

A better ride for your money

WEITTEC[®]

FAHRWERKTECHNIK

QUICKFINDER

QUICKFINDER

This is just a small application out of the vast Weitec suspension range. The Weitec Quickfinder is a great overview of the complete program of Weitec, and it is immediately visible which Weitec product is available for the car in question. Prices dependant on application.

CONTENTS

Spring Kits F-Series

Weitec Lowering Springs

WEITEC Sports Springs are manufactured in cold winding mode according to DIN ISO 9001. High-quality chrome silicon steel and hardening processes, as well as the final epoxide-coating ensure a long-lasting driving pleasure. Over 1000 spring kits in various versions are available, even for specialised cars:

- Discreet lowering from 20 - 45 mm (for use with stock or sports dampers (e.g. WEITEC GT Dampers))
- Wedge lowering e.g. 40/30 mm (for use with stock or sports dampers (e.g. WEITEC GT Dampers))
- Lowering Kits from 50mm for combination with shortened dampers.
- Wedge Lowering e.g. 60/40 (for use with shortened dampers (e.g. WEITEC GT Dampers))
- Lowering Springs on the front axle only for wedge lowering
- Most Spring Kits with TÜV approval and some applications with ABE
- Extreme Lowering up to 80mm (without TÜV approval, for competition and show only)

e.g. for
VW Corrado

Ultra GT sports suspensions

WEITEC complete sports suspension including springs and dampers

WEITEC ULTRA GT sports suspensions are high-quality products, yet have an unbelievable cost-performance ratio. For an optimal suspension tuning, WEITEC Sports Springs have been combined with WEITEC GT dampers.

- Complete suspension kit with sporty setting for more driving fun and safety.
- High-quality components ensure a long product life.
- GT dampers have pre-set damping characteristics
- Many different lowering possibilities from discreet to extreme, also for wedge style
- Many applications with grooved ring adjustable spring plates on the rear axle for fine-tuning your ride height.

SPRING DISTANCE KITS

e.g. for Audi A3

WEITEC spring distance kits include especially manufactured spacers, which are mounted in between the original springs or the spring retainer on the axle or chassis. By installing our SD-Kit you make your car more drivable on impassable terrain. A Weitec Spring Distance kit consists of 2 pcs (left + right) for one axle only.

Prices differ because of different lowering solutions which are available for spring kits and sport suspensions. Coilover prices differ because of the differences between HICON GT/TX (coilover system which is mainly height adjustable on the rear axle) and HICON GTN which is the economic solution with a groove adjustable spring perch on the rear axle shock, which allows 5 different height positions. Also prices can differ because of different damping options HICON GT/GTN with a fixed damping set up and HICON TX with hardness adjustment options. Please contact your Weitec dealer, or call the Weitec hotline to get more detailed informations.

HICON GT Coilover Kits

Height adjustable / fixed damping rates

The HICON GT Series features individual lowering in combination with sporty pre-set damping rates.

- Individual lowering within the TÜV approved lowering range
- Front axle and rear axle (if technically possible) with coilover adjustment
- Galvanized strut housings with additional coating for ideal corrosion prevention
- Complete solution with adjustable spring perches, race spring system and rubber stops with dust protection cover.
- High-performance twin-tube design damper with high-quality components for a long product life.

e.g. for
Corsa B

HICON TX "plus" Coilover Kits

Height adjustable / adjustable damping rates

The HICON TX "plus" coilover kits have been designed for sporty and ambitious drivers, who want to adjust the damping rates of their rides.

- Rebound adjustable without dismantling the dampers
- TX "plus" – state of the art technology for a long product life
- Reduced system-friction for effective rebound adjustment
- Individual lowering within the TÜV approved lowering range
- Front axle and rear axle (if technically possible) with coilover adjustment
- Galvanized strut housings with additional coating for ideal corrosion prevention
- Complete solution with adjustable spring perches, race spring system and rubber stops with dust protection cover.

e.g. for
Audi A4

HICON GTN Coilover/ grooved ring adjustable kits

Height adjustable /
rear axle grooved ring adjustment /
fixed damping rates

WEITEC suspension strut with coilover adjustment on the front axle, GT sport dampers with grooved ring adjustable spring plates on the rear axle allow an economic access into the coilover world.

- Individual lowering within the TÜV approved lowering range
- Galvanized strut housings with additional coating for ideal corrosion prevention on the front axle
- GT dampers on the rear axle with grooved ring adjustable spring plates
- GT dampers with optimal pre-set damping characteristics
- High-performance twin-tube design damper with high-quality components for a long product life.

e.g. for
Corsa B
