INSTRUCTIONS

HOW TO LOCATE PARTS IN THE CATALOG

Realistically, there can only be four possible scenarios when looking for a part(s). These are:

1. Either **image of the part** or the **location** on vehicle are known.

2. **D-Code** and/or **Group number** (of part) are known.

3. **Part Number** is known.

4. **Name of part** is known.

If one or more of the items listed above are known, the parts catalog user may use the appropriate index to facilitate part(s) location. The four indeces that may be used are:

PICTORIAL INDEX -
Use if either the image of the part and/or location on vehicle are known.

SECTION NUMBER INDEX -
Use if D-Code, Group Number or type of part is known.

PART NUMBER INDEX -
Use if part number is known.

ALPHABETICAL INDEX -
Use if name of part is known.

The following two pages outline how to use these indeces.

USING THE PICTORIAL INDEX

1. The PICTORIAL INDEX is the 1st column of every fiche.

2. Decide whether the desired part is an engine, chassis or body part.

3. Look through the PICTORIAL INDEX for the part. Take note of all possible fiche locations where the part may be found. These information will be useful in thoroughly tracking down the part.

4. Once the appropriate illustration is found, note the section number. Refer to the SECTION NUMBER INDEX for fiche location.

USING THE SECTION NUMBER INDEX

1. The SECTION NUMBER INDEX is the first row of every fiche.

2. The column labeled STARTING LOCATION denotes the microfiche GRID LOCATION for a particular section.

   EXAMPLE:

   1 - G6
   1 = denotes the fiche number, i.e., 1 of 3, 2 of 3, 3 of 3
   G = denotes the horizontal row location
   6 = denotes the vertical column location

3. As an additional feature, the sections located in every column are enclosed in a "highlight box" in the SECTION NUMBER INDEX.

4. At this point, it is just a simple matter of going to the correct frame and locating the desired part number.

USING THE PART NUMBER INDEX

1. If the part number is known, simply use the PART NUMBER INDEX.

2. The PART NUMBER INDEX is located at the very end of the catalog, on the last fiche of a fiche set.

3. The index shows the section number and the grid location where the part number may be found.

4. When the PART NUMBER INDEX is used, remember that the part number is NOT read from "left to right". The base part number is read first. The base part number consists of the center two digits plus the next three (or four) digits to the right.

5. Use the grid location to go to the appropriate frame where the part number may be found. Cross-reference the part number with the illustration and text to ensure that it is indeed the desired part.

