PRECAUTIONS

< PRECAUTION >

PRECAUTION

PRECAUTIONS

Precaution for Supplemental Restraint System (SRS) "AIR BAG" and "SEAT BELT PRE-TENSIONER"

INFOID:000000007361929

The Supplemental Restraint System such as "AIR BAG" and "SEAT BELT PRE-TENSIONER", used along with a front seat belt, helps to reduce the risk or severity of injury to the driver and front passenger for certain types of collision. This system includes seat belt switch inputs and dual stage front air bag modules. The SRS system uses the seat belt switches to determine the front air bag deployment, and may only deploy one front air bag, depending on the severity of a collision and whether the front occupants are belted or unbelted. Information necessary to service the system safely is included in the SR and SB section of this Service Manual.

WARNING:

- To avoid rendering the SRS inoperative, which could increase the risk of personal injury or death in the event of a collision which would result in air bag inflation, all maintenance must be performed by an authorized NISSAN/INFINITI dealer.
- Improper maintenance, including incorrect removal and installation of the SRS, can lead to personal injury caused by unintentional activation of the system. For removal of Spiral Cable and Air Bag Module, see the SR section.
- Do not use electrical test equipment on any circuit related to the SRS unless instructed to in this Service Manual. SRS wiring harnesses can be identified by yellow and/or orange harnesses or harness connectors.

PRECAUTIONS WHEN USING POWER TOOLS (AIR OR ELECTRIC) AND HAMMERS

WARNING:

- When working near the Airbag Diagnosis Sensor Unit or other Airbag System sensors with the Ignition ON or engine running, DO NOT use air or electric power tools or strike near the sensor(s) with a hammer. Heavy vibration could activate the sensor(s) and deploy the air bag(s), possibly causing serious injury.
- When using air or electric power tools or hammers, always switch the Ignition OFF, disconnect the battery, and wait at least 3 minutes before performing any service.

Precaution for Work

INFOID:000000007361930

- When removing or disassembling each component, be careful not to damage or deform it. If a component may be subject to interference, be sure to protect it with a shop cloth.
- When removing (disengaging) components with a screwdriver or similar tool, be sure to wrap the component with a shop cloth or vinyl tape to protect it.
- Protect the removed parts with a shop cloth and prevent them from being dropped.
- Replace a deformed or damaged clip.
- If a part is specified as a non-reusable part, always replace it with new one.
- Be sure to tighten bolts and nuts securely to the specified torque.
- After installation is complete, be sure to check that each part works properly.
- Follow the steps below to clean components.
 - Water soluble dirt: Dip a soft cloth into lukewarm water, and wring the water out of the cloth to wipe the dirty area.
Then rub with a soft and dry cloth.
 - Oily dirt: Dip a soft cloth into lukewarm water with mild detergent (concentration: within 2 to 3%), and wipe the dirty area.
Then dip a cloth into fresh water, and wring the water out of the cloth to wipe the detergent off. Then rub with a soft and dry cloth.
- Do not use organic solvent such as thinner, benzene, alcohol, or gasoline.
- For genuine leather seats, use a genuine leather seat cleaner.

Door Mirror Assembly

INFOID:000000007361935

EXPLODED VIEW

NOTE:

Power mirror shown, manual mirror similar.

MANUAL MIRROR

CAUTION:

Be careful not to damage the mirror body.

Removal

1. Remove the front door sash cover.
2. Remove the front door finisher. Refer to [INT-14, "Removal and Installation"](#).
3. Remove the nuts and the door mirror assembly.

Installation

Installation is in the reverse order of removal

POWER MIRROR

CAUTION:

Be careful not to damage the mirror body.

Removal

1. Remove the front door sash cover.
2. Remove the front door finisher. Refer to [INT-14, "Removal and Installation"](#).
3. Disconnect the door mirror harness connector.
4. Remove the nuts and the door mirror assembly.

Installation

Installation is in the reverse order of removal.

DOOR MIRROR

< UNIT REMOVAL AND INSTALLATION >

Door Mirror Glass

INFOID:000000007361936

REMOVAL

1. Angle the mirror fully up.
2. Remove the mirror.
 - Pull from the bottom to disengage the clips.
 - Continue to pivot the mirror upward from the bottom to separate the hooks.
 - If equipped, disconnect the electrical connectors.

INSTALLATION

Installation is in the reverse order of removal.

DOOR MIRROR

< UNIT DISASSEMBLY AND ASSEMBLY >

UNIT DISASSEMBLY AND ASSEMBLY

DOOR MIRROR

Mirror Actuator

INFOID:000000007361937

DISASSEMBLY AND ASSEMBLY

Disassembly

1. Remove the mirror glass. Refer to [MIR-14, "Door Mirror Glass"](#).
2. Remove the screws (A) and release the actuator from housing (B).

3. Disconnect the connectors (A) and remove the actuator (1).

Assembly

Assembly is the reverse order of disassembly.
