Catalogue 2006

**Driving pleasure
has never been
more reasonable!**

With Weitec Suspension Technology you've probably got Germany's most reasonable Suspension Kit Programme available to you – including excellent quality. Thanks to carefully selected materials, reliable partners and years of production know-how you're guaranteed constant high quality with the Sports Suspension Kits from Weitec.

COMPARE US...

- **Low price**
- **Approved and tested shock absorber technology**
- **High quality**
- **Huge application program**

Tips for working with the catalogue.

- It doesn't matter which product you are looking for in our catalogue, always pay attention to the remarks.
- The mentioned vehicle always refers to the basic model.
- If the vehicle doesn't agree to the application in: type, engine, year of manufacture the application is impossible.
- The given lowering rates must be understood as reference values. Due to vehicle specific tolerances and most various equipment variations no guarantee can be taken for the compliance.

The prices mentioned in this catalogue represent a suggestive retail price excl. VAT of the KW automotive GmbH

SPORT SPRINGS

F-Series Spring Kits Weitec Lowering Springs

WEITEC Sports Springs are manufactured in cold winding mode according to DIN ISO 9001. High-quality chrome silicon steel and hardening processes, as well as the final epoxide-coating ensure a long-lasting driving pleasure. Over 1000 spring kits in various versions are available, even for specialised cars:

- Discreet lowering from 20 – 45 mm (for use with stock or sports dampers (e.g. WEITEC GT Dampers))
- Wedge lowering e.g. 40/30 mm (for use with stock or sports dampers (e.g. WEITEC GT Dampers))
- Lowering Kits from 50mm for combination with shortened dampers.
- Wedge Lowering e.g. 60/40 (for use with shortened dampers (e.g. WEITEC GT Dampers))
- Lowering Springs on the front axle only for wedge lowering
- Most Spring Kits with TÜV approval and some applications with ABE
- Extreme Lowering up to 80mm (without TÜV approval, for competition and show only)

SPORT SUSPENSIONS

Ultra GT Sports Suspensions WEITEC complete Sports Suspension incl. springs and dampers

WEITEC ULTRA GT sports suspensions are high-quality products, yet have an unbelievable cost-performance ratio. For an optimal suspension tuning, WEITEC Sports Springs have been combined with WEITEC GT dampers.

- Complete suspension kit with sporty setting for more driving fun and safety.
- High-quality components ensure a long product life.
- GT dampers have pre-set damping characteristics
- Many different lowering possibilities from discreet to extreme, also for wedge style
- Many applications with grooved ring adjustable spring plates on the rear axle for fine-tuning your ride height.

SPORT DAMPERS

GT Dampening System Sport Dampers WEITEC sport dampers with fixed damping rates

The WEITEC GT sports dampers are manufactured in twin-tube design and have optimized sporty damping rates, which have been set by our engineers. The kits are available at a perfect cost performance ratio.

- Modern and high-quality components ensure a long product life
- High-capacity damping system with friction-optimized guidings.
- Dampers have been designed for combination with lowering springs
- Shortened piston-rod (rebound) to ensure sufficient pre-load of the spring
- Many dampers with grooved ring adjustable spring plates on the rear axle for fine-tuning your ride height

*= Rear Damper has grooved ring adjustable spring plates for height adjustment

COIL OVER SUSPENSIONS

HICON GT Coilover Kits

Height adjustable / fixed damping rates

The HICON GT Series features individual lowering in combination with sporty pre-set damping rates.

- Individual lowering within the TÜV approved lowering range
- Front axle and rear axle (if technically possible) with coilover adjustment
- Galvanized strut housings with additional coating for ideal corrosion prevention
- Complete solution with adjustable spring perches, race spring system and rubber stops with dust protection cover.
- High-performance twin-tube design damper with high-quality components for a long product life.

COIL OVER SUSPENSIONS

HICON TX "plus" Coilover Kits

Height adjustable / adjustable damping rates

The HICON TX "plus" coilover kits have been designed for sporty and ambitious drivers, who want to adjust the damping rates of their rides.

- Rebound adjustable without dismantling the dampers
- TX "plus" – state of the art technology for a long product life
- Reduced system-friction for effective rebound adjustment
- Individual lowering within the TÜV approved lowering range
- Front axle and rear axle (if technically possible) with coilover adjustment
- Galvanized strut housings with additional coating for ideal corrosion prevention
- Complete solution with adjustable spring perches, race spring system and rubber stops with dust protection cover.

COIL OVER/GROOVED RING
ADJUSTABLE KITS

HICON GTN Coilover/ grooved ring adjustable kits

Height adjustable/rear axle grooved ring adjustment/
fixed damping rates

WEITEC suspension strut with coilover adjustment on the front axle, GT sport dampers with grooved ring adjustable spring plates on the rear axle allow an economic access into the coilover world.