USING THE ALPHABETICAL INDEX

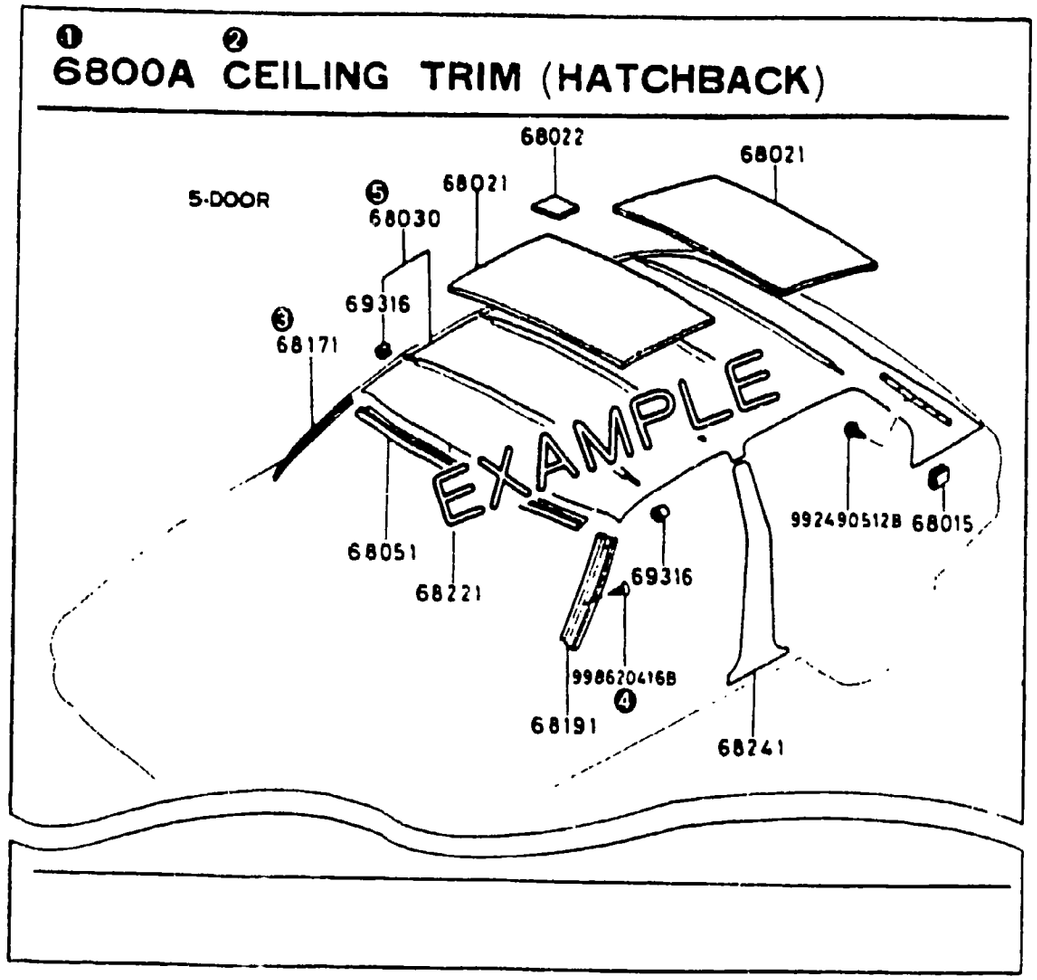

1. If the name of the part is known, simply use the ALPHABETICAL INDEX.

2. The ALPHABETICAL INDEX is located right before the PART NUMBER INDEX, at the very end of the catalog, on the last fiche of a fiche set.

3. The ALPHABETICAL INDEX contains the section number and the grid location where the desired part may be found.

4. Use the grid location to go to the appropriate frame where the part number may be found. Cross-reference the part number with the illustration and text to ensure that it is indeed the desired part.

HOW TO INTERPRET THE ILLUSTRATION

In the example shown above, the interpretation of each item appearing in the illustration area is as follows.

❶ **SECTION NUMBER**

Each illustration is given a Section Number, which is a "IDENTIFICATION NUMBER" of the group of parts classified in function.
Section Number basically consists of four numeric characters and alpha "A". But when a Section (a group of parts) is shown in more than one illustration over the same catalog, an additional alphabetical character is incorporated, e.g.,

Section No	Section Name
6800A	Ceiling Trim (Hatchback)
6800AA	Ceiling Trim (Wagon)

[Note]
Illustrations are always arranged in numerical sequence by SECTION NUMBER throughout the fiches in the set. (Exception: Section No. "0900A key Sets" is located in the first section of Body group.)

❷ **SECTION NAME**

This is a descriptive name of the illustration (the group of parts).

❸ **D-CODE (KEY NUMBER)**

D-Code consists of five or six digits, and serves as a "KEY NUMBER" to co-ordinate a part's illustration with its related text.

[Note]
Those parts which appear in the illustration without D-Code are not available as spare parts. (Exception: Most Standard Parts do not have D-Code, but are available as spare parts.)

❹ **STANDARD PART NUMBER**

Those parts which are standardized in form, dimension, material, etc. such as bolts, nuts, washers, etc. are called "Standard Parts". In most cases, Standard Part Numbers are shown on the illustration instead of via the D-Code, and are distinguised from D-Code by the number which consists of nine or ten digits starting with "9", e.g., 99862-0416B. Those Parts do not appear in the text and part number index.

❺ **ASSEMBLY AND COMPONENTS' RELATIONSHIP**

The relationship between an Assembly and its Components is indicated in the illustration but not in the text.
If the D-Code appeared as the example, the correct interpretation of that would be: D-Code 68030 includes D-Code 69316 and Top Ceiling (no D-Code indicated).

HOW TO INTERPRET THE TEXT

IMPORTANT
As there are many abbreviated words used in the text, refer to "Abbreviation List" located in the lower corner of each fiche (frame No. N1).

