

CRUISE CONTROL SYSTEM

DESCRIPTION

- Cruise control system has been provided as optional equipment.
- The basic function of this system is the same as the current RX300.
- Once the system is set to a desired vehicle speed, the throttle valve position is adjusted automatically to maintain the vehicle speed at that speed without depressed the accelerator pedal.
- As with the current RX300, the ETCS-i (Electronic Throttle Control System-intelligent) performs throttle valve angle control on the RX400h.
- This system is controlled by the cruise control ECU built into the THS ECU.
