Bald eagle

(Haliaeetus leucocephalus)

The bald eagle is one of the larger types of eagle, its body measuring between 76 and 92cm, and its wingspan can reach more than two meters. Its dark brown body and white head and shoulders are the bald eagle's most distinguishing features. The bald eagle is also the national bird of the United States of America. This, along with its striking appearance, makes it a very well-known bird in the United States. Bald eagles can be found mostly in coastal areas of the North American continent, along the shores, rivers, and lakes. The bald eagle is protected under the Migratory Bird Treaty Act, and the Bald Eagle Protection Act, enacted in 1918 and 1940 respectively. Many North American indigenous people regard the bald eagle as a sacred creature, and the birds or their feathers feature in many rituals and traditional costumes. In addition, the bald eagle is also regarded as a symbol of wisdom, power, and strength, and a sign of peace and friendship.

This papercraft is about one half the size of a real bald eagle.

Assembly Instructions

1) Carefully cut out the parts.

2) Make mountain folds and valley folds along the dotted lines, as indicated by the directions.

3) Assemble the parts in the order shown by the numbers on the glue tabs. (Read the assembly instruction for more information.)

4) Attach the parts in order. (Read the assembly instruction for more information.)

5) Your Paper craft model is finished.

Tools

Scissors, glue (We recommend craft glue.)

Caution

Glue, scissors and other tools may be dangerous to young children so be sure to keep them out of the reach of young children.

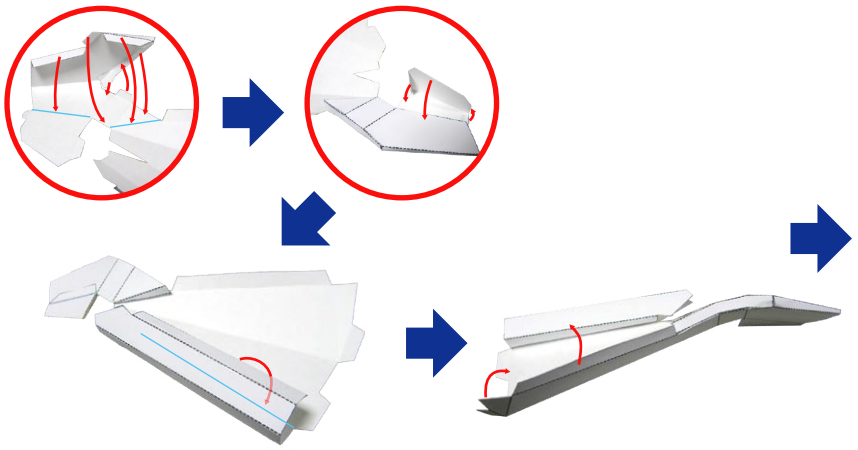
Assemble 39 and 40, and assemble the wing frame.

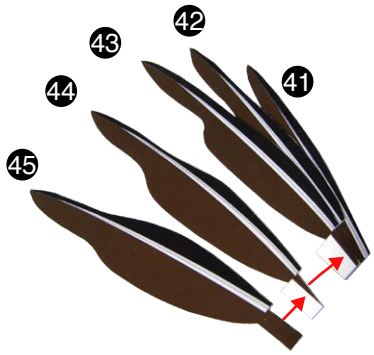
39 (40)



Completed the wing frame

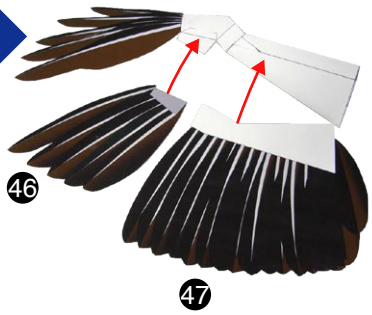
Assemble 40 in the same way so that both parts are symmetrical.

Glue 41 to 45 together, and insert them into the wing frame. Then, attach parts 46, 47, 48, 49 and 50.

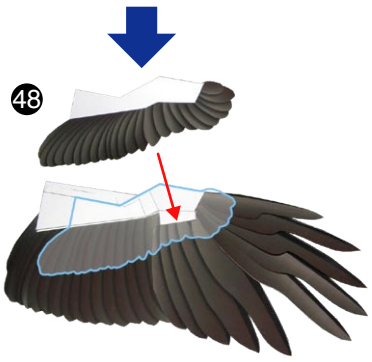


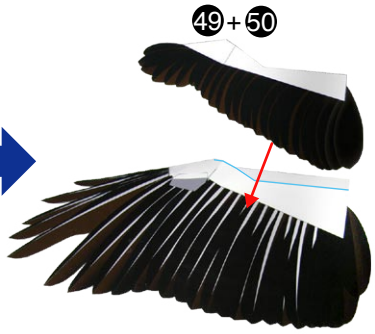
41 to 45

Wing frame
(39 is pictured)



Attach the parts to look like this.