6800A-1 CEILING TRIM (HATCHBACK)

D-CODE (Key No.)	PART NAME	PART No.	Qty	MODEL/DESCRIPTION	VIN (Chassis No.)
❶	❷	❹	❻	❼

	BEIGE	31			
68051	PLATE, T/CEILING	8531-68-051	1		FA4PS.. 500001 -522626 FA4TS.. 500001 -688439
	❾	❿			⓫
	<AN>	•8531-68-051A	1		FA4PS.. 522627- FA4TS.. 688440-

EXAMPLE

In the example shown above, the interpretation of the information appearing in each column is as follows.

❶ D-CODE (KEY NUMBER)
This is to serve as a "KEY NUMBER" to co-ordinate with a part on the illustration.
Those parts which are identical in function and descriptive name, are given a common code over the Mazda Spare Parts
Within each Section Number, the D-Code appears in numerical sequence.

❷ PART NAME
Part Names are shown in English and/or French and/or Spanish and/or German, depending upon Catalogs and are given to each "D-CODE".

❸ COLOR NAME
Color Names appear here when Color Codes are indicated in the "PART No." column. These are shown in English only.

❹ PART NUMBER
Under the same D-Code, if there are more than one Part Number, Part Numbers are always listed in numerical and/or alphabetical sequence regardless of the order of modification history of parts.

❺ COLOR CODE
When Color Code(s) appear(s), the indicated Part Number requires the Color Code to properly identify the color of the part, e.g., 8531-68-030 00, 8531-68-030 31.

❻ QUANTITY
This denotes the Quantity of each part number per the D-Code used on the applicable model(s).

❼ DESCRIPTION
An additional descriptive information for each part is provided as necessary.

❽ MODEL APPLICATION
Model Application for a part is shown in this column if necessary.
If there is no Model Application indicated, the affected part is applicable to "ALL MODELS" covered in the page.
For further information, refer to "HOW TO INTERPRET THE MODEL APPLICATION" shown later (frame No. G16).

❾ INTERCHANGEABILITY CODE
The code in < > brackets appearing in this column indicates the level of interchangeability between the indicated part and the former one.
For the definition of the Codes, refer to "INTERCHANGEABILITY CODE LIST" shown in the lower corner of each fiche (frame No. N1).

❿ NEW PART NUMBER'S SIGN
An asterisk (•) appearing in the "Part Number" column indicates that the affected Part Number has been newly added since the last edition.

