- 12

TROUBLESHOOTING

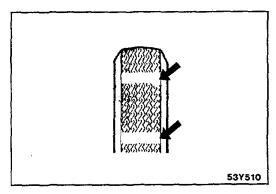

N22EA-

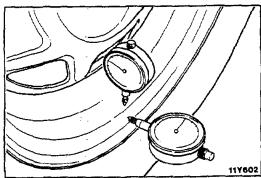

Symptom	 Probable cause	Remedy
Rapid wear at shoulders	Under- inflation or lack of rotation	Adjust the tire pressure
Rapid wear at center	Over- inflation or lack of rotation	
Cracked treads	Under-inflation	
Wear on one side	Excessive camber	Inspect the camber
Feathered edge	Incorrect	Adjust the toe-in
Bald spots	Unbalanced wheel	Adjust the imbalanced wheels
Scalloped wear	Lack of rotation of tires or worn or out-of- alignment suspension	Rotate the tires Inspect the front suspension alignment

SERVICE ADJUSTMENT PROCEDURES CHECKING TIRE INFLATION PRESSURE N22FDAA

Check the inflation pressure of the tires.

If it is not within the standard value, make the necessary adjustment.

CHECKING TIRE WEAR

N22FBAB

Measure the tread depth of tires

Limit: 1.6 mm (.06 in.)

If the remaining tread depth is less than the limit, replace the

NOTE

When the tread depth of tires is reduced to 1.6 mm (.06 in.) or less, wear indicators will appear.

CHECKING WHEEL RUNOUT

N22FCA9

N22GA-

Jack up the vehicle so that the wheels are clear of the floor. While slowly turning the wheel, measure wheel runout with a dial indicator.

Limit: Radial 2 mm (.08 in.)

Lateral 2 mm (.08 in.)

If wheel runout exceeds the limit, replace the wheel.

WHEELS AND TIRES

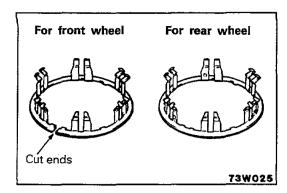

REMOVAL AND INSTALLATION Removal steps 1. Center cap 2. Hub nut 3. Center cap holder 4. Balance weight 5. Steel wheel 6. Tire 100-120 Nm 72-87 ft.lbs.

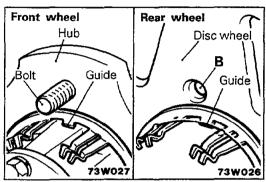

NOTE NOTE

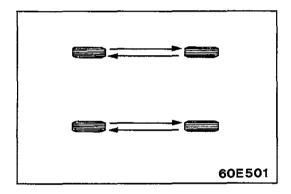

Reverse the removal procedures to reinstall.

→ ★ : Refer to "Service Points of Installation".

1180114

SERVICE POINTS OF INSTALLATION

N22GDAA

3. INSTALLATION OF CENTER CAP HOLDER

NOTE

Note that the center cap attaching metal fittings for the front and rear wheels are different in shape.

- (1) Align any of the guides (three projections) inside the fitting with a bolt position, and install the fitting on the hub, while using care to make sure that the cut ends are not opened. (Front wheel)
- (2) Align any of the guides (three projections) inside the fitting with the position of a wheel attaching hole (B) and install the fitting properly to the disc wheel from inside the disc wheel. (Rear wheel)

WHEEL ROTATION

N22GE-

Rotate the wheels in order to equalize tire wear in the patterns illustrated.

TIRE CHAINS AND SNOW TIRES

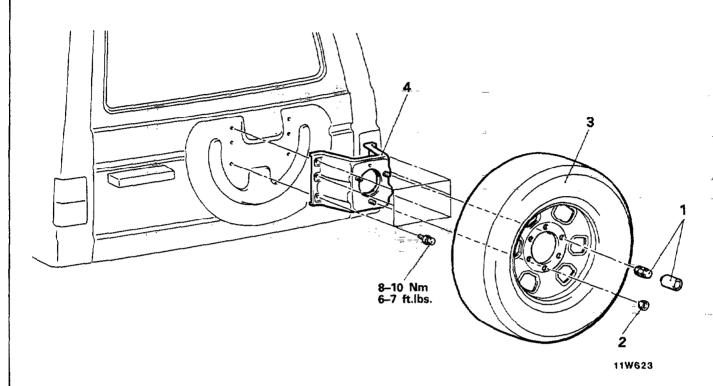

N22GGAB

- 1. Use tire chains only on rear wheels. Do not use tire chain on front wheels.
- 2. When using snow tires, use them on all four wheels for maneuverability and safety.

SPARE TIRE CARRIER

REMOVAL AND INSTALLATION

N22HA-

Removal steps

- 1. Spare tire lock cylinder
- 2. Hub nut
- 3. Spare tire
- → 4. Spare tire bracket

NOTE

- (1) Reverse the removal procedures to reinstall.
- (2) 🔷 : Refer to "Service Points of Installation".

SERVICE POINTS OF INSTALLATION

N22HDAC

4. APPLICATION OF SEALANT TO SPARE TIRE BRACKET

Apply a coat of the specified sealant around the spare tire bracket mounting bolts.

Specified sealant: 3M ART Part No. 8634 or equivalent
