

Multiplex Communication System (Body Control) (LHD)

Wiring diagram for the 2017 Honda Civic 1.8L VTEC 1800cc engine, showing the electrical system for the main body ECU, horn, headlights, and DRL. The diagram includes components like the 10A ECU-IG1, 10A ECU-ACC, 20A H-LP HI MAIN, 7.5A DRL, and various relays and switches. It also shows the connection to the H117 Junction Connector and H119 Junction Connector.

Legend:

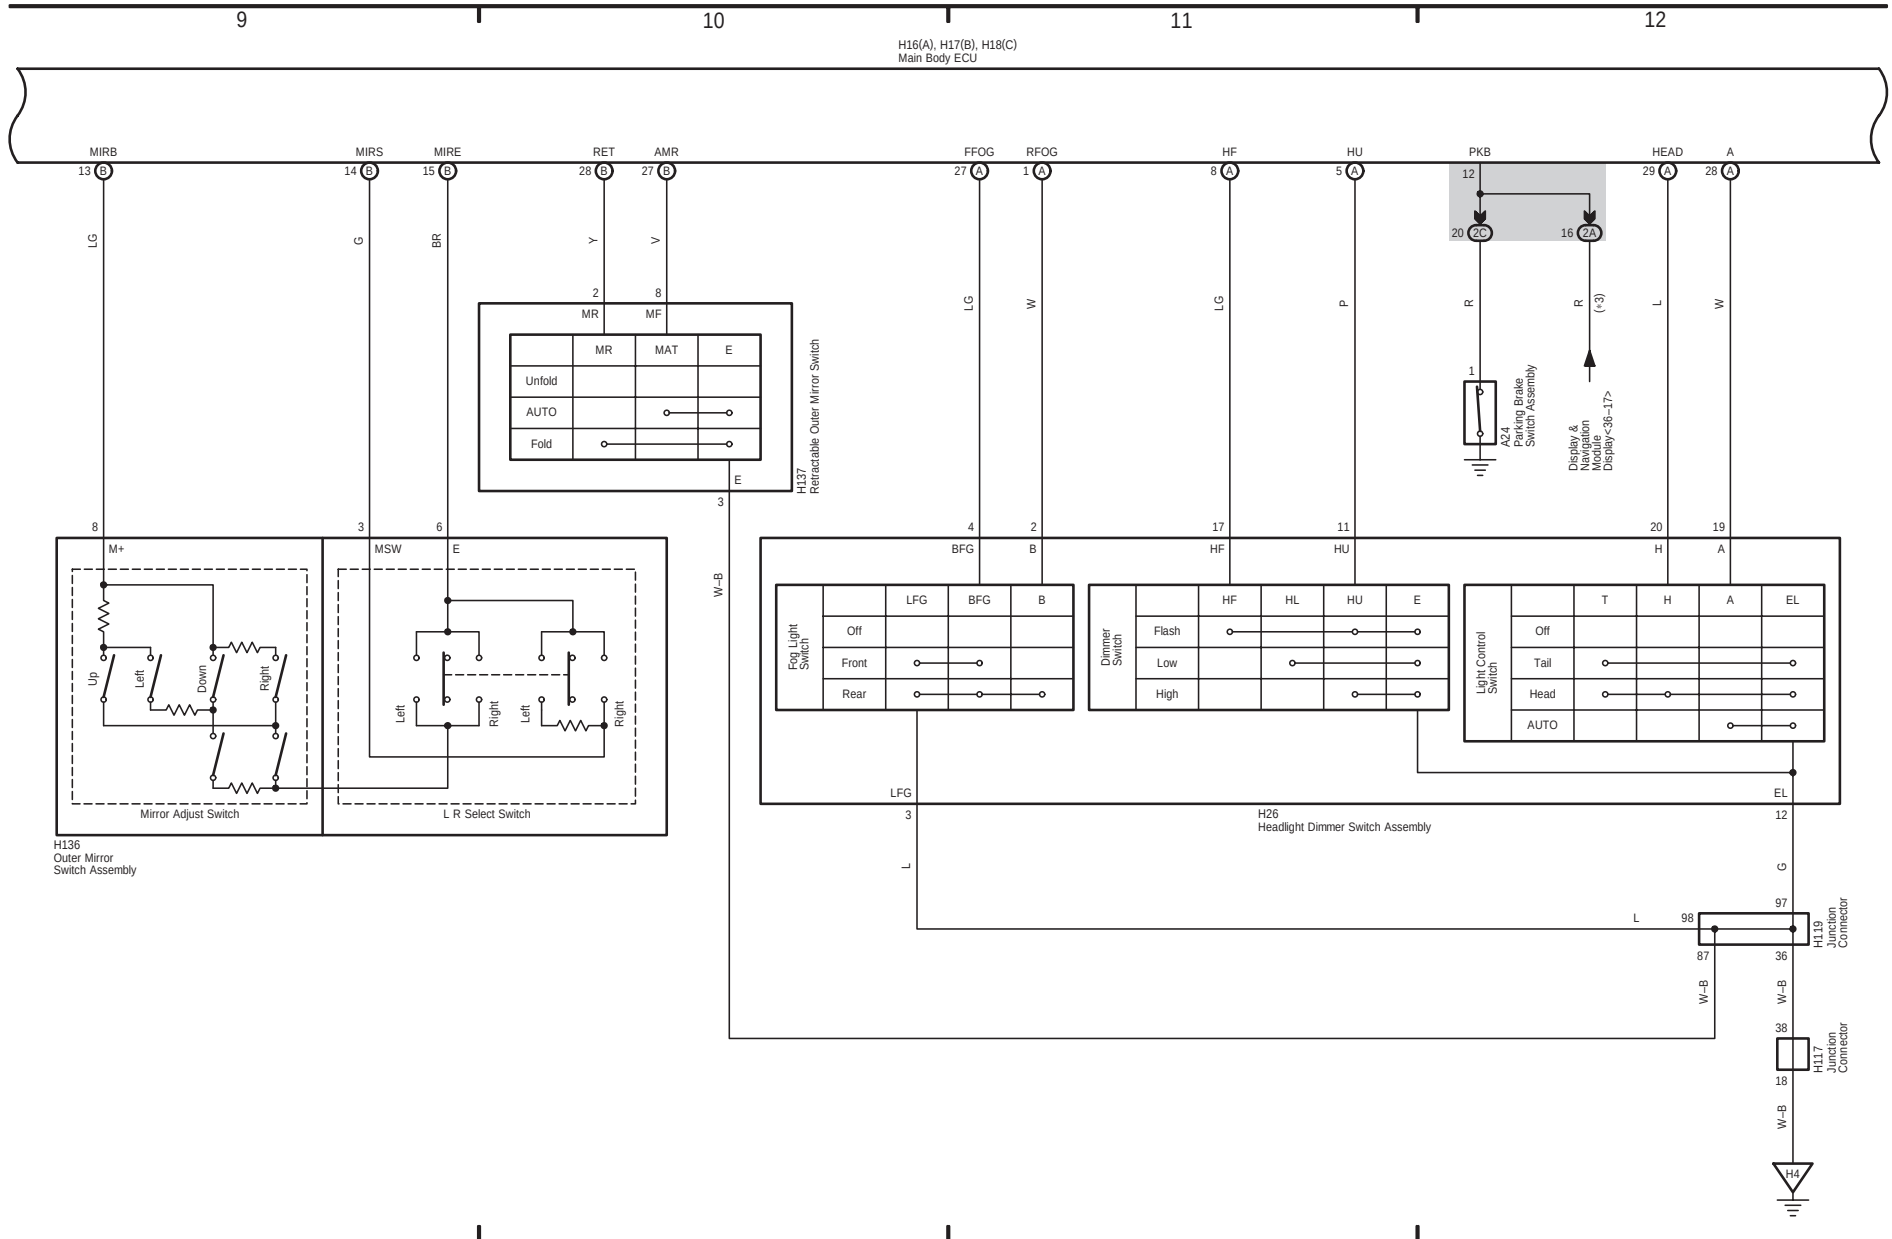

- * 1 : LED Headlight
- * 2 : Halogen Headlight

Wiring Details:

