| Road condition | ❑ Flat road<br>❑ Uphill<br>❑ Downhill<br>❑ Gravel road<br>❑ Others : | | |
| Vehicle operation | ❑ Starting<br>❑ Idling<br>❑ Driving<br>❑ Constant speed<br>❑ Accelerating<br>❑ Decelerating<br>❑ Turning<br>❑ Others : | | |
| Details of problem | | | |
| Airbag warning light operation | ❑ Normal (After turning the ignition switch to ON, illuminates for 6 seconds then goes off.)<br>❑ Remains ON<br>❑ Remains OFF | | |
| Passenger's airbag ON/OFF indicator does not operate. | ❑ Normal (After turning the ignition switch to ON, illuminates for 6 seconds then goes off for 2 seconds; Lights ON (adult) or OFF (children/unoccupied).)<br>❑ Both remain ON<br>❑ Both remain OFF | | |
| DTC output | ❑ OK code<br>❑ DTC: (Code: ) | | |

# 3. General Description

## A: CAUTION

1) The occupant detection system (passenger seat only) control module and the occupant detection sensor are fixed to the seat cushion frame. Never remove the occupant detection control module or the occupant detection sensor from the seat cushion frame.
2) Do not replace the seat cushion pad by itself. Always replace the seat cushion pad and frame assembly as a set. The seat cushion pad and cushion frame are adjusted as a set at the time of manufacture. If cushion pads and cushion frames are combined from those of other vehicles or other sets, the occupant detection system may not operate properly.
3) If the seat cushion cover is removed, make sure to replace the hang wire on the seat cushion side with a new wire.
4) Never connect the battery in reverse polarity. Occupant detection system may be destroyed instantly.
5) Do not disconnect the battery terminals while the engine is running. A large counter electromotive force will be generated in the generator, and this voltage may damage electronic parts such as occupant detection control module.
6) Before disconnecting the connectors of each sensor and control module, be sure to turn the ignition switch to OFF and wait for 60 seconds or more. Occupant detection control module may be damaged.
7) Every occupant detection system-related part is a precision part. Do not drop them.

**CAUTION:**
**• Do not use electrical test equipment on wiring harness and connector circuits of the airbag system.**
**• Be careful not to damage the airbag system wiring harness when servicing the occupant detection system.**
**• Refer to CAUTION in Airbag System when repairing the occupant detection system. <Ref. to AB-11, CAUTION, General Description.>**

## B: INSPECTION

Measure the battery voltage and check electrolyte.

***Standard voltage:***
***12 V***

***Specific gravity:***
***1.260 or more***

***Fluid level:***
***Between the upper level and lower level***

## C: PREPARATION TOOL

**CAUTION:**
**To measure the voltage and resistance of airbag system and occupant detection system components, be sure to use the specified test harness.**

### 1. SPECIAL TOOL

| ILLUSTRATION | TOOL NUMBER | DESCRIPTION | REMARKS |
|---|---|---|---|
|  ST1B022XU0 | 1B022XU0 | SUBARU SELECT MONITOR III KIT | Used for troubleshooting the electrical system. |

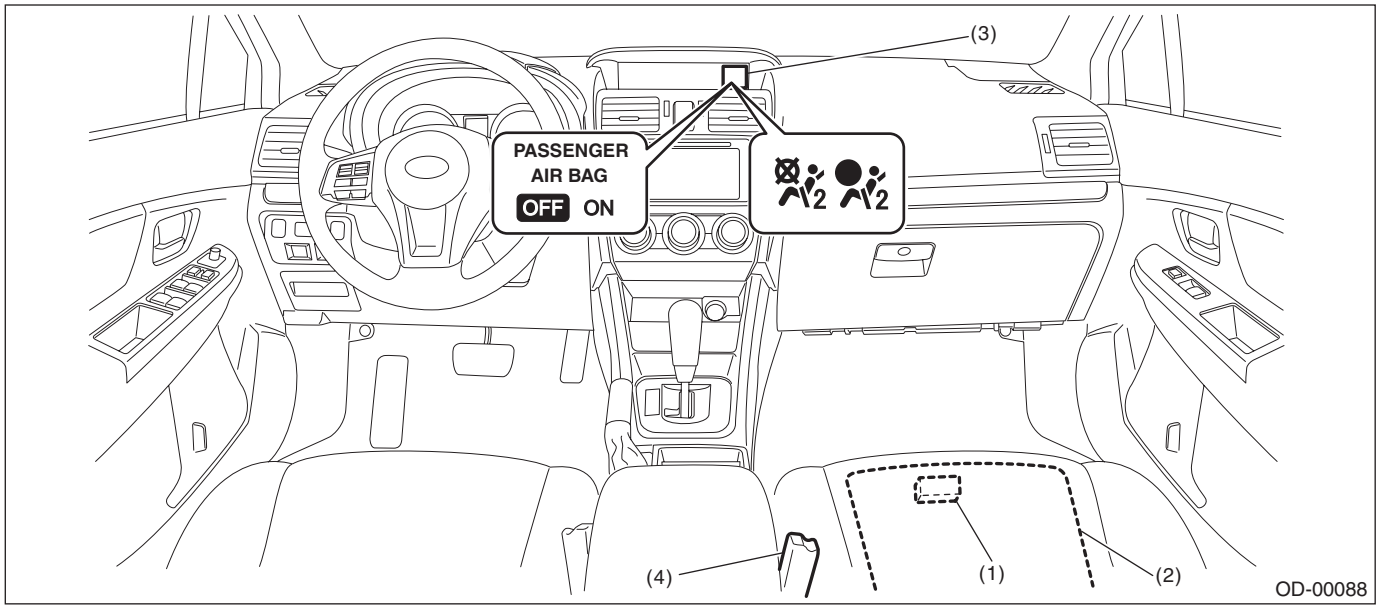
## 2. GENERAL TOOL

| TOOL NAME | REMARKS |
|---|---|
| Circuit tester | Used for measuring resistance, voltage and current. |

# 4. Electrical Component Location

## A: LOCATION



(1) Occupant detection control module
(2) Occupant detection sensor
(3) Airbag ON/OFF indicator light
(4) Buckle switch (passenger's seat)

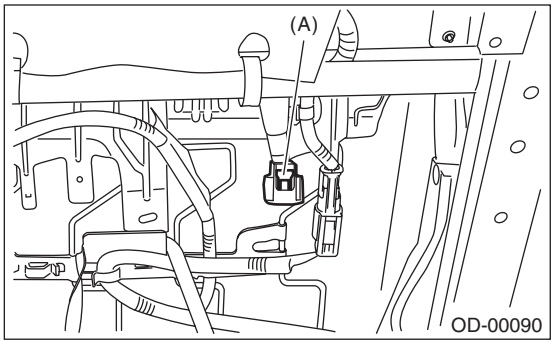
# 5. Airbag Connector

## A: PROCEDURE

### 1. OCCUPANT DETECTION SYSTEM (BETWEEN AIRBAG REAR HARNESS AND SEAT HARNESS)

1) How to disconnect:
Press the lock arm (A) and disconnect the connector.

**CAUTION:**
**When pulling the slide lock or disconnecting connector, be sure to hold the connector, not the harness.**



2) How to connect:
Holding the connector, push it in securely until a clicking sound is heard.

**CAUTION:**
**Be sure to insert the connector in until it is locked. Then pull it gently to make sure that it is locked.**

### 2. AIRBAG CONTROL MODULE

Refer to Airbag System section. <Ref. to AB-21, AIRBAG CONTROL MODULE, PROCEDURE, Airbag Connector.>

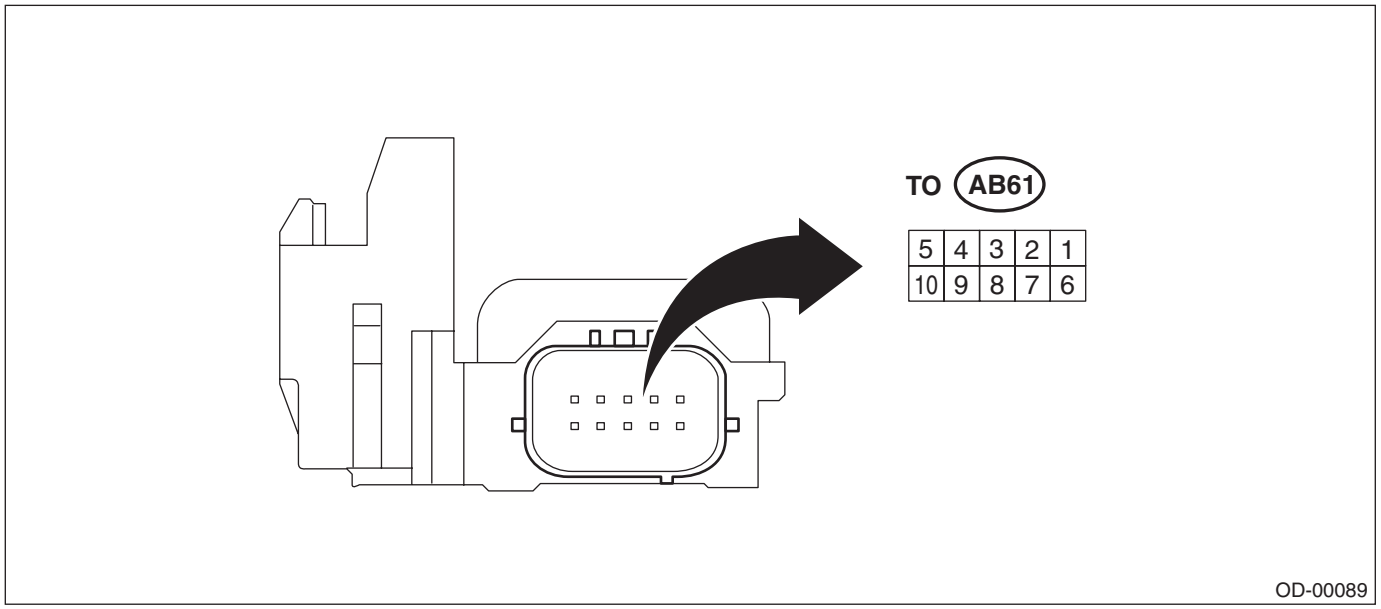
### 3. BUCKLE SWITCH RH

Refer to Airbag System section. <Ref. to AB-32, BUCKLE SWITCH RH, PROCEDURE, Airbag Connector.>

# 6. Control Module I/O Signal

## A: ELECTRICAL SPECIFICATION

**CAUTION:**
**Never remove the occupant detection control module, occupant detection sensor or seat frame because they are integrated into one unit.**



| Terminal No. | Terminal name | Input/Output value | Note |
|---|---|---|---|
| 1 | Airbag CM communication (FSR+) | — | Communication line |
| 2 | Not used | — | — |
| 3 | Not used | — | — |
| 4 | Buckle switch– (BER–) | 0 V | Switch ground |
| 5 | Not used | — | — |
| 6 | IG power supply (IG) | 8 — 16 V | When ignition SW is ON |
| 7 | Not used | — | — |
| 8 | Buckle switch+ | 0 — IG voltage | Ignition voltage when the switch is ON |
| 9 | Airbag CM communication (FSR–) | 0V | GND |
| 10 | Not used | — | — |

## B: WIRING DIAGRAM

Refer to the electrical wiring diagram. <Ref. to WI-113, WIRING DIAGRAM, Occupant Detection System.>

# 7. Subaru Select Monitor

## A: OPERATION

For detailed operation procedures, refer to the “PC application help for Subaru Select Monitor”.

## B: INSPECTION

### 1. COMMUNICATION FOR INITIALIZING THE AIRBAG SYSTEM IS IMPOSSIBLE

**DETECTING CONDITION:**
Defective harness connector
**TROUBLE SYMPTOM:**
Communication is impossible between the airbag control module and the Subaru Select Monitor.

NOTE:
Refer to “COMMUNICATION FOR INITIALIZING IMPOSSIBLE” in AIRBAG SYSTEM (DIAGNOSTICS). <Ref. to AB(diag)-24, COMMUNICATION FOR INITIALIZING IMPOSSIBLE, INSPECTION, Subaru Select Monitor.>

### 2. COMMUNICATION FOR INITIALIZING ONLY THE OCCUPANT DETECTION SYSTEM IS IMPOSSIBLE

NOTE:
The occupant detection system communicates with the Subaru Select Monitor via the airbag control module.
**DETECTING CONDITION:**
Defective harness connector between airbag control module and occupant detection control module
**TROUBLE SYMPTOM:**
Communication is impossible between the airbag control module and the occupant detection control module.
Perform the diagnosis from Step 2 in “DTC B1650 OCCUPANT CLASSIFICATION SYSTEM MALFUNCTION”. <Ref. to OD(diag)-19, DTC B1650 OCCUPANT CLASSIFICATION SYSTEM MALFUNCTION, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>

# 8. Read Diagnostic Trouble Code (DTC)

## A: OPERATION

Read out DTCs stored in the airbag control module and the occupant detection control module. For operation procedures, refer to the “PC application help for Subaru Select Monitor”.

NOTE:
For details concerning DTCs, refer to the List of Diagnostic Trouble Code (Airbag system, Occupant detection system). <Ref. to AB(diag)-34, List of Diagnostic Trouble Code (DTC).> <Ref. to OD(diag)-18, List of Diagnostic Trouble Code (DTC).>

# 9. Inspection Mode

## A: PROCEDURE

Recreate the circumstance by referring to the conditions described in the checklist.

# 10.Clear Memory Mode

## A: OPERATION

For operation procedures, refer to the “PC application help for Subaru Select Monitor”.

NOTE:
After repairing the occupant detection system, clear the DTCs stored in the airbag control module and the occupant detection control module.

# 11.Display of Status Information

## A: OPERATION

Check the operating condition of each sensor, in the event of malfunction in the seat belt buckle switch or when the seat belt buckle switch has been replaced.
1) On «Main Menu» display, select {Each System Check}.
2) On «System Selection Menu» display, select {Airbag System}.
3) On «Airbag System» display, select {Current Data Display & Save}.
The following table is for support data.

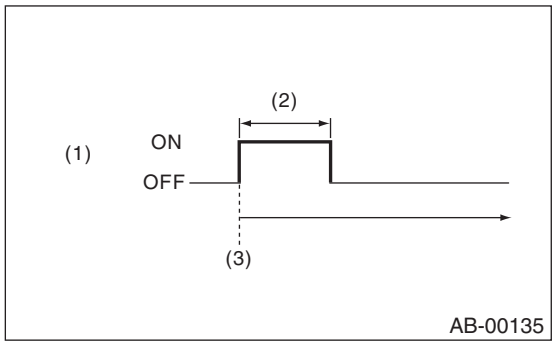
| Item | Display | Note |
|---|---|---|
| Trip Count | — | — |
| Count | — | — |
| Time Count | — | — |
| Belt Buckle Switch RH | Unbelted/Belted | “Belted” when passenger’s seat belt is fastened<br>“Unbelted” when passenger’s seat belt is not fastened |
| Passenger Occupant Status | Occupied/Empty or CRS | “Occupied” when the occupant is present<br>“Empty or CRS” when the seat is unoccupied or when child restraint seat is installed |
| Passenger Airbag Status | ON/OFF | “ON” when the passenger occupant status is “Occupied”<br>“OFF” when the status is “Empty or CRS” |

NOTE:
For detailed operation procedures, refer to “PC application help for Subaru Select Monitor”.

# 12. Airbag Warning Light Illumination Pattern

## A: INSPECTION

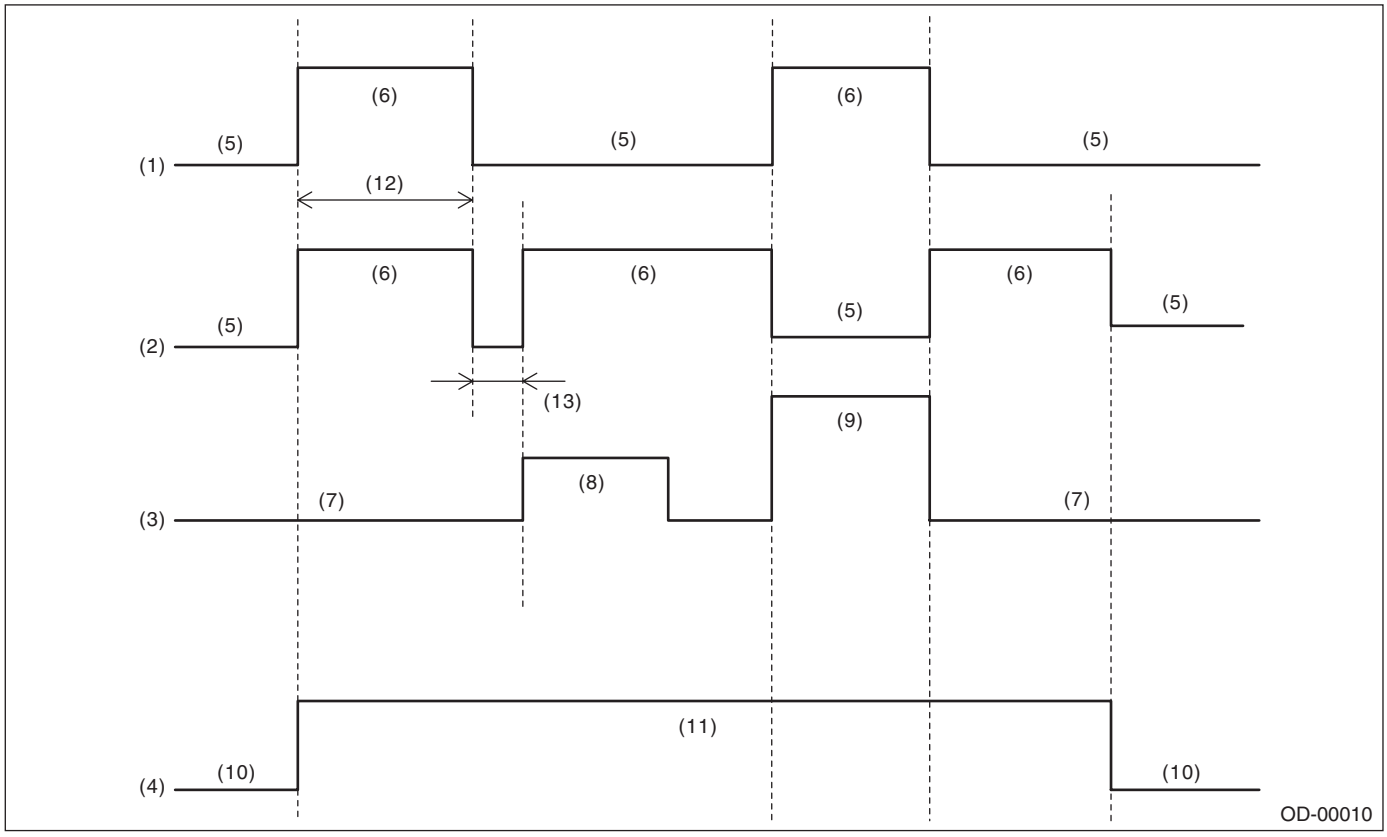
Turn the ignition switch to ON, and confirm that the airbag warning light remains on for approx. 6 seconds and then goes off afterwards.



(1) Airbag warning light
(2) Approx. 6 sec.
(3) Ignition switch ON

# 13.Passenger's Airbag ON/OFF Indicator Light Illumination Pattern

## A: INSPECTION



| | | | | | |
|---|---|---|---|---|---|
| (1) | Passenger's airbag ON indicator light | (6) | Light ON | (10) | OFF |
| (2) | Passenger's airbag OFF indicator light | (7) | Empty | (11) | ON |
| (3) | Occupant seating | (8) | Child | (12) | Approx. 6 sec. |
| (4) | Ignition switch | (9) | Adult | (13) | Approx. 2 sec. |
| (5) | Light OFF | | | | |

# 14.List of Diagnostic Trouble Code (DTC)

## A: LIST

| DTC | Item | Content of diagnosis | Reference |
|---|---|---|---|
| B1650 | Occupant Classification System Malfunction | • Occupant detection sensor is faulty.<br>• Occupant detection control module is faulty.<br>• Occupant detection harness is faulty.<br>• Fuse No. 25 is blown. | <Ref. to OD(diag)-19, DTC B1650 OCCUPANT CLASSIFICATION SYSTEM MALFUNCTION, Diagnostic Procedure with Diagnostic Trouble Code (DTC).> |
| B1655 | Front Buckle Switch RH Failure | • Passenger's buckle switch circuit is open, shorted or shorted to ground.<br>• Occupant detection system is faulty.<br>• Occupant detection harness is faulty. | <Ref. to OD(diag)-21, DTC B1655 FRONT BUCKLE SWITCH RH FAILURE, Diagnostic Procedure with Diagnostic Trouble Code (DTC).> |
| B1760 | Sensor mat abnormal | • Occupant detection sensor is faulty.<br>• Occupant detection sensor is open, shorted between terminals, shorted to power supply or shorted to ground.<br>• Seat heater is open.<br>• Occupant detection control module is faulty. | <Ref. to OD(diag)-22, DTC B1760 SENSOR MAT ABNORMAL, Diagnostic Procedure with Diagnostic Trouble Code (DTC).> |
| B1761 | Sensor mat liquid coating abnormal | • Detected that the occupant detection sensor is spattered with fluid.<br>• Occupant detection sensor is faulty.<br>• Occupant detection control module is faulty. | <Ref. to OD(diag)-22, DTC B1761 SENSOR MAT LIQUID COATING ABNORMAL, Diagnostic Procedure with Diagnostic Trouble Code (DTC).> |
| B1771 | Buckle switch abnormal | • Passenger's buckle switch is faulty.<br>• Passenger's buckle switch circuit is open, shorted or shorted to ground.<br>• Occupant detection system is faulty.<br>• Occupant detection harness is faulty. | <Ref. to OD(diag)-22, DTC B1771 BUCKLE SWITCH ABNORMAL, Diagnostic Procedure with Diagnostic Trouble Code (DTC).> |
| B1795 | ECU internal circuit fault | Occupant detection control module is faulty. | <Ref. to OD(diag)-22, DTC B1795 ECU INTERNAL CIRCUIT FAULT, Diagnostic Procedure with Diagnostic Trouble Code (DTC).> |

# 15.Diagnostic Procedure with Diagnostic Trouble Code (DTC)

## A: DTC B1650 OCCUPANT CLASSIFICATION SYSTEM MALFUNCTION

**DTC DETECTING CONDITION:**

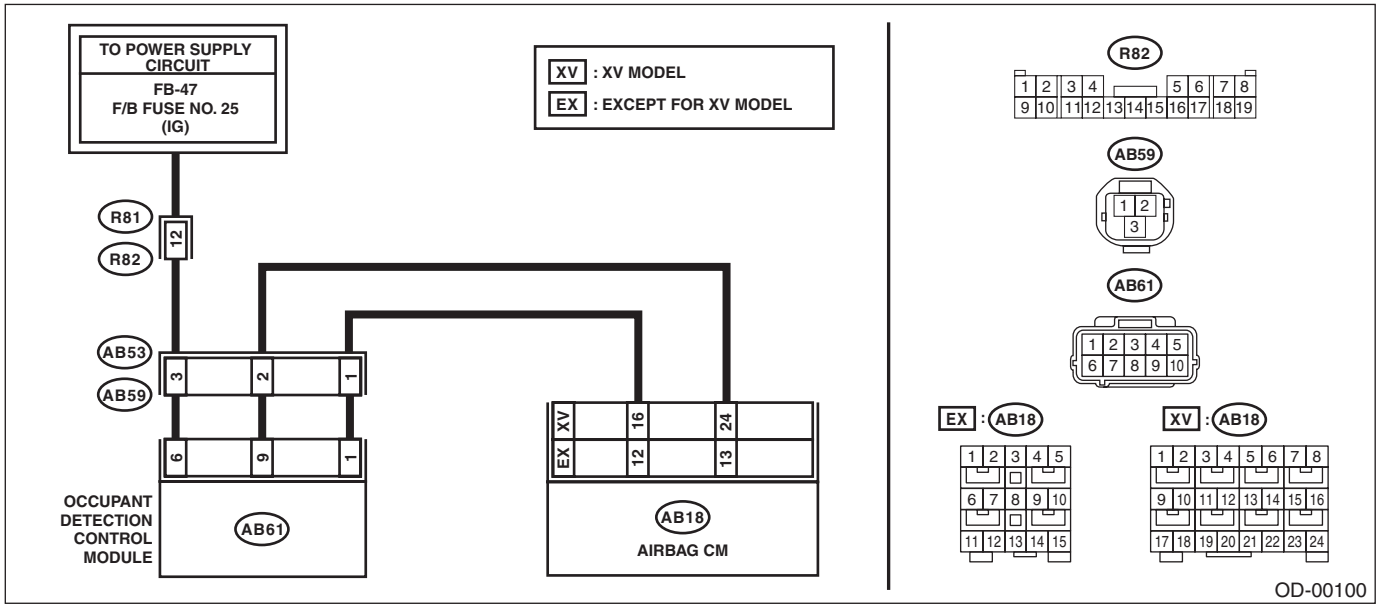
- Occupant detection sensor is faulty.
- Occupant detection control module is faulty.
- Occupant detection harness is faulty.
- Rear airbag harness is faulty.

**CAUTION:**

**Before performing diagnosis, refer to "CAUTION" in "General Description". <Ref. to AB(diag)-4, CAUTION, General Description.>**

**WIRING DIAGRAM:**

Occupant Detection System <Ref. to WI-113, WIRING DIAGRAM, Occupant Detection System.>



| Step | | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK DTC.**<br>Read the DTC of the occupant detection system. | Is any of DTC B1760, B1761, B1771 and B1795 detected? | Perform the diagnosis according to DTC. | Go to step **2**. |
| 2 | **CHECK POOR CONTACT OF CONNECTORS.**<br>Check for poor contact of the connectors between the occupant detection control module and airbag control module. | Is there poor contact? | Reconnect the connector. If defective is not improved, replace the airbag rear harness along with the body harness or the occupant detection harness (seat harness). | Go to step **3**. |

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 3 | **CHECK AIRBAG REAR HARNESS.**<br>1) Turn the ignition switch to OFF, disconnect the battery ground cable, and wait for 60 seconds or more.<br>2) Disconnect the connectors (AB59) and (AB53) under the passenger's seat.<br>3) Disconnect the connectors (AB6, AB17, AB18) from the airbag control module, and connect the connector (1AG) in the test harness AG to connectors (AB6, AB17, AB18).<br>NOTE:<br>Except for XV models, connect test harness AH between the connectors (AB6, AB17, AB18) and (1AG).<br>4) Connect the connector (1AP) in the test harness AP to the connector (AB53).<br>5) Measure the resistance between connector (5AG) in the test harness AG and connector (2AP) in the test harness AP.<br>***Connector & terminal***<br>***XV model***<br>***(6AG) No. 9 — (2AP) No. 2:***<br>***(6AG) No. 11 — (2AP) No. 1:***<br>***Except for XV model***<br>***(5AG) No. 5 — (2AP) No. 1:***<br>***(5AG) No. 16 — (2AP) No. 2:*** | Is the resistance less than 10 Ω? | Go to step **4**. | Replace the airbag rear harness along with body harness. |
| 4 | **CHECK AIRBAG REAR HARNESS.**<br>Measure the resistance between connector (5AG) in the test harness AG and chassis ground.<br>***Connector & terminal***<br>***XV model***<br>***(6AG) No. 9 — Chassis ground:***<br>***(6AG) No. 11 — Chassis ground:***<br>***(6AG) No. 9 — (6AG) No. 11:***<br>***Except for XV model***<br>***(5AG) No. 5 — Chassis ground:***<br>***(5AG) No. 16 — Chassis ground:***<br>***(5AG) No. 5 — (5AG) No. 16:*** | Is the resistance 1 MΩ or more? | Go to step **5**. | Replace the airbag rear harness along with body harness. |
| 5 | **CHECK OCCUPANT DETECTION HARNESS.**<br>1) Turn the ignition switch to ON.<br>2) Measure the voltage between connector (2AB) in the test harness AB and chassis ground.<br>***Connector & terminal***<br>***(2AP) No. 3 (+) — Chassis ground (–):*** | Is the voltage 10 V or more? | Replace the occupant detection harness (seat harness). If defective is not improved, replace the occupant detection system (seat cushion & frame assembly), and then the airbag control module in this order. <Ref. to SE-16, PASSENGER'S SEAT, DISASSEMBLY, Front Seat.> | Check the battery voltage and fuse. If there is no fault, replace the airbag rear harness together with body harness. |

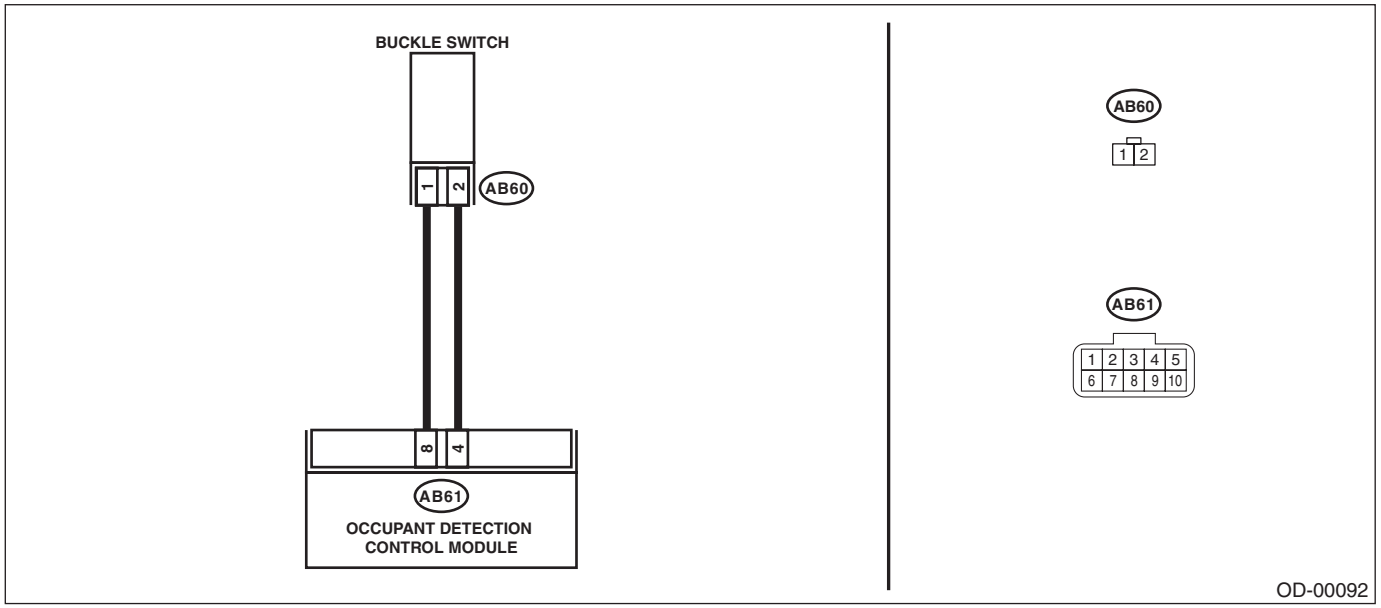
# B: DTC B1655 FRONT BUCKLE SWITCH RH FAILURE

**DTC DETECTING CONDITION:**

- Passenger's buckle switch circuit is open, shorted or shorted to ground.
- Seat harness circuit is open, shorted or shorted to ground.
- Occupant detection control module is faulty.

**WIRING DIAGRAM:**

Occupant Detection System <Ref. to WI-113, WIRING DIAGRAM, Occupant Detection System.>



| Step | | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK DTC.**<br>Read the DTC of the occupant detection system. | Is any of DTC B1760, B1761, B1771 and B1795 detected? | Perform the diagnosis according to DTC. | Go to step **2**. |
| 2 | **CHECK POOR CONTACT OF CONNECTORS.**<br>Check for poor contact of the connectors between the occupant detection control module and buckle switch. | Is there poor contact? | Reconnect the connector. If the fault is not fixed, replace the airbag harness. | Go to step **3**. |
| 3 | **CHECK BUCKLE SWITCH.**<br>1) Turn the ignition switch to OFF, disconnect the battery ground terminal, and wait for 60 seconds.<br>2) Disconnect the buckle switch connector (AB60).<br>3) Connect the test harness AE and test harness connector Y to buckle switch connector (AB60).<br>4) Connect the battery ground terminal and turn the ignition switch to ON. | Does the airbag warning light illuminate for 6 seconds and go off? | Replace the buckle switch. <Ref. to SB-16, SEAT BELT OUTER - FRONT, REMOVAL, Front Seat Belt.> | Check the seat harness, and if any fault is found, replace the seat harness. If the fault is not fixed, replace the occupant detection system. <Ref. to SE-16, PASSENGER'S SEAT, DISASSEMBLY, Front Seat.> |

## C: DTC B1760 SENSOR MAT ABNORMAL

**DTC DETECTING CONDITION:**

- Occupant detection sensor circuit is open, shorted between terminals, shorted to power supply or shorted to ground.
- Seat heater circuit is open.
- Occupant detection control module is faulty.

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK POOR CONTACT OF CONNECTORS.**<br>Check for poor contact of connectors between the occupant detection control module and the occupant detection sensor. | Is there poor contact of connector? | Reconnect the connector. If the fault is not fixed, replace the occupant detection harness or replace the occupant detection system (passenger's & frame assembly). | Replace the occupant detection system (passenger's & frame assembly). <Ref. to SE-16, PASSENGER'S SEAT, DISASSEMBLY, Front Seat.> |

## D: DTC B1761 SENSOR MAT LIQUID COATING ABNORMAL

**DTC DETECTING CONDITION:**

- Occupant detection sensor is spattered with fluid.
- Occupant detection sensor is faulty.
- Occupant detection control module is faulty.

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 1 | **DRY THE SEAT.**<br>1) Open the vehicle windows in a well-ventilated place indoors and dry the seat for 24 hours.<br>2) Read the DTC of the occupant detection system. | Is DTC B1761 detected? | Replace the occupant detection system (passenger's & frame assembly). <Ref. to SE-16, PASSENGER'S SEAT, DISASSEMBLY, Front Seat.> | Clear the memory. |

## E: DTC B1771 BUCKLE SWITCH ABNORMAL

**DTC DETECTING CONDITION:**

- Passenger's seat buckle switch is faulty.
- Passenger's buckle switch circuit is open, shorted or shorted to ground.
- Occupant detection system is faulty.
- Occupant detection harness is faulty.

Perform the diagnosis from Step 2 in "DTC B1655 FRONT BUCKLE SWITCH RH FAILURE". <Ref. to OD(diag)-21, DTC B1655 FRONT BUCKLE SWITCH RH FAILURE, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>

## F: DTC B1795 ECU INTERNAL CIRCUIT FAULT

**DTC DETECTING CONDITION:**

Occupant detection control module is faulty.

When "DTC B1795 ECU INTERNAL CIRCUIT FAULT" is displayed, the occupant detection control module is faulty. Replace the occupant detection system (passenger's & frame assembly). <Ref. to SE-16, PASSENGER'S SEAT, DISASSEMBLY, Front Seat.>

# SEAT BELT SYSTEM

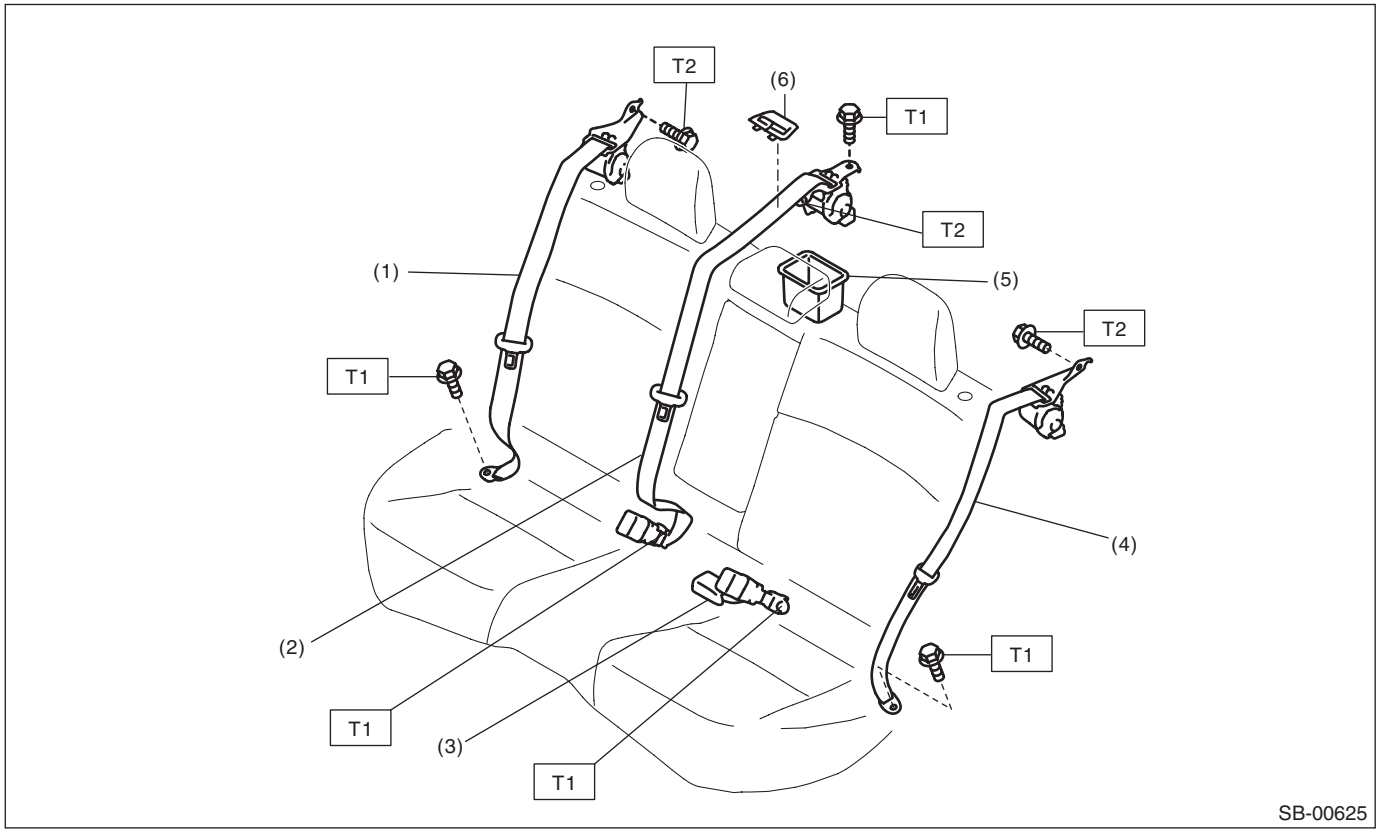
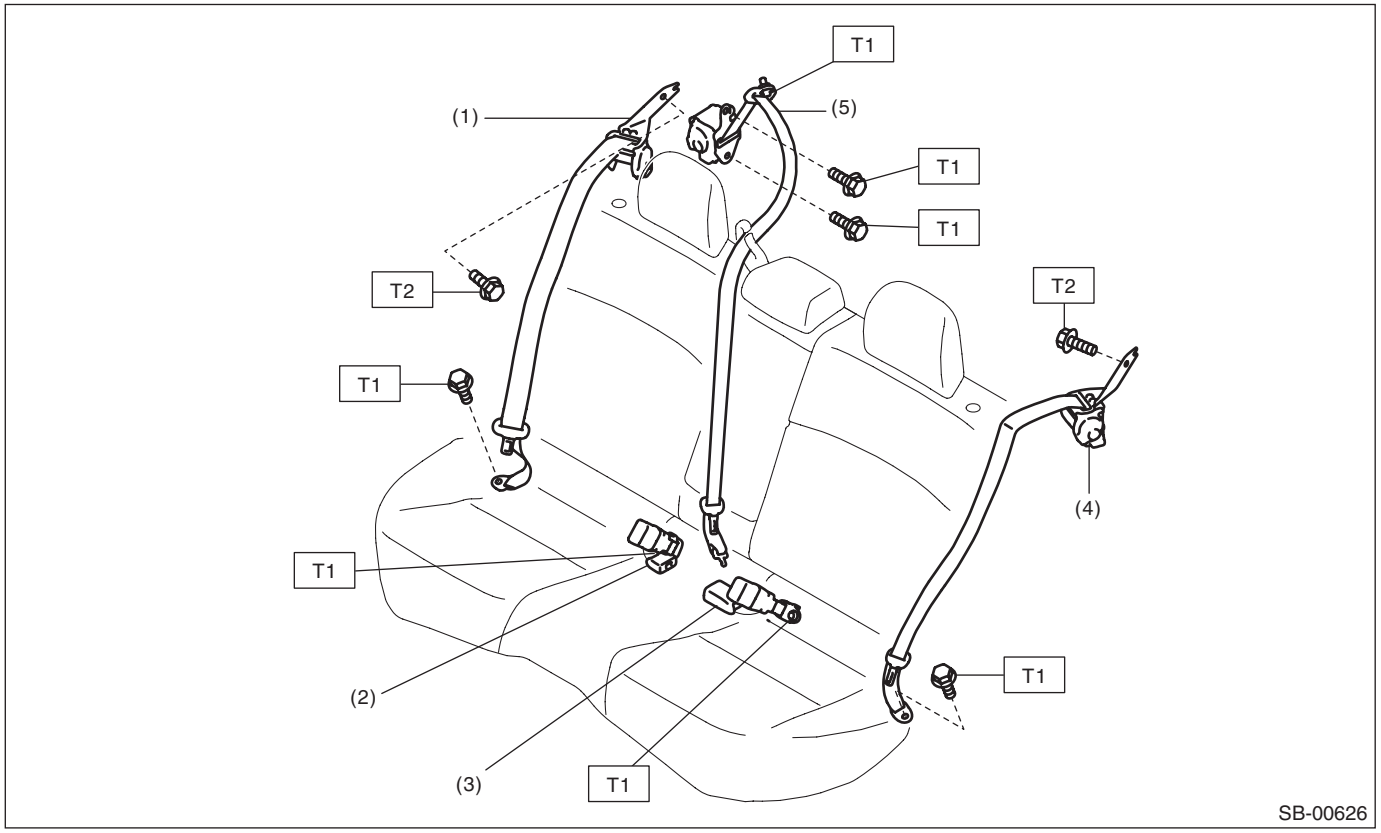
## 2. REAR SEAT BELT (4 DOOR MODEL)



| | | | |
|---|---|---|---|
| (1) | Seat belt outer - rear RH | (4) | Seat belt outer - rear LH |
| (2) | Seat belt - rear shoulder CTR | (5) | Cover - ELR |
| (3) | Seat belt - CTR LH | (6) | Cover - belt rear |

***Tightening torque: N·m (kgf-m, ft-lb)***
***T1: 30 (3.06, 22.1)***
***T2: 53 (5.40, 39.1)***

## 3. REAR SEAT BELT (5 DOOR MODEL/XV MODEL)



(1) Seat belt outer - rear RH
(2) Seat belt - CTR RH
(3) Seat belt - CTR LH
(4) Seat belt outer - rear LH
(5) Seat belt - rear shoulder CTR

***Tightening torque: N·m (kgf-m, ft-lb)***
***T1: 30 (3.06, 22.1)***
***T2: 53 (5.40, 39.1)***

## B: CAUTION

- Before starting the work, turn the ignition switch to OFF, disconnect the battery ground cable and wait for 60 seconds or more.
- The pretensioner system is fitted with a backup power supply. After disconnecting the battery ground cable, the pretensioner may operate if you do not wait for 60 seconds or more before starting pretensioner system servicing.
- Do not drop or apply any impact to the pretensioner.
- If oil, grease or water gets on the pretensioner, wipe it off immediately with a dry cloth.
- Do not expose the pretensioner to high temperature or flame.
- Do not allow current to flow through or voltage to reach the pretensioner. Do not use a circuit tester to check resistance of the pretensioner.
- Do not disassemble or attempt to repair the pretensioner. If it is dented, cracked or deformed, replace it with a new genuine part.
- Do not use the airbag or pretensioner parts from other vehicles. Always use a new genuine part for replacement.
- When handling a seat belt with deployed pretensioner, wear gloves and goggles. Wash your hands afterwards.
- Do not reuse a seat belt with deployed pretensioner.
- Before disposal, make sure to perform an operation process to the pretensioners.
- If material from the pretensioner enters the eyes or contacts skin during operation process, wash it away with clean water, and then consult a doctor.

|---|---|
| Circuit tester | Used for measuring resistance and voltage. |

# 2. Pretensioner Connector

## A: PROCEDURE

For connectors of seat belt pretensioner, lap seat belt pretensioner and buckle switch RH, refer to “Airbag Connector” of “AIRBAG SYSTEM” section or “OCCUPANT DETECTION SYSTEM” section.

- Airbag system: <Ref. to AB-20, PROCEDURE, Airbag Connector.>
- Occupant detection system: <Ref. to OD(diag)-9, PROCEDURE, Airbag Connector.>

# 3. Inspection Locations after a Collision

## A: INSPECTION

Refer to “Inspection Locations after a Collision” of “AIRBAG SYSTEM” section. <Ref. to AB-34, Inspection Locations after a Collision.>

# 4. Seat Belt Warning System

## A: WIRING DIAGRAM

Refer to “Seat Belt Warning System” in the wiring diagram. <Ref. to WI-136, WIRING DIAGRAM, Seat Belt Warning System.>

## B: INSPECTION

**CAUTION:**
**• Before diagnosing the seat belt warning system and airbag system, always turn the ignition switch to OFF, disconnect the battery ground cable, and then wait for 60 seconds or more.**
**• When inspecting the airbag main harness, disconnect the connectors of the driver’s airbag module, passenger’s airbag module and knee airbag module for safety reasons.**
**• When inspecting the airbag rear harness, disconnect the side airbag module connector, curtain airbag module connector and seat belt pretensioner connector for safety reasons.**

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK FUNCTION.**<br>1) Sit on the driver’s seat and passenger’s seat and disconnect the seat belts of the both.<br>2) Turn the ignition switch to ON (engine OFF).<br>3) Check the illumination of the driver’s seat belt warning light in the combination meter, and the passenger’s seat belt warning light in the MFD, and the sounding of the buzzer. | Do the driver’s warning light and passenger’s warning light blink and the buzzer sound while blinking? | Go to step **2**. | Go to step **12**. |
| 2 | **CHECK FUNCTION.**<br>1) Wait until the buzzer sound stops in step 1. (for approximately six seconds after starting sounding)<br>2) Connect and disconnect the seat belts of the driver’s and passenger’s.<br>3) Check the illumination of the driver’s seat belt warning light in the combination meter and the passenger’s seat belt warning light in the MFD. | Do the seat belts warning light illuminate ←→ go off according to the operation? | Go to step **3**. | Go to step **8**. |
| 3 | **CHECK FUNCTION.**<br>1) Wait until the buzzer sound stops in step 2. (for approximately six seconds after starting sounding)<br>2) Start the engine, and set the vehicle speed at 20 km/h (12 MPH) or more.<br>3) Check the seat belt warning lights of the driver’s and the passenger’s, and if the warning buzzer sounds. | Do the driver’s warning light and passenger’s warning light blink and the buzzer sound while blinking? | Go to step **4**. | Go to step **14**. |
| 4 | **CHECK HARNESS.**<br>1) Disconnect the negative terminal from the battery, and wait for 60 seconds or more.<br>2) Disconnect the connectors of the combination meter and the seat belt buckle switch LH.<br>3) Check for short circuit to battery, open circuit and short circuit to ground between the combination meter and the seat belt buckle switch LH.<br>***Connector & terminal***<br>***(i10) No. 15 — (R107) No. 2:*** | Is the harness normal? | Go to step **5**. | Repair or replace the harness. |
| 5 | **CHECK HARNESS.**<br>Measure the resistance between the seat belt buckle switch LH and chassis ground.<br>***Connector & terminal***<br>***(R107) No. 1 — Chassis ground:*** | Is the resistance less than 10 Ω? | Go to step **6**. | Repair or replace the harness. |

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 6 | **CHECK SEAT BELT BUCKLE SWITCH LH.**<br>Measure the resistance between the connector terminals of the driver's seat belt switch when the driver's seat belt is fastened and detached.<br>***Connector & terminal***<br>***(R107) No. 2 — (R107) No. 1:*** | Is the resistance when the belt is fastened 1 MΩ or more, and less than 10 Ω when the belt is detached? | Go to step **7**. | Replace the seat belt inner - front LH. <Ref. to SB-16, SEAT BELT OUTER - FRONT, REMOVAL, Front Seat Belt.> |
| 7 | **CHECK COMBINATION METER.**<br>Perform the self-diagnosis of combination meter. <Ref. to IDI-7, SELF-DIAGNOSIS DISPLAY MODE, OPERATION, Combination Meter System.> | At the start of combination meter self diagnosis, did the buzzer sound and the seat belt warning light illuminate? | Replace the body integrated unit or the combination meter. Or replace both. It may be due to the transmission failure of the body integrated unit or the reception failure of the combination meter. | Replace the combination meter. <Ref. to IDI-17, REMOVAL, Combination Meter.> |
| 8 | **CHECK CURRENT DATA.**<br>1) Sit in the passenger's seat.<br>2) Select "Current Data Display" and display the data of "P seatbelt SW input".<br>3) Fasten and detach the passenger's side seat belt buckle, and read the data of the seat belt switch. <Ref. to BC(diag)-11, OPERATION, Read Current Data.> | Does the seat belt switch display turn ON ←→ OFF according to the operation of the seat belt buckle? | Go to step **12**. | Go to step **9**. |
| 9 | **CHECK AIRBAG SYSTEM AND OCCUPANT DETECTION SYSTEM.**<br>Perform the check in accordance with the diagnostic procedure DTC B1650 of the airbag system. <Ref. to OD(diag)-19, DTC B1650 OCCUPANT CLASSIFICATION SYSTEM MALFUNCTION, Diagnostic Procedure with Diagnostic Trouble Code (DTC).> | Is there any problem on the inspection result? | Go to step **10**. | Repair or replace with new parts according to DTC B1650. |
| 10 | **CHECK BUCKLE SWITCH RH.**<br>Perform the check in accordance with the diagnostic procedure DTC B1655 of the occupant detection system. <Ref. to OD(diag)-21, DTC B1655 FRONT BUCKLE SWITCH RH FAILURE, Diagnostic Procedure with Diagnostic Trouble Code (DTC).> | Is there any problem on the inspection result? | Go to step **11**. | Repair or replace with new parts according to DTC B1655. |
| 11 | **CHECK AIRBAG CONTROL MODULE AND COMBINATION METER.**<br>Check the airbag control module, occupant detection sensor and seat belt buckle switch RH.<br>Perform the check in accordance with the diagnostic procedure DTC B16F1 of the airbag system. <Ref. to AB(diag)-94, DTC B16F1 PASSENGER'S SEAT BELT WARNING FAILURE, Diagnostic Chart with Trouble Code.> | Is there any problem on the inspection result? | Replace the combination meter. <Ref. to IDI-17, REMOVAL, Combination Meter.> | Repair or replace with new parts according to DTC B16F1. |
| 12 | **CHECK MFD POWER SUPPLY VOLTAGE.**<br>1) Disconnect the MFD connector.<br>2) Turn the ignition switch to ON.<br>3) Measure the voltage between the ignition power supply and the MFD.<br>***Connector & terminal***<br>***(i122) No. 3 (+) — Chassis ground (–):*** | Is the voltage 10 V or more? | Go to step **13**. | Check the harness for open or short between the fuse and MFD. |

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 13 | **CHECK MFD GROUND CIRCUIT.**<br>1) Turn the ignition switch to OFF.<br>2) Measure the resistance between MFD and chassis ground.<br>***Connector & terminal***<br>***(i122) No. 2 — Chassis ground:*** | Is the resistance less than 10 Ω? | Go to step **14**. | Repair or replace the harness. |
| 14 | **CHECK HARNESS BETWEEN MFD AND COMBINATION METER.**<br>1) Disconnect the harness of the MFD and the combination meter.<br>2) Measure the resistance between MFD and combination meter.<br>***Connector & terminal***<br>***(i122) No. 9 — (i10) No. 28:*** | Is the resistance less than 10 Ω? | Go to step **15**. | Repair or replace the harness. |
| 15 | **CHECK COMMUNICATION STATUS BETWEEN MFD AND COMBINATION METER.**<br>1) Remove the MFD, and install a properly operating MFD (new MFD).<br>2) Connect the connector and then turn the ignition switch to ON.<br>***Connector & terminal***<br>***(i122) No. 9 — (i10) No. 28:*** | Is the MFD properly displayed? | Replace the MFD. | Replace the combination meter case assembly. |

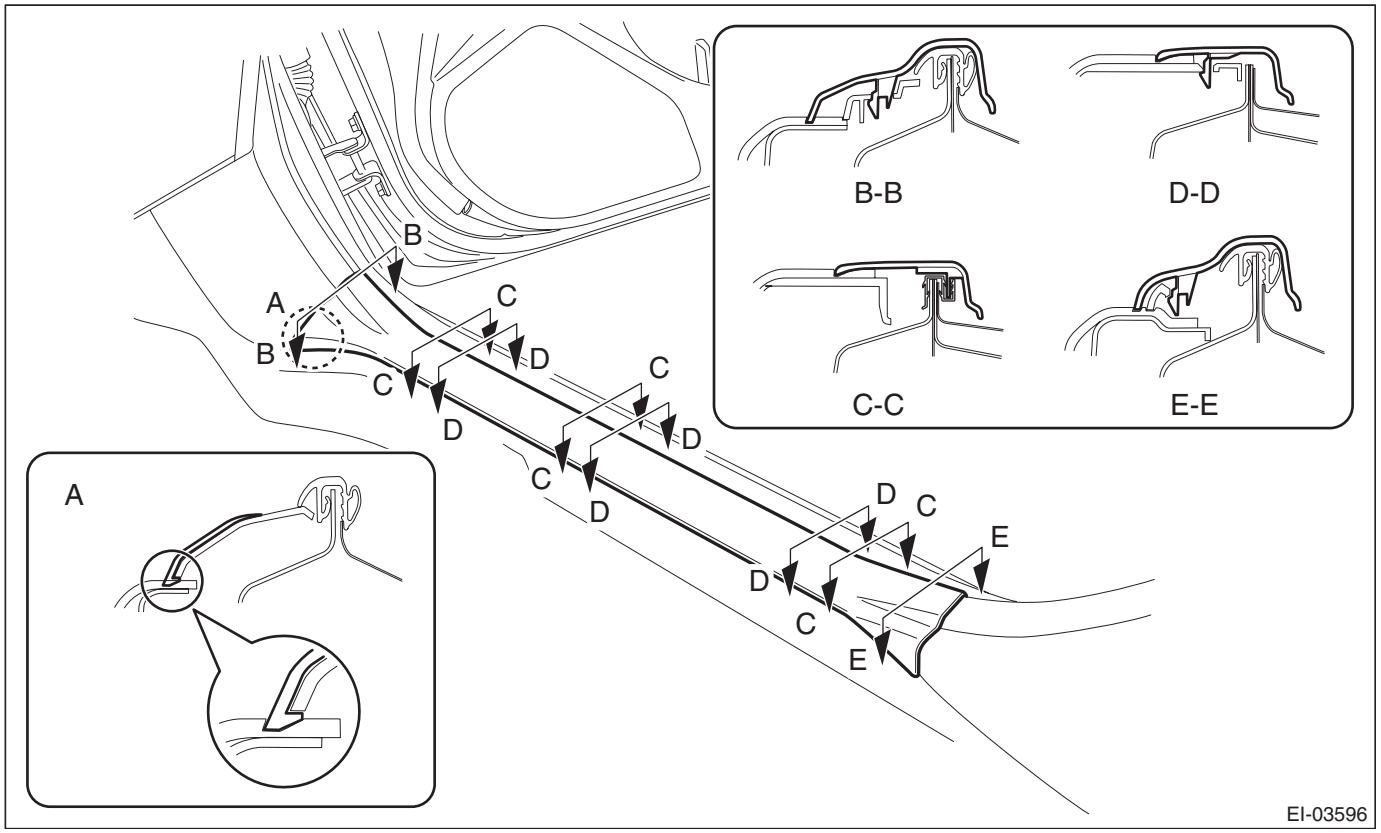
# 5. Front Seat Belt

## A: REMOVAL

### 1. SEAT BELT OUTER - FRONT

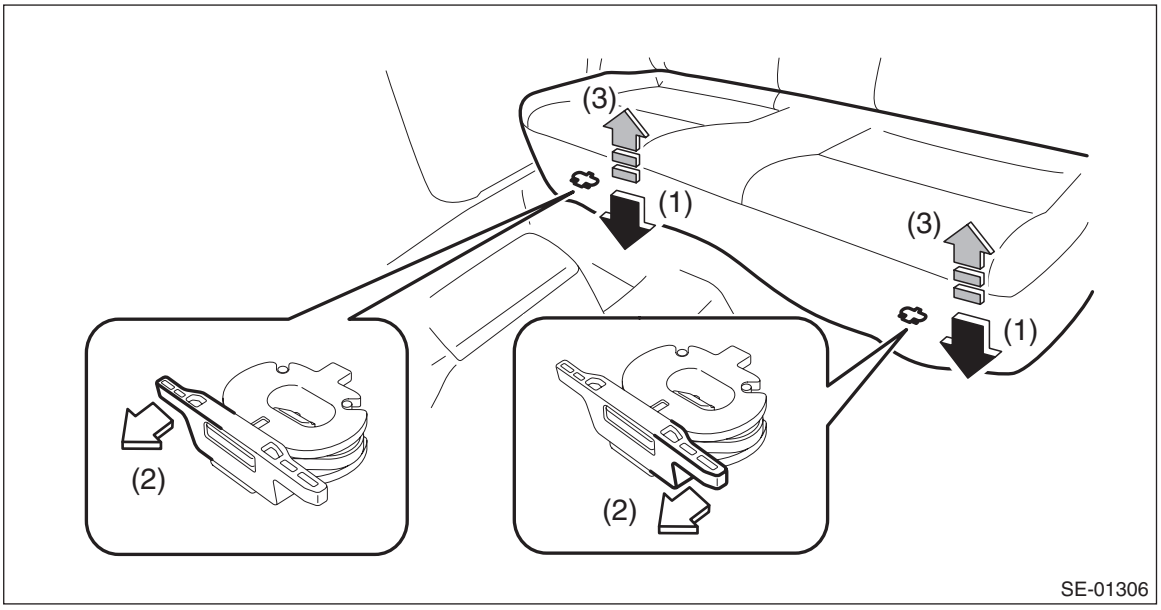
**CAUTION:**
**• The airbag system is fitted with a backup power supply. After disconnecting the battery ground cable, the airbag may operate if you do not wait for 60 seconds before starting the service of airbag system.**
**• Do not drop or subject the pretensioner to any impact.**
**• Since the pretensioner and bracket are integrated as a unit, do not disassemble them.**
1) Before working, turn the ignition switch to OFF, disconnect the battery ground cable, and wait for 60 seconds or more.
2) Tilt the front seat backrest assembly forward, and move the front seat all the way forward.
3) Release the claws, and then remove the cover side sill - front INN. (On the side where seat belt assembly is removed)

**CAUTION:**
**Do not pull with excessive force. Doing so may damage the claws of the cover side sill - front INN.**

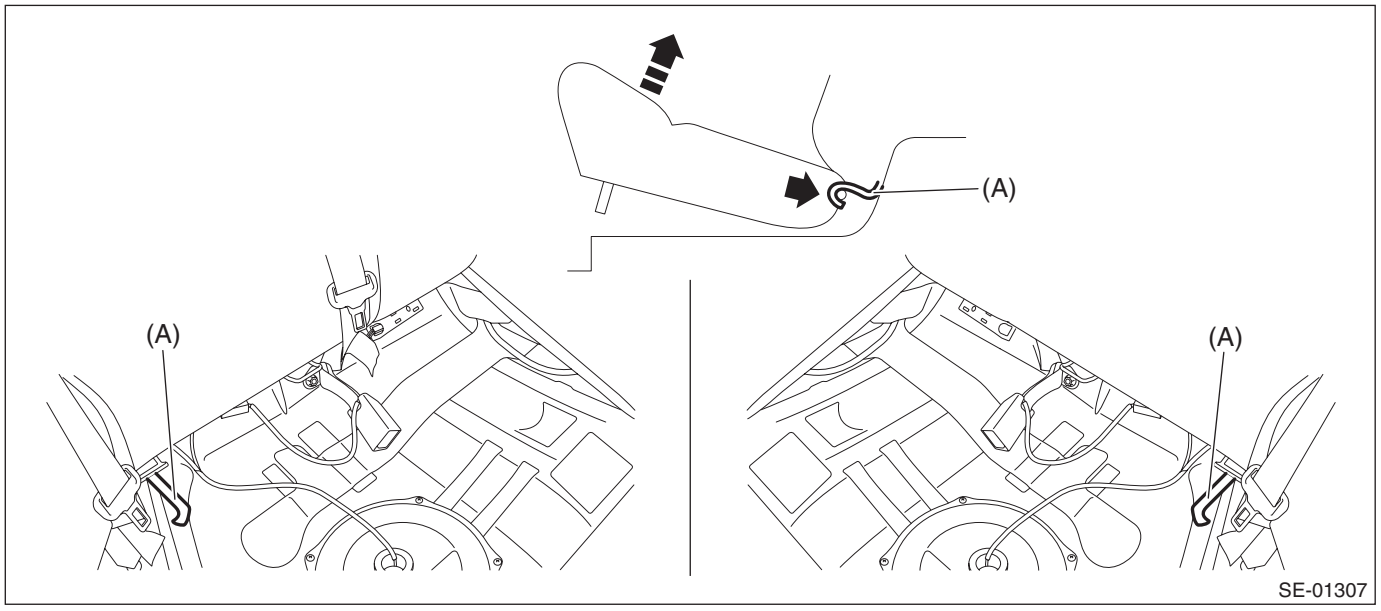


4) Remove the rear seat cushion assembly.
(1) Push the corners of the seat cushion from above.
(2) While pushing the corners of the seat cushion from above, pull the knob of the hook - seat cushion rear towards yourself.
(3) While pulling the knob towards yourself, disconnect the hooks by lifting up the rear seat cushion.

NOTE:
Pull the left side of the knob to disconnect the LH side hook, and pull the right side of the knob to disconnect the RH side hook.

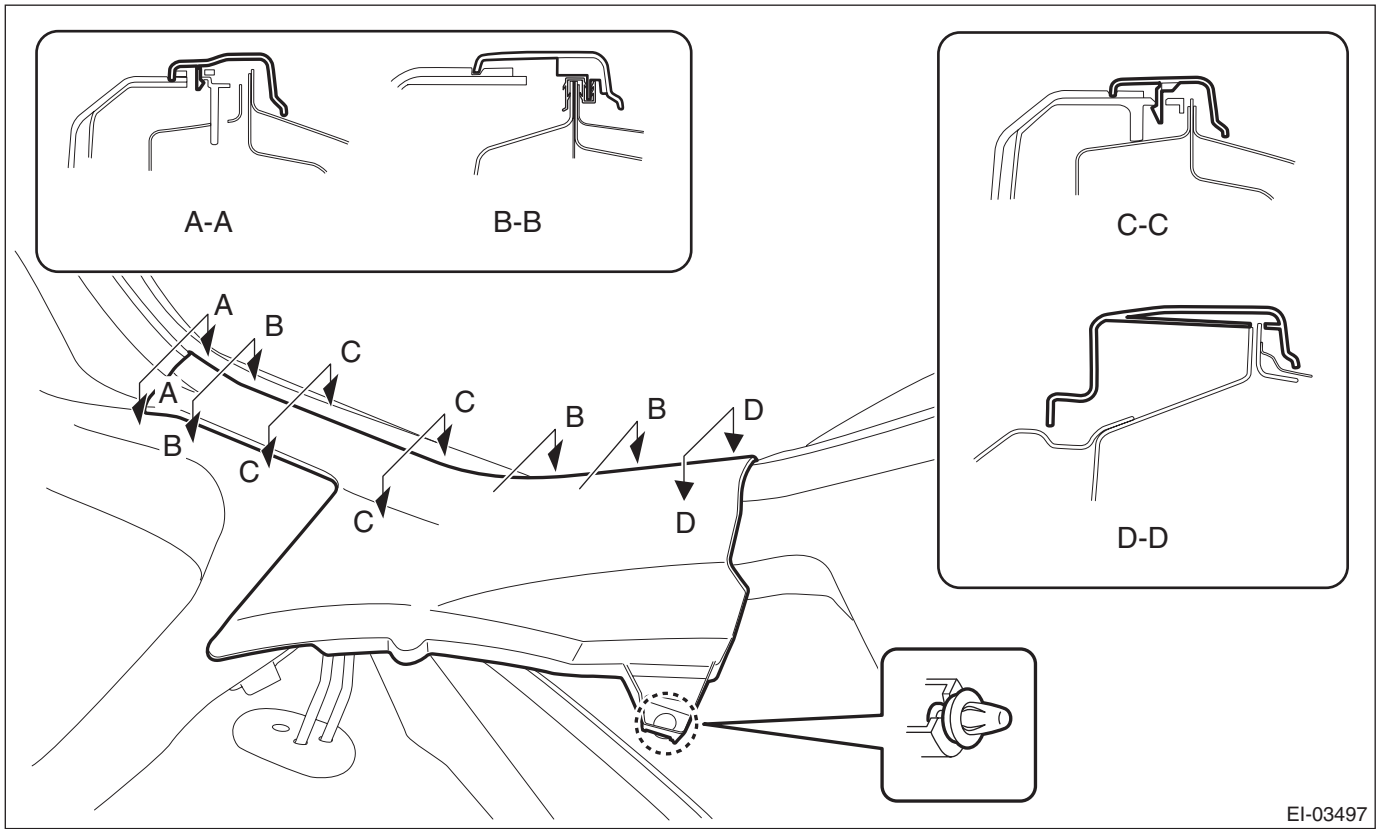


(4) Remove the hook (A) by pushing it back while lifting the front side of the rear seat cushion, and remove the rear seat cushion.



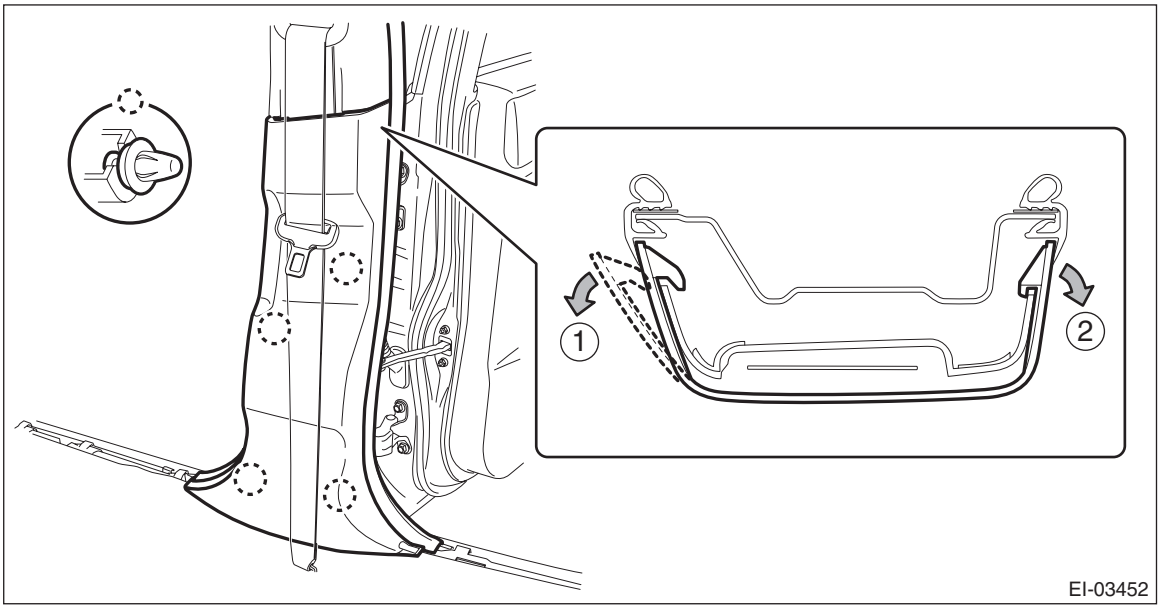
5) Release the clips and claws, and then remove the cover side sill - rear INN. (On the side where seat belt assembly is removed)

**CAUTION:**
**Do not pull with excessive force. Doing so may damage the claws of the cover side sill - rear INN.**



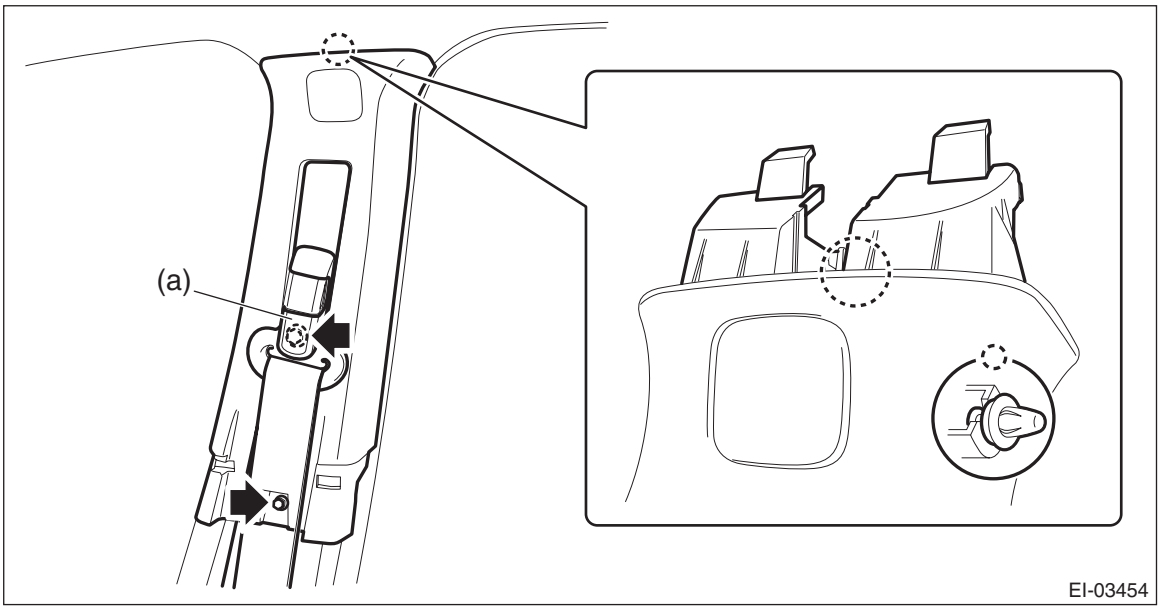
6) Remove the trim panel - center pillar LWR. (On the side where seat belt assembly is removed)
(1) Release the clip by pulling the trim panel - center pillar LWR toward you.
(2) Expand the claws of the trim panel - center pillar LWR outward, and remove it from the trim panel - center pillar UPR.

**CAUTION:**
**Do not expand the trim panel - center pillar LWR excessively. Doing so may damage the trim.**



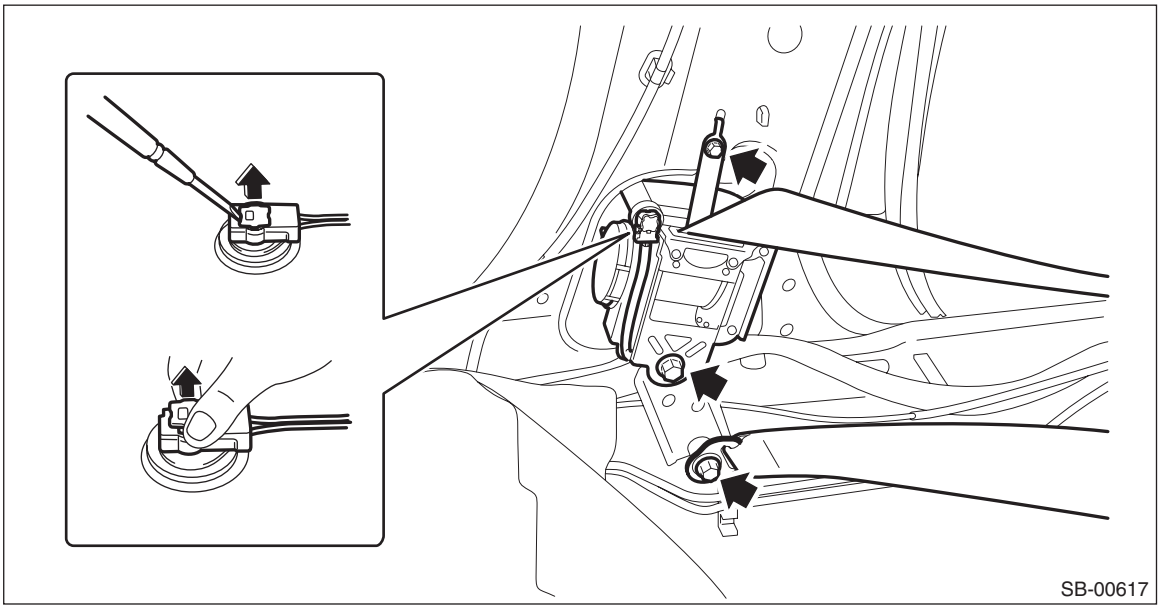
NOTE:
First release the claw located to the front of the vehicle.
7) Remove the trim panel - center pillar UPR. (On the side where seat belt assembly is removed)
(1) Remove the cover through (a), and remove the seat belt anchor bolt.
(2) Remove the bolt on the lower side of the trim panel - center pillar UPR.
(3) Remove the clip by pulling the upper part of the trim toward you, and while lowering the entire trim, remove the trim panel - center pillar UPR.

**CAUTION:**
**Do not reuse the upper clips of the trim panel - center pillar UPR. Once the clip is removed, its holding force is reduced. Be sure to replace it with a new clip.**



8) Remove the seat belt outer - front.
(1) Turn over the floor mat to disconnect the belt tension sensor connector. <Ref. to AB-24, DRIVER'S AIRBAG MODULE, CURTAIN AIRBAG MODULE & PRETENSIONER, PROCEDURE, Airbag Connector.>

NOTE:
For XV model, disconnect the connector of the passenger's lap seat belt pretensioner.
(2) Remove the bolt to remove the seat belt retractor.
(3) Remove the lower anchor bolt, and remove the seat belt outer - front.



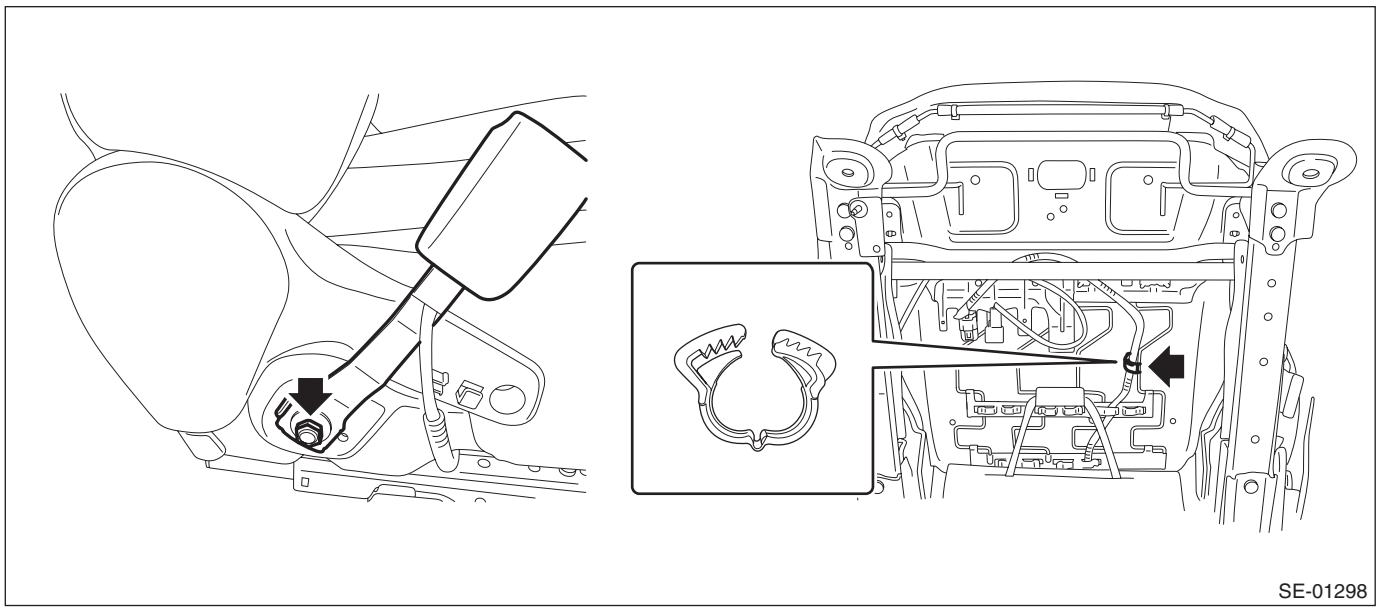
## 2. SEAT BELT INNER - FRONT

**CAUTION:**
**The airbag system is fitted with a backup power supply. After disconnecting the battery ground cable, the airbag may operate if you do not wait for 60 seconds before starting the service of airbag system.**

1) Turn the ignition switch to OFF.
2) Disconnect the ground cable from battery and wait for at least 60 seconds before starting work.
3) Remove the front seats.
   (1) Tilt the backrest assembly forward and move the front seat to the front most position.
   (2) Remove the cover - bolt rear (A) and remove the bolts.

   (3) Move the front seat to the rearmost position, and remove the bolts.
   (4) Disconnect the connector under the front seat.
   • Seat belt warning light connector (driver's seat)
   • Occupant detection system harness connector (passenger's seat) <Ref. to OD(diag)-9, OCCUPANT DETECTION SYSTEM (BETWEEN AIRBAG REAR HARNESS AND SEAT HARNESS), PROCEDURE, Airbag Connector.>
   • Side airbag connector <Ref. to AB-31, SIDE AIRBAG MODULE, PROCEDURE, Airbag Connector.>
   • Seat heater connector (model with seat heater)
   • Buckle switch RH connector (passenger's seat) <Ref. to AB-32, BUCKLE SWITCH RH, PROCEDURE, Airbag Connector.>

4) Remove the seat belt inner - front.
(1) Remove the nut, and remove the seat belt inner - front.
(2) Remove the clip for the inner seat belt harness located under the seat cushion.



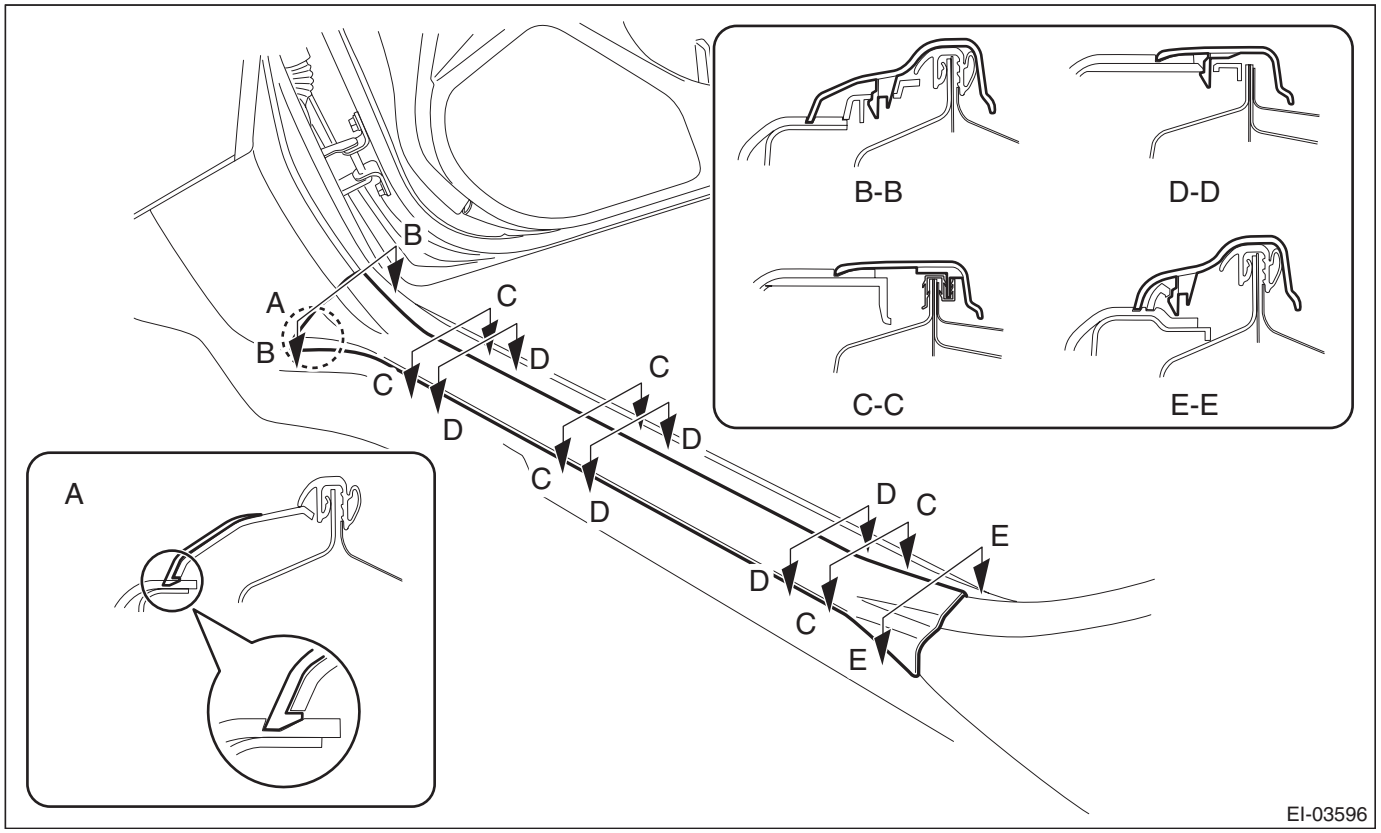
### 3. ADJUSTER ASSEMBLY - SEAT BELT

**CAUTION:**
**• The airbag system is fitted with a backup power supply. After disconnecting the battery ground cable, the airbag may operate if you do not wait for 60 seconds before starting the service of airbag system.**
**• Do not drop or subject the pretensioner to any impact.**
**• Since the pretensioner and bracket are integrated as a unit, do not disassemble them.**

1) Before working, turn the ignition switch to OFF, disconnect the battery ground cable, and wait for 60 seconds or more.
2) Tilt the backrest assembly forward and move the front seat to the front most position.

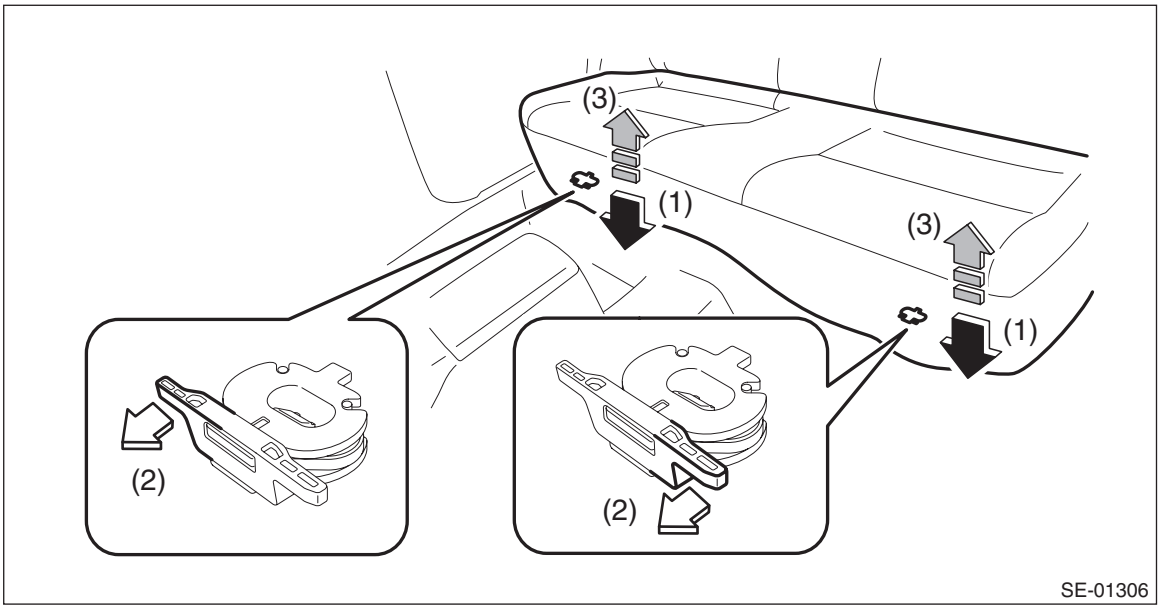
3) Release the claws, and then remove the cover side sill - front INN.

**CAUTION:**
**Do not pull with excessive force. Doing so may damage the claws of the cover side sill - front INN.**

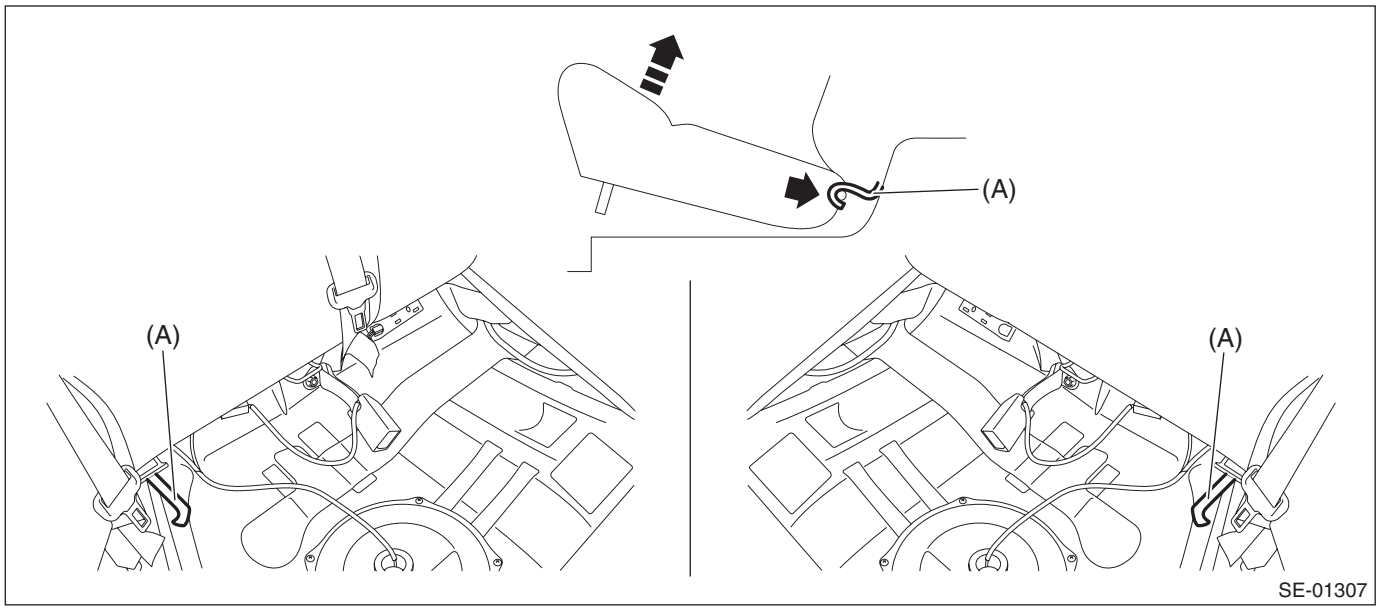


4) Remove the rear seat cushion assembly.
(1) Push the corners of the rear seat cushion from above.
(2) While pushing the corners of the rear seat cushion from above, pull the knob of the hook - seat cushion rear towards yourself.
(3) While pulling the knob towards yourself, disconnect the hooks by lifting up the rear seat cushion.

NOTE:
Pull the left side of the knob to disconnect the LH side hook, and pull the right side of the knob to disconnect the RH side hook.

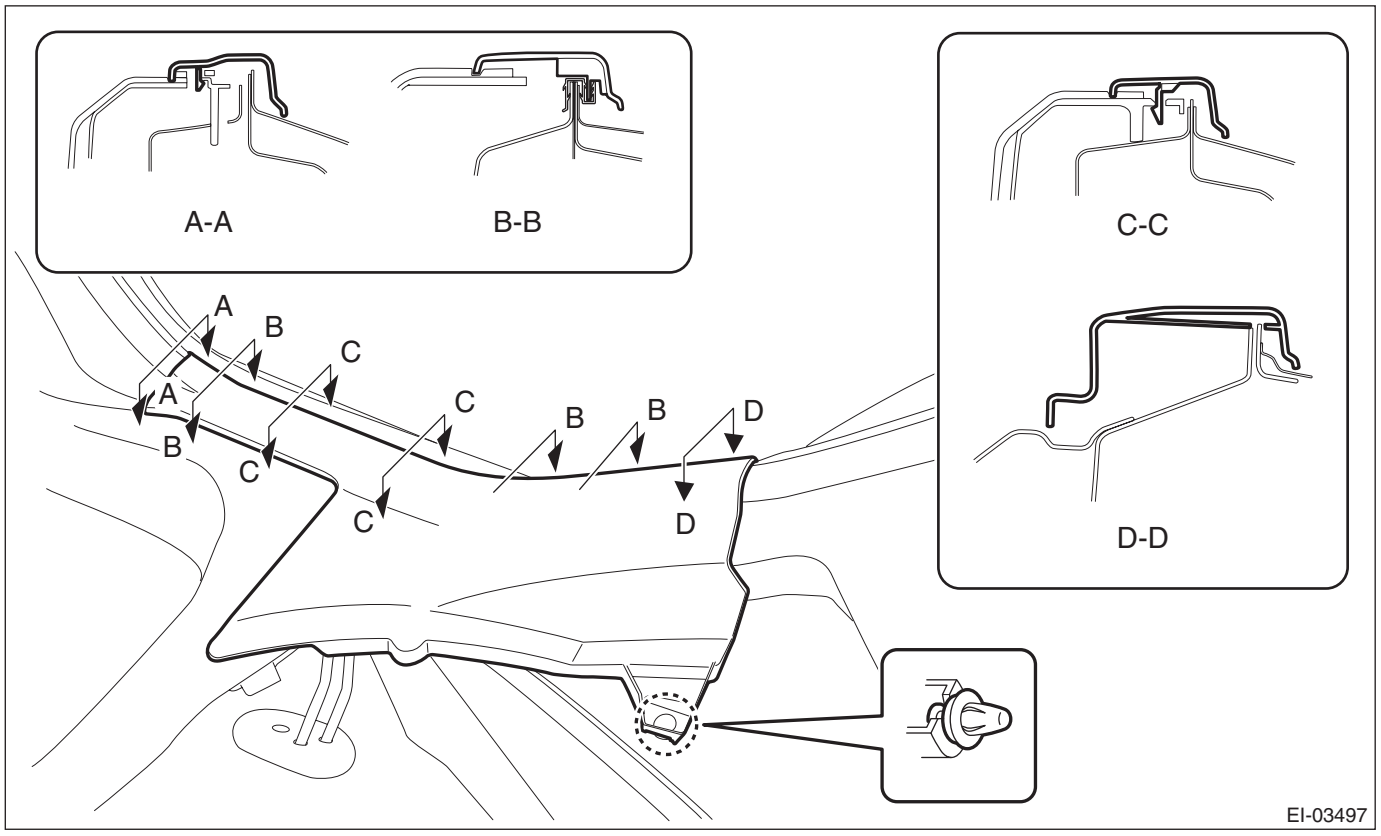


(4) Remove the hook (A) by pushing it back while lifting the front side of the rear seat cushion, and remove the rear seat cushion.



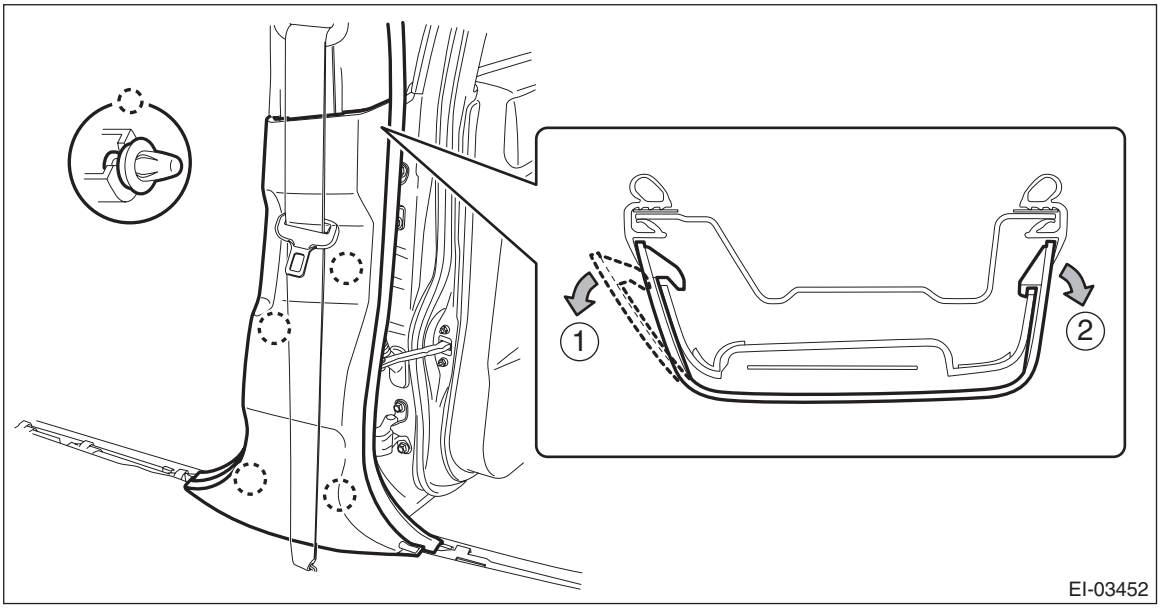
5) Release the clips and claws, and then remove the cover side sill - rear INN.

**CAUTION:**
**Do not pull with excessive force. Doing so may damage the claws of the cover side sill - rear INN.**



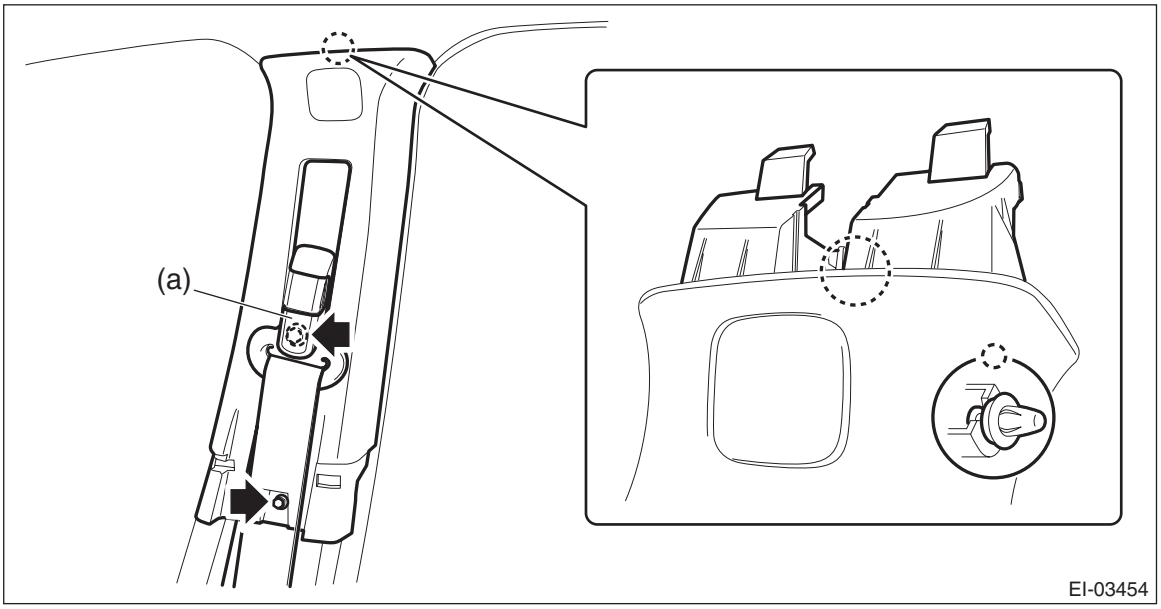
6) Remove the trim panel - center pillar LWR.
(1) Release the clip by pulling the trim panel - center pillar LWR toward you.
(2) Expand the claws of the trim panel - center pillar LWR outward, and remove it from the trim panel - center pillar UPR.

**CAUTION:**
**Do not expand the trim panel - center pillar LWR excessively. Doing so may damage the trim.**

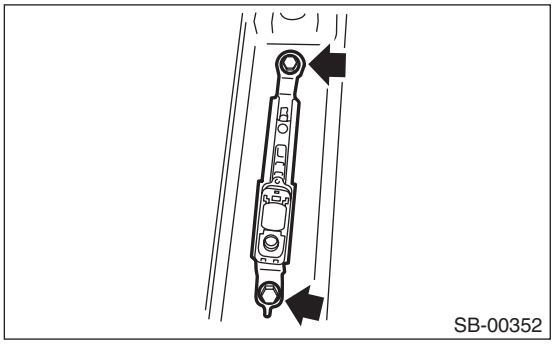


NOTE:
First release the claw located to the front of the vehicle.
7) Remove the trim panel - center pillar UPR.
(1) Remove the cover through (a), and remove the seat belt anchor bolt.
(2) Remove the bolt on the lower side of the trim panel - center pillar UPR.
(3) Remove the clip by pulling the upper part of the trim toward you, and while lowering the entire trim, remove the trim panel - center pillar UPR.

**CAUTION:**
**Do not reuse the upper clips of the trim panel - center pillar UPR. Once the clip is removed, its holding force is reduced. Be sure to replace it with a new clip.**



8) Remove the bolts, and then remove the adjuster assembly - seat belt.



## B: INSTALLATION

### 1. SEAT BELT OUTER - FRONT

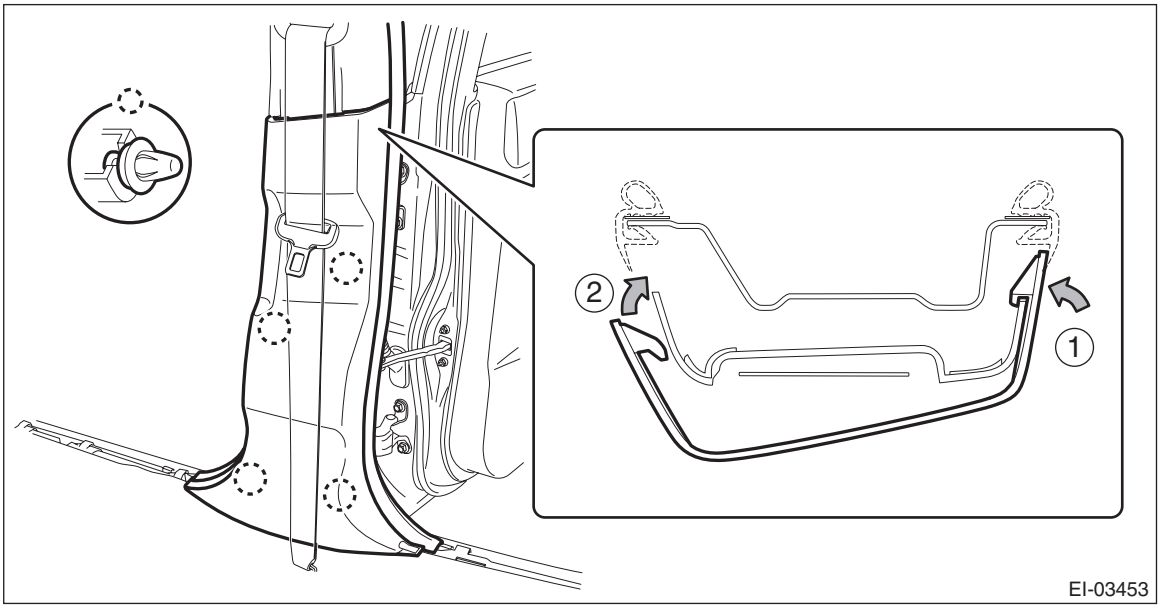
**CAUTION:**
**• The parts of the driver and passenger sides are not the same. Before installation, make sure that the correct part is used.**
**• During installation, make sure that the seat belts are not twisted.**
**• After installation, make sure that the seat belt can be pulled out and retracted smoothly.**
**• Make sure that the seat belt harness is not caught anywhere. Wrong harness rooting may cause the harness short from pinch.**
**• Do not reuse the upper clips of the trim panel - center pillar UPR. Once the clip is removed, its holding force is reduced. Be sure to replace it with a new clip.**

1) Before installation, perform a unit inspection of retractor. <Ref. to SB-28, INSPECTION, Front Seat Belt.>
2) Install the seat belt outer - front.

***Tightening torque:***
***Front seat belt: <Ref. to SB-2, FRONT SEAT BELT, COMPONENT, General Description.>***

3) Install the remaining parts in the reverse order of removal.

NOTE:
Assemble the trim panel - center pillar LWR to the trim panel - center pillar UPR securely.



4) After installation, check the following points.
- The seat belt is not twisted.
- The seat belt can be pulled out and retracted smoothly.
- The adjuster assembly - seat belt can be moved smoothly.
- Check that the airbag warning light lights up for approximately 6 seconds and then turns off when connecting the battery ground cable and turning the ignition switch to ON.

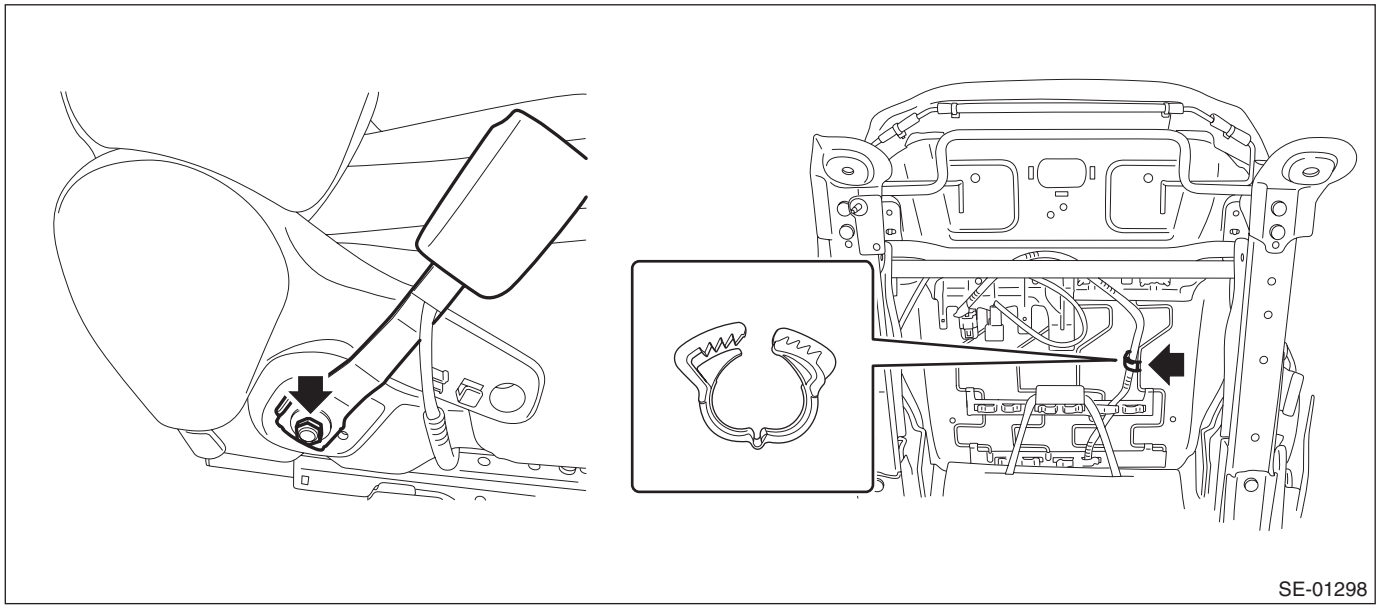
## 2. SEAT BELT INNER - FRONT

**CAUTION:**
- **Before installation, make sure that the correct part is used.**
- **During installation, make sure that the seat belts are not twisted.**
- **Check that there is no pinching of the seat belt harness. Wrong harness rooting may cause the harness short from pinch.**

1) Install the seat belt inner - front.

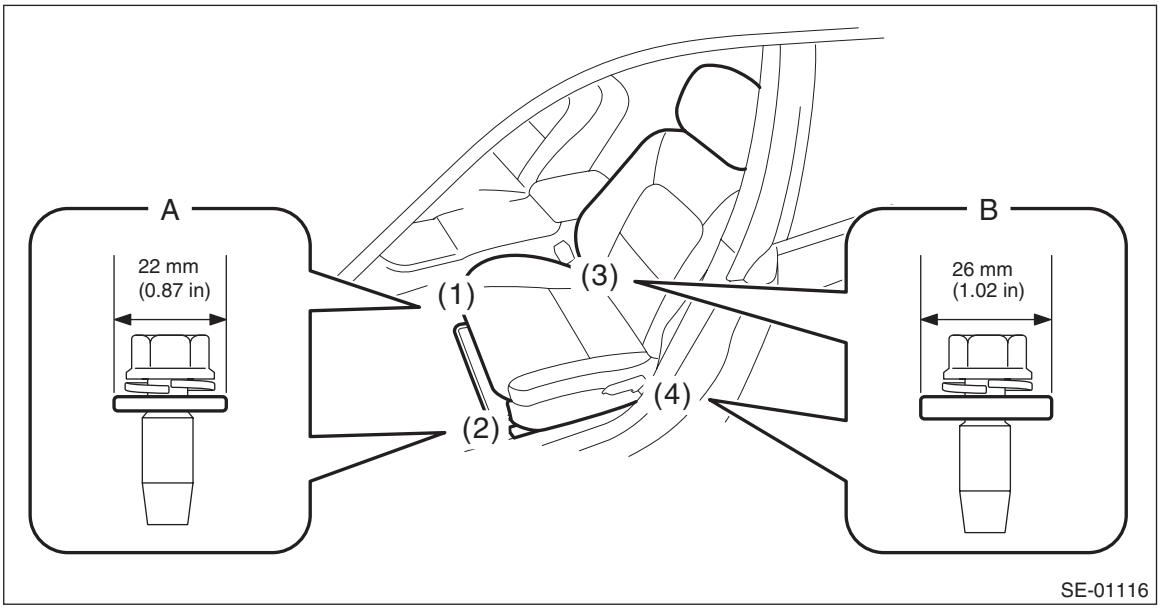
***Tightening torque:***
***Front seat belt: <Ref. to SB-2, FRONT SEAT BELT, COMPONENT, General Description.>***

2) Locate the seat belt harness and retain it with a harness clip.



3) Install the seat assembly to the body.

**CAUTION:**
**• The seat mounting bolts differ between the front mounting points and the rear mounting points. Make sure that you are using correct bolts at correct positions.**
**• Tighten the slide rail installing bolts in the order as shown in the figure, in several steps by gradually increasing the torque until they reach the specified torque.**



- **Front (bolt A): Washer diameter 22 mm (0.87 in)**
- **Rear (bolt B): Washer diameter 26 mm (1.02 in)**

***Tightening torque:***
***Front seat assembly: 53 N·m (5.40 kgf-m, 39.1 ft-lb)***

4) Check that no harness is caught by sliding the seat back and forth.

## 3. ADJUSTABLE ANCHOR ASSY

Referring to the installation procedure for seat belt outer - front, install the parts in the reverse order of removal.

***Tightening torque:***
***Front seat belt: <Ref. to SB-2, FRONT SEAT BELT, COMPONENT, General Description.>***

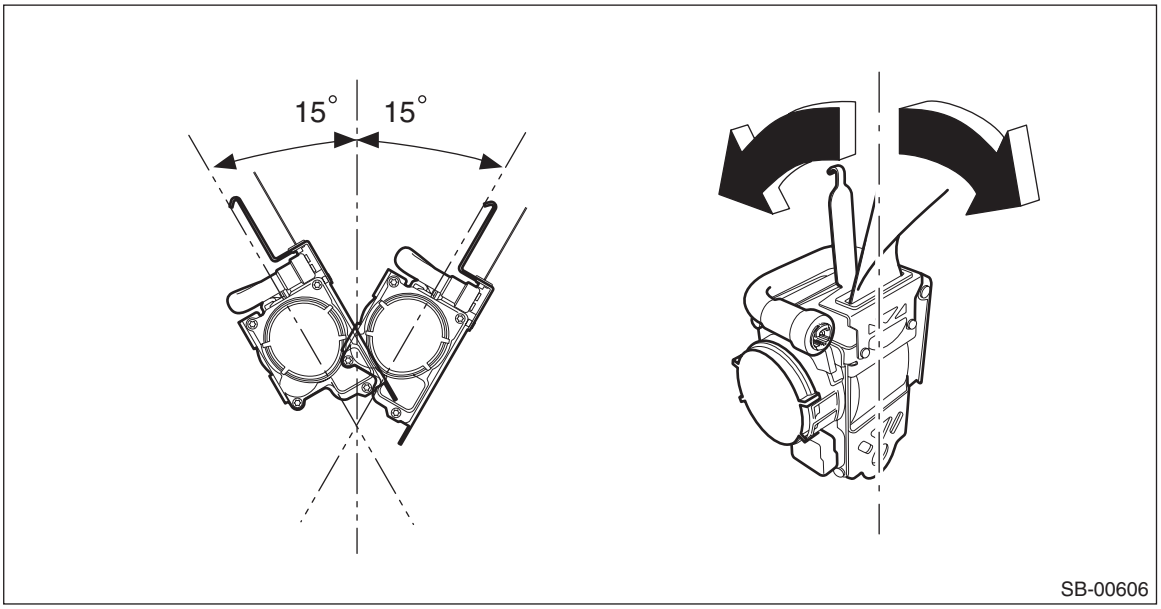
# C: INSPECTION

## 1. VISUAL INSPECTION

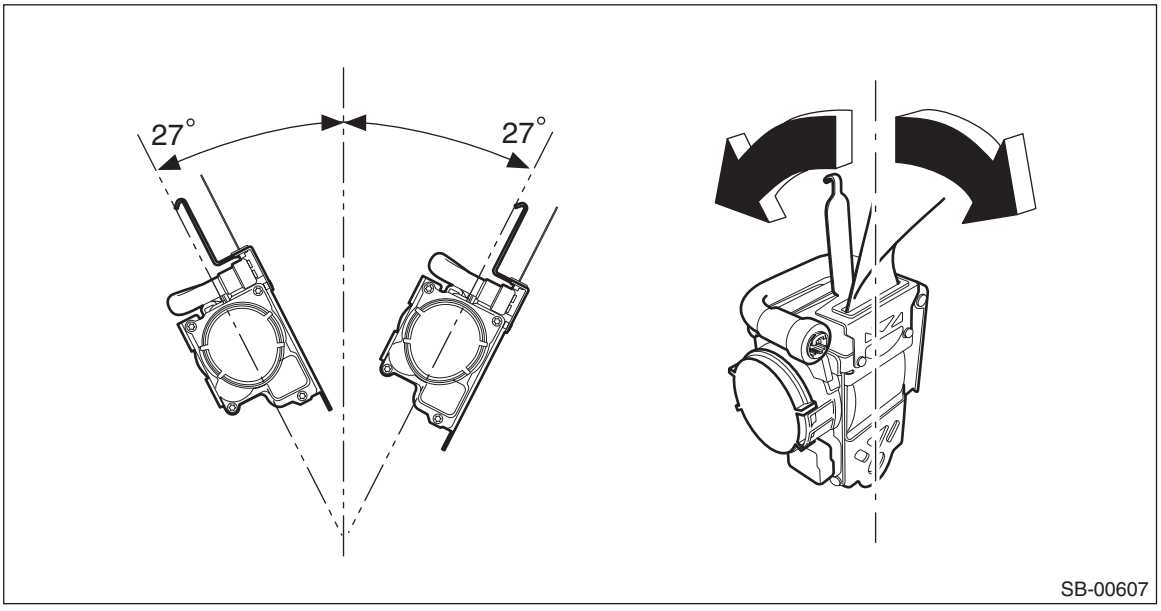
Check for the following, and replace with new parts if necessary.
- Pretensioner is cracked or deformed.
- Adjuster assembly - seat belt is cracked or deformed.
- Seat belt is slackened, bent or worn.
- Seat belt is abnormally wound or extended.
- Seat belt inner - front is deformed or damaged.
- Seat belt buckle cannot be engaged properly.

## 2. ELR LOCK MECHANISM INSPECTION

1) Hold the retractor upright (as installed in the vehicle) and check the ELR lock mechanism.
2) Tilt the retractor from the upright posture and check the following points.
- It does not lock if the inclination angle is 15° or less.



- It remains locked if the inclination angle is 27° or more.



3) If the ELR lock mechanism does not operate properly, replace the seat belt outer - front with a new part.

## 3. SEAT BELT SWITCH INSPECTION

***Preparation tool:***
***Circuit tester***

- Driver's seat

Check the resistance between the terminals when the seat belt inner - front is in each of the following operation conditions.

| Terminal No. | Inspection conditions | Standard | Circuit |
|---|---|---|---|
| 2 — 1 | Tongue plate inserted | Less than 1 Ω |  SB-00609 |
| 2 — 1 | Tongue plate detached | 10 kΩ or more | |

Replace the seat belt inner - front if the inspection result is not within the standard.

- Passenger's seat

Check the current between the terminals when the seat belt inner - front is in each of the following operation conditions.

| Terminal No. | Inspection conditions | Standard | Circuit |
|---|---|---|---|
| 1 — 2 | Tongue plate inserted | 12 — 18 mA |  SB-00608 |
| 1 — 2 | Tongue plate detached | 4 — 7 mA | |

Replace the seat belt inner - front if the inspection result is not within the standard.

# 6. Rear Seat Belt

## A: REMOVAL

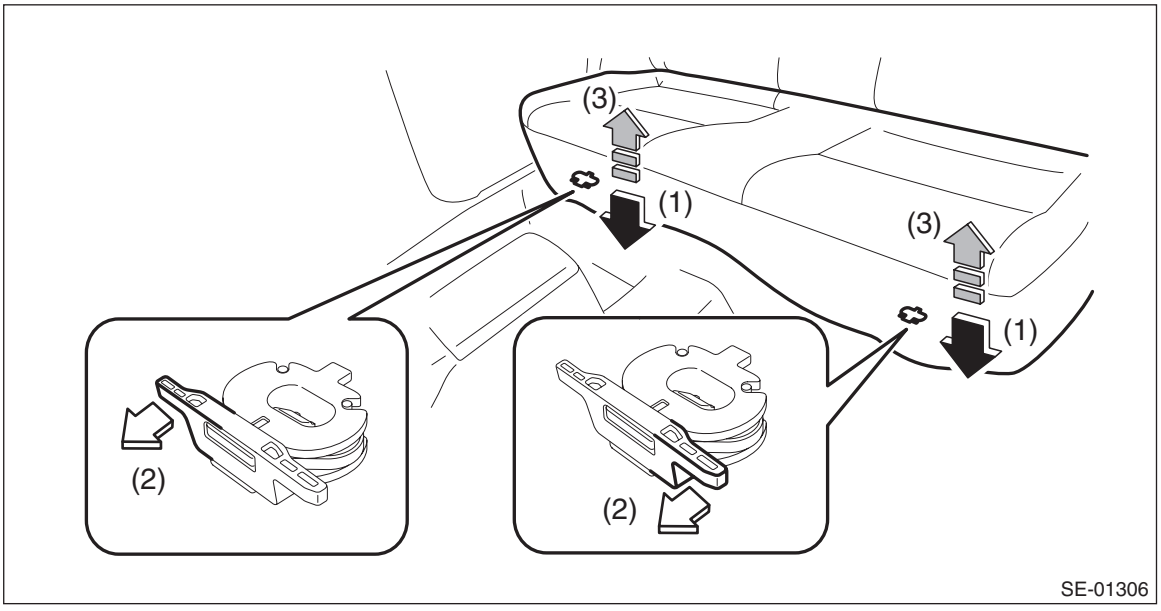
### 1. SEAT BELT OUTER - REAR RH AND LH (4 DOOR MODEL)

1) Disconnect the ground cable from battery and wait for at least 60 seconds before starting work.

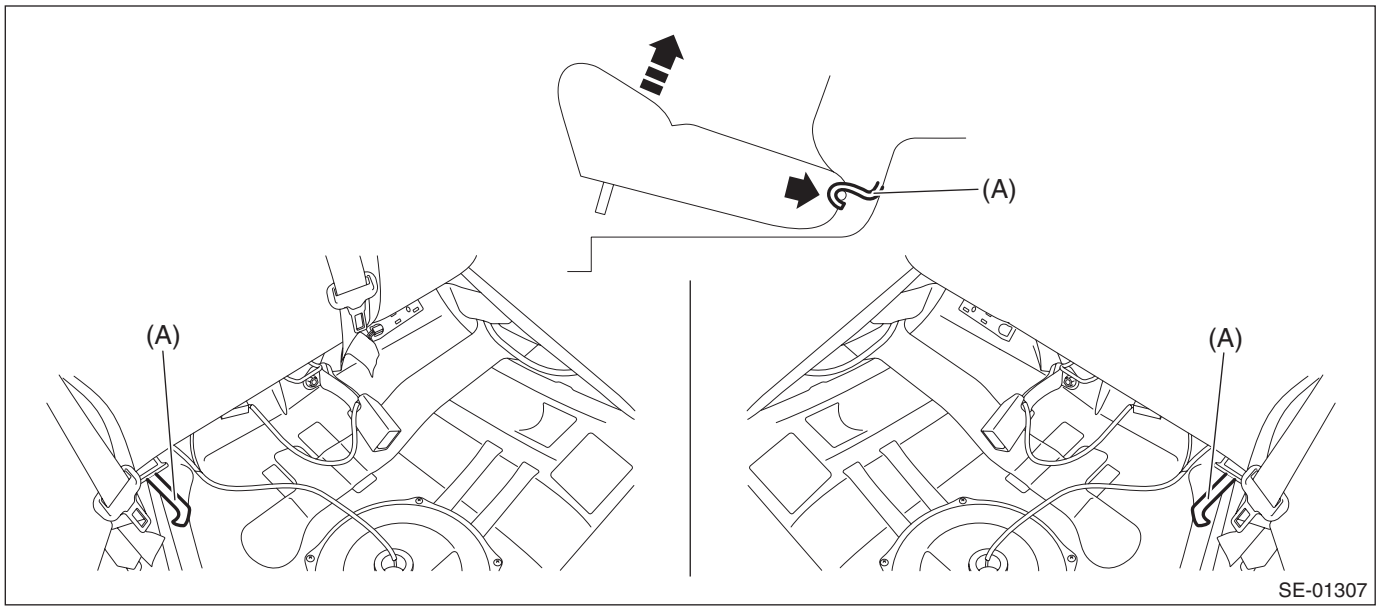
**CAUTION:**
**The airbag system is fitted with a backup power supply. After disconnecting the battery ground cable, the airbag may operate if you do not wait for 60 seconds before starting the service of airbag system.**

2) Remove the rear seat cushion assembly.
   (1) Push the corners of the rear seat cushion from above.
   (2) While pushing the corners of the rear seat cushion from above, pull the knob of the hook - seat cushion rear towards yourself.
   (3) While pulling the knob towards yourself, disconnect the hooks by lifting up the rear seat cushion.

NOTE:
Pull the left side of the knob to disconnect the LH side hook, and pull the right side of the knob to disconnect the RH side hook.

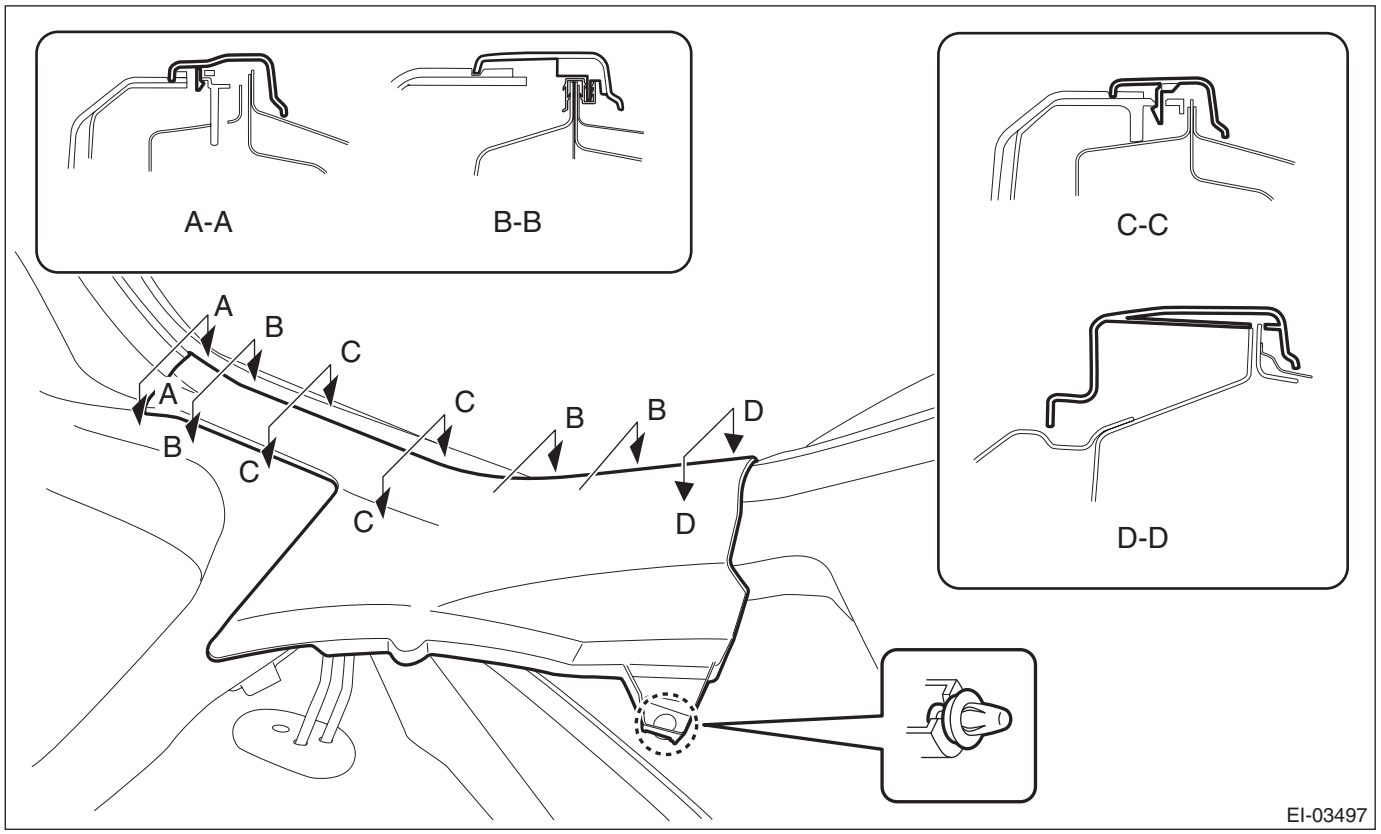


(4) Remove the hook (A) by pushing it back while lifting the front side of the rear seat cushion, and remove the rear seat cushion.

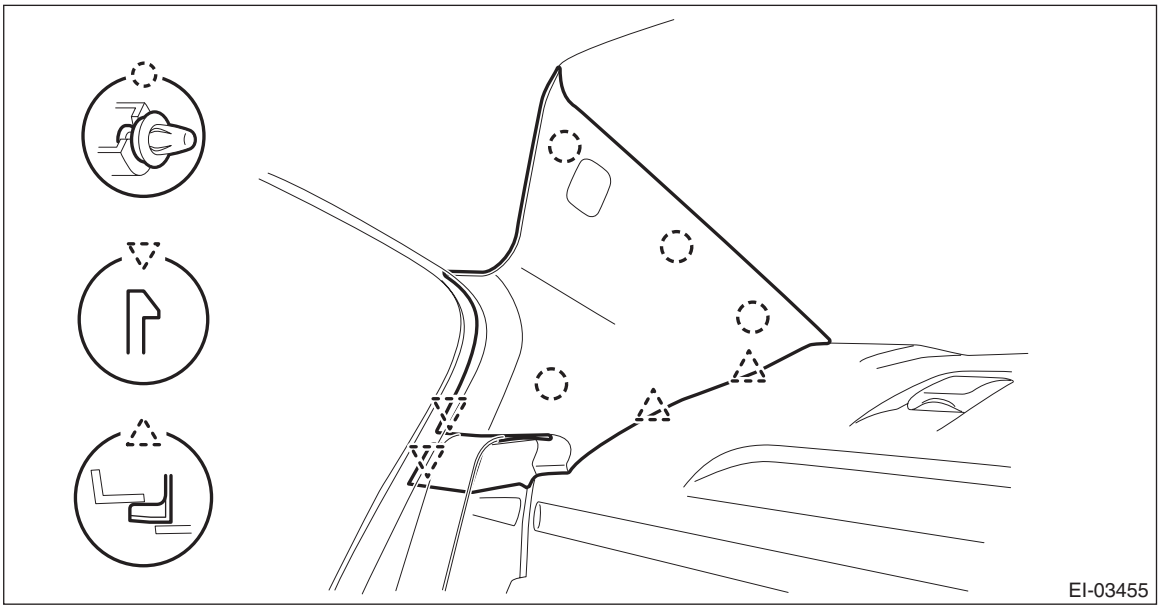


3) Release the clips and claws, and then remove the cover side sill - rear INN. (On the side where seat belt assembly is removed)

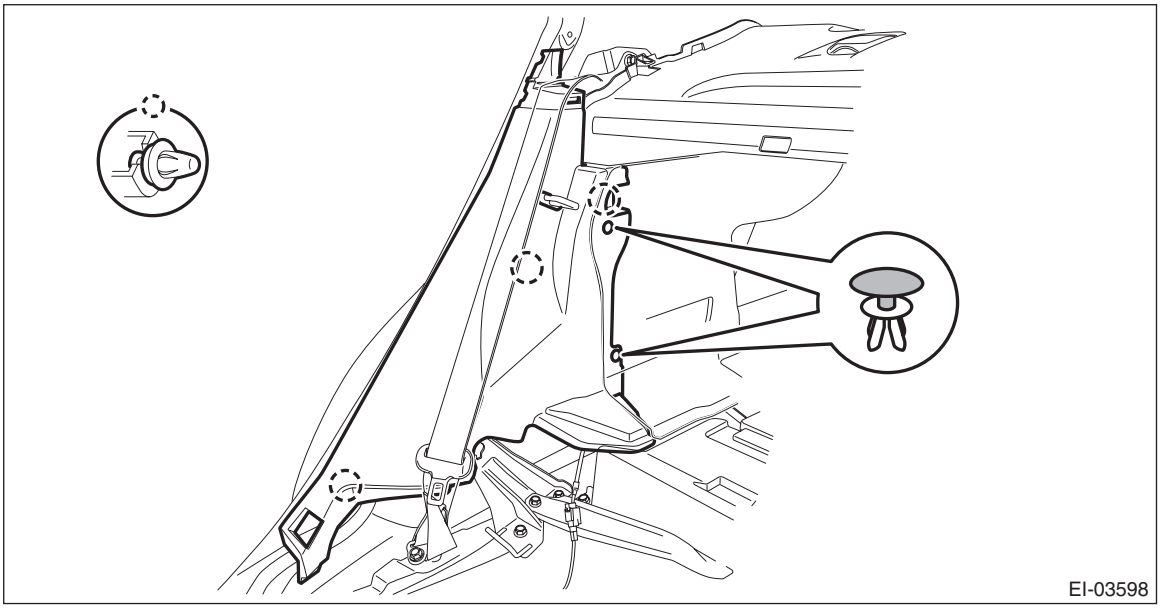
**CAUTION:**
**Do not pull with excessive force. Doing so may damage the claws of the cover side sill - rear INN.**



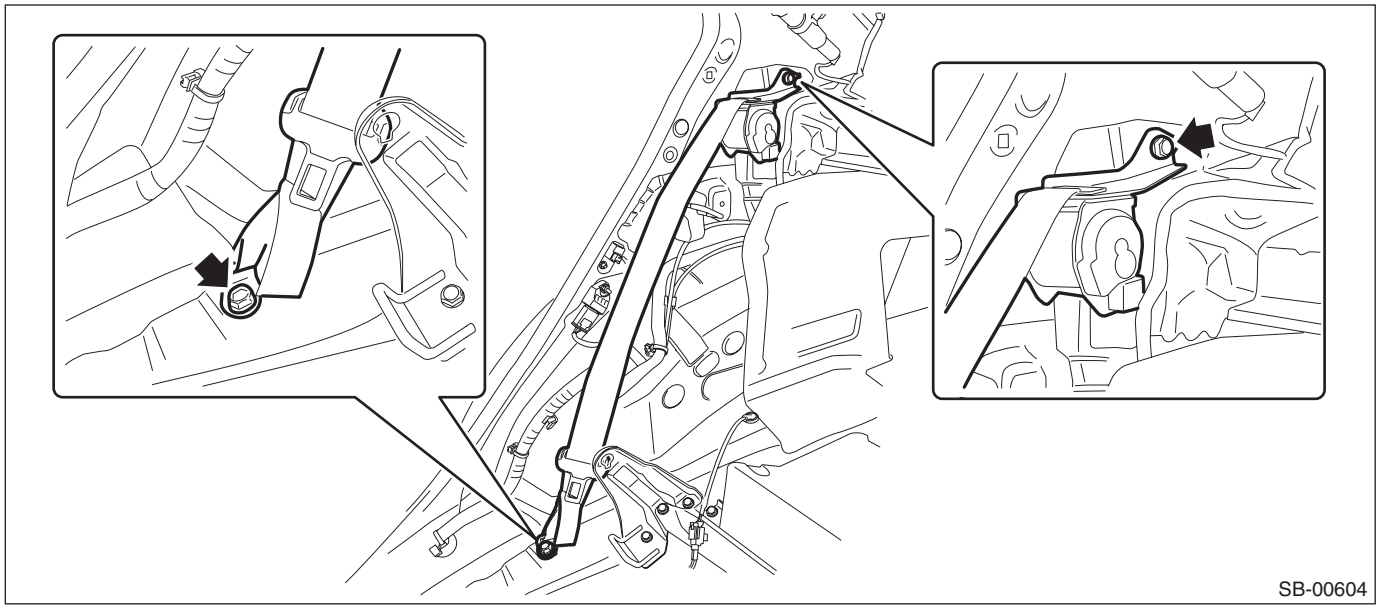
4) Remove the clips, and remove the trim panel - rear pillar UPR. (On the side where seat belt assembly is removed)



5) Remove the trim panel - rear pillar LWR. (On the side where seat belt assembly is removed)
   (1) Remove the clips, and turn over the trim panel - trunk side.
   (2) Remove the clips, and remove the trim panel - rear pillar LWR.



6) Remove the bolts, and remove the seat belt outer - rear.



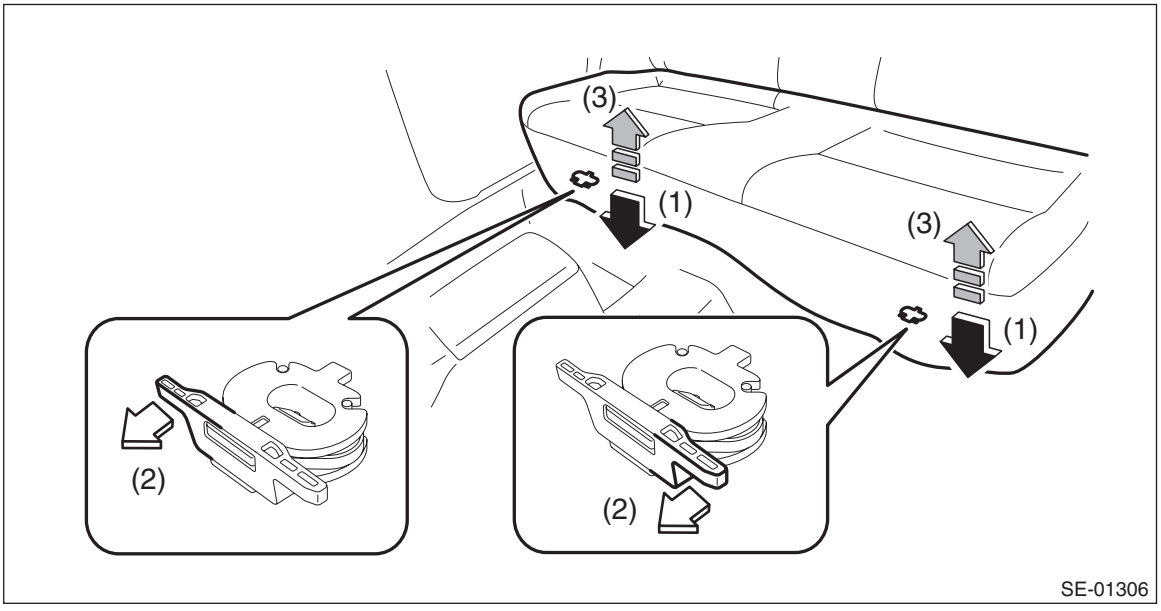
## 2. SEAT BELT OUTER - REAR RH AND LH (5 DOOR MODEL/XV MODEL)

1) Disconnect the ground cable from battery and wait for at least 60 seconds before starting work.

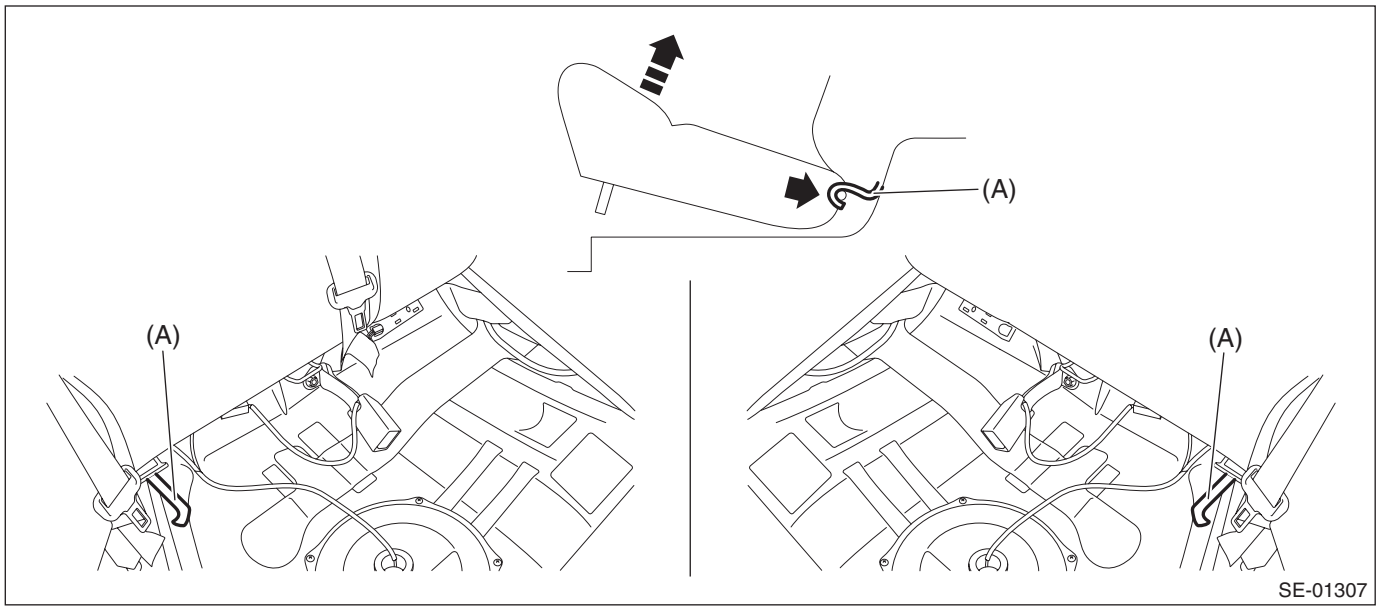
**CAUTION:**
**The airbag system is fitted with a backup power supply. After disconnecting the battery ground cable, the airbag may operate if you do not wait for 60 seconds before starting the service of airbag system.**

2) Remove the rear seat cushion assembly.
   (1) Push the corners of the rear seat cushion from above.
   (2) While pushing the corners of the rear seat cushion from above, pull the knob of the hook - seat cushion rear towards yourself.
   (3) While pulling the knob towards yourself, disconnect the hooks by lifting up the rear seat cushion.

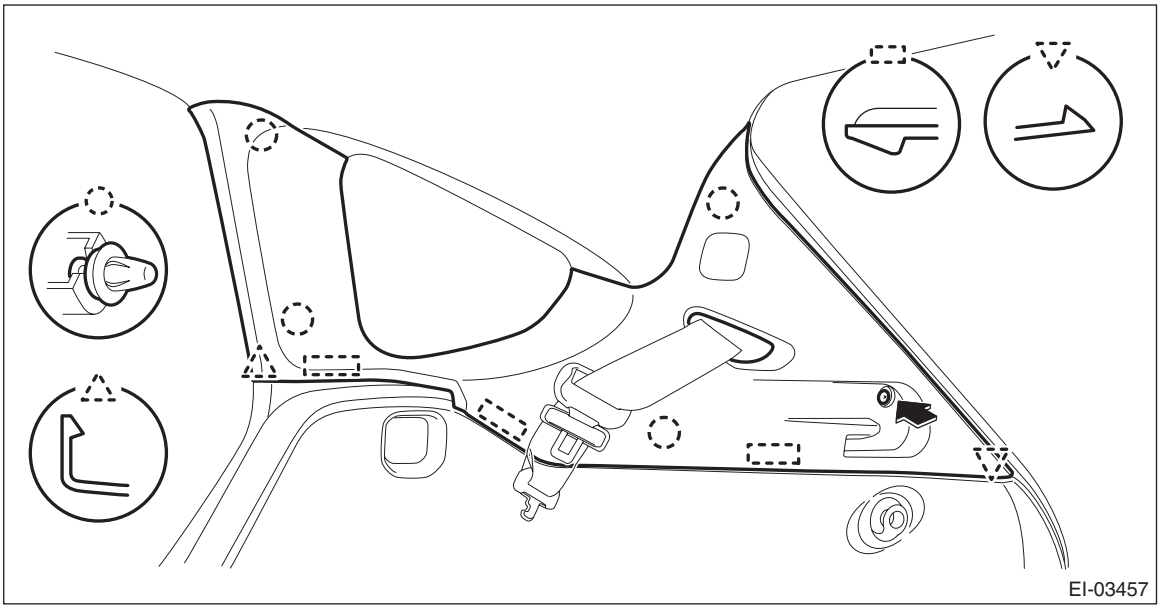
NOTE:
Pull the left side of the knob to disconnect the LH side hook, and pull the right side of the knob to disconnect the RH side hook.



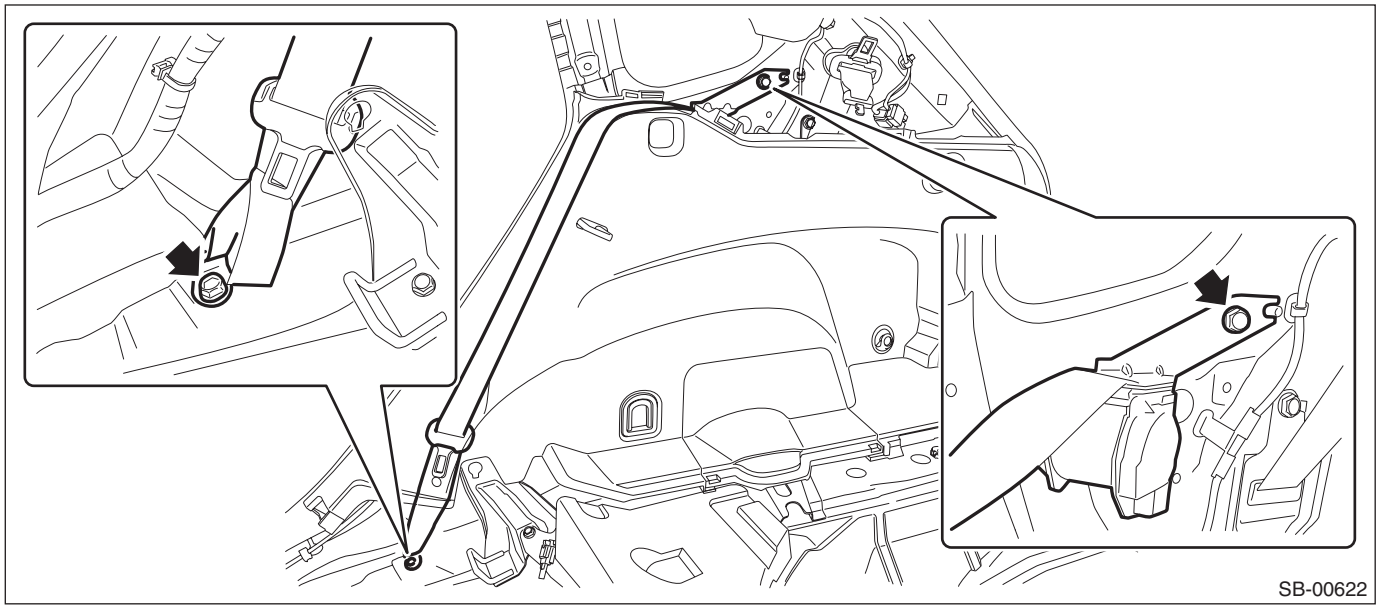
(4) Remove the hook (A) by pushing it back while lifting the front side of the rear seat cushion, and remove the rear seat cushion.



3) Remove the screws and clips, and remove the trim panel - rear quarter pillar UPR. (On the side where seat belt assembly is removed)



4) Remove the bolts, and remove the seat belt outer - rear.



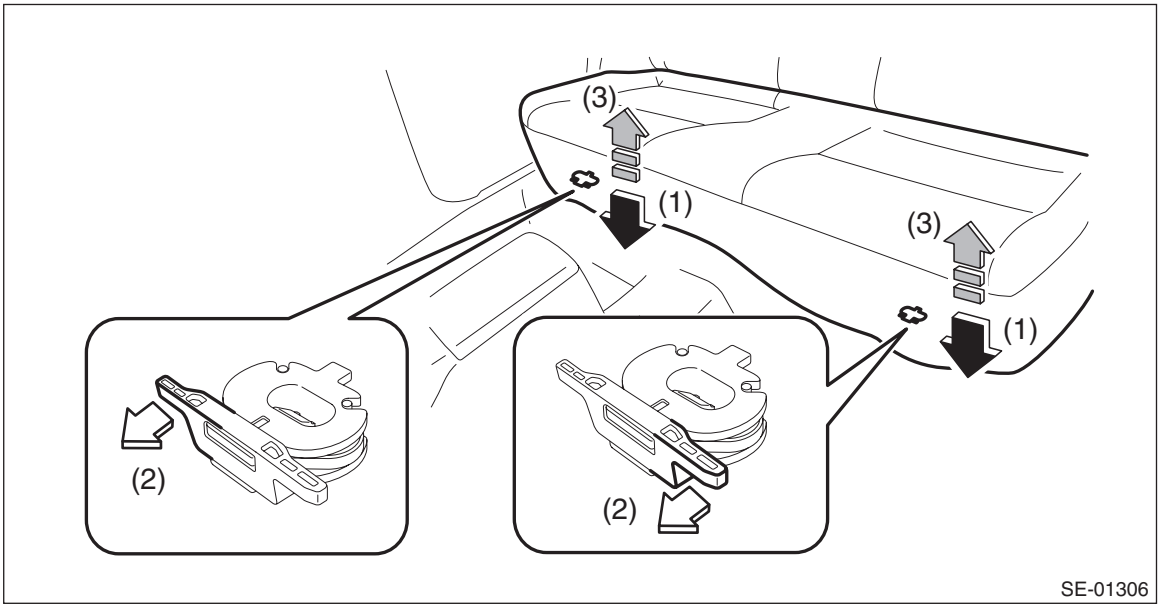
### 3. SEAT BELT - REAR SHOULDER CTR (4 DOOR MODEL)

1) Disconnect the ground cable from battery and wait for at least 60 seconds before starting work.

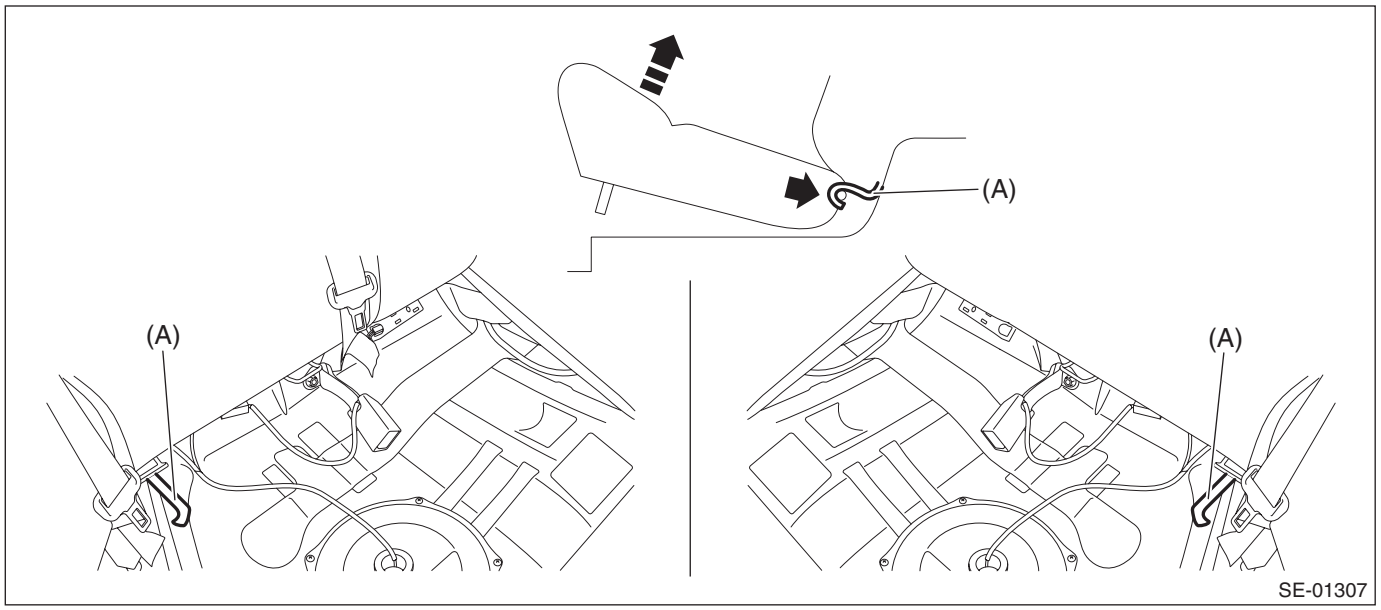
**CAUTION:**
**The airbag system is fitted with a backup power supply. After disconnecting the battery ground cable, the airbag may operate if you do not wait for 60 seconds before starting the service of airbag system.**

2) Remove the rear seat cushion assembly.
   (1) Push the corners of the rear seat cushion from above.
   (2) While pushing the corners of the rear seat cushion from above, pull the knob of the hook - seat cushion rear towards yourself.
   (3) While pulling the knob towards yourself, disconnect the hooks by lifting up the rear seat cushion.

NOTE:
Pull the left side of the knob to disconnect the LH side hook, and pull the right side of the knob to disconnect the RH side hook.

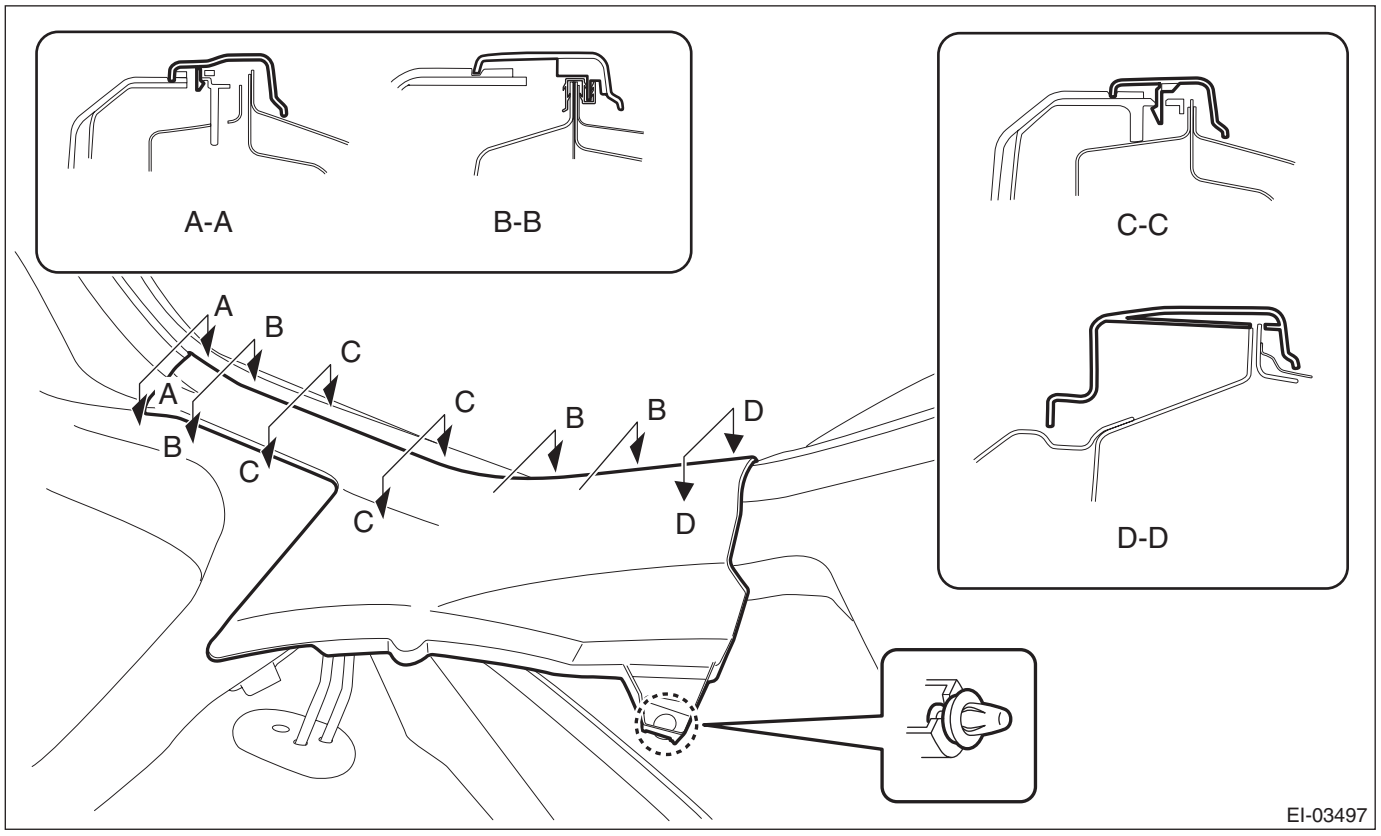


(4) Remove the hook (A) by pushing it back while lifting the front side of the rear seat cushion, and remove the rear seat cushion.

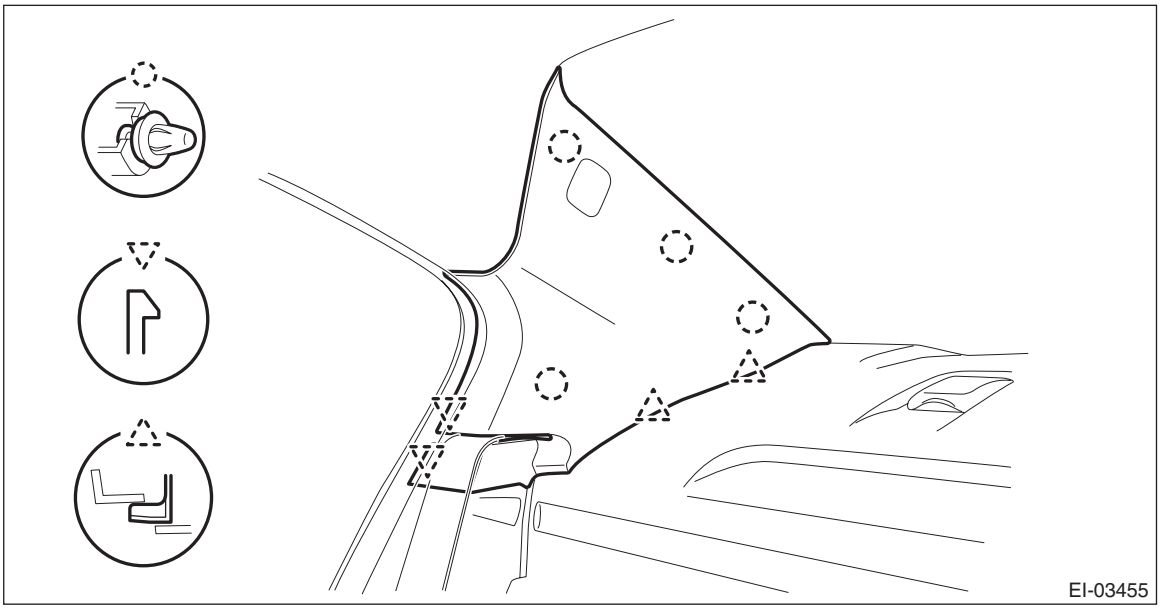


3) Release the clips and claws, and remove the side sill covers - rear INN on the left and right sides.

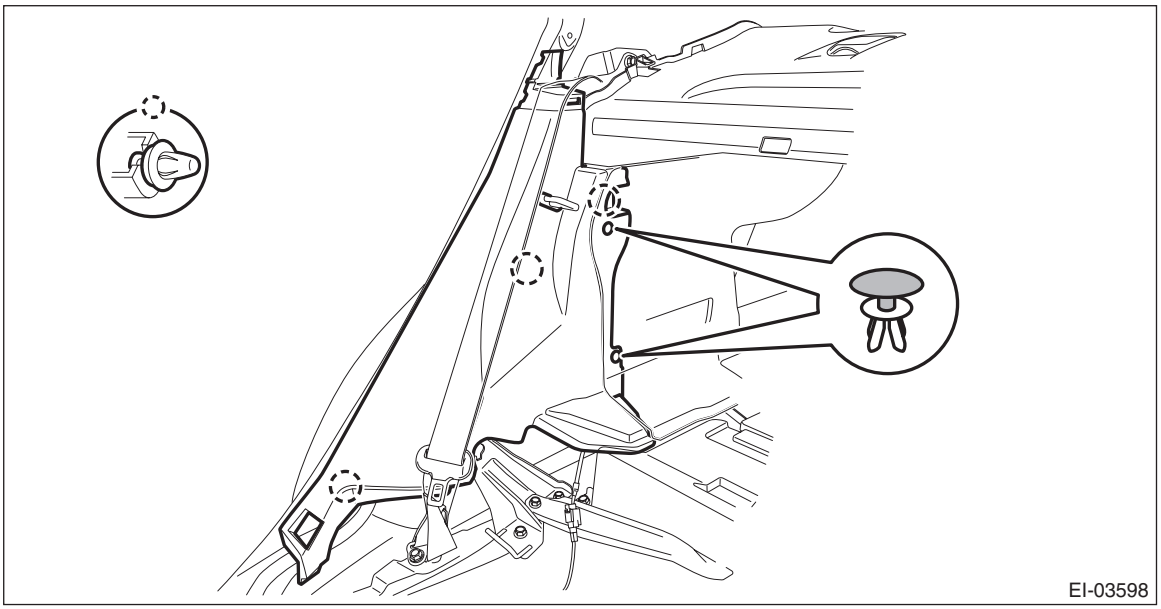
**CAUTION:**
**Do not pull with excessive force. Doing so may damage the claws of the side sill cover - rear INN.**



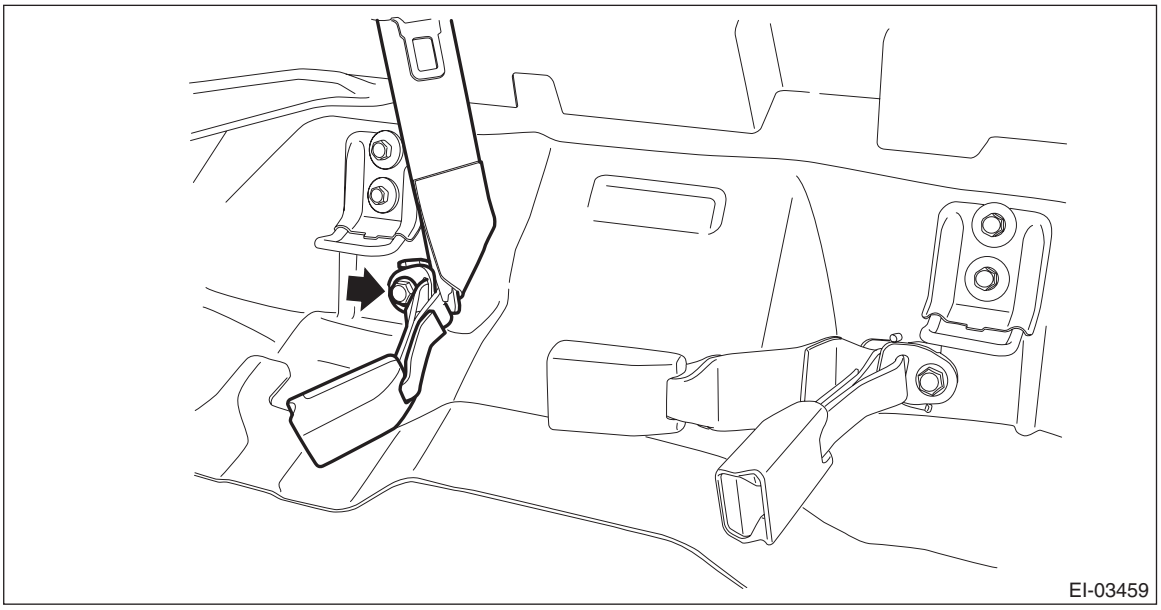
4) Remove the clips, and remove the trim panel - rear pillar UPR on the left and right sides.



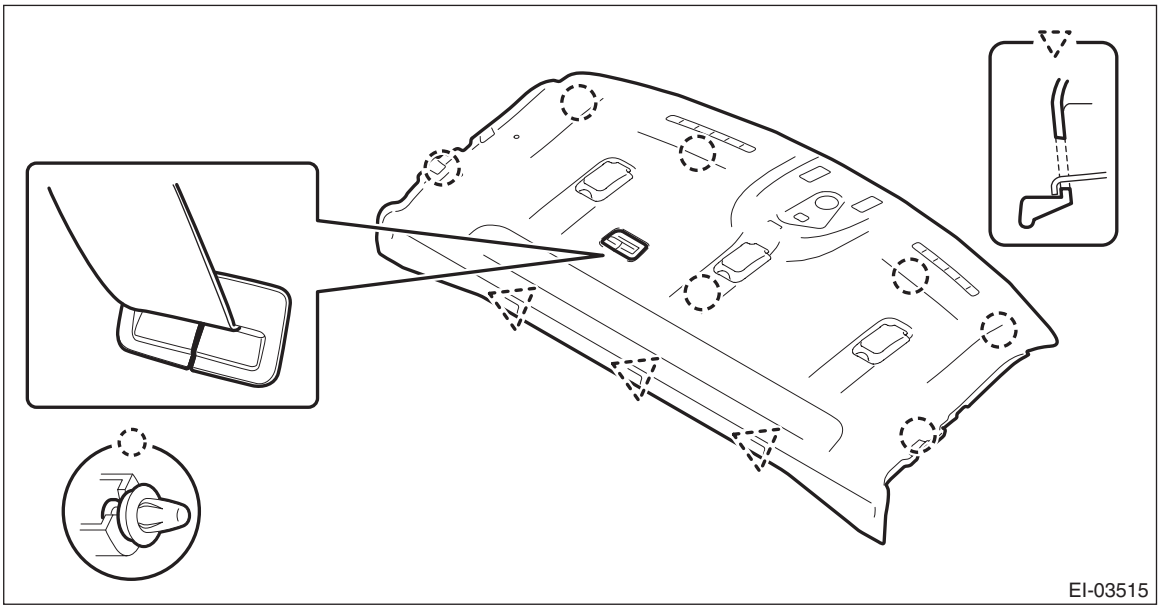
5) Remove the trim panel - rear pillar LWR on the left and right sides.
   (1) Remove the clips, and turn over the trim panel - trunk side.
   (2) Remove the clips, and remove the trim panel - rear pillar LWR.



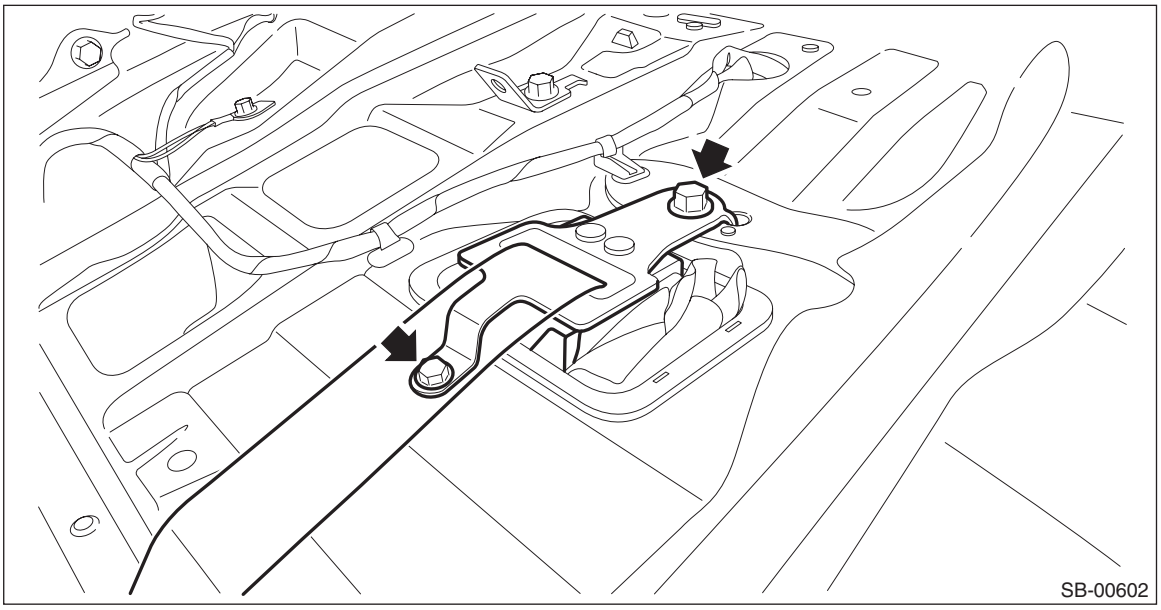
6) Remove the bolts, and remove the lower anchor of the seat belt - rear shoulder CTR.



7) Remove the trim panel - rear shelf assembly.
   (1) Release the clips to float the trim panel assembly - rear shelf.
   (2) Release the belt guide, and guide the anchor of the seat belt - rear shoulder CTR to behind the trim panel - rear shelf assembly.
   (3) Disconnect the connector of high-mounted stop light.
   (4) Remove the trim panel assembly - rear shelf.



8) Remove the bolts, and remove the seat belt - rear shoulder CTR.

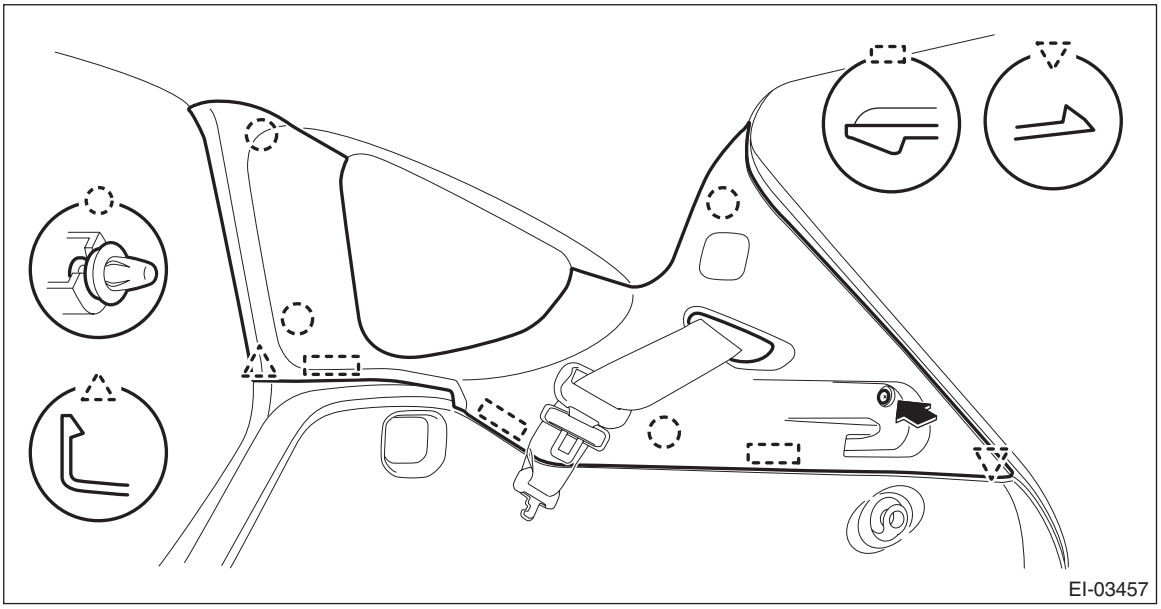


## 4. SEAT BELT - REAR SHOULDER CTR (5 DOOR MODEL/XV MODEL)

1) Disconnect the ground cable from battery and wait for at least 60 seconds before starting work.

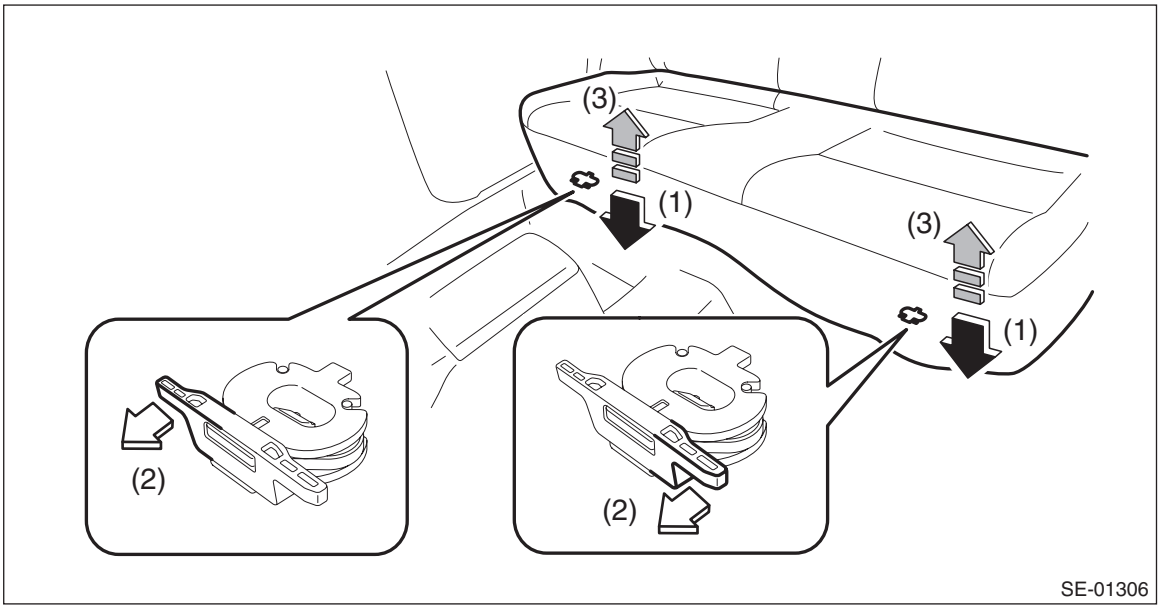
**CAUTION:**
**The airbag system is fitted with a backup power supply. After disconnecting the battery ground cable, the airbag may operate if you do not wait for 60 seconds before starting the service of airbag system.**

2) Remove the screws and clips, and remove the trim panel - rear quarter pillar UPR RH.

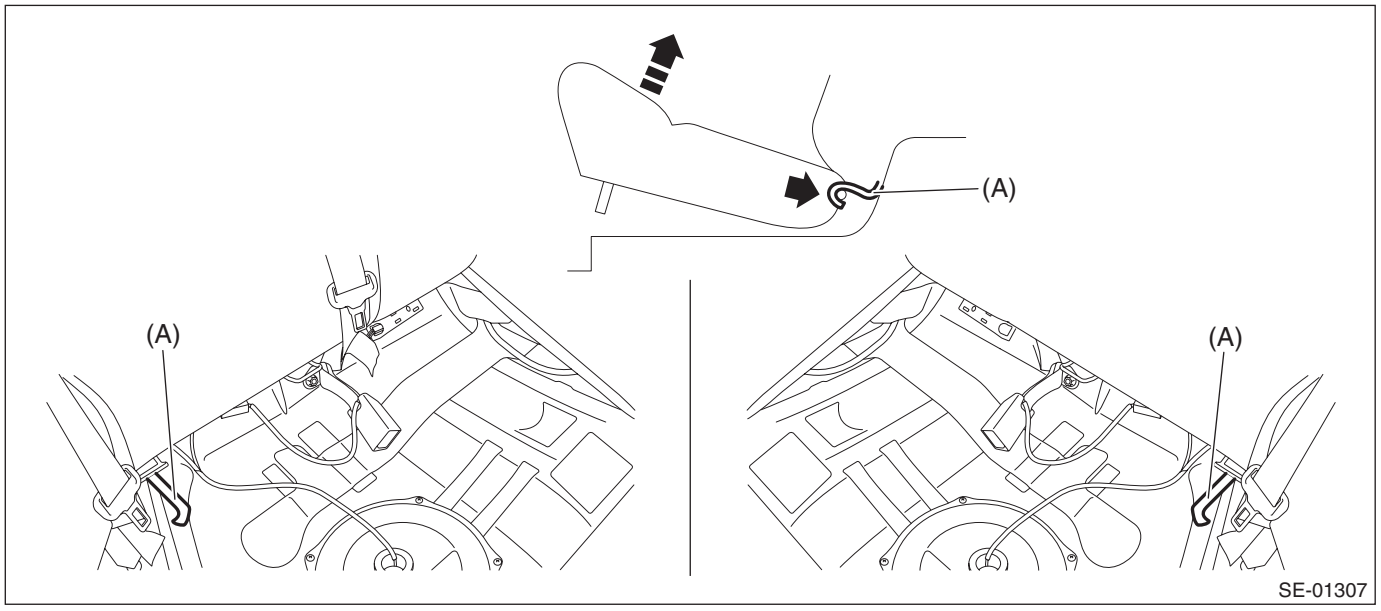


3) Remove the rear seat cushion assembly.
(1) Push the corners of the rear seat cushion from above.
(2) While pushing the corners of the rear seat cushion from above, pull the knob of the hook - seat cushion rear towards yourself.
(3) While pulling the knob towards yourself, disconnect the hooks by lifting up the rear seat cushion.

NOTE:
Pull the left side of the knob to disconnect the LH side hook, and pull the right side of the knob to disconnect the RH side hook.

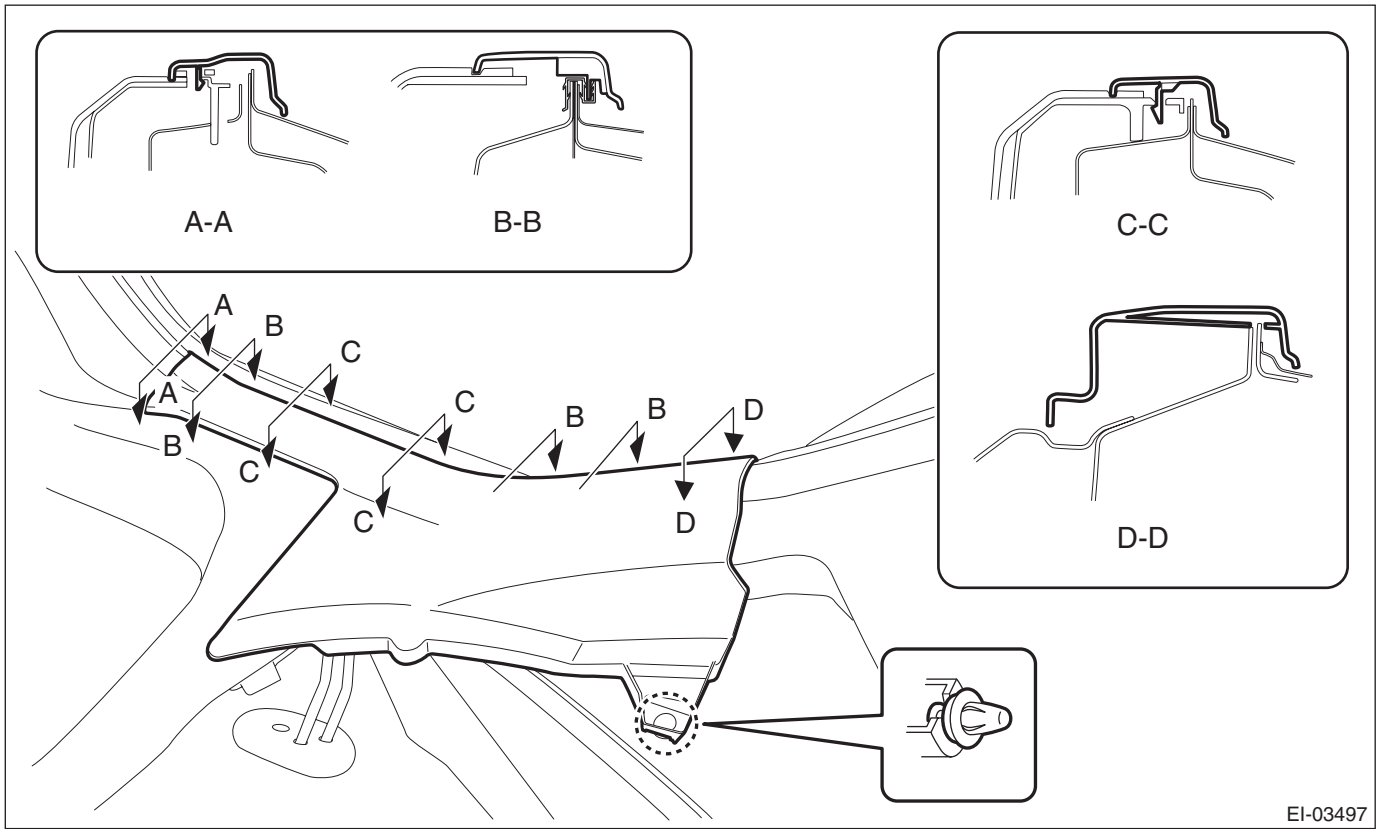


(4) Remove the hook (A) by pushing it back while lifting the front side of the rear seat cushion, and remove the rear seat cushion.

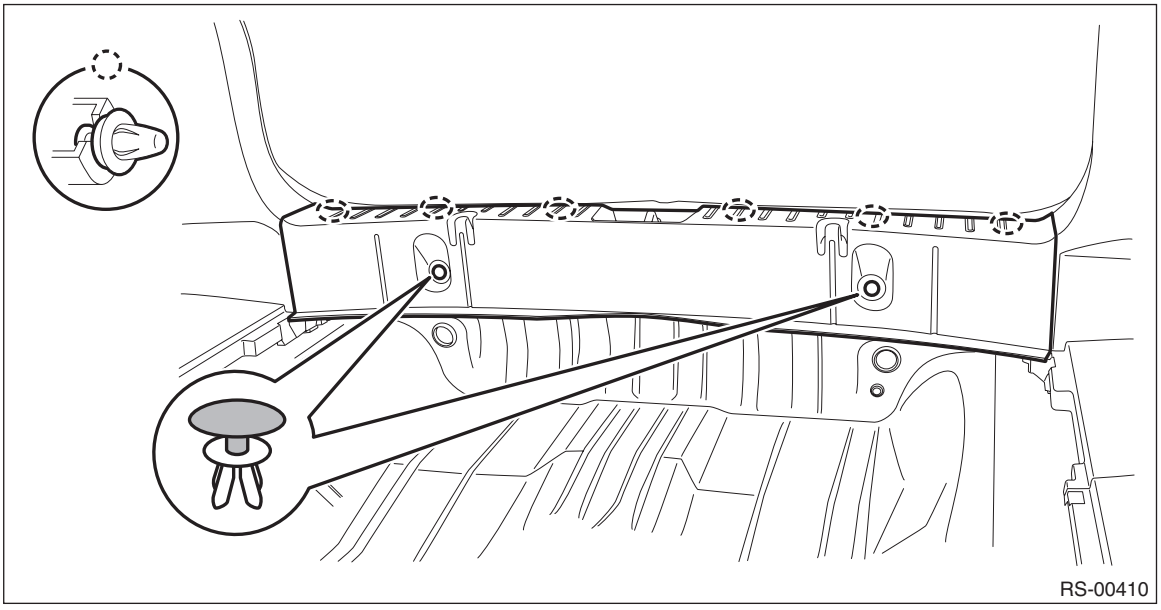


4) Release the clips and claws, and then remove the cover side sill - rear INN RH.

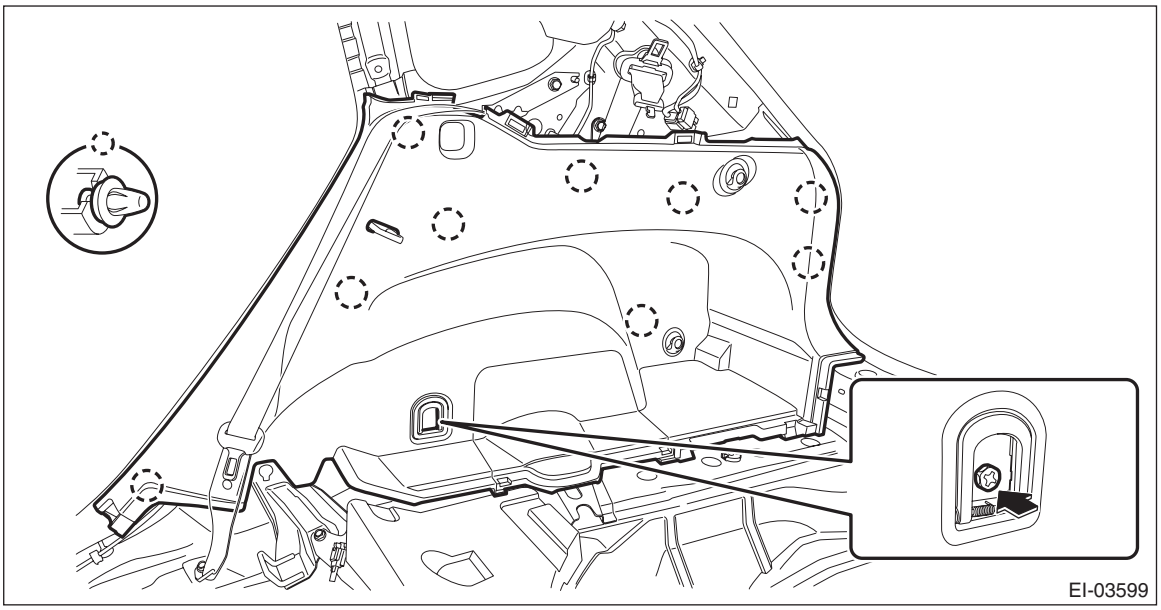
**CAUTION:**
**Do not pull with excessive force. Doing so may damage the claws of the cover side sill - rear INN.**



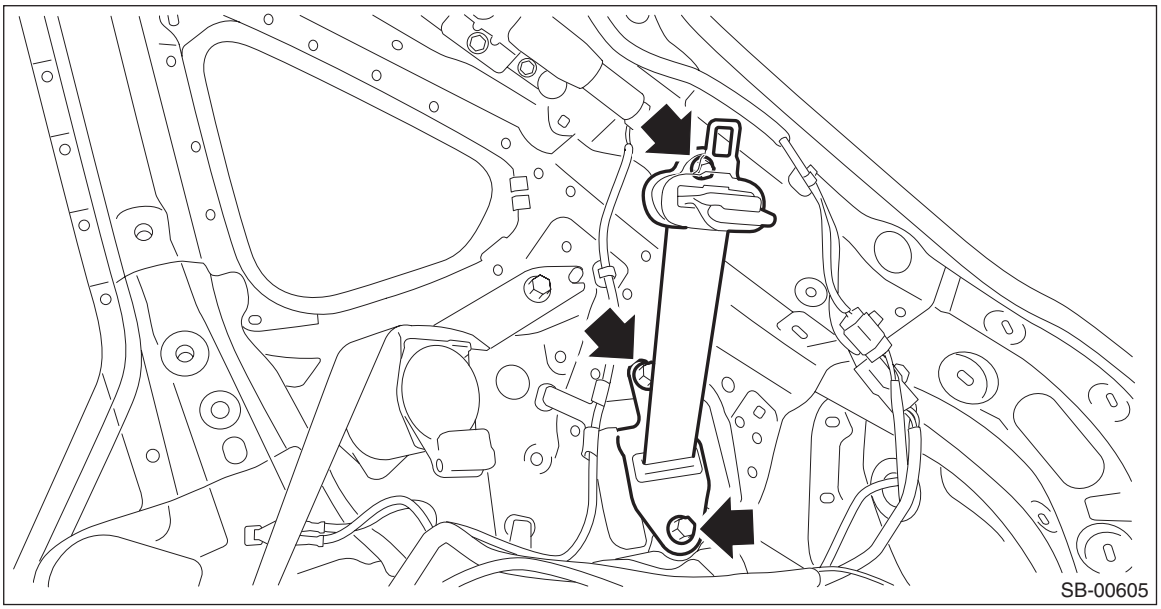
5) Remove the clips, and remove the trim panel - rear skirt.



6) Remove the trim panel - rear apron RH.
   (1) Remove the caps, and then remove the screws.
   (2) Remove the clips, and remove the trim panel - rear apron RH.



7) Remove the bolts, and remove the seat belt - rear shoulder CTR.



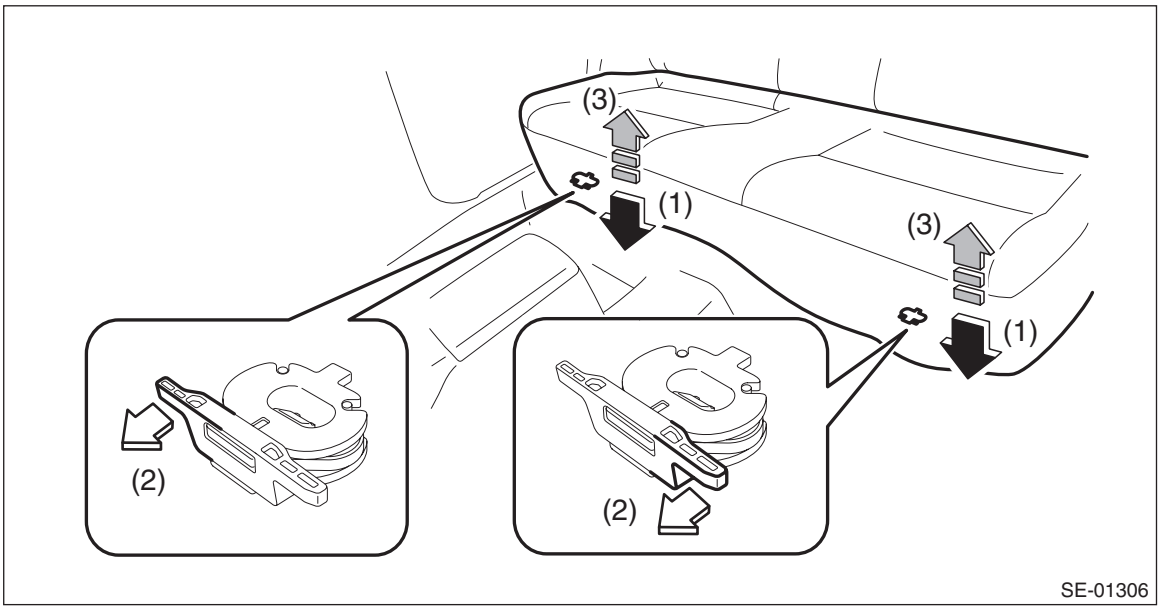
## 5. SEAT BELT - CTR RH AND LH

1) Disconnect the ground cable from battery and wait for at least 60 seconds before starting work.

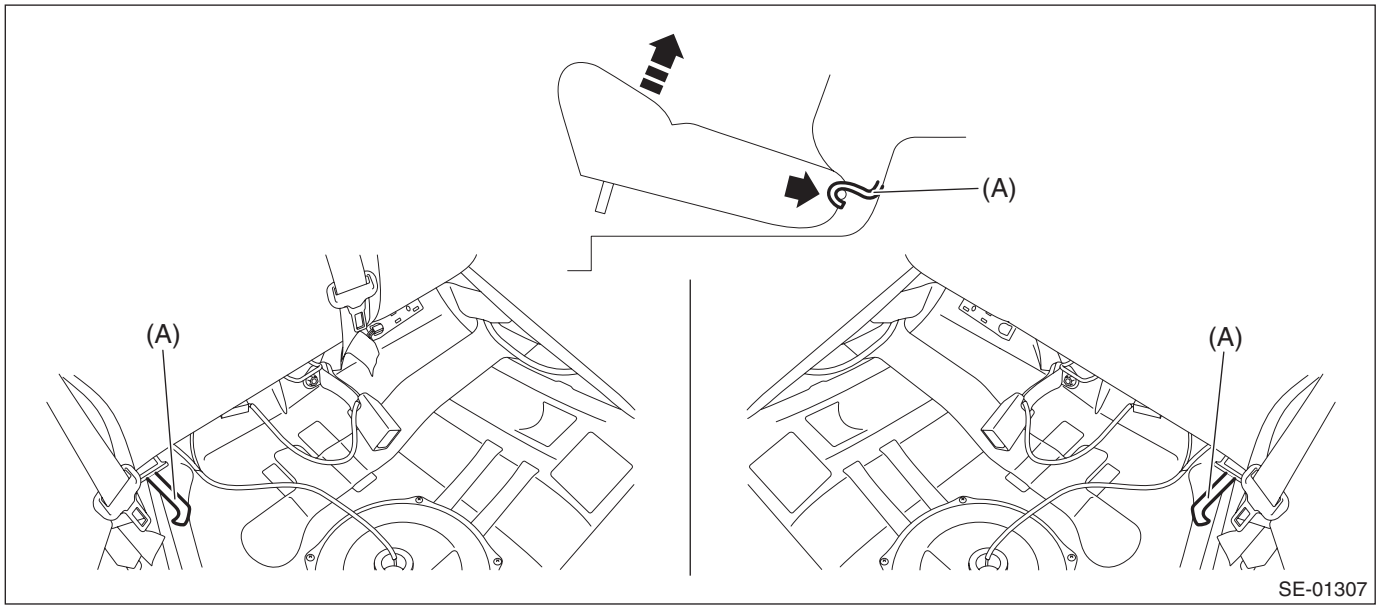
**CAUTION:**
**The airbag system is fitted with a backup power supply. After disconnecting the battery ground cable, the airbag may operate if you do not wait for 60 seconds before starting the service of airbag system.**

2) Remove the rear seat cushion assembly.
   (1) Push the corners of the rear seat cushion from above.
   (2) While pushing the corners of the rear seat cushion from above, pull the knob of the hook - seat cushion rear towards yourself.
   (3) While pulling the knob towards yourself, disconnect the hooks by lifting up the rear seat cushion.

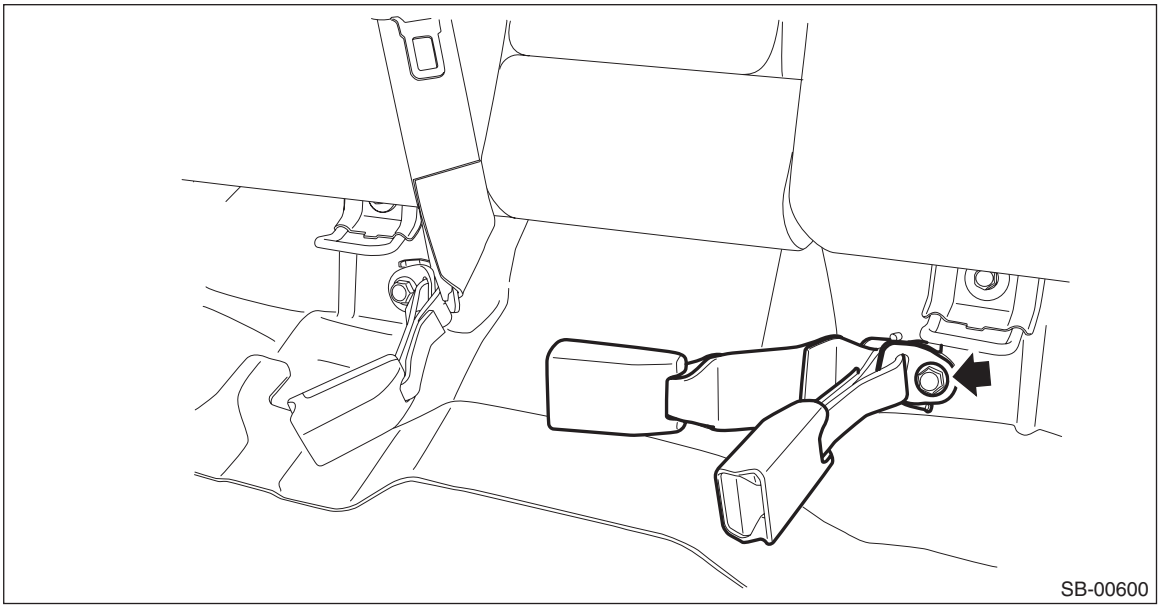
NOTE:
Pull the left side of the knob to disconnect the LH side hook, and pull the right side of the knob to disconnect the RH side hook.



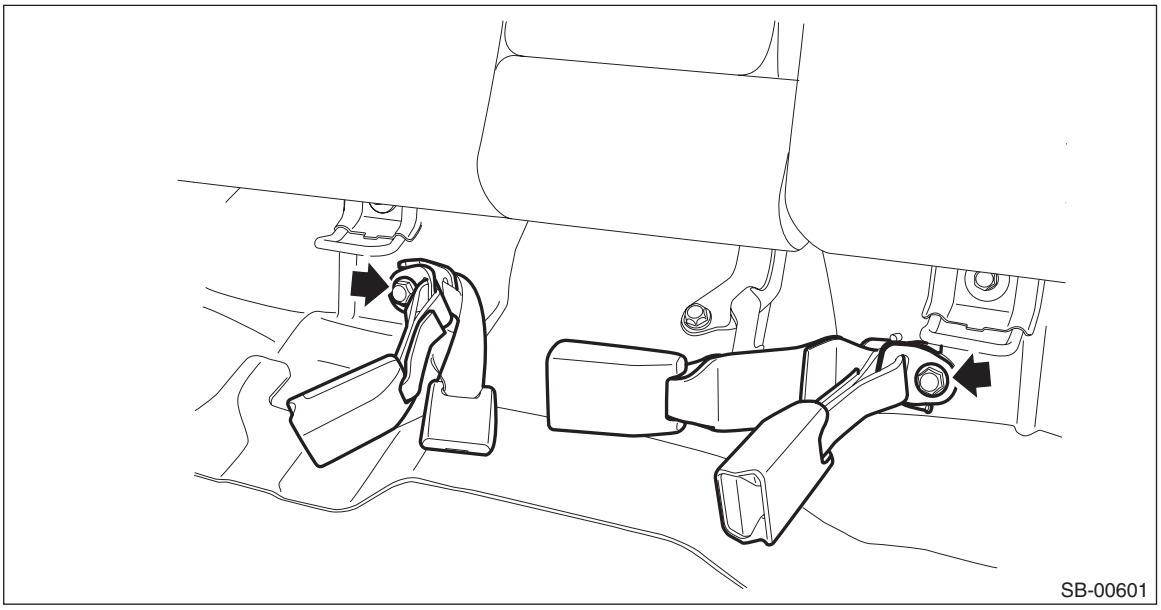
(4) Remove the hook (A) by pushing it back while lifting the front side of the rear seat cushion, and remove the rear seat cushion.



3) Remove the bolts, and remove the seat belt - CTR RH and LH.
- 4 door model: Seat belt - CTR LH



- 5 door model/XV model: Seat belt - CTR RH and LH



## B: INSTALLATION

### 1. SEAT BELT OUTER - REAR RH AND LH (4 DOOR MODEL)

1) Before installation, perform a unit inspection of retractor. <Ref. to SB-46, INSPECTION, Rear Seat Belt.>
2) Install the seat belt outer - rear.

**CAUTION:**
- **During installation, make sure that the seat belts are not twisted.**
- **After installation, make sure that the seat belts are smoothly extended and wound.**

***Tightening torque:***
***Rear seat belt (4 door model): <Ref. to SB-3, REAR SEAT BELT (4 DOOR MODEL), COMPONENT, General Description.>***

3) Install the remaining parts in the reverse order of removal.
4) After installation, check the following points.
- The seat belt is not twisted.
- The seat belt can be pulled out and retracted smoothly.

### 2. SEAT BELT OUTER - REAR RH AND LH (5 DOOR MODEL/XV MODEL)

1) Before installation, perform a unit inspection of retractor. <Ref. to SB-46, INSPECTION, Rear Seat Belt.>
2) Install the seat belt outer - rear.

**CAUTION:**
- **During installation, make sure that the seat belts are not twisted.**
- **After installation, make sure that the seat belts are smoothly extended and wound.**

***Tightening torque:***
***Rear seat belt (5 door model/XV model): <Ref. to SB-4, REAR SEAT BELT (5 DOOR MODEL/XV MODEL), COMPONENT, General Description.>***

3) Install the trim panel - rear quarter trim UPR.
4) Install the remaining parts in the reverse order of removal.
5) After installation, check the following points.
- The seat belt is not twisted.
- The seat belt can be pulled out and retracted smoothly.

### 3. SEAT BELT - REAR SHOULDER CTR (4 DOOR MODEL)

1) Install the retractor of seat belt - rear shoulder CTR.

***Tightening torque:***
***Rear seat belt (4 door model): <Ref. to SB-3, REAR SEAT BELT (4 DOOR MODEL), COMPONENT, General Description.>***

2) Install the trim panel assembly - rear shelf.
3) Install the lower anchor of seat belt - rear shoulder CTR.

**CAUTION:**
- **During installation, make sure that the seat belts are not twisted.**
- **After installation, make sure that the seat belts are smoothly extended and wound.**

***Tightening torque:***
***Rear seat belt (4 door model): <Ref. to SB-3, REAR SEAT BELT (4 DOOR MODEL), COMPONENT, General Description.>***

4) Install the remaining parts in the reverse order of removal.
5) After installation, check the following points.
- The seat belt is not twisted.
- The seat belt can be pulled out and retracted smoothly.

### 4. SEAT BELT - REAR SHOULDER CTR (5 DOOR MODEL/XV MODEL)

1) Install the seat belt - rear shoulder CTR.

***Tightening torque:***
***Rear seat belt (5 door model/XV model): <Ref. to SB-4, REAR SEAT BELT (5 DOOR MODEL/XV MODEL), COMPONENT, General Description.>***

2) Install the remaining parts in the reverse order of removal.
3) After installation, check the following points.
- The seat belt is not twisted.
- The seat belt can be pulled out and retracted smoothly.

### 5. SEAT BELT - CTR RH AND LH

1) Install the seat belt - CTR RH/LH.

***Tightening torque:***
***Rear seat belt (4 door model): <Ref. to SB-3, REAR SEAT BELT (4 DOOR MODEL), COMPONENT, General Description.>***
***Rear seat belt (5 door model/XV model): <Ref. to SB-4, REAR SEAT BELT (5 DOOR MODEL/XV MODEL), COMPONENT, General Description.>***

2) Install the rear seat cushion.
3) Install the remaining parts in the reverse order of removal.
4) After installation, check the following points.
- The seat belt is not twisted.
- Check that the airbag warning light lights up for approximately 6 seconds and then turns off when connecting the battery ground cable and turning the ignition switch to ON.

## C: INSPECTION

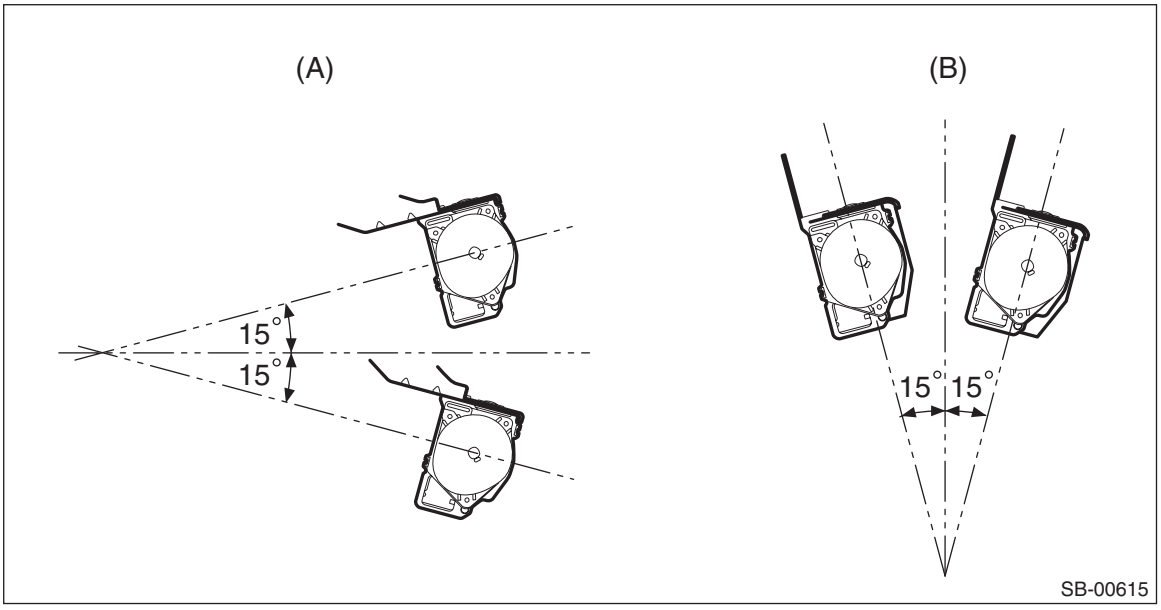
### 1. VISUAL INSPECTION

Check for the following, and replace with new parts if necessary.
- Seat belt is slackened, bent or worn.
- Seat belt is abnormally wound or extended.
- Seat belt inner - rear is deformed or damaged.
- Seat belt buckle cannot be engaged properly.

## 2. ELR LOCK MECHANISM INSPECTION

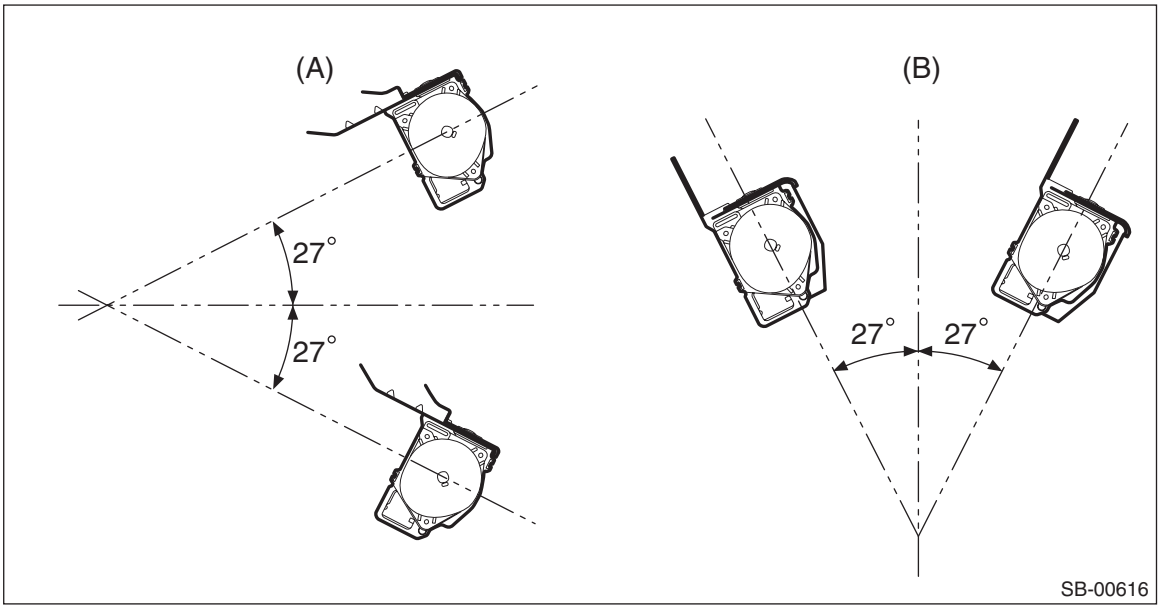
1) Hold the retractor upright (as installed in the vehicle) and check the ELR lock mechanism.
2) Tilt the retractor from the upright posture and check the following points.

- It does not lock if the inclination angle is 15° or less.



(A) Except for seat belt - rear shoulder CTR (5 door model/XV model)
(B) Seat belt - rear shoulder CTR (5 door model/XV model)

- It remains locked if the inclination angle is 27° or more.



(A) Except for seat belt - rear shoulder CTR (5 door model/XV model)
(B) Seat belt - rear shoulder CTR (5 door model/XV model)

3) If the ELR lock mechanism does not operate properly, replace the seat belt outer - rear with a new part.

