

Steering

POWER STEERING SYSTEM HYDRAULIC BLEED

1. Remove cap from reservoir and fill reservoir with Dexron IID or equivalent power steering fluid.

2. Release rubber cover from fuel cut - off solenoid terminal nut.
3. Remove nut securing leads to fuel cut - off solenoid.
4. Disconnect 2 leads.
5. Crank engine for 5 seconds to prime pump.
6. Top - up reservoir.
7. Connect 2 leads to fuel cut - off solenoid, fit and tighten nut; fit rubber cover.
8. Start and run engine for 30 seconds then turn steering wheel from lock to lock, one turn each way.

CAUTION: Do not hold steering at full lock for longer than 5 seconds.

9. Allow engine to idle for a further 30 seconds.
10. Stop engine.
11. Top - up reservoir; fit filler cap.