- Individual lowering within the TÜV approved lowering range
- Galvanized strut housings with additional coating for ideal corrosion prevention on the front axle
- GT dampers on the rear axle with grooved ring adjustable spring plates
- GT dampers with optimal pre-set damping characteristics
- High-performance twin-tube design damper with high-quality components for a long product life.

SPRING DISTANCE KITS

WEITEC spring distance kits include especially manufactured spacers, which are mounted in between the original springs or the spring retainer on the axle or chassis. By installing our SD-Kit you make your car more drivable on impassable terrain. A Weitec Spring Distance kit consists of 2 pcs (left + right) for one axle only.

WEITEC Distance Kits offer...

- More ground clearance
- Ideal for cars with trailers
- Improved access comfort
- Levelling system on permanent payload
- Improvement of the wheel clearance
- A sportive off road-look for the car

The WEITEC Spring Distance Kit will be delivered with German TÜV Certificate.

WEITEC is crossing new borders with the lift kit program.

Consisting of Spring Distance Kits and Ultra SD-Kits. This program is the ideal solution for car owners who uses their cars often, with trailers or on bad road conditions and would like to raise the height of their car. Hunters, farmers but also people of the construction industry appreciate a better ground clearance. More over the raise of an axle could result in an aligned car level during loading. Furthermore, the complete car lifting improves the access comfort. Even older people or persons with disabilities can access or exit more comfortably.