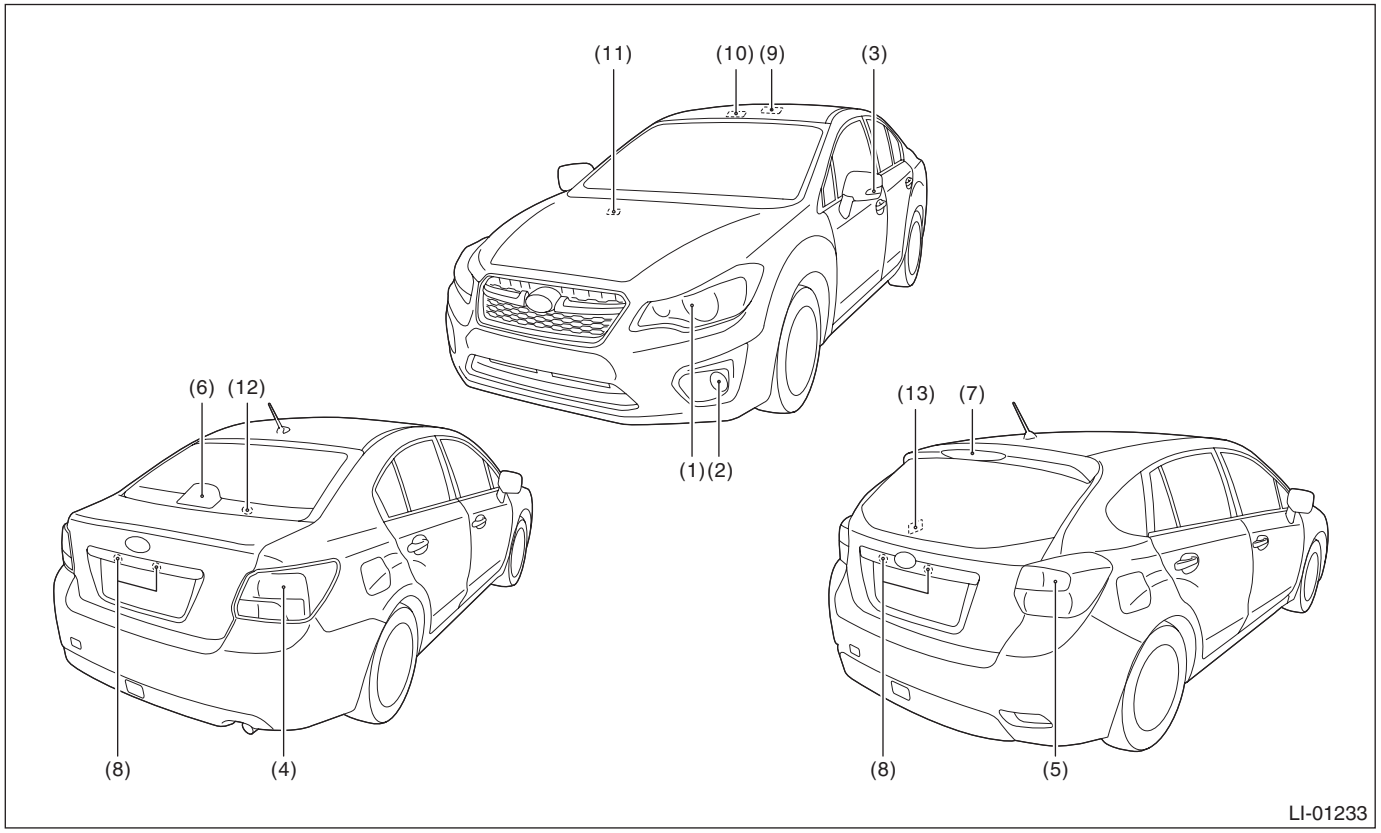
# 1. General Description

## A: SPECIFICATION



| | | | |
|---|---|---|---|
| (1) | Headlight | Low beam (Halogen type) | 12 V — 55 W |
| | | Low beam (HID type) | 12 V — 35 W |
| | | High beam | 12 V — 60 W |
| | | Front turn signal light | 12 V — 21 W |
| | | Parking light | 12 V — 5 W |
| | | Side marker light | 12 V — 5 W |
| (2) | Front fog light | | 12 V — 24 W |
| (3) | Side turn signal light | | 12 V — 1.1 W (LED) |
| (4) | Rear combination light (4 door model) | Tail & side marker/stop light | 12 V — 5 / 21 W |
| | | Turn signal light | 12 V — 21 W |
| | | Back-up light | 12 V — 16 W |
| (5) | Rear combination light (5 door model/XV model) | Tail/stop light | 12 V — 5 / 21 W |
| | | Back-up light | 12 V — 16 W |
| | | Turn signal light | 12 V — 21 W |
| | | Side marker light | 12 V — 5 W |
| (6) | High-mounted stop light (4 door model) | | 12 V — 21 W |
| (7) | High-mounted stop light (5 door model/XV model) | | 12 V — 2.1 W (LED) |
| (8) | License plate light | | 12 V — 5 W |
| (9) | Room light | | 12 V — 8 W |
| (10) | Spot map light | | 12 V — 8 W |
| (11) | Glove box light | | 12 V — 1.4 W |
| (12) | Trunk room light (4 door model) | | 12 V — 5 W |
| (13) | Luggage room light (5 door model/XV model) | | 12 V — 5 W |

## B: CAUTION

• Before disassembling or reassembling parts, always disconnect the battery ground cable from battery. When replacing the audio, control module and other parts provided with memory functions, record the memory contents before disconnecting the battery ground cable. Otherwise, the memory is cleared.
• Reassemble the parts in the reverse order of disassembly procedure unless otherwise indicated.
• Connect the connectors securely during reassembly.
• After reassembly, make sure that the each component operates normally.
• Yellow connectors and harnesses with yellow tapes around them are the connectors and harnesses for the airbag system. Using a tester above such circuits may cause malfunction of airbag system. Follow the cautions for “AIRBAG SYSTEM” in this case. <Ref. to AB-11, CAUTION, General Description.>
• Be careful not to damage the airbag system wiring harness when servicing electrical parts and switches.
• If the steering wheel and steering angle sensor (steering roll connector) are removed, perform “VDC sensor midpoint setting mode” of the VDC. <Ref. to VDC-19, VDC SENSOR MIDPOINT SETTING MODE, ADJUSTMENT, VDC Control Module and Hydraulic Control Unit (VDCCM&H/U).>

## C: PREPARATION TOOL

### 1. SPECIAL TOOL

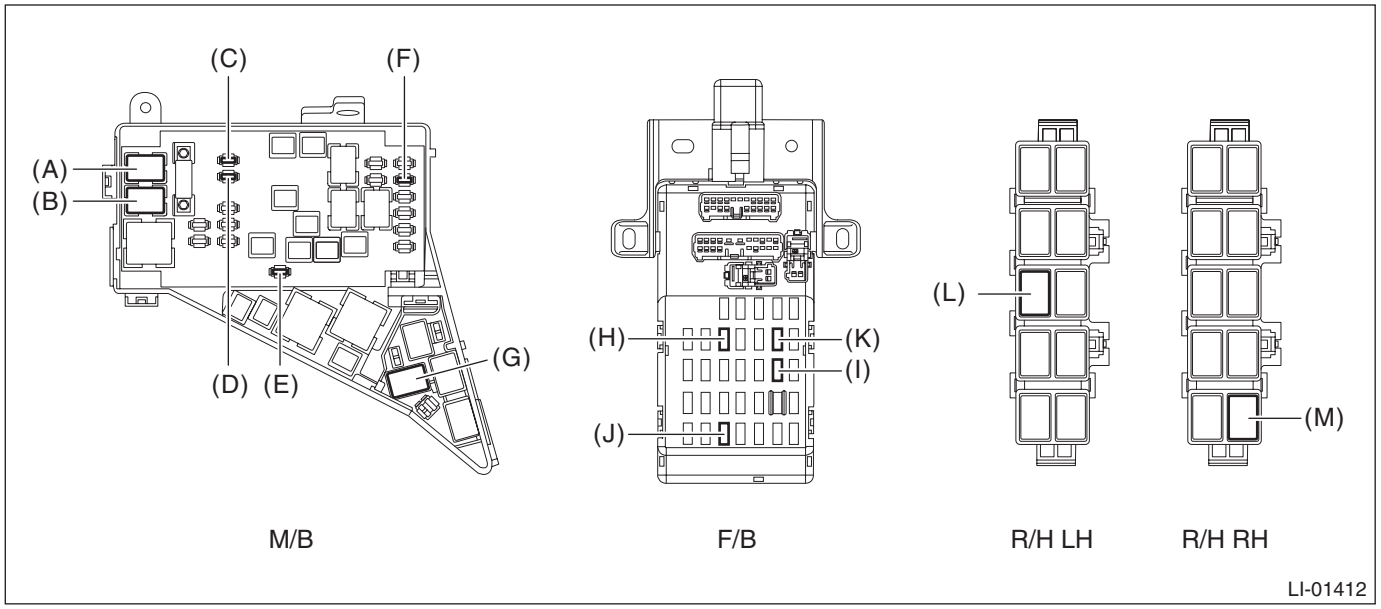
| ILLUSTRATION | TOOL NUMBER | DESCRIPTION | REMARKS |
|---|---|---|---|
|  ST1B022XU0 | 1B022XU0 | SUBARU SELECT MONITOR III KIT | Used for setting of each function and trouble-shooting for electrical system.<br>NOTE:<br>For detailed operation procedures of SUBARU SELECT MONITOR III KIT, refer to “PC application help for Subaru Select Monitor”. |

### 2. GENERAL TOOL

| TOOL NAME | REMARKS |
|---|---|
| Circuit tester | Used for measuring resistance and voltage. |
| Steering wheel puller | Used for removing the steering wheel. |

# 2. Relay and Fuse

## A: LOCATION



| | | |
|---|---|---|
| Main fuse box | Headlight relay (HI) | (A) |
| | Headlight relay (LO) | (B) |
| | Fuse 15A (daytime running light relay) | (C) |
| | Fuse 15A (front fog light relay, headlight LH / RH (LO)) | (D) |
| | Fuse 20A (spot map light, room light, ignition switch illumination) | (E) |
| | Fuse 15A (tail and illumination relay, daytime running light relay) | (F) |
| | Daytime running light relay | (G) |
| Relay & fuse box | Fuse 15A (stop light and brake switch) | (H) |
| | Fuse 10A (inhibitor switch, back-up light switch, auto headlight beam leveler CM) | (I) |
| | Fuse 15A (front fog light relay) | (J) |
| | Fuse 7.5A (turn signal & hazard unit) | (K) |
| Relay holder LH | Tail & Illumination relay | (L) |
| Relay holder RH | Front fog light relay | (M) |

NOTE:
For other related fuses, refer to the wiring diagram. <Ref. to WI-15, Power Supply Circuit.>

# B: INSPECTION

## 1. CHECK FUSE

1) Remove the fuse and inspect visually.
2) If the fuse is blown out, replace the fuse.

NOTE:
If the fuse is blown again, check the system wiring harness.

## 2. CHECK RELAY

1) Check the resistance between relay terminals.

| Terminal No. | Inspection conditions | Standard | Circuit |
|---|---|---|---|
| 1 — 2 | Always | 1 MΩ or more |  LI-01273 |
| 1 — 2 | Apply battery voltage between terminals 4 and 3. | Less than 1 Ω | |

| Terminal No. | Inspection conditions | Standard | Circuit |
|---|---|---|---|
| 1 — 2 | Always | 1 MΩ or more |  LI-01274 |
| 1 — 4 | Always | Less than 1 Ω | |
| 1 — 2 | Apply battery voltage between terminals 3 and 5. | Less than 1 Ω | |

2) Replace the relay if the inspection result is not within the standard value.

# 3. Headlight System

## A: WIRING DIAGRAM

Refer to “Headlight System” in the wiring diagram. <Ref. to WI-95, WIRING DIAGRAM, Headlight System.>

## B: INSPECTION

### 1. AUTO HEADLIGHT SYSTEM CHECK

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK HEADLIGHT ILLUMINATION.**<br>Set the lighting switch to the switch 1 (TAIL) and switch 2 (HEAD). | Do the tail and headlight illuminate? | Go to step **2**. | Check the combination switch (light) and headlight bulb. |
| 2 | **CHECK CURRENT DATA.**<br>Using the Subaru Select Monitor, display the data of «Lighting AUTO input».<br>NOTE:<br>For detailed procedures, refer to “PC application help for Subaru Select Monitor”. | Does the display switch between OFF ←→ ON when the lighting switch is moved to AUTO position? | Go to step **3**. | Go to step **8**. |
| 3 | **CHECK CURRENT DATA.**<br>1) Using the Subaru Select Monitor, display the data of «Illumination Sensor Output».<br>2) Measure the voltage when the area around the light control sensor, which was dark, becomes bright.<br>***Illumination sensor output***<br>***Dark condition: Approx. 0.6 V or less***<br>***Bright condition: Approx. 3.0 V or more*** | Is the voltage output according to the brightness? | Check and replace the body integrated unit.<br>• Inspection: <Ref. to BC(diag)-2, Basic Diagnostic Procedure.><br>• Replacement: <Ref. to SL-78, Body Integrated Unit.> | Go to step **4**. |
| 4 | **CHECK HARNESS.**<br>1) Disconnect the connectors from body integrated unit and light control sensor.<br>2) Check the harness between body integrated unit and light control sensor.<br>***Connector & terminal***<br>***(B280) No. 19 — (i226) No. 2:***<br>***(B280) No. 29 — (i226) No. 1:***<br>***(B281) No. 1 — (i226) No. 3:*** | Is harness normal? | Go to step **5**. | Repair or replace the harness. |
| 5 | **CHECK HARNESS.**<br>1) Connect the connector of body integrated unit.<br>2) Turn the ignition switch to ON.<br>3) Measure the voltage between light control sensor connector and chassis ground.<br>***Connector & terminal***<br>***(i226) No. 3 (+) — Chassis ground (–):*** | Is the voltage 4.5 — 5.5 V? | Go to step **6**. | Replace the body integrated unit. <Ref. to SL-78, Body Integrated Unit.> |
| 6 | **CHECK BODY INTEGRATED UNIT.**<br>Measure the resistance between the body integrated unit and chassis ground.<br>***Connector & terminal***<br>***(B280) No. 29 — Chassis ground:*** | Is the resistance less than 10 Ω? | Go to step **7**. | Replace the body integrated unit. <Ref. to SL-78, Body Integrated Unit.> |
| 7 | **CHECK LIGHT CONTROL SENSOR.**<br>1) Connect the light control sensor connector.<br>2) Check the light control sensor. <Ref. to LI-26, INSPECTION, Light Control Sensor.> | Is the light control sensor normal? | Go to step **8**. | Replace the light control sensor. |
| 8 | **CHECK COMBINATION SWITCH (LIGHT).**<br>Check the combination switch (light). <Ref. to LI-22, INSPECTION, Combination Switch (Light).> | Is the combination switch (light) normal? | Go to step **9**. | Replace the combination switch (light). |

| Step | | Check | Yes | No |
|---|---|---|---|---|
| 9 | **CHECK HARNESS.**<br>1) Disconnect the connectors of body integrated unit and combination switch (light).<br>2) Check the harness between body integrated unit and combination switch (light).<br>***Connector & terminal***<br>***(B71) No. 19 — (B281) No. 16:*** | Is harness normal? | Check and replace the body integrated unit.<br>• Inspection: <Ref. to BC(diag)-2, Basic Diagnostic Procedure.><br>• Replacement: <Ref. to SL-78, Body Integrated Unit.> | Repair or replace the harness. |

### 2. CHECK LIGHTING SWITCH

Refer to the “INSPECTION” of the “Combination Switch (Light)”. <Ref. to LI-22, INSPECTION, Combination Switch (Light).>

### 3. CHECK DIMMER & PASSING SWITCH

Refer to the “INSPECTION” of the “Combination Switch (Light)”. <Ref. to LI-22, INSPECTION, Combination Switch (Light).>

## C: NOTE

For operation procedures of each component of the headlight system, refer to the respective section.
- Headlight Assembly: <Ref. to LI-27, Headlight Assembly.>
- Headlight bulb: <Ref. to LI-36, Headlight Bulb.>
- Combination switch (light): <Ref. to LI-18, Combination Switch (Light).>
- Light control sensor: <Ref. to LI-25, Light Control Sensor.>

# 4. Day Time Running Light System

## A: WIRING DIAGRAM

Refer to “Headlight System” in the wiring diagram. <Ref. to WI-95, WIRING DIAGRAM, Headlight System.>

## B: INSPECTION

### 1. DAYTIME RUNNING LIGHT SYSTEM CHECK

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK BODY INTEGRATED UNIT.**<br>Read the DTC using Subaru Select Monitor.<br>NOTE:<br>For detailed procedures, refer to “PC application help for Subaru Select Monitor”. | Is DTC displayed? | Perform the diagnosis according to DTC. | Go to step **2**. |
| 2 | **CHECK CURRENT DATA.**<br>Display the following items using Subaru Select Monitor.<br>• «Parking Brake Switch Input»<br>• «Shift position»<br>• «Lighting II Switch Input» | Is the input signal normal? | Go to step **3**. | Check the defective part. |
| 3 | **CHECK RELAY.**<br>Check the daytime running light relay. <Ref. to LI-5, CHECK RELAY, INSPECTION, Relay and Fuse.> | Is the relay OK? | Go to step **4**. | Replace the relay. |
| 4 | **CHECK HARNESS.**<br>Check each harness. | Is harness normal? | Replace the body integrated unit. <Ref. to SL-78, REMOVAL, Body Integrated Unit.> | Repair or replace the harness. |

## C: NOTE

For operation procedures of each component of the daytime running light system, refer to the respective section.

- Headlight Assembly: <Ref. to LI-27, Headlight Assembly.>
- Headlight bulb: <Ref. to LI-36, Headlight Bulb.>
- Combination switch (light): <Ref. to LI-18, Combination Switch (Light).>
- Daytime running resistor: <Ref. to LI-93, Day Time Running Resistor.>

# 5. Clearance Light and Illumination Light System

## A: WIRING DIAGRAM

Refer to “Clearance Light and Illumination Light System” in the wiring diagram. <Ref. to WI-49, WIRING DIAGRAM, Clearance Light and Illumination Light System.>

## B: INSPECTION

### 1. CHECK LIGHTING SWITCH

Refer to the “INSPECTION” of the “Combination Switch (Light)”. <Ref. to LI-22, INSPECTION, Combination Switch (Light).>

## C: NOTE

For operation procedures of each component of the clearance light & illumination light system, refer to the respective sections.

- Combination switch (light): <Ref. to LI-18, Combination Switch (Light).>
- Parking light bulb: <Ref. to LI-51, Clearance/Parking Light Bulb.>
- Front side marker light bulb: <Ref. to LI-52, Front Side Marker Light Bulb.>
- Rear combination light assembly: <Ref. to LI-58, Rear Combination Light Assembly.>
- Tail light/stop light bulb: <Ref. to LI-61, Tail/Stop Light Bulb.>
- Rear side marker light bulb: <Ref. to LI-67, Rear Side Marker Light Bulb.>
- License plate light: <Ref. to LI-72, License Plate Light.>
- Ignition switch illumination: <Ref. to LI-87, Ignition Switch Illumination.>

# 6. Front Fog Light System

## A: WIRING DIAGRAM

Refer to “Front Fog Light System” in the wiring diagram. <Ref. to WI-89, WIRING DIAGRAM, Front Fog Light System.>

## B: INSPECTION

### 1. CHECK FRONT FOG LIGHT SWITCH

Refer to the “INSPECTION” of the “Combination Switch (Light)”. <Ref. to LI-22, INSPECTION, Combination Switch (Light).>

## C: NOTE

For operation procedures of each component of the front fog light system, refer to the respective section.

- Combination switch (light): <Ref. to LI-18, Combination Switch (Light).>
- Front fog light assembly: <Ref. to LI-53, Front Fog Light Assembly.>
- Front fog light bulb: <Ref. to LI-56, Front Fog Light Bulb.>

# 7. Turn Signal Light and Hazard Light System

## A: WIRING DIAGRAM

Refer to “Turn Signal Light and Hazard Light System” in the wiring diagram. <Ref. to WI-149, WIRING DIAGRAM, Turn Signal Light and Hazard Light System.>

## B: INSPECTION

### 1. CHECK TURN SIGNAL SWITCH

Refer to the “INSPECTION” of the “Combination Switch (Light)”. <Ref. to LI-22, INSPECTION, Combination Switch (Light).>

### 2. CHECK HAZARD SWITCH

Refer to the “INSPECTION” of the “Hazard Switch”. <Ref. to LI-47, INSPECTION, Hazard Switch.>

### 3. CHECK TURN SIGNAL AND HAZARD MODULE

Refer to “INSPECTION” of the “Turn Signal Light and Hazard Light System”. <Ref. to LI-49, INSPECTION, Turn Signal Light & Hazard Light Module.>

## C: NOTE

For operation procedures of each component of the turn signal and hazard light system, refer to the respective sections.

- Combination switch (light): <Ref. to LI-18, Combination Switch (Light).>
- Front turn signal light bulb: <Ref. to LI-50, Front Turn Signal Light Bulb.>
- Side turn signal light assembly: <Ref. to LI-57, Side Turn Signal Light Assembly.>
- Rear combination light assembly: <Ref. to LI-58, Rear Combination Light Assembly.>
- Rear turn signal light bulb: <Ref. to LI-64, Rear Turn Signal Light Bulb.>
- Hazard switch: <Ref. to LI-46, Hazard Switch.>
- Turn signal and hazard module: <Ref. to LI-48, Turn Signal Light & Hazard Light Module.>

# 8. Back-up Light System

## A: WIRING DIAGRAM

Refer to “Back-up Light System” in the wiring diagram. <Ref. to WI-45, WIRING DIAGRAM, Back-up Light System.>

## B: INSPECTION

### 1. CHECK BACK-UP LIGHT SWITCH (MT MODEL)

Refer to “INSPECTION” of the “Switches and Harness” in “MANUAL TRANSMISSION AND DIFFERENTIAL” section. <Ref. to 5MT-36, BACK-UP LIGHT SWITCH, INSPECTION, Switches and Harness.>

### 2. CHECK INHIBITOR SWITCH (CVT MODEL)

Refer to “INSPECTION” of the “Inhibitor Switch” in “CONTINUOUSLY VARIABLE TRANSMISSION” section. <Ref. to CVT-90, INSPECTION, Inhibitor Switch.>

## C: NOTE

For operation procedures of each component of the back-up light system, refer to the respective section.

- Rear combination light assembly: <Ref. to LI-58, Rear Combination Light Assembly.>
- Back-up light bulb: <Ref. to LI-69, Back-up Light Bulb.>

# 9. Stop Light System

## A: WIRING DIAGRAM

Refer to “Stop Light System” in the wiring diagram. <Ref. to WI-145, WIRING DIAGRAM, Stop Light System.>

## B: INSPECTION

### 1. CHECK STOP LIGHT SWITCH

Refer to “INSPECTION” of the “Stop Light Switch” in “BRAKE” section. <Ref. to BR-74, INSPECTION, Stop Light Switch.>

## C: NOTE

For operation procedures of each component of the stop light system, refer to the respective section.

- Rear combination light assembly: <Ref. to LI-58, Rear Combination Light Assembly.>
- Tail light/stop light bulb: <Ref. to LI-61, Tail/Stop Light Bulb.>
- High-mounted stop light: <Ref. to LI-74, High-mounted Stop Light.>

# 10.Interior Light System

## A: WIRING DIAGRAM

Refer to “Interior Light System” in the wiring diagram. <Ref. to WI-101, WIRING DIAGRAM, Interior Light System.>

## B: INSPECTION

### 1. CHECK DOOR SWITCH

Refer to the “INSPECTION” of the “Door Switch”. <Ref. to LI-95, INSPECTION, Door Switch.>

### 2. CHECK REAR GATE LATCH SWITCH

Refer to “INSPECTION” of the “Rear Gate Latch and Actuator Assembly” in “SECURITY AND LOCKS” section. <Ref. to SL-49, ACTUATOR, INSPECTION, Rear Gate Latch and Actuator Assembly.>

### 3. CHECK TRUNK LID LATCH SWITCH

Refer to “INSPECTION” of the “Trunk Lid Latch and Actuator Assembly” in “SECURITY AND LOCKS” section. <Ref. to SL-51, ACTUATOR, INSPECTION, Trunk Lid Latch and Actuator Assembly.>

## C: NOTE

For operation procedures of each component of the interior light system, refer to the respective section.

- Spot map light: <Ref. to LI-78, Spot Map Light.>
- Room light: <Ref. to LI-80, Room Light.>
- Luggage room light: <Ref. to LI-82, Luggage Room Light.>
- Trunk room light: <Ref. to LI-84, Trunk Room Light.>
- Glove box light: <Ref. to LI-85, Glove Box Light.>
- Door switch: <Ref. to LI-95, Door Switch.>

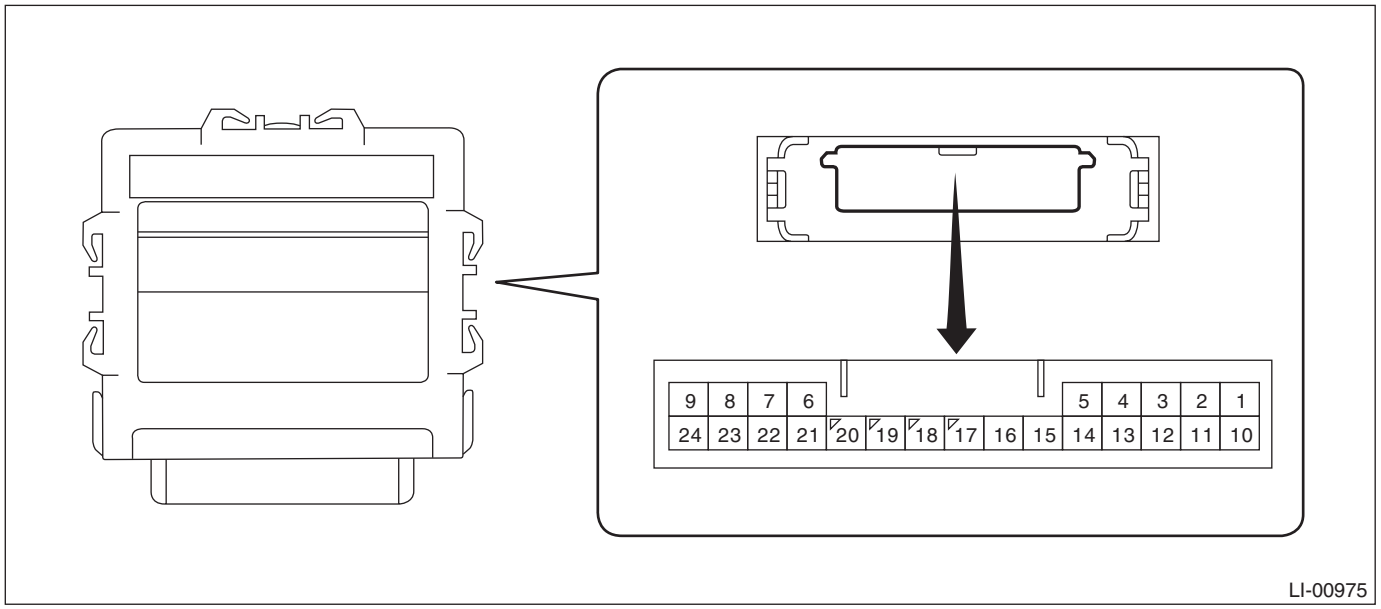
# 11.Auto Headlight Beam Leveler System

## A: WIRING DIAGRAM

Refer to “Headlight Beam Leveler System” in the wiring diagram. <Ref. to WI-93, WIRING DIAGRAM, Headlight Beam Leveler System.>

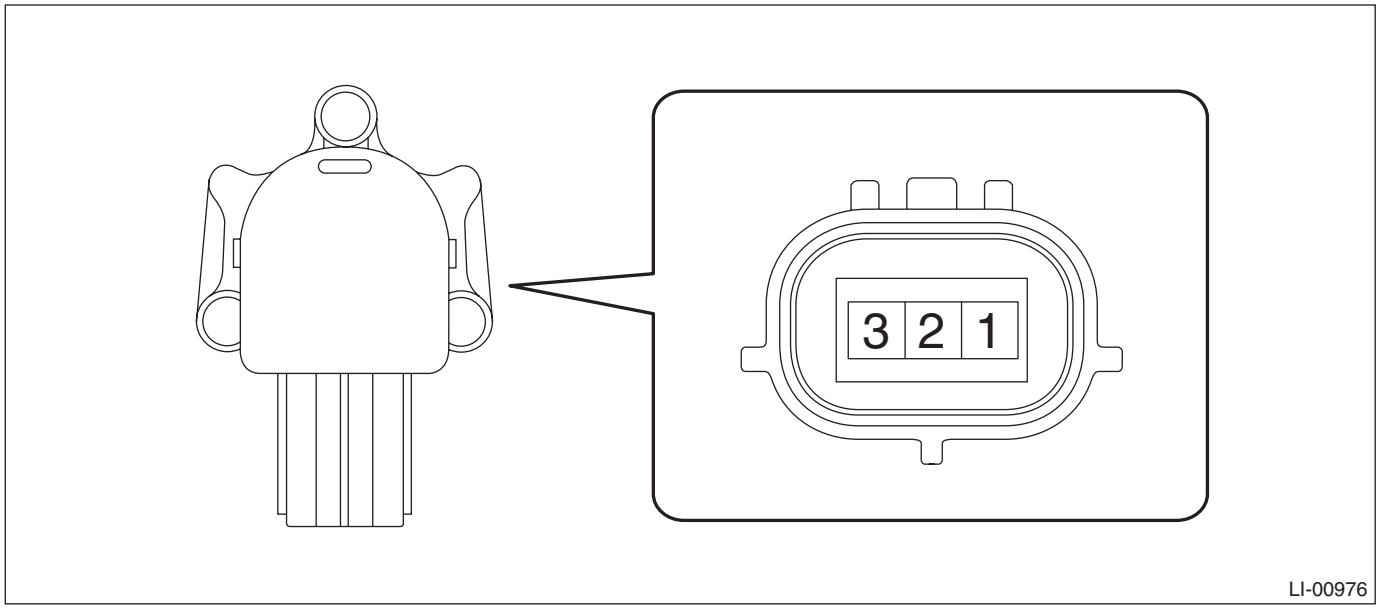
## B: SPECIFICATION

### 1. TERMINAL ARRANGEMENT OF AUTO HEADLIGHT BEAM LEVELER CM



(1) IG power supply
(2) GND
(3) Rear sensor GND
(4) Not used
(5) Not used
(6) Indicator output
(7) Not used
(8) Not used
(9) Not used
(10) Actuator power supply
(11) Actuator GND
(12) Rear sensor power supply
(13) Not used
(14) Not used
(15) Not used
(16) Not used
(17) Actuator control signal output
(18) Not used
(19) Rear sensor input
(20) Not used
(21) Not used
(22) Not used
(23) CAN-HI
(24) CAN-LO

### 2. TERMINAL LAYOUT OF VEHICLE HEIGHT SENSOR



(1) GND (2) Output (3) Power supply

## C: INSPECTION

Refer to “Basic Diagnostic Procedure” of “AUTO HEADLIGHT BEAM LEVELER SYSTEM (DIAGNOSTICS)” section. <Ref. to AL(diag)-2, Basic Diagnostic Procedure.>

## D: PROCEDURE

When parts related to the auto headlight beam leveler system are removed or replaced, perform the following procedures to initialize or reinitialize.

NOTE:
Before performing initialization or reinitialization, check the following:
- Vehicle is parked on a level surface.
- The inflation pressure of tires is correct.
- Unload any cargo from the vehicle.
- Vehicle's fuel tank is fully filled.
- Refer to the following chart to determine whether to initialize or reinitialize.

| | |
|---|---|
| Initialization | When the auto headlight beam leveler CM was replaced with a new module. |
| Reinitialization | • When the auto headlight beam leveler CM was replaced with a part from another vehicle.<br>• When suspension parts have been removed or replaced.<br>(Crossmember, front arm, sub frame, lateral link, housing, strut etc.)<br>• When the vehicle height sensor has been replaced or removed. |

**CAUTION:**
**If the indicator does not flash three times or the headlight beam does not operate, it can be assumed that there is an open circuit or faulty wiring in the harness of the auto headlight beam leveler CM, vehicle height sensors or headlight assembly. Perform inspection and repair according to the inspection results, then perform initialization/reinitialization again.**
- **Initialization: <Ref. to LI-17, INITIALIZATION, PROCEDURE, Auto Headlight Beam Leveler System.>**
- **Reinitialization: <Ref. to LI-17, REINITIALIZATION, PROCEDURE, Auto Headlight Beam Leveler System.>**

### 1. INITIALIZATION

1) Check that the indicator in the meter is flashing twice repeatedly.
2) Bounce the vehicle several times to normalize the suspension.
3) Make certain that someone is seated in the driver's seat.
4) Turn the ignition switch to ON, and within 1.5 — 20 seconds, turn the headlight switch OFF → ON for three successive times.
5) Make sure that the indicator in the meter flashes three times and then turns OFF, indicating that initialization has been successfully completed. (At this time, the headlight beam drops once, and then returns to the original position.)
6) Perform beam adjustment for the headlight. <Ref. to LI-34, ADJUSTMENT, Headlight Assembly.>

### 2. REINITIALIZATION

1) Bounce the vehicle several times to normalize the suspension.
2) Make certain that someone is seated in the driver's seat.
3) Turn the ignition switch to ON, and, within 1.5 — 10 seconds, turn the headlight switch OFF → ON five or more successive times.
4) Check that the headlight beam drops once, then returns to normal.
5) After confirming 4), turn the ignition switch to OFF within 30 seconds.
6) Turn the ignition switch to ON again, and, within 1.5 — 10 seconds, turn the headlight switch OFF → ON five or more successive times.
7) Make sure that the indicator in the meter flashes three times and then turns OFF, indicating that reinitialization has been successfully completed. (At this time, the headlight beam drops once, and then returns to the original position.)
8) Perform beam adjustment for the headlight. <Ref. to LI-34, ADJUSTMENT, Headlight Assembly.>

## E: NOTE

For operation procedures of each component of the auto headlight beam leveler system, refer to the respective section.
- Auto headlight beam leveler CM: <Ref. to LI-89, Auto Headlight Beam Leveler Control Module.>
- Vehicle height sensor: <Ref. to LI-91, Rear Height Sensor.>

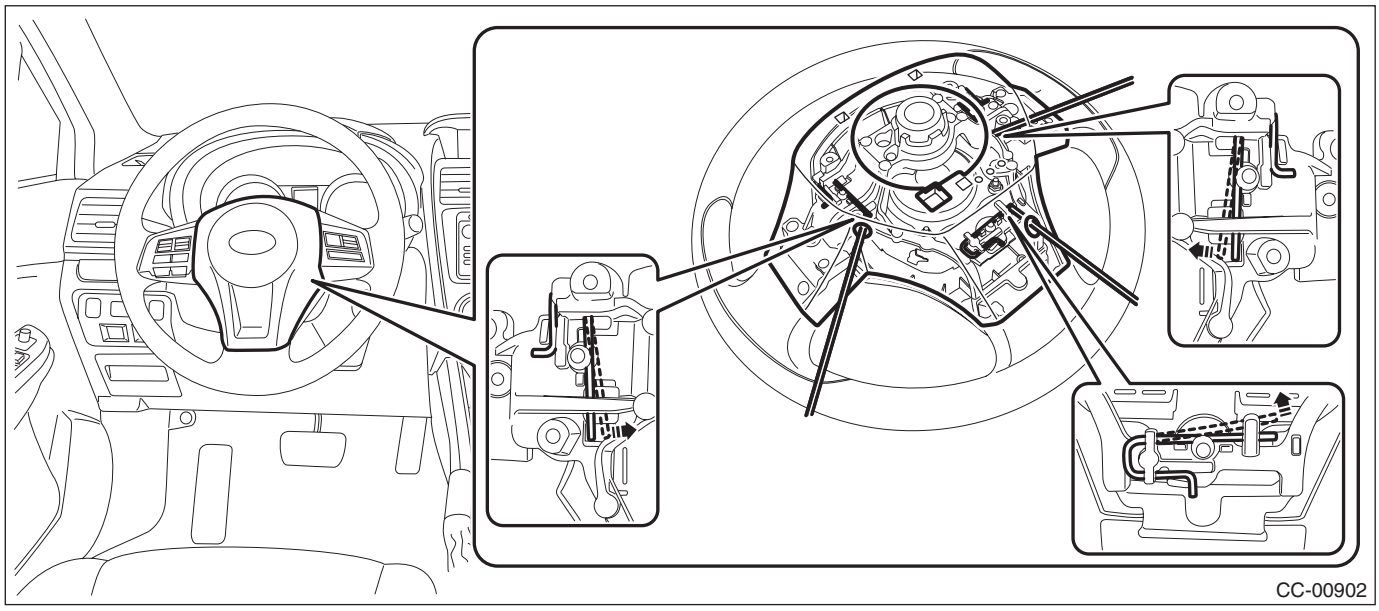
# 12.Combination Switch (Light)

## A: REMOVAL

1) Position the front wheels straight ahead. (After moving a vehicle 5 m (16 ft) or more with front wheels positioned straight ahead, make sure that the vehicle moves straight ahead.)
2) Turn the ignition switch to OFF.
3) Disconnect the ground cable from battery and wait for at least 60 seconds before starting work.
4) Remove the driver's airbag module.

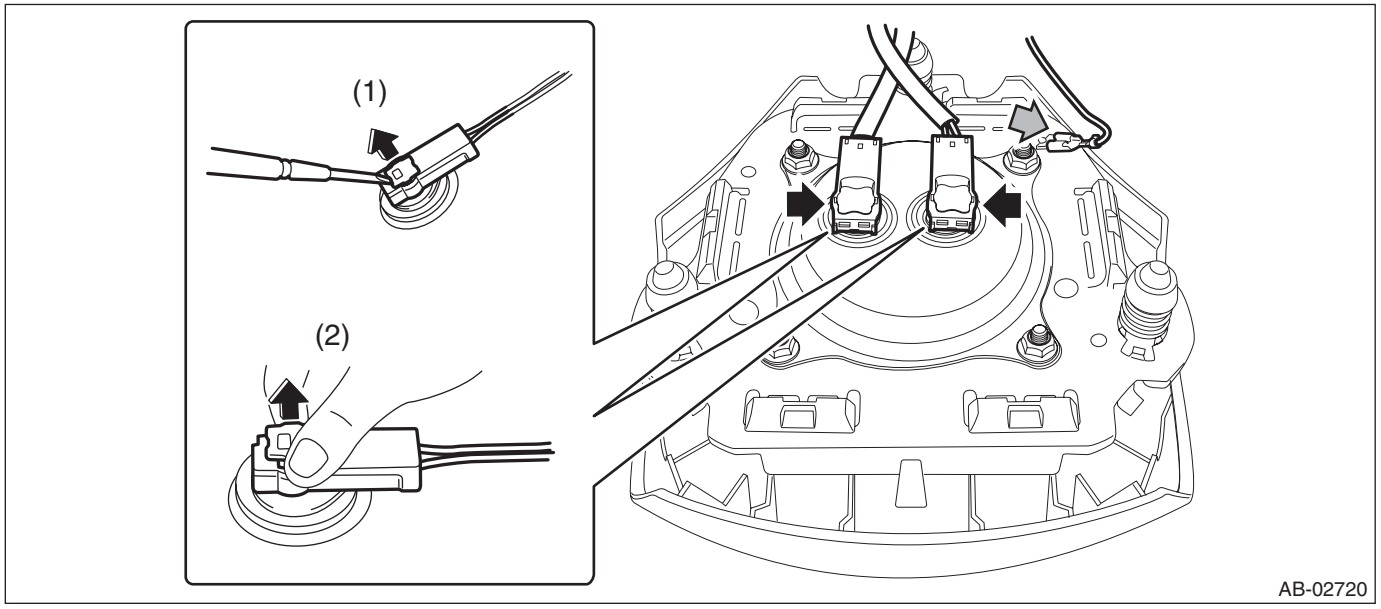
**CAUTION:**
**Before handling the airbag module, refer to "CAUTION" of "General Description" in "AIRBAG SYSTEM". <Ref. to AB-11, CAUTION, General Description.>**

(1) Using a hexagon wrench wrapped with protective tape, push in the snap pins to disengage the locks (3 places).



CC-00902

(2) Disconnect the horn harness and airbag connector, and remove the driver's airbag module. <Ref. to AB-24, DRIVER'S AIRBAG MODULE, CURTAIN AIRBAG MODULE & PRETENSIONER, PROCEDURE, Airbag Connector.>



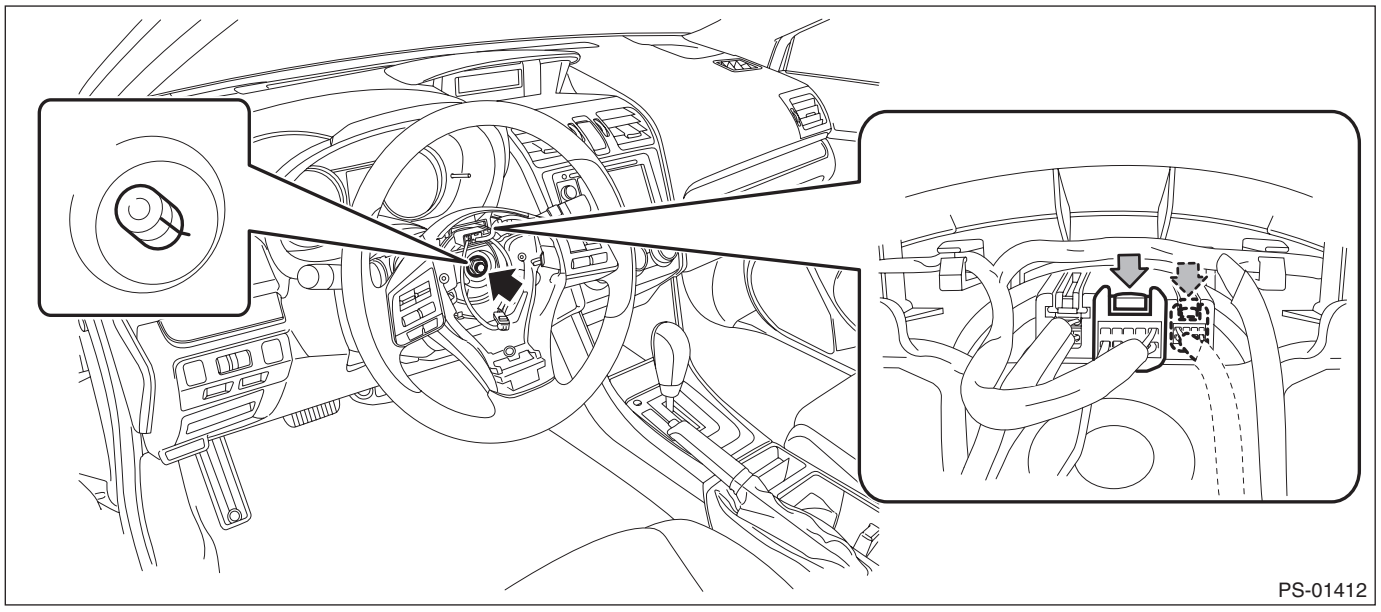
AB-02720

5) Remove the steering wheel.

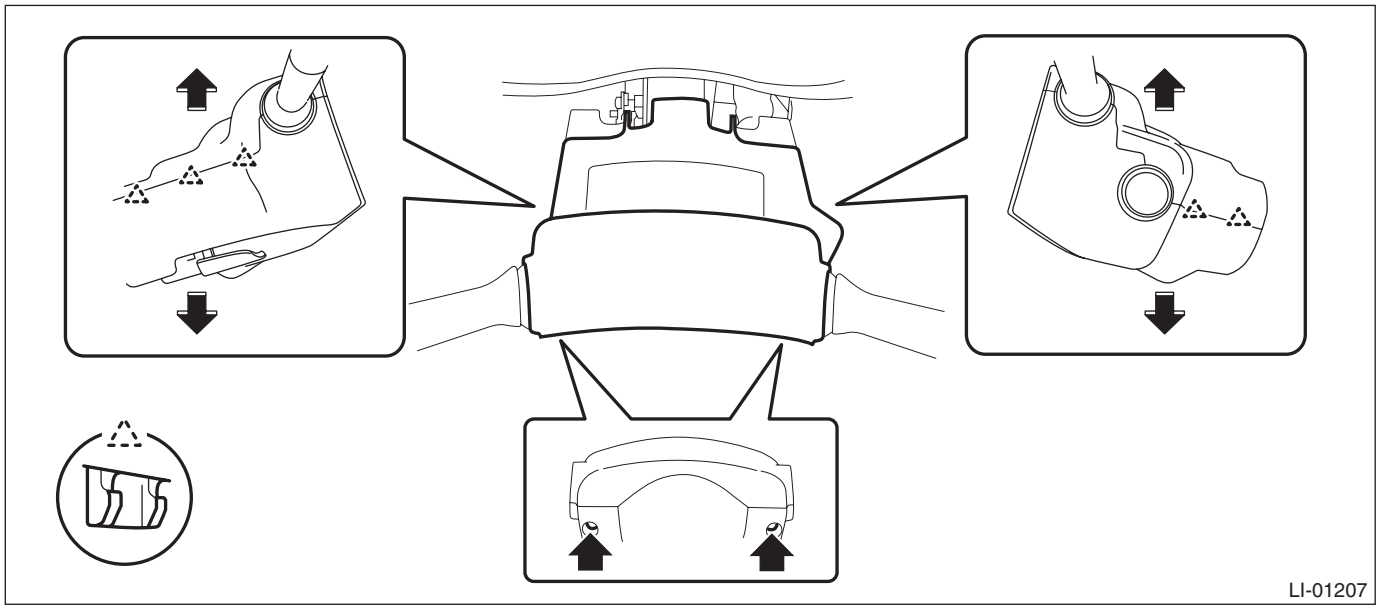
**CAUTION:**
- **Always use the steering wheel puller for removal to avoid deforming the steering wheel.**
- **If the steering wheel has been removed, make sure that the steering roll connector is not turned from the original position.**

(1) Disconnect the connector and remove the nut.
(2) Put alignment marks and remove the steering wheel using a steering wheel puller.

***Preparation tool:***
***Steering wheel puller***



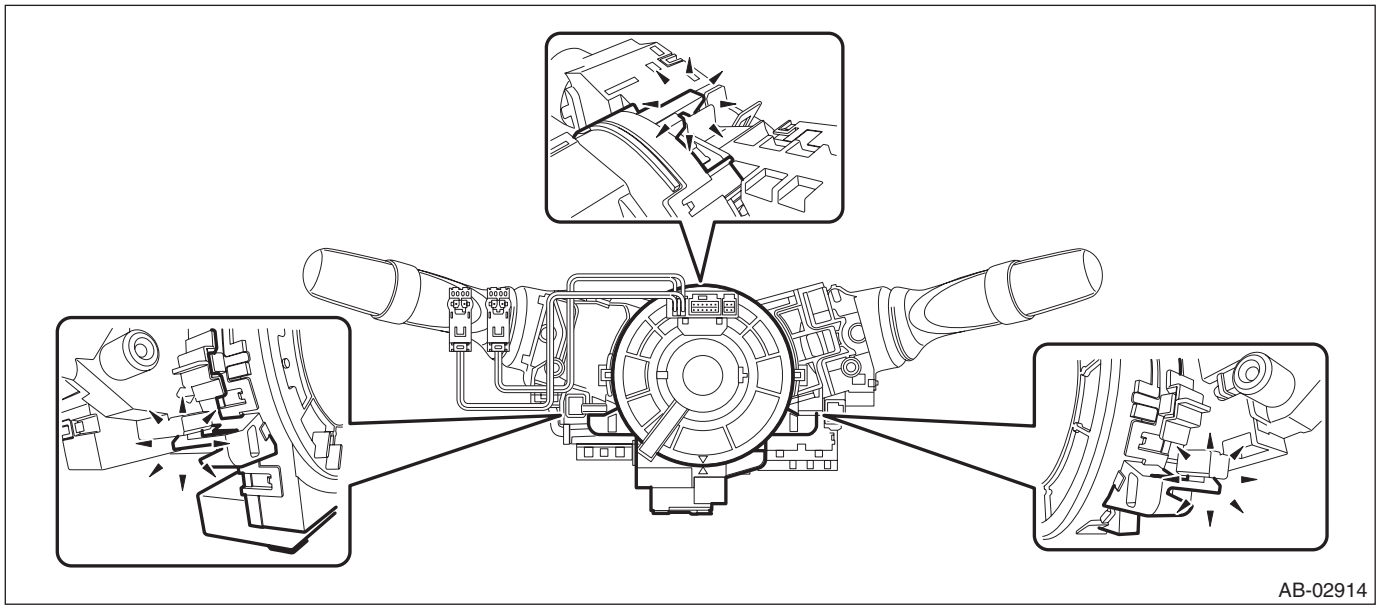
6) Remove the cover assembly - column.
(1) Remove the screws.
(2) Release the claw, and remove the cover assembly - column UPR and the cover assembly - column LWR.



7) Remove the steering roll connector.

**CAUTION:**
**Make sure that the steering roll connector is not turned from the original position.**

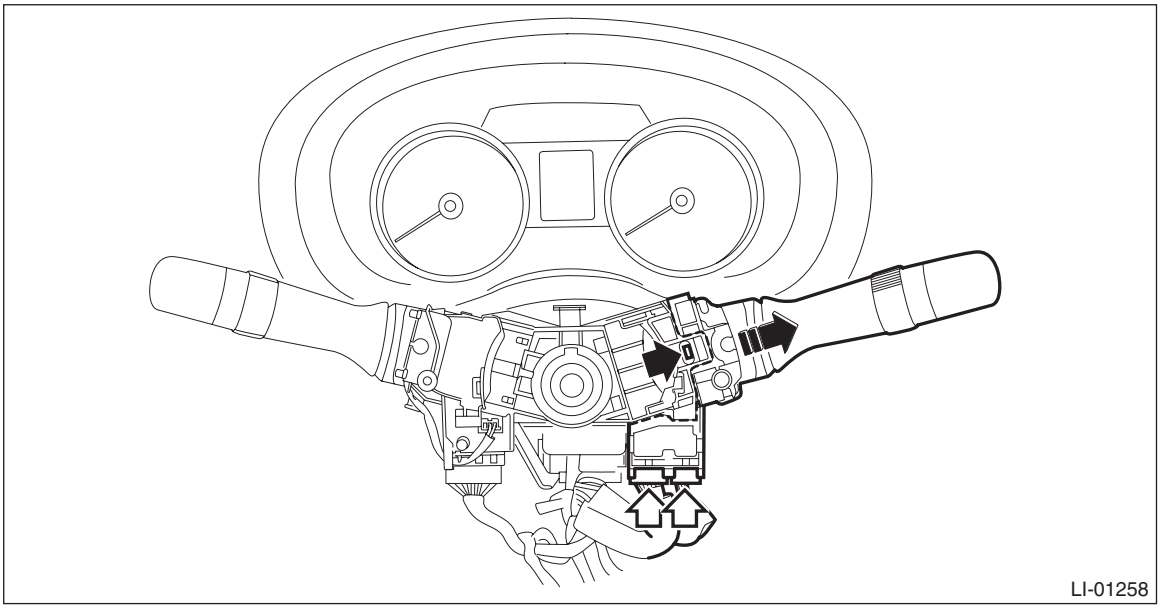
(1) Disconnect the connector under the steering roll connector.
(2) Release the claws and remove the steering roll connector.



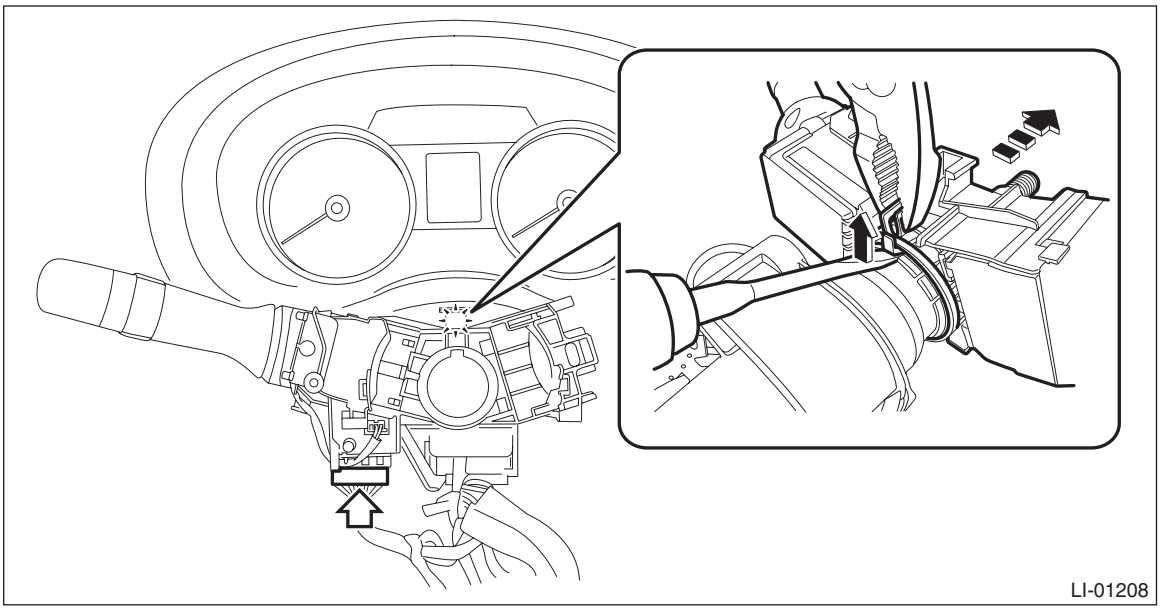
8) Remove the switch assembly - combination wiper select.

(1) Disconnect the connector.
(2) Release the claws, and pull out the switch assembly - combination wiper select.

**CAUTION:**
**Do not press the claws with excessive force. They may be damaged.**



9) Remove the switch assembly - combination turn dimmer.
(1) Disconnect the connector, and loosen the clamp to release the claws.
(2) Pull out the switch assembly - combination turn dimmer from the column assembly - steering.



## B: INSTALLATION

**CAUTION:**
**• Before handling the airbag module, refer to "CAUTION" of "General Description" in "AIRBAG SYSTEM". <Ref. to AB-11, CAUTION, General Description.>**
**• Do not allow harness and connectors to interfere or get tangled up with other parts.**
**• If the steering wheel and steering angle sensor (steering roll connector) are removed, perform "VDC sensor midpoint setting mode" of the VDC. <Ref. to VDC-19, VDC SENSOR MIDPOINT SETTING MODE, ADJUSTMENT, VDC Control Module and Hydraulic Control Unit (VDCCM&H/U).>**
1) Before installing steering wheel, be sure to adjust the direction of steering roll connector with steering wheel. <Ref. to AB-109, ADJUSTMENT, Roll Connector.>
2) Install each part in the reverse order of removal.

NOTE:
Align the alignment marks on the steering wheel and the column assembly - steering.

***Tightening torque:***
***Steering wheel: 39 N·m (3.98 kgf-m, 28.8 ft-lb)***

***Clearance:***
***Between cover assembly - column and steering wheel: 4 — 6 mm (0.16 — 0.24 in)***

# C: INSPECTION

## Unit inspection

***Preparation tool:***
***Circuit tester***

1) Check the resistance between switch terminals.

- Lighting switch

| Terminal No. | Inspection conditions | Standard | Connection diagram |
|---|---|---|---|
| — | Switch OFF | 1 MΩ or more | — |
| 18 — 12 | Switch 1 (TAIL) | Less than 1 Ω |  LI-01244 |
| 20, 18 — 12 | Switch 2 (HEAD) | Less than 1 Ω |  LI-01245 |
| 19 — 12 | Switch AUTO | Less than 1 Ω |  LI-01246 |

- Dimmer & passing switch

| Terminal No. | Inspection conditions | Standard | Connection diagram |
|---|---|---|---|
| 11, 17 — 12 | Switch PASS | Less than 1 Ω |  LI-01247 |
| 11 — 12 | Switch UP | Less than 1 Ω |  LI-01248 |

- Turn signal switch

| Terminal No. | Inspection conditions | Standard | Connection diagram |
|---|---|---|---|
| 13 — 12 | Switch TURN (RH) | Less than 1 Ω |  LI-01249 |
| 15 — 12 | Switch TURN (LH) | Less than 1 Ω |  LI-01250 |

- Front fog light switch

| Terminal No. | Inspection conditions | Standard | Connection diagram |
|---|---|---|---|
| 4 — 3 | Switch OFF | 1 MΩ or more |  |
| | Switch ON | Less than 1 Ω | |

2) Replace the switch assembly - combination turn dimmer if the inspection result is not within the standard value.

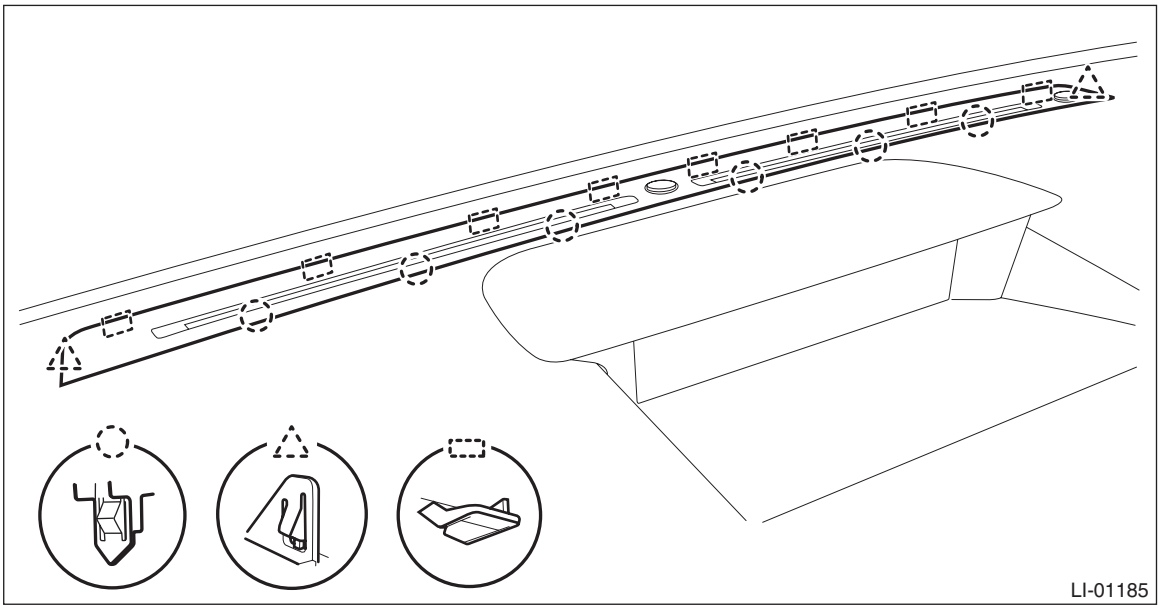
# 13.Light Control Sensor

## A: REMOVAL

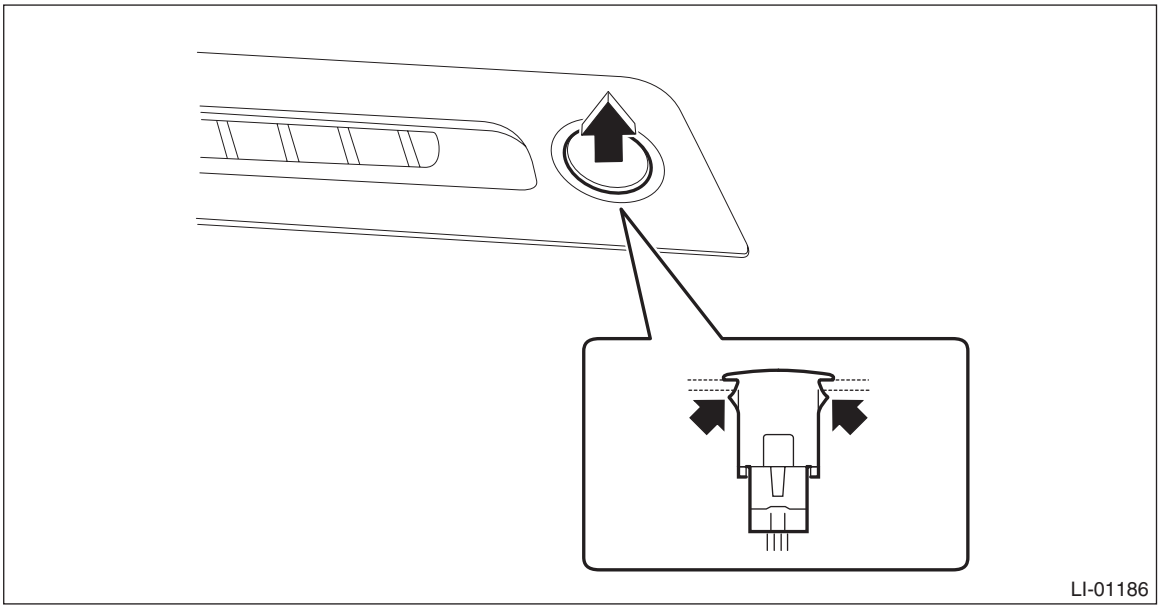
1) Disconnect the ground cable from battery.
2) Remove the sensor - automatic light.

**CAUTION:**
**Be careful not to damage the sensors and interior trims when removing.**

(1) Release the connector and claws, and remove the panel COMPL - instrument UPR.



(2) Release the claws, and remove the sensor - automatic light from the panel COMPL - instrument UPR.



## B: INSTALLATION

Install each part in the reverse order of removal.

# C: INSPECTION

## UNIT INSPECTION

***Preparation tool:***
***Circuit tester***

1) Turn the ignition switch to ON.
2) Set the lighting switch to AUTO position.
3) Check the voltage between the sensor terminals.

| Terminal No. | Inspection conditions | Standard | Connection diagram |
|---|---|---|---|
| 2 (+) — 1 (–) | Measure the voltage when the area around the sensor - automatic light, which was dark, becomes bright. | Dark condition: Approx. 0.6 V or less<br>Bright condition: Approx. 3.0 V or more |  LI-01280 |

4) Replace the sensor - automatic light if the inspection result is not within the standard value.

# 14.Headlight Assembly

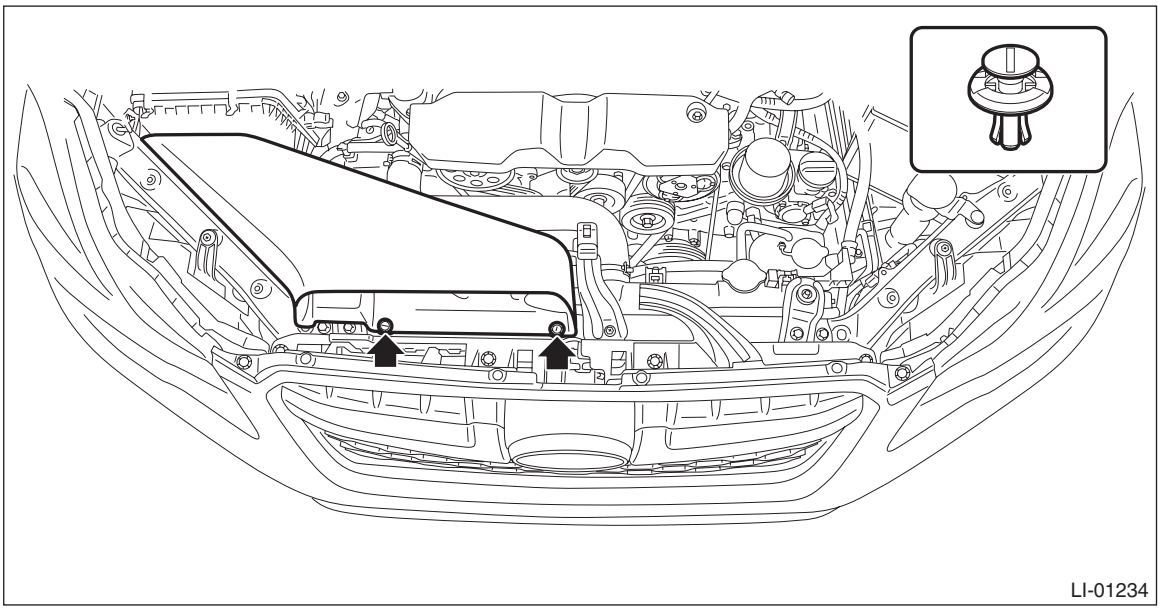
## A: REMOVAL

### 1. WHEN REMOVING RH SIDE

**WARNING:**
**Because the headlight system uses high voltage, be careful not to perform work with wet hands. There is a possibility of electrical shock.**

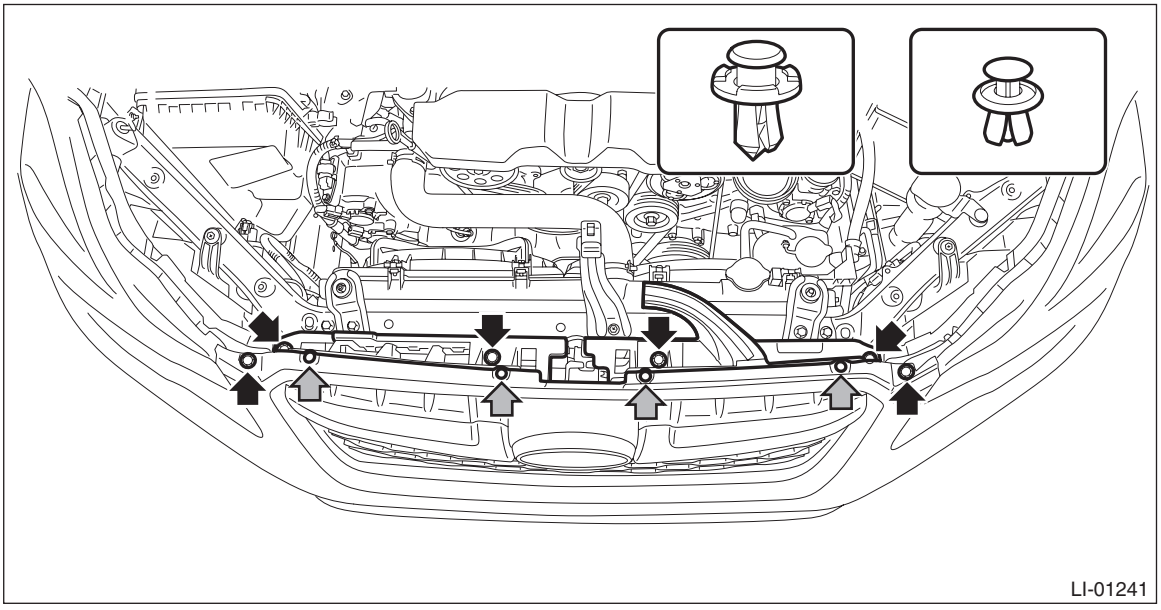
**CAUTION:**
**The HID type uses very high voltages for the lighting circuit. Make sure that the power supply is turned OFF before working.**

1) Disconnect the ground cable from battery.
2) Remove the clips and remove the air intake duct.



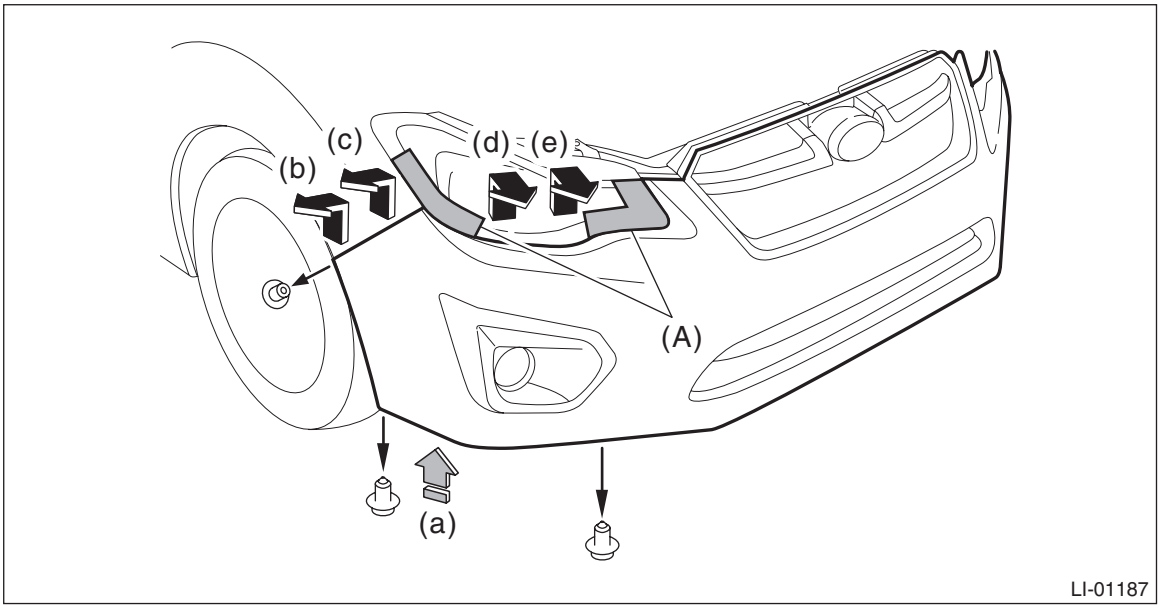
3) Remove the clip, and remove the bracket - grille.

**CAUTION:**
**To prevent damage to the bracket - grille, make sure to remove all clips.**



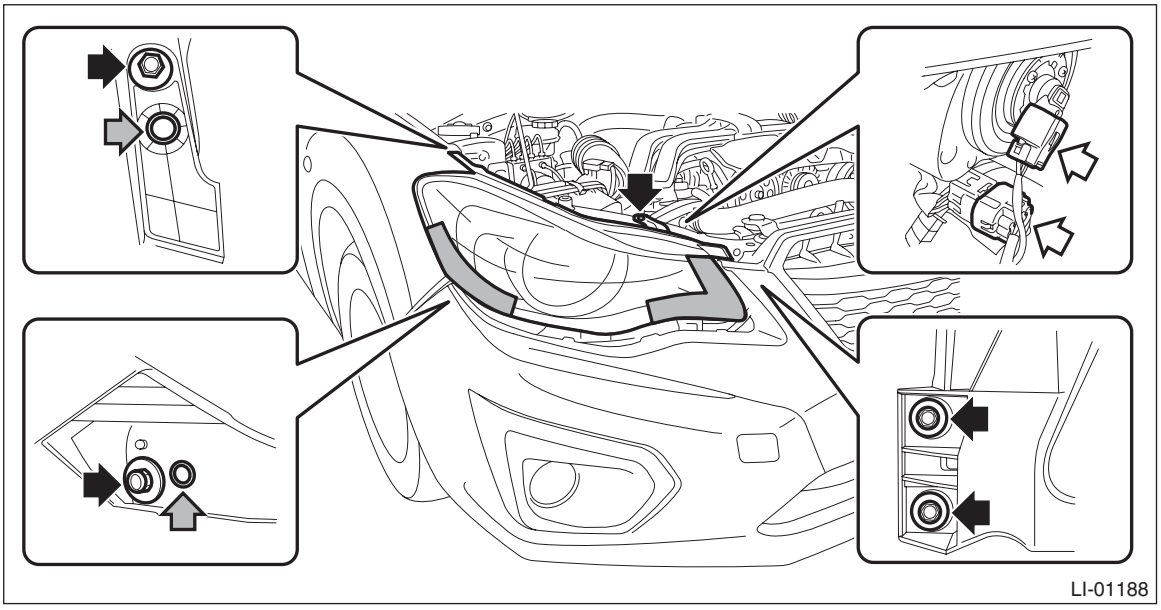
4) Detach the flange section on the right side of the bumper face - front.
(1) Apply protective tape (A) to the light assembly - head.
(2) Release the clips, and while pushing up the lower side (a) of the bumper face - front, remove from (b) to (e).

**CAUTION:**
**Do not pull forcibly. It may damage the flange sections of the bumper face - front.**



5) Remove the light assembly - head.

**CAUTION:**
**Be careful not to damage the light assembly - head, fender COMPL - front, and bumper face - front.**
(1) Disconnect connectors.
(2) Remove the bolts and clips, and remove the light assembly - head.



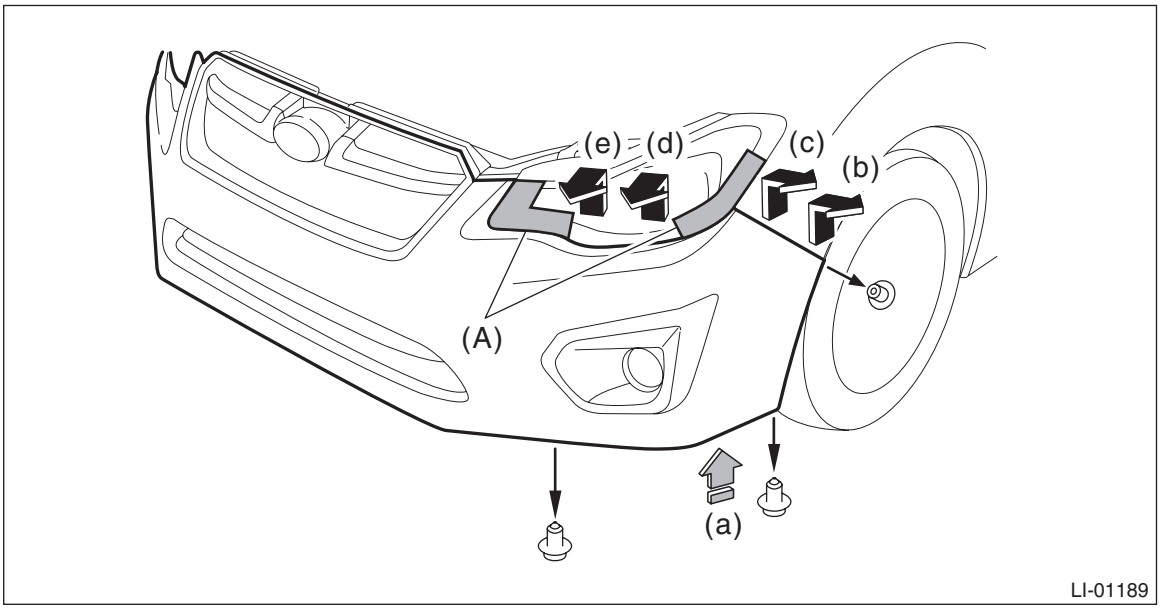
## 2. WHEN REMOVING LH SIDE

**WARNING:**
**Because the headlight system uses high voltage, be careful not to perform work with wet hands. There is a possibility of electrical shock.**

**CAUTION:**
**The HID type uses very high voltages for the lighting circuit. Make sure that the power supply is turned OFF before working.**

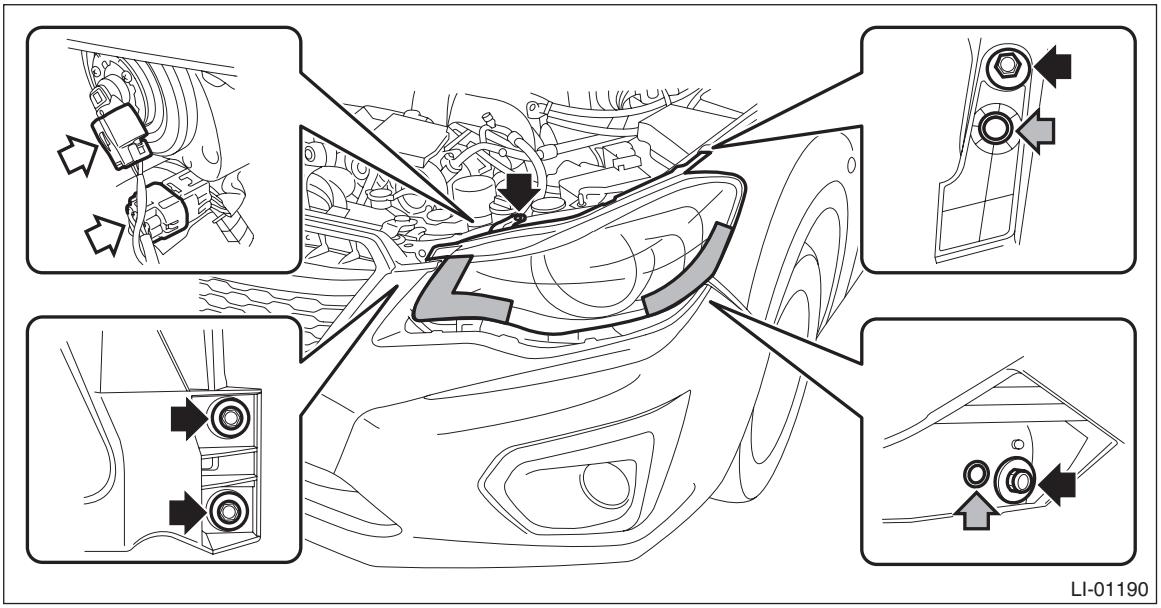
1) Disconnect the ground cable from battery.
2) Detach the flange section on the bumper face - front left side.
   (1) Apply protective tape (A) to the light assembly - head.
   (2) Release the clips, and while pushing up the lower side (a) of the bumper face - front, remove in the order from (b) to (e).

**CAUTION:**
**Do not pull forcibly. It may damage the flange sections of the bumper face - front.**



3) Remove the light assembly - head.

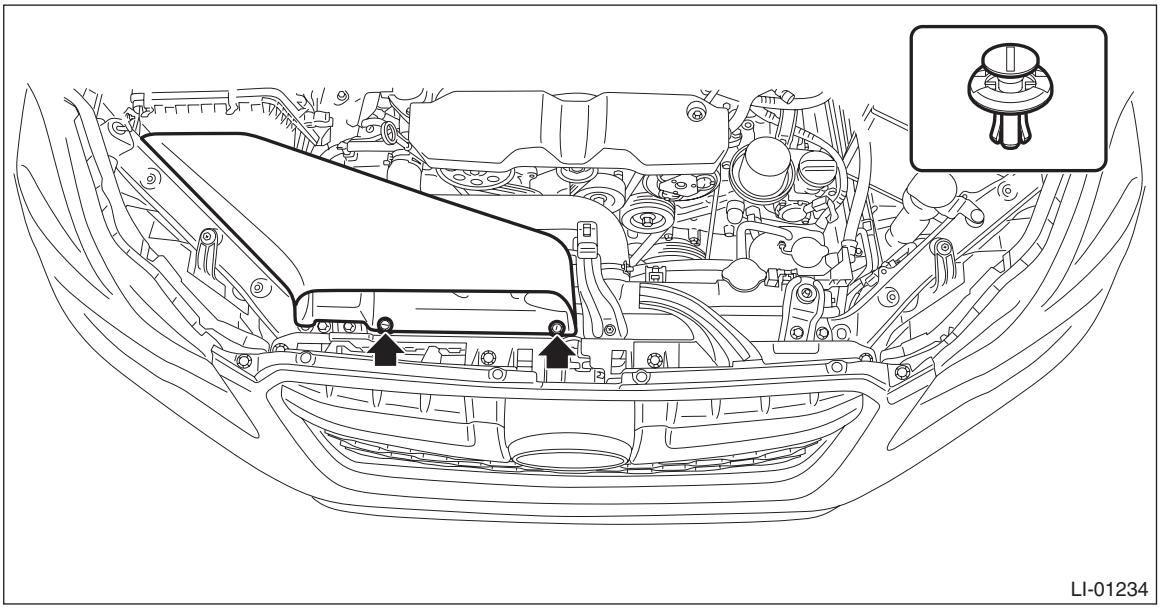
**CAUTION:**
**Be careful not to damage the light assembly - head, fender COMPL - front, and bumper face - front.**
(1) Disconnect connectors.
(2) Remove the bolts and clips, and remove the light assembly - head.



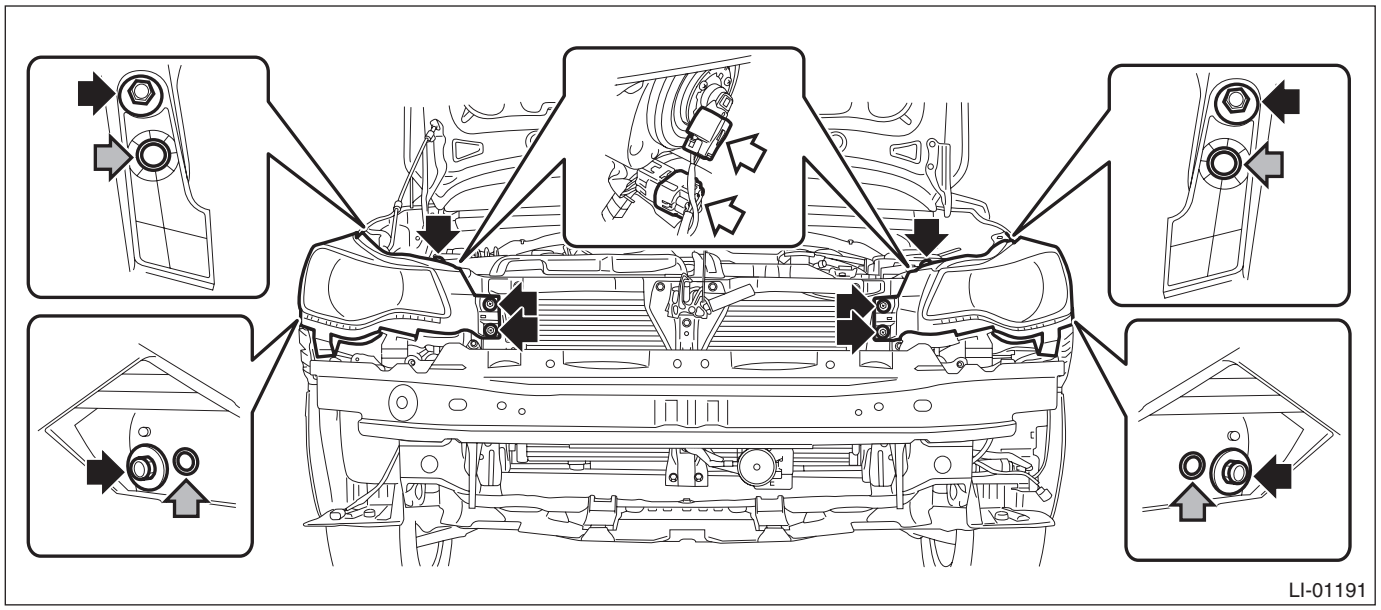
### 3. WHEN REMOVING BOTH SIDE

**WARNING:**
**Because the headlight system uses high voltage, be careful not to perform work with wet hands. There is a possibility of electrical shock.**

**CAUTION:**
**The HID type uses very high voltages for the lighting circuit. Make sure that the power supply is turned OFF before working.**
1) Disconnect the ground cable from battery.
2) Remove the clips and remove the air intake duct.



3) Remove the bumper face - front. <Ref. to EI-34, REMOVAL, Front Bumper.>
4) Remove the light assembly - head.
   (1) Disconnect connectors.
   (2) Remove the bolts and clips, and remove the light assembly - head.

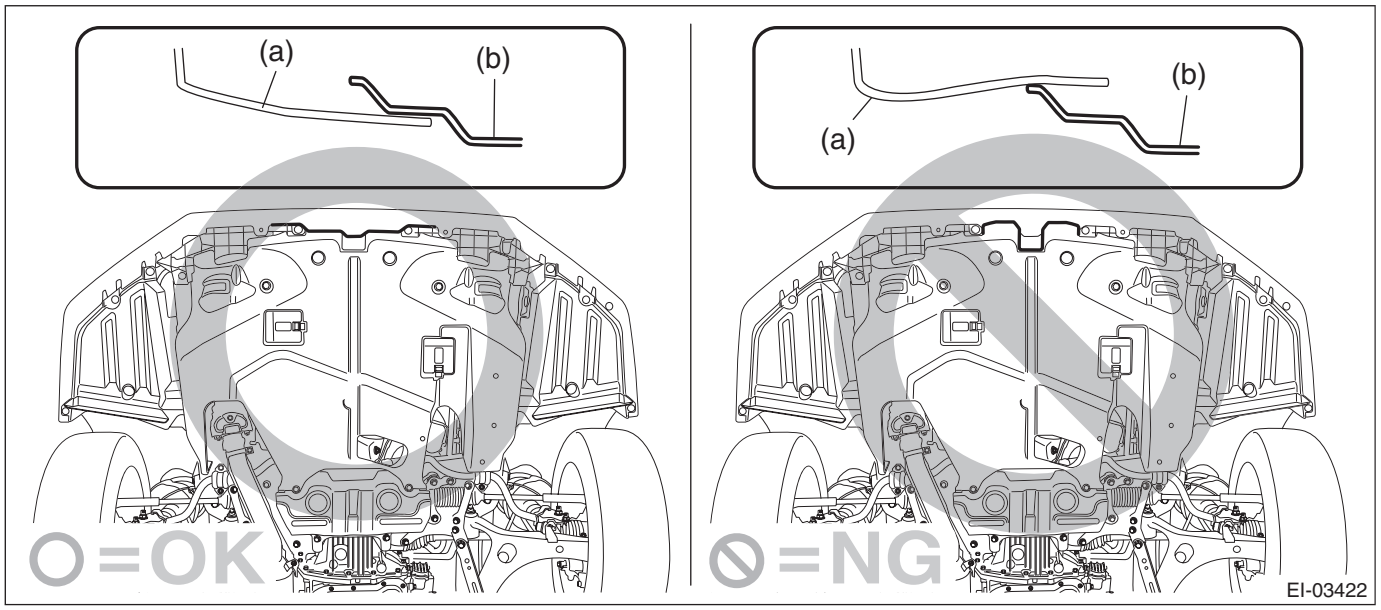


LI-01191

## B: INSTALLATION

1) Install each part in the reverse order of removal.
2) Secure the flange section of the bumper face - front to the bracket - front bumper side.

**CAUTION:**
**Install the bumper face - front so that the front end of the under cover (b) comes inside the bumper face - front (a).**



EI-03422

***Tightening torque:***
***Light assembly - head: 7.5 N·m (0.76 kgf-m, 5.5 ft-lb)***

3) Adjust the headlight beam and fog light beam.
- Adjust the headlight beam. <Ref. to LI-34, HEADLIGHT BEAM ADJUSTMENT, ADJUSTMENT, Headlight Assembly.>
- Adjust the fog light beam. (Model with fog light) <Ref. to LI-54, FOG LIGHT AIMING, ADJUSTMENT, Front Fog Light Assembly.>

# C: DISASSEMBLY

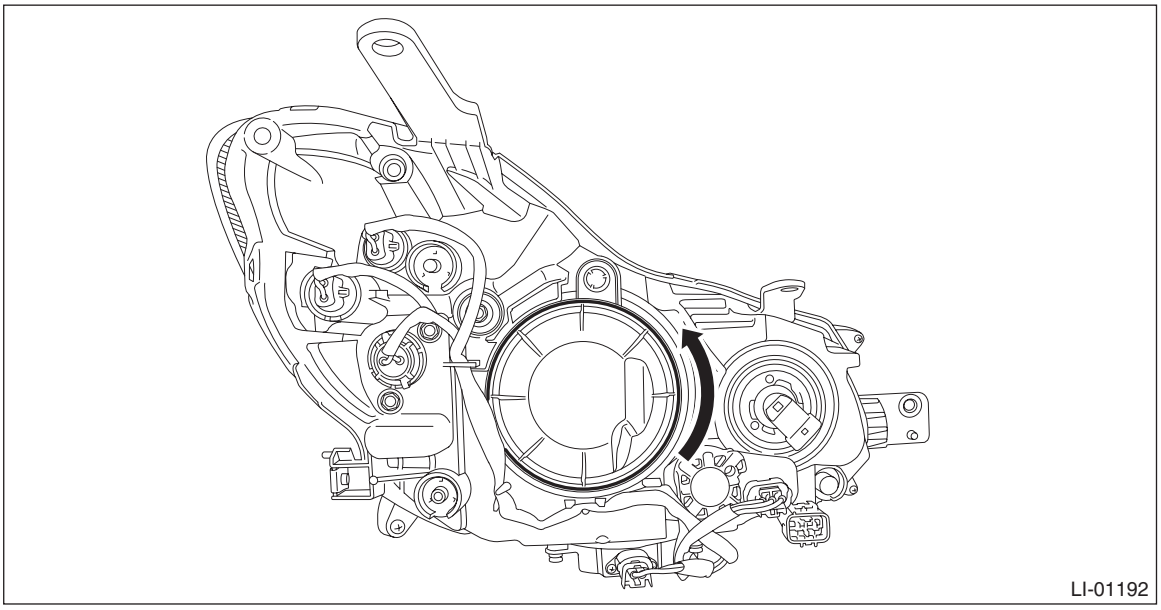
## 1. HID HEADLIGHT BALLAST

**WARNING:**
**Because the headlight system uses high voltage, be careful not to perform work with wet hands. There is a possibility of electrical shock.**

**CAUTION:**
**• The HID type uses very high voltages for the lighting circuit. Make sure that the power supply is turned OFF before working.**
**• Do not leave the light assembly - head without the ballast - headlight for a long time. Dust, moisture, etc. entering the light assembly - head may affect its performance.**

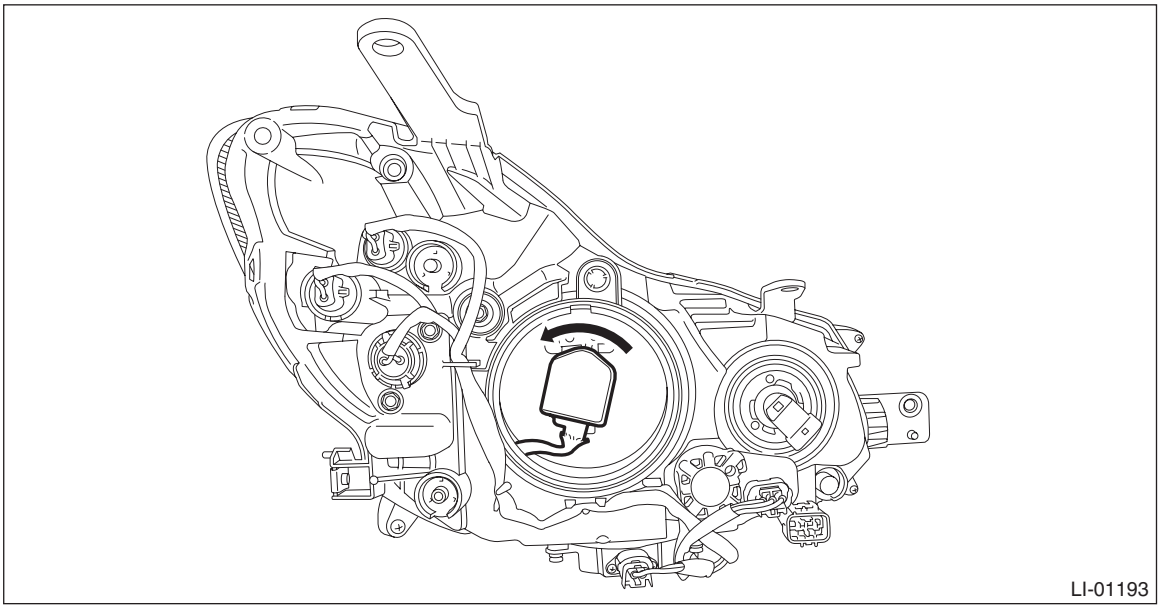
1) Disconnect the ground cable from battery.
2) Remove the light assembly - head.
- RH side: <Ref. to LI-27, WHEN REMOVING RH SIDE, REMOVAL, Headlight Assembly.>
- LH side: <Ref. to LI-29, WHEN REMOVING LH SIDE, REMOVAL, Headlight Assembly.>
- Both sides: <Ref. to LI-30, WHEN REMOVING BOTH SIDE, REMOVAL, Headlight Assembly.>

3) Remove the cover - headlight.



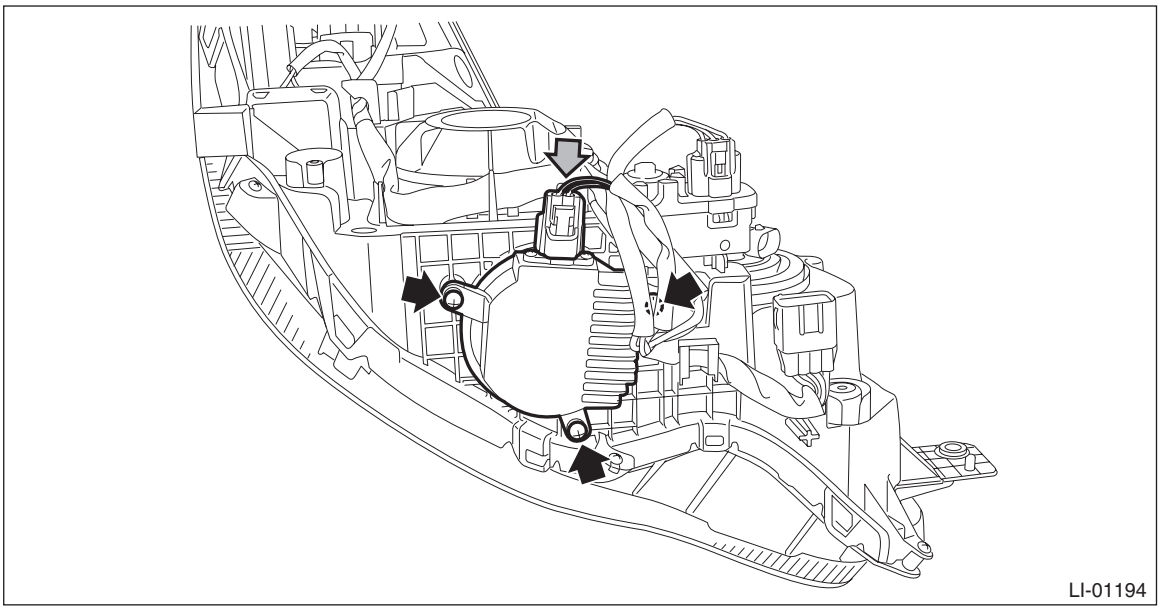
LI-01192

4) Disconnect the bulb socket.



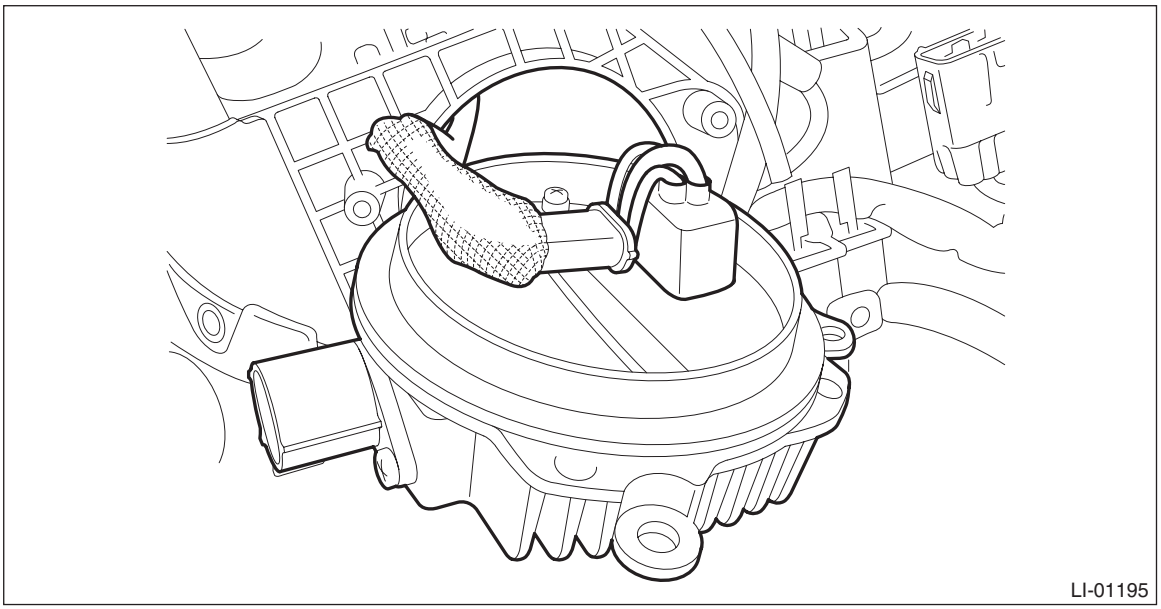
LI-01193

5) Remove the ballast - headlight.
(1) Disconnect the connector.
(2) Remove the screws and remove the ballast - headlight.



LI-01194

(3) Guiding the bulb socket through the gap between housing and reflector, pull out the ballast - headlight.



LI-01195

## D: ASSEMBLY

### 1. HID HEADLIGHT BALLAST

**CAUTION:**
- **When installing the ballast - headlight, be sure to install the gasket.**
- **After installing the ballast to the vehicle, be sure to perform beam adjustment.**

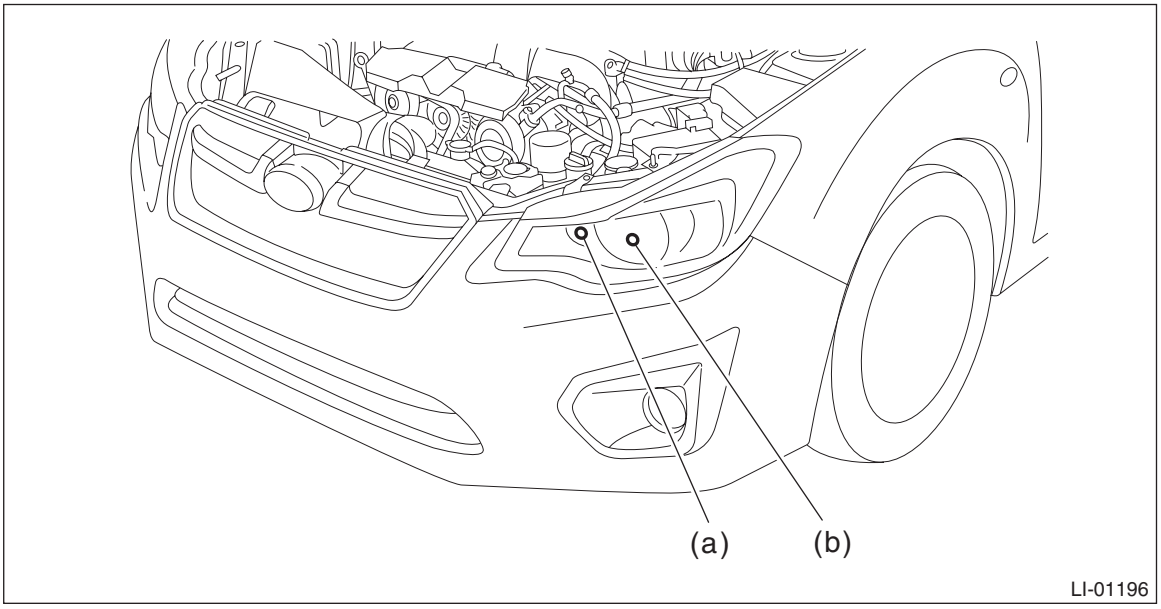
Assemble each part in the reverse order of disassembly.

***Tightening torque:***
***Light assembly - head: 7.5 N·m (0.76 kgf-m, 5.5 ft-lb)***

# E: ADJUSTMENT

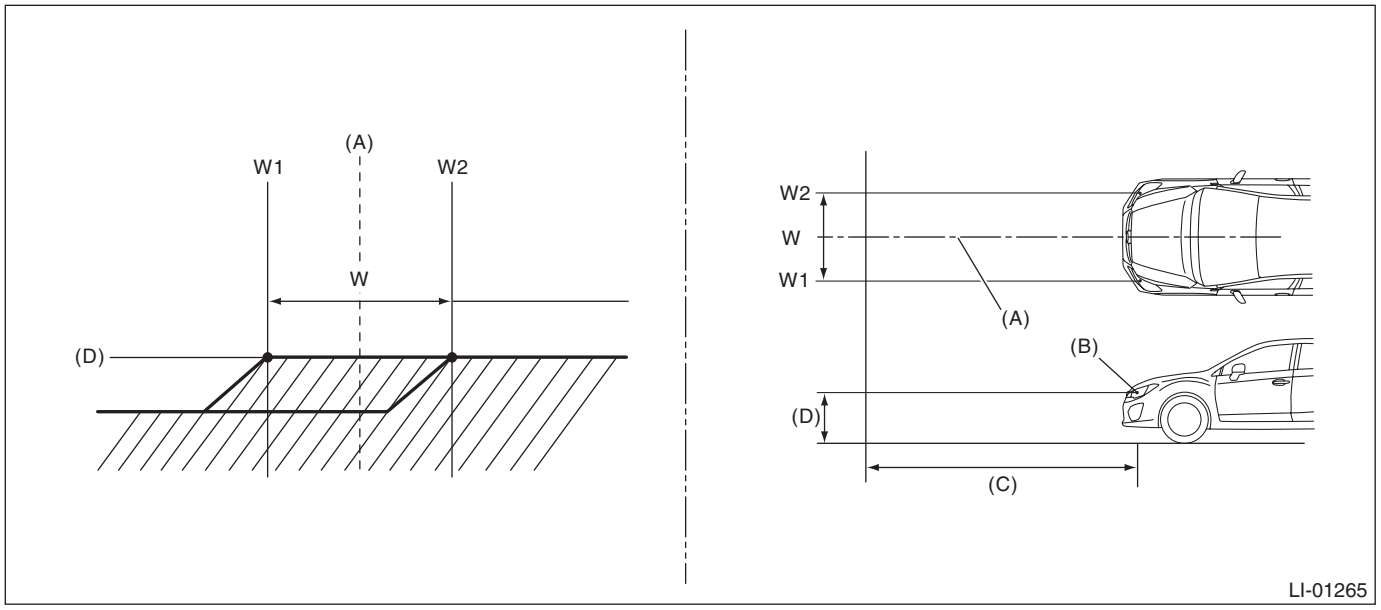
## 1. HEADLIGHT BEAM ADJUSTMENT

**CAUTION:**
**• Turn off the light before adjusting the beam level of the light assembly - head. If it is necessary to inspect the beam level, do not keep the light on for two minutes or more.**
**• When blocking the light that come from outside, use a closure plate or the like.**
**Do not apply tape to the lens or cover it with a cloth. It may raise the temperature in the light and cause deformation/bubble formations of the plastic lens.**
1) Before checking the beam level of the light assembly - head, be sure of the following:
• The area around the light assembly - head has not sustained any scratches, damage or other type of deformation.
• Vehicle is parked on a level surface.
• The inflation pressure of tires is correct.
• Vehicle's fuel tank is fully filled.
2) Bounce the vehicle several times to normalize the suspension.
3) Make certain that someone is seated in the driver's seat.
4) Measure the distance between the low beam bulb centers and the height of the bulb center.



(a) High beam (b) Low beam

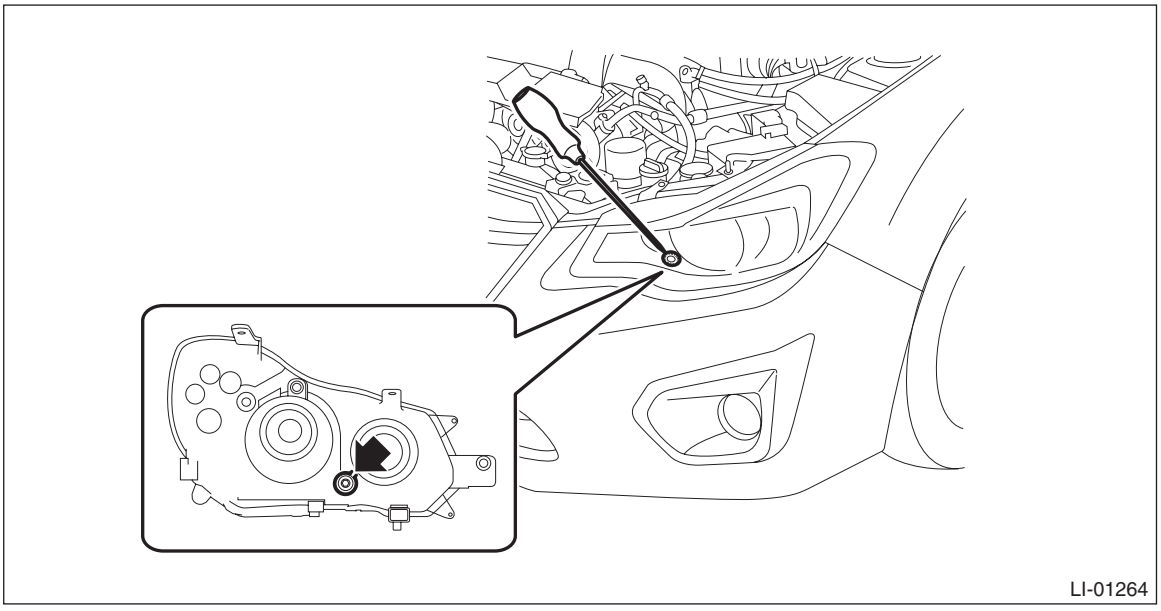
5) Adjust the beam level of the light assembly - head.
(1) Place the vehicle with the front end facing to the measurement panel, then illuminate the low beam.



(A) Vehicle center
(B) Bulb center marking
(C) 3 m (10 ft)
(D) Height of headlight center

| W mm (in) |
|---|
| 1,281 (50.44) |

(2) Adjust the low beam by turning the aiming screw.



# 15.Headlight Bulb

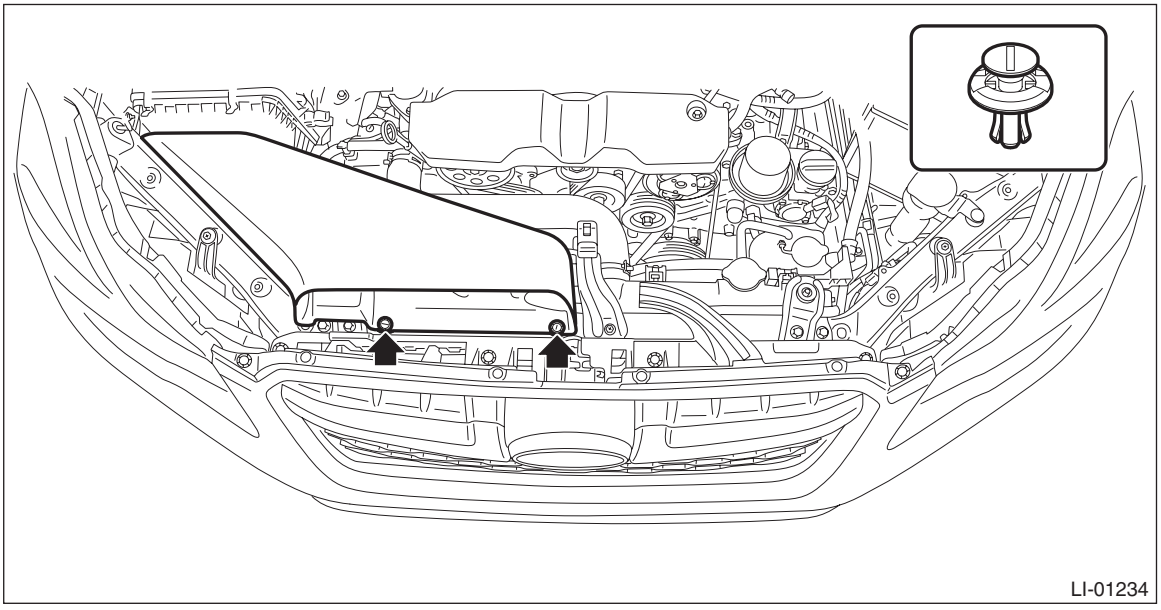
## A: REMOVAL

### 1. HIGH BEAM

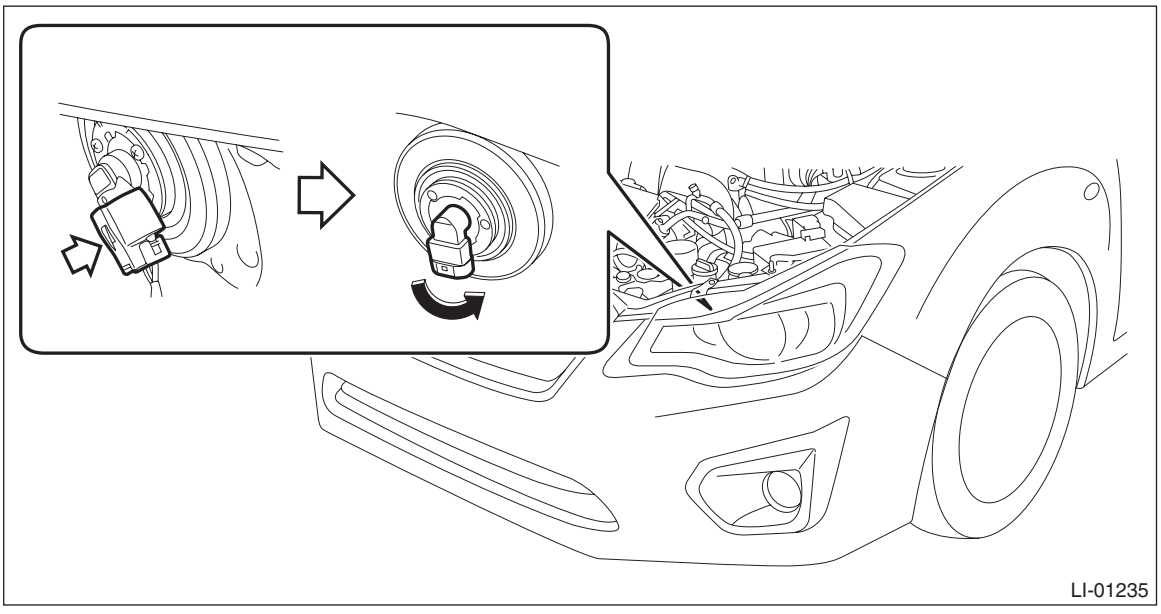
**WARNING:**
**Because the headlight system uses high voltage, be careful not to perform work with wet hands. There is a possibility of electrical shock.**

**CAUTION:**
**• Because the halogen bulb operates at a high temperature, dirt and oil on the bulb surface reduces the bulb's service life. Hold the flange portion when replacing the bulb. Never touch the glass portion.**
**• Do not leave the light assembly - head without the bulb for a long time. Dust, moisture, etc. entering the light may affect its performance.**

1) Disconnect the ground cable from battery.
2) Remove the clips and remove the air intake duct. (When removing the high beam bulb RH)



3) Disconnect the connector and remove the high beam bulb.

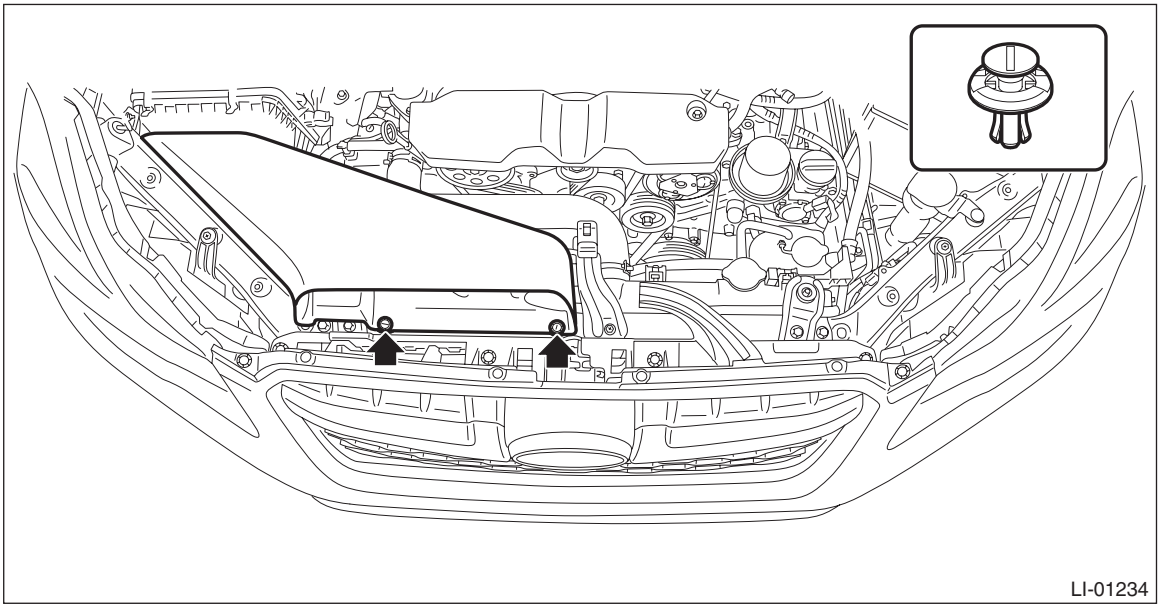


## 2. HALOGEN TYPE LOW BEAM

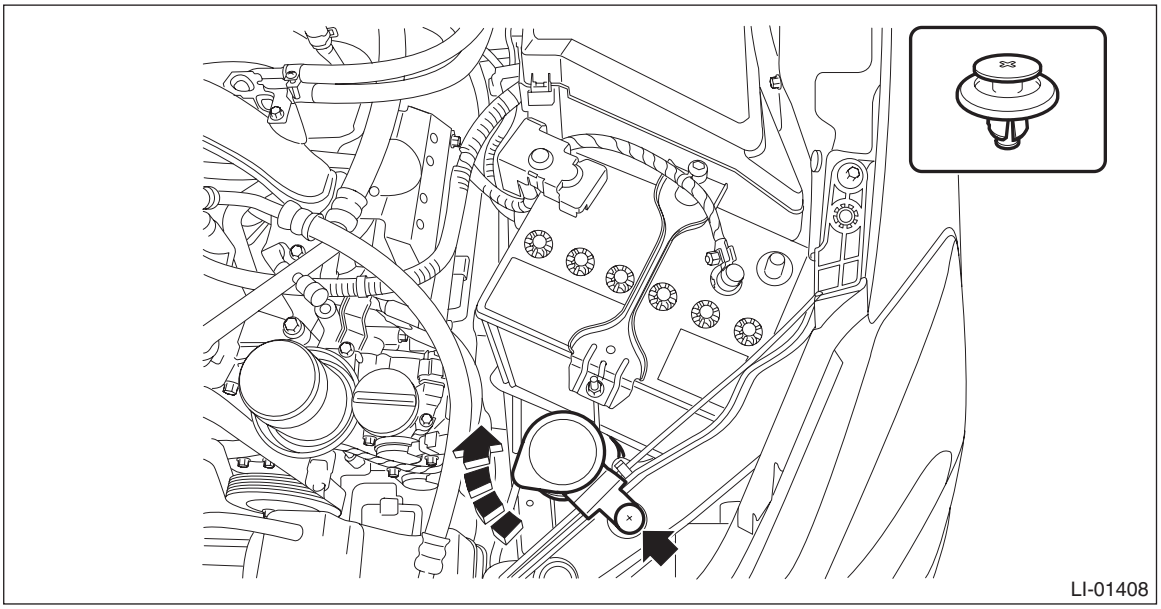
**WARNING:**
**Because the headlight system uses high voltage, be careful not to perform work with wet hands. There is a possibility of electrical shock.**

**CAUTION:**
**• Because the halogen bulb operates at a high temperature, dirt and oil on the bulb surface reduces the bulb's service life. Hold the flange portion when replacing the bulb. Never touch the glass portion.**
**• Do not leave the light assembly - head without the bulb for a long time. Dust, moisture, etc. entering the light may affect its performance.**

1) Disconnect the ground cable from battery.
2) Remove the clips and remove the air intake duct. (When removing the low beam bulb RH)

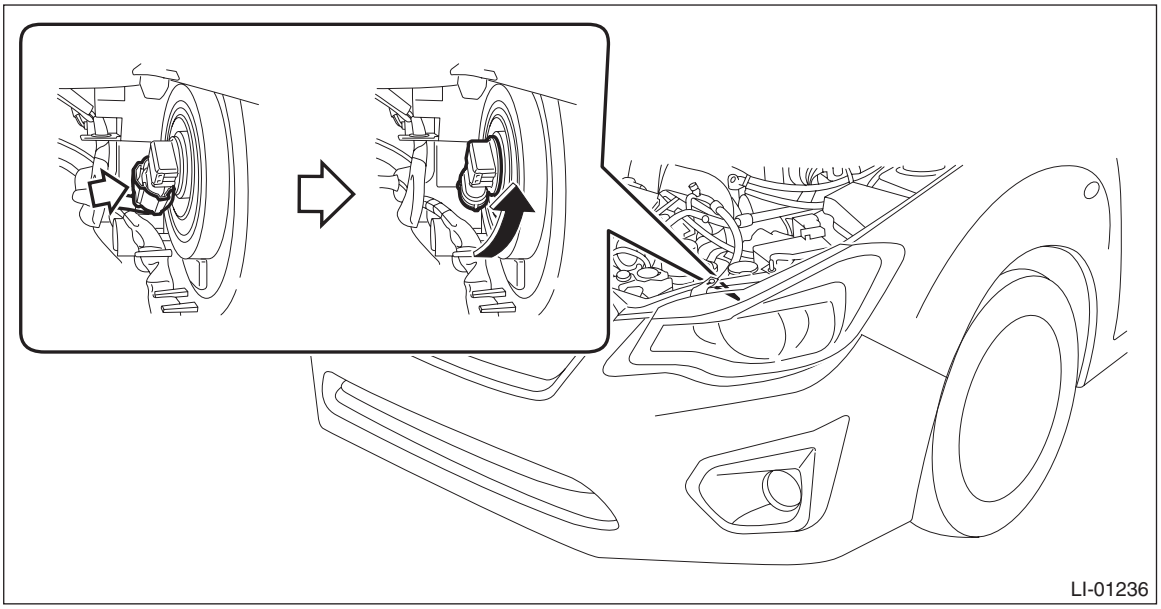


3) Turn the filler neck of the tank - washer front clockwise. (When removing the low beam bulb LH)



4) Disconnect the connector and remove the low beam bulb.

**CAUTION:**
**Make sure to check if any bulb O-ring is remained on the housing side as this may sometimes happen.**



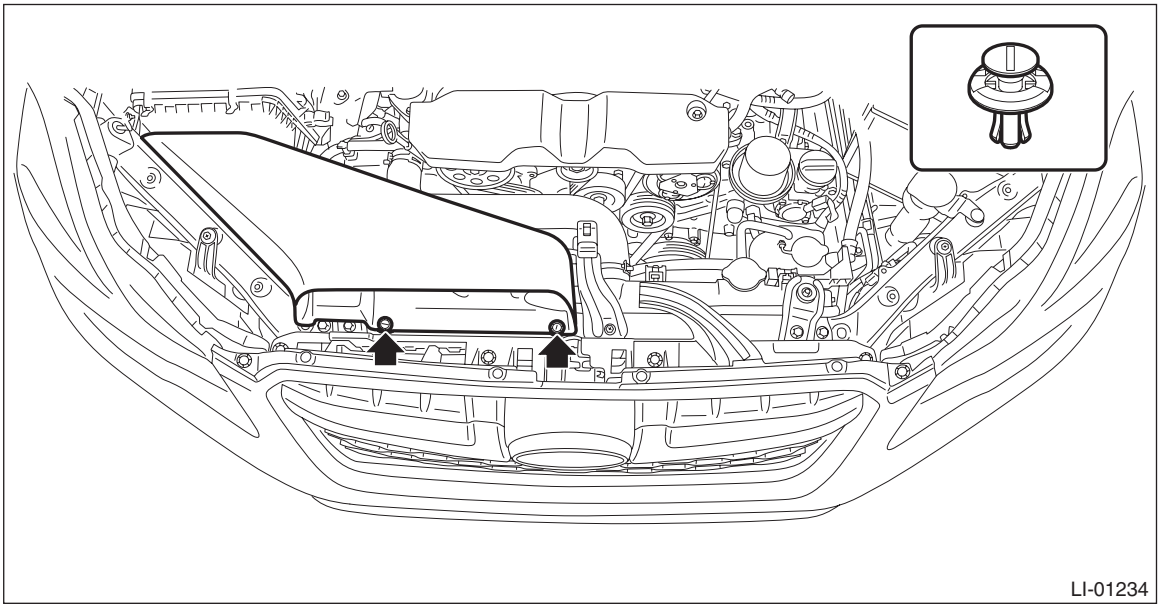
### 3. HID TYPE LOW BEAM

**When removing RH side**

**WARNING:**
**Because the headlight system uses high voltage, be careful not to perform work with wet hands. There is a possibility of electrical shock.**

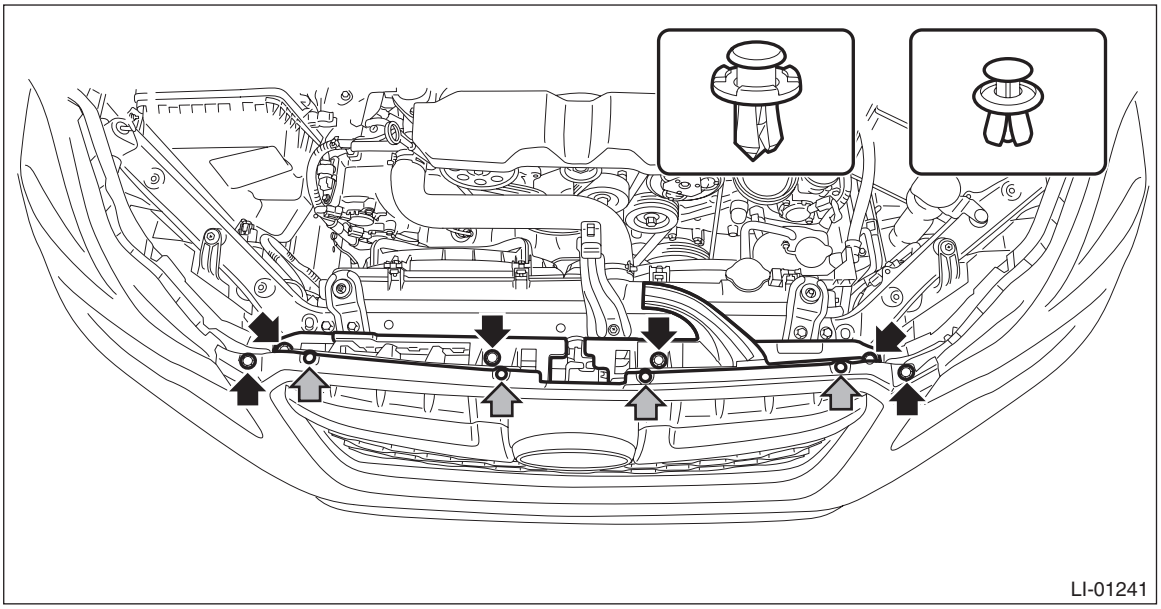
**CAUTION:**
- **Because the lighting circuit uses high voltage, be sure to confirm that the power supply is turned off before operation.**
- **When replacing bulb, hold the flange area. Be careful not to touch the glass area.**
- **Do not leave the light assembly - head without the bulb and cover - headlight for a long time. Dust, moisture, etc. entering the light may affect its performance.**

1) Disconnect the ground cable from battery.
2) Remove the clips and remove the air intake duct.



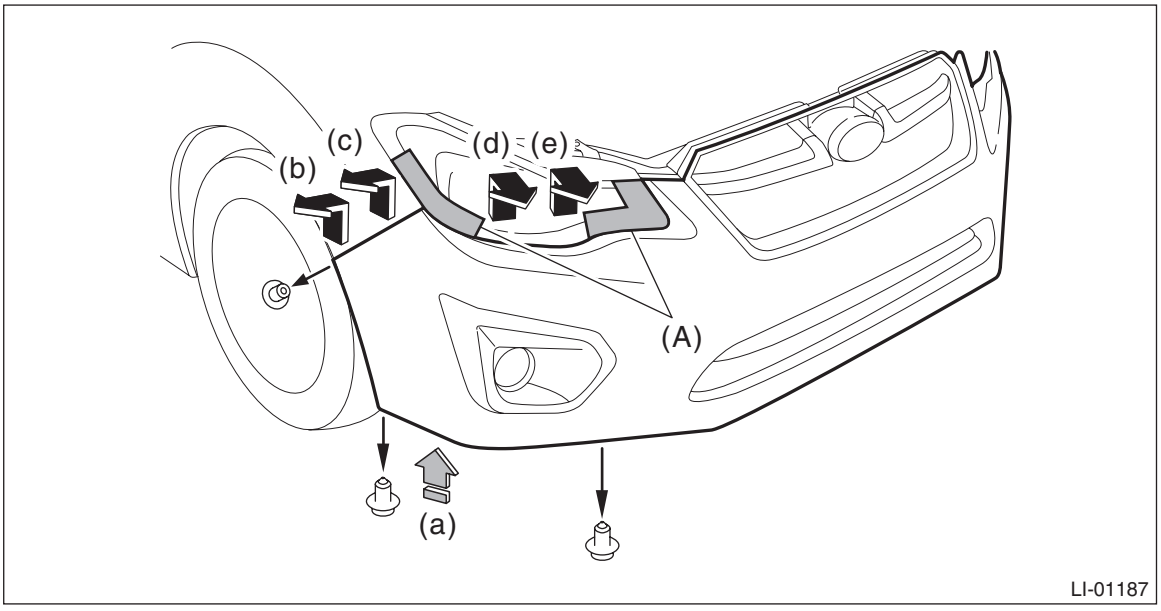
3) Remove the clip, and remove the bracket - grille.

**CAUTION:**
**To prevent damage to the bracket - grille, make sure to remove all clips.**



4) Detach the flange section on the right side of the bumper face - front.
   (1) Apply protective tape (A) to the light assembly - head.
   (2) Release the clips, and while pushing up the lower side (a) of the bumper face - front, remove from (b) to (e).

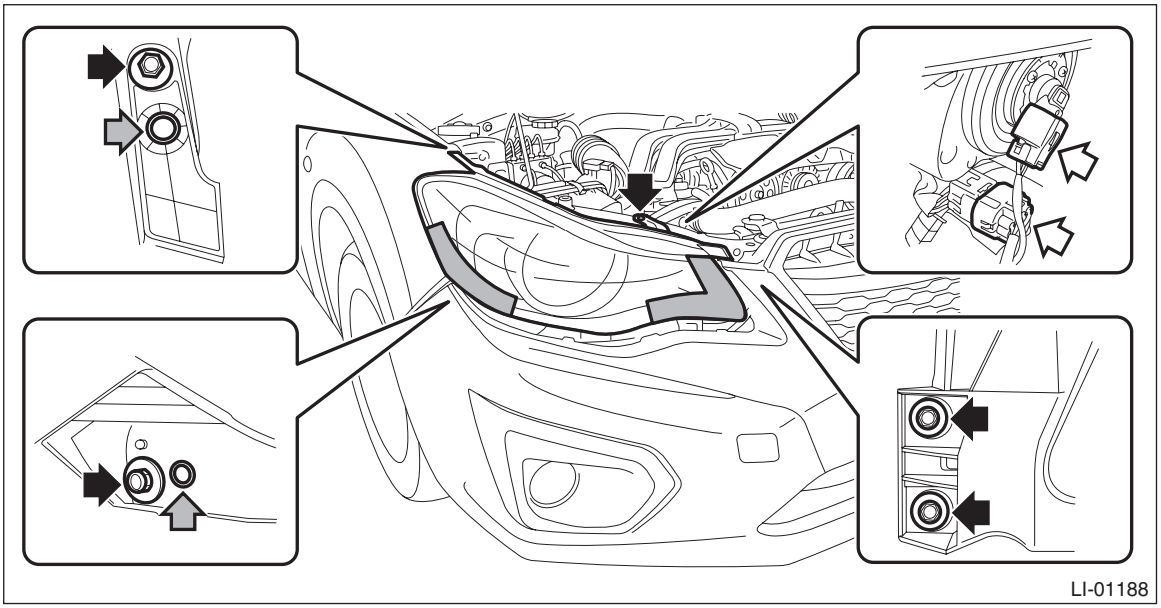
**CAUTION:**
**Do not pull forcibly. It may damage the flange sections of the bumper face - front.**



5) Remove the light assembly - head.

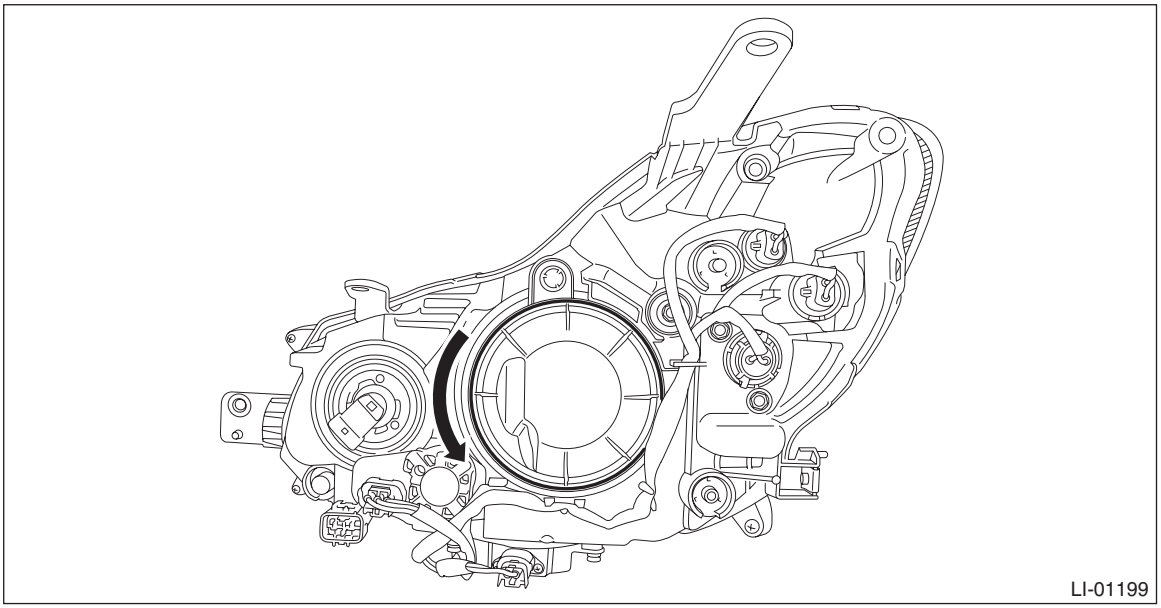
**CAUTION:**
**Be careful not to damage the light assembly - head, fender COMPL - front, and bumper face - front.**

(1) Disconnect connectors.
(2) Remove the bolts and clips, and remove the light assembly - head.

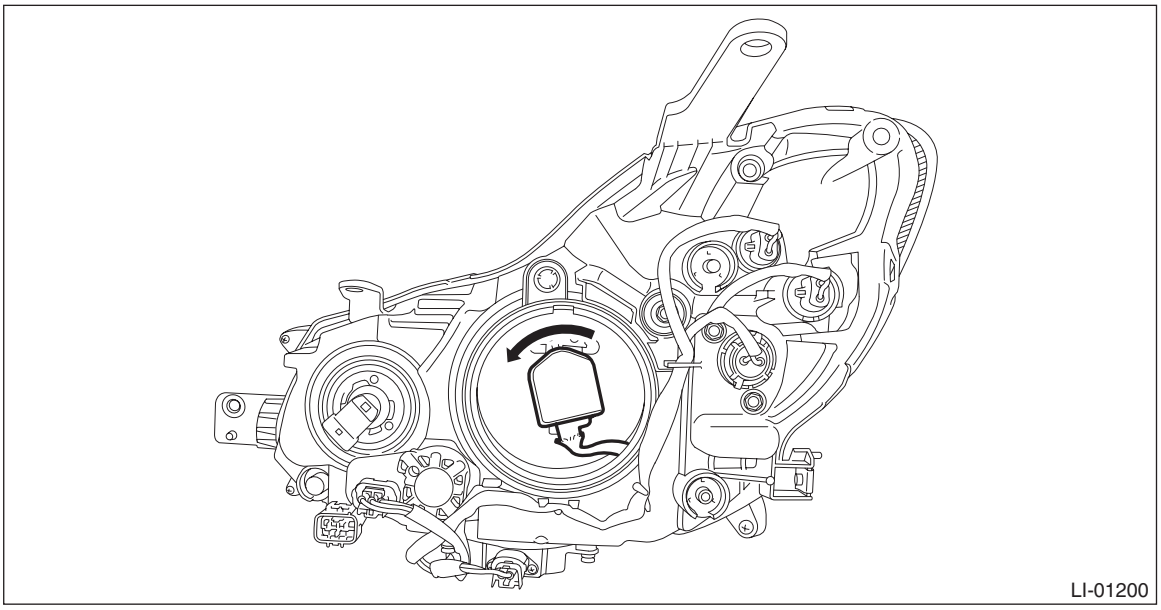


6) Remove the low beam bulb.

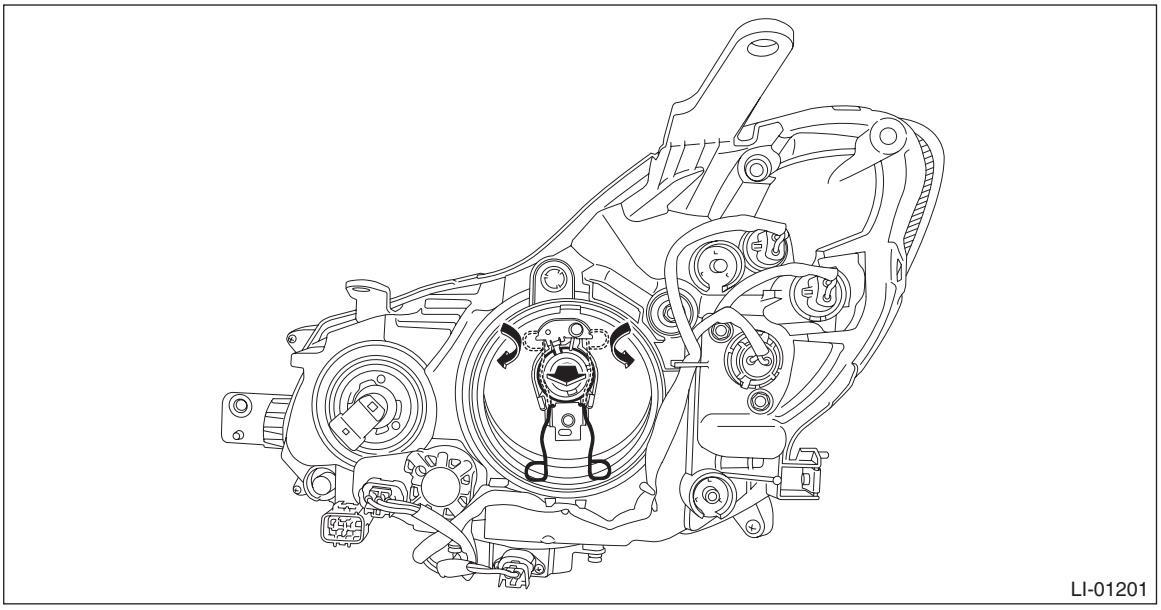
(1) Remove the cover - headlight.



(2) Remove the valve socket.



(3) Unlock the bulb spring, and remove the low beam bulb.

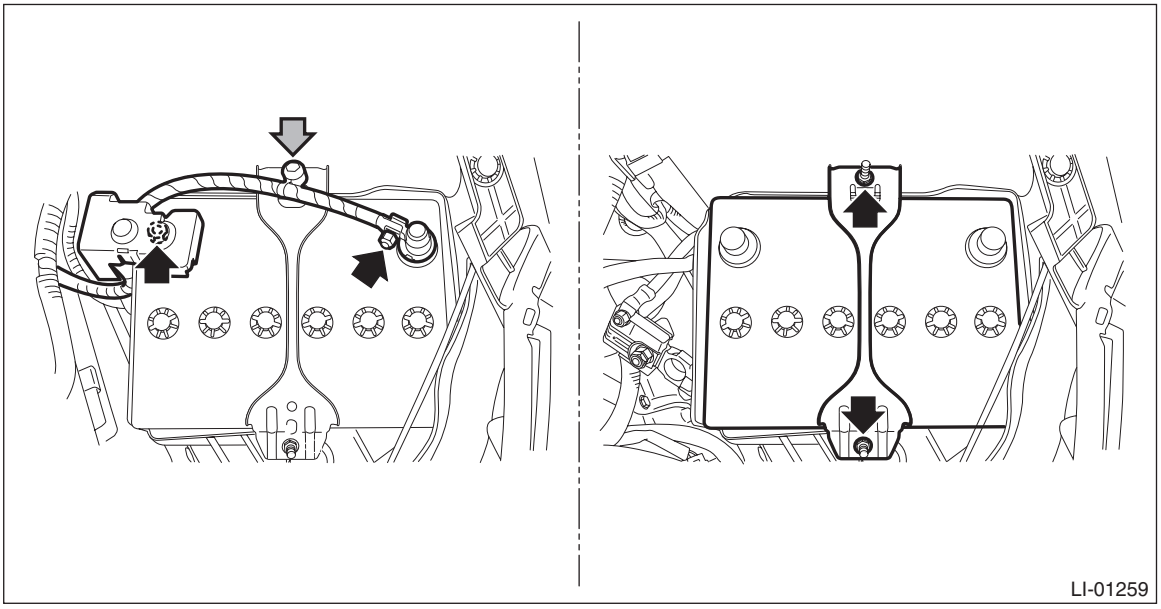


**When removing LH side**

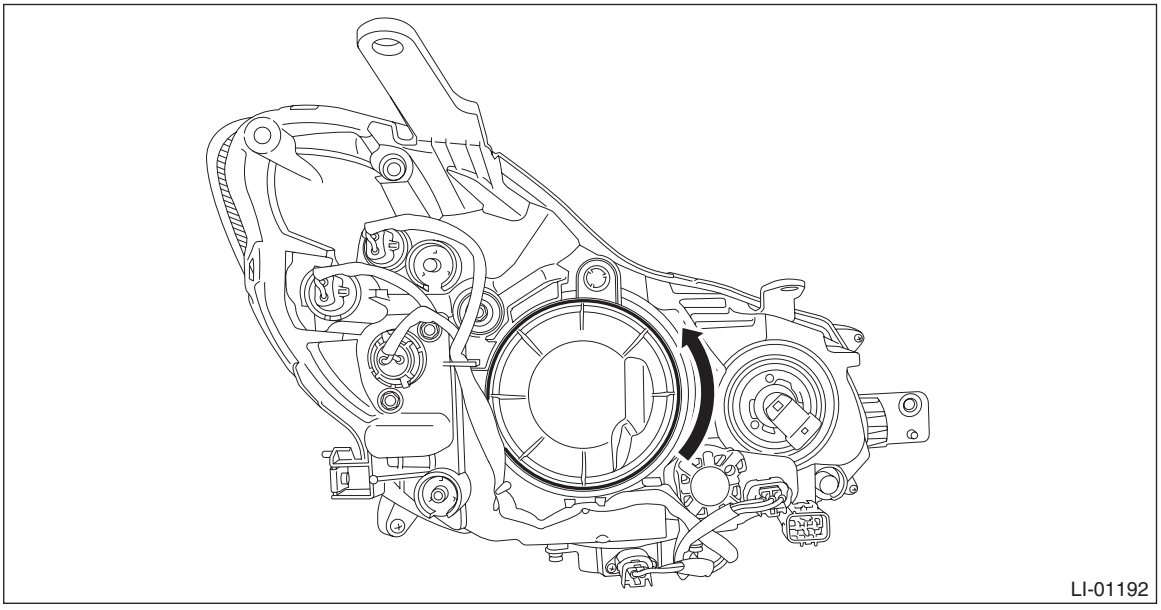
**WARNING:**
**Because the headlight system uses high voltage, be careful not to perform work with wet hands. There is a possibility of electrical shock.**

**CAUTION:**
**• Because the lighting circuit uses high voltage, be sure to confirm that the power supply is turned off before operation.**
**• When replacing bulb, hold the flange area. Be careful not to touch the glass area.**
**• Do not leave the light assembly - head without the bulb and cover - headlight for a long time. Dust, moisture, etc. entering the light may affect its performance.**

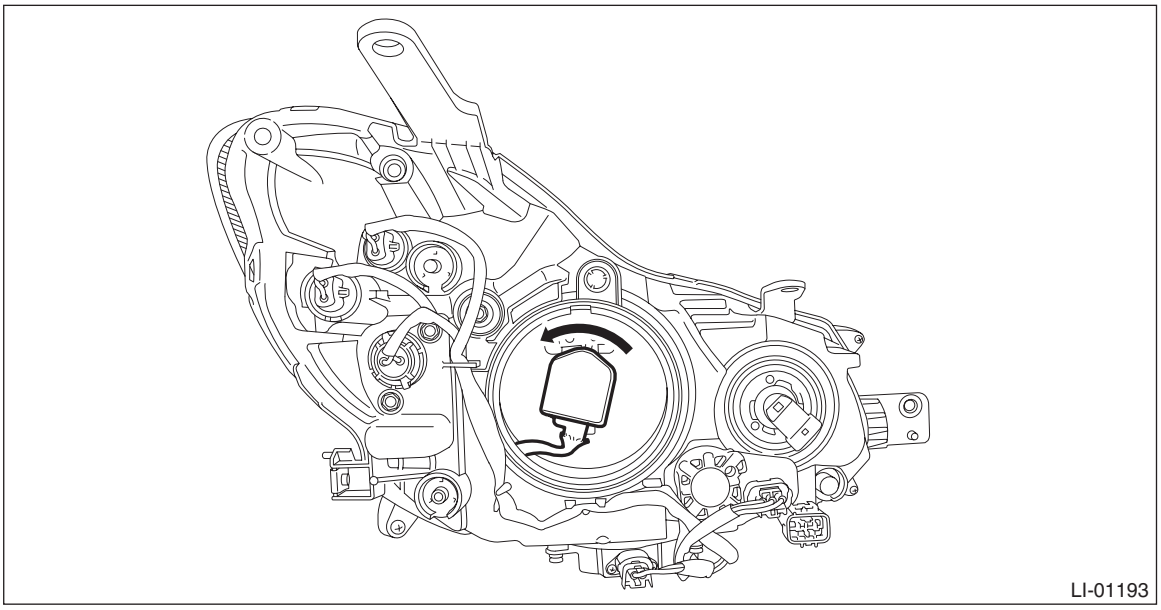
1) Remove the battery.
   (1) Disconnect the negative terminal of battery, and then the positive terminal, and remove the battery cable holder from the battery rod.
   (2) Remove the flange nut from battery rod and remove battery holder.



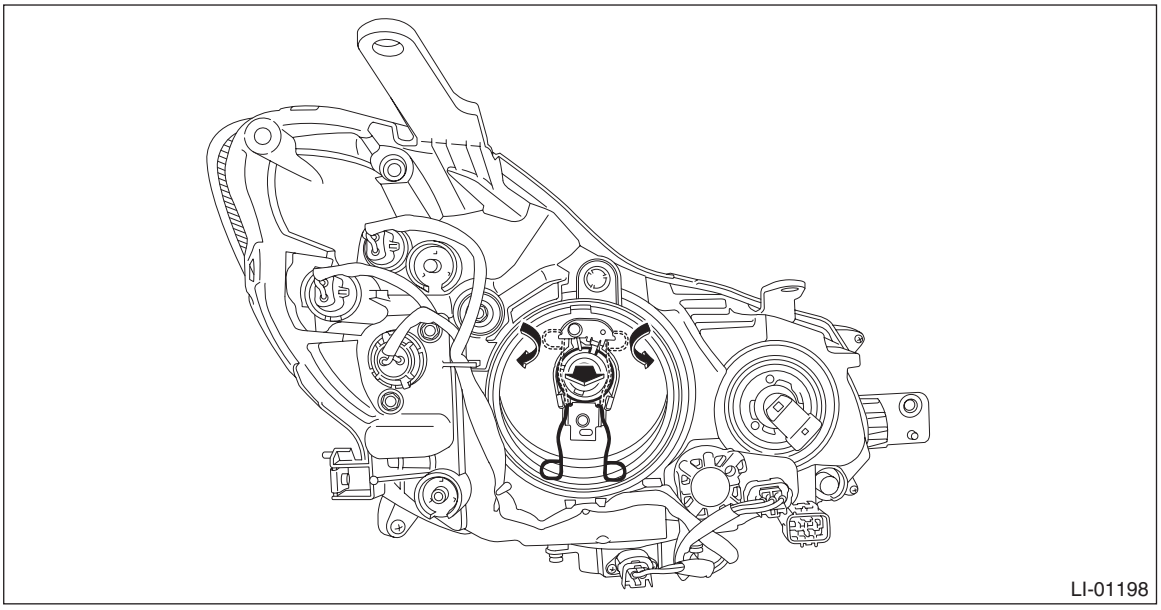
2) Remove the low beam bulb.
   (1) Remove the cover - headlight.



(2) Remove the valve socket.



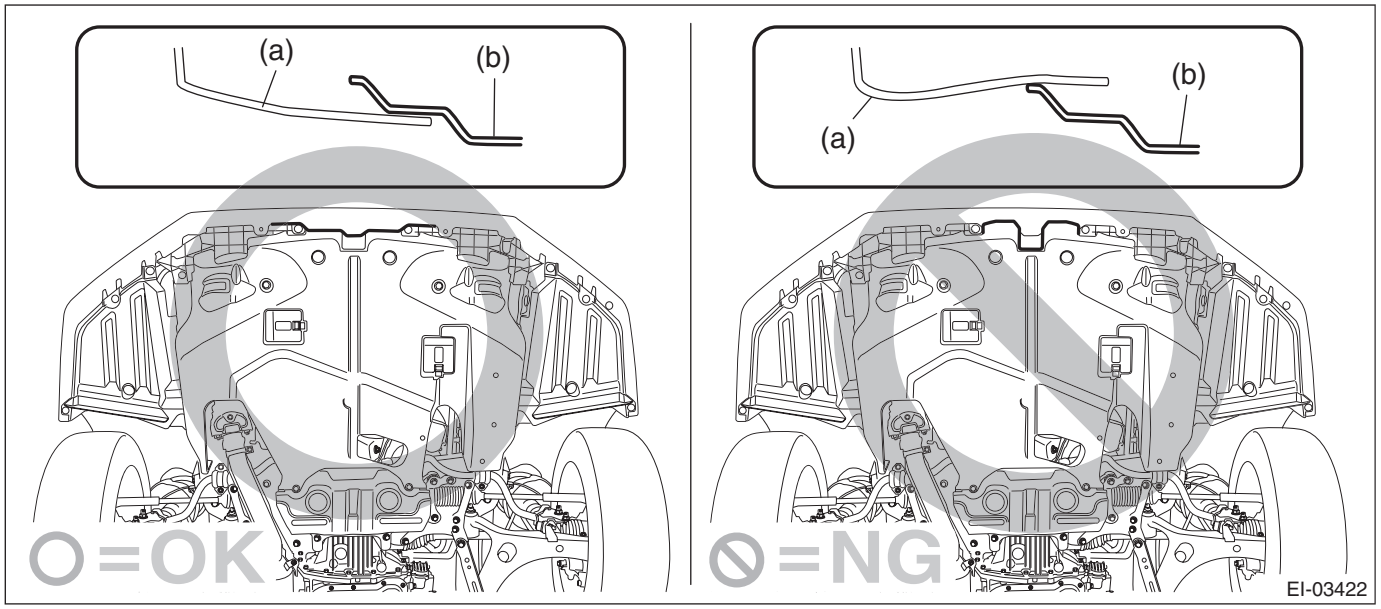
(3) Unlock the bulb spring, and remove the low beam bulb.



## B: INSTALLATION

1) Install each part in the reverse order of removal.
2) When performing the work of HID type low beam RH, secure the flange section of the bumper face - front to the bracket - front bumper side.

**CAUTION:**
**Install the bumper face - front so that the front end of the under cover (b) comes inside the bumper face - front (a).**



***Tightening torque:***
***Light assembly - head: 7.5 N·m (0.76 kgf-m, 5.5 ft-lb)***
***Battery holder: 3.5 N·m (0.36 kgf-m, 2.6 ft-lb)***

3) When performing the work of HID type low beam RH, adjust the fog light beam. (Model with fog light) <Ref. to LI-54, FOG LIGHT AIMING, ADJUSTMENT, Front Fog Light Assembly.>

## C: INSPECTION

### 1. HALOGEN TYPE

**WARNING:**
**Because the headlight system uses high voltage, be careful not to perform work with wet hands. There is a possibility of electrical shock.**

**CAUTION:**
**• Because the halogen bulb operates at a high temperature, dirt and oil on the bulb surface reduces the bulb's service life. Hold the flange portion when replacing the bulb. Never touch the glass portion.**
**• Do not leave the light assembly - head without the bulb and cover - headlight for a long time. Dust, moisture, etc. entering the headlight may affect its performance.**
1) Visually check the bulb for blow out.
2) Check the bulb specification. <Ref. to LI-2, SPECIFICATION, General Description.>
3) Replace the bulb if it is found defective.

### 2. HID TYPE

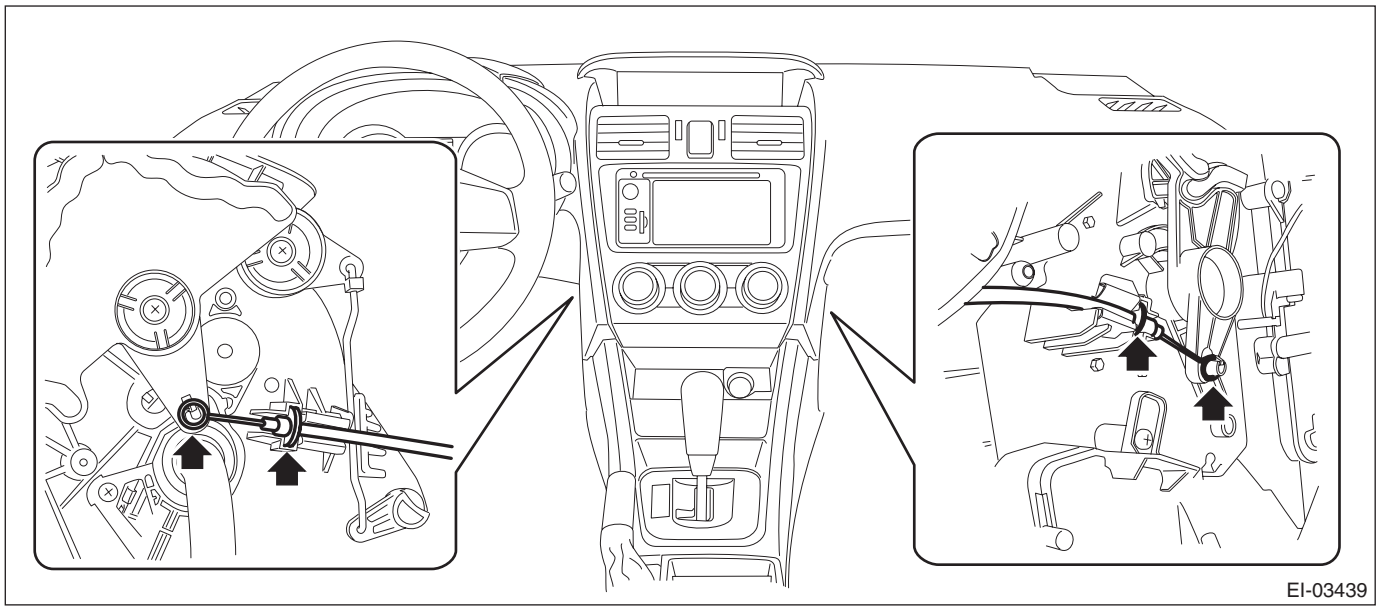
**WARNING:**
**Because the headlight system uses high voltage, be careful not to perform work with wet hands. There is a possibility of electrical shock.**

**CAUTION:**
**• Do not leave the light assembly - head without the bulb and cover - headlight for a long time. Dust, moisture, etc. entering the headlight may affect its performance.**
**• When lit (lighting switch is ON), do not touch the harness, light internals, or metal parts of the light.**
**• When performing a lighting test, make sure that the headlight is mounted on the vehicle, and the power supply is connected to the connector on the vehicle's side.**
1) Check the bulb specification. <Ref. to LI-2, SPECIFICATION, General Description.>
2) Install the factory HID bulb to check whether it lights properly.
3) If it does not light properly, replace with a new bulb.
4) Inspect the HID ballast.
Inspect the ballast in the following manner, and determine whether or not to reuse.
   (1) Perform cold starts (light the headlight after turning off for 10 minutes or more), and hot starts (light the headlight for 15 minutes or more, then turn off for 1 minute and relight) several times, to make sure that the headlight lights properly.
   (2) Monitor the lighting condition right after a cold start up to a stable state (approx. 5 min.), to see if there are any unstable conditions such as flickering.
   (3) Install bulbs with the same number of operating hours on both headlights, and light for approximately 30 minutes. Check for whether there is a difference in brightness on the right and left sides.
5) Replace the ballast if it is found defective.

# 16.Hazard Switch

## A: REMOVAL

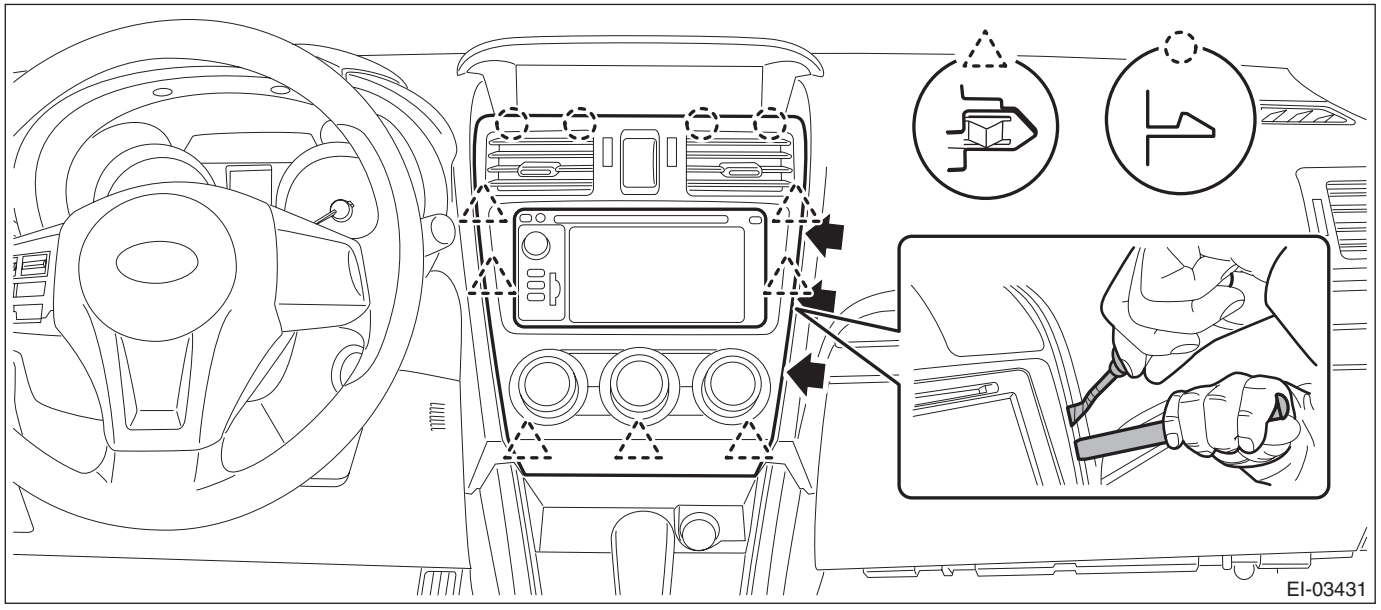
1) Disconnect the ground cable from battery.
2) On manual A/C models, disconnect the control cables from both sides of the heater and cooling unit assembly.



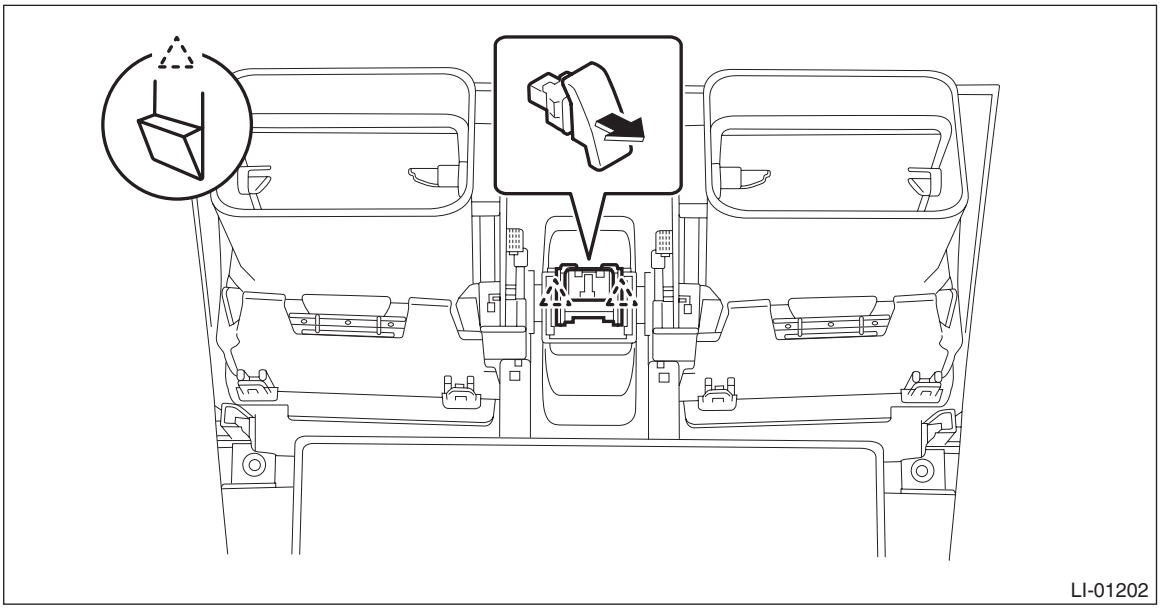
3) Remove the panel center assembly.

**CAUTION:**
**Do not put your finger on the fin of the air vent grille. Doing so may damage the fin.**

(1) Insert a plastic remover to the three areas shown by the arrows, and lift up the panel center assembly slightly.
(2) With the panel center assembly lifted up slightly, release the claw by using a clip remover wrapped with protective tape.
(3) Release the rest of the claws, and remove the panel center assembly.



4) Release the claws, and remove the switch - hazard from the panel center assembly.



## B: INSTALLATION

**CAUTION:**
**After installing the panel center assembly, check that the air vent grille of the panel center assembly is inserted correctly into the air vent duct.**
Install each part in the reverse order of removal.

## C: INSPECTION

**Unit inspection**

***Preparation tool:***
***Circuit tester***

1) Check the resistance between switch terminals.

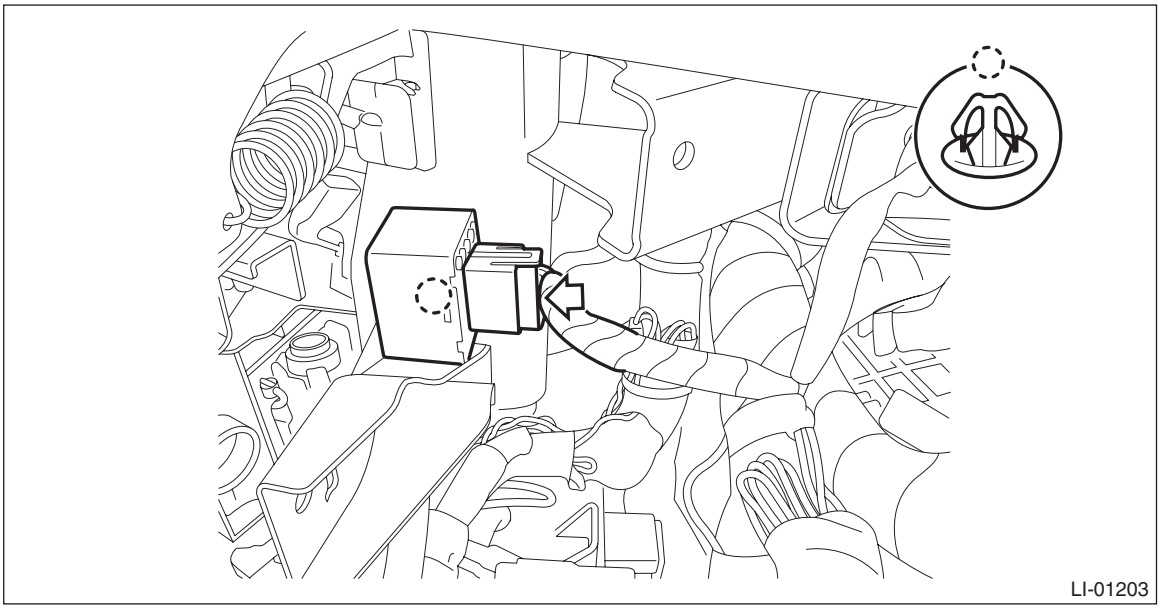
| Terminal No. | Inspection conditions | Standard | Connection diagram |
|---|---|---|---|
| 2 — 3 | Switch OFF | 1 MΩ or more |  |
| | Switch ON | Less than 1 Ω | |

2) Replace the switch - hazard if the inspection result is not within the standard value.

# 17.Turn Signal Light & Hazard Light Module

## A: REMOVAL

1) Remove the knee airbag module. <Ref. to AB-44, REMOVAL, Knee Airbag Module.>
2) Remove the turn signal and hazard module.
   (1) Disconnect the connector.
   (2) Release the claws and remove the turn signal & hazard module from the beam COMPL - steering.



## B: INSTALLATION

Install each part in the reverse order of removal.

NOTE:
Refer to “INSTALLATION” of “Knee Airbag Module”. <Ref. to AB-46, INSTALLATION, Knee Airbag Module.>

# C: INSPECTION

## On- the vehicle inspection

***Preparation tool:***
***Circuit tester***

1) Disconnect the turn signal and hazard module connector.
2) Measure the voltage between the turn signal & hazard module connector and the chassis ground.

| Terminal No. | Inspection conditions | Standard | Connection diagram |
|---|---|---|---|
| 4 (+) — Chassis ground (–) | Always | 10 — 14 V |   LI-01281 |
| 1 (+) — Chassis ground (–) | IG OFF → ON | Less than 1 V → 10 — 14 V | |

Repair or replace the harness if the inspection result is not within the standard value.
3) Measure the resistance between the turn signal & hazard module connector and the chassis ground.

| Terminal No. | Inspection conditions | Standard | Connection diagram |
|---|---|---|---|
| 7 — Chassis ground | Always | Less than 1 Ω |   LI-01282 |

Repair or replace the harness if the inspection result is not within the standard value.
4) Connect the turn signal and hazard module connector.
5) Measure the voltage between the turn signal & hazard module and the chassis ground.

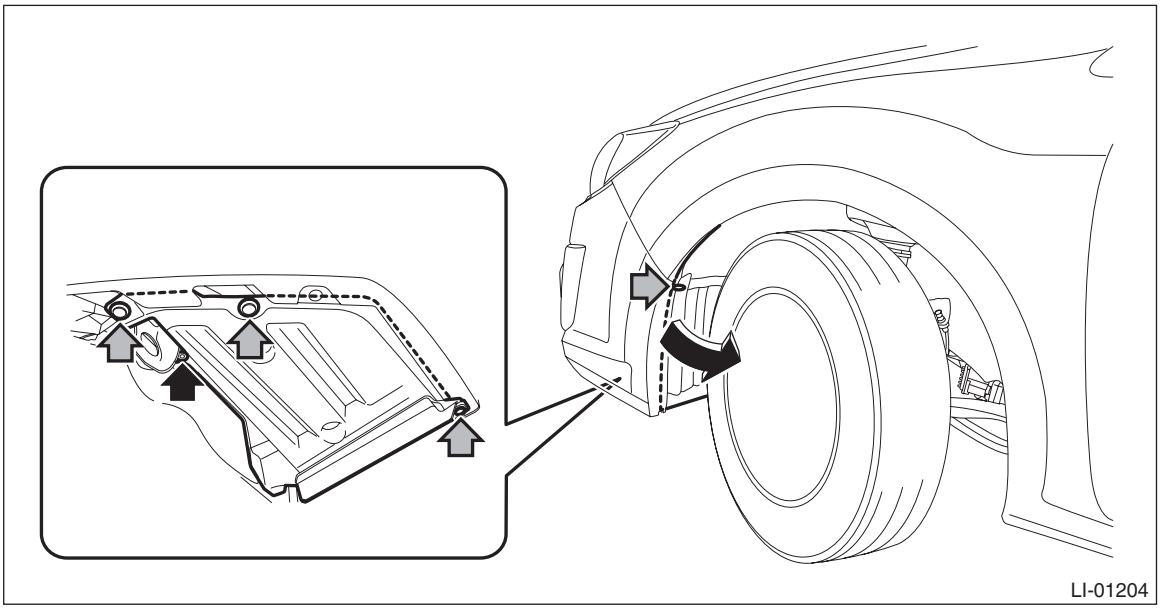
| Terminal No. | Input/ Output | Inspection conditions | Standard |
|---|---|---|---|
| 6 (+) — Chassis ground (–) | Input | Turn signal switch (Right) OFF → ON | Less than 1 V → 9 V or more |
| 5 (+) — Chassis ground (–) | Input | Turn signal switch (Left) OFF → ON | Less than 1 V → 9 V or more |
| 8 (+) — Chassis ground (–) | Input | Hazard switch OFF → ON | Less than 1 V → 9 V or more |
| 2 (+) — Chassis ground (–) | Output | Turn signal switch (Right) OFF → ON | Repeat less than 1 V → less than 1 V ←→ more than 9 V at 60 to 120 times per minute. |
| 3 (+) — Chassis ground (–) | Output | Turn signal switch (Left) OFF → ON | Repeat less than 1 V → less than 1 V ←→ more than 9 V at 60 to 120 times per minute. |
| 2 (+) — Chassis ground (–) | Output | Hazard switch OFF → ON | Repeat less than 1 V → less than 1 V ←→ more than 9 V at 60 to 120 times per minute. |
| 3 (+) — Chassis ground (–) | Output | Hazard switch OFF → ON | Repeat less than 1 V → less than 1 V ←→ more than 9 V at 60 to 120 times per minute. |

Replace the turn signal and hazard module if the inspection result is not within the standard value.

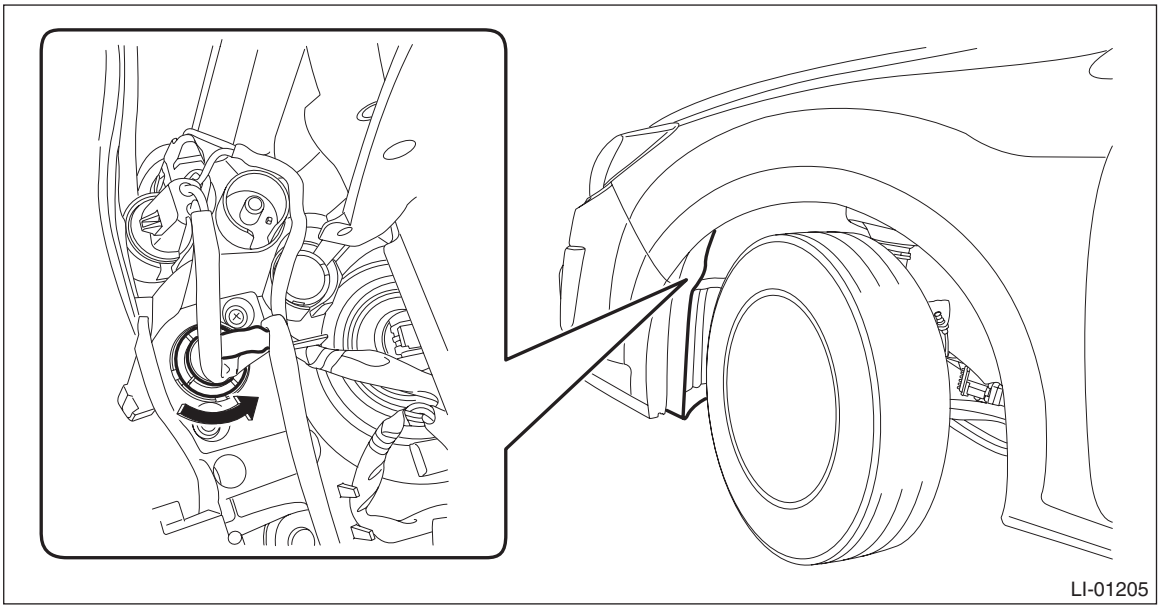
# 18.Front Turn Signal Light Bulb

## A: REMOVAL

1) Disconnect the ground cable from battery.
2) Turn the steering wheel in the opposite direction from the parts to be removed. Then remove the screws and clips, and turn over the mud guard - front.



3) Remove the bulb socket and front turn signal light bulb.



## B: INSTALLATION

Install each part in the reverse order of removal.

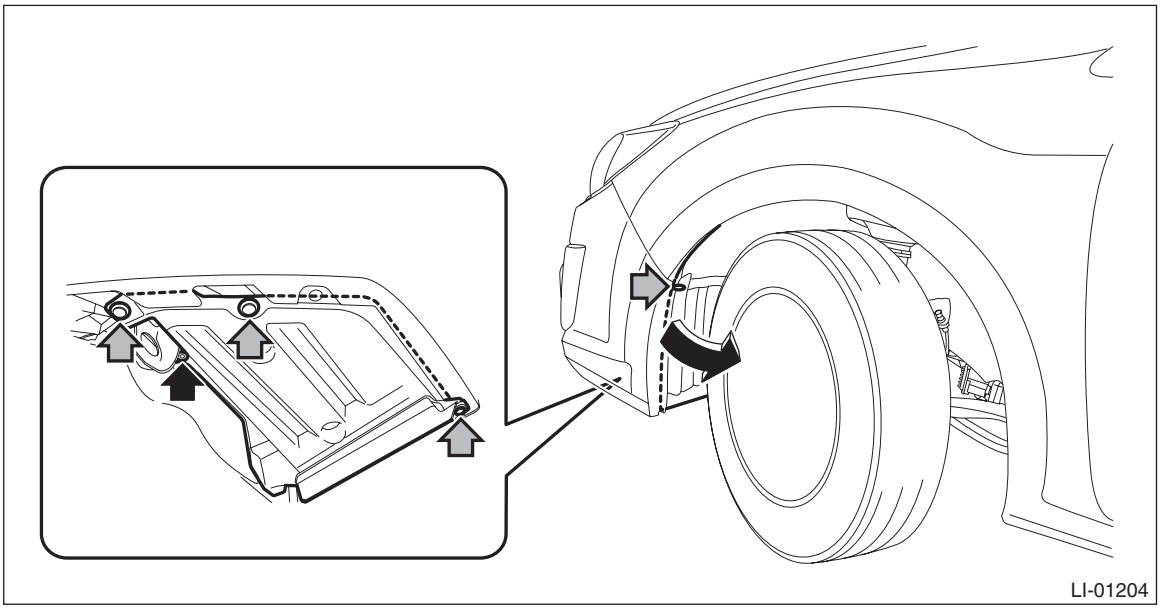
## C: INSPECTION

1) Visually check the bulb for blow out.
2) Check the bulb specification. <Ref. to LI-2, SPECIFICATION, General Description.>
3) Replace the bulb if it is found defective.

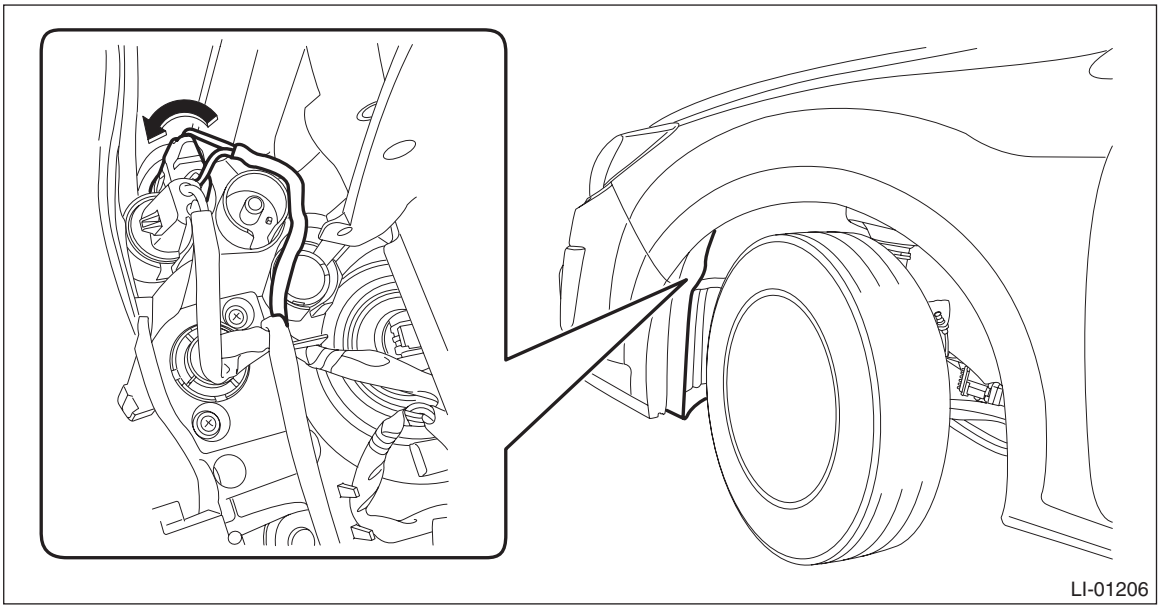
# 19.Clearance/Parking Light Bulb

## A: REMOVAL

1) Disconnect the ground cable from battery.
2) Turn the steering wheel in the opposite direction from the parts to be removed. Then remove the screws and clips, and turn over the mud guard - front.



3) Remove the bulb socket and the parking light bulb.



## B: INSTALLATION

Install each part in the reverse order of removal.

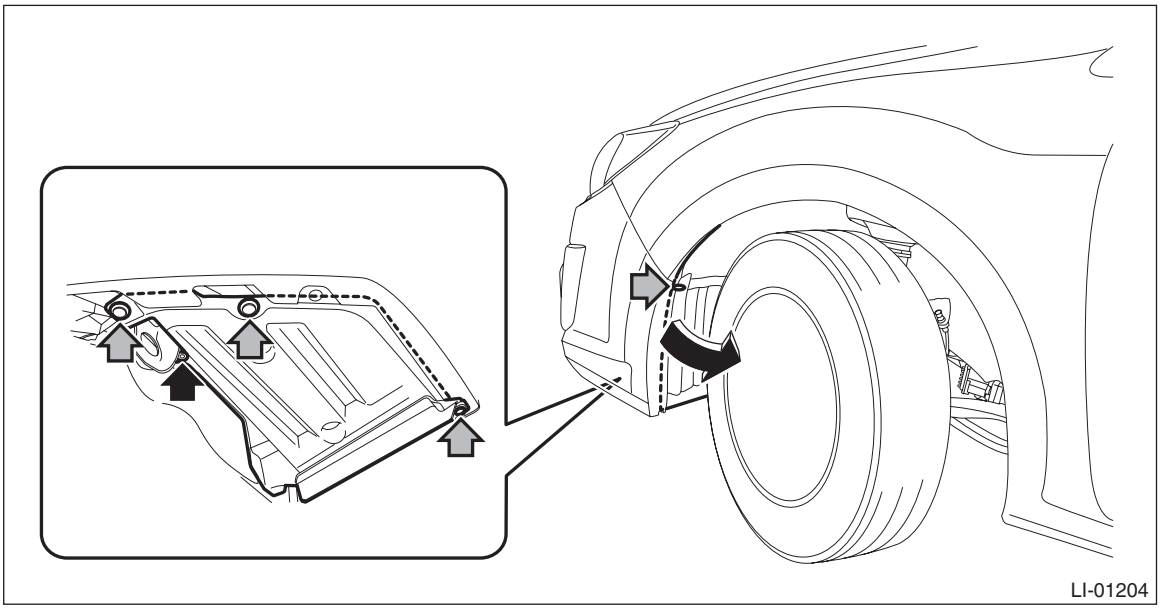
## C: INSPECTION

1) Visually check the bulb for blow out.
2) Check the bulb specification. <Ref. to LI-2, SPECIFICATION, General Description.>
3) Replace the bulb if it is found defective.

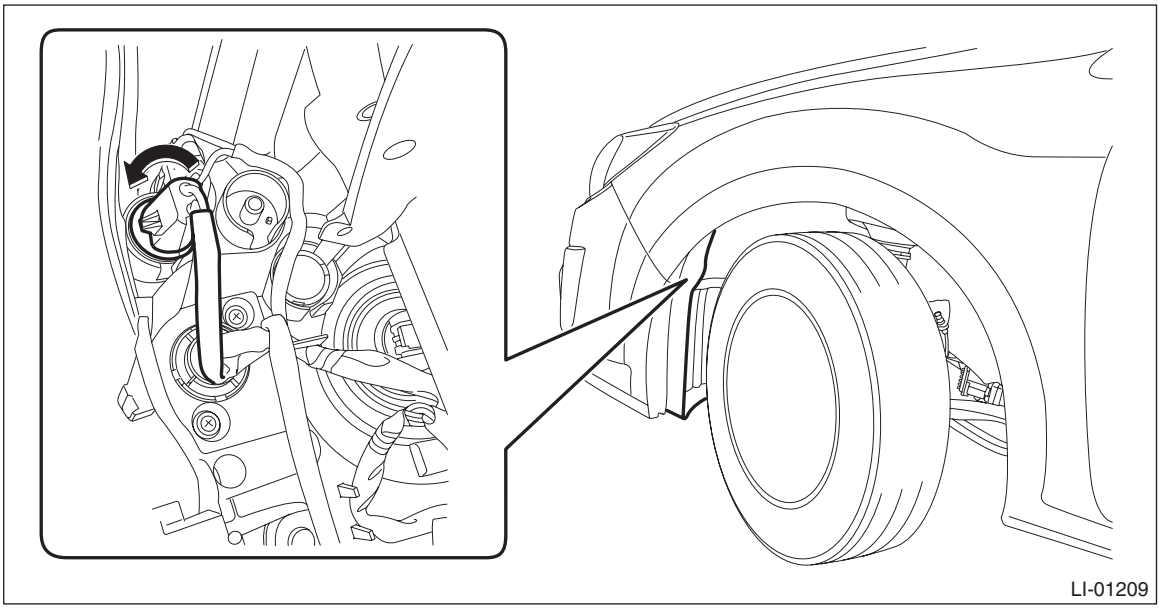
# 20.Front Side Marker Light Bulb

## A: REMOVAL

1) Disconnect the ground cable from battery.
2) Turn the steering wheel in the opposite direction from the parts to be removed. Then remove the screws and clips, and turn over the mud guard - front.



3) Remove the bulb socket and front side marker light bulb.



## B: INSTALLATION

Install each part in the reverse order of removal.

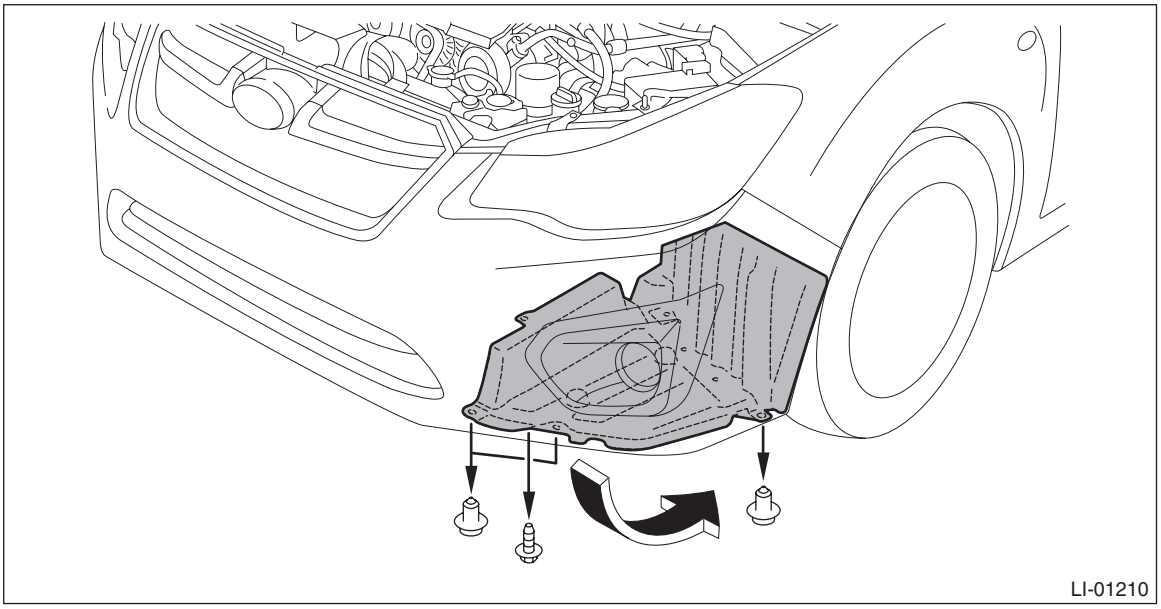
## C: INSPECTION

1) Visually check the bulb for blow out.
2) Check the bulb specification. <Ref. to LI-2, SPECIFICATION, General Description.>
3) Replace the bulb if it is found defective.

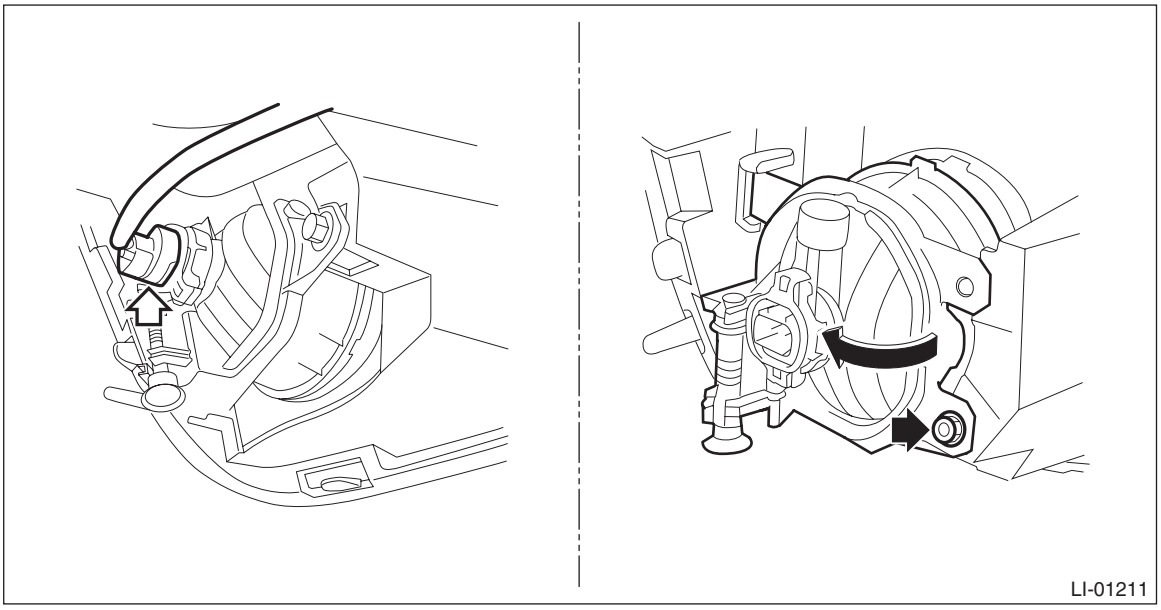
# 21.Front Fog Light Assembly

## A: REMOVAL

1) Disconnect the ground cable from battery.
2) Lift up the vehicle.
3) Remove the screw and clips, and turn over the front side of the mud guard - front.



4) From the bottom of the bumper face - front, remove the fog light assembly - front.
   (1) Disconnect the connector.
   (2) Remove the bolts, then remove the fog light assembly - front.



## B: INSTALLATION

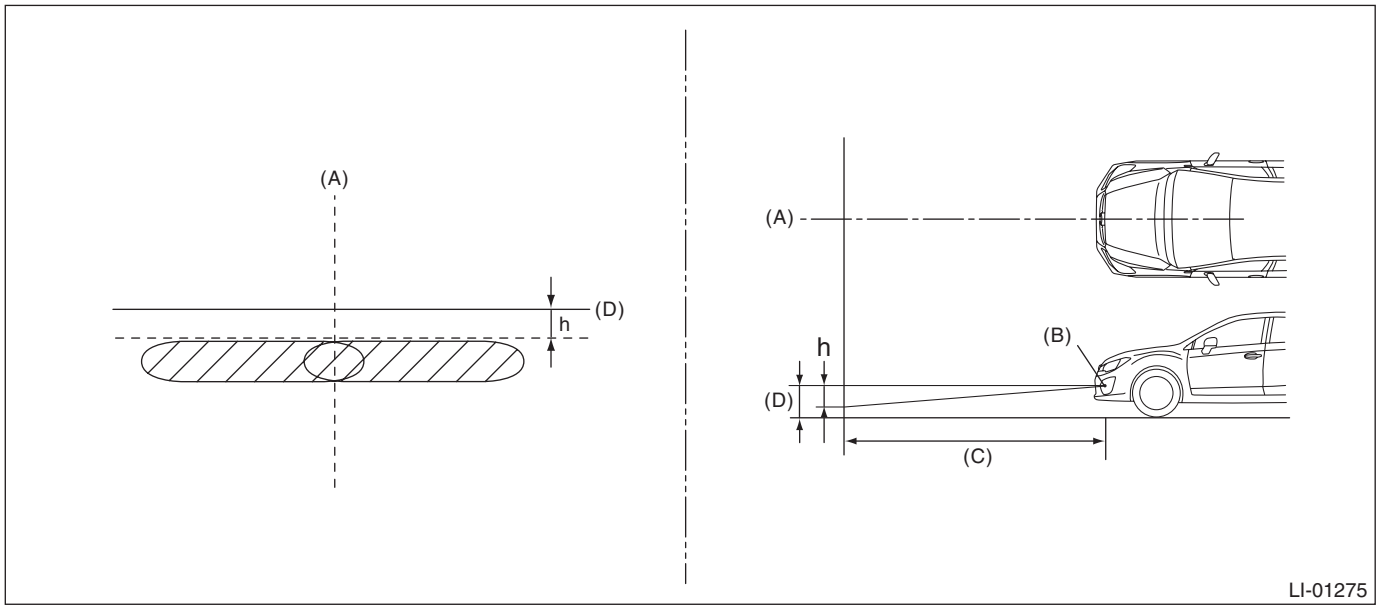
1) Install each part in the reverse order of removal.

***Tightening torque:***
***Fog light assembly - front: 7.5 N·m (0.76 kgf-m, 5.5 ft-lb)***
2) Adjust the fog light beam. <Ref. to LI-54, FOG LIGHT AIMING, ADJUSTMENT, Front Fog Light Assembly.>

# C: ADJUSTMENT

## 1. FOG LIGHT AIMING

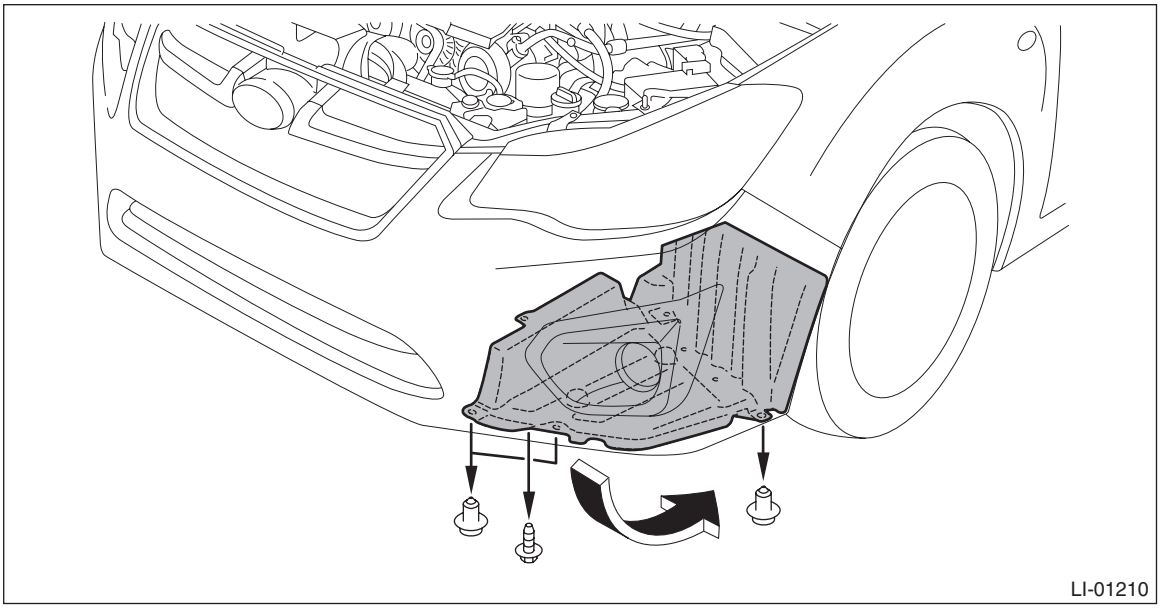
1) Before checking the fog light assembly - front beam level, be sure of the following:
• The area around the fog light assembly - front has not sustained any scratches, damage or other type of deformation.
• Vehicle is parked on a level surface.
• The inflation pressure of tires is correct.
• Vehicle's fuel tank is fully filled.
2) Bounce the vehicle several times to normalize the suspension.
3) Make certain that someone is seated in the driver's seat.
4) Place the vehicle with the front end facing to the measurement panel.



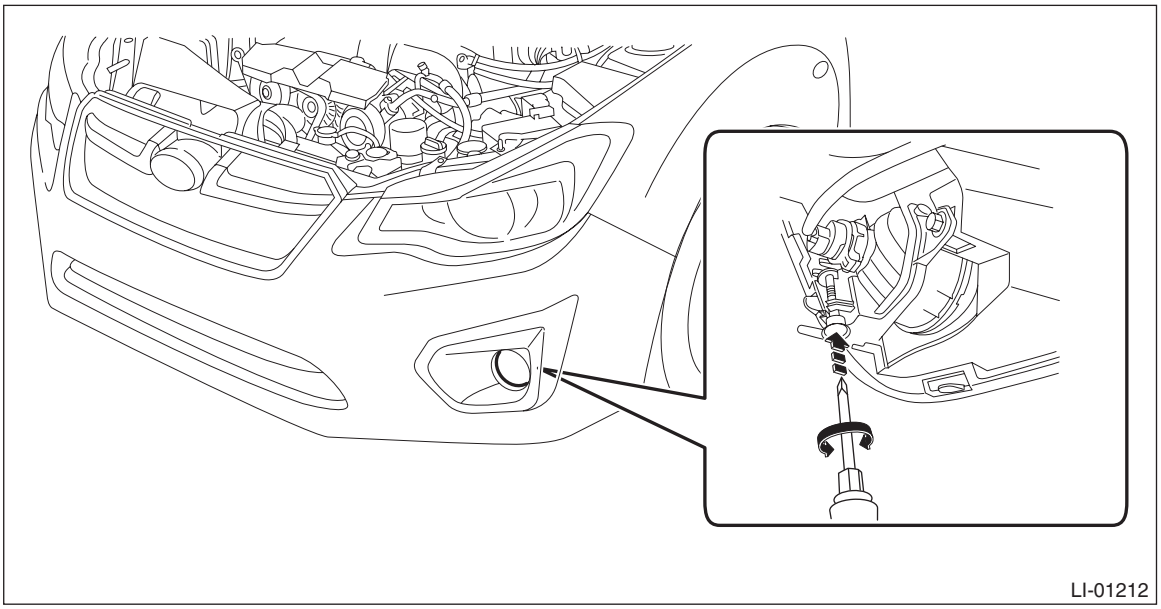
(A) Vehicle center
(B) Bulb center marking
(C) 3 m (10 ft)
(D) Height of fog light center

| h mm (in) at 3 m (10 ft) |
|---|
| 40 (1.58) |

5) Adjust the fog light assembly - front beam.
(1) Remove the screw and clips, and turn over the front side of the mud guard - front.



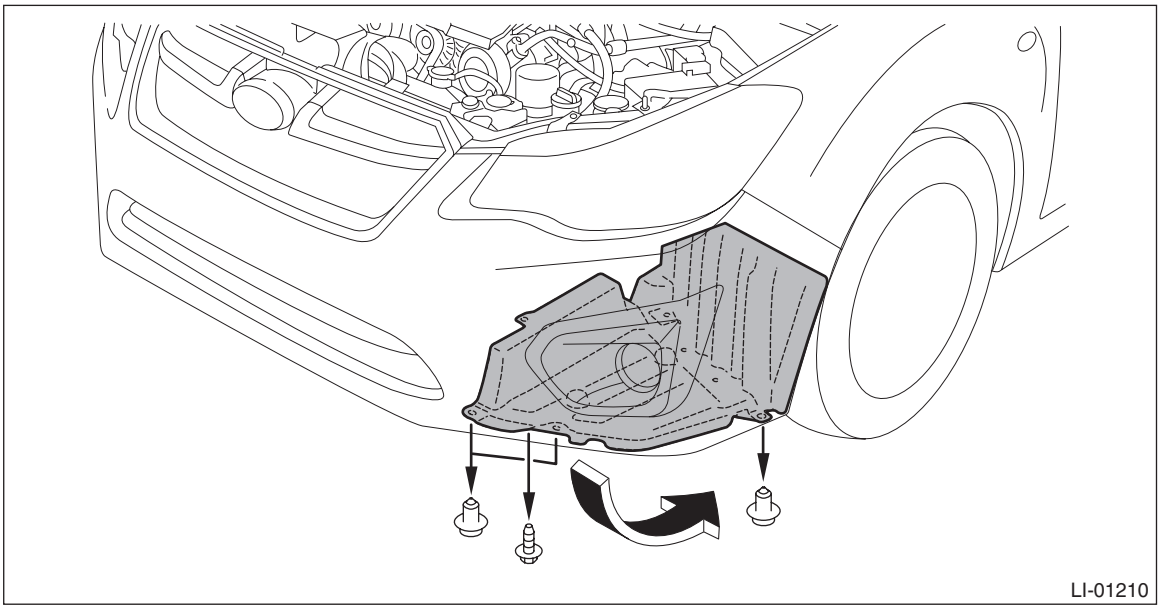
(2) Adjust the beam direction by turning the aiming screw from the bottom of the bumper face - front.



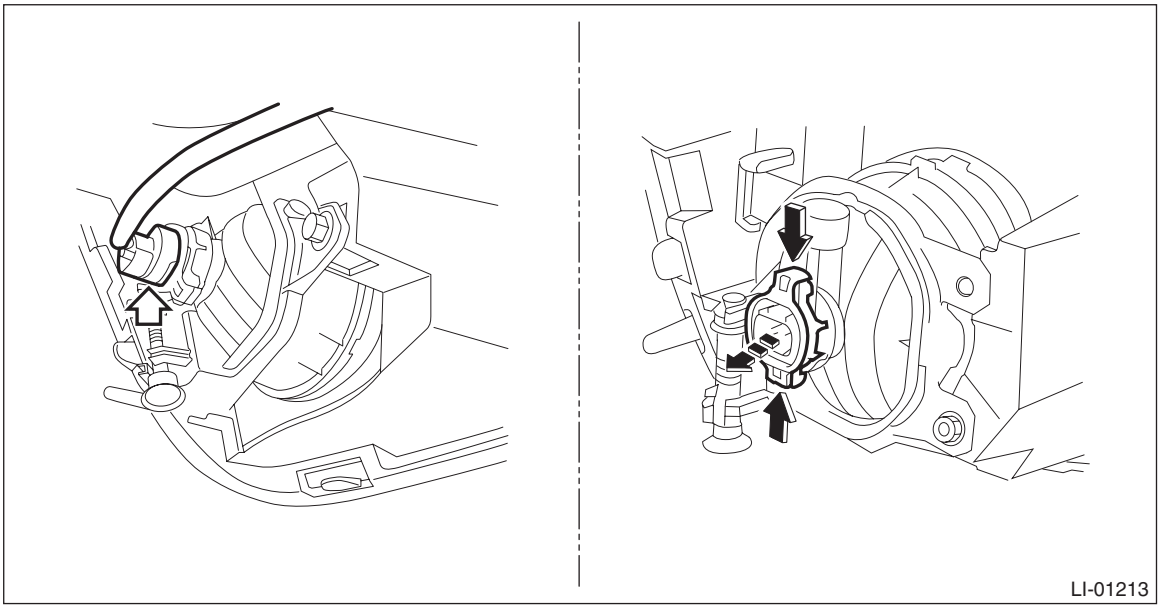
# 22.Front Fog Light Bulb

## A: REMOVAL

1) Disconnect the ground cable from battery.
2) Remove the screw and clips, and turn over the front side of the mud guard - front.



3) From the bottom of the bumper face - front, remove the front fog light bulb.
   (1) Disconnect the connector.
   (2) Remove the bulb.



## B: INSTALLATION

**CAUTION:**
**After connecting the connector, make sure that the bulb is locked securely.**
Install each part in the reverse order of removal.

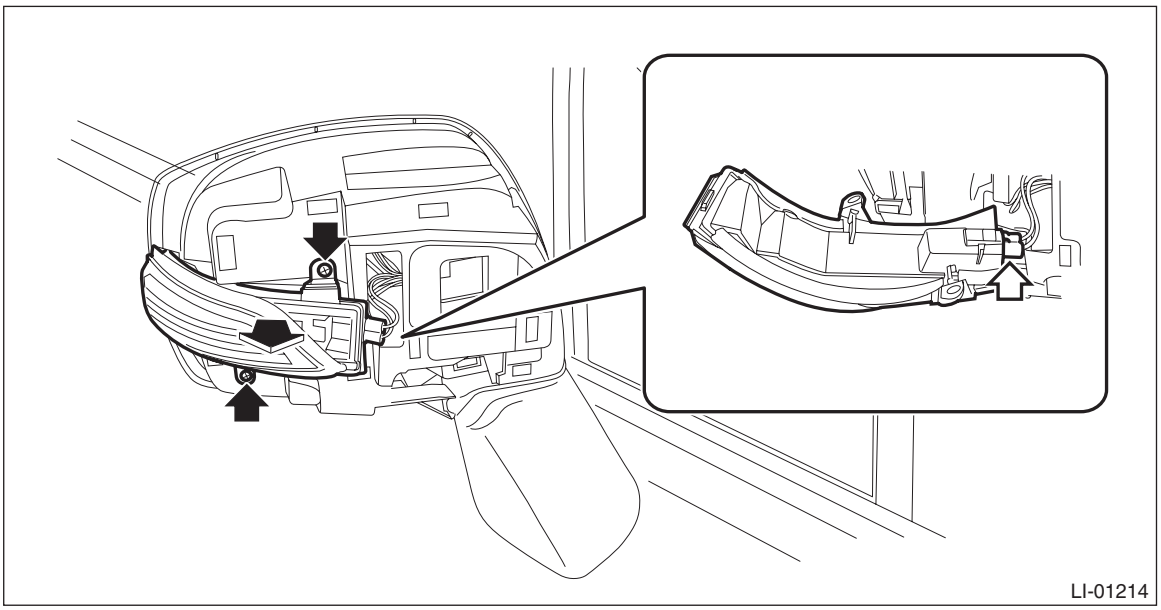
## C: INSPECTION

1) Visually check the bulb for blow out.
2) Check the bulb specification. <Ref. to LI-2, SPECIFICATION, General Description.>
3) Replace the bulb if it is found defective.

# 23.Side Turn Signal Light Assembly

## A: REMOVAL

1) Disconnect the ground cable from battery.
2) Remove the cover - cap outer mirror. <Ref. to GW-24, REPLACEMENT, Scalp Cap.>
3) Remove the light assembly - side turn mirror.
   (1) Remove the screws and pull out the light assembly - side turn mirror to the front of the vehicle.
   (2) Disconnect the connector and remove the light assembly - side turn mirror.



## B: INSTALLATION

Install each part in the reverse order of removal.

## C: INSPECTION

1) Install the light to check if it blinks normally.
2) If it fails to blink normally, replace the light assembly - side turn mirror with a new part.

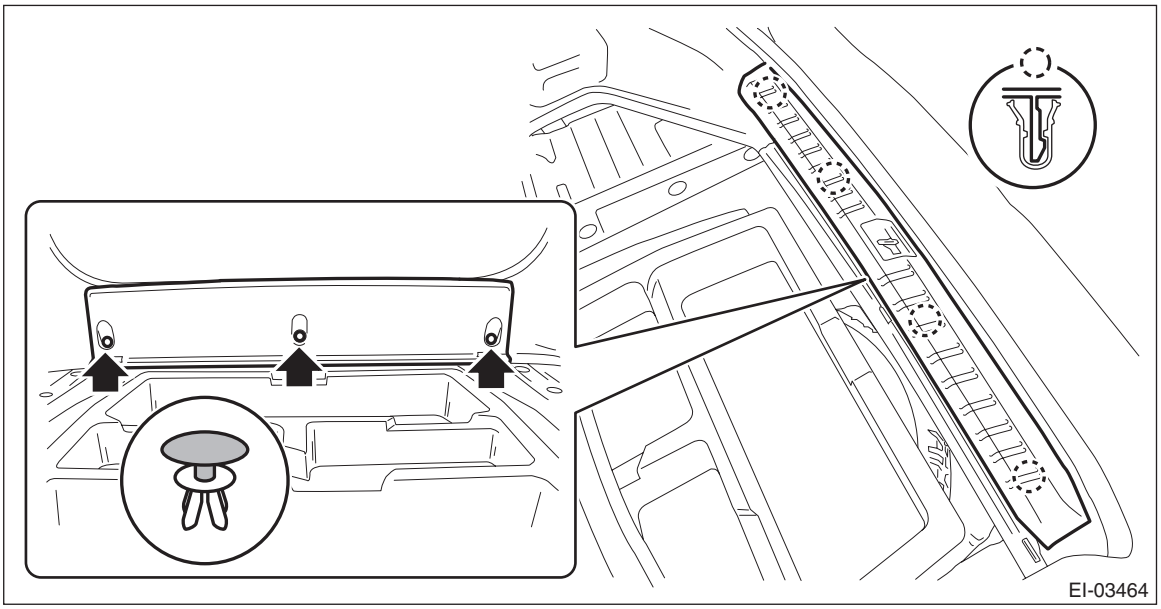
NOTE:
Since LED (Light Emitting Diode) is used for the light, replace the light assembly - side turn mirror if the LED burns out.

# 24.Rear Combination Light Assembly

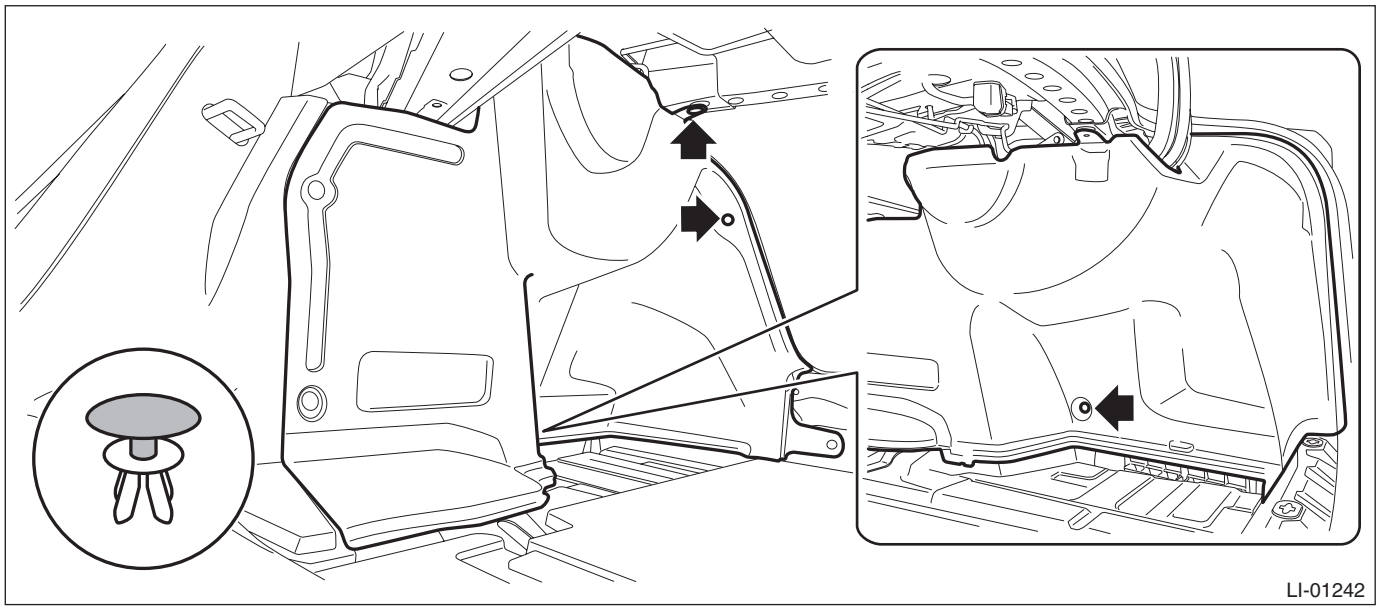
## A: REMOVAL

### 1. 4 DOOR MODEL

1) Disconnect the ground cable from battery.
2) Remove the mat - trunk.
3) Remove the trim panel - trunk rear.
   (1) Remove the clip.
   (2) Release the claws, and remove the trim panel - trunk rear.

