#### More P0440 Tips

##### Here are some additional tips for dealing with P0440 codes:

- After doing the compulsory valve check with the NSM or aftermarket test equipment, make certain the ports on the canister drain/vent valve are not physically damaged. The hoses may disguise this condition and you may misdiagnose a broken valve.
- Prior to reconnecting the hoses to the new valve, confirm that there are no obstructions in the drain hose due to the damaged component.
