

Genuine Subaru Parts MEANS BUSINESS!

Genuine SUBARU ENGINE COMPONENTS

...offer superior fit, reliability and value.

Restoring an engine's performance with Genuine Subaru Engine Components

is a smart decision. Our new components are far more reliable—and precise—than rebuilt alternatives. Rebuilt engine components are based on existing parts that have failed in service—for example, a rebuilt cylinder head from a core broker or junkyard. Why take chances with inferior aftermarket parts that not only don't meet the exacting standards met by Genuine Subaru Parts but that actually may fail again?

A wide selection of readily available parts

Whether you need an all-new replacement short block, oil or water pump, a clutch disk, camshaft or cam belt or other Genuine Subaru Engine Component, your local authorized Subaru dealer has a ready supply. You can order only those parts you need, restore an

engine to like-new performance and offer your customers faster turnaround.

Save time with pre-assembled cylinder heads

You can save on labor on your engine work by using pre-assembled Genuine Subaru Cylinder Heads. Each factory-new assembly is fully leak-tested and comes complete with all-new parts, including the cylinder head itself, valves, springs, seals and retainers. Plus, each assembly, like all Genuine Subaru engine components, is fully warranted and ready for installation. In fact, these components can save you time and money during installation compared to non-genuine parts that may require a force-fit. With Subaru Genuine Parts, you know you're getting the best—whether you're replacing a component or rebuilding an entire engine.

Thank you for your interest in Genuine Subaru Parts.

The Subaru Parts Program offers the largest inventory of these OE-quality Subaru parts available anywhere. Pricing information for the following products is available through your authorized Subaru dealer. Please call for complete details.