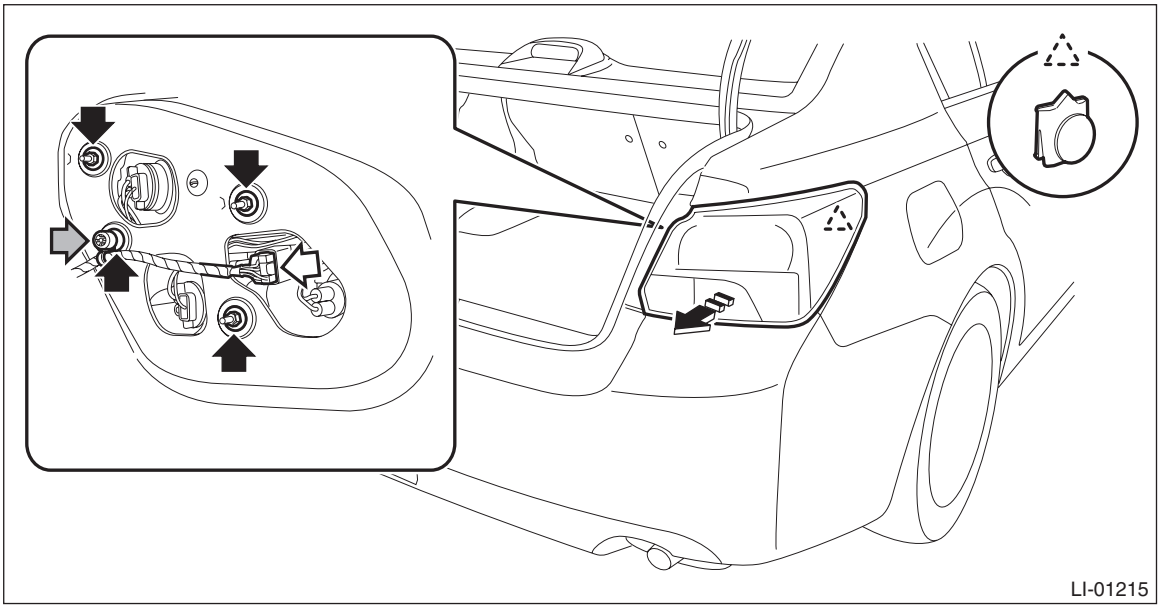


4) Remove the clips, and turn over the trim panel - trunk side.



5) Remove the light assembly - rear combination.
(1) Remove the harness clip and connector.
(2) Release the nuts and clips, then remove the light assembly - rear combination.

**CAUTION:**
**Be careful not to damage the clips.**

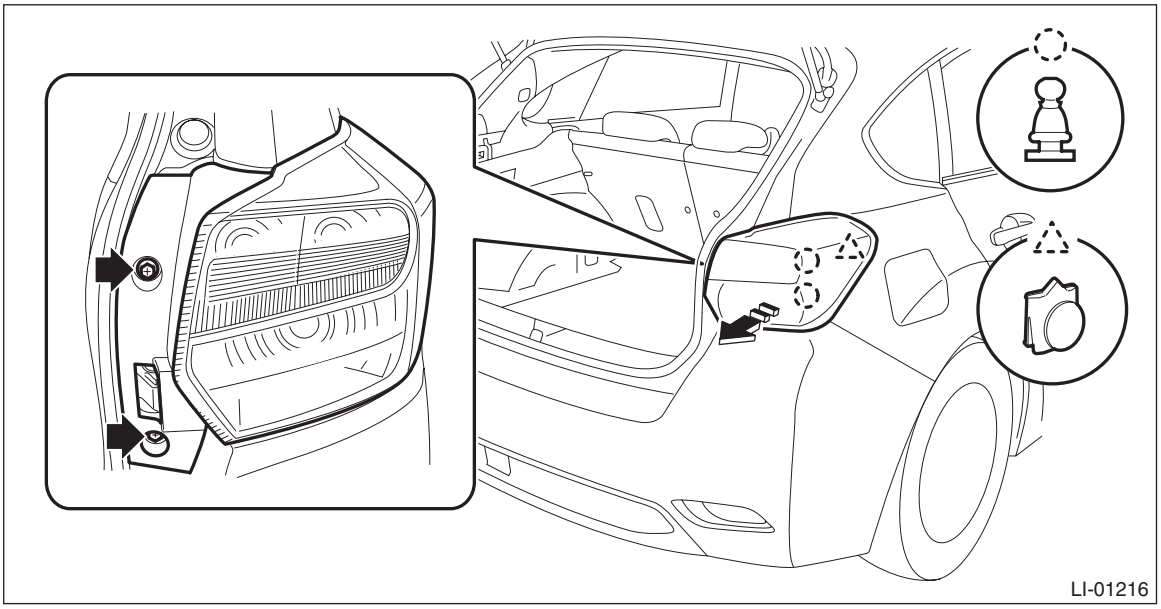


## 2. 5 DOOR MODEL/XV MODEL

1) Disconnect the ground cable from battery.
2) Remove the light assembly - rear combination.

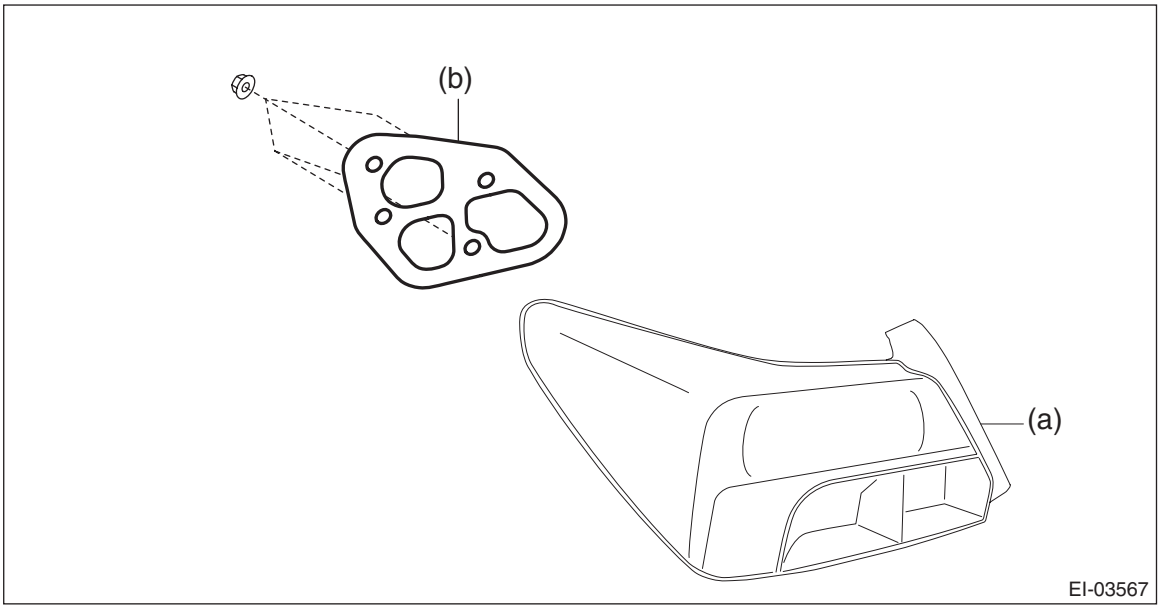
**CAUTION:**
**Be careful not to damage the clips.**

(1) Release the bolts and clips, then pull out the light assembly - rear combination to the vehicle rear.
(2) Disconnect the connector and remove the light assembly - rear combination.



## B: INSTALLATION

**CAUTION:**
**For 4 door model, replace the gasket - rear combination (b) of the light assembly - rear combination (a) with a new part. If the gasket - rear combination is reused, water may come inside of the vehicle.**



Install each part in the reverse order of removal.

***Tightening torque:***
***Light assembly - rear combination: 7.5 N·m (0.76 kgf-m, 5.5 ft-lb)***

## C: INSPECTION

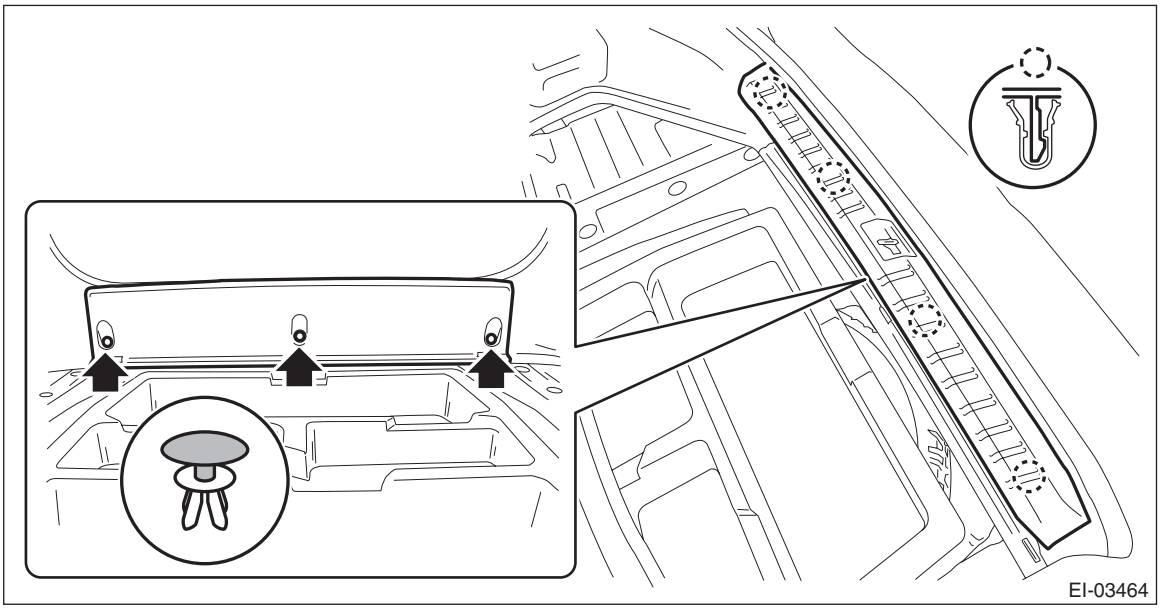
1) Visually check the bulb for blow out.
2) Check the bulb specification. <Ref. to LI-2, SPECIFICATION, General Description.>
3) Replace the bulb if it is found defective.

# 25.Tail/Stop Light Bulb

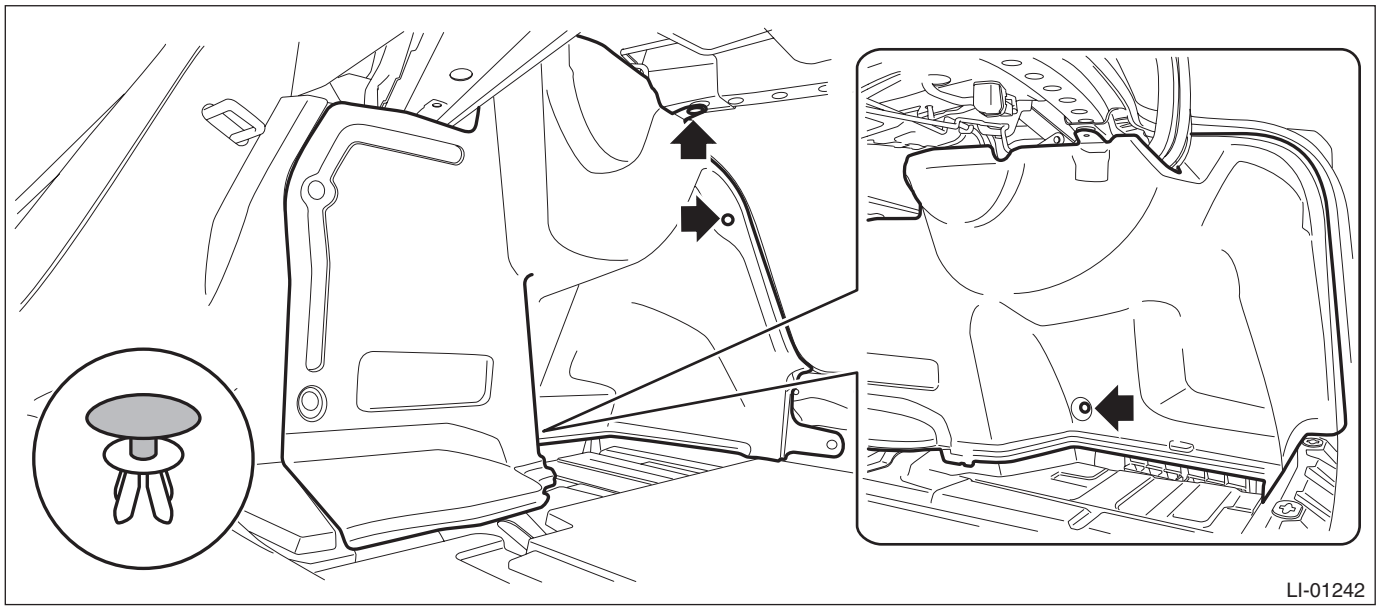
## A: REMOVAL

### 1. 4 DOOR MODEL

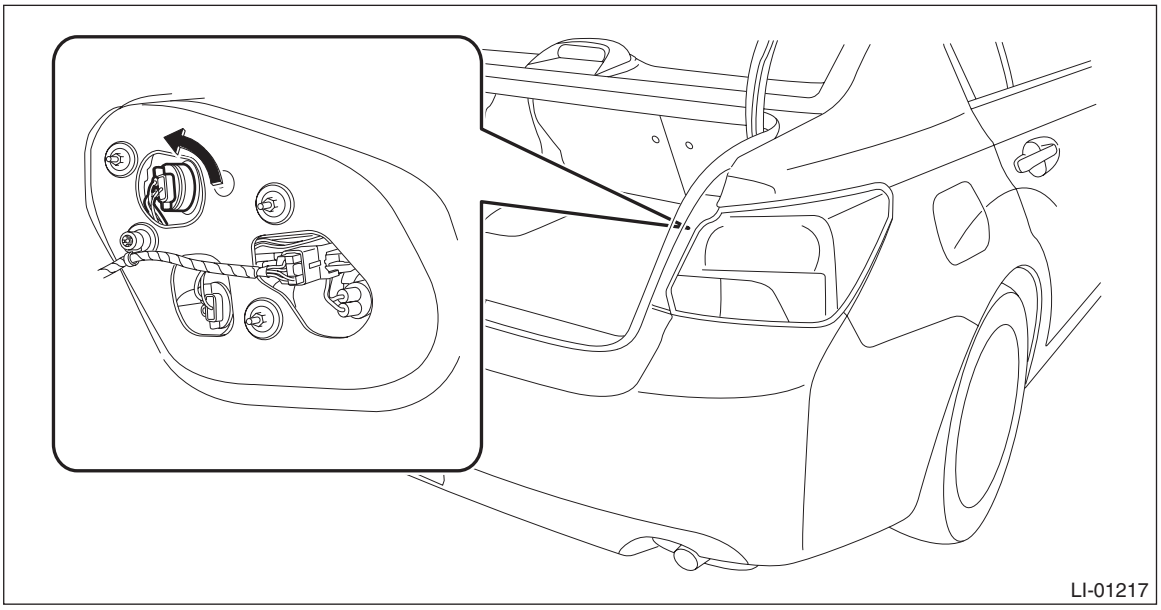
1) Disconnect the ground cable from battery.
2) Remove the mat - trunk.
3) Remove the trim panel - trunk rear.
   (1) Remove the clip.
   (2) Release the claws, and remove the trim panel - trunk rear.



4) Remove the clips, and turn over the trim panel - trunk side.



5) Remove the bulb socket and tail light/stop light bulb.

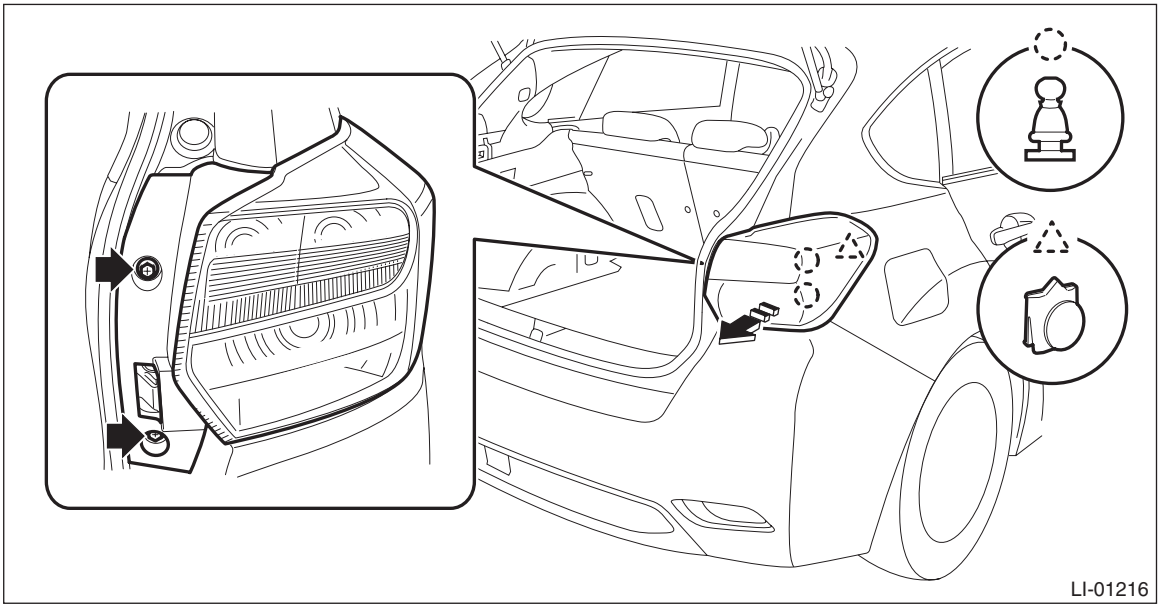


## 2. 5 DOOR MODEL/XV MODEL

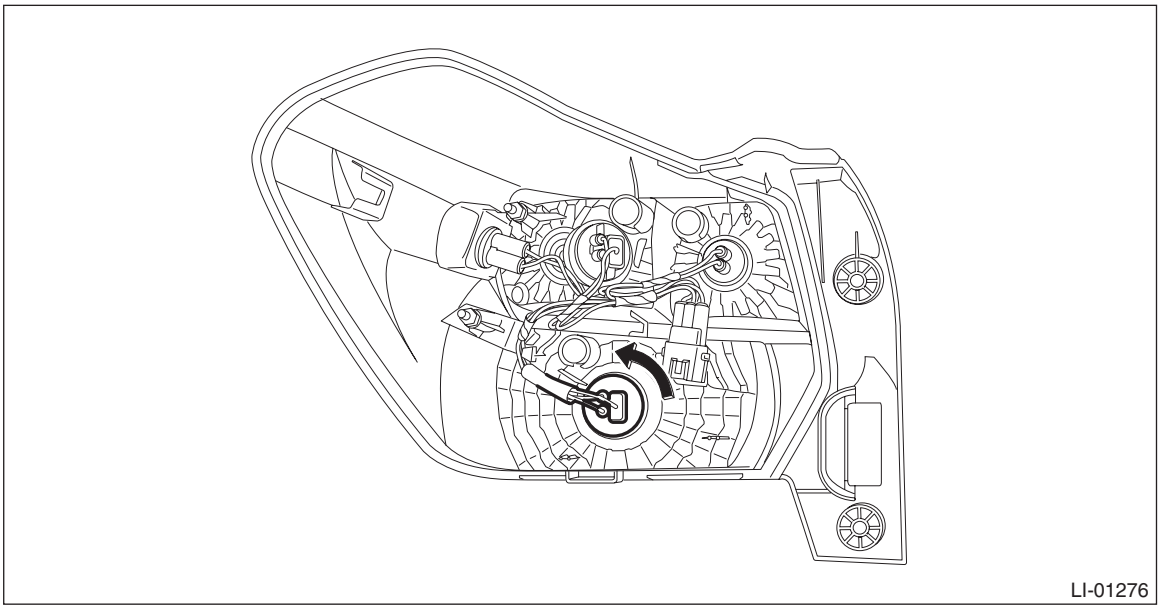
1) Disconnect the ground cable from battery.
2) Remove the light assembly - rear combination.

**CAUTION:**
**Be careful not to damage the clips.**

(1) Release the bolts and clips, then pull out the light assembly - rear combination to the vehicle rear.
(2) Disconnect the connector and remove the light assembly - rear combination.



3) Remove the bulb socket and tail light/stop light bulb.



## B: INSTALLATION

Install each part in the reverse order of removal.

***Tightening torque:***
***Light assembly - rear combination (5 door model/XV model): 7.5 N·m (0.76 kgf-m, 5.5 ft-lb)***

## C: INSPECTION

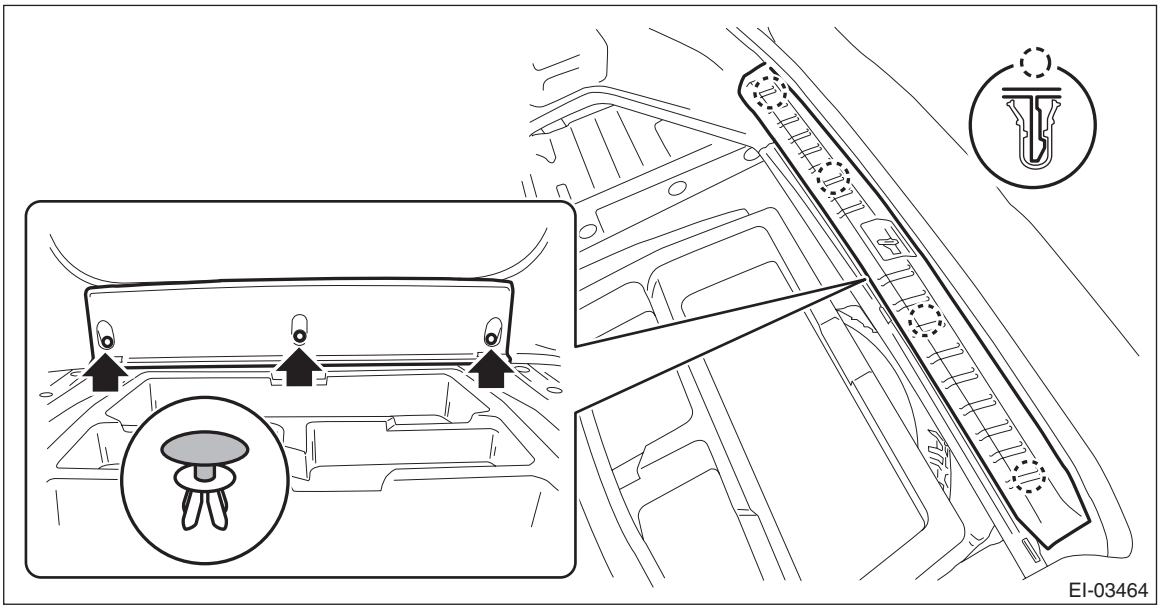
1) Visually check the bulb for blow out.
2) Check the bulb specification. <Ref. to LI-2, SPECIFICATION, General Description.>
3) Replace the bulb if it is found defective.

# 26.Rear Turn Signal Light Bulb

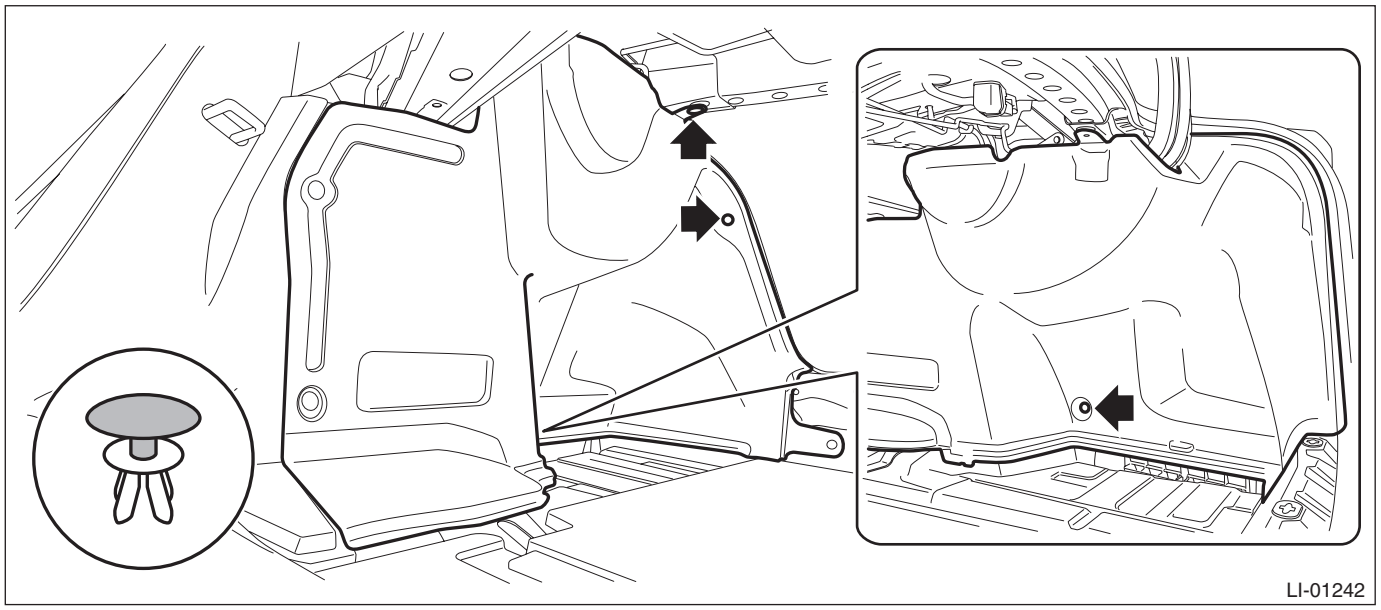
## A: REMOVAL

### 1. 4 DOOR MODEL

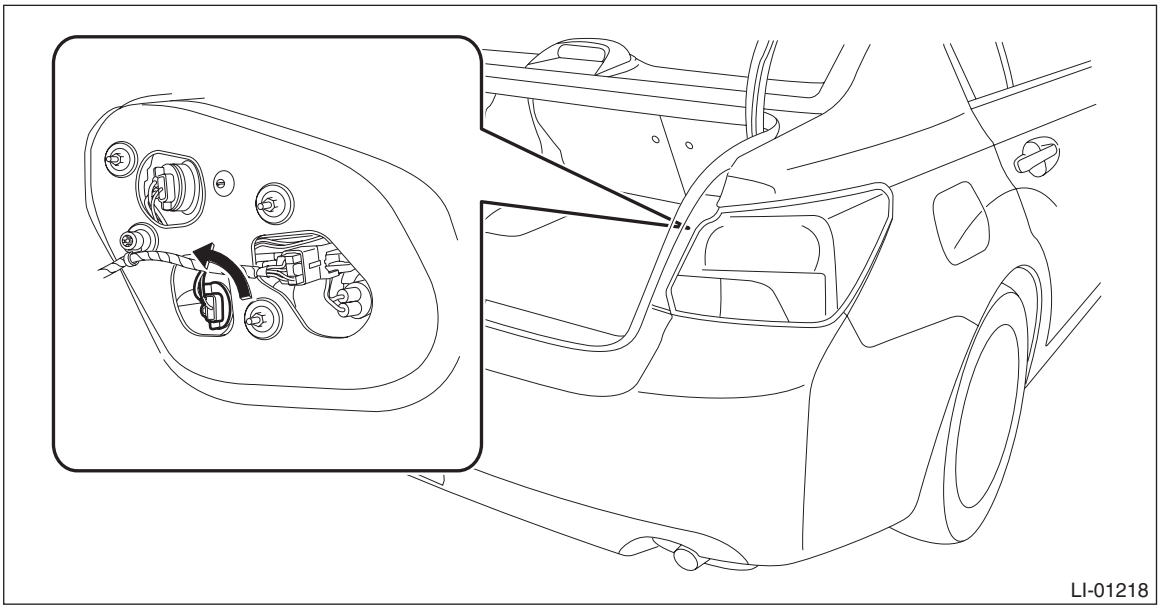
1) Disconnect the ground cable from battery.
2) Remove the mat - trunk.
3) Remove the trim panel - trunk rear.
   (1) Remove the clip.
   (2) Release the claws, and remove the trim panel - trunk rear.



4) Remove the clips, and turn over the trim panel - trunk side.



5) Remove the bulb socket and rear turn signal light bulb.

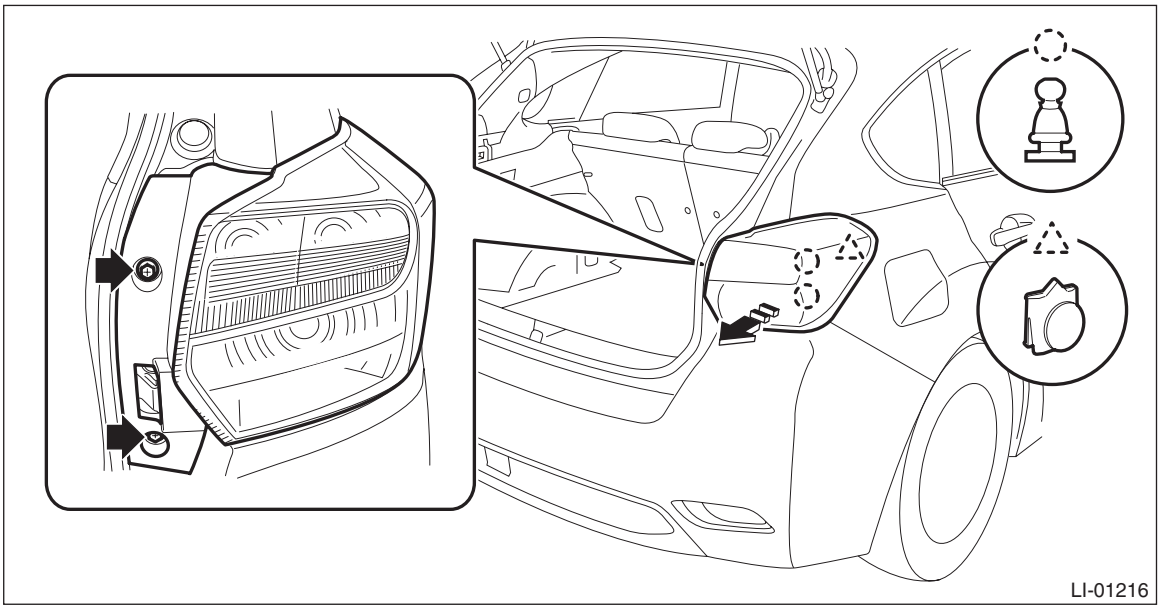


## 2. 5 DOOR MODEL/XV MODEL

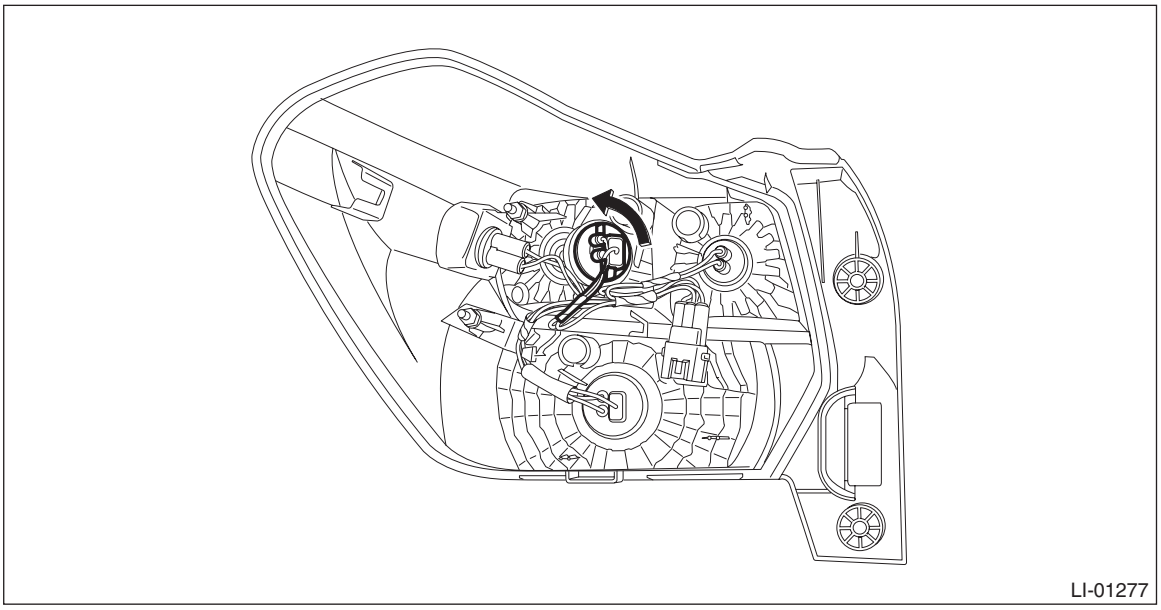
1) Disconnect the ground cable from battery.
2) Remove the light assembly - rear combination.

**CAUTION:**
**Be careful not to damage the clips.**

(1) Release the bolts and clips, then pull out the light assembly - rear combination to the vehicle rear.
(2) Disconnect the connector and remove the light assembly - rear combination.



3) Remove the bulb socket and rear turn signal light bulb.



## B: INSTALLATION

Install each part in the reverse order of removal.

***Tightening torque:***
***Light assembly - rear combination (5 door model/XV model): 7.5 N·m (0.76 kgf-m, 5.5 ft-lb)***

## C: INSPECTION

1) Visually check the bulb for blow out.
2) Check the bulb specification. <Ref. to LI-2, SPECIFICATION, General Description.>
3) Replace the bulb if it is found defective.

# 27.Rear Side Marker Light Bulb

## A: REMOVAL

### 1. 4 DOOR MODEL

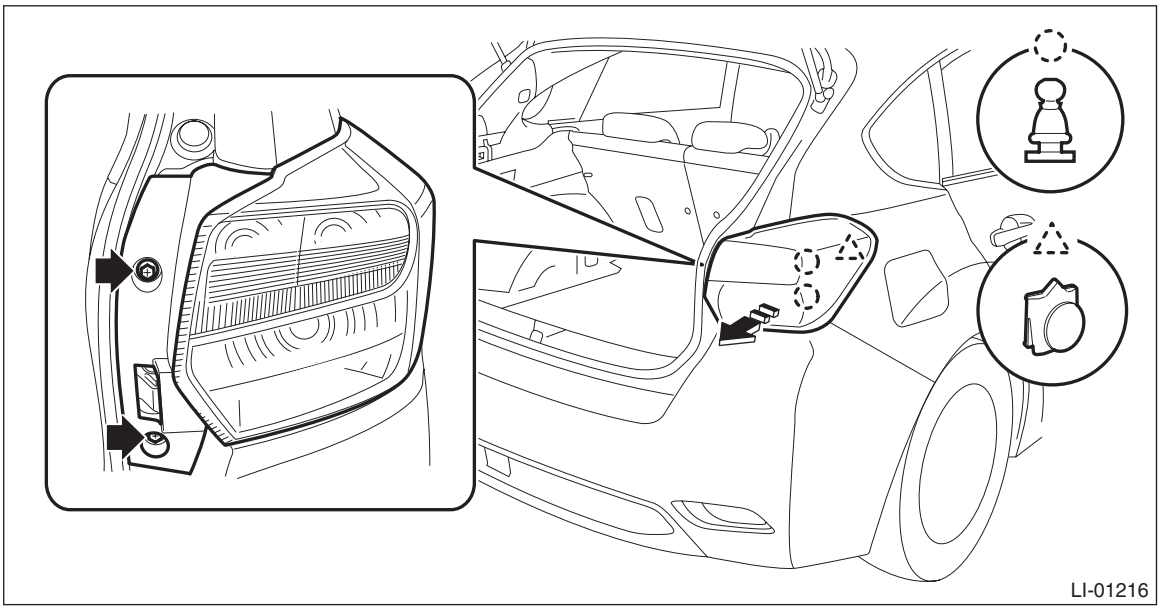
It is integrated with the tail light bulb. For details concerning operation procedures, refer to “REMOVAL” of “Tail/Stop Light Bulb”. <Ref. to LI-61, REMOVAL, Tail/Stop Light Bulb.>

### 2. 5 DOOR MODEL/XV MODEL

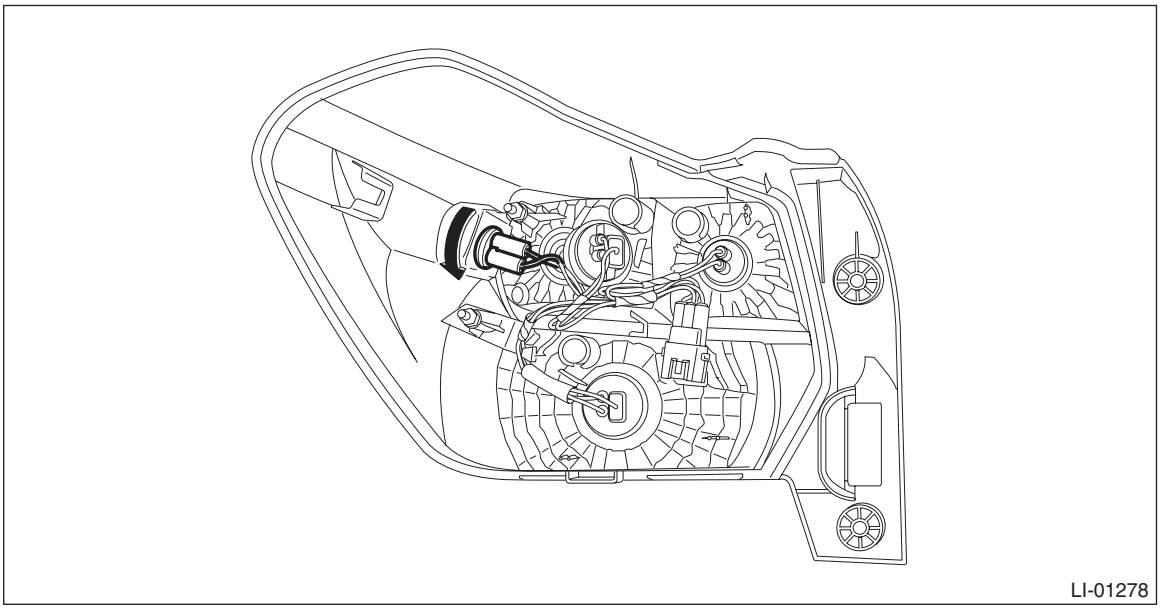
1) Disconnect the ground cable from battery.
2) Remove the light assembly - rear combination.

**CAUTION:**
**Be careful not to damage the clips.**

(1) Release the bolts and clips, then pull out the light assembly - rear combination to the vehicle rear.
(2) Disconnect the connector and remove the light assembly - rear combination.



3) Remove the bulb socket and rear side marker light bulb.



## B: INSTALLATION

Install each part in the reverse order of removal.

***Tightening torque:***
***Light assembly - rear combination (5 door model/XV model): 7.5 N·m (0.76 kgf-m, 5.5 ft-lb)***

## C: INSPECTION

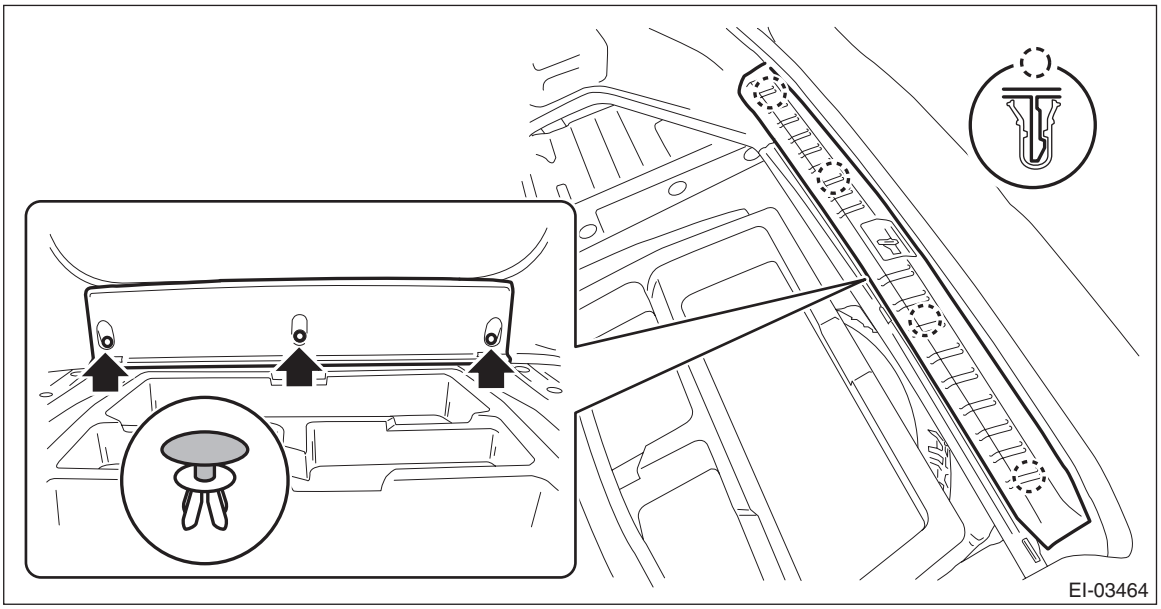
1) Visually check the bulb for blow out.
2) Check the bulb specification. <Ref. to LI-2, SPECIFICATION, General Description.>
3) Replace the bulb if it is found defective.

# 28.Back-up Light Bulb

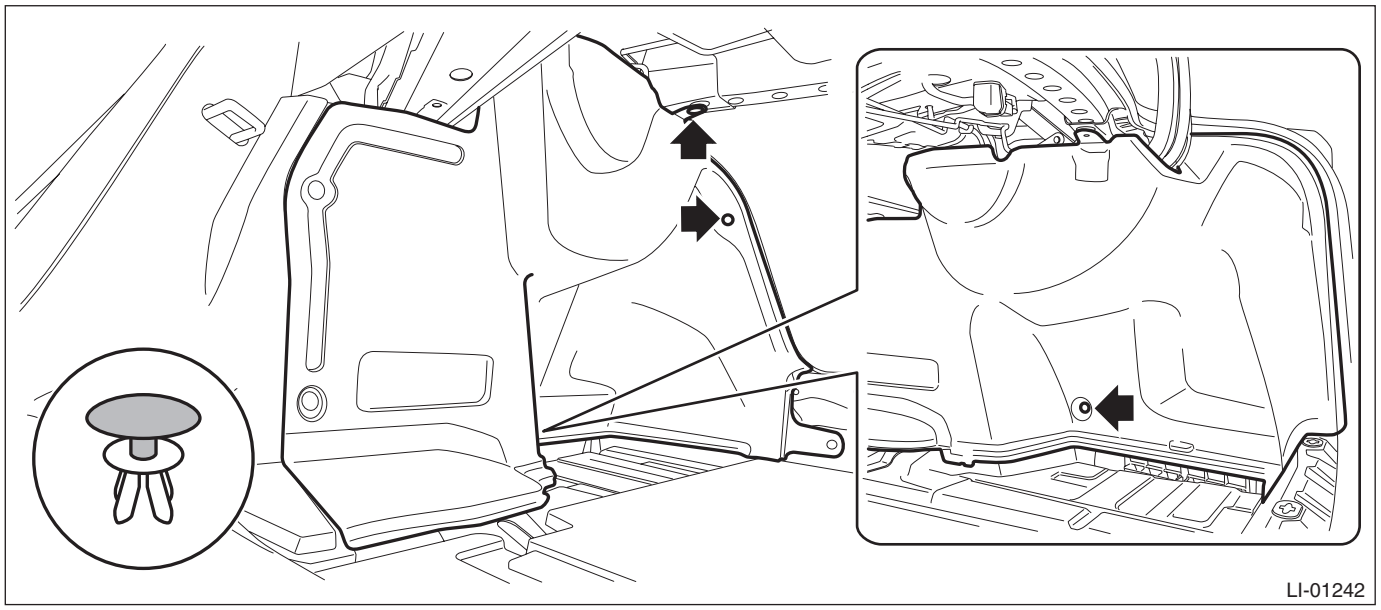
## A: REMOVAL

### 1. 4 DOOR MODEL

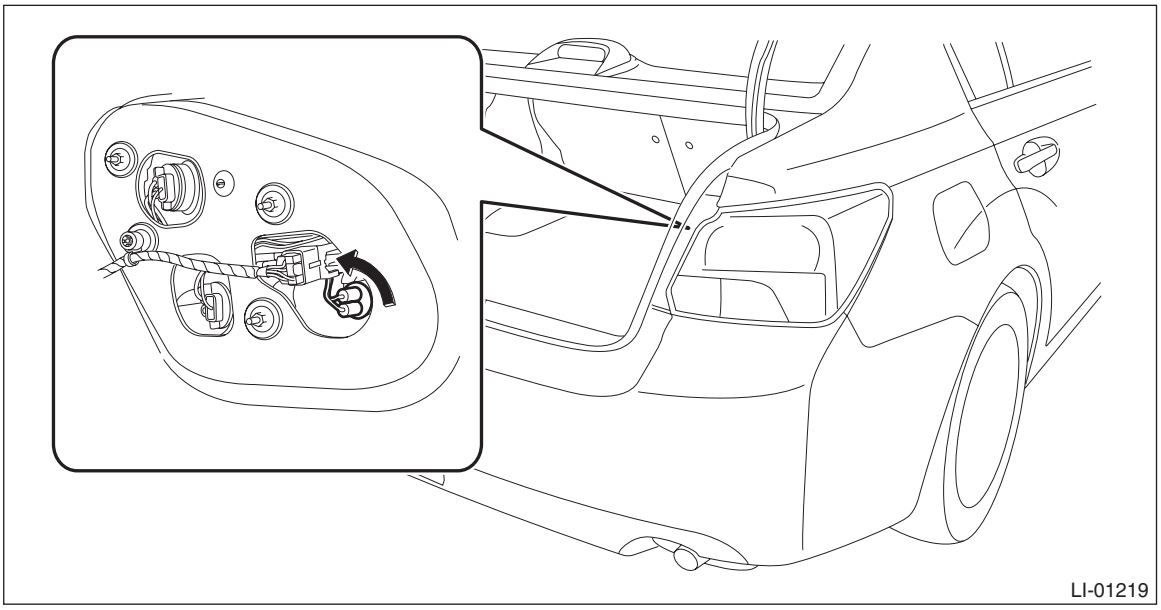
1) Disconnect the ground cable from battery.
2) Remove the mat - trunk.
3) Remove the trim panel - trunk rear.
   (1) Remove the clip.
   (2) Release the claws, and remove the trim panel - trunk rear.



4) Remove the clips, and turn over the trim panel - trunk side.



5) Remove the bulb socket and back-up light bulb.

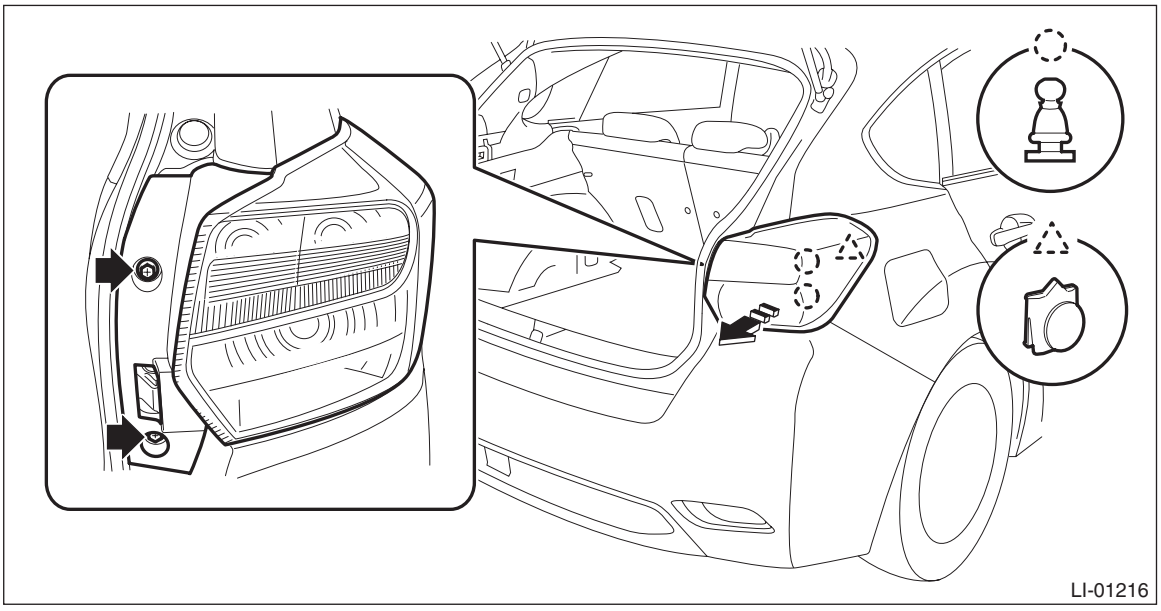


## 2. 5 DOOR MODEL/XV MODEL

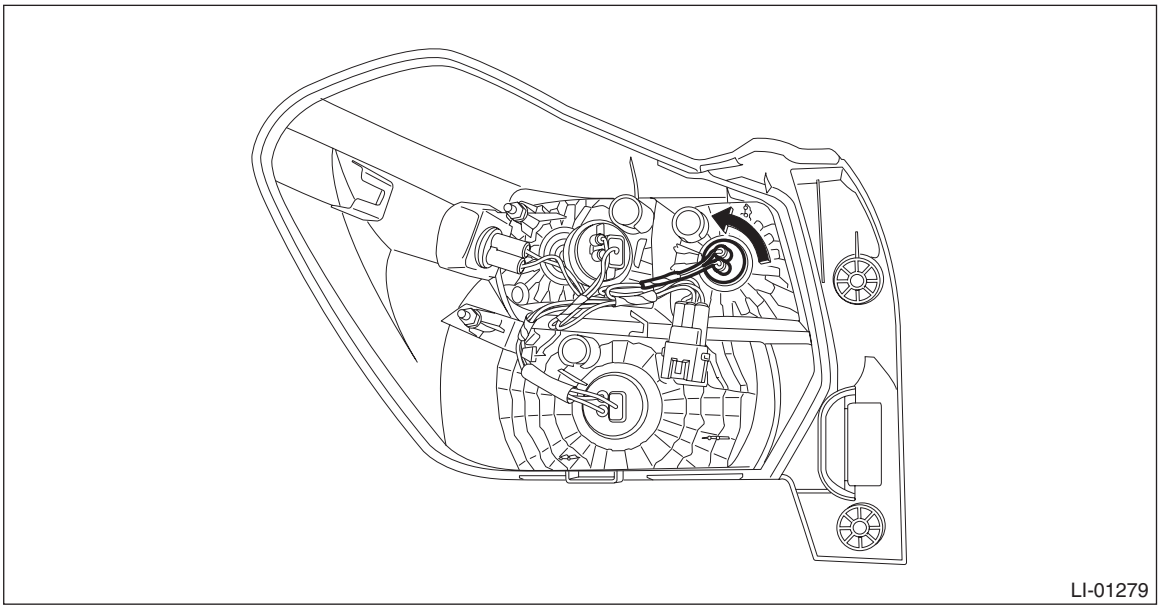
1) Disconnect the ground cable from battery.
2) Remove the light assembly - rear combination.

**CAUTION:**
**Be careful not to damage the clips.**

(1) Release the bolts and clips, then pull out the light assembly - rear combination to the vehicle rear.
(2) Disconnect the connector and remove the light assembly - rear combination.



3) Remove the bulb socket and rear turn signal light bulb.



## B: INSTALLATION

Install each part in the reverse order of removal.

***Tightening torque:***
***Light assembly - rear combination (5 door model/XV model): 7.5 N·m (0.76 kgf-m, 5.5 ft-lb)***

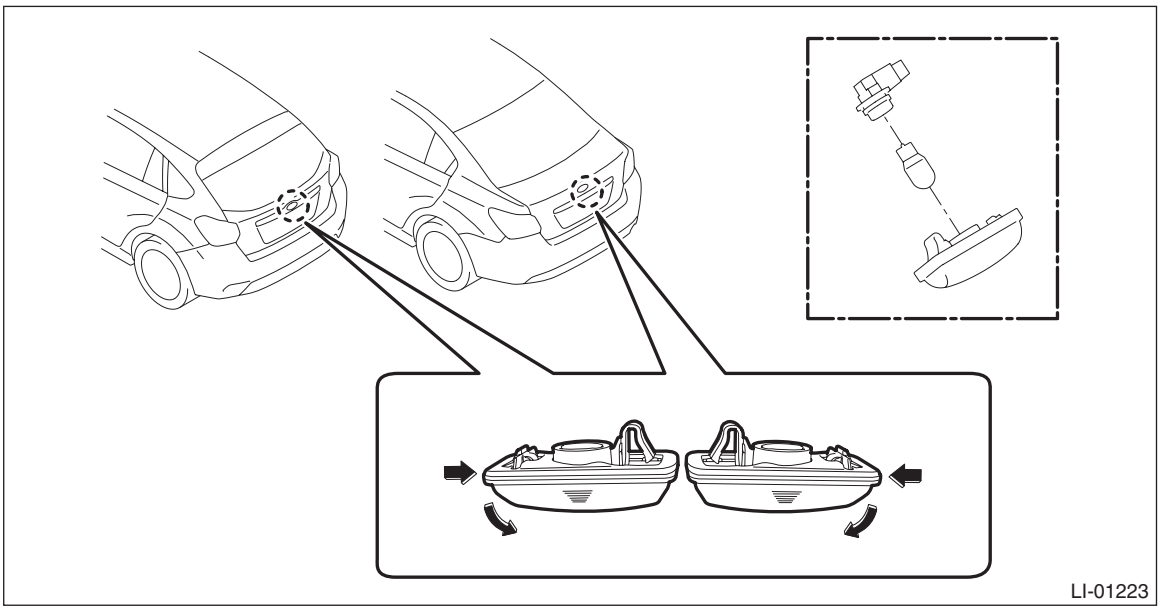
## C: INSPECTION

1) Visually check the bulb for blow out.
2) Check the bulb specification. <Ref. to LI-2, SPECIFICATION, General Description.>
3) Replace the bulb if it is found defective.

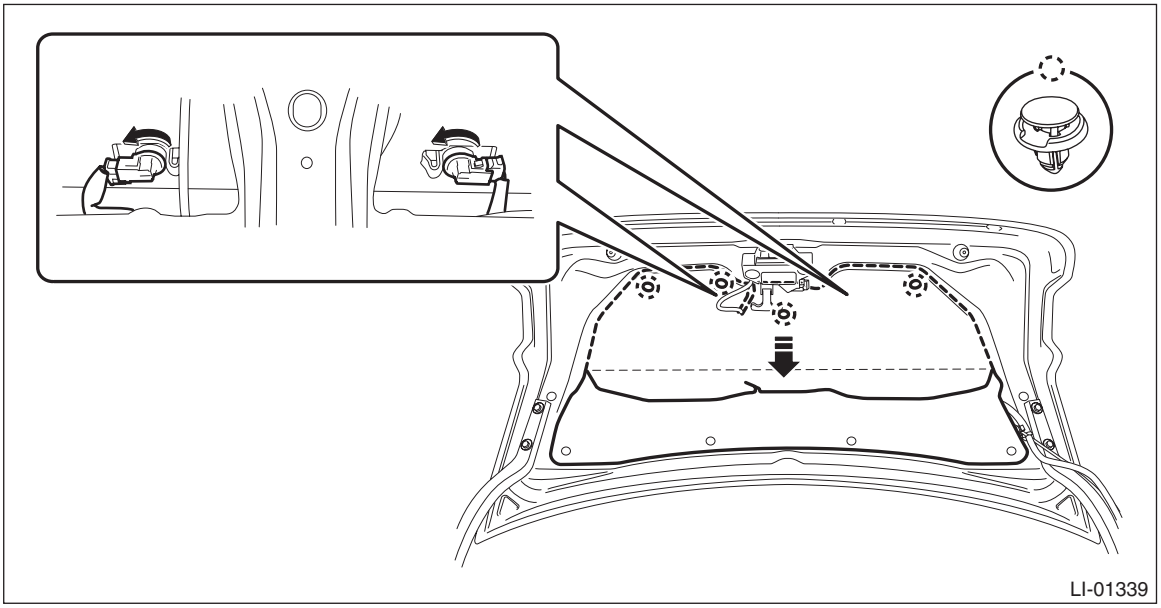
# 29.License Plate Light

## A: REMOVAL

1) Disconnect the ground cable from battery.
2) Remove the garnish - trunk. (4 door model) <Ref. to EI-151, REMOVAL, Trunk Lid Garnish.>
3) Remove the license plate light.
   (1) Release the claws and pull out the license plate light.
   (2) Disconnect the connector and remove the bulb socket and bulb from the license plate light.



NOTE:
For 4 door model, when removing the bulb only, remove the trim panel - trunk lid halfway, then remove the bulb socket and the bulb.



## B: INSTALLATION

Install each part in the reverse order of removal.

## C: INSPECTION

1) Visually check the bulb for blow out.
2) Check the bulb specification. <Ref. to LI-2, SPECIFICATION, General Description.>
3) Replace the bulb if it is found defective.

# 30.High-mounted Stop Light

## A: REMOVAL

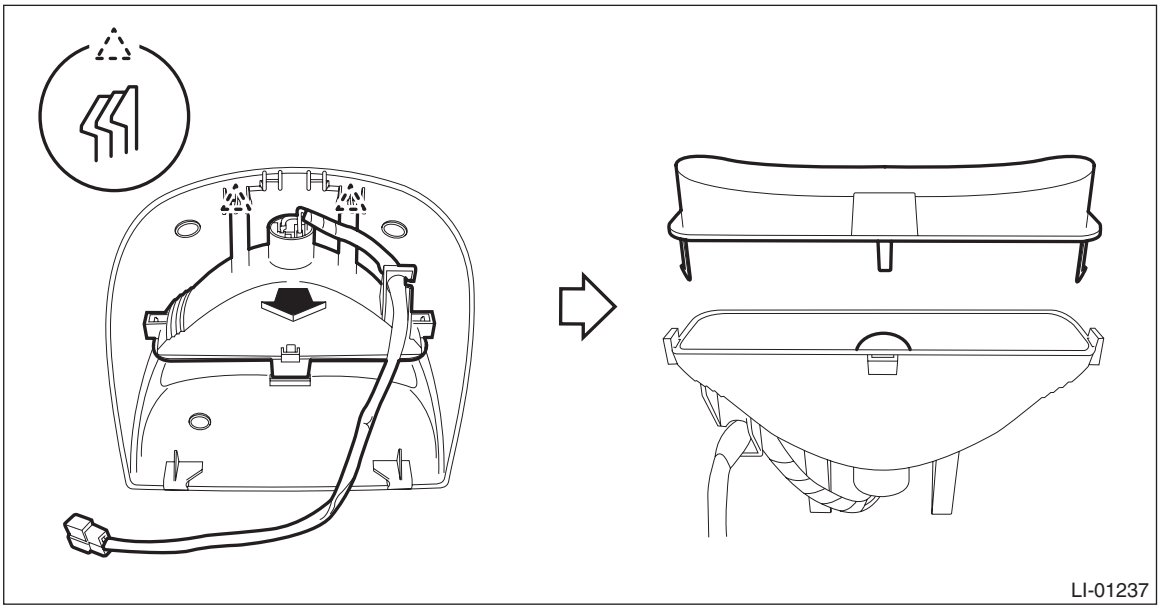
### 1. 4 DOOR MODEL

1) Disconnect the ground cable from battery.
2) Remove the light assembly - high-mounted.
   (1) Disconnect the connector.

   (2) Release the claws, and remove the light assembly - high-mounted.

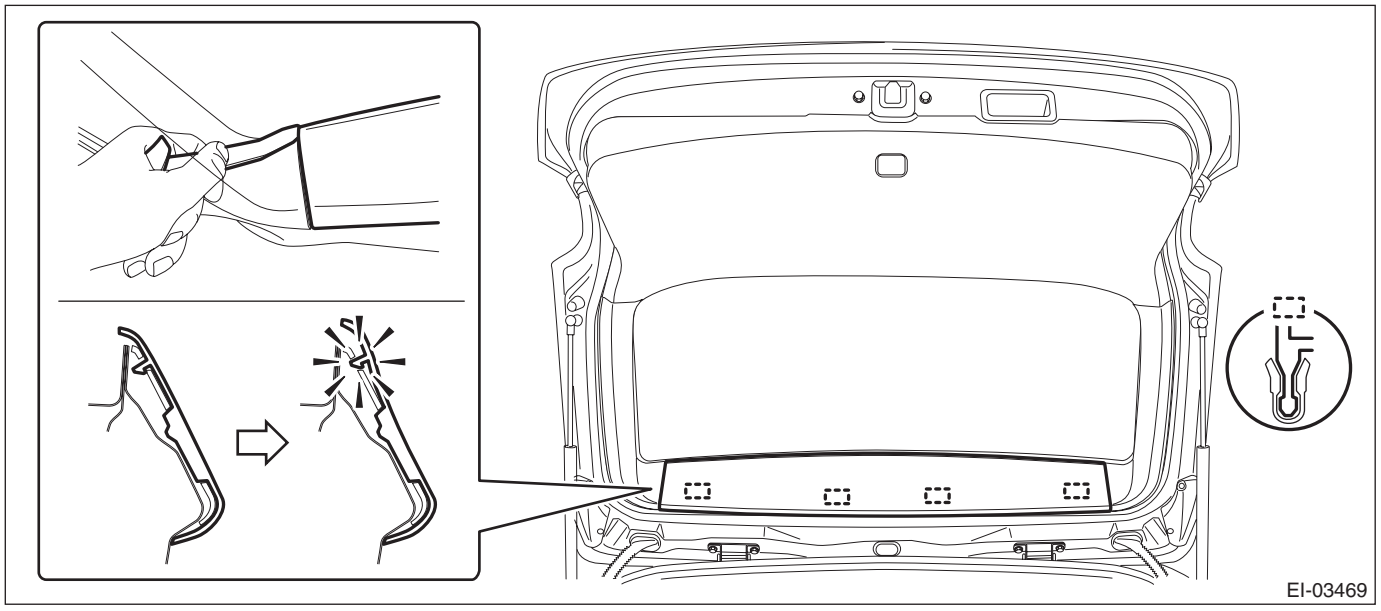
   (3) Release the claws and remove the reflector assembly from the light - case.

(4) Remove the lens and remove the bulb.

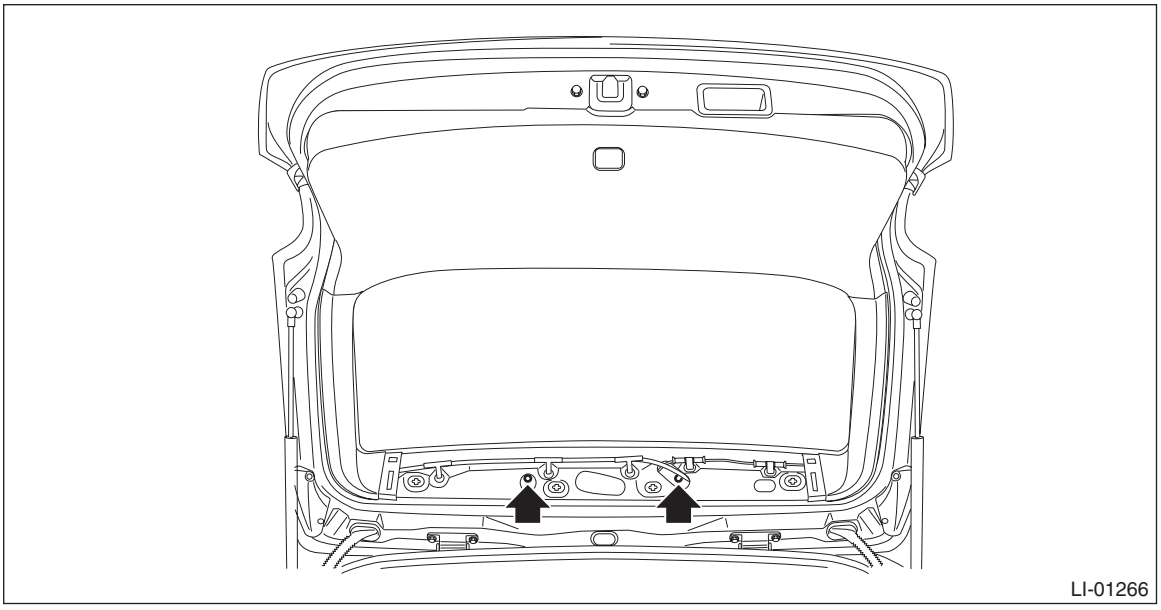


## 2. 5 DOOR MODEL/XV MODEL

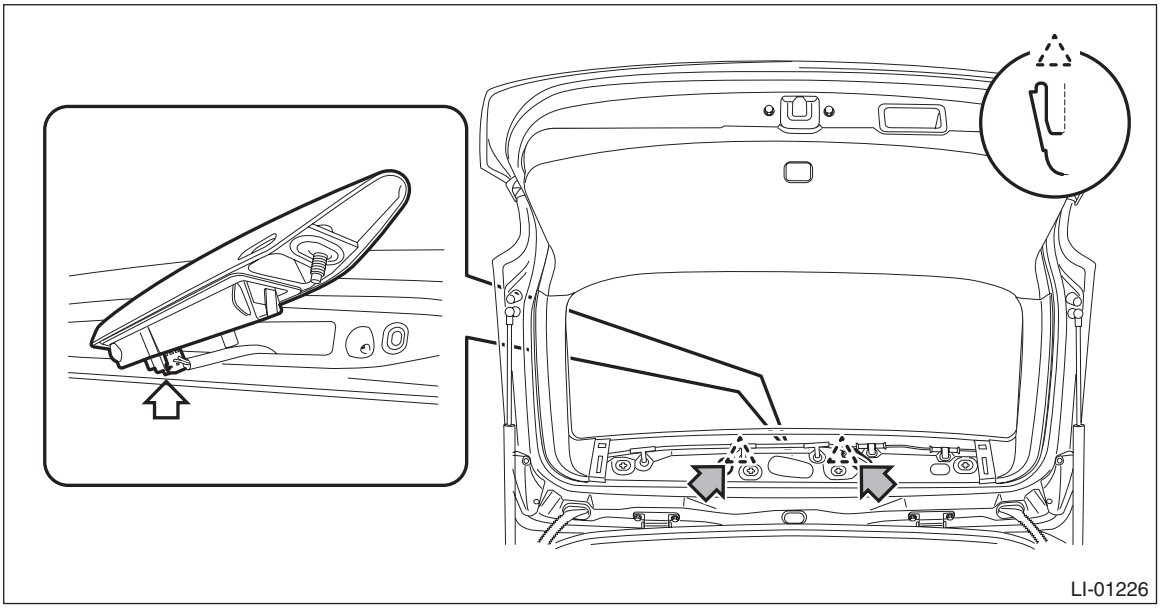
1) Disconnect the ground cable from battery.
2) Remove the trim panel - rear gate UPR.
   (1) Remove the claws on the trim edge.
   (2) Release the claws in the center of trim, and remove the trim panel - rear gate UPR.



3) Remove the light assembly - high-mounted.
(1) Remove the nut.



(2) From the inside of the rear gate, push the claws on both side of the light assembly - high-mounted to take it out toward vehicle rear.
(3) Disconnect the connector and remove the light assembly - high-mounted.



## B: INSTALLATION

Install each part in the reverse order of removal.

***Tightening torque:***
***Light assembly - high-mounted (5 door model/XV model): 4.5 N·m (0.46 kgf-m, 3.3 ft-lb)***

## C: INSPECTION

### 1. 4 DOOR MODEL

1) Visually check the bulb for blow out.
2) Check the bulb specification. <Ref. to LI-2, SPECIFICATION, General Description.>
3) Replace the bulb if it is found defective.

### 2. 5 DOOR MODEL/XV MODEL

1) Install the light to test if it illuminates normally.
2) If it fails to illuminate normally, replace the light assembly - high-mounted with a new part.

NOTE:
Since LED (Light Emitting Diode) is used for the light, replace the light assembly - high-mounted if the LED burns out.

# 31.Spot Map Light

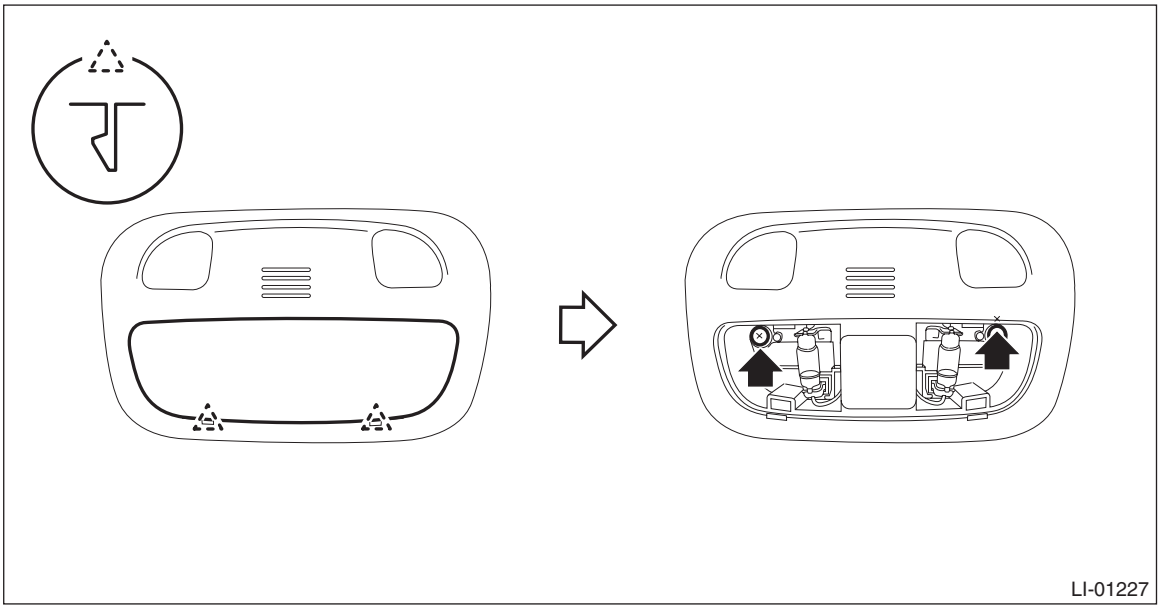
## A: REMOVAL

1) Disconnect the ground cable from battery.
2) Remove the light assembly - map.

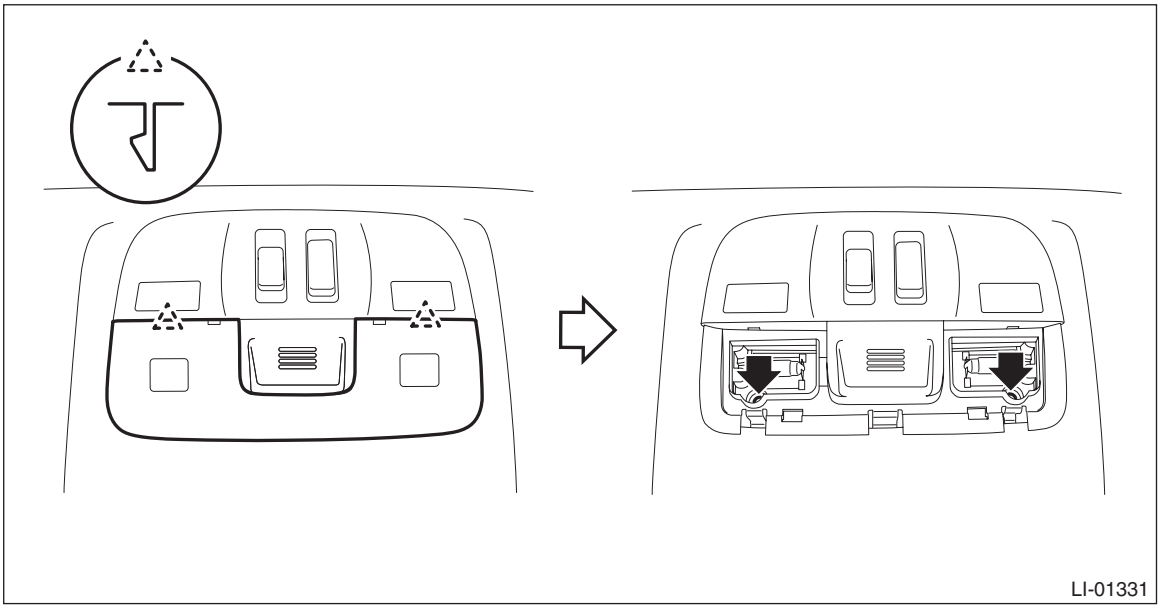
**CAUTION:**
**When using a flat tip screwdriver, apply protective tape or cloth and be careful not to cause damage.**

(1) Release the claws and remove the lens.
(2) Remove the screws and pull out the light assembly - map.

- Model without sunroof



- Model with sunroof



(3) Disconnect the connector and remove the light assembly - map and the bulb.

## B: INSTALLATION

Install each part in the reverse order of removal.

# C: INSPECTION

## 1. SPOT MAP LIGHT BULB

1) Visually check the bulb for blow out.
2) Check the bulb specification. <Ref. to LI-2, SPECIFICATION, General Description.>
3) Replace the bulb if it is found defective.

## 2. SPOT MAP LIGHT SWITCH

### Unit inspection

***Preparation tool:***
***Circuit tester***

1) Check the resistance between switch terminals.

- Model without sunroof

| Terminal No. | Inspection conditions | Standard | Connection diagram |
|---|---|---|---|
| 1 — 2 | Switch OFF | 1 MΩ or more |  LI-01253 |
| | Switch ON | Approx. 18 Ω | |

- Model with sunroof

| Terminal No. | Inspection conditions | Standard | Connection diagram |
|---|---|---|---|
| 1 — 2 | Switch OFF | 1 MΩ or more |  LI-01332 |
| | Switch ON | Approx. 18 Ω | |

2) Replace the light assembly - map if the inspection result is not within the standard value.

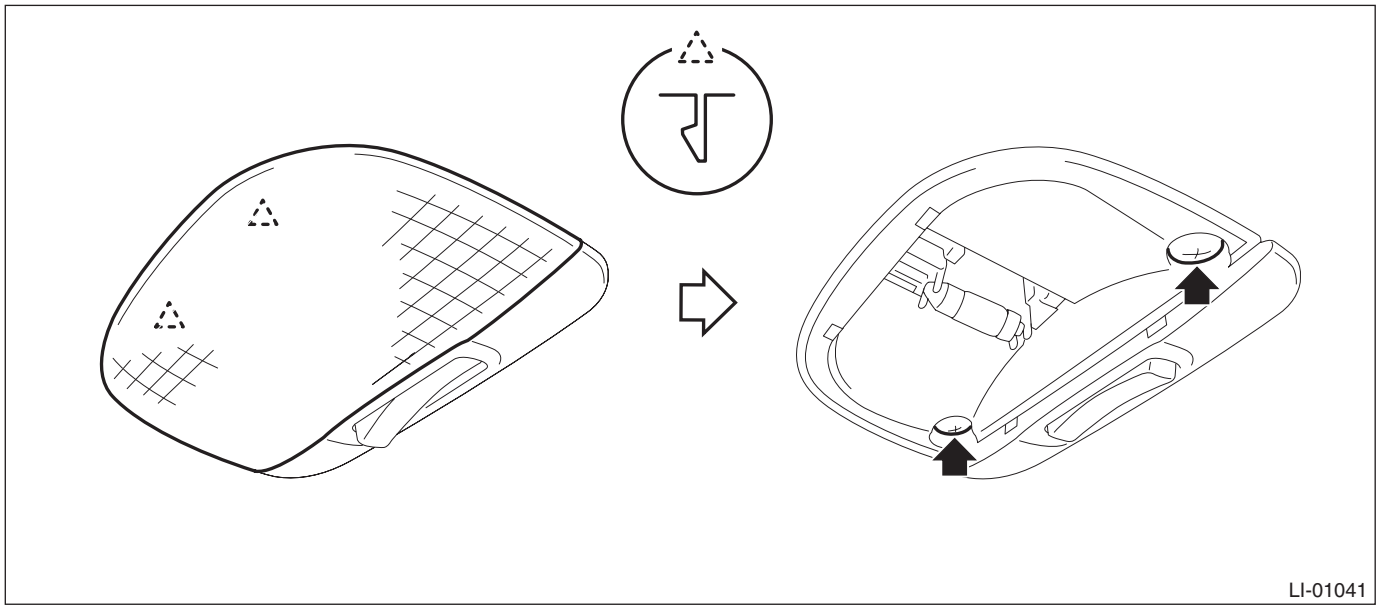
# 32.Room Light

## A: REMOVAL

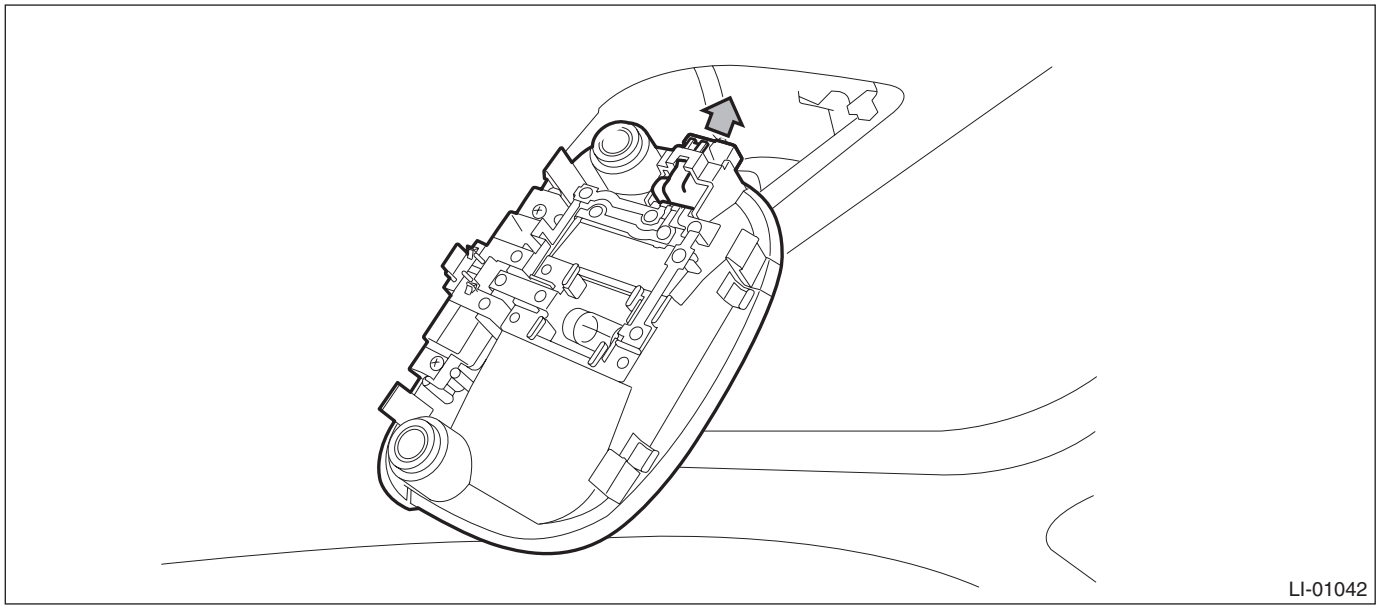
1) Disconnect the ground cable from battery.
2) Remove the light assembly - room.

**CAUTION:**
**When using a flat tip screwdriver, apply protective tape or cloth and be careful not to cause damage.**

(1) Release the claws and remove the lens.
(2) Remove the screws and pull out the light assembly - room.



(3) Disconnect the connector and remove the light assembly - room and the bulb.



## B: INSTALLATION

Install each part in the reverse order of removal.

# C: INSPECTION

## 1. ROOM LIGHT BULB

1) Visually check the bulb for blow out.
2) Check the bulb specification. <Ref. to LI-2, SPECIFICATION, General Description.>
3) Replace the bulb if it is found defective.

## 2. ROOM LIGHT SWITCH

### Unit inspection

***Preparation tool:***
***Circuit tester***

1) Check the resistance between switch terminals.

| Terminal No. | Inspection conditions | Standard | Connection diagram |
|---|---|---|---|
| — | Switch OFF | 1 MΩ or more |  LI-01254 |
| 1 — 3 | Switch ON | Less than 1 Ω | |
| 2 — 3 | Switch door | Less than 1 Ω |  LI-01255 |

2) Apply battery voltage to check the lighting condition of the light.

| Terminal No. | Inspection conditions | Specification | Connection diagram |
|---|---|---|---|
| 3 (+) — 1, 2 (–) | Switch OFF | Light OFF |  LI-01256 |
| | Switch ON | Light ON | |
| | Switch door | Light ON | |

3) Replace the light assembly - room if the inspection result is not within the standard value.

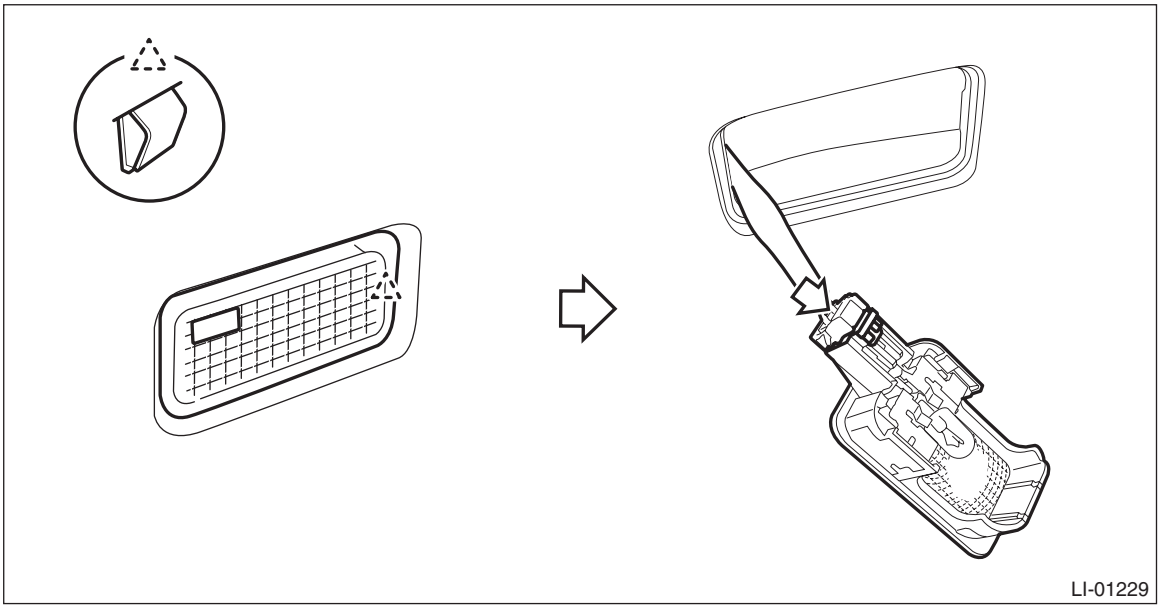
# 33.Luggage Room Light

## A: REMOVAL

1) Disconnect the ground cable from battery.
2) Remove the light assembly - luggage room.

**CAUTION:**
**When using a flat tip screwdriver, apply protective tape or cloth and be careful not to cause damage.**

(1) Release the claws and remove the main body of the light assembly - luggage room.
(2) Disconnect the connector and remove the light assembly - luggage room and the bulb.



## B: INSTALLATION

Install each part in the reverse order of removal.

# C: INSPECTION

## 1. LUGGAGE ROOM LIGHT BULB

1) Visually check the bulb for blow out.
2) Check the bulb specification. <Ref. to LI-2, SPECIFICATION, General Description.>
3) Replace the bulb if it is found defective.

## 2. LUGGAGE ROOM LIGHT SWITCH

**Unit inspection**

***Preparation tool:***
***Circuit tester***

1) Check the resistance between switch terminals.

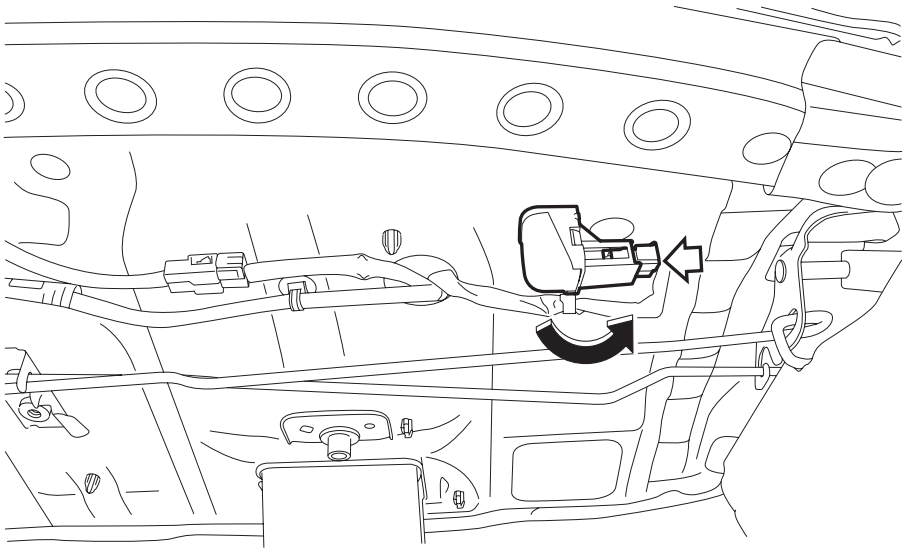
| Terminal No. | Inspection conditions | Specification | Connection diagram |
|---|---|---|---|
| 1 — 2 | Switch OFF | 1 MΩ or more |  LI-01253 |
| | Switch ON | Less than 1 Ω | |

2) Replace the light assembly - luggage room if the inspection result is not within the standard value.

# 34.Trunk Room Light

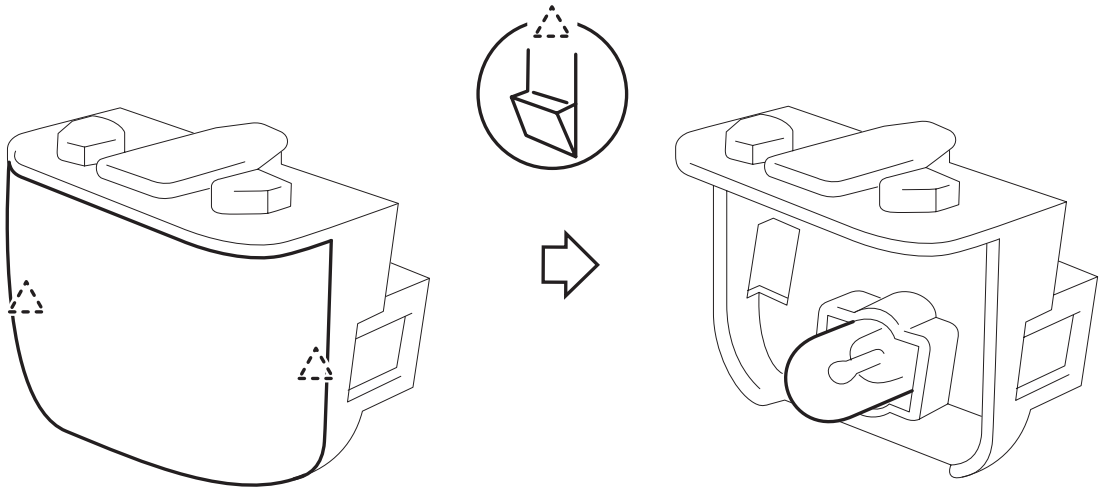
## A: REMOVAL

1) Disconnect the ground cable from battery.
2) Remove the light assembly - trunk room.
   (1) Disconnect the connector.
   (2) Turn the light assembly - trunk room counterclockwise to 60° and remove the light.



LI-01230

3) Release the claws, and detach the lens and bulb.



LI-01048

## B: INSTALLATION

Install each part in the reverse order of removal.

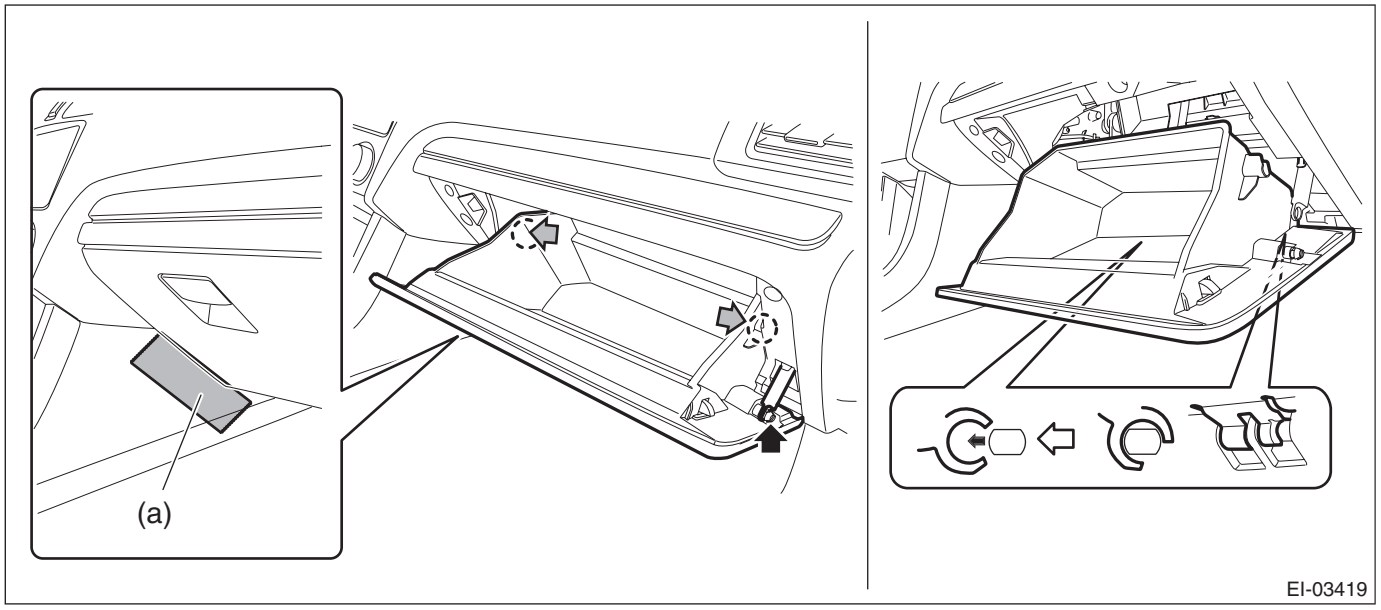
## C: INSPECTION

1) Visually check the bulb for blow out.
2) Check the bulb specification. <Ref. to LI-2, SPECIFICATION, General Description.>
3) Replace the bulb if it is found defective.

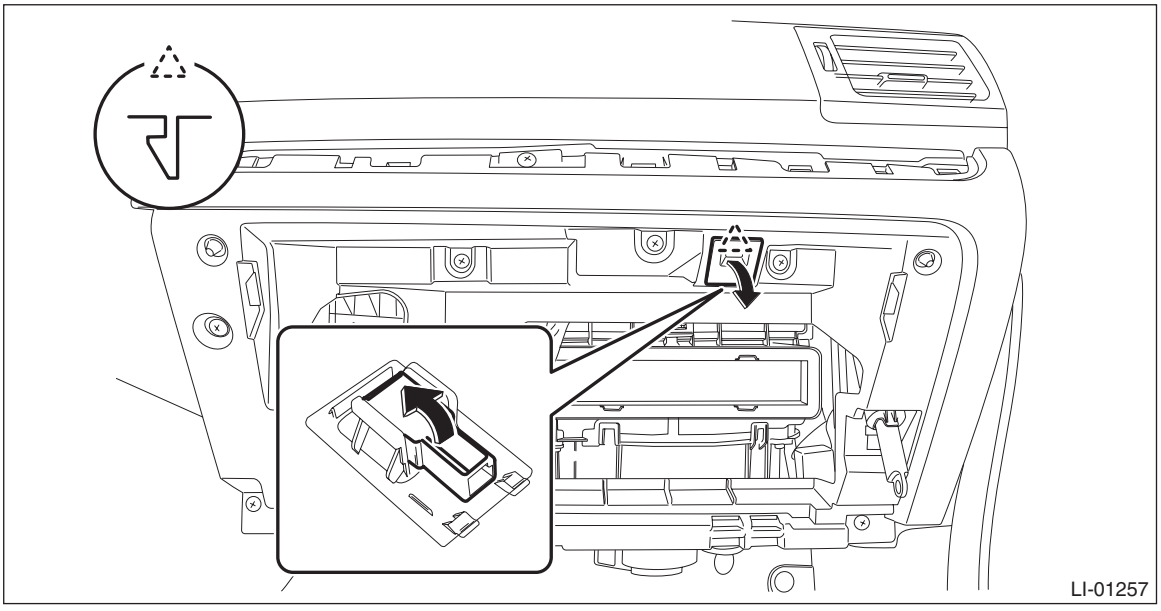
# 35.Glove Box Light

## A: REMOVAL

1) Disconnect the ground cable from battery.
2) Remove the pocket assembly.
   (1) Attach the protective tape (a) to the panel center LWR.
   (2) Remove the damper COMPL - pocket.
   (3) Release the stoppers and remove the pocket assembly by pulling it toward you.



3) Remove the light - pocket.
   (1) Release the claws and remove the light - pocket cover from the back panel - pocket.
   (2) Disconnect the connector and remove the light - pocket from the cover.



## B: INSTALLATION

Install each part in the reverse order of removal.

## C: INSPECTION

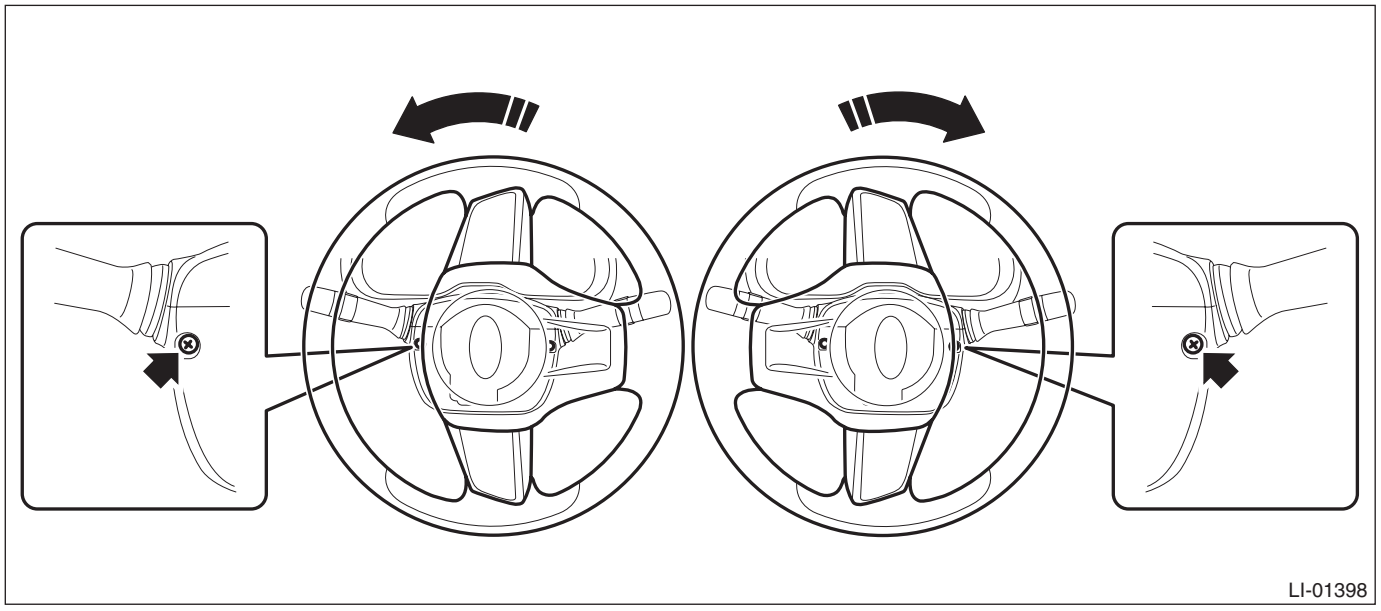
1) Install the light to test if it illuminates normally.
2) If it fails to illuminate normally, replace the light - pocket with a new part.

NOTE:
Since LED (Light Emitting Diode) is used for the light, replace the light - pocket if the LED burns out.

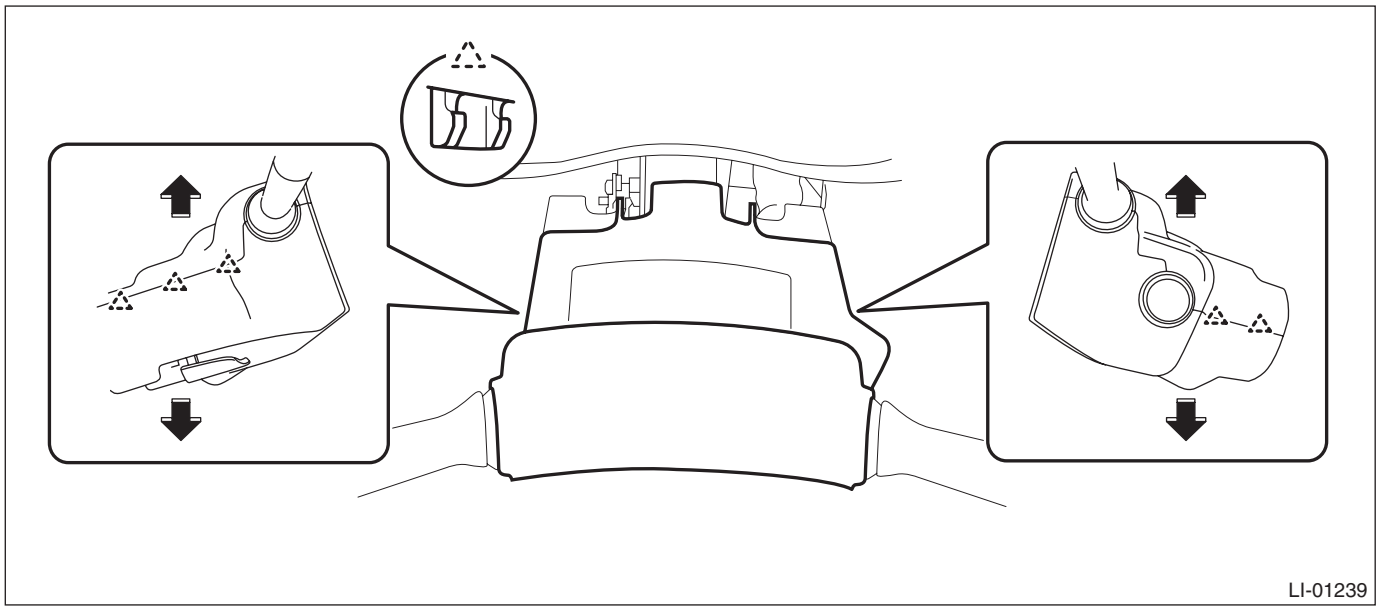
# 36.Ignition Switch Illumination

## A: REMOVAL

NOTE:
The ignition switch illumination is integrated into the immobilizer antenna assembly.
1) Disconnect the ground cable from battery.
2) Remove the cover assembly - column.
(1) Remove the screws by turning the steering wheel to right and left.

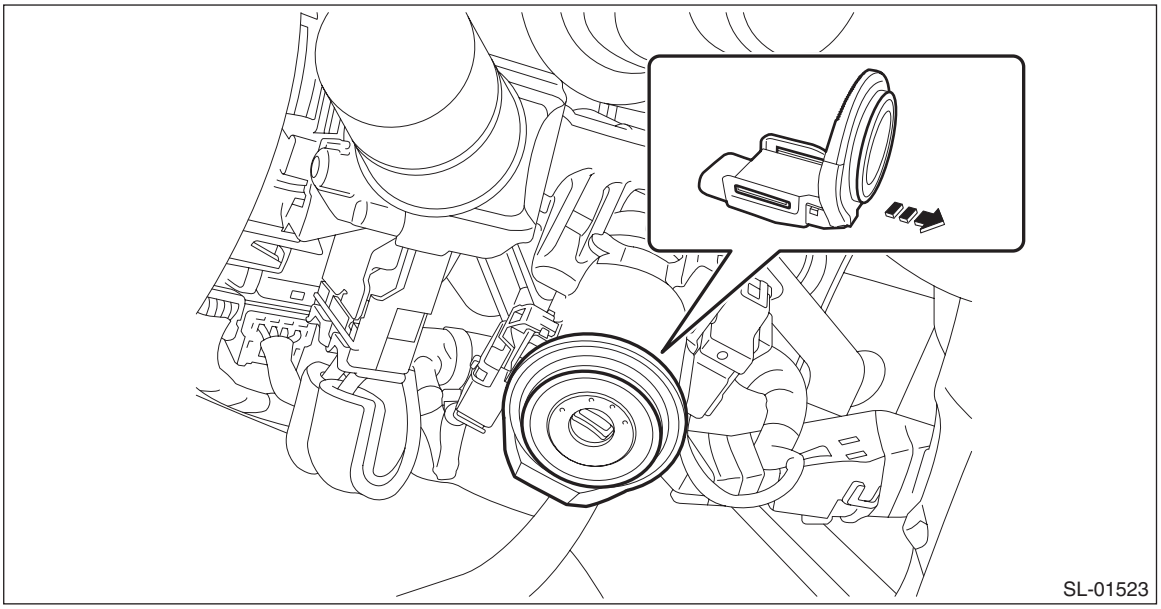


(2) Release the claw, and remove the cover assembly - column UPR and the cover assembly - column LWR.



3) Disconnect the connector and remove the ignition switch illumination.

**CAUTION:**
**Do not apply excessive force to remove the ignition switch illumination lock. Otherwise they may be broken because those parts are the products made of a plastic.**



## B: INSTALLATION

Install each part in the reverse order of removal.

## C: INSPECTION

**On- the vehicle inspection**

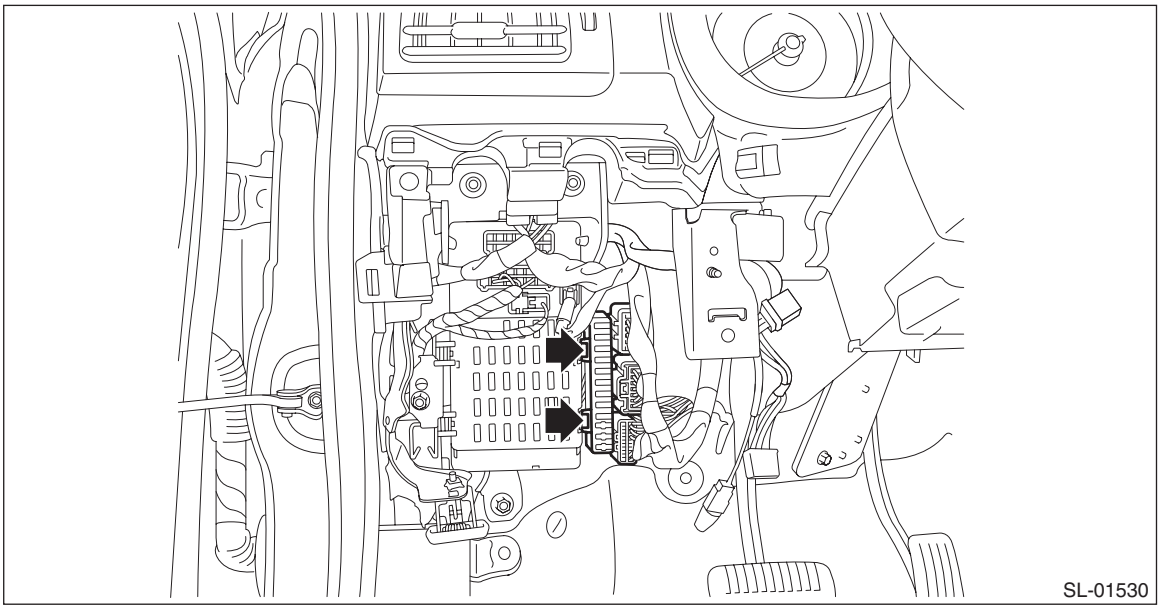
***Preparation tool:***
***Circuit tester***

| Step | | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK THE IGNITION SWITCH ILLUMINATION.**<br>Make sure the ignition switch illumination illuminates when driver's side door is open. | Does the ignition switch illumination illuminate? | Ignition switch illumination is normal. | Go to step **2**. |
| 2 | **CHECK THE IGNITION SWITCH ILLUMINATION.**<br>Make sure the ignition switch illumination blinks when the ignition switch is turned to ON. | Does the ignition switch illumination blink? | Check the function setting of body integrated unit. <Ref. to BC(diag)-2, Basic Diagnostic Procedure.> | Check the ignition switch illumination circuit. <Ref. to SL-26, CHECK IGNITION SWITCH ILLUMINATION, INSPECTION, Keyless Entry System.> |

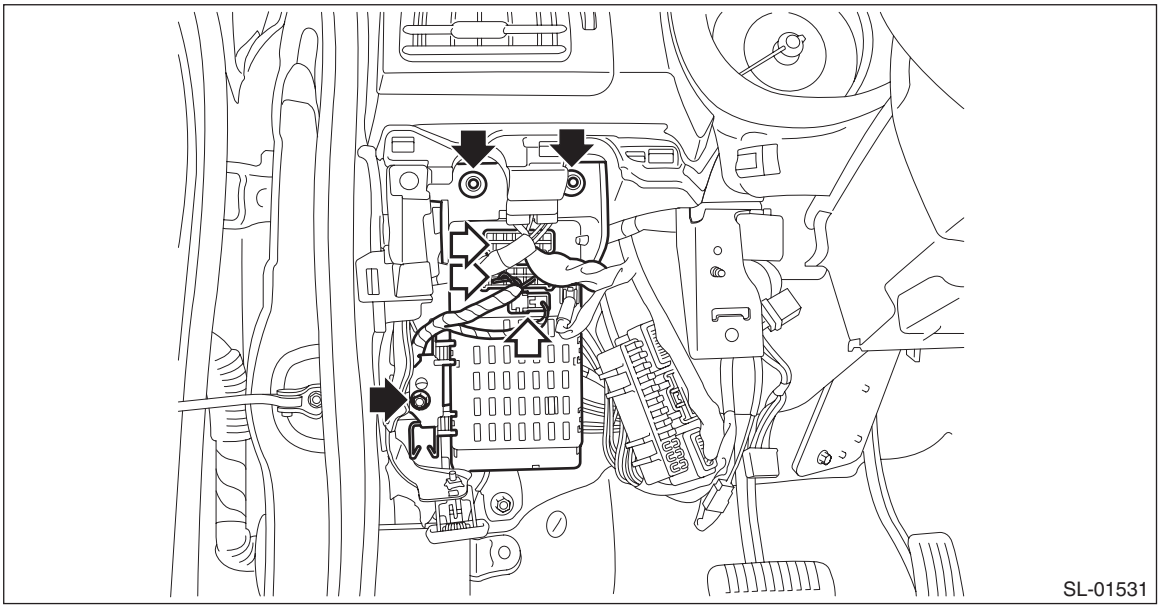
# 37.Auto Headlight Beam Leveler Control Module

## A: REMOVAL

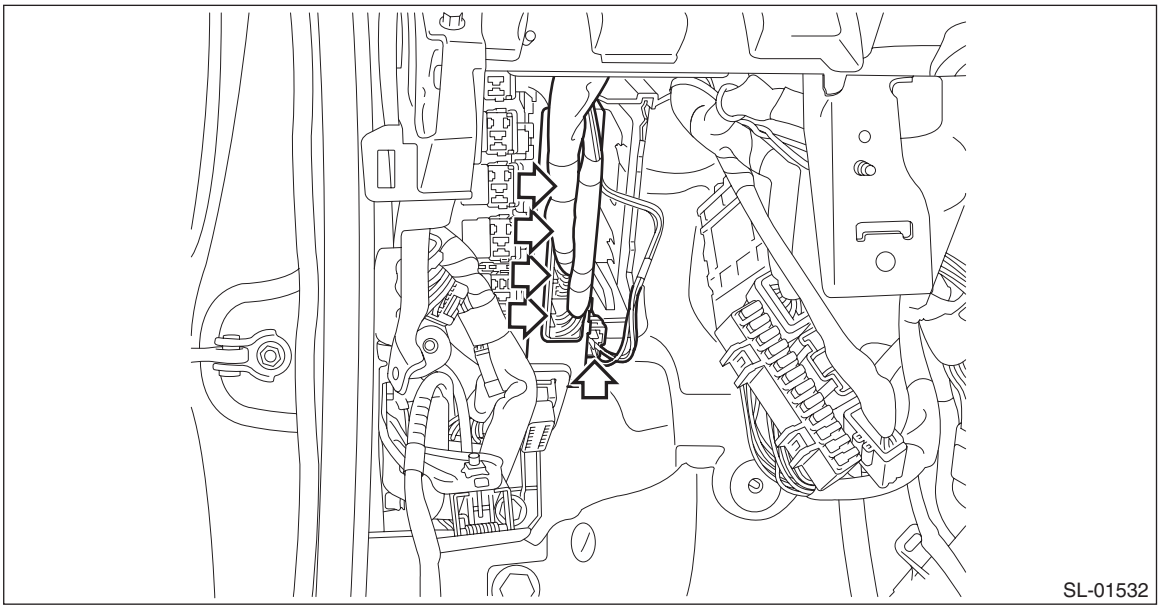
1) Remove the knee airbag module. <Ref. to AB-44, REMOVAL, Knee Airbag Module.>
2) Release the lock and remove the fuse holder.



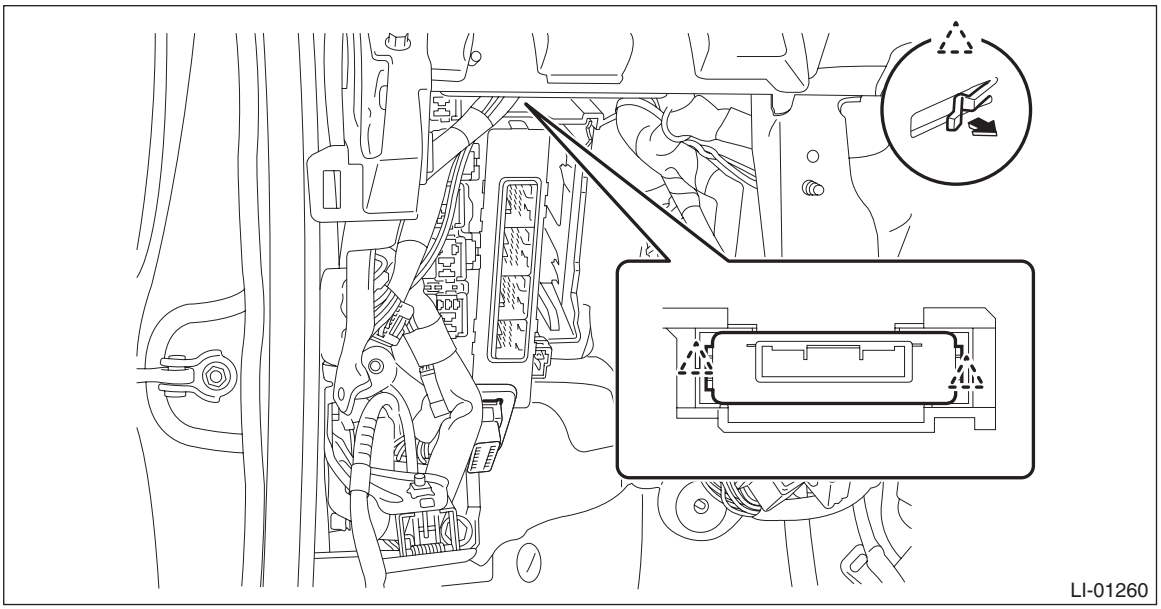
3) Remove the relay & fuse box.
   (1) Disconnect the connector.
   (2) Remove the bolts and nuts, and remove the relay & fuse box.



4) Disconnect the connector of body integrated unit.



5) Remove the auto headlight beam leveler CM.
   (1) Disconnect the connector.
   (2) Release the claws and pull out the auto headlight beam leveler CM.



## B: INSTALLATION

Install each part in the reverse order of removal.

NOTE:
Refer to “INSTALLATION” of “Knee Airbag Module”. <Ref. to AB-46, INSTALLATION, Knee Airbag Module.>

***Tightening torque:***
***Relay & fuse box: 7.5 N·m (0.76 kgf-m, 5.5 ft-lb)***

NOTE:
When the auto headlight beam leveler CM is removed, perform initialization or reinitialization. <Ref. to LI-17, PROCEDURE, Auto Headlight Beam Leveler System.>

# 38.Rear Height Sensor

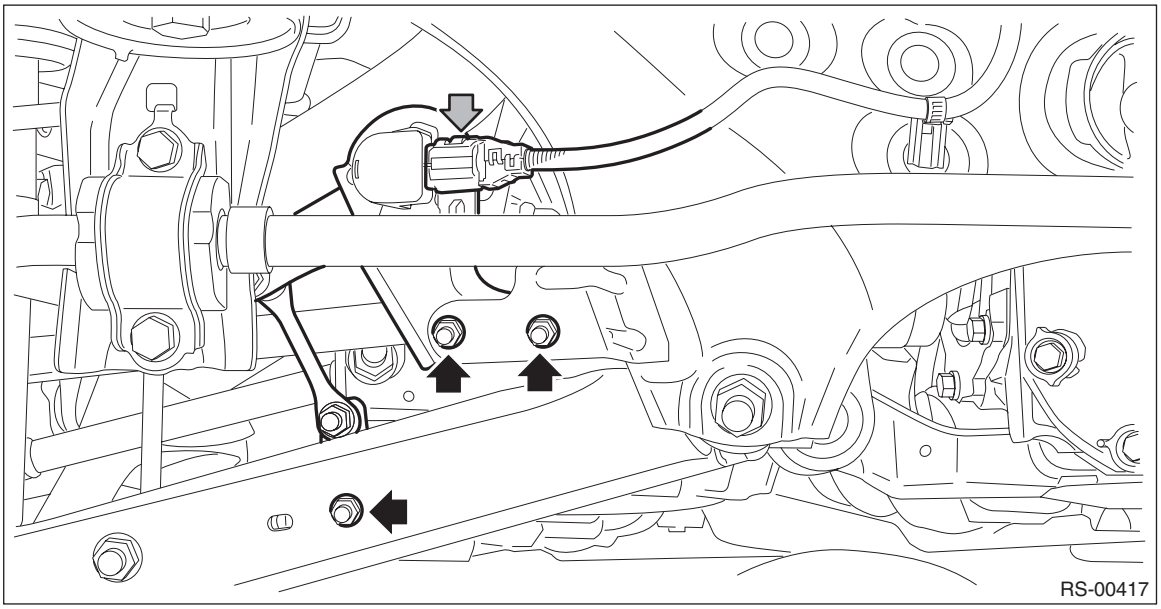
## A: REMOVAL

**CAUTION:**
**Always remove the sensor assembly - headlight beam leveler before removing any parts related to the suspension.**

1) Disconnect the ground cable from battery.
2) Lift up the vehicle body, and remove the left rear wheel.
3) Remove the sensor assembly - headlight beam leveler.

**CAUTION:**
**Do not disassemble the sensor and lever.**

(1) Disconnect the connector.
(2) Remove the nuts, and remove the sensor assembly - headlight beam leveler.



## B: INSTALLATION

1) Install each part in the reverse order of removal.

***Tightening torque:***
***Sensor assembly - headlight beam leveler: 7.5 N·m (0.76 kgf-m, 5.5 ft-lb)***
***Rear wheel: 120 N·m (12.24 kgf-m, 88.5 ft-lb)***

2) Perform reinitialization of the sensor assembly - headlight beam leveler. <Ref. to LI-17, REINITIALIZATION, PROCEDURE, Auto Headlight Beam Leveler System.>

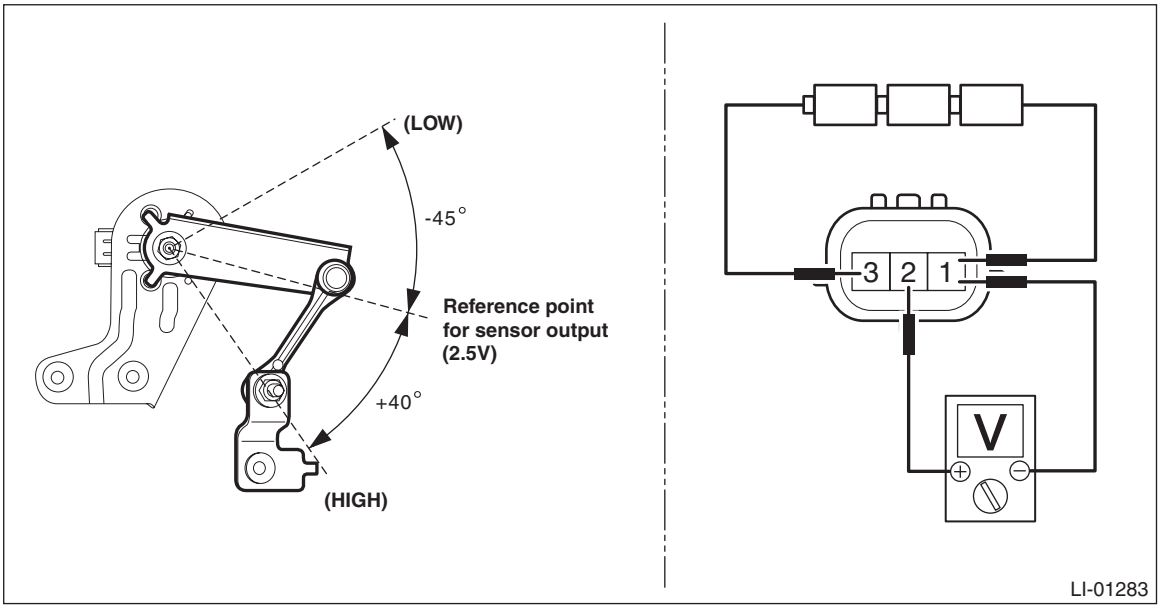
NOTE:
When replacing the sensor assembly - headlight beam leveler with a new part, perform the initialization. <Ref. to LI-17, INITIALIZATION, PROCEDURE, Auto Headlight Beam Leveler System.>

# C: INSPECTION

## UNIT INSPECTION

***Preparation tool:***
***Circuit tester***

1) Connect three dry cell batteries (1.5 V) in series.
2) Connect the (+) side of the battery to terminal No. 3 of the sensor, and the (–) side of the battery to terminal No. 1, and apply a voltage of 4.5 V between terminals No. 3 — No. 1.
3) With voltage applied, check the voltage between terminals when the sensor link is moved slowly up and down.



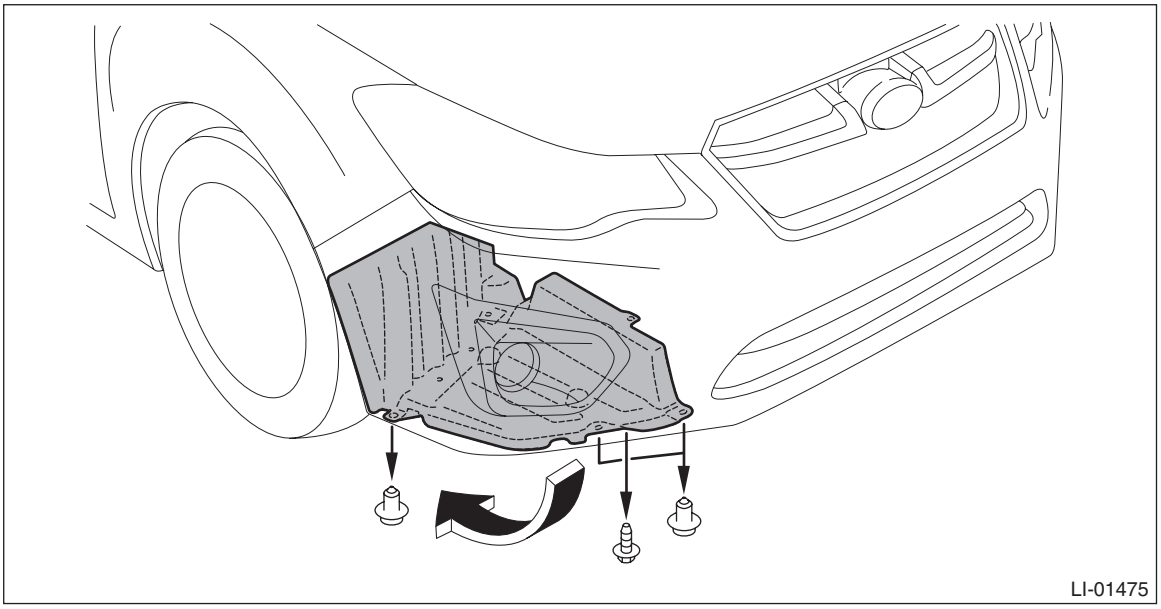
| Terminal No. | Inspection conditions | Standard |
|---|---|---|
| 2 (+) — 1 (–) | Move the link within the operation range. | 0.5 — 4.1 V |

4) Replace the sensor assembly - headlight beam leveler if the inspection result is not within the standard value.

# 39.Day Time Running Resistor

## A: REMOVAL

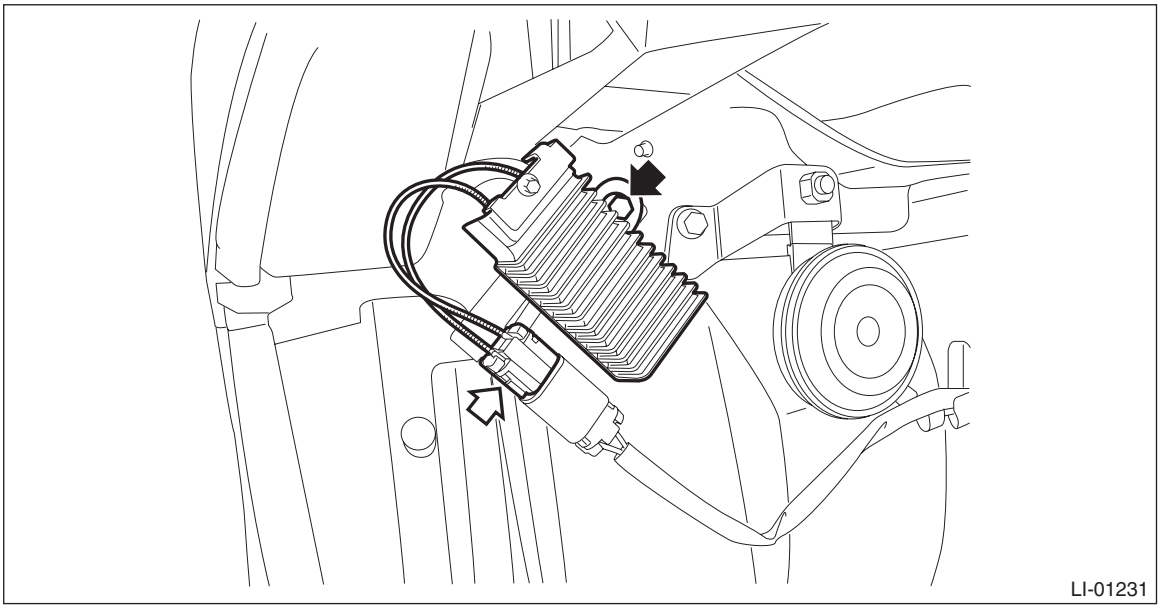
1) Disconnect the ground cable from battery.
2) Lift up the vehicle.
3) Remove the screw and clips, and turn over the front side of the mud guard - front.



4) Remove the resistor assembly - daytime running light.

**CAUTION:**
**The resistor may become hot. Be careful not to burn yourself when removing it.**

(1) Disconnect the connector.
(2) Remove the bolts, then remove the resistor assembly - daytime running light.



## B: INSTALLATION

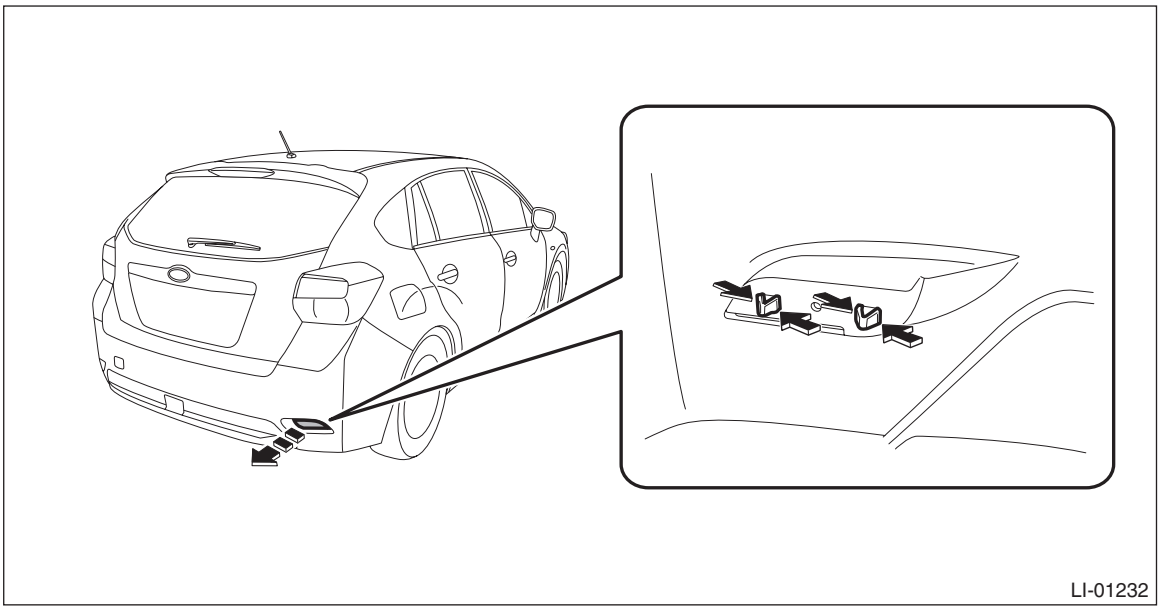
Install each part in the reverse order of removal.

***Tightening torque:***
***Resistor assembly - daytime running light: 7.5 N·m (0.76 kgf-m, 5.5 ft-lb)***

# 40.Reflex Reflector

## A: REMOVAL

From behind the bumper face - rear, release the claws and remove the reflex reflector assembly.



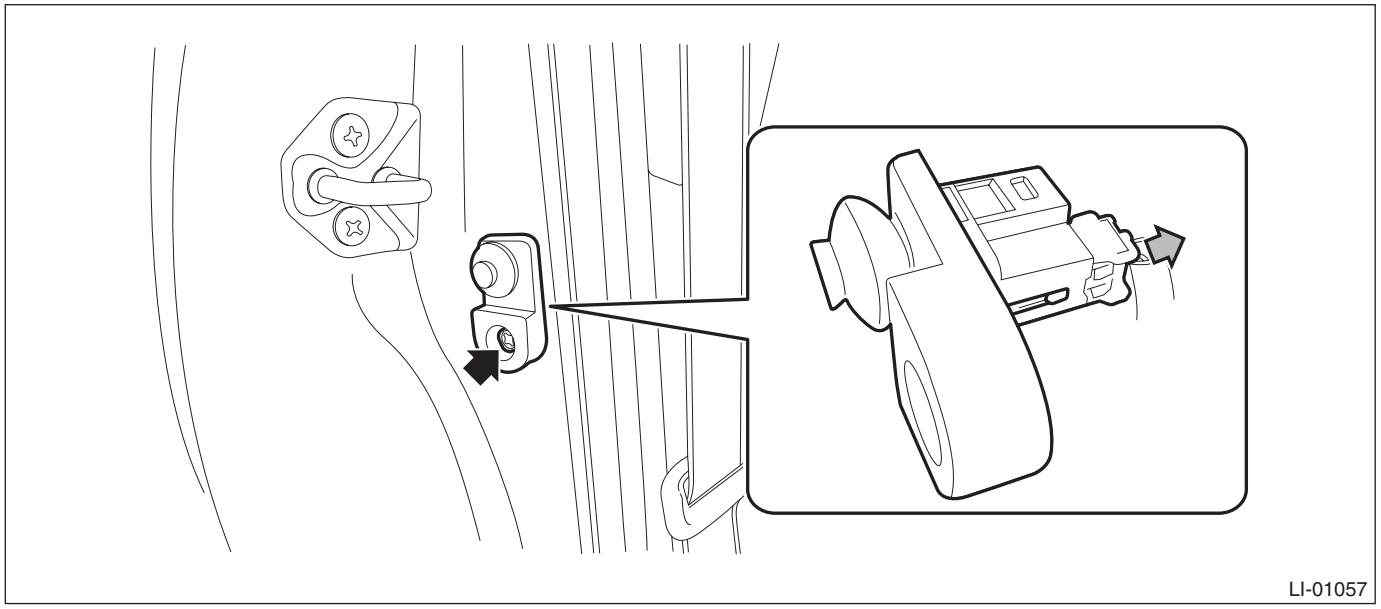
## B: INSTALLATION

Install each part in the reverse order of removal.

# 41.Door Switch

## A: REMOVAL

1) Disconnect the ground cable from battery.
2) Remove the switch assembly - door.
   (1) Remove the screws, and pull out the switch assembly - door toward you.
   (2) Disconnect the connector and remove the switch assembly - door.



## B: INSTALLATION

Install each part in the reverse order of removal.

## C: INSPECTION

**Unit inspection**

***Preparation tool:***
***Circuit tester***

1) Check the resistance between switch terminals.

| Terminal No. | Inspection conditions | Standard | Connection diagram |
|---|---|---|---|
| 1 — 3 | When door is opened | Less than 1 Ω |   LI-01327 |
| | When door is closed | 1 MΩ or more | |

2) Replace the switch assembly - door if the inspection result is not within the standard value.

# AUTO HEADLIGHT BEAM LEVELER SYSTEM (DIAGNOSTICS)

# AL(diag)

| | | Page |
|---|---|---|
| 1. | Basic Diagnostic Procedure | 2 |
| 2. | Check List for Interview | 3 |
| 3. | General Description | 4 |
| 4. | Electrical Component Location | 5 |

# 3. General Description

## A: CAUTION

### 1. AIRBAG SYSTEM

**CAUTION:**
**• Do not use the electrical test equipment on the airbag system wiring harnesses and connector circuits.**
**• Be careful not to damage the airbag system wiring harness.**

## B: INSPECTION

### 1. BASIC INSPECTION

Before performing the diagnosis, check the following items which may cause problems relating the wiper or light.
1) Check the battery.
2) Check the relay and fuse condition. <Ref. to LI-4, Relay and Fuse.>
3) Check the connecting condition of harness and harness connector.

### 2. FUNCTION CHECK

With the ignition switch ON and the lighting switch set at 2 (HEAD), change the vehicle posture while the vehicle is stopped. Check that the beam moves, when the vehicle condition is kept for three seconds or more.

## C: PREPARATION TOOL

### 1. SPECIAL TOOL

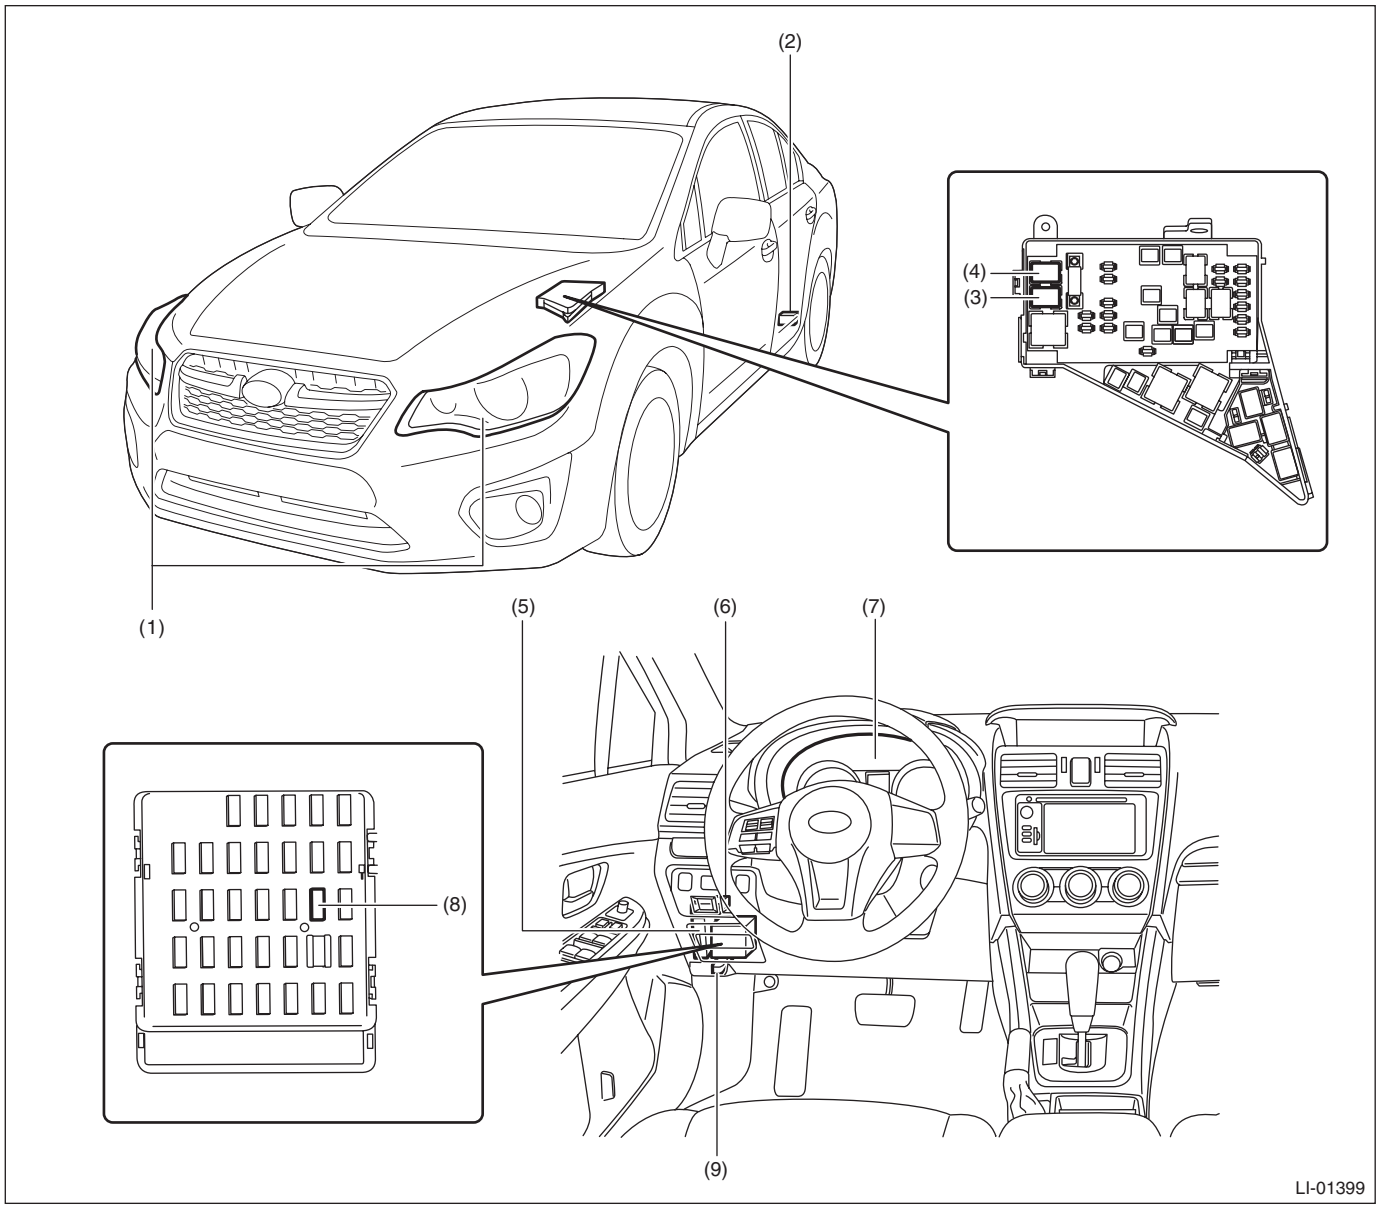
| ILLUSTRATION | TOOL NUMBER | DESCRIPTION | REMARKS |
|---|---|---|---|
|  ST1B022XU0 | 1B022XU0 | SUBARU SELECT MONITOR III KIT | Used for troubleshooting the electrical system. |

### 2. GENERAL TOOL

| TOOL NAME | REMARKS |
|---|---|
| Circuit tester | Used for measuring resistance, voltage and current. |

# 4. Electrical Component Location

## A: LOCATION

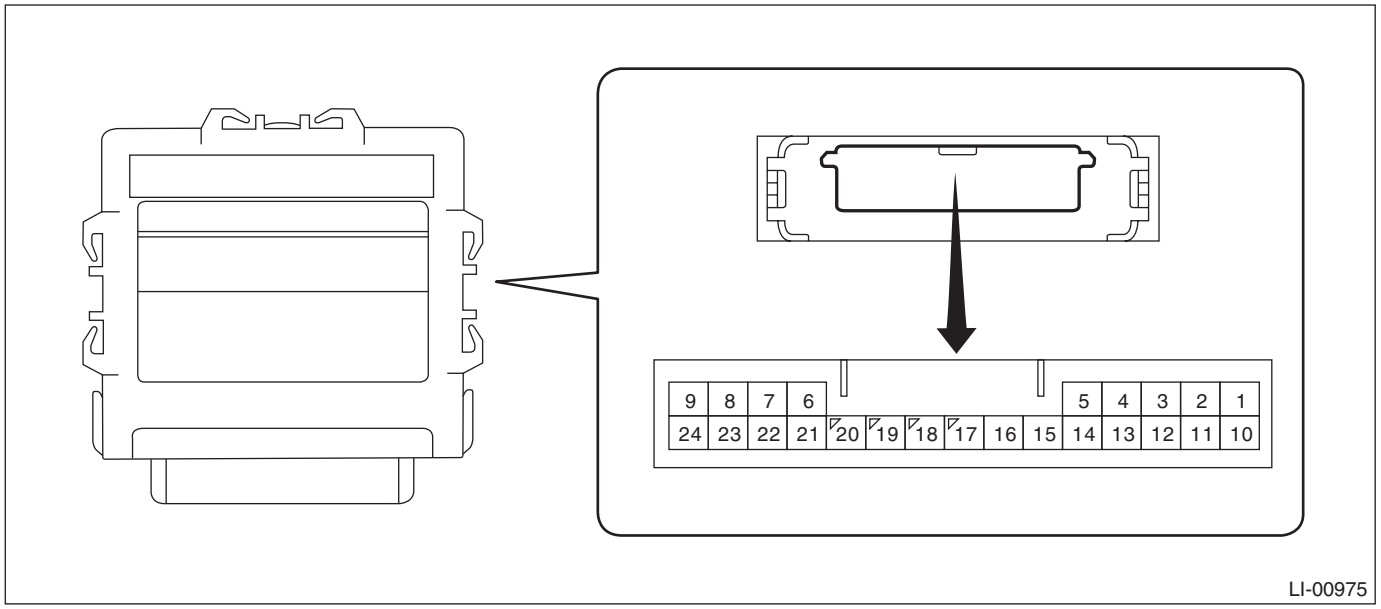


| | | | | | |
|---|---|---|---|---|---|
| (1) | Headlight ASSY<br>– Headlight beam leveler actuator | (4) | Headlight relay (Hi) | (7) | Combination meter |
| (2) | Rear vehicle height sensor | (5) | Body integrated unit | (8) | Fuse 10 A (auto headlight beam leveler CM) |
| (3) | Headlight relay (Lo) | (6) | Auto headlight beam leveler CM | (9) | Data link connector |

# 5. Control Module I/O Signal

## A: ELECTRICAL SPECIFICATION

### 1. AUTO HEADLIGHT BEAM LEVELER CM



| Terminal No. (terminal symbol) | Item | Measuring condition | Standard |
|---|---|---|---|
| 1 (IG) ←→ Chassis ground | Voltage | Ignition switch ON | 8 — 16 V |
| 2 (E1) ←→ Chassis ground | Resistance | Always | Less than 1 Ω |
| 3 (SGR) ←→ Chassis ground | Resistance | Always | Less than 1 Ω |
| 6 (WNG) ←→ Chassis ground | Voltage | After turning the ignition switch to ON, for 3 seconds (warning light on) → after 3 seconds (warning light off) | Less than 1.35 V → 8 — 16 V |
| 10 (LH1) ←→ Chassis ground | Voltage | Ignition switch ON | 10 — 16 V |
| 11 (LH3) ←→ Chassis ground | Resistance | Always | Less than 1 Ω |
| 12 (SBR) ←→ 3 (SGR) | Voltage | Ignition switch ON | 4.75 — 5.25 V |
| 17 (LH2) ←→ Chassis ground | Voltage | Headlight off → on | Less than 1 V → 1.0 — 14.4 V (for 17 seconds) |
| | | Headlight on, no vehicle height change → change and hold vehicle height for 3 seconds or more | |
| 19 (SHR) ←→ Chassis ground | Voltage | IG ON (with no passenger, no load and vehicle stopped) | Approx. 2.5 V (changes according to vehicle condition) |
| 23 (CAN-H) ←→ Chassis ground | — | Cannot be measured (CAN communication line) | — |
| 24 (CAN-L) ←→ Chassis ground | — | Cannot be measured (CAN communication line) | — |

## B: WIRING DIAGRAM

Refer to “Headlight Beam Leveler System” in the wiring diagram. <Ref. to WI-93, WIRING DIAGRAM, Headlight Beam Leveler System.>

# 6. Subaru Select Monitor

## A: OPERATION

- For operation procedures, refer to the “PC application help for Subaru Select Monitor”.
- If the auto headlight beam leveler CM can not communicate with Subaru Select Monitor, perform “COMMUNICATION FOR INITIALIZING IMPOSSIBLE”. <Ref. to AL(diag)-8, INSPECTION, Subaru Select Monitor.>

# B: INSPECTION

## 1. COMMUNICATION FOR INITIALIZING IMPOSSIBLE

Communication error with auto headlight beam leveler CM

**DETECTING CONDITION:**

- Defective harness connector
- Power supply circuit malfunction
- Defective auto headlight beam leveler CM
- Defective CAN communication circuit
- Defective Subaru Select Monitor

**TROUBLE SYMPTOM:**

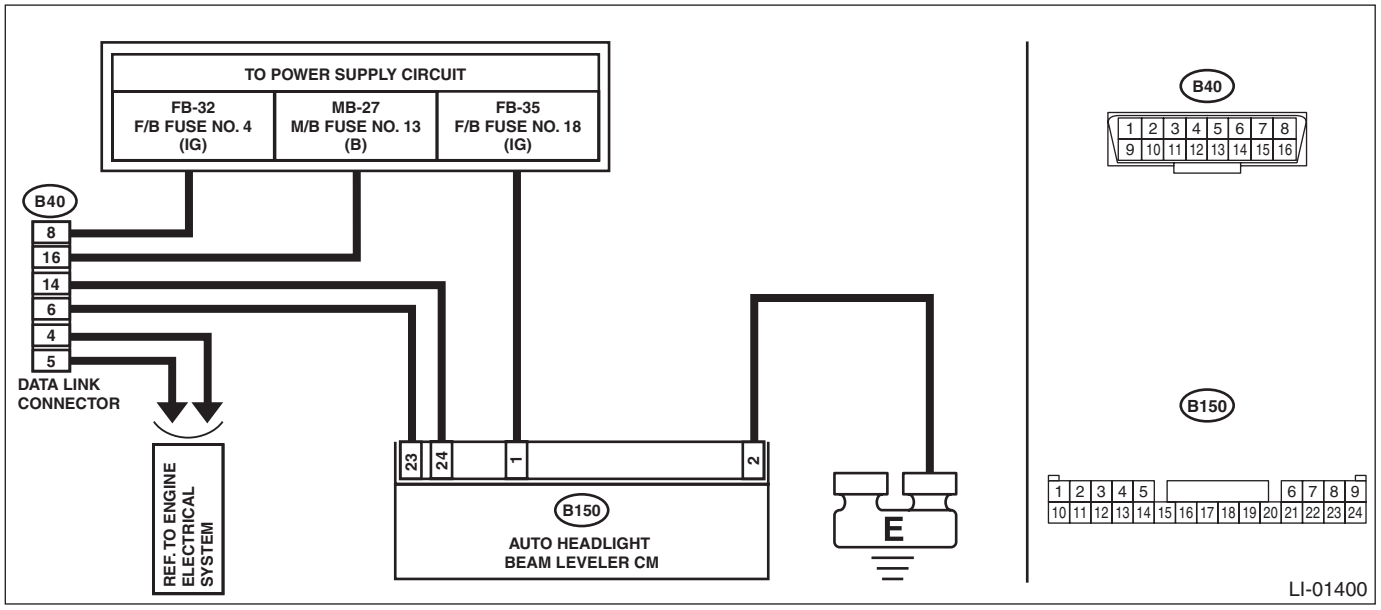
Communication is impossible between auto headlight beam leveler CM and Subaru Select Monitor.

**CAUTION:**

**Initialization is required after replacing the auto headlight beam leveler CM.**

**WIRING DIAGRAM:**

Headlight Beam Leveler System <Ref. to WI-93, WIRING DIAGRAM, Headlight Beam Leveler System.>



| Step | | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK OTHER COMMUNICATION.**<br>Communicate with the system other than the auto headlight beam leveler CM using the Subaru Select Monitor. | Is the communication to other control module possible? | Go to step **2**. | Perform the "Communication for Initializing Impossible" of LAN system. <Ref. to LAN(diag)-9, COMMUNICATION FOR INITIALIZING IMPOSSIBLE, Subaru Select Monitor.> |
| 2 | **CHECK LAN SYSTEM.**<br>Inspect LAN system. <Ref. to LAN(diag)-2, PROCEDURE, Basic Diagnostic Procedure.> | Is there any fault? | Perform the inspection according to the diagnosis for LAN system. | Go to step **3**. |

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 3 | **CHECK FOR POOR CONTACT.**<br>1) Turn the ignition switch to OFF.<br>2) Disconnect the auto headlight beam leveler CM connector.<br>3) Connect the disconnected connectors.<br>4) Communicate with the auto headlight beam leveler CM using the Subaru Select Monitor. | Is communication possible? | It is possible that temporary poor communication occurs. | Replace the auto headlight beam leveler CM. <Ref. to LI-89, Auto Headlight Beam Leveler Control Module.> |

# 7. Read Diagnostic Trouble Code (DTC)

## A: OPERATION

- For operation procedures, refer to the “PC application help for Subaru Select Monitor”.
- For details concerning DTC, refer to the List of Diagnostic Trouble Codes (DTC). <Ref. to AL(diag)-13, LIST, List of Diagnostic Trouble Code (DTC).>

# 8. Clear Memory Mode

## A: OPERATION

For operation procedures, refer to the “PC application help for Subaru Select Monitor”.

# 9. Read Current Data

## A: OPERATION

For detailed operation procedures, refer to “PC application help for Subaru Select Monitor”.

## B: LIST

| Item Name | Remarks | Standard | Note |
|---|---|---|---|
| Trip Count | Information of timestamp, trip counter | — | — |
| Count | Information of timestamp, original counter identification information | — | — |
| Time Count | Information of timestamp, time counter | — | — |
| F Sensor Signal | Output voltage value from front vehicle height sensor<br>Display range: 0.00 — 5.00 V | 5V | Fixed at 5 V because front vehicle height sensor is not equipped. |
| R Sensor Signal | Output voltage value from rear vehicle height sensor<br>Display range: 0.00 — 5.00 V | Approx. 2.5 V | Changes according to vehicle condition. |
| Actuator Signal | Power supply voltage value to headlight beam leveler actuator<br>Display range: 0% — 100% | Not in operation: 0%<br>In operation: 10 — 90% (17 Sec) | Changes according to vehicle condition. |
| ECU ACC | IG voltage condition of auto headlight beam leveler CM<br>Display range: 0.00 — 25.76 V | 8 — 16 V | — |
| Indicator Signal | Meter indicator condition<br>Display range: Light off/Light up/Flashing | Light off: Normal<br>Light up: Abnormal<br>Flashing: Not initialized | — |
| Vehicle speed signal | Vehicle speed condition<br>Display range: 0.00 — 3686.34 km/h | Shows vehicle speed | — |
| H/L Lo Signal | Headlight lighting condition<br>Display range: Light off/Light up | Light off: Light switch is OFF<br>Light up: Light sensor in operation when light switch is in HEAD or AUTO position | — |

NOTE:
For detailed operation procedures, refer to “PC application help for Subaru Select Monitor”.

# 10.List of Diagnostic Trouble Code (DTC)

## A: LIST

| DTC | Item | Content of diagnosis | Reference |
|---|---|---|---|
| U0073 | Control Module Communication Bus “A” Off | Detected when CAN line abnormality is detected. | <Ref. to AL(diag)-14, DTC U0073 CONTROL MODULE COMMUNICATION BUS “A” OFF, Diagnostic Procedure with Diagnostic Trouble Code (DTC).> |
| U0122 | Lost Communication With Vehicle Dynamics Control Module | Detected when CAN data from VDC (vehicle speed signal) does not arrive. | <Ref. to AL(diag)-14, DTC U0122 LOST COMMUNICATION WITH VEHICLE DYNAMICS CONTROL MODULE, Diagnostic Procedure with Diagnostic Trouble Code (DTC).> |
| U0140 | Lost Communication With Body Control Module | Detected when CAN data from body integrated unit (headlight ON signal) does not arrive. | <Ref. to AL(diag)-14, DTC U0140 LOST COMMUNICATION WITH BODY CONTROL MODULE, Diagnostic Procedure with Diagnostic Trouble Code (DTC).> |
| B2900 | AHLCU Error | Detected when an error occurred in auto headlight beam leveler CM. | <Ref. to AL(diag)-15, DTC B2900 AHLCU ERROR, Diagnostic Procedure with Diagnostic Trouble Code (DTC).> |
| B2902 | Rear Height Sensor Error | Detected when an error occurred in rear vehicle height sensor. | <Ref. to AL(diag)-16, DTC B2902 REAR HEIGHT SENSOR ERROR, Diagnostic Procedure with Diagnostic Trouble Code (DTC).> |
| B2903 | VDC Data Error | Detected when data from VDC (vehicle speed signal) is abnormal. | <Ref. to AL(diag)-17, DTC B2903 VDC DATA ERROR, Diagnostic Procedure with Diagnostic Trouble Code (DTC).> |

# 11.Diagnostic Procedure with Diagnostic Trouble Code (DTC)

## A: DTC U0073 CONTROL MODULE COMMUNICATION BUS “A” OFF

Detected when CAN line abnormality is detected.

NOTE:
Perform the diagnosis for LAN system. <Ref. to LAN(diag)-2, PROCEDURE, Basic Diagnostic Procedure.>

## B: DTC U0122 LOST COMMUNICATION WITH VEHICLE DYNAMICS CONTROL MODULE

Detected when CAN data (vehicle speed signal) is not received from VDC.

NOTE:
Perform the diagnosis for LAN system. <Ref. to LAN(diag)-2, PROCEDURE, Basic Diagnostic Procedure.>

## C: DTC U0140 LOST COMMUNICATION WITH BODY CONTROL MODULE

Detected when CAN data (headlights ON signal) is not received from the body integrated unit.

NOTE:
Perform the diagnosis for LAN system. <Ref. to LAN(diag)-2, PROCEDURE, Basic Diagnostic Procedure.>

## D: DTC B2900 AHLCU ERROR

**DTC DETECTING CONDITION:**
Detected when internal malfunction occurs in the auto headlight beam leveler CM.
**TROUBLE SYMPTOM:**
The auto headlight beam leveler does not operate.

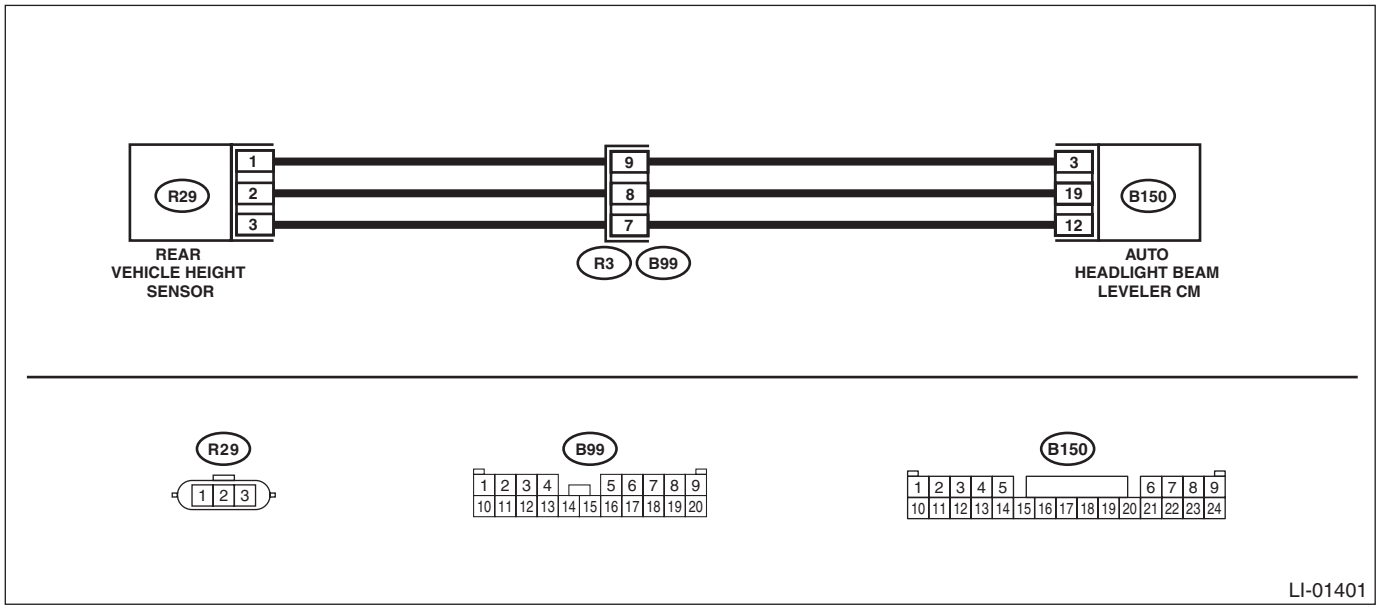
**CAUTION:**
**Initialization is required after replacing the auto headlight beam leveler CM.**

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK DTC.**<br>1) Turn the ignition switch to OFF.<br>2) Using the Subaru Select Monitor, clear the auto headlight beam leveler system memory.<br>3) Turn the ignition switch to OFF → ON.<br>4) Use the Subaru Select Monitor and read DTCs. | Is DTC B2900 displayed? (Current malfunction) | Replace the auto headlight beam leveler CM. <Ref. to LI-89, Auto Headlight Beam Leveler Control Module.> | System is normal. It is possible that temporary poor contact occurs. |

## E: DTC B2902 REAR HEIGHT SENSOR ERROR

**DTC DETECTING CONDITION:**
Detected when error occurs in the rear height sensor.
**TROUBLE SYMPTOM:**
The auto headlight beam leveler does not operate.

**CAUTION:**
**Initialization is required after replacing the auto headlight beam leveler CM.**
**WIRING DIAGRAM:**
Headlight Beam Leveler System <Ref. to WI-93, WIRING DIAGRAM, Headlight Beam Leveler System.>



| Step | | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK DTC.**<br>1) Turn the ignition switch to OFF.<br>2) Using the Subaru Select Monitor, clear the auto headlight beam leveler system memory.<br>3) Turn the ignition switch to OFF → ON.<br>4) Use the Subaru Select Monitor and read DTCs. | Is DTC B2902 displayed? (Current malfunction) | Go to step **2**. | System is normal. It is possible that temporary poor contact occurs. |
| 2 | **CHECK CURRENT DATA.**<br>Display {R Sensor Signal} using Subaru Select Monitor. | Does the data indicate the standard value? | Replace the auto headlight beam leveler CM. <Ref. to LI-89, Auto Headlight Beam Leveler Control Module.> | Go to step **3**. |
| 3 | **CHECK CURRENT DATA.**<br>1) Display {R Sensor Signal} using Subaru Select Monitor.<br>2) Change the vehicle posture. | Does the data change? | Go to step **6**. | Go to step **4**. |
| 4 | **CHECK OUTPUT VOLTAGE BETWEEN AUTO HEADLIGHT BEAM LEVELER CM AND VEHICLE HEIGHT SENSOR.**<br>1) Disconnect the vehicle height sensor connector.<br>2) Turn the ignition switch to ON.<br>3) Measure the voltage between the vehicle height sensor connector and chassis ground.<br>***Connector & terminal***<br>***(R29) No. 3 (+) — Chassis ground (–):*** | Is the voltage 5±0.25 V? | Go to step **5**. | Replace the auto headlight beam leveler CM. <Ref. to LI-89, Auto Headlight Beam Leveler Control Module.> |

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 5 | **CHECK REAR HEIGHT SENSOR.**<br>1) Remove the rear vehicle height sensor.<br>2) Perform the inspection of rear height sensor unit. <Ref. to LI-92, INSPECTION, Rear Height Sensor.> | Is the rear height sensor normal? | Go to step **6**. | Replace the rear height sensor. <Ref. to LI-91, Rear Height Sensor.> |
| 6 | **CHECK HARNESS.**<br>1) Disconnect the auto headlight beam leveler CM connector.<br>2) Using a tester, measure the resistance between the auto headlight beam leveler CM connector and rear height sensor connector.<br>***Connector & terminal***<br>***(B150) No. 3 — (R29) No. 1:***<br>***(B150) No. 19 — (R29) No. 2:***<br>***(B150) No. 12 — (R29) No. 3:*** | Is there continuity? | Go to step **7**. | Repair or replace the open circuit of harness. |
| 7 | **CHECK HARNESS.**<br>Using a tester, measure the resistance between the auto headlight beam leveler CM connector and chassis ground.<br>***Connector & terminal***<br>***(B150) No. 3 — Chassis ground:***<br>***(B150) No. 19 — Chassis ground:***<br>***(B150) No. 12 — Chassis ground:*** | Is the resistance 10 kΩ or more? | Replace the auto headlight beam leveler CM. <Ref. to LI-89, Auto Headlight Beam Leveler Control Module.> | Repair or replace the short circuit of the harness. |

## F: DTC B2903 VDC DATA ERROR

**DTC DETECTING CONDITION:**

Detected when data (vehicle speed signal) from VDC CM is abnormal.

**TROUBLE SYMPTOM:**

The auto headlight beam leveler does not operate.

NOTE:

Perform the diagnosis for VDC. <Ref. to VDC(diag)-2, PROCEDURE, Basic Diagnostic Procedure.>

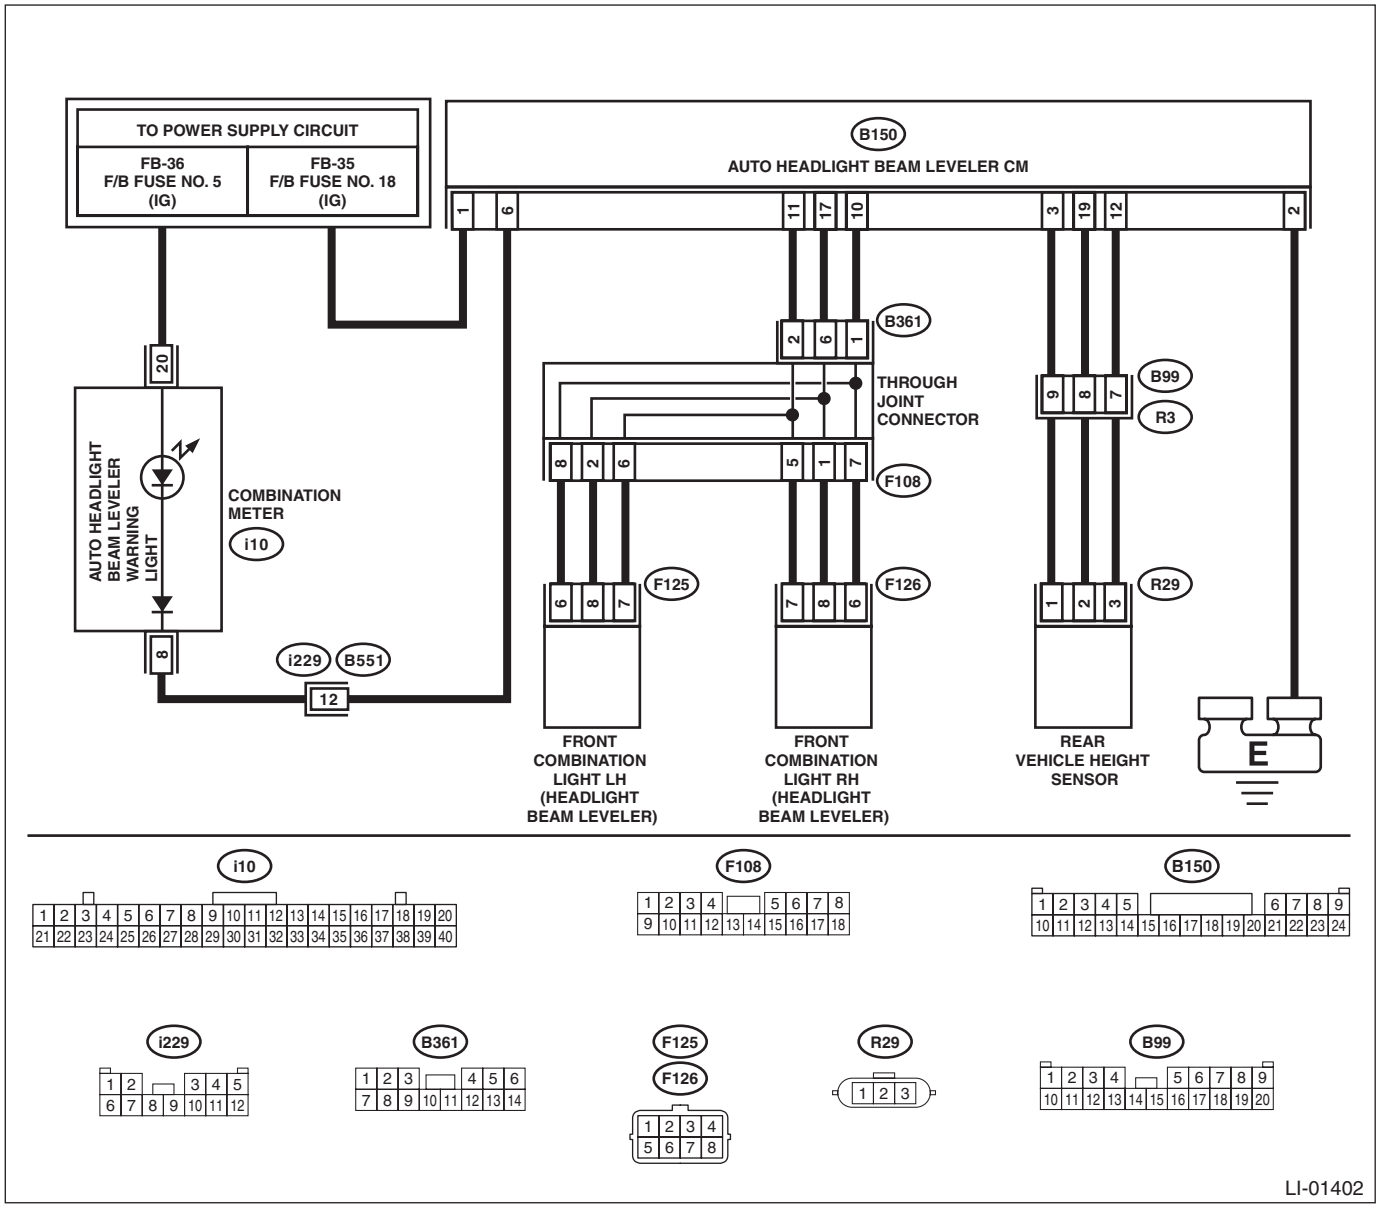
# 12.Diagnostics with Phenomenon

## A: INSPECTION

### 1. BEAM LEVEL CONTROL DOES NOT FUNCTION

**CAUTION:**
- **Before performing diagnosis, check the fuse in this circuit.**
- **Initialization is required after replacing the auto headlight beam leveler CM.**

**WIRING DIAGRAM:**
Headlight Beam Leveler System <Ref. to WI-93, WIRING DIAGRAM, Headlight Beam Leveler System.>



| | Step | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK CURRENT DATA.**<br>Display {ECU ACC} using Subaru Select Monitor. | Does the current data indicate the standard value? | Go to step **3**. | Go to step **2**. |
| 2 | **CHECK HARNESS BETWEEN POWER SUPPLY — AUTO HEADLIGHT BEAM LEVELER CM.**<br>1) Disconnect the auto headlight beam leveler CM connector.<br>2) Turn the ignition switch to ON.<br>3) Measure the voltage between the auto headlight beam leveler CM connector and chassis ground.<br>***Connector & terminal***<br>***(B150) No. 1 (+) — Chassis ground (–):*** | Is the voltage 8 — 16 V? | Replace the auto headlight beam leveler CM. <Ref. to LI-89, Auto Headlight Beam Leveler Control Module.> | Repair or replace the harness. |
| 3 | **CHECK INDICATOR OUTPUT.**<br>Turn the ignition switch to ON. | Does the warning indicator turn on for three seconds? | Go to step **5**. | Go to step **4**. |
| 4 | **CHECK CURRENT DATA.**<br>1) Display {Indicator Signal} using Subaru Select Monitor.<br>2) Turn the ignition switch to ON. | Is it set as ON for 3 seconds? | Go to step **6**. | Replace the auto headlight beam leveler CM. <Ref. to LI-89, Auto Headlight Beam Leveler Control Module.> |
| 5 | **CHECK INDICATOR OUTPUT.**<br>Leave the ignition switch to ON for 10 seconds. | Does the warning indicator light go off? | Go to step **9**. | Go to step **13**. |
| 6 | **CHECK HARNESS BETWEEN BATTERY — INDICATOR BULB — AUTO HEADLIGHT BEAM LEVELER CM.**<br>1) Disconnect the auto headlight beam leveler CM connector.<br>2) Turn the ignition switch to ON.<br>3) Measure the voltage between the auto headlight beam leveler CM (indicator bulb) connector and chassis ground.<br>***Connector & terminal***<br>***(B150) No. 6 (+) — Chassis ground (–):*** | Is the voltage 12 V? | Replace the auto headlight beam leveler CM. <Ref. to LI-89, Auto Headlight Beam Leveler Control Module.> | Go to step **7**. |
| 7 | **CHECK INDICATOR BULB.**<br>1) Disconnect the combination meter connector.<br>2) Measure the continuity between combination meter terminals.<br>***Connector & terminal***<br>***(i10) No. 20 — (i10) No. 8:*** | Is there continuity? | Go to step **8**. | Replace the meter case assembly. <Ref. to IDI-17, Combination Meter.> |
| 8 | **CHECK HARNESS BETWEEN AUTO HEADLIGHT BEAM LEVELER CM AND INDICATOR BULB.**<br>1) Turn the ignition switch to OFF.<br>2) Measure the continuity between the auto headlight beam leveler CM and the combination meter.<br>***Connector & terminal***<br>***(B150) No. 6 — (i10) No. 8:*** | Is there continuity? | Replace the auto headlight beam leveler CM. <Ref. to LI-89, Auto Headlight Beam Leveler Control Module.> | Repair the open circuit and poor contact of the connector in the harness between the auto headlight beam leveler CM and indicator. |

| Step | | Check | Yes | No |
|---|---|---|---|---|
| 9 | **CHECK HEADLIGHT ASSEMBLY (ACTUATOR) DRIVE.**<br>1) Connect the auto headlight beam leveler CM connector.<br>2) Turn the ignition switch to ON, and within 10 seconds, repeat the OFF → 2 (HEAD) operation of headlight switch 5 times.<br>3) Check that the headlight beam drops once, then returns to normal.<br>4) Then, after waiting for 30 seconds or more with the ignition ON, turn the ignition switch to OFF. | Does the headlight beam drop down once, and then return? | Replace the auto headlight beam leveler CM. <Ref. to LI-89, Auto Headlight Beam Leveler Control Module.> | Go to step **10**. |
| 10 | **CHECK HEADLIGHT ASSEMBLY (ACTUATOR) OUTPUT.**<br>1) Display {Actuator Signal} using Subaru Select Monitor.<br>2) Turn the ignition switch to ON, and within 10 seconds, repeat the OFF → 2 (HEAD) operation of headlight switch 5 times.<br>3) Check that the headlight beam drops once, then returns to normal.<br>4) Then, after waiting for 30 seconds or more with the ignition ON, turn the ignition switch to OFF. | Does the current data indicate the standard value? (Does the value change at 10 — 90 %?) | Go to step **11**. | Replace the auto headlight beam leveler CM. <Ref. to LI-89, Auto Headlight Beam Leveler Control Module.> |
| 11 | **CHECK OUTPUT VOLTAGE BETWEEN HEADLIGHT ASSEMBLY (ACTUATOR).**<br>1) Disconnect the auto headlight beam leveler CM connector.<br>2) Turn the ignition switch to ON.<br>3) Measure the voltage between the auto headlight beam leveler CM connector and chassis ground.<br>***Connector & terminal***<br>***(B150) No. 10 (+) — Chassis ground (–):*** | Is the voltage 12 V? | Replace the headlight assembly. <Ref. to LI-27, Headlight Assembly.> | Go to step **12**. |
| 12 | **CHECK HARNESS BETWEEN AUTO HEADLIGHT BEAM LEVELER CM AND HEADLIGHT ASSEMBLY (ACTUATOR).**<br>1) Disconnect the connector of headlight assembly.<br>2) Measure the continuity between the auto headlight beam leveler CM connector and headlight assembly (actuator) connector.<br>***Connector & terminal***<br>***• Headlight beam leveler RH***<br>***(B150) No. 10 — (F126) No. 6:***<br>***(B150) No. 17 — (F126) No. 8:***<br>***(B150) No. 11 — (F126) No. 7:***<br>***• Headlight beam leveler LH***<br>***(B150) No. 10 — (F125) No. 6:***<br>***(B150) No. 17 — (F125) No. 8:***<br>***(B150) No. 11 — (F125) No. 7:*** | Is there continuity? | Replace the auto headlight beam leveler CM. <Ref. to LI-89, Auto Headlight Beam Leveler Control Module.> | Repair the open circuit or poor contact of the connector in the harness between headlight assembly and auto headlight beam leveler CM. |
| 13 | **CHECK DTC.**<br>Display DTC using the Subaru Select Monitor. | Is DTC displayed? | Perform the diagnosis according to DTC. <Ref. to AL(diag)-13, LIST, List of Diagnostic Trouble Code (DTC).> | Replace the auto headlight beam leveler CM. <Ref. to LI-89, Auto Headlight Beam Leveler Control Module.> |

# WIPER AND WASHER SYSTEMS

**WW**

| | | Page |
|---|---|---|
| 1. | General Description | 2 |
| 2. | Relay and Fuse | 7 |
| 3. | Wiper and Washer System | 9 |
| 4. | Combination Switch (Wiper) | 10 |
| 5. | Wiper Blade | 17 |
| 6. | Washer Tank and Motor | 21 |
| 7. | Front Wiper Arm | 27 |
| 8. | Front Wiper Motor and Link | 29 |
| 9. | Front Washer Nozzle | 33 |
| 10. | Rear Wiper Arm | 38 |
| 11. | Rear Wiper Motor | 40 |
| 12. | Rear Washer | 44 |

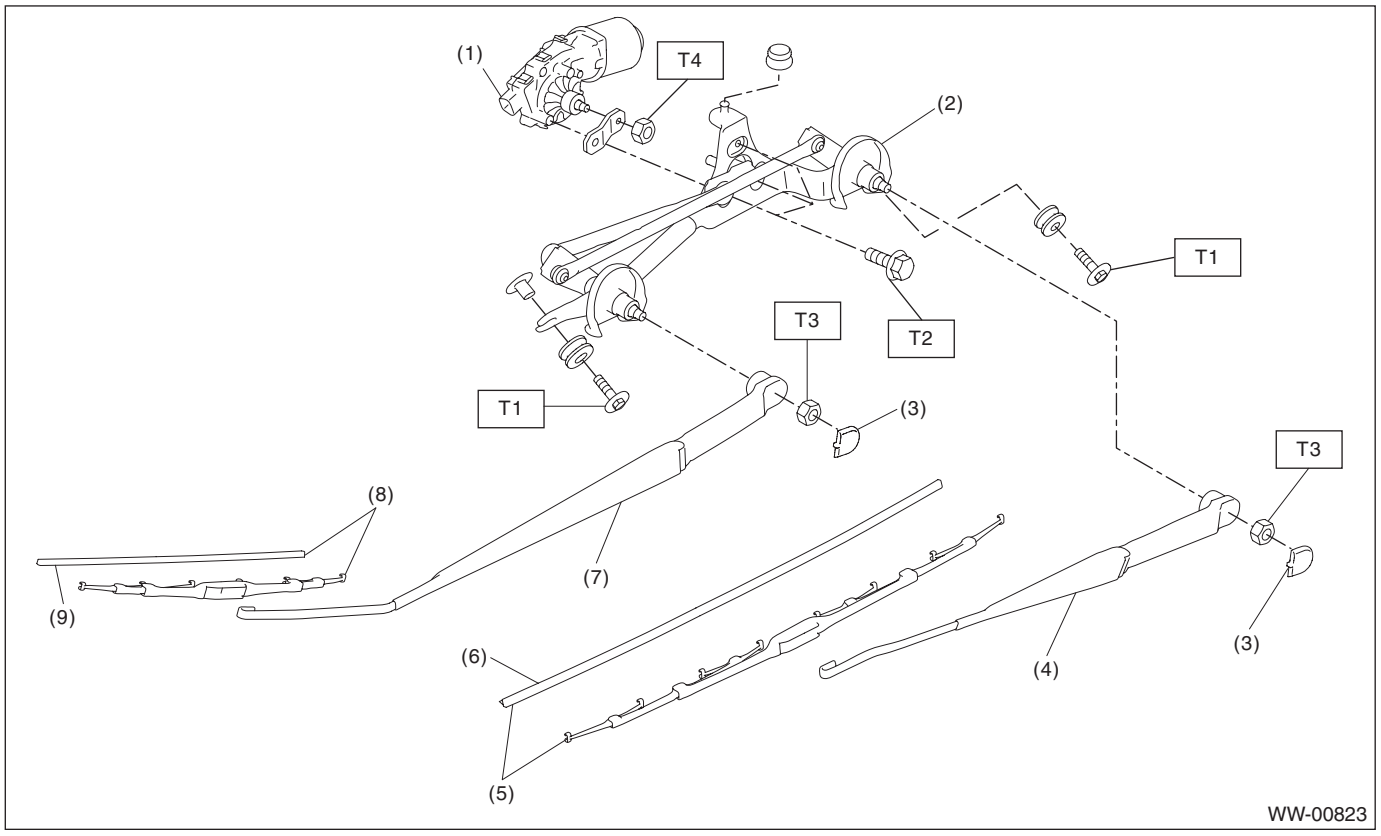
# 1. General Description

## A: SPECIFICATION

| | | |
|---|---|---|
| Front wiper motor | Input | 12 V — 72 W or less |
| Rear wiper motor | Input | 12 V — 42 W or less |
| Front washer motor | Pump type | Centrifugal |
| | Input | 12 V — 60 W or less |
| Rear washer motor | Pump type | Centrifugal |
| | Input | 12 V — 36 W or less |

## B: COMPONENT

### 1. FRONT WIPER

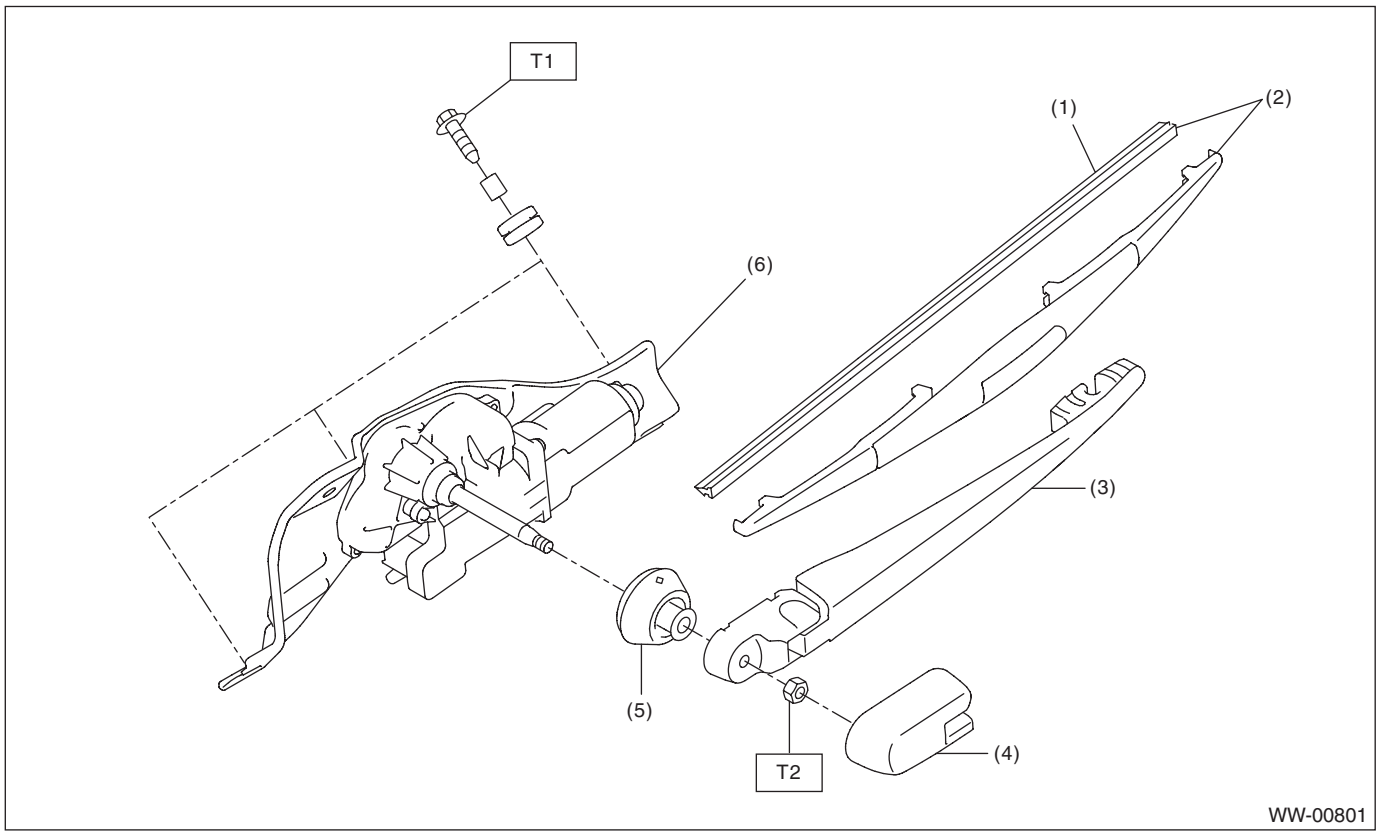


(1) Motor ASSY - windshield wiper
(2) Link ASSY - windshield wiper
(3) Cover - windshield wiper arm
(4) Arm ASSY - windshield wiper driver
(5) Blade ASSY - windshield wiper driver
(6) Rubber ASSY - windshield wiper driver
(7) Arm ASSY - windshield wiper assistor
(8) Blade ASSY - windshield wiper assistor
(9) Rubber ASSY - windshield wiper assistor

***Tightening torque: N·m (kgf-m, ft-lb)***

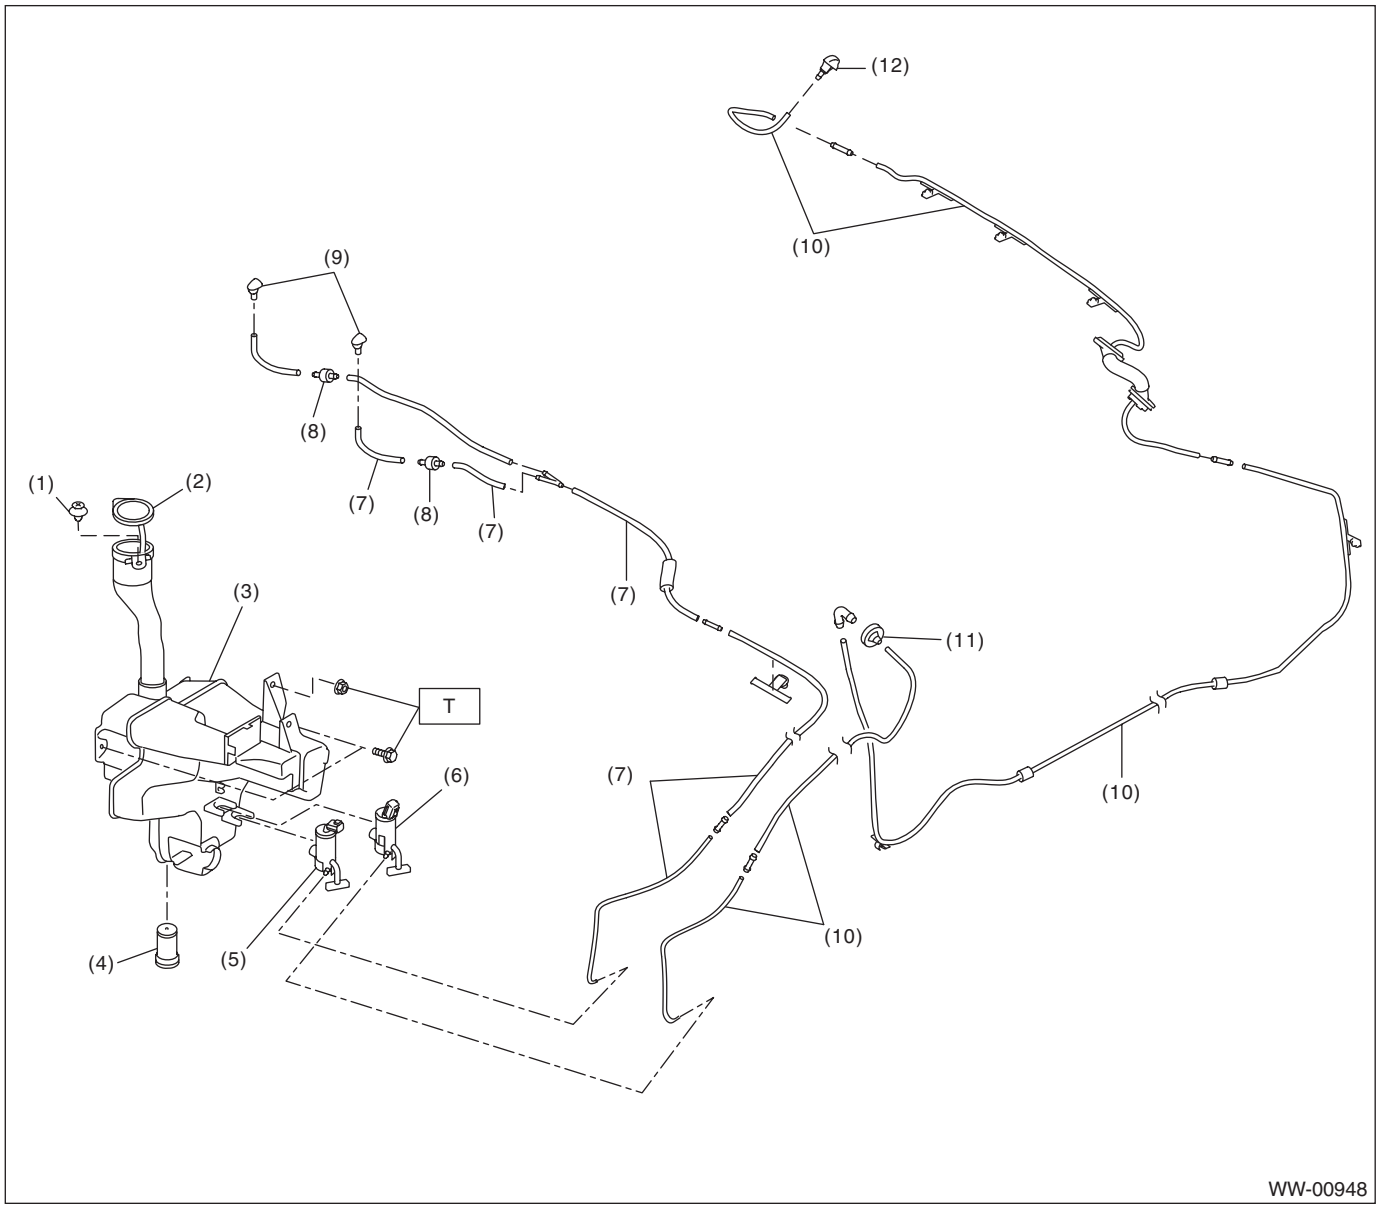
***T1: 6 (0.61, 4.4)***
***T2: 5.5 (0.56, 4.1)***
***T3: 22 (2.24, 16.2)***
***T4: <Ref. to WW-31, INSTALLATION, Front Wiper Motor and Link.>***

## 2. REAR WIPER



| | | | | |
|---|---|---|---|---|
| (1) | Rubber ASSY - rear wiper | (4) | Cover - rear wiper arm | ***Tightening torque: N·m (kgf-m, ft-lb)*** |
| (2) | Blade ASSY - rear wiper | (5) | Cap - pivot wiper | ***T1: 6 (0.61, 4.4)*** |
| (3) | Arm ASSY - rear wiper | (6) | Motor ASSY - rear wiper | ***T2: 8 (0.82, 5.9)*** |

## 3. WASHER TANK



(1) Clip
(2) Holder - windshield washer tank
(3) Tank - washer
(4) Sensor - washer tank
(5) Motor pump ASSY - washer front
(6) Motor pump ASSY - washer rear (5 door model/XV model only)
(7) Hose - windshield washer
(8) Valve - windshield washer
(9) Nozzle - windshield washer
(10) Hose ASSY - rear washer (5 door model/XV model)
(11) Grommet - washer hose
(12) Nozzle - rear washer (5 door model/XV model only)

***Tightening torque: N·m (kgf-m, ft-lb)***
***T: 6 (0.61, 4.4)***

## C: CAUTION

- Connect the connectors and hoses securely during reassembly.
- After reassembly, make sure that the each component or each function operates normally.
- Be careful with the airbag system wiring harness which passes near electrical parts and switches.
- Yellow connectors and harnesses with yellow tapes around them are the connectors and harnesses for the airbag system. Using a tester above such circuits may cause malfunction of airbag system. Follow the cautions of “AIRBAG SYSTEM” in this case. <Ref. to AB-11, CAUTION, General Description.>
- When connecting the pipe hoses, be careful not to cause bend or blockage.
- If even a small amount of silicon oil or grease enters the tank - washer and the washer fluid passages, an oil film will be formed on the glass and will cause the wiper to chatter and judder. Make sure that no oil comes into contact with the system.

## D: PREPARATION TOOL

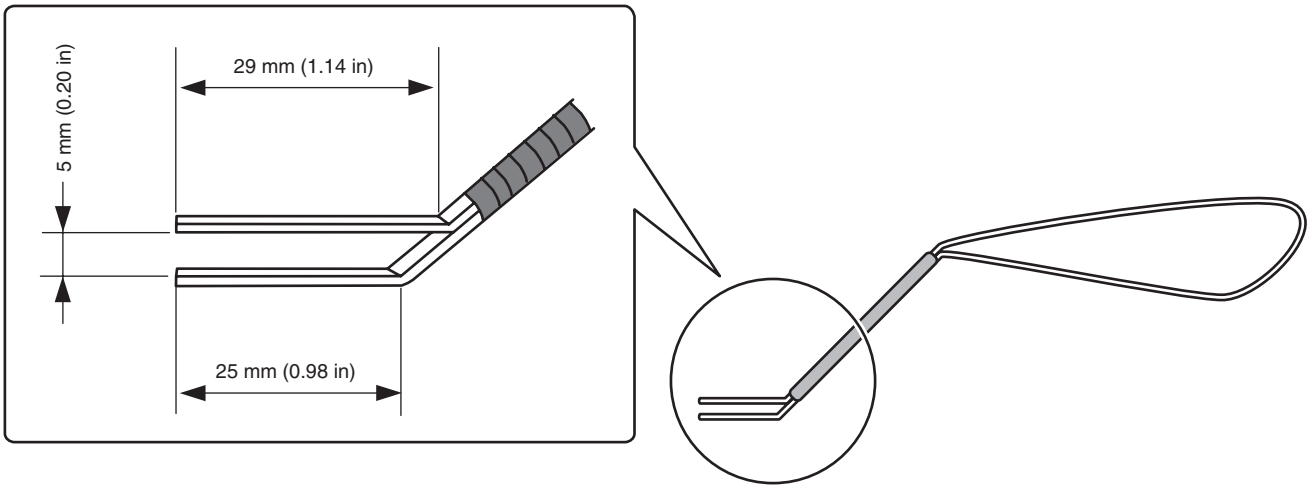
### 1. SPECIAL TOOL

| ILLUSTRATION | TOOL NUMBER | DESCRIPTION | REMARKS |
|---|---|---|---|
|  ST1B022XU0 | 1B022XU0 | SUBARU SELECT MONITOR III KIT | Used for setting of each function and trouble-shooting for electrical system. |

### 2. GENERAL TOOL

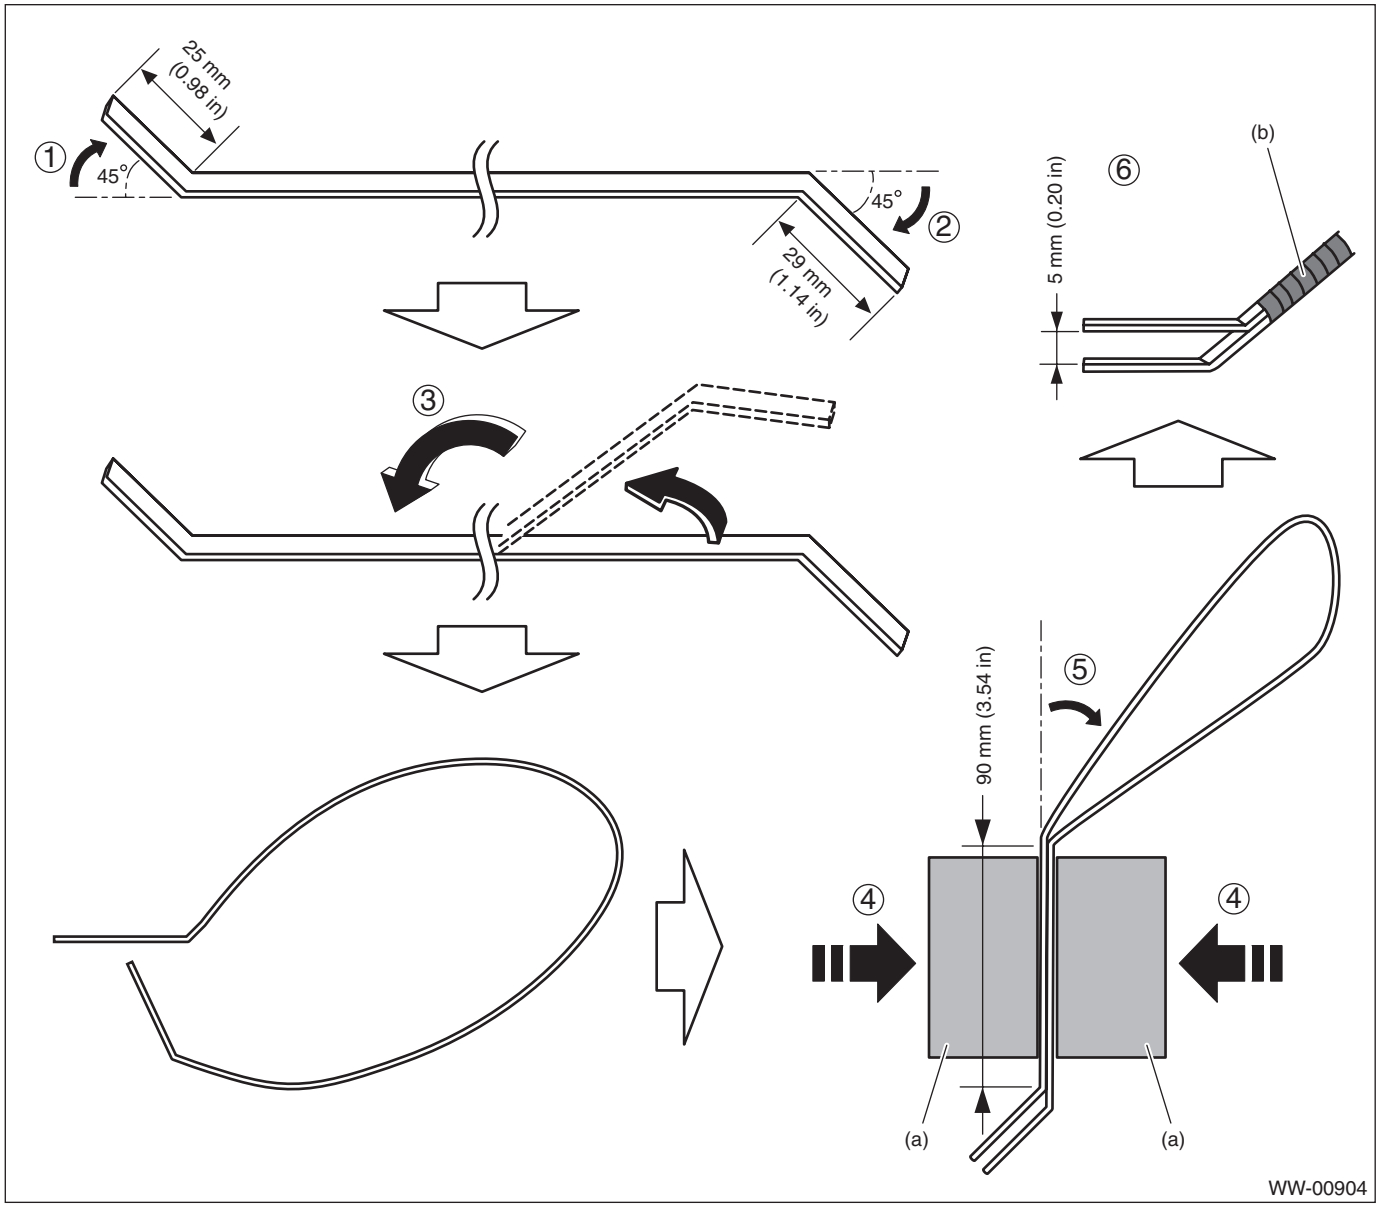
| TOOL NAME | REMARKS |
|---|---|
| Circuit tester | Used for checking voltage and continuity. |

NOTE:
Referring to the data described below, prepare the materials to make a nozzle - windshield washer adjustment tool.



Materials
- Vertebra of wiper blade which is to be discarded
- Vinyl tape

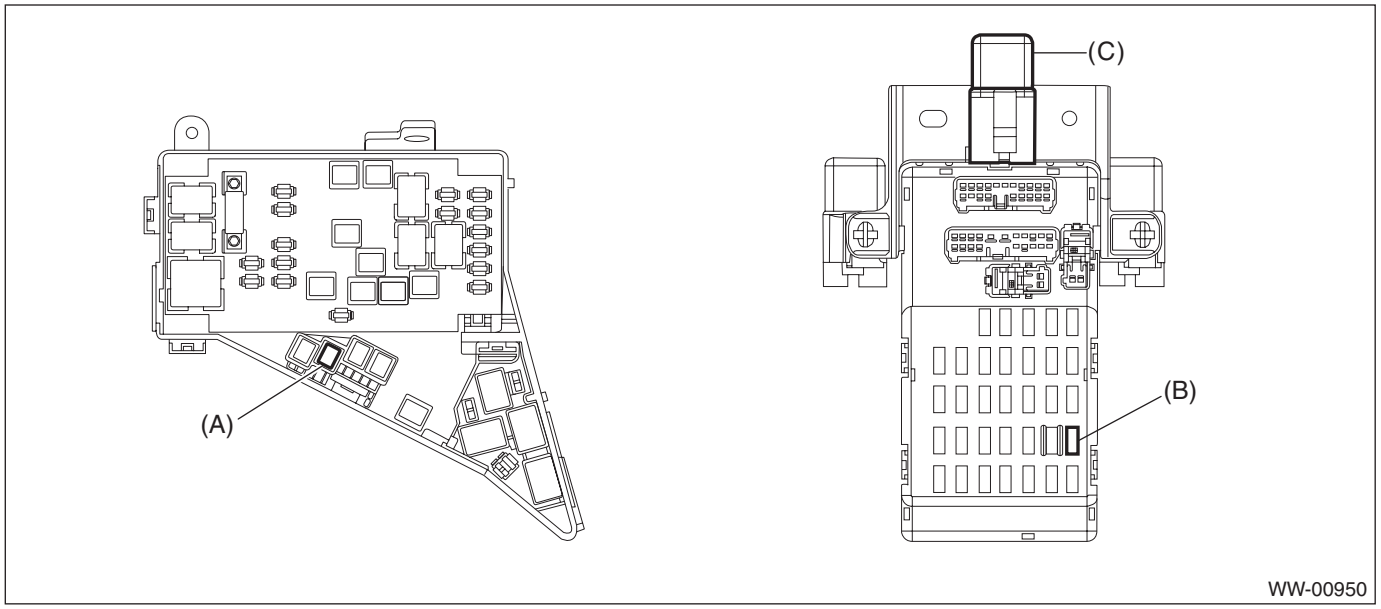
Steps of making a front washer nozzle adjustment tool



1. Bend the vertebra at the position 25 mm (0.98 in) away from its end by 45°.
2. Bend the vertebra at the position 29 mm (1.14 in) away from the other end by 45°.
3. Double up the vertebra so that the longer end (29 mm (1.14 in)) comes upward.
4. Secure the vertebra with a vise (a) so that the tip clearance becomes 5 mm (0.20 in).
5. Bend the vertebra at the position approximately 90 mm (3.54 in) away from the bending point for the longer end.
6. Check that the tip clearance is 5 mm (0.20 in), and secure the vertebra with vinyl tape (b).

# 2. Relay and Fuse

## A: LOCATION



| | | |
|---|---|---|
| Main fuse box | Fuse 30 A (wiper) | (A) |
| Relay & fuse box | Fuse 7.5 A (wiper) | (B) |
| Relay holder | Wiper relay | (C) |

NOTE:
For other related fuses, refer to the wiring diagram. <Ref. to WI-15, Power Supply Circuit.>

# B: INSPECTION

## 1. CHECK FUSE

1) Remove the fuse and inspect visually.
2) If the fuse is blown out, replace the fuse.

## 2. CHECK RELAY

1) Check the resistance between relay terminals.

| Terminal No. | Inspection conditions | Standard | Circuit |
|---|---|---|---|
| 1 — 2 | Always | 1 MΩ or more |  SR-00180 |
| 1 — 2 | Apply battery voltage between terminals 4 and 3. | Less than 1 Ω | |

| Terminal No. | Inspection conditions | Standard | Circuit |
|---|---|---|---|
| 1 — 2 | Always | 1 MΩ or more |  SL-01085 |
| 1 — 4 | Always | Less than 1 Ω | |
| 1 — 2 | Apply battery voltage between terminals 3 and 5. | Less than 1 Ω | |

2) Replace the relay if the inspection result is not within the standard.

# 3. Wiper and Washer System

## A: WIRING DIAGRAM

### 1. WIPER AND WASHER (FRONT)

Refer to “Front Wiper and Washer System” in the wiring diagram. <Ref. to WI-90, WIRING DIAGRAM, Front Wiper and Washer System.>

### 2. WIPER AND WASHER (REAR)

Refer to “Rear Wiper and Washer System” in the wiring diagram. <Ref. to WI-130, WIRING DIAGRAM, Rear Wiper and Washer System.>

## B: INSPECTION

| Symptoms | Repair order |
|---|---|
| Wiper and washers do not operate. | 1. Wiper fuse (F/B No. 14, 15)<br>2. Combination switch<br>3. Motor assembly - wiper<br>4. Wiring harness |
| Wipers do not operate in LO or HI. | 1. Combination switch<br>2. Motor assembly - wiper<br>3. Wiring harness |
| Wipers do not operate in INT. | 1. Combination switch<br>2. Motor assembly - wiper<br>3. Wiring harness |
| Washer motor does not operate. | 1. Combination switch<br>2. Motor pump assembly - washer<br>3. Wiring harness |
| Wipers do not operate when washer switch is ON. | 1. Motor assembly - wiper<br>2. Wiring harness |
| Washer fluid spray does not operate properly. | 1. Motor pump assembly - washer<br>2. Hose assembly - washer<br>3. Nozzle - washer |

## C: NOTE

For operation procedures of each component of the wiper and washer system, refer to the respective sections.