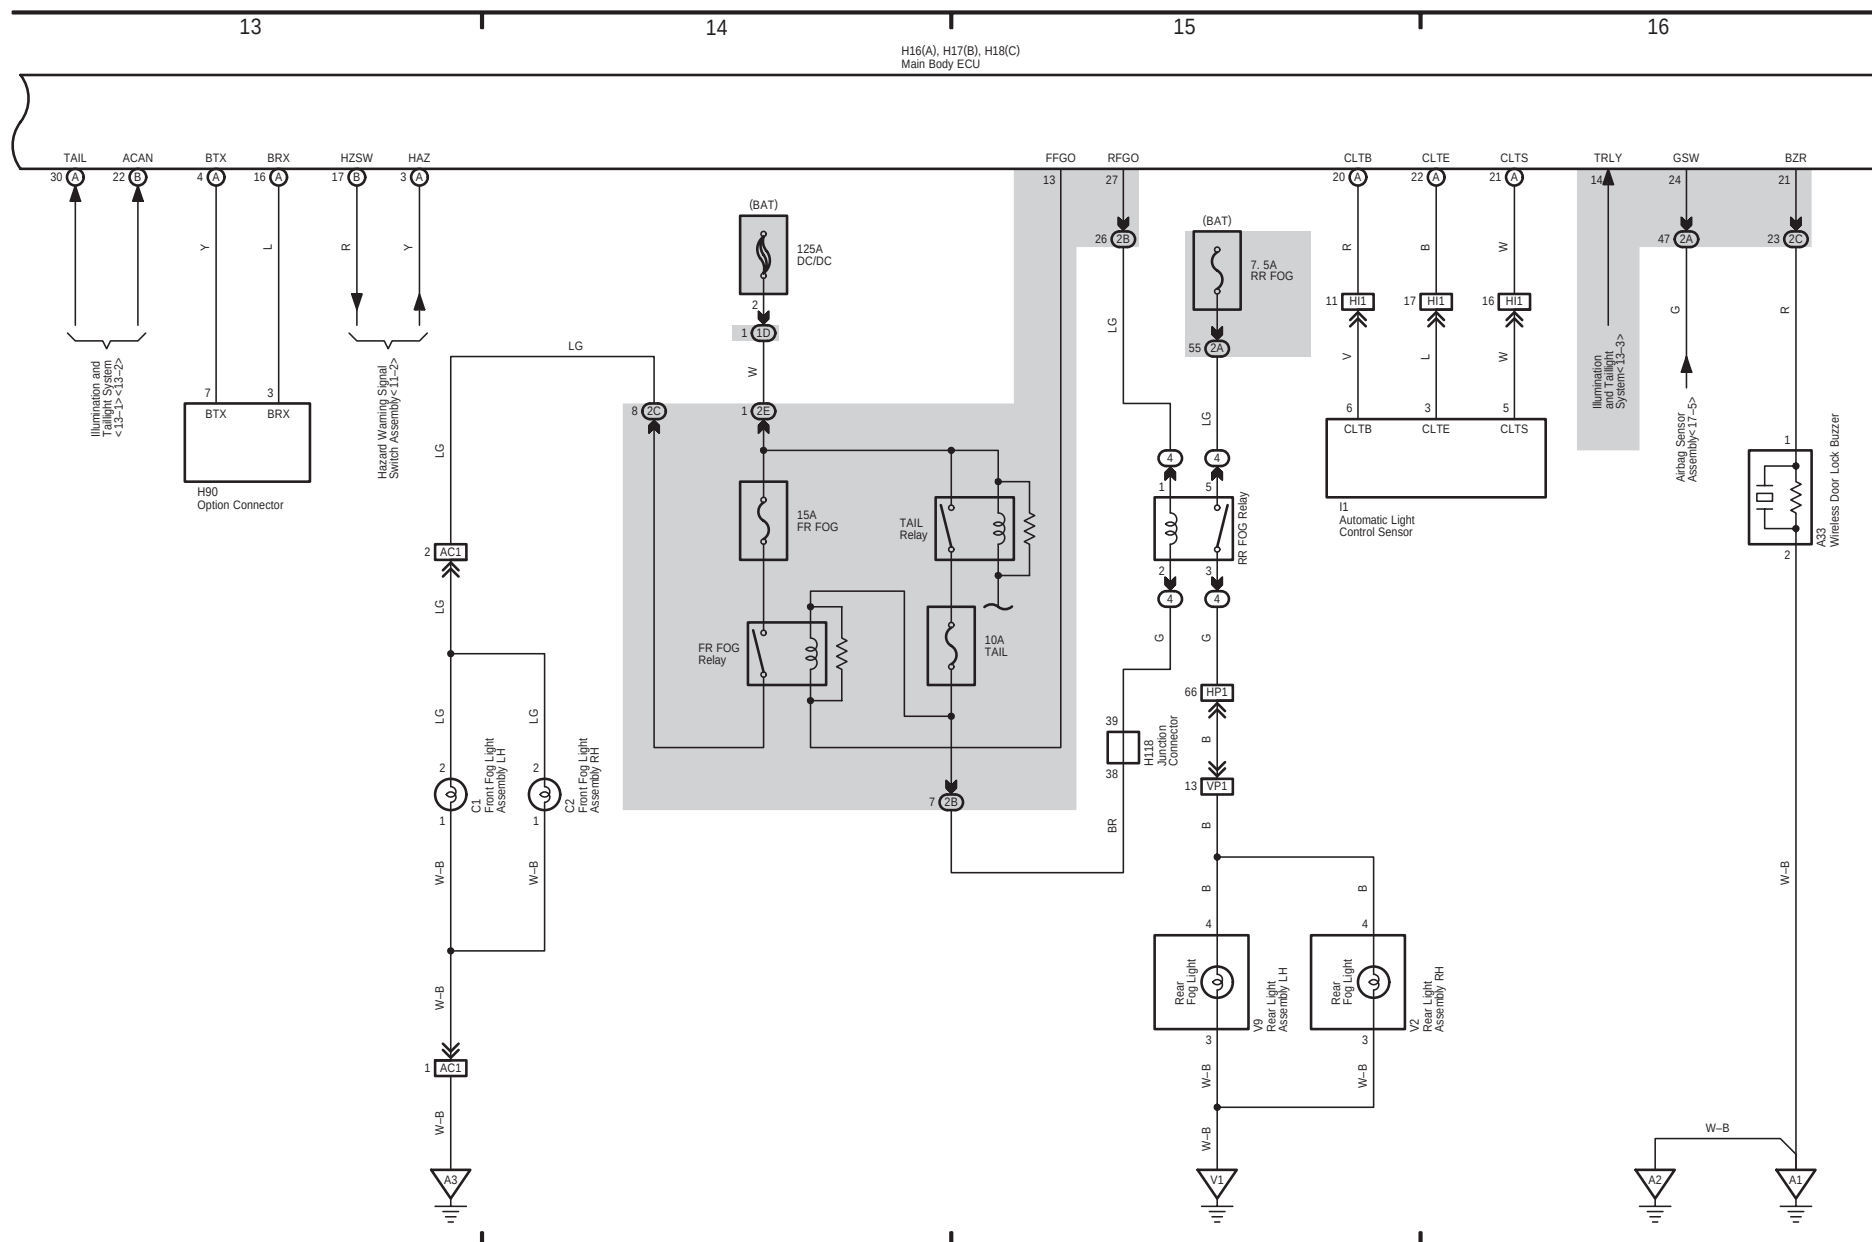

- ECU Connections:** The H16(A), H17(B), and H18(C) Main Body ECU is connected to the 10A ECU-IG1 (NO. 1) and 10A ECU-ACC. The ACC line is connected to the 20A H-LP HI MAIN.
- Horn:** The HORN line from the ECU is connected to the Horn Switch, which is controlled by the 24(F) Steering Pad Switch.
- Headlights:** The H16(A) and H17(B) lines are connected to the 10A H-LP LH HI and 10A H-LP RH HI relays. The H18(C) line is connected to the 7.5A DRL relay.
- DRL (Daytime Running Light):** The DRL line from the ECU is connected to the 7.5A DRL relay, which is controlled by the 24(F) Steering Pad Switch.
- Relays and Switches:** The diagram includes a 20A H-LP HI MAIN relay, a 7.5A DRL relay, and a 24(F) Steering Pad Switch.
- Connectors:** The H117 Junction Connector and H119 Junction Connector are shown, connecting the main body ECU to the headlight and DRL systems.
