

Preparation of Work

Electrical (cont'd)

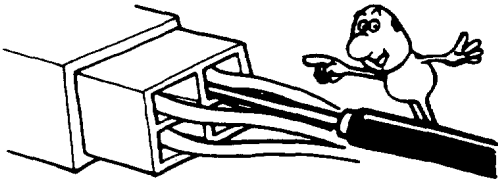

- After routing, check that the wire harnesses are not twisted or kinked.

- Wire harnesses should be routed so that they are not pulled taut, slackened excessively, pinched, or interfering with adjacent or surrounding parts in all steering positions.

- When using the Service Tester, follow the manufacturer's instructions and those described in the Shop Manual.

- Do drop parts.

- Rust is the enemy of all finished surfaces. Before connecting connectors and couplers, check the terminals and remove, if any, rust using a fine sand paper or emery cloth.
