*6 : AWD

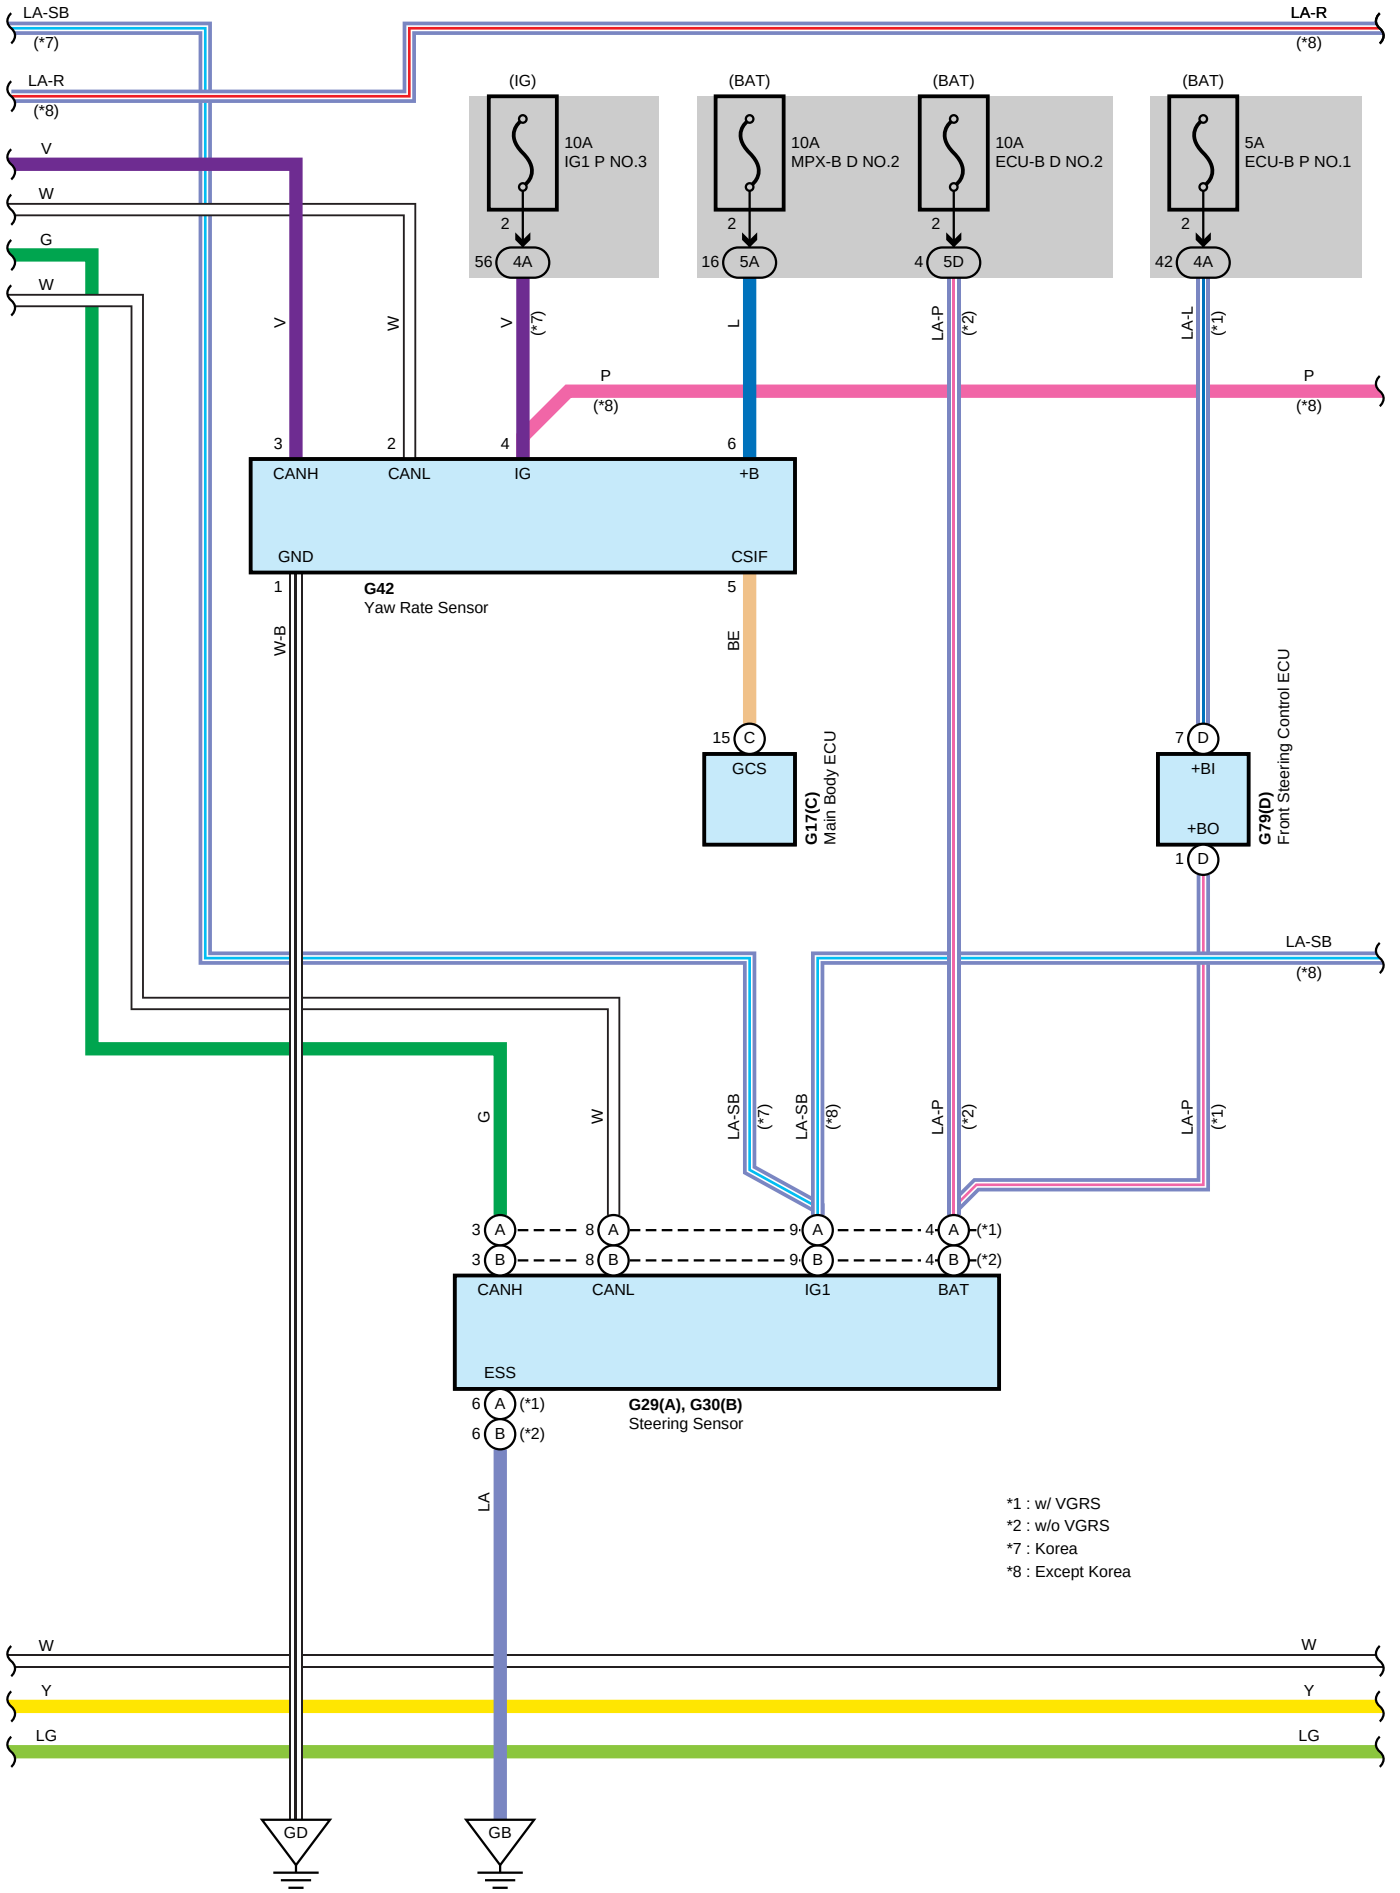

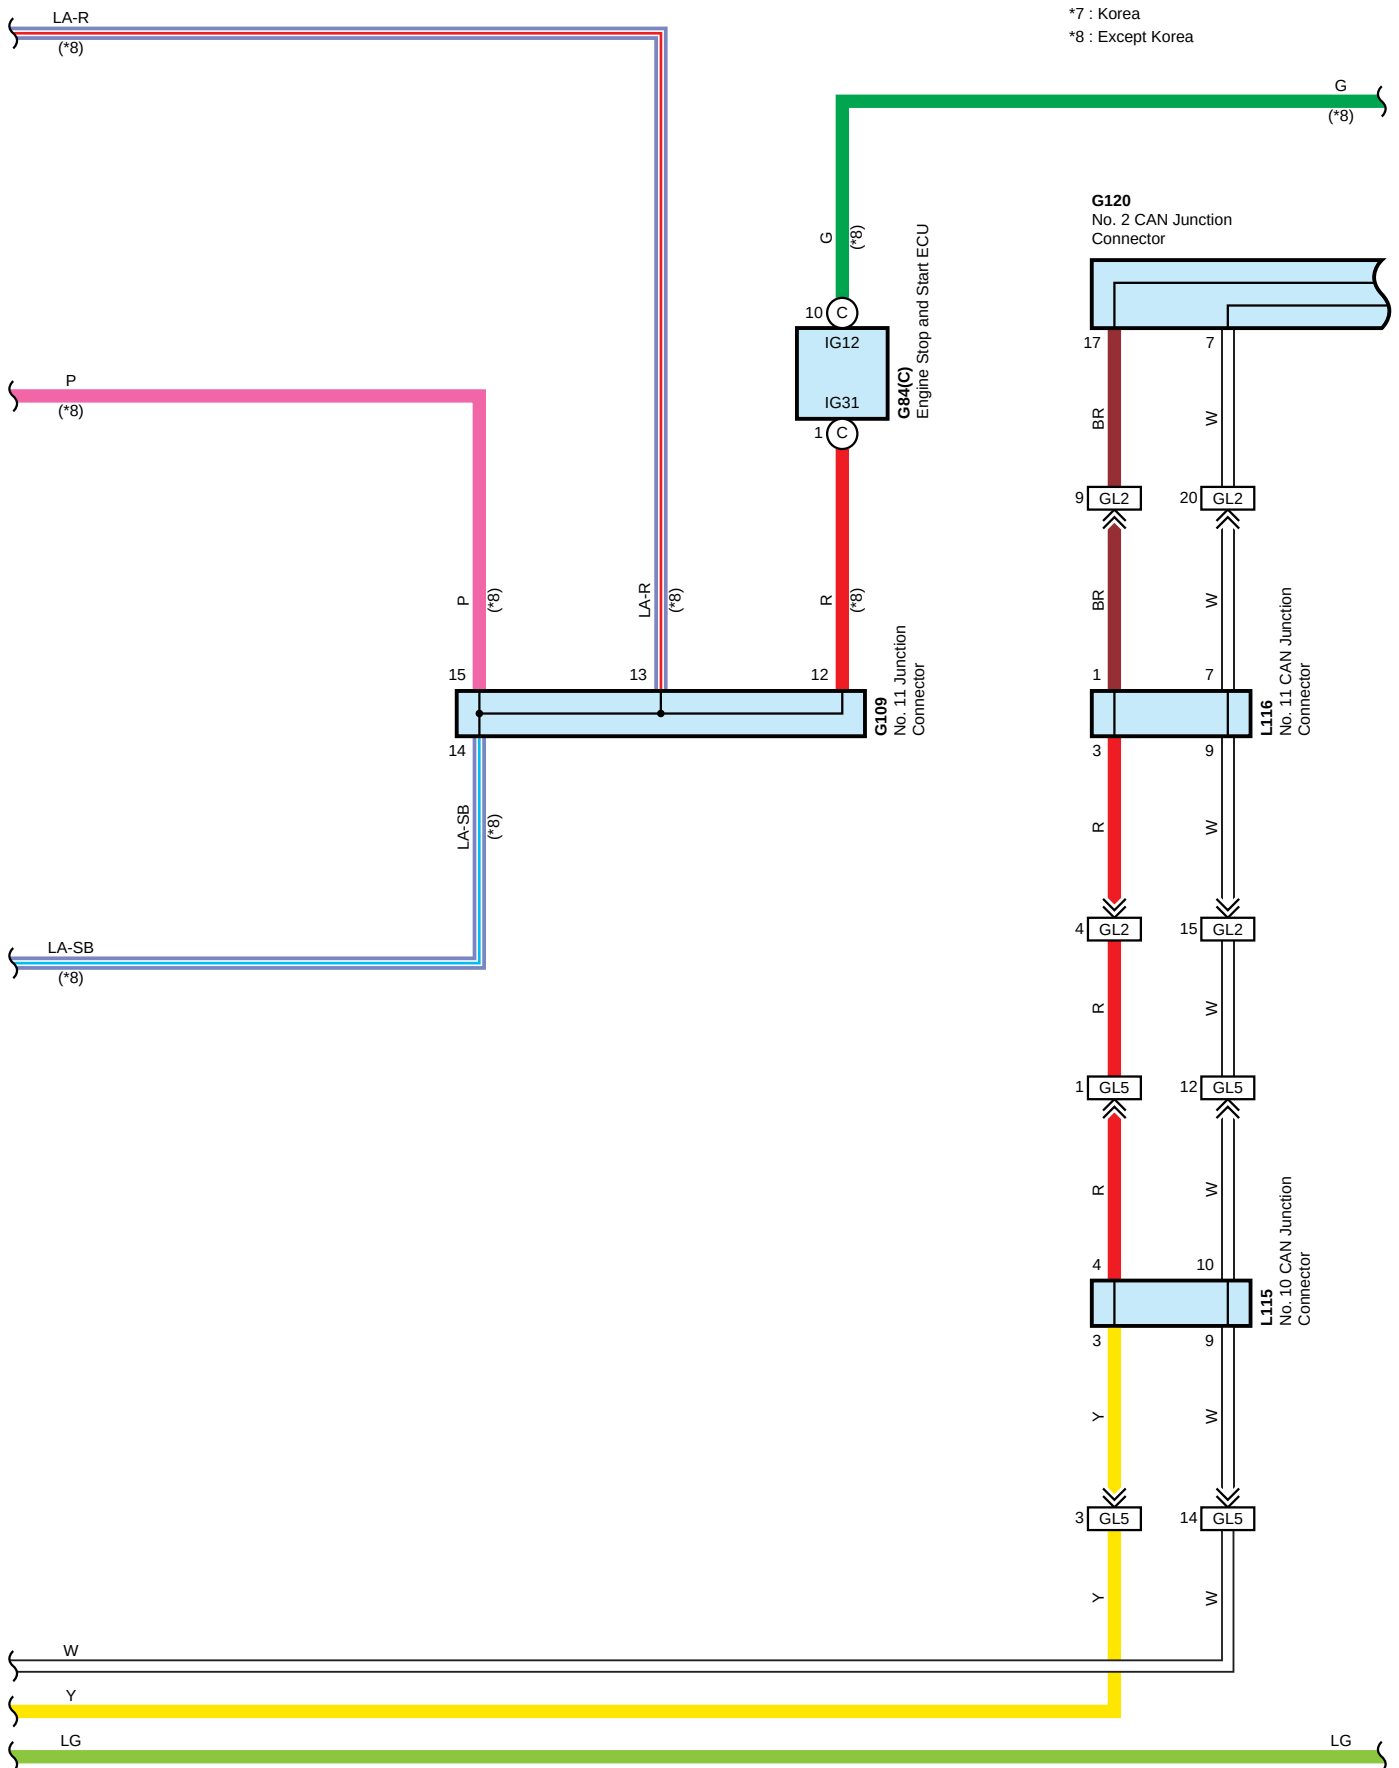

[illegible]

This diagram illustrates the CAN network wiring for a vehicle, showing the connections between various ECUs and junction connectors. The components and their connections are as follows:

- ECUs and Junction Connectors:**
 - G122** (No. 4 CAN Junction Connector): A central junction connector with 14 pins.
 - G11(A)** (Airbag ECU Assembly): Connected to G122 via pins 26 (CANH) and 27 (CANL).
 - L77(B)** (Parking Brake ECU Assembly): Connected to G122 via pins 9 (CA2H) and 1 (CA2L).
 - G20(A), G112(B)** (Data Link Connector 3): Connected to G122 via pins 6 (CANH) and 14 (CANL).
 - G66** (Network Gateway ECU): Connected to G122 via pins 15 (CA5H) and 16 (CA5L).
- Wiring and Grounding:**
 - Wires:** Various colored wires (red, blue, green, yellow, orange, black) represent different signal lines and grounds.
 - Grounds:** Labeled as G, W, and LG.
 - Connectors:** L119 (No. 14 CAN Junction Connector) and L122 (No. 4 CAN Junction Connector) are shown as part of the wiring harness.
- Notes:**
