

# GEAR V 90

Castor oil based lubricant

For mechanical transmissions.

## TYPE OF USE

Castor oil based lubricant for screw and wheel rear differentials or crown made of bronze fitted on some old PEUGEOT cars (203/403), some WILLEME trucks or some light farm machines STAUB.

### CAUTION :

Do not use this oil as an engine oil.

Do not mix with any mineral or synthetic oil.

## PROPERTIES

STANDARD :                      API GL-2

Meets the car maker requirements.

High creaminess.

No damage on copper alloys.

High viscosity index.

Anti-oxydation, anti-wear properties.

## ADVANTAGES

Protects and increase the differential bronze crown life time.

Motul GEAR V can be mixed with any other castor oil based lubricant used for the same differentials.

## CARACTERISTICS

Viscosity grade	SAE J306	90
Viscosity at 100°C (212°F)	ASTM D445	17,5 mm <sup>2</sup> /s
