

A/T. P. (Automatic Transmission Parking) Indicator Circuit

CIRCUIT DESCRIPTION

The propeller shaft and wheels are free even when the transmission shift lever is set to P as long as the transfer shift lever is in Neutral position. The A/T.P. indicator light lights up to warn the drive that the propeller shaft and wheels are not locked.

If the A/T.P. indicator light goes on, the transfer shift lever should be shifted out of N position.

WIRING DIAGRAM

INSPECTION PROCEDURE

- 1 Check park/neutral position switch (See page [DI-173](#)).

NG

Replace the park/neutral position switch.

OK

2	Check transfer neutral position switch (See page TR-40).
---	---

OK

Replace the transfer neutral position switch.

NG
