This wiring diagram illustrates the electrical system for the 2000 Ford Focus 1.6L engine. The diagram is organized into sections labeled 13, 14, 15, and 16, representing different parts of the vehicle's chassis.

**Engine Control Module (ECM) and Transmission:**

- The ECM (E6(C), E7(B), E8(A), E9(D), E10(E)) is connected to the vehicle's electrical system via terminals L-R, L-W, and W-B.
- The Transmission (E5) is connected to the ECM via terminals 2, 3, and 5.
- The Transmission is also connected to the vehicle's electrical system via terminals 1, 8, and 10.

**Sensors and Actuators:**

- AT OIL TEMP:** A temperature sensor connected to the ECM via terminal 10.
- AT P:** A pressure sensor connected to the ECM via terminal 11.
- 2nd STRT:** A sensor connected to the ECM via terminal 12.
- ECU PWR:** A power sensor connected to the ECM via terminal 13.
- CRUISE:** A cruise control sensor connected to the ECM via terminal 14.
- L:** A sensor connected to the ECM via terminal 15.
- D:** A sensor connected to the ECM via terminal 16.
- N:** A sensor connected to the ECM via terminal 17.
- R:** A sensor connected to the ECM via terminal 18.
- P:** A sensor connected to the ECM via terminal 19.

