

WIPER SYSTEM

DESCRIPTION

- A wiper system with a raindrop sensing function is available as optional equipment.
- As a rule, the control of the wiper operation is effected by the wiper ECU. However, the control of the rain drop sensing function is effected by the rain sensor.
- This system has the following function.

Function	Outline
Vehicle Speed-Sensing, Adjustable Interval (INT) Function*	This function controls the wiper interval time in accordance with the vehicle speed when the wiper switch is in the AUTO position.
Vehicle Speed Switching Function*	This function automatically switches the operating condition of the wipers while the vehicle is stopped or starting off, when the wiper switch is in the LO position.
Washer-Linked Wiper with Drip-Preventive Function*	To prevent the fluid from dripping after the washer has been operated, this function operates the wipers once after they have operated in unison with the washer.
Raindrop Sensing Function	This function controls the wiping timing in accordance with the amount of raindrops when the wiper switch is in the AUTO position.

*: The setting of function can be changed using the customized body electronics system. For details, refer to Customized Body Electronics System section on page BE-20.