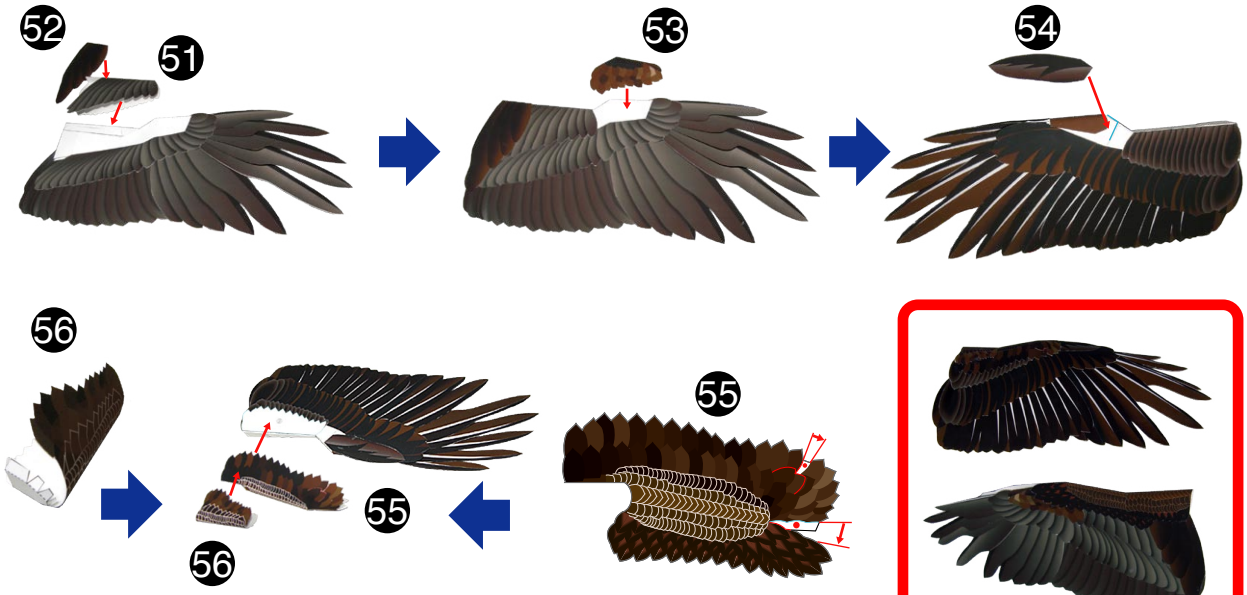




Assemble 57 to 66 in the same way so that both parts are symmetrical.

Canon ® is a registered trademark of Canon Inc. © Canon Inc. © Ikuo Anazawa

Assemble 51 to 56, and the wings are complete.



Assemble 67 to 72 in the same way so that both parts are symmetrical.

Completed wings

Assemble 27 to 38, and make the legs.

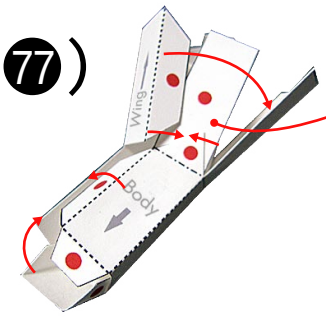
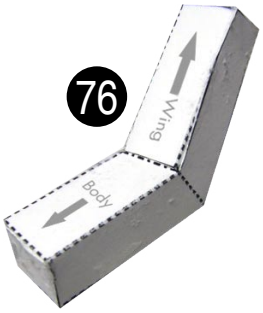
Assemble ㊻ and ㊼, and make the body-wing connector.

㊻ (㊼)



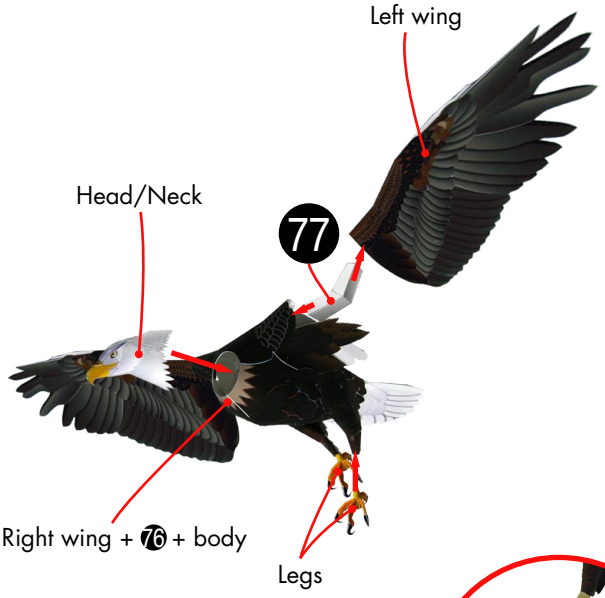
Stabilizing parts

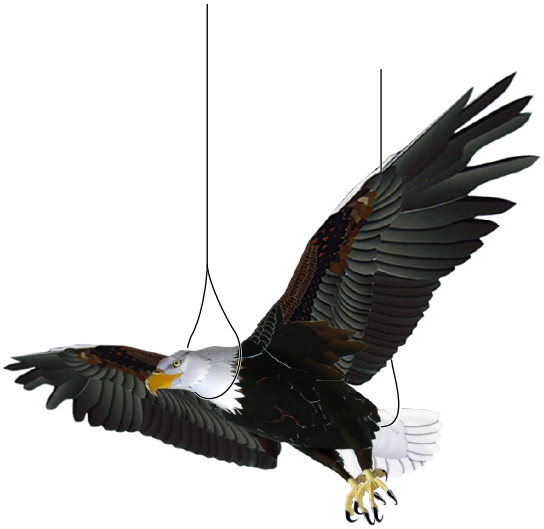


For the right side

For the left side

㊻ is for the right wing, and ㊼ is for the left wing.
Put stabilizing parts in each of them, and attach.
Assemble them so they are symmetrical on both sides.





*As shown in the picture, hang it from the ceiling with fishing wire or string.

㊸

*Assemble ㊸, and perch the eagle on it with both feet.

*Fasten both legs onto the pedestal, for greater stability.

*Balance the eagle on 3 points - its two feet and tail.

Complete!