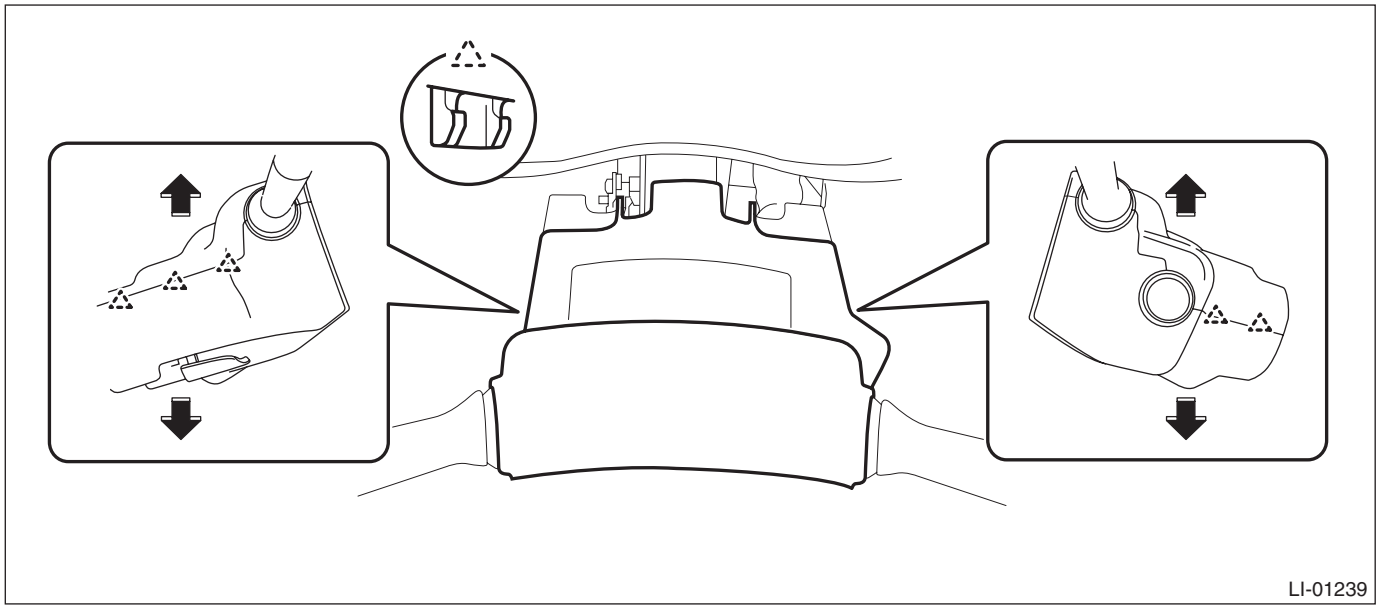
- Combination switch (Wiper): <Ref. to WW-10, Combination Switch (Wiper).>
- Wiper blade: <Ref. to WW-17, Wiper Blade.>
- Front wiper arm: <Ref. to WW-27, Front Wiper Arm.>
- Front wiper motor and link: <Ref. to WW-29, Front Wiper Motor and Link.>
- Rear wiper arm: <Ref. to WW-38, Rear Wiper Arm.>
- Rear wiper motor: <Ref. to WW-40, Rear Wiper Motor.>
- Washer tank and motor: <Ref. to WW-21, Washer Tank and Motor.>
- Front washer nozzle: <Ref. to WW-33, Front Washer Nozzle.>
- Rear washer nozzle: <Ref. to WW-44, Rear Washer.>

# 4. Combination Switch (Wiper)

## A: REMOVAL

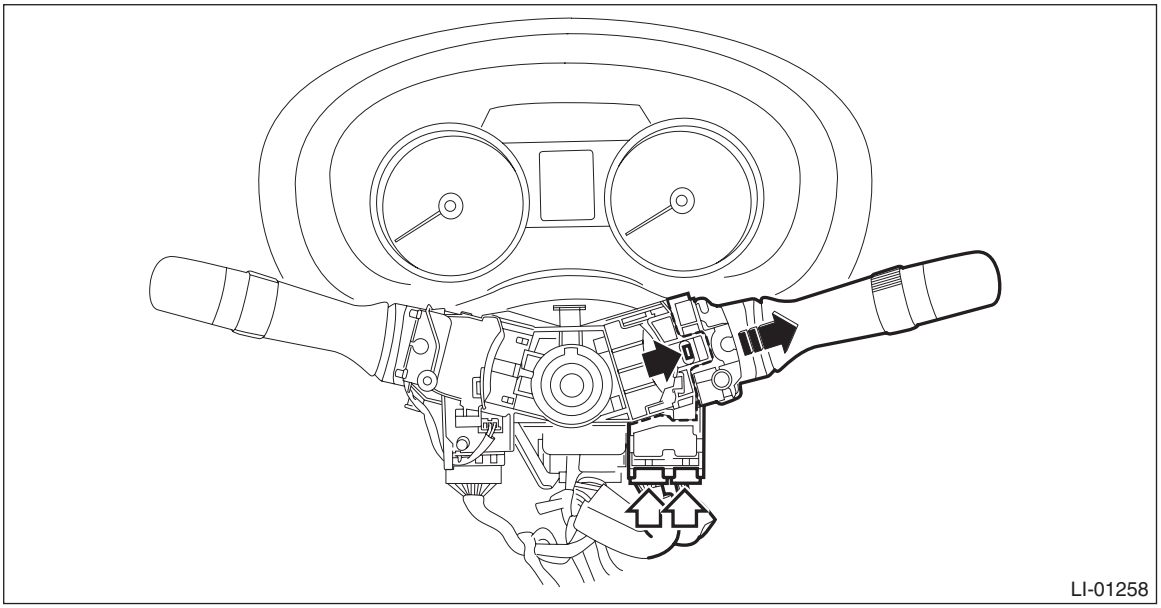
1) Disconnect the ground cable from battery.
2) Remove the cover assembly - column.
   (1) Remove the screws by turning the steering wheel to right and left.

   (2) Release the claw, and remove the cover assembly - column UPR and the cover assembly - column LWR.



3) Remove the switch assembly - combination wiper select.
   (1) Disconnect the connector.
   (2) Release the claws, and pull out the switch assembly - combination wiper select.

**CAUTION:**
**Do not press the claws with excessive force. They may be damaged.**



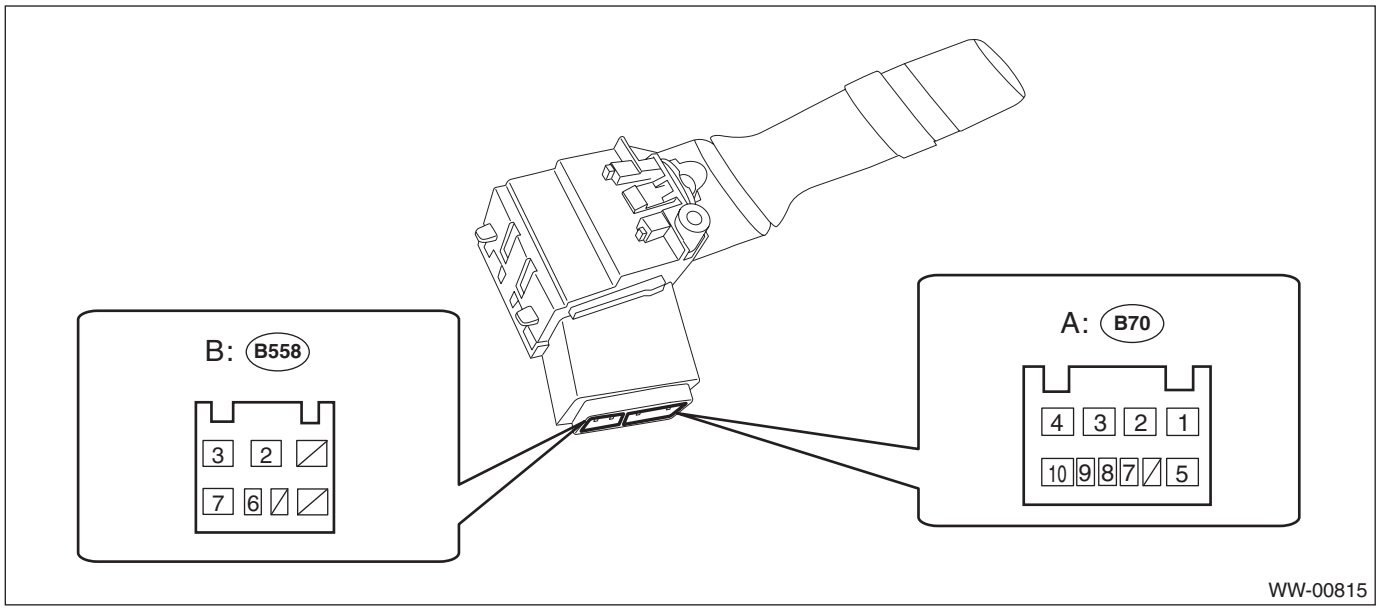
## B: INSTALLATION

Install each part in the reverse order of removal.

# C: INSPECTION

## 1. INSPECTION OF SWITCH UNIT

1) Operate the switches to check the continuity between terminals.



| | Switch position | Terminal No. | Standard |
|---|---|---|---|
| Front | OFF | A1 and A3 | Less than 1 Ω |
| | INT | A1 and A3 | Less than 1 Ω |
| | LO | A2 and A3 | Less than 1 Ω |
| | HI | A2 and A4 | Less than 1 Ω |
| | Washer ON | B2 and B3 | Less than 1 Ω |
| Rear | OFF | A5 and B2<br>B6 and B2<br>B7 and B2 | 1 MΩ or more |
| | LO | B6 and B2 | Less than 1 Ω |
| | HI | B7 and B2 | Less than 1 Ω |
| | Washer ON | A5 and B2 | Less than 1 Ω |

2) Replace the switch if the inspection result is not within the standard.

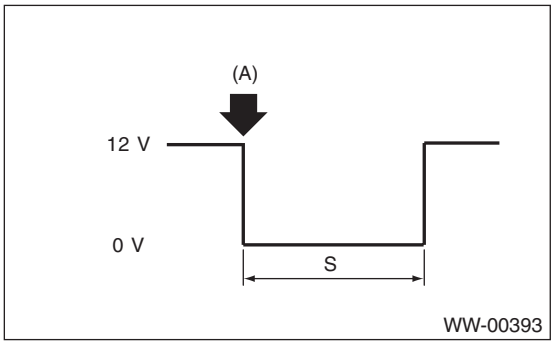
## 2. FRONT WIPER

1) Check with Subaru Select Monitor
   (1) Check the input signal when the switch assembly - combination wiper select is turned to LO or HI, using the current data display.
   (2) Does the input signal change corresponding to the switch operation?
   - **Yes** → Finish the diagnosis.
   - **No** → Check the harness.

2) CHECK THE INTERMITTENT OPERATION (INSPECTION OF THE WIPER SWITCH ALONE).

   (1) Set the voltmeter between terminals No. A2 (+) and No. B2 (–).
   (2) Connect the battery to connector. (Terminal No. A2 (+), terminal No. B2 & A3 (–))
   (3) Turn the switch assembly - combination wiper select to INT.
   (4) Connect the battery (+) to the terminal No. A2 for 5 seconds.
   (5) Connect the battery (–) to the terminal No. B2, and check the voltage between terminals No. A2 and No. A3 during intermittent operation.
   (6) Perform step (1) to (5) above when intermittent control switch is in MIN or MAX, and replace the switch if the operation is not as specified.

***Intermittent stationary time***
***MIN: Approx. 2 seconds***
***MAX: Approx. 16 seconds***

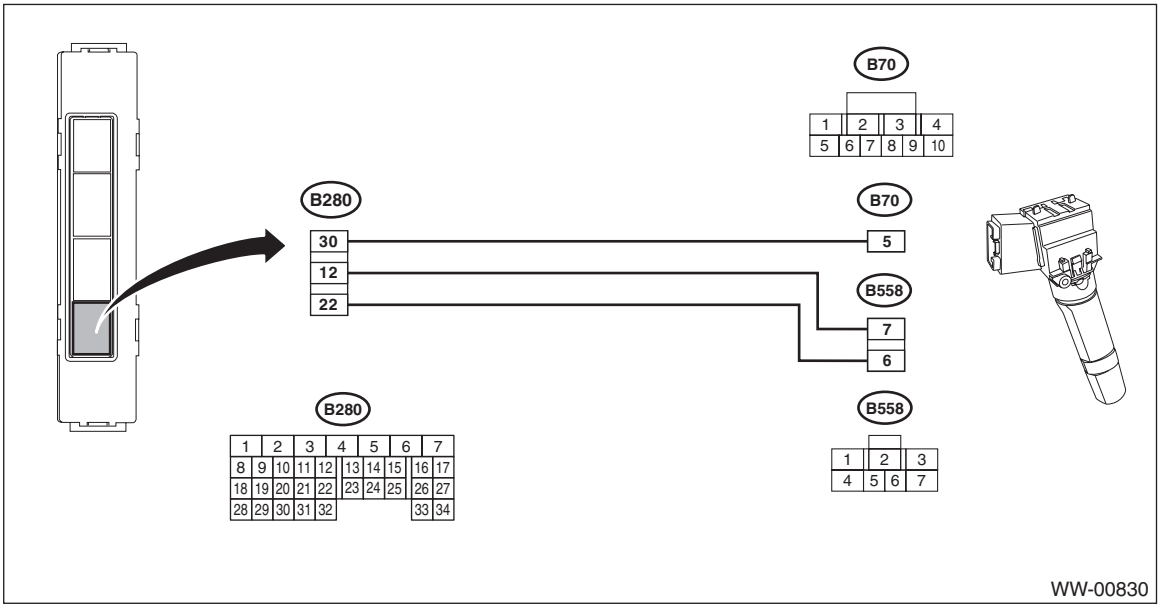


(A): Connect the battery (–) to the terminal No. B2.
S: Intermittent downtime (sec.)

## 3. REAR WIPER

1) Check input of body integrated unit
Check the input signal when the rear wiper switch is operated using Subaru Select Monitor.
(1) Turn the ignition switch to ON.
(2) Operate the rear wiper switch to each position of ON, INT and Washer ON.
(3) Does the input signal change corresponding to the switch operation?
- **Yes** → Go to step 4.
- **No** → Go to step 2.

2) Check harness
(1) Turn the ignition switch to OFF, disconnect the ground cable from battery.
(2) Disconnect the connector of body integrated unit and wiper switch.
(3) Measure the resistance between body integrated unit and wiper switch.



***Connector & terminal***
***(B280) No. 30 — (B70) No. 5:***
***(B280) No. 22 — (B558) No. 6:***
***(B280) No. 12 — (B558) No. 7:***
(4) Is the resistance less than 10 Ω?
- **Yes** → Go to step 3.
- **No** → Repair the harness between the body integrated unit and wiper switch.

3) Check input voltage of body integrated unit
(1) Connect the ground cable to battery.
(2) Turn the ignition switch to ON and check the input voltage of body integrated unit.

***Connector & terminal***
***(i84) No. 6 (+) — Chassis ground (–):***
***(B281) No. 3 (+) — Chassis ground (–):***
(3) Is the voltage 10 V or more?
- **Yes** → Go to step 4.
- **No** → Check the harness and fuse.

4) Check output of body integrated unit
Check the output signal when the rear wiper switch is operated using Subaru Select Monitor.
(1) Turn the ignition switch to ON.
(2) Operate the rear wiper switch to ON and Washer ON.
(3) When the operation in step (2) is performed, check the output signal of body integrated unit to rear wiper motor.
(4) When the rear wiper switch is set to ON, is ON output continuous? Also, when the washer is set to ON, is ON output?
- **Yes** → Go to step 5.
- **No** → Replace the body integrated unit. <Ref. to SL-78, Body Integrated Unit.>

5) Check output of body integrated unit
Check the output signal when the rear wiper switch is operated using Subaru Select Monitor.
(1) Turn the ignition switch to ON.
(2) Set the rear wiper switch to INT.
(3) When the operation in step (2) is performed, check the output signal of body integrated unit.
(4) When the rear wiper switch is set to INT, is ON/OFF output repeated? (INT OFF time (when vehicle parked): 12 seconds)
- **Yes** → Go to step 8.
- **No** → Go to step 6.

6) CHECK HARNESS BETWEEN BODY INTEGRATED UNIT AND REAR WIPER MOTOR.
(1) Turn the ignition switch to OFF, disconnect the ground cable from battery.
(2) Disconnect the connector of body integrated unit and wiper switch.
(3) Measure the resistance between the harness connector terminals of the body integrated unit and rear wiper motor.

***Connector & terminal***
***(B280) No. 6 — (B97) No. 11:***
(4) Is the resistance less than 10 Ω?
- **Yes** → Go to step 7.
- **No** → Repair the open circuit of the harness between body integrated unit and rear wiper motor.

7) CHECK STOP POSITION CIRCUIT OF THE REAR WIPER MOTOR.
(1) Disconnect the harness connector of the motor assembly - rear wiper.
(2) Check the continuity of the circuit of rear wiper motor stop position.

***Connector & terminal***
***(D43) No. 1 (+) — (D43) No. 4 (–):***
(3) Is there continuity between terminals?
- **Yes** → Go to step 8.
- **No** → Replace the motor assembly - rear wiper.

8) CHECK POWER SUPPLY CIRCUIT OF THE REAR WIPER MOTOR.
(1) Disconnect the harness connector of the motor assembly - rear wiper.
(2) Turn the ignition switch to ON.
(3) Measure the voltage between the rear wiper motor harness connector terminal and chassis ground.

***Connector & terminal***
***(D43) No. 3 (+) — Chassis ground (–):***
(4) Is the voltage 10 V or more?
- **Yes** → Go to step 9.
- **No** → Check the fuse (No. 27 in main fuse box).

9) CHECK GROUND CIRCUIT OF REAR WIPER MOTOR.
(1) Turn the ignition switch to OFF.
(2) Measure the resistance between the rear wiper motor harness connector terminal and chassis ground.

***Connector & terminal***
***(D43) No. 4 — Chassis ground:***
(3) Is the resistance less than 10 Ω?
- **Yes** → Go to step 10.
- **No** → Repair the open circuit of the rear wiper motor ground circuit.

10) CHECK HARNESS BETWEEN BODY INTEGRATED UNIT AND REAR WIPER MOTOR.
(1) Turn the ignition switch to OFF.
(2) Disconnect the harness connector of body integrated unit.
(3) Disconnect the harness connector of the motor assembly - rear wiper.
(4) Measure the resistance between the harness connector terminals of the body integrated unit and rear wiper motor.

***Connector & terminal***
***(B280) No. 7 — (D43) No. 2:***
(5) Is the resistance less than 10 Ω?
- **Yes** → Go to step 11.
- **No** → Repair the open circuit of the harness between body integrated unit and rear wiper motor.

11) Check output of body integrated unit
(1) Connect the harness connector of body integrated unit.
(2) Disconnect the connector of the motor assembly - rear wiper.
(3) Turn the ignition switch to ON.
(4) Measure the voltage between rear wiper motor connector and chassis ground.

***Connector & terminal***
***(D43) No. 2 (+) — Chassis ground (–):***
(5) Is the voltage less than 1.5 V when the rear wiper switch is OFF, and is the voltage 10 V or more when the rear wiper switch is ON?
- **Yes** → Go to step 12.
- **No** → Replace the body integrated unit. <Ref. to SL-78, Body Integrated Unit.>

12) CHECK OPERATION OF REAR WIPER MOTOR.
(1) Remove the motor assembly - rear wiper.
(2) Check the rear wiper motor. <Ref. to WW-43, INSPECTION, Rear Wiper Motor.>
(3) Does the rear wiper motor rotate normally?
- **Yes** → Finished.
- **No** → Replace the motor assembly - rear wiper.

NOTE:
Rear wiper intermittent time

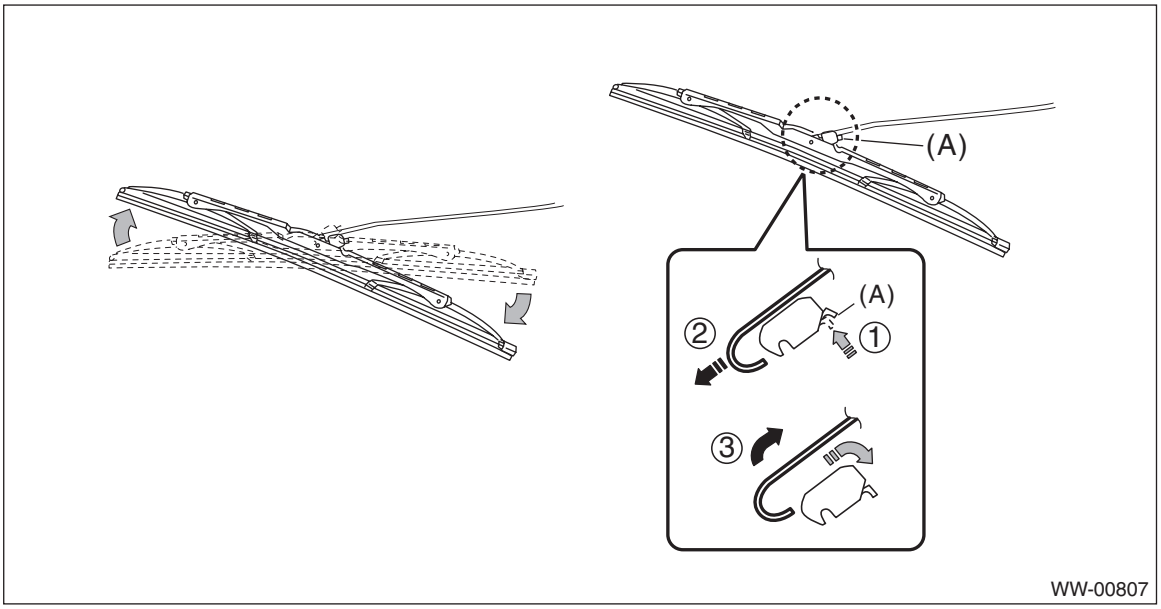
| Select lever position | Vehicle speed (km/h (MPH)) | Intermittent stopping time (sec.) |
|---|---|---|
| | | 5 door model/XV model |
| Rev. | — | Continuous operation |
| Except for reverse mode | 80 — (50 — ) | 3 |
| | 50 — 80 (31 — 50) | 6 |
| | 20 — 50 (12 — 31) | 9 |
| | 0 — 20 (0 — 12) | 12 |

# 5. Wiper Blade

## A: REMOVAL

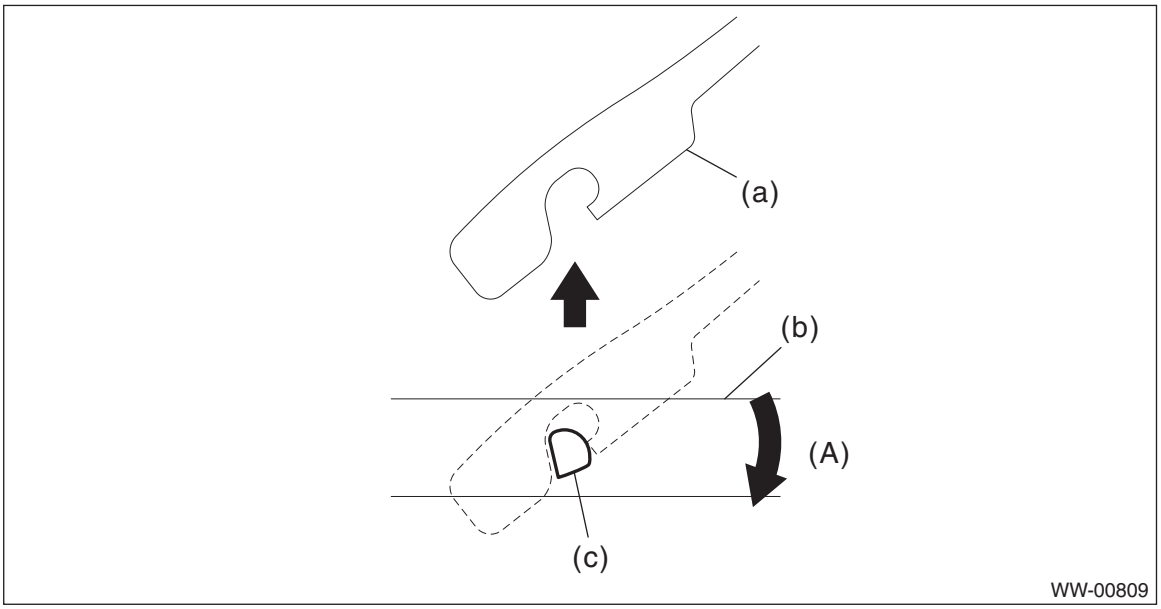
### 1. FRONT

While pushing the locking clip (A) up, pull out the blade assembly - windshield wiper in the direction of the arrow, and remove it from the arm assembly - windshield wiper.



### 2. REAR

Turn the blade assembly - rear wiper in the direction of arrow (A) and remove it from the arm assembly - rear wiper.



(A) Turn the wiper blade.

(a) Arm ASSY - rear wiper (b) Blade ASSY - rear wiper (c) Wiper blade attachment section

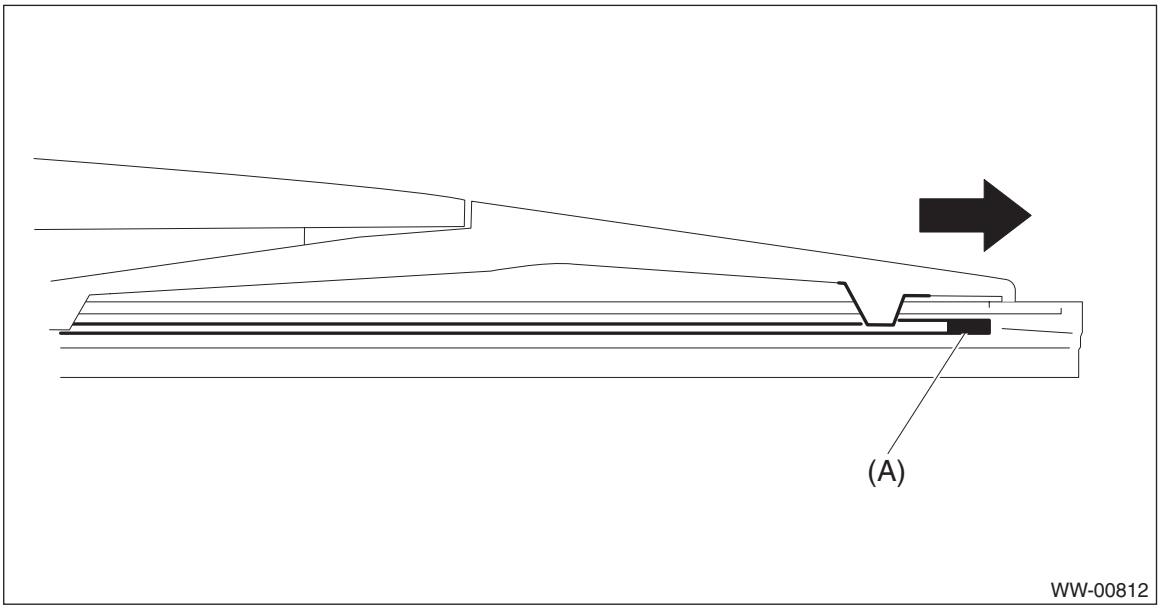
## B: INSTALLATION

1) Install each part in the reverse order of removal.
2) Confirm that the clip is locked securely.

## C: DISASSEMBLY

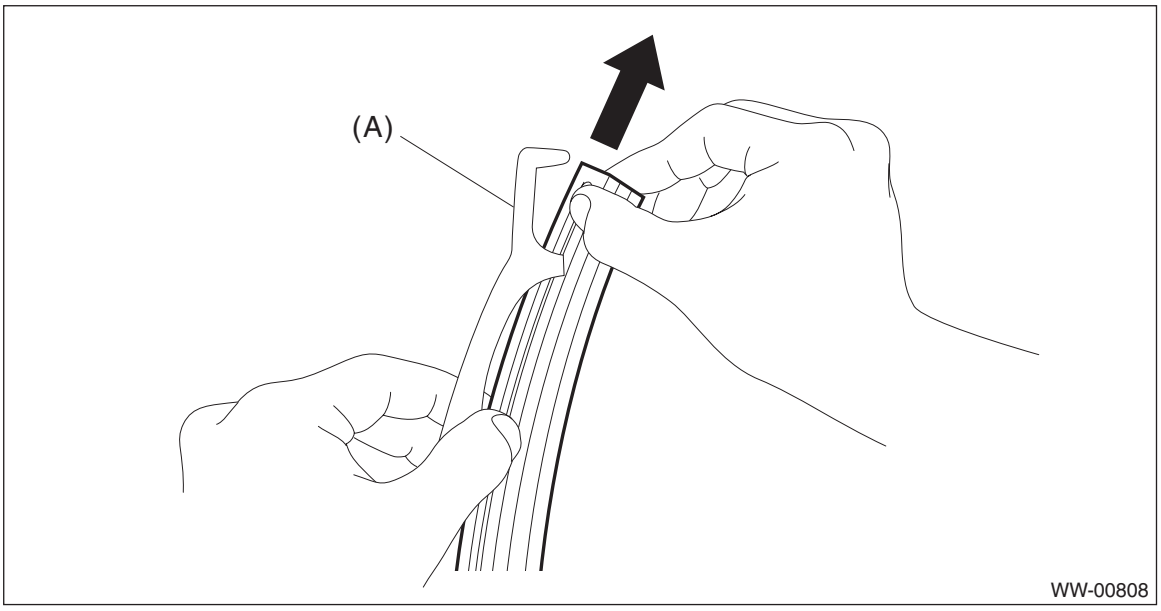
### 1. FRONT

Pull side (A) of the wiper rubber stopper, and remove the rubber assembly - windshield wiper from the blade assembly - windshield wiper.



### 2. REAR

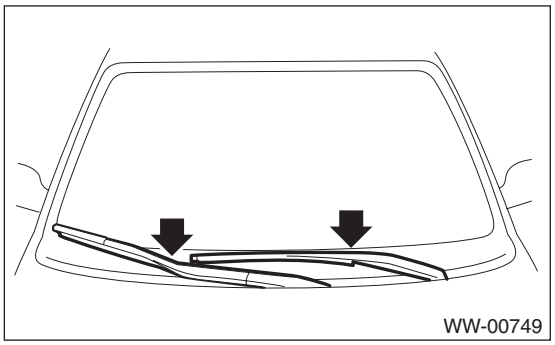
Slightly pull the top of the rubber assembly - rear wiper from the stopper (A), and pull out completely.



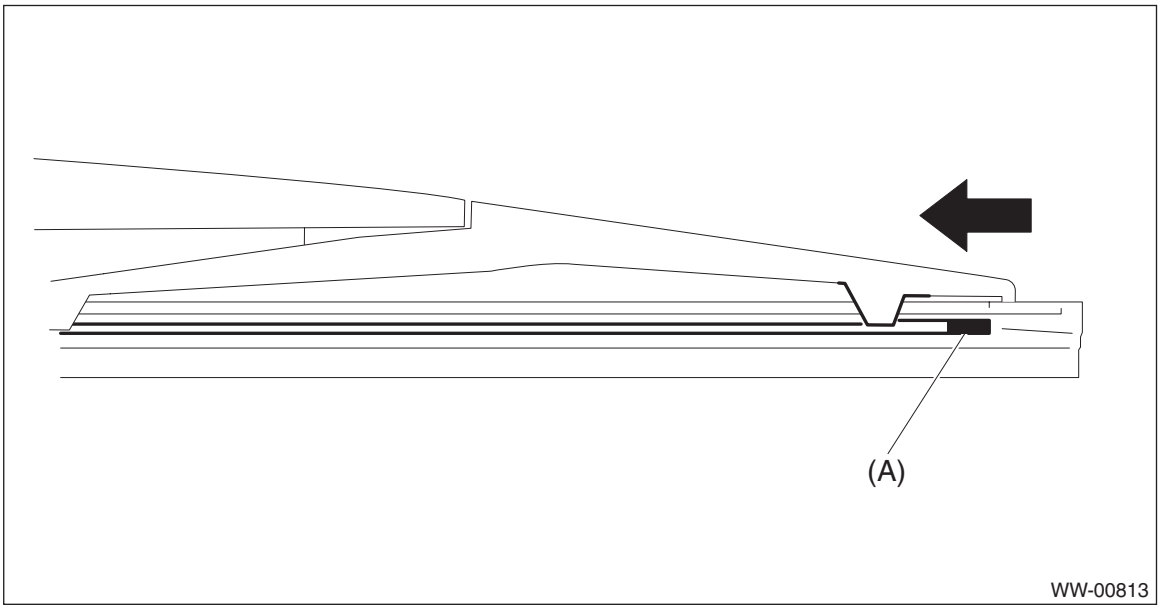
## D: ASSEMBLY

### 1. FRONT

1) Insert the rubber assembly - windshield wiper onto the blade - windshield wiper so that the stopper is in the position shown in the figure.

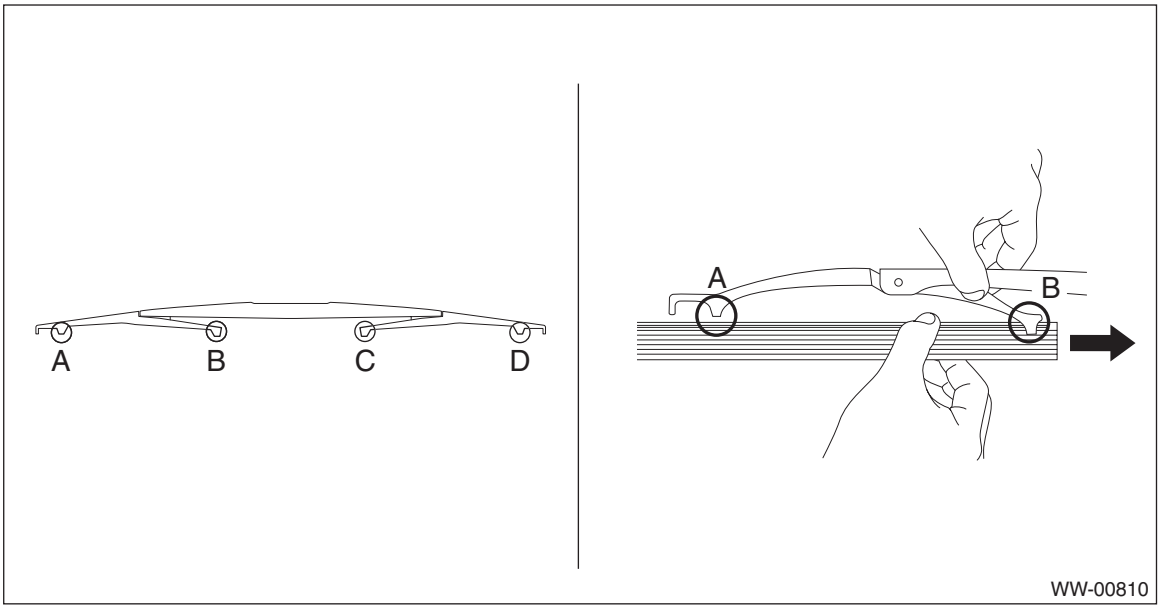


2) Make sure the rubber assembly - windshield wiper is securely fastened to the pull stopper (A).

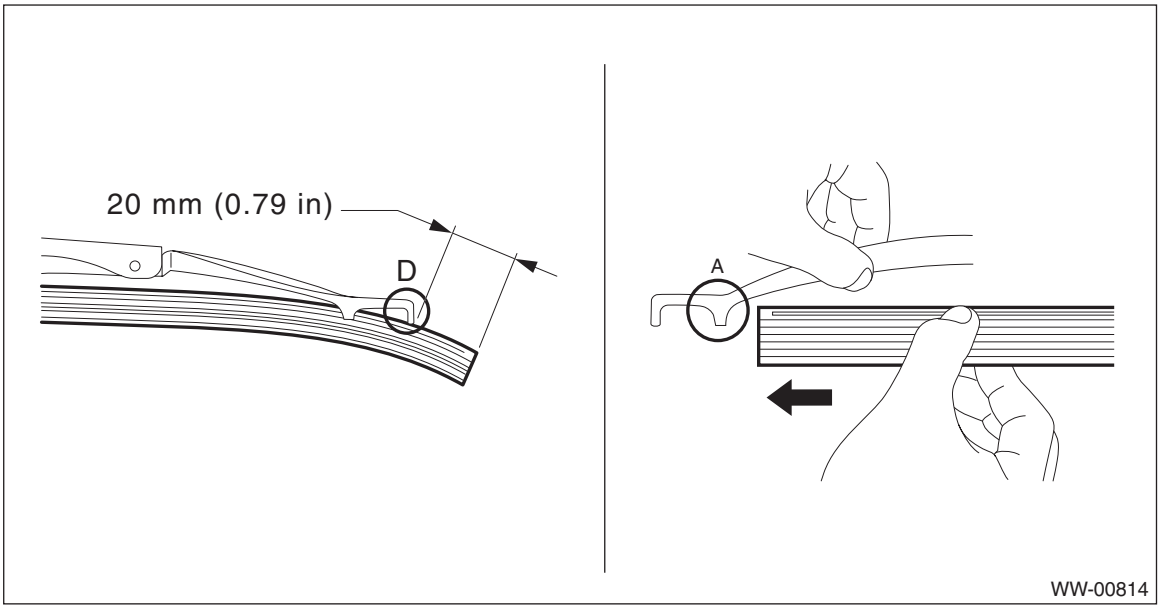


### 2. REAR

1) Insert the rubber assembly - rear wiper into claw (B).



2) Insert the rubber assembly - rear wiper until its top end protrudes approx. 20 mm (0.79 in) from stopper (D).
3) Insert the rubber assembly - rear wiper into claw (A).



## E: INSPECTION

1) When the wiper does not operate properly, inspect the following item.
- Make sure the movable part of the blade assembly - rear wiper moves smoothly.
- Check that the rubber assembly - rear wiper rubber is not deformed or damaged.

2) Replace with a new part if damage is found.

# 6. Washer Tank and Motor

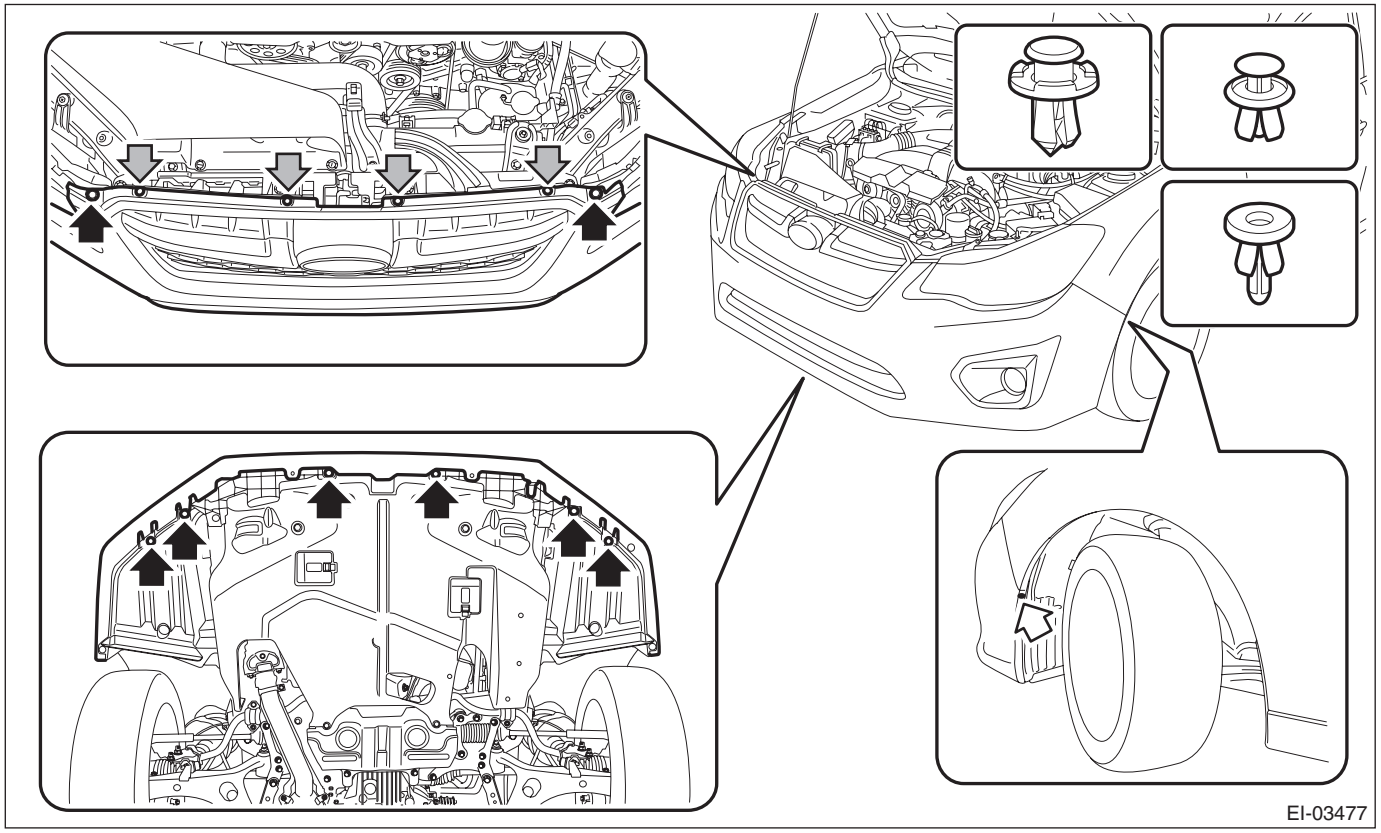
## A: REMOVAL

### 1. WASHER TANK

1) Open the hood COMPL - front.
2) Disconnect the ground cable from battery.
3) Remove the bumper face - front.
   (1) Remove the clips and screws, and turn over the mud guard - front, and then disconnect the connectors of the fog light assembly - front on the LH and RH sides. (Model with fog light)

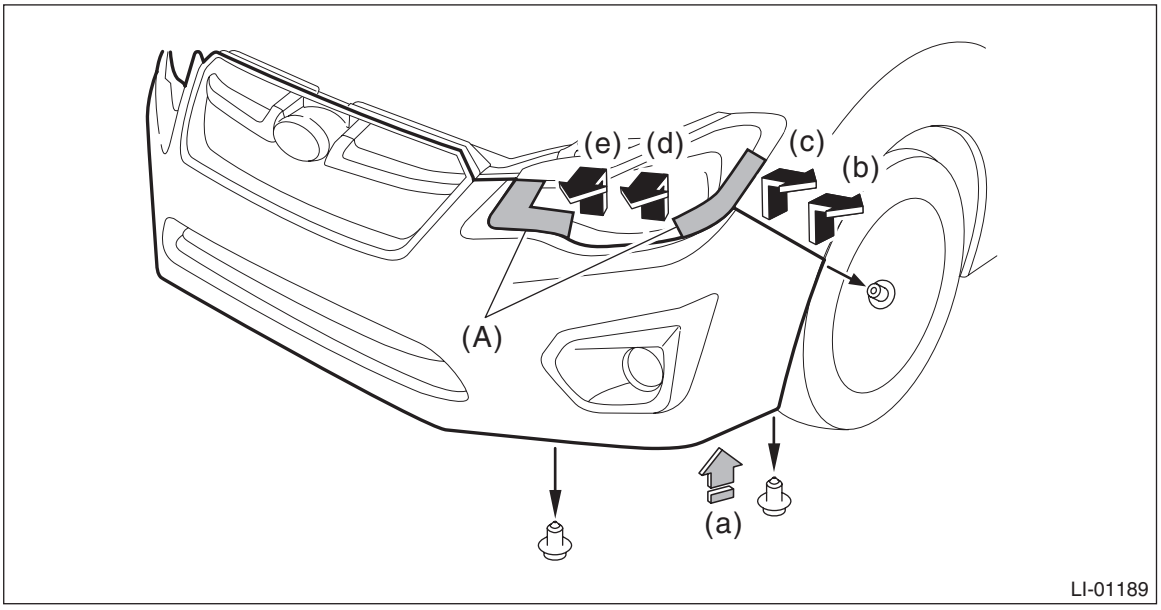
   (2) Remove the clips at the upper side of the bumper.
   (3) Remove the clips from the fender.

(4) Remove the clips at the lower side of bumper.



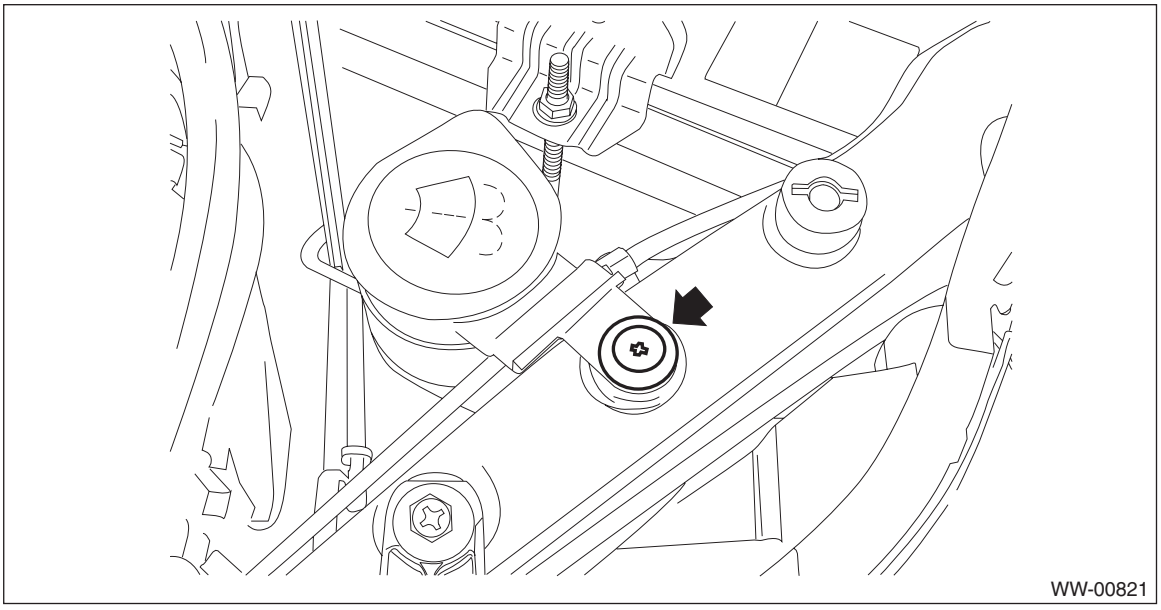
(5) Apply protective tape (A) to the light assembly - head.
(6) Release the clips, and while pushing up the lower side (a) of the bumper face - front, remove in the order from (b) to (e).

**CAUTION:**
**Do not pull forcibly. It may damage the flange sections of the bumper face - front.**

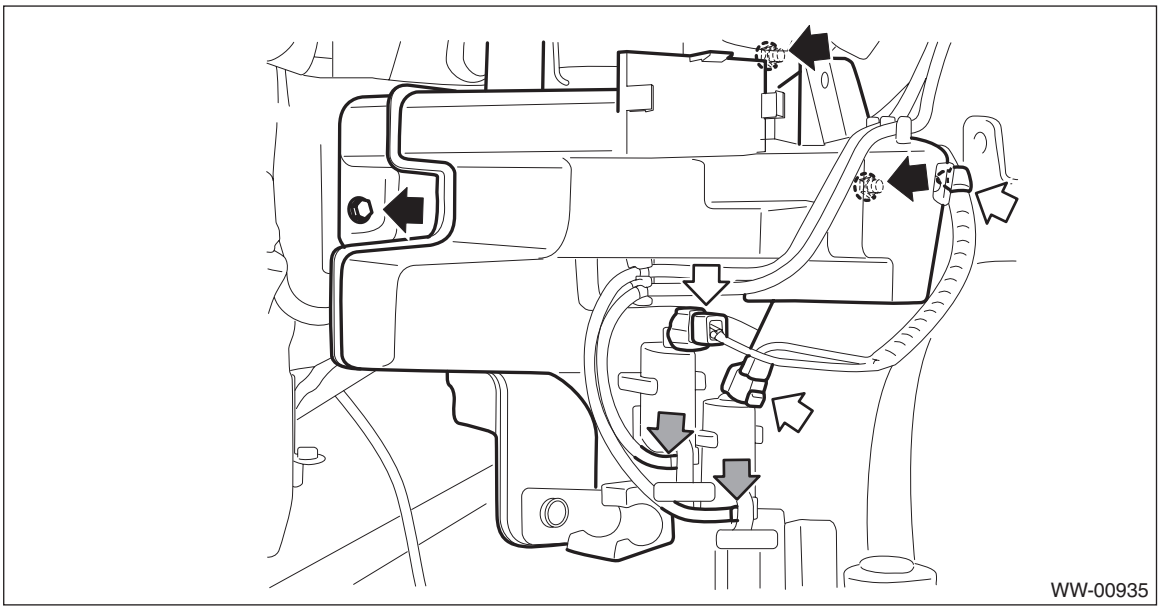


NOTE:
Detach the opposite side in the same manner.

4) Remove the tank - washer assembly.
(1) Remove the clip of the holder - windshield washer tank.

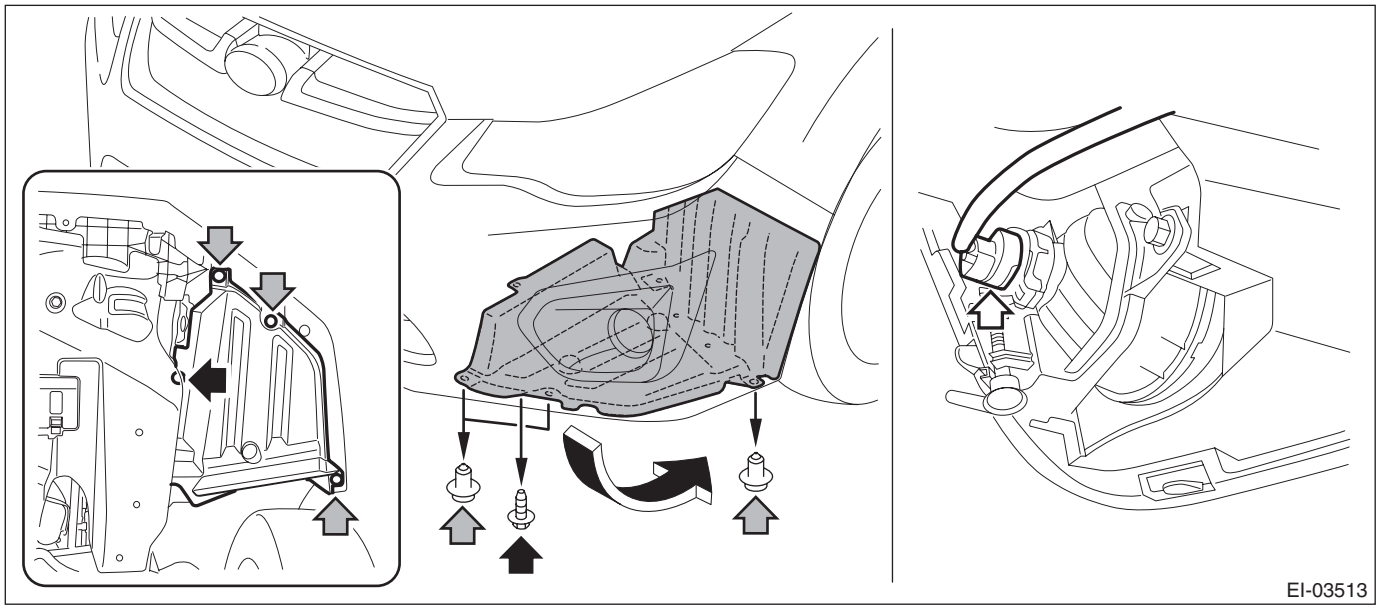


(2) Disconnect the connector from the motor pump assembly - washer and the sensor - washer tank, and then remove the harness clip.
(3) Prepare a container before disconnecting the hose - washer, and drain all washer fluid in the tank - washer.
(4) Remove the bolt and nuts and remove the tank - washer assembly.

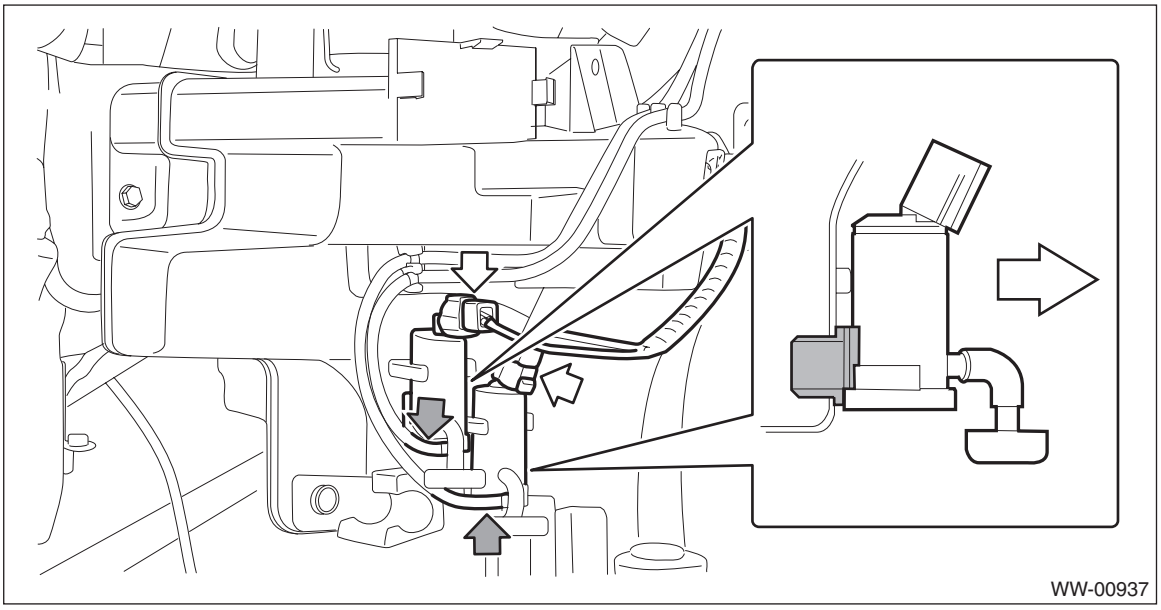


## 2. WASHER MOTOR

1) Open the hood COMPL - front.
2) Disconnect the ground cable from battery.
3) Remove the clips and screws, turn over the mud guard - front LH, and disconnect the connector of the fog light assembly - front. (Model with fog light)



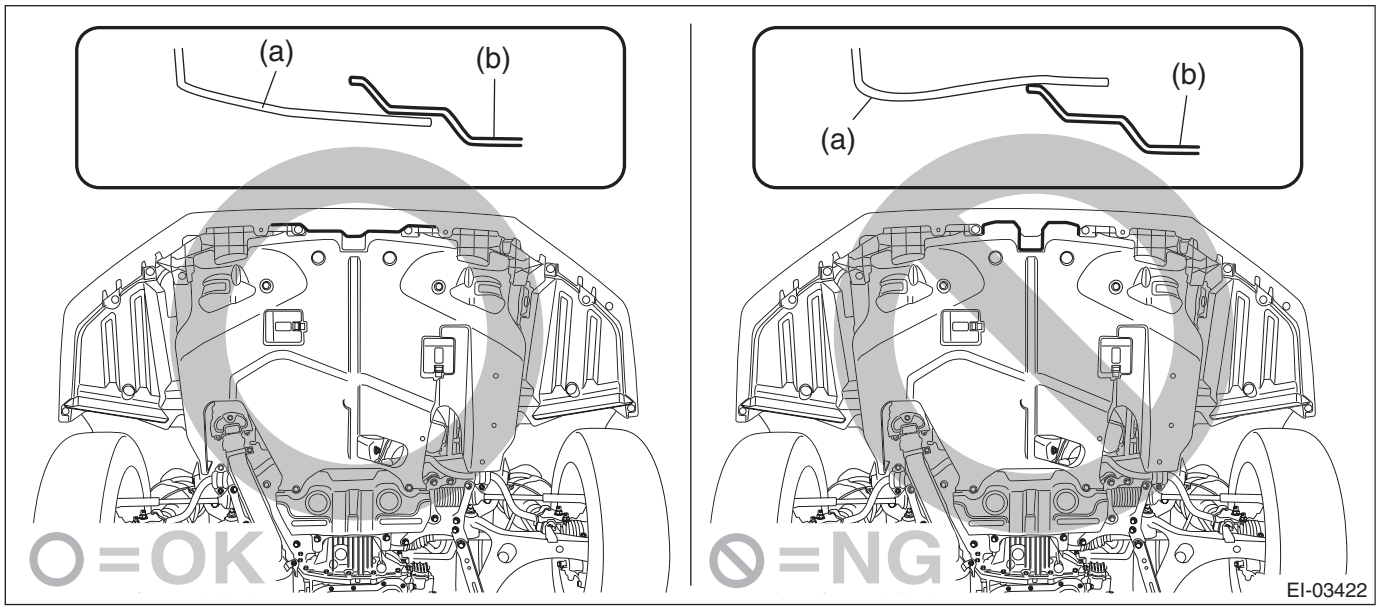
4) Disconnect the connector from the motor pump assembly - washer and remove the harness clip.
5) Prepare a container before disconnecting the hose - washer, and drain all washer fluid in the tank - washer.
6) Remove the motor pump assembly - washer from the tank - washer.



## B: INSTALLATION

1) Install each part in the reverse order of removal.

**CAUTION:**
**Install the bumper face - front so that the front end of the under cover (b) comes inside the bumper face - front (a).**



***Tightening torque:***
***6 N·m (0.61 kgf-m, 4.4 ft-lb)***

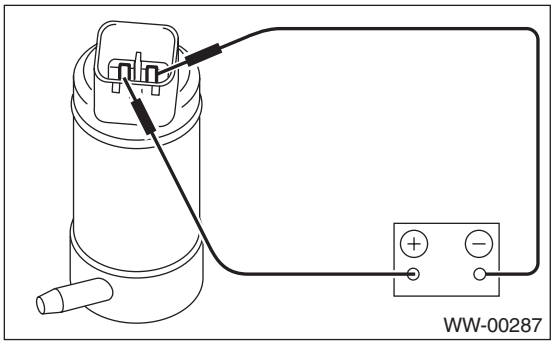
2) Add new washer fluid.

3) Adjust the fog light beam. (Model with fog light) <Ref. to LI-54, FOG LIGHT AIMING, ADJUSTMENT, Front Fog Light Assembly.>

## C: INSPECTION

### 1. WASHER PUMP

Apply battery voltage to the connector terminal of the motor pump assembly - washer, and make sure that the motor operates.



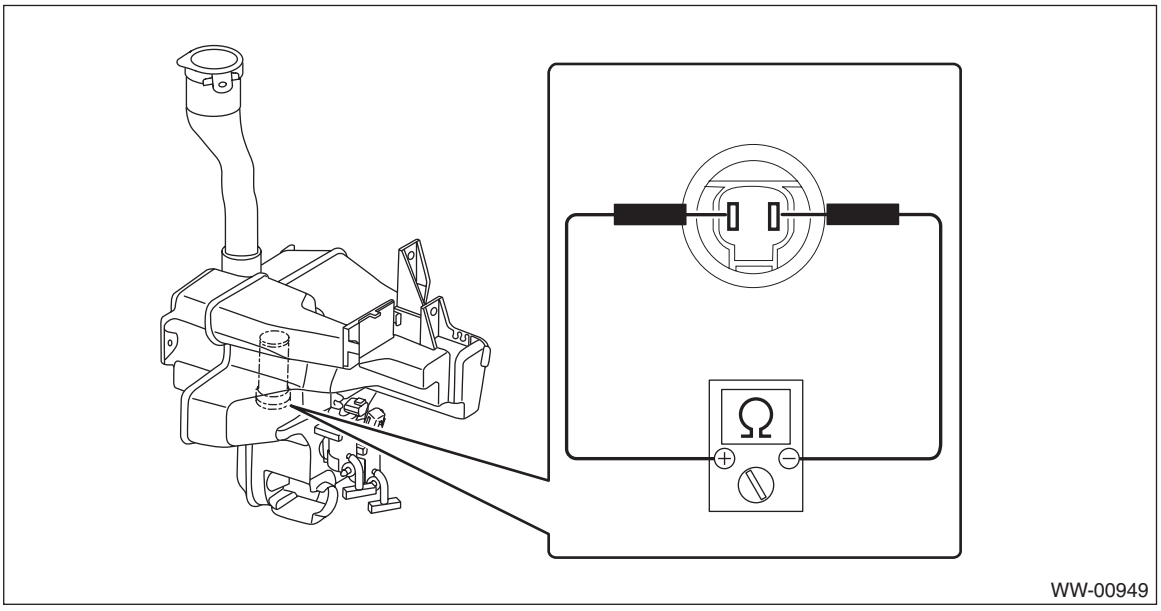
## 2. WASHER FLUID LEVEL SENSOR

1) Check the connection status of washer fluid level sensor connector.
2) Does the low washer fluid warning light illuminate after draining the washer fluid? And does the low washer fluid warning light go off after refilling the washer fluid?
- **Yes → Normal operation.**
- **No → Perform step 3.**

3) Using a tester, measure the voltage of the washer fluid level sensor connector.
   (1) Is the voltage approx. 8.5 V or more?
   - **Yes → Perform step 4.**
   - **No → Check harness, meter and integrated unit, and replace if necessary.**

4) Does the meter indicator illuminate if you short the washer fluid level sensor connector?
- **Yes → Perform step 5.**
- **No → Check meter and integrated unit, and replace if necessary.**

5) Using a tester, measure the resistance of the washer fluid level sensor.
   (1) Turn over the mud guard.
   (2) Measure the resistance of the washer fluid level sensor.



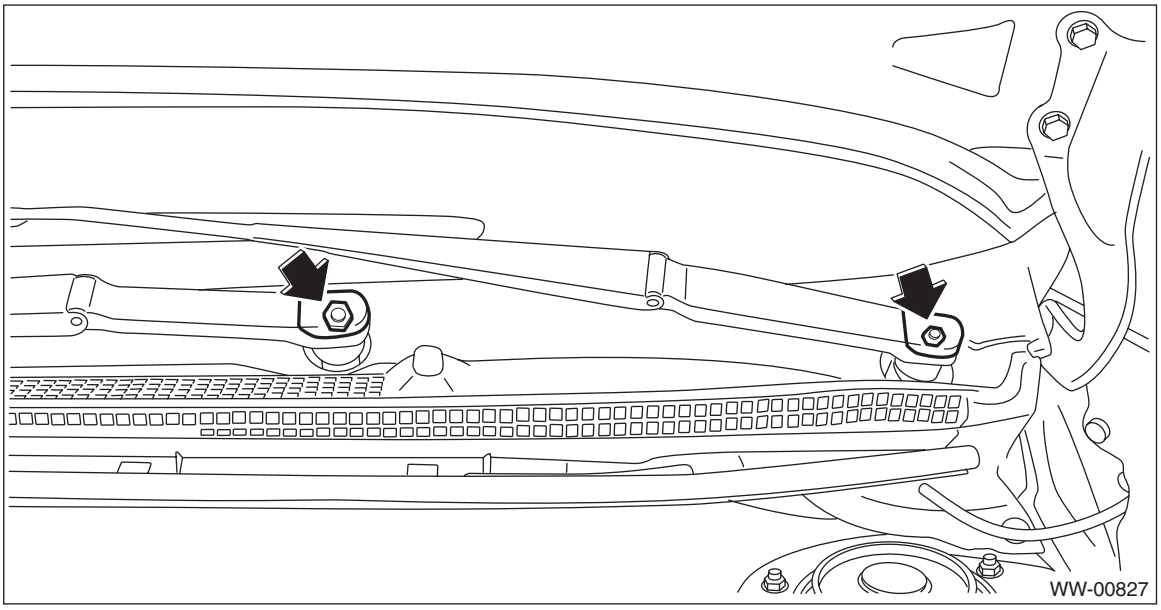
| Amount of washer fluid in the tank | Standard |
|---|---|
| No remaining quantity (ON) | Less than 10 Ω |
| There is remaining quantity (OFF) | 1 MΩ or more |

   (3) Is the resistance within the standard?
   - **Yes → Normal operation.**
   - **No → Replace the washer fluid level sensor along with the washer tank.**

# 7. Front Wiper Arm

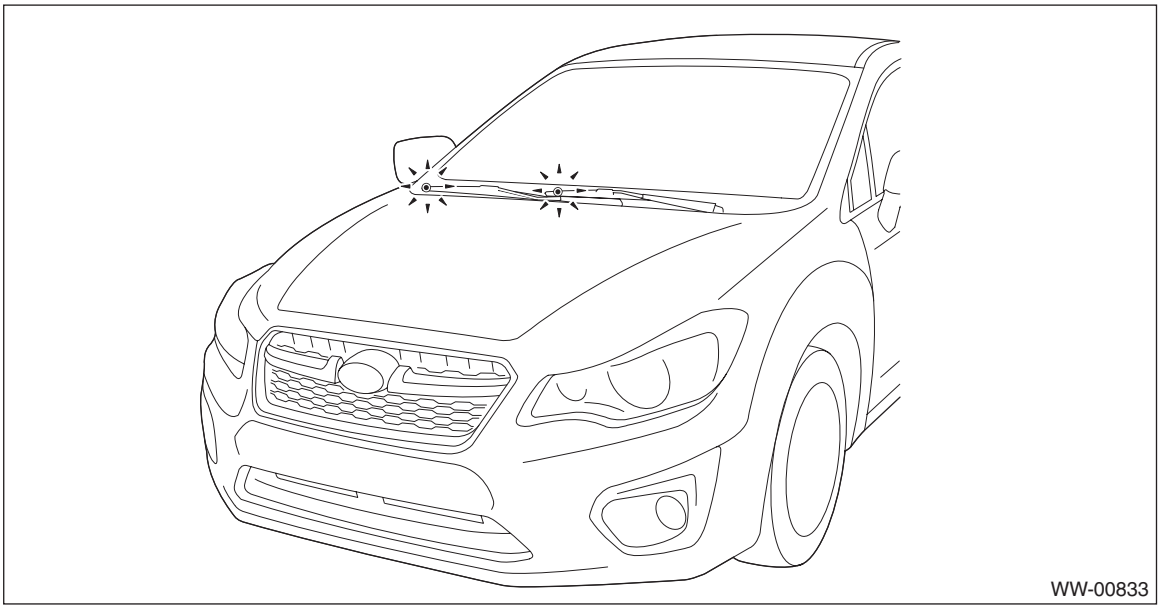
## A: REMOVAL

1) Open the hood COMPL - front.
2) Remove the arm assembly - windshield wiper.
   (1) Remove the cover - windshield wiper arm.
   (2) Remove the nuts, and remove the arm assembly - windshield wiper.



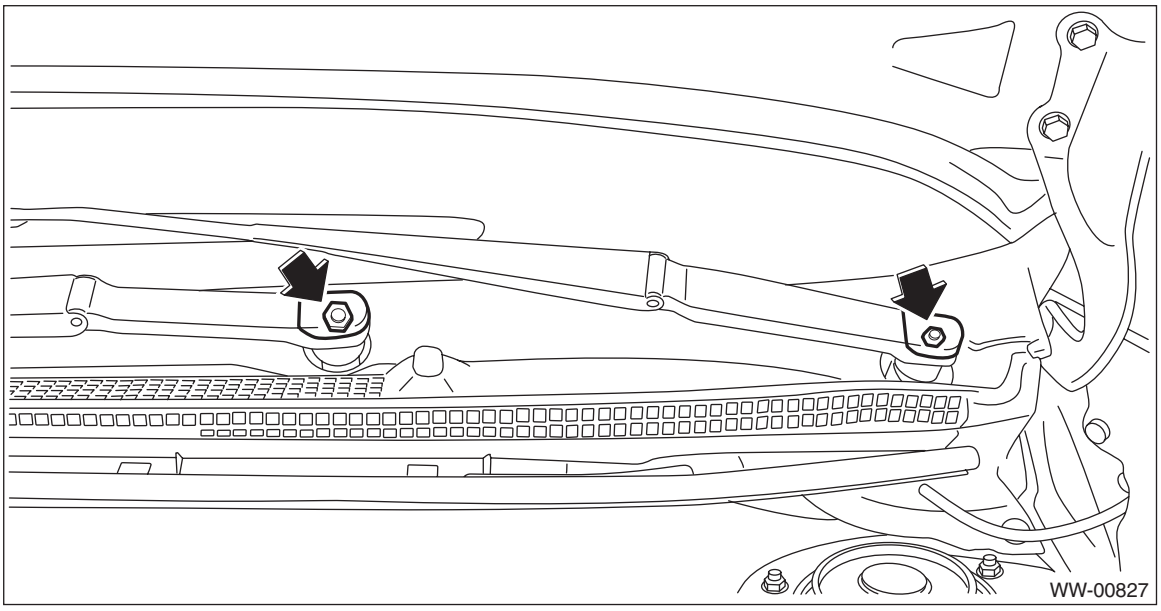
## B: INSTALLATION

1) Install the arm assembly - windshield wiper.
   (1) Assemble the arm assembly - windshield wiper so that the blade assembly - windshield wiper is aligned to the ceramic print point mark of the windshield glass.



(2) Tighten the arm assembly - windshield wiper to specified torque and install the cap.

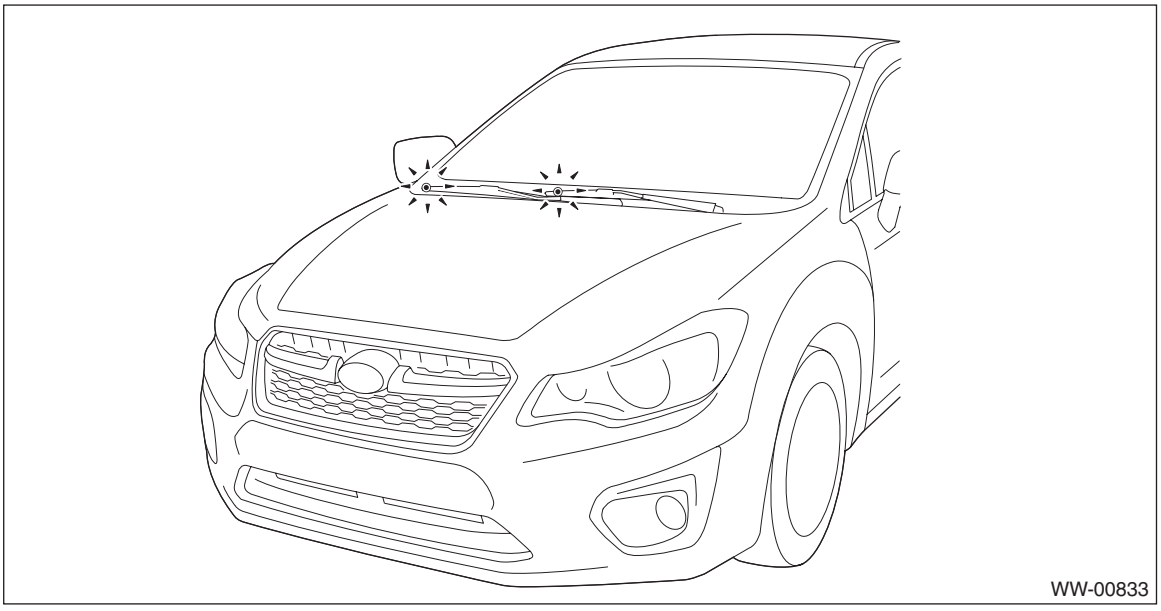
***Tightening torque:***
***22 N·m (2.24 kgf-m, 16.2 ft-lb)***



2) Check the position of windshield wiper. <Ref. to WW-28, ADJUSTMENT, Front Wiper Arm.>

## C: ADJUSTMENT

1) Operate the windshield wiper once.
2) Check that the wiper blade is aligned with the point mark.

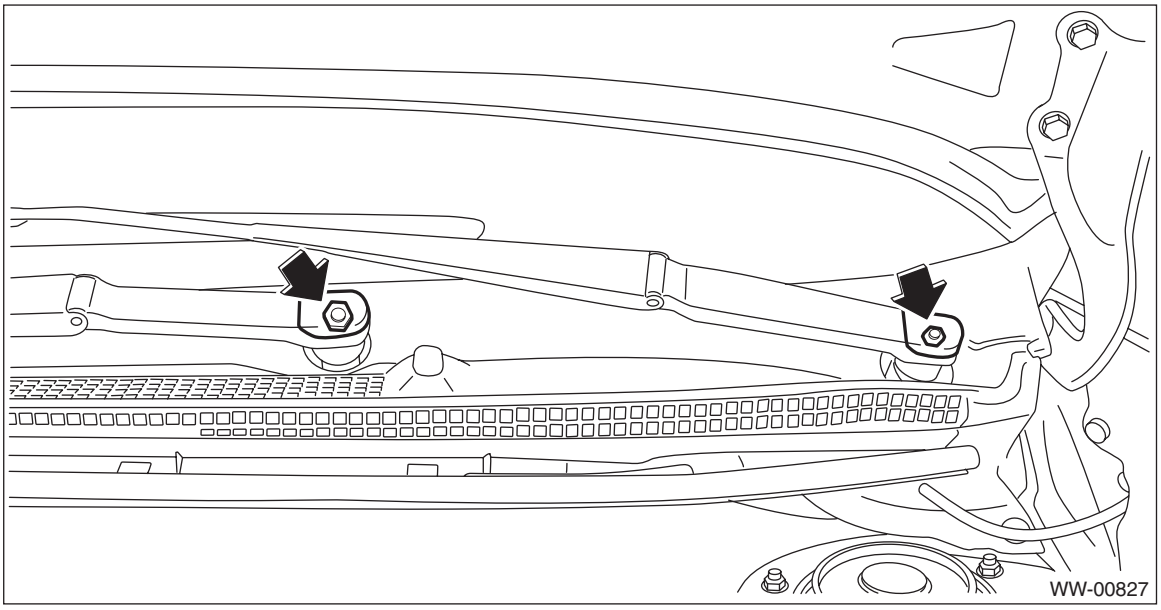


3) If the wiper blade is not aligned with the point mark, perform the removal and installation of the windshield wiper. <Ref. to WW-27, REMOVAL, Front Wiper Arm.>

# 8. Front Wiper Motor and Link

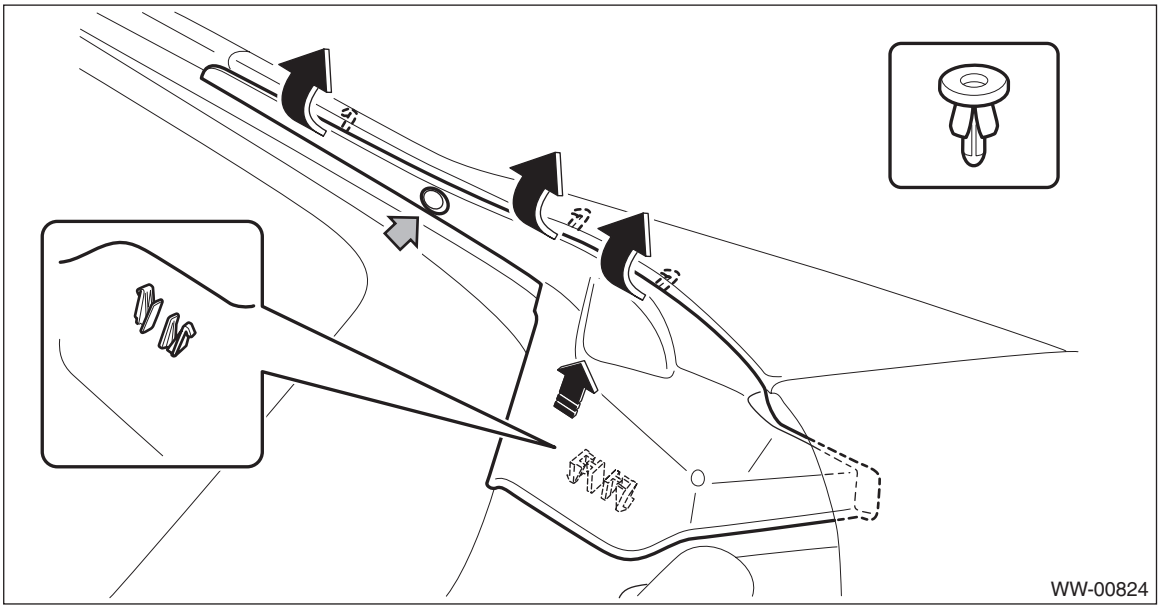
## A: REMOVAL

1) Disconnect the ground cable from battery.
2) Remove the arm assembly - windshield wiper.
   (1) Remove the cover - windshield wiper arm.
   (2) Remove the nuts, and remove the arm assembly - windshield wiper.



3) Remove the cowl panel - side.
   (1) Remove the clips.
   (2) Release the claws, and then remove the cowl panel - side.

**CAUTION:**
**Pulling with excessive force may damage the cowl panel - side. If it is difficult to remove, use a plastic remover or equivalent tool.**



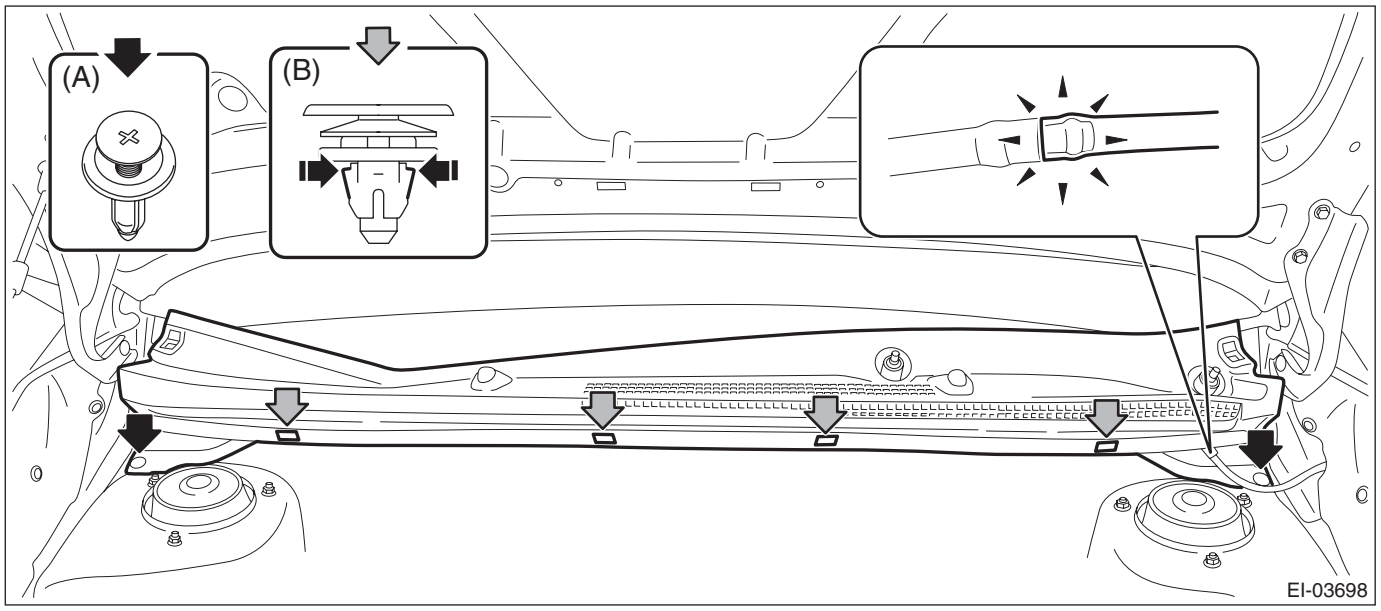
4) Remove the cowl panel assembly.

**CAUTION:**
**Before removing the cowl panel, use an air blower and nylon brush to sweep gravel from the lower area of the front side of the glass.**

(1) Disconnect the hose - windshield washer.
(2) Remove clips (A).
(3) Check the direction of the clip (B), and push the claws from both sides to remove it.

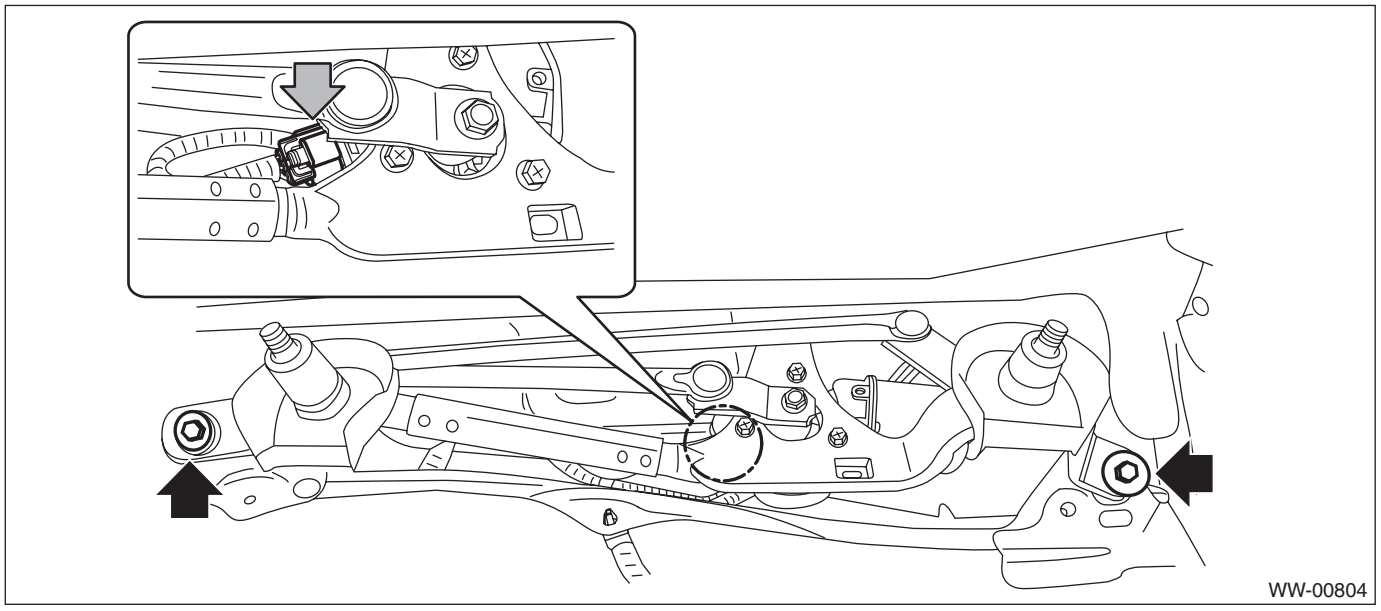
**CAUTION:**
**When removing the clip (B), push the claw of the clip from both sides.**
**Be careful because the clips (B) can be damaged if you pull unnecessarily hard on them.**

(4) Remove the cowl panel assembly by pulling it out towards the front of the vehicle.

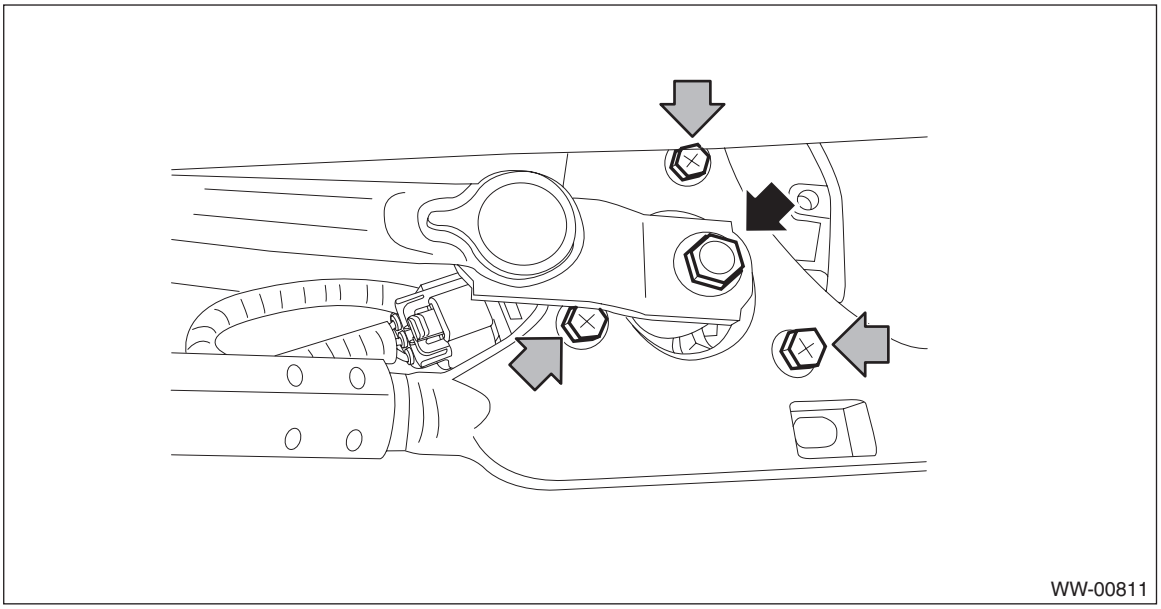


5) Remove the link assembly - windshield wiper.

(1) Disconnect the connector of the motor assembly - windshield wiper.
(2) Remove the bolts and harness clips, and remove the link assembly - windshield wiper.



6) Remove the motor assembly - windshield wiper.
(1) Remove the nuts on the link plate and the motor assembly - windshield wiper, and disconnect from the link assembly - windshield wiper.
(2) Remove the bolts, and remove the motor assembly - windshield wiper.



## B: INSTALLATION

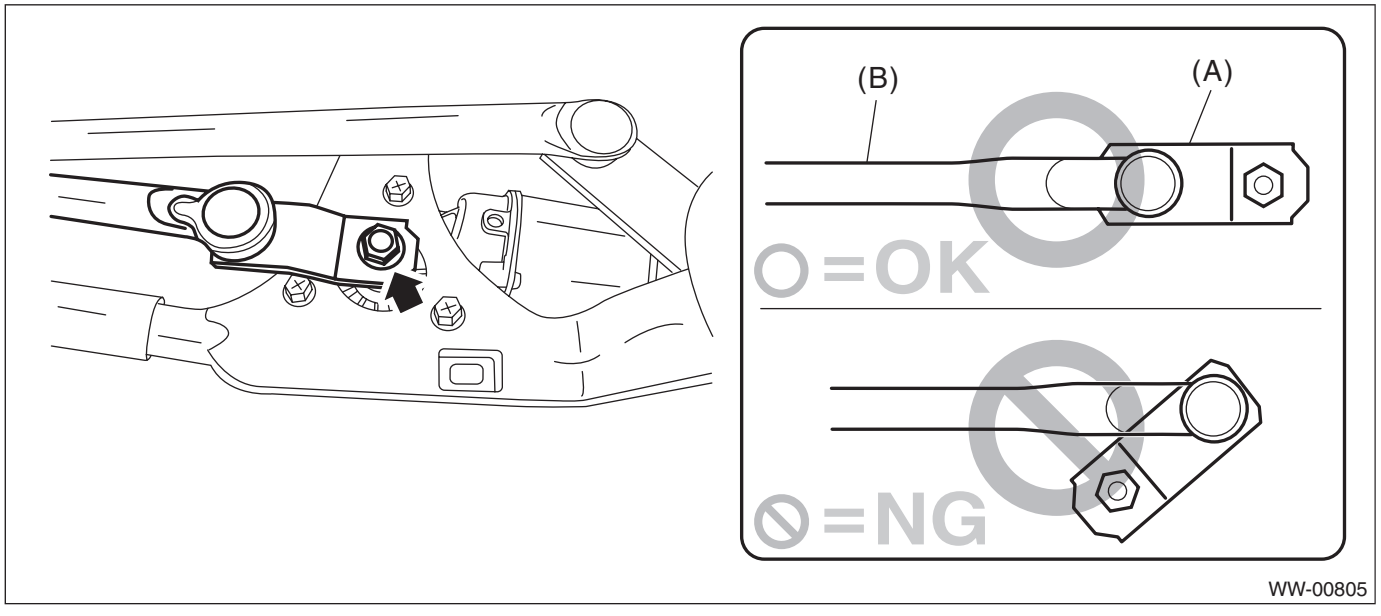
**CAUTION:**
**Before installing the windshield glass and cowl panel, make sure there are no gravel in the installing area.**

1) Connect the battery ground terminal.
2) To confirm that the motor assembly - windshield wiper is at the auto stop position, connect the harness to the motor and turn the wiper switch to ON/OFF once.

**CAUTION:**
**During motor operation, do not touch the movable part.**

3) Disconnect the ground cable from battery.
4) Install the motor assembly - windshield wiper.

**CAUTION:**
**Tighten the nut where rod (B) and link plate (A) is aligned in a straight line.**



***Tightening torque:***
***Tighten to 8.5 N·m (0.87 kgf-m, 6.3 ft-lb) by 115°.***

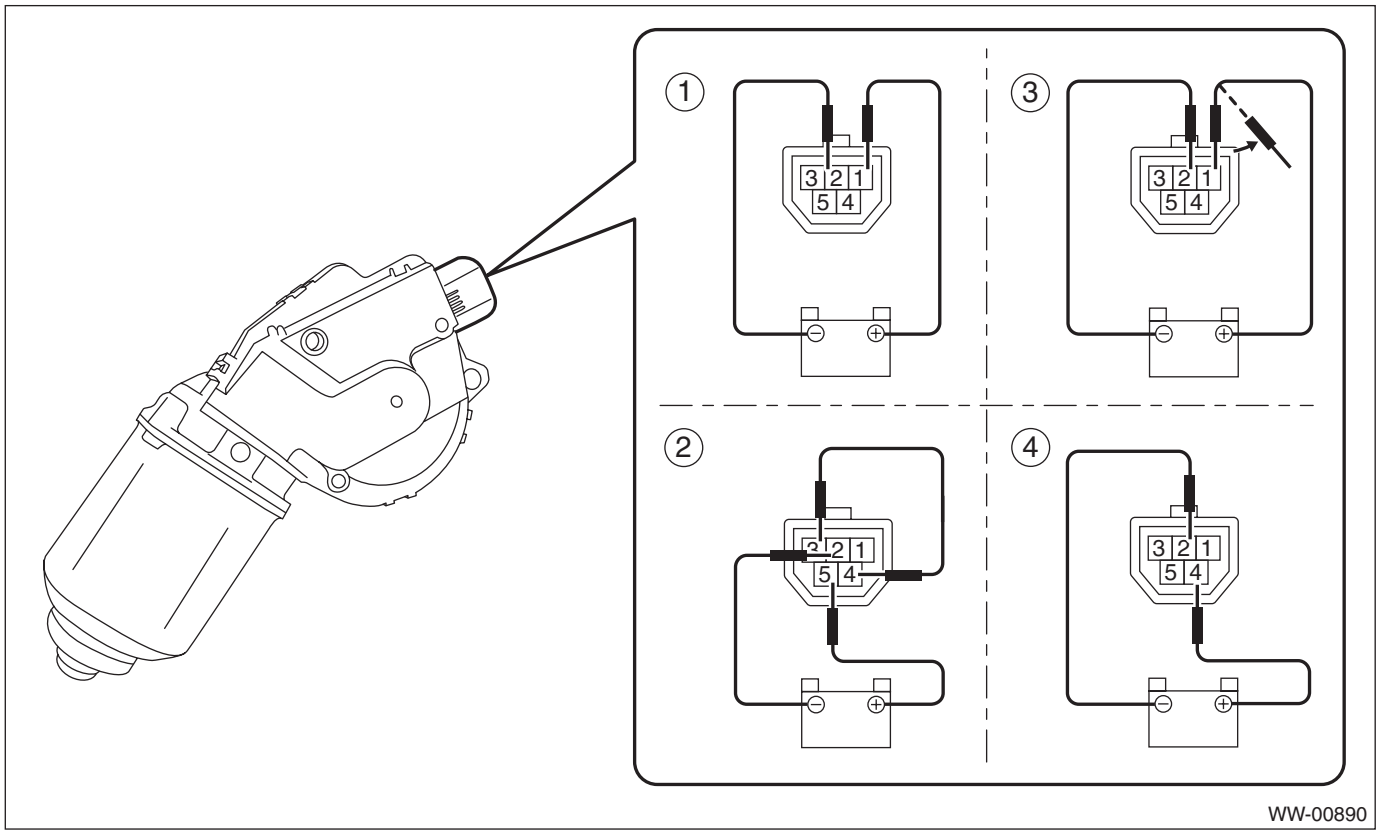
5) Install the link assembly - windshield wiper and cowl panel in the reverse order of removal.

***Tightening torque:***
***Refer to "COMPONENT" of "General Description". <Ref. to WW-2, FRONT WIPER, COMPONENT, General Description.>***

## C: INSPECTION

1) When the battery is connected to the terminal of connectors, confirm that the motor operates at low speed.
2) When the battery is connected to the terminal of connectors, confirm that the motor operates at high speed.
3) Connect the battery to terminals of the connector, and remove the terminal connection with motor rotating at low speed, and stop the motor assembly - windshield wiper in mid-operation.
4) Connect the battery and check that the motor stops at the automatic stop position after the motor operates at low speed again.

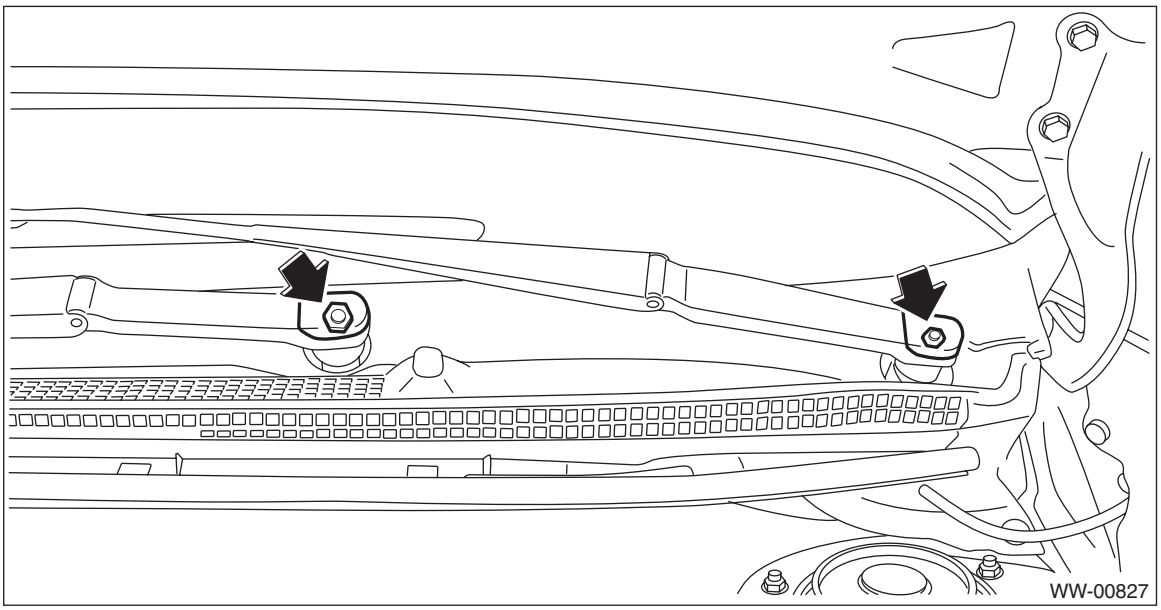
**CAUTION:**
**Fix the motor to prevent the motor from being shorted by moving during operation.**



# 9. Front Washer Nozzle

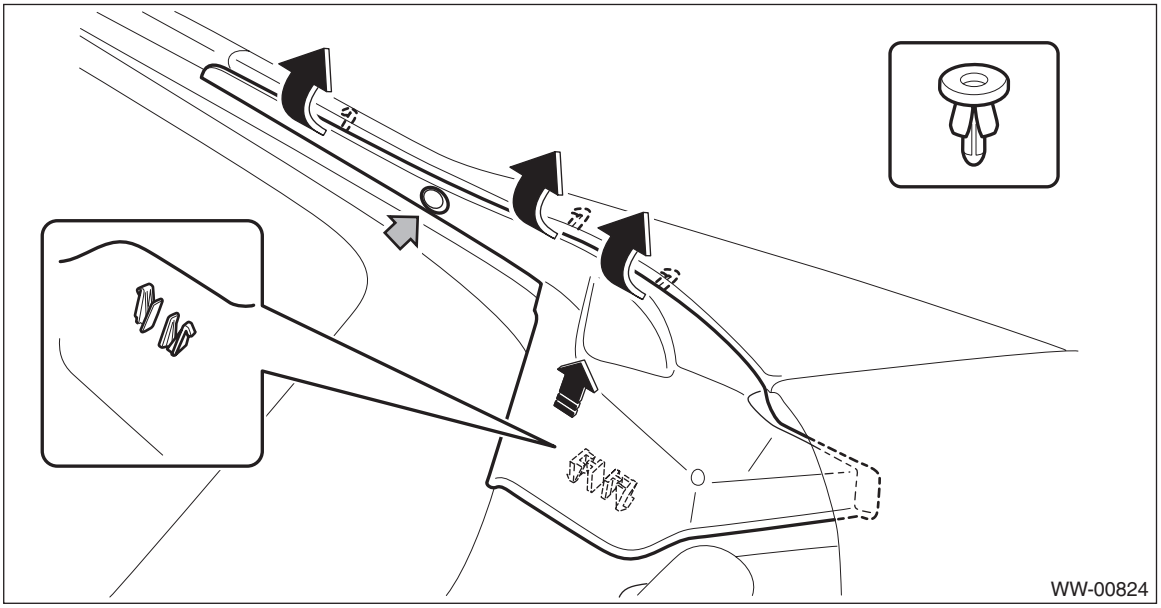
## A: REMOVAL

1) Open the hood COMPL - front.
2) Disconnect the ground cable from battery.
3) Remove the arm assembly - windshield wiper.
   (1) Remove the cover - windshield wiper arm.
   (2) Remove the nuts, and remove the arm assembly - windshield wiper.



4) Remove the cowl panel - side.
   (1) Remove the clips.
   (2) Release the claws, and then remove the cowl panel - side.

**CAUTION:**
**Pulling with excessive force may damage the cowl panel - side. If it is difficult to remove, use a plastic remover or equivalent tool.**



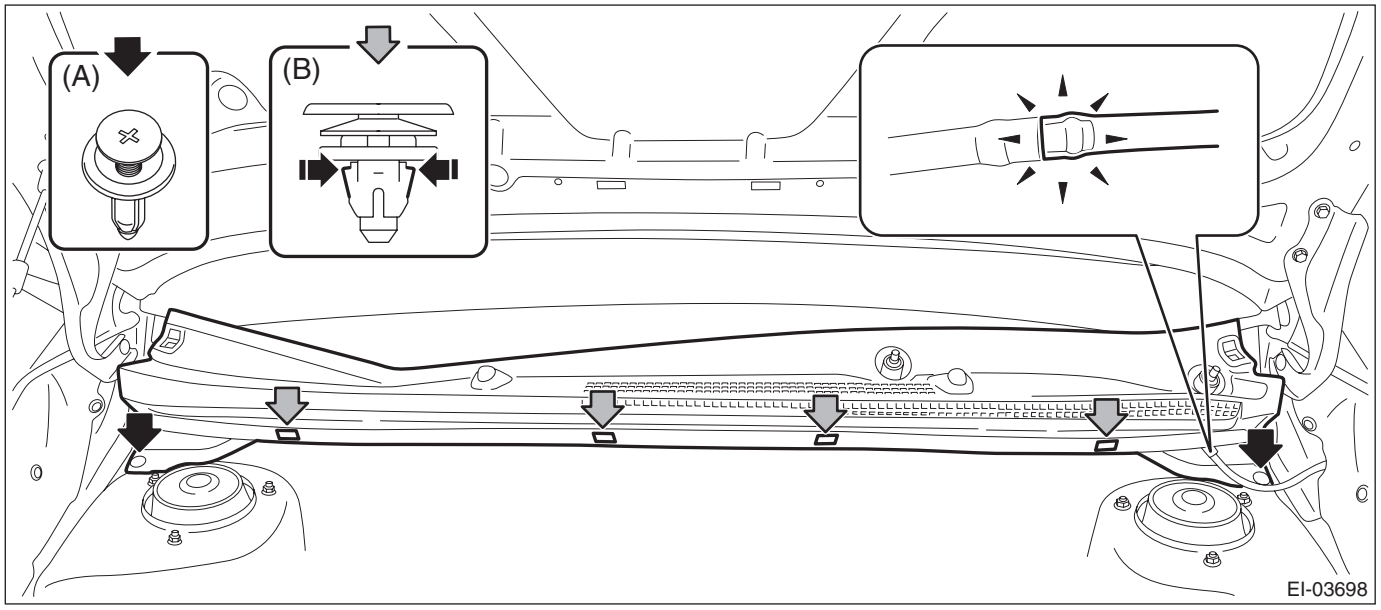
5) Remove the cowl panel assembly.

**CAUTION:**
**Before removing the cowl panel, use an air blower and nylon brush to sweep gravel from the lower area of the front side of the glass.**

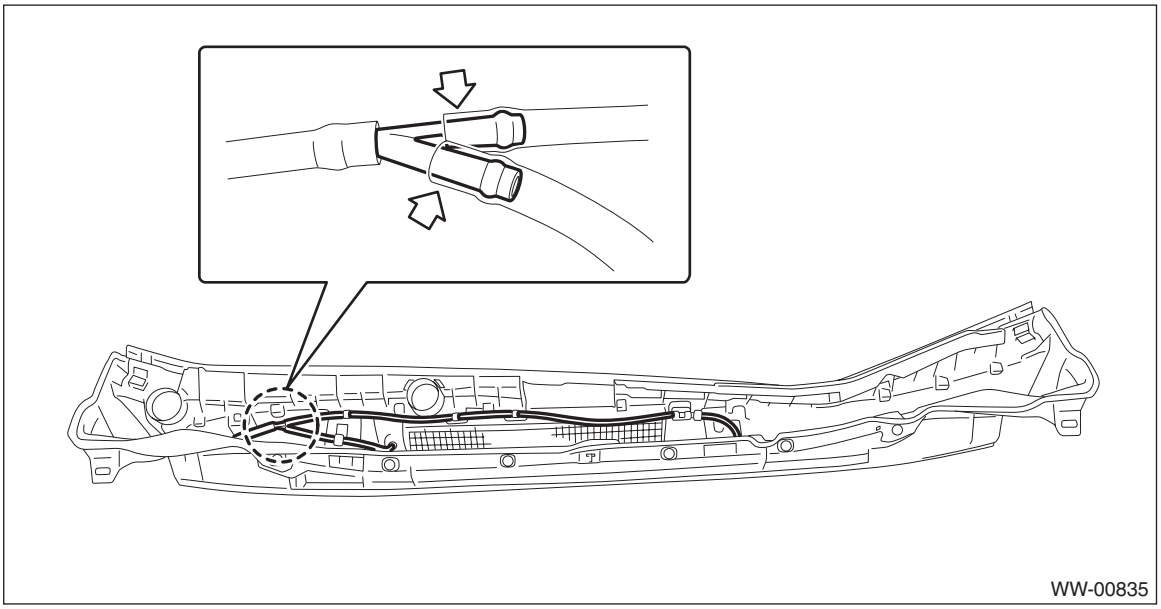
(1) Disconnect the hose - windshield washer.
(2) Remove clips (A).
(3) Check the direction of the clip (B), and push the claws from both sides to remove it.

**CAUTION:**
**When removing the clip (B), push the claw of the clip from both sides.**
**Be careful because the clips (B) can be damaged if you pull unnecessarily hard on them.**

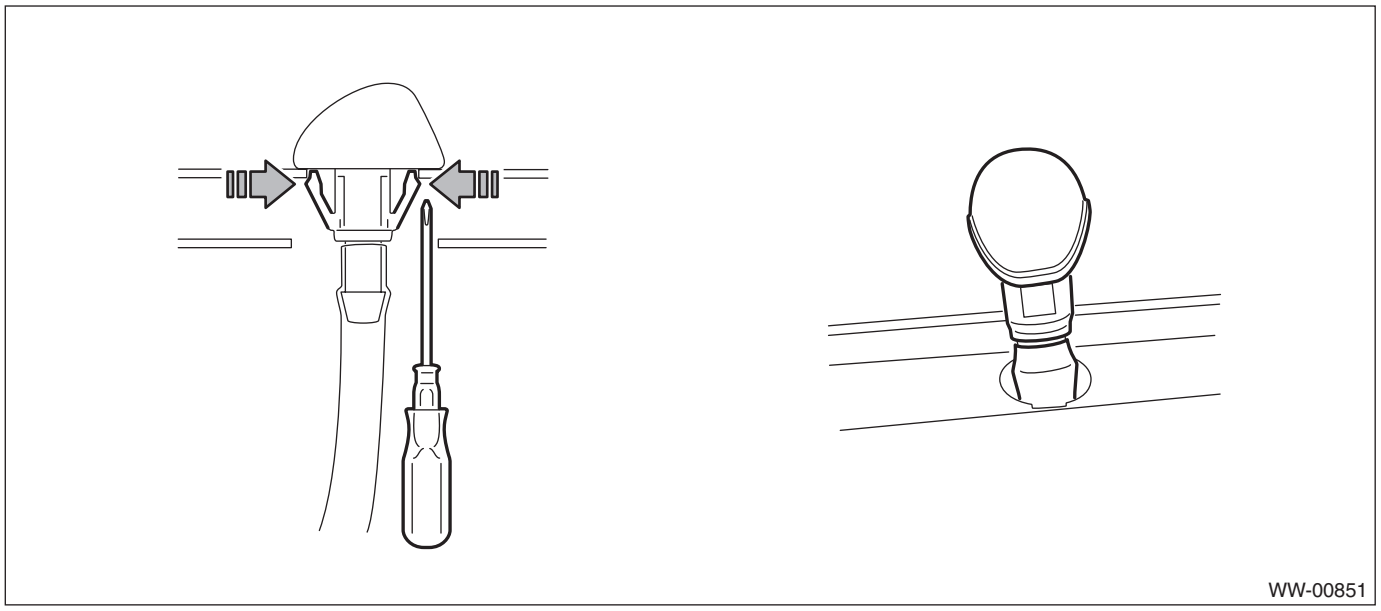
(4) Remove the cowl panel assembly by pulling it out towards the front of the vehicle.



6) Disconnect the hose - windshield washer.



7) Remove the nozzle - windshield washer.
(1) Push the claw using a flat tip screwdriver, etc.
(2) When the nozzle - windshield washer lifts up, pull out the nozzle - windshield washer using a clip remover, etc.
(3) Disconnect the hose - windshield washer, and remove the nozzle - windshield washer.



## B: INSTALLATION

**CAUTION:**
**Before installing the windshield glass and cowl panel, make sure there are no gravel in the installing area.**

1) Install each part in the reverse order of removal.

***Tightening torque:***
***Refer to "COMPONENT" of "General Description". <Ref. to WW-2, FRONT WIPER, COMPONENT, General Description.>***

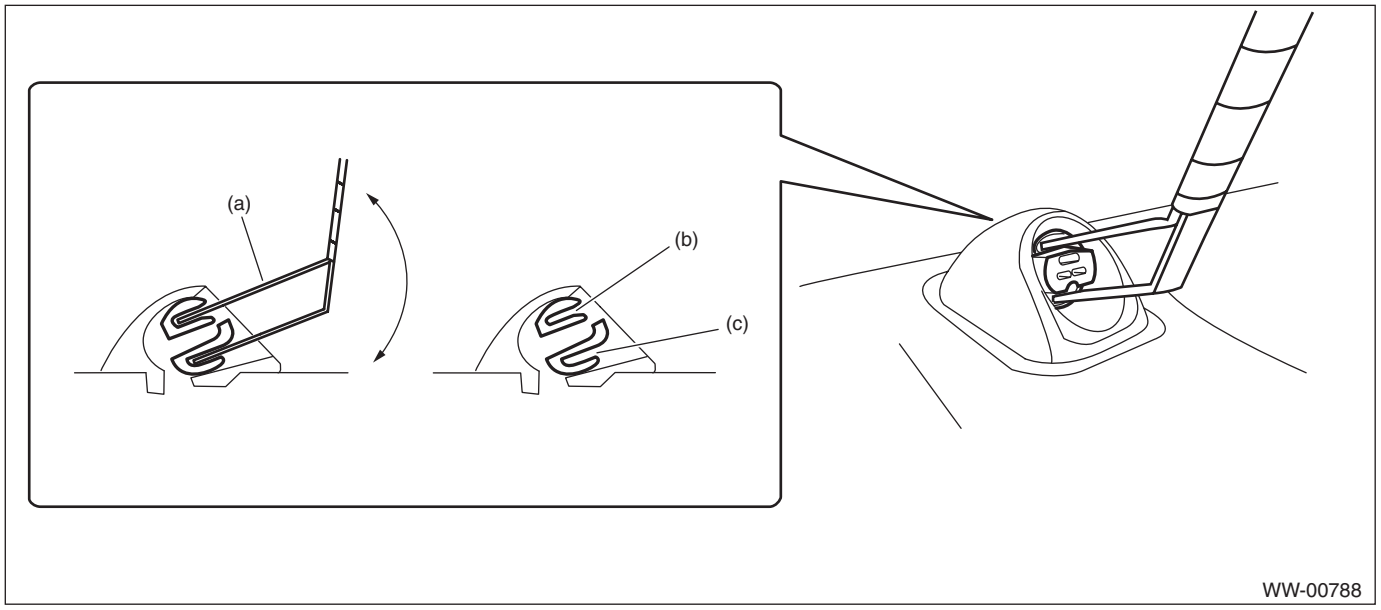
2) Adjust the position of the nozzle - windshield washer. <Ref. to WW-36, ADJUSTMENT, Front Washer Nozzle.>

## C: INSPECTION

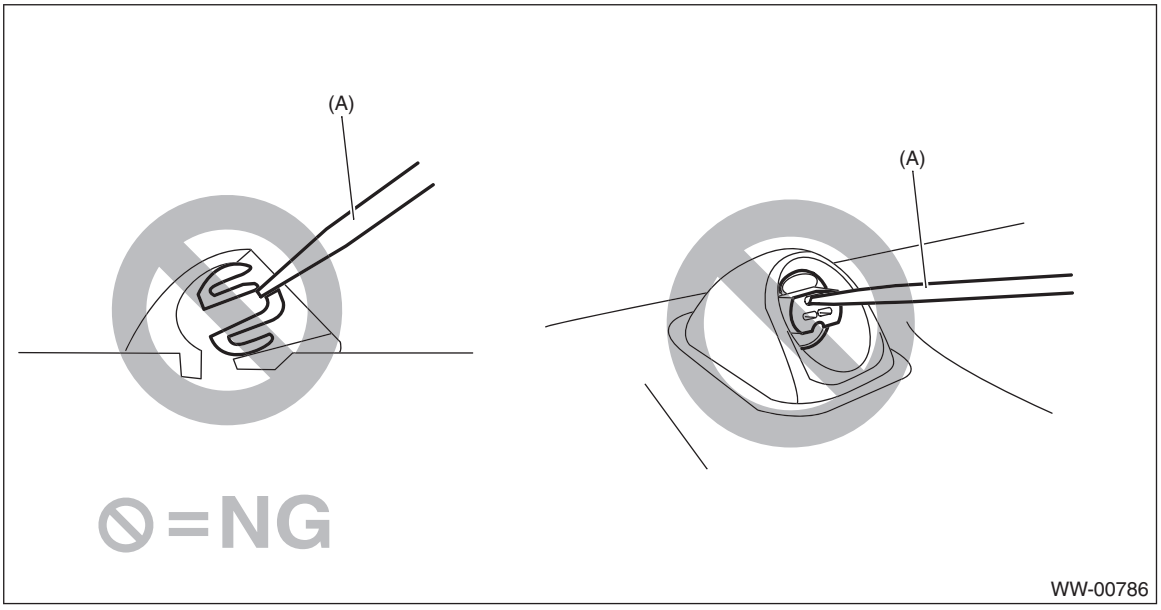
- Make sure the nozzle - windshield washer and the hose - windshield washer are not clogged.
- Make sure the hose - windshield washer is not bent.

## D: ADJUSTMENT

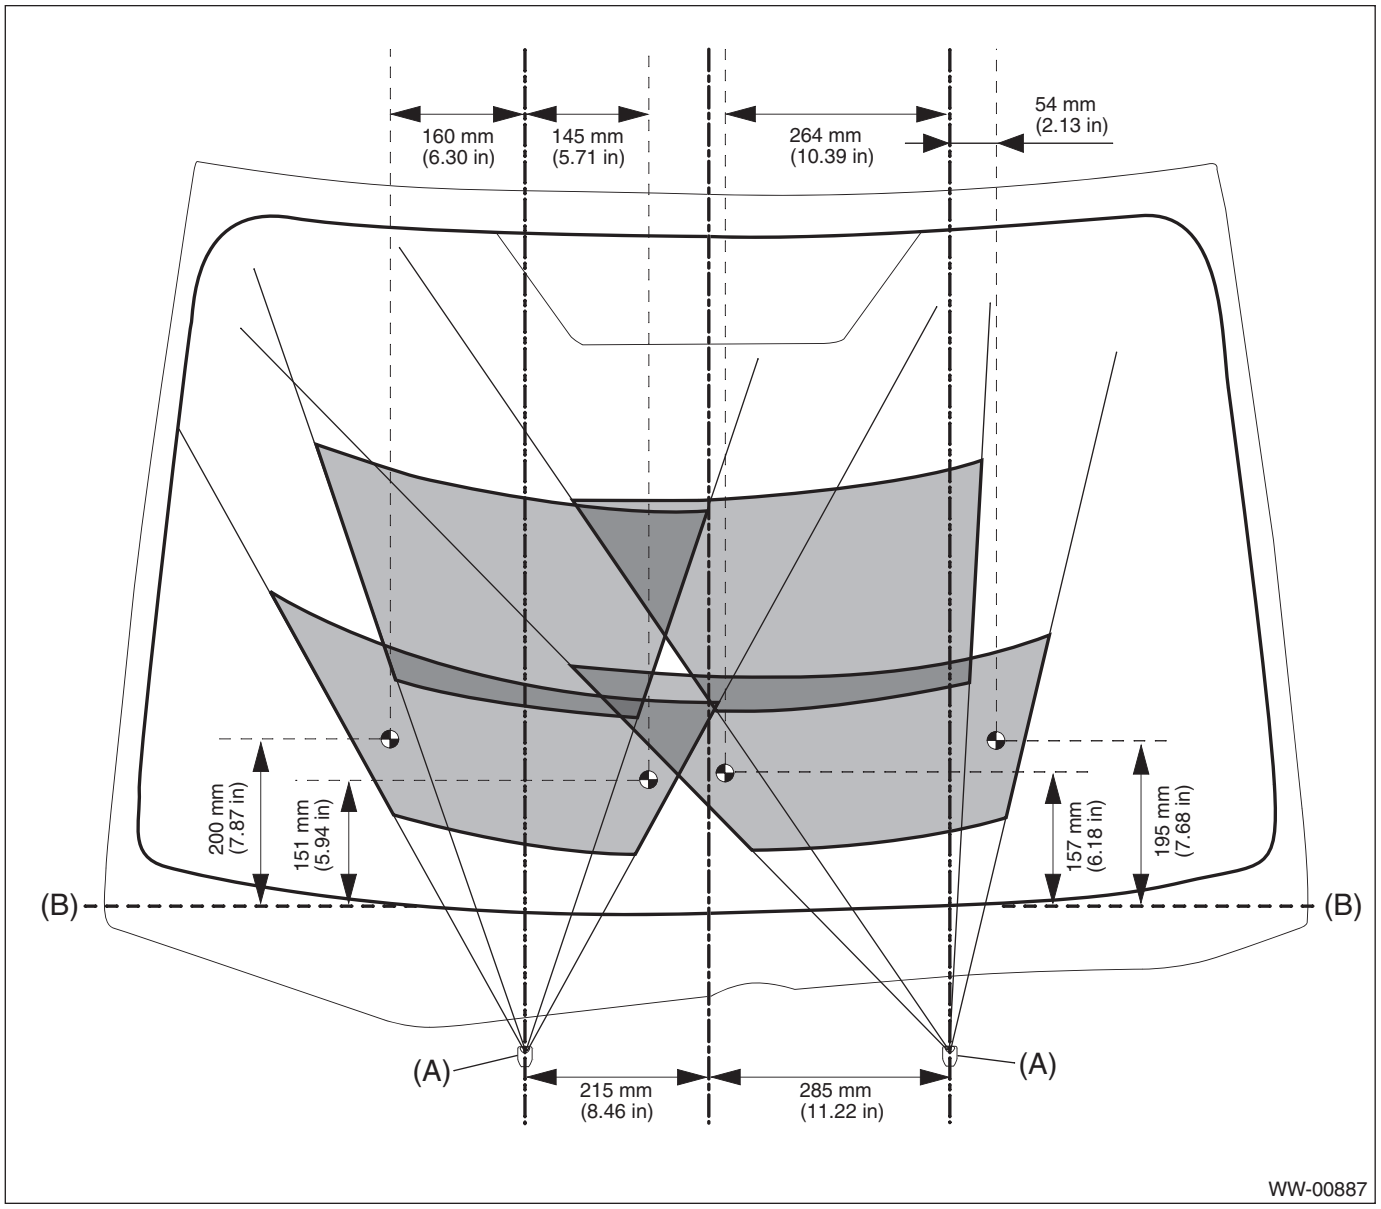
1) Turn the wiper switch to OFF position.
2) While the vehicle is at a standstill, insert the washer nozzle adjustment tool (a) into upper side (b) and lower side (c) of the nozzle - windshield washer to perform necessary adjustment.



**CAUTION:**
**The nozzle - windshield washer is made of resin. If precision screwdriver (A) or equivalent is inserted into discharge port for adjustment, the discharge port can be deformed, and washer fluid cannot be sprayed.**



3) Adjust the washer injection position as shown in the figure.

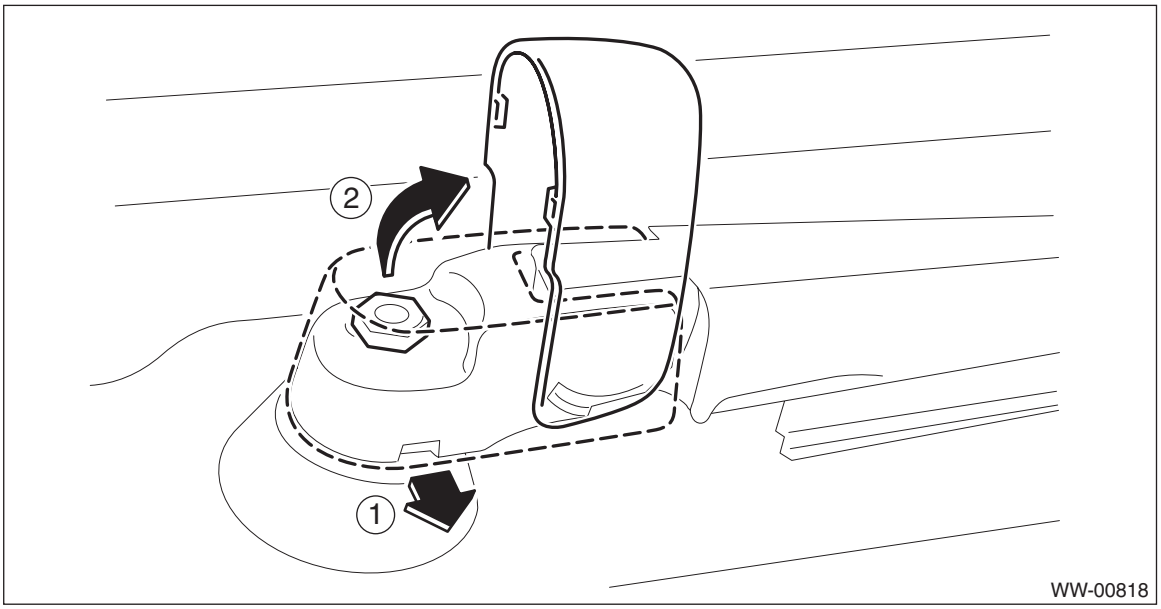


(A) Nozzle - windshield washer (B) Ceramic line

# 10.Rear Wiper Arm

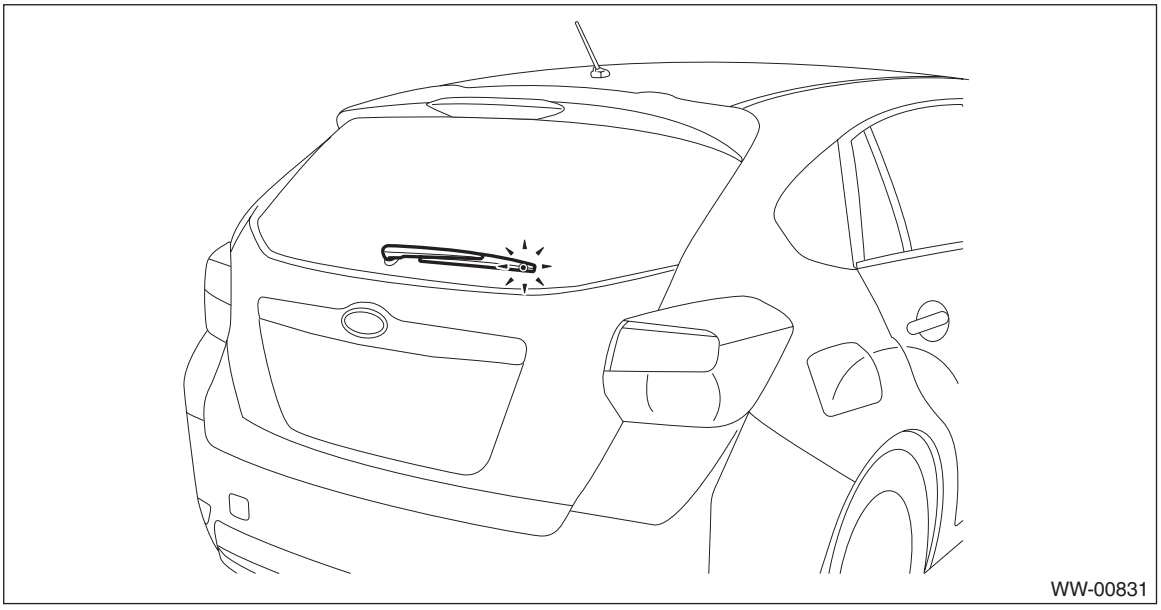
## A: REMOVAL

1) Pull up the cover - rear wiper arm.
2) Remove the nut, and remove the arm assembly - rear wiper.



## B: INSTALLATION

1) Install in the reverse order of removal.
2) Operate the rear wiper once.
3) Align the blade assembly - rear wiper with the marking on the glass, and then tighten the nut to the specified torque.

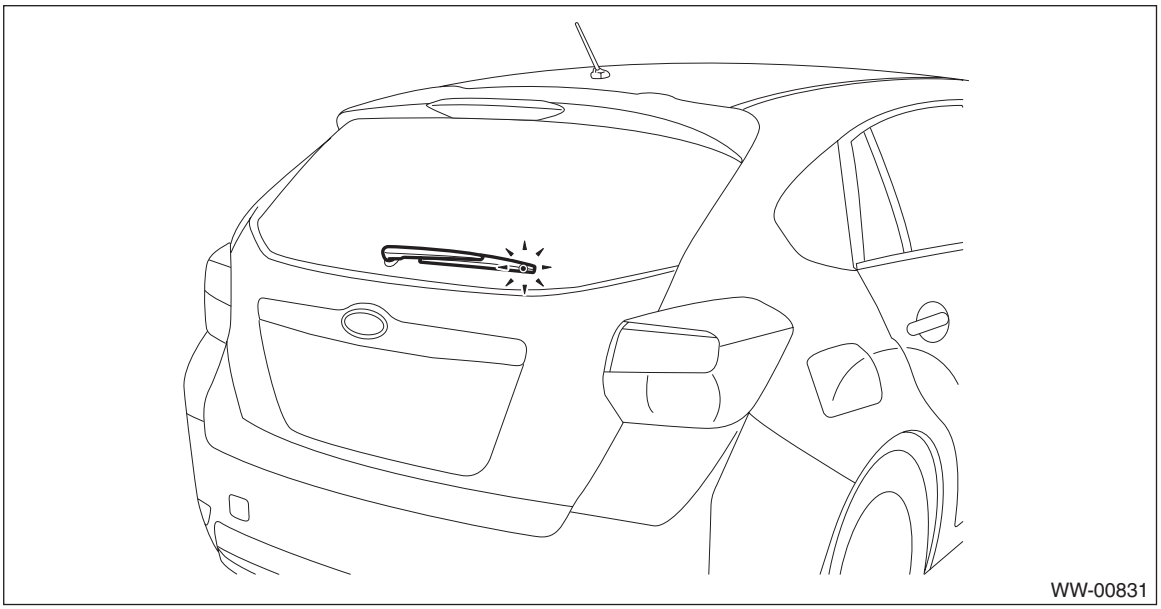


***Tightening torque:***
***8 N·m (0.82 kgf-m, 5.9 ft-lb)***

4) Operate the wiper to check whether the wiper blade aligns with the point mark. If not, perform installation over again.

## C: ADJUSTMENT

1) Operate the rear wiper once.
2) Align the blade assembly - rear wiper with the marking on the glass.

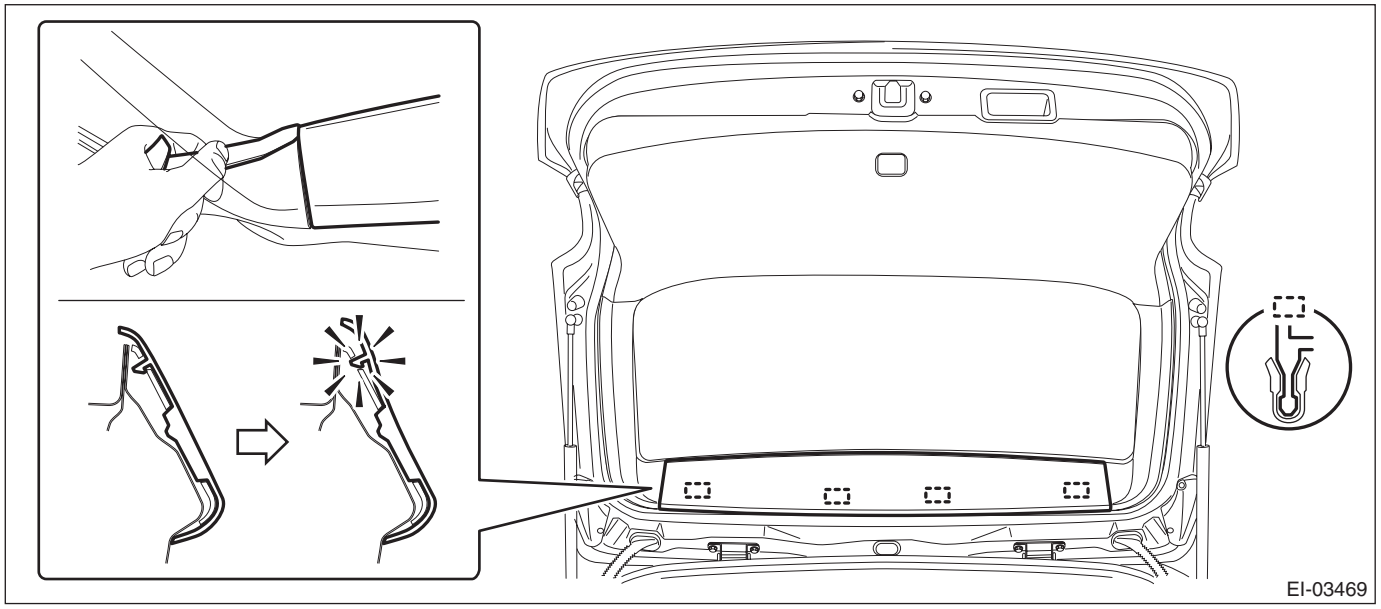


3) If the wiper blade is not aligned with the point mark, perform the removal of the rear wiper arm to align with the marking. <Ref. to WW-38, REMOVAL, Rear Wiper Arm.>

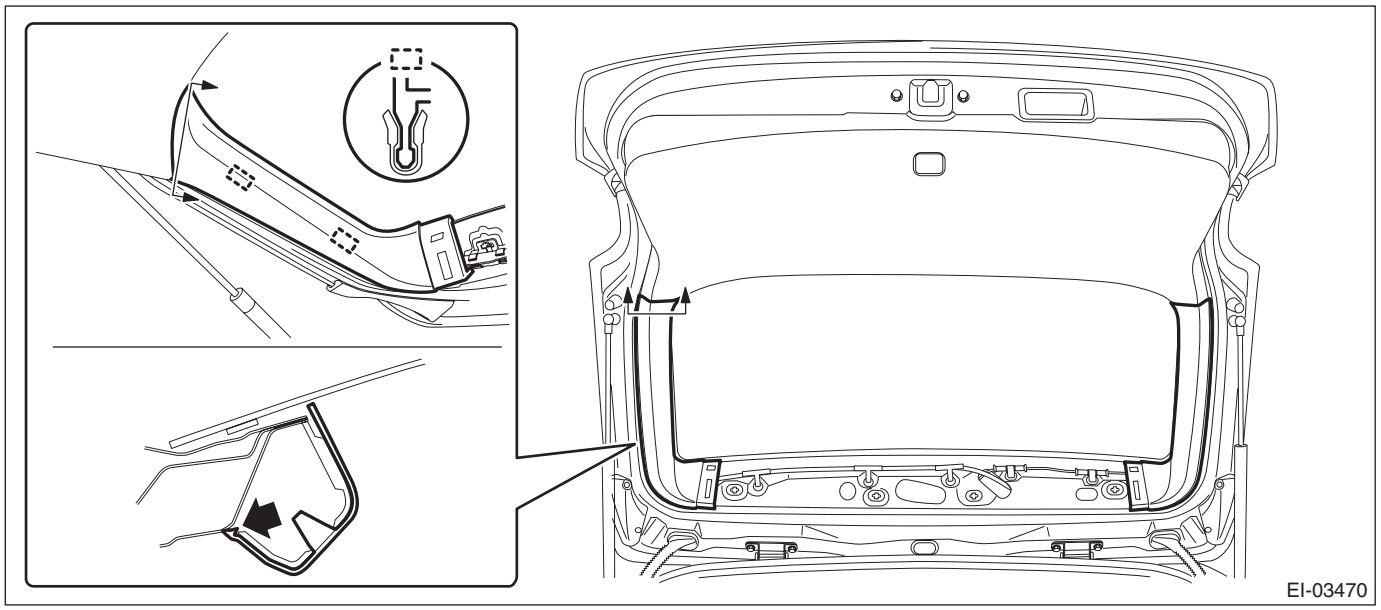
# 11.Rear Wiper Motor

## A: REMOVAL

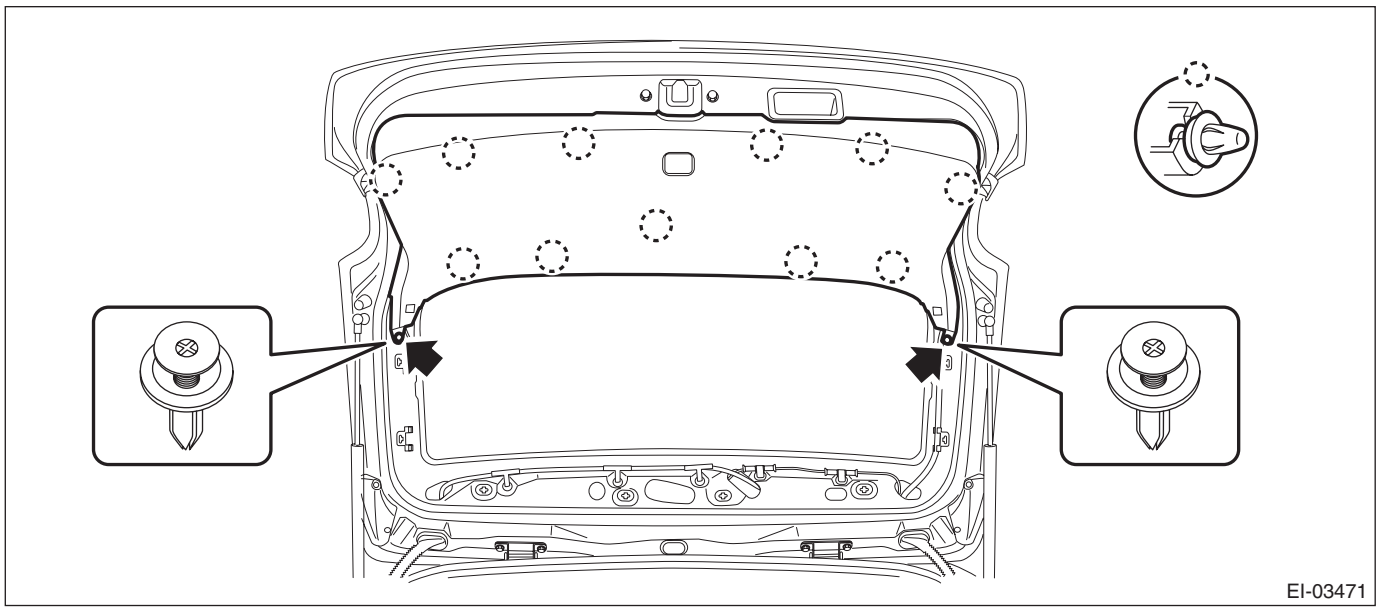
1) Disconnect the ground cable from battery.
2) Remove the trim panel - rear gate UPR.
   (1) Remove the claws on the trim edge.
   (2) Release the claws in the center of trim, and remove the trim panel - rear gate UPR.



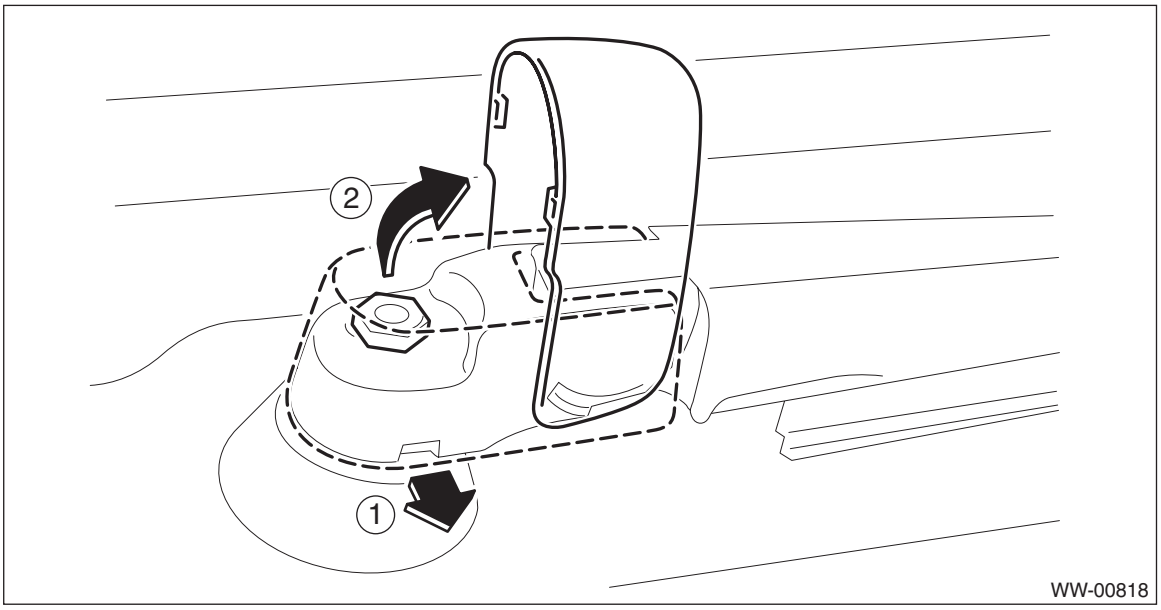
3) Remove the trim panel - rear gate pillar side.
   (1) Release the claws.
   (2) Remove the claws on the bottom of trim, and remove the trim panel - rear gate pillar side.



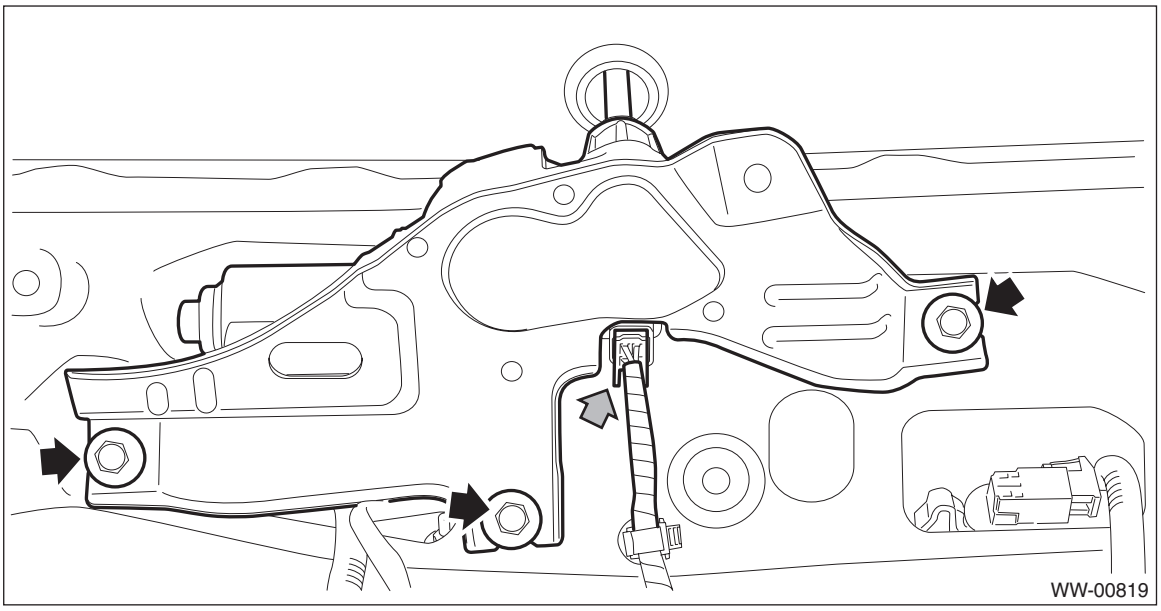
4) Remove the trim panel - rear gate LWR.
   (1) Remove the clips on both ends.
   (2) Release the clips, and remove the trim panel - rear gate LWR.



5) Remove the arm assembly - rear wiper.
   (1) Remove the cover - rear wiper arm.
   (2) Remove the nut, and remove the arm assembly - rear wiper.

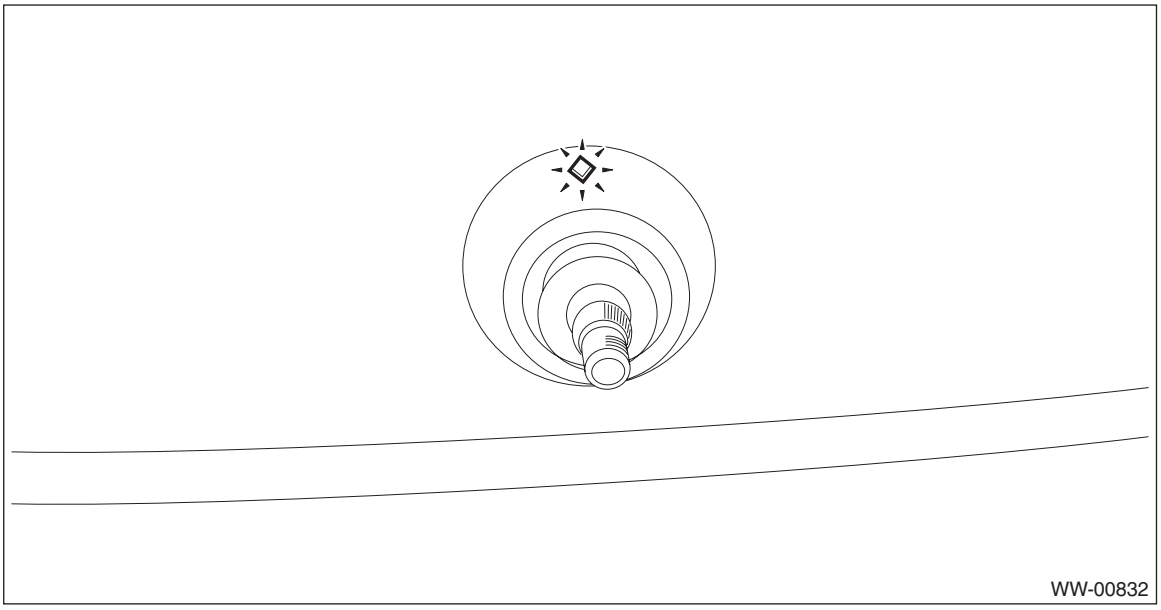


6) Remove the motor assembly - rear wiper.
   (1) Disconnect the harness connector of the motor assembly - rear wiper.
   (2) Remove the bolts, and remove the motor assembly - rear wiper.



## B: INSTALLATION

1) Install each part in the reverse order of removal.
2) Check that the mark on the cap - pivot wiper faces up, as shown in the figure.

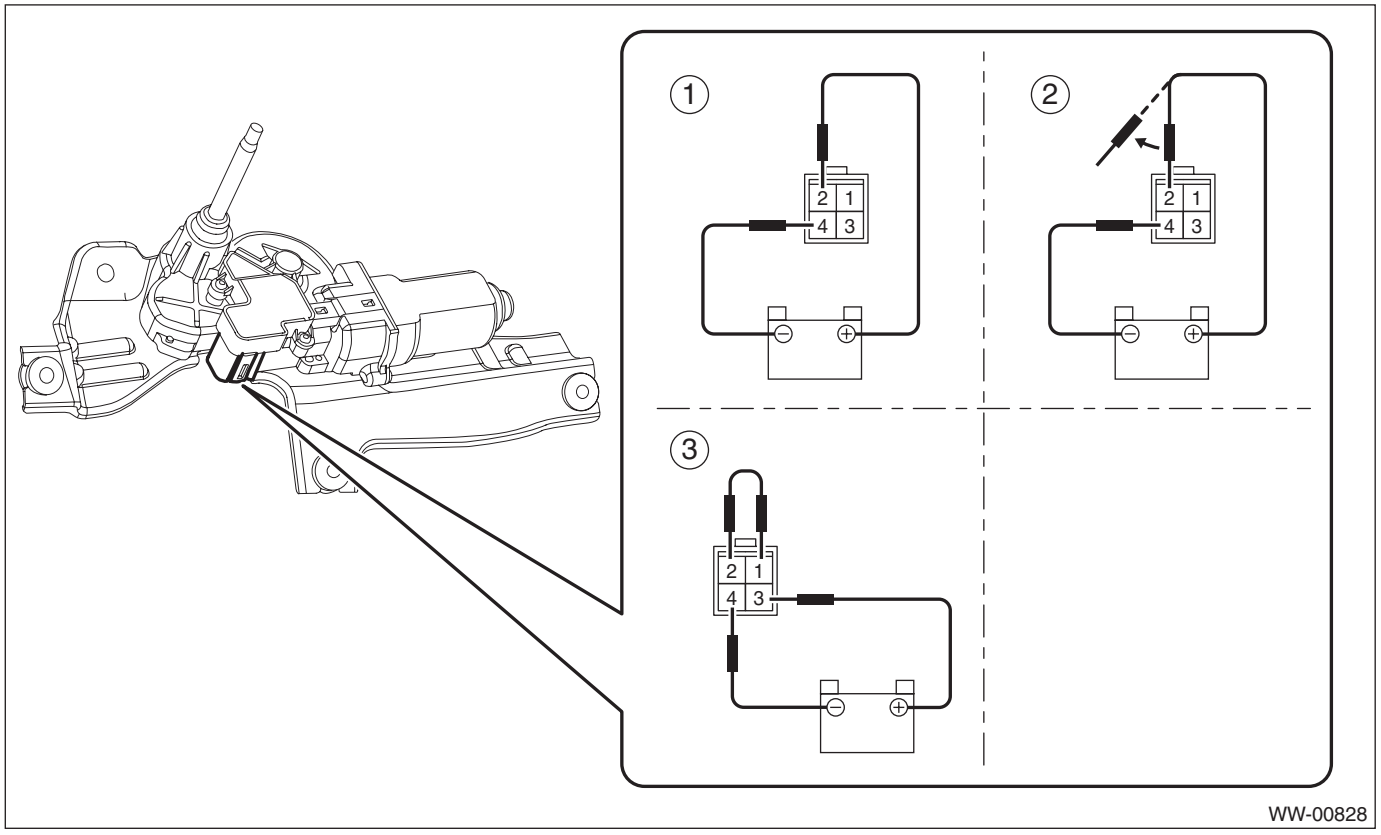


***Tightening torque:***
***Refer to "COMPONENT" of "General Description". <Ref. to WW-3, REAR WIPER, COMPONENT, General Description.>***

## C: INSPECTION

1) Connect the battery to the rear wiper motor connector, and check that the motor assembly - rear wiper operates.
2) Connect the battery to terminals of the connector, and remove the terminal connection with motor rotating, and stop the motor assembly - rear wiper in mid-operation.
3) Connect the battery and check that the motor stops at the automatic stop position after the motor operates at low speed again.

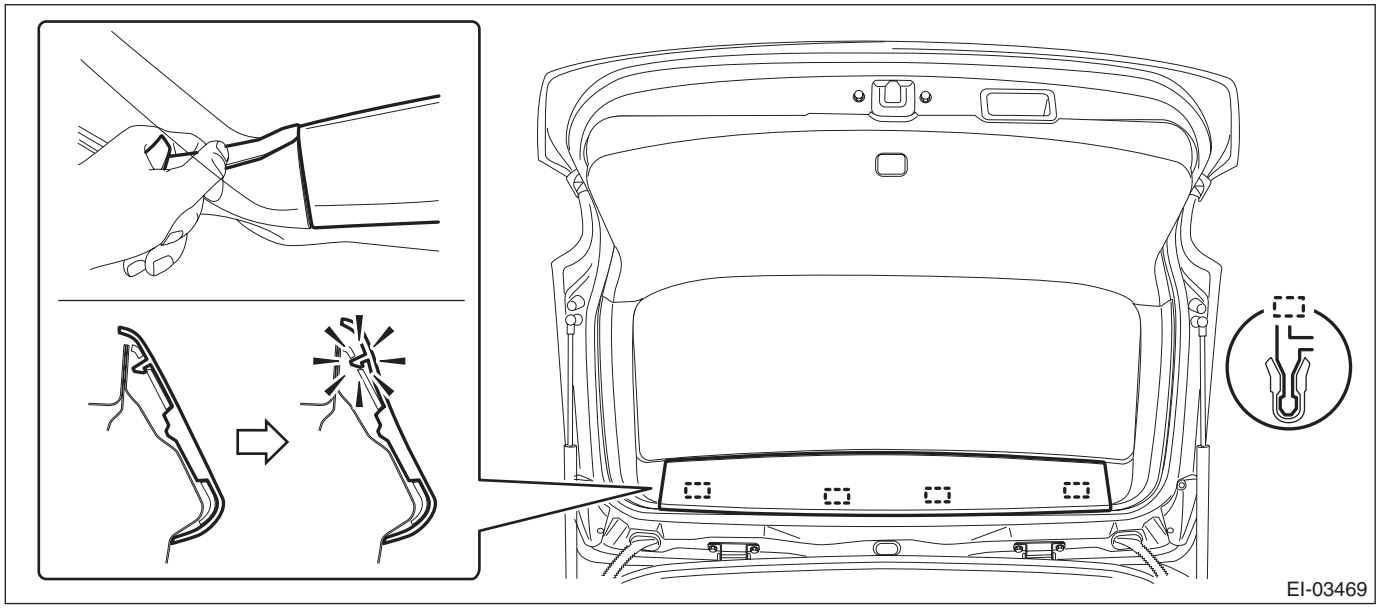
**CAUTION:**
**Fix the motor to prevent the motor from being shorted by moving during operation.**



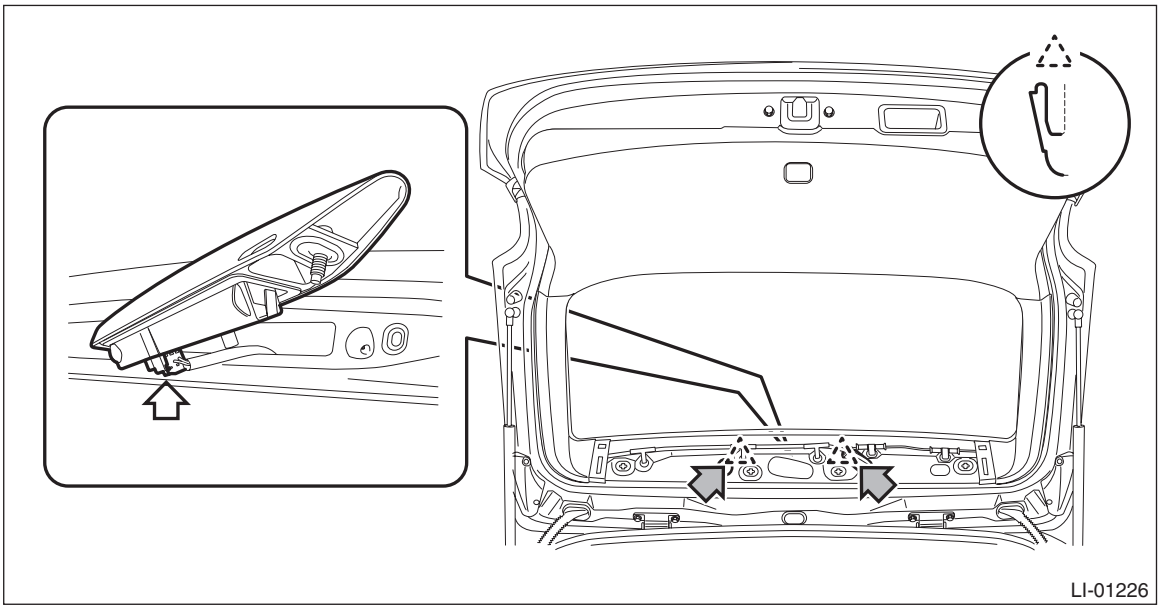
# 12.Rear Washer

## A: REMOVAL

1) Disconnect the ground cable from battery.
2) Remove the trim panel - rear gate UPR.
   (1) Remove the claws on the trim edge.
   (2) Release the claws in the center of trim, and remove the trim panel - rear gate UPR.



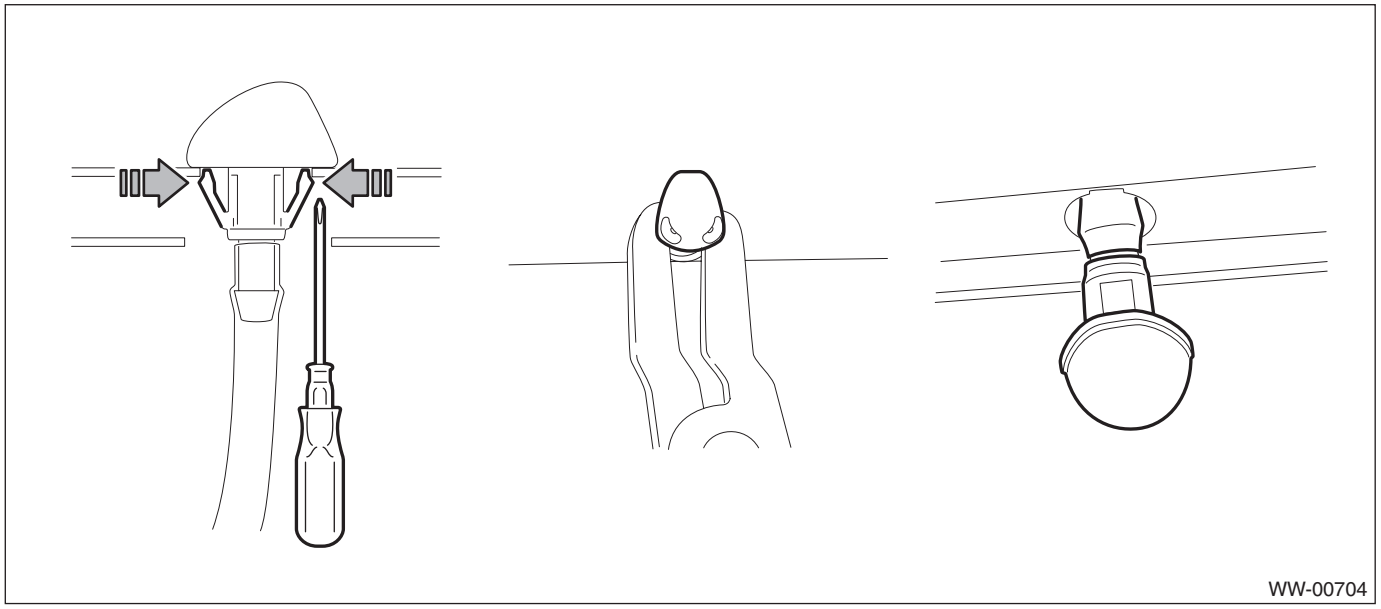
3) Remove the light assembly - high-mounted.
   (1) Remove the nut.
   (2) Disconnect the connector and remove the light assembly - high-mounted.



4) Remove the nozzle - rear washer.

**CAUTION:**
**Before removing, apply protective tape to the body panel and used tools not to damage the panel - rear gate.**

(1) Push the claw using a flat tip screwdriver, etc.
(2) When the nozzle - rear washer lifts up, pull out the nozzle - rear washer using a clip remover, etc.
(3) Disconnect the hose - rear washer, and remove the nozzle - rear washer.



## B: INSTALLATION

1) Install each part in the reverse order of removal.

***Tightening torque:***
***Light assembly - high-mounted: 4.5 N·m (0.46 kgf-m, 3.3 ft-lb)***

2) Check the nozzle - rear washer position. <Ref. to WW-46, VISUAL INSPECTION, INSPECTION, Rear Washer.>

# C: INSPECTION

## 1. VISUAL INSPECTION

Check for the following items, and if any malfunction is found, replace the corresponding part.
- Make sure the nozzle - rear washer and the hose - rear washer are not clogged.
- Make sure the hose - rear washer is not bent.

## 2. INSPECTING THE SPRAY POSITION

1) Turn the wiper switch to OFF position.
2) While the vehicle is stopped, check that the washer spray position is as shown in the figure.
3) After inspection, if the spray position is significantly out of the specified range, replace the nozzle - rear washer with a new part.

# 1. General Description

## A: CAUTION

• Before disassembling or reassembling parts, always disconnect the battery ground cable from battery. When replacing the audio, control module and other parts provided with memory functions, record the memory contents before disconnecting the battery ground cable. Otherwise, the memory is cleared.
• Reassemble the parts in the reverse order of disassembly procedure unless otherwise indicated.
• Adjust parts to the given specifications.
• Connect the connectors securely during reassembly.
• After reassembly, make sure that the each component operates smoothly.
• Yellow connectors and harnesses with yellow tapes around them are the connectors and harnesses for the airbag system. Using a tester above such circuits may cause malfunction of airbag system. Follow the cautions of “AIRBAG SYSTEM” in this case. <Ref. to AB-11, CAUTION, General Description.>
• Be careful not to damage the airbag system wiring harness when servicing electrical parts and switches.
• If the steering wheel and steering angle sensor (steering roll connector) are removed, perform “VDC sensor midpoint setting mode” of the VDC. <Ref. to VDC-19, VDC SENSOR MIDPOINT SETTING MODE, ADJUSTMENT, VDC Control Module and Hydraulic Control Unit (VDCCM&H/U).>

## B: PREPARATION TOOL

### 1. GENERAL TOOL

| TOOL NAME | REMARKS |
|---|---|
| Circuit tester | Used for measuring resistance and voltage. |
| Steering wheel puller | Used for removing the steering wheel. |

# 2. Audio System

## A: WIRING DIAGRAM

### 1. AUDIO

Refer to “Audio System” in the wiring diagram. <Ref. to WI-42, WIRING DIAGRAM, Audio System.>

## B: INSPECTION

| Symptoms | Repair order |
|---|---|
| No power coming in. (No display and no sound from speakers) | 1. Check the fuse and power supply for audio.<br>2. Check the audio ground.<br>3. Remove the audio and repair them. |
| A specific speaker does not operate. | 1. Check the speaker.<br>2. Check the output circuit between audio and speaker. |
| Audio generates noise with engine running. | 1. Check the audio ground.<br>2. Check the generator.<br>3. Check the ignition coil.<br>4. Remove the audio and repair them. |
| Volume is low in AM and FM modes or interference noise occurs. | 1. Check the antenna.<br>2. Check the rear window defogger.<br>3. Check the audio ground.<br>4. Remove the audio and repair them. |
| Rear window defogger generates noise when it operate. | 1. Check the rear window defogger. |

## C: NOTE

For procedure of each component in the audio system, refer to the respective sections.

- Audio unit: <Ref. to ET-7, Audio.>
- Front side speaker: <Ref. to ET-9, TWEETER, REMOVAL, Front Speaker.>
- Front door speaker: <Ref. to ET-10, DOOR SPEAKER, REMOVAL, Front Speaker.>
- Rear door speaker: <Ref. to ET-12, Rear Speaker.>
- Antenna: <Ref. to ET-14, Antenna.>
- Steering satellite switch: <Ref. to ET-25, Steering Satellite Switch.>
- AUX input terminal: <Ref. to ET-50, AUX Input Terminal.>

# 3. Navigation System

## A: WIRING DIAGRAM

Refer to “Navigation System” in the wiring diagram. <Ref. to WI-110, WIRING DIAGRAM, Navigation System.>

## B: INSPECTION

NOTE:
If no problems are found in “CHECK NAVIGATION OPERATION”, “CHECK EACH CONNECTION” and “CHECK EACH VEHICLE SIGNAL” as described below, check the navigation system circuit. <Ref. to WI-110, WIRING DIAGRAM, Navigation System.>

### 1. CHECK NAVIGATION OPERATION

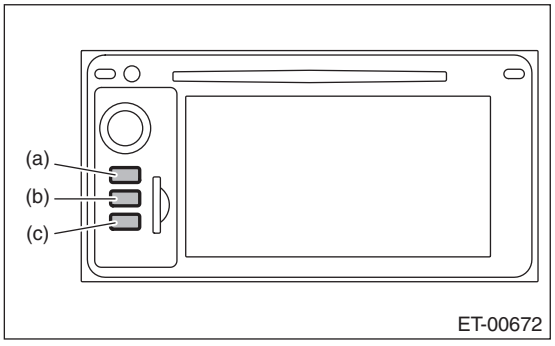
Start the engine and check that the opening screen is displayed.
Standard: Opening screen is displayed.
OK: Normal.
NG: If the screen is not displayed, check the following items.

- The map disk (SD CARD) is set in the navigation system unit.
- Check the connection of the power supply connector at the backside of the navigation unit. If wire connection is correct or has got repaired, check again that the opening screen is displayed.

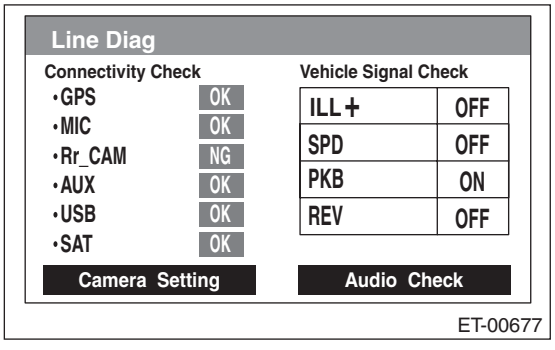
If it is not displayed at this time, it indicates the navigation unit trouble.

### 2. CHECK EACH CONNECTION

1) With the main power OFF, press and hold the button (c) for 3 seconds or more while pressing the buttons (a) and (b).



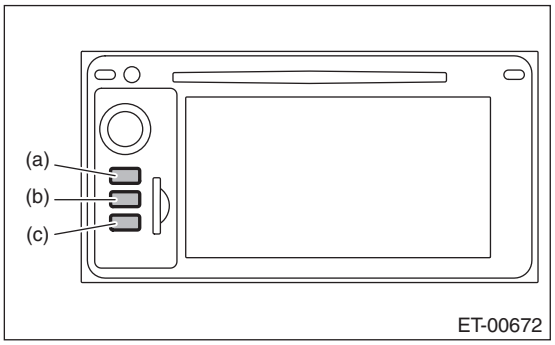
NOTE:
Diagnostic mode can be cancelled by pressing the button (a) for 3 seconds or more, or turning the ignition switch from ACC OFF to ON position.
2) Line Diag screen is displayed.
3) Check the connection status by monitoring each item in “Connectivity Check” displayed on the left of the screen.



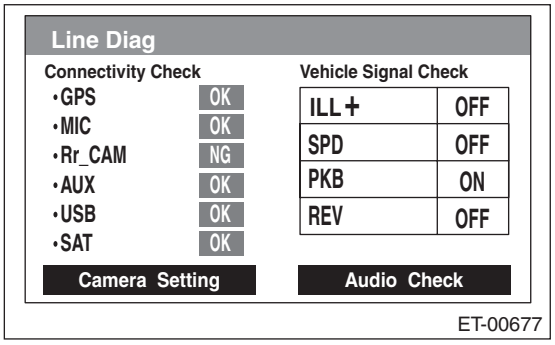
OK: Each connection device is connected correctly.
NG: No connection or faulty connection has been detected.
4) Check the connection status of the connector. If there are no problems, the connection device or unit body could be faulty.

### 3. CHECK EACH VEHICLE SIGNAL

1) With the main power OFF, press and hold the button (c) for 3 seconds or more while pressing the buttons (a) and (b).



NOTE:
Diagnostic mode can be cancelled by pressing the button (a) for 3 seconds or more, or turning the ignition switch from ACC OFF to ON position.
2) Line Diag screen is displayed.
3) Check the connection status by monitoring each item in “Vehicle Signal Check” displayed on the right of the screen.



- **Check illumination**

NOTE:
Before starting inspections, turn the ignition switch to ON.
1) Turn the lighting switch to level 1.
Make sure that the bright switch is not turned ON at this time.
2) Make sure that “ON” lights in ILL+ and then the screen becomes dim.
ON: Normal.
OFF: Abnormal. Check the signal line connector. If there are no problems, the unit could be faulty.

- **Check speed sensor**

NOTE:
- Before starting inspections, check the safety around the vehicle.
- Lift up the vehicle as necessary.
- When the diagnostic trouble code is input in the VDCCM, perform the Clear Memory operation.

1) Drive the vehicle at 9 km/h (6 mph) or more.
2) Check that “ON” is displayed in SPD.
ON: Normal.
OFF: Vehicle speed is less than 7 km/h (4 mph), or abnormality is found in the signal line. Check the signal line connector. If there are no problems, the unit could be faulty.

- **Check parking brake signal**

1) Pull parking brake lever.
2) Check that “ON” is displayed in PKB.
ON: Normal.
OFF: Abnormal. Check the signal line connector. If there are no problems, the unit could be faulty.

- **Check back sensor**

NOTE:
Before starting inspections, check the safety around the rear end of the vehicle and then turn the ignition switch to ON.
1) Pull the parking brake and depress the brake, then put the gear in reverse.
2) Make sure that “ON” is displayed in REV.
ON: Normal.
OFF: Abnormal. Check the signal line connector. If there are no problems, the unit could be faulty.

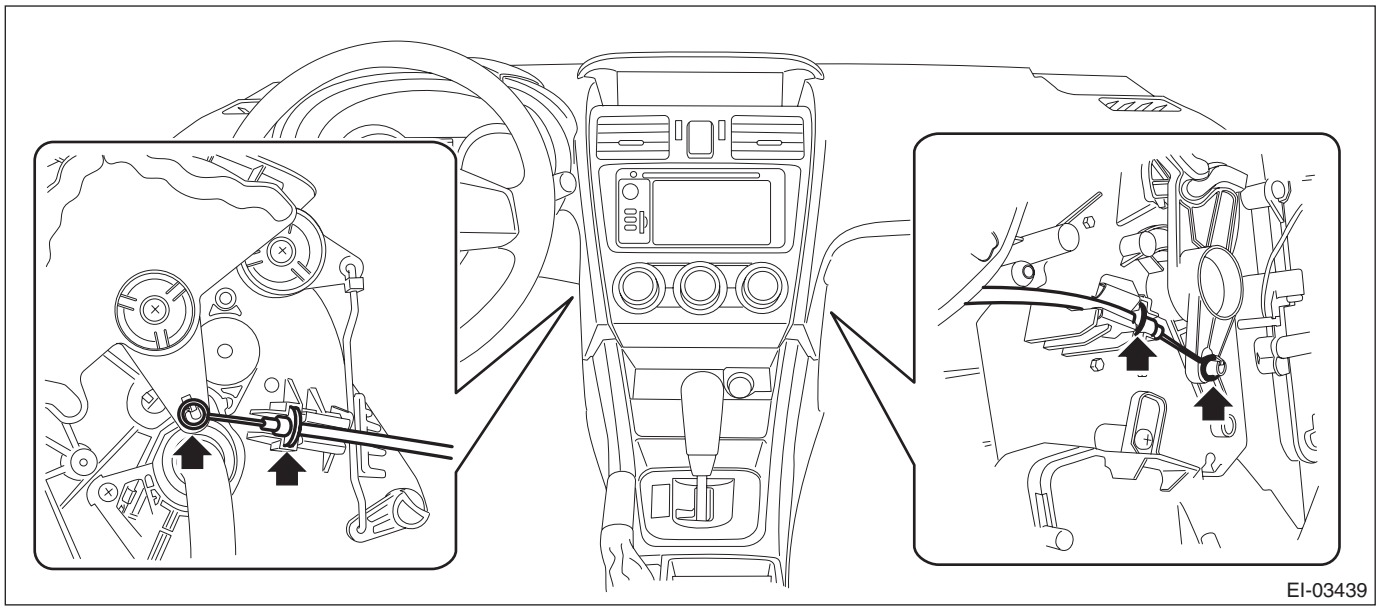
## C: NOTE

For procedure of each component in the navigation system, refer to the respective section.
- Navigation unit: <Ref. to ET-31, Navigation Body.>
- GPS antenna: <Ref. to ET-33, GPS Antenna.>
- Rearview camera: <Ref. to ET-33, GPS Antenna.>

# 4. Audio

## A: REMOVAL

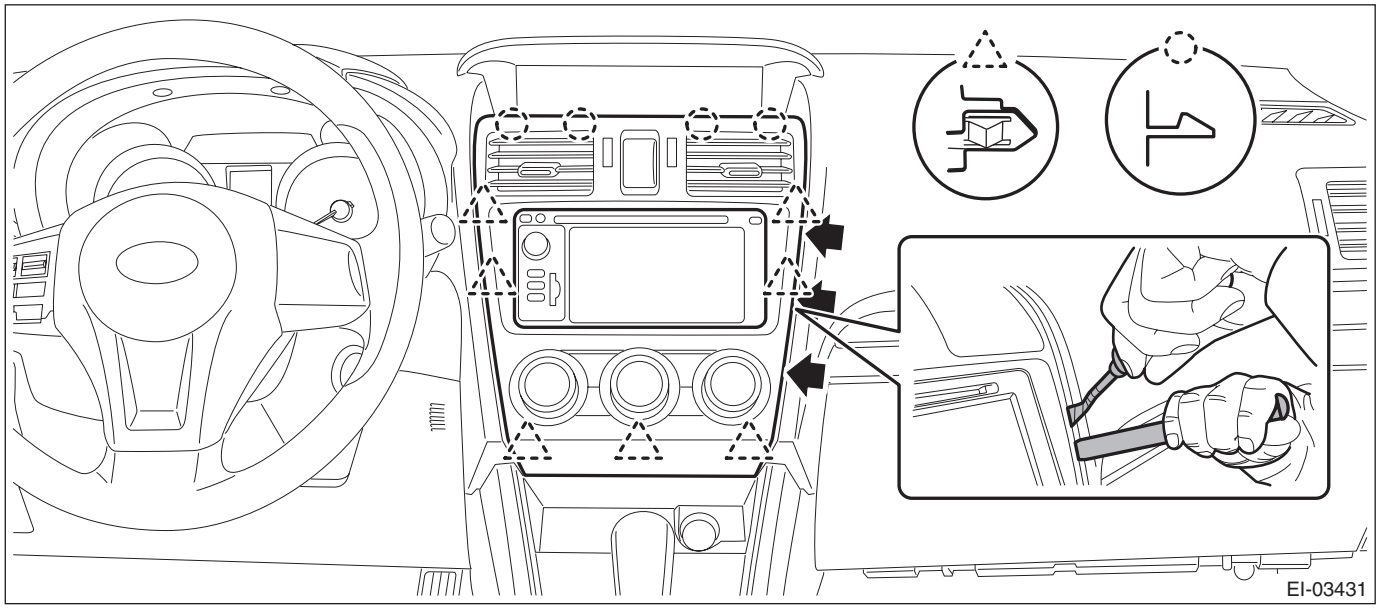
1) Disconnect the ground cable from battery.
2) On manual A/C models, disconnect the control cables from both sides of the heater and cooling unit assembly.



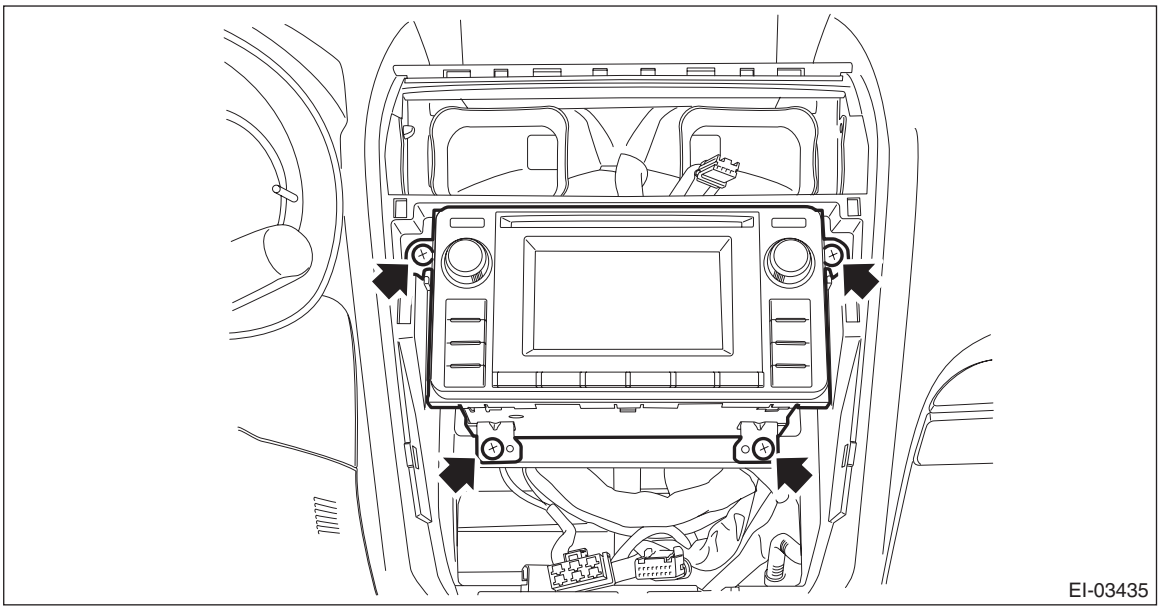
NOTE:
Remove the glove box pocket assembly on the passenger's side.
3) Remove the panel center assembly.

**CAUTION:**
- **Do not put your finger on the fin of the air vent grille. Doing so may damage the fin.**
- **Pull the panel center assembly slowly. Pulling with excessive force may damage the connector.**

(1) Insert a plastic remover to the three areas shown by the arrows, and lift up the panel center assembly slightly.
(2) With the panel center assembly lifted up slightly, release the claw by using a clip remover wrapped with protective tape.
(3) Release the rest of the claws, and pull out the panel center assembly.
(4) Disconnect the connectors, and remove the panel center assembly.



4) Remove the audio assembly.
   (1) Remove the left and right screws, and partially pull out the audio assembly.
   (2) Disconnect the connectors, and remove the audio assembly.



## B: INSTALLATION

**CAUTION:**
**After installing the panel center assembly, check that the air vent grille of the panel center assembly is inserted correctly into the air vent duct.**
Install each part in the reverse order of removal.

# 5. Front Speaker

## A: REMOVAL

### 1. TWEETER

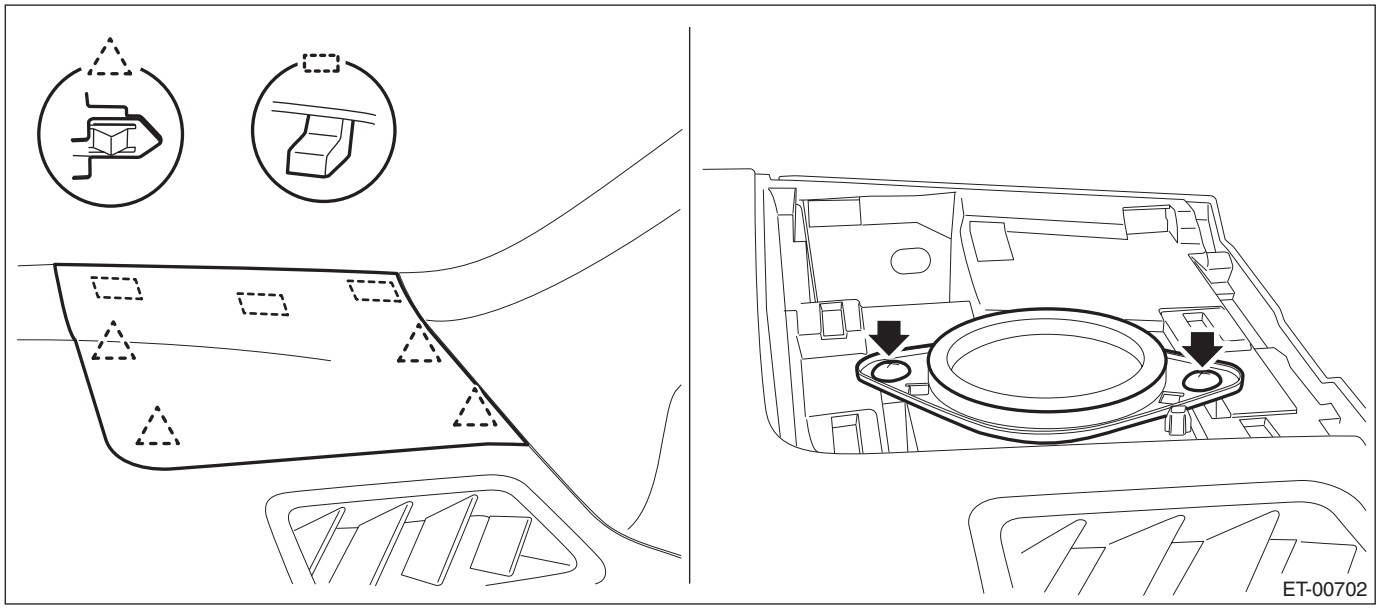
1) Disconnect the ground cable from battery.
2) Remove the speaker assembly - tweeter.
   (1) Release the clips and claws, then detach the grille speaker side.

NOTE:
Remove the grille speaker side by using a plastic remover.

   (2) Remove the screws.

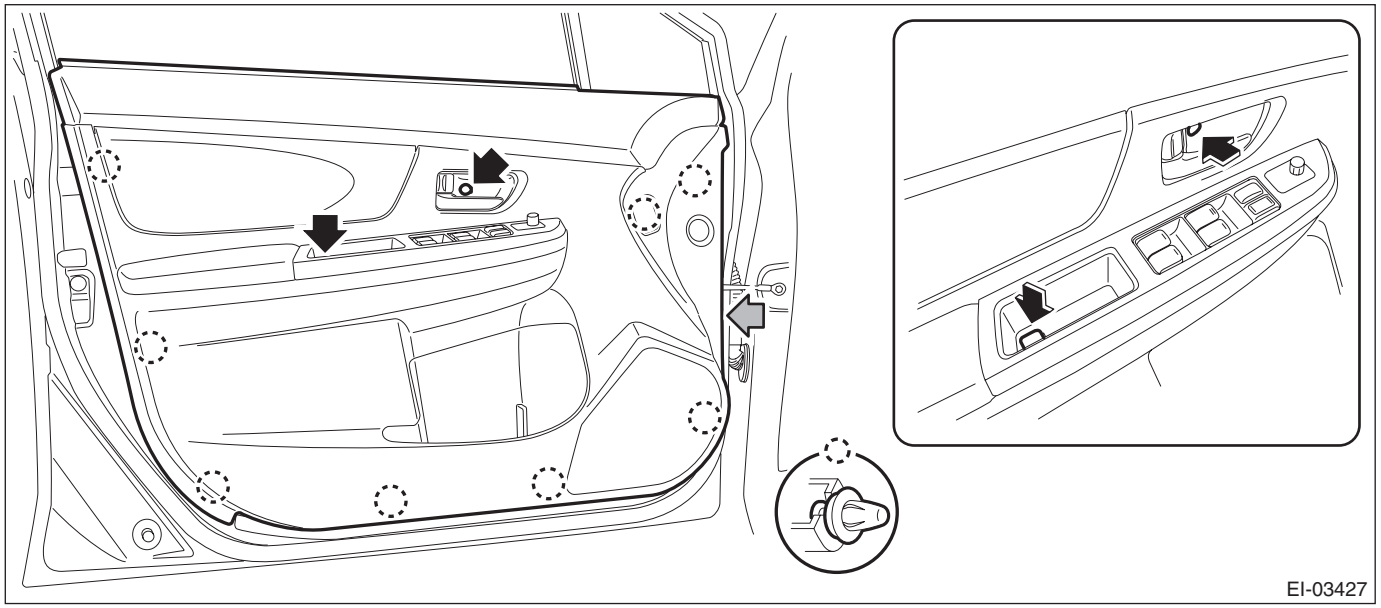
***PREPARATION TOOL:***
***Stubby screwdriver***

   (3) Disconnect the connector and remove the speaker assembly - tweeter.



## 2. DOOR SPEAKER

1) Disconnect the ground cable from battery.
2) Remove the trim panel - front door.
   (1) Open the cover and remove the screw.
   (2) Remove the clips, and remove the trim panel - front door from the panel assembly - front door.

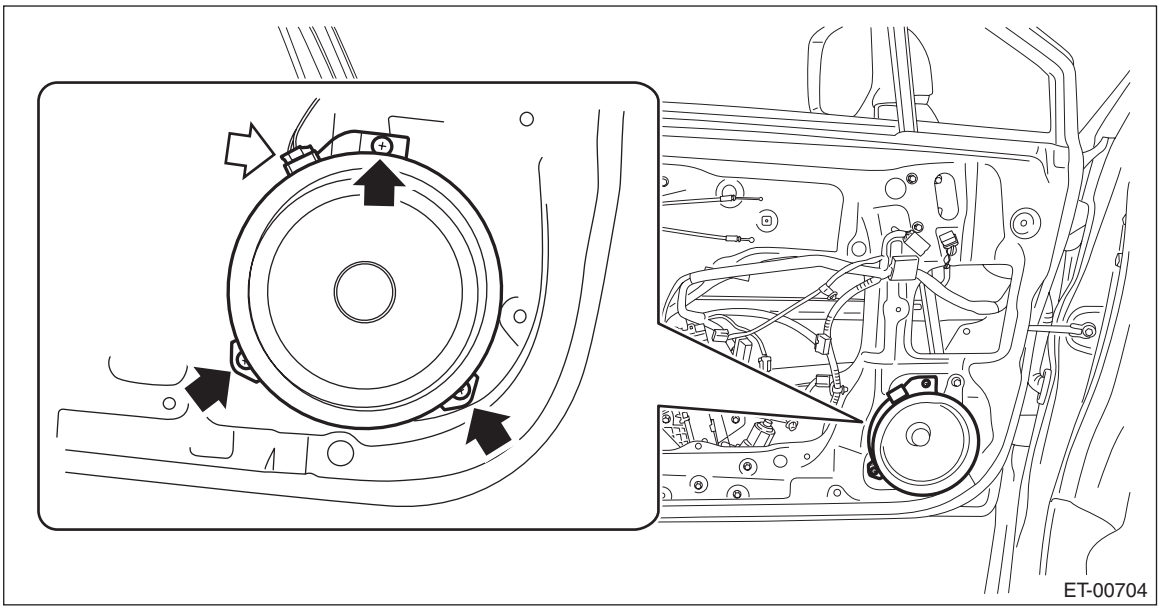


NOTE:
It is easier to remove the door trim if the removal is performed from the gray arrow section.

   (3) Detach the door lock cable (a) and door open cable (b) from the remote assembly - door.

   (4) Disconnect the harness connector and remove the trim panel - front door.

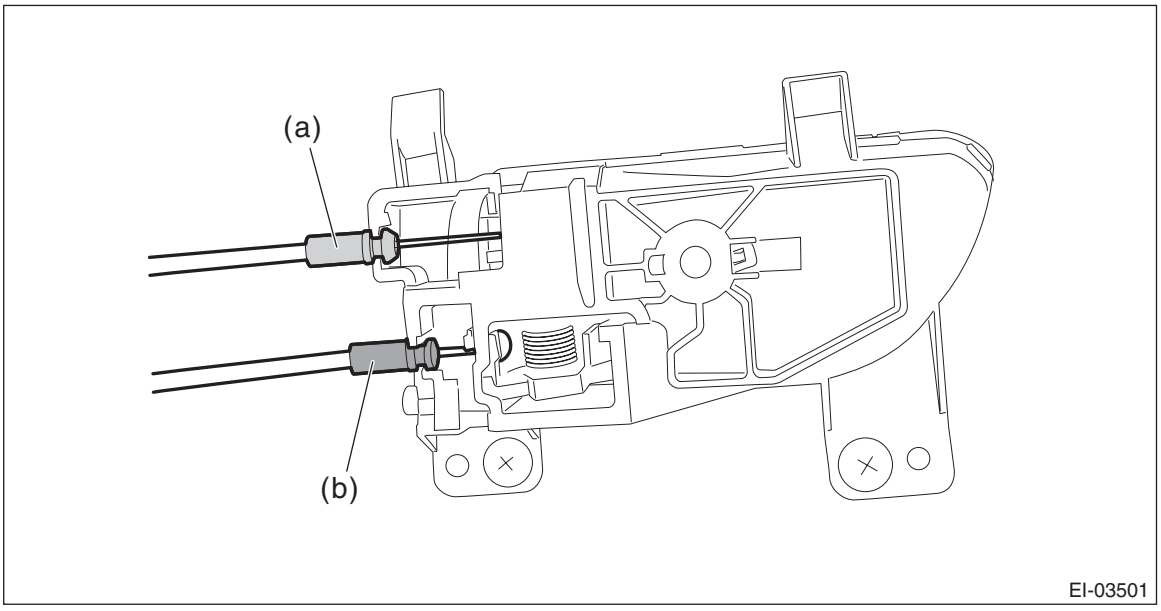
3) Remove the front door speaker assembly.
   (1) Remove the screws.
   (2) Disconnect the connector, and remove the front door speaker assembly.



## B: INSTALLATION

Install each part in the reverse order of removal.

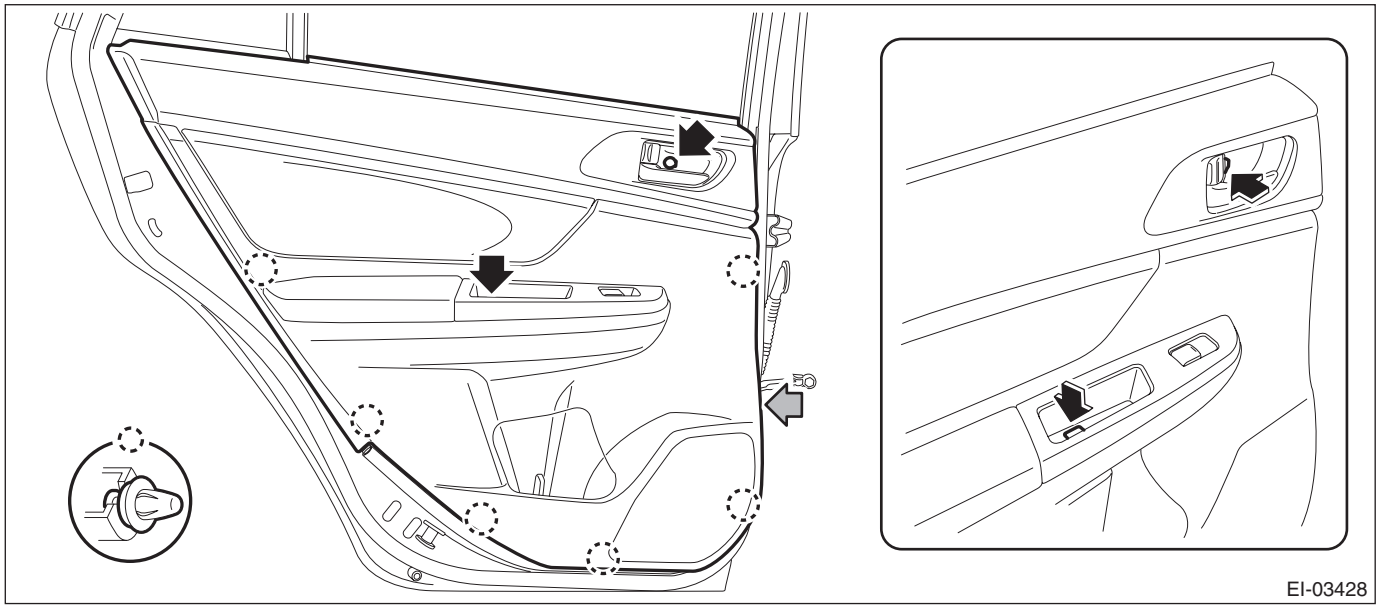
NOTE:
Attach the door lock cable (a - end ball: small) to the upper side, and attach the door open cable (b - end ball: large) to the lower side.



# 6. Rear Speaker

## A: REMOVAL

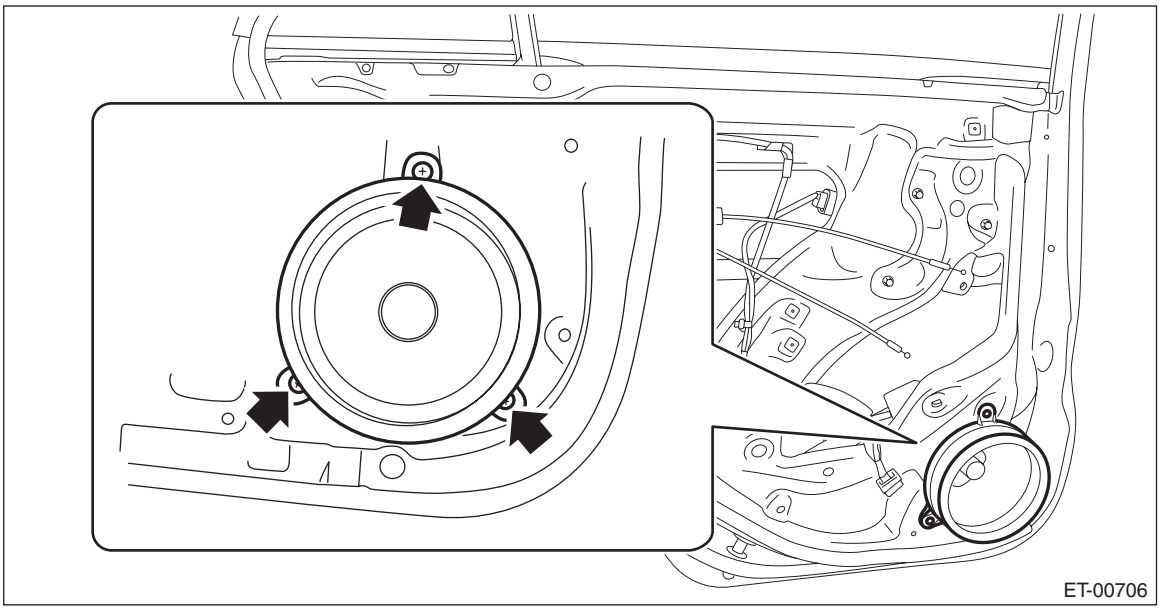
1) Disconnect the ground cable from battery.
2) Remove the trim panel - rear door.
   (1) Open the cover and remove the screw.
   (2) Remove the clips, and remove the trim panel - rear door from the panel assembly - rear door.



NOTE:
It is easier to remove the door trim if the removal is performed from the gray arrow section.
   (3) Detach the door lock cable (a) and door open cable (b) from the remote assembly - door.

   (4) Disconnect the harness connector and remove the trim panel - rear door.

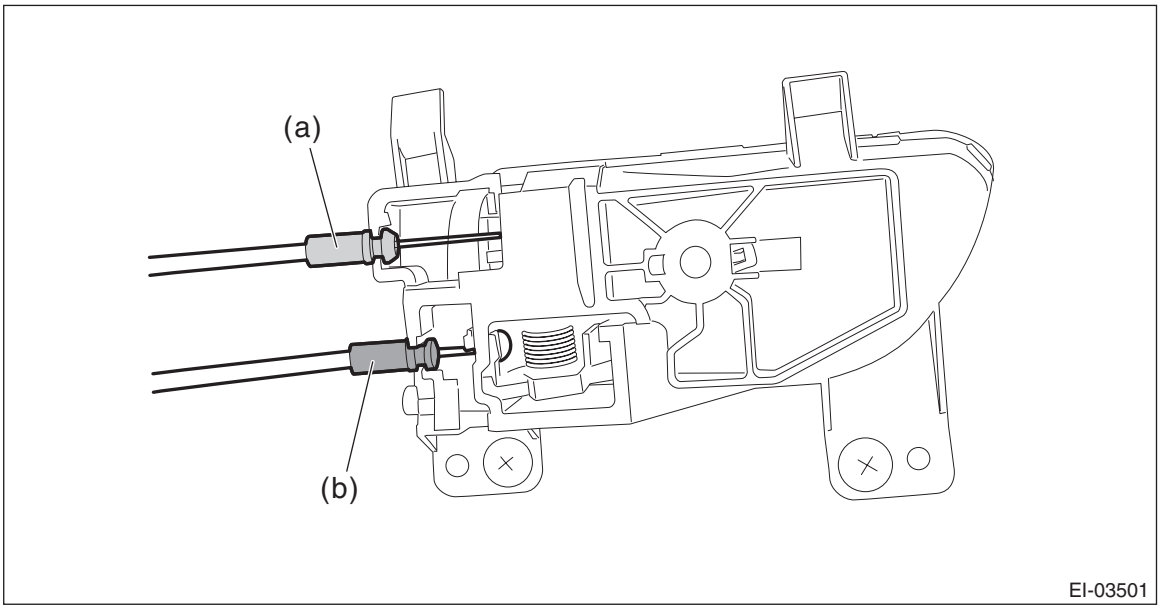
3) Remove the rear speaker assembly.
(1) Remove the screws.
(2) Disconnect the connector behind the speaker and remove the rear speaker assembly.



## B: INSTALLATION

Install each part in the reverse order of removal.

NOTE:
Attach the door lock cable (a - end ball: small) to the upper side, and attach the door open cable (b - end ball: large) to the lower side.



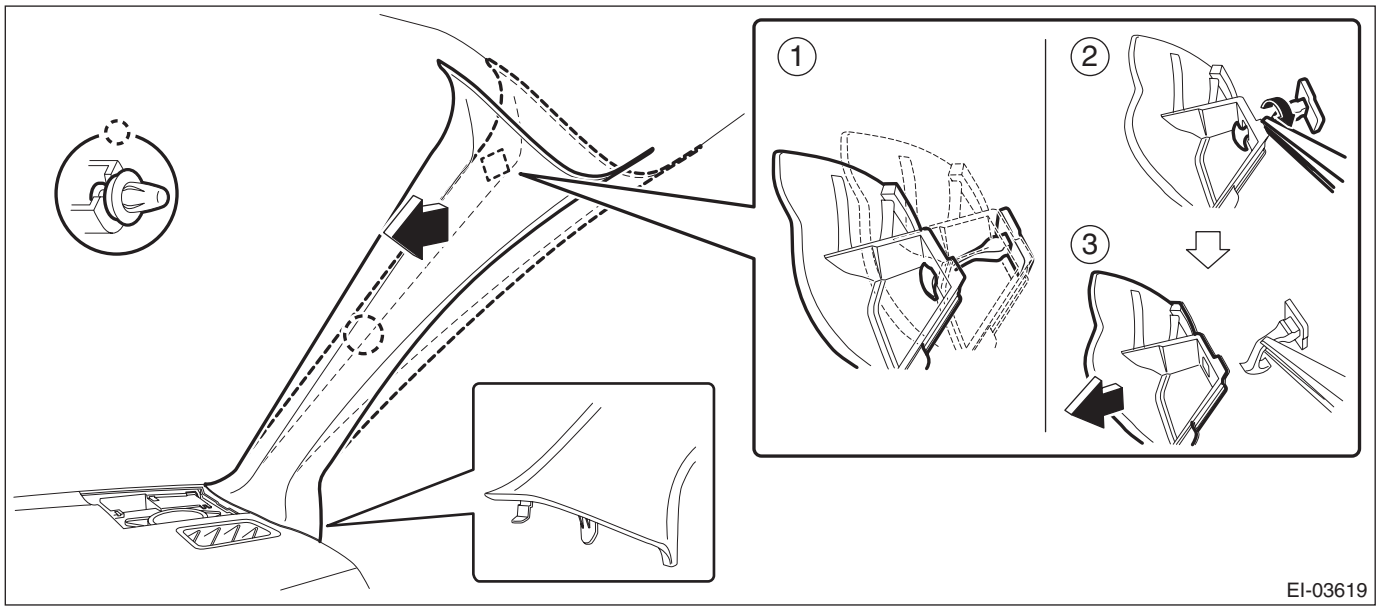
# 7. Antenna

## A: REMOVAL

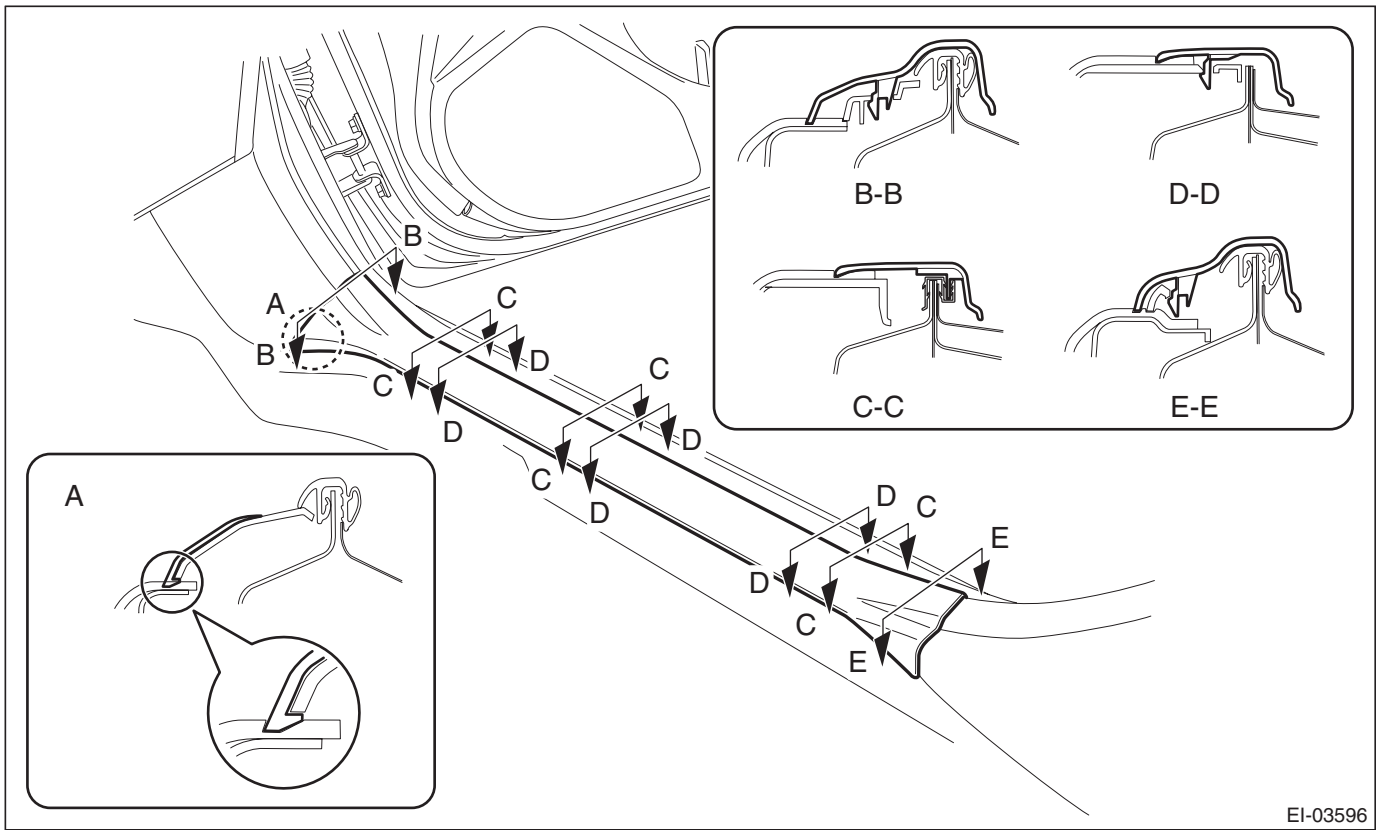
### 1. ANTENNA

1) Disconnect the ground cable from battery and wait for at least 60 seconds before starting work.
2) Remove the trim panel - front pillar UPR on the left and right sides.
   (1) Pull the upper part of the trim panel - front pillar UPR towards the center of the vehicle.
   (2) Insert long-nose pliers into the top part of the trim, grip the tether clip with the pliers and twist 90° in that position.

**CAUTION:**
**Be careful not to damage the pillar trim surface and curtain airbag module when inserting the pliers.**
   (3) Holding the tether clip twisted as in the previous step, remove the trim panel - front pillar UPR from the tether clip.
   (4) Remove the clips, and remove the trim panel - front pillar UPR.

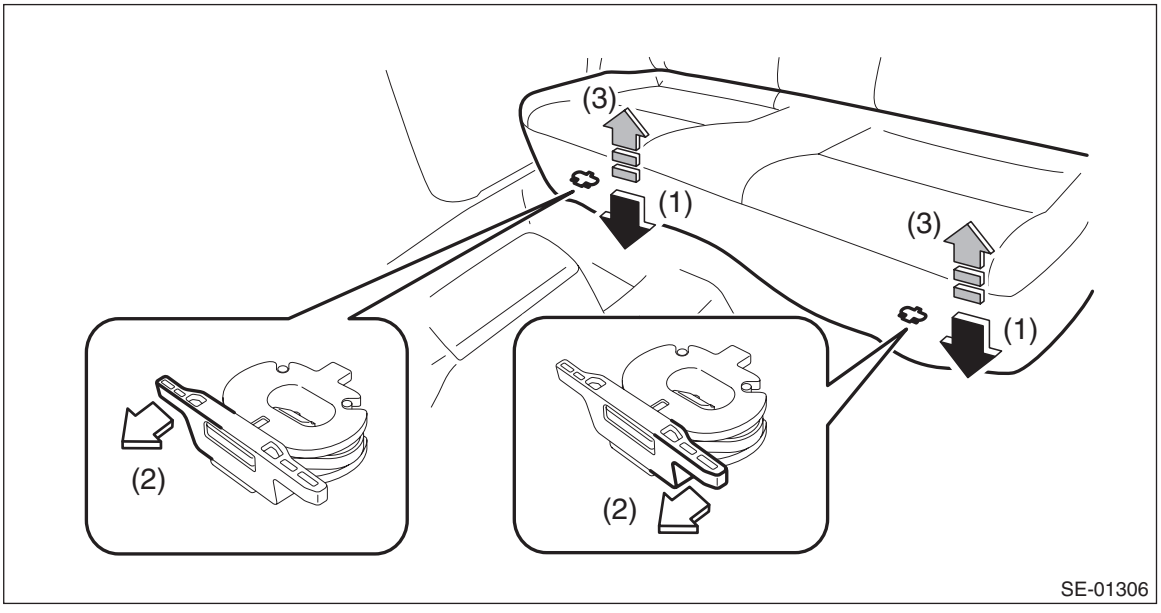


3) Release the claws, and then remove the cover side sill - front INN on LH and RH sides.

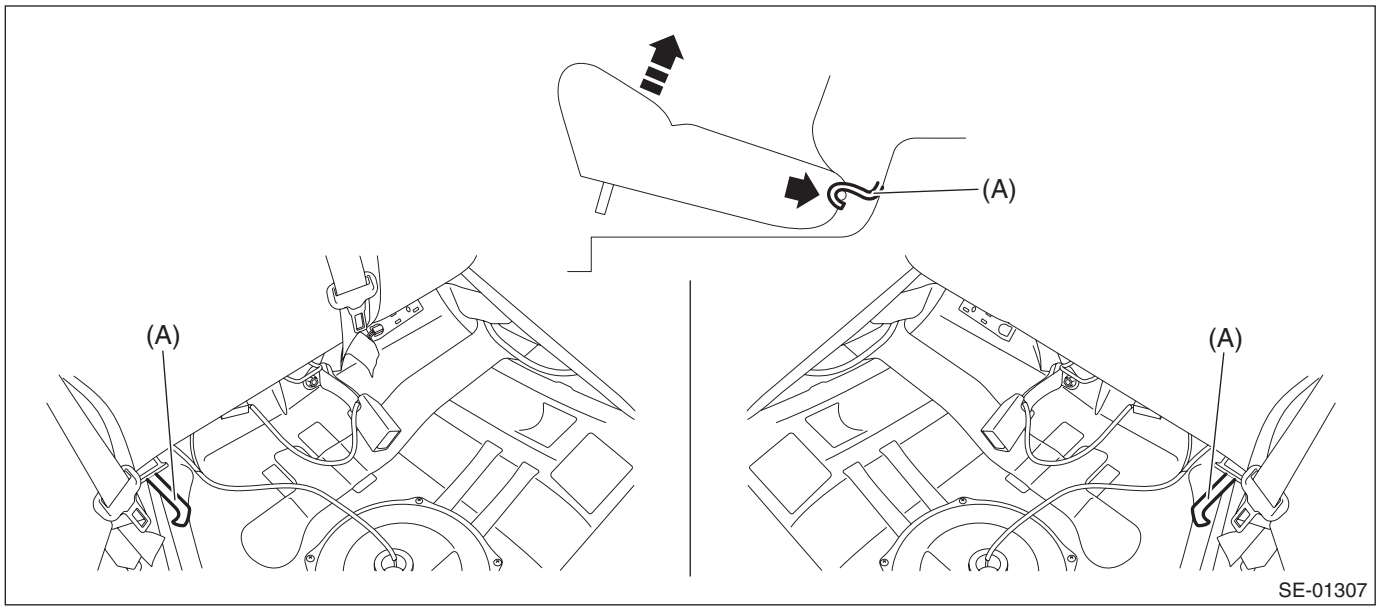


4) Remove the rear seat cushion assembly.
   (1) Push the corners of the rear seat cushion from above.
   (2) While pushing the corners of the rear seat cushion from above, pull the knob of the hook - seat cushion rear towards yourself.
   (3) While pulling the knob towards yourself, disconnect the hooks by lifting up the rear seat cushion.

NOTE:
Pull the left side of the knob to disconnect the LH side hook, and pull the right side of the knob to disconnect the RH side hook.

