

Sunroof

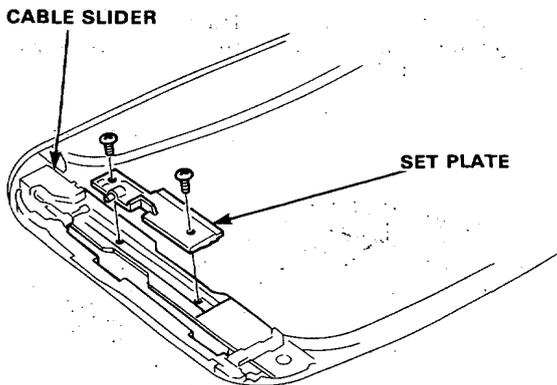

Glass and Sunshade Replacement

1. Tilt-up the sliding glass and open the sunshade.
2. Slide the drain channel to the backward by removing the mounting screws.
3. Remove the glass mounting screws, then lift off the sliding glass from the mounting bracket.

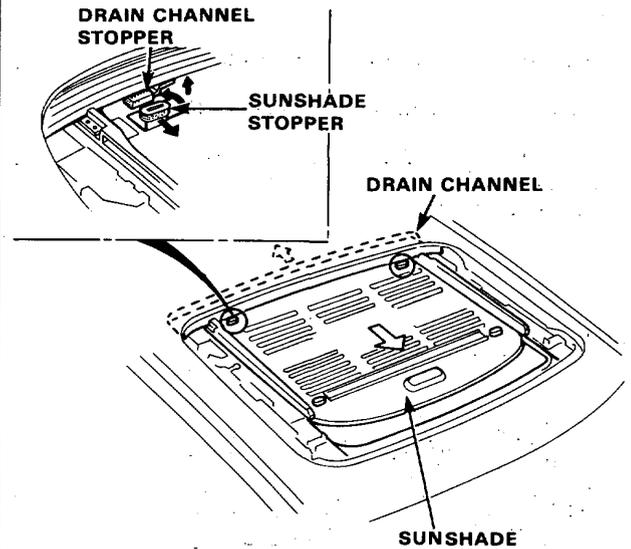

GLASS MOUNTING SCREWS
Use TORX® T20

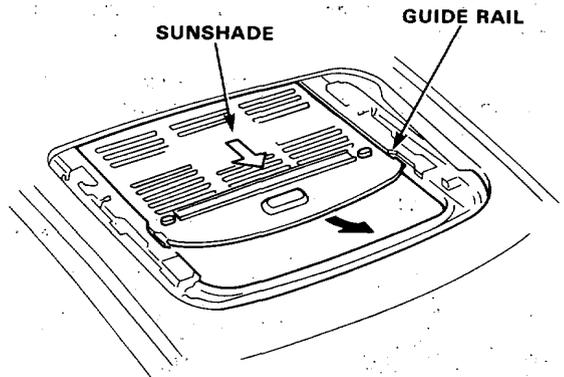

4. Remove the screws, then remove the set plates.
NOTE: Slide the cable slider to the backward.

5. Slide the sunshade fully to the forward by lifting the drain channel stoppers.

6. Pull out and remove the sunshade from the cut-out of the guide rails.

7. To attach, follow the steps described for removal in reverse.

NOTE:

- Check that the sunshade moves smoothly.
- After attachment, check the glass height and alignment.
- Check for water and air leaks.