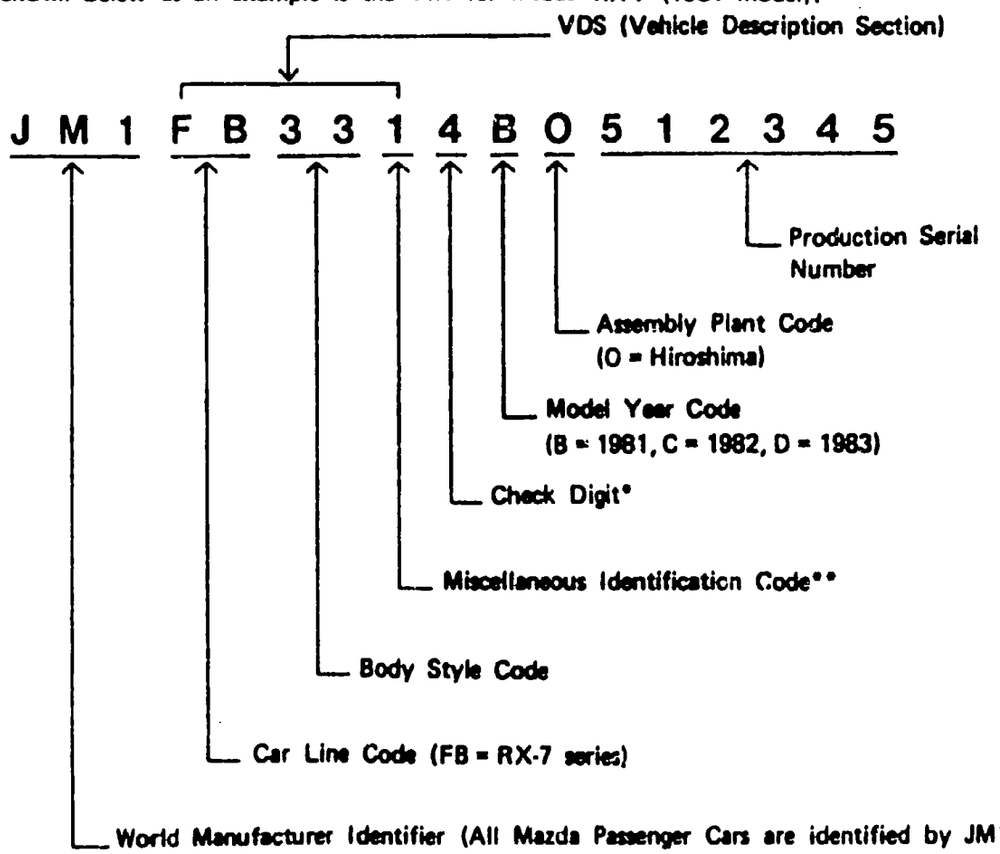

⓫ VIN (CHASSIS No.)
VIN (Vehicle Identification Number) is shown in this column if necessary, to identify the vehicles applicable to the affected part.
For further details, refer to "HOW TO INTERPRET THE VIN (CHASSIS No.)" located in frame No. H16 of this fiche.

HOW TO INTERPRET THE VIN (CHASSIS No.)

VEHICLE IDENTIFICATION SYSTEM FOR MAZDA RX-7 SERIES (1981–)

Vehicle Identification Number (VIN) for RX-7 (1981 and later year models) consists of World Manufacturer Identifier, Vehicle Description Section (VDS), Check Digit, Model Year Code and Production Serial Number which is sequentially numbered within each VDS.

Shown below as an example is the VIN for Mazda RX-7 (1981 model).

* Check Digit is included as a VIN security feature to permit law enforcement verification of the authenticity of a suspected illegal VIN plate. This single digit number is determined, based upon a complex mathematical formula which is applied to each vehicle's VIN number.

** Miscellaneous Identification Code identifies major components such as engine, brake system, cab type, etc. However, if all models of the same car line use the same such components, this code is indicated as a numeric character "1" only.

VIN PRESENTATION ON THE PARTS CATALOG

VIN does NOT ALWAYS APPEAR. No "VIN" indicated denotes that a Part is applicable to the affected model from the FIRST PRODUCTION and ON (up to now).

If the information in the "VIN" column appeared as the example below:

6230A-1 BACK DOOR MECHANISMS (HATCHBACK)

D-CODE (Key No.)	PART NAME	PART No.	Qty	MODEL/DESCRIPTION	VIN (Chassis No.)
62210A	HINGE, BACK DOOR	8531-62-2108	2	1000 1300	❶ FA4PS.. 500001 –522626 FA4TS.. 500001 –688439
		*8531-62-2100	2		❷ FA4PS.. 522627– FA4TS.. 688440– FA4US.. 500001–
62310	LOCK, BACK DOOR	8531-62-3108	2		❸

.. the correct interpretation of the above would be:

❶ Part No. 8531-62-2108 is applicable to Model 1000 from VIN FA4PS-500001 thru FA4PS-522626 and Model 1300 from VIN FA4TS-500001 thru FA4TS-688439 for the Hatchback respectively.

❷ Part No. 8531-62-210D is applicable to Model 1000 from VIN FA4PS-522627 and on, Model 1300 from VIN FA4TS-688440 and on, and Model 1400 from VIN FA4US-500001 (the first production) and on for the Hatchback respectively.

❸ Part No. 8531-62-310B is applicable to ALL MODELS (1000, 1300 and 1400) of the Hatchback series from the FIRST PRODUCTION and ON (up to now).

HOW TO INTERPRET THE MODEL APPLICATION

Model Application does NOT ALWAYS APPEAR. No "Model Application" indicated denotes that a Part is applicable to ALL MODELS covered by the affected page.

If the information in the "MODEL/DESCRIPTION" column appeared as the example below:

4000A-1 EX. SYSTEM (HATCHBACK)

D-CODE (Key No.)	PART NAME	PART No.	Qty.	MODEL/DESCRIPTION	VIN (Chassis No.)
40061	HANGER SILENCER	3874-40-060	1	❶	
40081	BRACKET	3952-40-080A	1	CAL. ❷	
		8021-40-080C	1	FED. ❸	

. . . the correct interpretation of the above would be:

❶ Part No. 3874-40-060 is applicable to All of Hatchbacks.

❷ Part No. 3952-40-080A is applicable to the Hatchbacks for California applications.