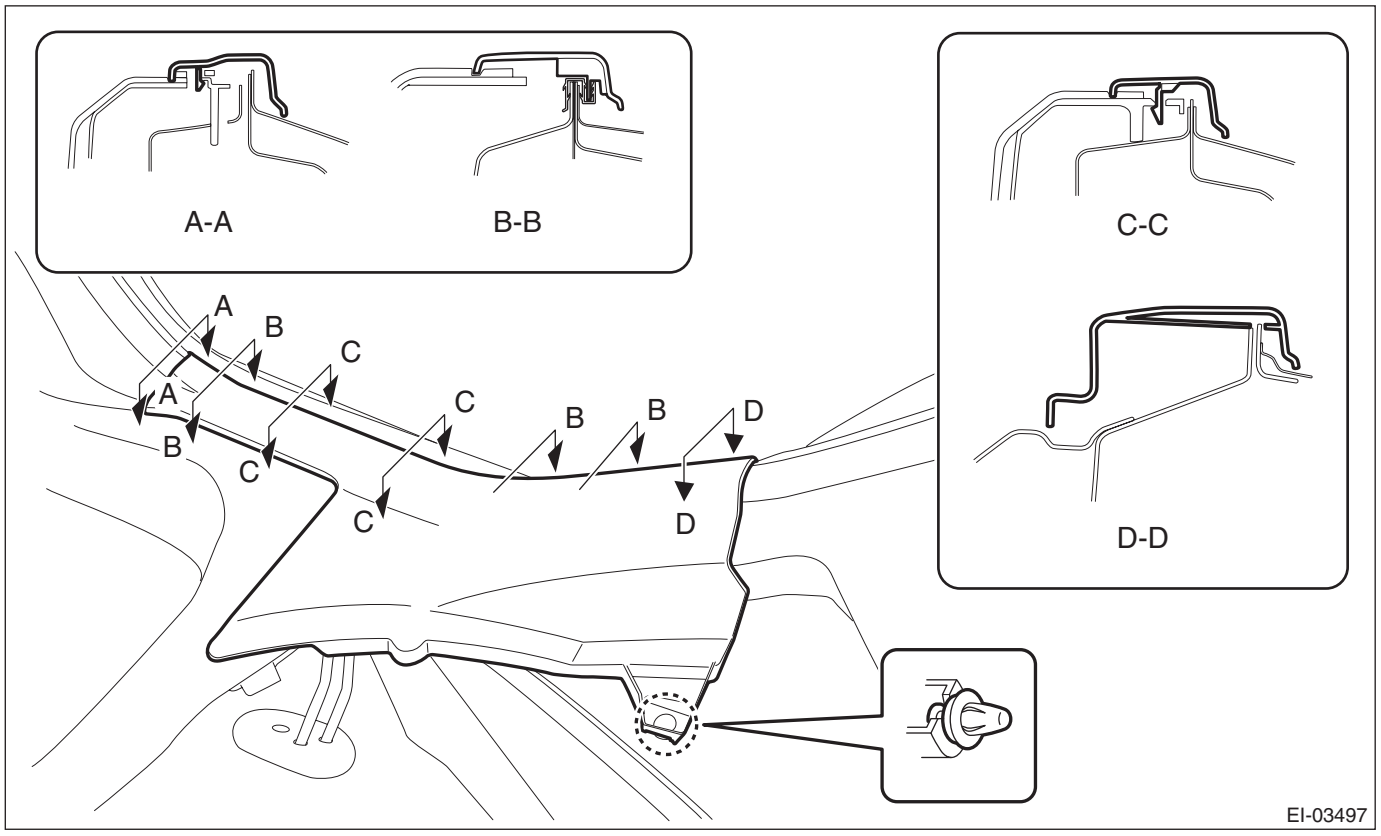


(4) Remove the hook (A) by pushing it back while lifting the front side of the rear seat cushion, and remove the rear seat cushion.



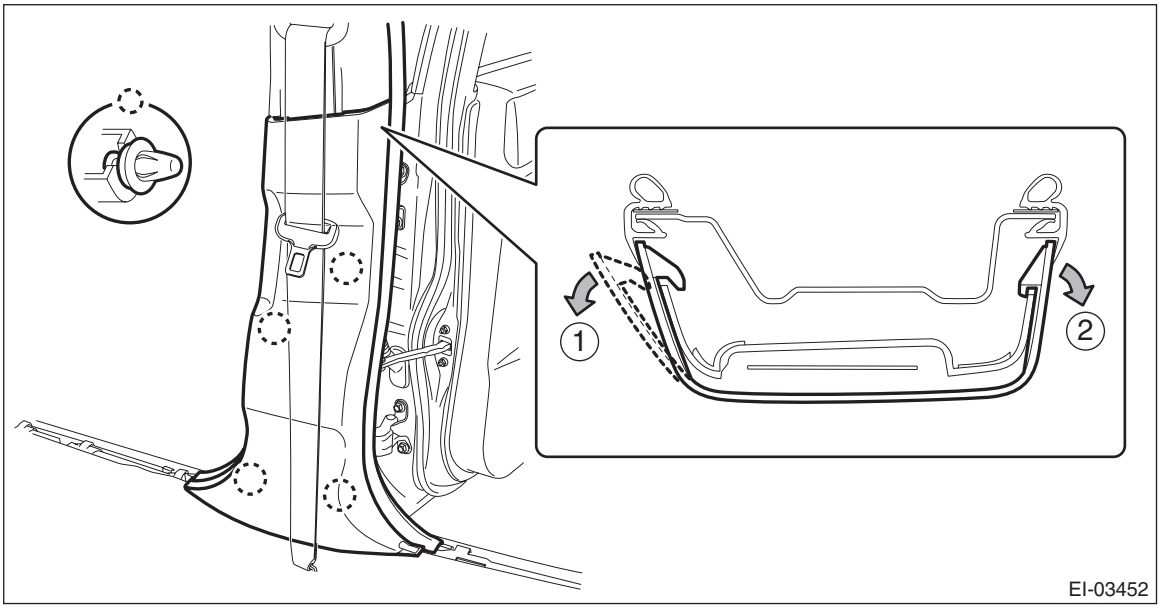
5) Release the clips and claws, and remove the cover side sill - rear INN on LH and RH sides.

**CAUTION:**
**Do not pull with excessive force. Doing so may damage the claws of the cover side sill - rear INN.**



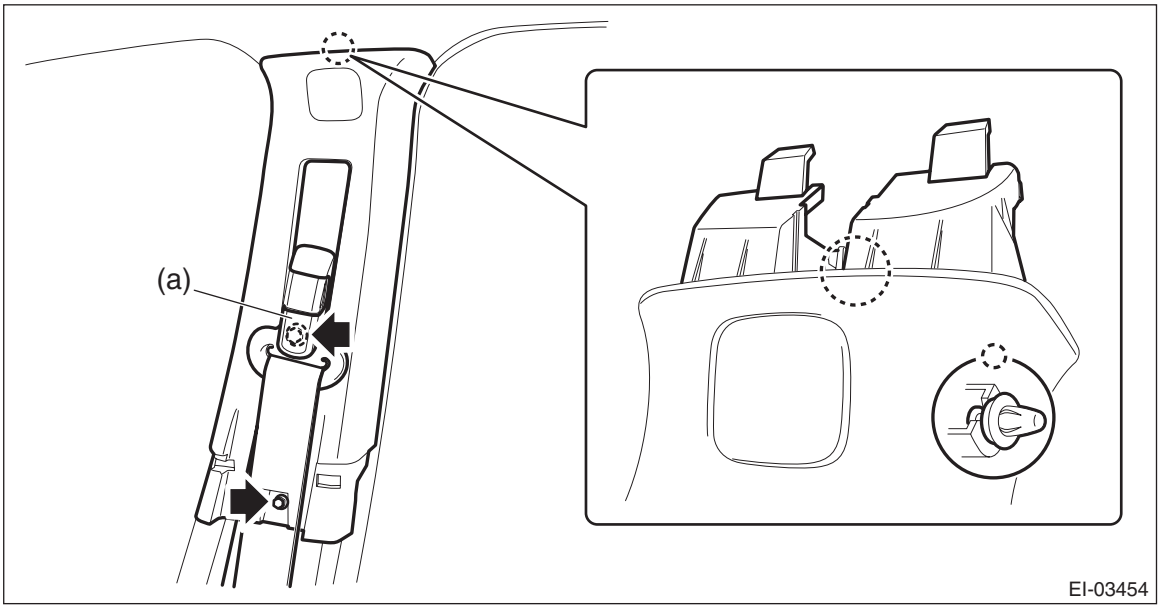
6) Remove the trim panel - center pillar LWR on the left and right sides.
(1) Release the clip by pulling the trim panel - center pillar LWR toward you.
(2) Expand the claws of the trim panel - center pillar LWR outward, and remove it from the trim panel - center pillar UPR.

**CAUTION:**
**Do not expand the trim panel - center pillar LWR excessively. Doing so may damage the trim.**

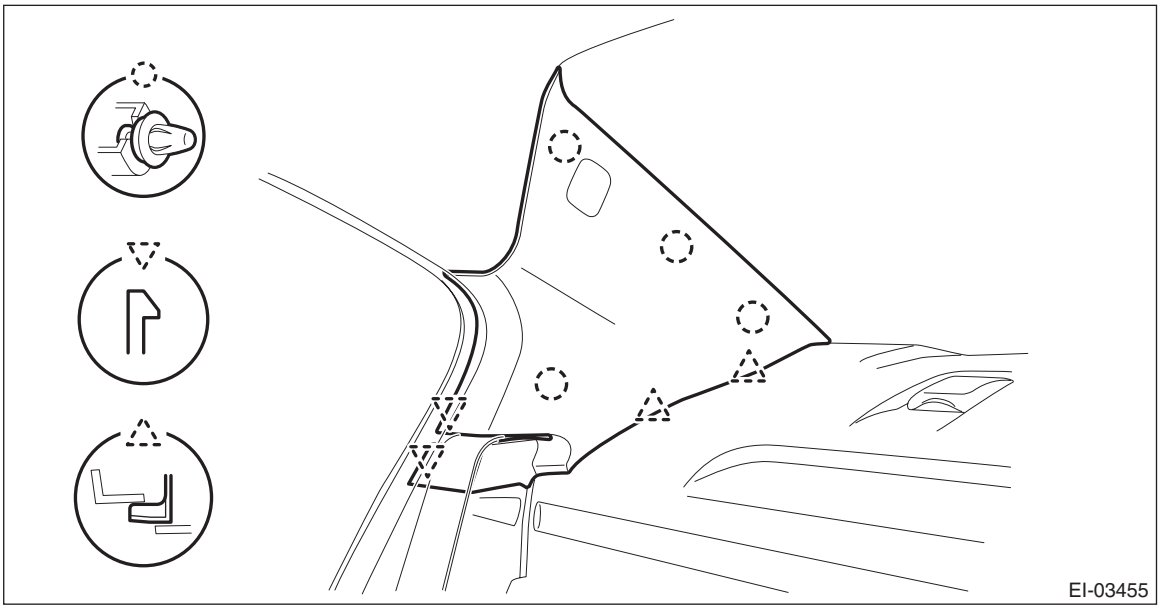


NOTE:
First release the claw located to the front of the vehicle.
7) Remove the trim panel - center pillar UPR on the left and right sides.
(1) Remove the cover through (a), and remove the seat belt anchor bolt.
(2) Remove the bolt on the lower side of the trim panel - center pillar UPR.
(3) Remove the clip by pulling the upper part of the trim toward you, and while lowering the entire trim, remove the trim panel - center pillar UPR.

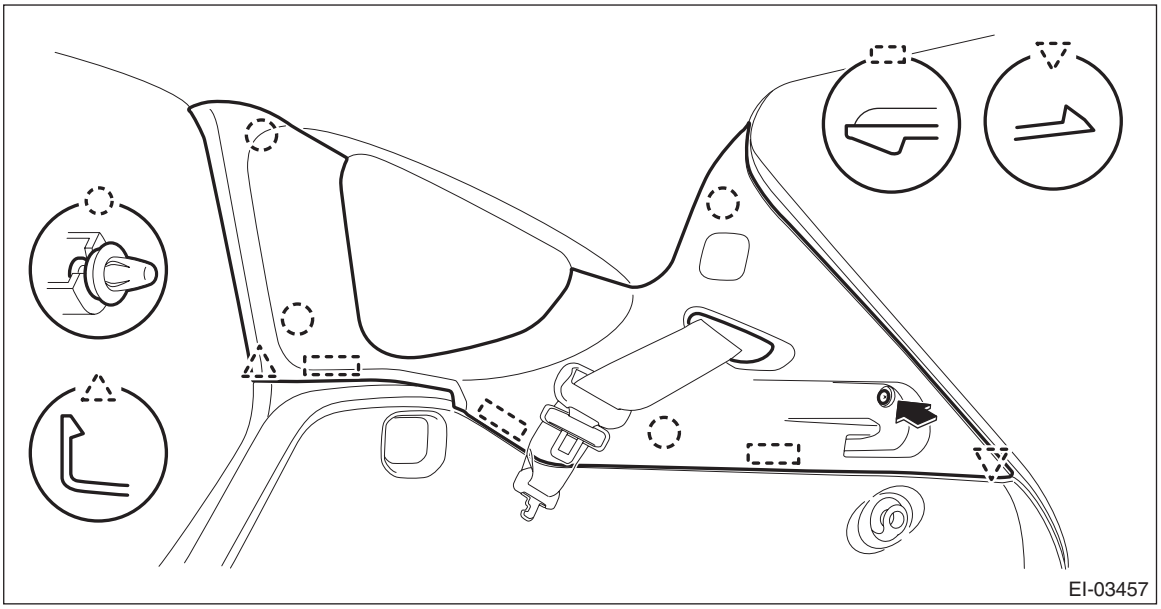
**CAUTION:**
**Do not reuse the upper clips of the trim panel - center pillar UPR. Once the clip is removed, its holding force is reduced. Be sure to replace it with a new clip.**



8) Remove the clips, and remove the trim panel - rear pillar UPR on the left and right sides. (4 door model)

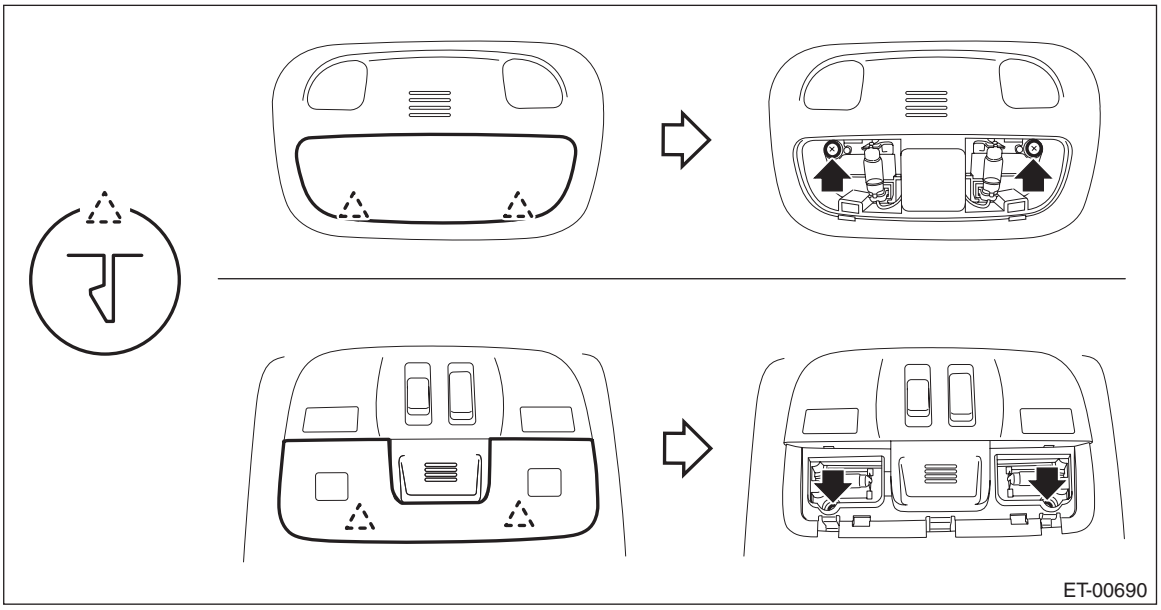


9) Remove the screws and clips, and remove the trim panel - rear quarter pillar UPR on the left and right sides. (5 door model/XV model)

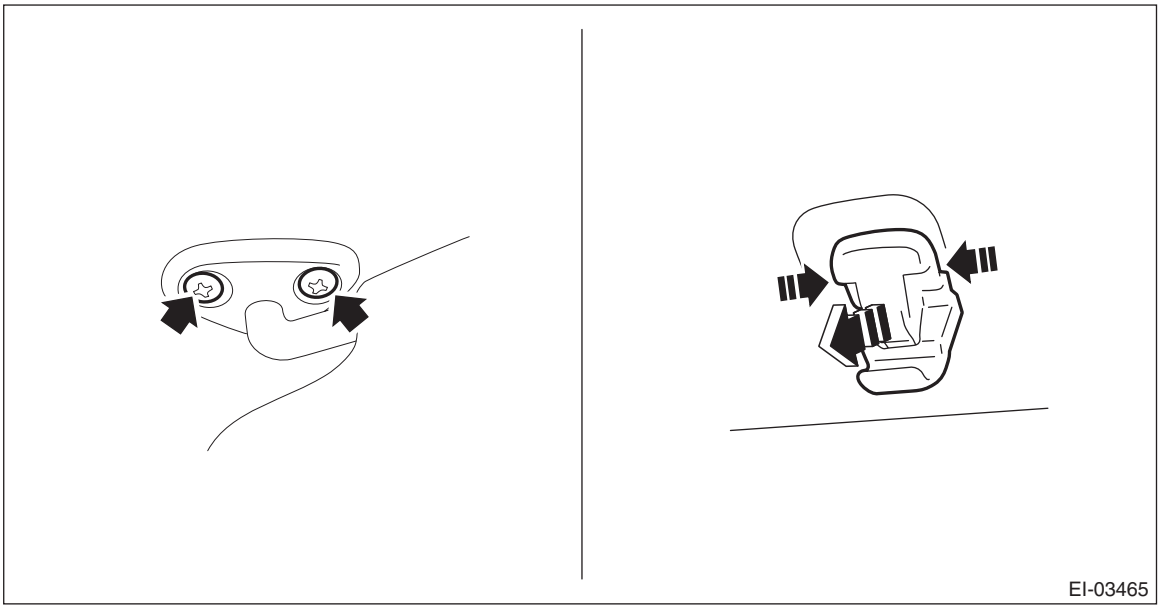


10) Remove the light assembly - map.
(1) Remove the lens and detach the screws.

(2) Disconnect the connector and remove the light assembly - map.

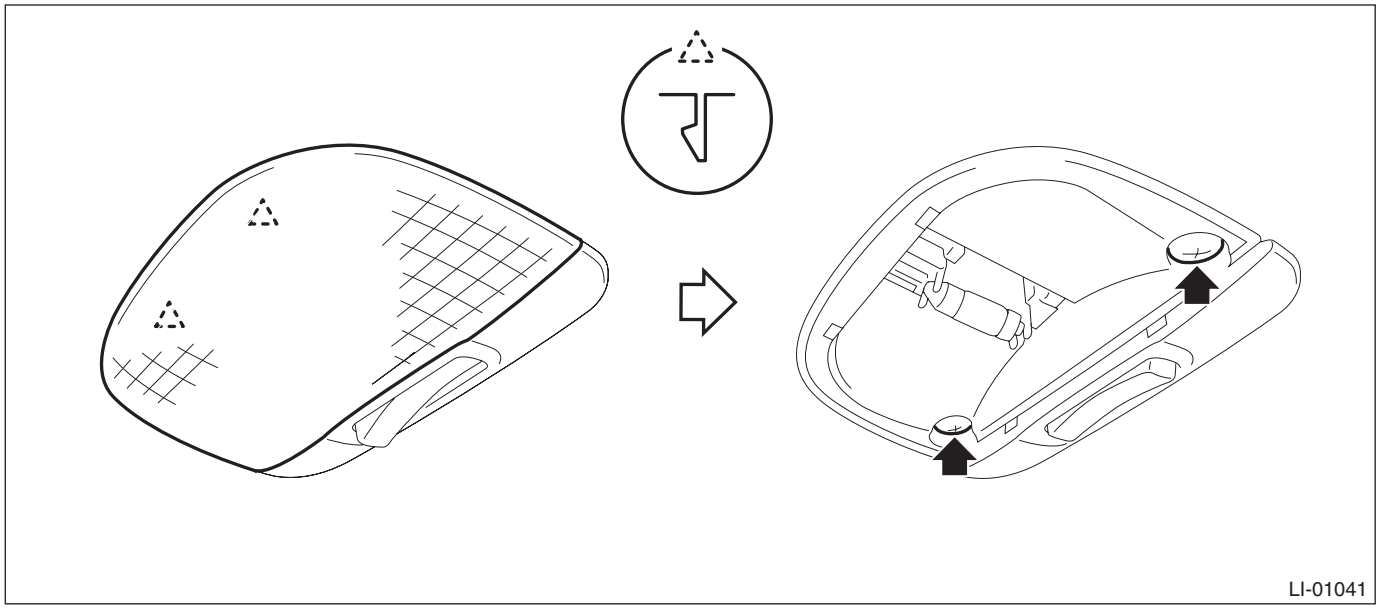


11) Remove the left and right sun visor assembly.
(1) Remove the screws and remove the sun visor assembly.
(2) Press both sides of the hook - sun visor using a flat tip screwdriver.
(3) Remove the hook - sun visor by pulling it toward you.

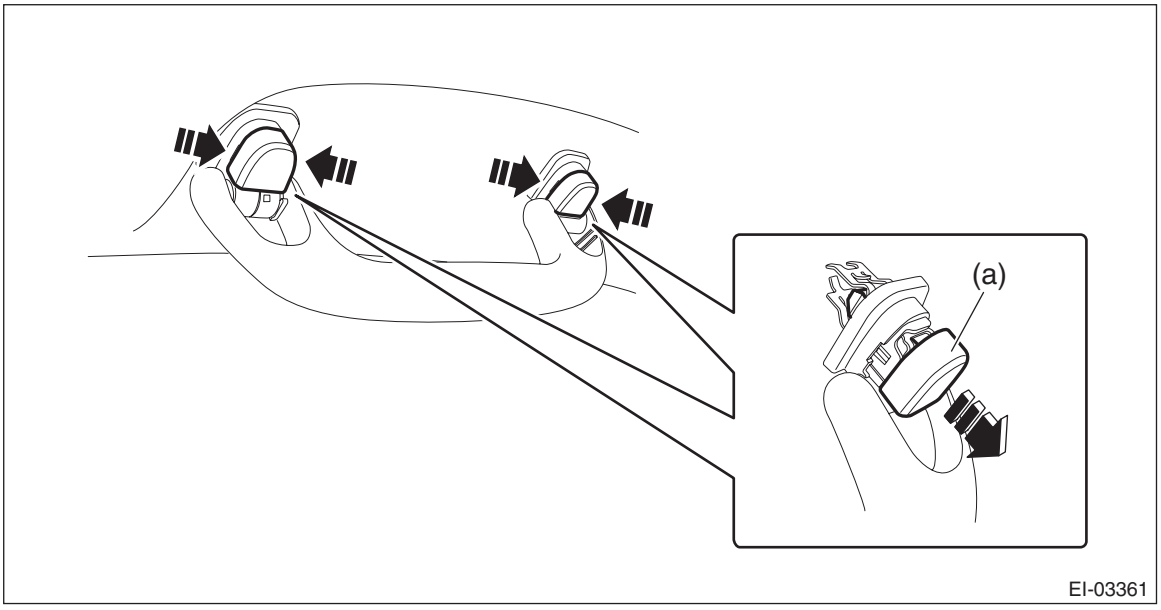


12) Remove the light assembly - room.
(1) Remove the lens and detach the screws.

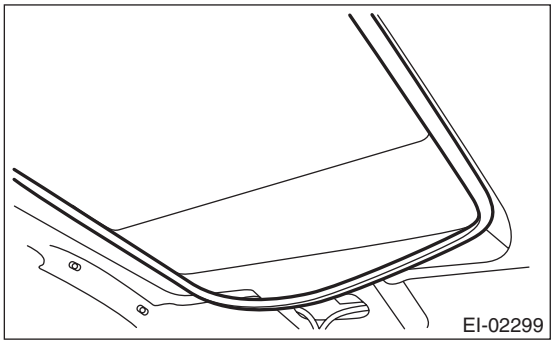
(2) Disconnect the connector and remove the light assembly - room.



13) Remove all assist rails.
(1) Remove the cap (a) by pulling the both sides of the cap (a) using a flat tip screwdriver wrapped with a protection tape.
(2) Pull the assist grip toward you (to the vehicle center) and remove the metal clip from the bracket.

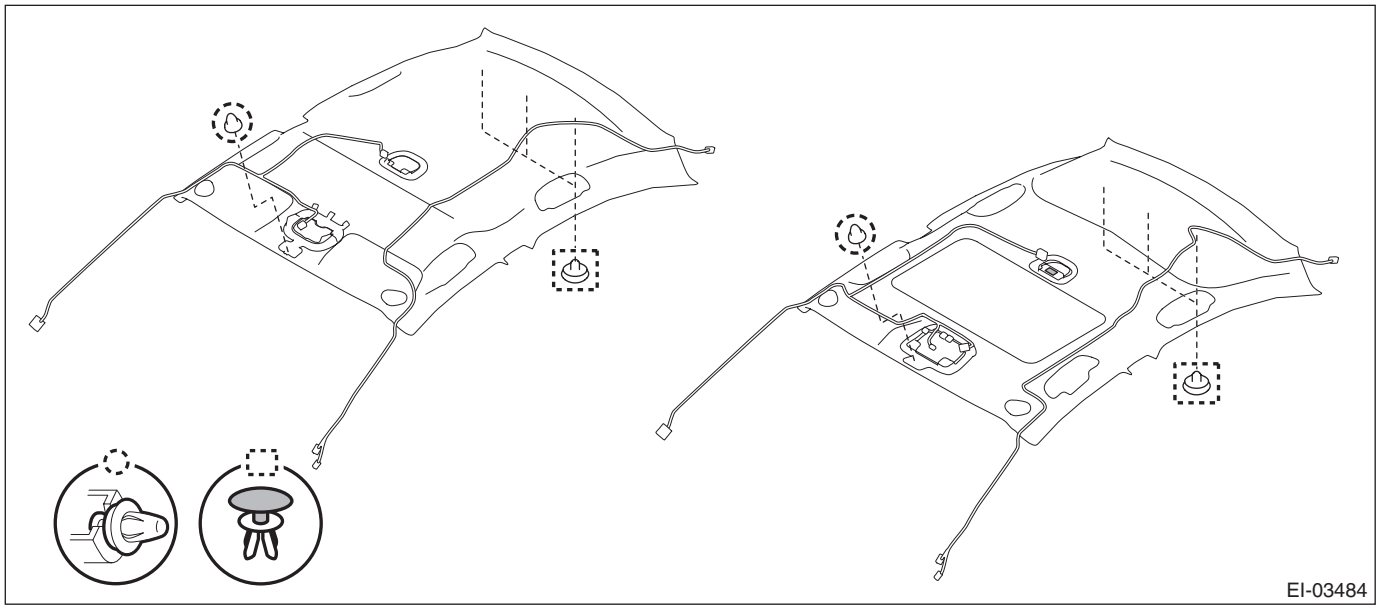


14) Remove the garnish - roof. (Model with sunroof)

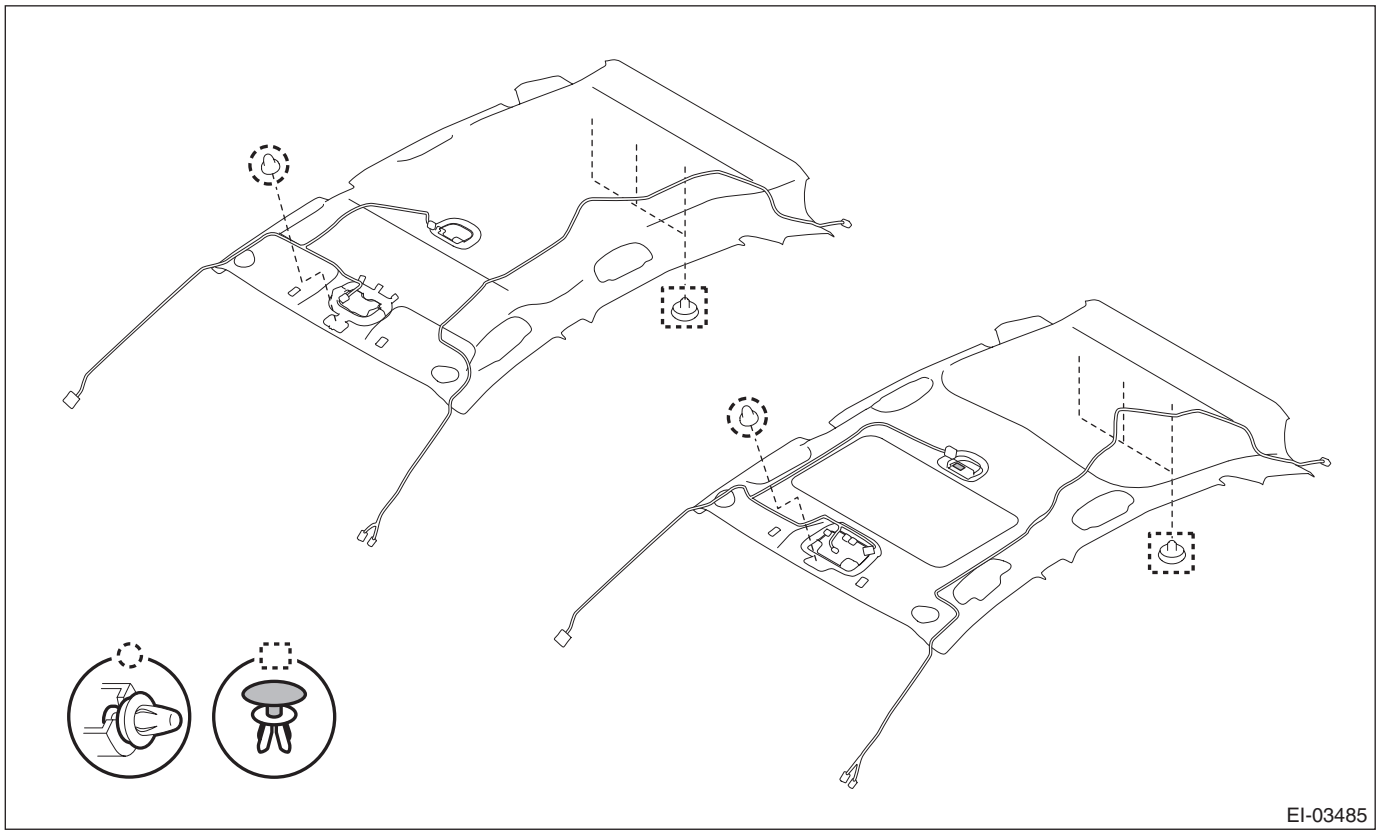


15) Remove the trim panel - roof assembly.

(1) Remove the clips and the Velcro tape behind the room light.
(2) Remove the weather strip - body side flange from the front/rear and left/right doors, and lower the trim panel - roof assembly.



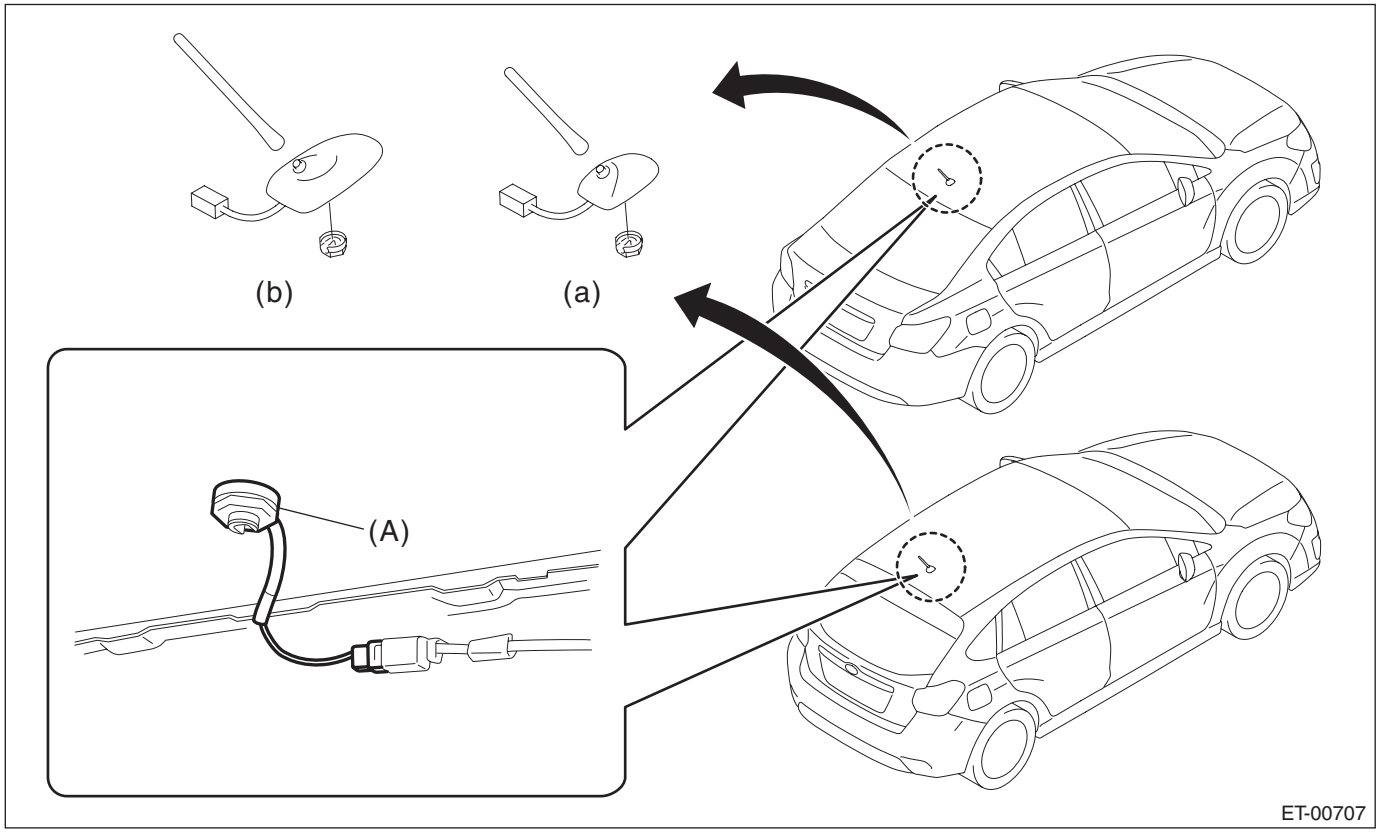
EI-03484



EI-03485

16) Disconnect the harness connector and terminal, and remove the mounting nut (A).

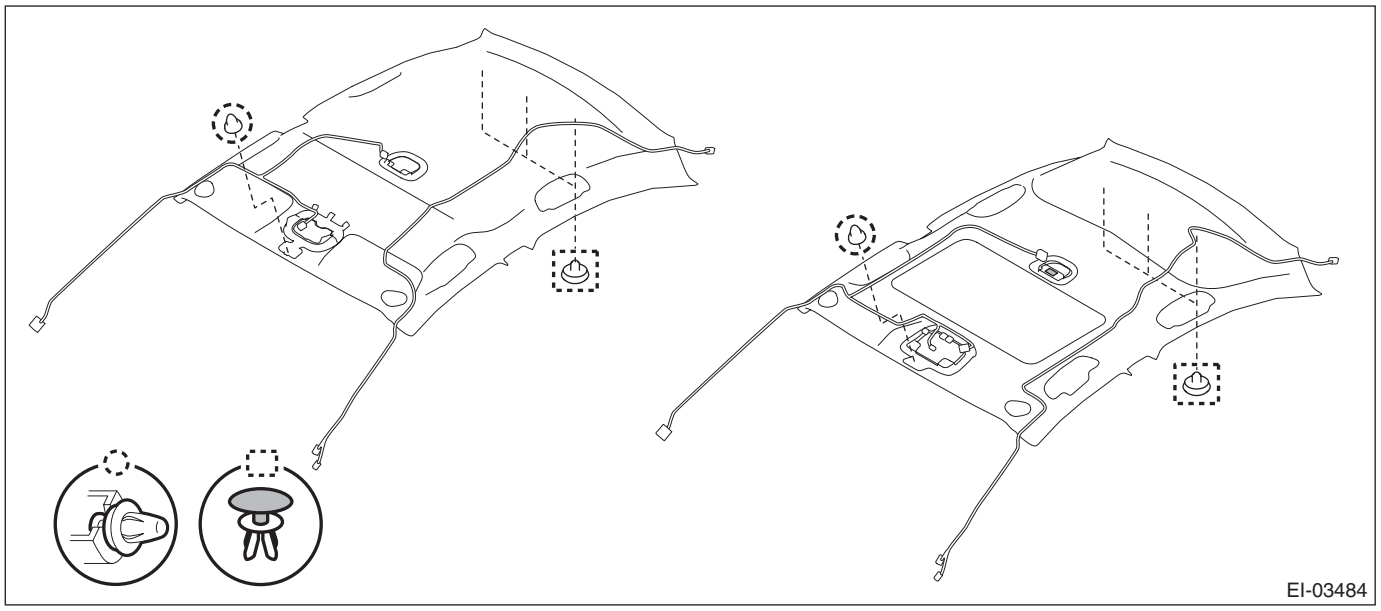
17) Pull out the antenna from the roof top.



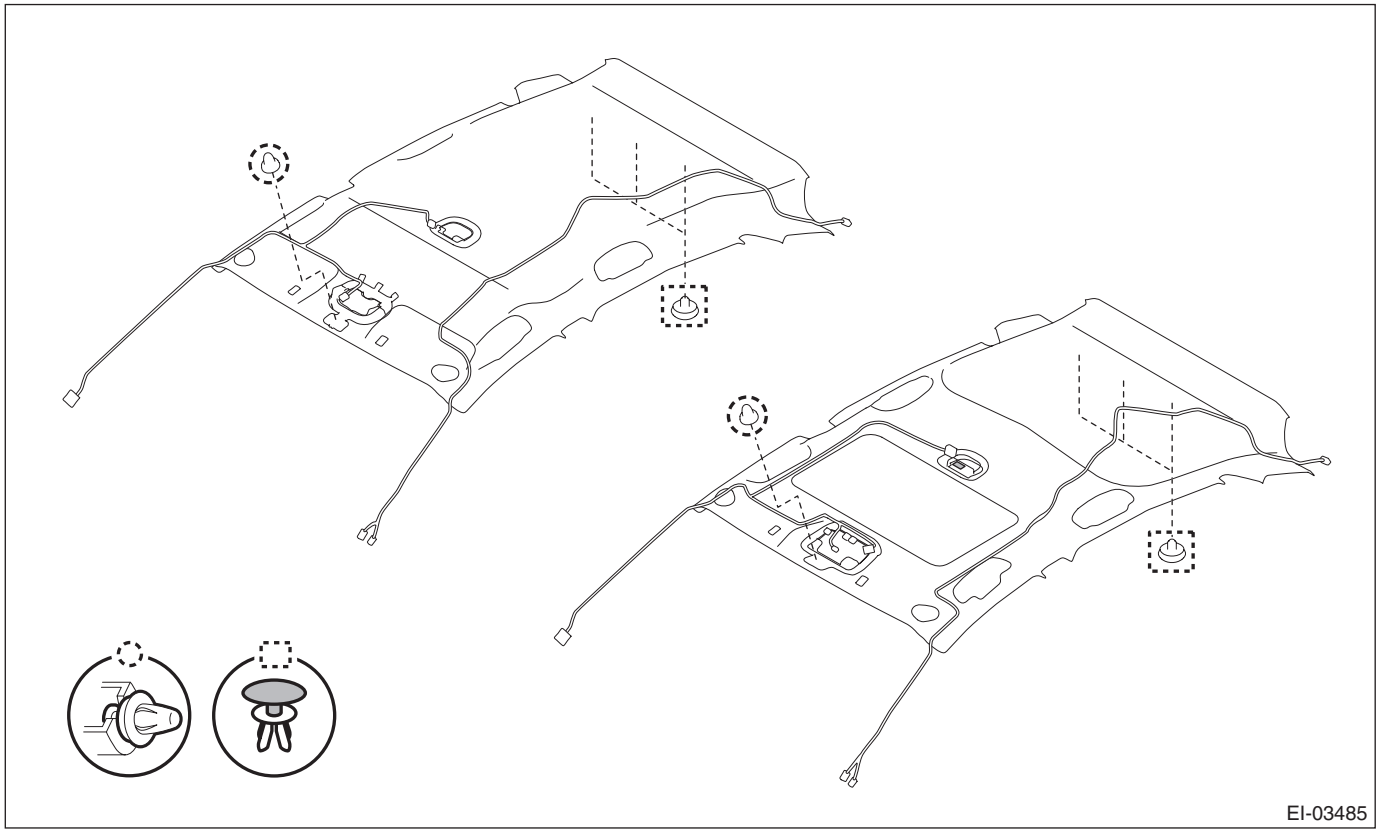
(a) Radio antenna (b) XM radio antenna

## 2. ANTENNA FEEDER CORD

1) Disconnect the ground cable from battery and wait for at least 60 seconds before starting work.
2) Lower the trim panel - roof assembly in the same manner as the removal procedure of antenna. <Ref. to ET-14, ANTENNA, REMOVAL, Antenna.>
   (1) Disconnect the connector of the cord assembly - antenna feeder.
   (2) Remove the clips and the Velcro tape behind the room light.
   (3) Detach the connector of the cord assembly - antenna feeder from the trim panel - roof assembly.



EI-03484



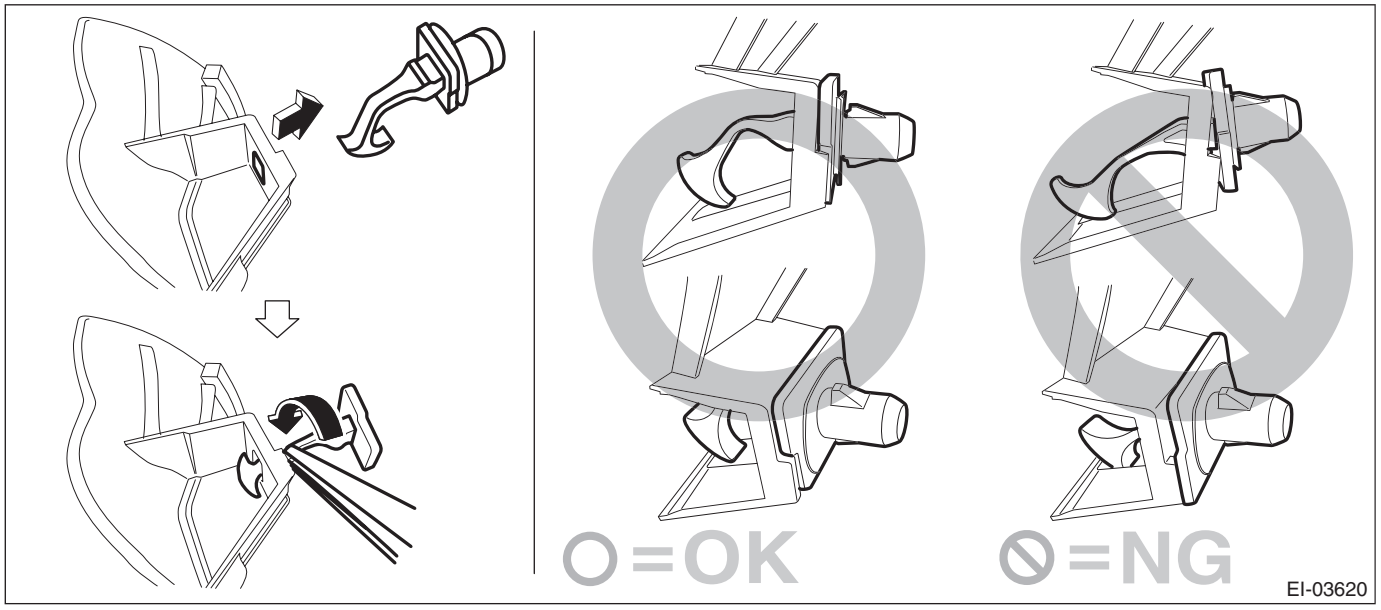
EI-03485

## B: INSTALLATION

Install each part in the reverse order of removal.

**CAUTION:**
**• When reusing the tether clip on the upper part of the trim panel - front pillar UPR, check that there is no damage to the tether clip. If the clip is damaged, its holding force is reduced and the trim panel - front pillar UPR may come off. Be sure to replace it with a new clip.**
**• Do not reuse the tether clip removed from the upper part of the trim panel - front pillar UPR. Always replace with a new part.**
**• Do not reuse the upper clips of the trim panel - center pillar UPR. Once the clip is removed, its holding force is reduced. Be sure to replace it with a new clip.**
**• Before installing the trim panel - front pillar UPR, check the condition of protective non-woven fabric (white) of the curtain airbag. If it is damaged (airbag module cloth is exposed), replace the curtain airbag module assembly with a new part.**

NOTE:
• For application of feeder cord, refer to installation procedure of the trim panel - roof assembly. <Ref. to EI-143, INSTALLATION, Roof Trim.>
• Check the installation status of the tether clips and install the trim panel - front pillar UPR.



***Tightening torque:***
***Radio antenna: 4.5 N·m (0.46 kgf-m, 3.3 ft-lb)***

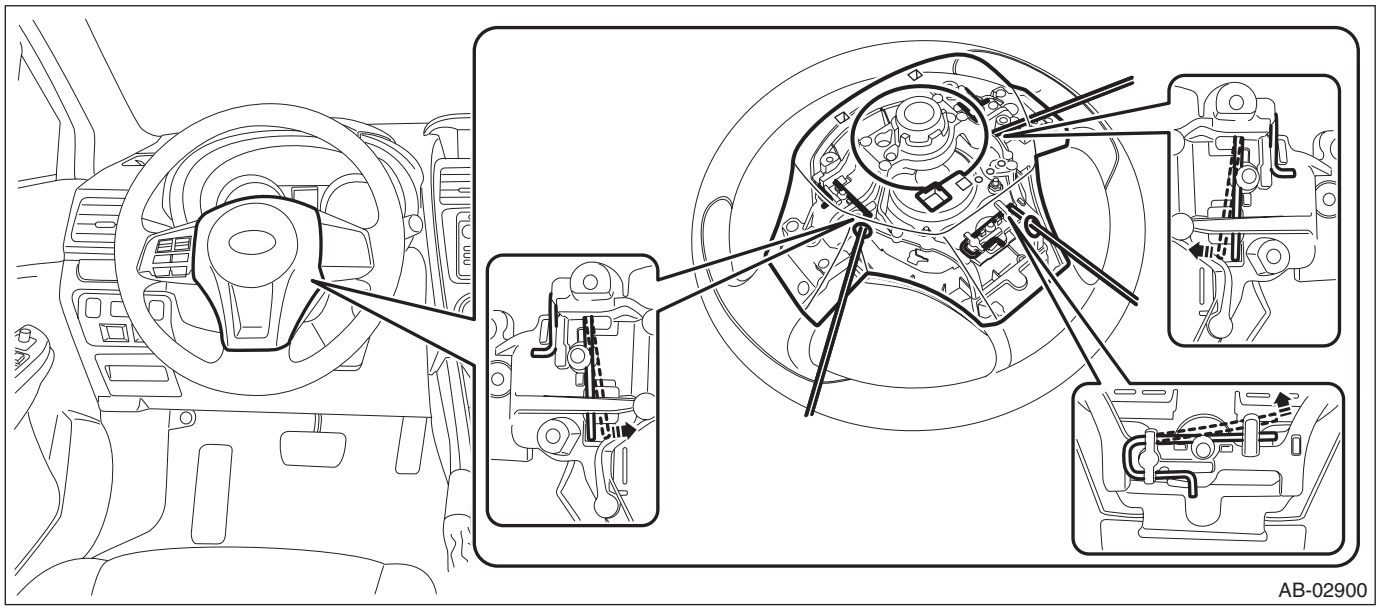
# 8. Steering Satellite Switch

## A: REMOVAL

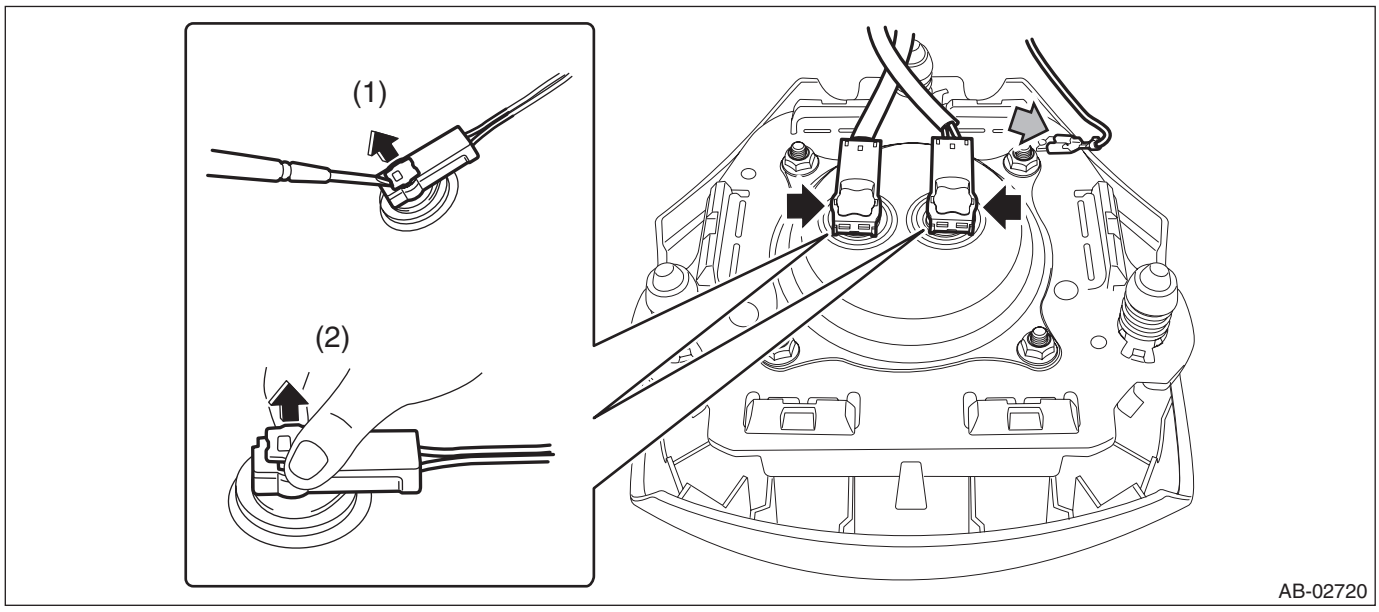
1) Position the front wheels straight ahead. (After moving a vehicle 5 m (16 ft) or more with front wheels positioned straight ahead, make sure that the vehicle moves straight ahead.)
2) Turn the ignition switch to OFF.
3) Disconnect the ground cable from battery and wait for at least 60 seconds before starting work.
4) Remove the driver's airbag module.

**CAUTION:**
**Before handling the airbag module, refer to "CAUTION" of "General Description" in "AIRBAG SYSTEM". <Ref. to AB-11, CAUTION, General Description.>**

(1) Using a hexagon wrench etc. wrapped by protective tape, insert the snap pins and release the locks (3 locations).



(2) Disconnect the horn harness and airbag connector, and remove the driver's airbag module. <Ref. to AB-20, PROCEDURE, Airbag Connector.>

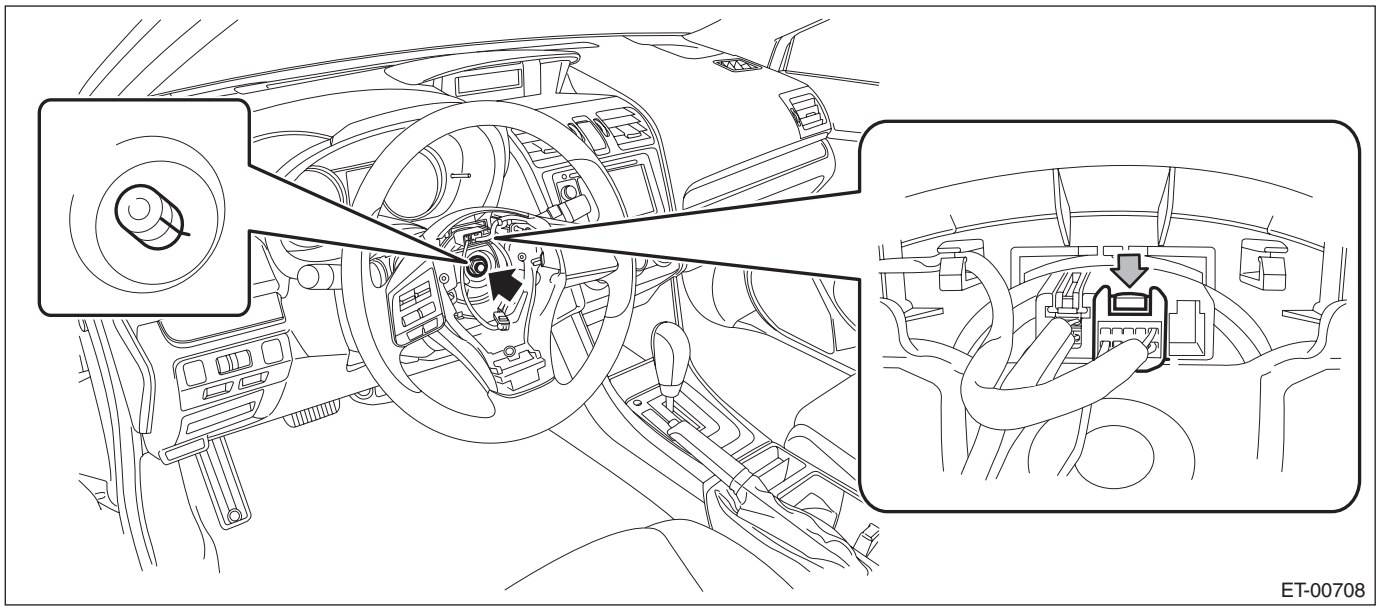


5) Remove the steering wheel.

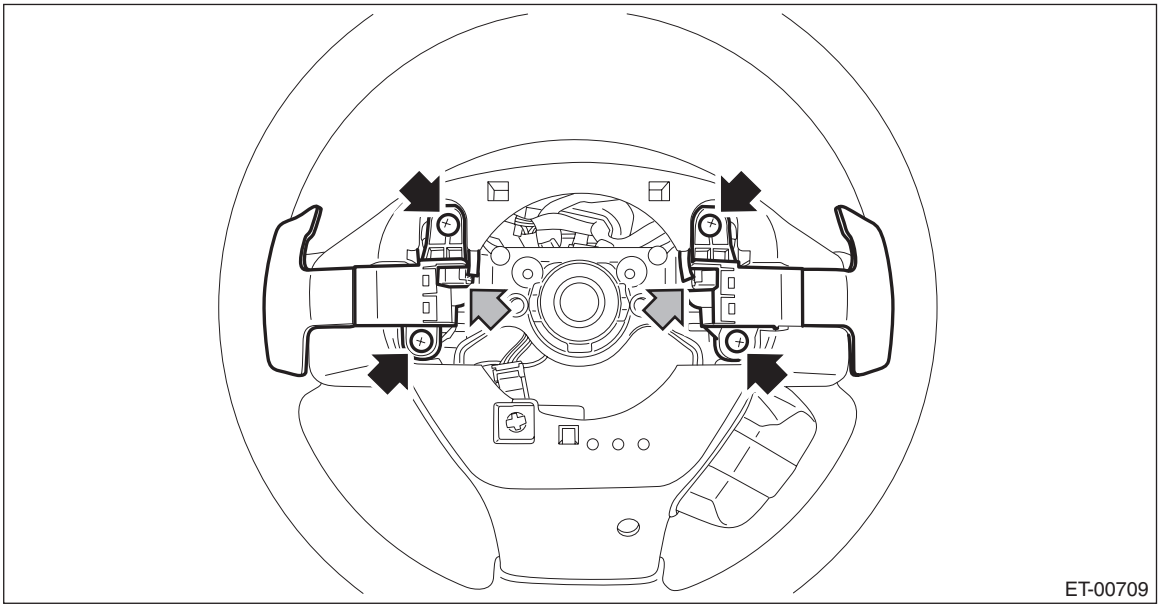
**CAUTION:**
- **Always use the steering wheel puller for removal to avoid deforming the steering wheel.**
- **If the steering wheel has been removed, make sure that the roll connector is not turned from the original position.**

(1) Disconnect the connector and remove the nut.
(2) Put alignment marks and remove the steering wheel.

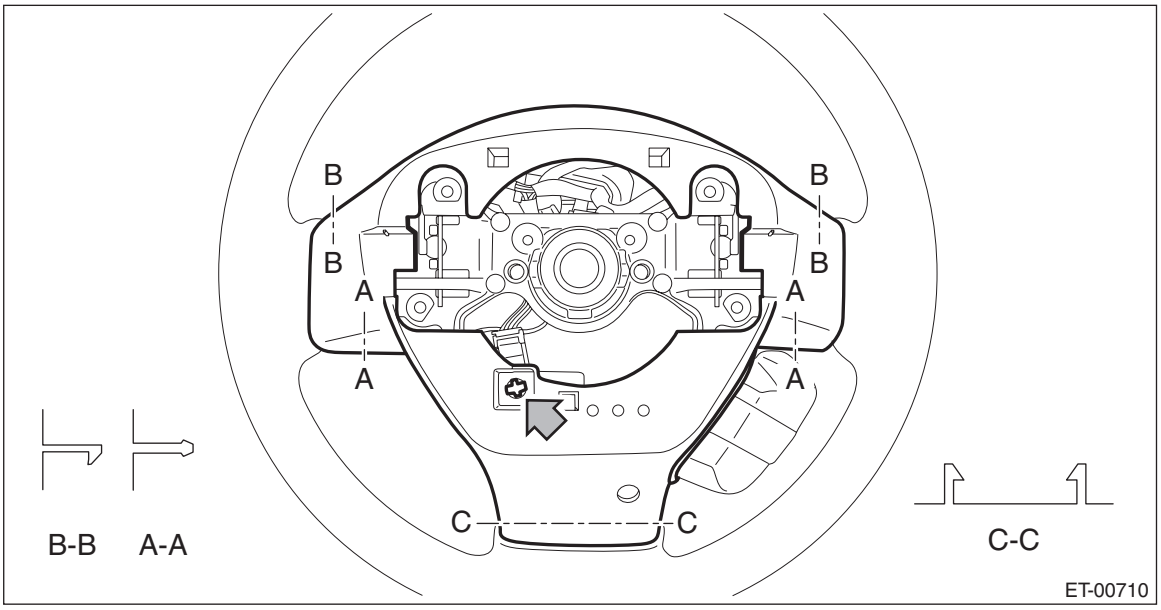
***Preparation tool:***
***Steering wheel puller***



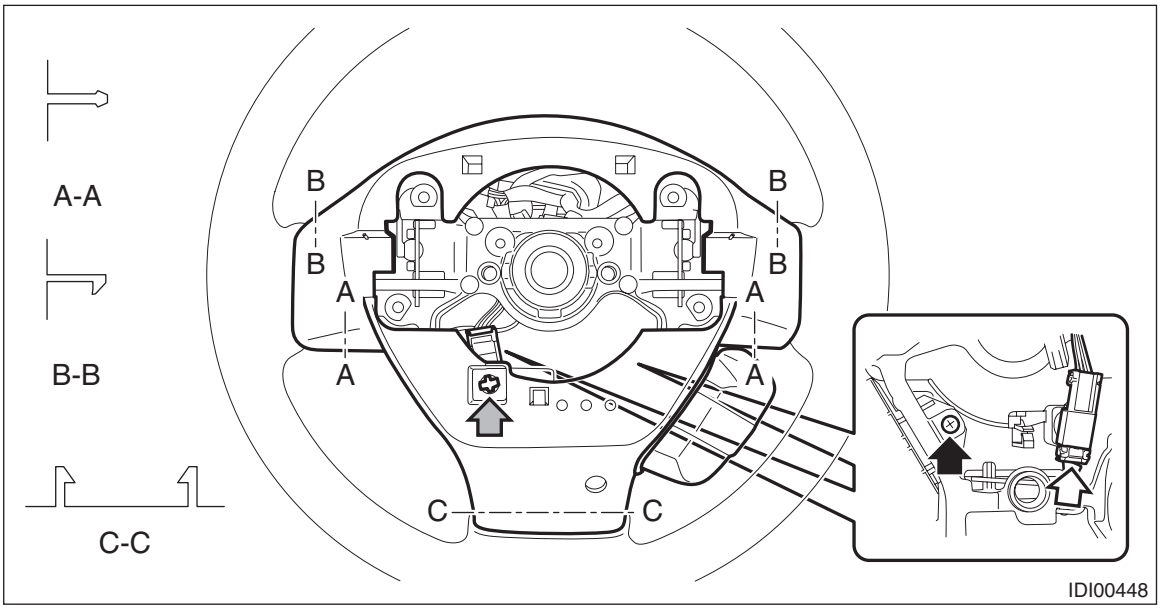
6) Remove the satellite switch assembly.
(1) Remove the screw, disconnect the connector and remove the paddle shift switch. (Model with paddle shift)



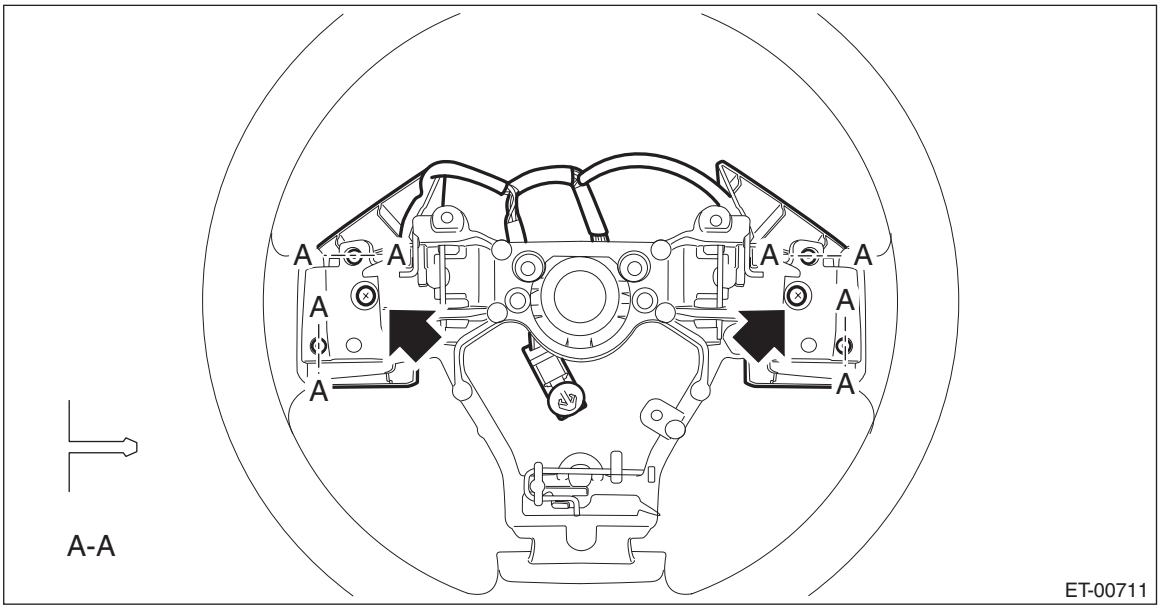
(2) Release the claws and clips, detach the cover - steering wheel LWR.



NOTE:
For model with steering switch, remove the connector and screw.



(3) Remove the screws and then remove the satellite switch assembly.



## B: INSTALLATION

**CAUTION:**

- **Before handling the airbag module, refer to "CAUTION" of "General Description" in "AIRBAG SYSTEM". <Ref. to AB-11, CAUTION, General Description.>**
- **Do not allow harness and connectors to interfere or get tangled up with other parts.**
- **If the steering wheel and steering angle sensor (steering roll connector) are removed, perform "VDC sensor midpoint setting mode" of the VDC. <Ref. to VDC-19, VDC SENSOR MIDPOINT SETTING MODE, ADJUSTMENT, VDC Control Module and Hydraulic Control Unit (VDCCM&H/U).>**

1) Before installing steering wheel, be sure to adjust the direction of steering roll connector with steering wheel. <Ref. to AB-109, ADJUSTMENT, Roll Connector.>
2) Install each part in the reverse order of removal.

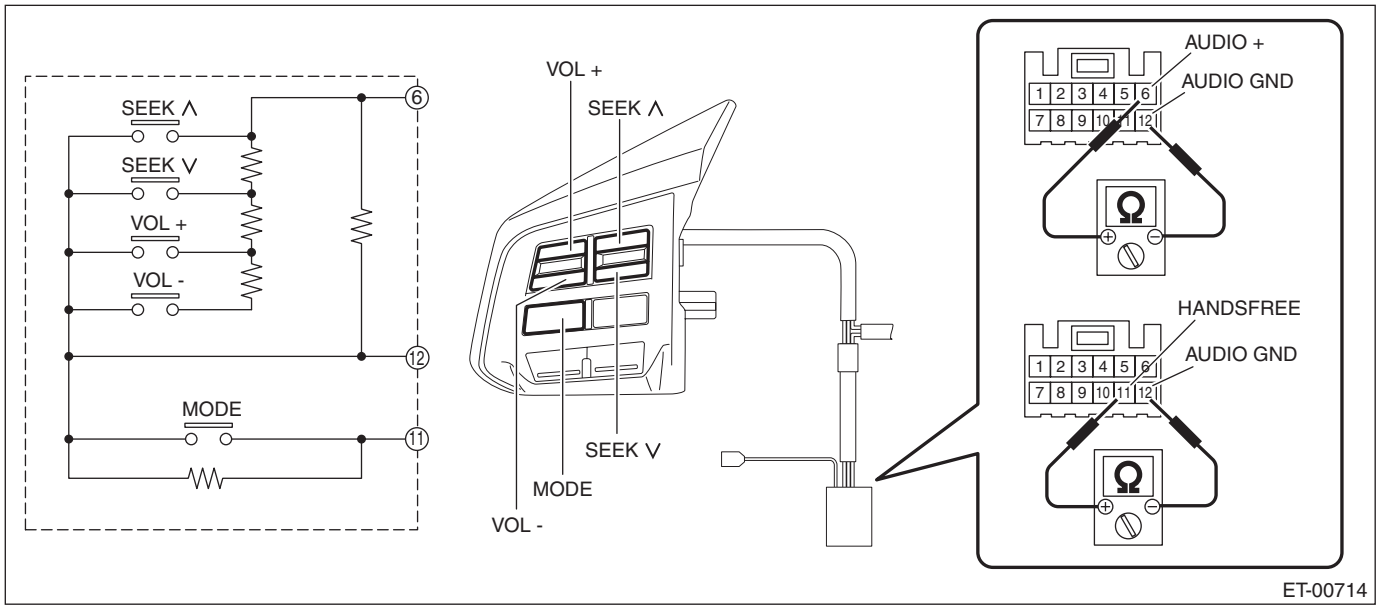
NOTE:
Align the alignment marks on the steering wheel and the column assembly - steering.

***Tightening torque:***
***Steering wheel: 39 N·m (4.0 kgf-m, 28.8 ft-lb)***

***Clearance:***
***Between cover assembly - column and steering wheel: 4 — 6 mm (0.16 — 0.24 in)***

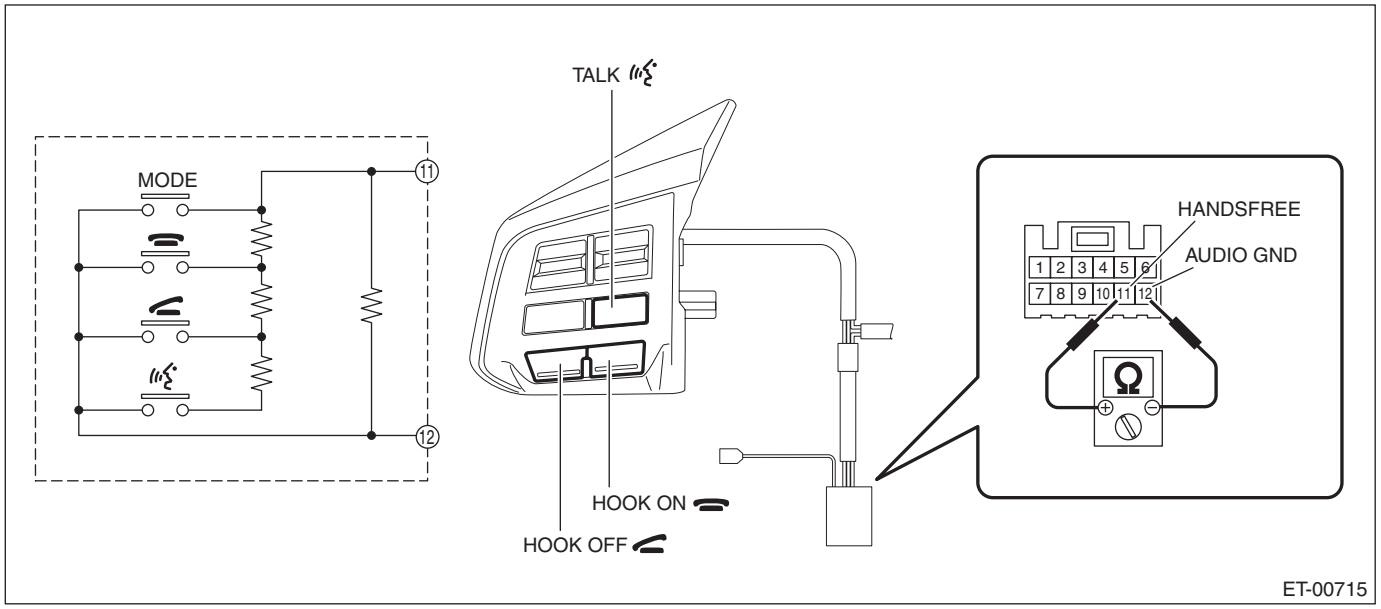
## C: INSPECTION

1) Measure the resistance between connector terminals of the satellite switch.
- Audio operation



| Switch | Switch operation | Terminal No. | Standard |
|---|---|---|---|
| VOL (+)<br>VOL (–)<br>SEEK (∧)<br>SEEK (∨) | All OFF | 6 and 12 | Approx. 100 kΩ |
| MODE | OFF | 11 and 12 | Approx. 100 kΩ |
| VOL (+) | ON | 6 and 12 | Approx. 1,010 Ω |
| VOL (–) | ON | 6 and 12 | Approx. 3,210 Ω |
| Preset CH UP/SEEK (∧) | ON | 6 and 12 | Approx. less than 1 Ω |
| Preset CH DOWN/SEEK (∨) | ON | 6 and 12 | Approx. 330 Ω |
| MODE | ON | 11 and 12 | Approx. less than 1 Ω |

- Handsfree operation



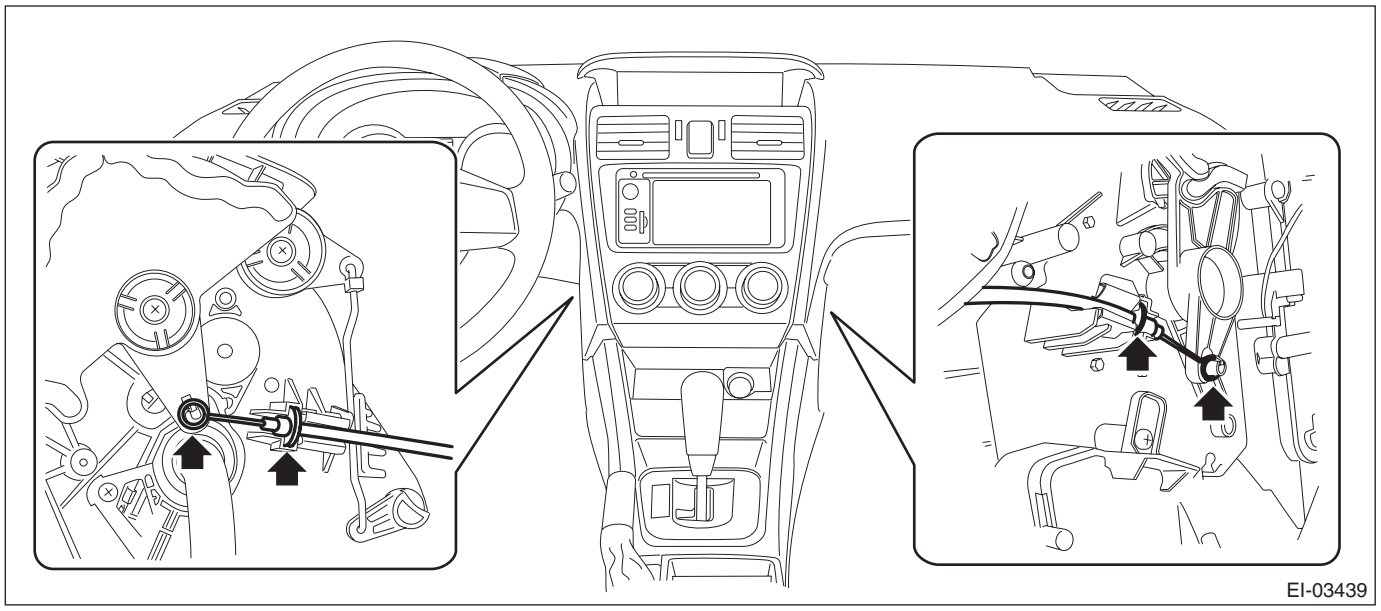
| Switch | Switch operation | Terminal No. | Standard |
|---|---|---|---|
| HOOK ON<br>HOOK OFF<br>TALK | All OFF | 11 and 12 | Approx. 100 kΩ |
| HOOK ON | ON | 11 and 12 | Approx. 330 Ω |
| HOOK OFF | ON | 11 and 12 | Approx. 1,010 Ω |
| TALK | ON | 11 and 12 | Approx. 3,210 Ω |

2) If the result of the measurement is not at the standard, replace the satellite switch assembly.

# 9. Navigation Body

## A: REMOVAL

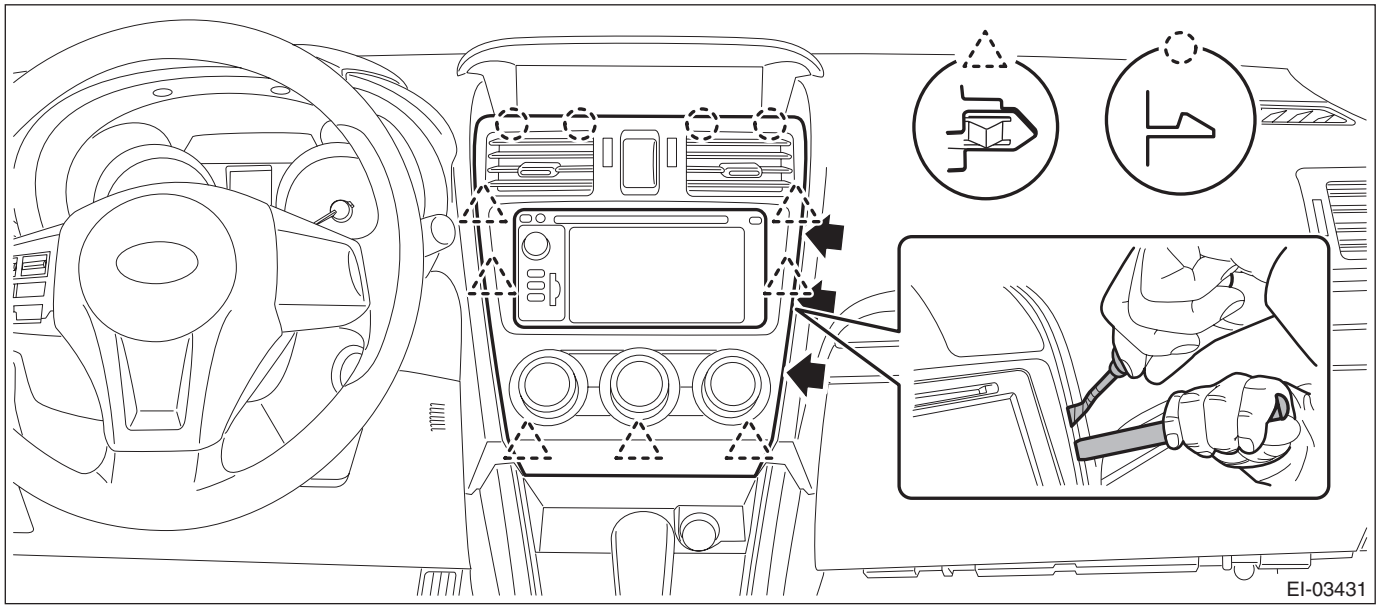
1) Disconnect the ground cable from battery.
2) On manual A/C models, disconnect the control cables from both sides of the heater and cooling unit assembly.



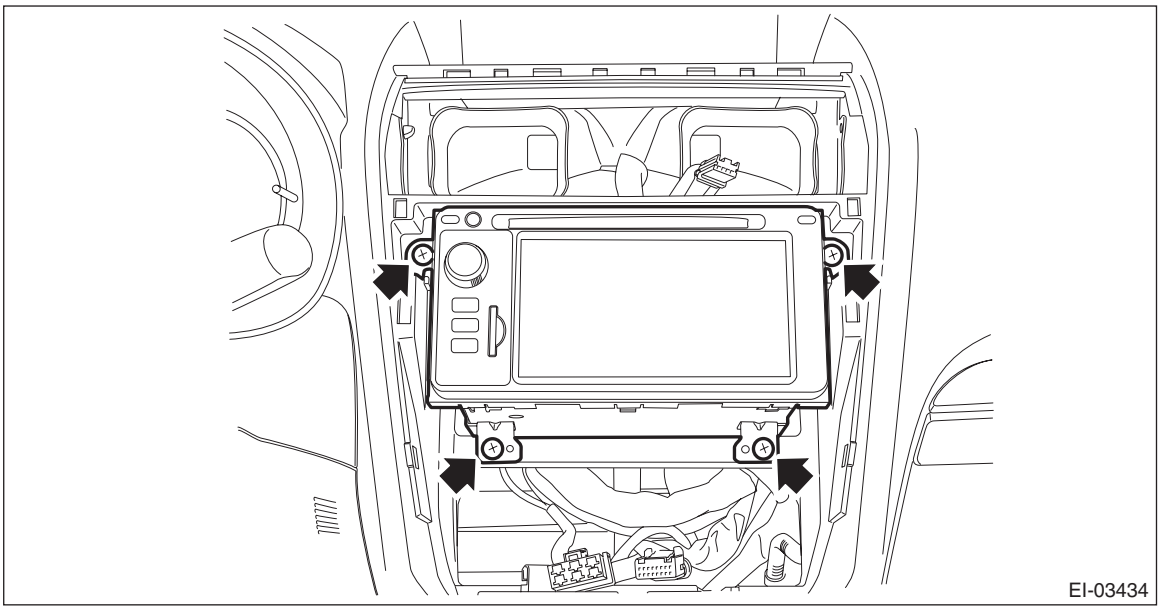
NOTE:
Remove the glove box pocket assembly on the passenger's side.
3) Remove the panel center assembly.

**CAUTION:**
- **Do not put your finger on the fin of the air vent grille. Doing so may damage the fin.**
- **Pull the panel center assembly slowly. Pulling with excessive force may damage the connector.**

(1) Insert a plastic remover to the three areas shown by the arrows, and lift up the panel center assembly slightly.
(2) With the panel center assembly lifted up slightly, release the claw by using a clip remover wrapped with protective tape.
(3) Release the rest of the claws, and pull out the panel center assembly.
(4) Disconnect the connectors, and remove the panel center assembly.



4) Remove the navigation assembly.
   (1) Remove the left and right screws, and partially pull out the navigation assembly.
   (2) Disconnect the connector and remove the navigation assembly.



## B: INSTALLATION

**CAUTION:**
**After installing the panel center assembly, check that the air vent grille of the panel center assembly is inserted correctly into the air vent duct.**
Install each part in the reverse order of removal.

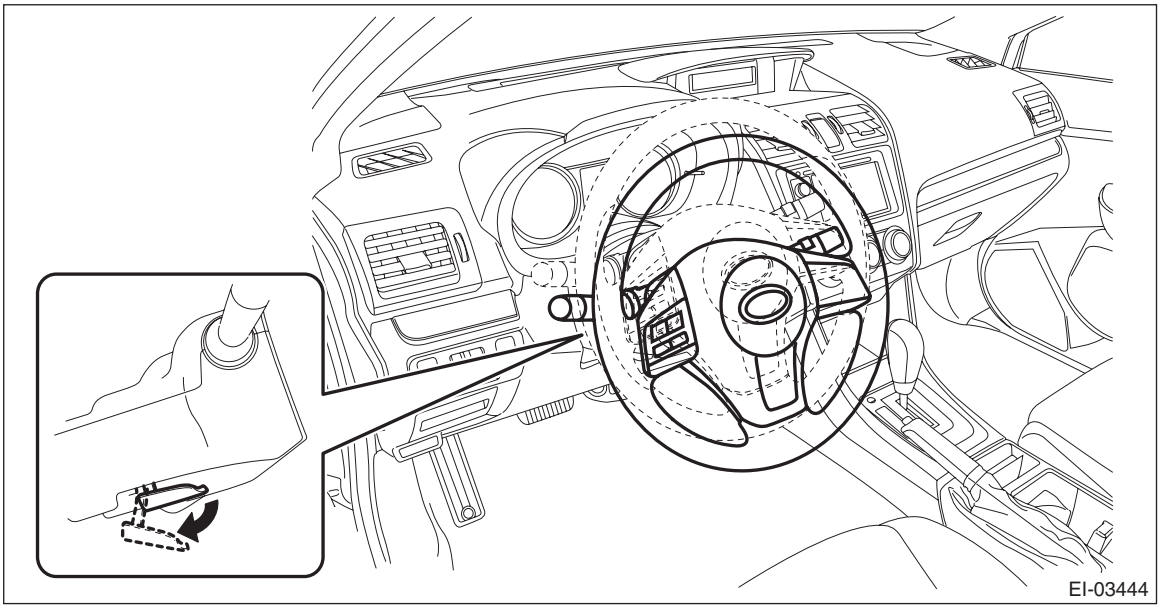
# 10.GPS Antenna

## A: REMOVAL

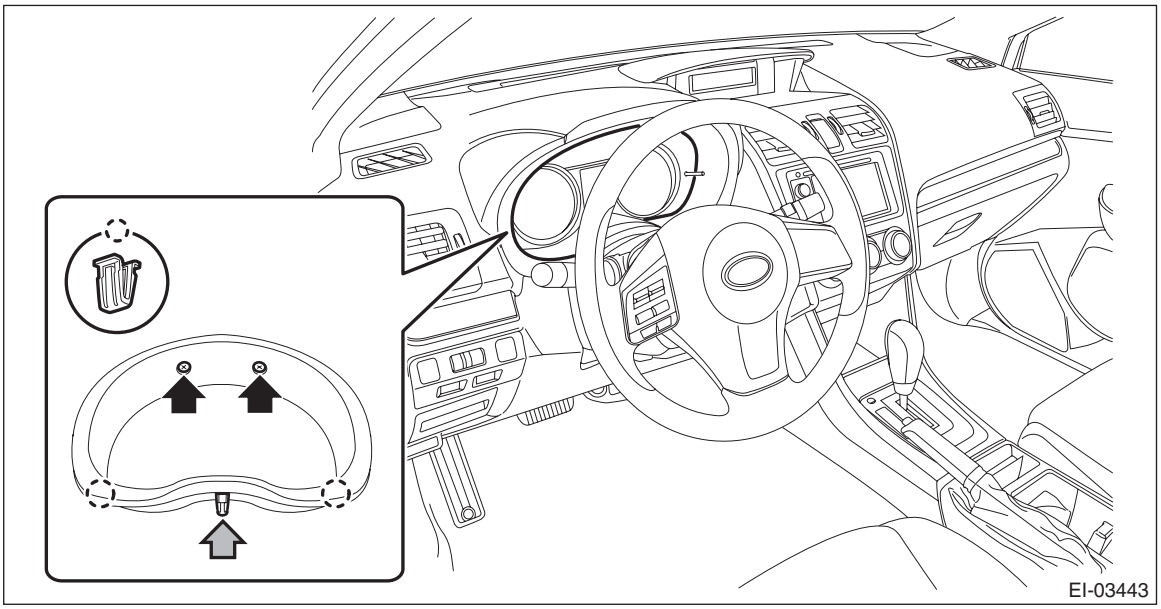
1) Disconnect the ground cable from battery.
2) Remove the combination meter assembly.

**CAUTION:**
- **Be careful not to damage the meter or instrument panel.**
- **Pay particular attention to avoid damaging the meter glass.**

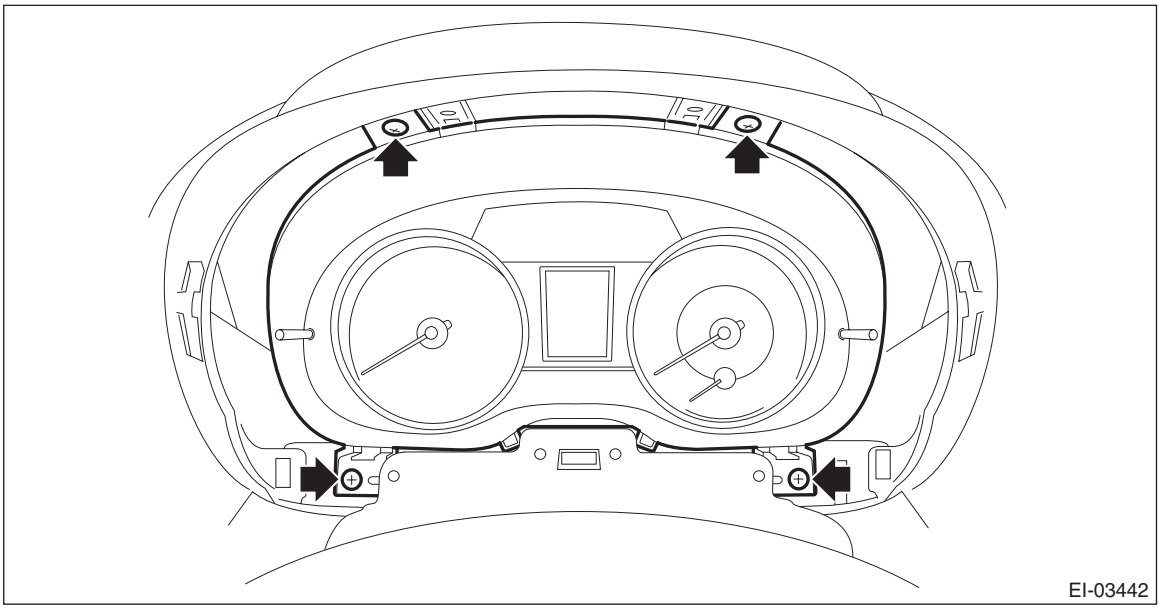
(1) Release the lock, tilt the steering column to the lowest end and fully extend the column by the telescopic system.



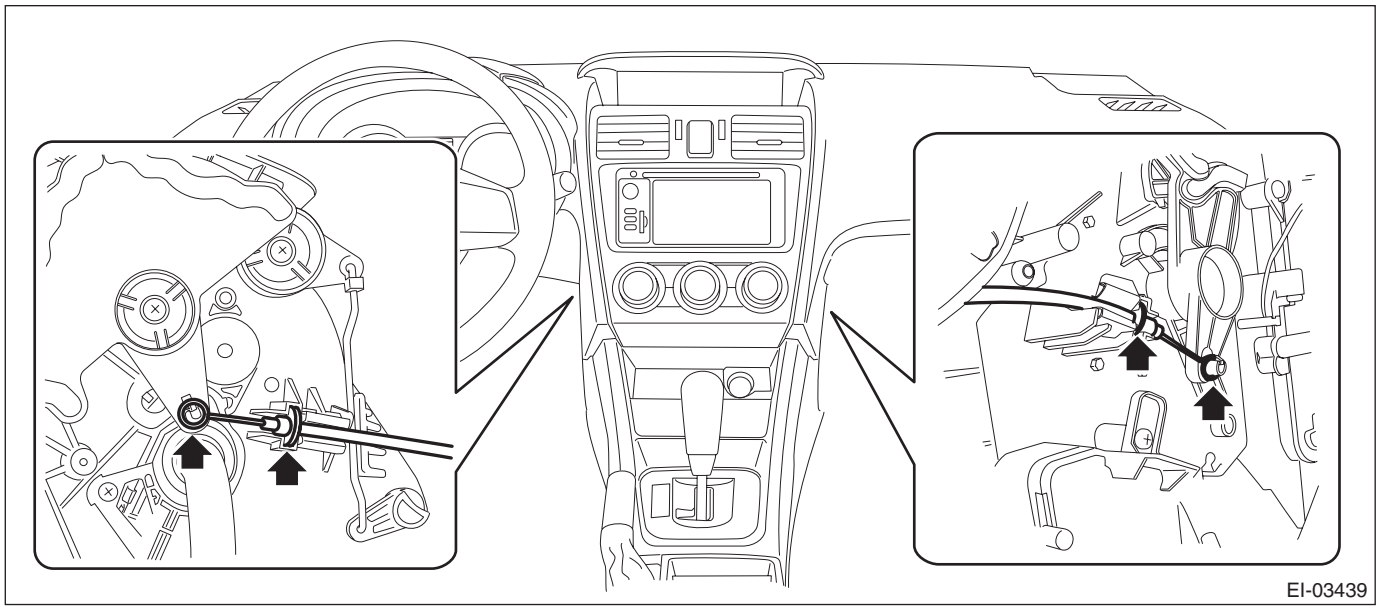
(2) Release the screws and clips, then detach the meter visor assembly.



(3) Remove the screws, disconnect the connector and remove the combination meter assembly.



3) On manual A/C models, disconnect the control cables from both sides of the heater and cooling unit assembly.

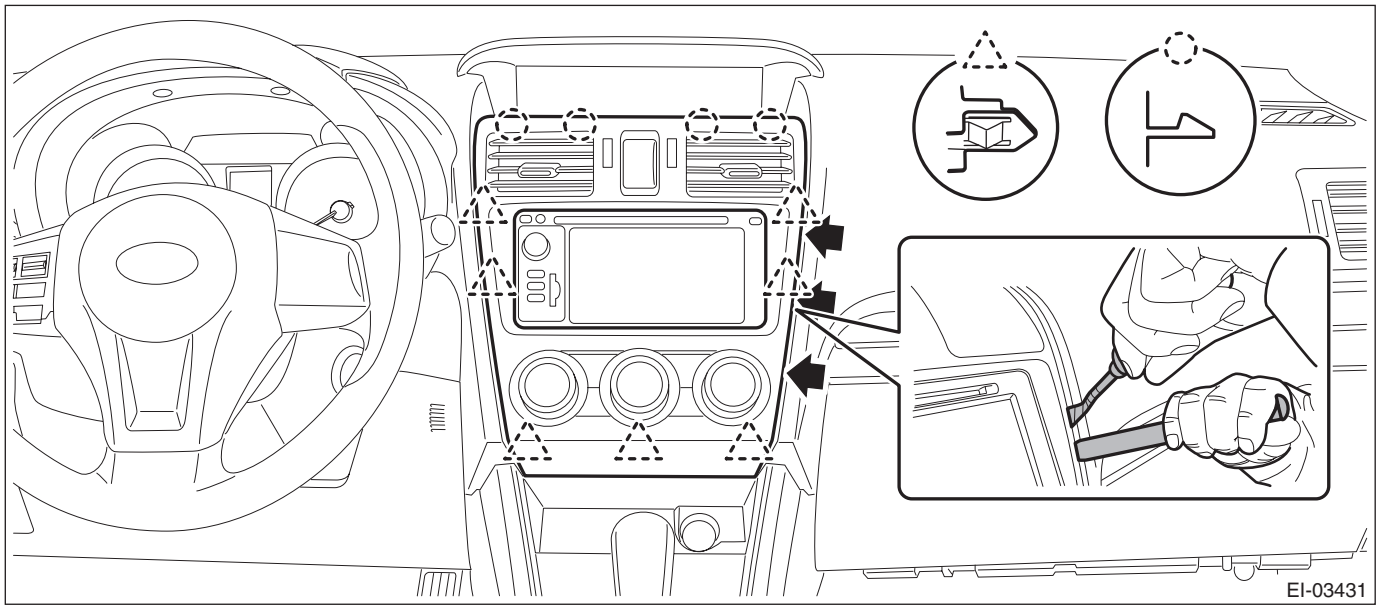


NOTE:
Remove the glove box pocket assembly on the passenger's side.

4) Remove the panel center assembly.

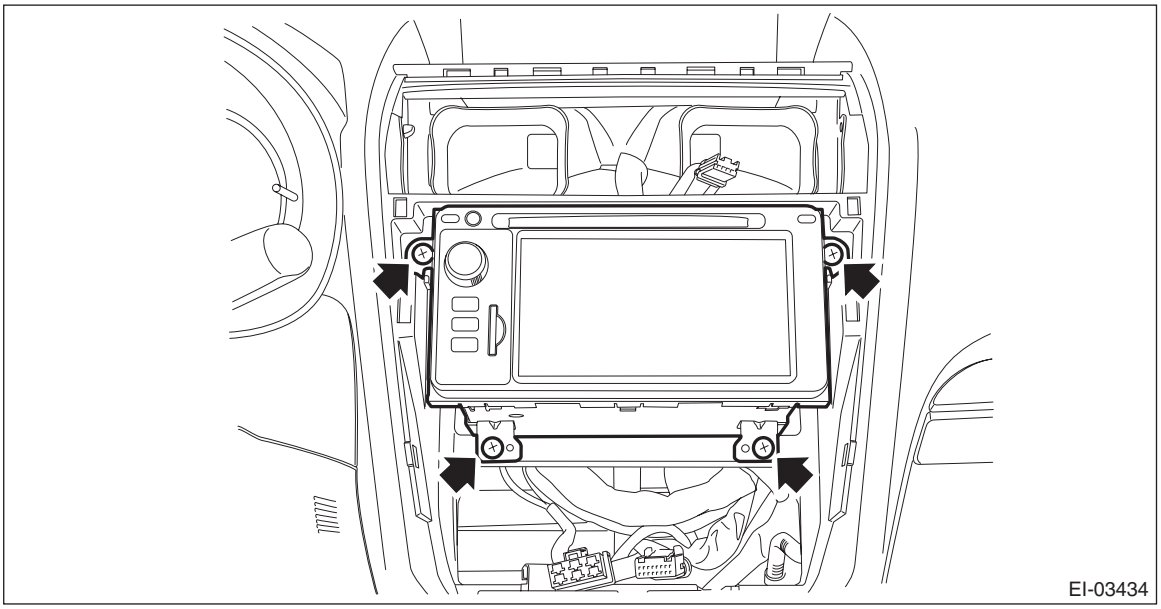
**CAUTION:**
- **Do not put your finger on the fin of the air vent grille. Doing so may damage the fin.**
- **Pull the panel center assembly slowly. Pulling with excessive force may damage the connector.**

(1) Insert a plastic remover to the three areas shown by the arrows, and lift up the panel center assembly slightly.
(2) With the panel center assembly lifted up slightly, release the claw by using a clip remover wrapped with protective tape.
(3) Release the rest of the claws, and pull out the panel center assembly.
(4) Disconnect the connectors, and remove the panel center assembly.



EI-03431

5) Remove the navigation assembly.
(1) Remove the left and right screws, and partially pull out the navigation assembly.
(2) Disconnect the connector and remove the navigation assembly.

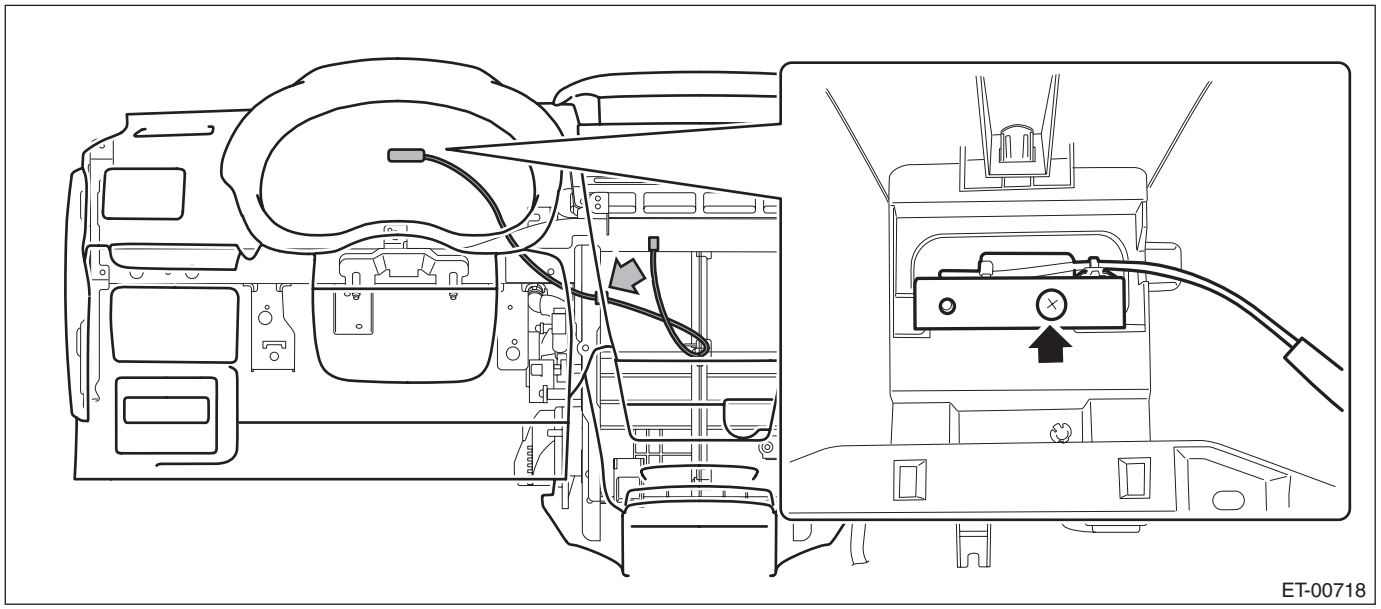


EI-03434

6) Remove the GPS antenna assembly.
(1) Tie a string to the GPS antenna assembly harness connector on the navigation unit side.

NOTE:
A string makes operation easier during installation.

(2) Remove the screw and harness clamp, and pull out the GPS antenna assembly harness from the combination meter side.



(3) When the GPS antenna assembly is pulled out, remove the string attached to the connector in step (1).

## B: INSTALLATION

**CAUTION:**
**After installing the panel center assembly, check that the air vent grille of the panel center assembly is inserted correctly into the air vent duct.**
Install each part in the reverse order of removal.

# 11.Rearview Camera System

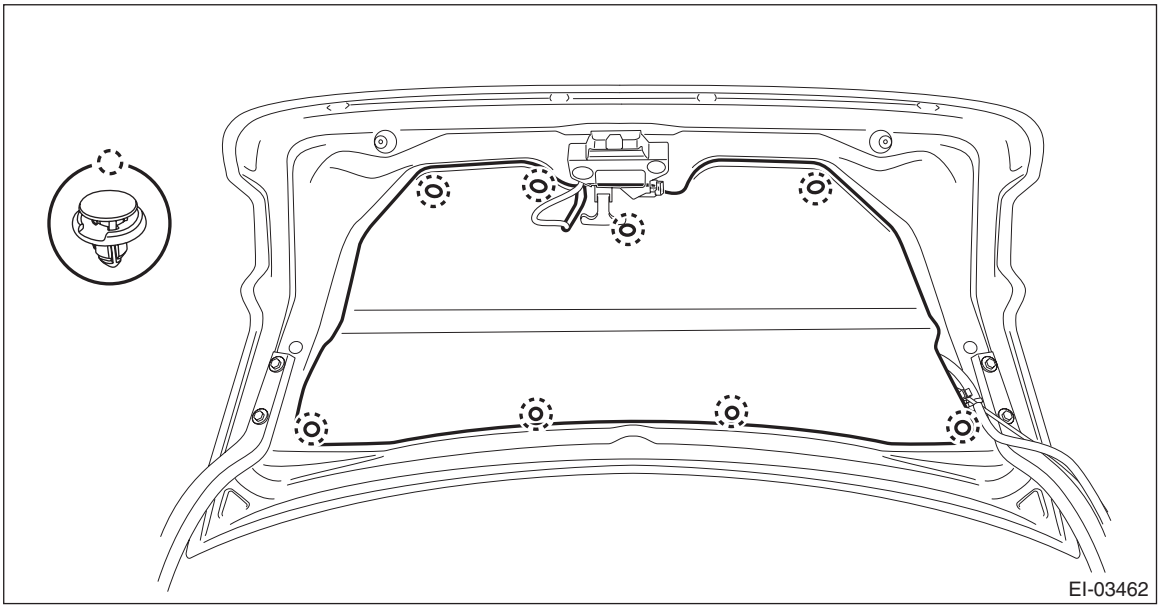
## A: WIRING DIAGRAM

Refer to “Rearview Camera System” in the wiring diagram. <Ref. to WI-123, WIRING DIAGRAM, Rearview Camera System.>

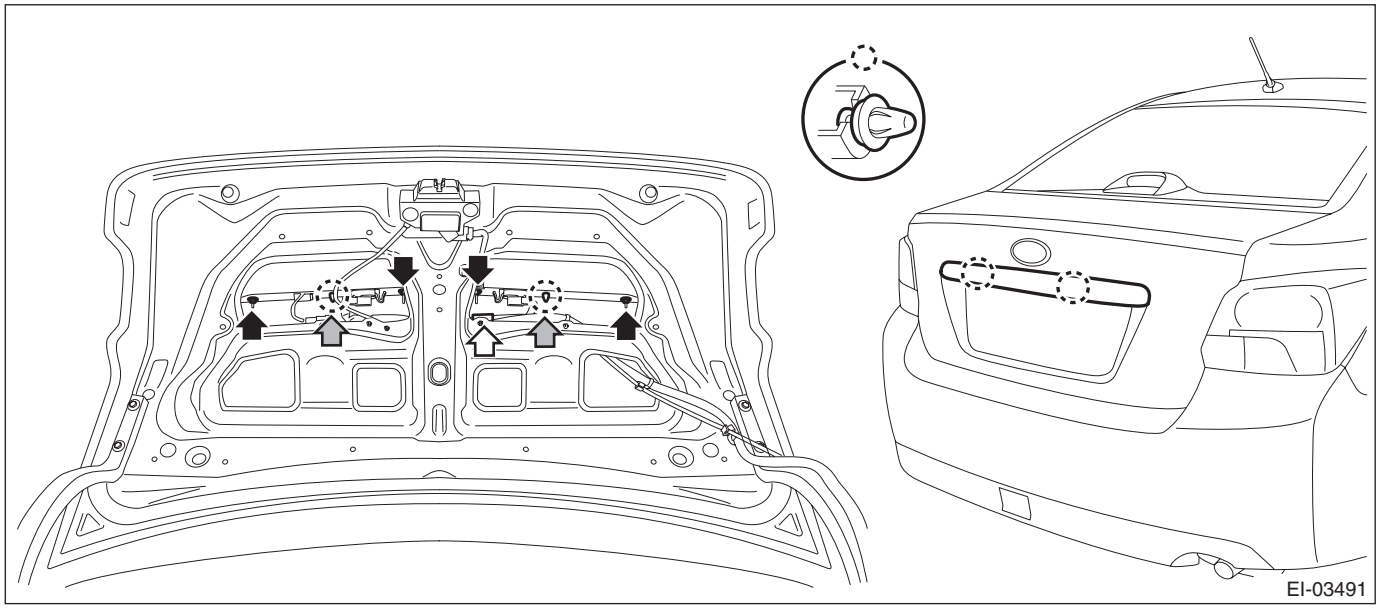
## B: REMOVAL

### 1. 4 DOOR MODEL

1) Disconnect the ground cable from battery.
2) Remove the clips, and remove the trim panel - trunk lid.



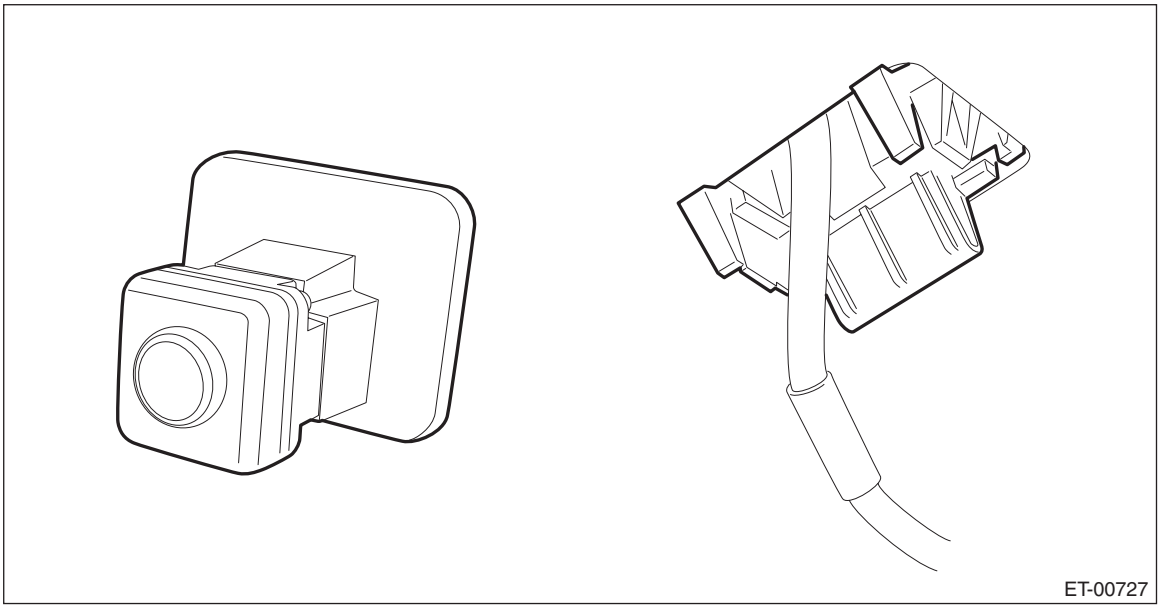
3) Remove the garnish - trunk.
   (1) Remove the nut.
   (2) Remove the clips, and remove the garnish - trunk.



4) Remove the rearview camera assembly.

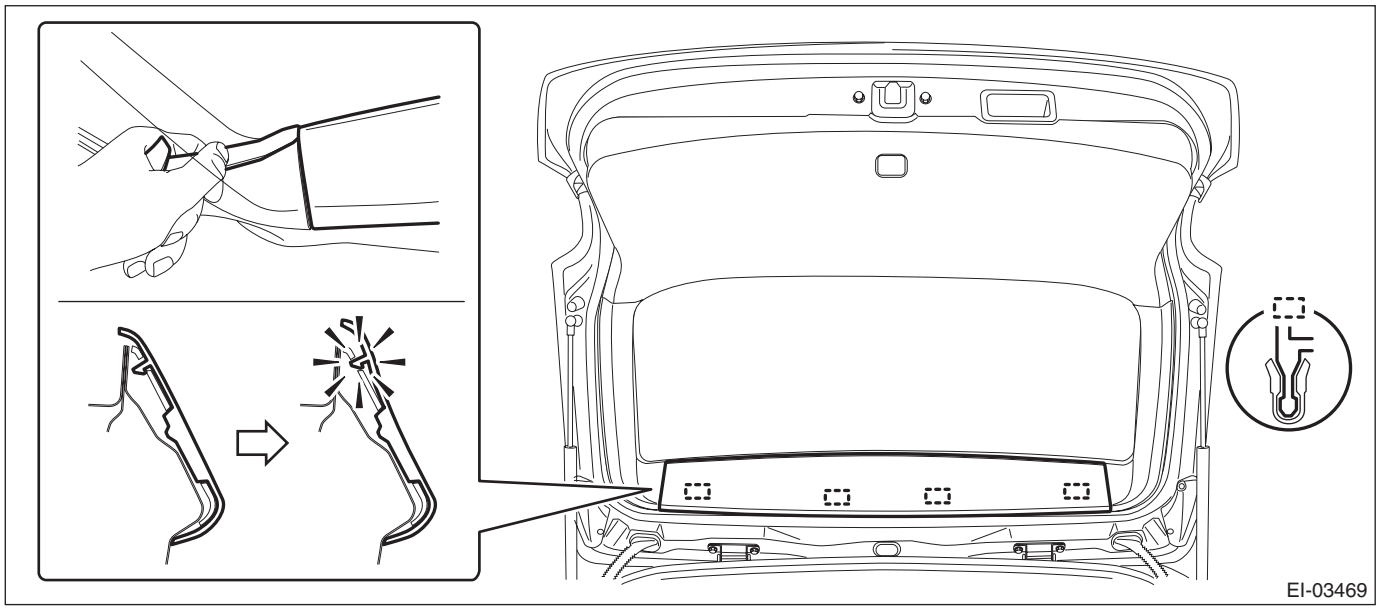
**CAUTION:**
**Do not drop or apply any impact to the rearview camera because it is a precision equipment.**

(1) Disconnect the rearview camera connector.
(2) Disconnect the claws and then remove the rearview camera assembly.

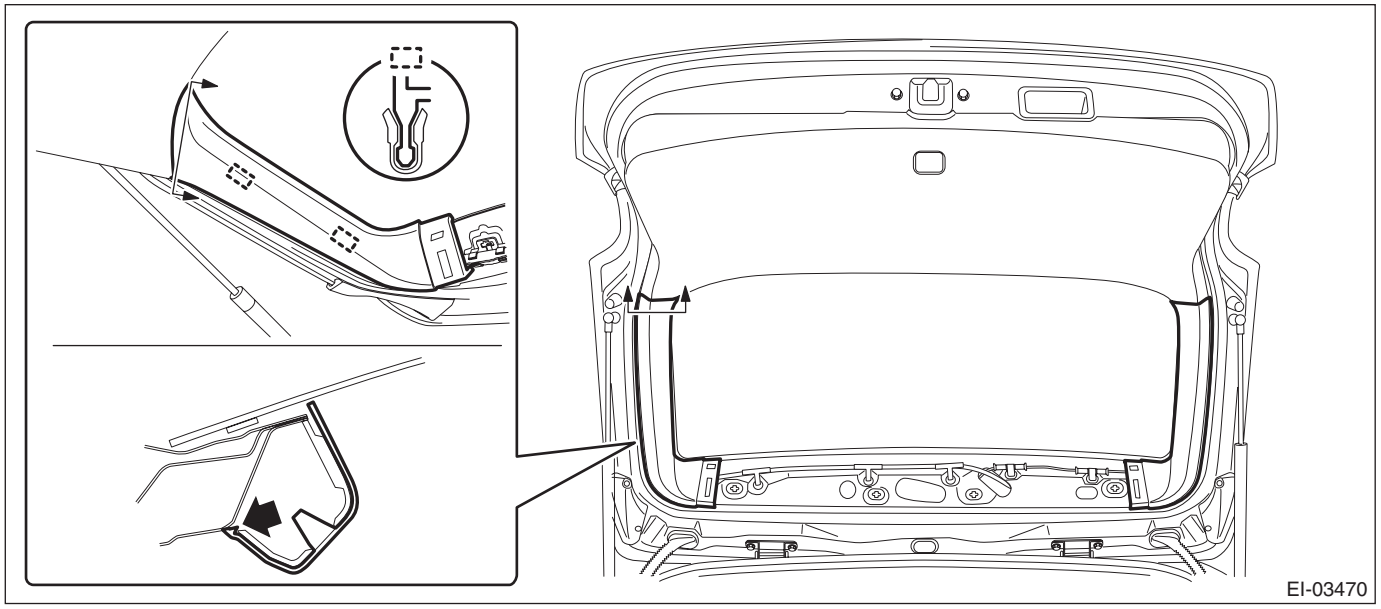


## 2. 5 DOOR MODEL/XV MODEL

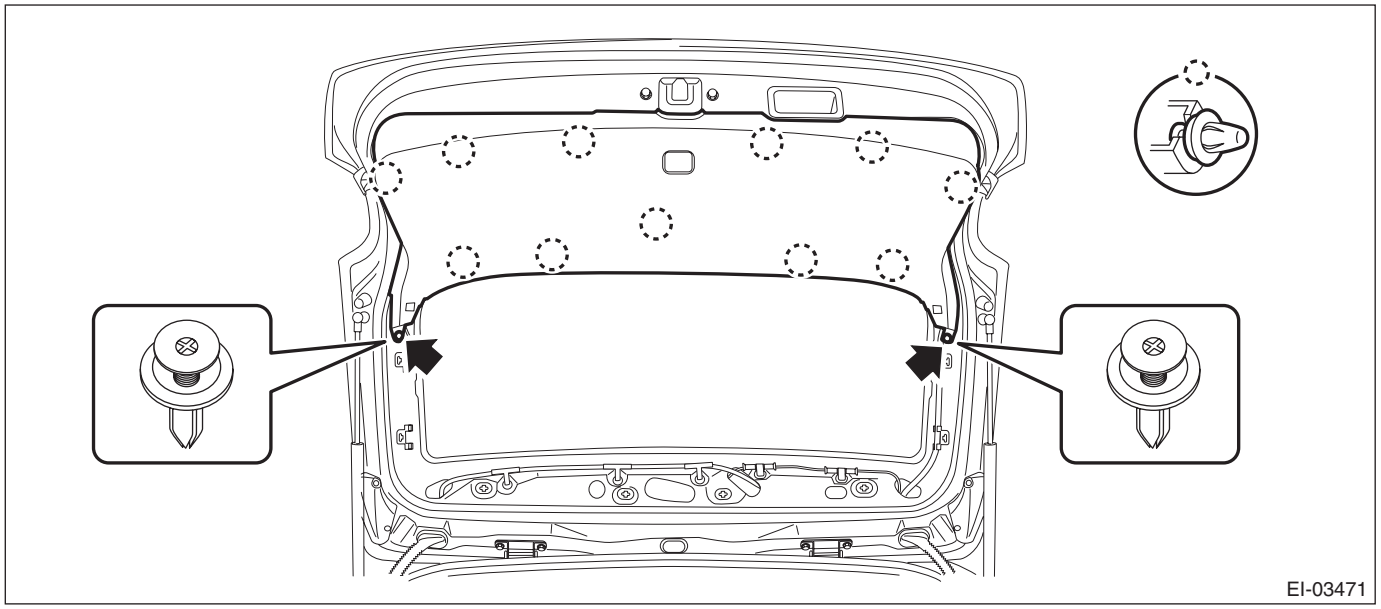
1) Disconnect the ground cable from battery.
2) Remove the trim panel - rear gate UPR.
   (1) Remove the claws on the trim edge.
   (2) Release the claws in the center of trim, and remove the trim panel - rear gate UPR.



3) Remove the trim panel - rear gate pillar side.
   (1) Release the claws.
   (2) Remove the claws on the bottom of trim, and remove the trim panel - rear gate pillar side.

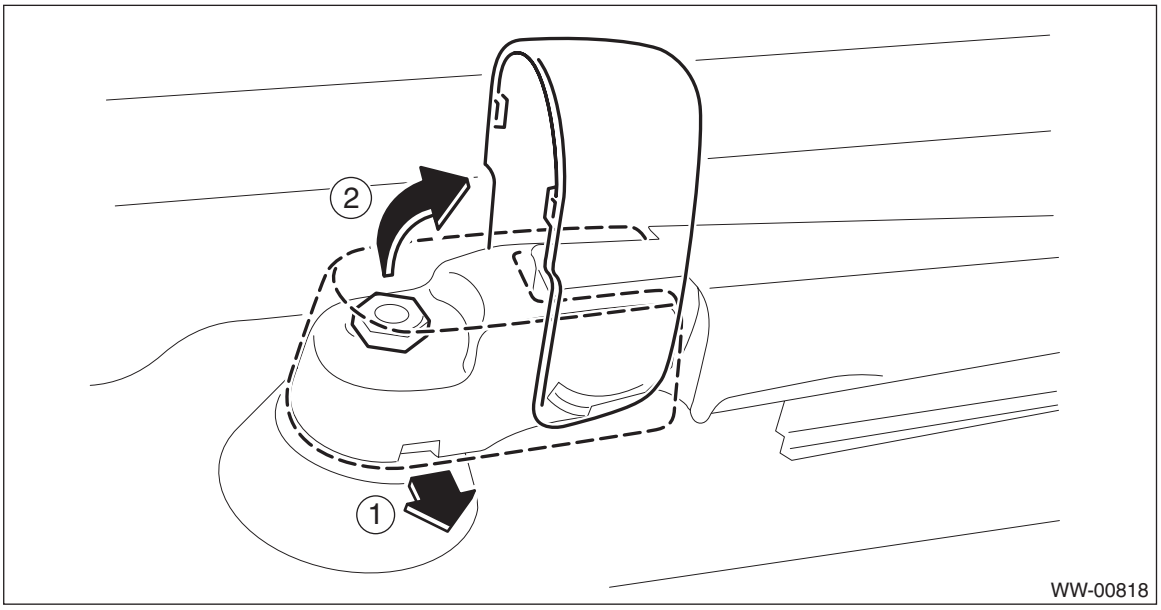


4) Remove the trim panel - rear gate LWR.
   (1) Remove the clips on both ends.
   (2) Release the clips, and remove the trim panel - rear gate LWR.

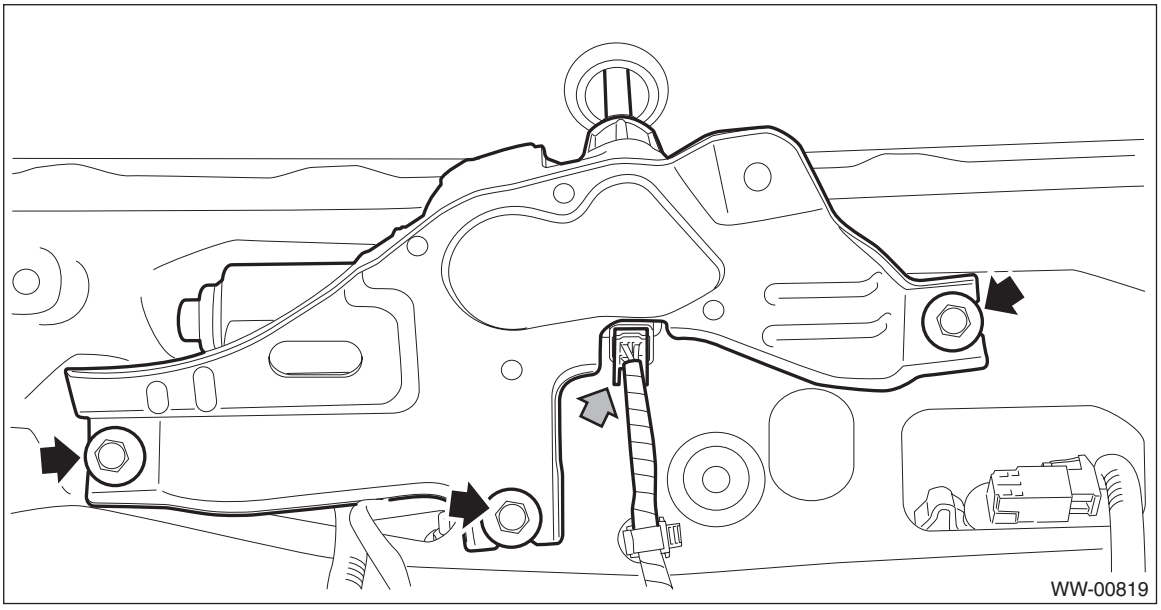


5) Remove the arm assembly - rear wiper.
   (1) Remove the cover - rear wiper arm.

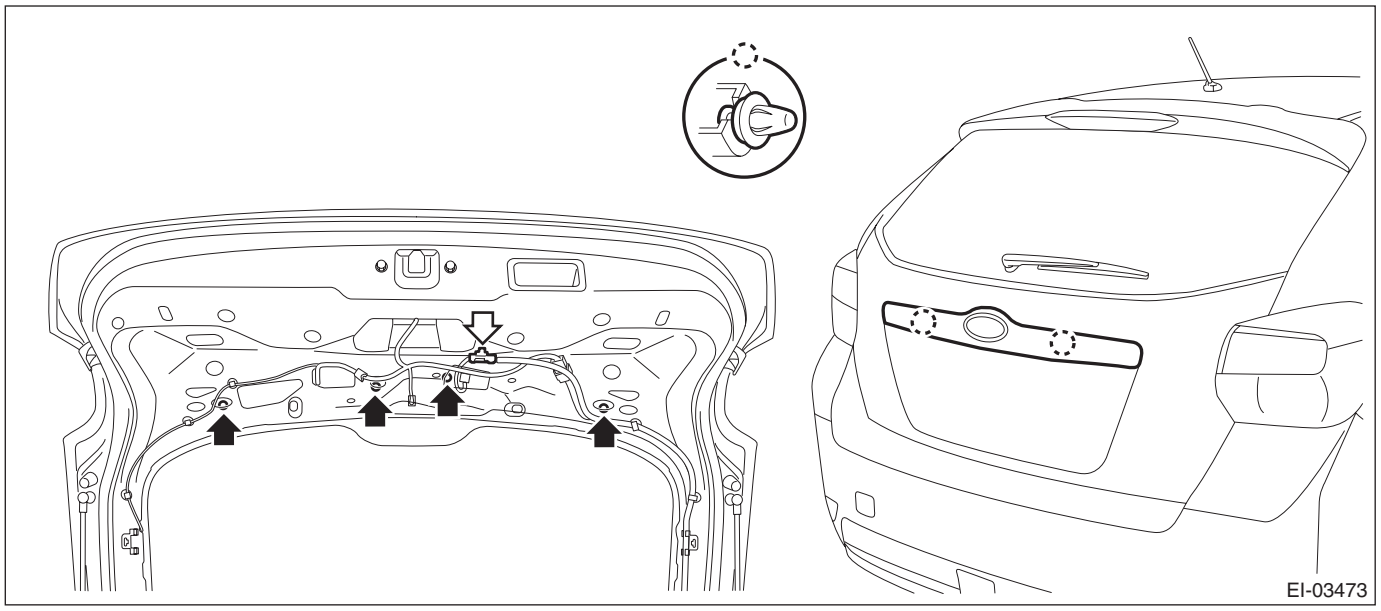
(2) Remove the nut, and remove the arm assembly - rear wiper.



6) Remove the motor assembly - rear wiper.
(1) Disconnect the harness connector of the motor assembly - rear wiper.
(2) Remove the bolts, and remove the motor assembly - rear wiper.

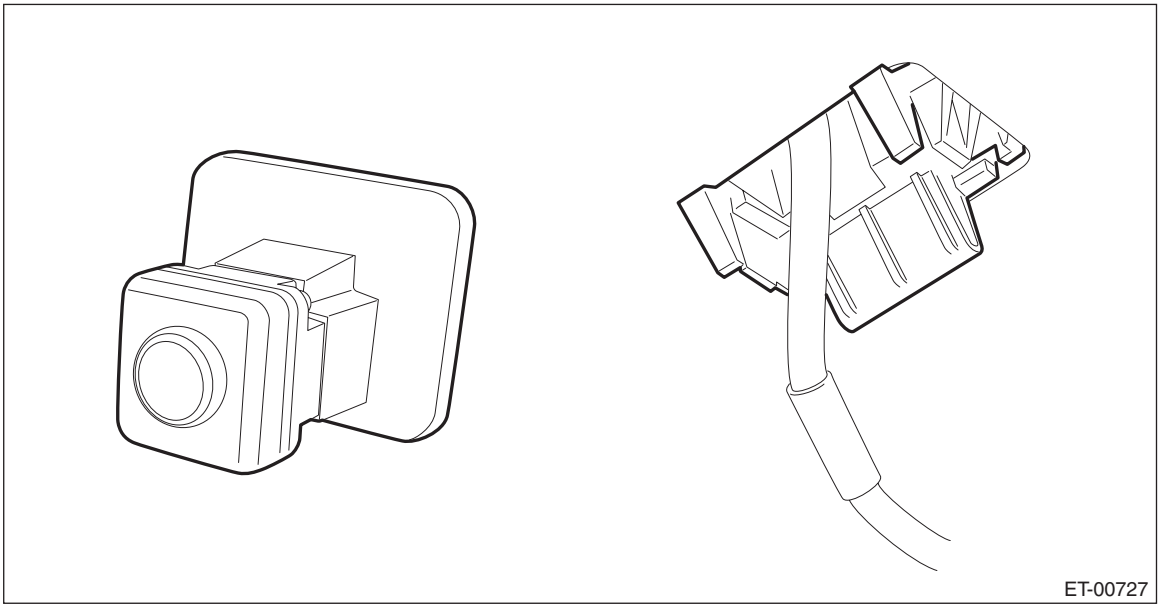


7) Remove the garnish assembly - rear gate.
(1) Disconnect the harness connector of license plate light assembly.
(2) Remove the nuts.
(3) Remove the clips and remove the garnish assembly - rear gate.



8) Remove the rearview camera assembly.

**CAUTION:**
**Do not drop or apply any impact to the rearview camera because it is a precision equipment.**
(1) Disconnect the rearview camera connector.
(2) Disconnect the claws and then remove the rearview camera assembly.



## C: INSTALLATION

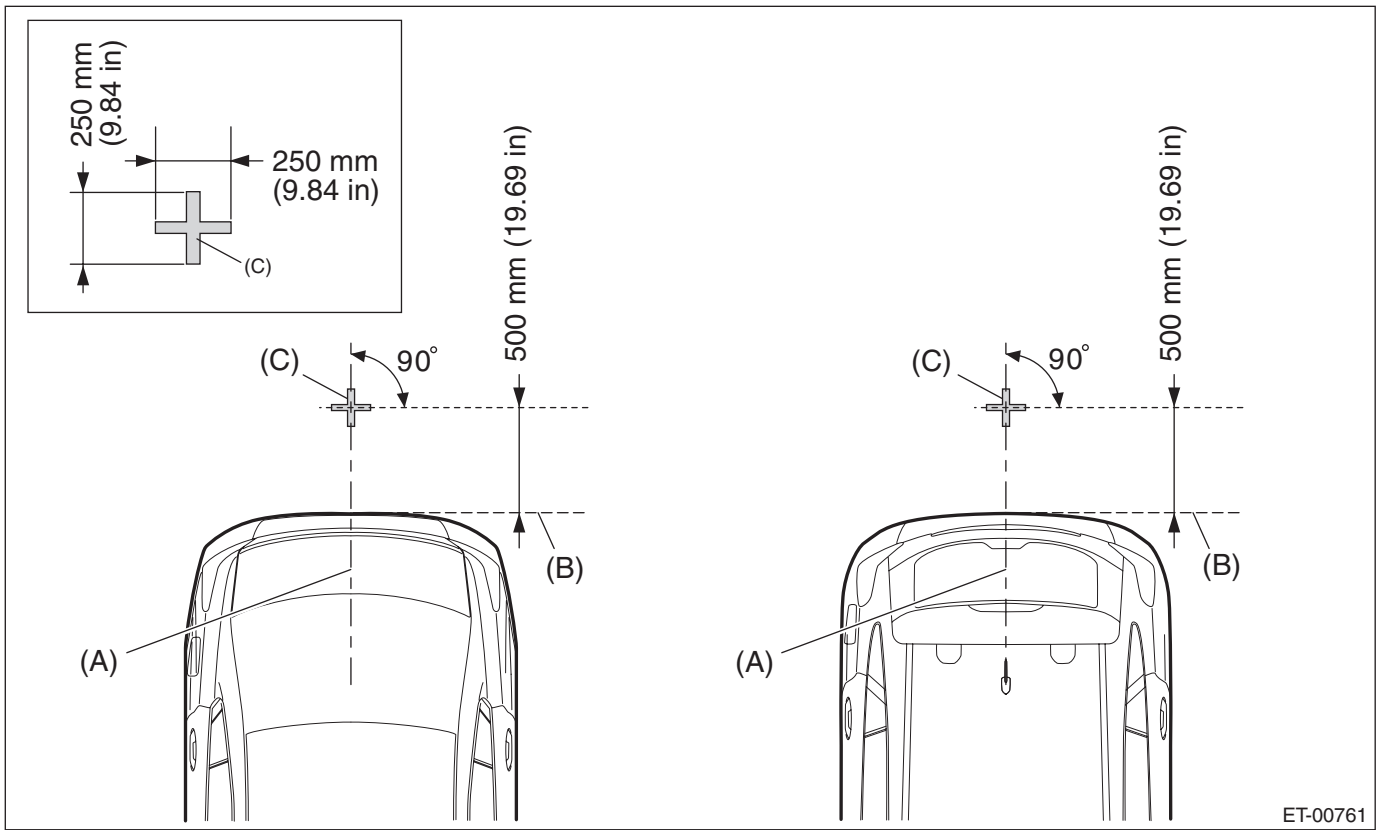
**CAUTION:**
**Be sure to confirm the marker position, whenever the rearview camera is removed/installed/replaced.**
Install each part in the reverse order of removal.

***Tightening torque:***
***4 door model***
***Rearview camera (bracket): 7.5 N·m (0.76 kgf-m, 5.5 ft-lb)***
***Garnish - trunk: 4.5 N·m (0.46 kgf-m, 3.3 ft-lb)***
***5 door model/XV model***
***Rearview camera (bracket (nut)): 4.5 N·m (0.46 kgf-m, 3.3 ft-lb)***
***Rearview camera (ground (bolt)): 13 N·m (1.33 kgf-m, 9.6 ft-lb)***
***Garnish assembly - rear gate: 4.5 N·m (0.46 kgf-m, 3.3 ft-lb)***
***Arm assembly - rear wiper: 8 N·m (0.82 kgf-m, 5.9 ft-lb)***

## D: INSPECTION

1) Park the vehicle at the level place where there are enough area at the rear of the vehicle.
2) Attach the tape as the target point for standard at the floor rearward of the vehicle as shown in the figure below.

NOTE:
Standard tape width is about 30 — 50 mm (1.18 — 1.97 in) and brilliant color shall be used.



(A) Vehicle body center line (B) Rear edge of bumper (C) Target point

3) Confirm the following before checking the corresponding items.
- If the display is blank.

Rearview camera image is not displayed. (Navigation screen is displayed normally.)
1. Check the condition of back sensor connection. <Ref. to ET-5, CHECK EACH VEHICLE SIGNAL, INSPECTION, Navigation System.>
2. Check the condition of rearview camera connection. <Ref. to ET-4, CHECK EACH CONNECTION, INSPECTION, Navigation System.>

- If the marker is not displayed.
- If the marker position is not aligned.

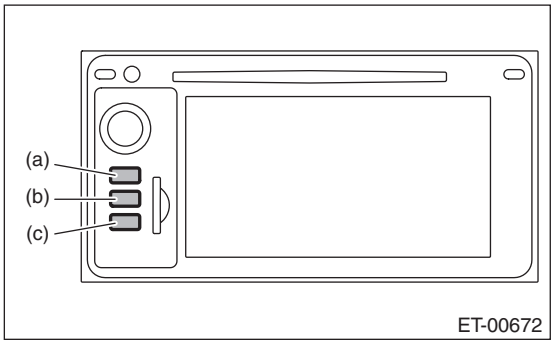
1. Adjust the marker position according to the MARKER ADJUSTMENT MODE. <Ref. to ET-43, MARKER ADJUSTMENT MODE, ADJUSTMENT, Rearview Camera System.>

# E: ADJUSTMENT

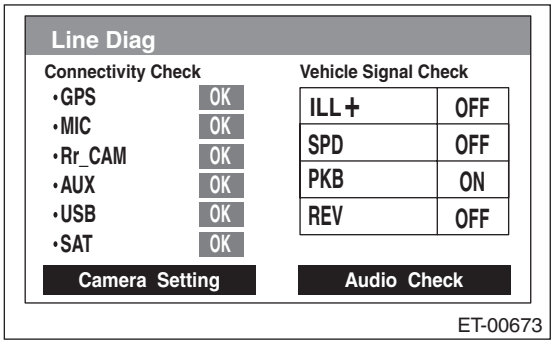
## 1. MARKER ADJUSTMENT MODE

**CAUTION:**
**When replacing the navigation unit, be sure to replace with specified navigation unit. The marker adjustment can not be performed correctly if replacing with unspecified navigation unit.**

1) Prepare the target point. <Ref. to ET-42, INSPECTION, Rearview Camera System.>
2) With the main power OFF, press and hold the button (c) for 3 seconds or more while pressing the buttons (a) and (b) simultaneously.



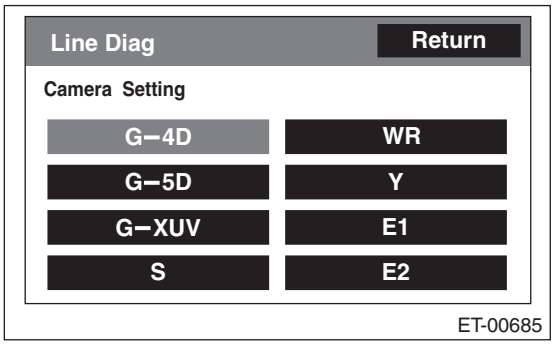
NOTE:
Pressing the button (a) for 3 seconds or more, or turning the ignition switch from ACC OFF to ON position can exit the diagnostic mode.
3) Line Diag screen is displayed.



4) Touch {Camera Setting} key to display «Camera Setting» screen.

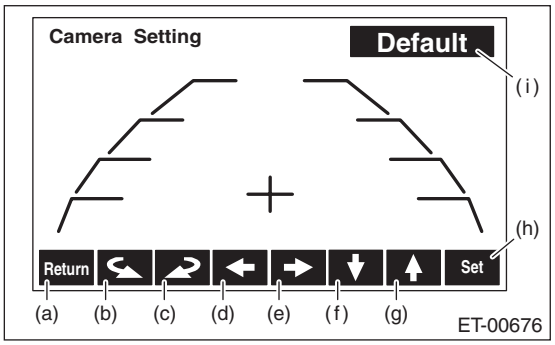
5) Touch {G-4D} key.

**CAUTION:**
**Do not use {G-5D} key or {G-XUV} key.**



6) Shift the shift lever or the select lever to the following position to display the image of the rearview camera:
- MT model: Shift lever shifted to “Reverse” position.
- CVT model: Select lever shifted to “R” position.

7) Touch the adjustment keys (d), (e), (f) and (g) on the display screen to adjust the marker line.



(a) Returns to vehicle selection screen.
(b) Rotates the cross line on the center of the screen counterclockwise by 0.25°.
(c) Rotates the cross line on the center of the screen clockwise by 0.25°.
(d) Moves the guide line and cross line to the left.
(e) Moves the guide line and cross line to the right.
(f) Moves the guide line and cross line downward.
(g) Moves the guide line and cross line upward.
(h) Saves settings for vehicle selection and guide line.
(i) Resets the adjustment value to the default condition.

(1) Confirm that the target point position in the display screen is identified.
(2) Adjust by touching the adjustment keys so that the cross line and target point join together.

8) Turn the ignition switch to OFF and wait for 60 seconds or more before turning the ignition switch to ON again.

**CAUTION:**
**If the ignition switch is turned to OFF, be sure to wait for 60 seconds or more before turning the ignition switch to ON again.**
**If turning the ignition switch to ON again or disconnecting the ground cable from battery within 60 seconds after turning the ignition switch to OFF, the navigation unit data updating can not be performed correctly.**

9) Shift the shift lever or the select lever to the following position to display the image of the rearview camera:
- MT model: Shift lever shifted to “Reverse” position.
- CVT model: Select lever shifted to “R” position.

10) Confirm that the marker line position is correctly adjusted before turning the ignition switch to OFF, then finish the procedures.

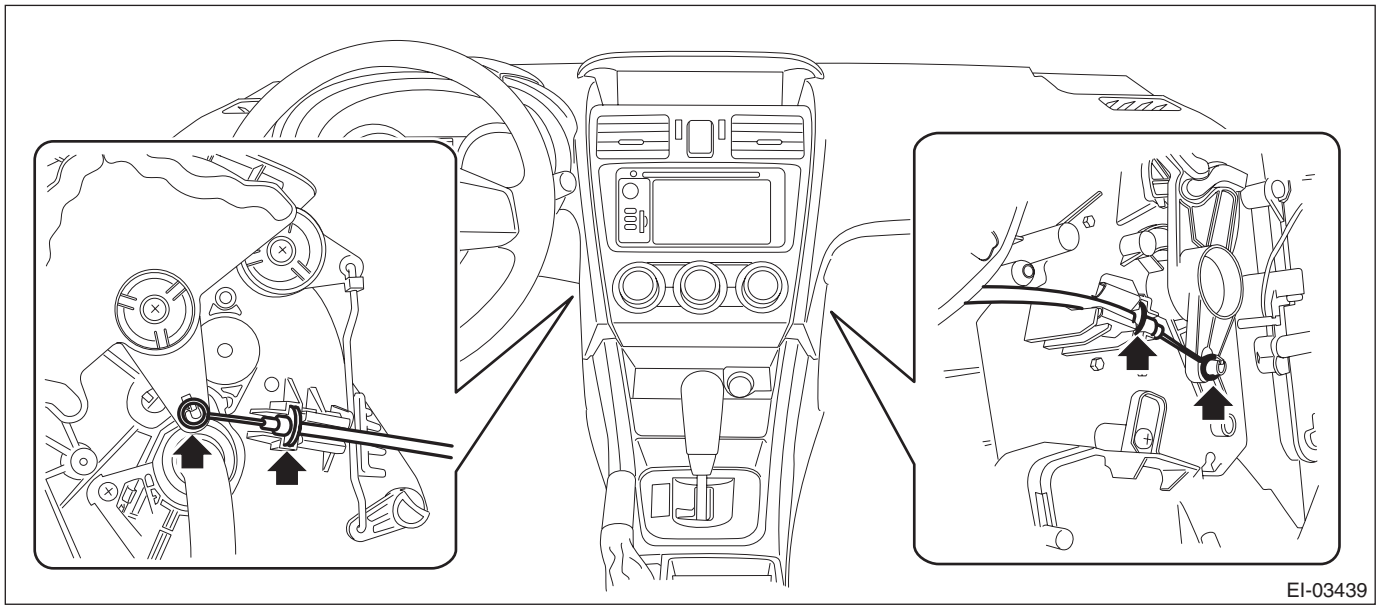
# 12.Front Accessory Power Supply Socket

## A: WIRING DIAGRAM

Refer to “Front Accessory Power Supply Socket System” in the wiring diagram. <Ref. to WI-88, WIRING DIAGRAM, Front Accessory Power Supply Socket System.>

## B: REMOVAL

1) Disconnect the ground cable from battery.
2) On manual A/C models, disconnect the control cables from both sides of the heater and cooling unit assembly.

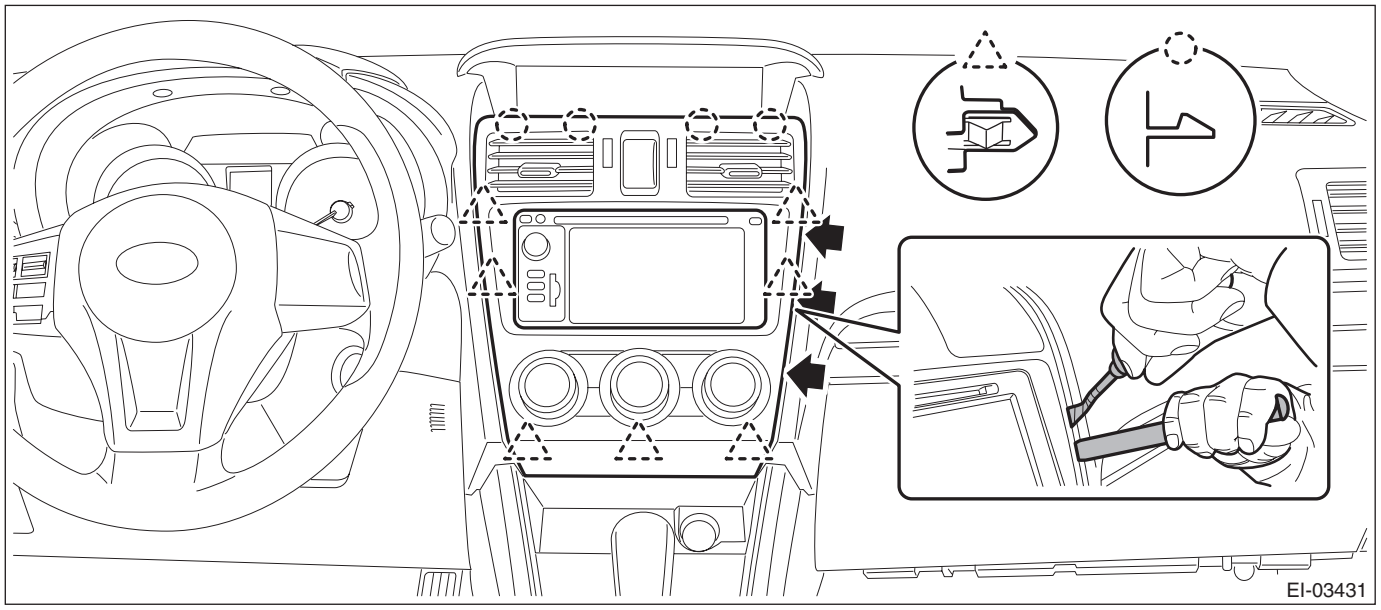


NOTE:
Remove the glove box pocket assembly on the passenger’s side.

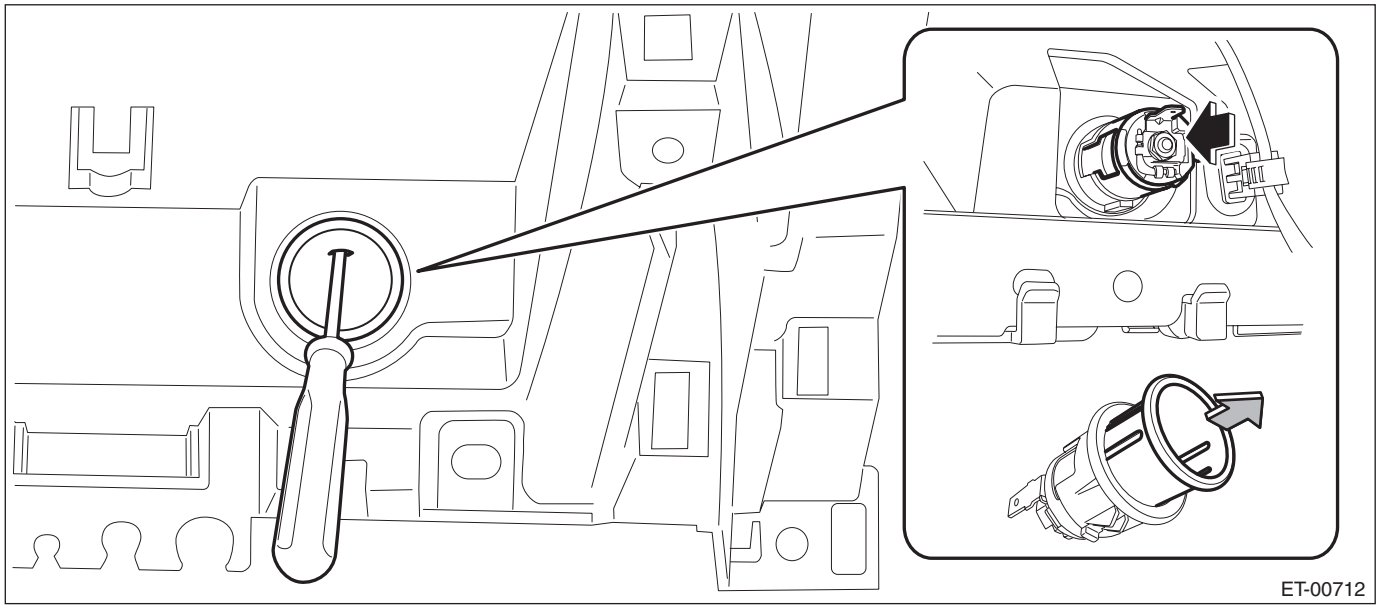
3) Remove the panel center assembly.

**CAUTION:**
- **Do not put your finger on the fin of the air vent grille. Doing so may damage the fin.**
- **Pull the panel center assembly slowly. Pulling with excessive force may damage the connector.**

(1) Insert a plastic remover to the three areas shown by the arrows, and lift up the panel center assembly slightly.
(2) With the panel center assembly lifted up slightly, release the claw by using a clip remover wrapped with protective tape.
(3) Release the rest of the claws, and pull out the panel center assembly.
(4) Disconnect the connectors, and remove the panel center assembly.



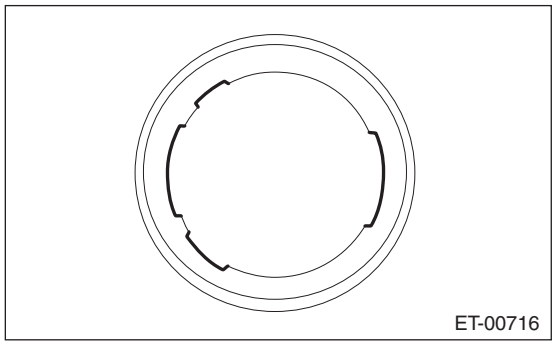
4) Remove the front accessory power supply socket.
(1) Disconnect the connector.
(2) While releasing the claw inside the accessory power supply socket, press in the claw from the rear to remove the accessory power supply socket.



## C: INSTALLATION

**CAUTION:**
**After installing the panel center assembly, check that the air vent grille of the panel center assembly is inserted correctly into the air vent duct.**
Install each part in the reverse order of removal.

NOTE:
Align the grooves of the holder with the claws of accessory power supply socket.



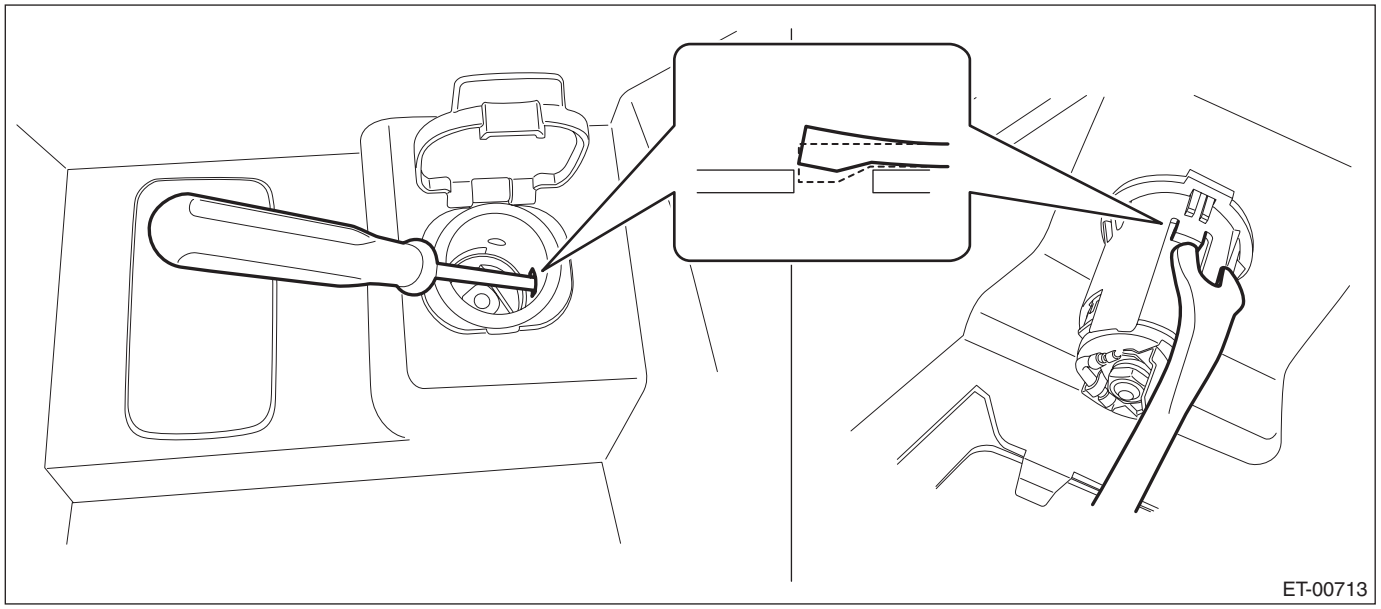
# 13.Rear Accessory Power Supply Socket

## A: WIRING DIAGRAM

Refer to “Rear Accessory Power Supply Socket System” in the wiring diagram. <Ref. to WI-121, WIRING DIAGRAM, Rear Accessory Power Supply Socket System.>

## B: REMOVAL

1) Disconnect the ground cable from battery.
2) Open the console box, and remove the rear accessory power supply socket.
   (1) Release the claws inside the accessory power supply socket.
   (2) Pull the accessory power supply socket out to remove.

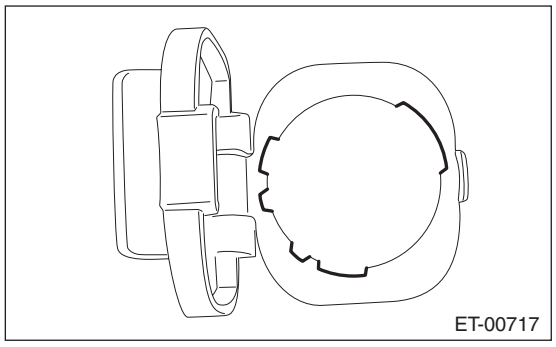


NOTE:
If it is hard to remove, remove the console box assembly and then release the claws from behind.

## C: INSTALLATION

Install each part in the reverse order of removal.

NOTE:
Align the grooves of the holder with the claws of accessory power supply socket.



# 14.AUX Input Terminal

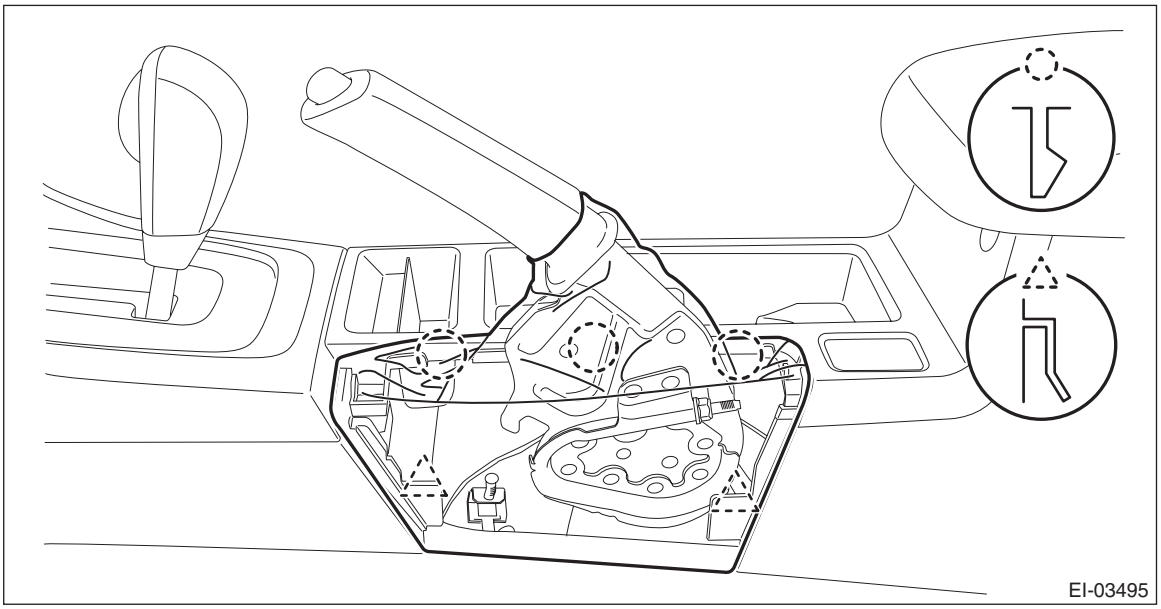
## A: REMOVAL

1) Disconnect the ground cable from battery.

NOTE:
On CVT models, shift the select lever into “D” before disconnecting the battery ground cable.

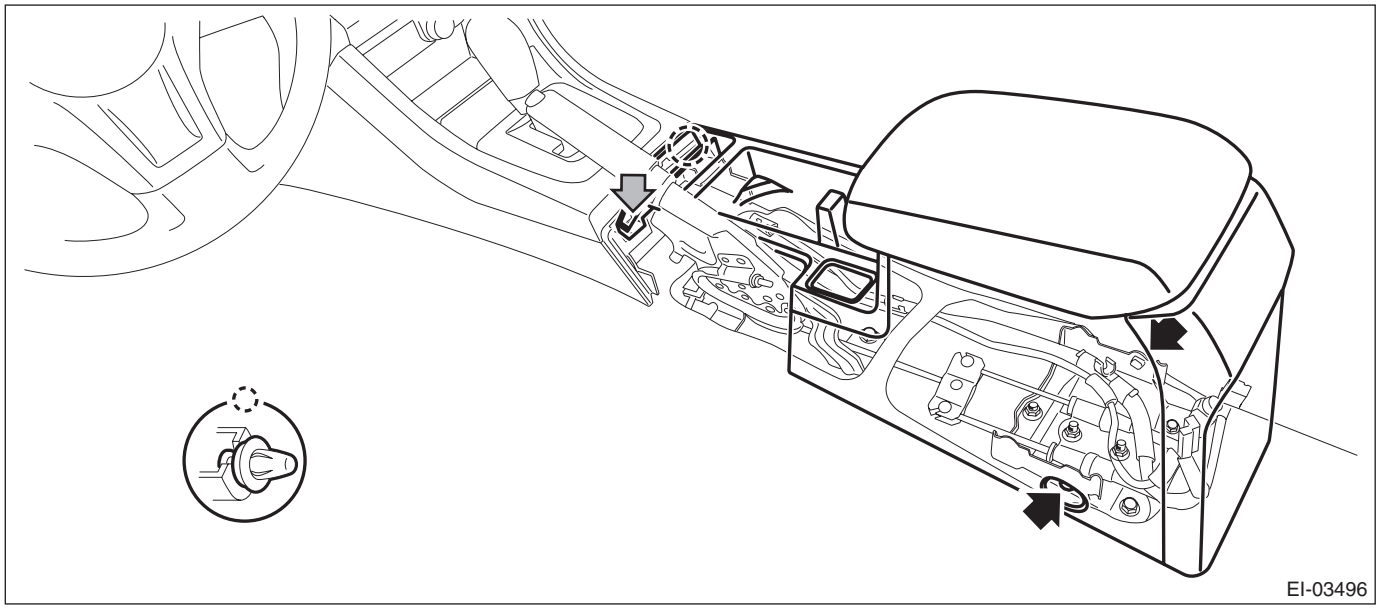
2) Remove the console box assembly.

(1) Release the claws, and then remove the boot - hand brake.

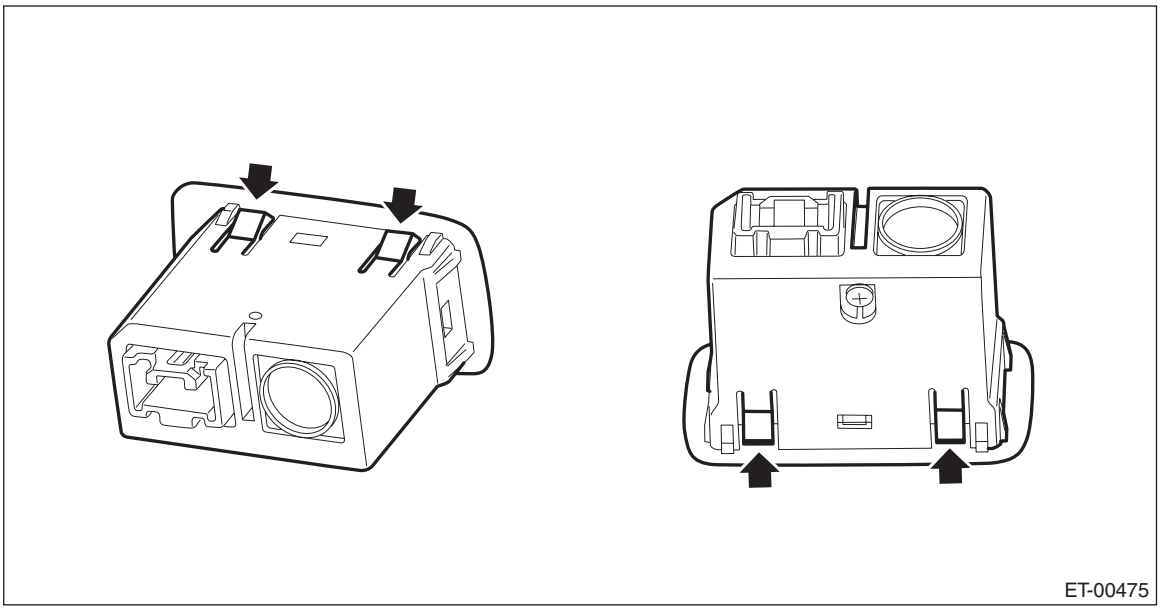


(2) Move the seat forward, and remove the bolts after detaching the left and right caps.

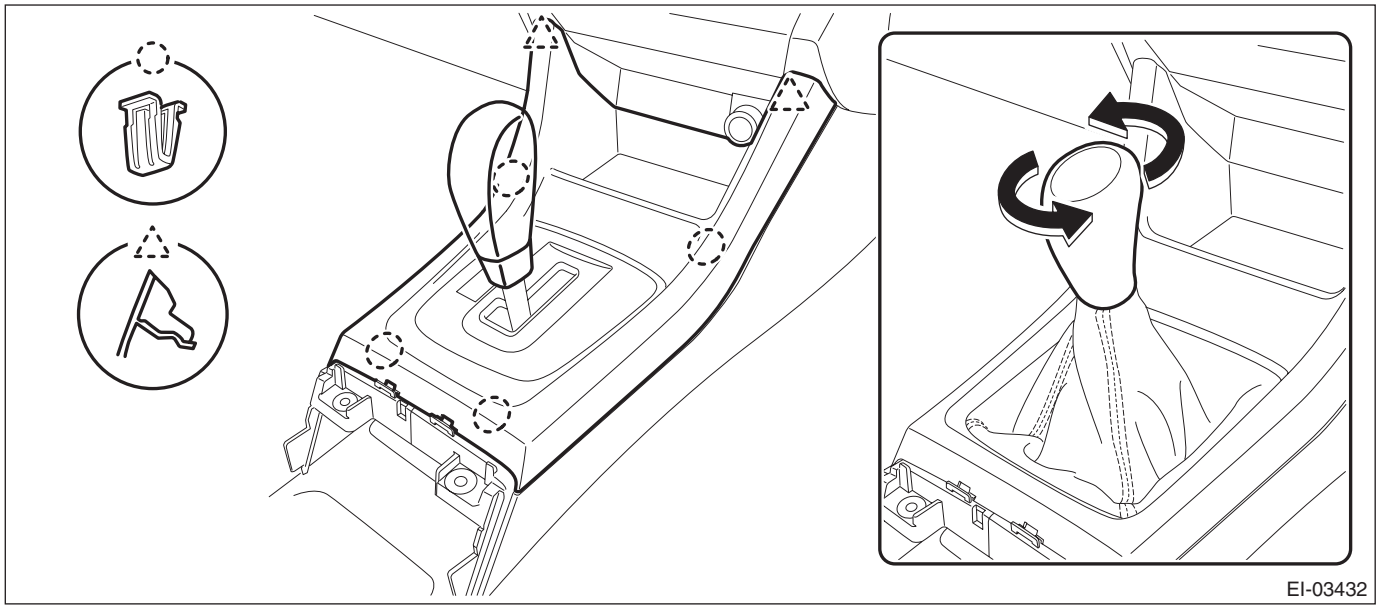
(3) Remove the screws and clips, disconnect the harness connector and remove the console box assembly.



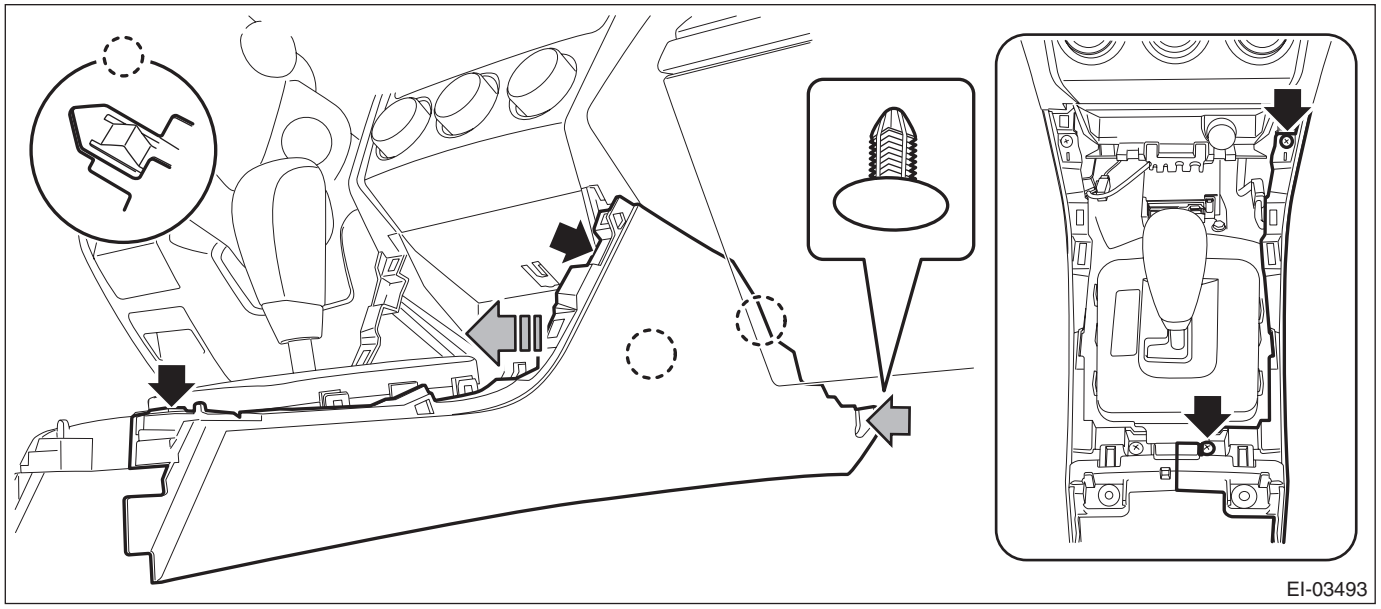
3) Remove the AUX input terminal.
   (1) Remove the claws at four locations.
   (2) Remove the AUX input terminal assembly by pushing it into the console box.



4) Remove the cover - shift lever.
   (1) Remove the shift knob. (MT model)
   (2) Release the clips and claws, then pull up the cover - shift lever.

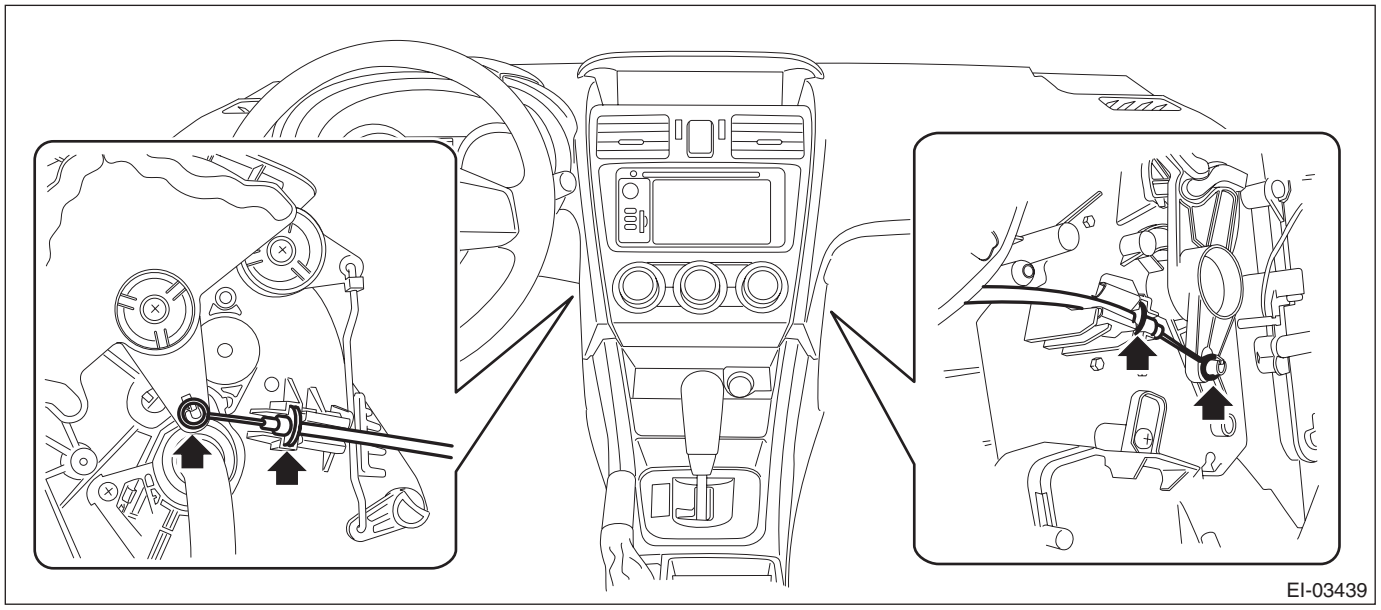


5) Remove the panel center LWR RH.
(1) Remove the screws and clips.
(2) Release the claws, and pull the panel center LWR RH to remove.



EI-03493

6) On manual A/C models, disconnect the control cables from both sides of the heater and cooling unit assembly.



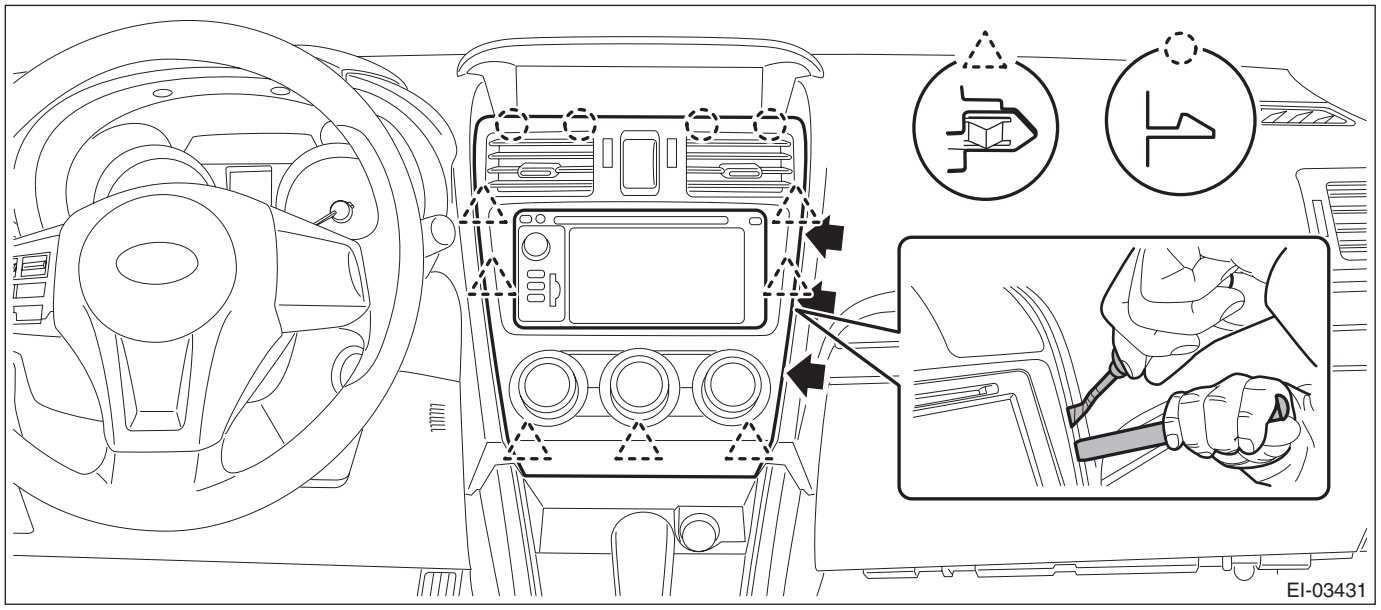
EI-03439

NOTE:
Remove the glove box pocket assembly on the passenger's side.

7) Remove the panel center assembly.

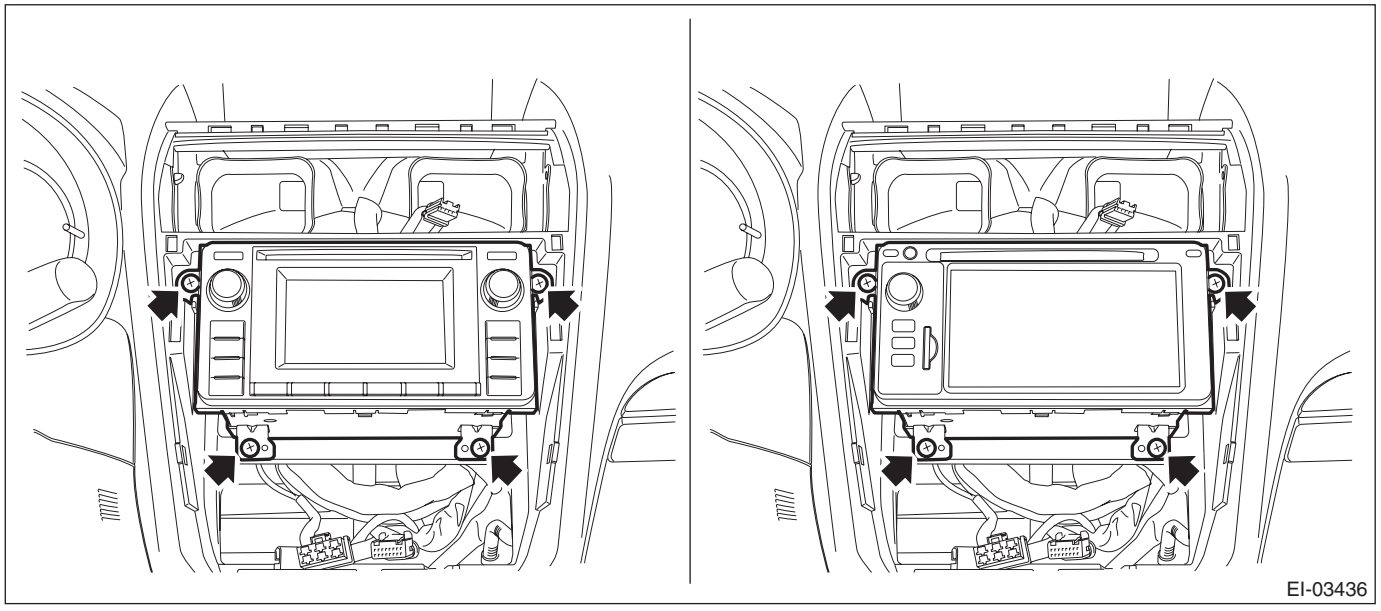
**CAUTION:**
- **Do not put your finger on the fin of the air vent grille. Doing so may damage the fin.**
- **Pull the panel center assembly slowly. Pulling with excessive force may damage the connector.**

(1) Insert a plastic remover to the three areas shown by the arrows, and lift up the panel center assembly slightly.
(2) With the panel center assembly lifted up slightly, release the claw by using a clip remover wrapped with protective tape.
(3) Release the rest of the claws, and pull out the panel center assembly.
(4) Disconnect the connectors, and remove the panel center assembly.



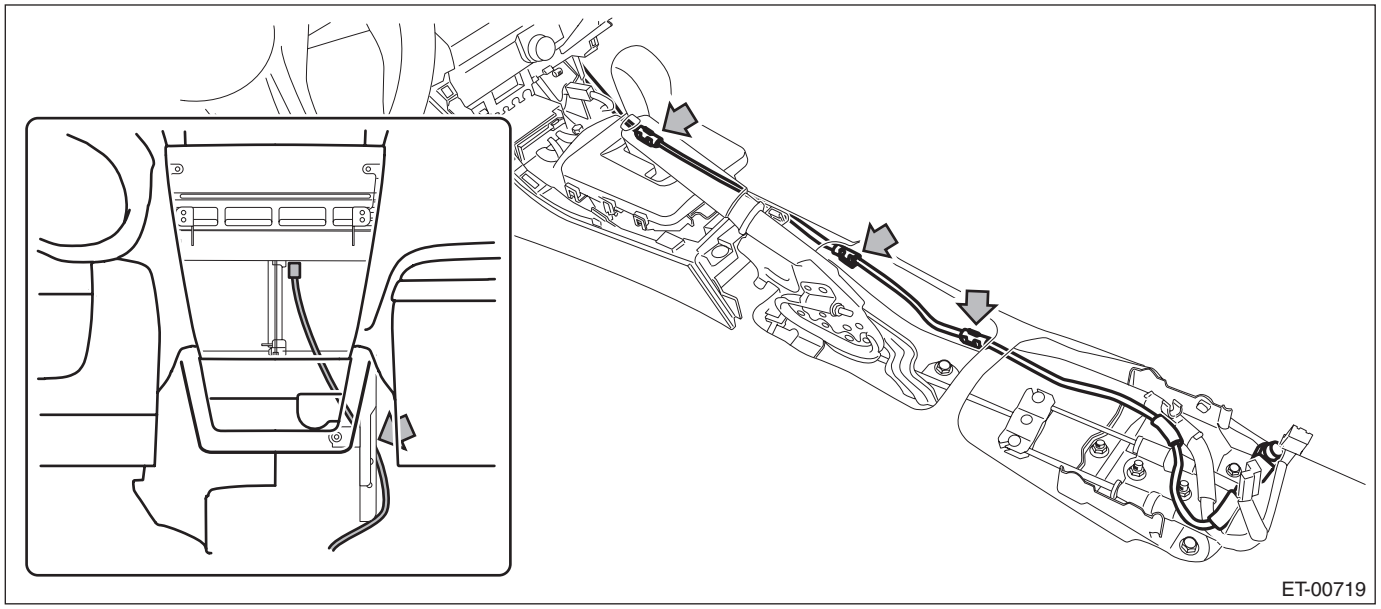
EI-03431

8) Remove the audio assembly or navigation assembly.
(1) Remove the screws, and partially pull out the audio assembly or navigation assembly.
(2) Disconnect the connectors, and remove the audio assembly or navigation assembly.



EI-03436

9) Remove the harness clamp and remove the AUX terminal harness.



## B: INSTALLATION

**CAUTION:**
**After installing the panel center assembly, check that the air vent grille of the panel center assembly is inserted correctly into the air vent duct.**
Install each part in the reverse order of removal.

***Tightening torque:***
***Console box assembly: 6.5 N·m (0.66 kgf-m, 4.8 ft-lb)***

# COMMUNICATION SYSTEM

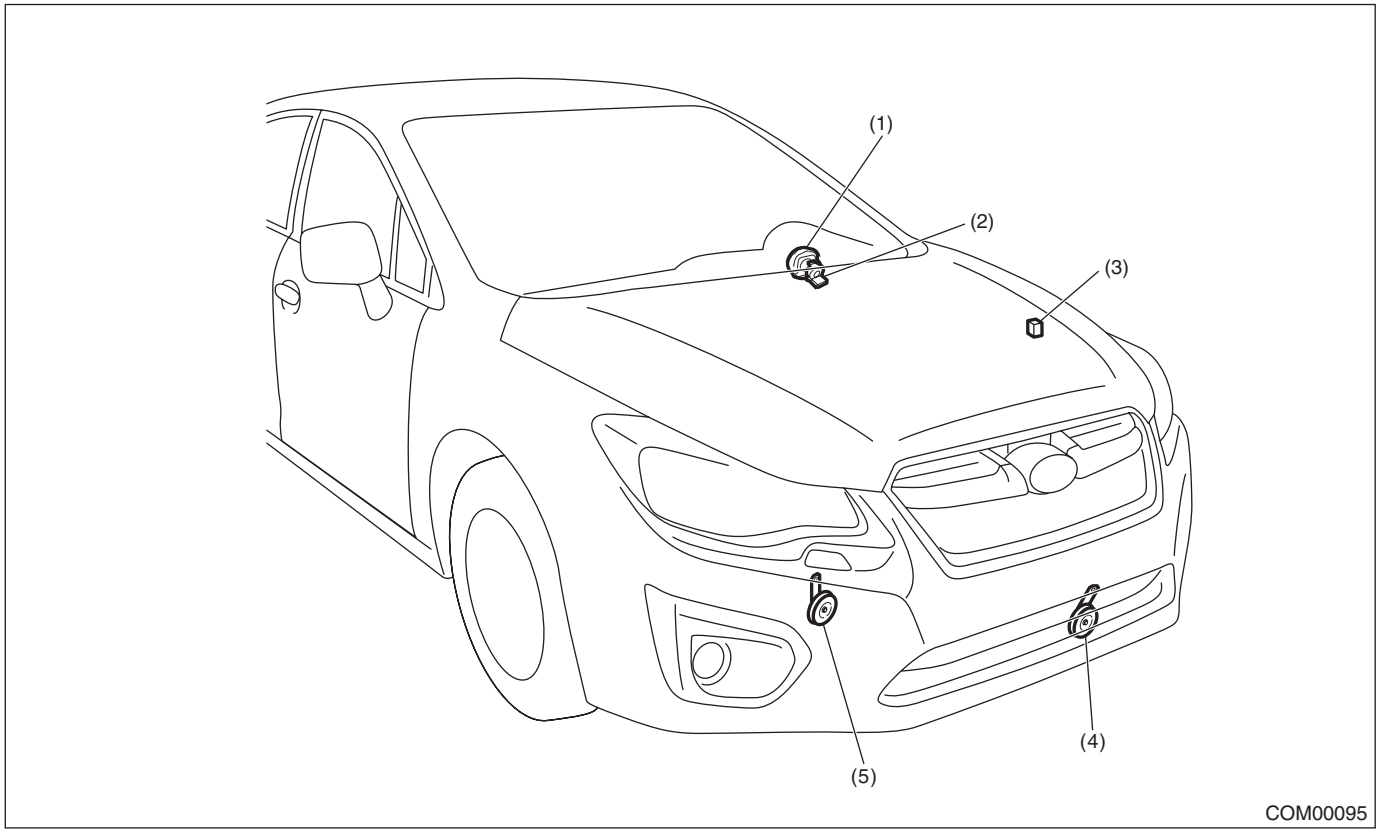
# COM

Page

1. General Description .....2
2. Relay and Fuse .....3
3. Horn System .....4
4. Horn .....5
5. Horn Switch .....8

# 1. General Description

## A: COMPONENT



(1) Horn switch (driver's airbag module ASSY)
(2) Roll connector
(3) Horn relay
(4) Horn ASSY - Lo
(5) Horn ASSY - Hi

## B: CAUTION

• Before disassembling or reassembling parts, always disconnect the battery ground cable from battery. When replacing the audio, control module and other parts provided with memory functions, record the memory contents before disconnecting the battery ground cable. Otherwise, the memory is cleared.
• Reassemble the parts in the reverse order of disassembly procedure unless otherwise indicated.
• Connect the connectors securely during reassembly.
• After reassembly, make sure that the each component operates normally.
• Yellow connectors and harnesses with yellow tapes around them are the connectors and harnesses for the airbag system. Using a tester above such circuits may cause malfunction of airbag system. Follow the cautions of "AIRBAG SYSTEM" in this case. <Ref. to AB-11, CAUTION, General Description.>
• Be careful not to damage the airbag system wiring harness when servicing electrical parts and switches.

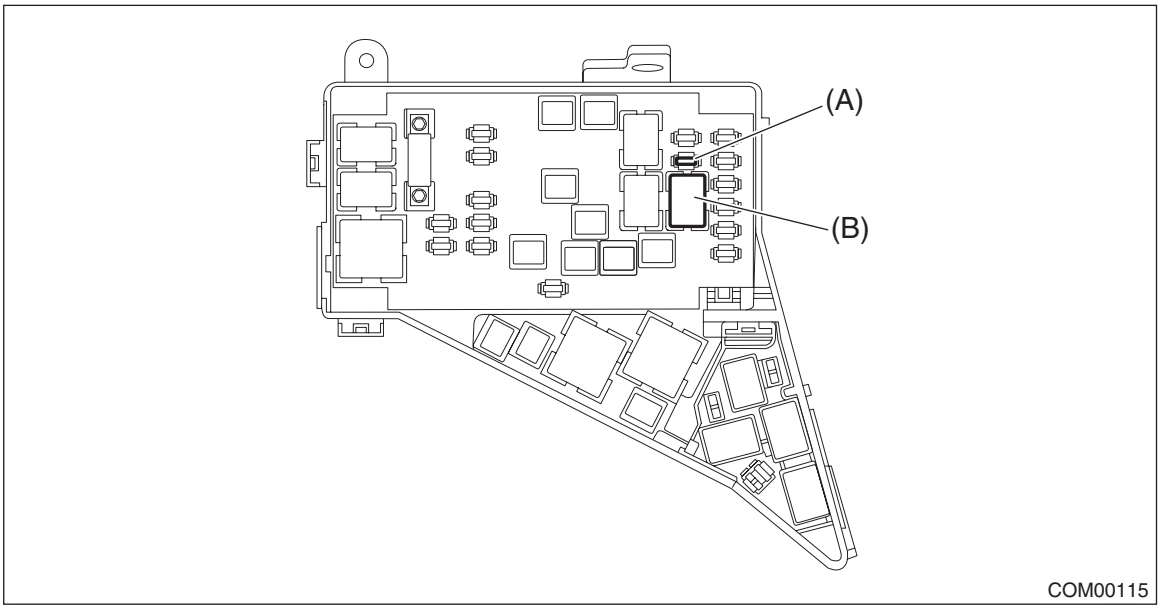
## C: PREPARATION TOOL

### 1. GENERAL TOOL

| TOOL NAME | REMARKS |
|---|---|
| Circuit tester | Used for measuring resistance and voltage. |

# 2. Relay and Fuse

## A: LOCATION



| | | |
|---|---|---|
| Main fuse box | Fuse 15 A (horn ASSY - Hi, Lo) | (A) |
| | Horn relay | (B) |

NOTE:
For other related fuses, refer to the wiring diagram. <Ref. to WI-15, Power Supply Circuit.>

## B: INSPECTION

### 1. CHECK FUSE

1) Remove the fuse and check visually.
2) If the fuse is blown out, replace the fuse.

### 2. CHECK RELAY

1) Check the resistance between relay terminals.

| Terminal No. | Inspection conditions | Specification | Circuit |
|---|---|---|---|
| 1 — 2 | Always | 1 MΩ or more |  |
| 1 — 2 | Apply battery voltage between 4 — 3 terminals. | Less than 1 Ω | |

2) Replace the relay if the inspection result is not within the standard value.

# 3. Horn System

## A: WIRING DIAGRAM

Refer to “Horn System” in the wiring diagram. <Ref. to WI-99, WIRING DIAGRAM, Horn System.>

## B: INSPECTION

| Symptoms | Inspection steps |
|---|---|
| Horn does not sound | 1. Check the fuse. |
| | 2. Check the horn relay. |
| | 3. Check the role connector. |
| | 4. Check the horn switch. |
| | 5. Check the horn assembly. |
| | 6. Check the harness. |

## C: NOTE

For operation procedures of each component of the horn system, refer to the respective section.

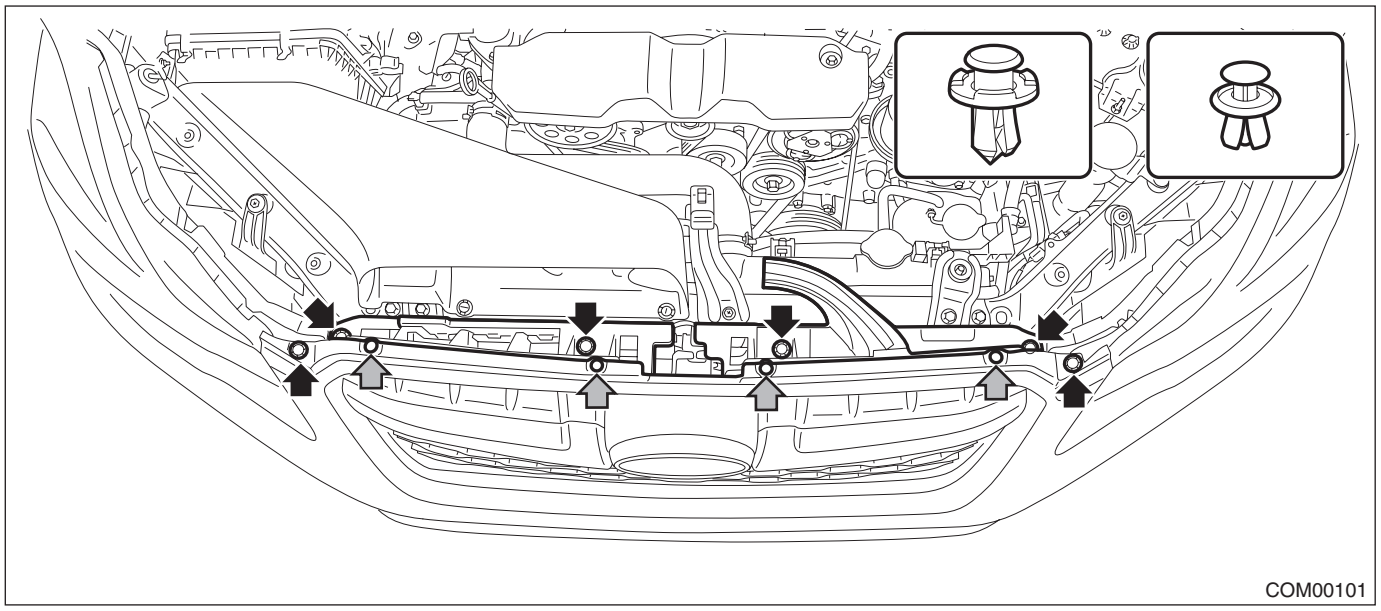
- Horn ASSY: <Ref. to COM-5, Horn.>
- Horn switch: <Ref. to COM-8, Horn Switch.>

# 4. Horn

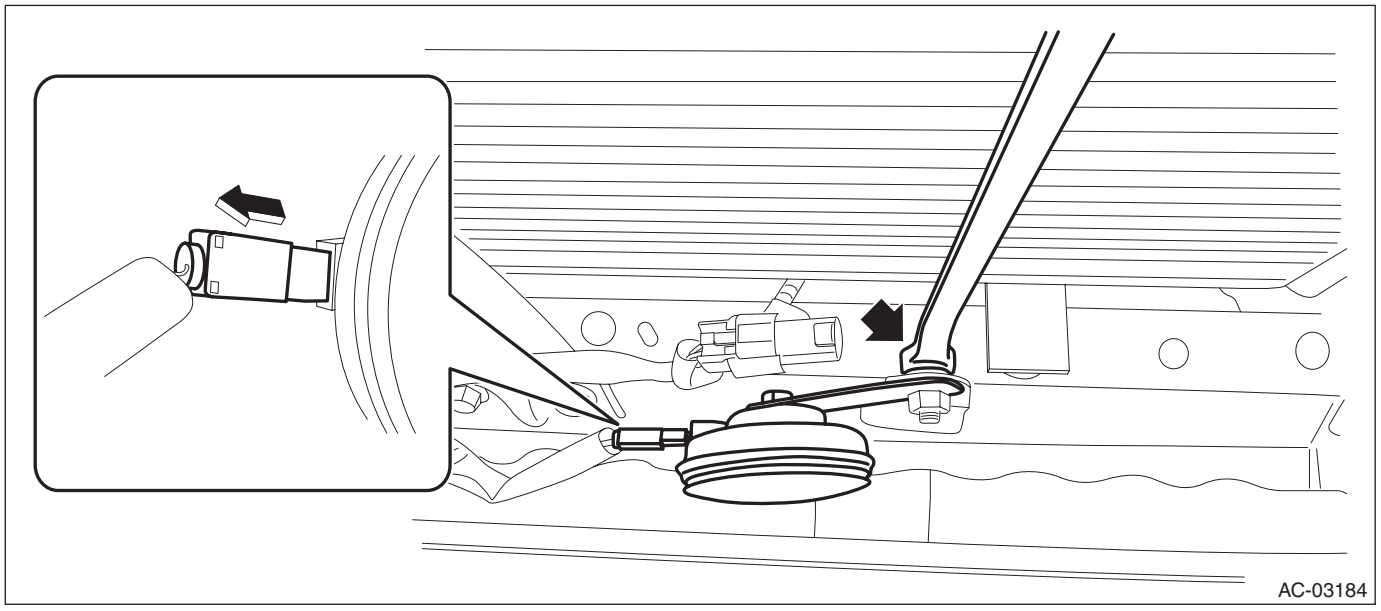
## A: REMOVAL

**CAUTION:**
**Do not remove the bumper face - front when removing the horn, in order to prevent damaging the claws of the bracket - front bumper corner and the bracket - front bumper side.**

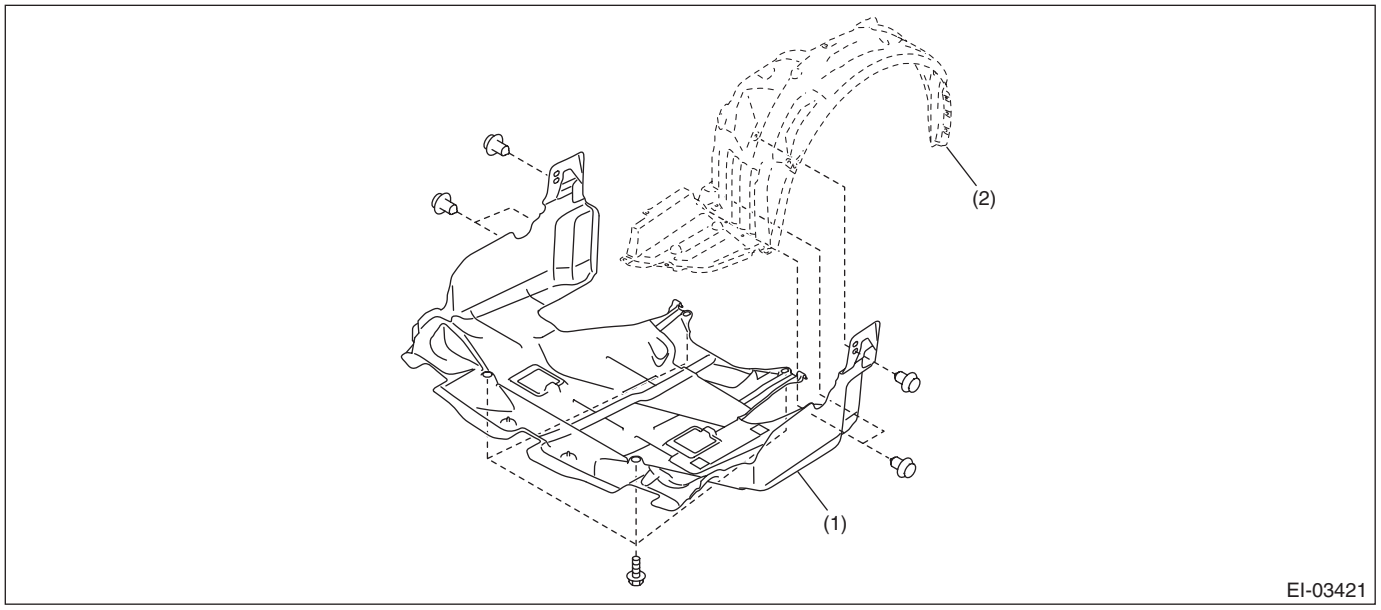
1) Disconnect the ground cable from battery.
2) Remove the clip, and remove the bracket - grille.



3) Remove the horn assembly - Lo.
   (1) Disconnect the connector.
   (2) Remove the horn bracket mounting bolt, and remove the horn assembly - Lo.



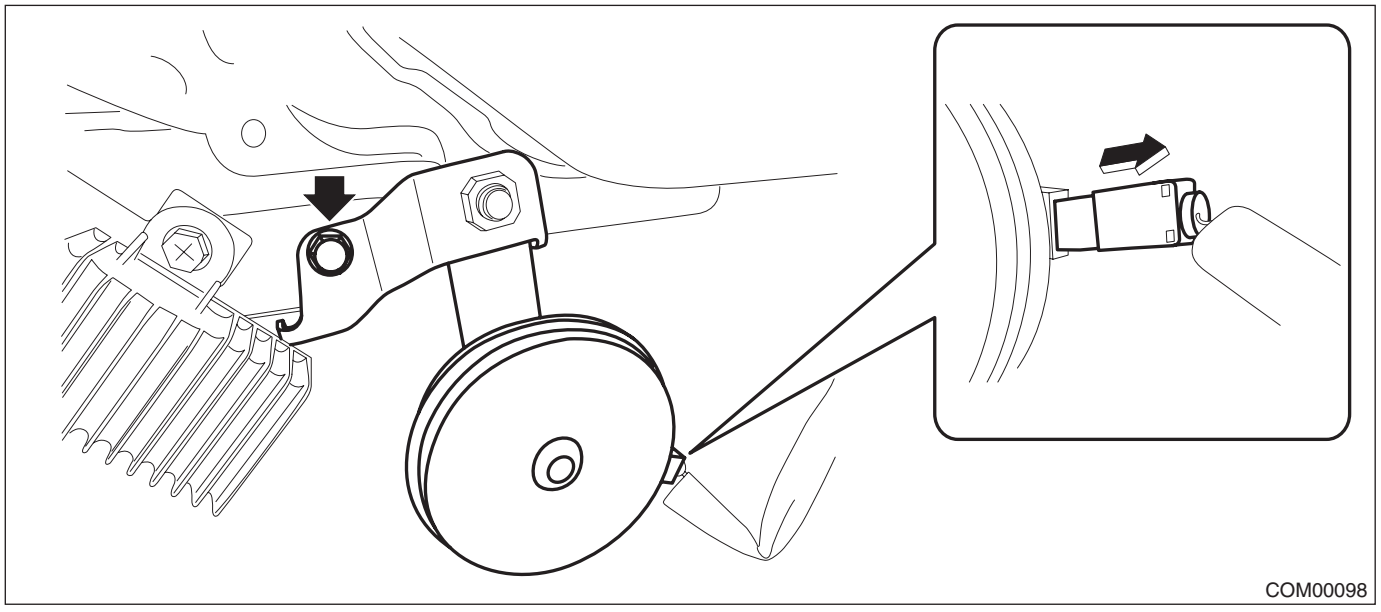
4) Remove the horn assembly - Hi.
(1) Remove the bolts and clips, and remove the under cover - front.



(1) Under cover - front (2) Mud guard - front

(2) Remove the clips, turn over the mud guard - front, and disconnect the horn connector.
(3) Remove the horn bracket mounting bolt, and remove the horn assembly - Hi.

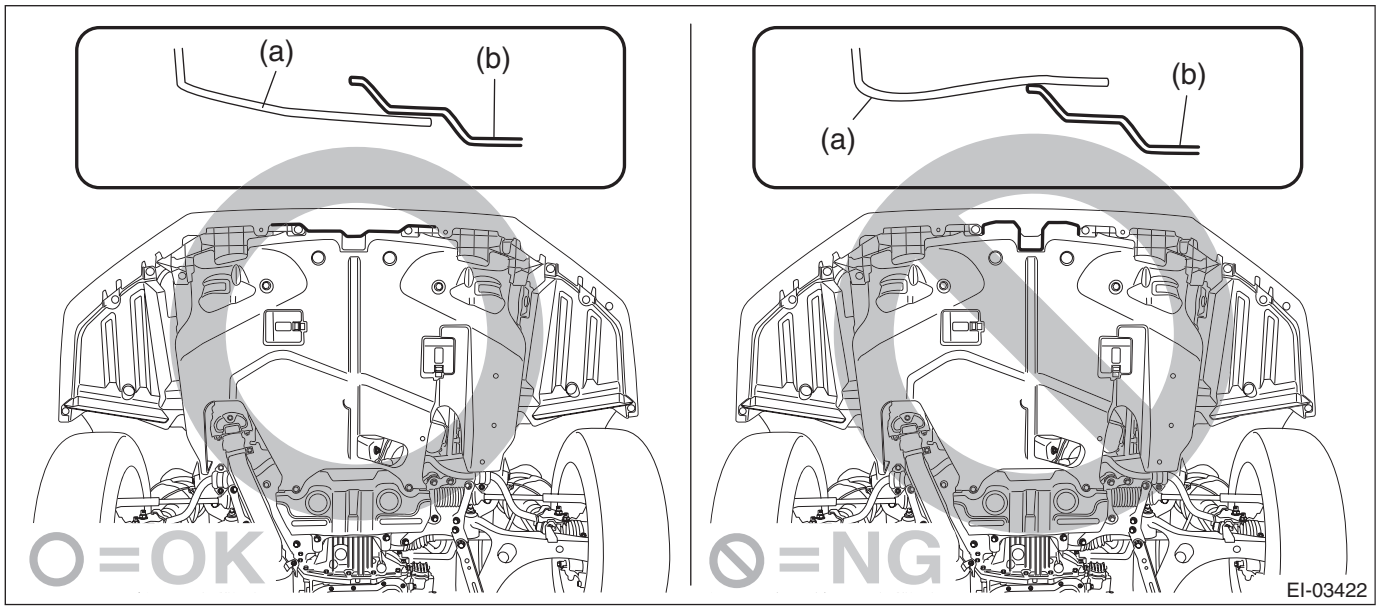
**CAUTION:**
**The resistor may become hot. Be careful not to burn yourself.**



## B: INSTALLATION

Install each part in the reverse order of removal.

**CAUTION:**
**Install the under cover so that the under cover front end (b) comes inside of the bumper face - front (a).**

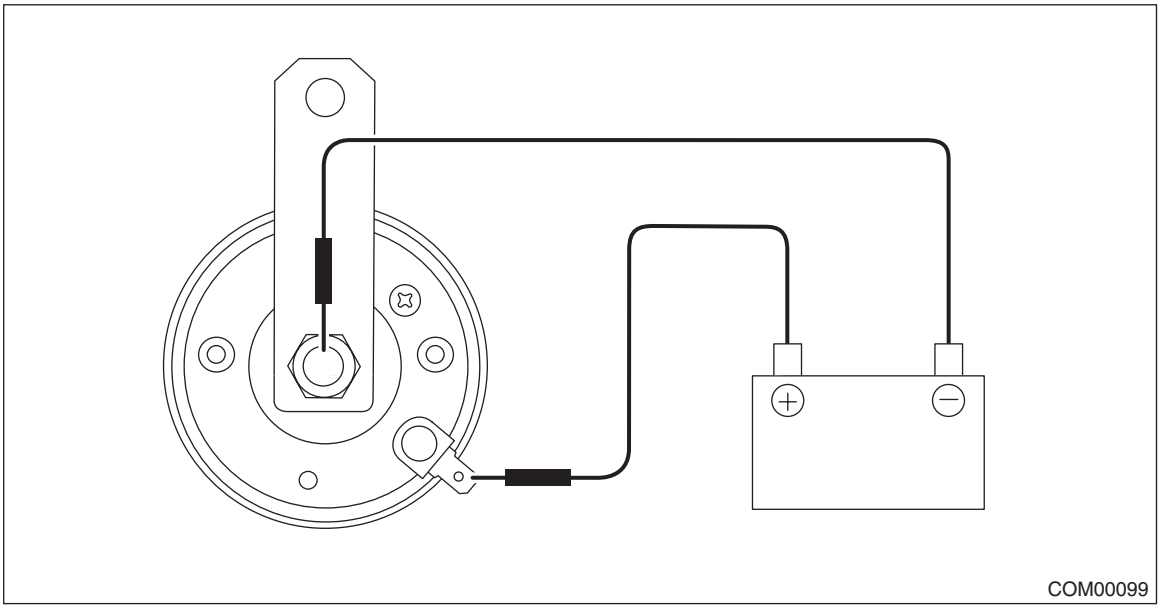


***Tightening torque:***
***Horn assembly - Hi: 13 N·m (1.33 kgf-m, 9.6 ft-lb)***
***Horn assembly - Lo: 18 N·m (1.84 kgf-m, 13.3 ft-lb)***

## C: INSPECTION

### 1. CHECK HORN ASSEMBLY

1) Remove the horn assembly (Hi & Lo). <Ref. to COM-5, REMOVAL, Horn.>
2) Check the horn sounds when applying the battery voltage to the horn assembly.



| Terminal No. | Inspection conditions | Specification |
|---|---|---|
| Horn terminal (+) — Horn case (–) | Connect battery to the terminals | Sounds |

3) If it does not operate normally, replace the horn assembly.

