The diagram illustrates the wiring for the interior lighting system. It features a main power source (G) at the top left, which branches into two main paths. The upper path leads to the E58 Junction Connector, which then splits into three branches leading to the V4, V5, and V6 assemblies. The lower path leads to the E94(A) Outer Mirror Switch Assembly, which then branches into two paths leading to the X1 Front Seat Memory Switch LH and the V4 Integration Control & Panel Assembly. The V4 assembly is connected to the E58 Junction Connector, which then splits into three branches leading to the V5, V6, and V4 assemblies. The V5 and V6 assemblies are connected to the E58 Junction Connector, which then splits into three branches leading to the V5, V6, and V4 assemblies. The V4 assembly is connected to the E58 Junction Connector, which then splits into three branches leading to the V5, V6, and V4 assemblies. The V5 and V6 assemblies are connected to the E58 Junction Connector, which then splits into three branches leading to the V5, V6, and V4 assemblies. The V4 assembly is connected to the E58 Junction Connector, which then splits into three branches leading to the V5, V6, and V4 assemblies.
