

■ LIGHT TURN-OFF SYSTEM

The light turn-off system is used to prevent the driver from leaving the vehicle with the headlights or front fog lights on.

- This system has the following functions:

Function	Outline
Turn-off	When all of the following conditions are met, the headlights or front fog lights turn off. • Power source changes from ACC, or IG-ON to OFF. • The light control switch is HEAD or AUTO. • The front fog light switch is ON. (Only for front fog lights) • The driver door is opened.