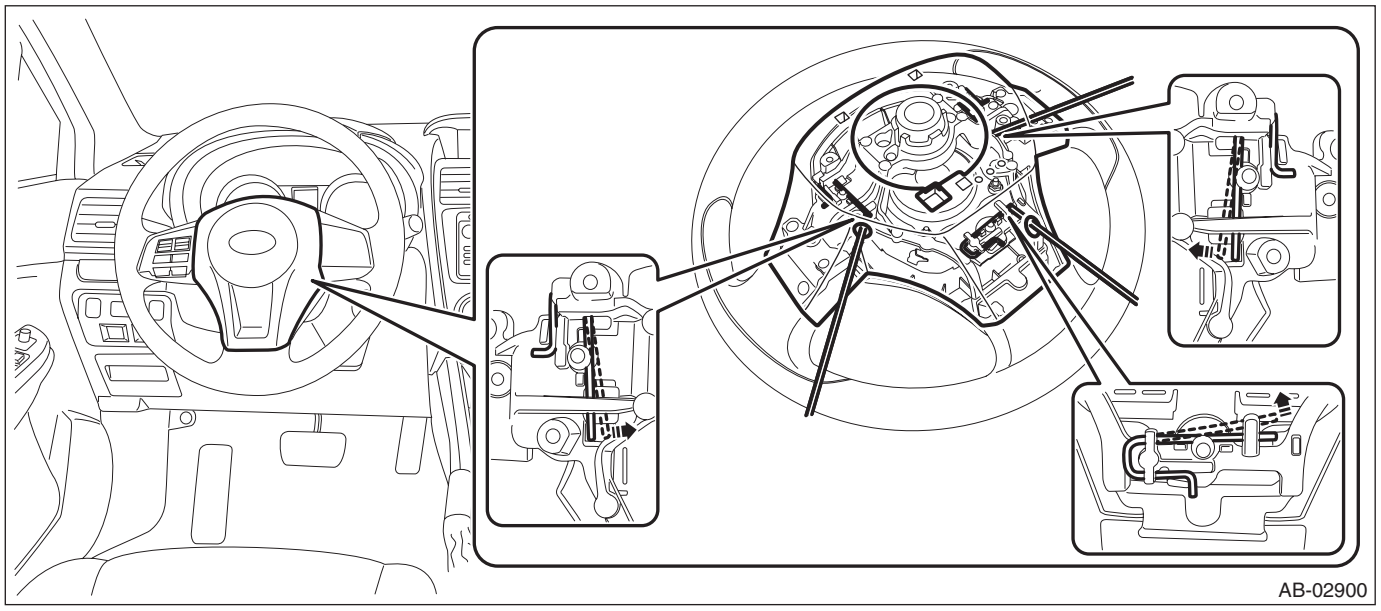
# 5. Horn Switch

## A: REMOVAL

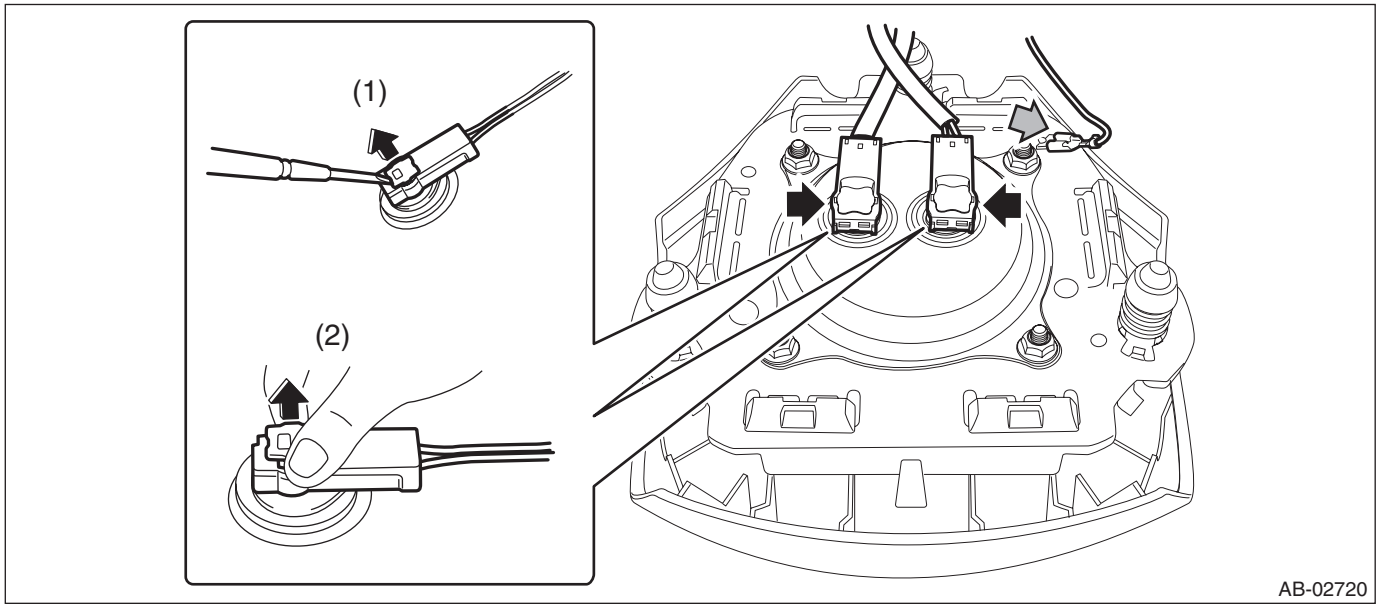
NOTE:
Horn switch is a unit with the driver's airbag module.
1) Position the front wheels straight ahead. (After moving a vehicle 5 m (16 ft) or more with front wheels positioned straight ahead, make sure that the vehicle moves straight ahead.)
2) Turn the ignition switch to OFF.
3) Disconnect the ground cable from battery and wait for at least 60 seconds before starting work.
4) Remove the driver's airbag module.

**CAUTION:**
**Before handling the airbag module, refer to "CAUTION" of "General Description" in "AIRBAG SYSTEM". <Ref. to AB-11, CAUTION, General Description.>**

(1) Using a hexagon wrench wrapped with protective tape, push in the snap pins to disengage the locks (3 places).



(2) Disconnect the horn harness and airbag connector, and remove the driver's airbag module. <Ref. to AB-24, DRIVER'S AIRBAG MODULE, CURTAIN AIRBAG MODULE & PRETENSIONER, PROCEDURE, Airbag Connector.>



## B: INSTALLATION

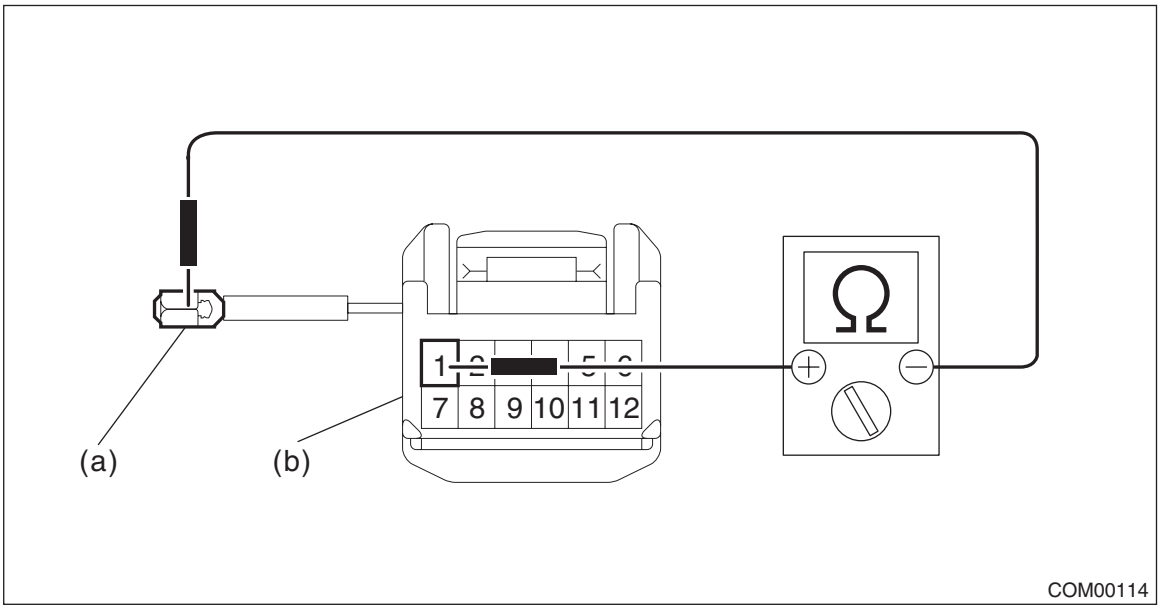
**CAUTION:**
**• Before handling the airbag module, refer to "CAUTION" of "General Description" in "AIRBAG SYSTEM". <Ref. to AB-11, CAUTION, General Description.>**
**• Do not allow harness and connectors to interfere or get tangled up with other parts.**
1) Install the driver's airbag module. <Ref. to AB-43, INSTALLATION, Driver's Airbag Module.>
2) Install each part in the reverse order of removal.

## C: INSPECTION

### 1. CHECK HORN SWITCH

1) Remove the horn switch. <Ref. to COM-8, REMOVAL, Horn Switch.>
2) Check that the connection of the horn switch harness connector is correct.
3) Disconnect the horn switch harness connector and check the resistance between the harness connectors.

***Preparation tool:***
***Circuit tester***



(a) Ground terminal (b) Horn switch terminal

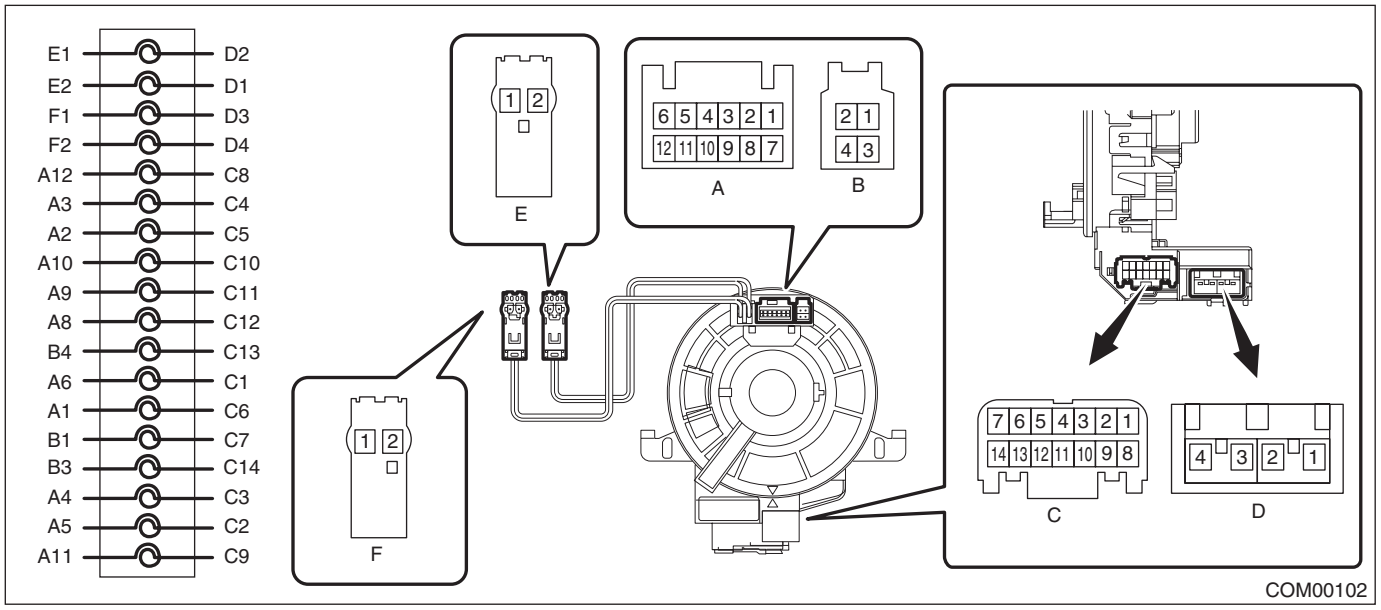
| Terminal No. | Standard |
|---|---|
| Horn switch terminal — ground terminal | Less than 1 Ω |

4) Replace the driver's airbag module if the inspection result is not within the standard value.

## 2. CHECK ROLL CONNECTOR

1) Remove the roll connector. <Ref. to AB-104, REMOVAL, Roll Connector.>
2) Check the resistance between roll connector terminals.

***PREPARATION TOOL:***
***Circuit tester***



| Terminal No. | Inspection conditions | Standard |
|---|---|---|
| A1 — C6 | Always | Less than 1 Ω |

3) Replace the roll connector if the inspection result is not within the standard.

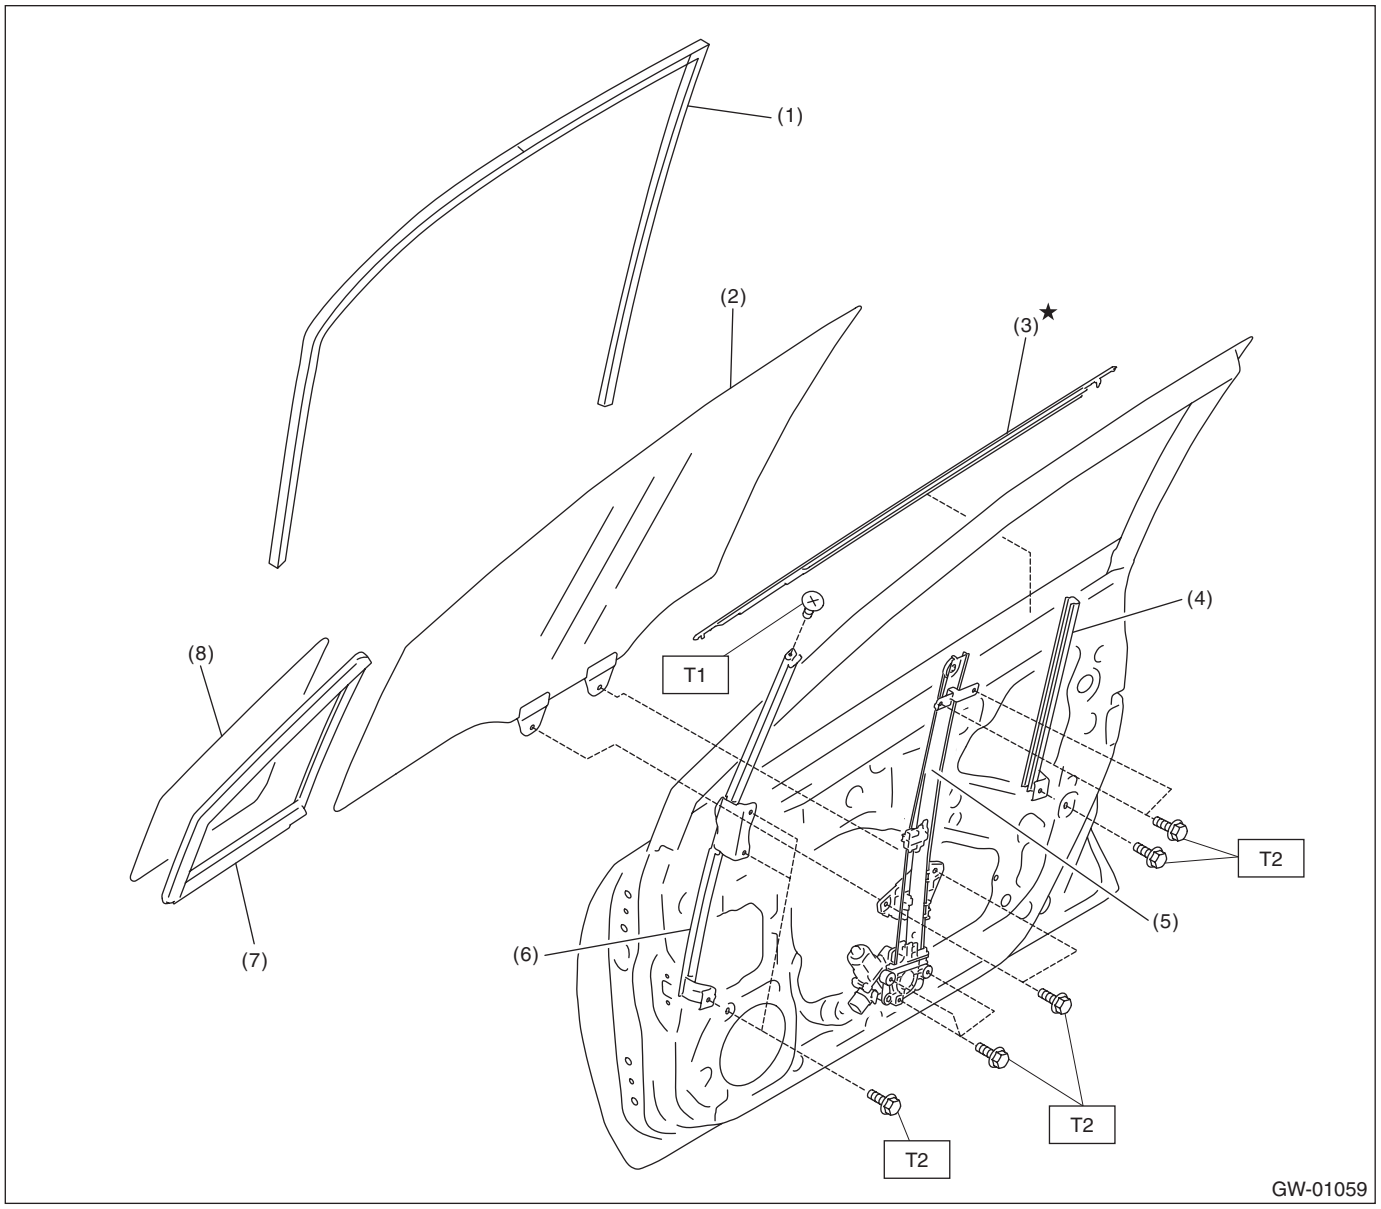
# 1. General Description

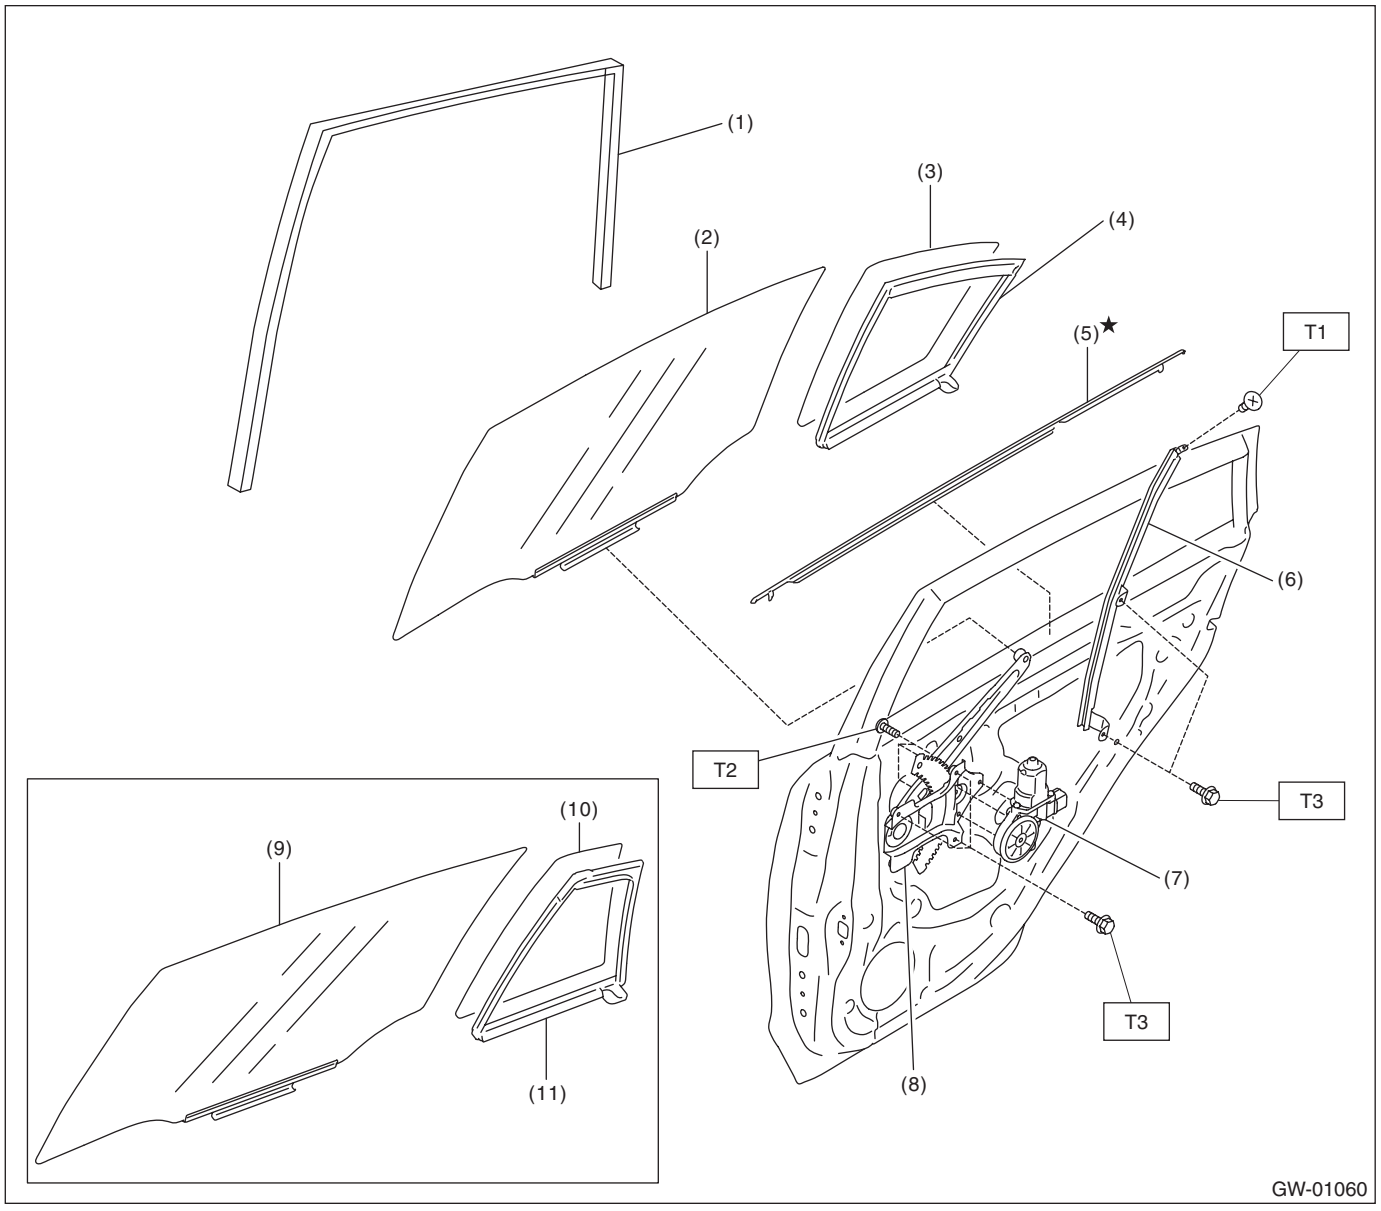
## A: COMPONENT

### 1. FRONT DOOR GLASS



| | | | | |
|---|---|---|---|---|
| (1) | Running channel - front door | (5) | Regulator & motor ASSY - front | ***Tightening torque: N·m (kgf-m, ft-lb)*** |
| (2) | Glass ASSY - front door | (6) | Sash COMPL - partition | ***T1: 2.2 (0.22, 1.6)*** |
| (3) | Weather strip outer - front door | (7) | Weather strip - front door partition | ***T2: 7.5 (0.76, 5.5)*** |
| (4) | Sash COMPL - lower | (8) | Glass - front door partition | |

## 2. REAR DOOR GLASS



| | | | |
|---|---|---|---|
| (1) | Running channel - rear door | (7) | Motor - rear |
| (2) | Glass ASSY - rear door (4 door model) | (8) | Regulator - rear |
| (3) | Glass - rear door partition (4 door model) | (9) | Glass ASSY - rear door (5 door model/XV model) |
| (4) | Weather strip - front door partition (4 door model) | (10) | Glass - rear door partition (5 door model/XV model) |
| (5) | Weather strip outer - rear door | (11) | Weather strip - rear door partition (5 door model/XV model) |
| (6) | Sash COMPL - rear partition | | |

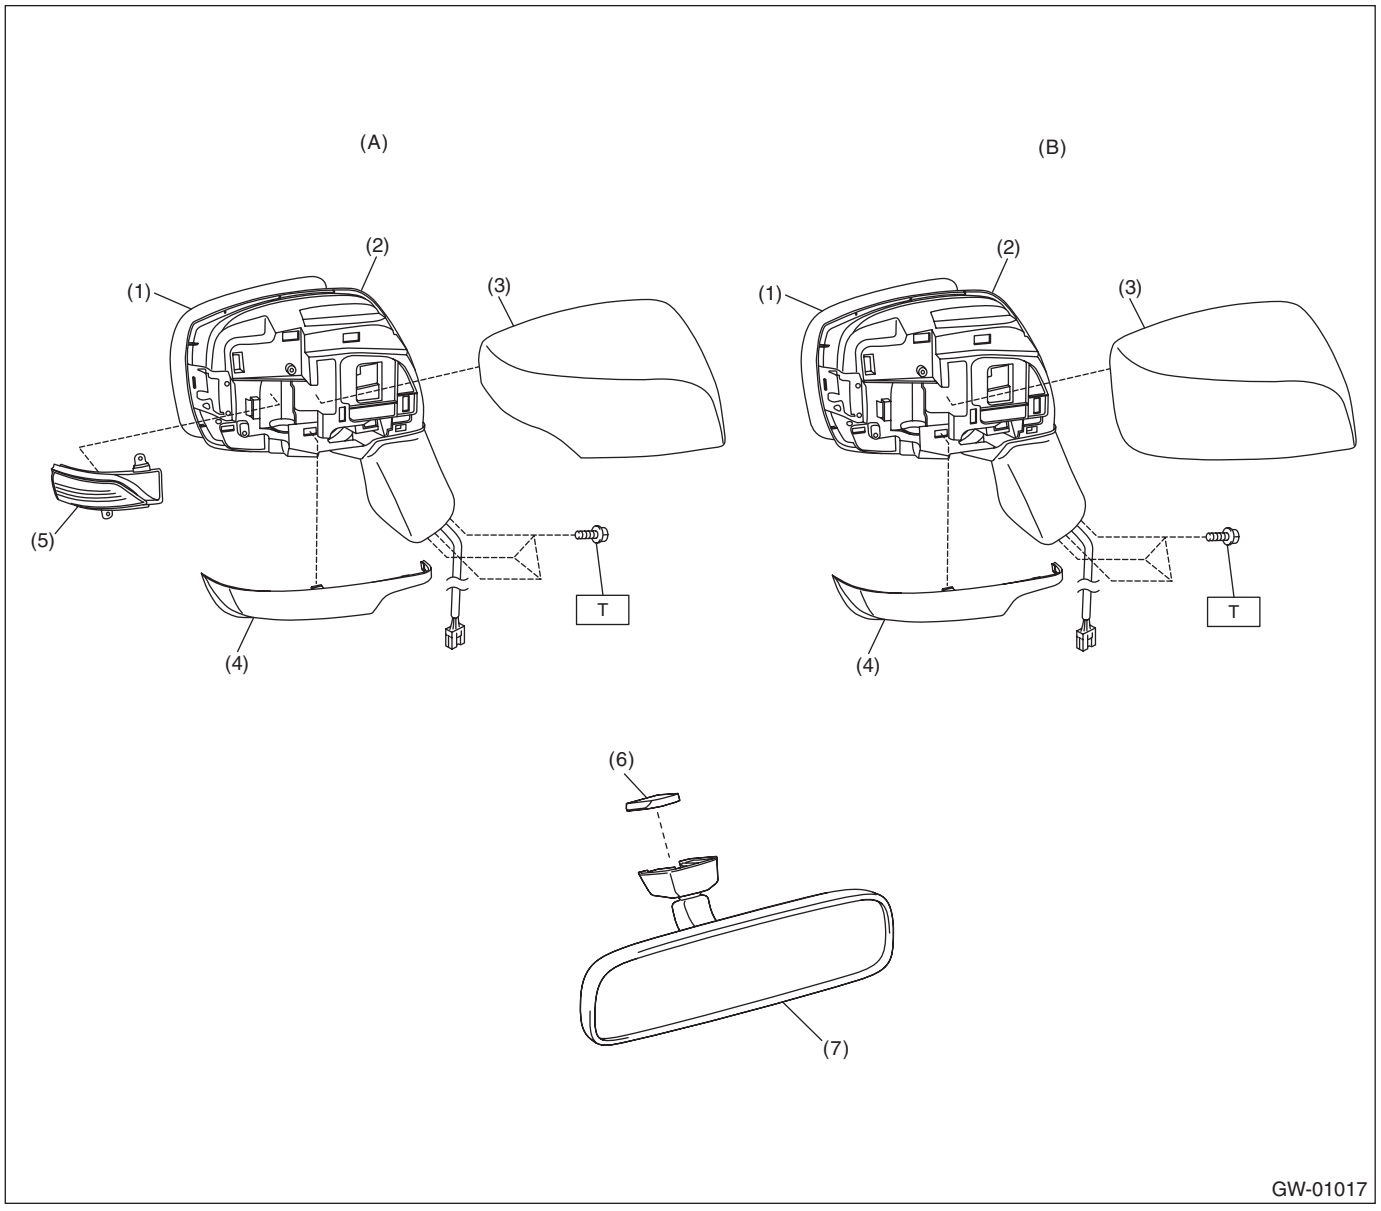
***Tightening torque: N·m (kgf-m, ft-lb)***

***T1: 2.2 (0.22, 1.6)***

***T2: 5.9 (0.6, 4.4)***

***T3: 7.5 (0.76, 5.5)***

## 3. MIRROR

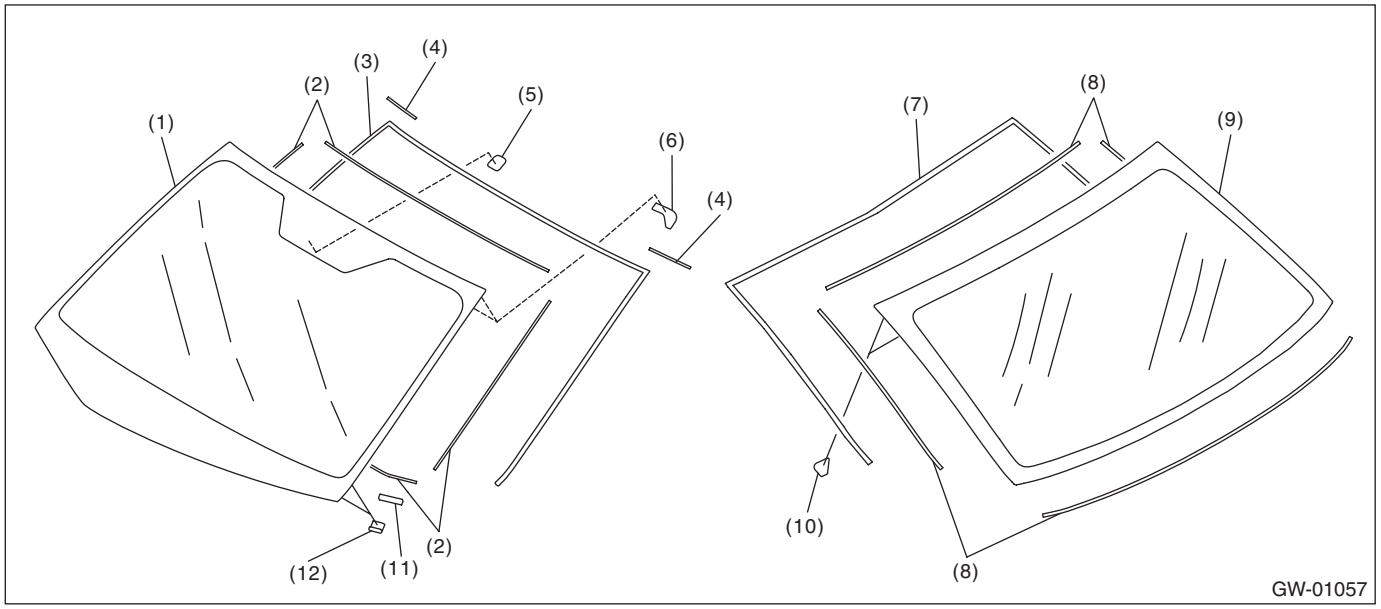


(A) Model with side turn
(B) Model without side turn

(1) Mirror - repair
(2) Mirror unit - door
(3) Cover - cap outer mirror
(4) Cover - cap outer mirror lower
(5) Light ASSY - side turn mirror
(6) Base - inner mirror
(7) Mirror ASSY - inner rearview

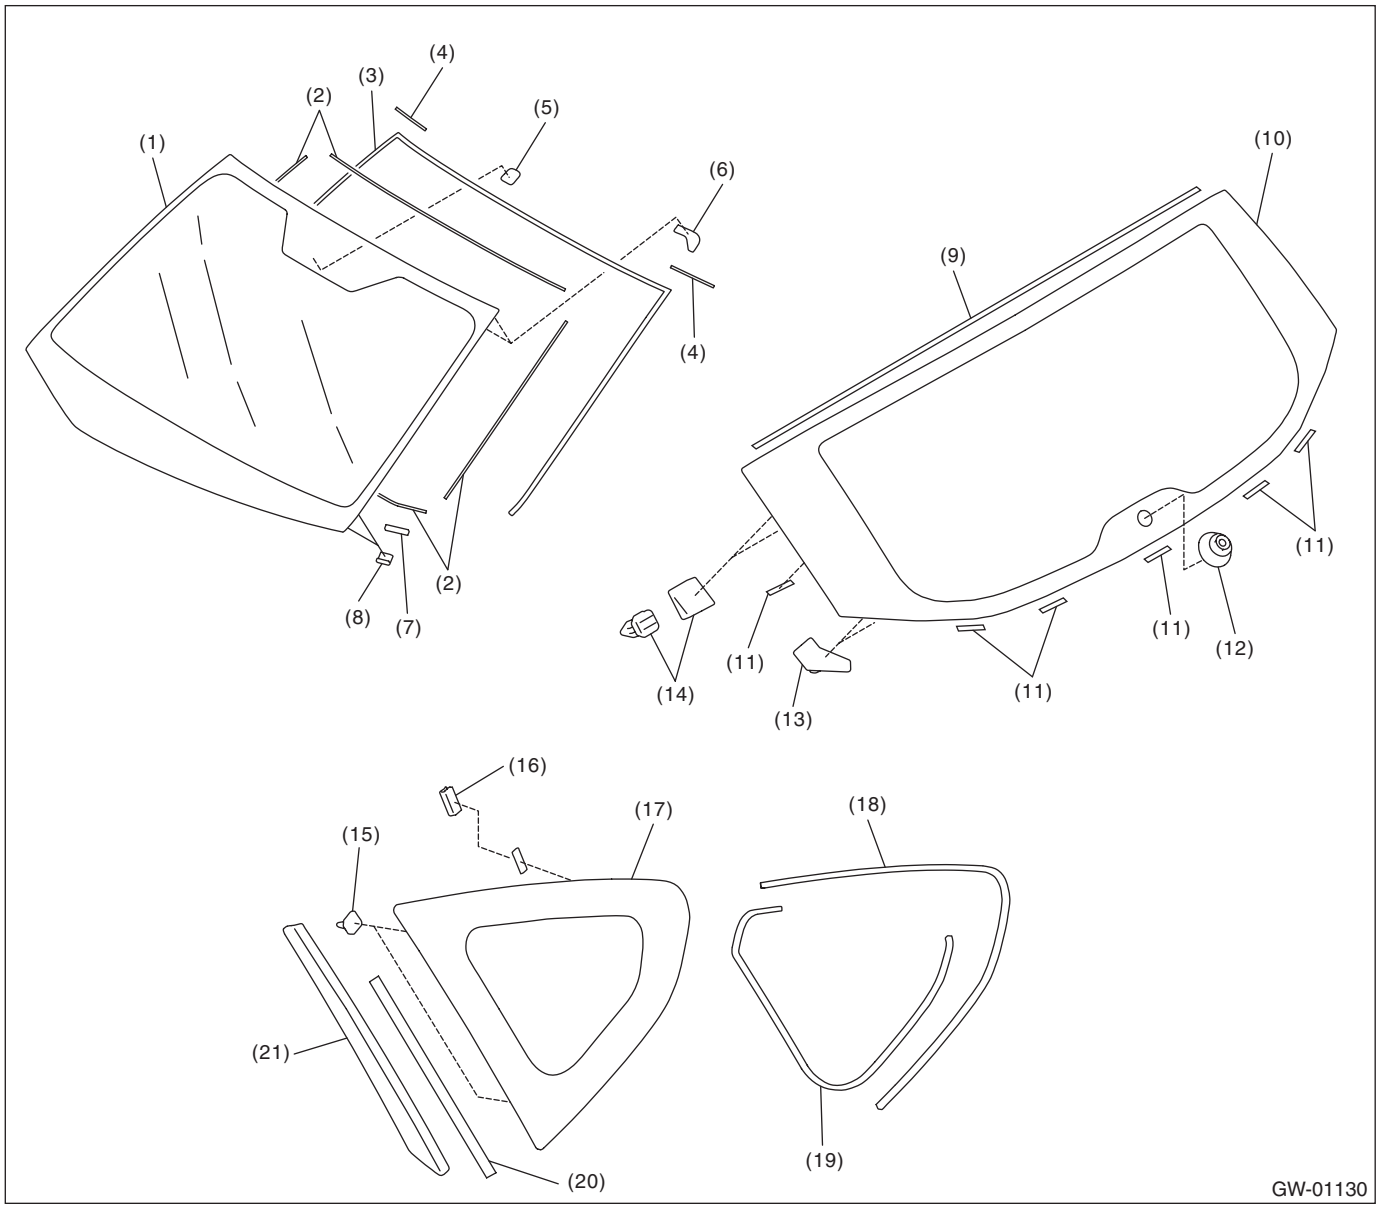
***Tightening torque: N·m (kgf-m, ft-lb)***
***T: 7.5 (0.76, 5.5)***

## 4. FIXED GLASS (4 DOOR MODEL)



(1) Glass - front window
(2) Dam rubber - front
(3) Molding - front window
(4) Seal - upper
(5) Base - inner mirror
(6) Locating pin - front window
(7) Molding - rear window
(8) Dam rubber - rear
(9) Glass - rear window
(10) Locating pin - rear window
(11) Seal - lower VIN
(12) Seal - lower

## 5. FIXED GLASS (5 DOOR MODEL/XV MODEL)



(1) Glass - front window
(2) Dam rubber - front
(3) Molding - front window
(4) Seal - upper
(5) Base - inner mirror
(6) Locating pin - front window
(7) Seal - lower VIN
(8) Seal - lower
(9) Dam rubber - rear gate
(10) Glass - rear gate
(11) Spacer - rear gate
(12) Cap - pivot
(13) Locating pin - rear gate
(14) Holder - rear gate
(15) Locating pin - rear quarter
(16) Fastener - rear quarter
(17) Glass - rear quarter
(18) Dam rubber - rear quarter
(19) Seal - rear quarter
(20) Protective plate
(21) Molding - rear quarter

## B: CAUTION

• Before disassembling or reassembling parts, always disconnect the battery ground cable from battery. When replacing the audio, control module and other parts provided with memory functions, record the memory contents before disconnecting the battery ground cable. Otherwise, the memory is cleared.
• Avoid impact and damage to the glass.
• Reassemble the parts in the reverse order of disassembly procedure unless otherwise indicated.
• Connect the connectors securely during reassembly.
• After reassembly, make sure that the each component operates normally.

## C: PREPARATION TOOL

### 1. SPECIAL TOOL

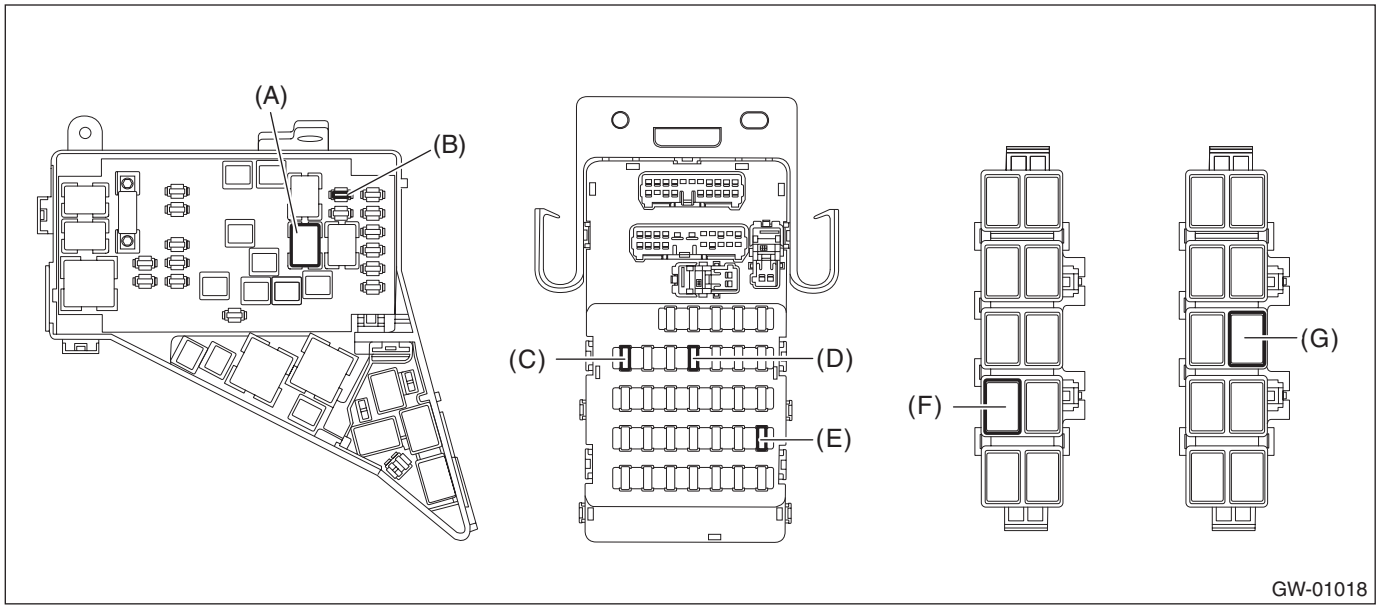
| ILLUSTRATION | TOOL NUMBER | DESCRIPTION | REMARKS |
|---|---|---|---|
|  ST1B022XU0 | 1B022XU0 | SUBARU SELECT MONITOR III KIT | Used for setting of each function and trouble-shooting for electrical system. |

### 2. GENERAL TOOL

| TOOL NAME | REMARKS |
|---|---|
| Circuit tester | Used for measuring resistance and voltage. |
| Piano wire | Used for removing the window glass. |
| Cutter knife | Used for removing the window glass. |
| Windshield glass knife | Used for removing the window glass. |

# 2. Relay and Fuse

## A: LOCATION



| | | |
|---|---|---|
| Main fuse box | Rear defogger relay | (A) |
| | Fuse 25 A (rear defogger) | (B) |
| Relay & fuse box | Fuse 7.5 A (remote control mirror) | (C) |
| | Fuse 15 A (wiper deicer) | (D) |
| | Fuse 7.5 A (power window) | (E) |
| Relay holder | Power window relay | (F) |
| | Wiper deicer relay | (G) |

NOTE:
For other related fuses, refer to the wiring diagram. <Ref. to WI-15, Power Supply Circuit.>

# B: INSPECTION

## 1. CHECK FUSE

1) Remove the fuse and check visually.
2) If the fuse is blown out, replace the fuse.

## 2. CHECK RELAY

1) Check the resistance between relay terminals.

| Terminal No. | Inspection conditions | Specification | Circuit |
|---|---|---|---|
| 1 — 2 | Always | 1 MΩ or more |  SR-00180 |
| 1 — 2 | Apply battery voltage between 4 — 3 terminals. | Less than 1 Ω | |

| Terminal No. | Inspection conditions | Specification | Circuit |
|---|---|---|---|
| 1 — 2 | Always | 1 MΩ or more |  SL-01085 |
| 1 — 4 | Always | Less than 1 Ω | |
| 1 — 2 | Apply battery voltage between 3 — 5 terminals. | Less than 1 Ω | |

2) Replace the relay if the inspection result is not within the standard value.

# 3. Power Window System

## A: WIRING DIAGRAM

Refer to “Power Window System” in the wiring diagram. <Ref. to WI-116, WIRING DIAGRAM, Power Window System.>

## B: INSPECTION

| Symptoms | Inspection order |
|---|---|
| All power windows do not operate. | 1. Check the fuse.<br>2. Check the power window relay.<br>3. Check the wiring harness. |
| Particular window does not operate. | 1. Check the fuse.<br>2. Check the switch - power window main.<br>3. Check the switch - power window sub.<br>4. Check the power window motor.<br>5. Check the wiring harness. |
| “Window Lock” does not operate. | Check the switch - power window main. |
| Driver’s side window moves slightly (approx. 20 mm (0.79 in)). | 1. Check the motor - front.<br>2. Check the switch - power window main.<br>3. Check the wiring harness. |
| Driver’s side window moves slightly (approx. 50 mm (1.97 in)). (This status is not a failure.) | Perform reset operation A. <Ref. to GW-10, RESET OPERATION A, OPERATION, Power Window System.> |
| Driver’s side window does not close completely. (Using AUTO UP allows the window to fully close first and then move in reverse resulting in slightly opening.) | Perform reset operation B. <Ref. to GW-10, RESET OPERATION B, OPERATION, Power Window System.> |

## C: OPERATION

### 1. RESET OPERATION A

1) Sit in the driver’s seat and close the door.
2) Turn the ignition switch to ON.
3) Operate the switch - power window main to open the glass assembly - front door halfway.
4) Operate the switch - power window main in “UP” direction to fully close the glass assembly - front door on the driver’s side.
5) While the glass assembly - front door is fully closed, hold down the switch - power window main in “UP” direction for one second.
6) Operate the switch - power window main in “AUTO DOWN” direction to check whether the window fully opens properly.

NOTE:
If the window does not fully open properly, repeat steps 1) to 6).

### 2. RESET OPERATION B

1) Sit in the driver’s seat and close the door.
2) Turn the ignition switch to ON.
3) On the glass assembly - front door of the driver’s side, operate the “AUTO UP” function (fully pull up the switch) using the switch - power window main, and perform auto-reverse operations 10 times in a row (after the window fully closes, it slightly opens).
4) Check that the “AUTO UP” function no longer operates.
5) Perform reset operation A.
6) Check that the window operates properly by operating the “AUTO UP” and “AUTO DOWN” switch.

NOTE:
If the window does not fully open/close properly, repeat steps 1) to 6).

## D: NOTE

For operation procedures of each component of the power window system, refer to the respective sections.
- Power window control switch: <Ref. to GW-12, Power Window Control Switch.>
- Front door glass: <Ref. to GW-18, Front Door Glass.>
- Front regulator and motor assembly: <Ref. to GW-21, Front Regulator and Motor Assembly.>
- Rear door glass: <Ref. to GW-34, Rear Door Glass.>
- Rear regulator and motor assembly: <Ref. to GW-36, Rear Regulator and Motor Assembly.>

# 4. Power Window Control Switch

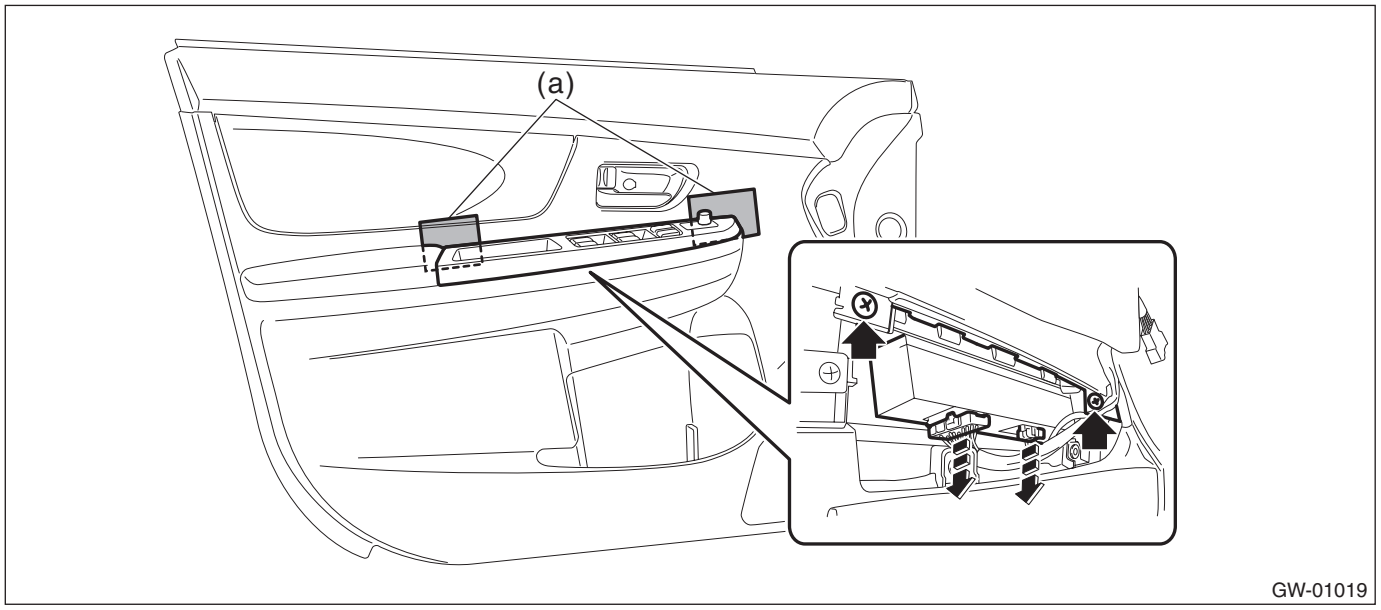
## A: REMOVAL

### 1. MAIN SWITCH

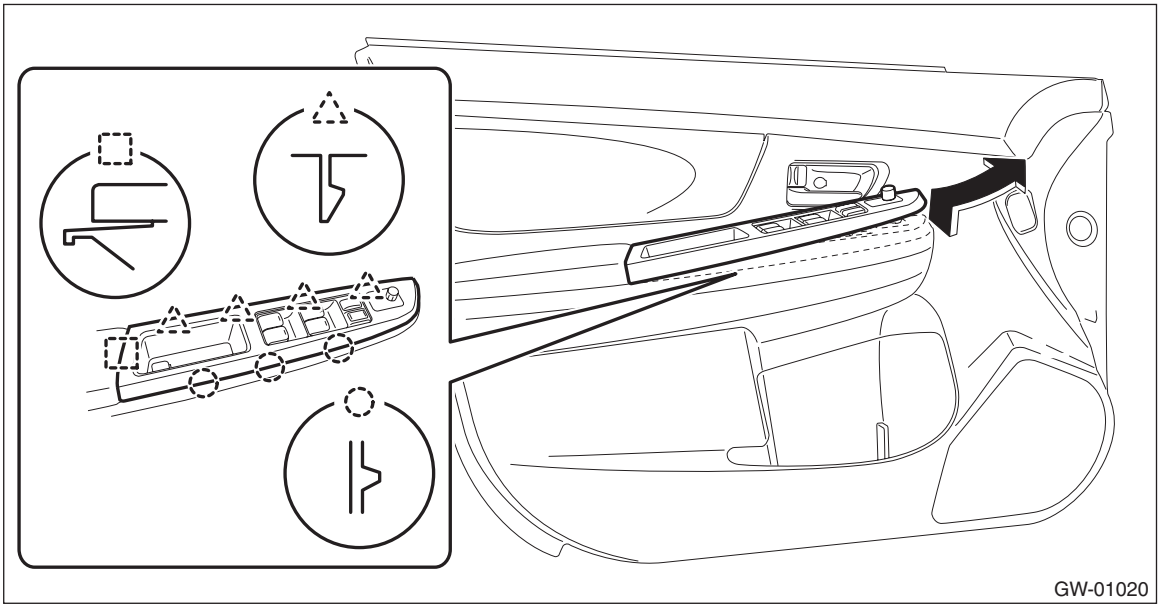
1) Remove the trim panel - front door. <Ref. to EI-61, FRONT DOOR, REMOVAL, Door Trim.>
2) Remove the panel - power window main switch.

**CAUTION:**
**Be careful not to damage the trim panel - front door with the panel - power window main switch.**

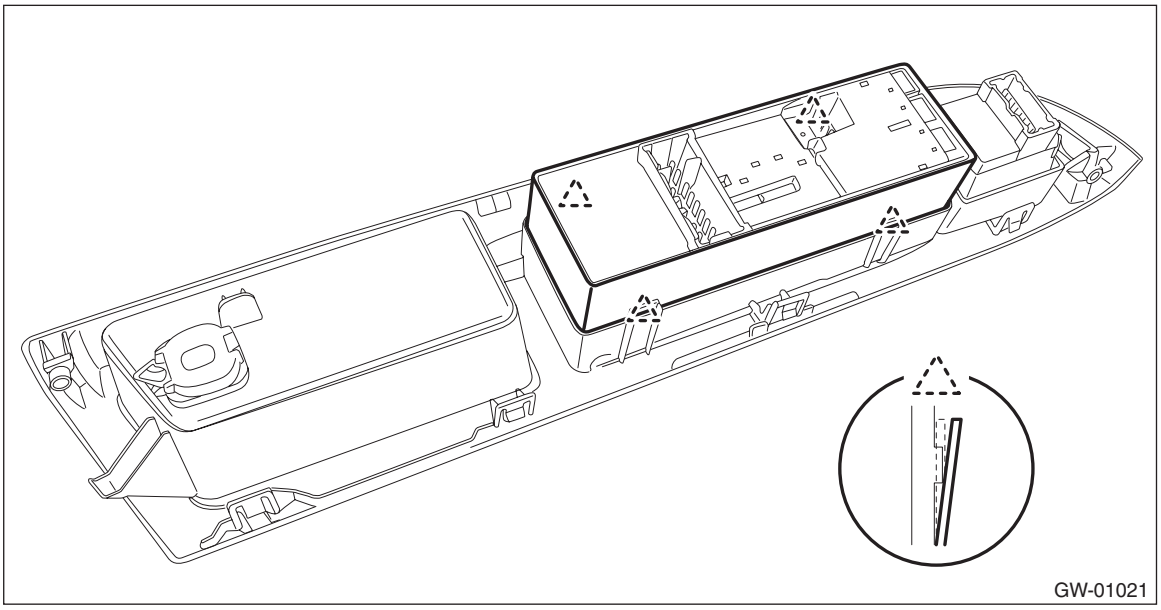
(1) Insert a sheet of protective paper (a) between panel - power window main switch and trim panel - front door.
(2) Remove the screws and disconnect the connector.



(3) Release the claws, and then remove the panel - power window main switch.



(4) Release the claws, and then remove the switch - power window main.



## 2. SUB-SWITCH

**Switch - power window sub front**

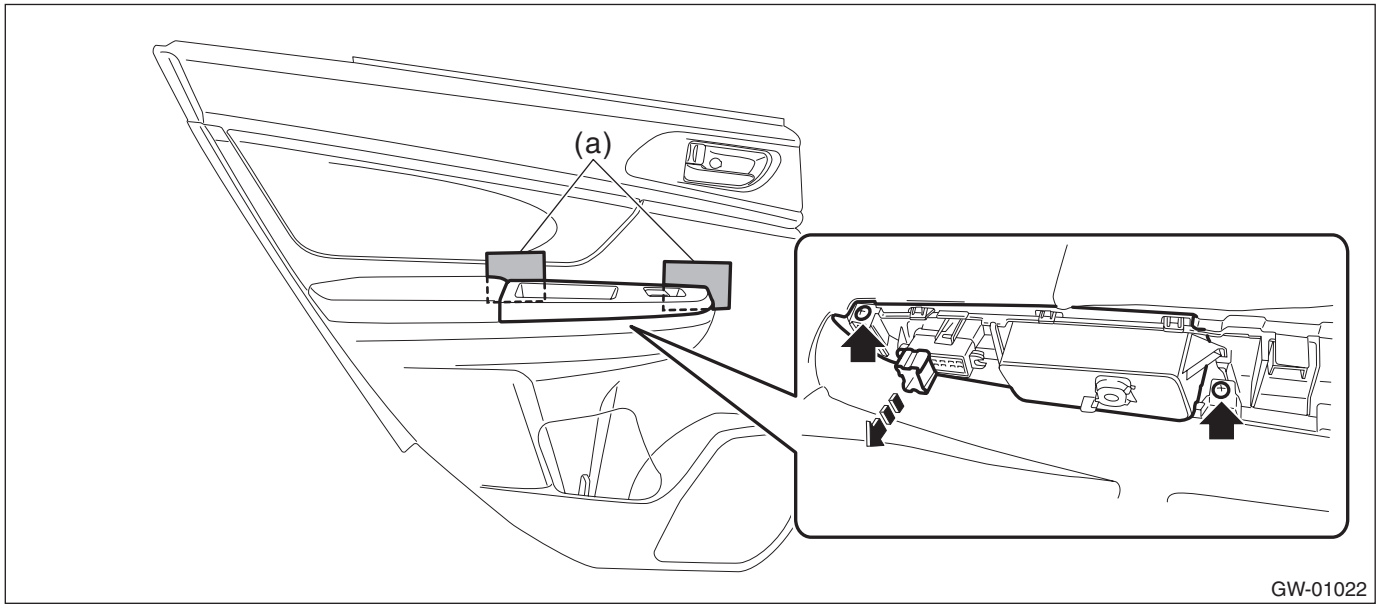
For removal of the switch - power window sub front on the passenger's seat, refer to the removal procedure of the switch - power window main. <Ref. to GW-12, MAIN SWITCH, REMOVAL, Power Window Control Switch.>

**Switch - power window sub rear**

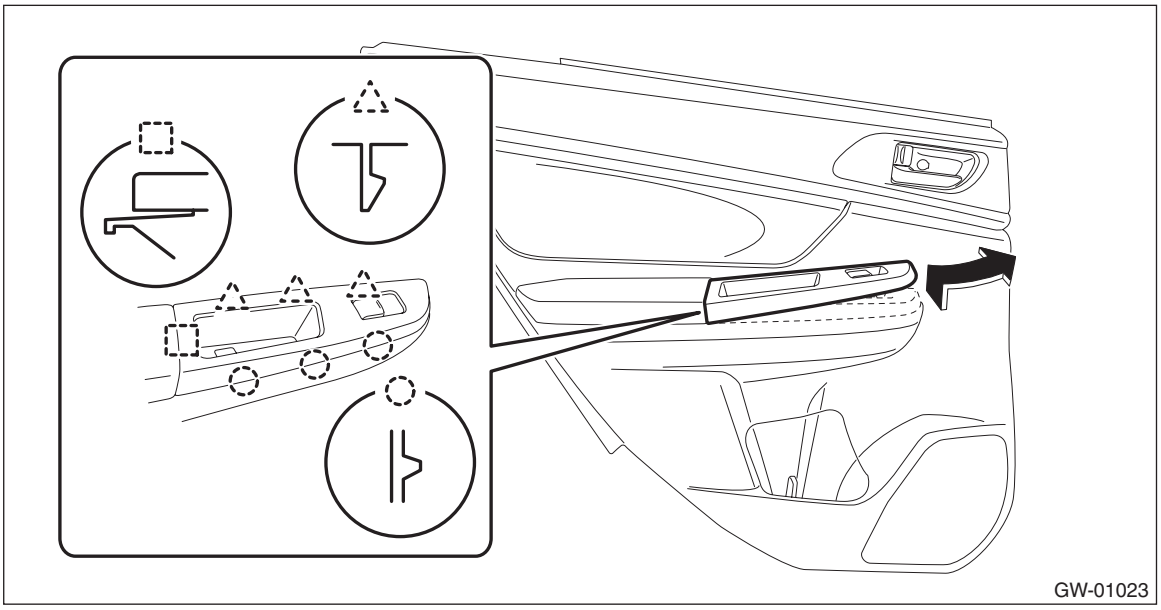
1) Remove the trim panel - rear door. <Ref. to EI-62, REAR DOOR, REMOVAL, Door Trim.>
2) Remove the panel - power window sub switch rear.

**CAUTION:**
**Be careful not to damage the trim panel - rear door with the panel - power window sub switch rear.**

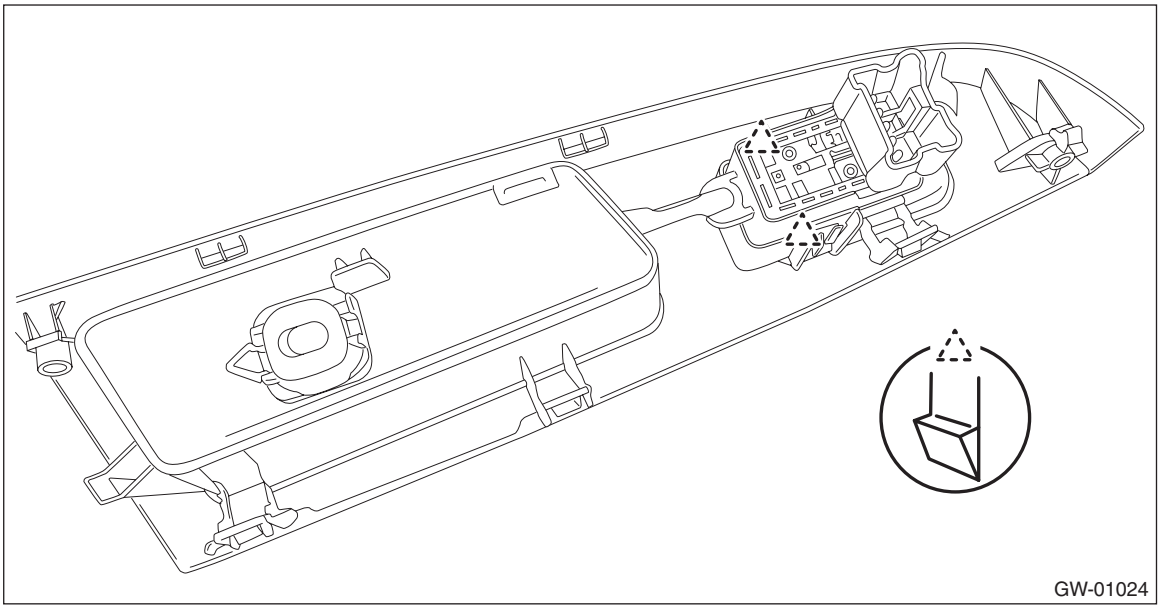
(1) Insert a sheet of protective paper (a) between panel - power window sub switch rear and trim panel - rear door.
(2) Remove the screws and disconnect the connector.



(3) Release the claws, and then remove the panel - power window sub switch rear.



3) Release the claws, and then remove the switch - power window sub rear.



## B: INSTALLATION

**CAUTION:**

- **After installing the switch - power window main, always perform the initial setting.**

**Failure to do so may cause the improper activation of auto-reverse operation for pinching hazard prevention.**

- **Use protective paper to avoid damage to the trim panel.**

1) Install each part in the reverse order of removal.

2) Perform initial setting operation (reset operation A). <Ref. to GW-10, RESET OPERATION A, OPERATION, Power Window System.>

# C: INSPECTION

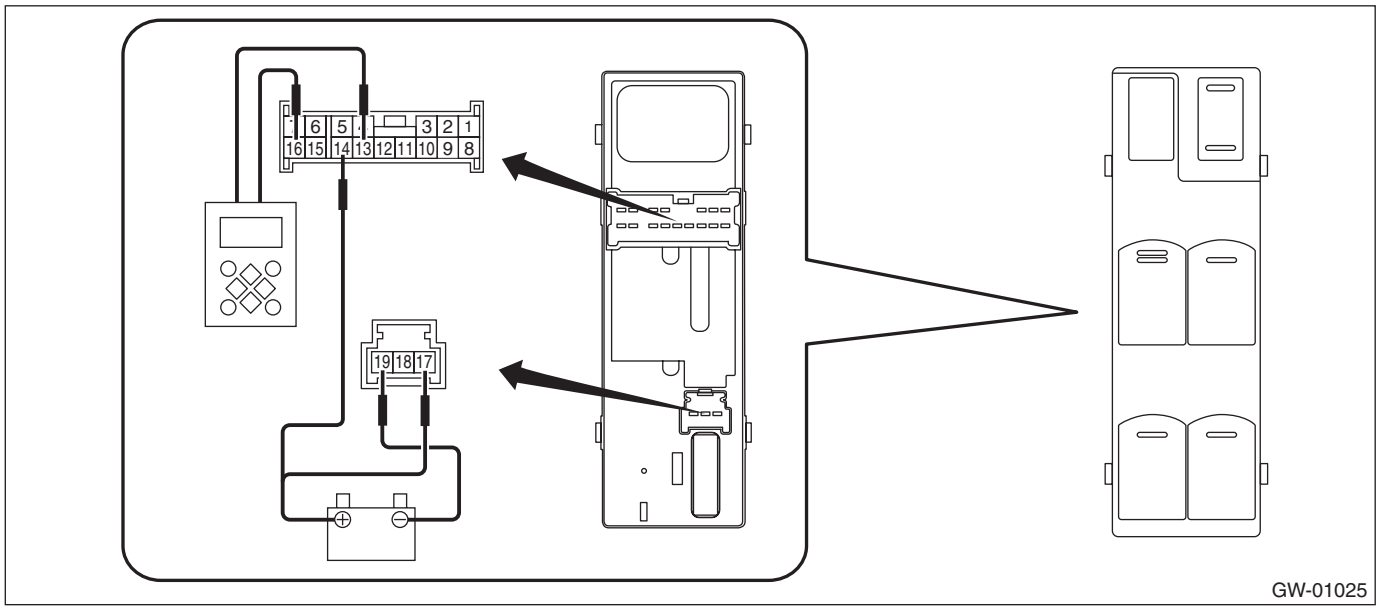
## 1. MAIN SWITCH

**• Driver's seat**

**CAUTION:**
**Since the switch - power window main is controlled by CPU, do not check continuity for switch alone with the circuit tester. Performing continuity check with circuit tester can damage the switch - power window main circuit.**
Check output from the switch - power window main to the driver's side motor using the oscilloscope function in the Subaru Select Monitor.
1) Remove the switch - power window main.
2) Connect the battery and the Subaru Select Monitor to the switch - power window main terminal.

**CAUTION:**
**Never mix up the terminals when connecting the harness connector of the switch - power window main and the battery. If the connection is wrong, the switch - power window main may be damaged.**

NOTE:
• When the battery is connected to the switch - power window main terminal, the letters "AUTO" on the driver's side knob illuminates.
• For detailed procedures, refer to "Subaru Select Monitor Operation Manual".



3) Operate the switch - power window main and check the output.

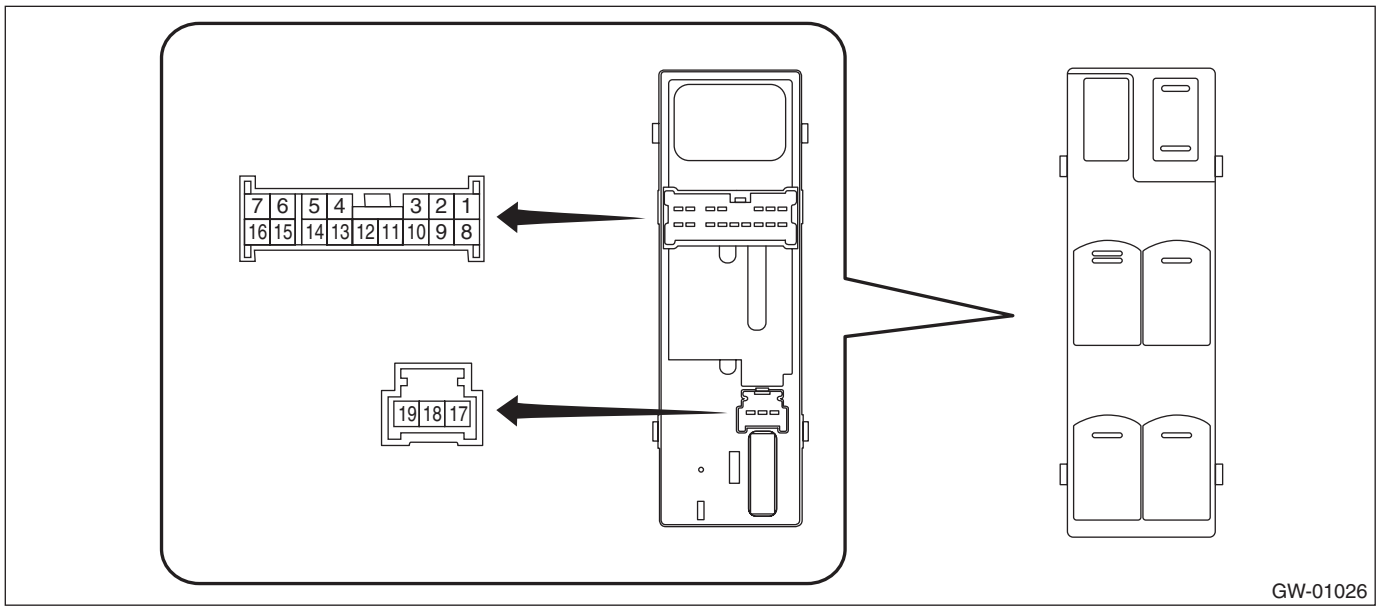
NOTE:
Since output time during window UP operation is extremely short, it cannot be checked without using a measuring instrument such as oscilloscope. Output is constantly produced while the switch is operated for window DOWN operation.

| Inspection conditions | Output time | Standard |
|---|---|---|
| AUTO UP | Approx. 130 ms | Battery voltage |
| UP | | |
| OFF | — | 0 V |
| DOWN | During switch operation | Battery voltage |
| AUTO DOWN | Approx. 300 ms | |

4) If the inspection result is not within the standard, replace the switch - power window main.

**• Except for driver's seat**

1) Check the resistance between terminals of the switch - power window main.

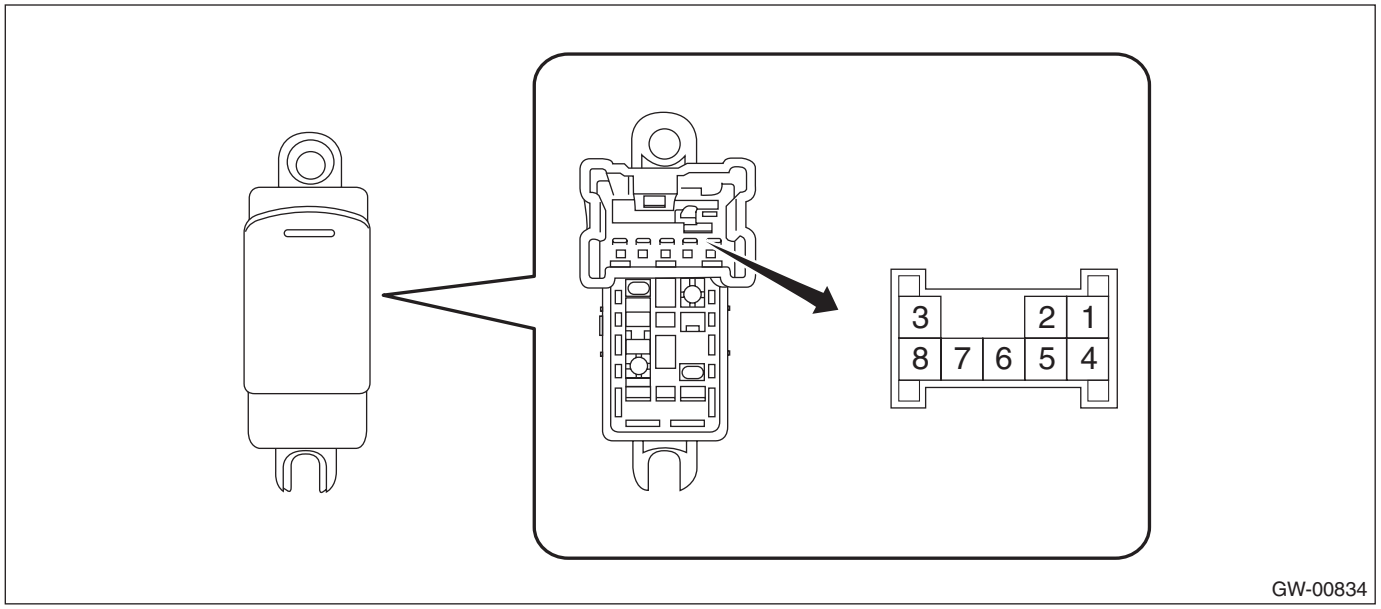


| | Terminal No. | Inspection conditions | Standard |
|---|---|---|---|
| Passenger's seat | 14 — 8<br>19 — 12 | UP | Less than 1 Ω |
| | 14 — 12<br>14 — 8 | OFF | 1 MΩ or more |
| | 19 — 8<br>19 — 12<br>8 — 12 | | Less than 1 Ω |
| | 14 — 12<br>19 — 8 | DOWN | Less than 1 Ω |
| Rear LH | 14 — 7<br>19 — 5 | UP | Less than 1 Ω |
| | 14 — 7<br>14 — 5 | OFF | 1 MΩ or more |
| | 19 — 7<br>19 — 5<br>7 — 5 | | Less than 1 Ω |
| | 14 — 5<br>19 — 7 | DOWN | Less than 1 Ω |
| Rear RH | 14 — 1<br>19 — 3 | UP | Less than 1 Ω |
| | 14 — 1<br>14 — 3 | OFF | 1 MΩ or more |
| | 19 — 3<br>19 — 1<br>3 — 1 | | Less than 1 Ω |
| | 14 — 3<br>19 — 1 | DOWN | Less than 1 Ω |

2) If the inspection result is not within the standard, replace the switch - power window main.

## 2. SUB-SWITCH

1) Remove the switch - power window sub front.
2) Check the resistance between terminals of the switch - power window sub front.



| | Terminal No. | Inspection conditions | Standard |
|---|---|---|---|
| Passenger seat, rear | 4 — 5<br>6 — 7 | UP | Less than 1 Ω |
| | 7 — 4<br>8 — 4 | OFF | 1 MΩ or more |
| | 5 — 8<br>6 — 7 | | Less than 1 Ω |
| | 4 — 6<br>5 — 8 | DOWN | Less than 1 Ω |

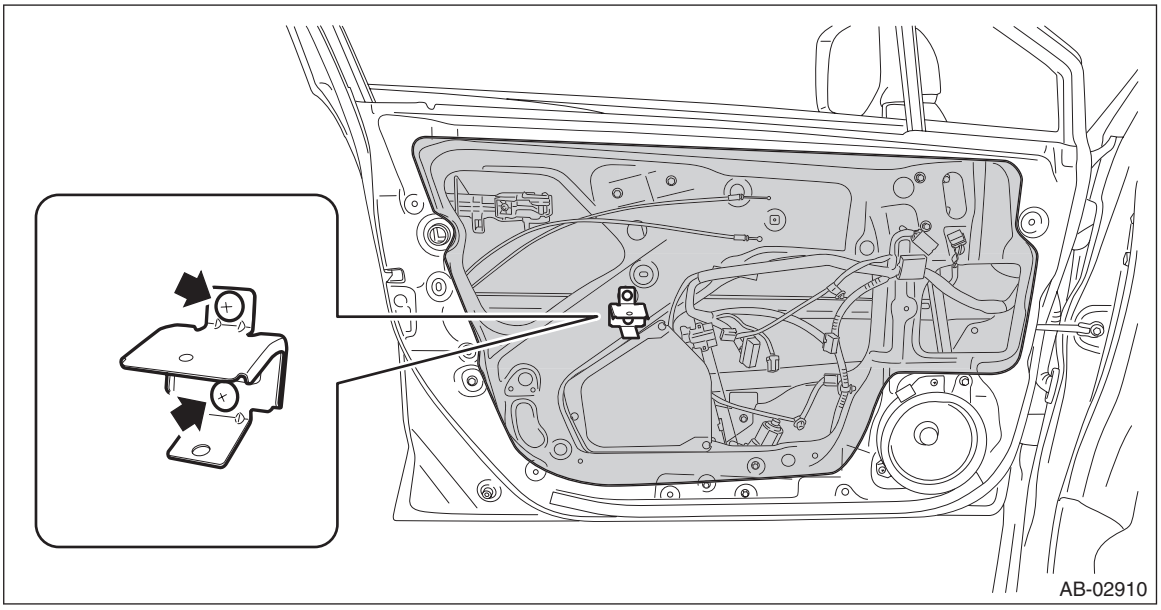
3) If the inspection result is not within the standard, replace the switch - power window sub front.

# 5. Front Door Glass

## A: REMOVAL

1) Remove the trim panel - front door. <Ref. to EI-61, FRONT DOOR, REMOVAL, Door Trim.>
2) Remove the sealing cover - front door.

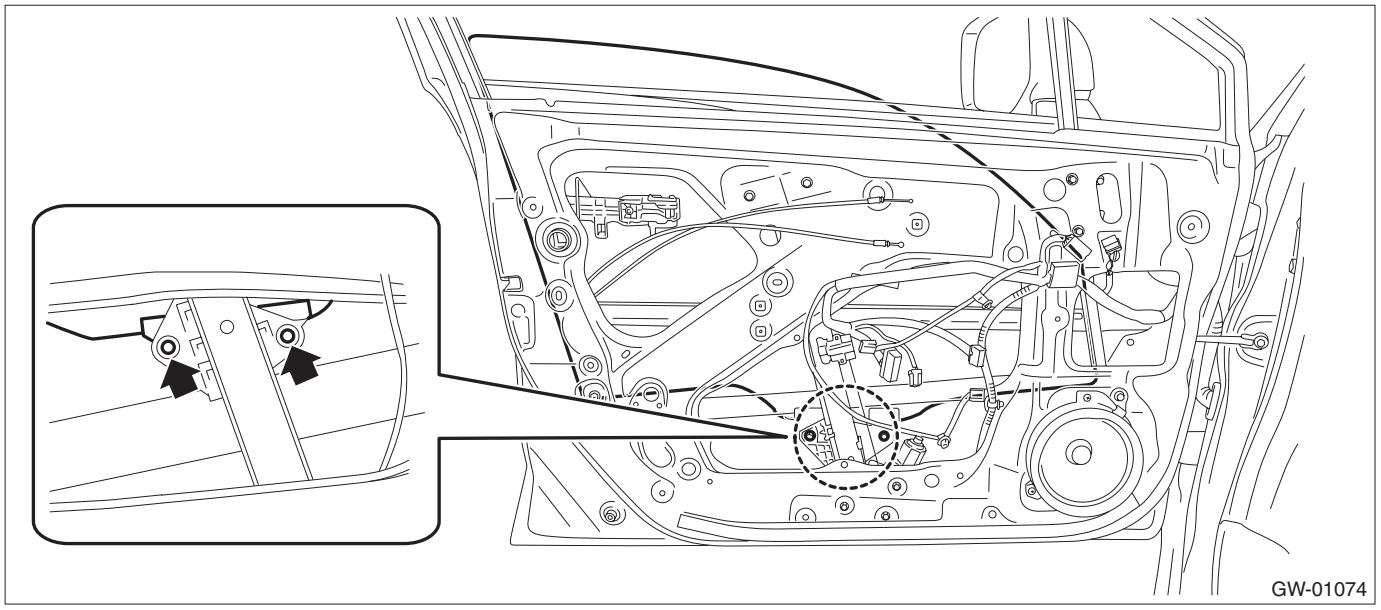
**CAUTION:**
- **Carefully remove the butyl tape. Excessive force will easily break the sealing cover - front door.**
- **If the sealing cover - front door gets broken, replace it with a new part.**
  (1) Remove the screw to remove the bracket - door trim front.
  (2) Carefully remove the butyl tape to remove the sealing cover - front door.



3) Remove the front door inner pad.

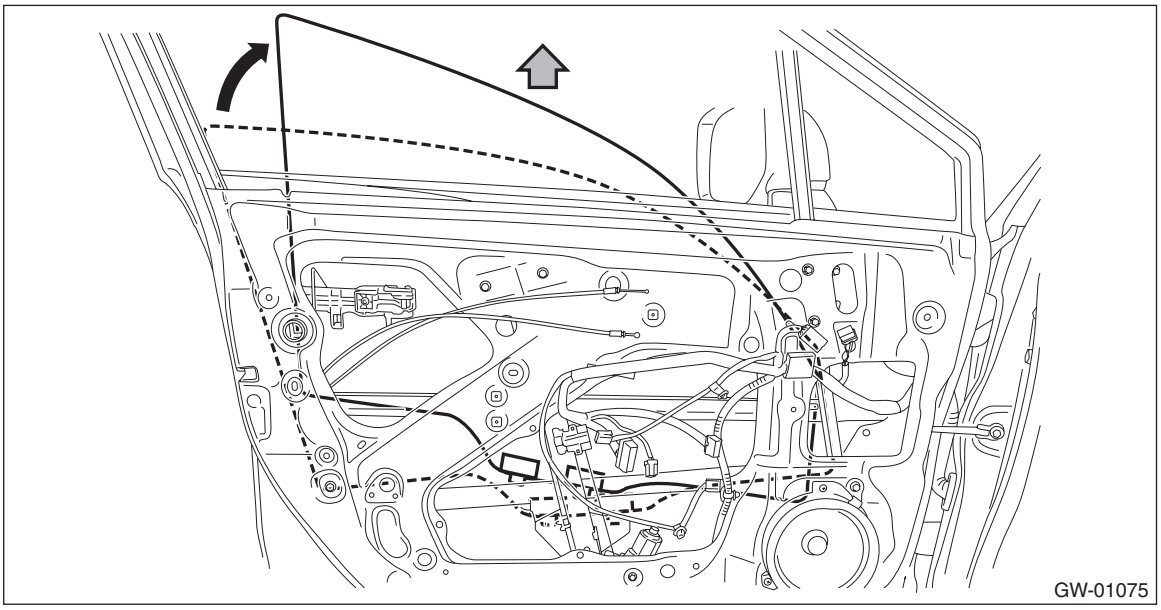
**CAUTION:**
**If the clip is damaged, replace it with a new part because the panel assembly - front door may be deformed.**
4) Attach the battery ground cable and the switch - power window, and turn the ignition to ON.

5) Remove the glass assembly - front door.
(1) Operate the switch - power window to move the glass assembly - front door to the position where the mounting bolts can be seen.
(2) Remove the bolt.

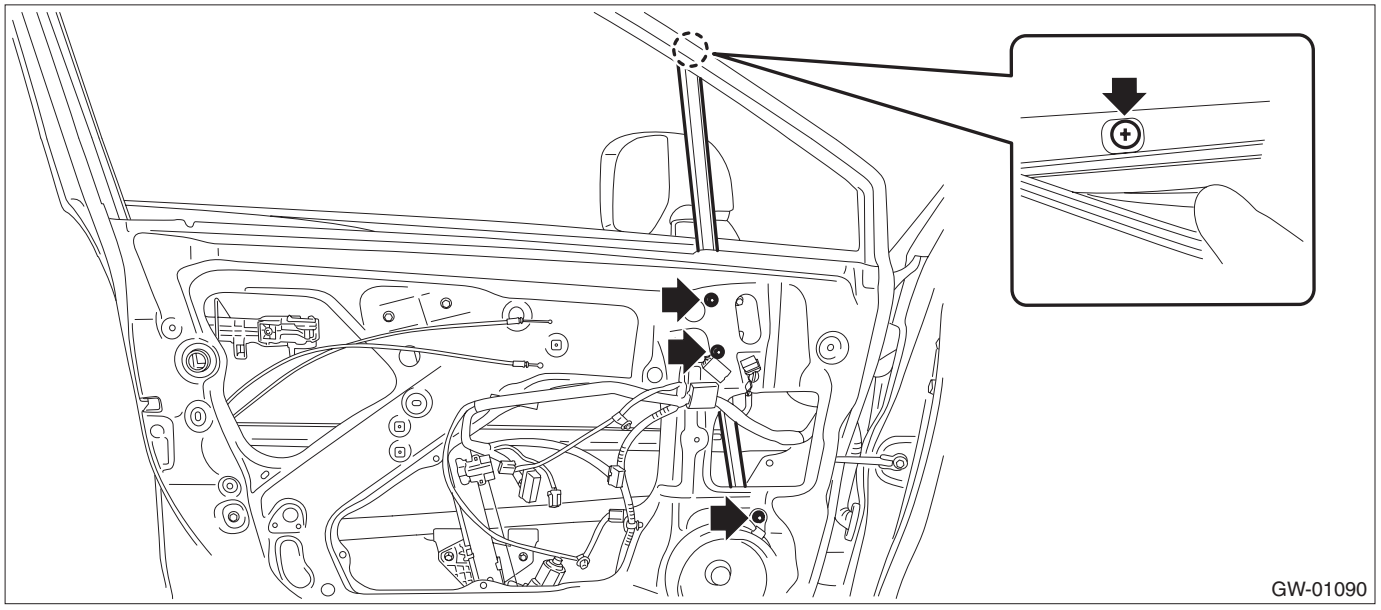


(3) While tilting the glass, remove the glass assembly - front door.

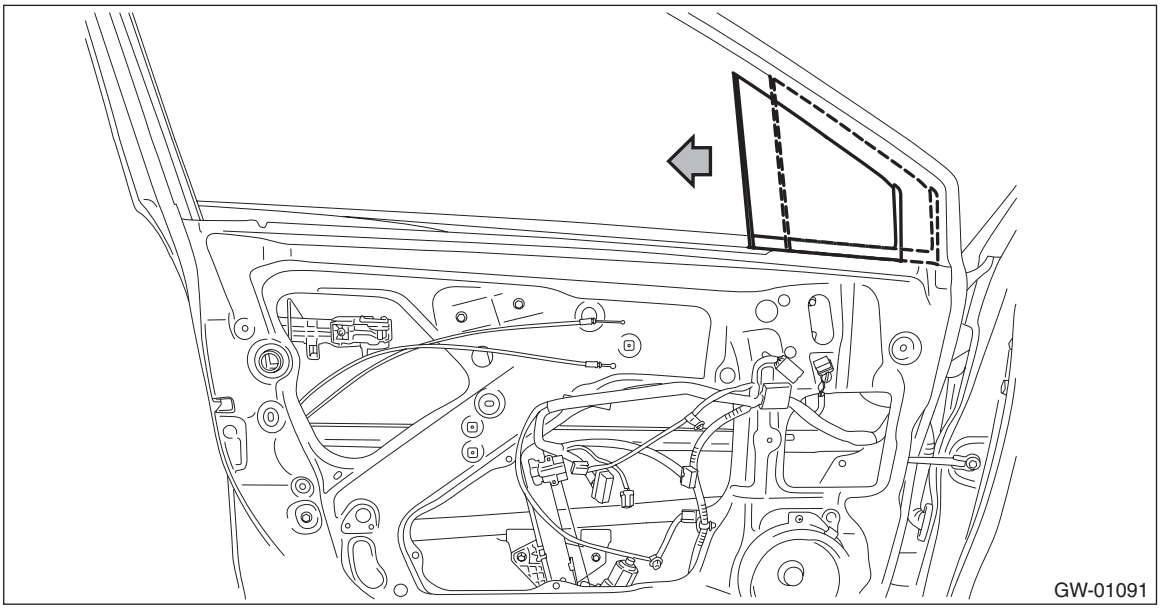
**CAUTION:**
**Avoid impact and damage to the glass assembly - front door.**



6) Remove the glass - front door partition.
(1) Remove the bolts and screws, and then remove the sash COMPL - partition.



(2) Remove the glass - front door partition.



## B: INSTALLATION

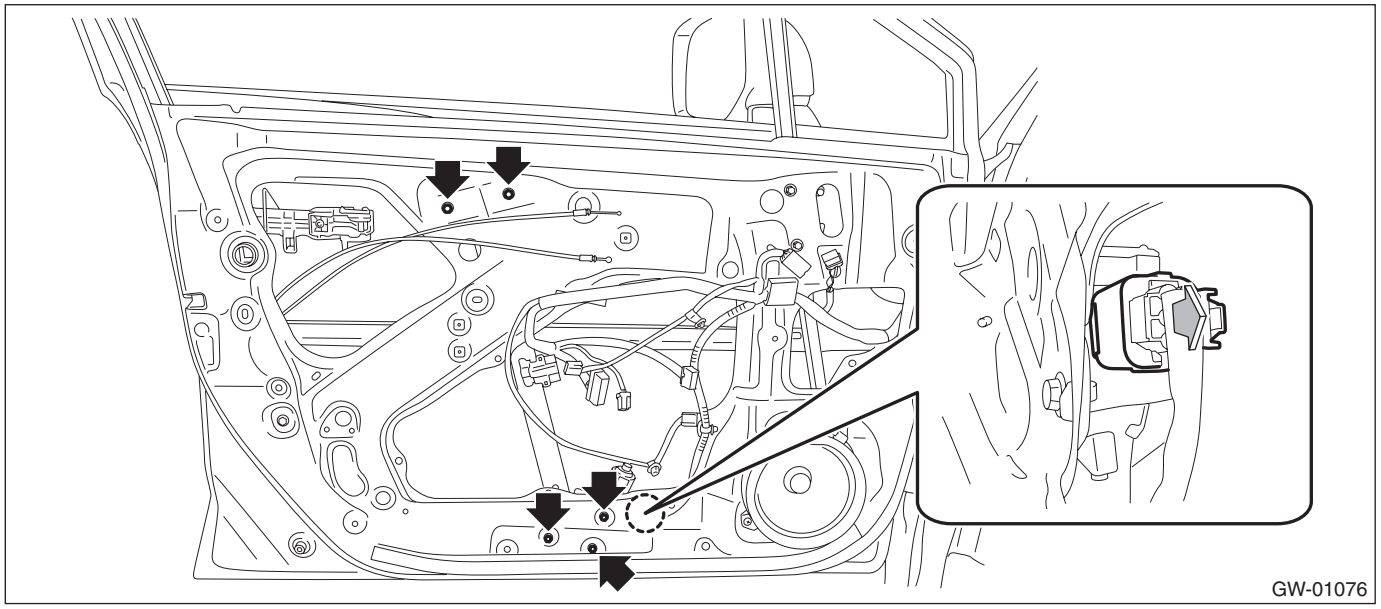
**CAUTION:**
**Check that the running channel - front door is securely fixed to the panel assembly - front door and to the sash COMPL - partition.**
Install each part in the reverse order of removal.

***Tightening torque:***
***Refer to "COMPONENT" of "General Description". <Ref. to GW-2, FRONT DOOR GLASS, COMPONENT, General Description.>***

# 6. Front Regulator and Motor Assembly

## A: REMOVAL

1) Remove the glass assembly - front door. <Ref. to GW-18, REMOVAL, Front Door Glass.>
2) Remove the regulator and motor assembly - front.
   (1) Disconnect the motor - front connector.
   (2) Remove the bolts, and then remove the regulator and motor assembly - front.



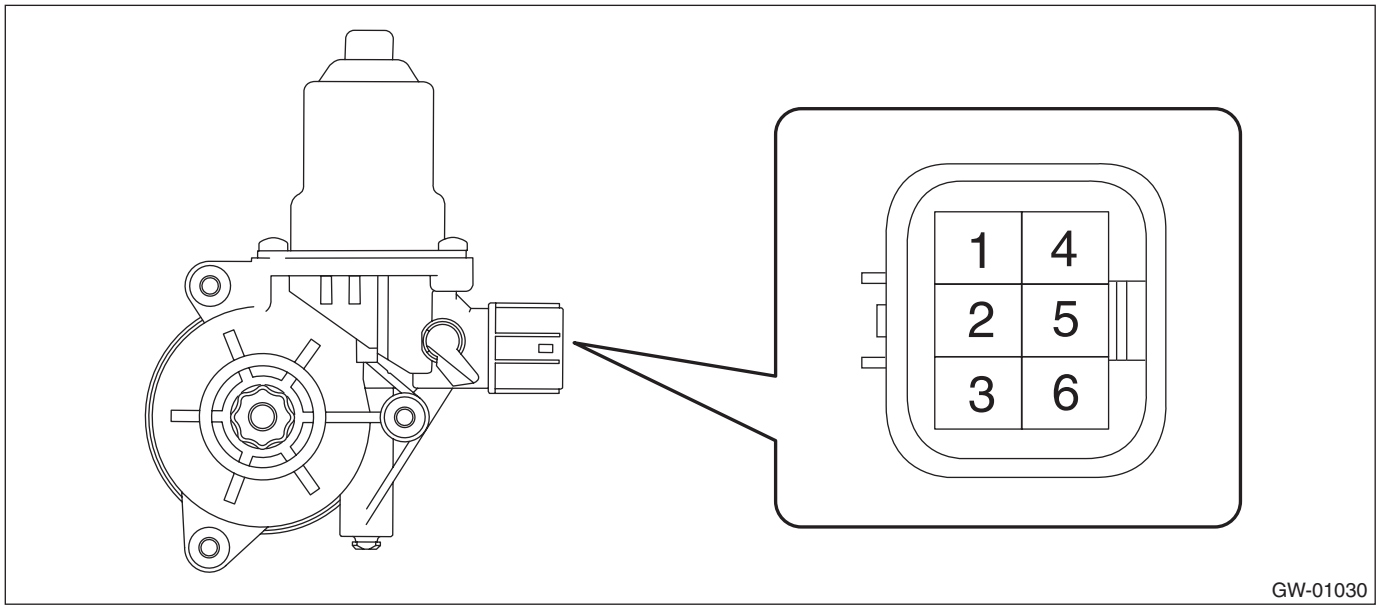
## B: INSTALLATION

Install each part in the reverse order of removal.

***Tightening torque:***
***Refer to "COMPONENT" of "General Description". <Ref. to GW-2, FRONT DOOR GLASS, COMPONENT, General Description.>***

## C: INSPECTION

1) Disconnect the connector of the motor - front.
2) Check the motor operation when battery voltage is applied between terminals of the motor - front connector.



- LH side

| Terminal No. | Inspection conditions | Standard |
|---|---|---|
| 4 (+) — 1 (–) | Apply battery voltage between terminals. | Increase |
| 1 (+) — 4 (–) | Apply battery voltage between terminals. | Decrease |

- RH side

| Terminal No. | Inspection conditions | Standard |
|---|---|---|
| 3 (+) — 6 (–) | Apply battery voltage between terminals. | Increase |
| 6 (+) — 3 (–) | Apply battery voltage between terminals. | Decrease |

3) If it does not operate properly as a result of inspection, replace the regulator and motor assembly - front.

# 7. Remote Control Mirror System

## A: WIRING DIAGRAM

Refer to “Remote Control Mirror System” in the wiring diagram. <Ref. to WI-132, WIRING DIAGRAM, Remote Control Mirror System.>

## B: INSPECTION

### 1. SYMPTOM CHART

| Symptoms | Inspection order |
|---|---|
| All function does not operate. | 1. Check the fuse.<br>2. Check the remote control mirror switch.<br>3. Check the wiring harness. |
| One side of the mirror motor does not operate. | 1. Check the remote control mirror switch.<br>2. Check the mirror motor.<br>3. Check the wiring harness. |
| Mirror heater does not operate. | 1. Check the rear defogger switch.<br>2. Check the rear defogger relay.<br>3. Check the mirror heater.<br>4. Check the wiring harness.<br>5. Check body integrated unit. |

NOTE:
The mirror heater operates with the rear window defogger at the same time. Refer to “INSPECTION” of “Rear Window Defogger System” for details. <Ref. to GW-52, INSPECTION, Rear Window Defogger System.>

## C: NOTE

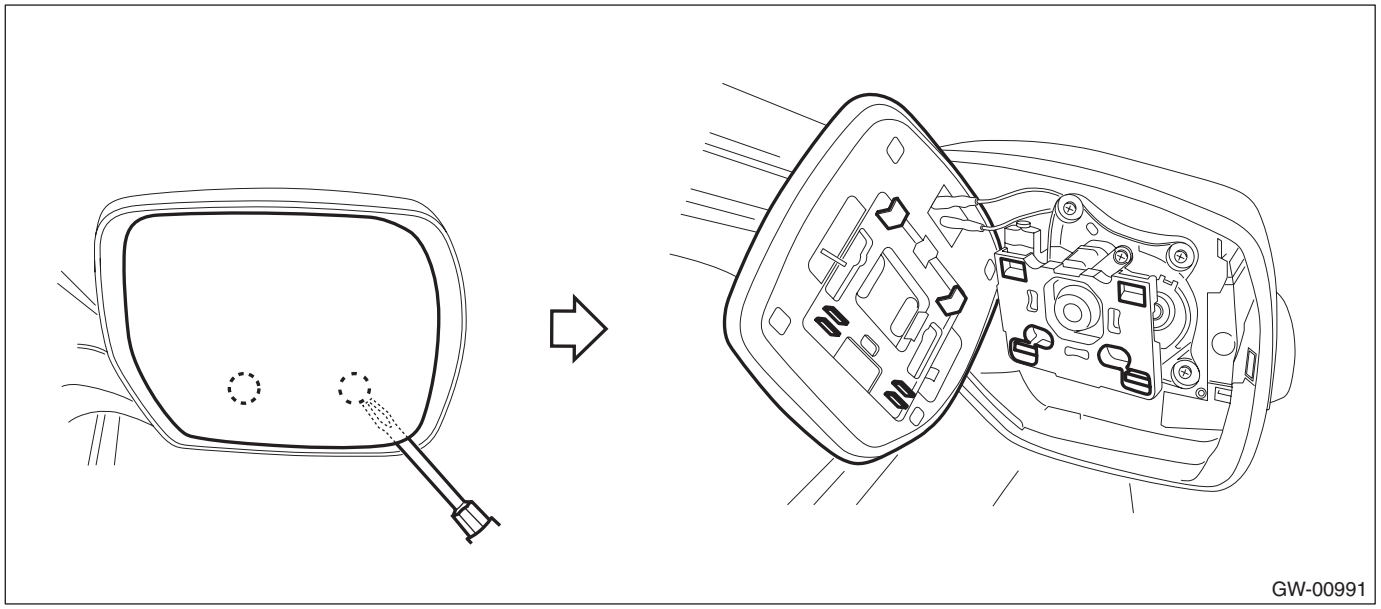
For operation procedures of each component of the remote control mirror system, refer to the respective sections.

- Scalp cap: <Ref. to GW-24, Scalp Cap.>
- Outer mirror assembly: <Ref. to GW-27, Outer Mirror Assembly.>
- Outer mirror: <Ref. to GW-29, Outer Mirror.>
- Remote control mirror switch: <Ref. to GW-30, Remote Control Mirror Switch.>

# 8. Scalp Cap

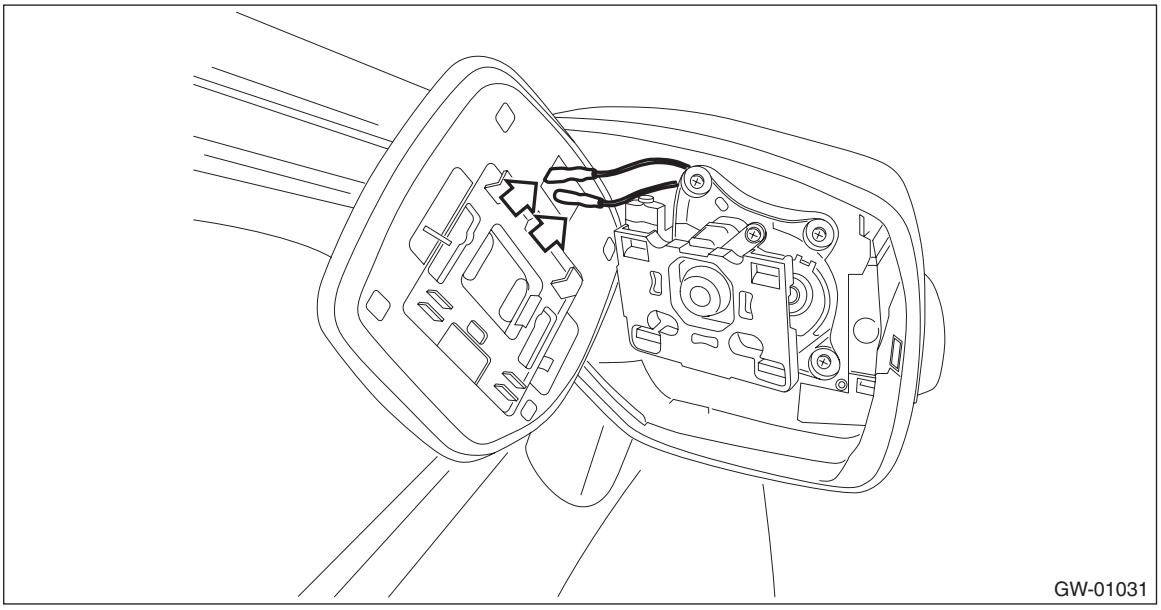
## A: REPLACEMENT

**CAUTION:**
**• When removing the mirror - repair, be careful not to damage the back surface of mirror - repair with a flat tip screwdriver.**
**• When installing the mirror - repair, insert the connector and clip securely.**
1) Operate the remote control mirror switch to face the mirror - repair upward.
2) Disconnect the ground cable from battery.
3) Remove the mirror - repair.
(1) Using a flat tip screwdriver, release the clip, and slide the mirror - repair downward to remove.



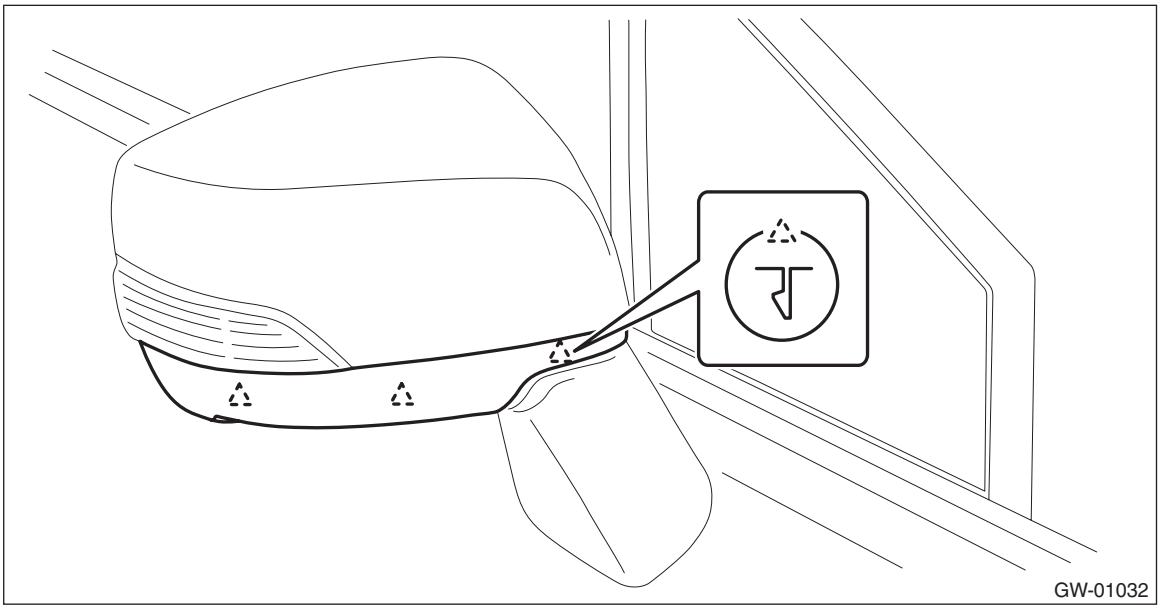
GW-00991

(2) Disconnect the mirror heater connector. (Model with mirror heater)



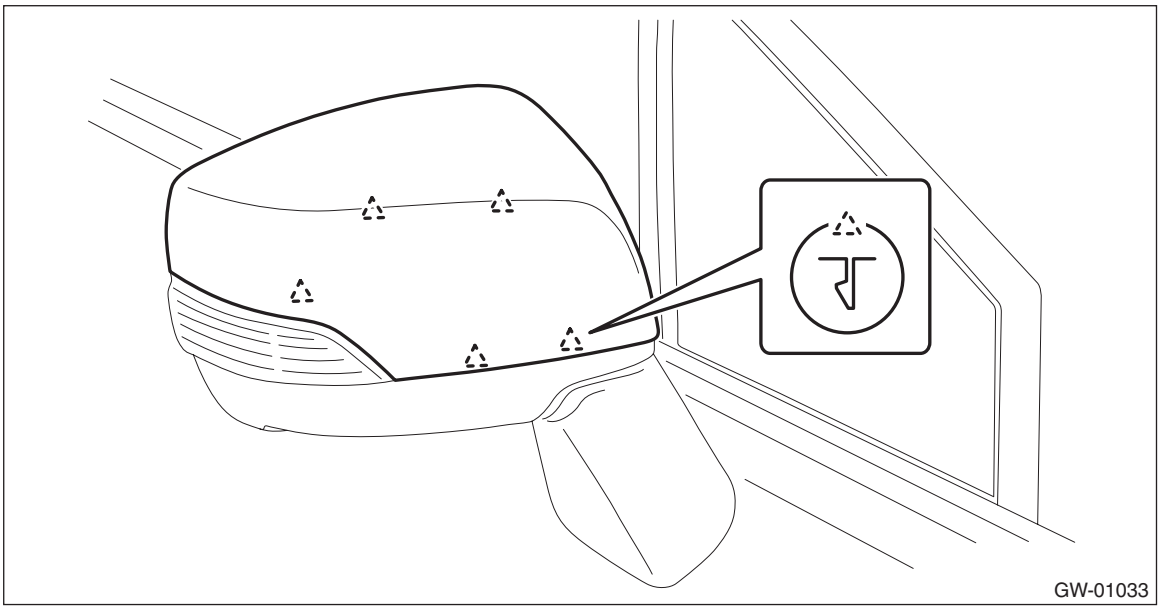
GW-01031

4) Release the claws, and then remove the cover - cap outer mirror lower.

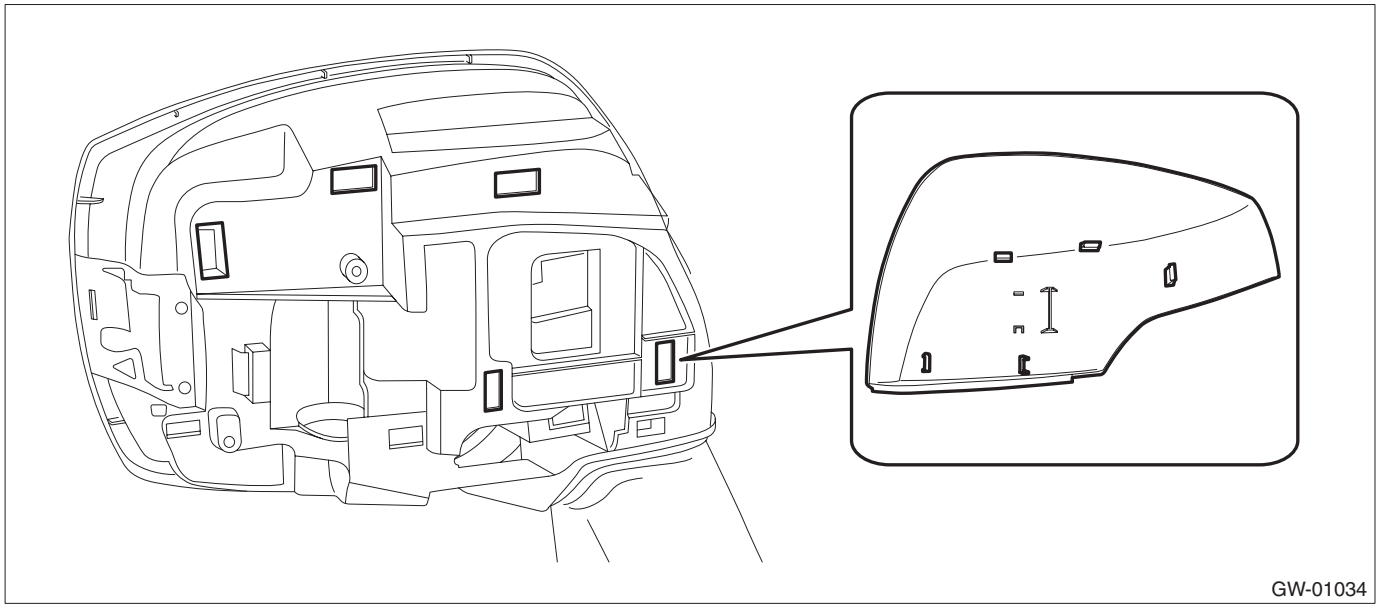


5) Release the claws, and then remove the cover - cap outer mirror.

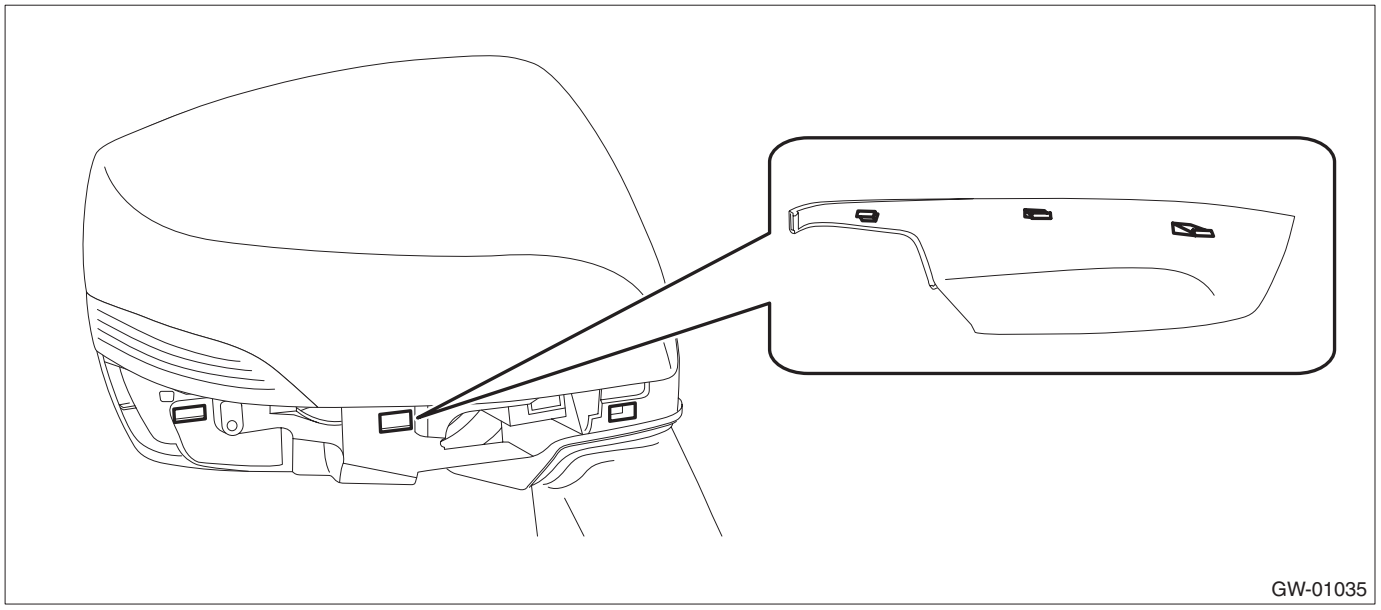
**CAUTION:**
**Be careful not to apply excessive force when removing the cover - cap outer mirror, as the lower hooks may become damaged.**



6) Engage the claws into the hole and install the cover - cap outer mirror.



7) Engage the claws into the hole and install the cover - cap outer mirror lower.



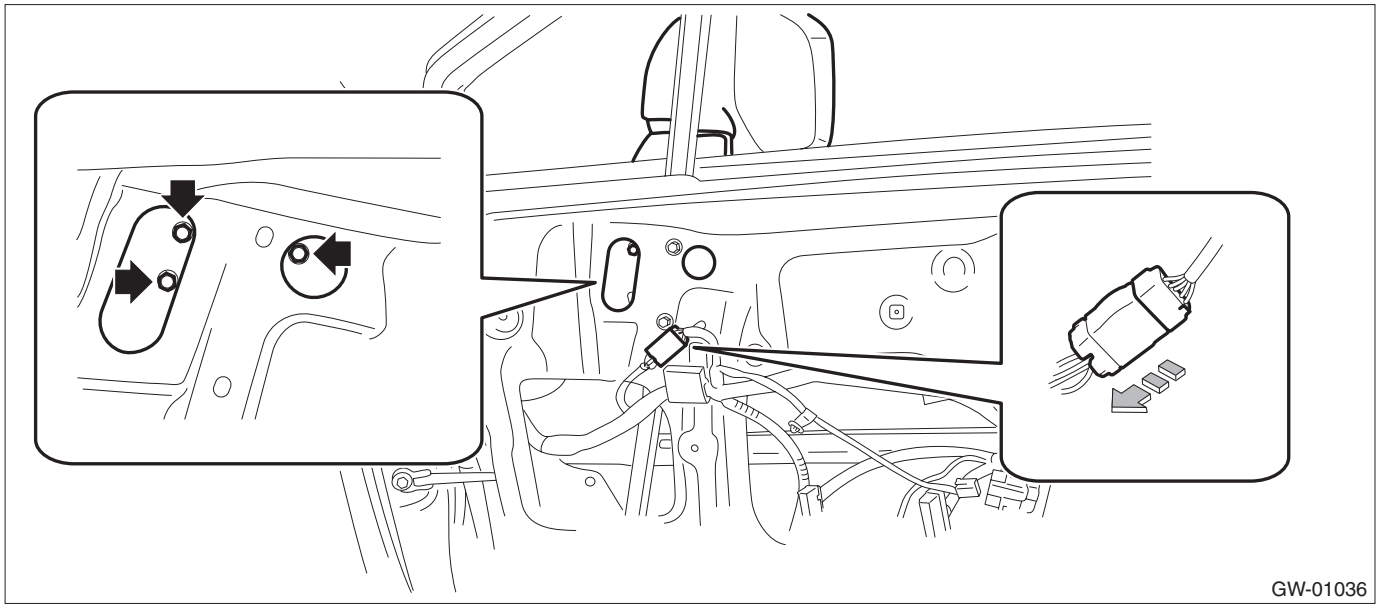
8) Check that all the claws are securely engaged.
9) Install the mirror - repair in the reverse order of removal.

**CAUTION:**
**Be sure to insert the connector and clips securely.**

# 9. Outer Mirror Assembly

## A: REMOVAL

1) Remove the trim panel - front door. <Ref. to EI-61, FRONT DOOR, REMOVAL, Door Trim.>
2) Remove the outer mirror assembly.
   (1) Remove the connector clip that is installed on the panel assembly - front door, and disconnect the connector.
   (2) Turn over the sealing cover - front door.
   (3) Remove the bolts to remove outer mirror assembly.



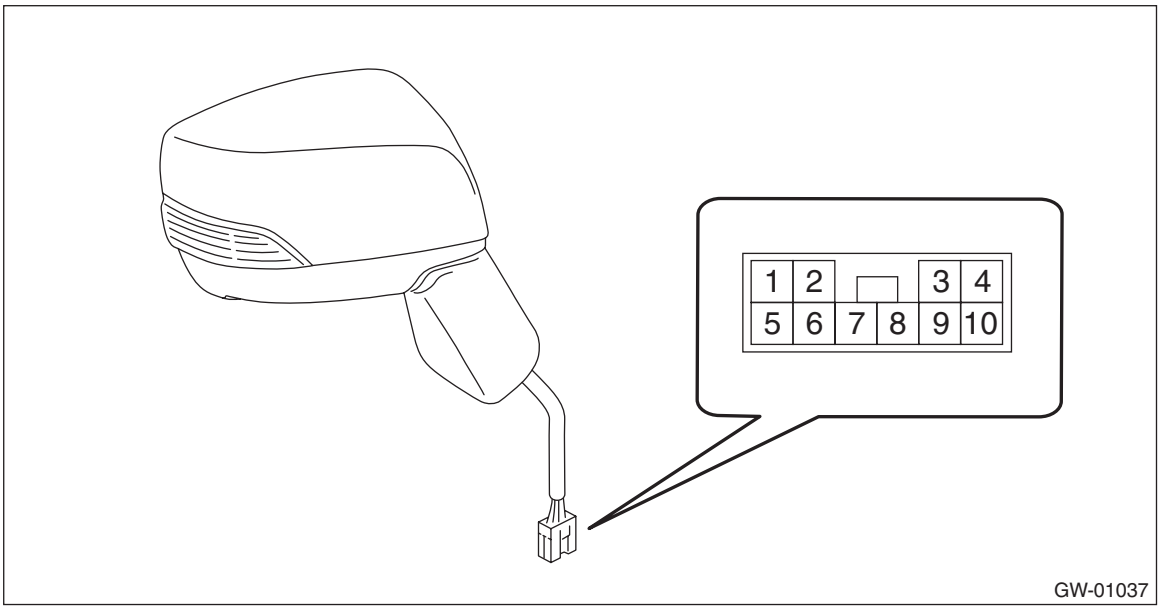
## B: INSTALLATION

Install each part in the reverse order of removal.

***Tightening torque:***
***Outer mirror assembly: 7.5 N·m (0.76 kgf-m, 5.5 ft-lb)***

## C: INSPECTION

1) Disconnect the outer mirror connector.
2) Apply battery voltage between the outer mirror connector terminals and check the mirror operation.



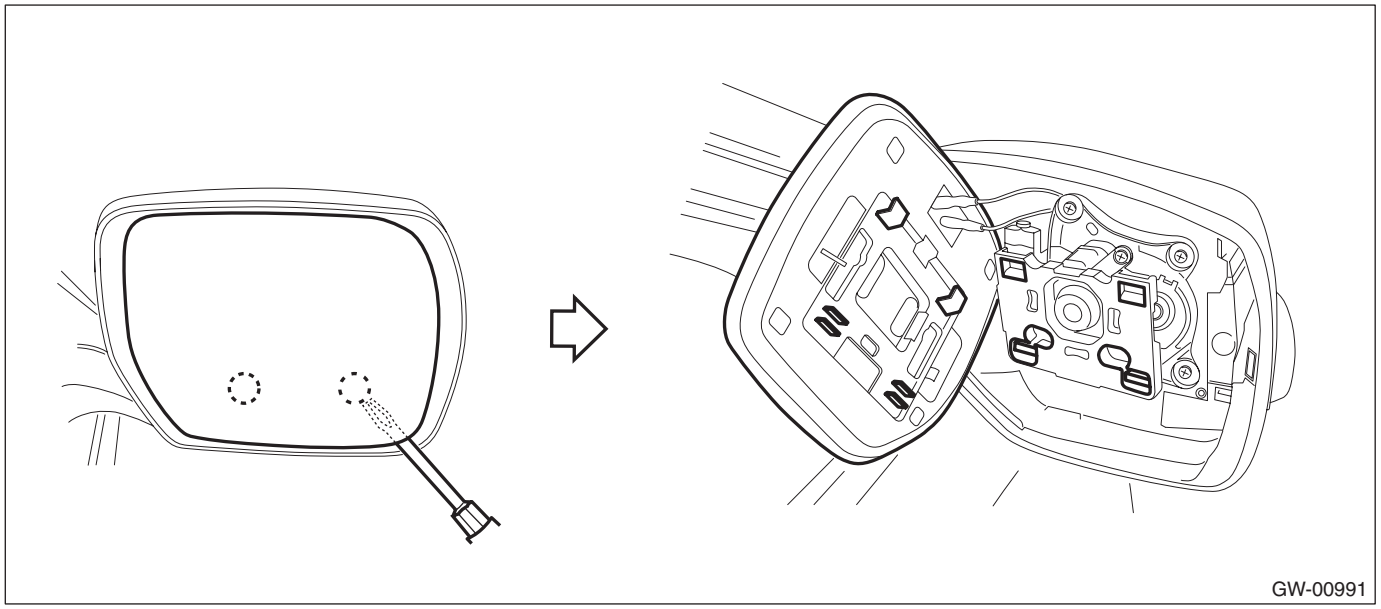
| Terminal No. | Inspection conditions | Switch position |
|---|---|---|
| — | — | OFF |
| 3 (+) — 8 (–) | Apply battery voltage between terminals. | UP |
| 8 (+) — 3 (–) | Apply battery voltage between terminals. | DOWN |
| 7 (+) — 3 (–) | Apply battery voltage between terminals. | LEFT |
| 3 (+) — 7 (–) | Apply battery voltage between terminals. | RIGHT |

3) If it does not operate normally, replace the outer mirror assembly.

# 10.Outer Mirror

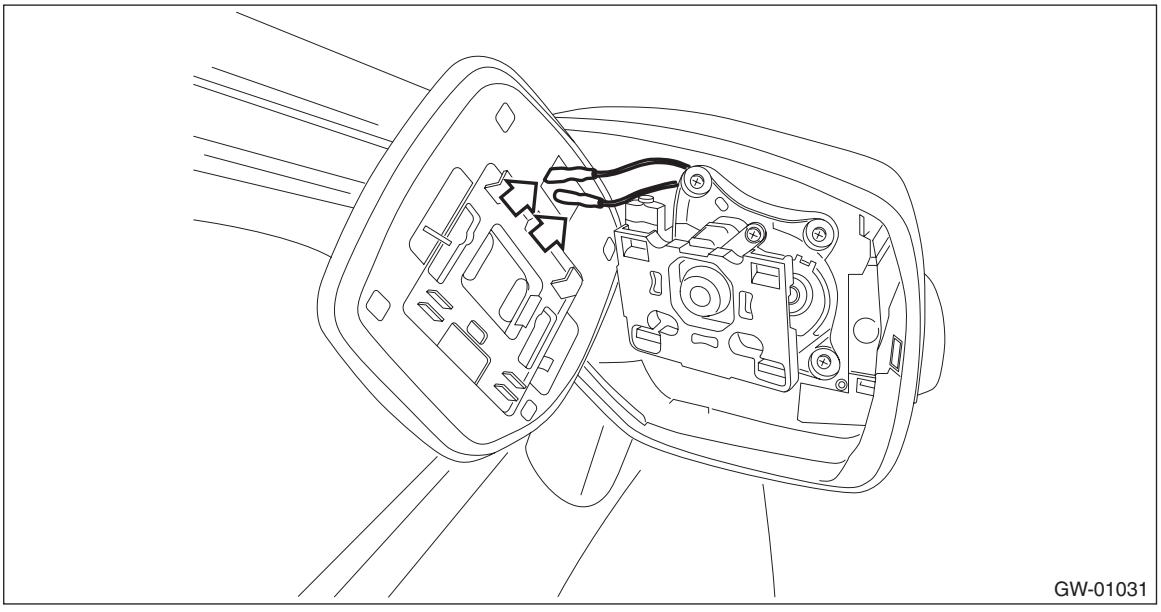
## A: REPLACEMENT

**CAUTION:**
**• When removing the mirror - repair, be careful not to damage the back surface of mirror - repair with a flat tip screwdriver.**
**• When installing the mirror - repair, insert the connector and clip securely.**
1) Operate the remote control mirror switch to face the mirror - repair upward.
2) Disconnect the ground cable from battery.
3) Remove the mirror - repair.
(1) Disconnect the clips using a flat tip screwdriver.



GW-00991

(2) Disconnect the mirror heater connector. (Model with mirror heater)



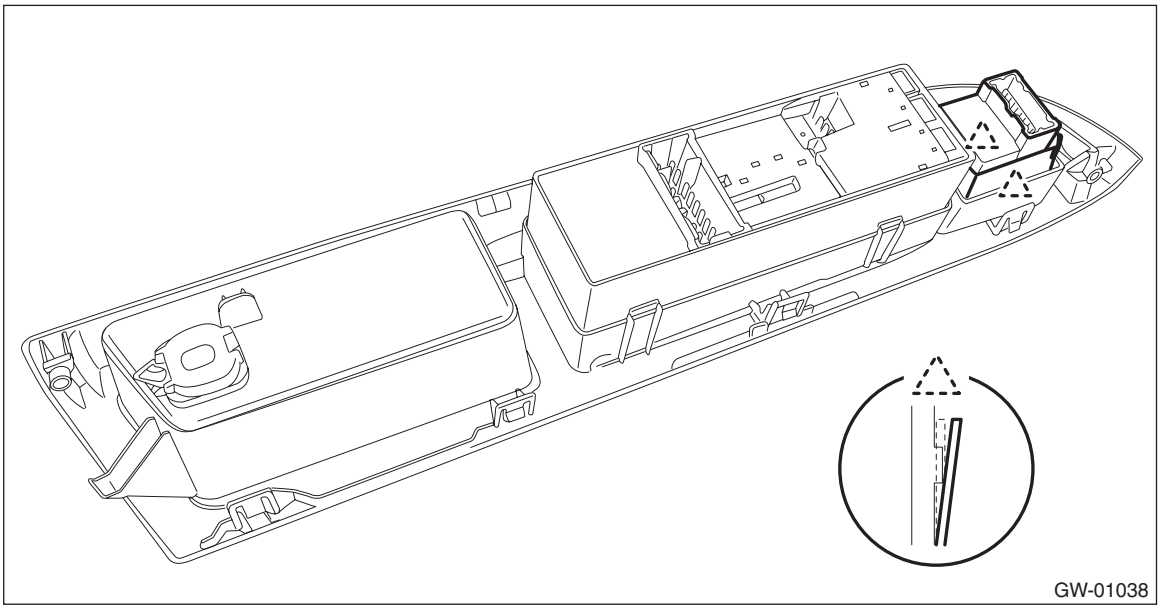
GW-01031

4) Install the mirror - repair in the reverse order of removal.

# 11.Remote Control Mirror Switch

## A: REMOVAL

1) Remove the panel - power window main switch. <Ref. to GW-12, MAIN SWITCH, REMOVAL, Power Window Control Switch.>
2) Release the claws, and then remove the switch - door mirror.



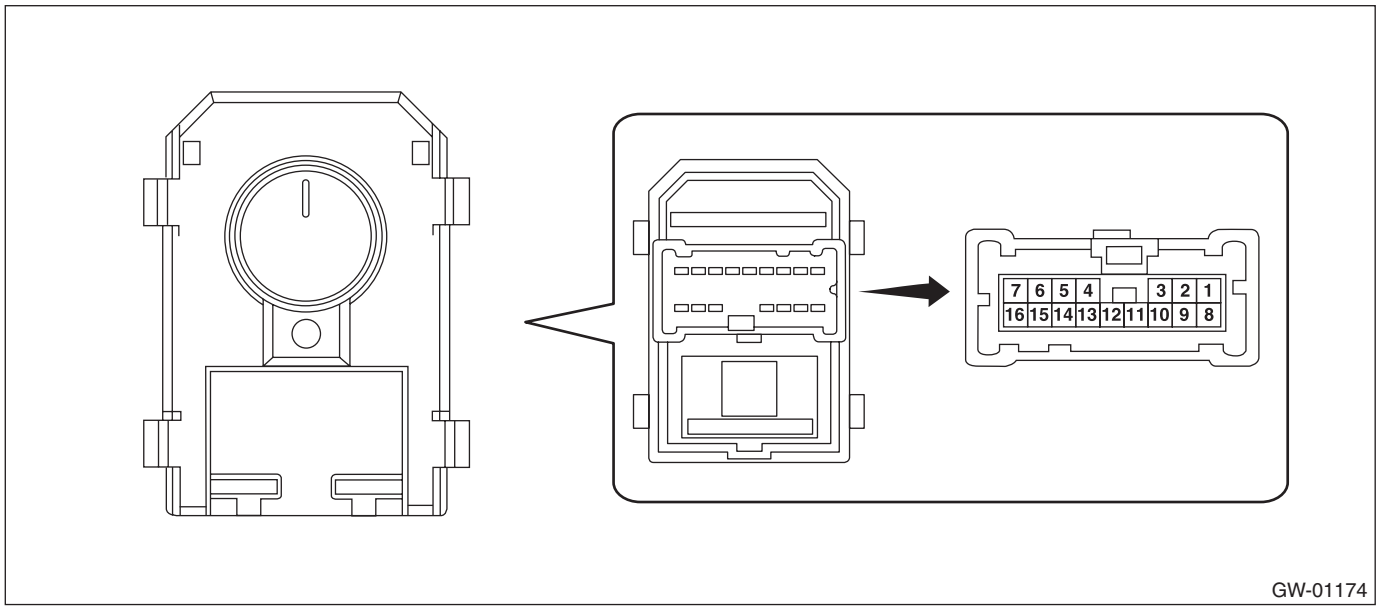
## B: INSTALLATION

Install each part in the reverse order of removal.

## C: INSPECTION

1) Disconnect the connector of the switch - door mirror.
2) Check the resistance between switch - door mirror terminals.

***Preparation tool:***
***Circuit tester***



- Changeover switch RH

| Terminal No. | Inspection conditions | Standard |
|---|---|---|
| — | OFF | 1 MΩ or more |
| 1 — 12<br>9 — 7 | UP | Less than 1 Ω |
| 1 — 9<br>12 — 7 | DOWN | Less than 1 Ω |
| 1 — 11<br>12 — 7 | LEFT | Less than 1 Ω |
| 1 — 12<br>11 — 7 | RIGHT | Less than 1 Ω |

- Changeover switch LH

| Terminal No. | Inspection conditions | Standard |
|---|---|---|
| — | OFF | 1 MΩ or more |
| 1 — 14<br>8 — 7 | UP | Less than 1 Ω |
| 1 — 8<br>14 — 7 | DOWN | Less than 1 Ω |
| 1 — 10<br>14 — 7 | LEFT | Less than 1 Ω |
| 1 — 14<br>10 — 7 | RIGHT | Less than 1 Ω |

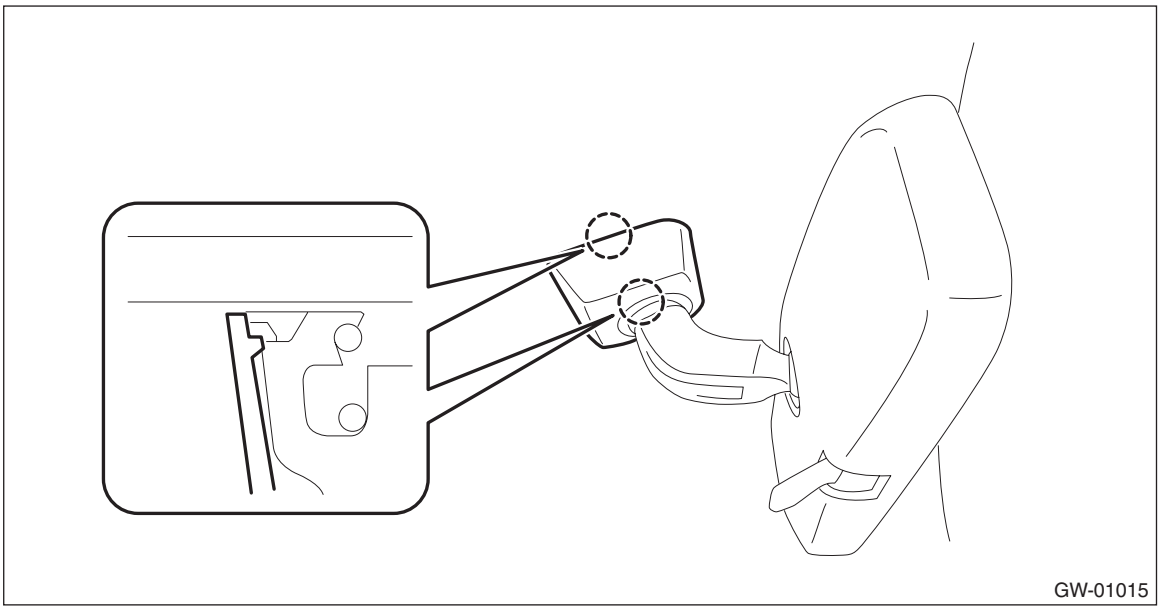
3) If the inspection result is not within the standard, replace the switch - door mirror.

# 12.Rearview Mirror

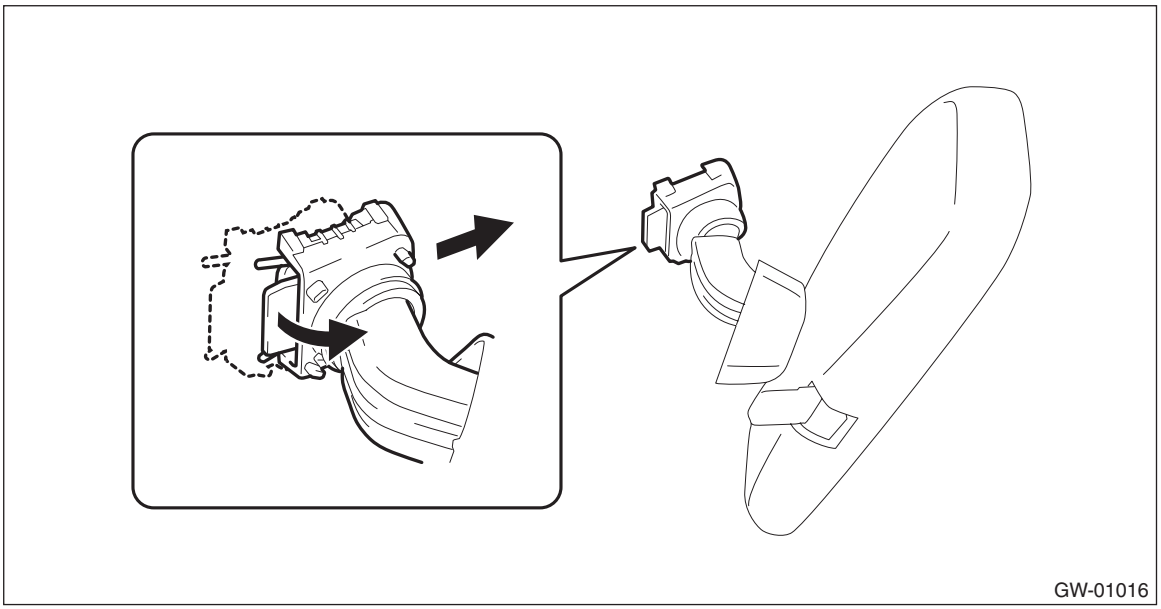
## A: REMOVAL

**CAUTION:**
**Be careful not to damage the mirror surface and the glass - front window.**

1) Release the claws, and then remove the cover.



2) Release the lock lever, and slide the mirror assembly - inner rearview to remove.



3) When the mirror mount is damaged, use something like piano wire or a spatula to remove.

## B: INSTALLATION

Install each part in the reverse order of removal.

NOTE:
If the mirror mount is removed, it is attached according to the following procedures.
1. Clean the old adhesive completely.
2. Attach the mirror mount by matching with the mark on the glass - front window.
3. Make sure that the mirror mount is firmly adhered.

***Adhesive:***
***REPAIR KIT IN MR (Part No. 65029FC000) or equivalent***

## C: INSPECTION

Check the mirror and mirror mount for damage.

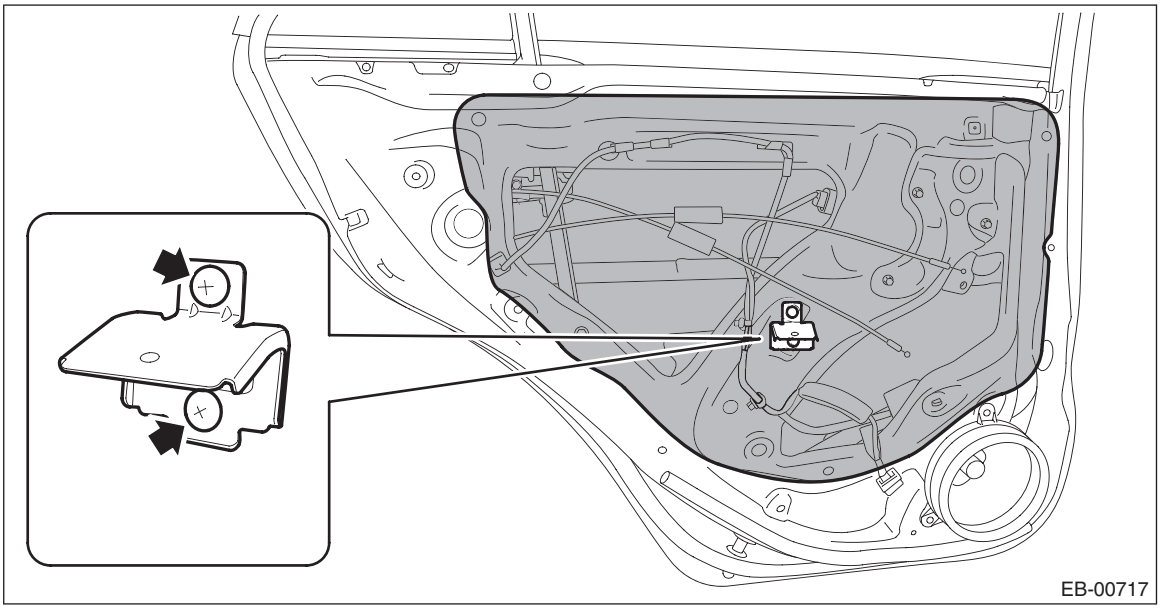
# 13.Rear Door Glass

## A: REMOVAL

1) Remove the trim panel - rear door. <Ref. to EI-62, REAR DOOR, REMOVAL, Door Trim.>
2) Remove the sealing cover - rear door.

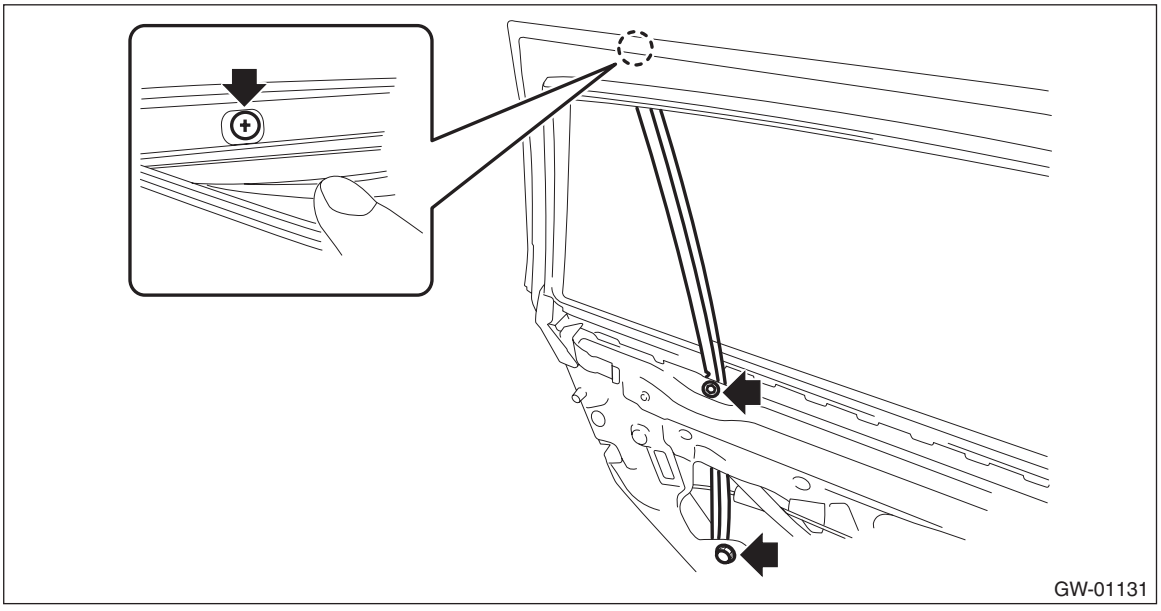
**CAUTION:**
- **Carefully remove the butyl tape. Excessive force will easily break the sealing cover - rear door.**
- **If the sealing cover - rear door gets broken, replace it with a new part.**

(1) Remove the screw to remove the bracket - door trim rear.
(2) Carefully remove the butyl tape to remove the sealing cover - rear door.



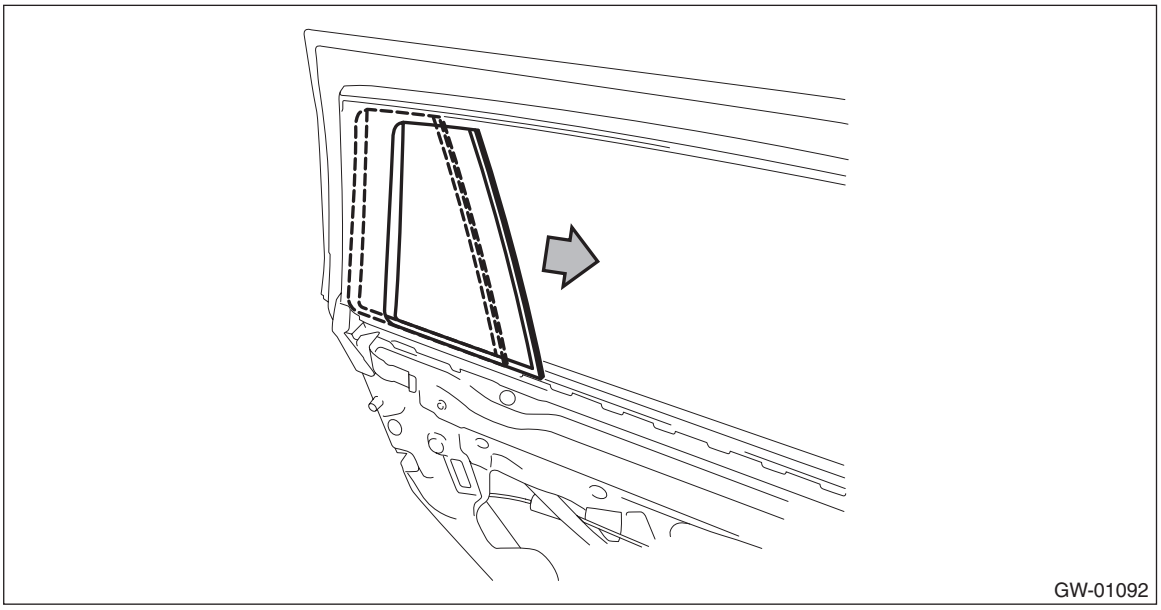
EB-00717

3) Attach the battery ground cable and the switch - power window, and turn the ignition to ON.
4) Remove the glass assembly - rear door.
(1) Operate the switch - power window sub rear to move the glass assembly - rear door to the lowest position.
(2) Remove the screws and bolts, and then remove the sash COMPL - rear partition.



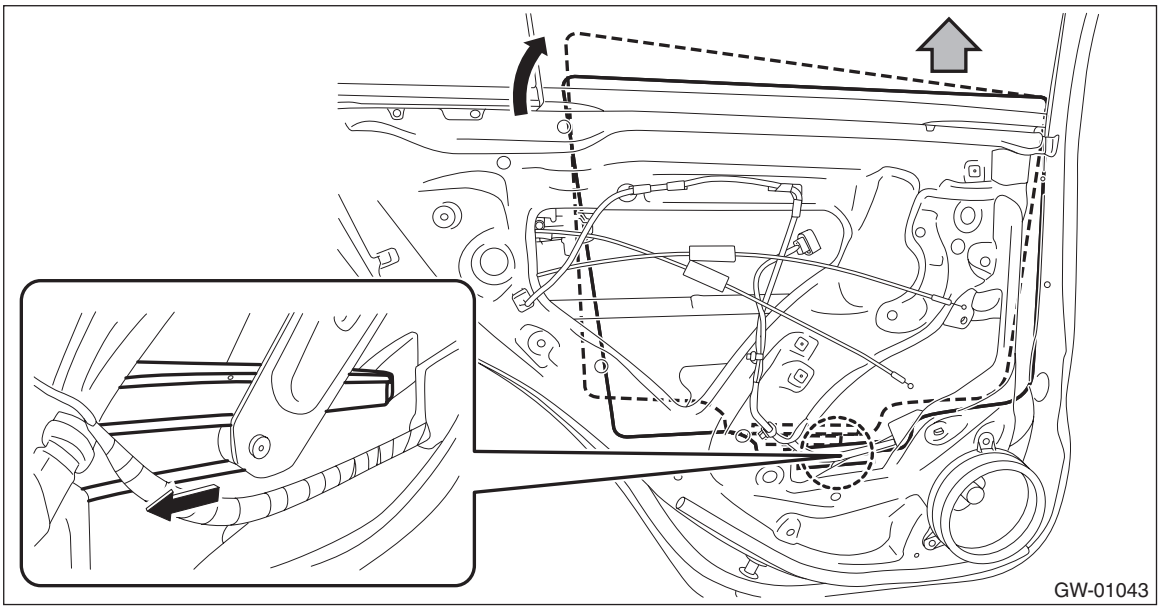
GW-01131

(3) Remove the glass - rear door partition.



(4) While tilting the glass assembly - rear door, remove the guide from the roller of the regulator and motor assembly - rear, then remove the glass assembly - rear door.

**CAUTION:**
**Avoid impact and damage to the glass assembly - rear door.**



## B: INSTALLATION

**CAUTION:**
**Check that the running channel - rear door is securely fixed to the panel assembly - rear door and to the sash COMPL - rear partition.**
Install each part in the reverse order of removal.

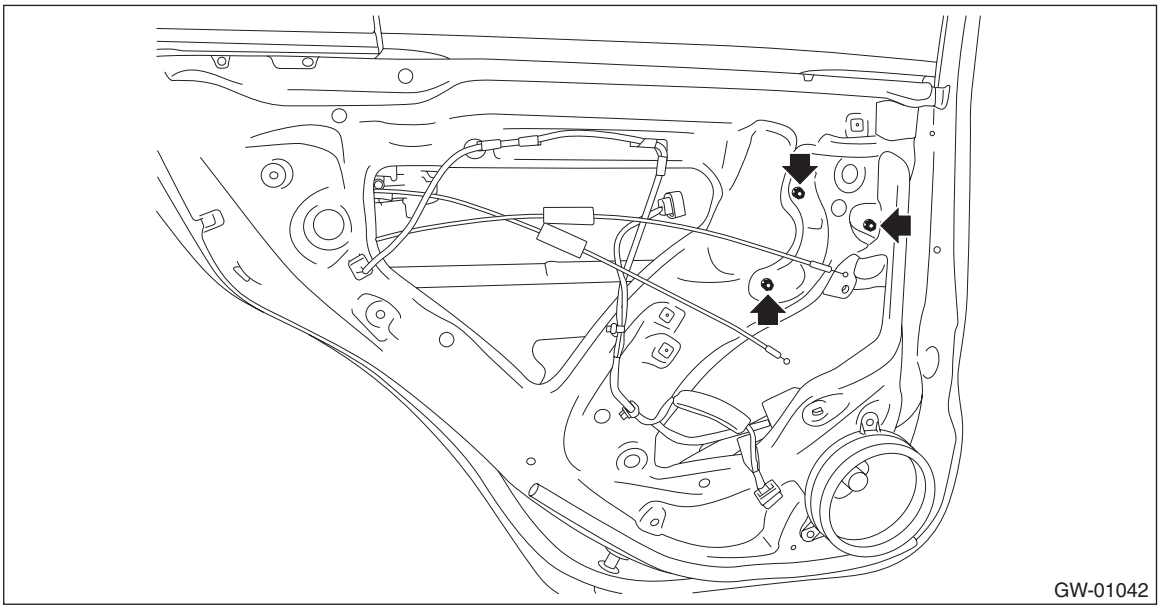
***Tightening torque:***
***Refer to "COMPONENT" of "General Description". <Ref. to GW-3, REAR DOOR GLASS, COMPONENT, General Description.>***

# 14.Rear Regulator and Motor Assembly

## A: REMOVAL

1) Remove the glass assembly - rear door. <Ref. to GW-34, REMOVAL, Rear Door Glass.>
2) Remove the rear regulator and motor assembly.
   (1) Disconnect the motor - rear connector.

   (2) Remove the bolts, and then remove the rear regulator and motor assembly.



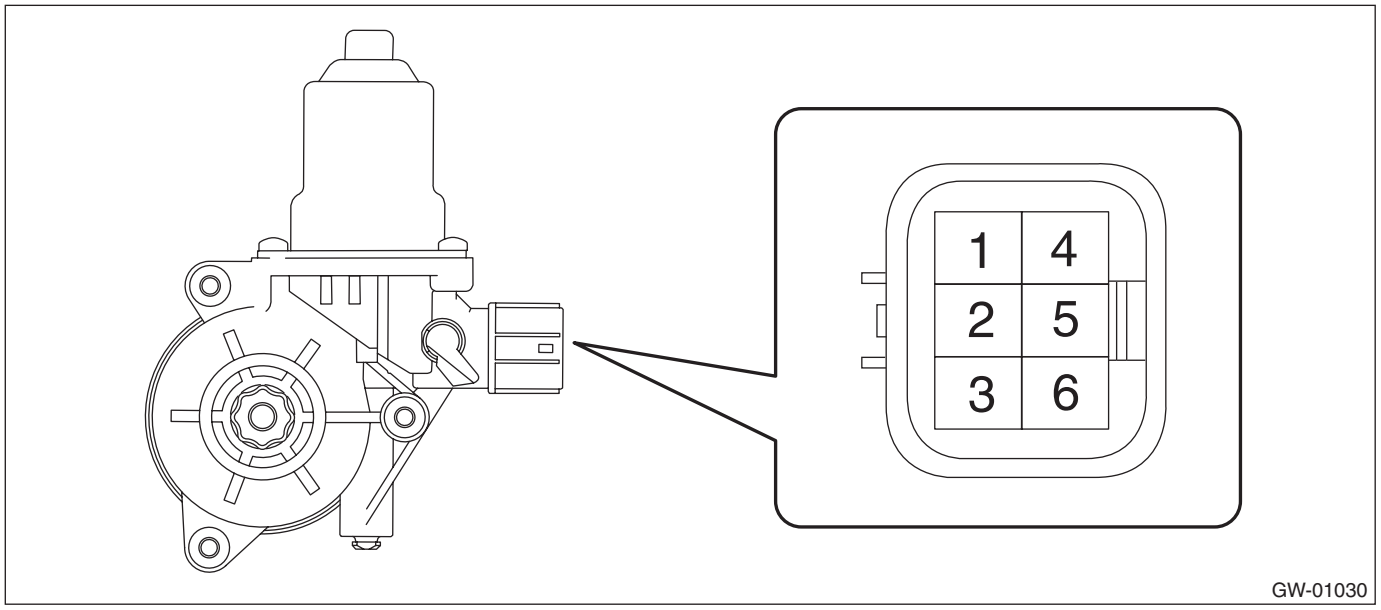
## B: INSTALLATION

Install each part in the reverse order of removal.

***Tightening torque:***
***Refer to "COMPONENT" of "General Description". <Ref. to GW-3, REAR DOOR GLASS, COMPONENT, General Description.>***

## C: INSPECTION

1) Disconnect the connector of the motor - rear.
2) Check the motor operation when battery voltage is applied between terminals of the motor - rear connector.



- LH side

| Terminal No. | Inspection conditions | Standard |
|---|---|---|
| 4 (+) — 1(–) | Apply battery voltage between terminals. | Increase |
| 1 (+) — 4(–) | Apply battery voltage between terminals. | Decrease |

- RH side

| Terminal No. | Inspection conditions | Standard |
|---|---|---|
| 3 (+) — 6(–) | Apply battery voltage between terminals. | Increase |
| 6 (+) — 3(–) | Apply battery voltage between terminals. | Decrease |

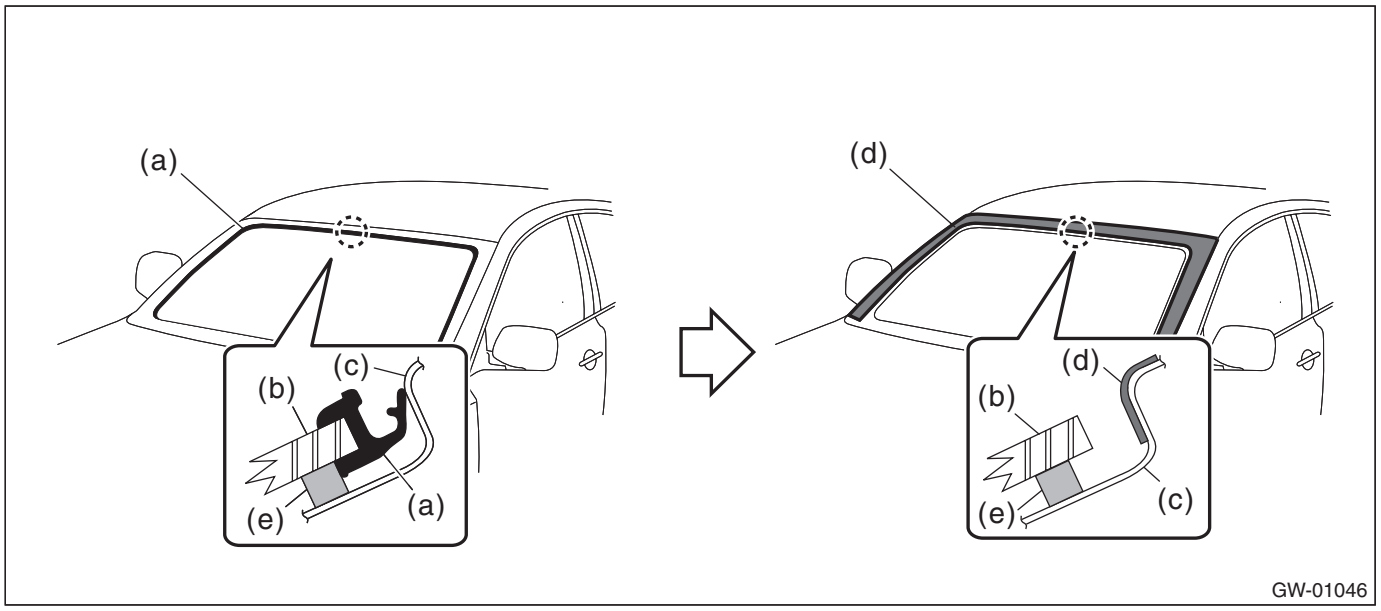
3) If it does not operate properly as a result of inspection, replace the regulator and motor assembly - rear.

# 15.Windshield Glass

## A: REMOVAL

### 1. USING WINDSHIELD GLASS KNIFE

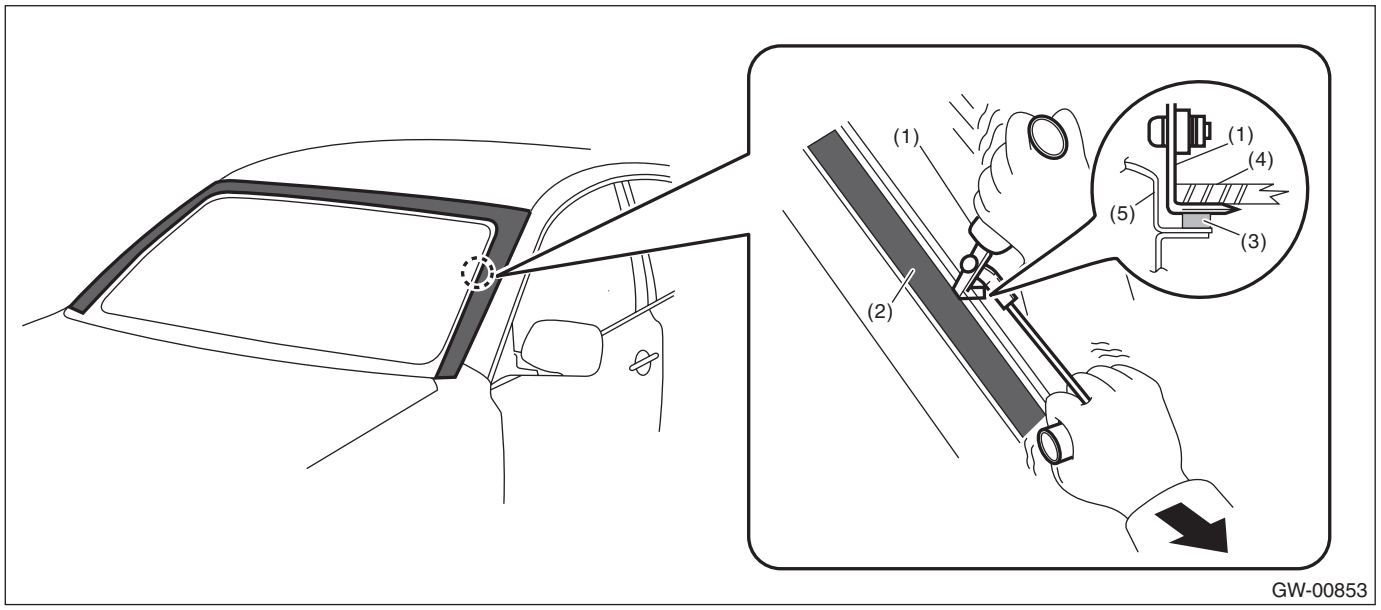
1) Disconnect the ground cable from battery. (Models with wiper deicer)
2) Remove the trim panel - front pillar UPR. <Ref. to EI-100, REMOVAL, Upper Inner Trim.>
3) Remove the cowl panel assembly. <Ref. to EI-53, REMOVAL, Cowl Panel.>
4) Disconnect the wiper deicer connector. (Models with wiper deicer)
5) Remove the molding - front window from the glass - front window, and attach protective tape on the body side of the circumference of the glass - front window.



(a) Molding - front window
(b) Glass - front window
(c) Body panel
(d) Protective tape
(e) Adhesive

6) Remove the glass - front window.
(1) Apply sufficient amount of soapy water to the adhesive part and insert the windshield glass knife.
(2) While holding the edges of the knife and the glass - front window at a right angle, move the windshield glass knife parallel to the edge of the glass - front window, and cut the adhesive along the surface and the edge of the glass - front window.

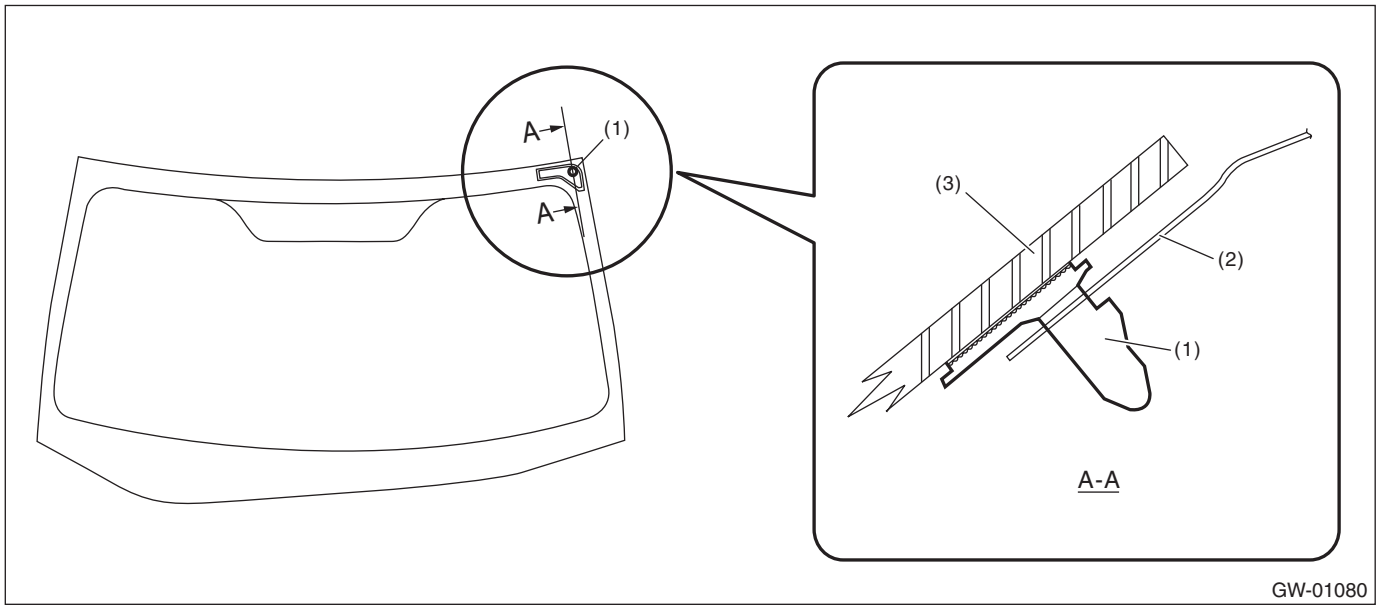
**CAUTION:**
**• Cutting of adhesive part should be started from an area with wider gap between the glass - front window and the body.**
**• Never twist the windshield glass knife.**



(1) Windshield glass knife
(2) Protective tape
(3) Adhesive
(4) Glass - front window
(5) Body panel

(3) Disconnect the locating pin - front window, and remove the glass - front window.

NOTE:
The locating pin - front window are bonded to the corners of the glass - front window. Use piano wire to disconnect the pins.

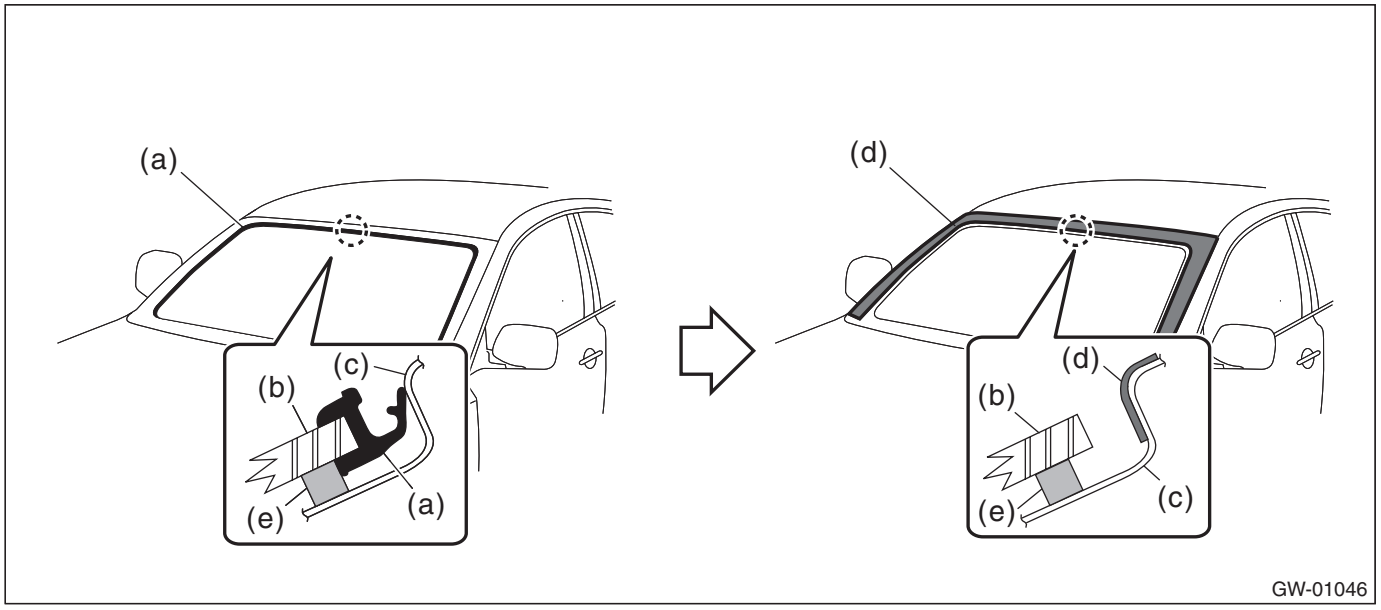


(1) Locating pin - front window
(2) Body panel
(3) Glass - front window

## 2. USING PIANO WIRE

**CAUTION:**
- **Do not tightly pull the piano wire against the glass - front window edge.**
- **Apply protective tape, etc, and be careful that the inner and outer components of the vehicle are not damaged.**
- **Do not cross piano wires. Otherwise they may be cut.**

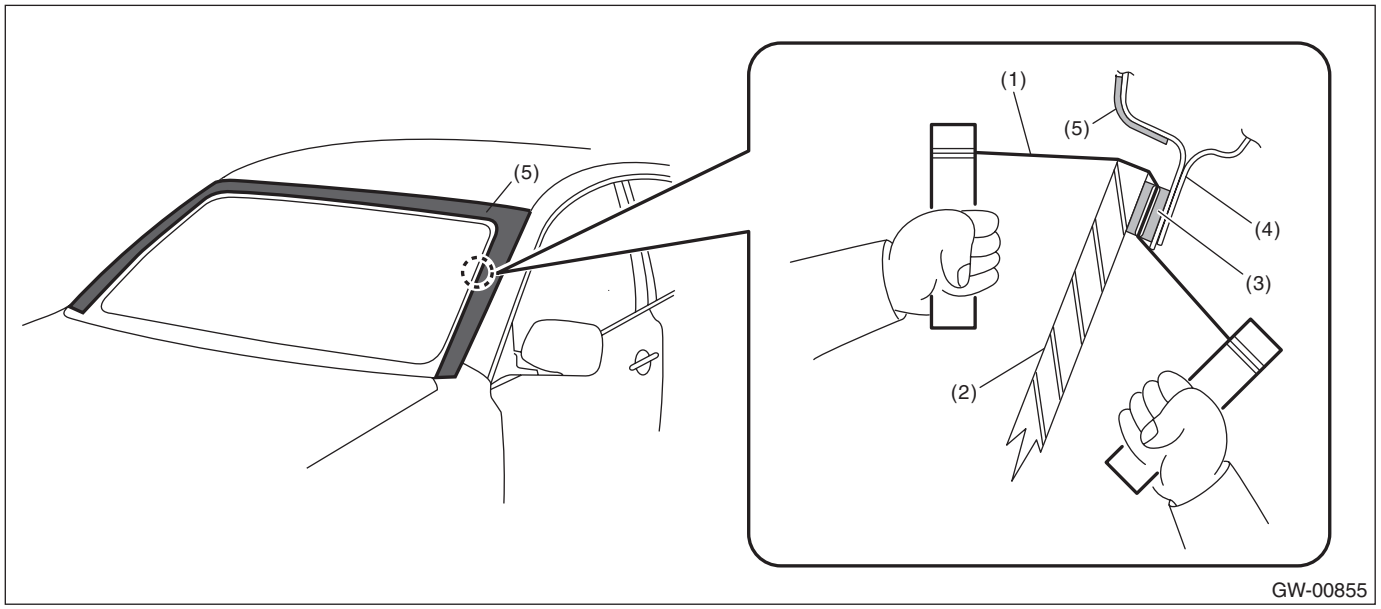
1) Disconnect the ground cable from battery. (Models with wiper deicer)
2) Remove the trim panel - front pillar UPR. <Ref. to EI-100, REMOVAL, Upper Inner Trim.>
3) Remove the cowl panel assembly. <Ref. to EI-53, REMOVAL, Cowl Panel.>
4) Disconnect the wiper deicer connector. (Models with wiper deicer)
5) Remove the molding - front window from the glass - front window, and attach protective tape on the body side of the circumference of the glass - front window.



(a) Molding - front window
(b) Glass - front window
(c) Body panel
(d) Protective tape
(e) Adhesive

6) Remove the glass - front window.
   (1) Using a drill, make a hole in the adhesive part.
   (2) Pass the piano wire through the hole, and pull the wire ends alternately to cut off the adhesive part and the locating pin - front window.

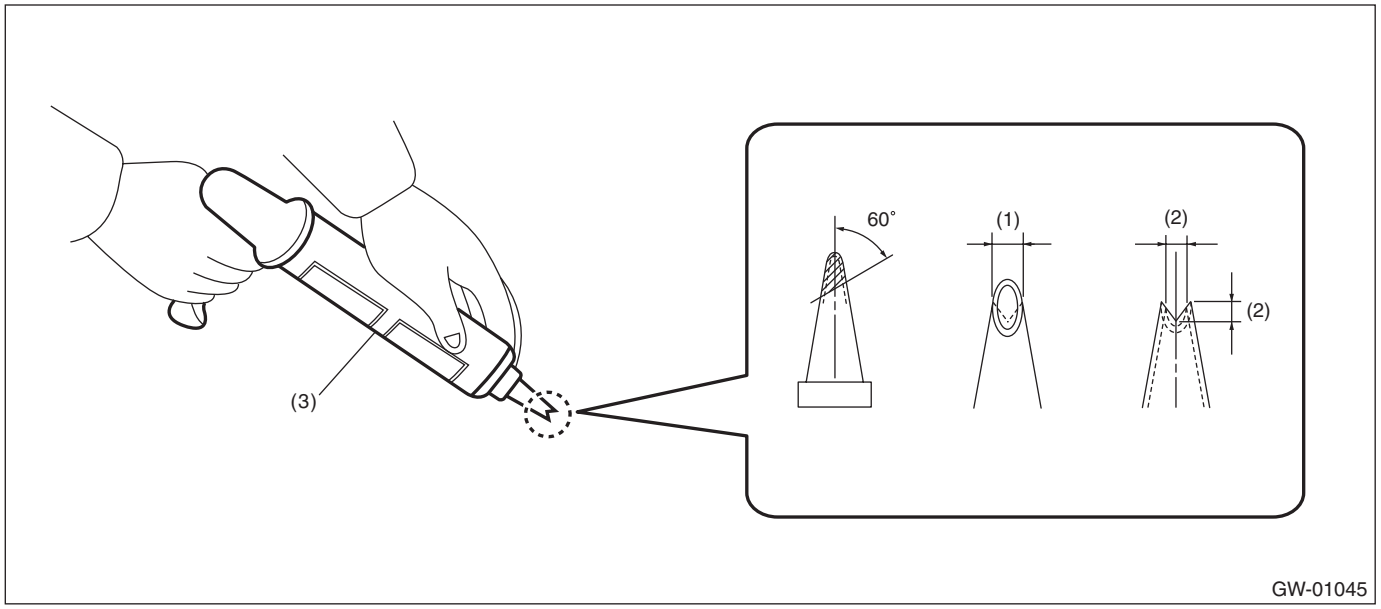
**CAUTION:**
**Attach a piece of wood to both piano wire ends.**



(1) Piano wire
(2) Glass - front window
(3) Adhesive
(4) Body panel
(5) Protective tape

## B: INSTALLATION

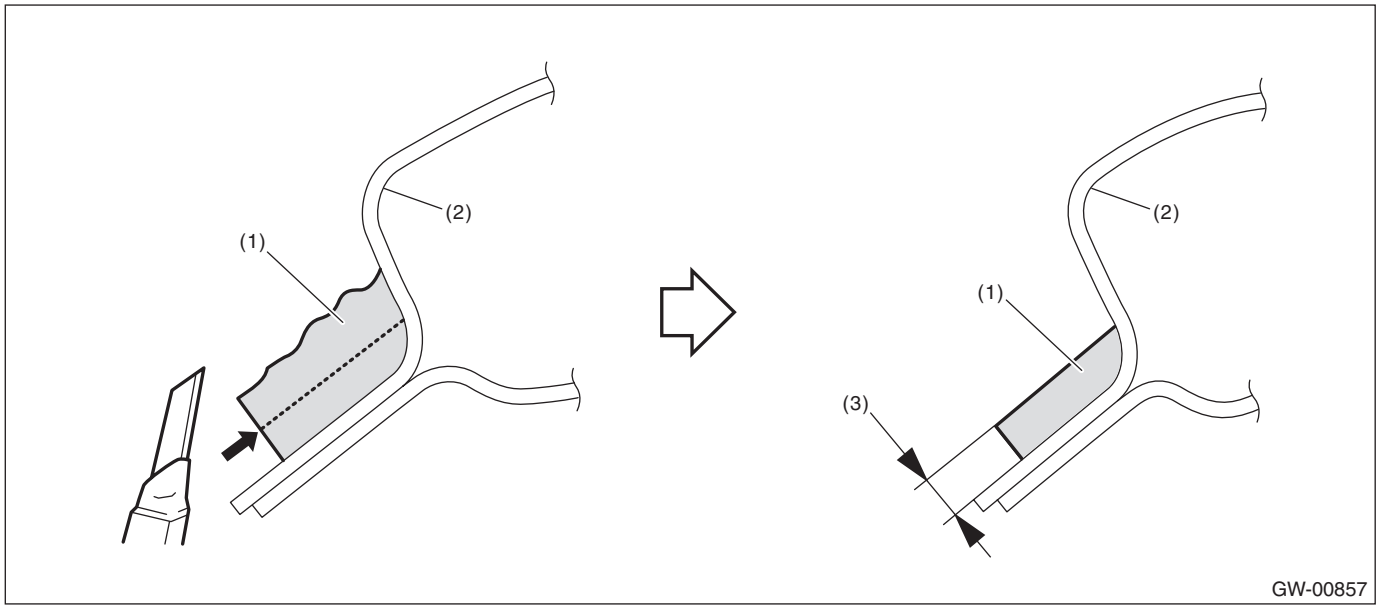
1) Fabricate the cartridge nozzle tip as shown and set the sealant gun with the adhesive.



(1) 10 mm (0.39 in) (2) 8 mm (0.31 in) (3) Sealant gun

2) Remove the adhesive layer on the body using cutter knife to obtain smooth face of 2 mm (0.08 in) thick.

**CAUTION:**
- **Be careful not to damage the body and paint surface.**
- **Be sure to keep some of old adhesive.**

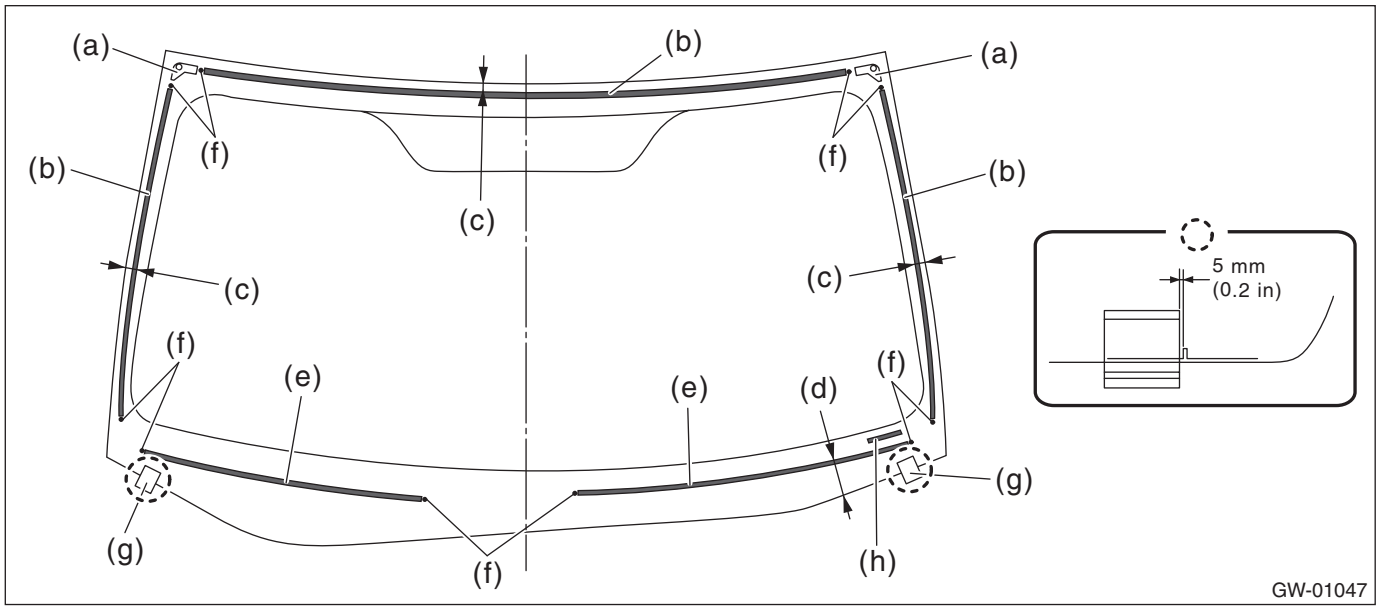


(1) Adhesive (2) Body panel (3) 2 mm (0.08 in)

3) Clean the glass - front window and the body with alcohol or white gasoline to completely eliminate cutting powder, dust and dirt.

4) Attach the dam rubber - front to the glass - front window.

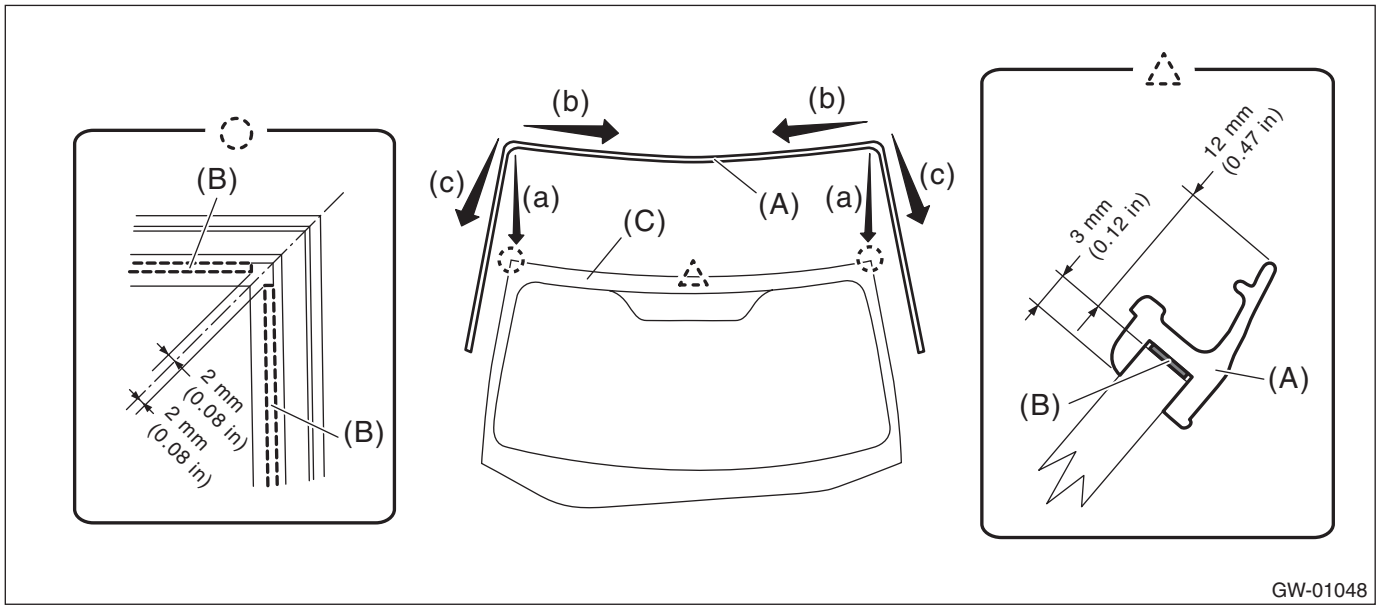
NOTE:
Adhere the dam rubber along with the ceramic print.



| | | | | | |
|---|---|---|---|---|---|
| (a) | Locating pin - front window | (d) | 14.1 mm (0.56 in) | (g) | Seal - lower |
| (b) | Dam rubber - front upper | (e) | Dam rubber - front lower | (h) | Seal - lower VIN |
| (c) | 16 mm (0.63 in) | (f) | Ceramic print | | |

5) Attach the molding - front window to the glass - front window.

**CAUTION:**
**Be careful to attach the molding - front window so that the molding has no loose or undulating part.**



(1) Align the molding - front window (A) to the upper ends (a) of the glass - front window (C).
(2) Install the molding - front window from both corners of the upper edge toward the center (b).
(3) Install the molding - front window from both corners of the upper edge toward the lower side (c).
(4) Firmly apply the double sided tape (B) of the molding - front window evenly to the surface of the glass - front window.

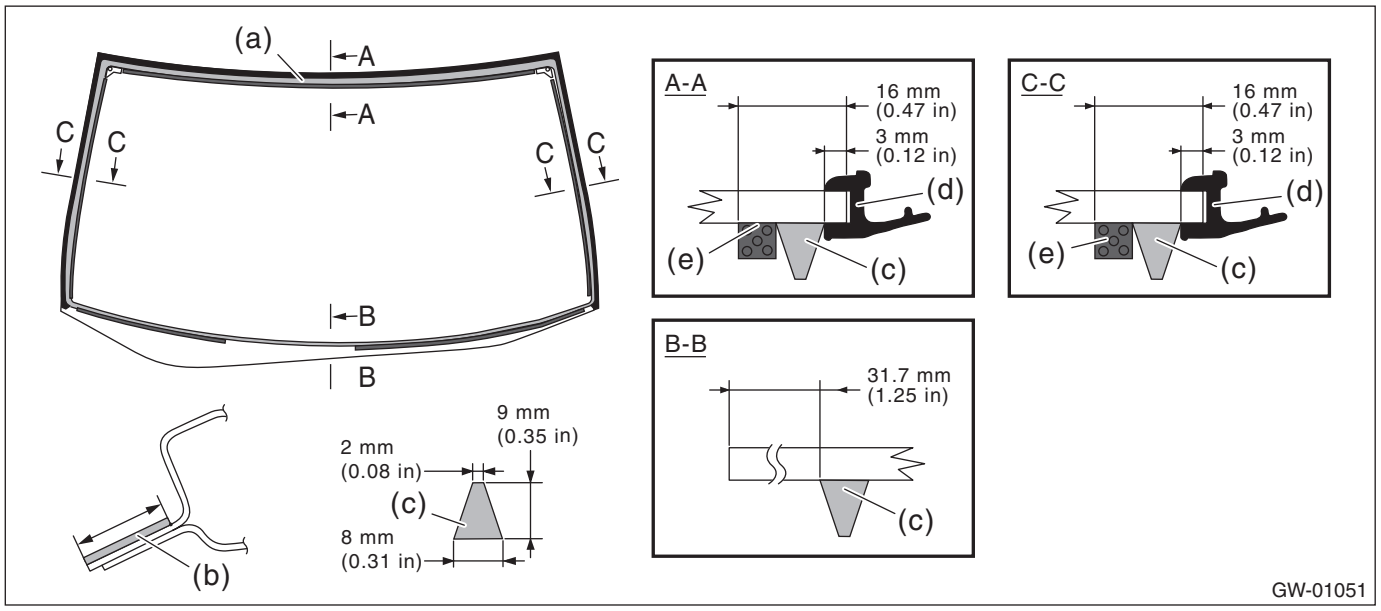
6) Install the glass - front window.
(1) Apply the primer to the adhesive surface of glass - front window side and body side using sponge.

***Glass primer:***
***Dow Automotive's***
***ESSEX U-401, U-402 or equivalent***

***Painted surface primer:***
***Dow Automotive's***
***ESSEX U-413 or equivalent***

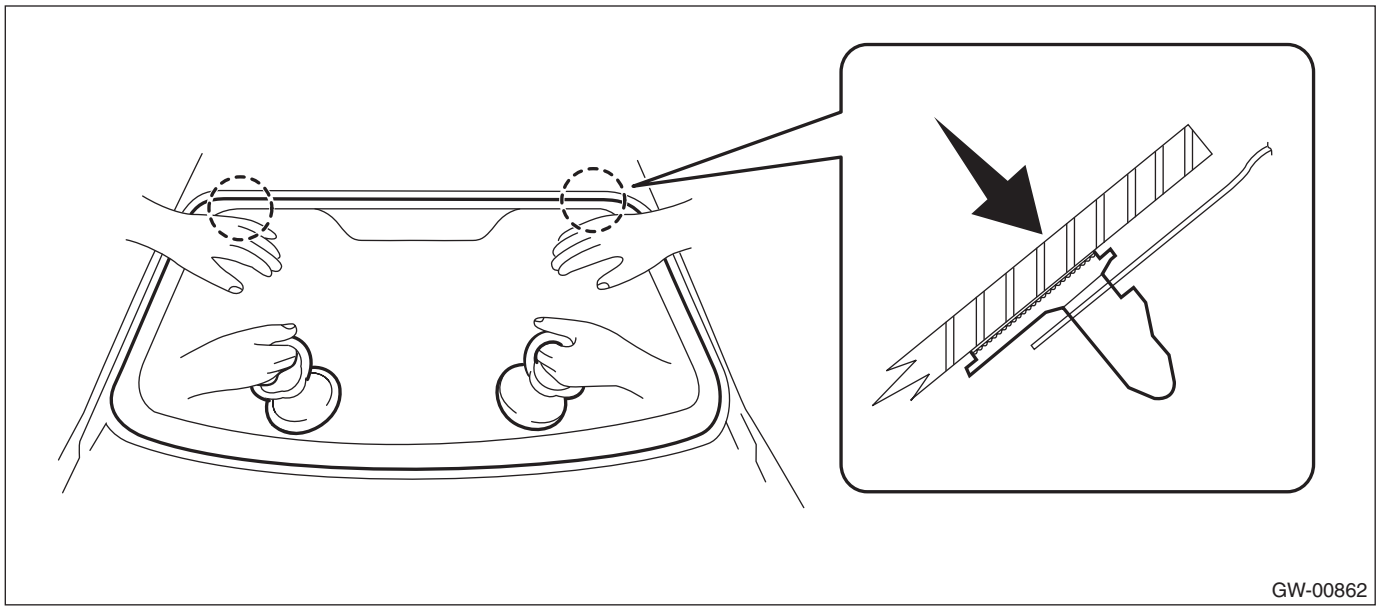
NOTE:
• Primer once attached to the painted surface of the body and internal trim is hard to wipe off. Mask the circumference of such area.
• Let primer dry for about ten minutes before installing the glass - front window.
• Do not touch the surface coated with primer.
(2) Apply adhesive to the end back surface of the glass - front window.

***Adhesive:***
***Dow Automotive's***
***ESSEX U-400HV or equivalent***



(a) Application of primer (glass side)
(b) Application of primer (body side)
(c) Adhesive
(d) Molding - front window
(e) Dam rubber - front

(3) Fit the locating pins - front window to the vehicle body using suction rubber cups to install the windshield glass.



(4) Lightly press the entire perimeter of the glass - front window for tight fit.
(5) Make flush the adhesive surface jutted out using spatula.

7) After completion of all work, allow the vehicle to stand for about 24 hours.

NOTE:
• When opening/closing the door after the glass - front window was bonded, always lower the glass assembly - door first, and then open/close it carefully.
• Move the vehicle slowly.
• For minimum drying time and vehicle standing time before driving after bonding, follow instructions or instruction manual from the adhesive manufacturer.

8) Connect the wiper deicer connector. (Models with wiper deicer)
9) Install the cowl panel assembly. <Ref. to EI-54, INSTALLATION, Cowl Panel.>
10) Install the trim panel - front pillar UPR. <Ref. to EI-104, INSTALLATION, Upper Inner Trim.>
11) Connect the battery ground terminal. (Models with wiper deicer)
12) After curing of adhesive, pour the water on external surface of vehicle to check that there are no water leaks.

NOTE:
When a vehicle is returned to the user, tell him or her that the vehicle should not be subjected to heavy impact for at least three days.

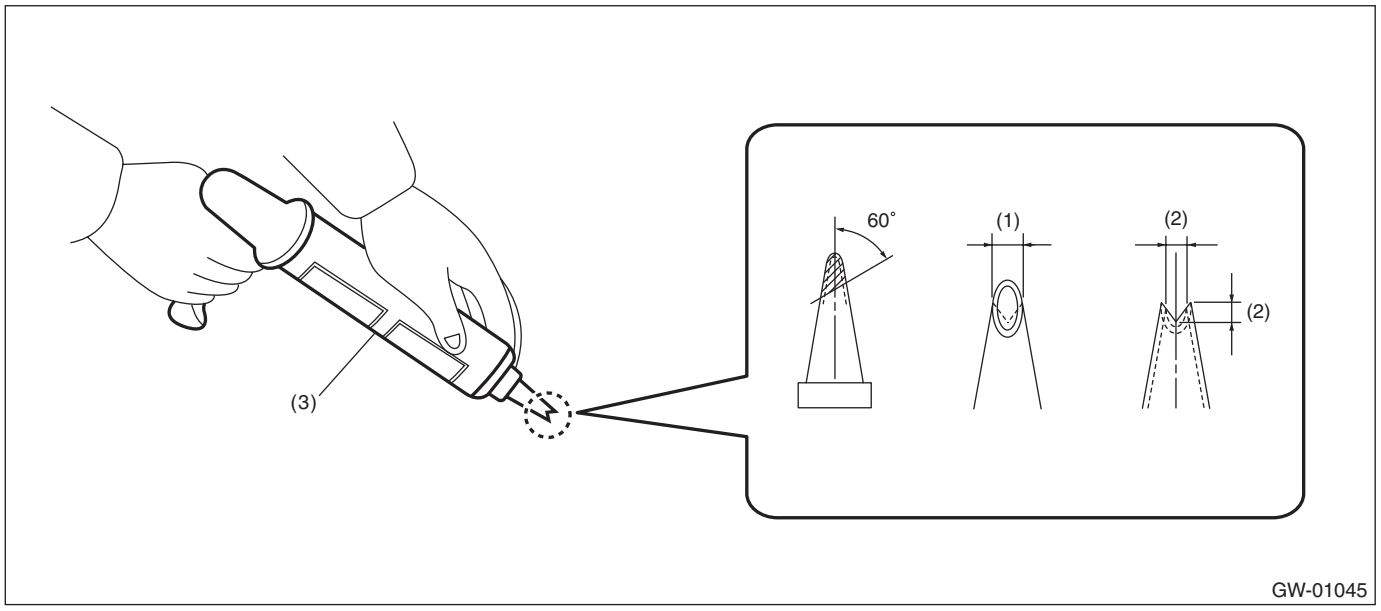
# 16.Rear Window Glass

## A: REMOVAL

1) Disconnect the ground cable from battery.
2) Disconnect the rear defogger connector.
3) Remove the glass - rear window in the same procedure as for the glass - front window. <Ref. to GW-38, REMOVAL, Windshield Glass.>

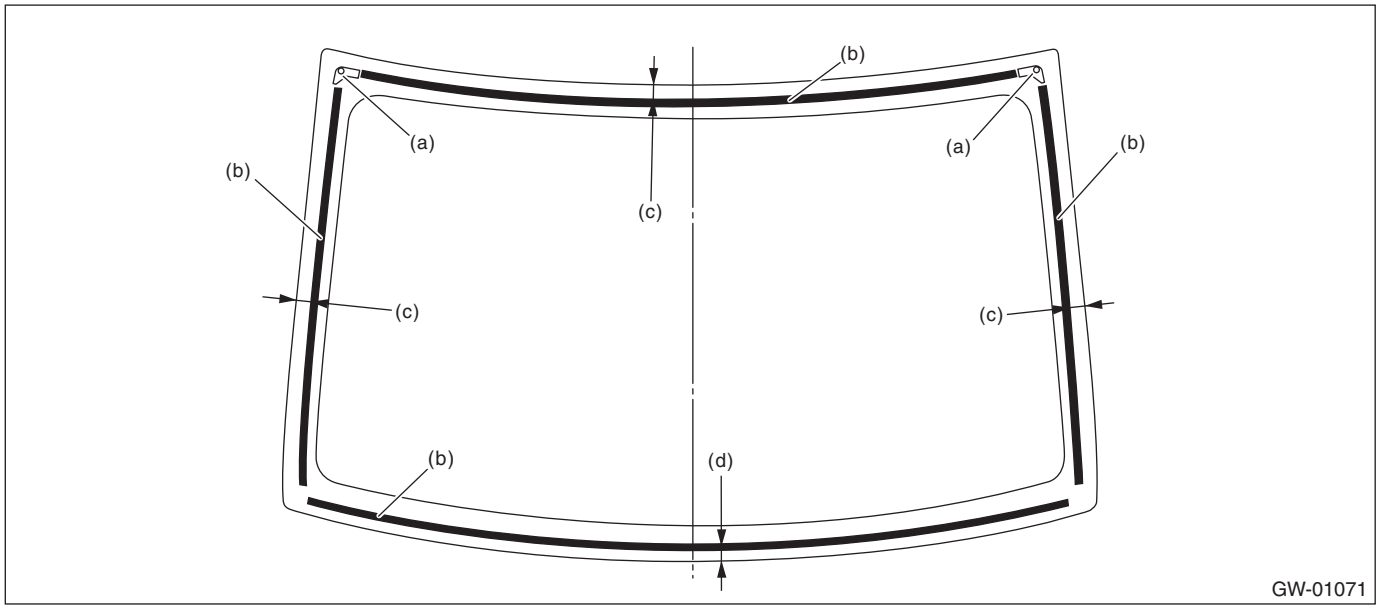
## B: INSTALLATION

1) Fabricate the cartridge nozzle tip as shown and set the sealant gun with the adhesive.



(1) 10 mm (0.39 in) (2) 8 mm (0.31 in) (3) Sealant gun

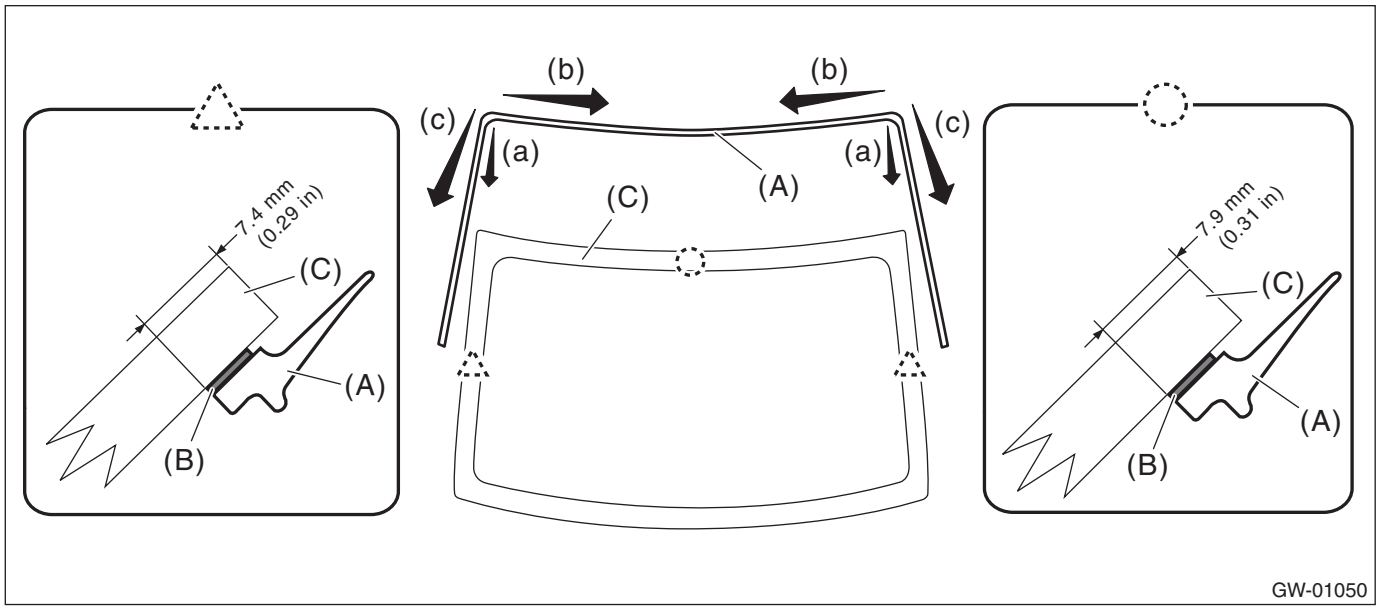
2) Smoothen and clean the adhesive surfaces of the glass - rear window and body using the same procedures as for the glass - front window. <Ref. to GW-42, INSTALLATION, Windshield Glass.>
3) Attach the dam rubber - rear to the glass - rear window.



(a) Locating pin - rear window (c) 20.9 mm (0.82 in) (d) 10.7 mm (0.42 in)
(b) Dam rubber - rear

4) Attach the molding - rear window to the glass - rear window.

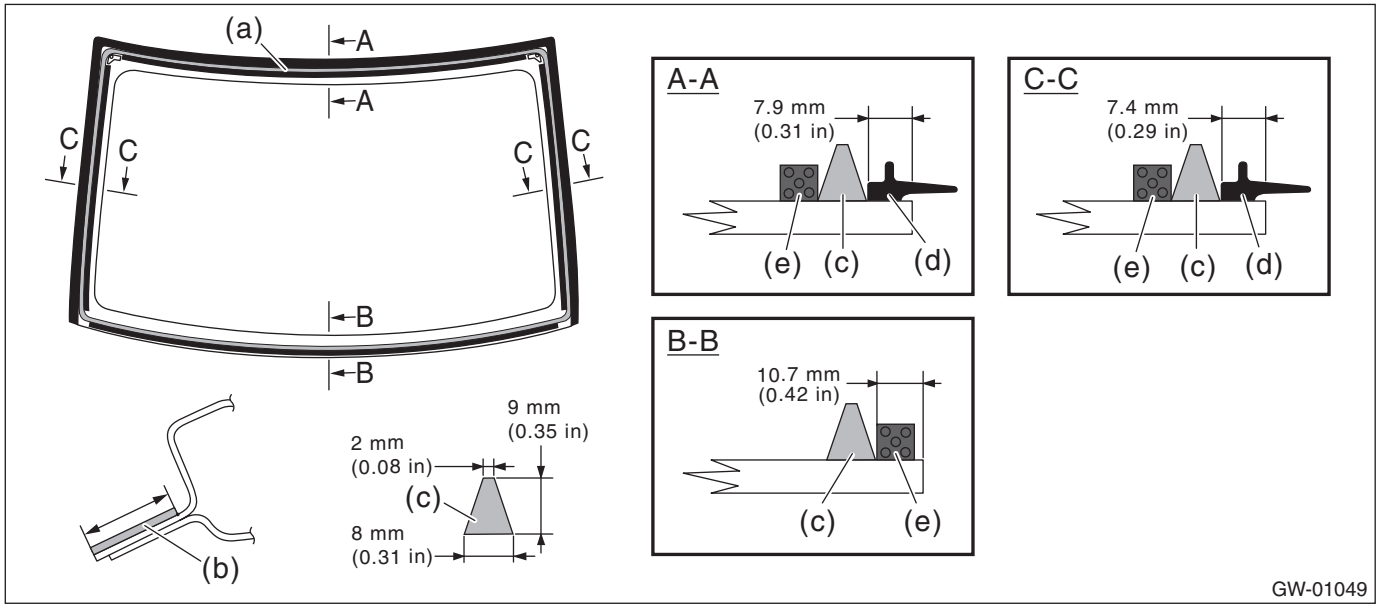
**CAUTION:**
**Be careful to attach the molding - rear window so that the molding has no loose or undulating part.**



(1) Align the molding - rear window (A) to the upper ends (a) of the glass - rear window (C).
(2) Install the molding - rear window from both corners of the upper edge toward the center (b).
(3) Install the molding - rear window from both corners of the upper edge toward the lower side (c).
(4) Firmly apply the double sided tape (B) of the molding - rear window evenly to the surface of the glass - rear window.

5) Install the glass - rear window in the same procedure as for the glass - front window. <Ref. to GW-42, INSTALLATION, Windshield Glass.>

(1) Apply the primer to the adhesive surface of glass - rear window side and body side using sponge.
(2) Apply adhesive to the end back surface of the glass - rear window.



(a) Application of primer (glass side)
(b) Application of primer (body side)
(c) Adhesive
(d) Molding - rear window
(e) Dam rubber - rear

(3) Insert the locating pins - rear window into the rear panel holes, and install the glass - rear window.
(4) Lightly press the entire perimeter of the glass - rear window for tight fit.

(5) Make flush the adhesive surface jutted out using spatula.

6) After completion of all work, allow the vehicle to stand for about 24 hours.

NOTE:

- When opening/closing the door after the glass - rear window was bonded, always lower the glass assembly - door first, and then open/close it carefully.
- Move the vehicle slowly.
- For minimum drying time and vehicle standing time before driving after bonding, follow instructions or instruction manual from the adhesive manufacturer.

7) Connect the rear defogger connector.

8) After curing of adhesive, pour the water on external surface of vehicle to check that there are no water leaks.

NOTE:

When a vehicle is returned to the user, tell him or her that the vehicle should not be subjected to heavy impact for at least three days.

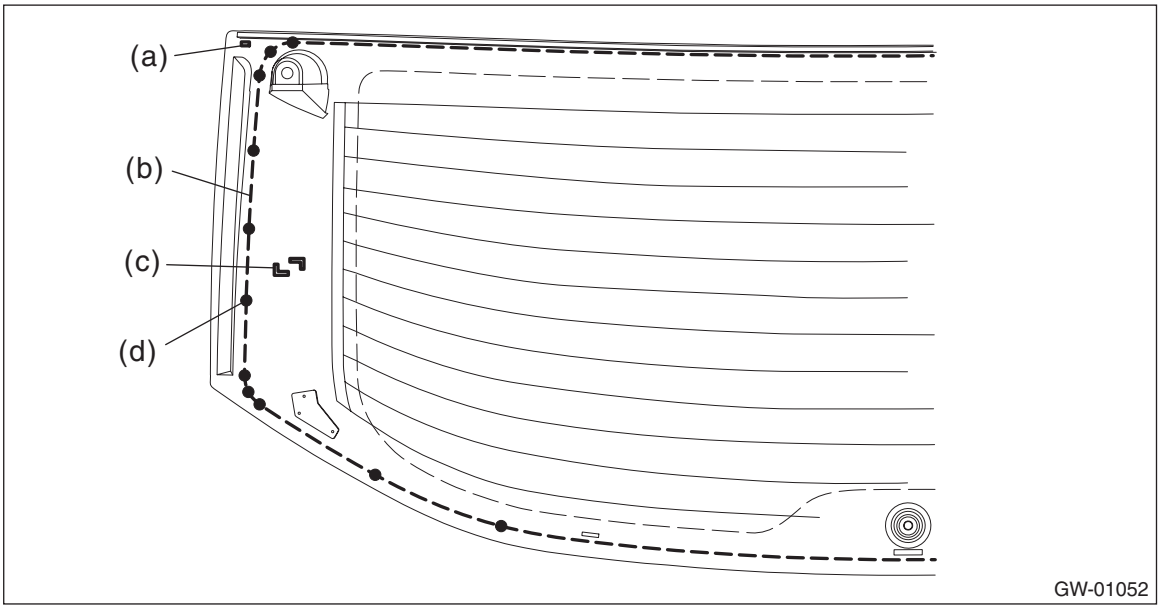
# 17.Rear Gate Glass

## A: REMOVAL

1) Disconnect the ground cable from battery.
2) Remove the trim panel - rear gate and the motor assembly - rear wiper. <Ref. to WW-40, REMOVAL, Rear Wiper Motor.>
3) Disconnect the rear defogger connector.
4) Remove the glass - rear gate in the same procedure as for the glass - front window. <Ref. to GW-38, REMOVAL, Windshield Glass.>

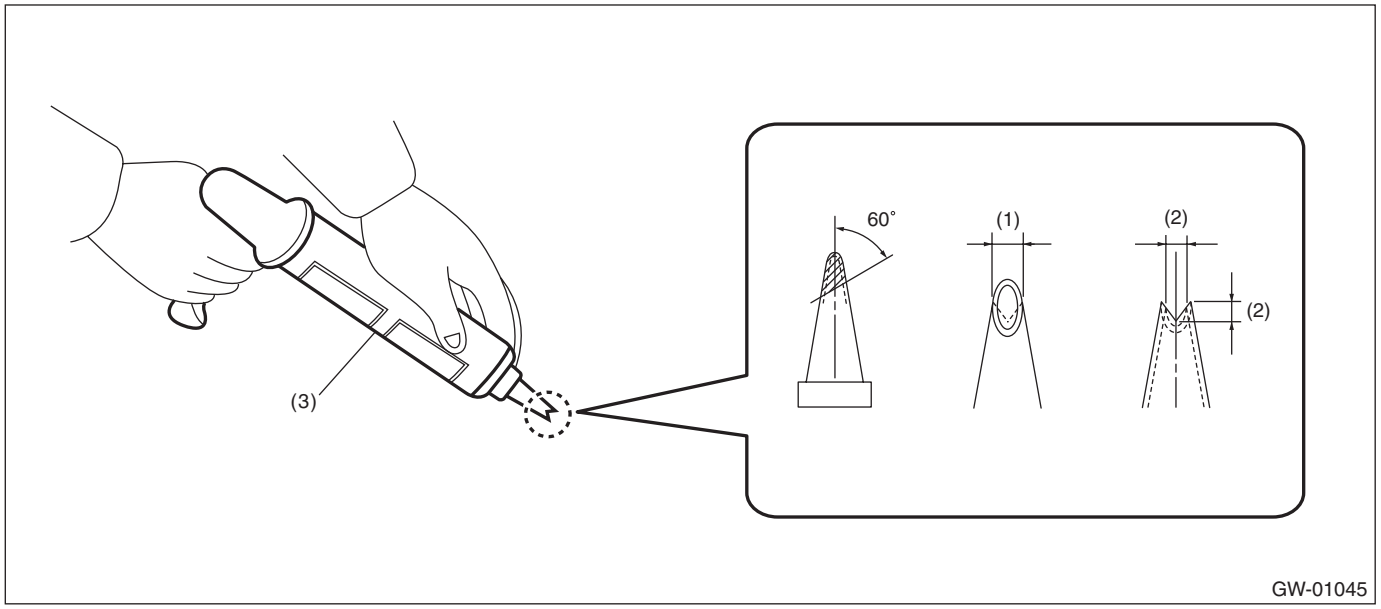
## B: INSTALLATION

NOTE:
Use the markings on the glass to apply adhesive and primer, and to install the dam rubber - rear gate and the spacer - rear gate.