❸ Part No. 8021-40-080C is applicable to All Hatchbacks for Federal applications.

CAL. = California

FED. = Federal

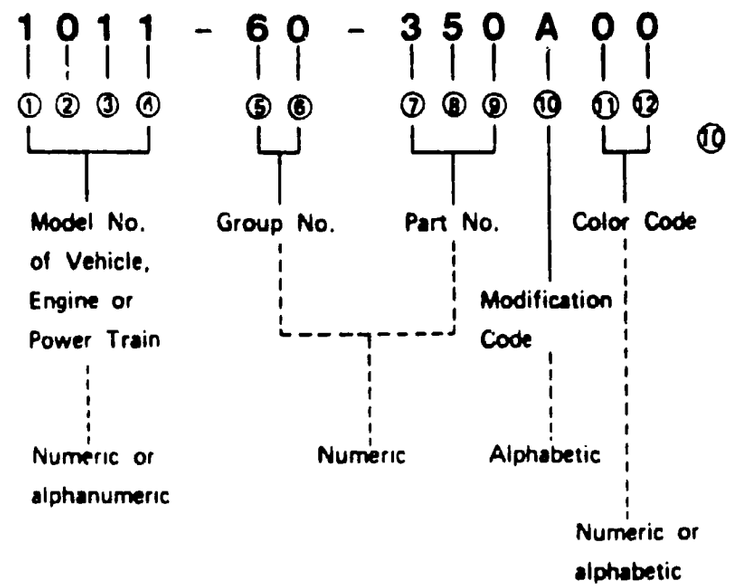

MAZDA PART NUMBERING SYSTEM

Mazda Part Numbers are generally classified into three categories: General Parts, Standard Parts and Special Tools.

MAZDA GENERAL PARTS

The Part Number basically consists of nine or ten digits. The 10th digit (if applicable) denotes modification of the part. It has twelve digits when a color code consisting of two digits is required.

EXAMPLE

[Note]
If a color code was required but not modification code, the 10th digit would be blank and the color code would follow, e.g.,

1011-60 350 _ 00
↑
└blank

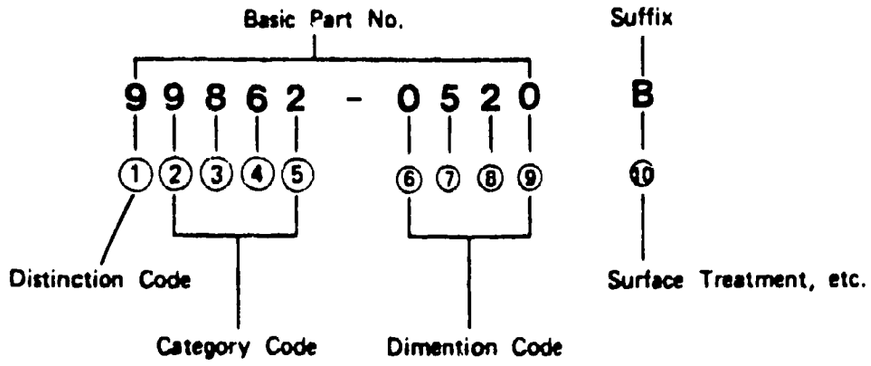

MAZDA STANDARD PARTS

Those Parts which are standardized in form and dimension such as Bolts, Nuts, Washers, Hoses, Disc Wheels, etc. are called Mazda Standard Parts.

All the Mazda Standard Parts are identified by a Part Number starting with "9". The numbering structure of Standard Parts varies depending upon the kind of parts.

The following is just one example of Standard Part Numbers.
For further details and examples, refer to the wall chart, "LIST OF STANDARD PARTS".

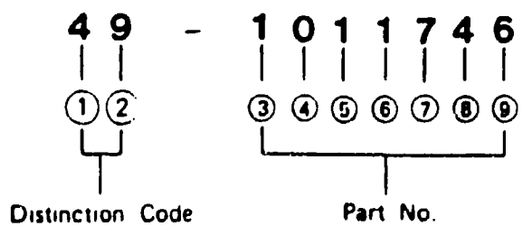

EXAMPLE

MAZDA SPECIAL TOOLS

In order to repair Mazda Vehicles, certain equipment is required. Those are called Mazda Special Tools.