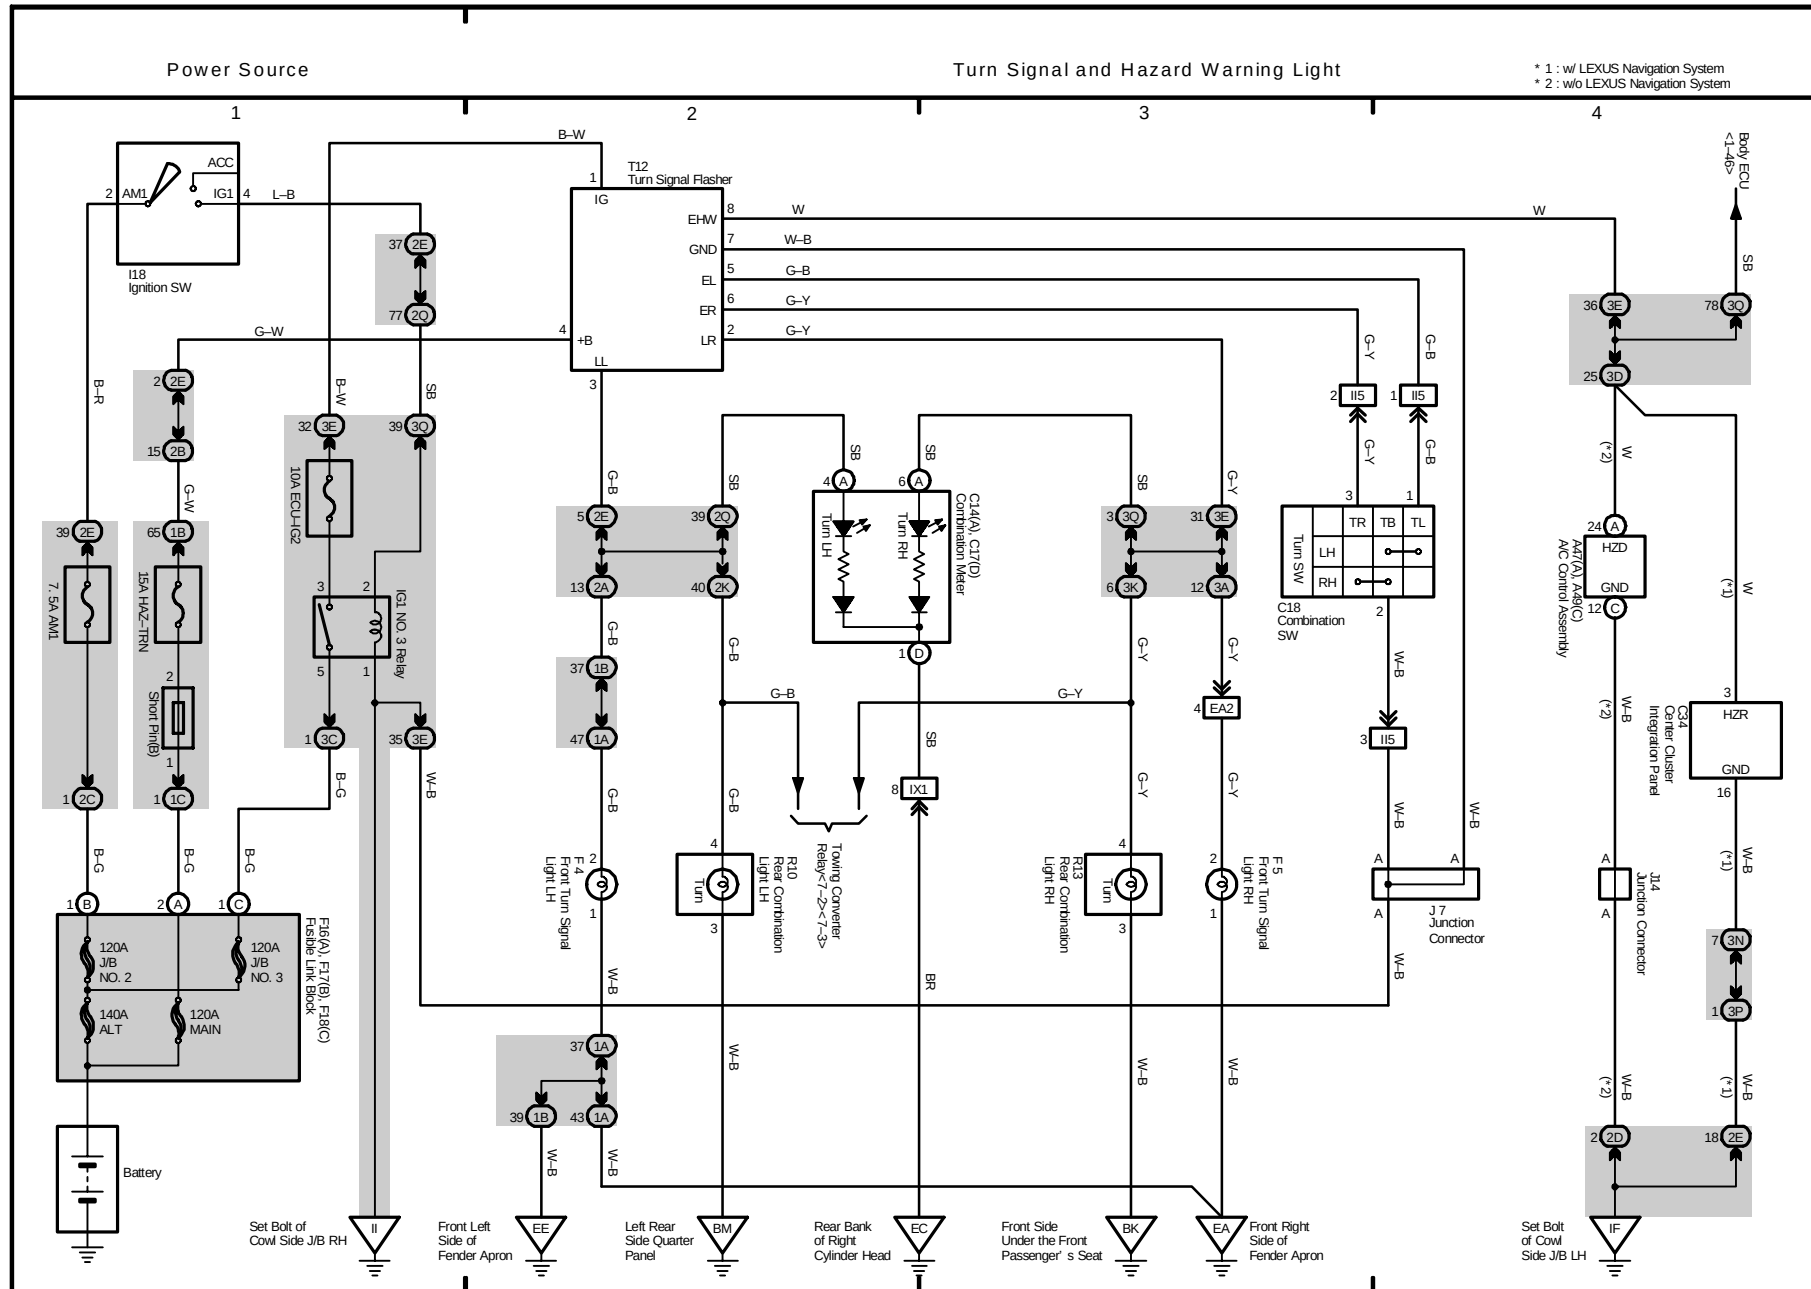

**Wiring Details:**

- The diagram shows various wires (L-O, BR, SB, W-B, L-R, L-W) connecting the components to the vehicle's electrical system.
- Key components include the 10A ECU-B2 fuse, the J118 Junction Connector, and the C14(A), C17(D) Combination Meter.
- The diagram also shows the connection to the vehicle's battery (B) and ground (G).
