

EXTERIOR

Front View

- The engine hood has been designed with an image of wings and the headlights have been designed with a sharp, hawk-like look to express powerfulness and speed.
- A radiator grille that consists of vertical and horizontal lines is provided on the engine hood, and a large opening is provided in the center of the front bumper. These designs give the vehicle a powerful and sporty look.
- Round, projector type fog lights are used on the front bumper to ensure visibility under poor weather conditions.

Rear View

- The streamlined configuration in which the bottom of the window comes in contact with the rear combination lights and the downward expansion of both lights express the vehicle's powerfulness and stability.
- The rear combination lights express innovation and luxury through the use of transparent lenses and LEDs (Light Emitting Diodes). In addition, the LEDs have been designed so that they are located on the entire surfaces of the stoplights and taillights.
