# VEHICLE IDENTIFICATION SYSTEM FOR RX-7

## SERIES (1989～)

VIN (= Vehicle Identification Number) for RX-7 series (1989～ Year Model) consists of WMI (= World Manufacturer Identifier), VDS (= Vehicle Description Section) and VIS (= Vehicle Identification Section). VDS consisting of six alphanumeric characters denotes the "MODEL SERIES". VIS consisting of eight alphanumeric characters denotes the serial unit number of vehicle and is sequentially numbered within each VDS.

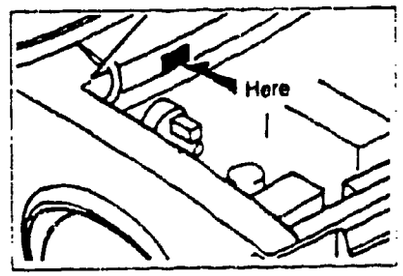

* Check digit is included as a VIN security feature to permit law enforcement verification of the authenticity of a suspected illegal VIN plate. This single digit number is determined, based upon a complex mathematical formula which is applied to each vehicle's VIN number.

** Miscellaneous Identification Code identifies major components such as engine, brake system, cab type, etc.

### LOCATION OF VIN PLATE

The plate is attached to the top ledge of the dash panel under the bonnet (engine hood), refer to the illustration shown right.

[NOTE]

If the VIN (chassis) reference number in the PCM (Parts catalog microfiche) appeared as

FC3***-700001

the vehicle's VIN would be e.g. JM1FC331**K0700001