EXAMPLE

(Note)
As Mazda Special Tools are not shown in the Parts Catalog, refer to "LIST OF SPECIAL TOOLS & APPLYING MODELS" as for further details

INTERCHANGEABILITY CODE LIST

Code	Definition	
AN	⟷ (Both Ways)	A new part and the former part are fully interchangeable.
A	→ (One Way)	A new part can be used in place of the former part, but the former part cannot be used in place of a new part.
C	Plus	A new part with some additional part(s) can be used in place of the former part
G	Plus	Some modification work is required to use a new part in place of the former part.
S	← (One Way Backward)	The former part can be used in place of a new part, but a new part cannot be used in place of the former part.

AERO

0000-86-2200 - 1979-85, Lip Spoiler

AIR CONDITIONER
Refer to Accy. Bulletin XA-1 for Air Conditioner information.

ARM REST
Refer to Accy. Bulletin XN-1 for replacement parts.

BATTERY

0000-80-124F
Refer to Accy. Bulletin XG-4 for Battery information.

BLOCK HEATER

0000-88-6600
Refer to Accy. Bulletin XG-5 for installation information.

CIGARETTE LIGHTERS

B001-66-252 - 1983-90

CRUISE CONTROL

FA54-99-063A
Refer to Accy. Bulletin XG-7 for more Cruise Control information.

DOOR EDGE GUARDS

0000-88-3199-BK - ALL, Black Universal Type

FRONT MASK

0000-88-0584 - 1984-85, W/O Air Dam

PAINT

Refer to Accy. Bulletin XE-2 for Touch-Up Paint information.

STEREO EQUIPMENT
Refer to Accy. Bulletins XS-1, XS-2, and XS-3 for Audio information.