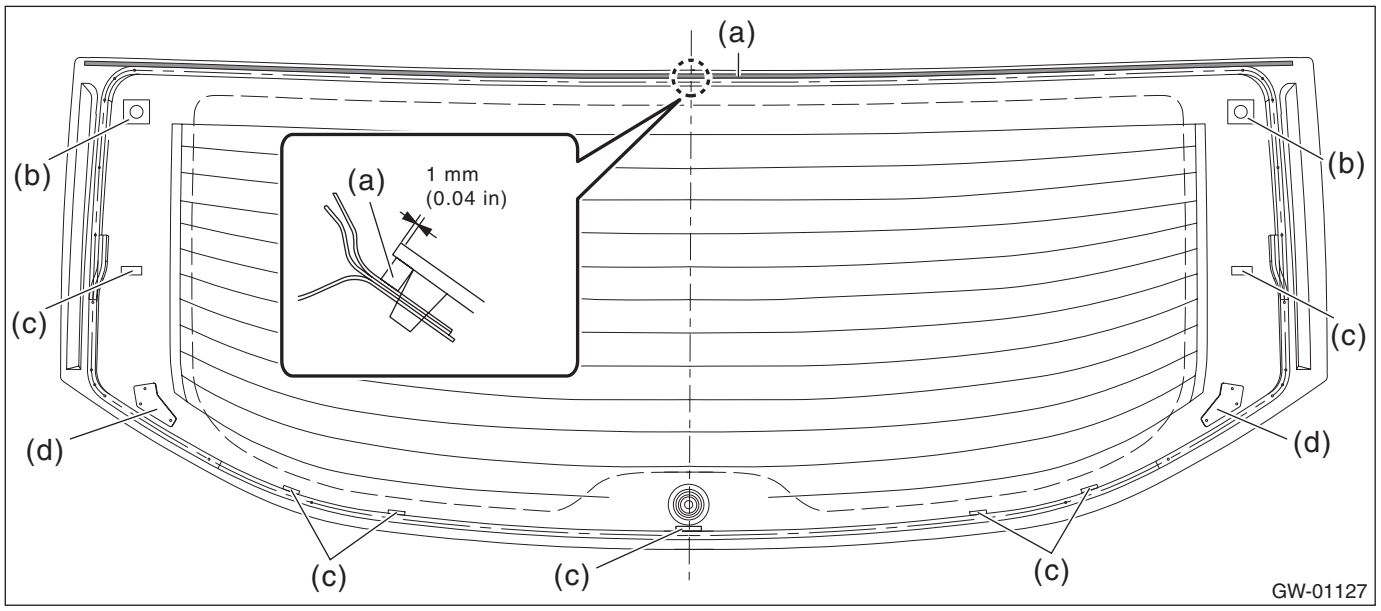
(a) Marking for dam rubber - rear gate application (Ag print)
(b) Center line for adhesive
(c) Marking for spacer - rear gate application (Ag print)
(d) Marking for primer application

1) Fabricate the cartridge nozzle tip as shown and set the sealant gun with the adhesive.



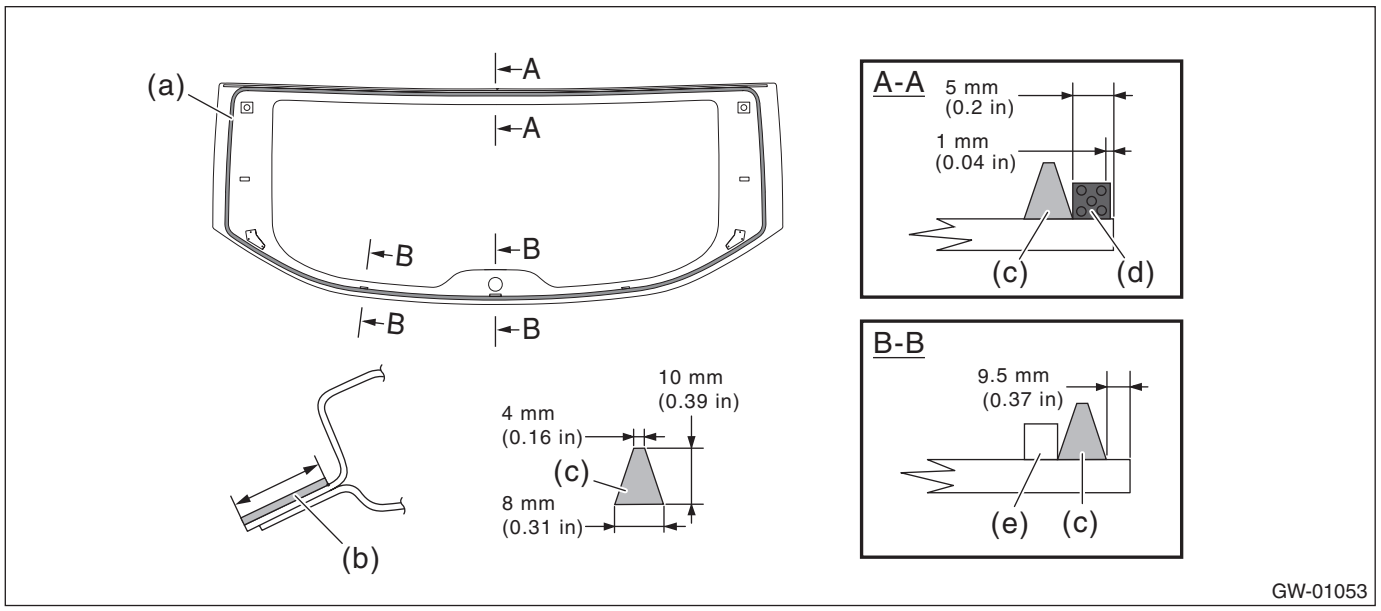
(1) 10 mm (0.39 in) (2) 8 mm (0.31 in) (3) Sealant gun

2) Smoothen and clean the adhesive surfaces of the glass - rear gate and body using the same procedures as for the glass - front window. <Ref. to GW-42, INSTALLATION, Windshield Glass.>
3) Attach the dam rubber - rear gate to the glass - rear gate.



(a) Dam rubber - rear gate (c) Spacer - rear gate (d) Locating pin - rear gate
(b) Holder - rear gate

4) Install the glass - rear gate.
(1) Apply the primer to the adhesive surface of glass - rear gate side and body side using sponge.
(2) Apply adhesive to the glass - rear gate end back surface.



(a) Application of primer (glass side)
(b) Application of primer (body side)
(c) Adhesive
(d) Dam rubber - rear gate
(e) Spacer - rear gate

(3) Attach the clip to the holder - rear gate of the glass - rear gate.
(4) Insert the locating pins - rear gate into the rear gate panel holes, and install the glass - rear gate.
(5) Lightly press the entire perimeter of the glass - rear gate for tight fit.
(6) Make flush the adhesive surface jutted out using spatula.

5) After completion of all work, allow the vehicle to stand for about 24 hours.

NOTE:
• When opening/closing the door after the glass - rear gate was bonded, always lower the glass assembly - door first, and then open/close it carefully.
• Move the vehicle slowly.
• For minimum drying time and vehicle standing time before driving after bonding, follow instructions or instruction manual from the adhesive manufacturer.

6) Connect the rear defogger connector.
7) Install the motor assembly - rear wiper and the arm assembly - rear wiper.

***Tightening torque:***
***Motor assembly - rear wiper and arm assembly - rear wiper: <Ref. to WW-3, REAR WIPER, COMPONENT, General Description.>***

8) Install the trim panel - rear gate. <Ref. to EI-148, INSTALLATION, Rear Gate Trim.>
9) After curing of adhesive, pour the water on external surface of vehicle to check that there are no water leaks.

NOTE:
When a vehicle is returned to the user, tell him or her that the vehicle should not be subjected to heavy impact for at least three days.

# 18.Rear Window Defogger System

## A: WIRING DIAGRAM

Refer to “Rear Defogger System” in the wiring diagram. <Ref. to WI-122, WIRING DIAGRAM, Rear Defogger System.>

## B: INSPECTION

### 1. CHECK SYSTEM

| Symptoms | Inspection order |
|---|---|
| Rear window defogger does not operate. | 1. Check the fuse.<br>2. Check the rear defogger relay.<br>3. Check the rear window defogger switch.<br>4. Check the heat wire.<br>5. Check the wiring harness.<br>6. Check body integrated unit. |

NOTE:
Rear window defogger system can be customized using the Subaru Select Monitor, when the customize setting {Auto A/C ECU Setting} of the body integrated unit is set to {support}.

| System name | Initial setting | Customize setting |
|---|---|---|
| Rear defogger operation mode | OFF after 15 min. | Repeat 15 min. operation and 2 min. stop. |

### 2. CHECK WITH SUBARU SELECT MONITOR

**CAUTION:**
**Check whether the Rr Defogger op. mode setting is in initial setting or customize setting before performing inspection.**

1) Check the input signal when the rear window defogger switch is operated using Subaru Select Monitor.
   (1) Prepare the Subaru Select Monitor. <Ref. to GW-7, PREPARATION TOOL, General Description.>
   (2) Turn the ignition switch to ON (engine OFF) and run the “PC application for Subaru Select Monitor”.
   (3) On «System Selection Menu» display, select {Integ. unit mode}.
   (4) Select {Auto A/C ECU Setting} from Current Data Display & Save.
   (5) Check the vehicle equipment and the settings of body integrated unit.
   • Model with manual A/C: Without auto A/C ECM setting
   • Model with auto A/C: With auto A/C ECM setting
   If correct, go to (6).
   If not correct, go to (8).
   (6) Select the {Rr Defogger output} on {Current Data Display & Save}.
   (7) Check the displayed data (ON/OFF) by operating the rear window defogger switch.
   (8) On the system selection menu display, select the body integrated unit mode. Select customize from work support, then select {Auto A/C ECU Setting}. Match the auto A/C ECM setting to the actual vehicle equipment.
2) Check the operation with rear window defogger switch ON.
• When customize setting is set as “Continuous”, it is normal if the 15-minute operation and 2-minute stop repeats.
• When customize setting is “Normal”, it is normal if the operation lasts for 15 minutes and then turns OFF.
3) When the operation in 2) above fails, replace the body integrated unit.

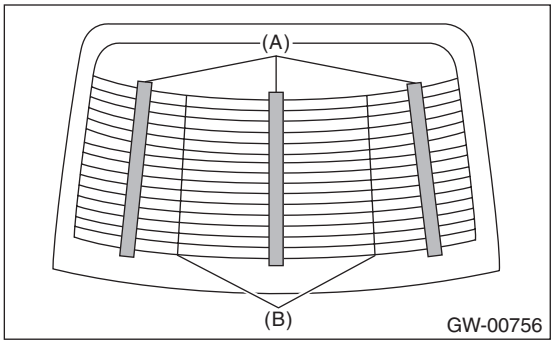
## 3. HEAT WIRE INSPECTION

**CAUTION:**
**Use a dry soft cloth to wipe off dirt on the glass along the heat wires with care not to damage the heat wires.**

1) Prepare the following checking items.
- Liquid crystal thermograph sheet (Approximate Size: 300 × 300 mm (11.8 × 11.8 in) and thermal temperature: 35 — 40°C (95 — 104°F))
- Aluminum foil

2) Turn the ignition switch to ON.
3) Turn the defogger switch to ON.
4) Push the liquid crystal thermograph sheet from the outside of the glass - rear window.

NOTE:
Use the liquid crystal thermograph sheet every range it is separated with the separate line.



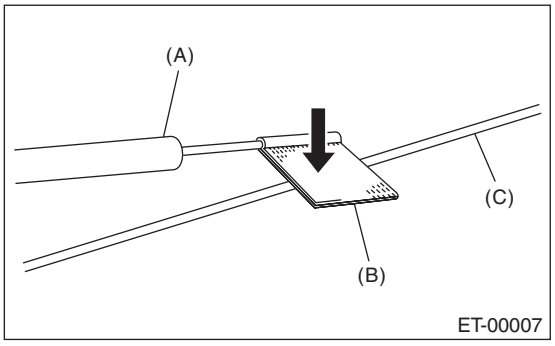
(A) Liquid crystal thermograph sheet
(B) Separate line

5) Determine the faulty heat wire by checking the color of the liquid crystal thermograph sheet.

| Liquid crystal thermograph sheet | Criteria |
|---|---|
| Change occurred (red → blue) | Normal |
| No change (black) | Open |

NOTE:
- Check from the inside of the glass - rear window if the liquid crystal thermograph sheet does not change.
- The time for the color change may differ depends on the surface temperature of the glass.

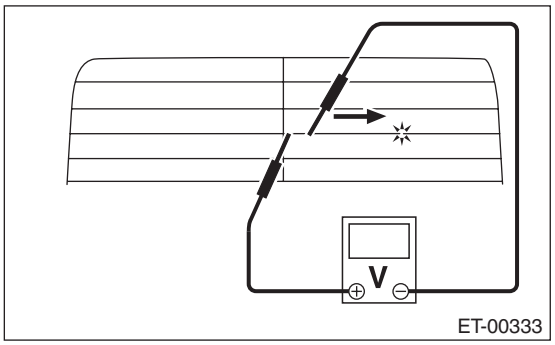
6) Wrap a piece of aluminum foil around the tip of tester probe and press it against the heat wire with your finger.



(A) Tester probe
(B) Aluminum foil
(C) Heat wire

7) To both ends of the section that has been found to include an open in the step 5), apply the tester positive (+) probe and the negative (–) probe.

8) Move the tester probe on the negative (–) side slowly along the heat wire. If voltage changes from zero while moving the tester probe, heat wire is open at the voltage change point.

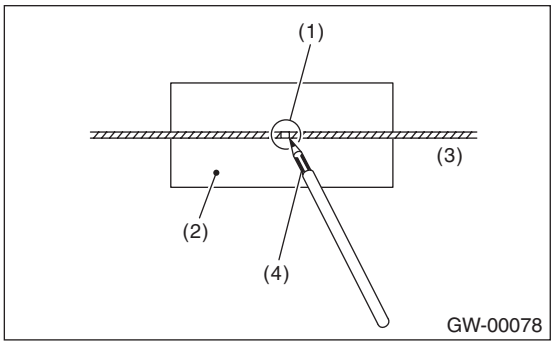


9) Repair the heat wire that determines the place of the open circuit. <Ref. to GW-54, REPAIR, Rear Window Defogger System.>

## C: REPAIR

1) Clean the broken portion with alcohol or white gasoline.
2) Mask both side of wire with masking tape.
3) Apply the conductive silver composition to the broken portion.

***Conductive silver composition:***
***by Permatex***
***QUICK GRID***



(1) Broken portion
(2) Masking tape
(3) Broken wire
(4) Conductive silver composition

4) Dry using a dryer after applying the composition.
5) After repair, check the wire.

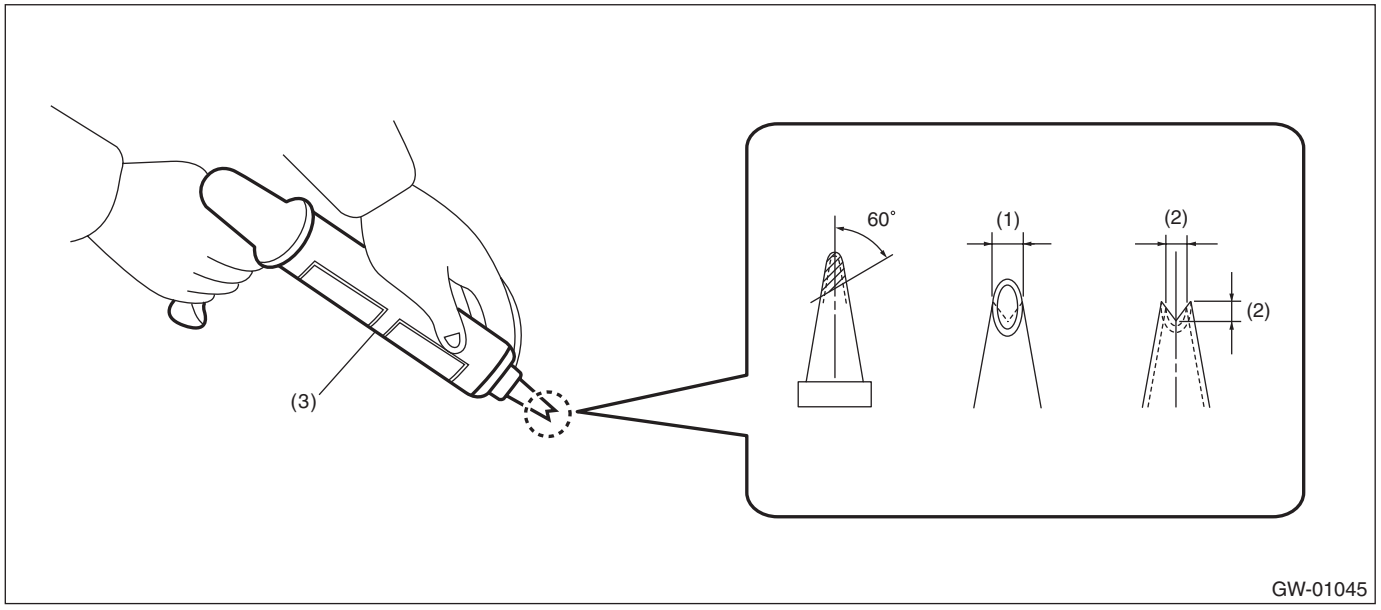
# 19.Rear Quarter Glass

## A: REMOVAL

1) Disconnect the ground cable from battery.
2) Remove the trim panel - rear pillar UPR. <Ref. to EI-108, 5 DOOR MODEL/XV MODEL, REMOVAL, Rear Quarter Trim.>
3) Remove the glass - rear quarter in the same procedure as for the glass - front window. <Ref. to GW-38, REMOVAL, Windshield Glass.>

## B: INSTALLATION

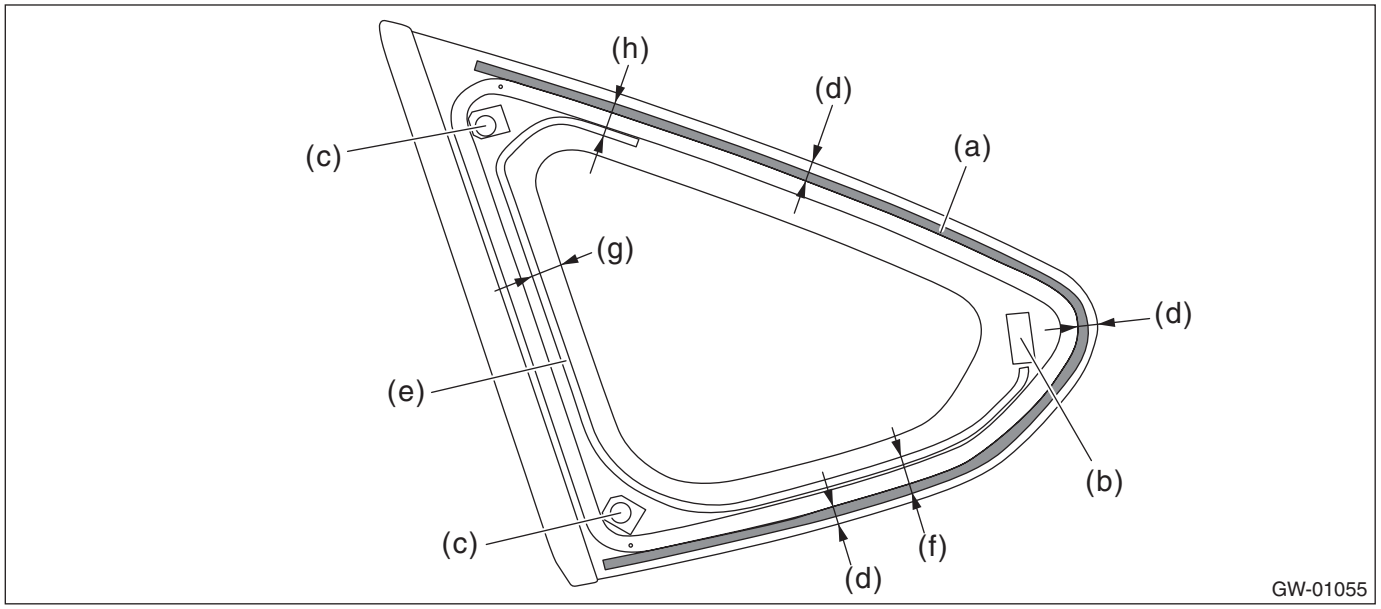
1) Fabricate the cartridge nozzle tip as shown and set the sealant gun with the adhesive.



(1) 10 mm (0.39 in) (2) 8 mm (0.31 in) (3) Sealant gun

2) Smoothen and clean the adhesive surfaces of the glass - rear quarter and body using the same procedures as for the glass - front window. <Ref. to GW-42, INSTALLATION, Windshield Glass.>

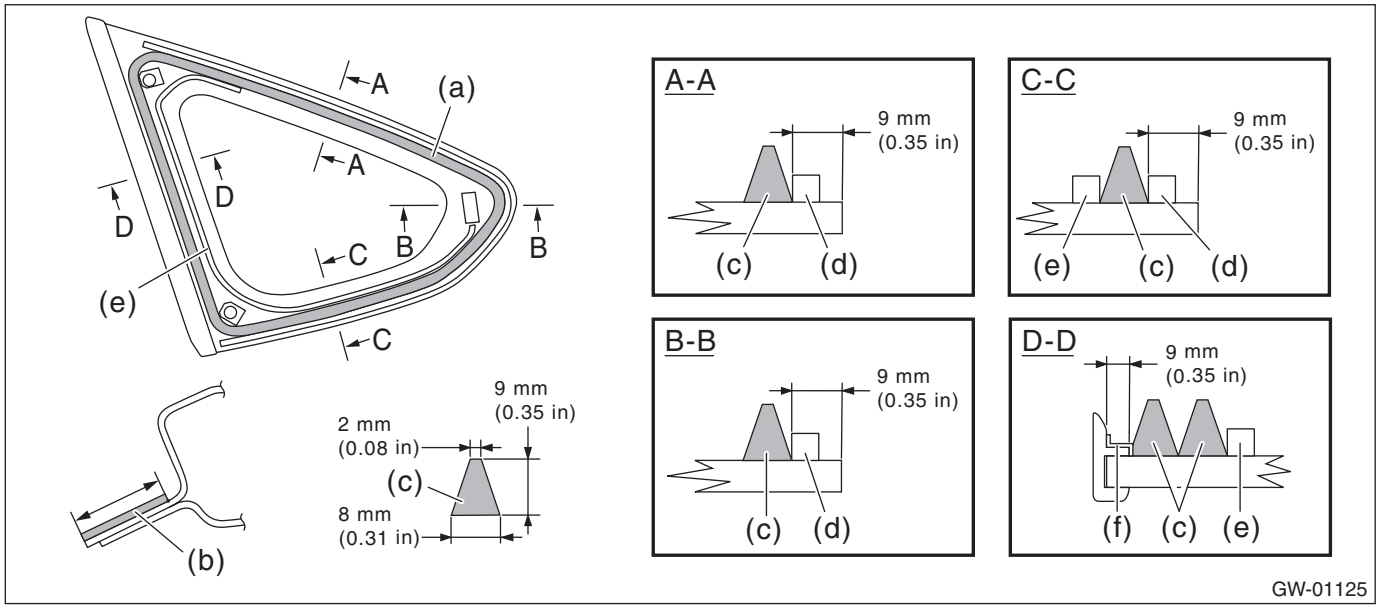
3) Install the dam rubber - rear and the seal - rear quarter to the glass - rear quarter.



(a) Dam rubber - rear quarter
(b) Fastener - rear quarter
(c) Locating pin - rear quarter
(d) 9 mm (0.35 in)
(e) Seal - rear quarter
(f) 23.1 mm (0.91 in)
(g) 11.2 mm (0.44 in)
(h) 22.4 mm (0.88 in)

4) Install the glass - rear quarter in the same procedure as for the glass - front window. <Ref. to GW-42, INSTALLATION, Windshield Glass.>

(1) Apply the primer to the adhesive surface of glass - rear quarter side and body side using sponge.
(2) Apply adhesive to the glass - rear quarter end back surface.



(a) Application of primer (glass side)
(b) Application of primer (body side)
(c) Adhesive
(d) Dam rubber - rear quarter
(e) Seal - rear quarter
(f) Protective plate

(3) Mount the fastener - rear quarter on the vehicle body.
(4) Insert the locating pins - rear quarter into the side panel holes, and install the glass - rear quarter.
(5) Lightly press the entire perimeter of the glass - rear quarter for tight fit.
(6) Make flush the adhesive surface jutted out using spatula.

5) After completion of all work, allow the vehicle to stand for about 24 hours.

NOTE:
- When opening/closing the door after the glass - rear quarter was bonded, always lower the glass assembly - door first, and then open/close it carefully.
- Move the vehicle slowly.
- For minimum drying time and vehicle standing time before driving after bonding, follow instructions or instruction manual from the adhesive manufacturer.

6) Install the trim panel - rear pillar UPR. <Ref. to EI-111, INSTALLATION, Rear Quarter Trim.>

7) After curing of adhesive, pour the water on external surface of vehicle to check that there are no water leaks.

NOTE:
When a vehicle is returned to the user, tell him or her that the vehicle should not be subjected to heavy impact for at least three days.

# 20.Wiper Deicer System

## A: WIRING DIAGRAM

Refer to “Wiper Deicer System” in the wiring diagram. <Ref. to WI-157, Wiper Deicer System.>

## B: INSPECTION

### 1. CHECK SYSTEM

NOTE:
- The wiper deicer does not operate when the ambient temperature becomes 5°C (41°F) or more.
- The wiper deicer operates with the rear window defogger at the same time.
- It is possible to perform a forced operation if you keep holding the rear window defogger switch for 3 seconds or more.

| Symptoms | Inspection order |
|---|---|
| Wiper deicer does not operate. | 1. Check the fuse.<br>2. Check the wiper deicer relay.<br>3. Check the wiper deicer switch.<br>4. Check the heat wire.<br>5. Check the wiring harness.<br>6. Check body integrated unit. |

NOTE:
- Wiper deicer system can be customized using the Subaru Select Monitor, when the customize setting {Auto A/C ECU Setting} of the body integrated unit is set to {support}.
- Set the system using the Rr Defogger op. mode, and setting will be the same as rear defogger system setting.

| System name | Initial setting | Customize setting |
|---|---|---|
| Rear defogger operation mode | OFF after 15 min. | Continuous operation* |

*: When one of the following conditions occurs, continuous operation is suspended and turned off after 15 minutes.
- Ambient temperature at 5°C (41°F) or more continues for 10 seconds.
- Malfunction occurs on ambient sensor.
- Vehicle speed of 15 km/h (9 MPH) or less continues 15 minutes (OFF when conditions are met)
- Malfunction occurs in CAN communication.
- Battery voltage remains at 10 V or less for 30 seconds.
- SI-DRIVE [I] mode driving continues for 10 seconds.

### 2. CHECK WITH SUBARU SELECT MONITOR

**CAUTION:**
**Before performing the inspection, check the following settings.**
- **Wiper deicer setting → "support". If "no support", set to "support" using customize setting.**
- **Rr Defogger op. mode setting → Initial setting or customize setting.**

1) Check the input signal when the rear window defogger switch is operated using Subaru Select Monitor.
   (1) Prepare the Subaru Select Monitor. <Ref. to GW-7, PREPARATION TOOL, General Description.>
   (2) Turn the ignition switch to ON (engine OFF) and run the "PC application for Subaru Select Monitor".
   (3) On «System Selection Menu» display, select {Integ. unit mode}.
   (4) Select {Auto A/C ECU Setting} from Current Data Display & Save.
   (5) Check the vehicle equipment and the settings of body integrated unit.
   - Model with manual A/C: Without auto A/C ECM setting
   - Model with auto A/C: With auto A/C ECM setting

   If correct, go to (6).
   If not correct, go to (8).
   (6) Select the {wiper deicer output} on {Current Data Display & Save}.
   (7) Check the displayed data (ON/OFF) by operating the rear window defogger switch.
   (8) On the system selection menu display, select the body integrated unit mode. Select customize from work support, then select {Auto A/C ECU Setting}. Match the auto A/C ECM setting to the actual vehicle equipment.
2) Check the operation with rear window defogger switch ON.
- When customize setting is set as "Continuous", it is normal if the 15-minute operation and 2-minute stop repeats.
- When customize setting is "Normal", it is normal if the operation lasts for 15 minutes and then turns OFF.

3) When the operation in 2) above fails, replace the body integrated unit.

### 3. HEAT WIRE INSPECTION

Refer to "HEAT WIRE INSPECTION" of "Rear Window Defogger System". <Ref. to GW-53, HEAT WIRE INSPECTION, INSPECTION, Rear Window Defogger System.>

NOTE:
Heat wire inspection needs removing/installing procedure of instrument panel assembly.

## C: REPAIR

Refer to "REPAIR" of "Rear Window Defogger System". <Ref. to GW-54, REPAIR, Rear Window Defogger System.>

NOTE:
Heat wire repair needs removing/installing procedure of instrument panel assembly.

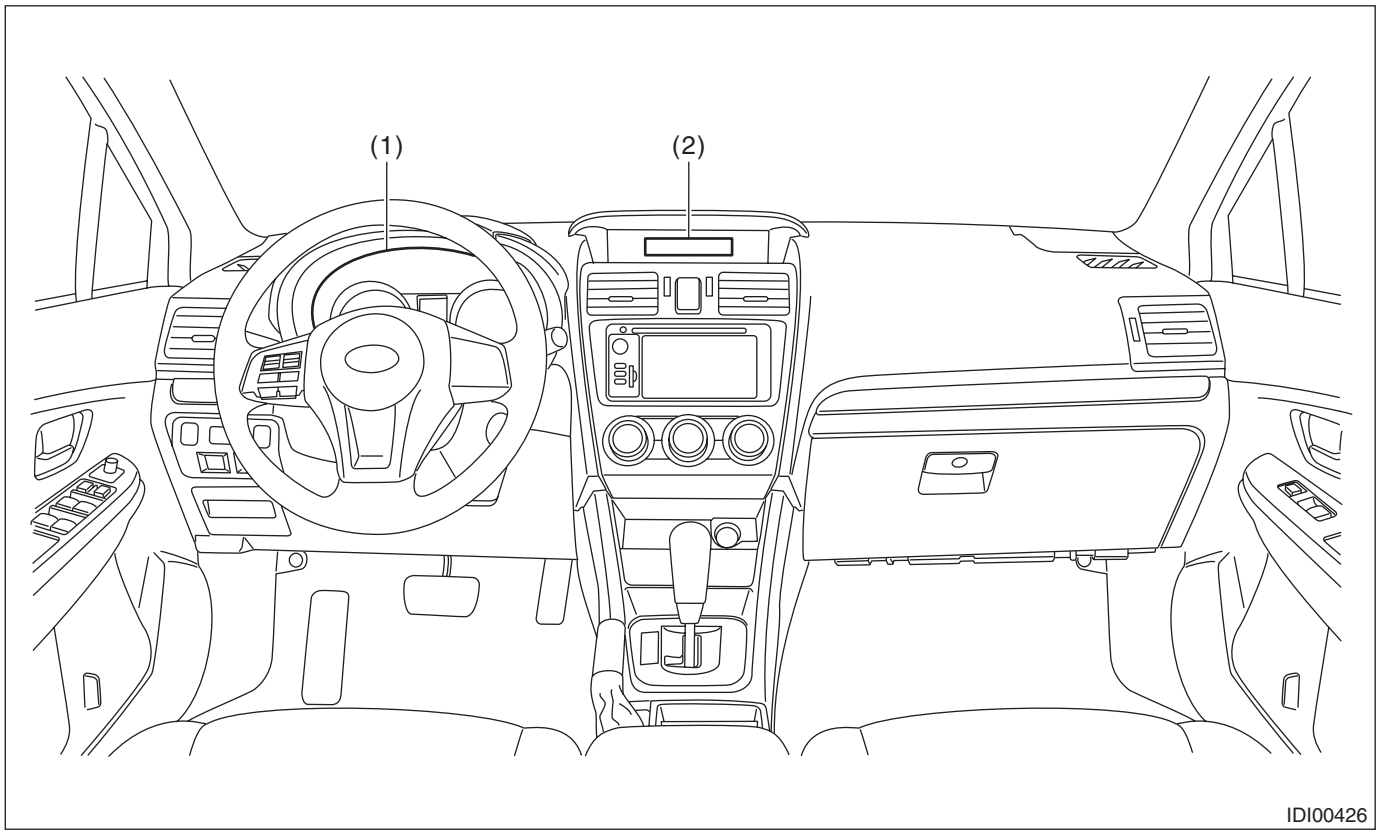
## B: LOCATION



(1) Combination meter ASSY (2) Multi-function display

## C: CAUTION

• Before disassembling or reassembling parts, always disconnect the battery ground cable from battery. When replacing the audio, control module and other parts provided with memory functions, record the memory contents before disconnecting the battery ground cable. Otherwise, the memory is cleared.
• Reassemble the parts in the reverse order of disassembly procedure unless otherwise indicated.
• Use gloves to avoid damage and getting fingerprints on the glass surface and meter surfaces.
• Do not apply an excessive force on the printed circuit.
• Do not drop or otherwise apply impact.
• Connect the connectors securely during reassembly.
• After reassembly, make sure that each component operates normally.
• When the combination meter assembly has been replaced, be sure to perform the registration of immobilizer.
• If the steering wheel and steering angle sensor (steering roll connector) are removed, perform “VDC sensor midpoint setting mode” of the VDC. <Ref. to VDC-19, VDC SENSOR MIDPOINT SETTING MODE, ADJUSTMENT, VDC Control Module and Hydraulic Control Unit (VDCCM&H/U).>

## D: PREPARATION TOOL

### 1. SPECIAL TOOL

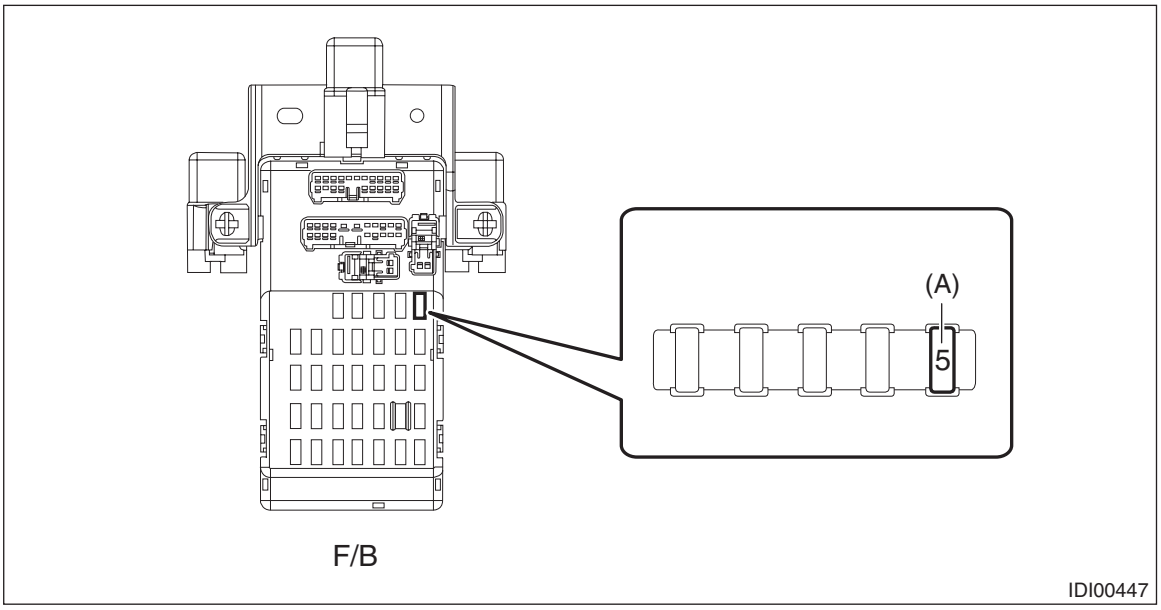
| ILLUSTRATION | TOOL NUMBER | DESCRIPTION | REMARKS |
|---|---|---|---|
|  ST1B022XU0 | 1B022XU0 | SUBARU SELECT MONITOR III KIT | Used for setting of each function and trouble-shooting for electrical system.<br>NOTE:<br>For detailed operation procedures of SUBARU SELECT MONITOR III KIT, refer to “PC application help for Subaru Select Monitor”. |

### 2. GENERAL TOOL

| TOOL NAME | REMARKS |
|---|---|
| Circuit tester | Used for measuring resistance and voltage. |
| Steering wheel puller | Used for removing the steering wheel. |

# 2. Relay and Fuse

## A: LOCATION



| | | |
|---|---|---|
| Relay & fuse box | Fuse 10 A (combination meter, MFD) | (A) |

NOTE:
For other related fuses, refer to the wiring diagram. <Ref. to WI-15, Power Supply Circuit.>

## B: INSPECTION

### 1. CHECK FUSE

1) Remove the fuse and inspect visually.
2) If the fuse is blown out, replace the fuse.

NOTE:
If the fuse is blown again, check the system wiring harness.

# 3. Combination Meter System

## A: WIRING DIAGRAM

Refer to “Combination Meter System” in the wiring diagram. <Ref. to WI-54, WIRING DIAGRAM, Combination Meter System.>

## B: ELECTRICAL SPECIFICATION

### 1. COMBINATION METER ASSEMBLY

Refer to “Control Module I/O Signal” of “INSTRUMENTATION/DRIVER INFO (DIAGNOSTICS)” section. <Ref. to IDI(diag)-6, ELECTRICAL SPECIFICATION, Control Module I/O Signal.>

## C: OPERATION

### 1. SELF-DIAGNOSIS DISPLAY MODE

The self-diagnosis (checking of each meter, warning light, indicator light, illumination, LCD) of combination meter can be performed in the following procedure.

**CAUTION:**
**Perform the steps described in 1) through 4) within 10 seconds.**
1) Unfasten → fasten the driver’s seat belt within 3 seconds after the ignition switch is turned to ON.
2) With the driver’s seat belt fastened, press the trip meter knob three times.
3) Unfasten the driver’s seat belt, and then press the trip meter knob three times.
4) Fasten the driver’s seat belt again, and then press the trip meter knob three times.

NOTE:
• When the self-diagnosis function operates, the warning light, indicator light, and LCD display checks are performed. After this, the buzzer will sound for 0.5 seconds every time the trip meter knob is pressed, and operation checks are performed in the order of meter indicator needle operation, meter indicator needle indication, and LCD. Turn the ignition switch to OFF to cancel the self-diagnosis function.
• When the engine starts during diagnosis, the self-diagnosis function is not cancelled, however, once the vehicle starts driving, the self-diagnosis function is deactivated automatically.
5) Go to “Check meter indicator operation”.
Check meter operation, warning light, indicator light, illumination and LCD.

NOTE:
• After “_S_1” is displayed on the LCD, the meter indicator operation check mode is initiated.
• Each of the meter indicator operation display and LCD display switches every 6 seconds.

| Meter indicator | LCD display, illumination | Warning light/ indicator light |
|---|---|---|
| MIN indication<br>↓<br>MAX indication | ILL1 (Min. brightness)<br>↓*4<br>ILL6 (Max. brightness) | *1, *2, *3 |
| MAX indication<br>↓<br>MIN indication | ILL6 (Max. brightness)<br>↓*4<br>ILL1 (Min. brightness) | |

*1: Warning lights and indicator lights controlled by the meter drive circuit are illuminated. <Ref. to IDI-2, SPECIFICATION, General Description.>
*2: Warning lights and indicator lights controlled by other module are turned on/off according to the module control. <Ref. to IDI-2, SPECIFICATION, General Description.>
*3: Engine coolant temperature warning light illuminates in red.
*4: Display for one second for each level

6) Press the trip meter knob once.
7) Go to “Meter Indicator Needle Indication Check”.
Check meter operation, warning light, indicator light, and LCD.

NOTE:
• Meter indicator switches every 1.5 seconds for each indication.
• ILL indication illuminates at the same brightness as when entering “Meter Indicator Needle Indication Check”.
• During operation, “_S_2” is displayed on the LCD trip display.

| Speedometer (km/h) | Tachometer (rpm) | ECO gauge | Warning light/ indicator light |
|---|---|---|---|
| 0 | 0 | Lowest point | *1, *2, *3 |
| 0 | 0 | –Max | |
| 40 | 1000 | 0 | |
| 100 | 4000 | +Max | |
| 40 | 1000 | 0 | |
| 0 | 0 | –Max | |

*1: Warning lights and indicator lights controlled by the meter drive circuit go off. <Ref. to IDI-2, SPECIFICATION, General Description.>
*2: Warning lights and indicator lights controlled by other module are turned on/off according to the module control. <Ref. to IDI-2, SPECIFICATION, General Description.>
*3: Engine coolant temperature indicator light illuminates in blue.
8) Press the trip meter knob once.
9) Go to “Check LCD display”.
Check the LCD display.

NOTE:
• After “_S_3” is displayed on the LCD, the LCD display check mode is initiated.
• LCD display switches every 1 second.
• Warning lights and indicator lights controlled by the meter drive circuit go off. <Ref. to IDI-2, SPECIFICATION, General Description.>
• Warning lights and indicator lights controlled by other module are turned on/off according to the module control. <Ref. to IDI-2, SPECIFICATION, General Description.>
• The meter indication remains at the same level as “Meter Indicator Needle Indication Check”.
• ILL indication illuminates at ILL6 level (max. brightness).
• After No. 14 is displayed in the illumination order, display is repeated from No. 1 again.

IDI00374

## D: INSPECTION

Refer to “Basic Diagnostic Procedure” of “INSTRUMENTATION/DRIVER INFO (DIAGNOSTICS)” section. <Ref. to IDI(diag)-2, Basic Diagnostic Procedure.>

## E: NOTE

For procedure of each component in the combination meter system, refer to the respective section.

- Combination meter assembly: <Ref. to IDI-17, Combination Meter.>
- Speedometer: <Ref. to IDI-20, Speedometer.>
- Tachometer: <Ref. to IDI-21, Tachometer.>
- FUEL meter: <Ref. to IDI-22, Fuel Gauge.>
- ECO gauge: <Ref. to IDI-23, ECO Gauge.>

# 4. Multi-function Display (MFD) System

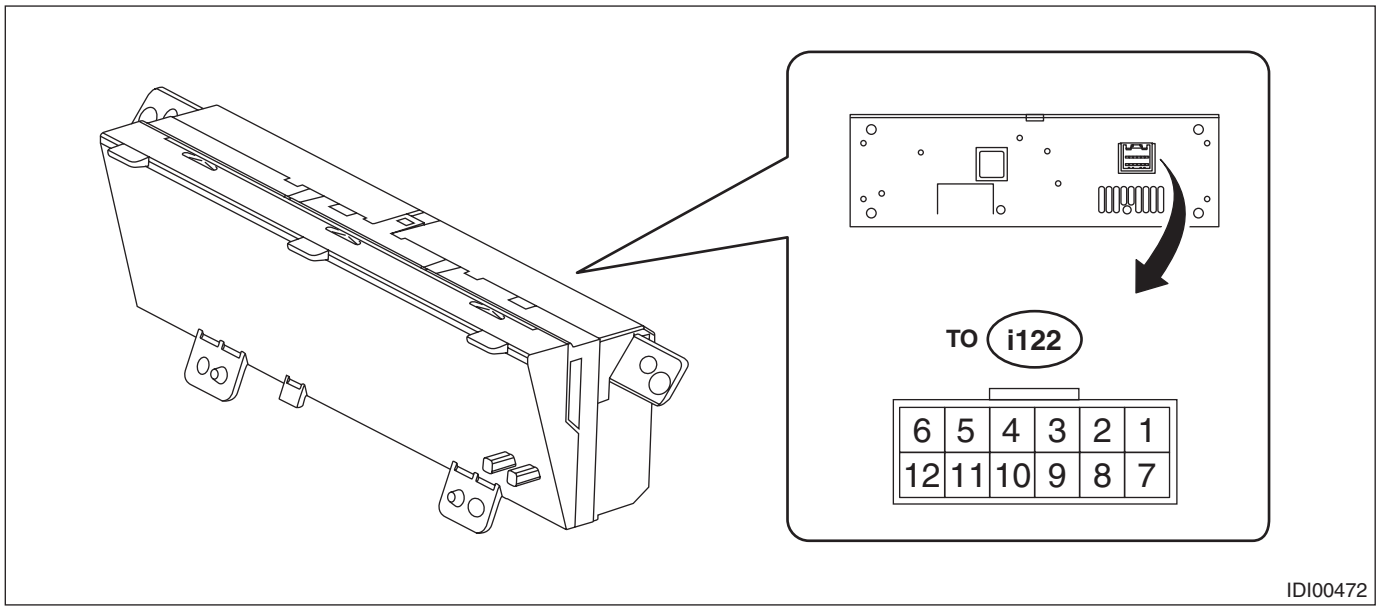
## A: WIRING DIAGRAM

Refer to “Multi-function Display (MFD) System” in WI section. <Ref. to WI-108, WIRING DIAGRAM, Multi-function Display (MFD) System.>

## B: ELECTRICAL SPECIFICATION

### 1. MULTI FUNCTION DISPLAY

- Standard type



| Terminal No. | Item | Measuring condition | Standard |
|---|---|---|---|
| 1 (+B) ←→ Chassis ground | Voltage | Always | 10 — 14 V |
| 2 (GND) ←→ Chassis ground | Resistance | Always | Less than 1 Ω |
| 3 (IG) ←→ Chassis ground | Voltage | IG OFF → ON | 0 V → 10 — 14 V |
| 9 (U-ART com.) | — | Cannot be measured | — |
| 10 ←→ Chassis ground | Voltage | Passenger’s airbag ON indicator light OFF → ON | 0 V → 1.5 V |
| 11 ←→ Chassis ground | Voltage | Passenger’s airbag OFF indicator light OFF → ON | 0 V → 1.5 V |

- High grade type

Refer to “Control Module I/O Signal” of “INSTRUMENTATION/DRIVER INFO (DIAGNOSTICS)” section. <Ref. to IDI(diag)-6, ELECTRICAL SPECIFICATION, Control Module I/O Signal.>

# C: OPERATION

## 1. DIAGNOSTIC MODE (HIGH GRADE TYPE ONLY)

The settings of the multi-function display can be changed by performing the following procedures to display the diagnostic mode.

**CAUTION:**
- **Perform the work with IG-ON while charging the battery.**
- **While performing the work, close the front hood and all doors, and do not operate any electrical parts.**
- **Display can not be switched to diagnostic mode if the illumination control dial is set to the position for the dimming cancel function (maximum brightness).**

1) Procedure

**CAUTION:**
**Perform the steps described in (2) through (4) within 10 seconds.**

(1) Within 3 seconds after turning the IG-ON, turn the lighting switch to Switch 1 (TAIL) or Switch 2 (HEAD).
(2) While keeping the lighting switch to Switch 1 (TAIL) or Switch 2 (HEAD) position, press the i/SET switch three times.
(3) Turn the lighting switch to OFF, and press the i/SET switch three times.
(4) Turn the lighting switch to Switch 1 (TAIL) or Switch 2 (HEAD) position again, press the i/SET switch three times.

NOTE:
- Except for the demonstration display setting of the diagnostic mode, the display will terminate with IG-OFF or by selecting “Back” from the menu screen.
- The demonstration display setting of the diagnostic mode will terminate by starting the engine or removing the battery. Even if it becomes IG-OFF then IG-ON again, the diagnostic mode will not terminate.
- To select other menus from the demonstration display setting, terminate the diagnostic mode by starting the engine or removing the battery, then access to the diagnostic mode again.

2) Display menu

Change the display and settings from each menu.

| Menu | Item | Contents |
|---|---|---|
| Demonstration display setting | — | Shows demonstration display. |
| Vehicle status confirmation | • CAN communication | Displays the connection status of input signals. |
| | • U-ART communication | |
| | • Camera connection | |
| Rear camera settings | • Guide line adjustment | Adjust the guide line in the order of up/down, left/right and rotate, then select “Set” to determine. |
| | • Guide line display | Select “ON” or “OFF”, then select “Set” to determine. |
| | • Guide line reset | Select “Yes” or “No” to determine whether to restore to the default settings. |
| Customize | • Key operation sound | Select “ON” or “OFF”, then select “Set” to determine. |
| | • Correction of lifetime fuel economy value* | Adjust the fuel economy value within the range of -10 — +10 km/l, then determine the value with i/SET switch. |
| Back | — | Finish the diagnostic mode. |

*: Correction of lifetime fuel economy value is used only when the multi-function display has been replaced. This function is provided as a compensation feature to bring the current lifetime fuel economy value to the one before the replacement of multi-function display.

# D: INSPECTION

• Standard type

Refer to the following inspection steps. <Ref. to IDI-13, SYMPTOM CHART, INSPECTION, Multi-function Display (MFD) System.>

• High grade type

Refer to “Basic Diagnostic Procedure” of “INSTRUMENTATION/DRIVER INFO (DIAGNOSTICS)” section. <Ref. to IDI(diag)-2, Basic Diagnostic Procedure.>

## 1. SYMPTOM CHART

| Symptoms | Repair order | Note |
|---|---|---|
| No display is shown. | 1. Power supply<br>2. Ground circuit<br>3. Communication circuit harness<br>4. MFD | <Ref. to IDI-13, CHECK POWER SUPPLY AND GROUND CIRCUIT AND COMMUNICATION CIRCUIT, INSPECTION, Multi-function Display (MFD) System.> |
| Ambient air temperature/fuel economy displays do not appear. | 1. Power supply<br>2. Ground circuit<br>3. Communication circuit harness<br>4. MFD | <Ref. to IDI-14, CHECK CLOCK SYSTEM COMMUNICATION CIRCUIT, INSPECTION, Multi-function Display (MFD) System.> |
| Only ambient air temperature display is not displayed. | 1. Power supply<br>2. Harness<br>3. Ambient sensor<br>4. Communication circuit<br>5. MFD | <Ref. to IDI-15, CHECK AMBIENT TEMPERATURE METER SYSTEM COMMUNICATION CIRCUIT, INSPECTION, Multi-function Display (MFD) System.> |
| Only fuel economy display is not displayed. | 1. Setting<br>2. Communication circuit<br>3. MFD | <Ref. to IDI-16, CHECK COMMUNICATION CIRCUIT OF FUEL ECONOMY SYSTEM, INSPECTION, Multi-function Display (MFD) System.> |

## 2. CHECK POWER SUPPLY AND GROUND CIRCUIT AND COMMUNICATION CIRCUIT

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK POWER SUPPLY.**<br>1) Disconnect the MFD connector.<br>2) Measure the voltage between MFD connector and chassis ground.<br>***Connector & terminal***<br>***(i122) No. 1 (+) — Chassis ground (–):*** | Is the voltage 10 V or more? | Go to step **2**. | Check the harness for open or short between the fuse and MFD. |
| 2 | **CHECK GROUND CIRCUIT.**<br>Measure the resistance between MFD connector and chassis ground.<br>***Connector & terminal***<br>***(i122) No. 2 — Chassis ground:*** | Is the resistance less than 10 Ω? | Go to step **3**. | Repair or replace the harness. |
| 3 | **CHECK HARNESS BETWEEN MFD AND COMBINATION METER ASSEMBLY.**<br>1) Disconnect the connector of combination meter assembly.<br>2) Check harness between MFD and combination meter assembly.<br>***Connector & terminal***<br>***(i122) No. 9 — (i10) No. 28:*** | Is harness normal? | Go to step **4**. | Repair or replace the harness. |
| 4 | **CHECK MFD.**<br>1) Remove the MFD.<br>2) Attach the clock to another vehicle on which the clock display operates normally, and check its operation. | Is the MFD normal? | Replace the meter - main assembly. | Replace the MFD. |

## 3. CHECK CLOCK SYSTEM COMMUNICATION CIRCUIT

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK POWER SUPPLY.**<br>1) Disconnect the MFD connector.<br>2) Turn the ignition switch to ON.<br>3) Measure the voltage between MFD connector and chassis ground.<br>***Connector & terminal***<br>***(i122) No. 3 (+) — Chassis ground (–):*** | Is the voltage 10 V or more? | Go to step **2**. | Repair or replace the harness. |
| 2 | **CHECK GROUND CIRCUIT.**<br>Measure the resistance between MFD connector and chassis ground.<br>***Connector & terminal***<br>***(i122) No. 2 — Chassis ground:*** | Is the resistance less than 10 Ω? | Go to step **3**. | Repair or replace the harness. |
| 3 | **CHECK HARNESS BETWEEN MFD AND COMBINATION METER ASSEMBLY.**<br>1) Disconnect the connector of combination meter assembly.<br>2) Check harness between MFD and combination meter assembly.<br>***Connector & terminal***<br>***(i122) No. 9 — (i10) No. 28:*** | Is harness normal? | Go to step **4**. | Repair or replace the harness. |
| 4 | **CHECK MFD.**<br>1) Remove the MFD.<br>2) Attach the clock to another vehicle on which the clock display operates normally, and check its operation. | Is the MFD normal? | Replace the meter - main assembly. | Replace the MFD. |

## 4. CHECK AMBIENT TEMPERATURE METER SYSTEM COMMUNICATION CIRCUIT

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK AMBIENT SENSOR POWER SUPPLY.**<br>1) Disconnect the ambient sensor connector.<br>2) Turn the ignition switch to ON.<br>3) Measure the voltage between the ambient sensor connector and chassis ground.<br>***Connector & terminal***<br>***(F78) No. 1 (+) — Chassis ground (–):*** | Is the voltage 4 V or more? | Go to step **2**. | Check the harness for open or short between the fuse and MFD. |
| 2 | **CHECK HARNESS BETWEEN AMBIENT SENSOR AND COMBINATION METER ASSEMBLY.**<br>1) Disconnect the connector of combination meter assembly.<br>2) Check harness between ambient sensor and combination meter assembly.<br>***Connector & terminal***<br>***(F78) No. 1 — (i10) No. 27:***<br>***(F78) No. 2 — (i10) No. 36:*** | Is harness normal? | Go to step **3**. | Repair or replace the harness. |
| 3 | **CHECK AMBIENT SENSOR.**<br>Check the ambient sensor. <Ref. to AC-75, INSPECTION, Ambient Sensor.> | Is the ambient sensor operating properly? | Go to step **4**. | Replace the ambient sensor. |
| 4 | **CHECK AMBIENT TEMPERATURE DISPLAY.**<br>1) Connect the combination meter assembly connector.<br>2) Install the 3 kΩ resistance between connector terminals of the ambient sensor.<br>3) Turn the ignition switch to ON.<br>***Connector & terminal***<br>***(F78) No. 1 — No. 2:*** | Does the ambient temperature display 25°C (77°F)? | Repair the poor contact between the ambient sensor and harness connector. | Go to step **5**. |
| 5 | **CHECK CURRENT DATA.**<br>Using the Subaru Select Monitor, display the data of «Ambient Air Temperature».<br>NOTE:<br>For detailed procedures, refer to “PC application help for Subaru Select Monitor”. | Is the ambient temperature of 25°C (77°F) output? | Go to step **6**. | Replace the meter - main assembly. <Ref. to IDI-17, Combination Meter.> |
| 6 | **CHECK MFD.**<br>1) Remove the MFD.<br>2) Attach the ambient temperature display to another vehicle on which the ambient temperature display operates normally to check its operation. | Does the ambient temperature display 25°C (77°F)? | Replace the MFD. | Replace the meter - main assembly. <Ref. to IDI-17, Combination Meter.> |

## 5. CHECK COMMUNICATION CIRCUIT OF FUEL ECONOMY SYSTEM

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK FUEL ECONOMY DISPLAY OFF MODE.**<br>Check that the mode display changes when the MFD changeover knob is operated.<br>(Display changes in the following order: cruising distance → average fuel economy → instantaneous fuel economy → continuous driving time → average vehicle speed → blank display) | Is fuel economy displayed? | MFD is normal. | Go to step **2**. |
| 2 | **CHECK BODY INTEGRATED UNIT.**<br>Read the DTC using Subaru Select Monitor.<br>NOTE:<br>For detailed procedures, refer to "PC application help for Subaru Select Monitor". | Is DTC detected? | Go to step **3**. | Replace the meter - main assembly. <Ref. to IDI-17, Combination Meter.> |
| 3 | **CHECK MFD.**<br>1) Remove the MFD.<br>2) Attach the fuel economy display to another vehicle on which the fuel economy display operates normally to check its operation. | Is the fuel economy display correct? | Replace the MFD. | Replace the meter - main assembly. <Ref. to IDI-17, Combination Meter.> |

## E: NOTE

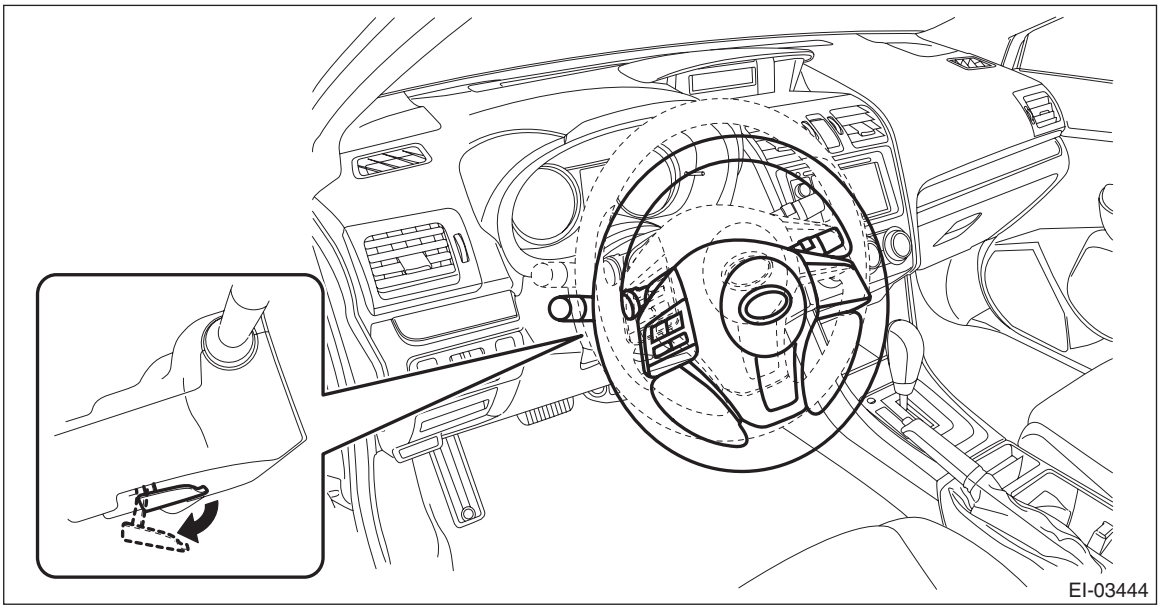
For procedure of each component in the clock system, refer to the respective section.

- Multi-function display: <Ref. to IDI-24, Multi-function Display (MFD).>

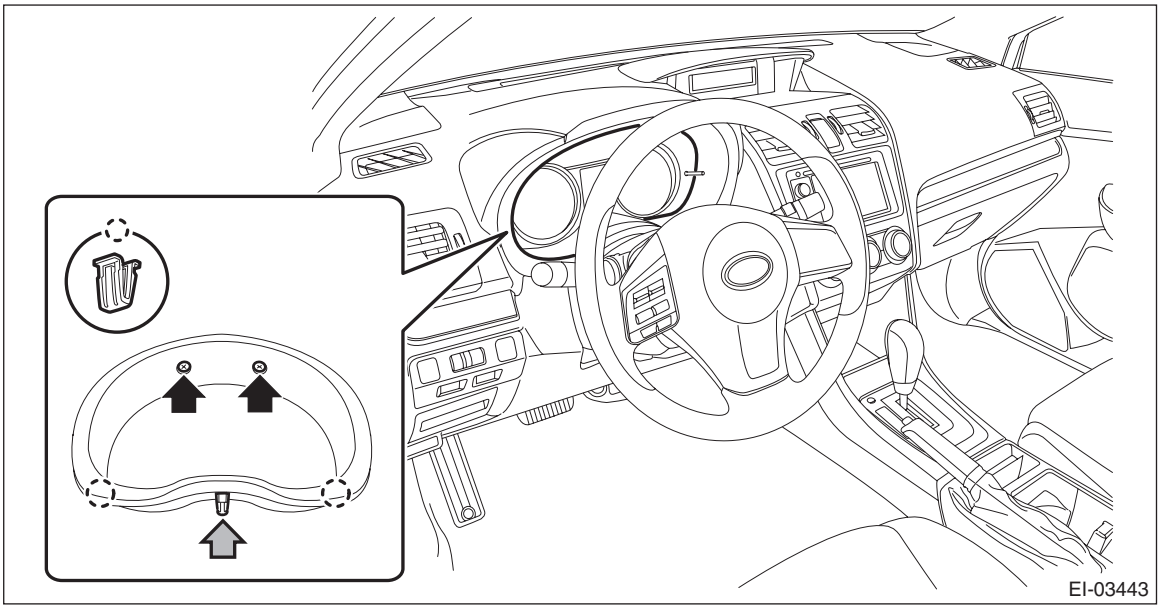
# 5. Combination Meter

## A: REMOVAL

1) Disconnect the ground cable from battery.
2) Release the lock, tilt the steering column to the lowest end and fully extend the column by the telescopic system.



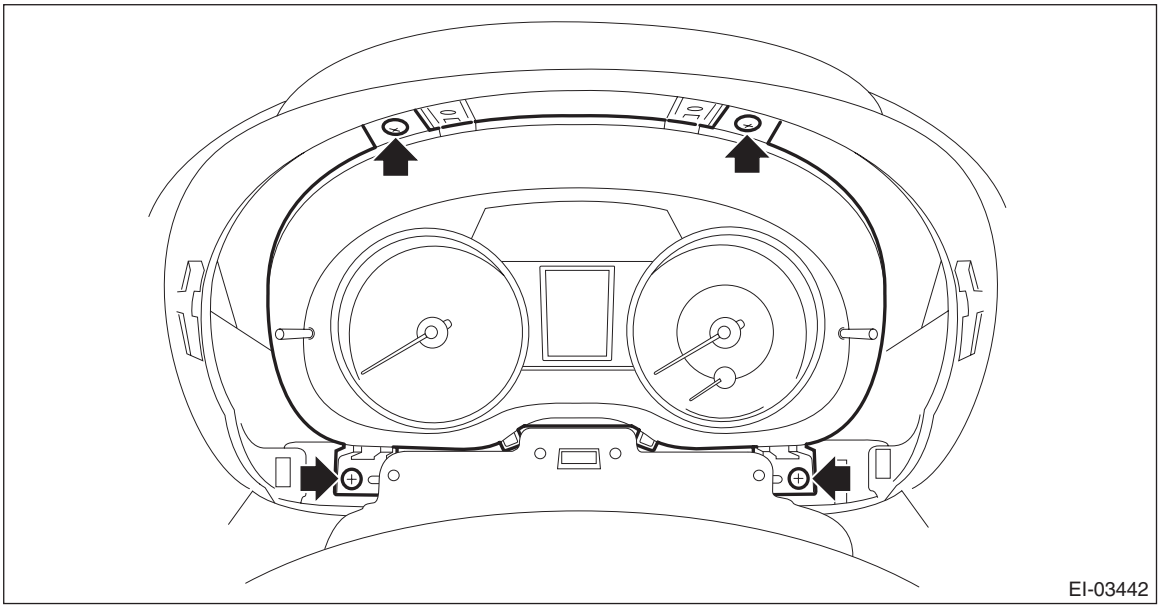
3) Release the screws, clips and claws, and remove the visor - combination meter.



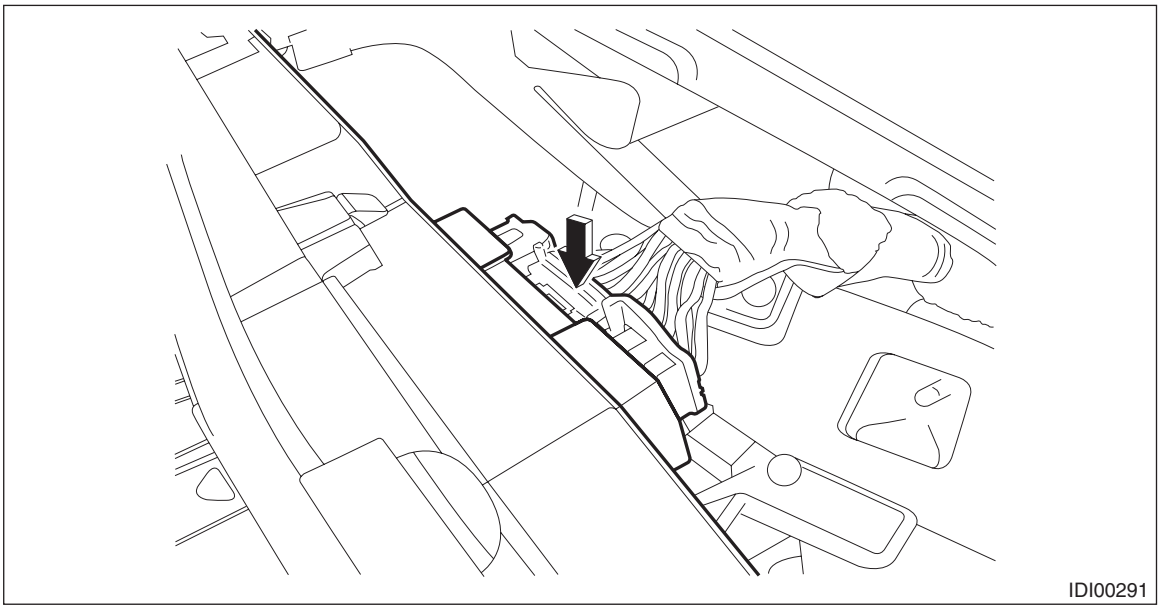
4) Remove the combination meter assembly.

**CAUTION:**
- **Be careful not to damage the meter or instrument panel.**
- **Pay particular attention to avoid damaging the meter glass.**

(1) Remove the screws.



(2) Pull the combination meter assembly toward you and disconnect the connector.



## B: INSTALLATION

**CAUTION:**
- **Make sure the electrical connector is connected securely.**
- **Make sure that each meter operates normally.**
- **When the combination meter assembly has been replaced, be sure to perform the registration of immobilizer.**

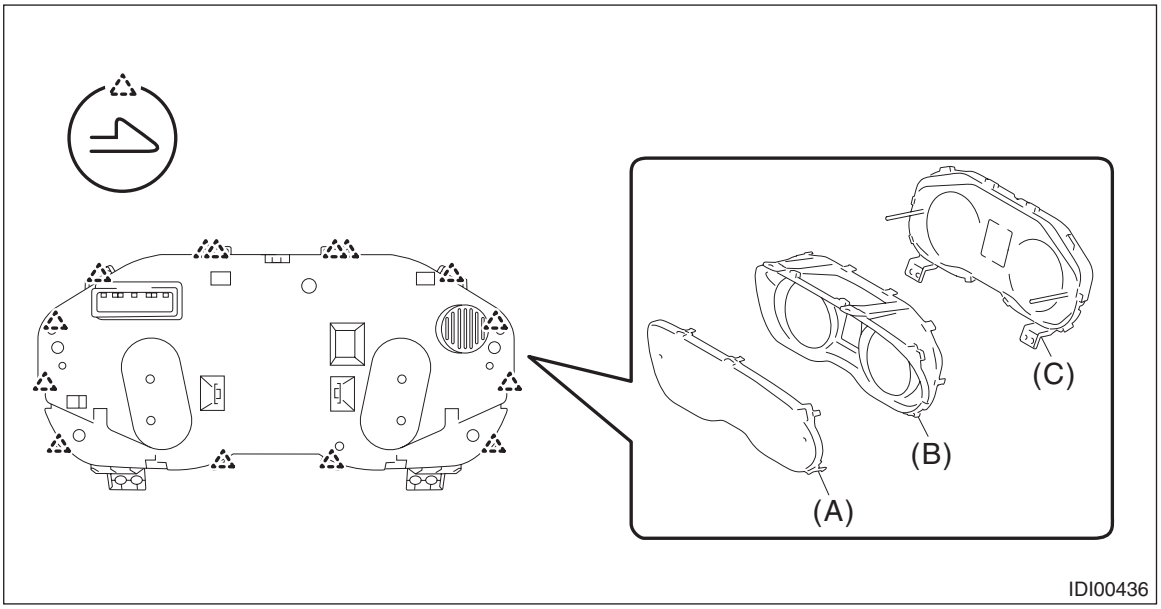
Install each part in the reverse order of removal.

# C: DISASSEMBLY

## 1. DISASSEMBLY OF COMBINATION METER ASSEMBLY

**CAUTION:**
- **Use gloves to avoid damage and getting fingerprints on the glass surface and meter surfaces.**
- **Be careful not to apply excessive force to the trip knob.**
- **Be sure not to touch the meter indicator needle.**

Release the claw, and remove the glass - combination meter (A) and visor - combination meter (B) from the meter - main assembly (C).



## 2. BULB REPLACEMENT

Because LEDs are used for all of warning lights and indicator lights of combination meters, replace the meter - main assembly if faulty.

# D: ASSEMBLY

Assemble each part in the reverse order of disassembly.

# 6. Speedometer

## A: SPECIFICATION

Since the meter - main assembly cannot be disassembled, do not remove or inspect the speedometer alone. (Do not remove the cover on the back surface.)

# 7. Tachometer

## A: SPECIFICATION

Since the meter - main assembly cannot be disassembled, do not remove or inspect the tachometer alone. (Do not remove the cover on the back surface.)

# 8. Fuel Gauge

## A: SPECIFICATION

Since the meter - main assembly cannot be disassembled, do not remove or inspect the fuel gauge alone. (Do not remove the cover on the back surface.)

# 9. ECO Gauge

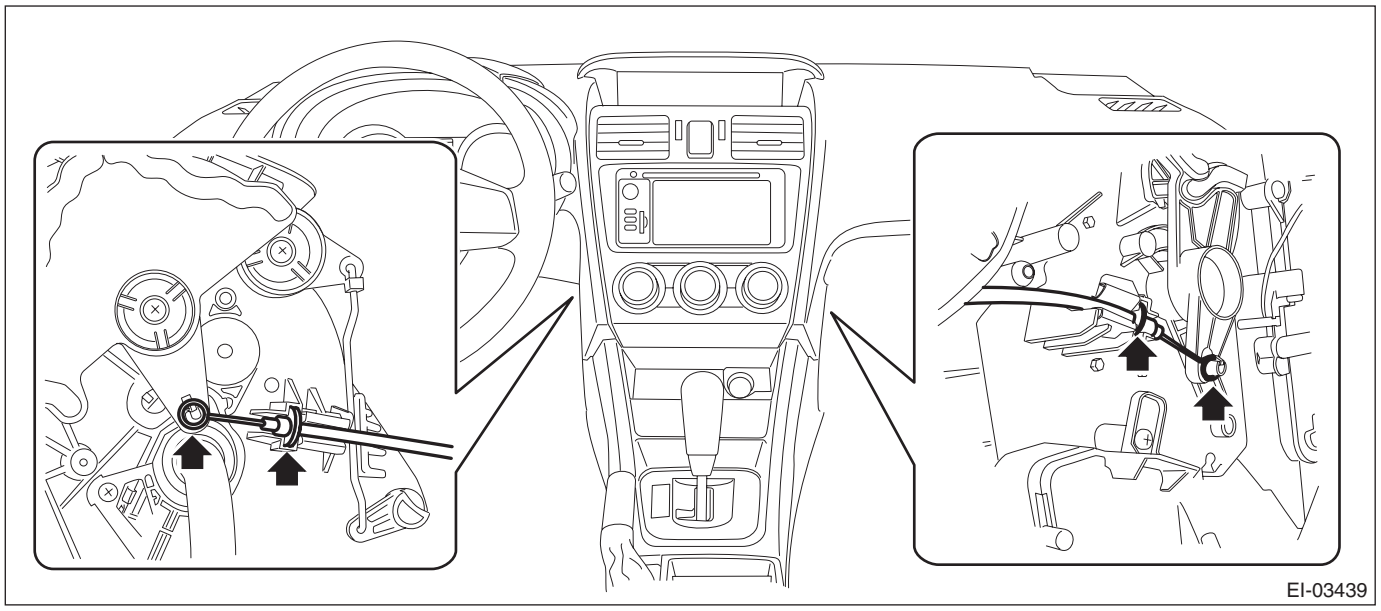
## A: SPECIFICATION

Since the meter - main assembly cannot be disassembled, do not remove or inspect the ECO gauge alone. (Do not remove the cover on the back surface.)

# 10.Multi-function Display (MFD)

## A: REMOVAL

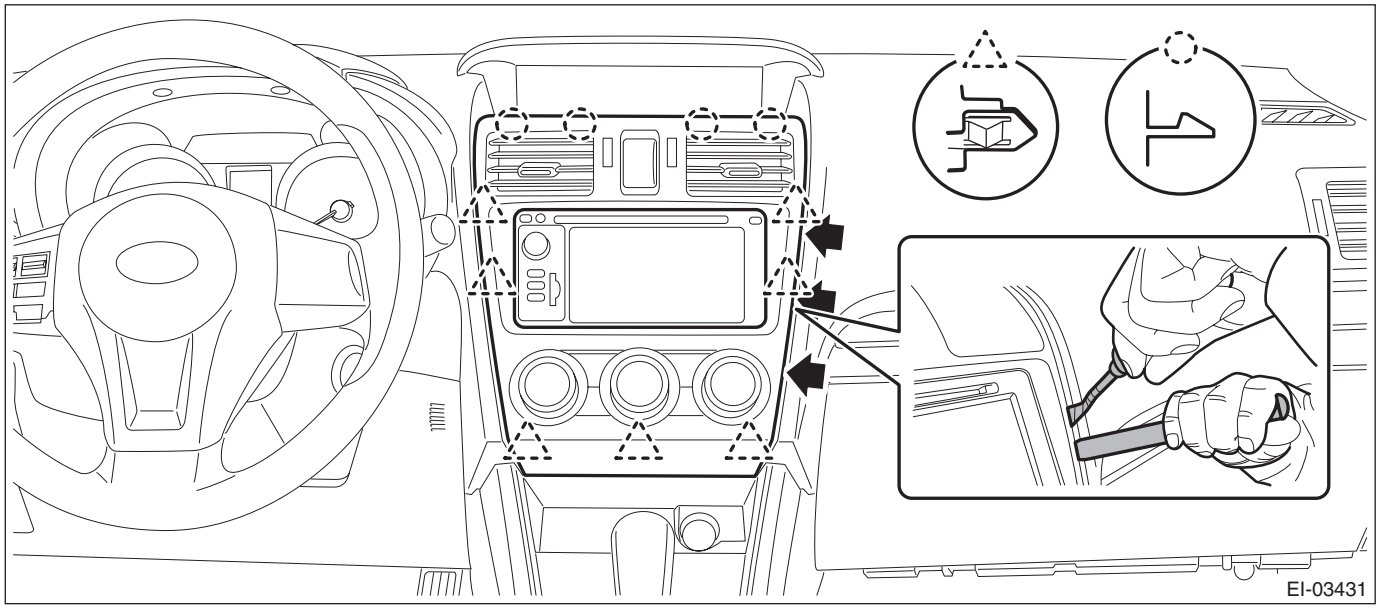
1) Disconnect the ground cable from battery.
2) On manual A/C models, disconnect the control cables from both sides of the heater and cooling unit assembly.



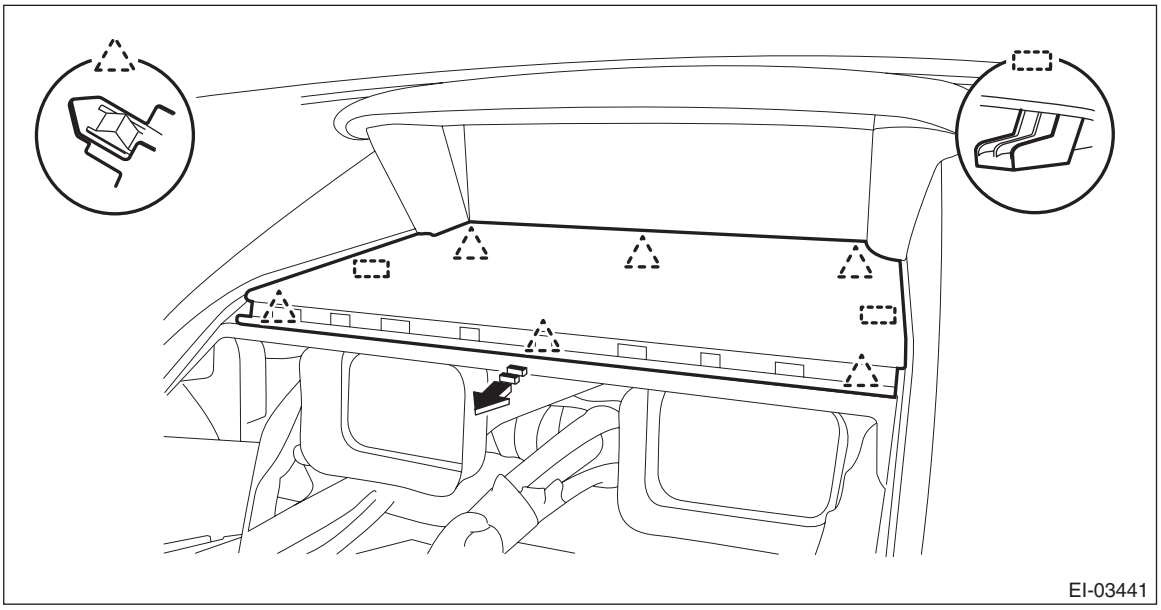
NOTE:
Remove the glove box pocket assembly on the passenger's side.
3) Remove the panel center assembly.

**CAUTION:**
- **Do not put your finger on the fin of the air vent grille. Doing so may damage the fin.**
- **Pull the panel center assembly slowly. Pulling with excessive force may damage the connector.**

(1) Insert a plastic remover to the three areas shown by the arrows, and lift up the panel center assembly slightly.
(2) With the panel center assembly lifted up slightly, release the claw by using a clip remover wrapped with protective tape.
(3) Release the rest of the claws, and pull out the panel center assembly.
(4) Disconnect the connectors, and remove the panel center assembly.



4) Release the claw and hook, and then remove the cover center UPR.

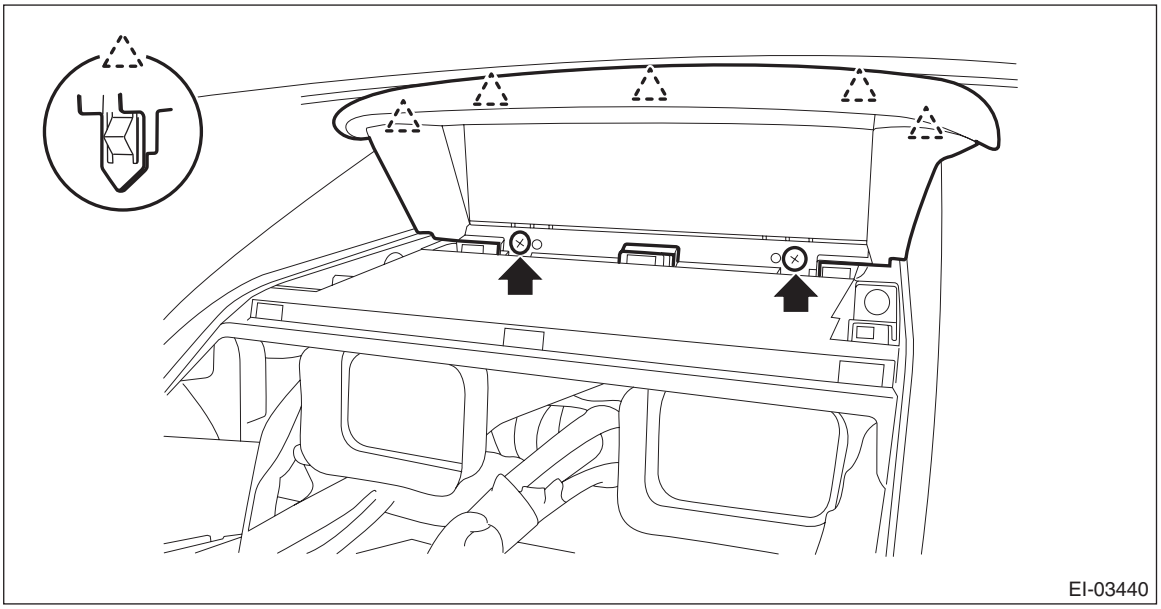


NOTE:
Lightly push up the back of the cover center UPR, hook the finger to the end portion and pull it toward you to remove it.

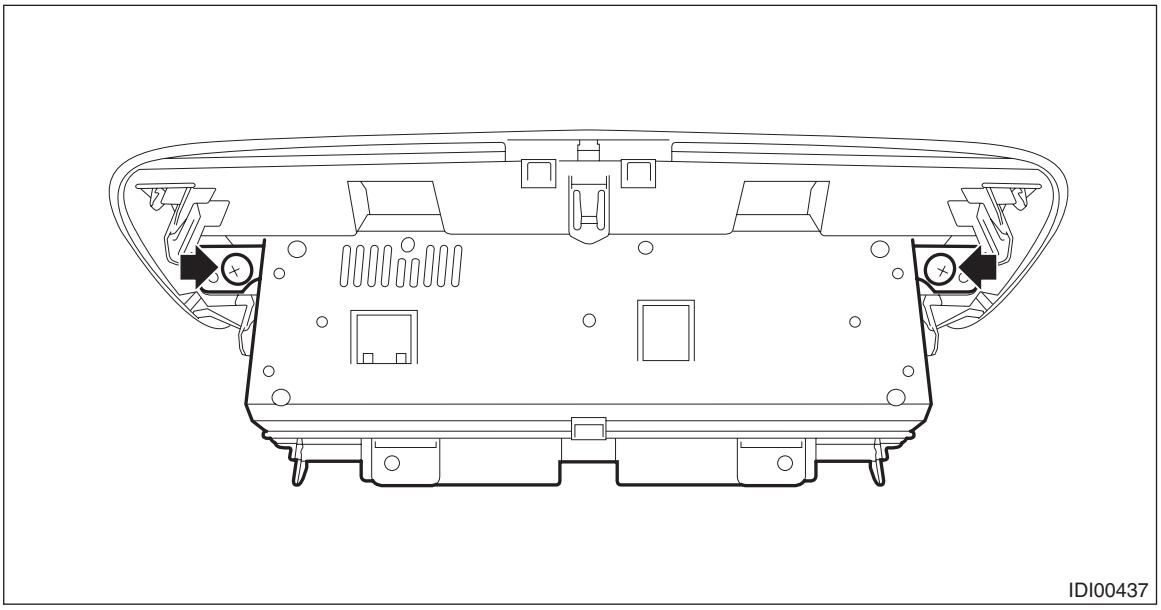
5) Remove the multi-function display.

**CAUTION:**
**Be careful not to damage the multi-function display or instrument panel.**

(1) Release the screws and claws.
(2) Pull the multi-function display assembly toward you, and disconnect the connector.



(3) Remove the screw, and remove the multi-function display from the panel - display.



## B: INSTALLATION

**CAUTION:**
- **Make sure the electrical connector is connected securely.**
- **Make sure that the multi-function display operates normally.**
- **After installing the panel center assembly, check that the air vent grille of the panel center assembly is inserted correctly into the air vent duct.**

Install each part in the reverse order of removal.

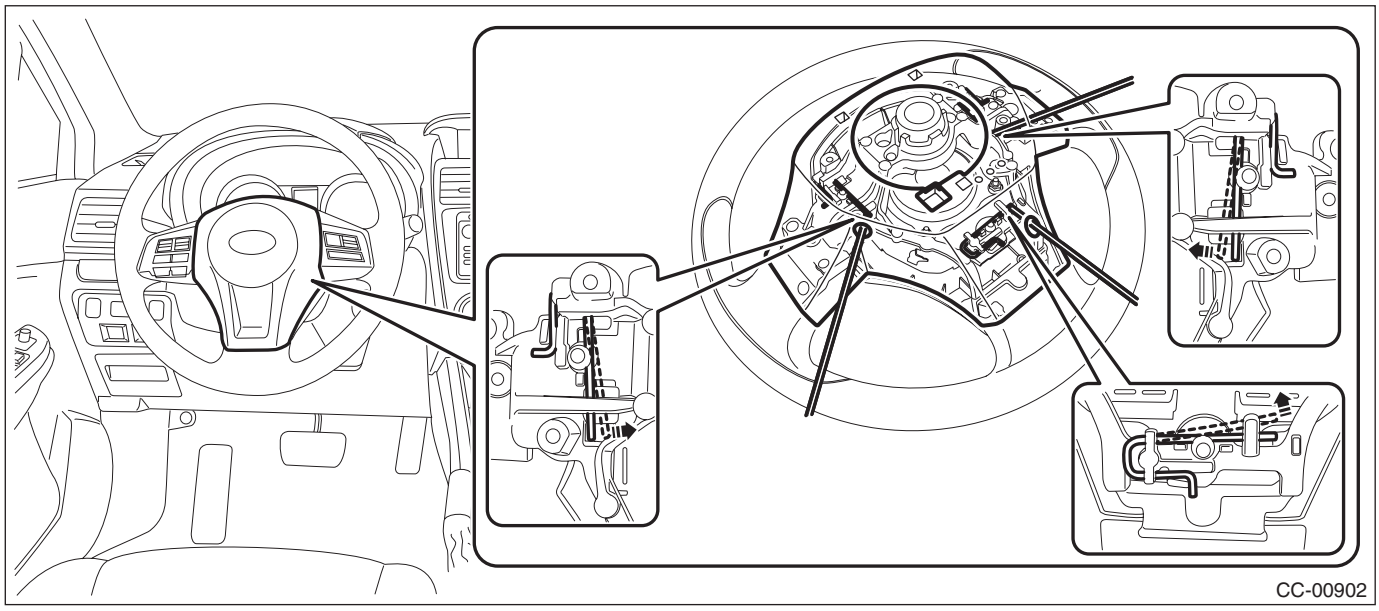
# 11.Steering Switch

## A: REMOVAL

1) Position the front wheels straight ahead. (After moving a vehicle 5 m (16 ft) or more with front wheels positioned straight ahead, make sure that the vehicle moves straight ahead.)
2) Turn the ignition switch to OFF.
3) Disconnect the ground cable from battery and wait for at least 60 seconds before starting work.
4) Remove the driver's airbag module.

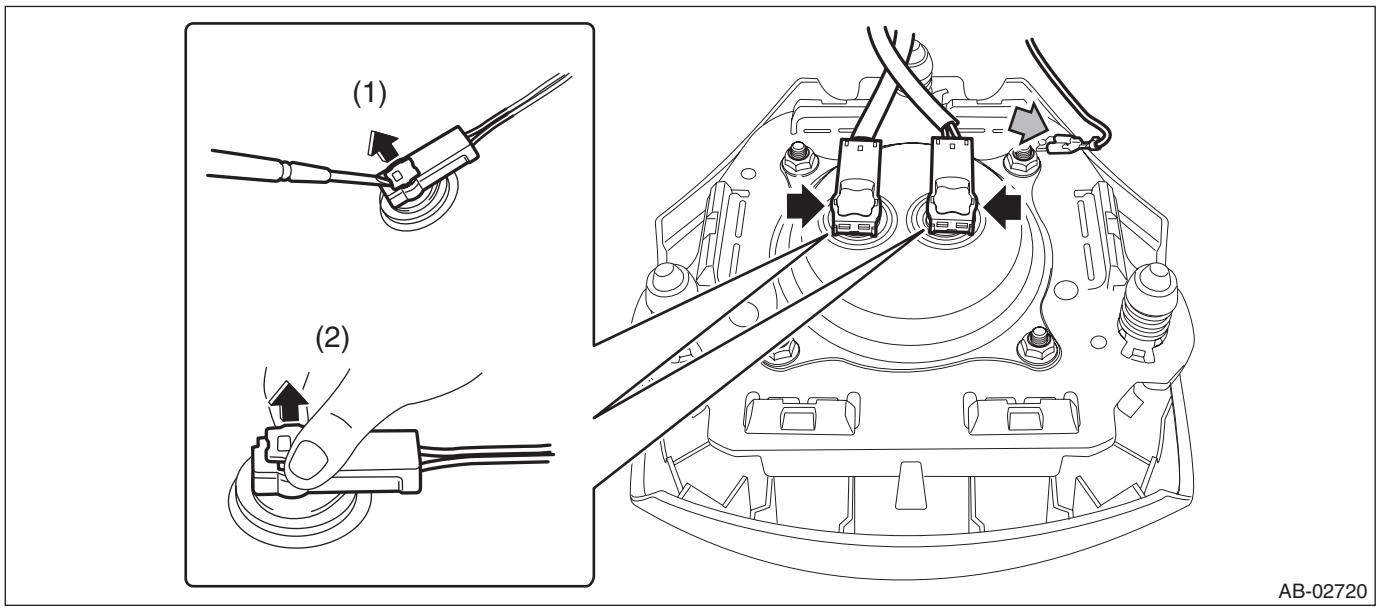
**CAUTION:**
**Before handling the airbag module, refer to "CAUTION" of "General Description" in "AIRBAG SYSTEM". <Ref. to AB-11, CAUTION, General Description.>**

(1) Using a hexagon wrench wrapped with protective tape, push in the snap pins to disengage the locks (3 places).



CC-00902

(2) Disconnect the horn harness and airbag connector, and remove the driver's airbag module. <Ref. to AB-20, PROCEDURE, Airbag Connector.>



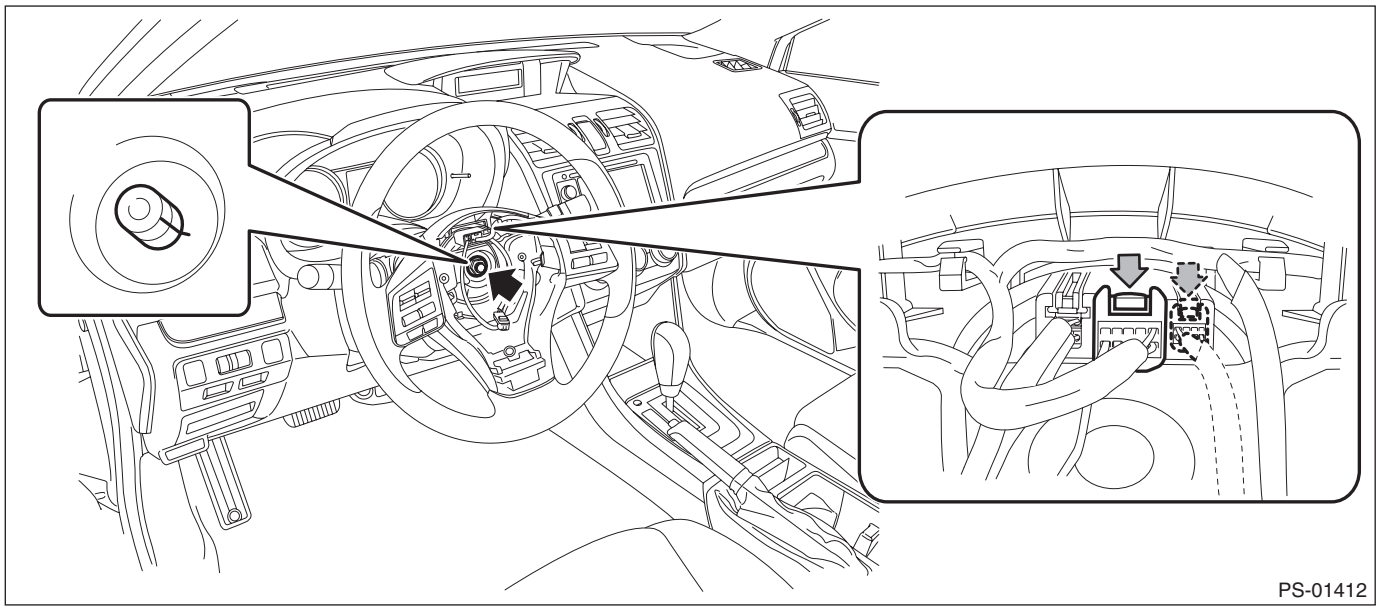
AB-02720

5) Remove the steering wheel.

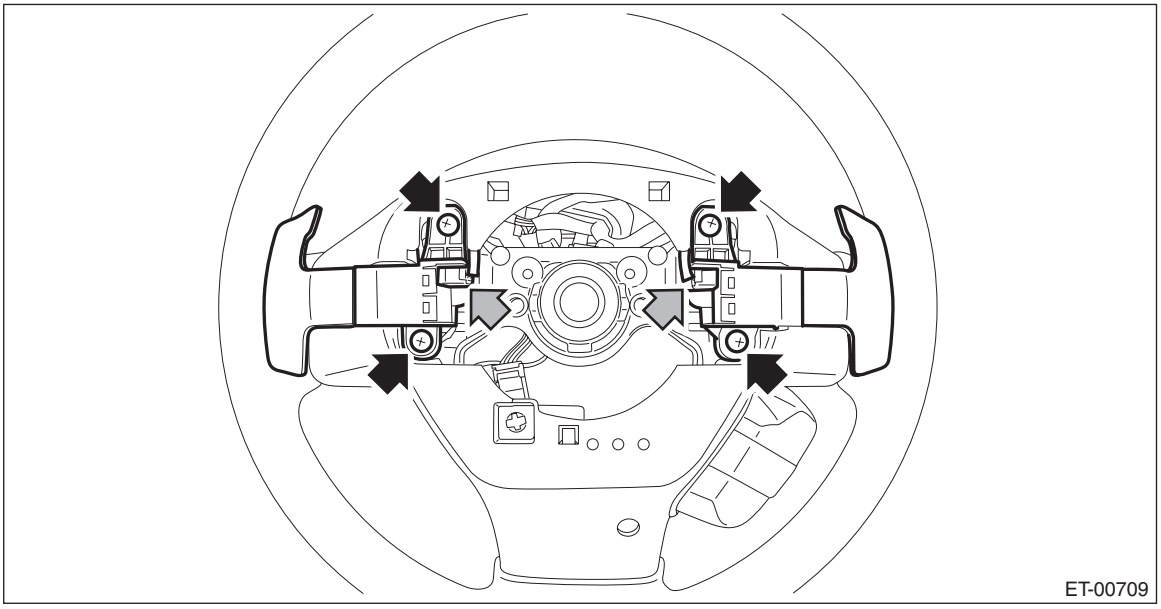
**CAUTION:**
- **Always use the steering wheel puller for removal to avoid deforming the steering wheel.**
- **If the steering wheel has been removed, make sure that the roll connector is not turned from the original position.**

(1) Disconnect the connector and remove the nut.
(2) Put alignment marks and remove the steering wheel using a steering wheel puller.

***Preparation tool:***
***Steering wheel puller***

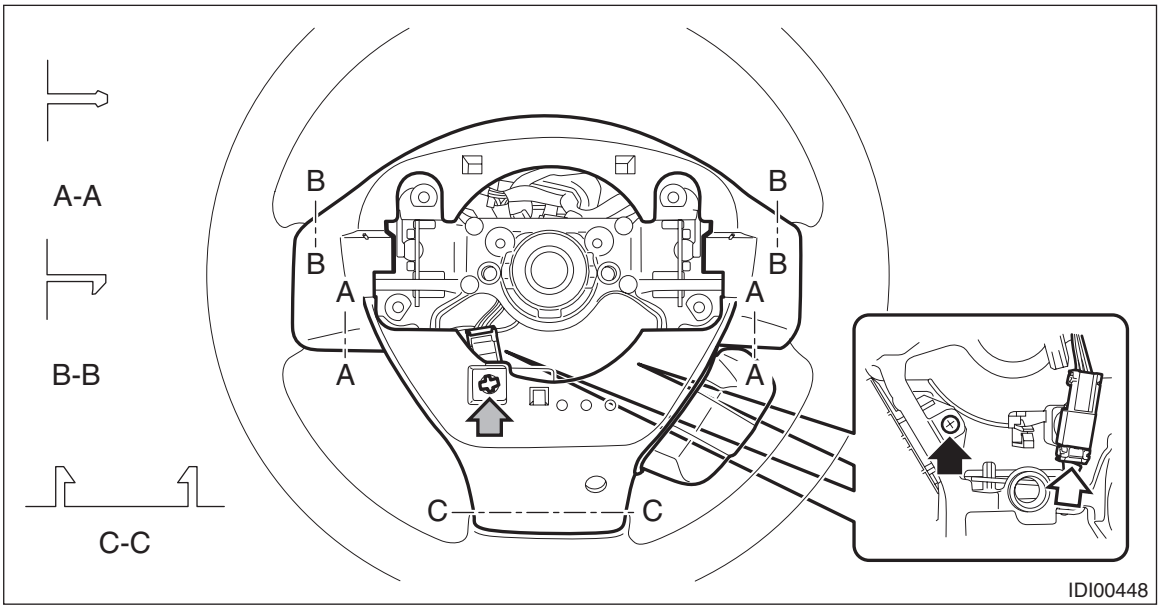


6) Remove the switch assembly - steering.
(1) Remove the screw, disconnect the connector and remove the paddle shift switch. (Model with paddle shift)

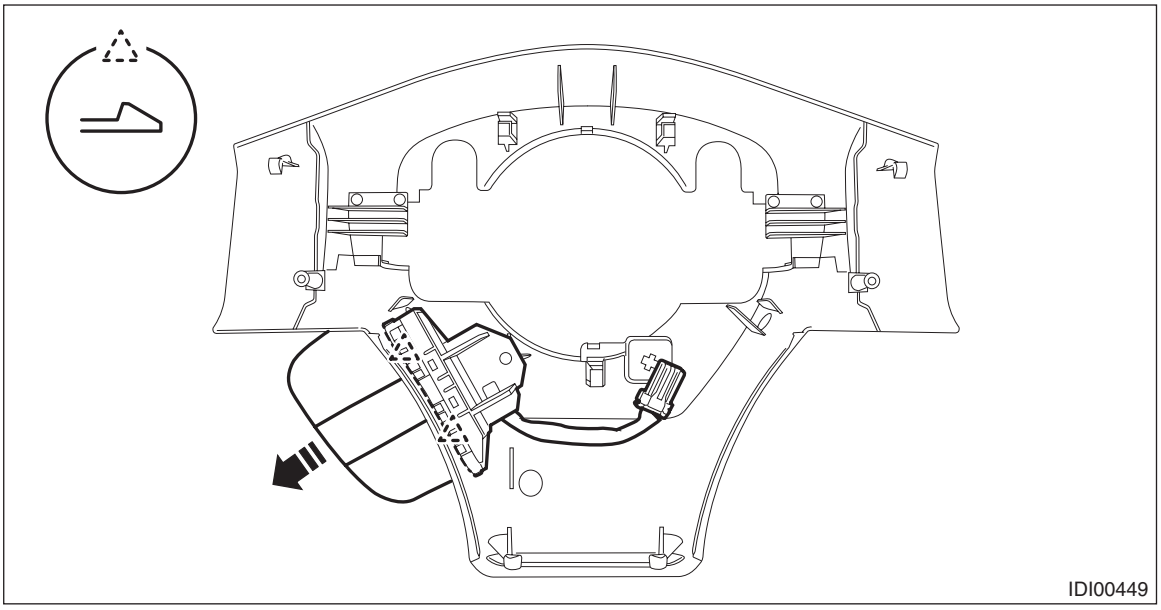


(2) Remove the connector and screw.

(3) Release the claws and clips, and remove the cover - steering wheel LWR.



(4) Remove the switch assembly - steering from the cover - steering wheel LWR.



## B: INSTALLATION

**CAUTION:**
**• Before handling the airbag module, refer to "CAUTION" of "General Description" in "AIRBAG SYSTEM". <Ref. to AB-11, CAUTION, General Description.>**
**• Do not allow harness and connectors to interfere or get tangled up with other parts.**
**• If the steering wheel and steering angle sensor (steering roll connector) are removed, perform "VDC sensor midpoint setting mode" of the VDC. <Ref. to VDC-19, VDC SENSOR MIDPOINT SETTING MODE, ADJUSTMENT, VDC Control Module and Hydraulic Control Unit (VDCCM&H/U).>**
1) Before installing steering wheel, be sure to adjust the direction of steering roll connector with steering wheel. <Ref. to AB-109, ADJUSTMENT, Roll Connector.>
2) Install each part in the reverse order of removal.

NOTE:
Align the alignment marks on the steering wheel and the column assembly - steering.

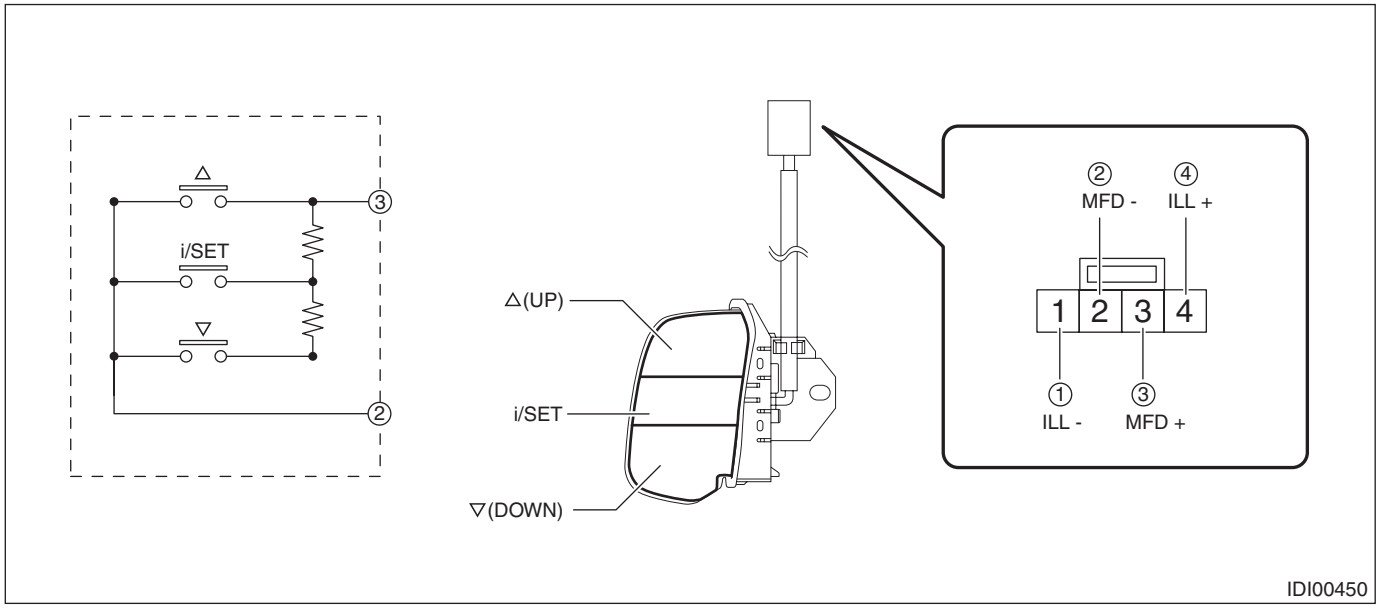
***Tightening torque:***
***Steering wheel: 39 N·m (3.98 kgf-m, 28.8 ft-lb)***

***Clearance:***
***Between cover assembly - column and steering wheel: 4 — 6 mm (0.16 — 0.24 in)***

## C: INSPECTION

**UNIT INSPECTION**

***PREPARATION TOOL:***
***Circuit tester***
1) Check the resistance between switch terminals.



| Terminal No. | Inspection conditions | | Standard |
|---|---|---|---|
| 3 — 2 | △ (UP)<br>i/SET<br>▽ (DOWN) | All OFF | Approx. 3670 Ω |
| 3 — 2 | △ (UP) | ON | Less than 1 Ω |
| 3 — 2 | i/SET | ON | Approx. 1000 Ω |
| 3 — 2 | ▽ (DOWN) | ON | Approx. 2670 Ω |

2) Replace the switch assembly - steering if the inspection result is not within the standard.

# 3. General Description

## A: CAUTION

### 1. AIRBAG SYSTEM

**CAUTION:**
**• Do not use the electrical test equipment on the airbag system wiring harnesses and connector circuits.**
**• Be careful not to damage the airbag system wiring harness.**

## B: INSPECTION

Before performing the diagnosis, check the following items which may cause problems relating the wiper or light.
1) Measure the battery voltage and check electrolyte.

***Standard voltage: 12 V or more***

***Specific gravity: 1.260 or more***
2) Check the fuse condition.
3) Check the connecting condition of harness and harness connector.

## C: PREPARATION TOOL

### 1. SPECIAL TOOL

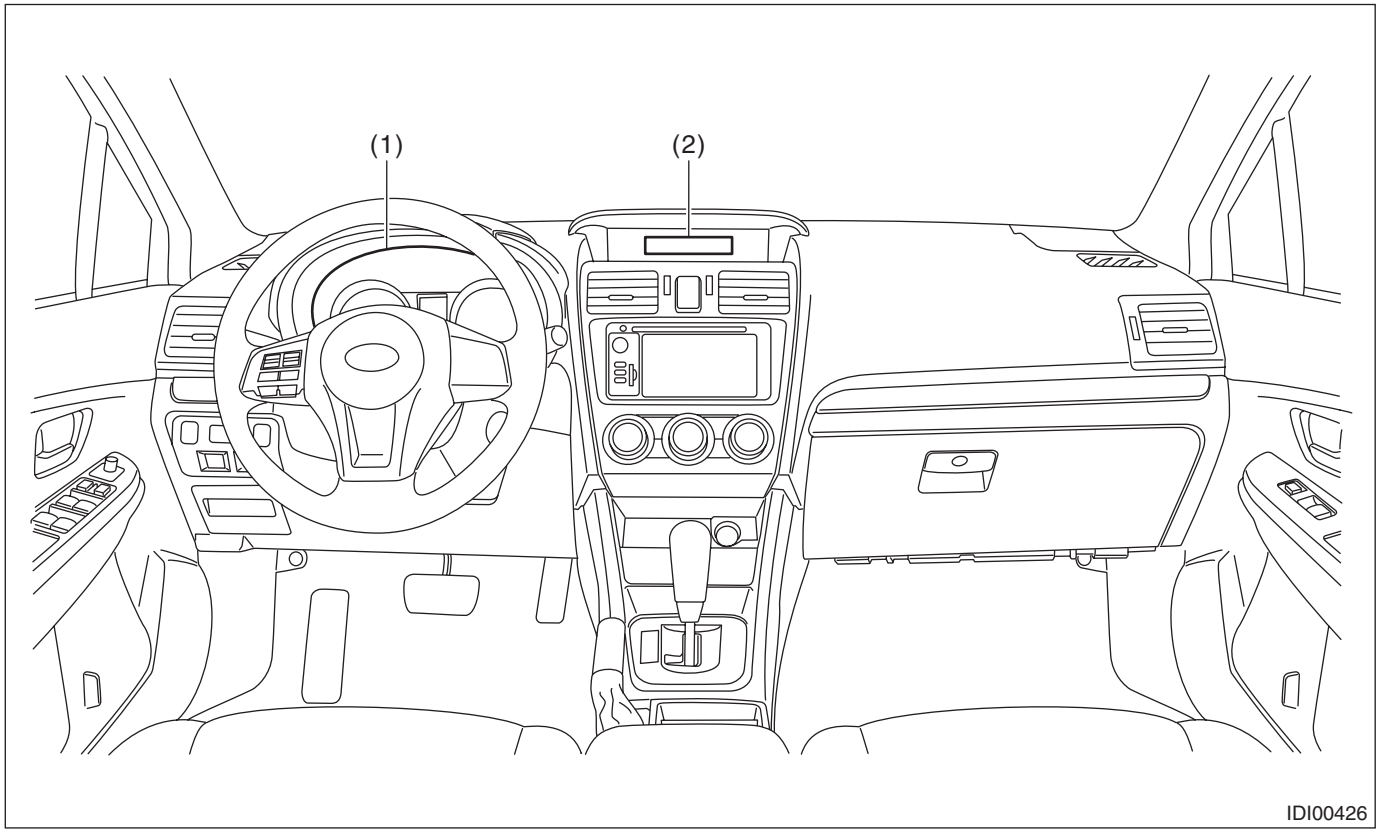
| ILLUSTRATION | TOOL NUMBER | DESCRIPTION | REMARKS |
|---|---|---|---|
|  ST1B022XU0 | 1B022XU0 | SUBARU SELECT MONITOR III KIT | Used for troubleshooting the electrical system. |

### 2. GENERAL TOOL

| TOOL NAME | REMARKS |
|---|---|
| Circuit tester | Used for measuring resistance, voltage and current. |

# 4. Electrical Component Location

## A: LOCATION

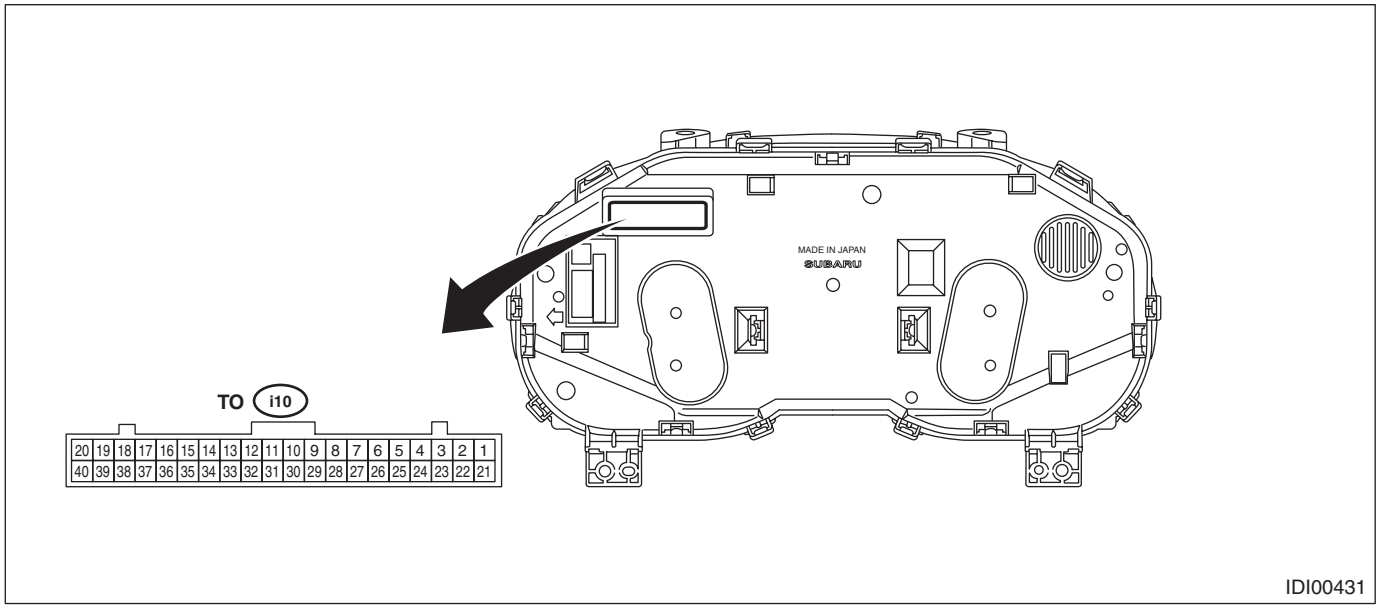


(1) Combination meter
(2) MFD

# 5. Control Module I/O Signal

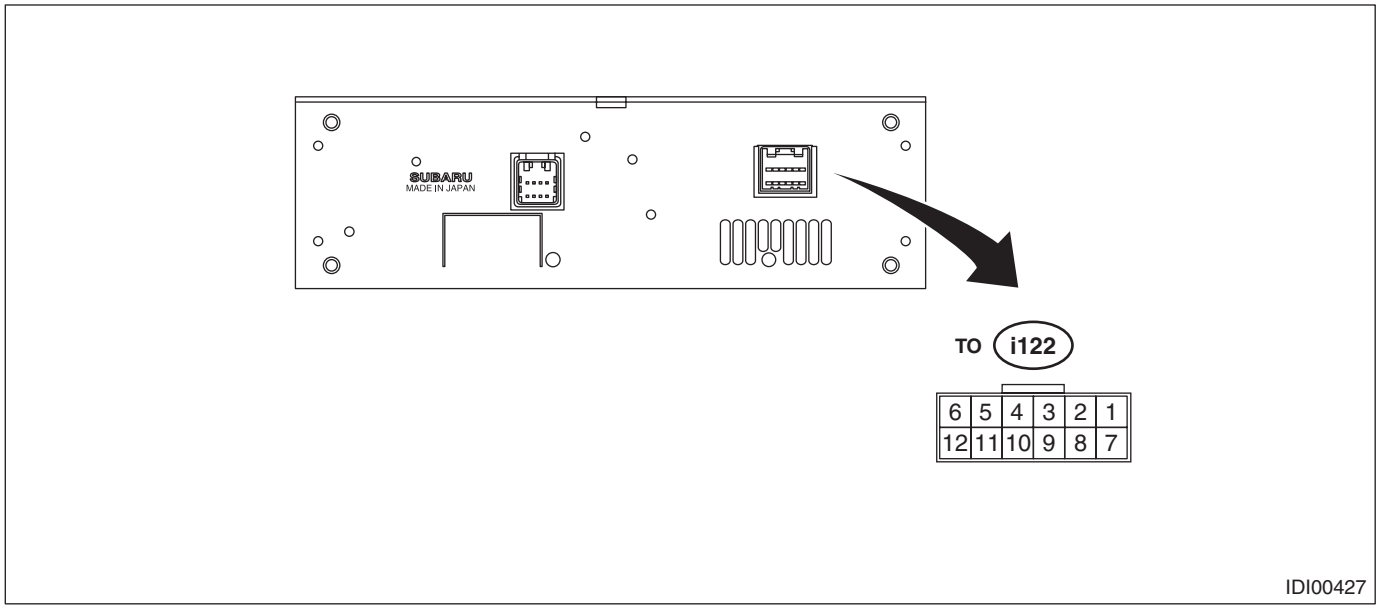
## A: ELECTRICAL SPECIFICATION

- Combination meter



| Terminal No. | Item | Measuring condition | Standard |
|---|---|---|---|
| 1 ←→ Chassis ground | Voltage | Security/immobilizer indicator light off → on | 0 V → 10 — 14 V |
| 2 ←→ Chassis ground | Voltage | Charge warning light off → on | 0 V → 10 — 14 V |
| 3 ←→ Chassis ground | Voltage | Oil pressure warning light off → on | 0 V → 10 — 14 V |
| 4 ←→ Chassis ground | Voltage | RH turn indicator off → on | 0 V → 10 — 14 V |
| 6 ←→ Chassis ground | Voltage | LH turn indicator off → on | 0 V → 10 — 14 V |
| 8 ←→ Chassis ground | Voltage | Auto headlight beam leveler warning light off → on | 0 V → 10 — 14 V |
| 15 ←→ Chassis ground | Resistance | Driver's seat belt switch ON | Less than 1 Ω |
| 16 ←→ Chassis ground | Resistance | Passenger's seat belt switch ON | Less than 1 Ω |
| 20 ←→ Chassis ground | Voltage | IG OFF → ON | 0 V → 10 — 14 V |
| 21 ←→ Chassis ground | — | Washer fluid level sensor | — |
| 23 ←→ Chassis ground | — | Brake fluid level switch | — |
| 25 ←→ 37 | Resistance | Fuel level sensor | 10 — 600 Ω |
| 27 ←→ 36 | Resistance | Ambient sensor | 1 — 35 kΩ |
| 28 (UART) ←→ Chassis ground | — | Cannot be measured | — |
| 32 (CAN–) ←→ Chassis ground | — | Cannot be measured | — |
| 33 (CAN+) ←→ Chassis ground | — | Cannot be measured | — |
| 34 ←→ Chassis ground | Resistance | Always | Less than 1 Ω |
| 35 ←→ Chassis ground | Resistance | Always | Less than 1 Ω |
| 36 ←→ Chassis ground | Resistance | Always | Less than 1 Ω |
| 37 ←→ Chassis ground | Resistance | Always | Less than 1 Ω |
| 38 ←→ Chassis ground | Resistance | Always | Less than 1 Ω |
| 39 ←→ Chassis ground | Resistance | Always | Less than 1 Ω |
| 40 ←→ Chassis ground | Voltage | Always | 10 — 14 V |

- MFD



| Terminal No. | Item | Measuring condition | Standard |
|---|---|---|---|
| 1(+B) ←→ Chassis ground | Voltage | Always | 10 — 14 V |
| 2 (GND) ←→ chassis ground | Resistance | Always | Less than 1 Ω |
| 3 (IGN) ←→ Chassis ground | Voltage | IG OFF → ON | 0 V → 10 — 14 V |
| 4 (STR-) ←→ Chassis ground | — | Cannot be measured (steering switch communication line) | — |
| 5 (CAN-) ←→ Chassis ground | — | Cannot be measured (CAN communication line) | — |
| 6 (CAN+) ←→ Chassis ground | — | Cannot be measured (CAN communication line) | — |
| 9 (UART) ←→ Chassis ground | — | Cannot be measured (meter communication line) | — |
| 10 ←→ Chassis ground | Voltage | Passenger's airbag ON indicator (when illuminating) | Less than 1 V |
| 11 ←→ Chassis ground | Voltage | Passenger's airbag OFF indicator (when illuminating) | Less than 1 V |
| 12 (STR+) ←→ Chassis ground | — | Cannot be measured (steering switch communication line) | — |

# 6. Subaru Select Monitor

## A: OPERATION

- For operation procedures, refer to the “PC application help for Subaru Select Monitor”.
- If the combination meter or MFD can not communicate with Subaru Select Monitor, perform the “Communication for Initializing Impossible”. <Ref. to IDI(diag)-9, INSPECTION, Subaru Select Monitor.>

If the DTCs related to the LAN system are not displayed, perform the inspection by connecting the Subaru Select Monitor to another vehicle which is operating properly and by establishing the communication.

# B: INSPECTION

## 1. COMMUNICATION FOR INITIALIZING IMPOSSIBLE (COMBINATION METER)

**DETECTING CONDITION:**

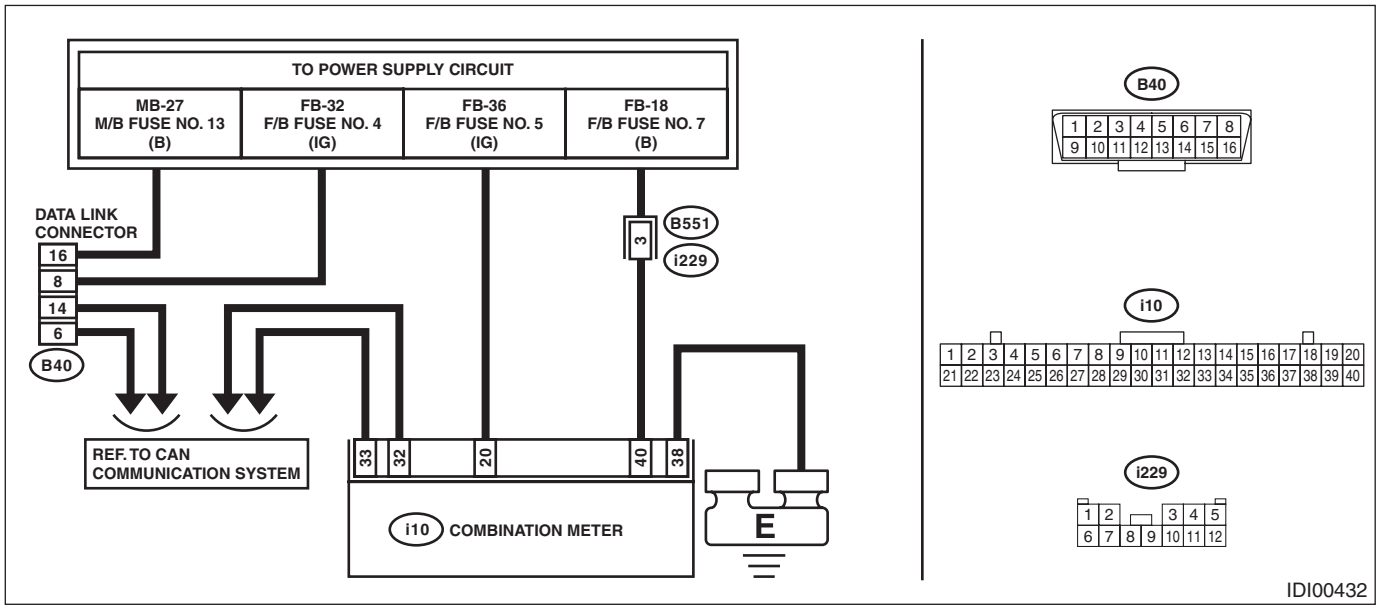
- Defective harness connector
- Power supply circuit malfunction
- Defective combination meter
- Defective CAN communication circuit
- Defective Subaru Select Monitor

**TROUBLE SYMPTOM:**

Communication is impossible between combination meter and Subaru Select Monitor.

**WIRING DIAGRAM:**

- Combination meter system <Ref. to WI-54, WIRING DIAGRAM, Combination Meter System.>
- CAN communication system <Ref. to WI-46, WIRING DIAGRAM, CAN Communication System.>



| Step | | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK OTHER COMMUNICATION.**<br>Communicate with the system other than the combination meter using the Subaru Select Monitor. | Is the communication to other control module possible? | Go to step **2**. | Perform the "Communication for Initializing Impossible" of LAN system. <Ref. to LAN(diag)-9, COMMUNICATION FOR INITIALIZING IMPOSSIBLE, Subaru Select Monitor.> |
| 2 | **CHECK DTC.**<br>Read the DTC of the LAN system using the Subaru Select Monitor. <Ref. to LAN(diag)-22, OPERATION, Read Diagnostic Trouble Code (DTC).> | Is DTC detected? | Perform the diagnosis according to DTC. | Go to step **3**. |

| Step | | Check | Yes | No |
|---|---|---|---|---|
| 3 | **CHECK COMBINATION METER.**<br>1) Turn the ignition switch to OFF.<br>2) Disconnect the connector of combination meter.<br>3) Connect the disconnected connectors.<br>4) Communicate with the combination meter using the Subaru Select Monitor. | Is communication possible? | It is possible that temporary poor communication occurs. | Replace the combination meter. <Ref. to IDI-17, Combination Meter.> |

## 2. COMMUNICATION FOR INITIALIZING IMPOSSIBLE (MFD)

**DETECTING CONDITION:**

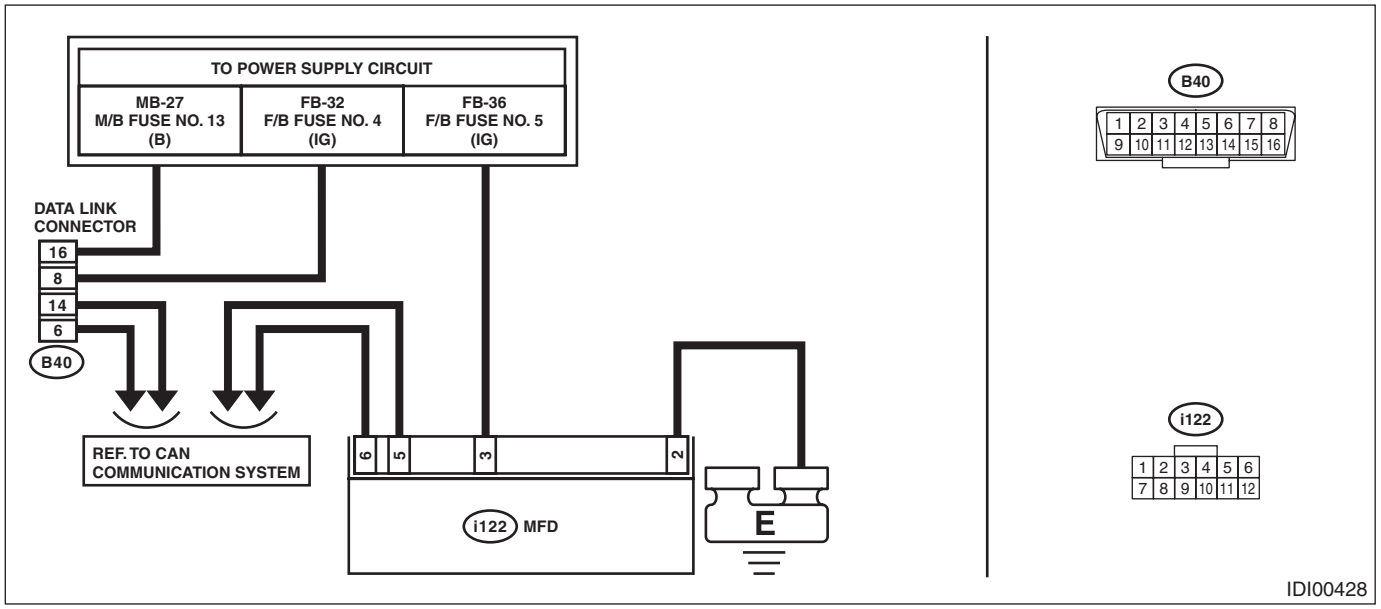
- Defective harness connector
- Power supply circuit malfunction
- Defective MFD
- Defective CAN communication circuit
- Defective Subaru Select Monitor

**TROUBLE SYMPTOM:**

Communication is impossible between MFD and Subaru Select Monitor.

**WIRING DIAGRAM:**

- Multi-function display (MFD) system <Ref. to WI-108, WIRING DIAGRAM, Multi-function Display (MFD) System.>
- CAN communication system <Ref. to WI-46, WIRING DIAGRAM, CAN Communication System.>



| | Step | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK OTHER COMMUNICATION.**<br>Communicate with the system other than the MFD using the Subaru Select Monitor. | Is the communication to other control module possible? | Go to step **2**. | Perform the "Communication for Initializing Impossible" of LAN system. <Ref. to LAN(diag)-9, COMMUNICATION FOR INITIALIZING IMPOSSIBLE, Subaru Select Monitor.> |
| 2 | **CHECK DTC.**<br>Read the DTC of the LAN system using the Subaru Select Monitor. <Ref. to LAN(diag)-22, OPERATION, Read Diagnostic Trouble Code (DTC).> | Is DTC detected? | Perform the diagnosis according to DTC. | Go to step **3**. |
| 3 | **CHECK MFD.**<br>1) Turn the ignition switch to OFF.<br>2) Disconnect the MFD connector.<br>3) Connect the disconnected connectors.<br>4) Communicate with the MFD using the Subaru Select Monitor. | Is communication possible? | It is possible that temporary poor communication occurs. | Replace the MFD. <Ref. to IDI-24, Multi-function Display (MFD).> |

# 7. Read Diagnostic Trouble Code (DTC)

## A: OPERATION

- For operation procedures, refer to the “PC application help for Subaru Select Monitor”.
- For detailed concerning DTC, refer to the List of Diagnostic Trouble Codes (DTC). <Ref. to IDI(diag)-21, LIST, List of Diagnostic Trouble Code (DTC).>

# 8. Clear Memory Mode

## A: OPERATION

For operation procedures, refer to the “PC application help for Subaru Select Monitor”.

# 9. Read Current Data

## A: OPERATION

For detailed operation procedures, refer to “PC application help for Subaru Select Monitor”.

## B: LIST

- Combination meter

| Items to be displayed | Unit of measure | Remarks | Note |
|---|---|---|---|
| Power on trip number | times | Information of timestamp | — |
| Power on supply system | — | Information of timestamp | — |
| Past time after power on | ms | Information of timestamp | — |
| Fuel sensing value | Ω | Fuel sensor value display | — |

NOTE:
For detailed operation procedures, refer to “PC application help for Subaru Select Monitor”.

# 10.System Operation Check Mode

## A: OPERATION

For detailed operation procedures, refer to “PC application help for Subaru Select Monitor”.

NOTE:
If not equipped (based on area or condition), process will not go on.

**CAUTION:**
**After executing the system operation check mode, execute the Clear Memory Mode. <Ref. to IDI(diag)-13, OPERATION, Clear Memory Mode.>**

## B: LIST

# 11.User Customizing

## A: OPERATION

For operation procedures, refer to the “PC application help for Subaru Select Monitor”.

## B: LIST

- Combination meter

| Items to be displayed | Initial setting value | Customize setting | Note |
|---|---|---|---|
| External air temperature compensation value | ±0°C | -5°C — +5°C | Temperature compensation can only be performed by 1°C (1°C change = 1.8°F) interval. |
| Mean fuel consumption compensation value | ±0°% | +10% — -10% | — |
| Second level belt warning customize | Shifting prohibited | Shifting prohibited/ Shifting permitted | — |

# 12.List of Diagnostic Trouble Code (DTC)

## A: LIST

| DTC | Item | Content of diagnosis | Reference |
|---|---|---|---|
| U0073 | Control Module Communication Bus “A” Off | Detected when CAN line abnormality is detected. | <Ref. to IDI(diag)-22, DTC U0073 CONTROL MODULE COMMUNICATION BUS “A” OFF, Diagnostic Procedure with Diagnostic Trouble Code (DTC).> |
| U0100 | Lost Communication With ECM/PCM “A” | Detected when CAN data from the engine control module (ECM) does not arrive. | <Ref. to IDI(diag)-22, DTC U0100 LOST COMMUNICATION WITH ECM/PCM “A”, Diagnostic Procedure with Diagnostic Trouble Code (DTC).> |
| U0101 | Lost Communication With TCM | Detected when CAN data from TCM does not arrive. | <Ref. to IDI(diag)-22, DTC U0101 LOST COMMUNICATION WITH TCM, Diagnostic Procedure with Diagnostic Trouble Code (DTC).> |
| U0122 | Lost Communication With Vehicle Dynamics Control Module | Detected when CAN data from VDC does not arrive. | <Ref. to IDI(diag)-22, DTC U0122 LOST COMMUNICATION WITH VEHICLE DYNAMICS CONTROL MODULE, Diagnostic Procedure with Diagnostic Trouble Code (DTC).> |
| U0131 | Lost Communication With Power Steering Control Module | Detected when CAN data from electric power steering CM does not arrive. | <Ref. to IDI(diag)-22, DTC U0131 LOST COMMUNICATION WITH POWER STEERING CONTROL MODULE, Diagnostic Procedure with Diagnostic Trouble Code (DTC).> |
| U0140 | Lost Communication With Body Control Module | Detected when CAN data from body integrated unit does not arrive. | <Ref. to IDI(diag)-22, DTC U0140 LOST COMMUNICATION WITH BODY CONTROL MODULE, Diagnostic Procedure with Diagnostic Trouble Code (DTC).> |
| U0151 | Lost Communication With Restraints Control Module | Detected when CAN data from airbag CM does not arrive. | <Ref. to IDI(diag)-22, DTC U0151 LOST COMMUNICATION WITH RESTRAINTS CONTROL MODULE, Diagnostic Procedure with Diagnostic Trouble Code (DTC).> |
| U0164 | Lost Communication With HVAC Control Module | Detected when CAN data from A/C CM does not arrive. | <Ref. to IDI(diag)-22, DTC U0164 LOST COMMUNICATION WITH HVAC CONTROL MODULE, Diagnostic Procedure with Diagnostic Trouble Code (DTC).> |
| U1201 | CAN-HS Counter Abnormal | Detected when CAN data is abnormal. | <Ref. to IDI(diag)-22, DTC U1201 CAN-HS COUNTER ABNORMAL, Diagnostic Procedure with Diagnostic Trouble Code (DTC).> |
| U1650 | Invalid Data Received From Meter (UART) | UART data from the combination meter is abnormal. | <Ref. to IDI(diag)-23, DTC U1650 INVALID DATA RECEIVED FROM METER (UART), Diagnostic Procedure with Diagnostic Trouble Code (DTC).> |
| U1651 | Lost Communication With Meter (UART) | UART data from the combination meter has not arrived. | <Ref. to IDI(diag)-24, DTC U1651 LOST COMMUNICATION WITH METER (UART), Diagnostic Procedure with Diagnostic Trouble Code (DTC).> |
| B2220 | Break The Wire of Ign | Voltage malfunction caused by poor contact of IGN power supply circuits. | <Ref. to IDI(diag)-26, DTC B2220 BREAK THE WIRE OF IGN, Diagnostic Procedure with Diagnostic Trouble Code (DTC).> |
| B2222 | System Microcomputer Fail | When microcomputer froze. | <Ref. to IDI(diag)-27, DTC B2222 SYSTEM MICROCOMPUTER FAIL, Diagnostic Procedure with Diagnostic Trouble Code (DTC).> |
| B2223 | GERDA Fail | When transmitting and receiving of data cannot be done normally between system microcomputer and image microcomputer. | <Ref. to IDI(diag)-27, DTC B2223 GERDA FAIL, Diagnostic Procedure with Diagnostic Trouble Code (DTC).> |
| B1500 | Fuel Sender Open/ Short-Circuit Detection | Fuel gauge circuit is open or shorted. | <Ref. to IDI(diag)-28, DTC B1500 FUEL SENDER OPEN/ SHORT-CIRCUIT DETECTION, Diagnostic Procedure with Diagnostic Trouble Code (DTC).> |
| B1501 | Power Supply System Error Detection | Combination meter power supply circuit is open or shorted. | <Ref. to IDI(diag)-30, DTC B1501 POWER SUPPLY SYSTEM ERROR DETECTION, Diagnostic Procedure with Diagnostic Trouble Code (DTC).> |
| B1507 | External Air Temperature Open/Short-Circuit Detection | External air temperature sensor circuit is open or shorted. | <Ref. to IDI(diag)-31, DTC B1507 EXTERNAL AIR TEMPERATURE OPEN/SHORT-CIRCUIT DETECTION, Diagnostic Procedure with Diagnostic Trouble Code (DTC).> |

# 13.Diagnostic Procedure with Diagnostic Trouble Code (DTC)

## A: DTC U0073 CONTROL MODULE COMMUNICATION BUS “A” OFF

Detected when defective CAN line is detected.

NOTE:
Perform the diagnosis for LAN system. <Ref. to LAN(diag)-2, PROCEDURE, Basic Diagnostic Procedure.>

## B: DTC U0100 LOST COMMUNICATION WITH ECM/PCM “A”

Detected when CAN data is not received from engine control module (ECM).

NOTE:
Perform the diagnosis for LAN system. <Ref. to LAN(diag)-2, PROCEDURE, Basic Diagnostic Procedure.>

## C: DTC U0101 LOST COMMUNICATION WITH TCM

Detected when CAN data is not received from TCM.

NOTE:
Perform the diagnosis for LAN system. <Ref. to LAN(diag)-2, PROCEDURE, Basic Diagnostic Procedure.>

## D: DTC U0122 LOST COMMUNICATION WITH VEHICLE DYNAMICS CONTROL MODULE

Detected when CAN data is not received from VDC.

NOTE:
Perform the diagnosis for LAN system. <Ref. to LAN(diag)-2, PROCEDURE, Basic Diagnostic Procedure.>

## E: DTC U0131 LOST COMMUNICATION WITH POWER STEERING CONTROL MODULE

Detected when CAN data is not received from electric power steering CM.

NOTE:
Perform the diagnosis for LAN system. <Ref. to LAN(diag)-2, PROCEDURE, Basic Diagnostic Procedure.>

## F: DTC U0140 LOST COMMUNICATION WITH BODY CONTROL MODULE

Detected when CAN data is not received from body integrated unit.

NOTE:
Perform the diagnosis for LAN system. <Ref. to LAN(diag)-2, PROCEDURE, Basic Diagnostic Procedure.>

## G: DTC U0151 LOST COMMUNICATION WITH RESTRAINTS CONTROL MODULE

Detected when CAN data is not received from airbag CM.

NOTE:
Perform the diagnosis for LAN system. <Ref. to LAN(diag)-2, PROCEDURE, Basic Diagnostic Procedure.>

## H: DTC U0164 LOST COMMUNICATION WITH HVAC CONTROL MODULE

Detected when CAN data is not received from A/C CM.

NOTE:
Perform the diagnosis for LAN system. <Ref. to LAN(diag)-2, PROCEDURE, Basic Diagnostic Procedure.>

## I: DTC U1201 CAN-HS COUNTER ABNORMAL

Detected when CAN data is abnormal.

NOTE:
Perform the diagnosis for LAN system. <Ref. to LAN(diag)-2, PROCEDURE, Basic Diagnostic Procedure.>

## J: DTC U1650 INVALID DATA RECEIVED FROM METER (UART)

**DTC DETECTING CONDITION:**
There is an abnormality in UART data from combination meter.
**TROUBLE SYMPTOM:**
LCD is not displayed.

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK LAN SYSTEM.**<br>Read the DTC of the LAN system using the Subaru Select Monitor. <Ref. to LAN(diag)-22, OPERATION, Read Diagnostic Trouble Code (DTC).> | Is DTC displayed? | Perform the diagnosis according to DTC. | Go to step **2**. |
| 2 | **CHECK CONNECTOR.**<br>1) Disconnect the MFD connector and meter connector.<br>2) Connect the disconnected connectors.<br>3) Read the DTC of the MFD using the Subaru Select Monitor. | Is DTC U1650 a current malfunction? | Go to step **3**. | There was poor contact of connector. |
| 3 | **CHECK COMBINATION METER.**<br>1) Replace the combination meter. <Ref. to IDI-17, Combination Meter.><br>2) Read the DTC of the MFD using the Subaru Select Monitor. | Is DTC U1650 a current malfunction? | Go to step **4**. | There was something wrong with the meter. |
| 4 | **CHECK COMBINATION METER.**<br>1) Replace the current combination meter with the original combination meter.<br>2) Replace the MFD. <Ref. to IDI-24, Multi-function Display (MFD).><br>3) Read the DTC of the MFD using the Subaru Select Monitor. | Is DTC U1650 a current malfunction? | Replace the meter. <Ref. to IDI-17, Combination Meter.> | There was an abnormality in MFD. |

# K: DTC U1651 LOST COMMUNICATION WITH METER (UART)

**DTC DETECTING CONDITION:**
UART data from combination meter is not received.
**TROUBLE SYMPTOM:**
LCD is not displayed.
**WIRING DIAGRAM:**
Multi-function display (MFD) system <Ref. to WI-108, WIRING DIAGRAM, Multi-function Display (MFD) System.>

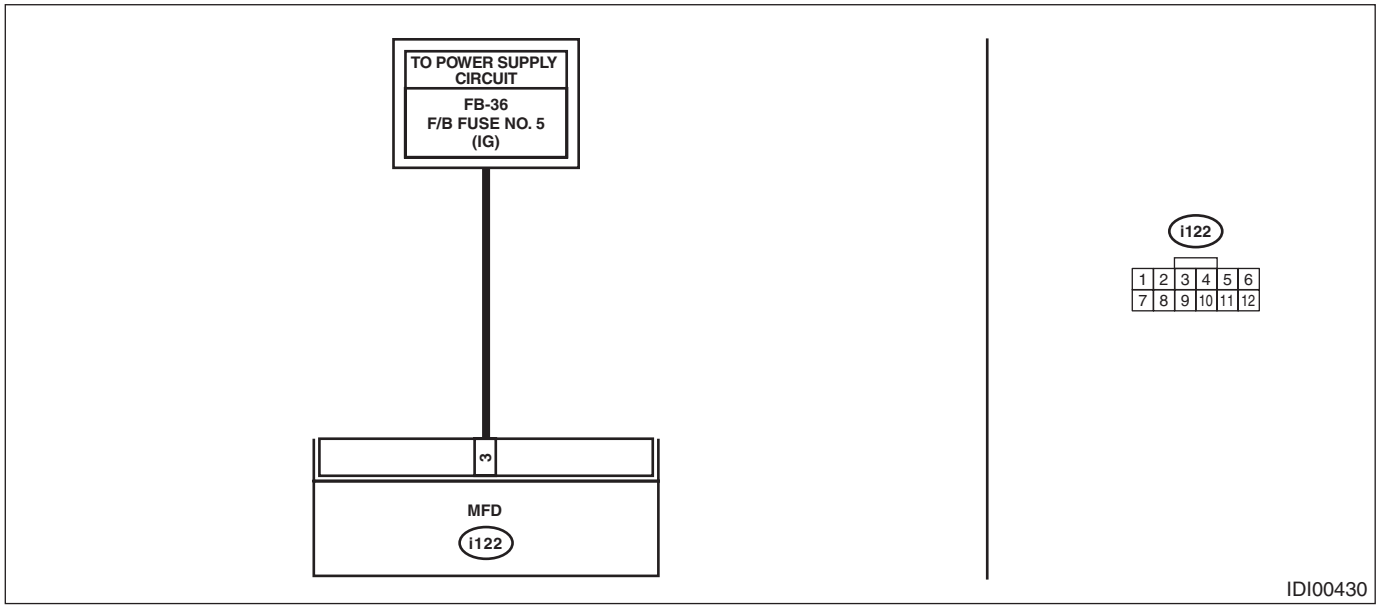
| 1 | **CHECK LAN SYSTEM.**<br>Read the DTC of the LAN system using the Subaru Select Monitor. <Ref. to LAN(diag)-22, OPERATION, Read Diagnostic Trouble Code (DTC).> | Is DTC displayed? | Perform the diagnosis according to DTC. | Go to step **2**. |
| 2 | **CHECK CONNECTOR.**<br>1) Disconnect the MFD connector and meter connector.<br>2) Connect the disconnected connectors.<br>3) Read the DTC of the MFD using the Subaru Select Monitor. | Is DTC U1651 a current malfunction? | Go to step **3**. | There was poor contact of connector. |
| 3 | **CHECK HARNESS.**<br>1) Disconnect the MFD connector and meter connector.<br>2) Using the tester, measure the resistance between terminals.<br>***Connector & terminal***<br>***(i10) No. 28 — (i122) No. 9:*** | Is the resistance 10 Ω or less? | Go to step **4**. | Repair the open circuit of harness or replace harness. |
| 4 | **CHECK HARNESS.**<br>Using the tester, measure the resistance between terminals.<br>***Connector & terminal***<br>***(i122) No. 9 — Chassis ground:*** | Is the resistance 10 Ω or less? | Repair the short circuit of harness or replace harness. | Go to step **5**. |
| 5 | **CHECK COMBINATION METER.**<br>1) Replace the combination meter. <Ref. to IDI-17, Combination Meter.><br>2) Read the DTC of the MFD using the Subaru Select Monitor. | Is DTC U1651 a current malfunction? | Go to step **6**. | There was something wrong with the meter. |

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 6 | **CHECK COMBINATION METER.**<br>1) Replace the current combination meter with the original combination meter.<br>2) Replace the MFD. <Ref. to IDI-24, Multi-function Display (MFD).><br>3) Read the DTC of the MFD using the Subaru Select Monitor. | Is DTC U1651 a current malfunction? | Replace the meter. <Ref. to IDI-17, Combination Meter.> | There was an abnormality in MFD. |

## L: DTC B2220 BREAK THE WIRE OF IGN

**DTC DETECTING CONDITION:**
There was voltage malfunction caused by poor contact of IGN power supply circuits.
**TROUBLE SYMPTOM:**
Airbag indicator does not illuminate.
**WIRING DIAGRAM:**
Multi-function display (MFD) system <Ref. to WI-108, WIRING DIAGRAM, Multi-function Display (MFD) System.>



| | Step | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK DTC.**<br>Read the DTC of the MFD using the Subaru Select Monitor. | Is DTC B2220 a current malfunction? | Go to step **2**. | Go to step **5**. |
| 2 | **CHECK DTC.**<br>1) Turn the ignition switch to OFF.<br>2) Disconnect the MFD connector and reconnect it.<br>3) Turn the ignition switch to ON.<br>4) Read the DTC relating the MFD using the Subaru Select Monitor. | Is DTC B2220 a current malfunction? | Go to step **3**. | Go to step **5**. |
| 3 | **CHECK FUSE.**<br>1) Turn the ignition switch to OFF.<br>2) Check the fuse. | Is the fuse OK? | Go to step **4**. | Replace the defective fuse. |
| 4 | **CHECK HARNESS.**<br>1) Disconnect the MFD connector.<br>2) Turn the ignition switch to ON.<br>3) Using the tester, measure the voltage between terminals.<br>***Connector & terminal***<br>***(i122) No. 3 (+) — Chassis ground (–):*** | Is the voltage 8.5 — 16.5 V? | Replace the MFD. <Ref. to IDI-24, Multi-function Display (MFD).> | Repair the harness between MFD and fuse. |
| 5 | **CHECK CONNECTOR.**<br>1) Turn the ignition switch to OFF.<br>2) Disconnect the MFD connector. | Is there poor contact of connector? | Repair or replace the poor contact of connector. | A temporary change of voltage occurred. |

## M: DTC B2222 SYSTEM MICROCOMPUTER FAIL

**DTC DETECTING CONDITION:**
When the microcomputer froze.
**TROUBLE SYMPTOM:**
MFD does not operate.

NOTE:
Reset the MFD. If it does not return to the normal operation, replace the MFD. <Ref. to IDI-24, Multi-function Display (MFD).>

## N: DTC B2223 GERDA FAIL

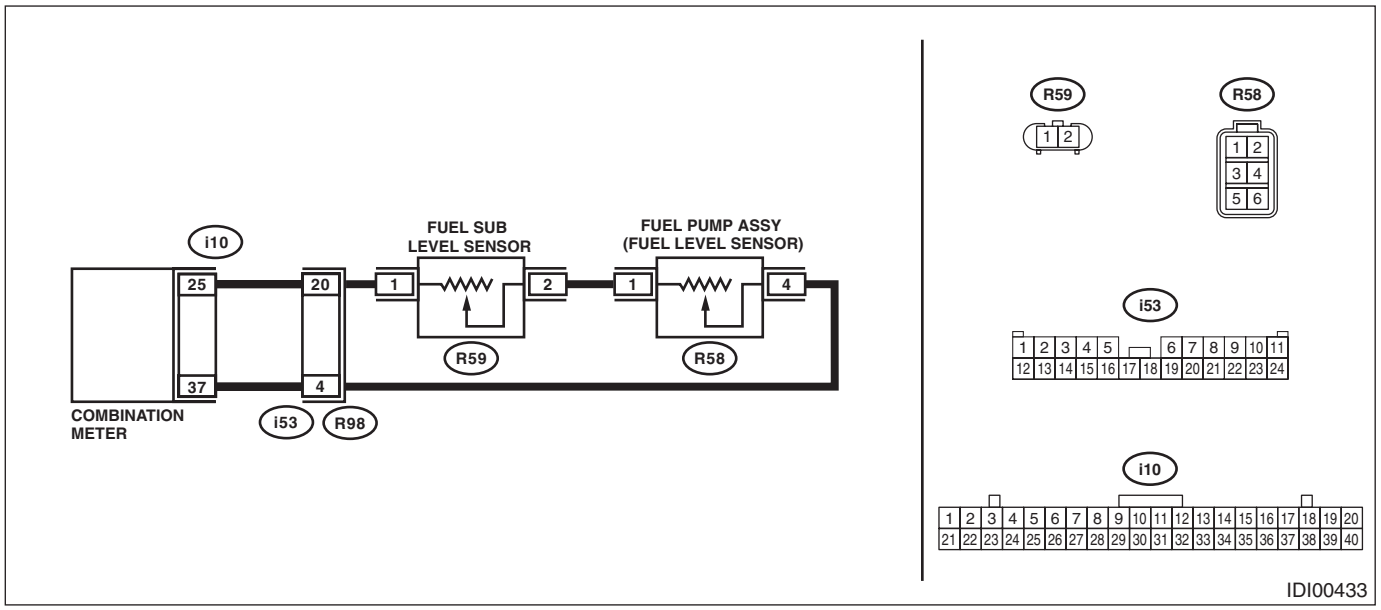
**DTC DETECTING CONDITION:**
When the system microcomputer can not send/receive the data with the image microcomputer normally.
**TROUBLE SYMPTOM:**
There is no display on the TFT. Operation is normal.

NOTE:
Replace the MFD. <Ref. to IDI-24, Multi-function Display (MFD).>

# O: DTC B1500 FUEL SENDER OPEN/SHORT-CIRCUIT DETECTION

**DTC DETECTING CONDITION:**
The fuel gauge circuit is open or shorted.
**TROUBLE SYMPTOM:**
- Defective fuel gauge.
- Fuel level warning light blinks.

**WIRING DIAGRAM:**
Fuel gauge system <Ref. to WI-92, WIRING DIAGRAM, Fuel Gauge System.>

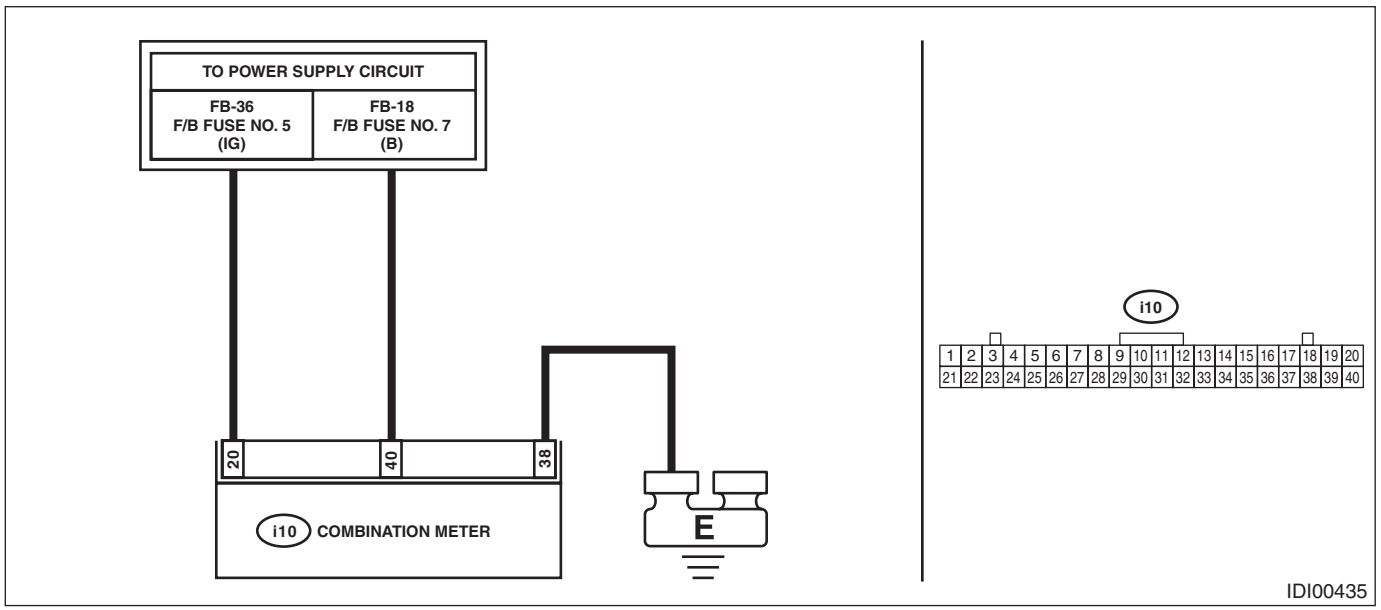


| Step | | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK DTC.**<br>Read the DTC of the meter using the Subaru Select Monitor. | Is DTC B1500 a current malfunction? | Go to step **2**. | Go to step **7**. |
| 2 | **CHECK COMBINATION METER.**<br>1) Check the operation of combination meter using Subaru Select Monitor.<br>2) From the {System Operation Check Mode}, select the «Fuel Meter Operation» and «Remaining fuel warning». | Is the operation of combination meter OK? | Go to step **3**. | Replace the combination meter. <Ref. to IDI-17, Combination Meter.> |
| 3 | **CHECK HARNESS.**<br>1) Turn the ignition switch to OFF.<br>2) Disconnect the meter connector and the fuel sub level sensor connector and the fuel level sensor connector.<br>3) Using the tester, measure the resistance between terminals.<br>***Connector & terminal***<br>***(i10) No. 25 — (R59) No. 1:***<br>***(i10) No. 37 — (R58) No. 4:*** | Is the resistance 10 Ω or less? | Go to step **4**. | Repair the open circuit of harness or replace harness. |
| 4 | **CHECK HARNESS.**<br>Using the tester, measure the resistance between terminals.<br>***Connector & terminal***<br>***(i10) No. 25 — Chassis ground:***<br>***(i10) No. 37 — Chassis ground:*** | Is the resistance 10 Ω or less? | Repair the short circuit of harness or replace harness. | Go to step **5**. |
| 5 | **CHECK FUEL SUB LEVEL SENSOR.**<br>Check the fuel sub level sensor as a single part. <Ref. to FU(H4DO)-160, INSPECTION, Fuel Sub Level Sensor.> | Is the sensor normal? | Go to step **6**. | Replace the sensor. |

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 6 | **CHECK FUEL LEVEL SENSOR.**<br>Check the fuel level sensor as a single part.<br><Ref. to FU(H4DO)-154, INSPECTION, Fuel Level Sensor.> | Is the sensor normal? | Go to step **7**. | Replace the sensor. |
| 7 | **CHECK CONNECTOR.**<br>1) Turn the ignition switch to OFF.<br>2) Disconnect connectors. | Is there poor contact of connector? | Repair or replace the poor contact of connector. | A temporary change of voltage occurred. |
| 8 | **CHECK CURRENT DATA.**<br>Using the Subaru Select Monitor, display the «Fuel sensing value» from {Read Current Data}. | Does the data display 10 — 570 Ω? | System is normal. | Replace the combination meter. <Ref. to IDI-17, Combination Meter.> |

# P: DTC B1501 POWER SUPPLY SYSTEM ERROR DETECTION

**DTC DETECTING CONDITION:**
Open or short in combination meter power supply circuit
**TROUBLE SYMPTOM:**
Defective operation of combination meter
**WIRING DIAGRAM:**
Combination meter system <Ref. to WI-54, WIRING DIAGRAM, Combination Meter System.>

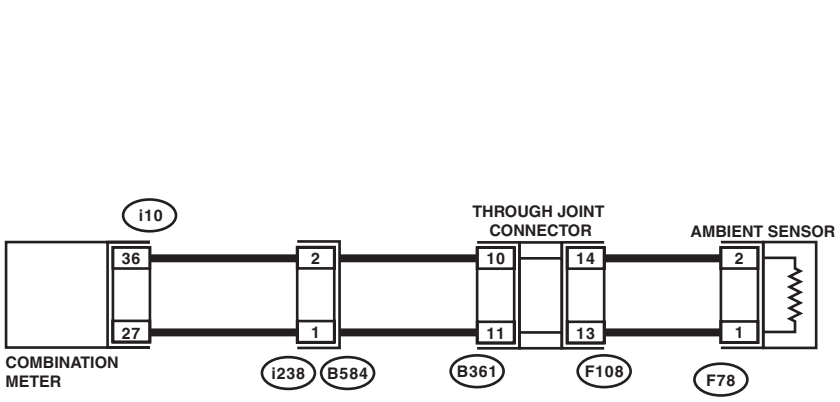


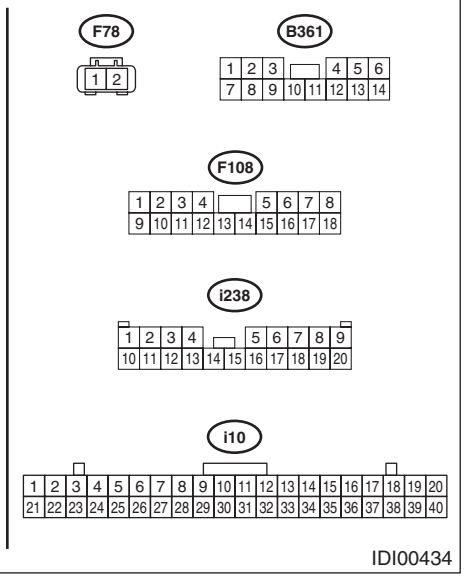
| Step | | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK POWER SUPPLY CIRCUIT.**<br>Turn the ignition switch to ON, and confirm that the illumination of combination meter lights. | Does the illumination light? | Go to step **2**. | Go to step **3**. |
| 2 | **CHECK DTC.**<br>Read the DTC of the meter using the Subaru Select Monitor. | Is DTC B1501 a current malfunction? | Go to step **3**. | Go to step **5**. |
| 3 | **CHECK FUSE.**<br>1) Turn the ignition switch to OFF.<br>2) Check the fuse. | Is the fuse OK? | Go to step **4**. | Replace the defective fuse. |
| 4 | **CHECK HARNESS.**<br>1) Turn the ignition switch to OFF.<br>2) Disconnect the meter connector.<br>3) Using the tester, measure the voltage between terminals.<br>***Connector & terminal***<br>***(i10) No. 20 (+) — Chassis ground (–):***<br>***(i10) No. 40 (+) — Chassis ground (–):*** | Is the voltage 8.5 — 16.5 V? | Go to step **5**. | Repair the open circuit of harness or replace harness. |
| 5 | **CHECK CONNECTOR.**<br>1) Turn the ignition switch to OFF.<br>2) Disconnect connectors. | Is there poor contact of connector? | Repair or replace the poor contact of connector. | A temporary change of voltage occurred. |

# Q: DTC B1507 EXTERNAL AIR TEMPERATURE OPEN/SHORT-CIRCUIT DETECTION

**DTC DETECTING CONDITION:**
Open or short circuit in ambient sensor.
**TROUBLE SYMPTOM:**
- Defective ambient temperature display
- Defective air conditioner operation

**WIRING DIAGRAM:**
Air Conditioning System <Ref. to WI-35, WIRING DIAGRAM, Air Conditioning System.>





IDI00434

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK DTC.**<br>Read the DTC of the meter using the Subaru Select Monitor. | Is DTC B1507 a current malfunction? | Go to step **2**. | Go to step **6**. |
| 2 | **CHECK CURRENT DATA.**<br>Using the Subaru Select Monitor, display the «External air temperature sensing value» from {Read Current Data}. | Is data displayed? | System is normal. | Go to step **3**. |
| 3 | **CHECK HARNESS.**<br>1) Turn the ignition switch to OFF.<br>2) Disconnect the meter connector and ambient sensor connector.<br>3) Using the tester, measure the resistance between terminals.<br>***Connector & terminal***<br>***(i10) No. 36 — (F78) No. 2:***<br>***(i10) No. 27 — (F78) No. 1:*** | Is the resistance 10 Ω or less? | Go to step **4**. | Repair the open circuit of harness or replace harness. |
| 4 | **CHECK HARNESS.**<br>Using the tester, measure the resistance between terminals.<br>***Connector & terminal***<br>***(i10) No. 36 — Chassis ground:***<br>***(i10) No. 27 — Chassis ground:*** | Is the resistance 10 Ω or less? | Repair the short circuit of harness or replace harness. | Go to step **5**. |
| 5 | **CHECK AMBIENT SENSOR.**<br>Perform the inspection of ambient sensor unit. <Ref. to AC-75, INSPECTION, Ambient Sensor.> | Is the sensor normal? | Go to step **6**. | Replace the sensor. |
| 6 | **CHECK CONNECTOR.**<br>1) Turn the ignition switch to OFF.<br>2) Disconnect connectors. | Is there poor contact of connector? | Repair or replace the poor contact of connector. | A temporary change of voltage occurred. |

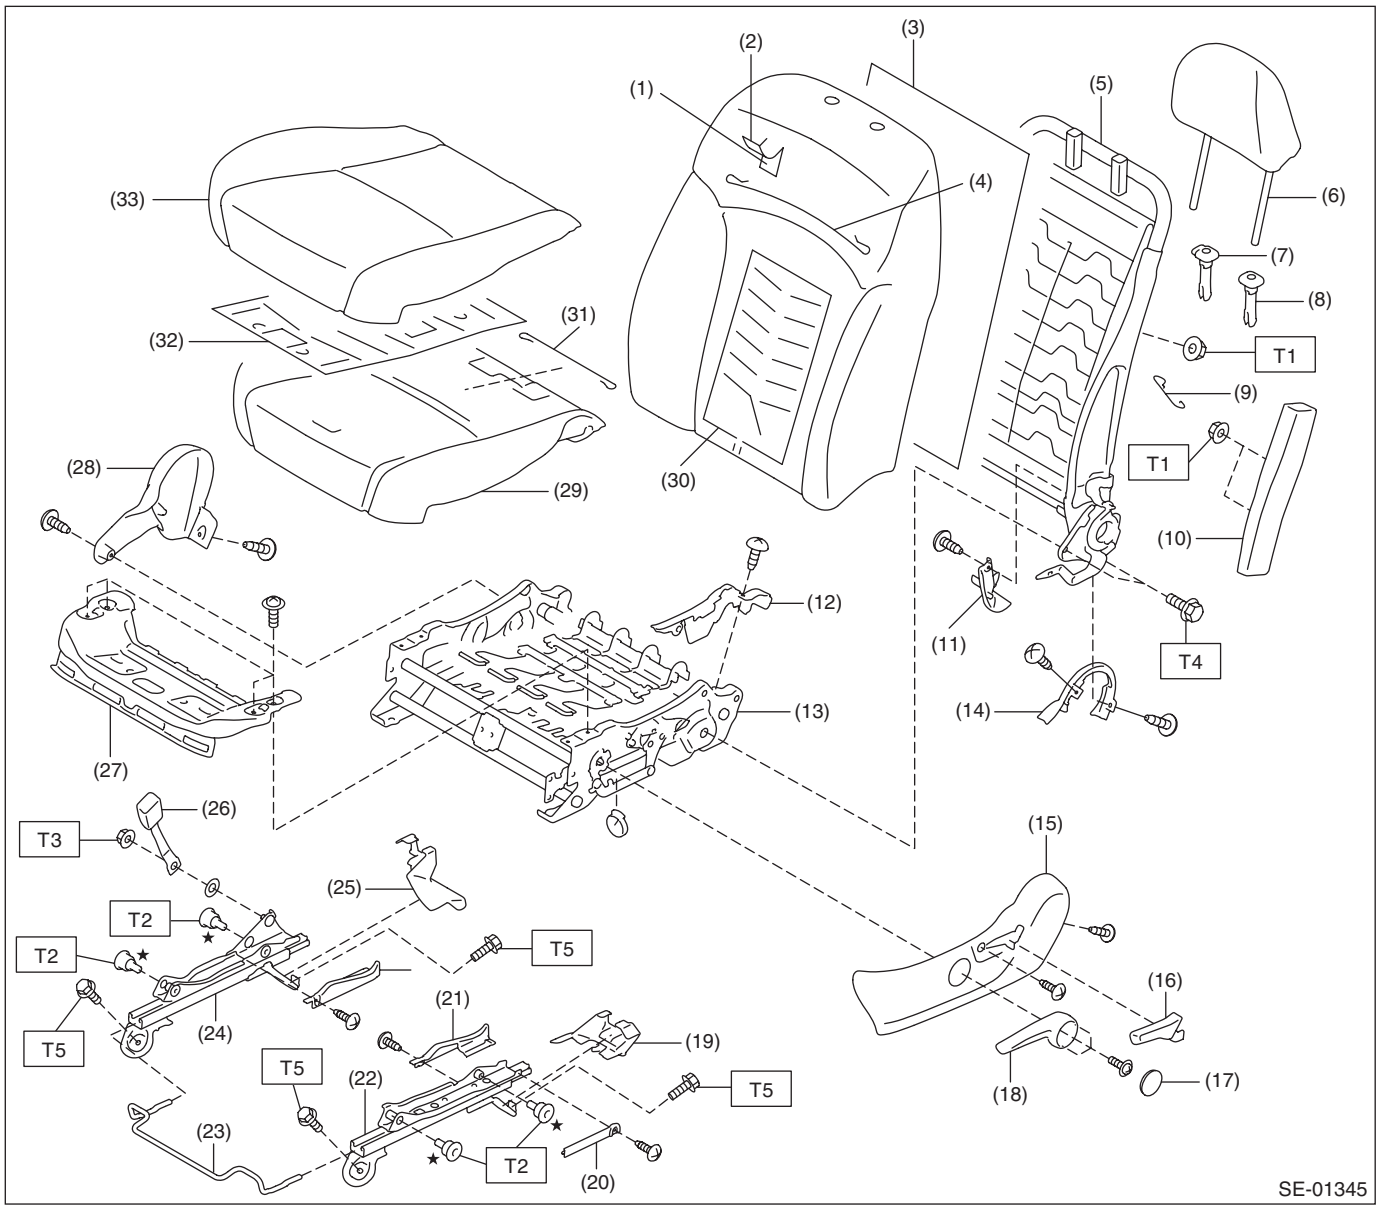
# 1. General Description

## A: COMPONENT

### 1. FRONT SEAT

- Manual seat LH

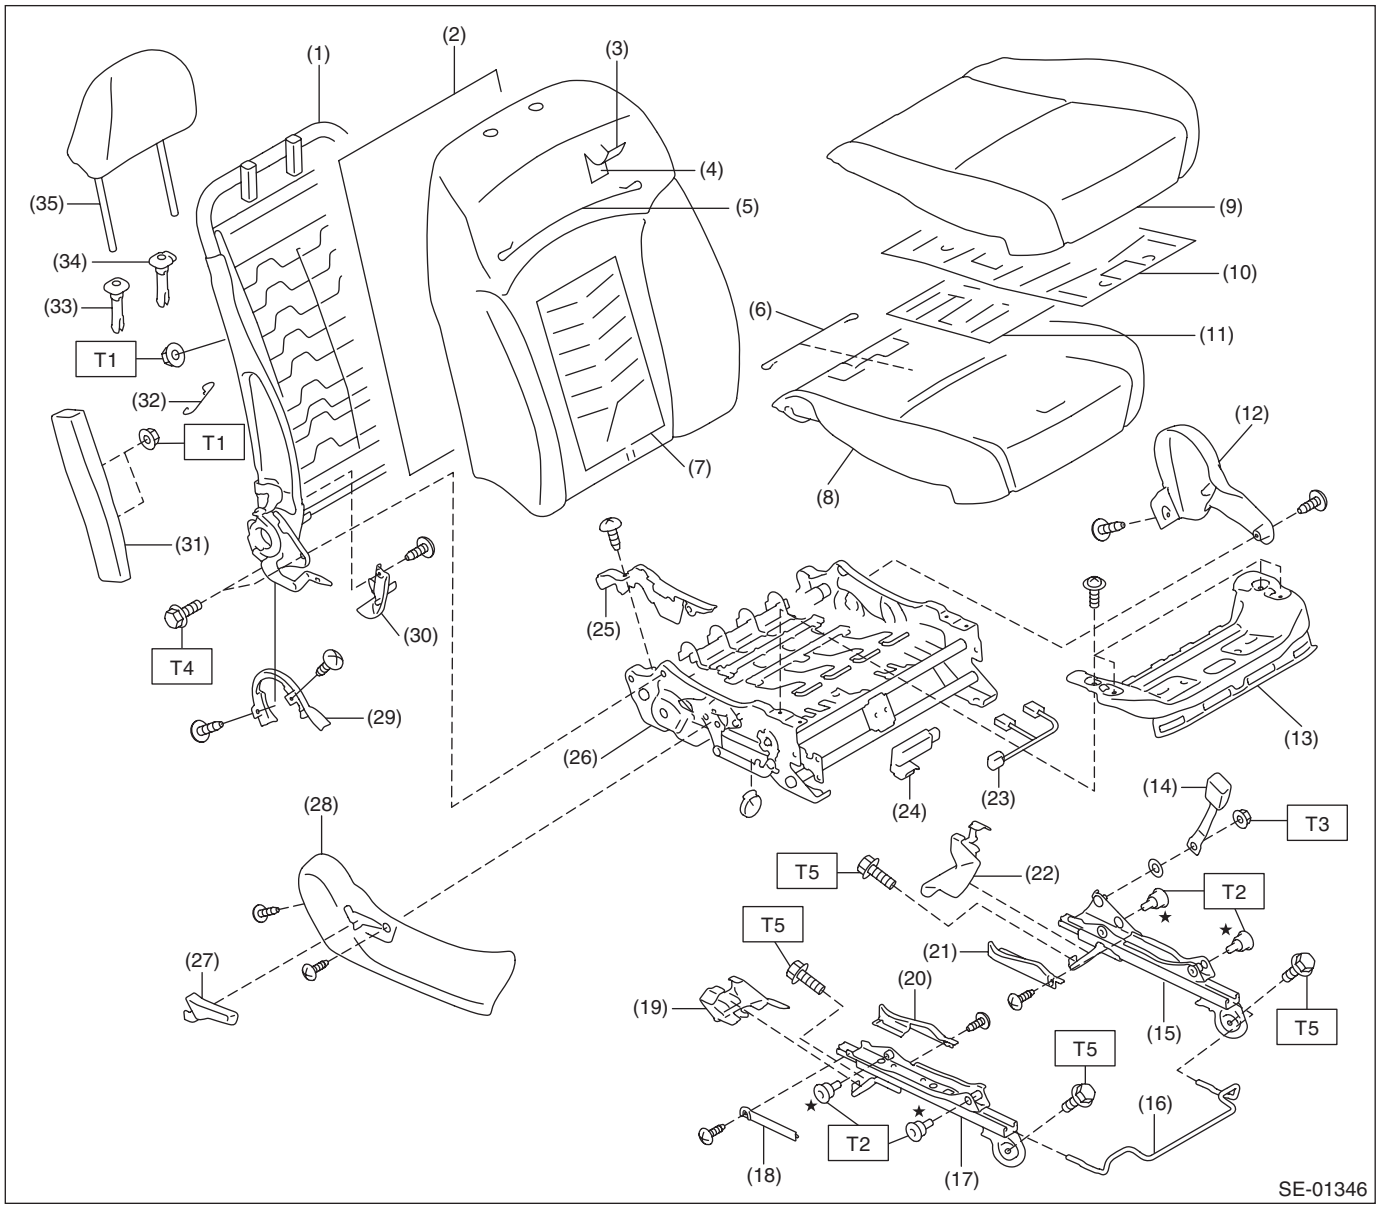


(1) Pad ASSY - front seat backrest
(2) Cover COMPL - front backrest
(3) Cover - silencer front seat backrest
(4) Wire set - front seat backrest
(5) Frame ASSY - front backrest
(6) Headrest ASSY - front
(7) Bushing - lock headrest
(8) Bushing - free headrest
(9) Hook - backrest front
(10) Side airbag module LH
(11) Cover - inner front
(12) Cover - frame front cushion
(13) Frame ASSY - front cushion
(14) Cover - hinge base front seat
(15) Cover - hinge front seat OUT
(16) Lever - reclining
(17) Cap - lifter lever
(18) Knob - lifter
(19) Cover - bolt rear OUT
(20) Cover - slide rail OUT
(21) Cover - slide rail OUT
(22) Slide rail ASSY - OUT
(23) Lever - towel bar
(24) Slide rail ASSY - INN
(25) Cover - bolt rear INN
(26) Seat belt inner - front
(27) Panel - front seat
(28) Cover - hinge front seat INN
(29) Pad ASSY - front seat cushion
(30) Heater unit - front seat backrest
(31) Wire set - front seat cushion
(32) Heater unit - front seat cushion
(33) Cover - front cushion

***Tightening torque: N·m (kgf-m, ft-lb)***

***T1: 6 (0.61, 4.4)***
***T2: 15 (1.53, 11.1)***
***T3: 38 (3.87, 28.0)***
***T4: 52 (5.30, 38.4)***
***T5: 53 (5.40, 39.1)***

- Manual seat RH

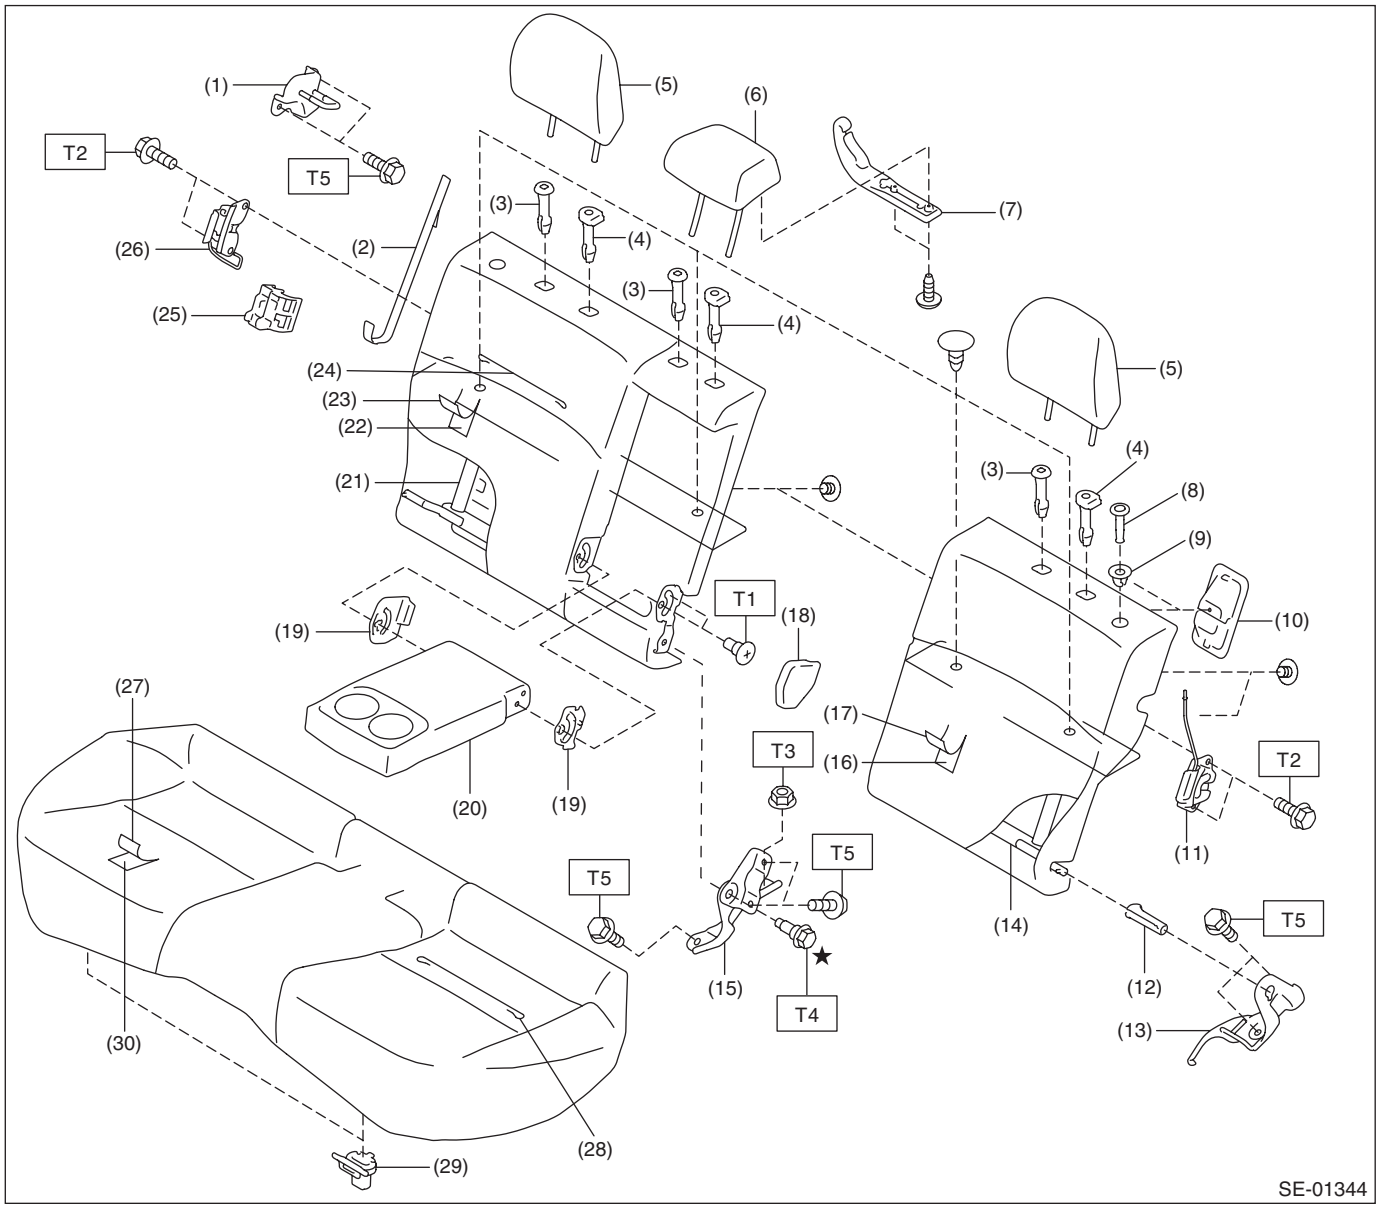


(1) Frame ASSY - front backrest
(2) Cover - silencer front seat backrest
(3) Cover COMPL - front backrest
(4) Pad ASSY - front seat backrest
(5) Wire set - front seat backrest
(6) Wire set - front seat cushion
(7) Heater unit - front seat backrest
(8) Pad ASSY - front seat cushion
(9) Cover - front cushion
(10) Heater unit - front cushion
(11) Occupant detection sensor
(12) Cover - hinge front seat INN
(13) Panel - front seat
(14) Seat belt inner - front
(15) Slide rail ASSY - INN
(16) Lever - towel bar
(17) Slide rail ASSY - OUT
(18) Cover - slide rail OUT
(19) Cover - bolt rear OUT
(20) Cover - slide rail OUT
(21) Cover - slide rail INN
(22) Cover - bolt rear INN
(23) Harness - occupant detection sensor
(24) Control unit - occupant detection sensor
(25) Cover - frame front seat cushion
(26) Frame ASSY - front seat cushion
(27) Lever - reclining
(28) Cover - hinge front seat OUT
(29) Cover - hinge base front seat
(30) Cover - inner front
(31) Side airbag module RH
(32) Hook - backrest front
(33) Bushing - lock headrest
(34) Bushing - free headrest
(35) Headrest ASSY - front

***Tightening torque: N·m (kgf-m, ft-lb)***

***T1: 6 (0.61, 4.4)***
***T2: 15 (1.53, 11.1)***
***T3: 38 (3.87, 28.0)***
***T4: 52 (5.30, 38.4)***
***T5: 53 (5.40, 39.1)***

## 2. REAR SEAT



(1) Striker - backrest rear RH
(2) Knob - strap (4 door model)
(3) Bushing - headrest
(4) Bushing - lock ASSY
(5) Headrest ASSY - rear backrest
(6) Headrest ASSY - rear center
(7) Belt guide - rear seat (5 door model/XV model)
(8) Knob - backrest rear
(9) Knob - guide
(10) Tether anchor cover
(11) Lock ASSY - backrest rear LH
(12) Bushing - backrest hinge
(13) Hinge ASSY - rear backrest
(14) Frame ASSY - rear backrest LH
(15) Hinge ASSY - backrest center
(16) Pad ASSY - rear seat backrest LH
(17) Cover COMPL - rear backrest LH
(18) Cover - armrest
(19) Bushing - rear armrest
(20) Armrest ASSY - rear center
(21) Frame ASSY - rear backrest RH
(22) Pad ASSY - rear seat backrest RH
(23) Cover COMPL - rear backrest RH
(24) Wire set - rear backrest
(25) Knob - strap guide (4 door model)
(26) Lock ASSY - backrest rear RH
(27) Cover - rear cushion
(28) Wire set - rear cushion
(29) Hook - seat cushion rear
(30) Pad and frame ASSY - rear cushion

| *Tightening torque: N·m (kgf-m, ft-lb)* | |
|---|---|
| *T1:* | *14.7 (1.5, 10.8)* |
| *T2:* | *22.5 (2.3, 16.6)* |
| *T3:* | *24.5 (2.5, 18.1)* |
| *T4:* | *28.9 (2.9, 21.3)* |
| *T5:* | *33 (3.4, 24.3)* |

## B: CAUTION

When removing the front seat from the vehicle, refer to “CAUTION” of “General Description” in “AIRBAG SYSTEM” section. <Ref. to AB-11, CAUTION, General Description.>

## C: PREPARATION TOOL

### 1. GENERAL TOOL

| TOOL NAME | REMARKS |
|---|---|
| Long nose plier | Used for removing the hog ring. |
| Hog ring pliers | Used for installing the hog ring. |
| Circuit tester | Used for measuring resistance and voltage. |

# 2. Front Seat

## A: REMOVAL

**CAUTION:**
**The airbag system is fitted with a backup power supply. After disconnecting the battery ground cable, the airbag may operate if you do not wait for 60 seconds before starting the service of airbag system.**

1) Remove the headrest assembly - front.
2) Disconnect the ground cable from battery and wait for at least 60 seconds before starting work.
3) Remove the slide rail assembly installing bolt.
   (1) Tilt the backrest assembly forward and move the front seat to the front most position.
   (2) Remove the cover - bolt rear (A) and remove the bolts.

   (3) Move the front seat to the rearmost position, and remove the bolts.
4) Disconnect the connector under the front seat.
- Seat belt warning light connector (driver's seat)
- Occupant detection system harness connector (passenger's seat) <Ref. to OD(diag)-9, OCCUPANT DETECTION SYSTEM (BETWEEN AIRBAG REAR HARNESS AND SEAT HARNESS), PROCEDURE, Airbag Connector.>
- Side airbag connector <Ref. to AB-31, SIDE AIRBAG MODULE, PROCEDURE, Airbag Connector.>
- Seat heater connector (model with seat heater)
- Buckle switch RH connector (passenger's seat) <Ref. to AB-32, BUCKLE SWITCH RH, PROCEDURE, Airbag Connector.>

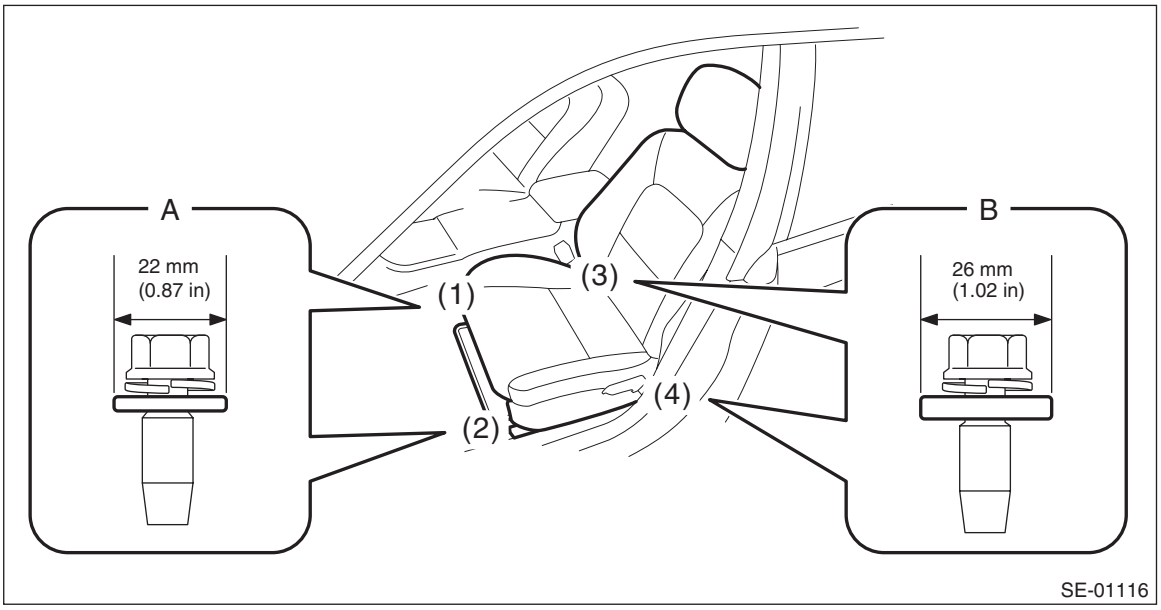
5) Take out the front seat from the vehicle.

**CAUTION:**
**Be careful not to damage the body.**

## B: INSTALLATION

Install each part in the reverse order of removal.

**CAUTION:**
**• The front seat mounting bolts differ between the front mounting points and the rear mounting points. When installing the front seat, make sure that you are using correct bolts at correct positions.**
**• Tighten the slide rail assembly installing bolts in the order as shown in the figure, in several steps by gradually increasing the torque until they reach the specified torque.**



- **Front (bolt A): Washer diameter 22 mm (0.87 in)**
- **Rear (bolt B): Washer diameter 26 mm (1.02 in)**

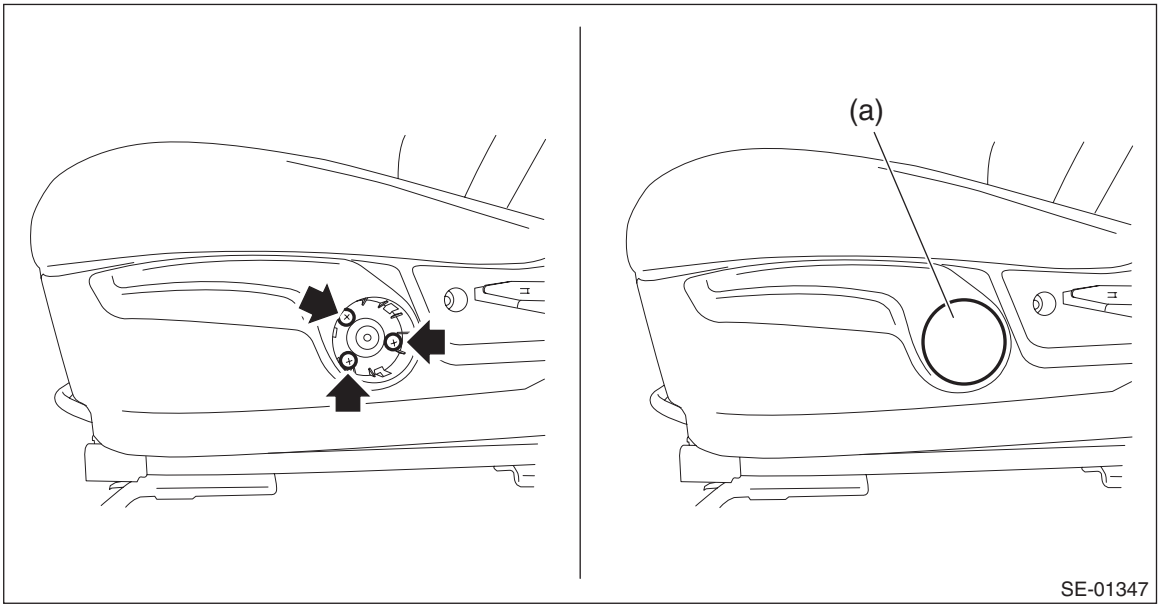
***Tightening torque:***
***Front seat assembly: 53 N·m (5.40 kgf-m, 39.1 ft-lb)***

# C: DISASSEMBLY

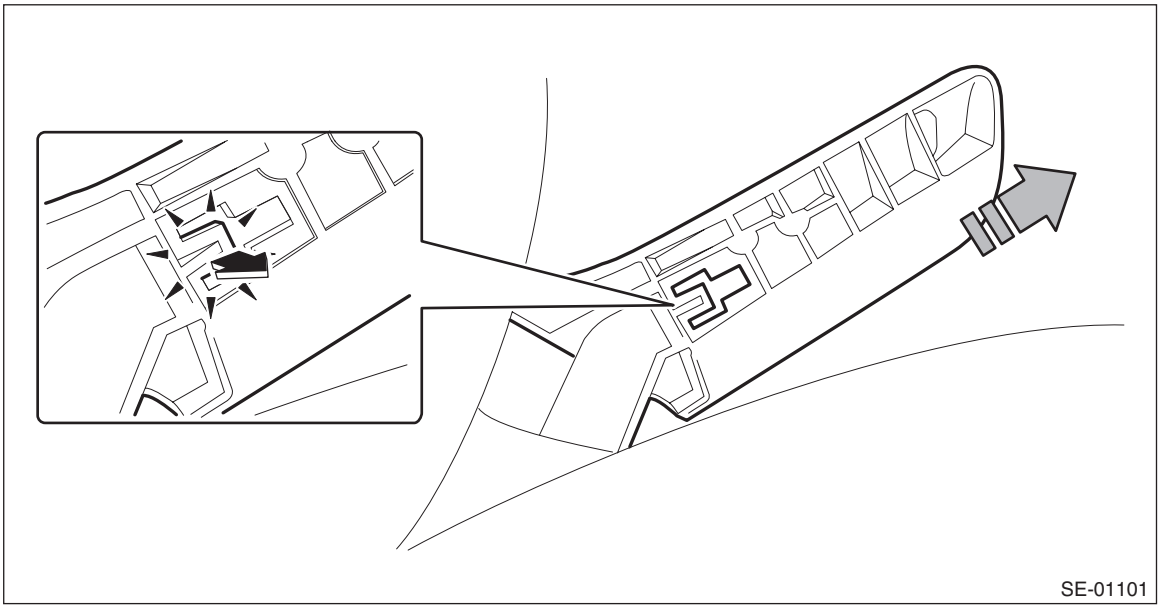
## 1. DRIVER'S SEAT

**CAUTION:**
**Before assembling, make sure how the harnesses such as the side airbag harness and the seat belt inner - front harness are routed in order to avoid misarranging. Assembling with harnesses improperly routed may cause the harness to get caught and short out.**

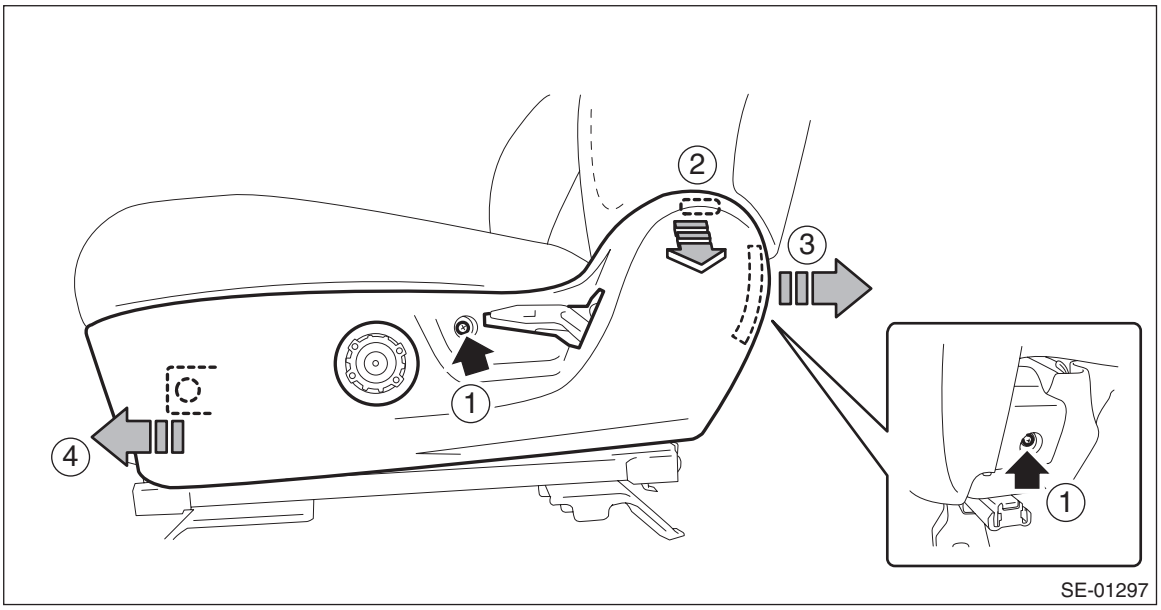
1) Remove the front seat from vehicle. <Ref. to SE-7, REMOVAL, Front Seat.>
2) Remove the knob - lifter.
   (1) Using a flat tip screwdriver, remove the cap - lifter lever (a).
   (2) Remove the screws and remove the knob - lifter.



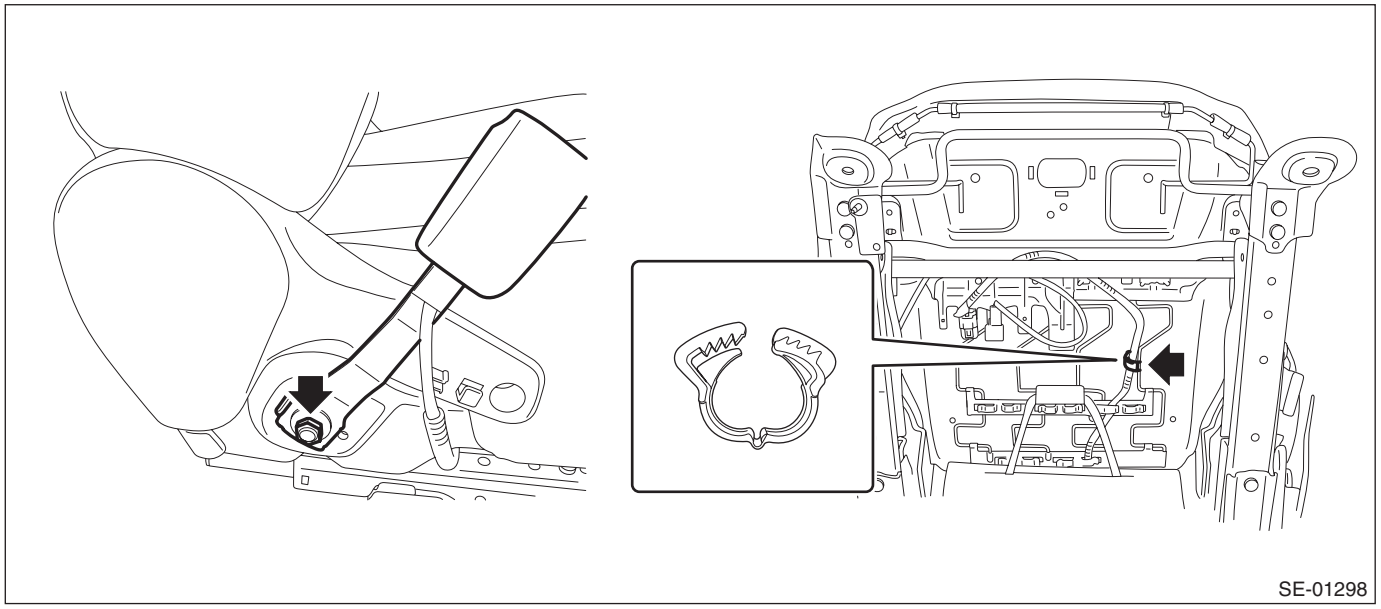
3) Remove the lever - reclining.
   (1) Pull up the lever - reclining and release the claws on the back.
   (2) Pull out the lever - reclining.



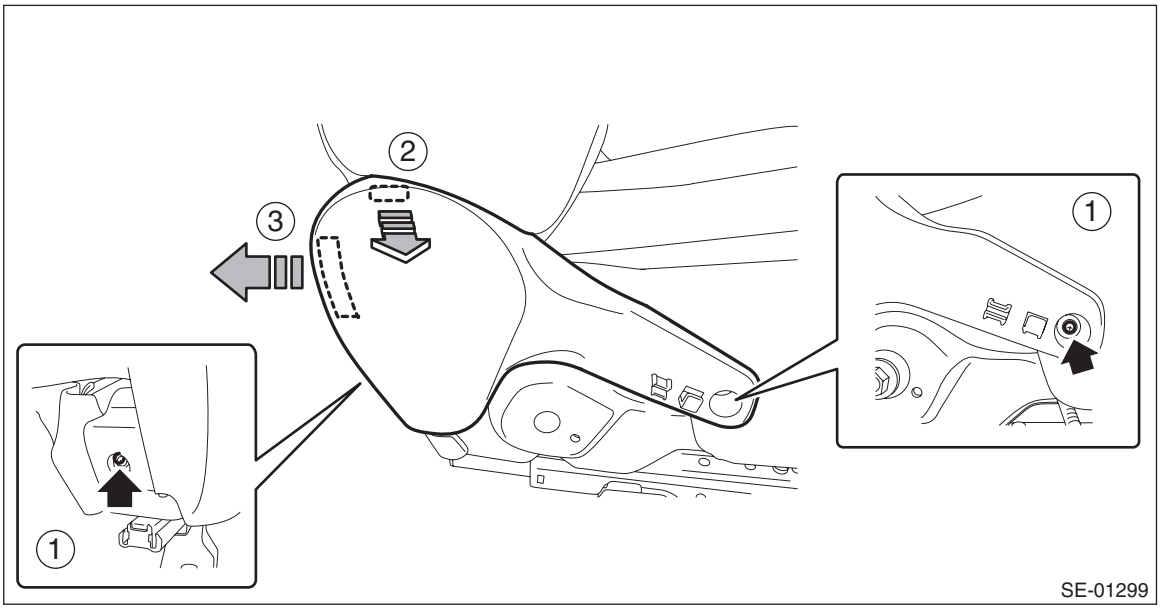
4) Remove the cover - hinge front seat OUT.
(1) Remove the screws.
(2) Release the claw in the upper section of the cover - hinge front seat OUT.
(3) Release the claw in the rear section of the cover - hinge front seat OUT.
(4) Release the claw in the front section of the cover - hinge front seat OUT, then remove the cover - hinge front seat OUT.



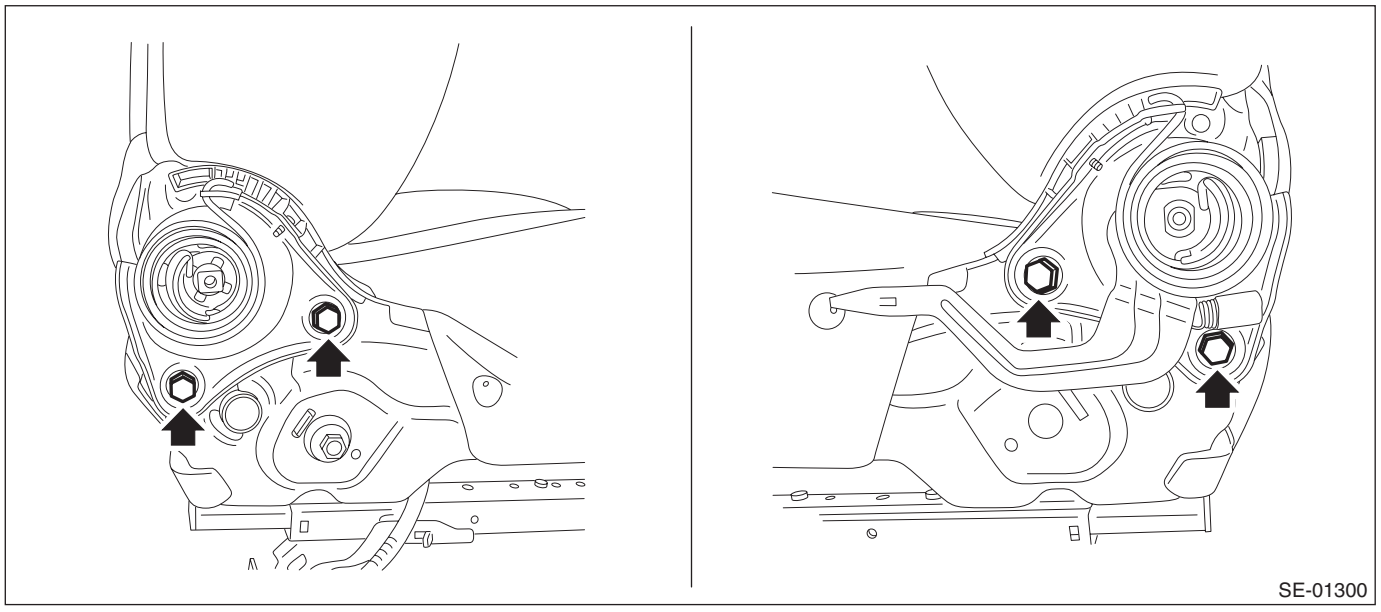
5) Remove the seat belt inner - front.
(1) Remove the nut, and remove the seat belt inner - front.
(2) Remove the clip for the seat belt inner - front located under the seat cushion assembly.



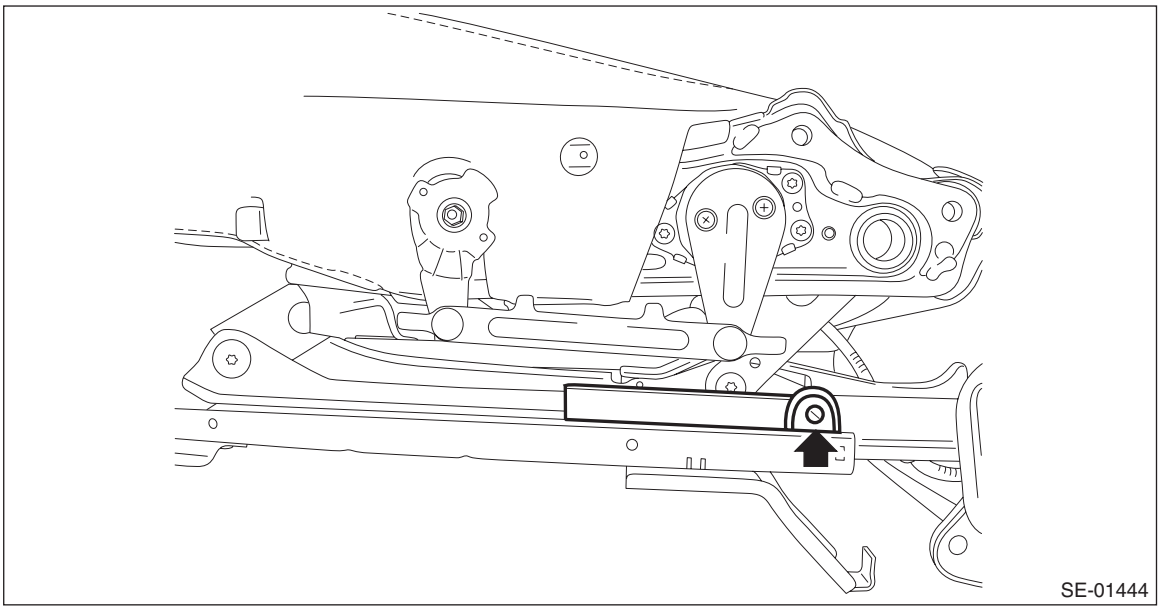
6) Remove the cover - hinge front seat INN.
(1) Remove the screws.
(2) Release the claw in the upper section of the cover - hinge front seat INN.
(3) Release the claw in the rear section of the cover - hinge front seat INN, then remove the cover - hinge front seat INN.