LIFT KITS

References

- 0 Technical-certificate not available on the day this catalogue was printed. Please check status with us.
- 1 These spring sets can be used only with shortened shock absorbers! We recommend our Weitec sport shock absorbers. See application list for front and rear shock absorbers.
- 2 Not for station wagon models (Estate/ Avant/ Turnier/ Variant/ Tmodell...).
- 3 Excluding models with 4 wheel steering.
- 4 Excluding four wheel drive models.
- 5 Use only sport springs in combination with M-Tech. Lowering will be 20mm less than listed.
- 6 Not for vehicles with EDC system (electronic damper control).
- 6a Excluding models with EDC-System, use our spring sets please.
- 7 Excluding models with High Ground Clearing System.
- 8 Excluding 16V/20V/24V and RSI.
- 8a Complete suspension kits are not for vehicles with 16V/20V/24V engines, please use our spring kit.
- 9 Spring kit consists of 2 front springs only.
- 10 Lowering will be less the series lowering rate by cars like GTI, GSI...
- 11 Excluding models with automatic level control, or automatic level system can be adjusted in accordance.
- 11a Complete suspension kits are excluding models with automatic level control, please use our springset.
- 12 At the rear axle of these cars, the car ride level has to be adjusted newly, after the lowering
- 13 This kit includes adjustable shock absorbers at front and rear axle.
- 14 For vehicles with series sports suspension please use our complete suspension kit only.
- 15 Please use original spring plates (VAG-part no. 1HQ412341) for vehicles from chassisnumber 31PO26436 on.
- 16 Excluding vehicles with series sports suspension.
- 16a Complete suspension kit only excluding vehicles with series sports suspension.
- 17 In the case of complete suspension systems: If there is no Weitec anti-roll bar attached to the original shock absorbers, the brake-hose brackets 6638965 and 6638964 must also be fitted. These can only be obtained from an authorised dealer.
- 18 Spring kit includes only 2 rear springs.
- 19 Excluding V-Tec models.
- 20 Very low ride height kit. This kit should only be fitted by specialists with attention being paid to wheel arch clearance. Ground clearance is minimal.
- 21 Not for vehicles with gas-powered engines.
- 22 Only for models with max. front axle weight up to 905 kg.
- 23 Only for models with max. front axle weight up to 850 kg.
- 24 Can only be supplied for as long as stocks last.
- 24a Complete suspension kits can only be supplied for as long as stocks last.
- 25 No German TUV Certificate will be delivered. Only a material certificate will be supplied.
- 26 For cars with max. rear axle weight over 915 kg the rear axle weight must be limited.
- 27 The front indicator lights on these vehicles must be relocated or replaced. These can be acquired from the manufacturer under order number 46 226 698.
- 28 Only for models up to chassis number 8D*X 199999
- 29 Only for models over chassis number 8D*X 200000
- 30 The quoted lowering can vary due to different original rubber springseats. Max lowering can be achieved by using single point rubber seats. Lowering can be adjusted by using different rubbers.
- 31 Listed lowering can vary up to +/- 25 mm due to different model weights.
- 32 VR6 only without air conditioning
- 33 Use only sports spring kits for models „B/C/L539, 53D, D53D“
- 34 Front shock absorber without fixing for anti roll bar
- 35 Listed lowering is in addition to series lowering.
- 36 Some models might need 2 extra spring plates (part number SPD1D). Please order wenn needed.
- 37 The inner diameter of the top of this spring is 81 mm.
- 37 Only for cars with long front end (e.g VW mini bus)
- 38 Excluding Kadett City
- 39 Excluding GTI/GLI/GTE/GLE/GLS.
- 40 Front axle height adjustable, rear axle consists of lowered sports springs and sports dampers.
- 41 Front axle height adjustable, rear axle adjustable sports dampers. Height adjustment is by Torsion bar.
- 42 In combination with original wheels and tyres, wheelspacers might be necessary.
- 43 In some cases 2 additional spring plates (VW order number 357 412 341 A) are needed for these vehicles for the front axle.
- 44 Only for models with 45 mm strut diameter outside [Can also be measured when fitted on the vehicle).
- 45 Only for models with 51 mm strut diameter outside [Can also be measured when fitted on the vehicle).
- 46 Special kit for vehicles with automatic level control.
- 47 Only for cars with removable strut inserts.
- 48 Only for vehicles up to chassis number 600 067.
- 49 Height adjustment at the rear axle over special bushes
- 50 Conical front springs
- 51 Cylindrical front springs
- 52 Excluding Cabrio/Convertible
- 53 Only for models with max. front axle weight up to 1020 kg.
- 53a Only for models with max. front axle weight over 1020 kg.
- 54 Excluding „full options“ models
- 55 Only „full options“ models
- 56 Excluding vehicles with Diesel engines.
- 57 Excluding automatic gear box
- 58 This kit does not include adjustable anti-sway bar links
- 59 Only for models with series sports suspension
- 60 In the case of „F“ models with ABS, the inscription on the original shock absorber must be checked! If this is „BC1D34700/700A or BC1F34700 on the front, the MAD27GT suspension must not be used.
- 61 Only for vehicles with chassis number over 600 068.
- 62 Only for models with chassis number up to -NV199999, -N1999999, -N599999
- 63 Only for models with chassis number up to P1000001, P5000001, P7000001.
- 64 Please use kit ALD17GT for 3.0V6 models with chassis number over 6183989.
- 65 Excluding models with pneumatic suspension
- 66 Excluding models with Rough Road Package
- 67 Excluding models with air conditioning
- 68 Excluding models with ABS
- 69 Only for models with automatic gear box
- 70 We advise checking the difference in the gaps between the wing/fender and the wheel. Because these vary it often seems that the actual lowering is not like that quoted.
- 71 Only for cars with a clamp diameter of 54,6 mm on the front axle
- 72 Only for cars with a clamp diameter of 49,8 mm on the front axle
- 73 Rear shock absorbers with eye-mounting.
- 74 Excluding S/ XR2/ XR3/ XR4 models.
- 75 Only for models with Chassisnumber from S000001 up to S100001
- 76 Please check original damper partnumber: OE-Nr: 95.AB-1808D-... then use kit for models build up to 08/ 95. OE-Nr: 96.AB-1808D-... then use kit for models build from 08/ 95 on.
- 77 Rear shock absorbers with fork-mounting.
- 78 Only for models with chassis number from S100001 onwards.
- 79 Excluding models with Esprit- or Avantgarde package or series sports suspension.
- 80 Only for 2- and 3- door versions.
- 81 Only for 4 and 5-door vehicles.
- 82 Only for 5-door version.
- 83 Only for models with Esprit- or Avantgarde package or series sports suspension.
- 84 Only for models with ABS.
- 85 Excluding turbo charged petrol engines.
- 86 Only for models with 2 torsion bars at the rear axle.
- 87 Only for models with 4 torsion bars at the rear axle
- 88 Not for cars with stabilizer on the rear axle
- 89 This kit does not include front shock absorbers. Only the lift kit and the rear axle shock absorbers will be supplied.
- 90 At the day this catalogue was printed, this kit was in development. Please check status with us.
- 91 Only for models with a right hand drive shaft of 32 or 42 mm diameter. Models with a 50 mm drive shaft should mount a special anti roll bar endlink kit. Please order with our part number KL001 if required.
- 92 Front axle spacers only for cars with 47mm damping tube diameter (DE)
- 93 Only for models from chassis number 1003027-, 5000001-, 6000001- on.
- 94 Front axle spacers only for cars with 51mm damping tube diameter (WEITEC)
- 95 Mounting these extremely low kits might result in too little spring travel. The use of absorbers which are not designed for this, will cause uncontrollable handling problems and might even result in mechanical failure.
- 96 Not for cars from 2004 onwards with standard 16" wheels
- 97 Excluding G 40 models.
- 98 Only for models with complete struts. For VW these struts can be used for all types including the models with removable inserts.
- 99 Please note that the lowering rate quoted in this catalogue will be reduced for models with original sports suspension.
- 100 Only for models up to 770 kg max front axle weight.
- 111 Wing / Fender edges might need to be modified for certain wheel/tyre combinations.
- 112 Because of the construction of the car the damping adjustment can only made when the damper is not mounted. By modifying the interior trim this problem can be avoided.
- 113 These springs / suspension units are supplied with general type approval.
- 114 The kit includes our special end links KL001
- 115 Only for cars up to 920 kg permissible front axle load
- 116 Only for vehicles with maximum front axle weight up to 780 kg.
- 117 Only for vehicles with maximum front axle weight from 780 kg.
- 118 On the front axle struts you need to measure the whole distance of the lower mounting drills. This distance has to be 57mm.
- 119 Only for models over 850 kg max front axle and rear axle weight.
- 120 On the front axle struts you need to measure the whole distance of the lower mounting drills. This distance has to be 72mm.
- 121 Extreme lowering might cause fouling of drive shaft and anti roll bar and/or chassis. Please use our special end links (KL001) and modify the chassis if necessary.
- 122 Models with foglights should have the lightbulbs removed to comply with TÜV regulations.
- 123 Not for models with special equipment like Camper or Westfalia equipment.