SUNROOF

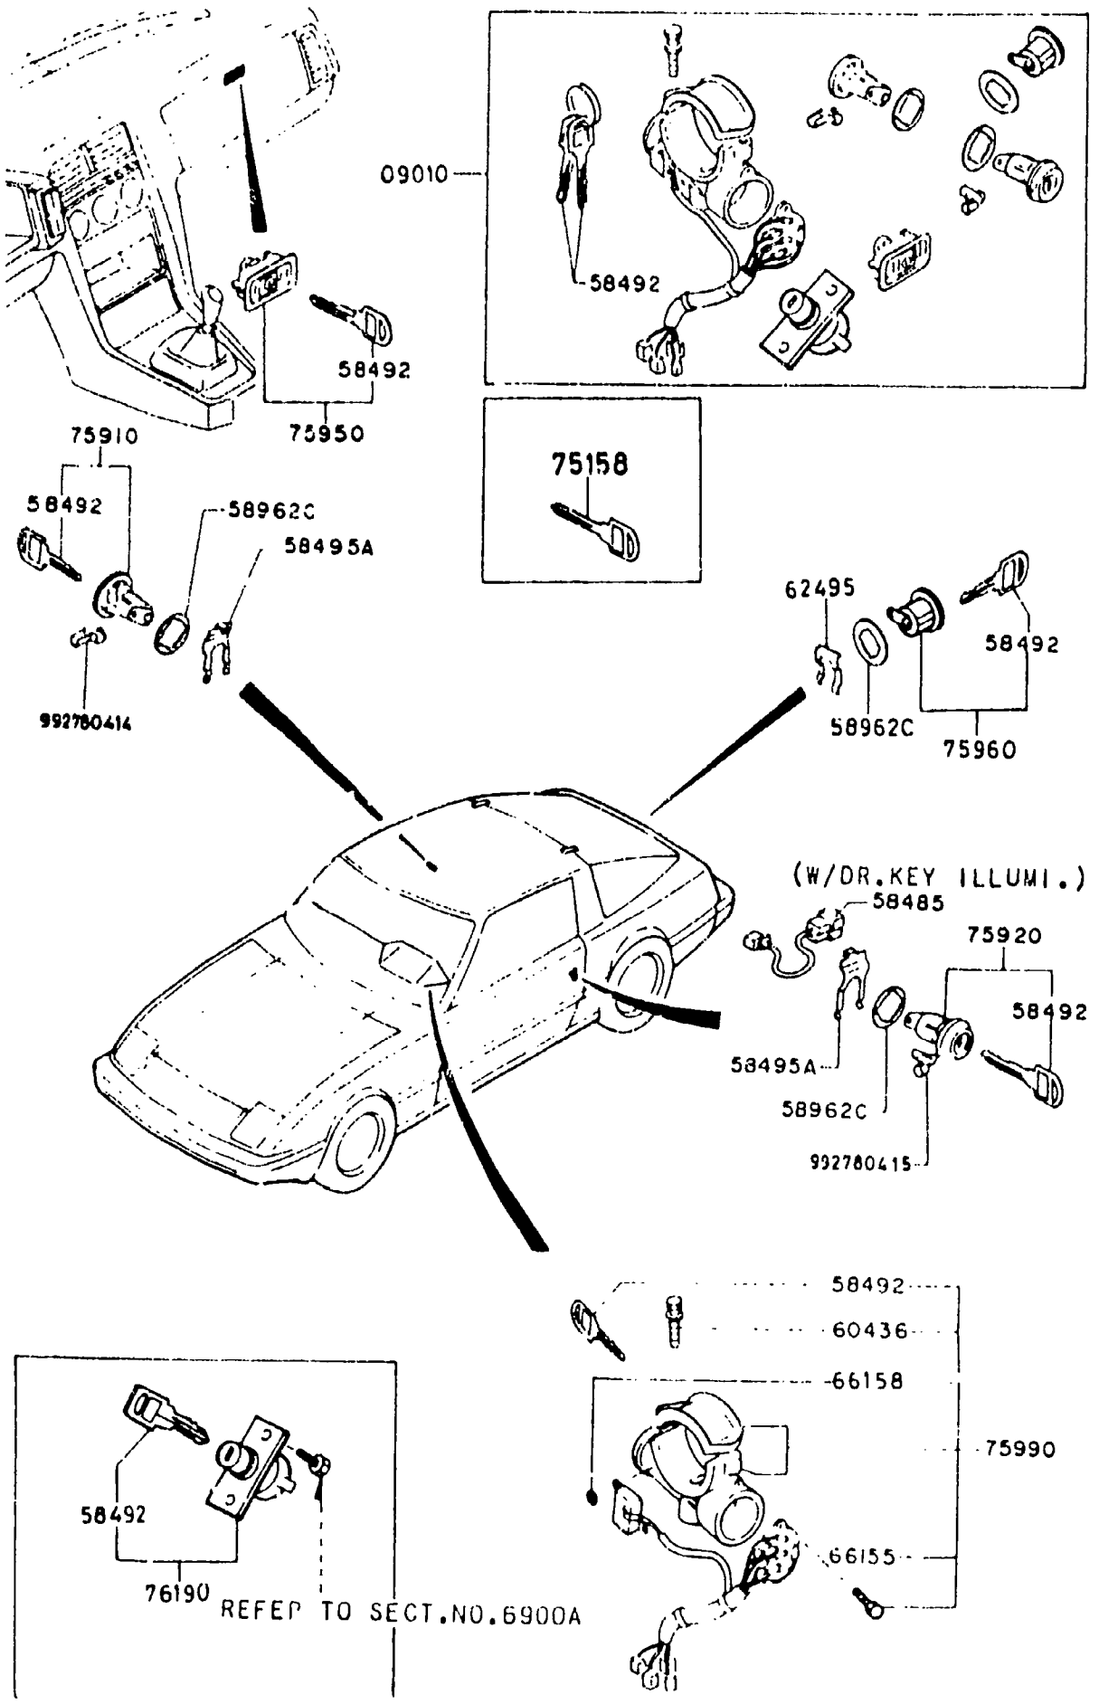

0000-86-2600 - 1980-85, Moonroof
0000-86-2600-KT - 1980-85, Left & Right Hinge
0000-86-2600-CP - 1980-85, Cap Nut Set
8346-62-885 - 1980-85, Slide Hook Latch

TIRES
Refer to Accy. Bulletins XE-1 for Tire information.

PART NUMBER INDEX

PART NUMBER INDEX

This index is listed in the fol'owing sequence.

GENERAL PARTS

EXAMPLE

❶ first, in the sequenece of group (5th & 6th digits)
❷ second, in the sequence of part (7th–9th digits)
❸ third, in the sequence of model/type (1st–4th digits)

STANDARD PARTS

Standard Parts are listed in numerical sequence after General Parts.
(Note: Those parts which do not have D-Code are not listed in the index.)
