# Interior Light (With Security Alarm System)
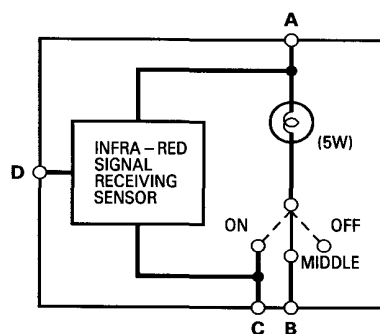

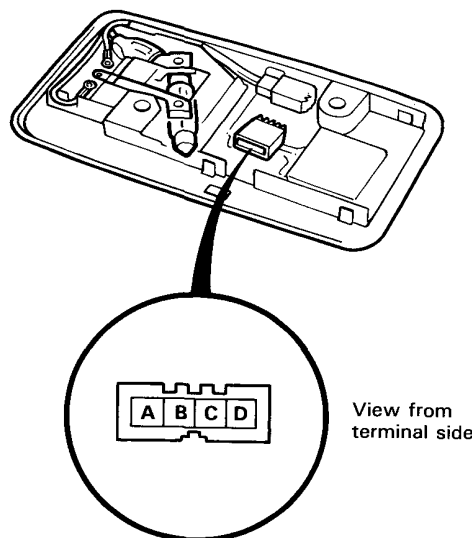

Test/Replacement

NOTE:
- When replacing the bulb, only take the lens off from the housing, and replace it.
- To test the infra-red signal receiving sensor, see page 16-15.

1. Turn the switch OFF.

2. Pry off the lens.

3. Remove the two nuts and disconnect the 4-P connector, then remove the housing.

4. Check for continuity between the terminals in each switch position according to the table.
