

Combination Meter

An Optitron meter with the dial in three dimensions is used. The dial has a metal-toned coating to provide an image of high quality.

- The multi-information display is used on the combination meter to display various information.
- Use of the SPEED indicator and TACH indicator that illuminate when the vehicle speed or engine speed reach the respective speed set by the driver make the drive more fun.

Multi-information Display

Six modes can be displayed: cruise information, warning, dynamic radar cruise display, LEXUS parking assist-sensor display, multi-switch, and diagnosis.

- In the cruise information mode, the display can be switched by using the DISP switch on the steering wheel.
- In the multi-switch mode, the display can show the following five functions through combination with the satellite switch: Intrusion Sensor ON/OFF, Sonar ON/OFF, AFS ON/OFF, SPEED Indicator ON/OFF, and TACH Indicator ON/OFF.