- 124 Distance between the mounting clips has to be 27mm (please check!)
- 125 Only for vehicles with cylindric rear springs.
- 126 Only for models up to 750 kg max. front axle weight.
- 127 Models with V6 engines are app. 20 mm lower. Therefore the quoted lowering will be reduced by 20 mm
- 128 Distance between the lower mounting holes of the front dampers should be 52 mm
- 129 Distance between the lower mounting holes of the front dampers should be 54 mm
- 130 Make sure the anti roll bar and the steering arms are at least 5 mm clear of the chassis. If not the chassis should be modified as necessary.
- 131 For models with ABS, the ABS-cable needs to be mounted separately.
- 132 Rear axle height adjustment is achieved by adjusting the torsion bars.
- 133 Front axle height adjustment is achieved by adjusting the torsion bars.
- 134 Distance between the mounting clips has to be 23mm (please check!)
- 135 On the front axle struts you need to measure the whole distance of the lower mounting drills. This distance has to be 59mm.
- 138 Excluding Long Wheel Base version.
- 139 Only for vehicles up to 2.5l Diesel or Turbo diesel engines.
- 140 ABE springkits: Wheel/tyre combinations which are not listed in the approval number for that car, need to be proved according § 19 of the StVZO. The same applies for models with tow bar used for towing purposes.
- 141 Max. front axle weight up to 980 kg, rear axle weight up to 1060 kg.
- 142 Exclusively for models with max front axle weight over 980 kg.
- 143 Only for models up to 960 kg max front axle weight.
- 144 Only for models over 961 kg max front axle weight.
- 146 Only for vehicles with front axle weight up to 1095 kg
- 147 Only for vehicles with front axle weight over 1096 kg
- 148 Only use the factory produced original spare parts for the rear axle shock absorbers
- 149 Only for vehicles with a chassis number up to 6K-X-399 999.
- 150 Only for vehicles with a chassis number from 6K-X-400 000 (Model 2000)
- 151 Only for vehicles with a short front-axle suspension leg housing, distance from centre of attachment hole to the top edge of the housing, 310-320 mm.
- 152 Only for vehicles with a long front-axle suspension leg housing, distance from centre of attachment hole to the top edge of the housing, 340-350mm.
- 153 When lowering, it is possible that the lower spring seat on the strut touches the inside of the wheel arch. This can be solved by altering the shape of the wheel arch.
- 154 For vehicles from model code „2000“
- 155 Not for vehicles with power steering.
- 156 Only for vehicles with ESP-system.
- 157 Only for vehicles with air condition and/ or 24V engine
- 158 Only for vehicles with power steering.
- 159 Only for vehicles with air condition and/ or automatic gear box..
- 160 Locating pin must be removed.
- 161 You need to use 15mm longer wheel screws.
- 162 You need to remove existing holding clips or screws on the brake discs or drums.
- 163 Only for vehicles with 43KW or 55KW petrol engine
- 164 Rear axle shock absorbers are not adjustable for dumping. Sport shock absorbers with a harder dumping characteristic will be supplied.
- 165 Only for vehicles with maximum permissible front axle weight up to 789 kg.
- 166 Not suitable for vehicles with extended axle weight.
- 167 Only for vehicles with barrel springs on the rear axle.
