PRECAUTIONS

EG0UP-01

1. Before working on the fuel system, disconnect the cable from the negative battery terminal.

2. When working on the fuel system, keep away from possible fire hazards and do not smoke.

3. Keep gasoline off rubber or leather parts.

4. Work on only one component group at a time to help avoid confusion between similar looking parts.

5. Keep work area clean to avoid contamination of the carburetor and components.

6. Be careful not to mix up or lose clips or springs.
