

## HYDRAULIC CLUTCH PEDAL SYSTEM

Clutch

### 3. Hydraulic Clutch Pedal System

#### A: CONSTRUCTION

- The hydraulic clutch pedal is connected to the master cylinder via a rod.
- The clutch pedal and brake pedal are mounted on the same bracket.

- |   |                                    |
|---|------------------------------------|
| (1) Clutch switch (With cruise control) | (5) Brake and clutch pedal bracket |
| (2) Clutch switch (Starter interlock)   | (6) Brake pedal                    |
| (3) Rod                                 | (7) Clutch pedal                   |
| (4) Lever                               |                                    |

CL-6

## HYDRAULIC CLUTCH PEDAL SYSTEM

Clutch

- The clutch pedal has a mechanism that reduces the initial force required to depress the clutch pedal.

B4H2188A

- |   |   |
|---|---|
| (1) Clutch switch (Starter interlock)   | (3) Initial pedal effort reducing mechanism |
| (2) Clutch switch (With cruise control) | (4) Clutch pedal                            |

### B: OPERATION

The clutch pedal used with the hydraulic clutch control system is similar to that for a mechanical clutch control system except that it has a spring that returns it to the original position.
