## SYSTEM DESCRIPTION

### 1. ELECTRICAL BACK DOOR OUTSIDE HANDLE SYSTEM DESCRIPTION

- (a) This system is provided on RX330 with a switch on the back door outside handle to open the back door electrically.
- (b) On models without a power back door, this system is controlled by the body ECU. On models with a power back door, it is controlled by the power back door ECU.
- (c) This system activates when the following two conditions are met:
  - (1) Vehicle speed is less than 5 km/h (3 mph).
  - (2) An unlock signal is input into the body ECU (models without power back door) / power back door ECU (models with power back door) from the respective door in accordance with the wireless door lock remote control, key, or door lock control.