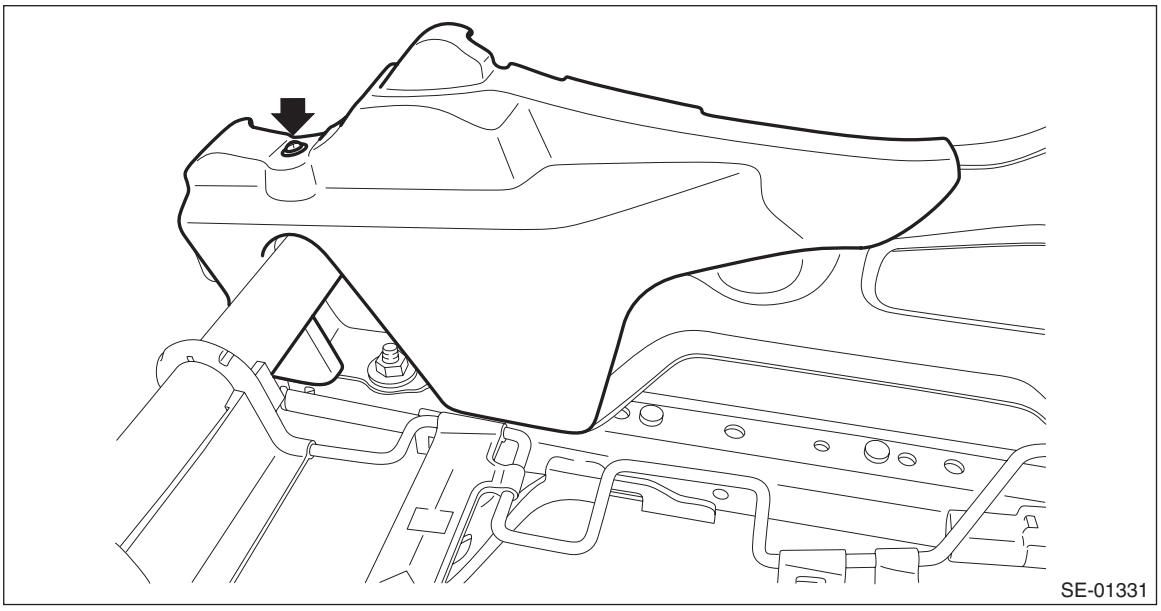
7) Separate the backrest assembly and the seat cushion assembly.
(1) Remove the clip for the side airbag harness located under the seat cushion assembly. (seat with side airbag)
(2) Remove the bolts from reclining hinge of both sides.
(3) While taking care not to damage the airbag harness, separate the backrest assembly and the seat cushion assembly.



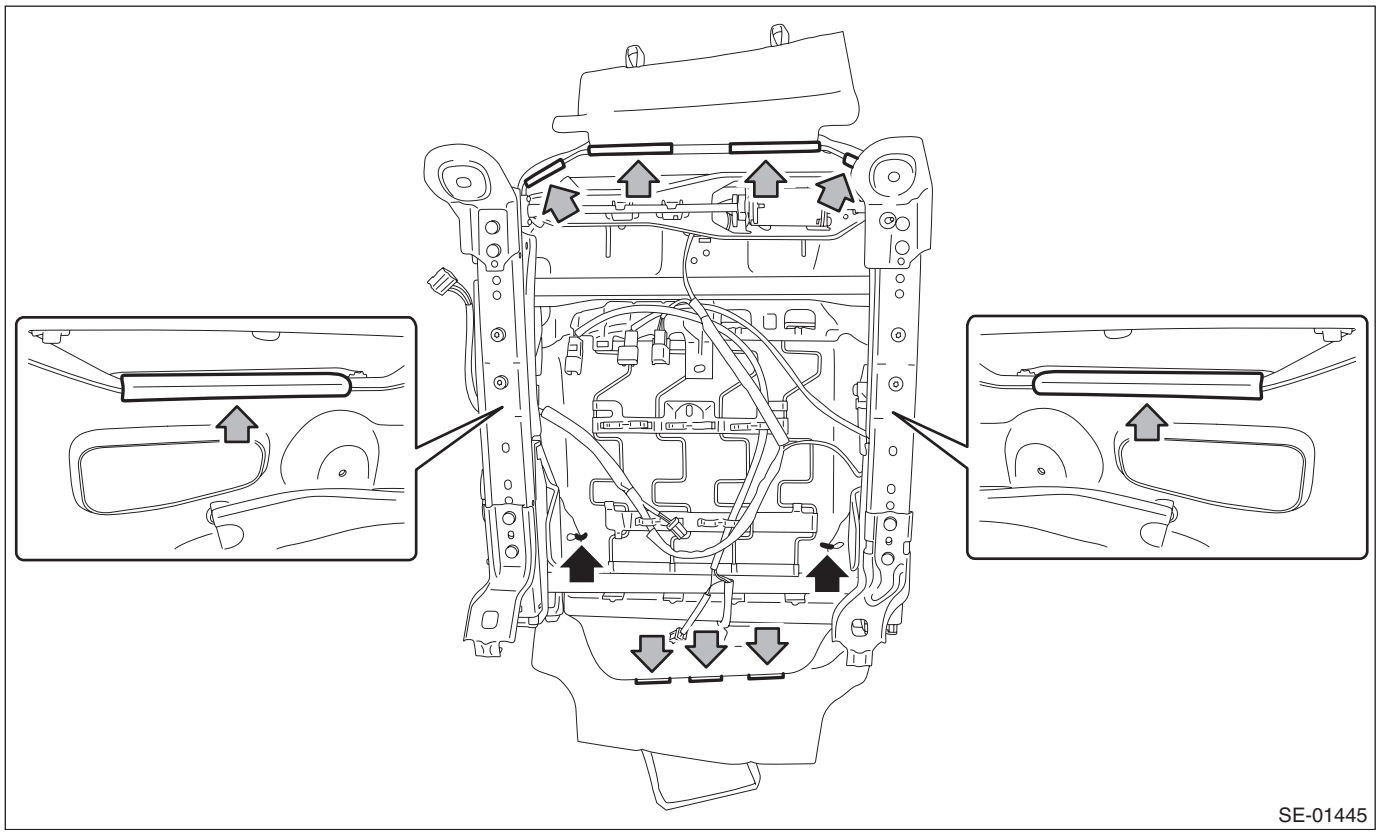
8) Remove the cover - slide rail OUT.
   (1) Remove the clip.
   (2) Remove the hook, and detach the cover - slide rail OUT.



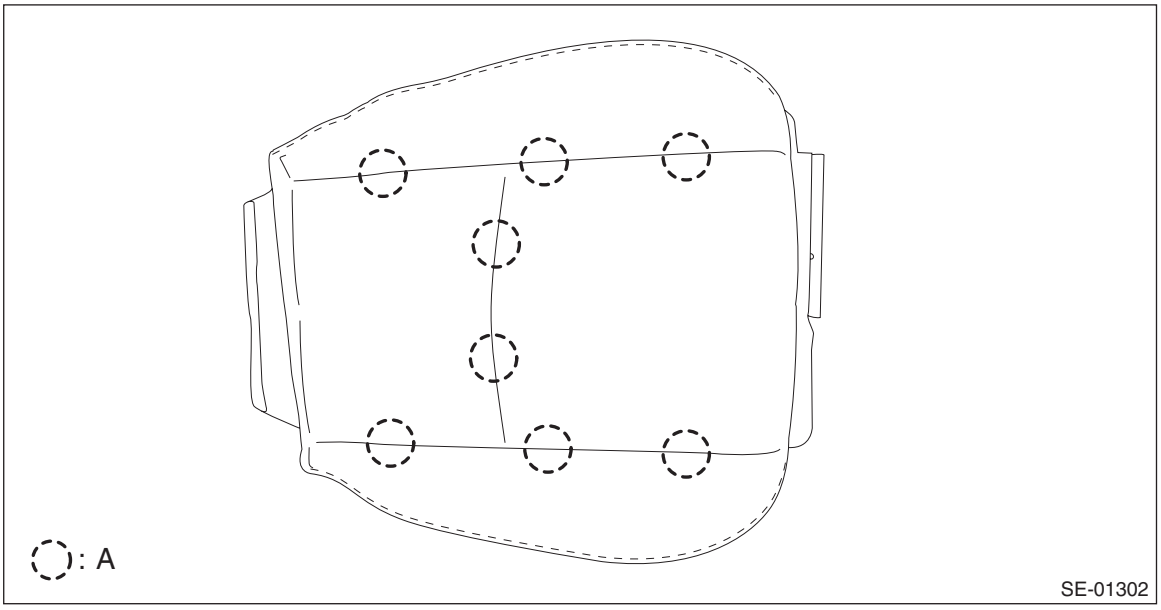
9) Remove the screws and detach the cover - slide rail INN.



10) Remove the pad assembly - front seat cushion and the cover - front cushion.
(1) Remove the hooks and hog rings.
(2) Remove the pad assembly - front seat cushion and the cover - front cushion from the seat cushion assembly.

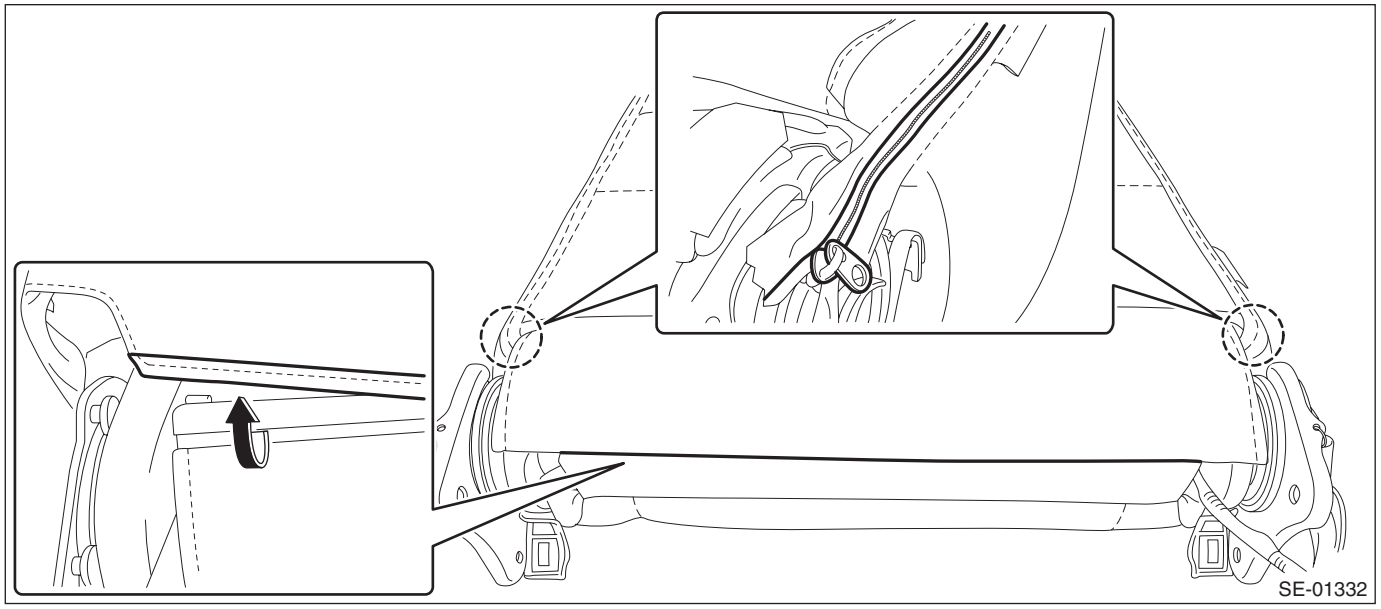


11) Remove the cover - front cushion.
(1) Remove the hog ring (A).

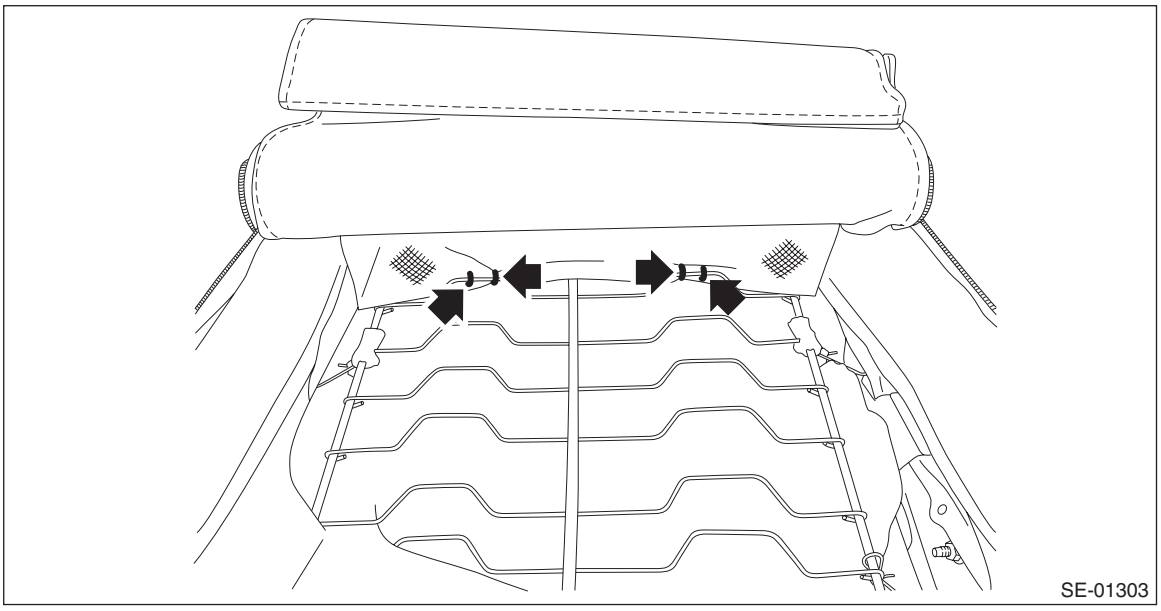


(2) Pull out the pad assembly - front seat cushion from the cover - front cushion.

12) Remove the pad assembly - front seat backrest and the cover COMPL - front backrest.
(1) Remove the plastic fastener at the back side (bottom) of backrest assembly.
(2) Open the fastener at the rear side of backrest assembly.



(3) Remove the hog ring.

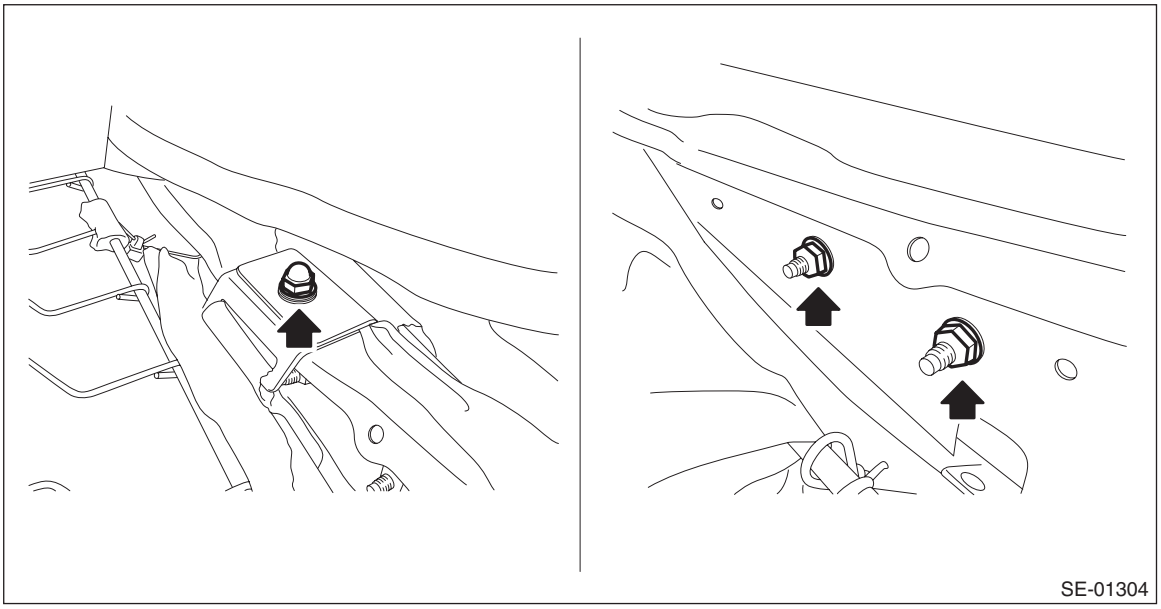


(4) Remove the pad assembly - front seat backrest and the cover COMPL - front backrest from the backrest assembly.

13) Remove the side airbag module.

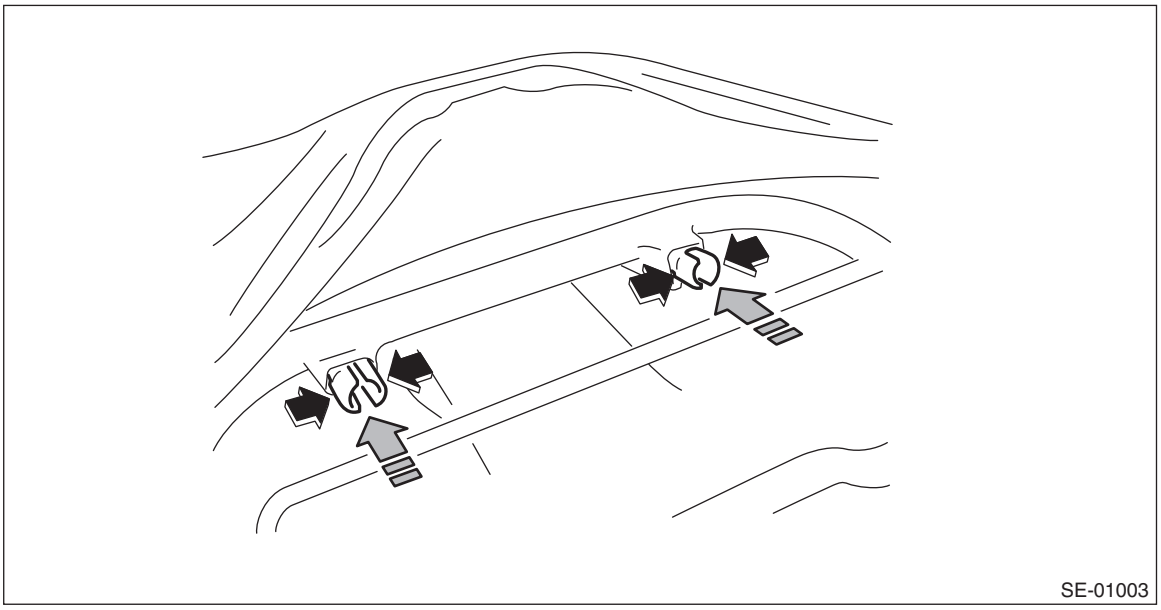
**CAUTION:**
**Do not open the protective cover of the side airbag. If any damage is present in the protective cover or the cloth of side airbag module comes out from the protective cover slit, replace the side airbag module with a new part.**

(1) Remove the hexagon cap nut and nuts.
(2) While taking care not to damage the airbag protective cover, remove the side airbag module.



SE-01304

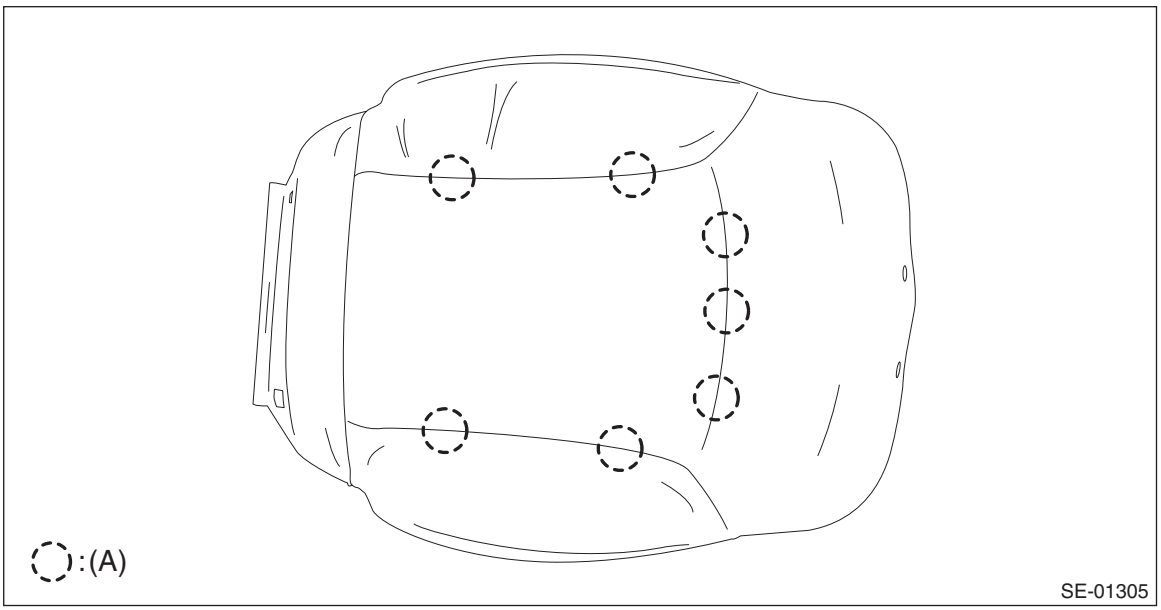
14) Remove the bushing - headrest.



SE-01003

NOTE:
Catch the tip of the bushing - headrest with pliers and push it outward from the inside of seat to remove it.
15) Pull out the frame assembly - front backrest.

16) Remove the cover COMPL - front backrest.
(1) Remove the hog ring (A).



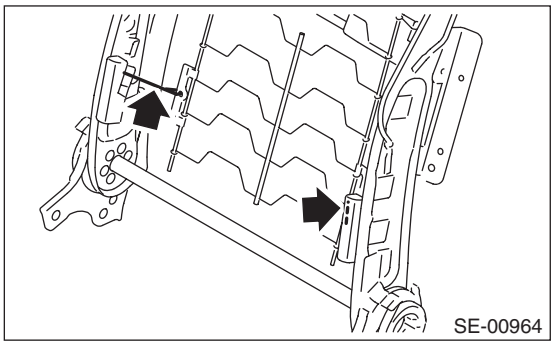
(2) Pull out the pad assembly - front seat backrest from the cover COMPL - front backrest.

## 2. PASSENGER'S SEAT

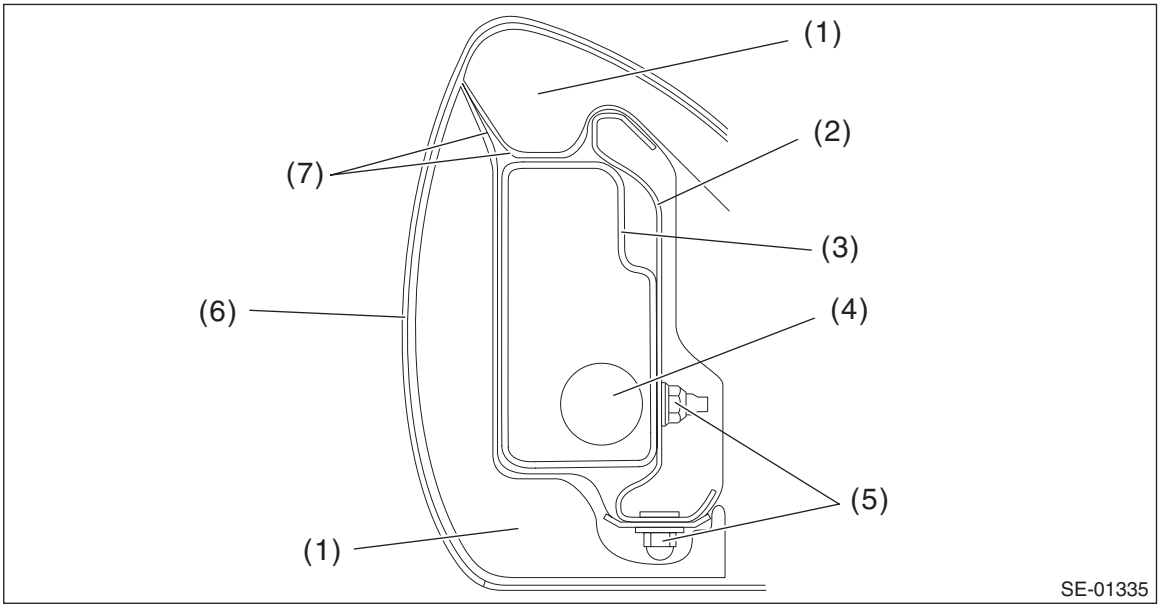
**CAUTION:**
**• The occupant detection system (passenger's seat only) control module, the occupant detection sensor, the pad assembly - front seat cushion and the frame assembly - front cushion are considered as a single seat cushion pad & frame assembly. Never remove the occupant detection control module or the occupant detection sensor from the frame assembly - front cushion.**
**• If the cover - front cushion is removed, make sure to replace the hang wire on the cover - front cushion side with a new wire.**
**• Never remove the occupant detection sensor connector from the occupant detection control module.**
**• When replacing the seat cover, be careful not to damage the occupant detection sensor while installing the hog ring.**
**• When removing or replacing the seat cover, perform "Occupant Detection System Inspection" after installing the seat to check if the occupant detection system operates normally. <Ref. to PI-14, SEAT, PRE-DELIVERY INSPECTION (PDI) PROCEDURE, Pre-delivery Inspection.>**
1) Remove the front seat (passenger's side) from vehicle. <Ref. to SE-7, REMOVAL, Front Seat.>
2) Refer to the disassembly procedures for the driver's seat. <Ref. to SE-9, DRIVER'S SEAT, DISASSEMBLY, Front Seat.>

## D: ASSEMBLY

**CAUTION:**
**• Do not confuse the harness routing of the side airbag harness and the seat belt inner - front harness, etc. Assembling with harnesses improperly routed may cause the harness to get caught and short out.**
**• If the flat mat hook of the frame assembly - front backrest is deformed or comes off due to the deformation, replace the hook with a new part.**



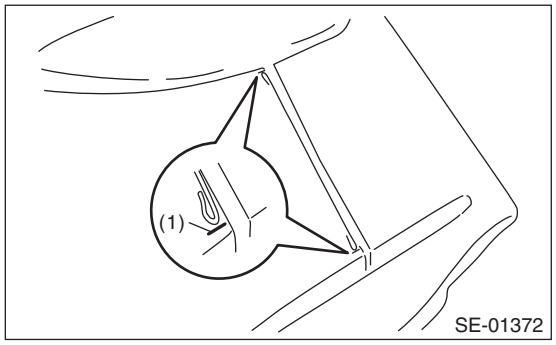
**• Make sure that the side airbag module is installed as shown in the figure.**



(1) Pad ASSY - front seat backrest
(2) Frame ASSY - front backrest
(3) Side airbag module protective cover
(4) Side airbag module inflator
(5) Nut
(6) Cover COMPL - front backrest
(7) Side airbag guide cloth

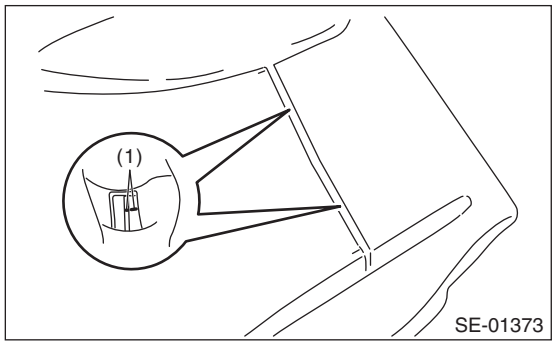
**Besides, if the cover COMPL - front backrest is not installed securely, the side airbag may not be activated properly, therefore keep strictly to the following procedures.**
**• Be careful not to stain or damage the cover COMPL - front backrest during assembly.**
**• Do not reuse hog rings.**
**• Secure the hog ring using hog ring pliers.**
**• Install the hog rings to the specified points securely and make sure that there is no wrinkle or twisting on the cover COMPL - front backrest.**
1) Make sure that there is no foreign matter on side airbag module.

2) Assemble the seat cover.
(1) Adjust so that the left and right clearances between wire and seat pad become equal, and mark the seat pad.



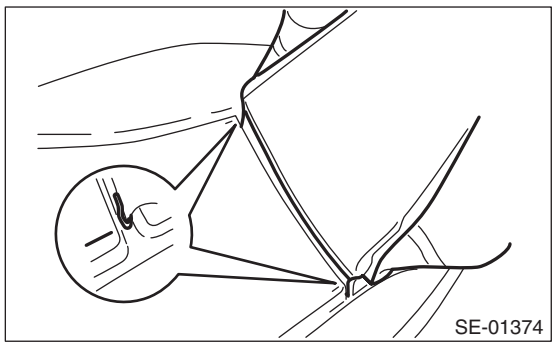
(1) Marking

(2) Mark the center of the wire on the pad side to which the hog ring is attached.

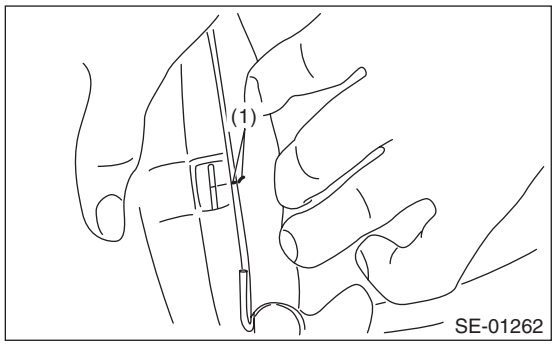


(1) Marking

(3) Insert the wire into the seat cover, and align the wire with the position marked in Step 1).

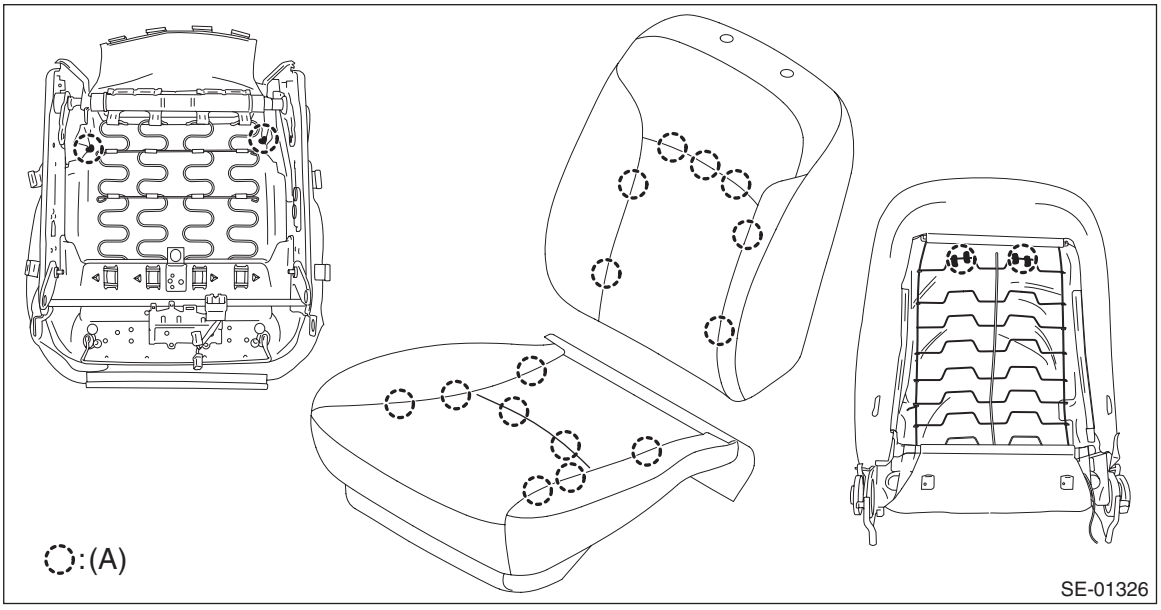


(4) Mark the wire on the seat cover side according to the markings on the seat pad.



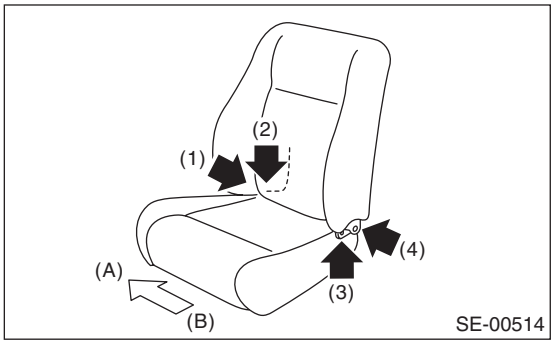
(1) Marking

(5) Perform Steps 1) — 4) to all sections to which the hog rings are attached.
(6) Make sure that all hog rings (A) are attached securely.



3) Assemble remaining parts in the reverse order of disassemble.

NOTE:
• When installing the seat belt inner - front, follow the procedures described in the seat belt section. <Ref. to SB-25, INSTALLATION, Front Seat Belt.>
• Install the backrest assembly and seat cushion assembly in the following procedure.
1. Temporarily tighten the four reclining hinge bolts.
2. Place the backrest in the most upright position.
3. Tighten the reclining hinge bolts in order from (1) to (4) two or three times, until they reach the specified torque.



(A) Vehicle inside
(B) Vehicle outside

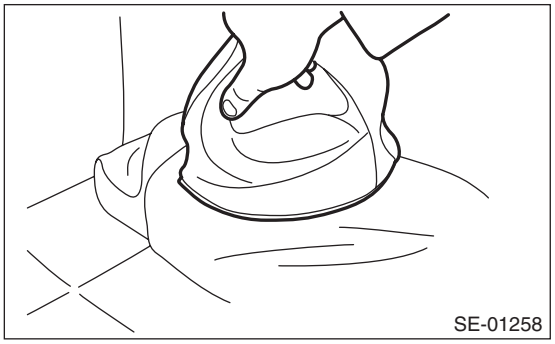
***Tightening torque:***
***Refer to "COMPONENT" of "General Description". <Ref. to SE-2, FRONT SEAT, COMPONENT, General Description.>***

4) If any wrinkles are found after the assembly of the seat cover, finish the seat cover with iron.
(1) Place the wet towel on wrinkles.

(2) Touch up with warm iron.

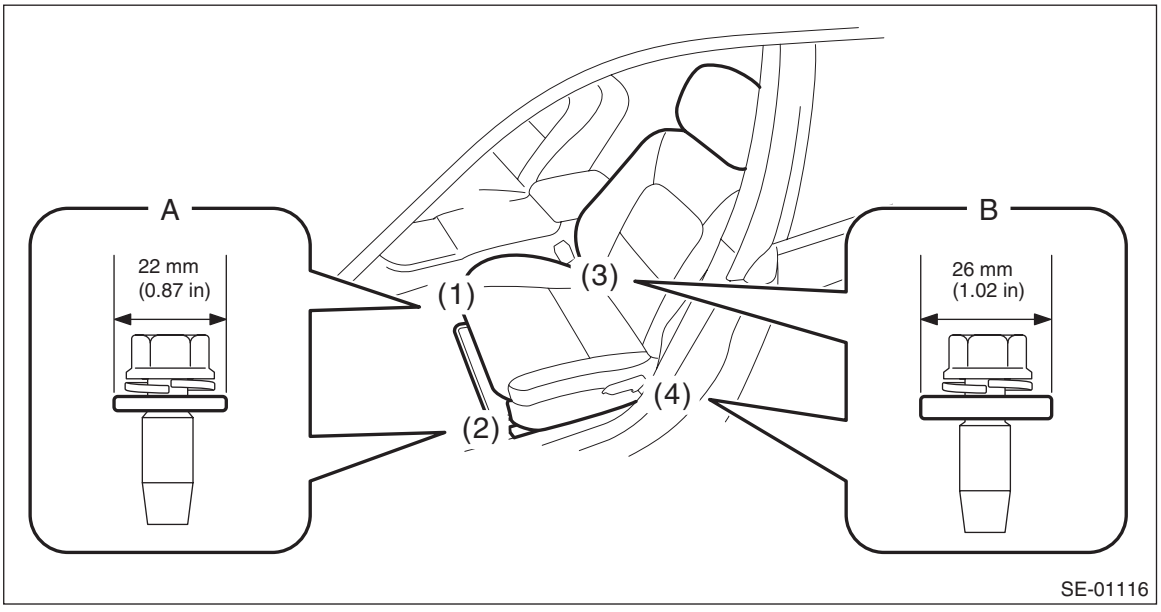
**CAUTION:**
**Keep moving the iron, otherwise the seat cover surface can be damaged.**

NOTE:
This method is available for genuine leather, synthetic leather, cloth, etc.



5) Install the seat assembly.

**CAUTION:**
**• The seat mounting bolts differ between the front mounting points and the rear mounting points. Make sure that you are using correct bolts at correct positions.**
**• Tighten the slide rail installing bolts in the order as shown in the figure, in several steps by gradually increasing the torque until they reach the specified torque.**



- **Front (bolt A): Washer diameter 22 mm (0.87 in)**
- **Rear (bolt B): Washer diameter 26 mm (1.02 in)**

***Tightening torque: 53 N·m (5.40 kgf-m, 39.1 ft-lb)***

# E: INSPECTION

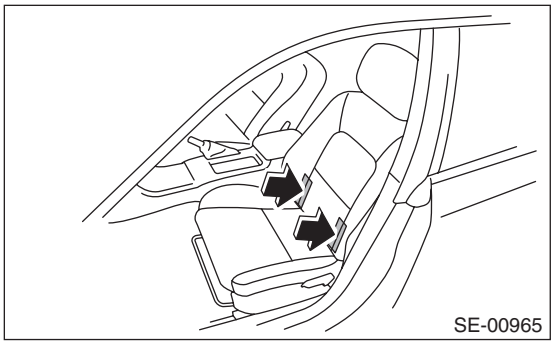
## 1. SEAT COVER

Check that there is no tear or fray on the cover COMPL - front backrest and the cover - front cushion.

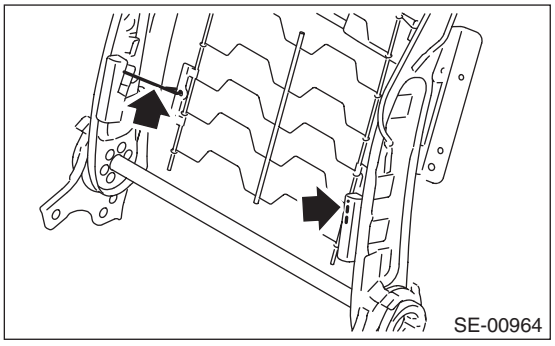
NOTE:
For model with side airbag, if the door side of the cover COMPL - front backrest is torn or frayed, the side airbag may not be deployed properly. In this case, replace the cover COMPL - front backrest with a new part.

## 2. FLAT MAT HOOK

Check the flat mat hook by applying weight to the backrest assembly.



NOTE:
If the appropriate stiffness is not obtained by applying weight to the backrest assembly, the hook may be disengaged.
If it is due to the deformation of the hook, replace the hook with a new part.

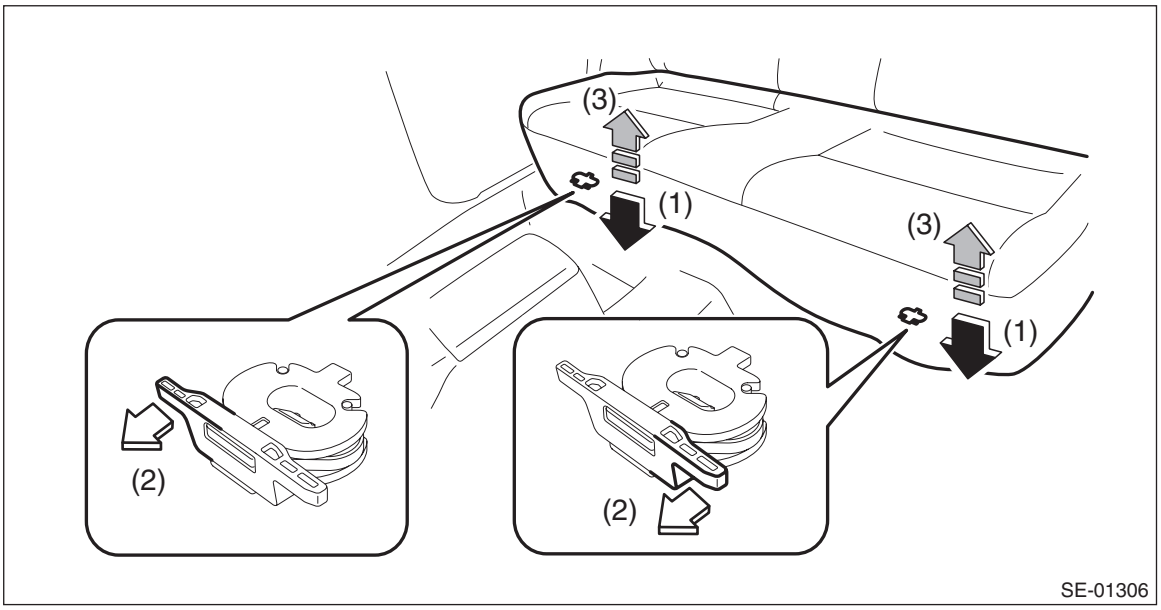


# 3. Rear Seat

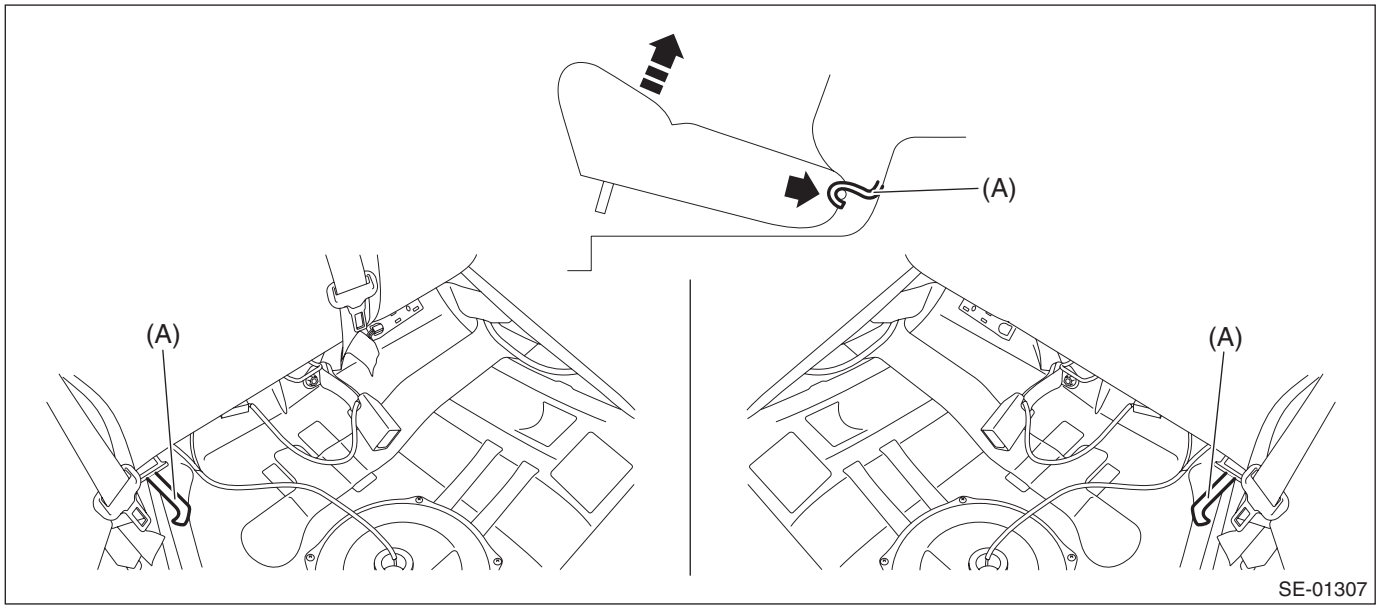
## A: REMOVAL

1) Remove the rear seat cushion assembly.
   (1) Push the corners of the rear seat cushion from above.
   (2) While pushing the corners of the rear seat cushion from above, pull the knob of the hook - seat cushion rear towards yourself.
   (3) While pulling the knob towards yourself, disconnect the hooks by lifting up the rear seat cushion.

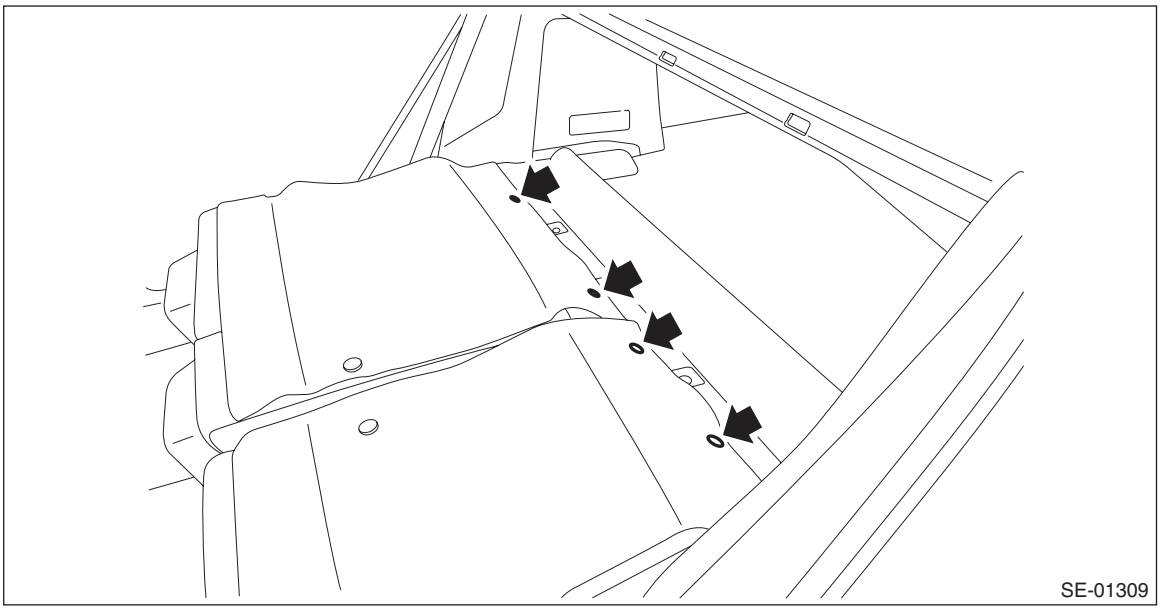
NOTE:
Pull the left side of the knob to disconnect the LH side hook, and pull the right side of the knob to disconnect the RH side hook.



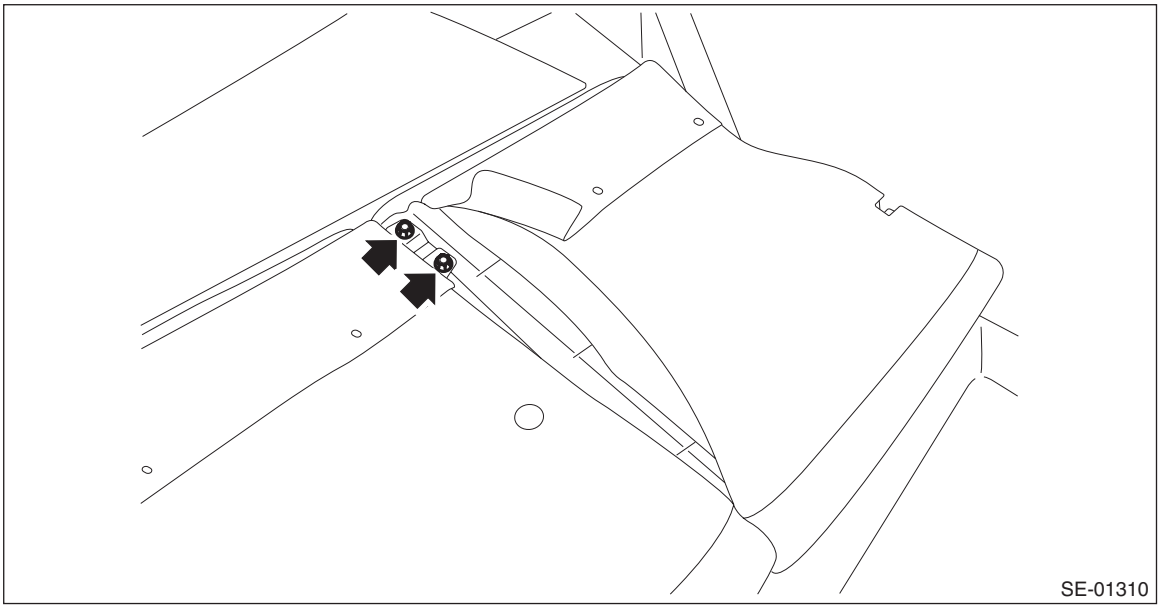
(4) Remove the hook (A) by pushing it back while lifting the front side of the rear seat cushion, and remove the rear seat cushion.



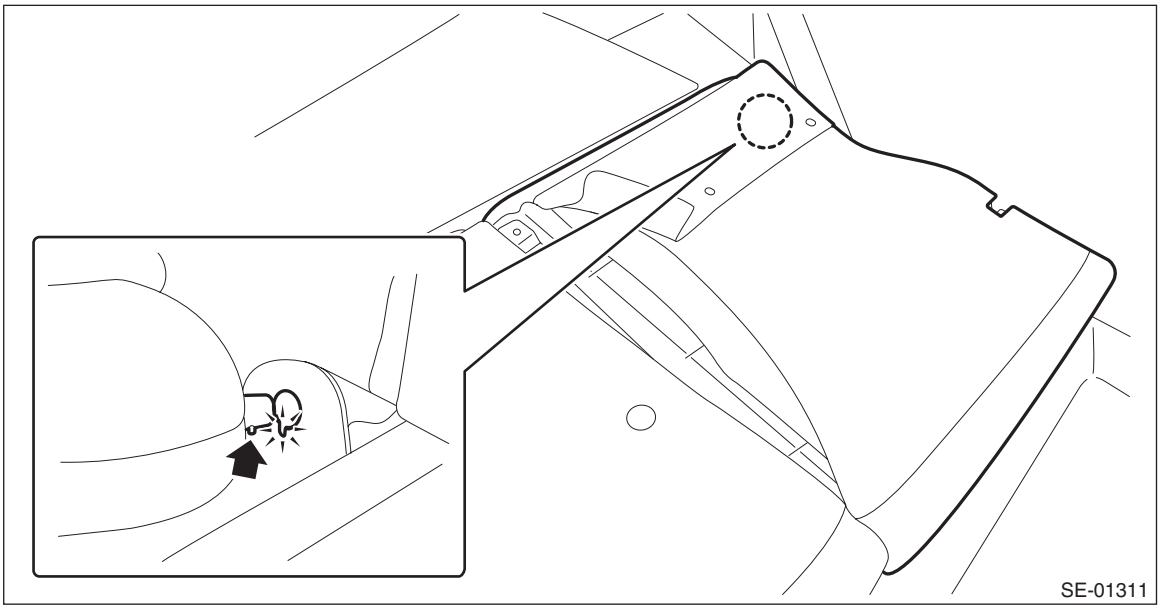
2) Remove the backrest assembly LH.
(1) Tilt the backrest assembly LH forward.
(2) Remove the clips located at the bottom of the cover COMPL - rear backrest LH and RH of the rear seat back.



(3) Turn over the cover COMPL - rear backrest LH to remove the bolts.



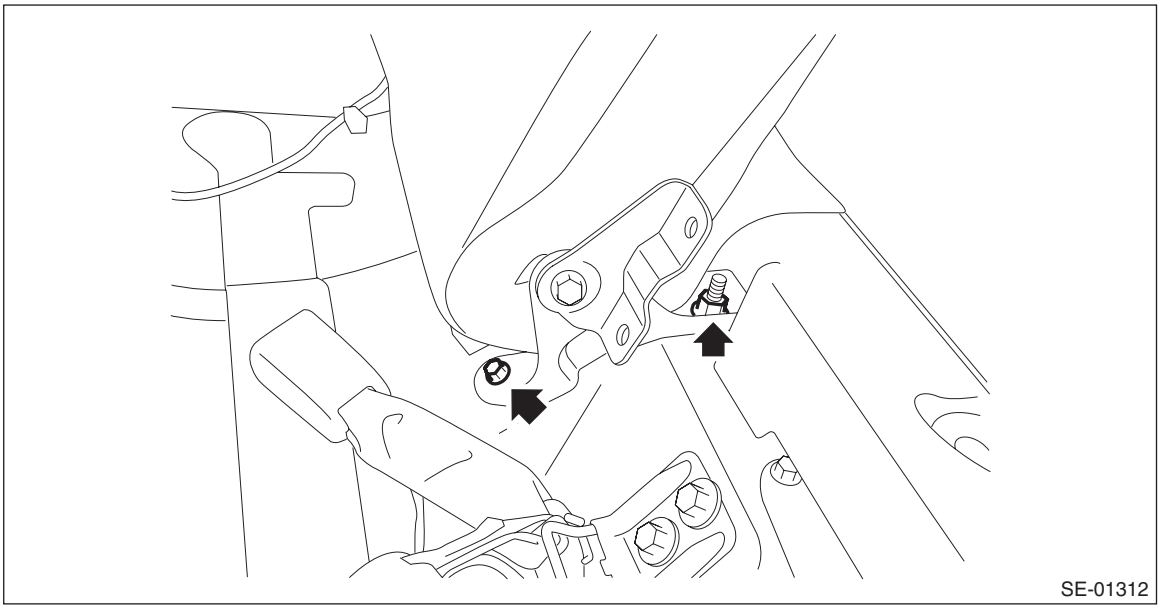
(4) Remove the backrest assembly LH from the hinge assembly.



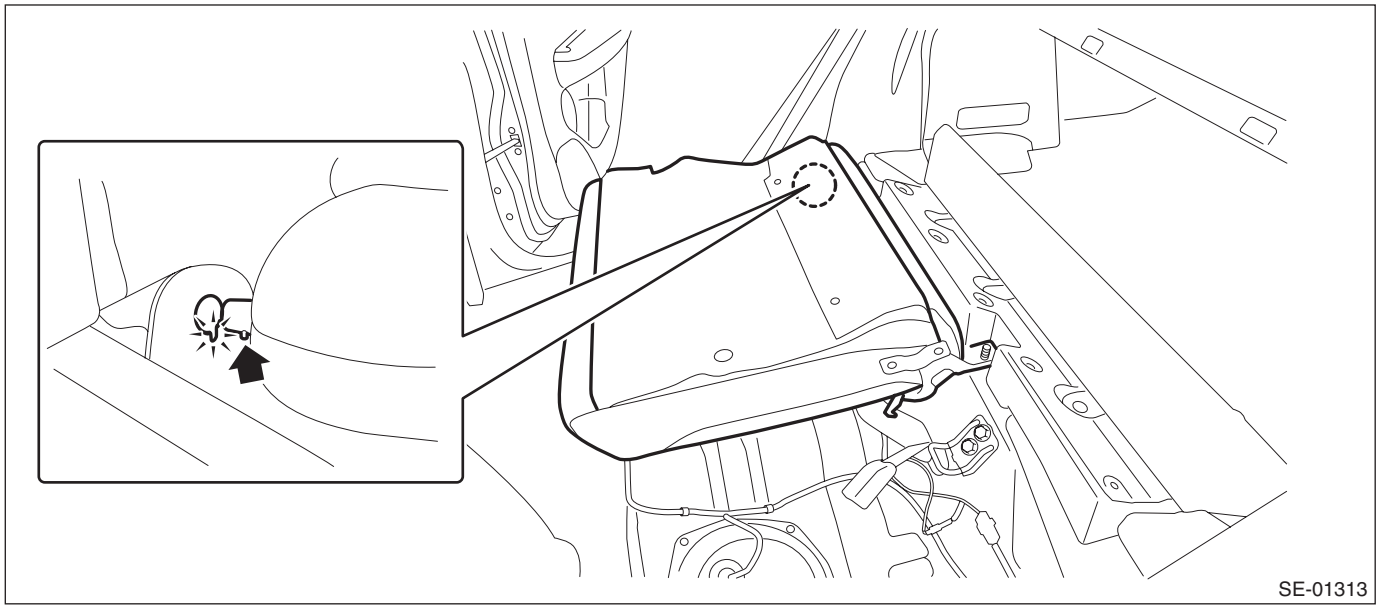
NOTE:
The backrest assembly cannot be removed unless pin positions on the hinge assembly side and backrest assembly side are aligned.

3) Remove the backrest assembly RH.

(1) Remove the bolts and nuts.



(2) Remove the backrest assembly RH from the hinge assembly.



NOTE:
The backrest assembly cannot be removed unless pin positions on the hinge assembly side and backrest assembly side are aligned.

## B: INSTALLATION

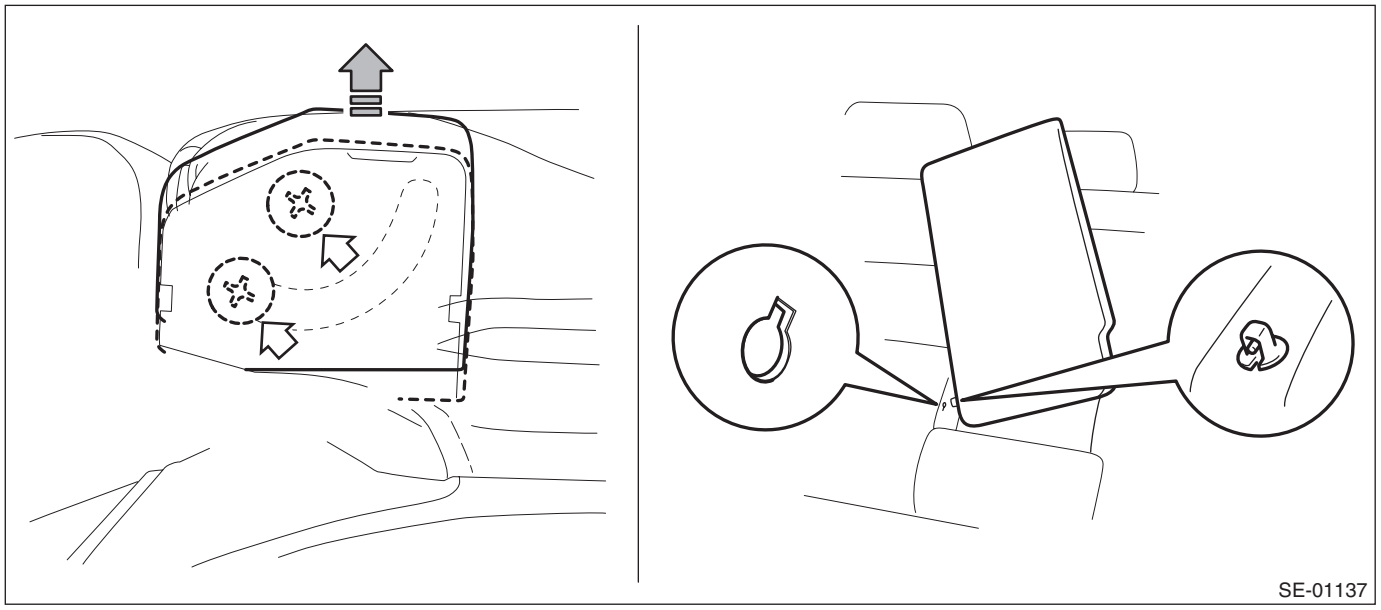
Install each part in the reverse order of removal.

NOTE:
- After installing the backrest assembly, make sure that each seat belt operates normally.
- Make sure that they are properly secured on each hook on the vehicle side.

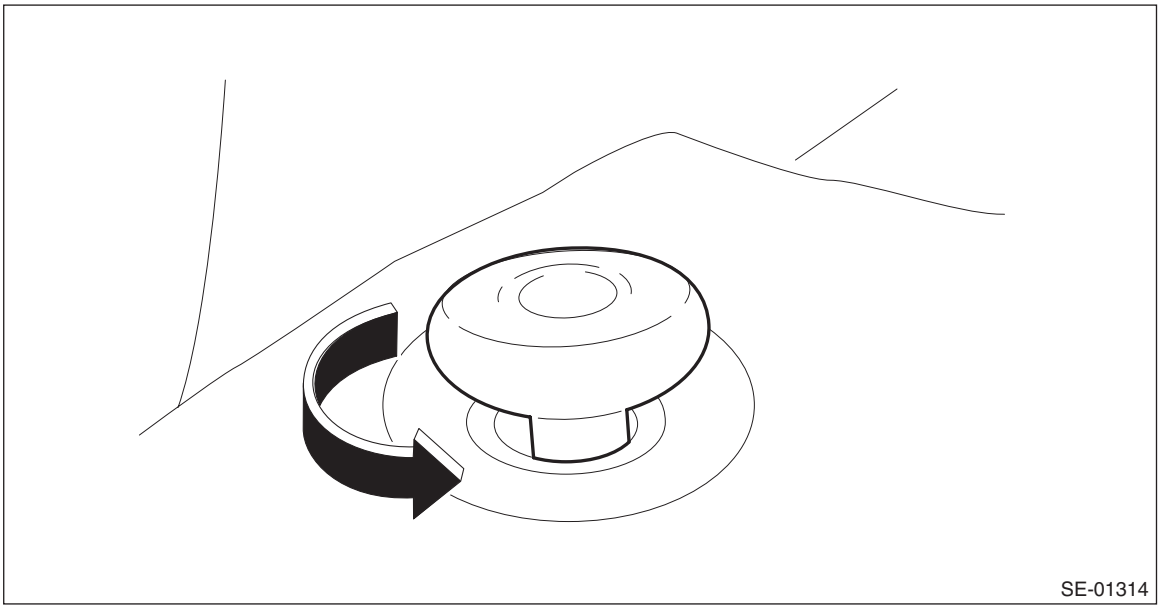
***Tightening torque:***
***Refer to "COMPONENT" of "General Description". <Ref. to SE-5, REAR SEAT, COMPONENT, General Description.>***

## C: DISASSEMBLY

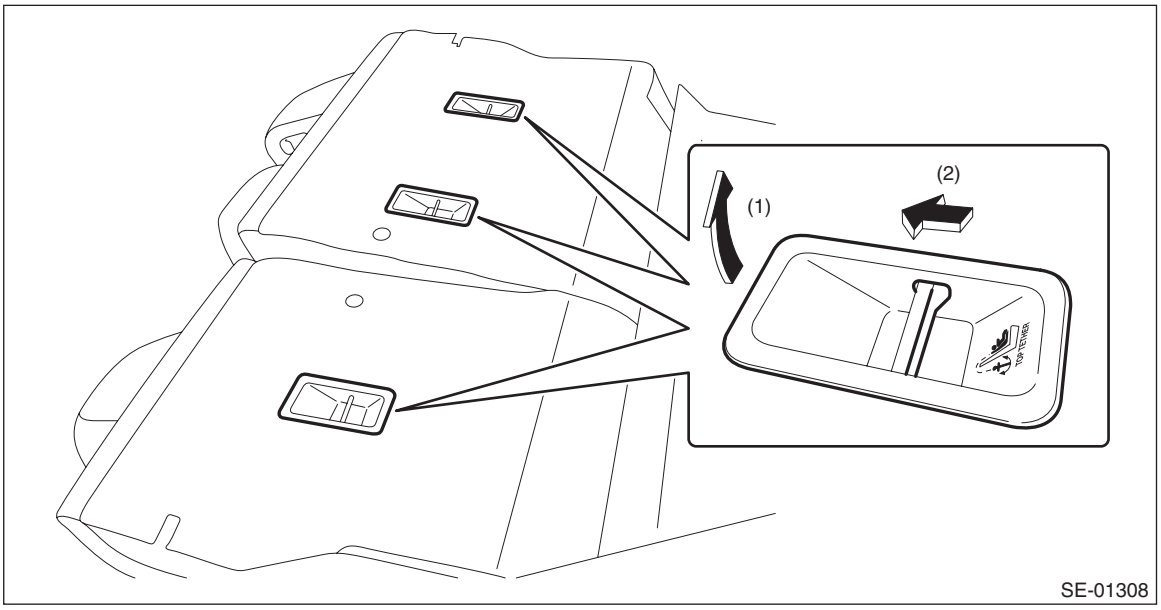
1) Remove the rear seat. <Ref. to SE-22, REMOVAL, Rear Seat.>
2) Remove the headrest assembly - rear backrest.
3) Remove the armrest assembly - rear center. (model with armrest assembly - rear center)
   (1) Remove the cover - armrest by pulling it in the direction of the arrow (black).
   (2) Remove the screws and remove the armrest assembly - rear center.



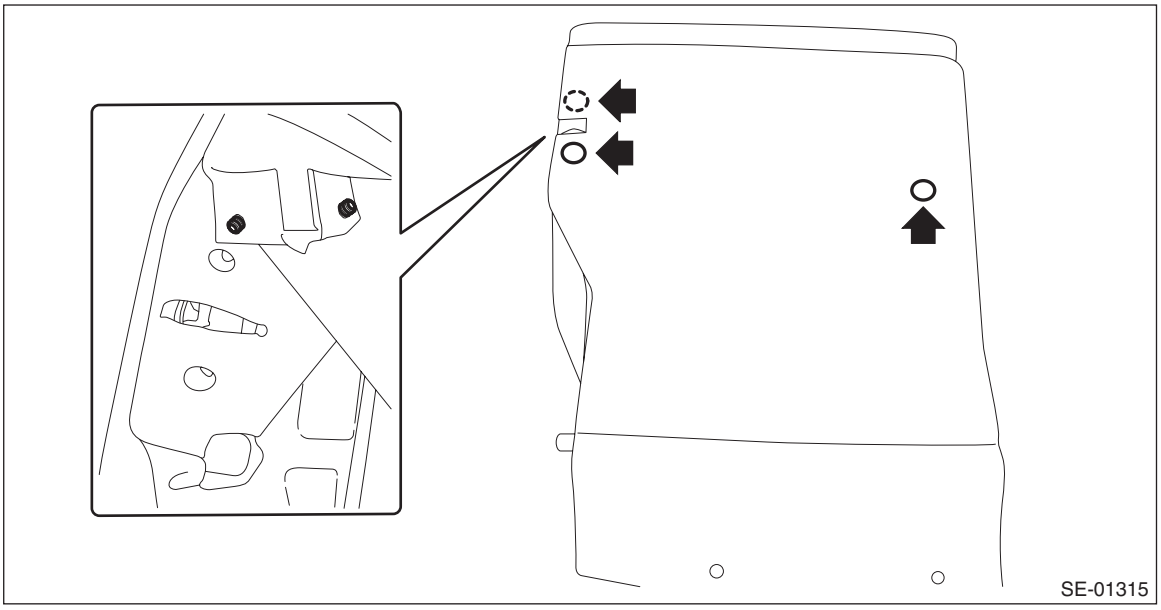
NOTE:
The armrest assembly - rear center cannot be detached unless pin positions on the RH side of the backrest assembly and on the center side of the armrest assembly - rear are aligned.
4) Remove the knob - backrest. (Screw-in type)



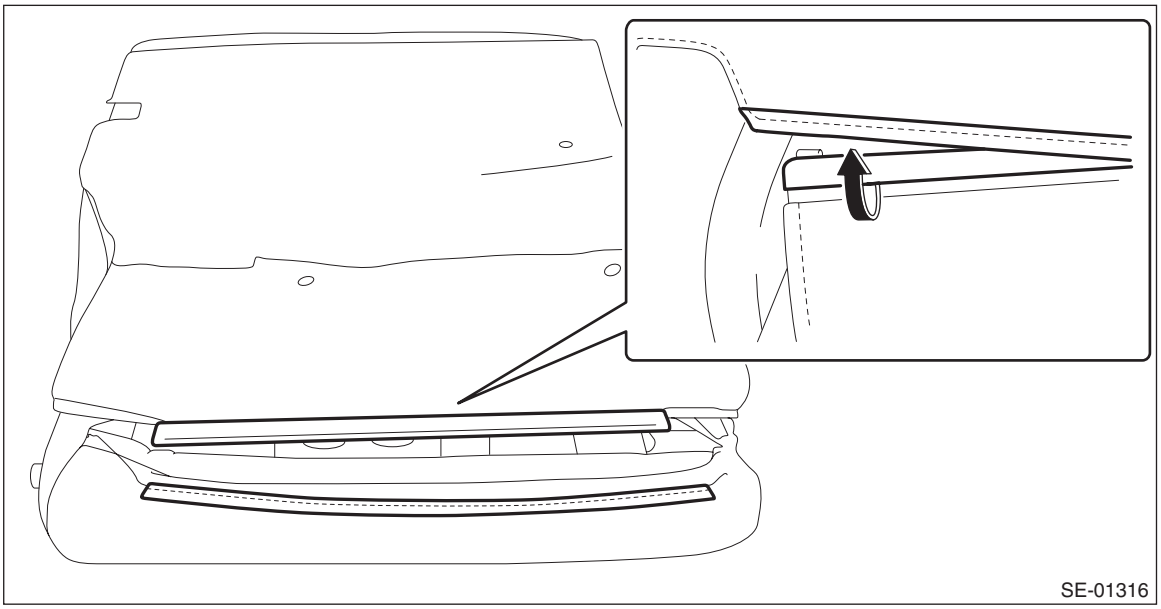
5) Remove the tether anchor cover.



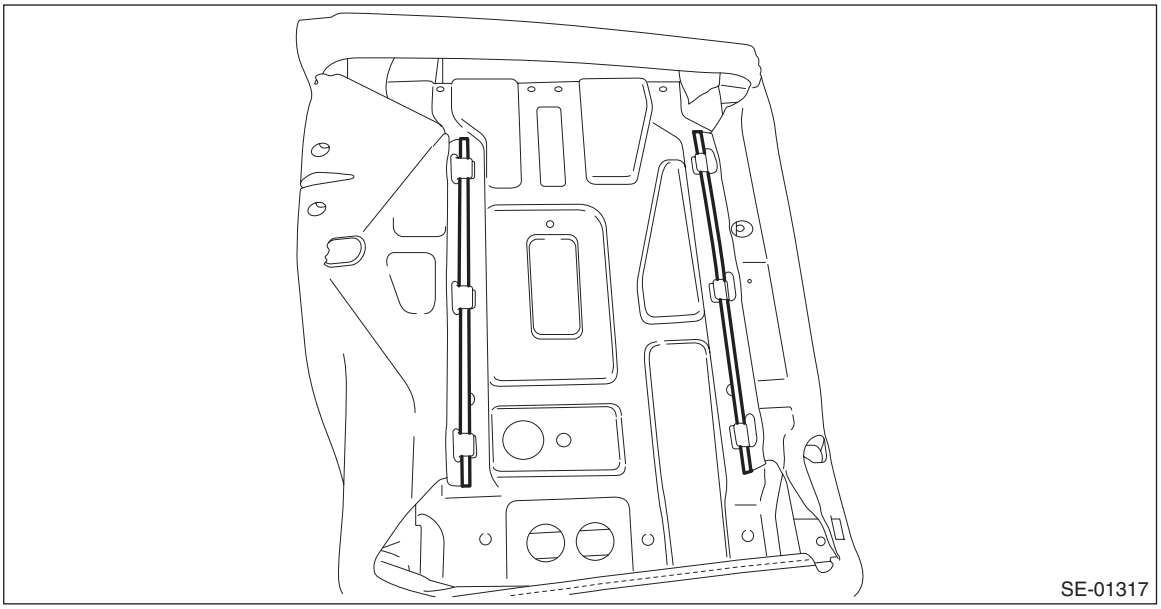
6) Remove the clips on the backside of the cover COMPL - rear backrest LH.



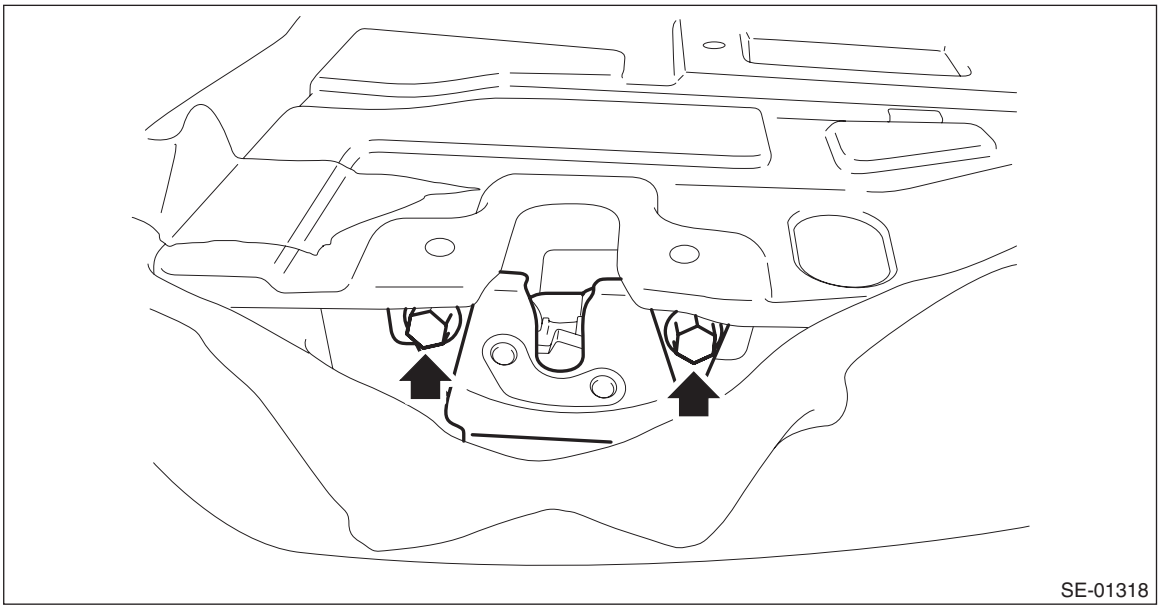
7) Detach the plastic fastener at the bottom of backrest assembly LH and turn over the cover COMPL - rear backrest LH.



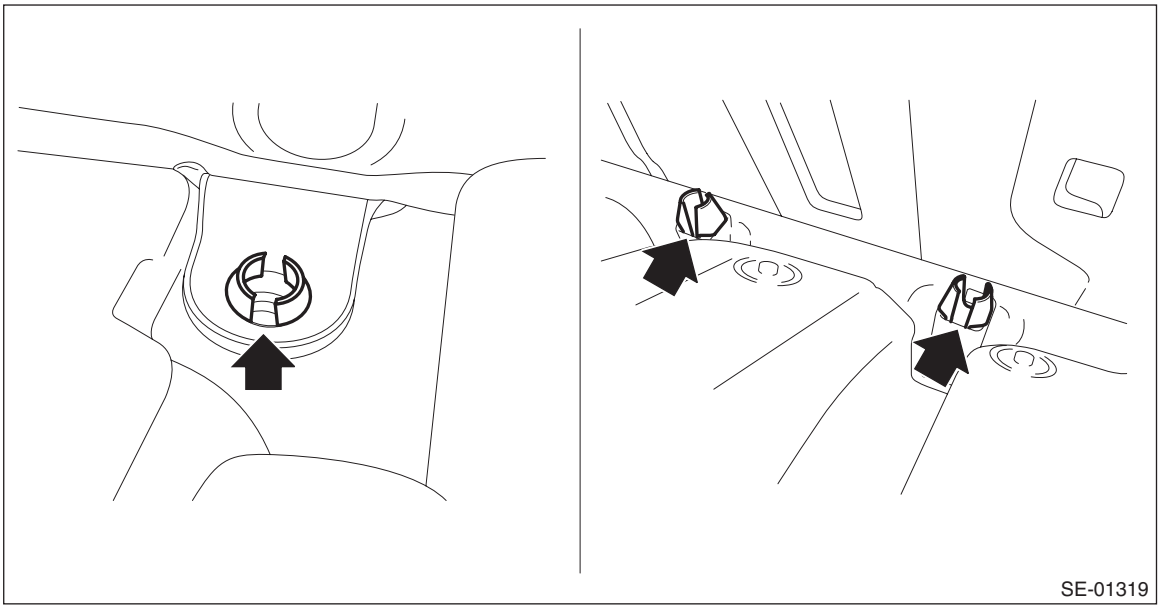
8) Remove the plastic hooks on the back side of the backrest assembly LH.



9) Remove the lock assembly - rear backrest rear LH.

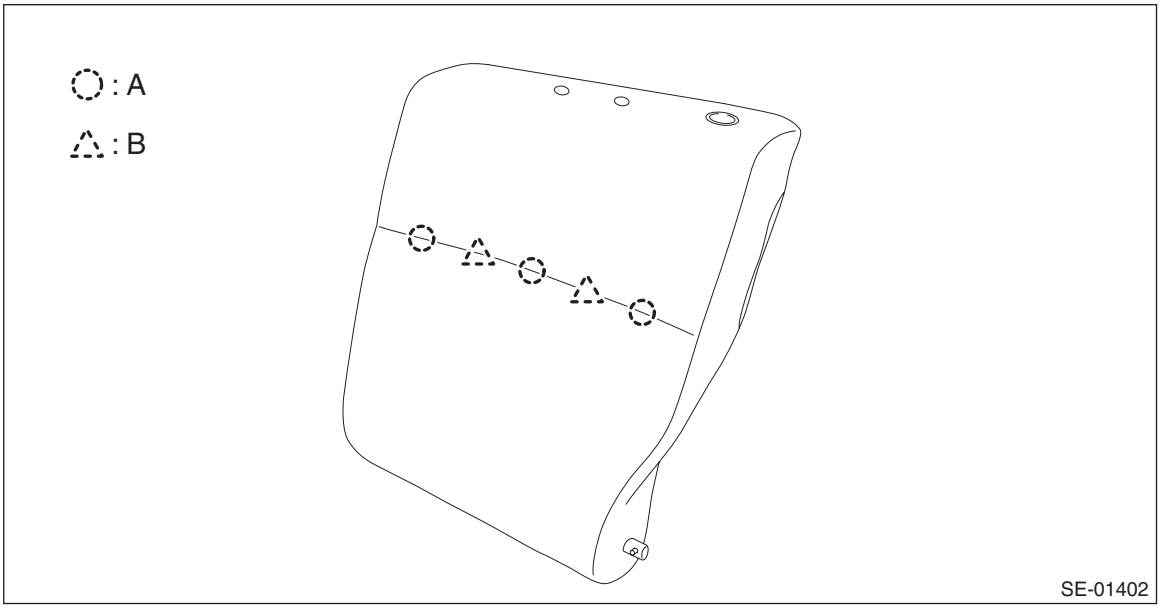


10) Detach the bushing - headrest and the bushing - lock assembly, and remove the frame assembly - rear backrest LH from the pad assembly - main LH.

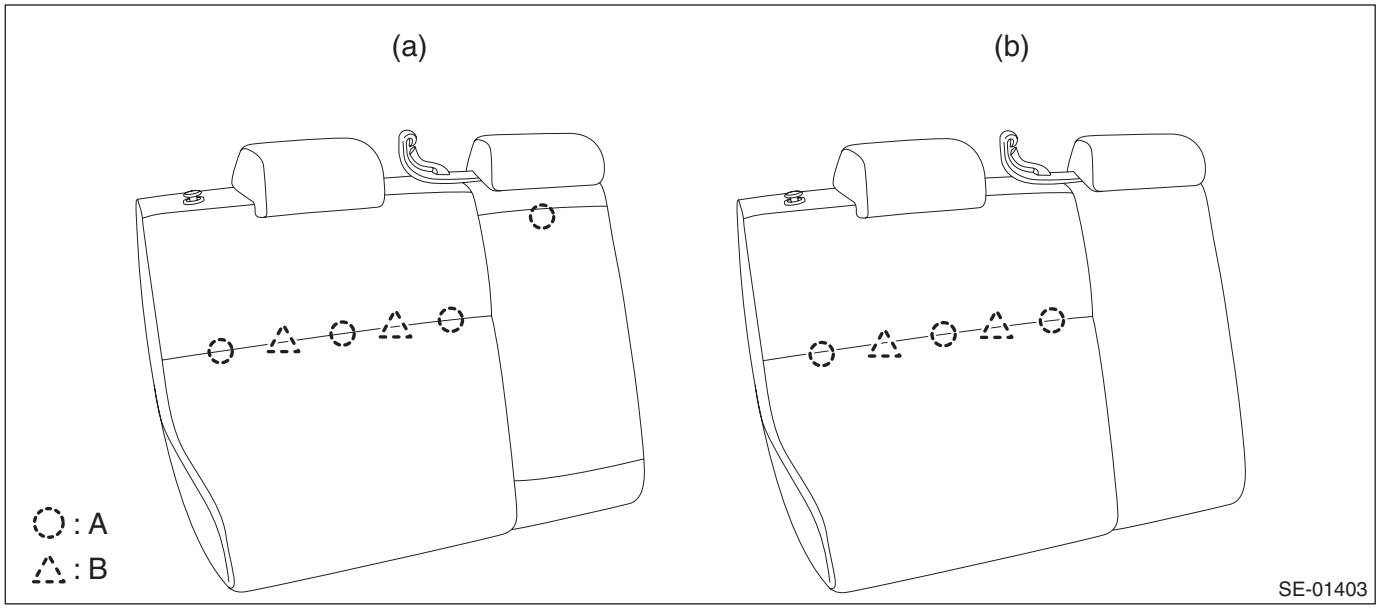


11) Remove the hog rings (A) and wire clip (B), then remove the cover COMPL - rear backrest LH.

- LH side



- RH side

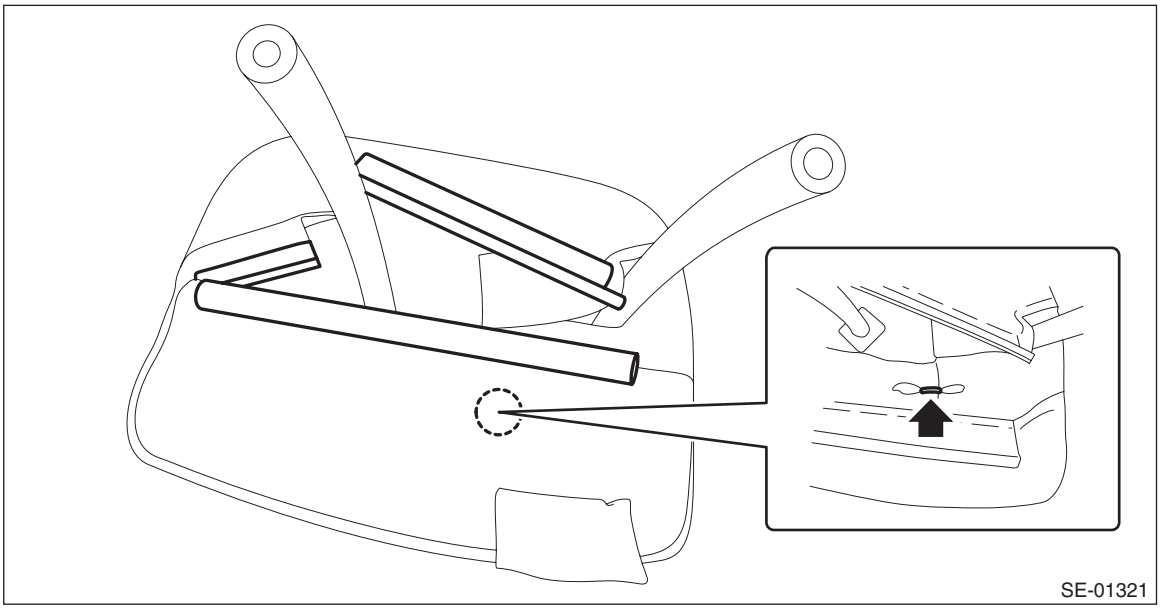


(a) Model with armrest assembly - rear center

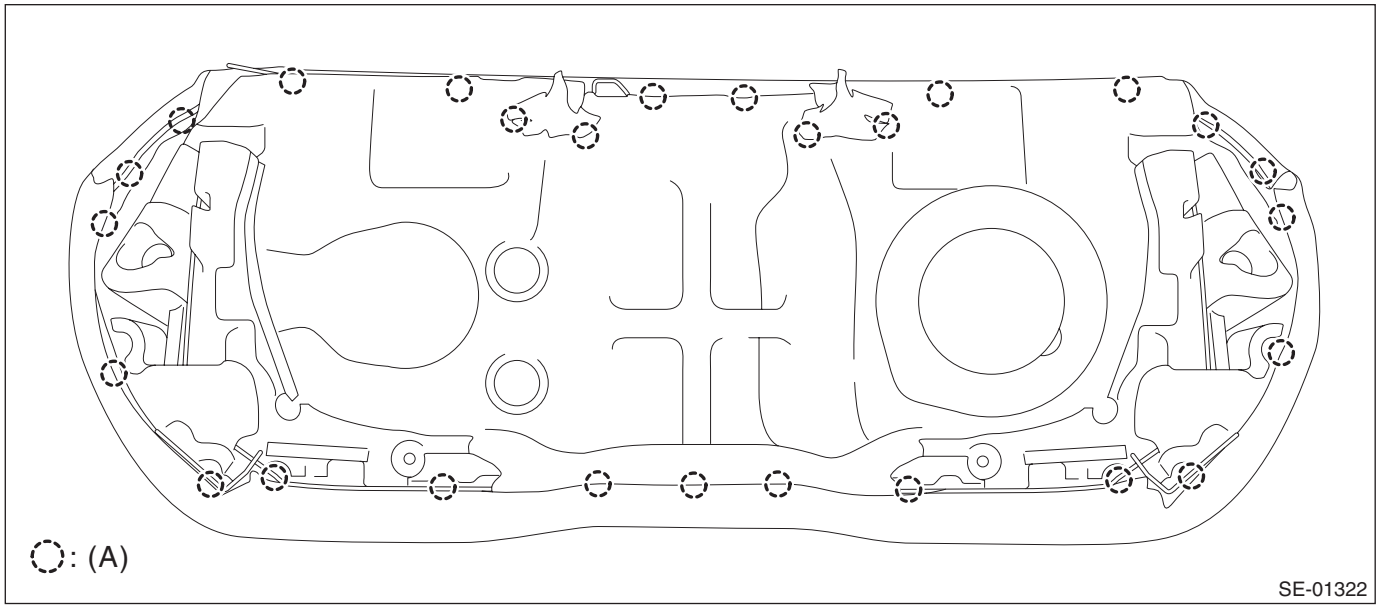
(b) Model without armrest assembly - rear center

12) Referring to the above steps, disassemble the backrest assembly RH.

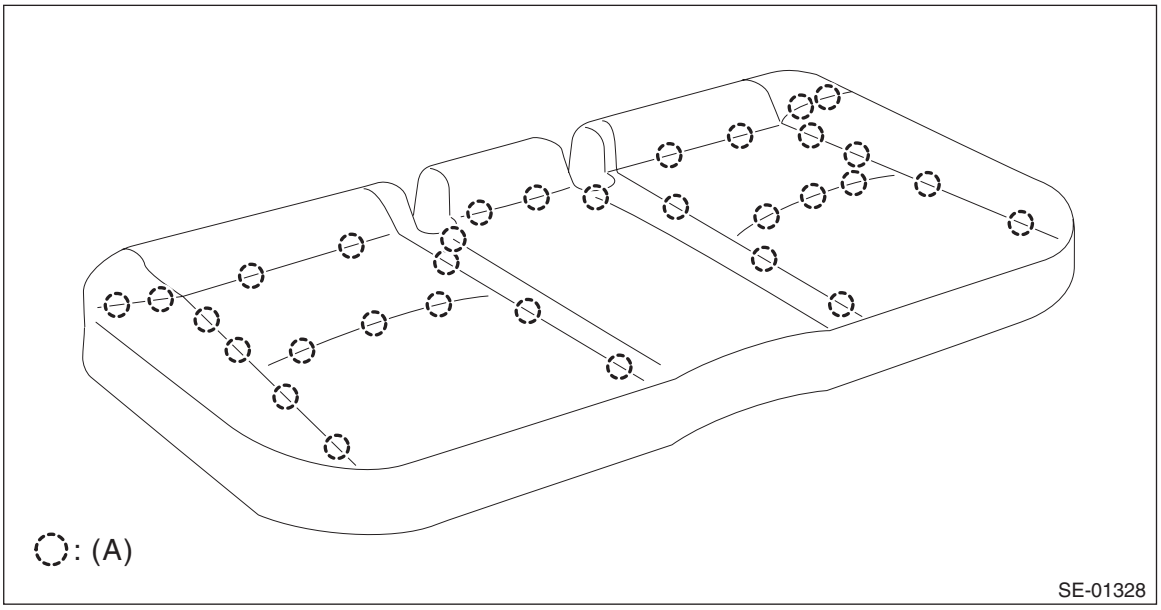
13) Detach the plastic fastener and hog ring, and then remove the headrest cover.



14) Remove the hog rings (A) on the back side of the rear seat cushion assembly.



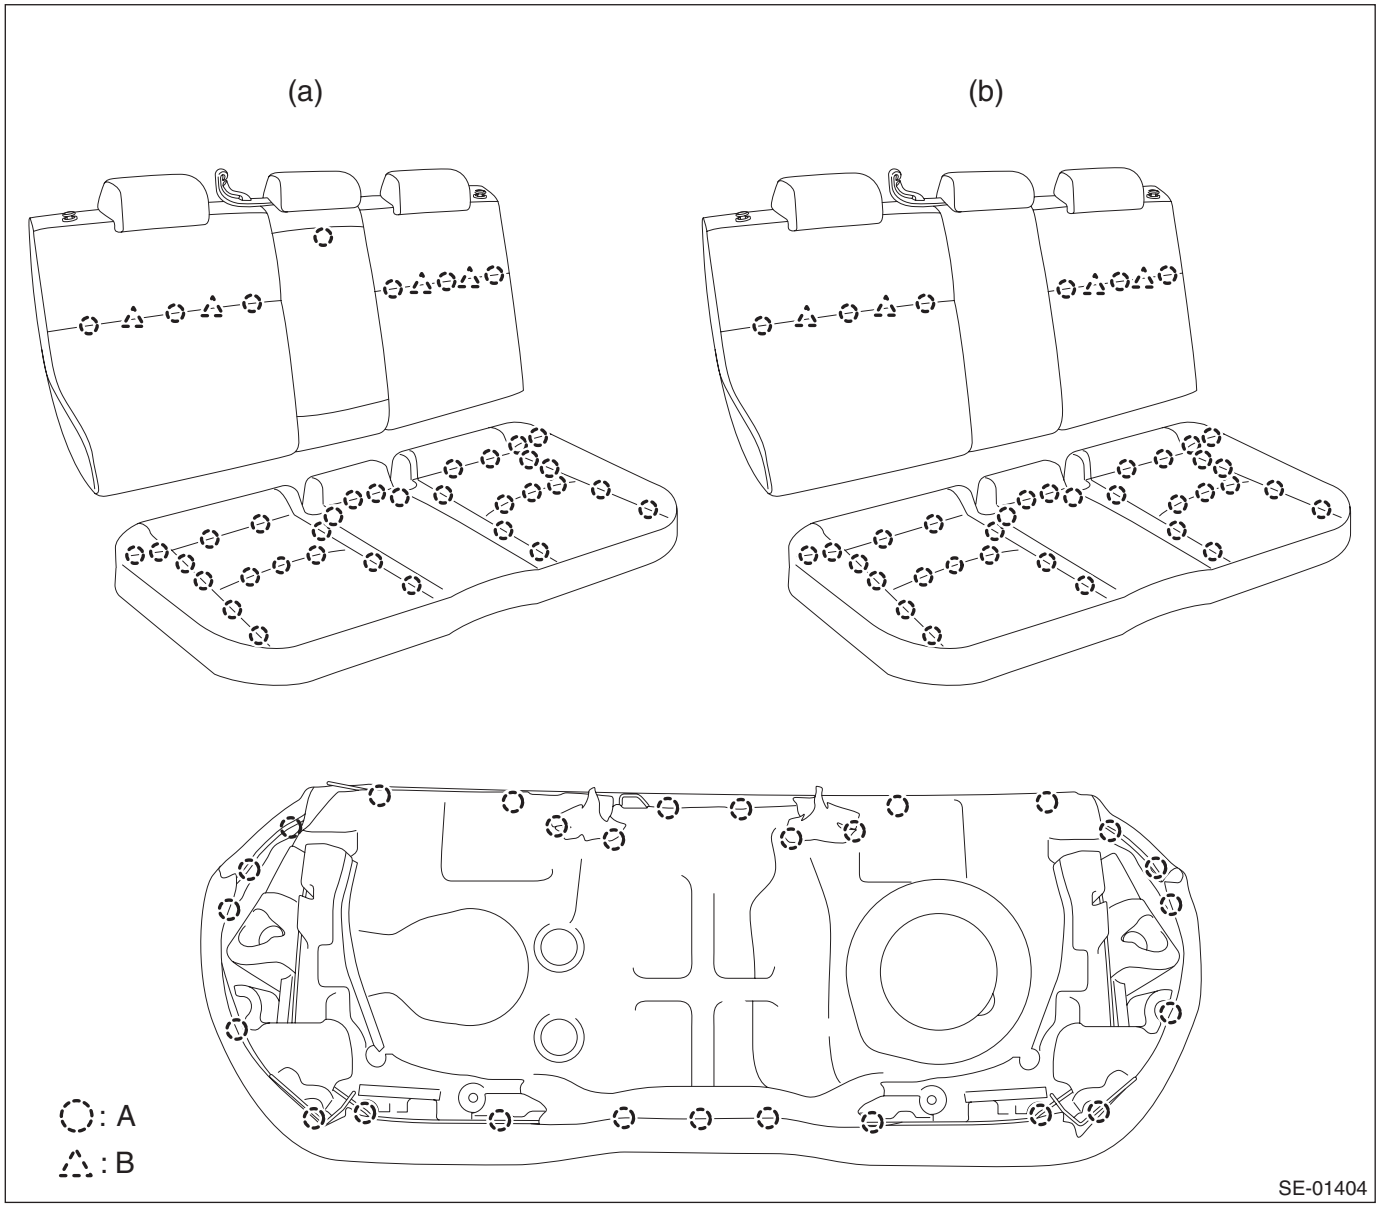
15) Remove the hog rings (A), then remove the cover - rear cushion.



## D: ASSEMBLY

**CAUTION:**
- **Do not reuse hog rings.**
- **Secure the hog ring using hog ring pliers.**
- **Install the hog rings to the specified points securely and make sure that there is no wrinkle or twisting on the cover COMPL - rear backrest.**

1) Assemble the cover COMPL - rear backrest and the cover - rear cushion in the same manner as for the front seat. <Ref. to SE-17, ASSEMBLY, Front Seat.>
2) Make sure that all hog rings (A) and wire clips (B) are attached securely.



(a) Model with armrest assembly - rear center
(b) Model without armrest assembly - rear center

3) Assemble each part in the reverse order of disassembly.

NOTE:
- Do not contaminate or damage the cover COMPL - rear backrest and the cover - rear cushion.
- While installing the hog rings, prevent the cover COMPL - rear backrest and the cover - rear cushion from getting wrinkled.

***Tightening torque:***
***Refer to "COMPONENT" of "General Description". <Ref. to SE-5, REAR SEAT, COMPONENT, General Description.>***

4) Before installation, check the following items.
- No tear and fray on the cover COMPL - rear backrest and the cover - rear cushion.
- No fray or deformation on each wire cable.

5) Install each part in the reverse order of removal.

# 4. Seat Heater System

## A: REMOVAL

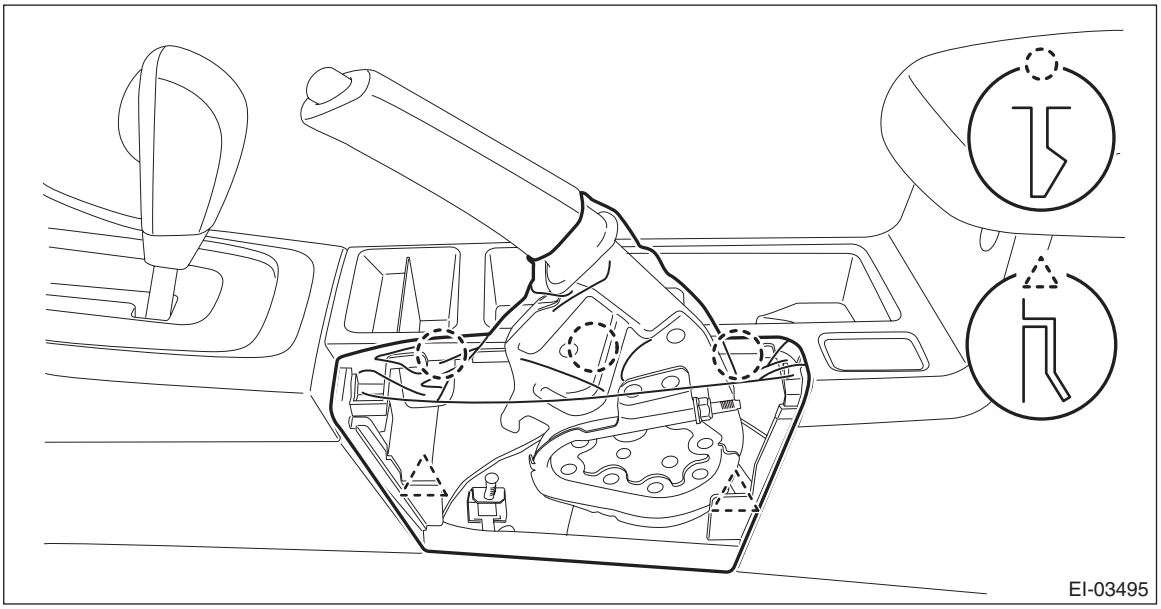
### 1. SEAT HEATER UNIT

1) Remove the front seats. <Ref. to SE-7, REMOVAL, Front Seat.>
2) Remove the backrest cover of front seat and seat cushion cover. <Ref. to SE-9, DISASSEMBLY, Front Seat.>
3) Remove the seat heater unit.

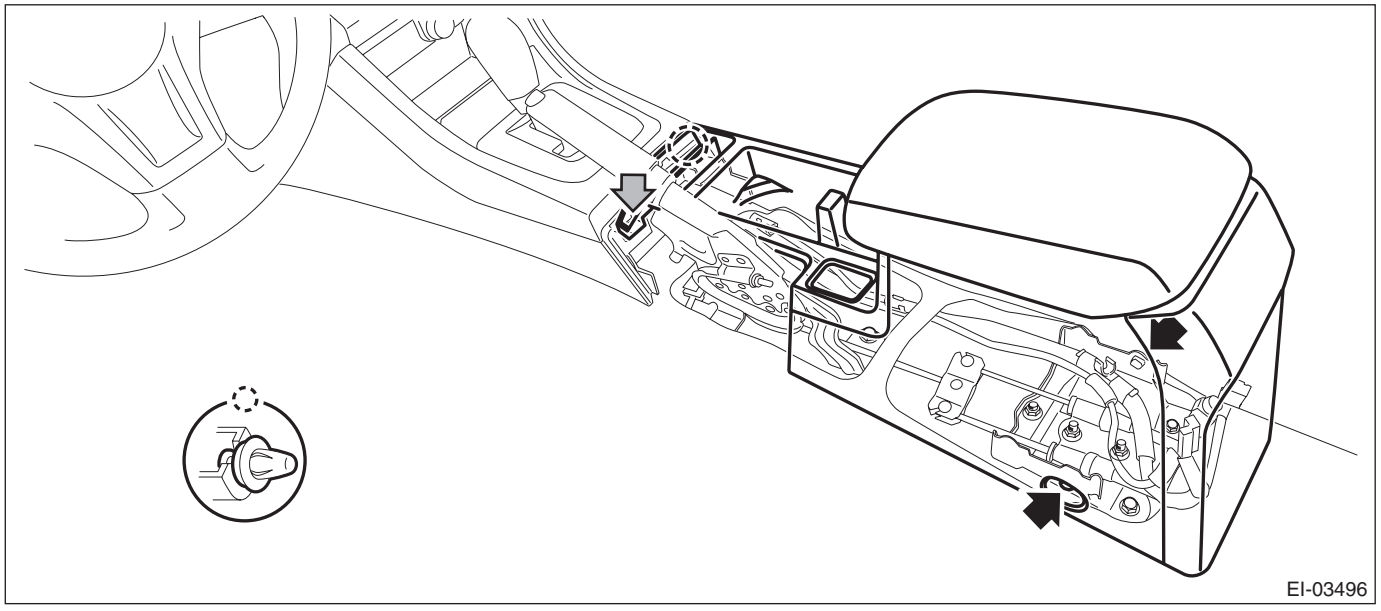
### 2. SEAT HEATER SWITCH

1) Disconnect the ground cable from battery.

NOTE:
On CVT models, shift the select lever into D before disconnecting the battery ground cable.
2) Remove the console box assembly.
(1) Release the claws, and then remove the boot - hand brake.



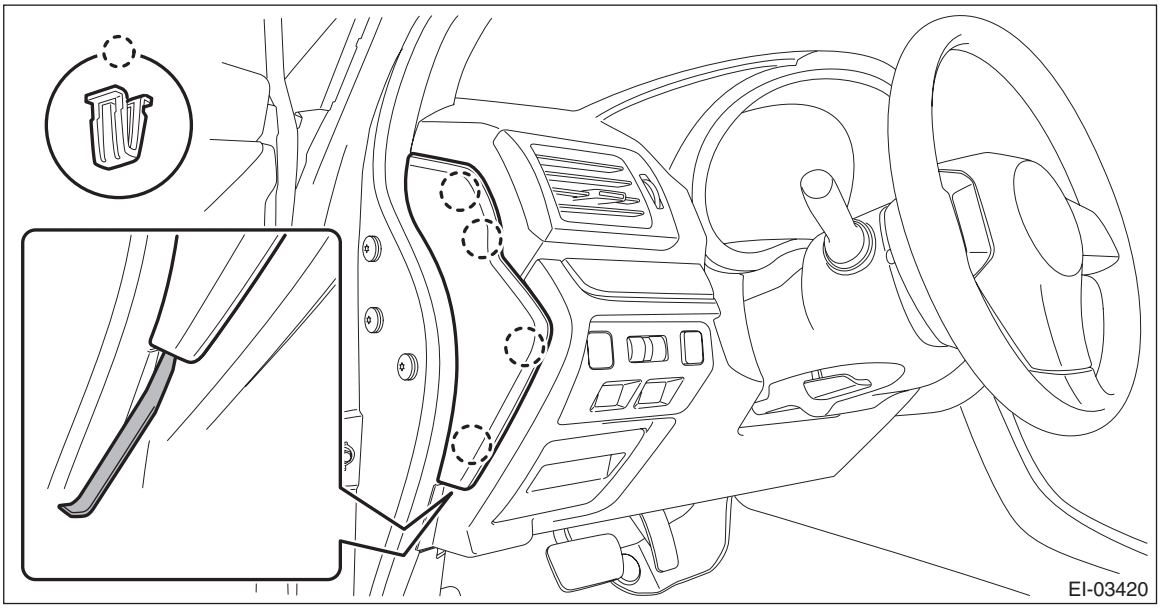
(2) Move the seat forward, and remove the bolts after detaching the left and right caps.
(3) Remove the screws, disconnect the harness connector and remove the console box assembly.



3) Remove the screws and remove the seat heater switch from the backside of the console box assembly.

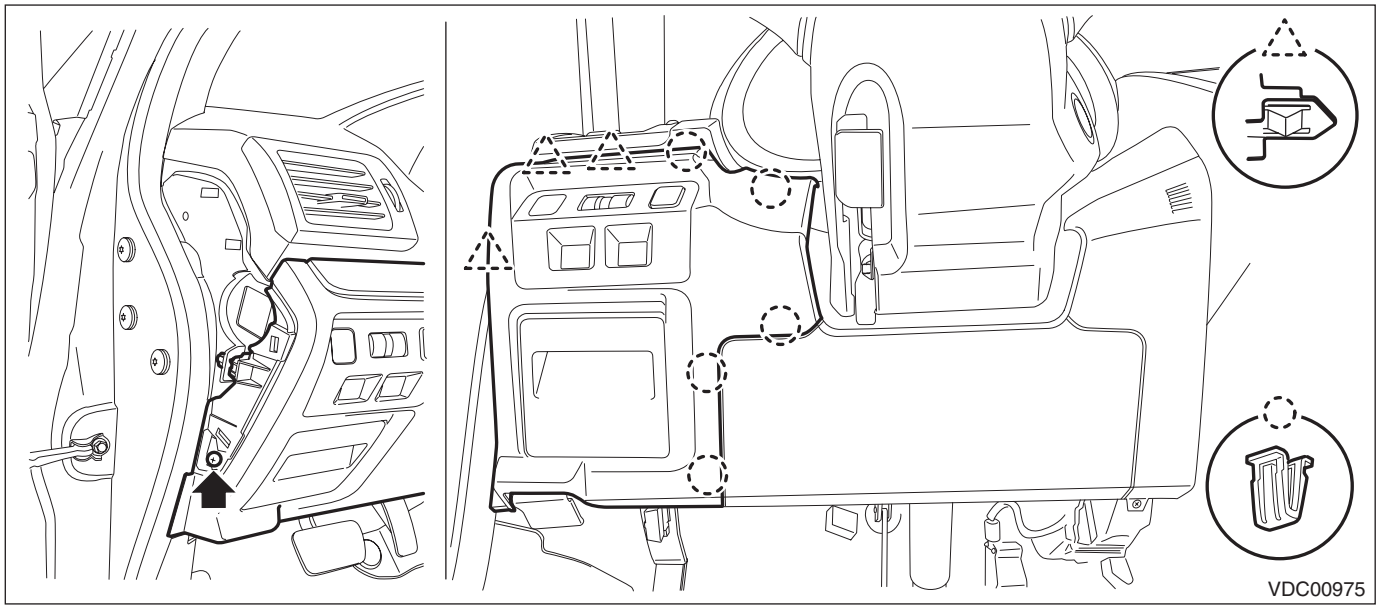
### 3. SEAT HEATER RELAY AND FUSE

1) Disconnect the ground cable from battery.
2) Remove the cover assembly - instrument panel LWR driver.
   (1) Remove the clips, and remove the cover - instrument panel side LH.

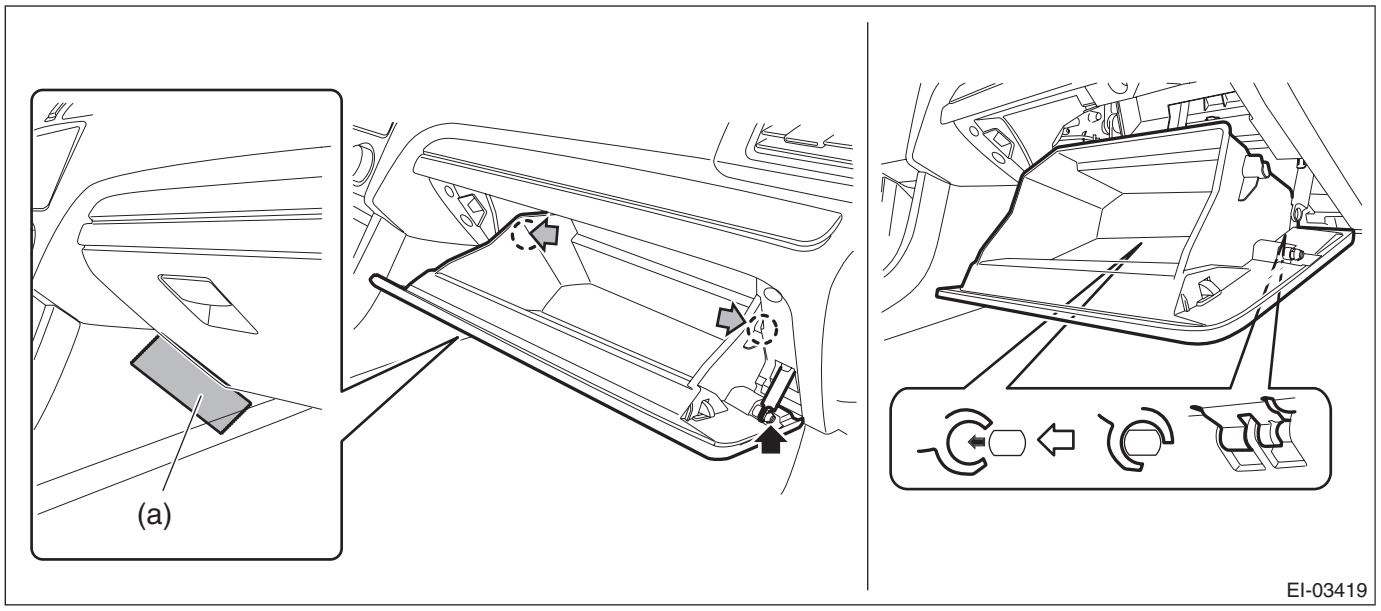


NOTE:
Using a plastic remover, open the cover - instrument panel side LH.

   (2) Remove the screws and release the clips and claws.
   (3) Disconnect the harness connectors, and remove the cover assembly - instrument panel LWR driver OUT.

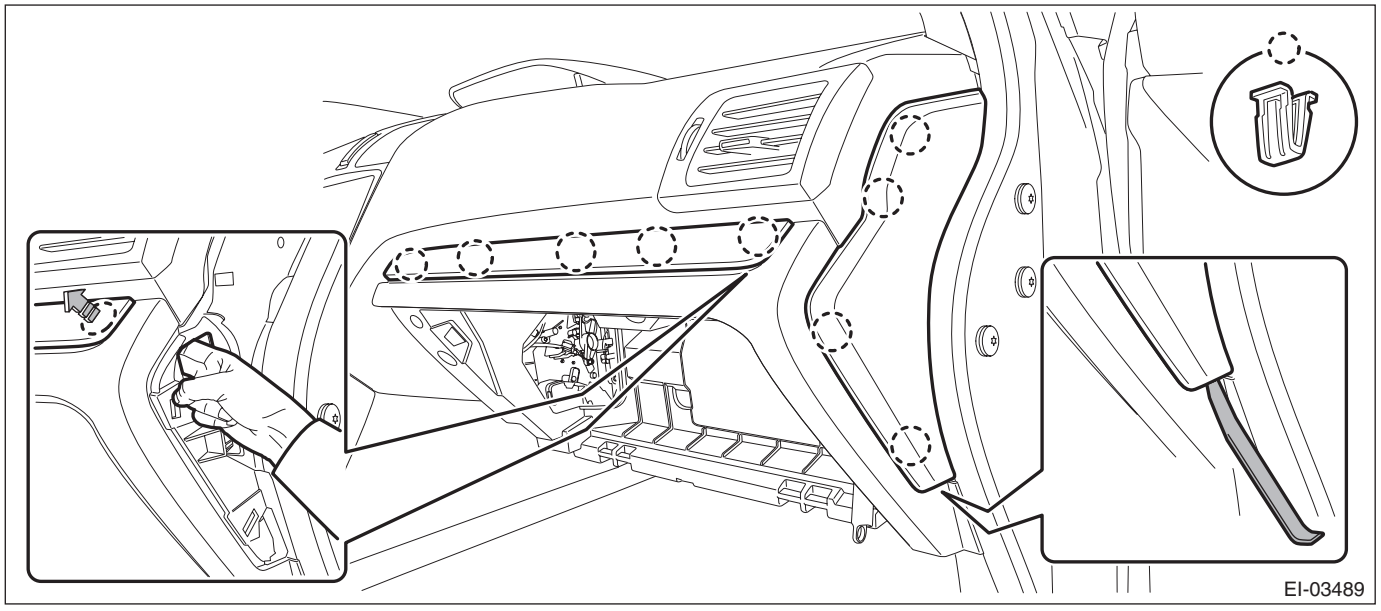


3) Remove the pocket assembly.
(1) Attach the protective tape (a) to the panel center LWR.
(2) Remove the damper COMPL - pocket.
(3) Release the stoppers and remove the pocket assembly by pulling it toward you.



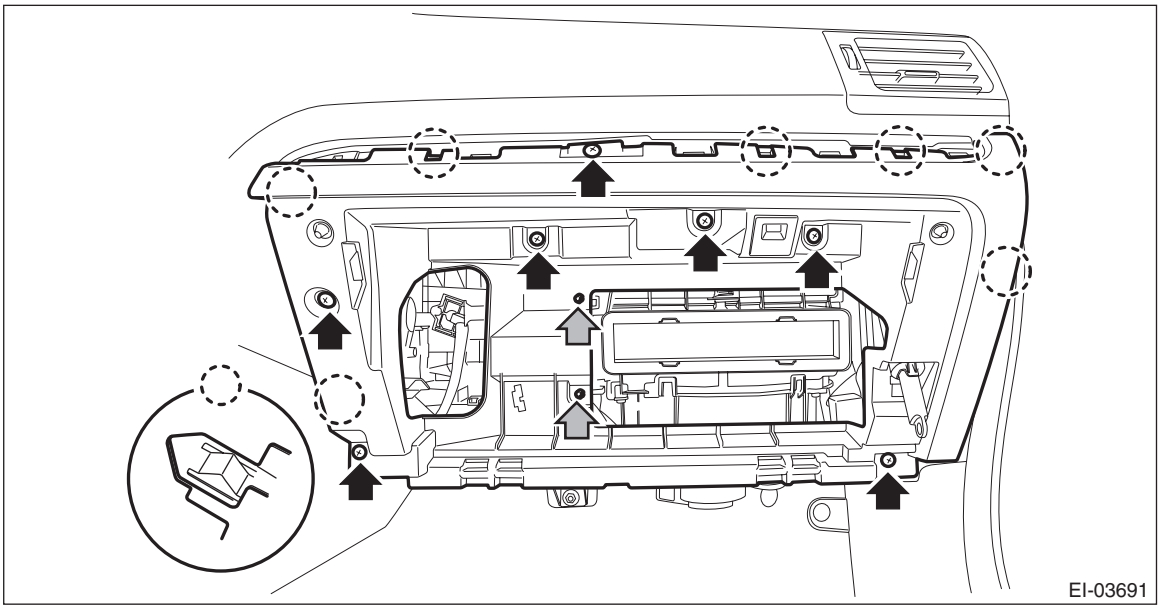
4) Remove the back panel - pocket.
(1) Remove the clips, and remove the cover - instrument panel side RH.

NOTE:
Remove the cover - instrument panel side RH by using a plastic remover.
(2) Release the clips, and remove the ornament - panel assembly passenger.



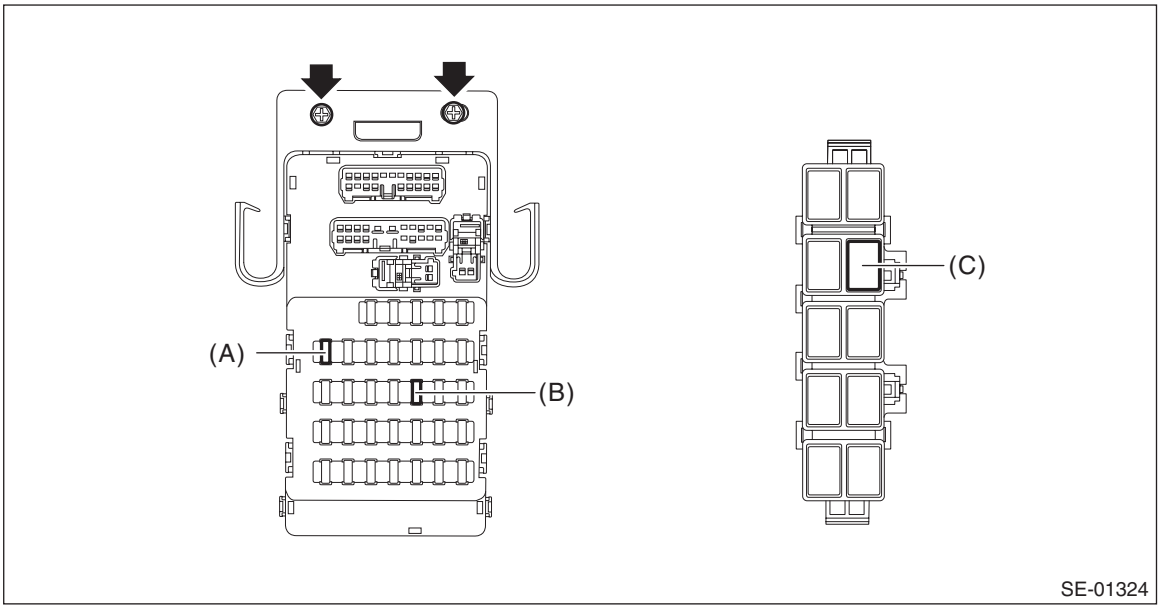
NOTE:
To facilitate the removal, push the clip of the ornament - panel assembly passenger from the backside.

(3) Release the claws and remove the screws, then remove the back panel - pocket.



(4) Disconnect the glove box light LED connector.

5) Remove the seat heater relay and fuse.
(1) Remove the relay & fuse box bolts.
(2) Remove the seat heater relay from the relay holder.



| | | |
|---|---|---|
| Relay & fuse box | Fuse 7.5 A (remote control mirror) | (A) |
| | Fuse 15 A (seat heater) | (B) |
| Relay holder | Seat heater relay | (C) |

## B: INSTALLATION

Install each part in the reverse order of removal.

# C: INSPECTION

## 1. WIRING DIAGRAM

Refer to “Seat Heater System” in the wiring diagram. <Ref. to WI-137, WIRING DIAGRAM, Seat Heater System.>

## 2. DIAGNOSTIC CHART

| Symptoms | Repair order |
|---|---|
| Seat heater does not operate. | 1. Check the fuse. <Ref. to SE-39, CHECK SEAT HEATER FUSE, INSPECTION, Seat Heater System.> |
| | 2. Check the seat heater relay. <Ref. to SE-39, CHECK SEAT HEATER RELAY, INSPECTION, Seat Heater System.> |
| | 3. Check the seat heater system power supply and ground circuit. <Ref. to SE-40, CHECK POWER SUPPLY AND GROUND CIRCUIT, INSPECTION, Seat Heater System.> |
| | 4. Check the seat heater module. <Ref. to SE-40, SEAT HEATER UNIT, INSPECTION, Seat Heater System.> |
| | 5. Check the seat heater switch circuit. <Ref. to SE-41, SEAT HEATER SWITCH, INSPECTION, Seat Heater System.> |

## 3. CHECK SEAT HEATER FUSE

Remove the seat heater fuse and inspect visually.
Is the fuse blown out?

- **Yes** → Replace the fuse.
- **No** → Check the power supply and ground circuits.

## 4. CHECK SEAT HEATER RELAY

1) Remove the seat heater relay from the relay holder.
2) Measure the resistance between seat heater relay terminals.

***Preparation tool: Circuit tester***

| Terminal No. | Inspection conditions | Standard | Circuit |
|---|---|---|---|
| 36 — 37 | Always | 1 MΩ or more |  |
| 36 — 37 | Apply battery voltage between terminals 38 — 39. | Less than 1 Ω | |

3) Replace the seat heater relay if the inspection result is not within the standard.

## 5. CHECK POWER SUPPLY AND GROUND CIRCUIT

1) Check power supply circuit
(1) Disconnect the harness connector of seat heater switch.
(2) Turn the ignition switch to ON.
(3) Measure the voltage between harness connector terminal and chassis ground.

***Connector & terminal***
***(R43) No. 7 (+) — Chassis ground (–):***
Is the voltage 12 V or more?
- **Yes** → Go to step 2.
- **No** → Check the harness between the seat heater switch and fuse.

2) Check ground circuit
Measure the resistance between harness connector terminal and chassis ground.

***Connector & terminal***
***(R43) No. 2 — Chassis ground:***
Is the resistance less than 10 Ω?
- **Yes** → Go to step 3.
- **No** → Repair the harness.

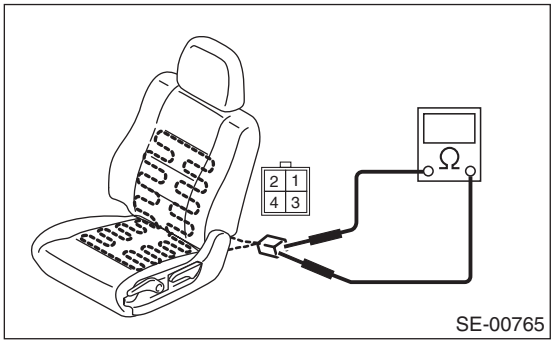
3) Check ground circuit
Measure the resistance between seat heater switch terminals.

***Connector & terminal***
***(R43) No. 7 — (R43) No. 2:***
Is the resistance less than 10 Ω?
- **Yes** → The power supply and ground circuits are normal.
- **No** → Replace the seat heater switch.

## 6. SEAT HEATER UNIT

1) Disconnect the seat heater unit connector, and check the continuity between terminals of connector.

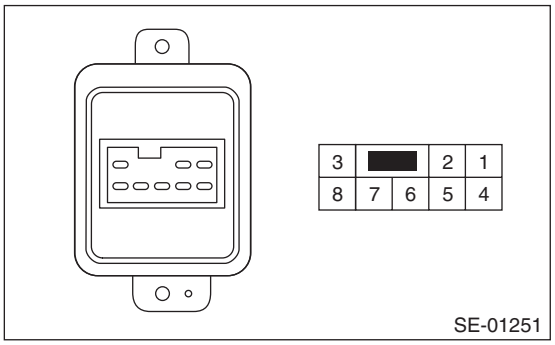
***Connector & terminal***
***HI***
***No. 1 — No. 3:***
***No. 3 — No. 4:***
***LOW***
***No. 1 — No. 4:***



2) If no continuity exists, replace the seat heater module with a new part.

## 7. SEAT HEATER SWITCH

1) Inspect the continuity between the seat heater switch terminals.



***Connector & terminal***

***HI***

***No. 7 — No. 2:***

***No. 7 — No. 4:***

***No. 7 — No. 8:***

***LOW***

***No. 7 — No. 1:***

***No. 7 — No. 2:***

***No. 7 — No. 3:***

2) If no continuity exists, replace the seat heater switch with a new part.

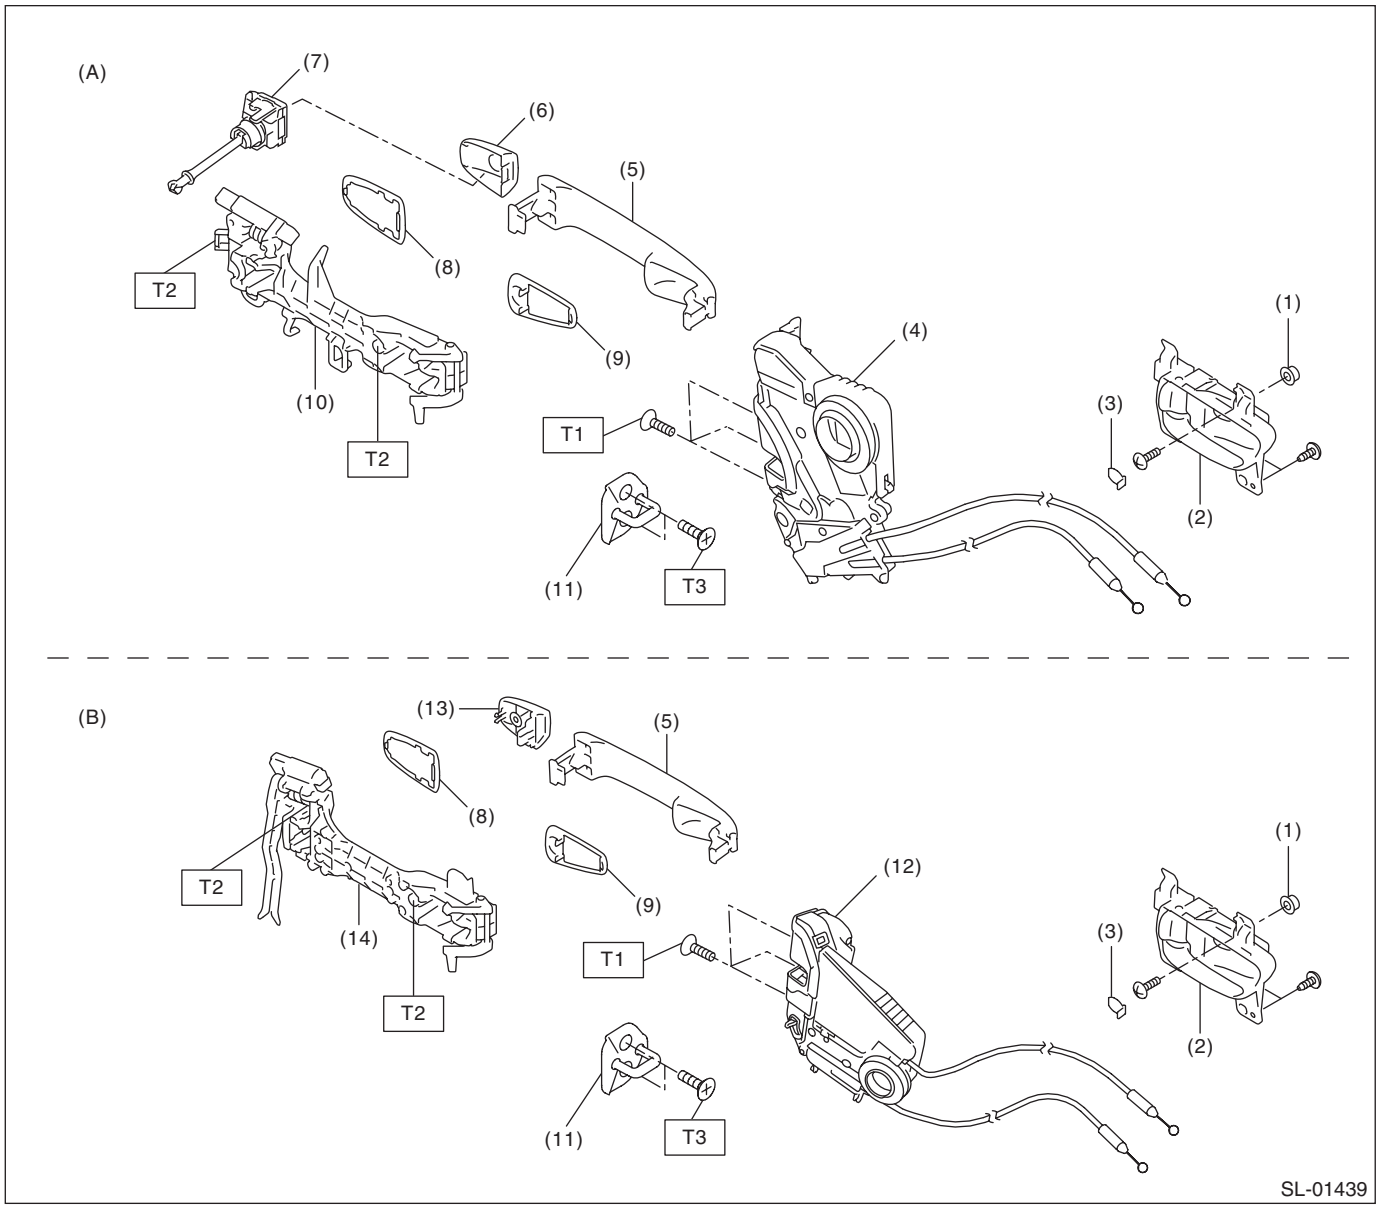
# 1. General Description

## A: COMPONENT

### 1. DOOR LOCK ASSEMBLY

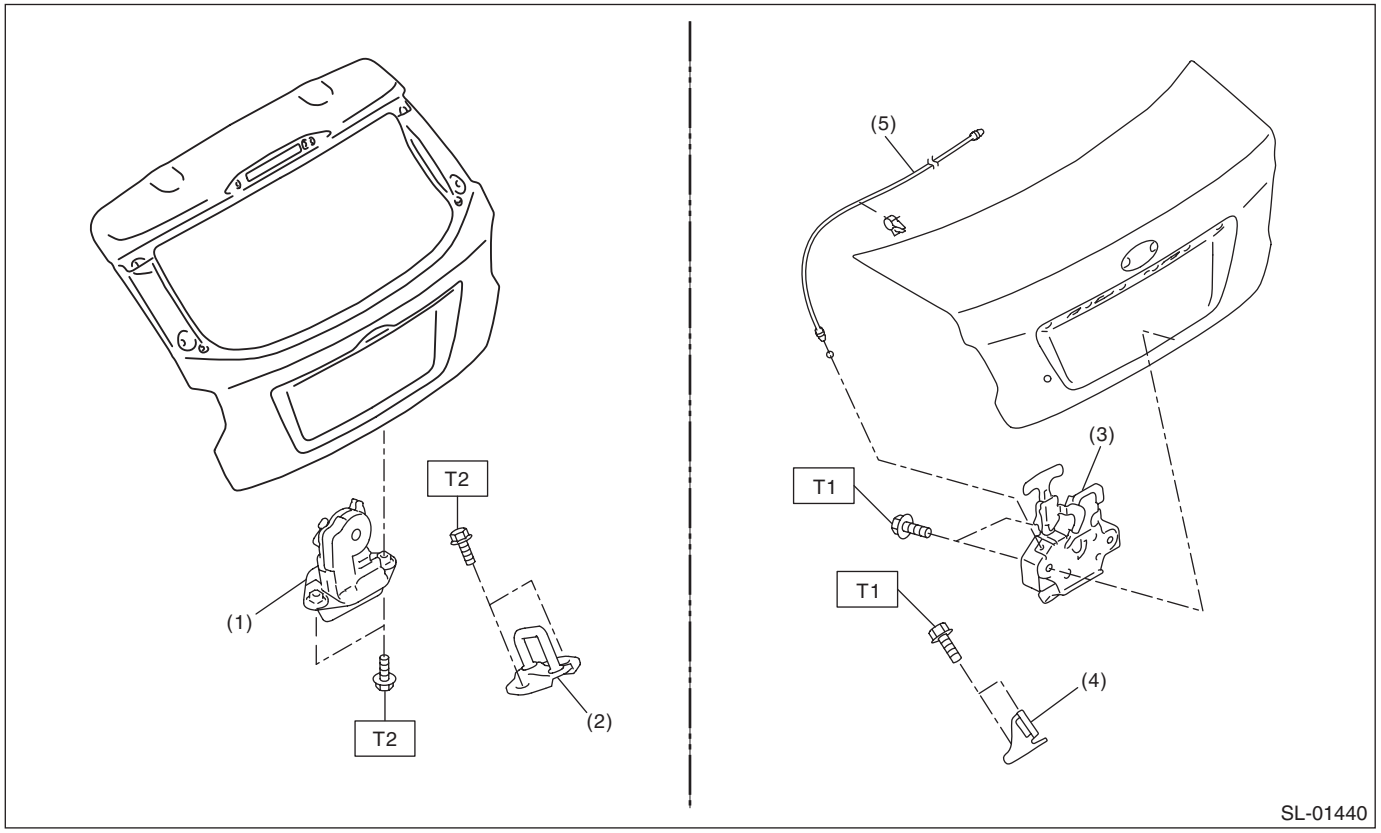


(A) Front
(B) Rear

(1) Grommet - screw
(2) Remote ASSY - door
(3) Cap remote
(4) Latch & actuator ASSY - front
(5) Handle - door outer
(6) Cover - handle front outer
(7) Key lock - door (driver's seat only)
(8) Spacer - door handle outer B
(9) Spacer - door handle outer A
(10) Frame ASSY - front door outer
(11) Striker - door
(12) Latch & actuator ASSY - rear
(13) Cover - handle rear outer
(14) Frame ASSY - rear door outer

***Tightening torque: N·m (kgf-m, ft-lb)***
***T1: 6.5 (0.66, 4.8)***
***T2: 7.5 (0.76, 5.5)***
***T3: 18 (1.84, 13.3)***

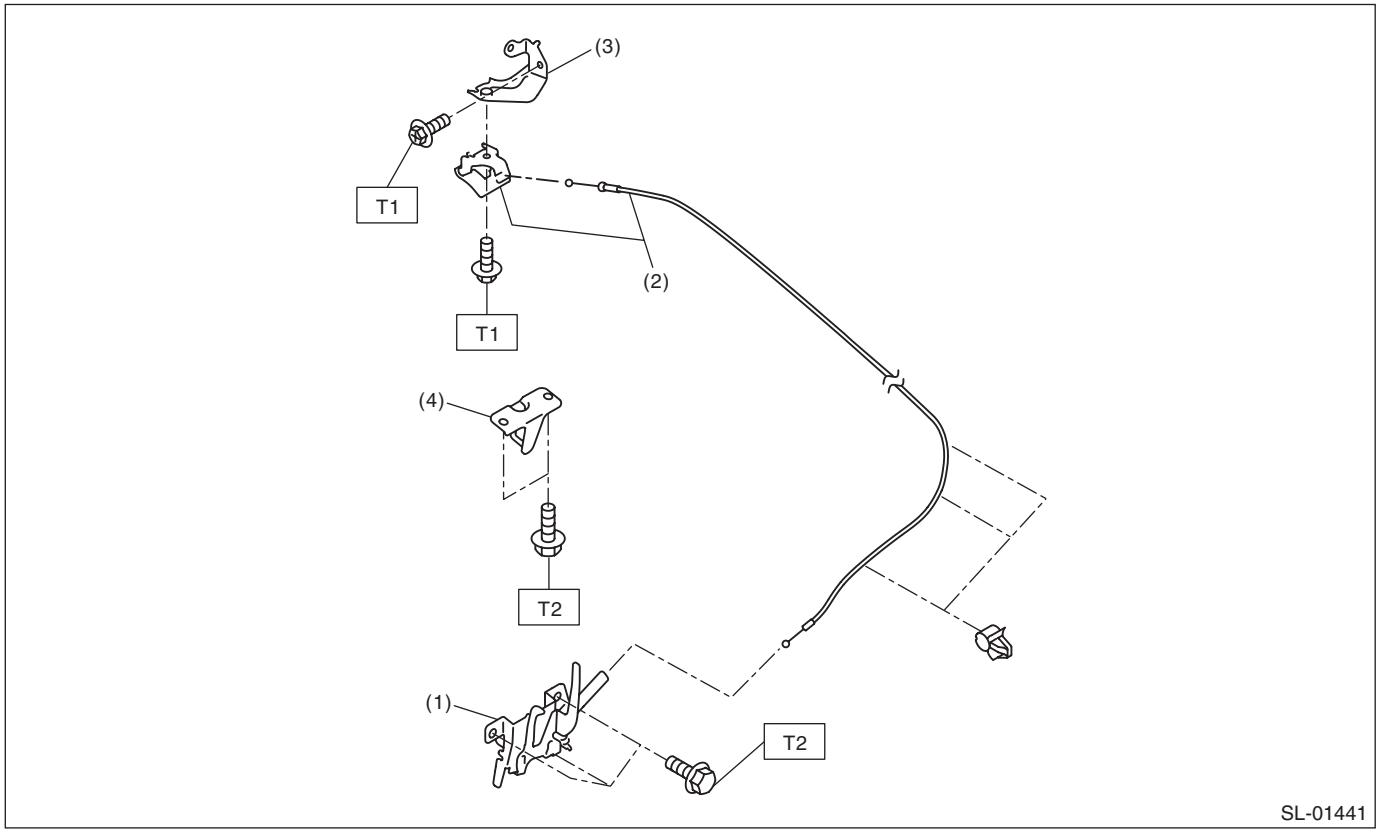
## 2. REAR GATE LOCK AND TRUNK LID LOCK



(1) Latch & actuator - rear gate
(2) Striker - rear gate
(3) Lock ASSY - trunk lid
(4) Striker - trunk lid
(5) Cable ASSY - trunk lid

***Tightening torque: N·m (kgf-m, ft-lb)***
***T1: 7.5 (0.76, 5.5)***
***T2: 25 (2.55, 18.4)***

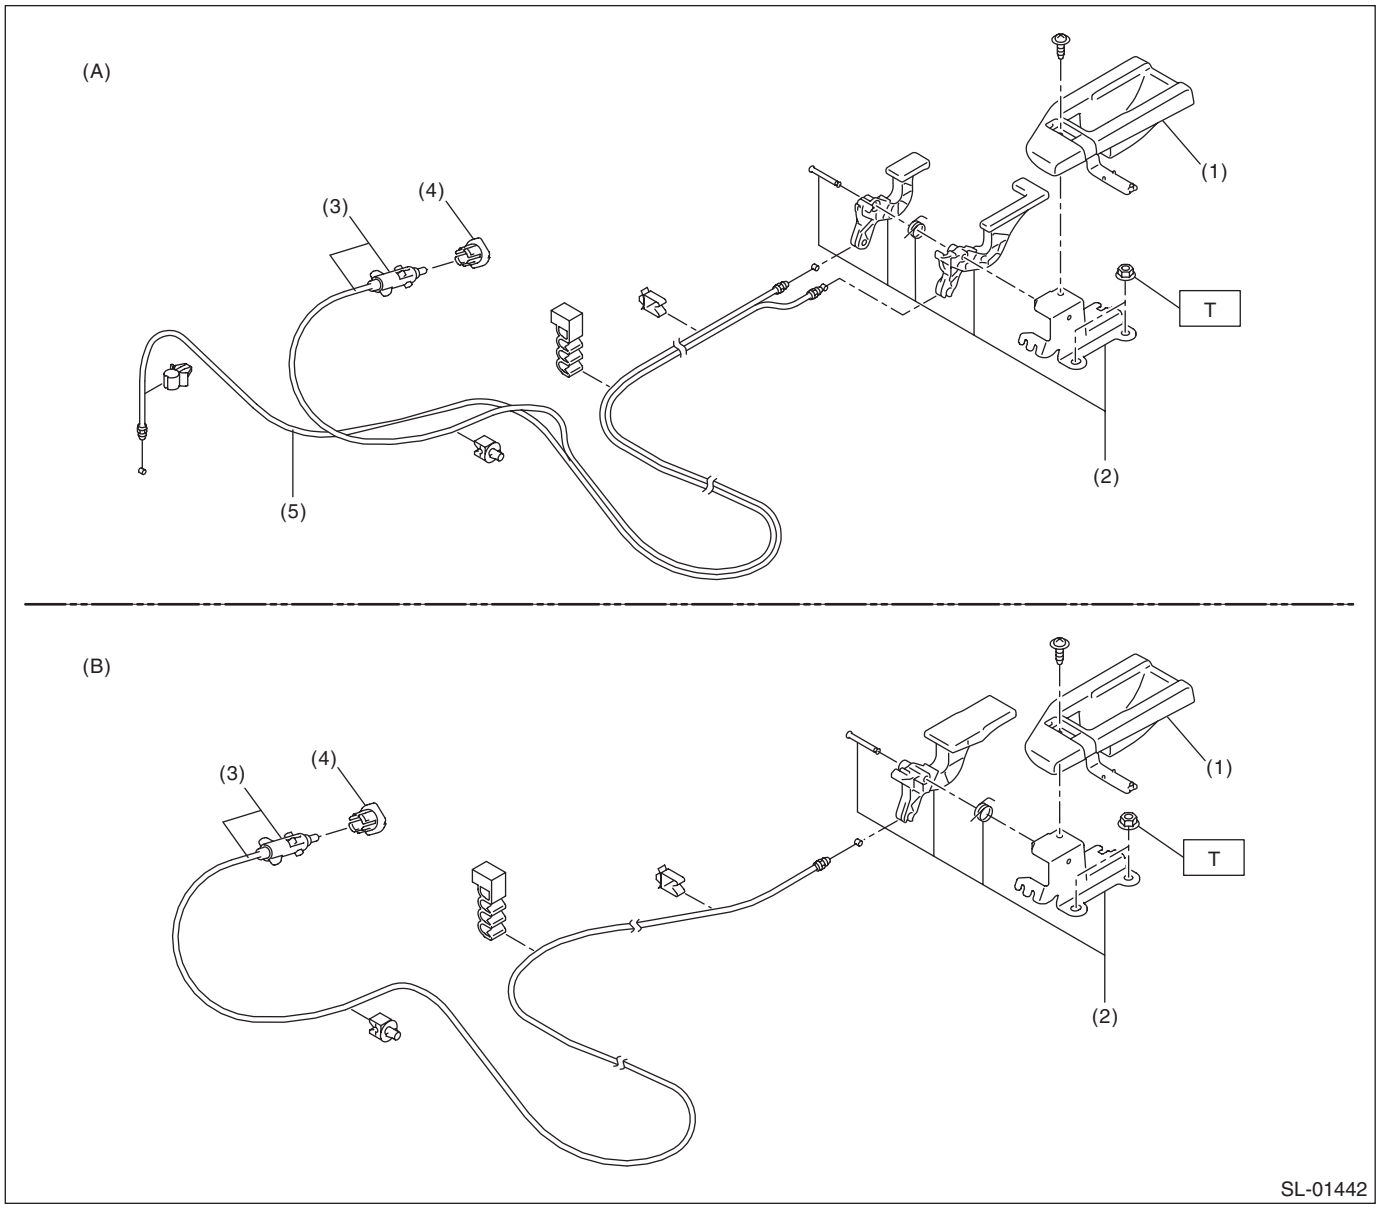
## 3. FRONT HOOD LOCK



(1) Lock ASSY - front hood
(2) Cable - front hood
(3) Bracket - opener handle
(4) Striker - front hood

***Tightening torque: N·m (kgf-m, ft-lb)***
***T1: 7.5 (0.76, 5.5)***
***T2: 33 (3.36, 24.3)***

## 4. REMOTE OPENER

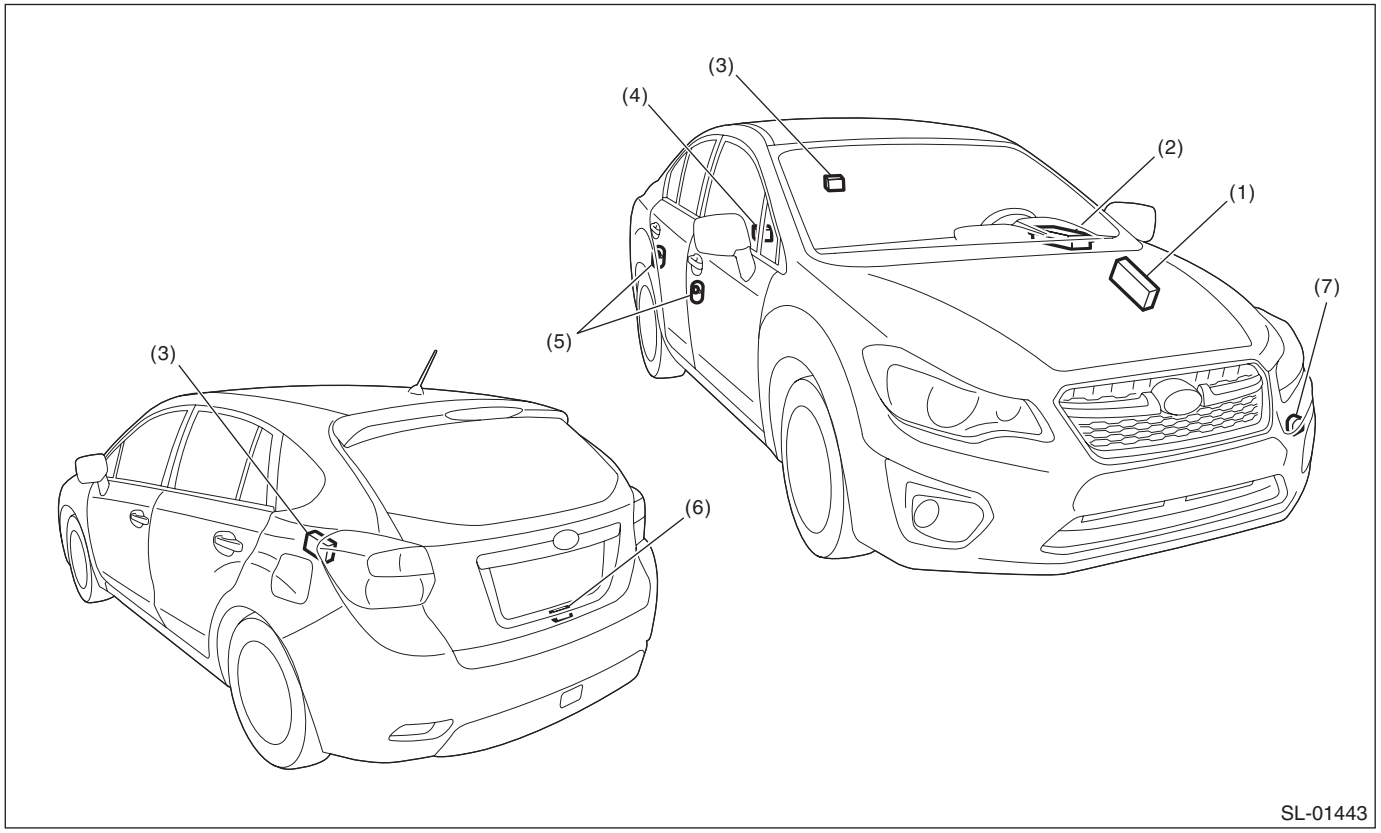


(A) 4 door model
(B) 5 door model/XV model

(1) Cover - handle
(2) Pull handle - opener
(3) Cable ASSY - fuel
(4) Holder
(5) Cable ASSY - trunk lid

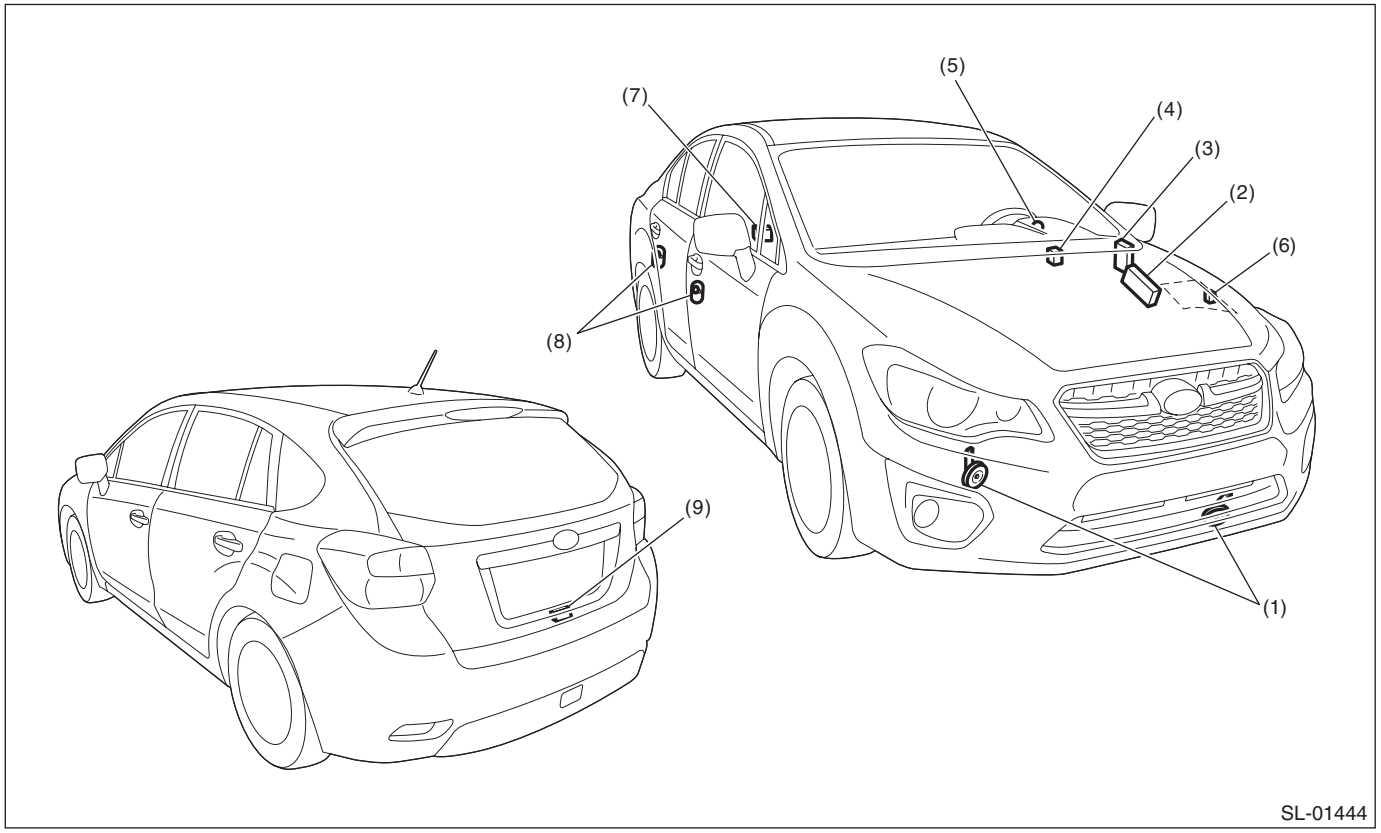
***Tightening torque: N·m (kgf-m, ft-lb)***
***T: 7.5 (0.76, 5.5)***

## 5. KEYLESS ENTRY SYSTEM



(1) Body integrated unit
(2) Power window main switch
(3) Keyless entry control module
(4) Trunk lid latch switch (4 door model)
(5) Door switch
(6) Rear gate latch switch (5 door model/XV model)
(7) Keyless buzzer

## 6. SECURITY SYSTEM



| | | | | | |
|---|---|---|---|---|---|
| (1) | Horn | (4) | Turn signal and hazard module | (7) | Trunk lid latch switch (4 door model) |
| (2) | Body integrated unit | (5) | Security indicator light (in combination meter) | (8) | Door switch |
| (3) | Impact sensor (driver's seat instrument panel side) (dealer option) | (6) | Horn relay (in main fuse box) | (9) | Rear gate latch switch (5 door model/XV model) |

## B: CAUTION

• Before disassembling or reassembling parts, always disconnect the battery ground cable from battery. When replacing the audio, control module and other parts provided with memory functions, record the memory contents before disconnecting the battery ground cable. Otherwise, the memory is cleared.
• Reassemble the parts in the reverse order of disassembly procedure unless otherwise indicated.
• Connect the connectors securely during reassembly.
• After reassembly, make sure that the each component operates normally.
• If any immobilizer related part has been replaced, make sure to register the immobilizer.
• Do not use any electrical test equipment on the airbag system wiring harnesses and connector circuits.
• Be careful not to damage the airbag system wiring harness when servicing the ignition key cylinder.
• If the steering wheel and steering angle sensor (steering roll connector) are removed, perform "VDC sensor midpoint setting mode" of the VDC. <Ref. to VDC-19, VDC SENSOR MIDPOINT SETTING MODE, ADJUSTMENT, VDC Control Module and Hydraulic Control Unit (VDCCM&H/U).>

## C: PREPARATION TOOL

### 1. SPECIAL TOOL

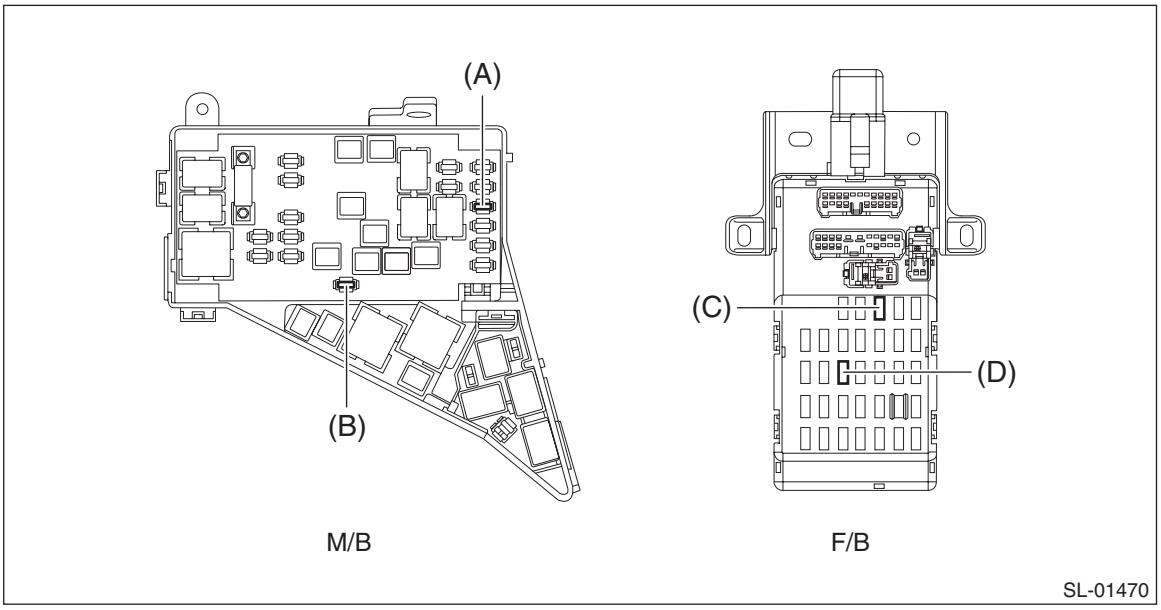
| ILLUSTRATION | TOOL NUMBER | DESCRIPTION | REMARKS |
|---|---|---|---|
|  ST1B022XU0 | 1B022XU0 | SUBARU SELECT MONITOR III KIT | Used for troubleshooting the electrical system.<br>NOTE:<br>For detailed operation procedures of SUBARU SELECT MONITOR III KIT, refer to "PC application help for Subaru Select Monitor". |

### 2. GENERAL TOOL

| TOOL NAME | REMARKS |
|---|---|
| Circuit tester | Used for measuring resistance and voltage. |
| Drill | Used for replacing ignition key lock. |
| Reverse tap | Used for replacing ignition key lock. |
| TORX® T30 | Used for removing and installing door outer handle cover and frame assembly. |
| Clip remover | Used for removing trim clip. |

# 2. Relay and Fuse

## A: LOCATION



| | | |
|---|---|---|
| Main fuse box | Fuse 15A (K/L) | (A) |
| | Fuse 20A (K/L, SEC) | (B) |
| Relay & fuse box | Fuse 15A (K/L) | (C) |
| | Fuse 10A (K/L) | (D) |

NOTE:
For other related fuses, refer to the wiring diagram. <Ref. to WI-15, Power Supply Circuit.>

## B: INSPECTION

### 1. CHECK FUSE

1) Remove the fuse and inspect visually.
2) If the fuse is blown out, replace the fuse.

NOTE:
If the fuse is blown again, check the system wiring harness.

# 3. Door Lock Control System

## A: WIRING DIAGRAM

Refer to “Keyless Entry System” in the wiring diagram. <Ref. to WI-104, WIRING DIAGRAM, Keyless Entry System.>

## B: ELECTRICAL SPECIFICATION

### 1. BODY INTEGRATED UNIT

Refer to “Control Module I/O Signal” of “BODY CONTROL SYSTEM (DIAGNOSTICS)” section. <Ref. to BC(diag)-6, ELECTRICAL SPECIFICATION, Control Module I/O Signal.>

## C: INSPECTION

### 1. SYMPTOM CHART

| Symptoms | Repair order | Reference |
|---|---|---|
| The door lock control system does not operate. | 1. Remove and visually inspect the following fuses.<br>• No. 3 (in fuse & relay box)<br>• No. 7 (in fuse & relay box)<br>• No. 8 (in main fuse box) | If the fuse is blown out, replace the fuse with a new part.<br>When there is no defective with the fuse, check the power supply and ground circuit. <Ref. to SL-10, CHECK POWER SUPPLY AND GROUND CIRCUIT, INSPECTION, Door Lock Control System.> |
| | 2. Check the power supply and ground circuit for body integrated unit. | <Ref. to SL-10, CHECK POWER SUPPLY AND GROUND CIRCUIT, INSPECTION, Door Lock Control System.> |
| | 3. Check the door lock switch and the circuit. | <Ref. to SL-11, CHECK DOOR LOCK SWITCH, INSPECTION, Door Lock Control System.> |
| | 4. Check the rear gate opener button and the circuit. | <Ref. to SL-12, CHECK REAR GATE OPENER BUTTON CIRCUIT, INSPECTION, Door Lock Control System.> |
| | 5. Check the door lock actuator and the circuit. | <Ref. to SL-13, CHECK DOOR LOCK ACTUATOR AND CIRCUIT, INSPECTION, Door Lock Control System.> |
| A specific door lock actuator does not operate. | Check the door lock actuator and circuit. | <Ref. to SL-13, CHECK DOOR LOCK ACTUATOR AND CIRCUIT, INSPECTION, Door Lock Control System.> |

### 2. CHECK POWER SUPPLY AND GROUND CIRCUIT

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK POWER SUPPLY.**<br>1) Disconnect the connector of body integrated unit.<br>2) Measure the voltage between the body integrated unit connector and chassis ground.<br>***Connector & terminal***<br>***(i84) No. 6 (+) — Chassis ground (–):***<br>***(i171) No. 1 (+) — Chassis ground (–):***<br>***(B281) No. 7 (+) — Chassis ground (–):*** | Is the voltage 9 V or more? | Go to step **2**. | Check the harness for open or short circuit between body integrated unit and fuse. |
| 2 | **CHECK GROUND CIRCUIT.**<br>Measure the resistance between the body integrated unit connector and chassis ground.<br>***Connector & terminal***<br>***(i84) No. 1 — Chassis ground:***<br>***(i171) No. 29 — Chassis ground:***<br>***(B280) No. 1 — Chassis ground:***<br>***(B281) No. 31 — Chassis ground:*** | Is the resistance less than 10 Ω? | The power supply and ground circuit are OK. | Repair or replace the harness. |

## 3. CHECK DOOR LOCK SWITCH

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK CURRENT DATA.**<br>Using the Subaru Select Monitor, display the data of «Manual lock SW input».<br>NOTE:<br>For detailed procedures, refer to "PC application help for Subaru Select Monitor". | Does the display switch between OFF ←→ ON when each door lock switch is moved to LOCK? | Go to step **2**. | Go to step **3**. |
| 2 | **CHECK DOOR LOCK SWITCH.**<br>From the condition in step 1), operate each door lock switch (driver's and passenger's) in the UNLOCK direction. | Does the display switch between OFF ←→ ON? | The door lock switch is OK. | Go to step **4**. |
| 3 | **CHECK DOOR LOCK SWITCH.**<br>1) Disconnect the door lock switch connector.<br>2) Measure the continuity between terminals when moving the door lock switch in LOCK direction.<br>***Terminals***<br>***Driver's side***<br>***No. A10 — No. B3:***<br>***Passenger's side***<br>***No. 4 — No. 5:*** | Did the indicator change from "No continuity" (1 MΩ or more) to "Continuity exists" (less than 10 Ω)? | Go to step **4**. | Replace the power window main switch or door lock switch. |
| 4 | **CHECK DOOR LOCK SWITCH.**<br>Measure the continuity between terminals when moving the door lock switch in UNLOCK direction.<br>***Terminals***<br>***Driver's side***<br>***No. A2 — No. B3:***<br>***Passenger's side***<br>***No. 2 — No. 5:*** | Did the indicator change from "No continuity" (1 MΩ or more) to "Continuity exists" (less than 10 Ω)? | Go to step **5**. | Replace the power window main switch or door lock switch. |
| 5 | **CHECK HARNESS.**<br>Measure the resistance between the door lock switch connector and chassis ground.<br>***Connector & terminal***<br>***Driver's side***<br>***(D102) No. 3 — Chassis ground:***<br>***Passenger's side***<br>***(D125) No. 5 — Chassis ground:*** | Is the resistance less than 10 Ω? | Go to step **6**. | Repair or replace the harness. |
| 6 | **CHECK HARNESS.**<br>Check the harness between body integrated unit and door lock switch.<br>***Connector & terminal***<br>***Driver's side***<br>***(D7) No. 10 — (i84) No. 9:***<br>***(D7) No. 2 — (i84) No. 20:***<br>***Passenger's side***<br>***(D125) No. 4 — (i84) No. 9:***<br>***(D125) No. 2 — (i84) No. 20:*** | Is harness normal? | Replace the body integrated unit. <Ref. to SL-78, Body Integrated Unit.> | Repair or replace the harness. |

## 4. CHECK REAR GATE OPENER BUTTON CIRCUIT

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK CURRENT DATA.**<br>Using the Subaru Select Monitor, display the data of «R Gate Release SW input».<br>NOTE:<br>For detailed procedures, refer to "PC application help for Subaru Select Monitor". | Does the display change to OFF ←→ ON, when the rear gate opener button is operated? | Rear gate opener button is normal. | Go to step **2**. |
| 2 | **CHECK HARNESS.**<br>1) Disconnect the connectors of body integrated unit and rear gate opener button.<br>2) Check the harness between the body integrated unit and rear gate opener button.<br>***Connector & terminal***<br>***(i84) No. 10 — (D47) No. 1:*** | Is harness normal? | Go to step **3**. | Repair or replace the harness. |
| 3 | **CHECK HARNESS.**<br>Measure the resistance between the rear gate opener button connector and chassis ground.<br>***Connector & terminal***<br>***(D47) No. 2 — Chassis ground:*** | Is the resistance less than 10 Ω? | Go to step **4**. | Repair or replace the harness. |
| 4 | **CHECK REAR GATE OPENER BUTTON.**<br>Measure the resistance between terminals both when the rear gate opener button is pressed and when not pressed.<br>***Terminals***<br>***No. 1 — No. 2:*** | Is the resistance less than 10 Ω when the switch is pressed and 1 MΩ or more when not pressed? | Replace the body integrated unit. <Ref. to SL-78, Body Integrated Unit.> | Replace the rear gate opener button. |

## 5. CHECK DOOR LOCK ACTUATOR AND CIRCUIT

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK HARNESS (DOOR LOCK).**<br>1) Disconnect the body integrated unit and each door lock actuator connector.<br>2) Check the harness between body integrated unit and each door lock actuator.<br>***Connector & terminal***<br>***Front door LH***<br>***(i171) No. 2 — (D72) No. 4:***<br>***Front door RH***<br>***(i171) No. 2 — (D18) No. 4:***<br>***Rear door LH***<br>***(i171) No. 2 — (D26) No. 4:***<br>***Rear door RH***<br>***(i171) No. 2 — (D32) No. 4:*** | Is harness normal? | Go to step **2**. | Repair or replace the harness. |
| 2 | **CHECK HARNESS (DOOR UNLOCK).**<br>Check the harness between body integrated unit and each door lock actuator.<br>***Connector & terminal***<br>***Front door LH***<br>***(i171) No. 4 — (D72) No. 1:***<br>***Front door RH***<br>***(i171) No. 3 — (D18) No. 1:***<br>***Rear door LH***<br>***(i171) No. 3 — (D26) No. 1:***<br>***Rear door RH***<br>***(i171) No. 3 — (D32) No. 1:*** | Is harness normal? | 4 door model: Go to step **5**.<br>5 door model/XV model: Go to step **3**. | Repair or replace the harness. |
| 3 | **CHECK HARNESS (REAR GATE UNLOCK).**<br>Check the harness between the body integrated unit and rear gate lock actuator.<br>***Connector & terminal***<br>***(i171) No. 7 — (D46) No. 1:*** | Is harness normal? | Go to step **4**. | Repair or replace the harness. |
| 4 | **CHECK HARNESS (REAR GATE UNLOCK).**<br>Measure the resistance between the rear gate lock actuator connector and chassis ground.<br>***Connector & terminal***<br>***(D46) No. 2 — Chassis ground:*** | Is the resistance less than 10 Ω? | Go to step **7**. | Repair or replace the harness. |
| 5 | **CHECK HARNESS (TRUNK UNLOCK).**<br>Check the harness between the body integrated unit and trunk lid lock actuator.<br>***Connector & terminal***<br>***(i171) No. 7 — (R186) No. 1:*** | Is harness normal? | Go to step **6**. | Repair or replace the harness. |
| 6 | **CHECK HARNESS (TRUNK UNLOCK).**<br>Measure the resistance between the trunk lid lock actuator connector and chassis ground.<br>***Connector & terminal***<br>***(R186) No. 2 — Chassis ground:*** | Is the resistance less than 10 Ω? | Go to step **7**. | Repair or replace the harness. |
| 7 | **CHECK BODY INTEGRATED UNIT OUTPUT SIGNAL.**<br>1) Connect the body integrated unit connector.<br>2) Measure the voltage between terminals of the body integrated unit when operating the door lock switch to LOCK direction.<br>***Connector & terminal***<br>***Except for front door LH***<br>***(i171) No. 2 (+) — (i171) No. 3 (–):***<br>***Front door LH***<br>***(i171) No. 2 (+) — (i171) No. 4 (–):*** | Does the voltage change from less than 1 V → 9 V or more? (During lock output) | Go to step **8**. | Replace the body integrated unit. <Ref. to SL-78, Body Integrated Unit.> |

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 8 | **CHECK BODY INTEGRATED UNIT OUTPUT SIGNAL.**<br>Measure the voltage between terminals of the body integrated unit when operating the door lock switch to UNLOCK direction.<br>***Connector & terminal***<br>***Except for front door LH***<br>***(i171) No. 3 (+) — (i171) No. 2 (–):***<br>***Front door LH***<br>***(i171) No. 4 (+) — (i171) No. 2 (–):*** | Does the voltage change from less than 1 V → 9 V or more? (During unlock output) | Go to step **9**. | Replace the body integrated unit. <Ref. to SL-78, Body Integrated Unit.> |
| 9 | **CHECK BODY INTEGRATED UNIT OUTPUT SIGNAL.**<br>Measure the voltage between body integrated unit and chassis ground when operating the rear gate opener button.<br>***Connector & terminal***<br>***(i171) No. 7 (+) — Chassis ground (–):*** | Does the voltage change from less than 1 V → 9 V or more? (During unlock output) | Go to step **10**. | Replace the body integrated unit. <Ref. to SL-78, Body Integrated Unit.> |
| 10 | **CHECK DOOR LOCK ACTUATOR.**<br>Check the door lock actuator.<br>• Front door lock actuator: <Ref. to SL-38, INSPECTION, Front Door Latch and Door Lock Actuator Assembly.><br>• Rear door lock actuator: <Ref. to SL-45, INSPECTION, Rear Door Latch and Door Lock Actuator Assembly.> | Is the door lock actuator OK? | • 4 door model: Go to step **12**.<br>• 5 door model/XV model: Go to step **11**. | Replace the door latch and door lock actuator assembly. |
| 11 | **CHECK REAR GATE LOCK ACTUATOR.**<br>Check the rear gate lock actuator. <Ref. to SL-48, Rear Gate Latch and Actuator Assembly.> | Is the rear gate lock actuator normal? | Check the connection status of the harness and connector that may have a temporary poor contact. | Replace the rear gate latch and actuator assembly. |
| 12 | **CHECK TRUNK LID LOCK ACTUATOR.**<br>Check the trunk lid lock actuator. <Ref. to SL-50, Trunk Lid Latch and Actuator Assembly.> | Is trunk lid lock actuator normal? | Check the connection status of the harness and connector that may have a temporary poor contact. | Replace the trunk lid latch & actuator assembly. |

# 4. Keyless Entry System

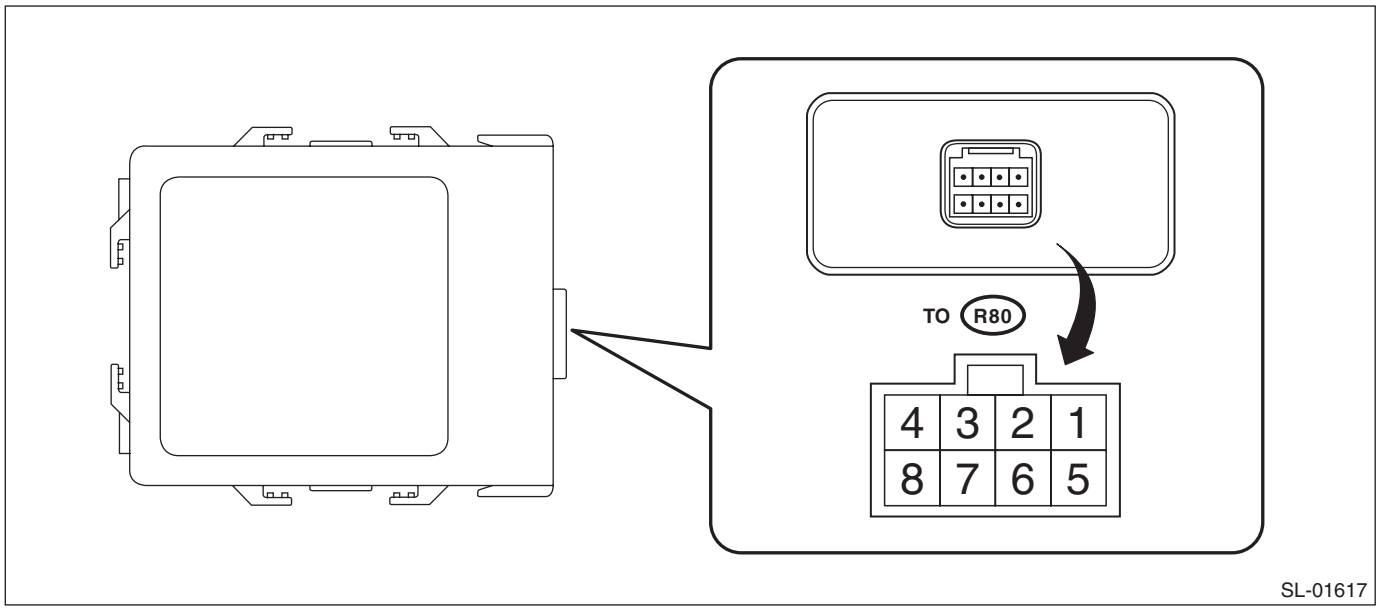
## A: WIRING DIAGRAM

Refer to “Keyless Entry System” in the wiring diagram. <Ref. to WI-104, WIRING DIAGRAM, Keyless Entry System.>

## B: ELECTRICAL SPECIFICATION

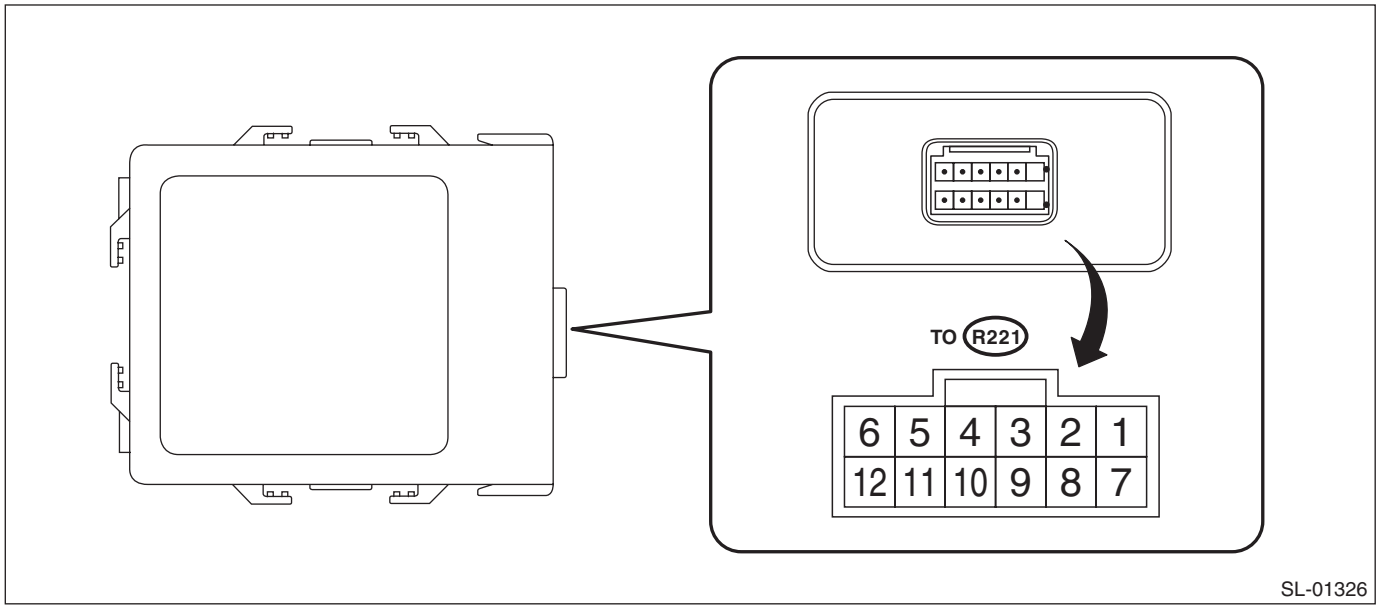
### 1. KEYLESS ENTRY CONTROL MODULE

- Model without tire pressure monitoring system



| Terminal No. | Item | Measuring condition | Standard |
|---|---|---|---|
| 3 (U-ART com.) | — | Cannot be measured | — |
| 4 (+B) ←→ Chassis ground | Voltage | Always | 10 — 14 V |
| 7 (GND) ←→ Chassis ground | Resistance | Always | Less than 1 Ω |

- Model with tire pressure monitoring system



| Terminal No. | Item | Measuring condition | Standard |
|---|---|---|---|
| 4 (IG) ←→ Chassis ground | Resistance | IG OFF → ON | 0 V → 10 — 14 V |
| 5 (GND) ←→ Chassis ground | Resistance | Always | Less than 1 Ω |
| 6 (+B) ←→ Chassis ground | Voltage | Always | 10 — 14 V |
| 11 (U-ART com.) | — | Cannot be measured | — |

## 2. BODY INTEGRATED UNIT

Refer to “Control Module I/O Signal” of “BODY CONTROL SYSTEM (DIAGNOSTICS)” section. <Ref. to BC(diag)-6, ELECTRICAL SPECIFICATION, Control Module I/O Signal.>

# C: INSPECTION

## 1. SYMPTOM CHART

| Symptoms | Repair order | Reference |
|---|---|---|
| None of the functions of the keyless entry system operate. | 1. Check the keyless transmitter battery. | <Ref. to SL-18, CHECK KEYLESS TRANSMITTER BATTERY AND FUNCTION, INSPECTION, Keyless Entry System.> |
| | 2. Remove and visually inspect the following fuses.<br>• No. 3 (in fuse & relay box)<br>• No. 7 (in fuse & relay box)<br>• No. 8 (in main fuse box) | If the fuse is blown out, replace the fuse with a new part.<br>When there is no defective with the fuse, check the power supply and ground circuit. <Ref. to SL-10, CHECK POWER SUPPLY AND GROUND CIRCUIT, INSPECTION, Door Lock Control System.> |
| | 3. Check the keyless entry control module. | <Ref. to SL-19, CHECK KEYLESS ENTRY CONTROL MODULE, INSPECTION, Keyless Entry System.> |
| | 4. Check the power supply and ground circuit for body integrated unit. | <Ref. to SL-19, CHECK BODY INTEGRATED UNIT POWER SUPPLY AND GROUND CIRCUIT, INSPECTION, Keyless Entry System.> |
| | 5. Check the key warning switch. | <Ref. to SL-22, CHECK KEY WARNING SWITCH, INSPECTION, Keyless Entry System.> |
| | 6. Check the door switch signal. | <Ref. to SL-20, CHECK DOOR SWITCH, INSPECTION, Keyless Entry System.> |
| | 7. Check the body integrated unit. | <Ref. to BC(diag)-2, Basic Diagnostic Procedure.> |
| The keyless transmitter cannot be registered. | 1. Check the keyless transmitter battery. | <Ref. to SL-18, CHECK KEYLESS TRANSMITTER BATTERY AND FUNCTION, INSPECTION, Keyless Entry System.> |
| | 2. Check the key warning switch. | <Ref. to SL-22, CHECK KEY WARNING SWITCH, INSPECTION, Keyless Entry System.> |
| | 3. Check the keyless entry control module. | <Ref. to SL-19, CHECK KEYLESS ENTRY CONTROL MODULE, INSPECTION, Keyless Entry System.> |
| | 4. Check the body integrated unit. | <Ref. to BC(diag)-2, Basic Diagnostic Procedure.> |
| Door lock or unlock does not operate.<br>NOTE:<br>If the door lock control system does not operate when using the door lock switch, check the door lock control system. <Ref. to SL-10, INSPECTION, Door Lock Control System.> | 1. Check the keyless transmitter battery. | <Ref. to SL-18, CHECK KEYLESS TRANSMITTER BATTERY AND FUNCTION, INSPECTION, Keyless Entry System.> |
| | 2. Check the key warning switch. | <Ref. to SL-22, CHECK KEY WARNING SWITCH, INSPECTION, Keyless Entry System.> |
| | 3. Check the keyless entry control module. | <Ref. to SL-19, CHECK KEYLESS ENTRY CONTROL MODULE, INSPECTION, Keyless Entry System.> |
| | 4. Check the body integrated unit. | <Ref. to BC(diag)-2, Basic Diagnostic Procedure.> |
| The keyless buzzer and hazard light do not operate. | 1. Check the keyless buzzer operation. | <Ref. to SL-25, CHECK KEYLESS BUZZER, INSPECTION, Keyless Entry System.> |
| | 2. Check the hazard light operation. | <Ref. to SL-24, CHECK HAZARD LIGHT OPERATION, INSPECTION, Keyless Entry System.> |
| | 3. Check the body integrated unit. | <Ref. to BC(diag)-2, Basic Diagnostic Procedure.> |
| Room light does not operate. | 1. Check the room light operation. | <Ref. to SL-23, CHECK ROOM LIGHT OPERATION, INSPECTION, Keyless Entry System.> |
| | 2. Check the body integrated unit. | <Ref. to BC(diag)-2, Basic Diagnostic Procedure.> |
| Ignition switch illumination does not operate. | 1. Check the ignition switch illumination. | <Ref. to SL-26, CHECK IGNITION SWITCH ILLUMINATION, INSPECTION, Keyless Entry System.> |
| | 2. Check the body integrated unit. | <Ref. to BC(diag)-2, Basic Diagnostic Procedure.> |

## 2. CHECK KEYLESS TRANSMITTER BATTERY AND FUNCTION

**CAUTION:**
**Be sure to reset keyless transmitter of other vehicles registered to the inspection target vehicle, and vehicles to which keyless transmitters were registered for inspection, to the condition before performing the inspection. (Re-register the keyless transmitters.)**

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK KEYLESS TRANSMITTER BATTERY.**<br>1) Remove the battery from the keyless transmitter. <Ref. to SL-81, REMOVAL, Keyless Transmitter.><br>2) Check the battery voltage. <Ref. to SL-82, INSPECTION, Keyless Transmitter.> | Is the voltage 2.5 V or more? | Go to step **2**. | Replace the keyless transmitter battery. |
| 2 | **CHECK KEYLESS TRANSMITTER.**<br>Register the keyless transmitter which operates normally on other vehicles to the inspection target vehicle. <Ref. to SL-83, REGISTRATION OF KEYLESS TRANSMITTER WITH SUBARU SELECT MONITOR, REPLACEMENT, Keyless Transmitter.><br>1) Close all the doors and rear gate (5 door model/XV model) or trunk lid (4 door model) of the inspection target vehicle.<br>2) Using the keyless transmitter, lock and unlock the doors and rear gate of vehicle. For the 4 door model, unlock the trunk lid. | Can lock, unlock of doors and unlock of the trunk lid be performed properly on the inspection target vehicle? | Go to step **3**. | Due to vehicle malfunction, continue the keyless entry system diagnosis. |
| 3 | **CHECK KEYLESS TRANSMITTER.**<br>Register the keyless transmitter of the inspected vehicle to another vehicle whose keyless system operates normally. <Ref. to SL-83, REGISTRATION OF KEYLESS TRANSMITTER WITH SUBARU SELECT MONITOR, REPLACEMENT, Keyless Transmitter.> | Is the keyless transmitter registered correctly? | Go to step **4**. | Replace the keyless transmitter and perform registration. |
| 4 | **CHECK KEYLESS TRANSMITTER.**<br>Check the registered keyless transmitter.<br>1) Close all the doors and rear gate (5 door model/XV model) or trunk lid (4 door model) of the vehicle on which the keyless system works normally.<br>2) Using the keyless transmitter, lock and unlock the doors and rear gate of vehicle. For the 4 door model, unlock the trunk lid. | Can lock, unlock of doors and unlock of the trunk lid be performed properly on the vehicle? | Keyless transmitter is OK. | Replace the keyless transmitter and perform registration. |

## 3. CHECK KEYLESS ENTRY CONTROL MODULE

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK BODY INTEGRATED UNIT.**<br>Read the DTC using Subaru Select Monitor.<br>NOTE:<br>For detailed procedures, refer to "PC application help for Subaru Select Monitor". | Is DTC B1500 "Keyless UART com. Malfunction" displayed? | Go to step **2**. | Keyless entry control module is normal. |
| 2 | **CHECK POWER SUPPLY.**<br>1) Disconnect the keyless entry control module connector.<br>2) Measure the voltage between keyless entry control module connector and chassis ground.<br>***Connector & terminal***<br>***Model without tire pressure monitoring system***<br>***(R80) No. 4 (+) — Chassis ground (–):***<br>***Model with tire pressure monitoring system***<br>***(R221) No. 6 (+) — Chassis ground (–):*** | Is the voltage 10 V or more? | Go to step **3**. | Check the harness for open or short circuits between the keyless entry control module and the fuse. |
| 3 | **CHECK GROUND CIRCUIT.**<br>Measure the resistance between keyless entry control module connector and chassis ground.<br>***Connector & terminal***<br>***Model without tire pressure monitoring system***<br>***(R80) No. 7 — Chassis ground:***<br>***Model with tire pressure monitoring system***<br>***(R221) No. 5 — Chassis ground:*** | Is the resistance less than 10 Ω? | Go to step **4**. | Repair or replace the harness. |
| 4 | **CHECK KEYLESS ENTRY CONTROL MODULE CIRCUIT.**<br>1) Disconnect the body integrated unit connector.<br>2) Check the harness between keyless entry control module and body integrated unit.<br>***Connector & terminal***<br>***Model without tire pressure monitoring system***<br>***(i171) No. 11 — (R80) No. 3:***<br>***Model with tire pressure monitoring system***<br>***(i171) No. 11 — (R221) No. 11:*** | Is harness normal? | Replace the keyless entry control module. | Repair or replace the harness. |

## 4. CHECK BODY INTEGRATED UNIT POWER SUPPLY AND GROUND CIRCUIT

Refer to the "INSPECTION of POWER SUPPLY AND GROUND CIRCUIT" of "Door Lock Control System" for detailed procedures. <Ref. to SL-10, CHECK POWER SUPPLY AND GROUND CIRCUIT, INSPECTION, Door Lock Control System.>

## 5. CHECK DOOR SWITCH

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK CURRENT DATA.**<br>Display the following items using Subaru Select Monitor.<br>• «Driver's door SW input»<br>• «P-door SW input»<br>• «Rear right door SW input»<br>• «Rear left door SW input»<br>• «R Gate SW input»<br>NOTE:<br>For detailed procedures, refer to "PC application help for Subaru Select Monitor". | Does the display switch between OFF ←→ ON when each door, rear gate, or trunk lid is opened/closed? | The door switches, trunk lid latch switch or rear gate latch switch are normal. | Go to step **2**. |
| 2 | **CHECK HARNESS.**<br>1) Disconnect the connector of body integrated unit.<br>2) Disconnect the connector of the door switch, trunk lid latch switch or rear gate latch switch that the display does not change.<br>3) Check the harness between body integrated unit and defective switch.<br>***Connector & terminal***<br>***Front door LH***<br>***(i84) No. 14 — (R9) No. 1:***<br>***Front door RH***<br>***(i84) No. 13 — (R12) No. 1:***<br>***Rear door LH***<br>***(i84) No. 24 — (R22) No. 1:***<br>***Rear door RH***<br>***(i84) No. 25 — (R16) No. 1:***<br>***Trunk lid***<br>***(i84) No. 33 — (R186) No. 3:***<br>***Rear gate***<br>***(i84) No. 33 — (D46) No. 3:*** | Is harness normal? | Go to step **3**. | Repair or replace the harness. |
| 3 | **CHECK HARNESS.**<br>Measure the resistance between the faulty switch connector and chassis ground.<br>***Connector & terminal***<br>***Front door LH***<br>***(R9) No. 3 — Chassis ground:***<br>***Front door RH***<br>***(R12) No. 3 — Chassis ground:***<br>***Rear door LH***<br>***(R22) No. 3 — Chassis ground:***<br>***Rear door RH***<br>***(R16) No. 3 — Chassis ground:***<br>***Trunk lid***<br>***(R186) No. 2 — Chassis ground:***<br>***Rear gate***<br>***(D46) No. 4 — Chassis ground:*** | Is the resistance less than 10 Ω? | Go to step **4**. | Repair or replace the harness. |

| Step | | Check | Yes | No |
|---|---|---|---|---|
| 4 | **CHECK DOOR SWITCH.**<br>Measure the resistance between faulty switch terminals.<br>***Terminals***<br>***Front LH door switch***<br>***No. 1 — No. 3:***<br>***Front RH door switch***<br>***No. 1 — No. 3:***<br>***Rear LH door switch***<br>***No. 1 — No. 3:***<br>***Rear RH door switch***<br>***No. 1 — No. 3:***<br>***Trunk lid latch switch***<br>***No. 3 — No. 2:***<br>***Rear gate latch switch***<br>***No. 3 — No. 4:*** | Is the resistance 1 MΩ or more when the door switch is pushed, or the trunk lid or rear gate is closed? | Replace the body integrated unit. <Ref. to SL-78, Body Integrated Unit.> | Replace the faulty parts.<br>• Door switches<br>• Trunk lid latch and actuator ASSY<br>• Rear gate latch and actuator ASSY |

## 6. CHECK KEY WARNING SWITCH

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK CURRENT DATA.**<br>Using the Subaru Select Monitor, display the data of «key-lock warning SW».<br>NOTE:<br>For detailed procedures, refer to "PC application help for Subaru Select Monitor". | Is the normal input signal displayed when the key is inserted in/removed from the ignition switch? | The key warning switch is OK. | Go to step **2**. |
| 2 | **CHECK FUSE.**<br>Remove and visually check fuse No. 14 (in the main fuse box). | Is the fuse blown out? | Replace the fuse with a new part. | Go to step **3**. |
| 3 | **CHECK KEY WARNING SWITCH CIRCUIT.**<br>1) Disconnect the connector of body integrated unit.<br>2) Insert the key into ignition switch. (LOCK position)<br>3) Measure the voltage between the body integrated unit connector and chassis ground.<br>***Connector & terminal***<br>***(B280) No. 4 (+) — Chassis ground (–):*** | Is the voltage 9 V or more? | Go to step **4**. | Go to step **5**. |
| 4 | **CHECK KEY WARNING SWITCH CIRCUIT.**<br>1) Remove the key from ignition switch.<br>2) Measure the voltage between the body integrated unit connector and chassis ground.<br>***Connector & terminal***<br>***(B280) No. 4 (+) — Chassis ground (–):*** | Is the voltage less than 1.5 V? | The key warning switch is OK. | Go to step **5**. |
| 5 | **CHECK KEY WARNING SWITCH.**<br>1) Disconnect the connector of key warning switch.<br>2) Insert the key into ignition switch. (LOCK position)<br>3) Measure the resistance between key warning switch terminals.<br>***Terminals***<br>***No. 1 — No. 2:*** | Is the resistance less than 1 Ω? | Go to step **6**. | Replace the key warning switch. |
| 6 | **CHECK KEY WARNING SWITCH.**<br>1) Remove the key from ignition switch.<br>2) Measure the resistance between key warning switch terminals.<br>***Terminals***<br>***No. 1 — No. 2:*** | Is the resistance 1 MΩ or more? | Check the following:<br>• Harness for open circuits and shorts between the key warning switch and fuse.<br>• Harness for open or short between the body integrated unit and key warning switch | Replace the key warning switch. |

## 7. CHECK ROOM LIGHT OPERATION

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK ROOM LIGHT OPERATION.**<br>Make sure the room light illuminates when the room light switch is ON, and goes off when the switch is OFF. | Does the room light illuminate or go off? | Go to step **2**. | Check the room light circuit. <Ref. to LI-81, INSPECTION, Room Light.> |
| 2 | **CHECK ROOM LIGHT OPERATION.**<br>1) Turn the room light switch to the "DOOR" position.<br>2) Open and close any door. | Does the room light illuminate ←→ go off (including off delay) when the door is opened and closed? | Go to step **3**. | Go to step **4**. |
| 3 | **CHECK KEYLESS ENTRY OPERATION.**<br>Press the LOCK/UNLOCK button of the keyless transmitter. | Does it operate properly? | Room light is normal. | Check keyless entry system. <Ref. to SL-17, SYMPTOM CHART, INSPECTION, Keyless Entry System.> |
| 4 | **CHECK ROOM LIGHT.**<br>Check the room light. <Ref. to LI-81, INSPECTION, Room Light.> | Is room light normal? | Go to step **5**. | Replace the bulb or room light assembly. |
| 5 | **CHECK HARNESS.**<br>1) Disconnect the connectors of body integrated unit and room light.<br>2) Check the harness between body integrated unit and room light.<br>***Connector & terminal***<br>***(i84) No. 4 — (R52) No. 2:*** | Is harness normal? | Go to step **6**. | Repair or replace the harness. |
| 6 | **CHECK HARNESS.**<br>Measure the voltage between the room light connector and chassis ground.<br>***Connector & terminal***<br>***(R52) No. 3 (+) — Chassis ground (–):*** | Is the voltage 10 V or more? | Replace the body integrated unit. <Ref. to SL-78, Body Integrated Unit.> | Repair or replace the harness. |

## 8. CHECK HAZARD LIGHT OPERATION

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK HAZARD LIGHT OPERATION.**<br>Make sure the hazard light blinks when hazard switch is turned to ON. | Does the hazard light blink? | Go to step **2**. | Check the hazard light circuit. |
| 2 | **CHECK BODY INTEGRATED UNIT SETTING.**<br>Display the data of «Abnormal warning lamp flashing setting» using Subaru Select Monitor.<br>NOTE:<br>For detailed procedures, refer to “PC application help for Subaru Select Monitor”. | Is the setting ON? | Go to step **3**. | Turn the setting to ON. |
| 3 | **CHECK CURRENT DATA.**<br>Display the data of «Hazard Output» using Subaru Select Monitor. | Is output signal present when operating the transmitter LOCK/UNLOCK button? | Go to step **4**. | Go to step **5**. |
| 4 | **CHECK KEYLESS ENTRY OPERATION.**<br>Press the LOCK/UNLOCK button of the keyless transmitter. | Does it operate properly? | Replace the body integrated unit. <Ref. to SL-78, Body Integrated Unit.> | Check keyless entry system. <Ref. to SL-17, SYMPTOM CHART, INSPECTION, Keyless Entry System.> |
| 5 | **CHECK HAZARD LIGHT CIRCUIT.**<br>1) Disconnect the connectors of the body integrated unit and turn signal & hazard unit.<br>2) Check the harness between body integrated unit and turn signal & hazard unit.<br>***Connector & terminal***<br>***(i171) No. 18 — (B32) No. 8:*** | Is harness normal? | Check body integrated unit. <Ref. to BC(diag)-2, Basic Diagnostic Procedure.> | Repair or replace the harness. |

## 9. CHECK KEYLESS BUZZER

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK BODY INTEGRATED UNIT SETTING.**<br>Display the data of «Answer-back buzzer setup» using Subaru Select Monitor.<br>NOTE:<br>For detailed procedures, refer to "PC application help for Subaru Select Monitor". | Is the setting ON? | Go to step **2**. | Turn the setting to ON. |
| 2 | **CHECK BODY INTEGRATED UNIT.**<br>Select and perform the «Keyless Buzzer Output» using Subaru Select Monitor. | Does the keyless buzzer sound? | Check the keyless control module. | Go to step **3**. |
| 3 | **CHECK KEYLESS BUZZER CIRCUIT.**<br>1) Turn the ignition switch to OFF.<br>2) Disconnect the connectors of the body integrated unit and keyless buzzer.<br>3) Check the harness between body integrated unit and keyless buzzer.<br>***Connector & terminal***<br>***(B280) No. 20 — (B164) No. 1:*** | Is harness normal? | Go to step **4**. | Repair or replace the harness. |
| 4 | **CHECK KEYLESS BUZZER CIRCUIT.**<br>Measure the resistance between the keyless buzzer connector and chassis ground.<br>***Connector & terminal***<br>***(B164) No. 2 — Chassis ground:*** | Is the resistance less than 10 Ω? | Go to step **5**. | Repair or replace the harness. |
| 5 | **CHECK KEYLESS BUZZER.**<br>1) Remove the keyless buzzer.<br>2) Connect the battery positive (+) terminal to terminal No. 1 of the keyless buzzer, and the negative (–) terminal to terminal No. 2, and check whether or not the buzzer will sound. | Does the keyless buzzer sound? | Go to step **6**. | Replace the keyless buzzer. |
| 6 | **CHECK BODY INTEGRATED UNIT.**<br>1) Select and perform the «Keyless Buzzer Output» using Subaru Select Monitor.<br>2) Measure the voltage between the body integrated unit connector and chassis ground.<br>***Connector & terminal***<br>***(B280) No. 20 (+) — Chassis ground (–):*** | Is the voltage 9 V or more? | Go to step **7**. | Replace the body integrated unit. <Ref. to SL-78, Body Integrated Unit.> |
| 7 | **CHECK OUTPUT OF BODY INTEGRATED UNIT.**<br>From the condition in step 6), operate the LOCK/UNLOCK button. | Is output signal present when operating? | System is normal. | Inspect the keyless entry system. If there are no problems, replace the body integrated unit.<br>• Inspection: <Ref. to SL-17, SYMPTOM CHART, INSPECTION, Keyless Entry System.><br>• Replacement: <Ref. to SL-78, Body Integrated Unit.> |

## 10.CHECK DOOR LOCK SWITCH

For operation procedures, refer to the "INSPECTION OF DOOR LOCK SWITCH" of the "Door Lock Control System". <Ref. to SL-11, CHECK DOOR LOCK SWITCH, INSPECTION, Door Lock Control System.>

## 11.CHECK IGNITION SWITCH ILLUMINATION

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK IGNITION CIRCUIT.**<br>Check the ignition circuit. <Ref. to SL-30, CHECK IGNITION SWITCH CIRCUIT, INSPECTION, Security System.> | Is the switch circuit normal? | Go to step **2**. | Repair or replace. |
| 2 | **CHECK DOOR SWITCH CIRCUIT.**<br>Inspect door switch circuit. <Ref. to SL-20, CHECK DOOR SWITCH, INSPECTION, Keyless Entry System.> | Is the switch circuit normal? | Go to step **3**. | Repair or replace. |
| 3 | **CHECK FUSE.**<br>Remove and visually check fuse No. 14 (in the main fuse box). | Is the fuse blown out? | Replace the fuse with a new part. | Go to step **4**. |
| 4 | **CHECK HARNESS.**<br>1) Disconnect the ignition switch illumination connector.<br>NOTE:<br>The ignition switch illumination is integrated into the immobilizer antenna.<br>2) Measure the voltage between ignition switch illumination connector and chassis ground.<br>***Connector & terminal***<br>***(B415) No. 2 (+) — Chassis ground (–):*** | Is the voltage 10 V or more? | Go to step **5**. | Check the harness for open or short circuits between the ignition switch illumination and fuse. |
| 5 | **CHECK IGNITION SWITCH ILLUMINATION CIRCUIT.**<br>1) Disconnect the connector of body integrated unit.<br>2) Check the harness between body integrated unit and ignition switch illumination.<br>***Connector & terminal***<br>***(B280) No. 25 — (B415) No. 6:*** | Is harness normal? | Go to step **6**. | Check the harness for open circuits and shorts between the body integrated unit and ignition switch illumination. |
| 6 | **CHECK IGNITION SWITCH ILLUMINATION BULB.**<br>Apply battery voltage between terminals of the bulb.<br>***Terminals***<br>***No. 2 (+) — No. 6 (–):*** | Does the bulb illuminate? | Replace the body integrated unit. <Ref. to SL-78, Body Integrated Unit.> | Replace the immobilizer antenna. <Ref. to SL-85, REMOVAL, Immobilizer Antenna.> |

# 5. Security System

## A: WIRING DIAGRAM

Refer to “Security System” in the wiring diagram. <Ref. to WI-138, WIRING DIAGRAM, Security System.>

## B: ELECTRICAL SPECIFICATION

Refer to “Control Module I/O Signal” of “BODY CONTROL SYSTEM (DIAGNOSTICS)” section. <Ref. to BC(diag)-6, ELECTRICAL SPECIFICATION, Control Module I/O Signal.>

## C: INSPECTION

### 1. BASIC DIAGNOSTIC PROCEDURE

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 1 | **INITIAL CHECK.**<br>Check keyless entry system. | Does the keyless entry system operate normally? | Go to step **2**. | Check keyless entry system. <Ref. to SL-17, INSPECTION, Keyless Entry System.> |
| 2 | **CHECK SECURITY ON/OFF SETTING.**<br>1) Remove the key from ignition switch, and then close all doors.<br>2) Check the status of security indicator light.<br>3) Press the LOCK button of the keyless transmitter.<br>4) Check the status of security indicator light. | Is the security indicator light blinking patterns as follows?<br>• Before pressing the LOCK button: Blinks once within 3 seconds<br>• After pressing the LOCK button: When monitoring lag is set to 0 second, flashes twice within 0.5 seconds in 2 second intervals / When monitoring lag is set to 30 seconds, flashes once within 0.4 seconds in 30 seconds. | Go to step **4**. | Go to step **3**. |
| 3 | **CHANGE SETTING OF SECURITY SYSTEM.**<br>Change the setting of security system to ON using Subaru Select Monitor. <Ref. to SL-29, SECURITY SYSTEM ON/OFF SETTING, INSPECTION, Security System.> | Is setting change completed correctly? | Go to step **4**. | Replace the body integrated unit. <Ref. to SL-78, Body Integrated Unit.> |
| 4 | **CHECK SECURITY SYSTEM OPERATION.**<br>1) Remove the key from ignition switch, and then close all doors.<br>2) Press the LOCK button of keyless transmitter, and wait for 30 seconds.<br>3) Check the security indicator light blinking patterns. | Does the security indicator light blink twice within 0.5 seconds in 2 second intervals? | Go to step **5**. | Refer to “SECURITY INDICATOR” of “IMMOBILIZER (DIAGNOSTICS)”. <Ref. to IM(diag)-11, CHECK SECURITY INDICATOR LIGHT CIRCUIT, INSPECTION, Diagnostics Chart for Security Indicator Light.> |

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 5 | **CHECK SECURITY ALARM OPERATION.**<br>1) Operate the driver's door lock switch to the UNLOCK side.<br>2) Open any door, trunk lid or rear gate. | Does the security alarm operate when opening any door, trunk lid, or rear gate? | Go to step **6**. | Check the following parts. <Ref. to SL-20, CHECK DOOR SWITCH, INSPECTION, Keyless Entry System.><br>• Door switches<br>• Trunk lid latch switch<br>• Rear gate latch switch |
| 6 | **CHECK SECURITY ALARM OPERATION.**<br>Check the security alarm operation status. | During the operation, does the horn keep sounding and the hazard light blink? | Go to step **7**. | • Check the following parts.<br>• Horn: <Ref. to SL-30, CHECK HORN, INSPECTION, Security System.><br>• Hazard light: <Ref. to SL-24, CHECK HAZARD LIGHT OPERATION, INSPECTION, Keyless Entry System.> |
| 7 | **CHECK SECURITY ALARM CANCEL OPERATION.**<br>Press any button of transmitter while the security alarm is operating. | Do the horn sound and the blinking of the hazard light stop? | Go to step **8**. | Replace the body integrated unit. <Ref. to SL-78, Body Integrated Unit.> |
| 8 | **CHECK IMPACT SENSOR (DEALER OPTION).**<br>Check the sensibility of impact sensor. <Ref. to SL-73, CHECK IMPACT SENSOR, ADJUSTMENT, Impact Sensor.> | Is the sensibility set properly? | Go to step **9**. | Adjust the sensitivity. <Ref. to SL-74, IMPACT SENSITIVITY ADJUSTMENT, ADJUSTMENT, Impact Sensor.> |
| 9 | **CHECK SECURITY SYSTEM CONDITION MEMORY.**<br>1) Remove the key from ignition switch, and then close all doors.<br>2) Open the front hood.<br>3) Press the LOCK button of keyless transmitter, and wait for 30 seconds.<br>4) Disconnect the ground cable from battery.<br>5) Connect the ground cable to battery.<br>6) Check the status of security indicator light. | Does the security indicator light blinks twice within 0.5 seconds at 2 second intervals? | Go to step **10**. | Replace the body integrated unit. <Ref. to SL-78, Body Integrated Unit.> |

| Step | | Check | Yes | No |
|---|---|---|---|---|
| 10 | **CHECK SECURITY SYSTEM MANUAL ON/OFF SETTING.**<br>1) Press the UNLOCK button of the keyless transmitter.<br>2) Change the setting of security system. <Ref. to SL-29, SECURITY SYSTEM ON/OFF SETTING, INSPECTION, Security System.> | Is setting change completed correctly? | Restore the security system settings to those before the diagnosis and finish the diagnosis. | • Check the following parts.<br>• Ignition switch circuit: <Ref. to SL-65, INSPECTION, Ignition Key Lock.><br>• Door lock switch circuit: <Ref. to SL-11, CHECK DOOR LOCK SWITCH, INSPECTION, Door Lock Control System.> |

NOTE:
If the horn sounds when the security is turned on (monitor condition) using the keyless transmitter, check the function setting of the body integrated unit. As a cause, it is possible that the impact sensor present (ON) / not present (OFF) setting is set to ON in the customization function though there is no impact sensor. <Ref. to BC(diag)-15, User Customizing.>

## 2. CHECK SECURITY SYSTEM CONDITION MEMORY

1) Pull out the key from the ignition switch, or turn the ignition to OFF.
2) Close all the doors, trunk lid and rear gate.
3) Open the front hood.
4) Press the LOCK button of the keyless transmitter.

NOTE:
Wait until the security indicator light blinks twice within 0.5 seconds at 2 second intervals.
If the 30 second monitoring lag has been set, wait for 30 seconds.
5) Disconnect the ground cable from battery.
6) Connect the battery ground terminal.
7) Check that the security indicator light blinks twice within 0.5 seconds at 2 second intervals. When it does not blink, replace the body integrated unit.

## 3. SECURITY SYSTEM ON/OFF SETTING

NOTE:
It can be set by «Security Alarm Setup» in unit customizing using Subaru Select Monitor.
For detailed procedures, refer to “PC application help for Subaru Select Monitor”.
1) Close all doors, trunk lid and rear gate, and sit down on the driver seat. Press the UNLOCK button of the keyless transmitter.
2) Turn the ignition switch to ON.
3) Press the central door unlock switch and open the driver’s door simultaneously. (Keep the central door unlock switch pressed down.)
4) When the condition in step 3) continues for 10 seconds, the system switches to a mode reverse to the current mode.

| Setting | Horn activation | Meter display |
|---|---|---|
| ON → OFF | Twice | [AL_OF] |
| OFF → ON | Once | [AL_ON] |

## 4. CHECK HORN

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK HORN OPERATION.**<br>Check the horn sounds when the horn switch is pushed. | Does the horn sound? | Go to step **2**. | Check the horn circuit. |
| 2 | **CHECK BODY INTEGRATED UNIT.**<br>Select and perform the «Horn Output» using Subaru Select Monitor.<br>NOTE:<br>For detailed procedures, refer to “PC application help for Subaru Select Monitor”. | Does the horn sound? | Horn circuit is OK. | Go to step **3**. |
| 3 | **CHECK HORN RELAY CIRCUIT.**<br>1) Turn the ignition switch to OFF.<br>2) Disconnect the connector of body integrated unit.<br>3) Remove the horn relay.<br>4) Check the harness between body integrated unit and horn relay.<br>***Connector & terminal***<br>***(B280) No. 24 — Horn relay No. 4:*** | Is harness normal? | Check body integrated unit. <Ref. to BC(diag)-2, Basic Diagnostic Procedure.> | Repair or replace the harness. |

## 5. CHECK IGNITION SWITCH CIRCUIT

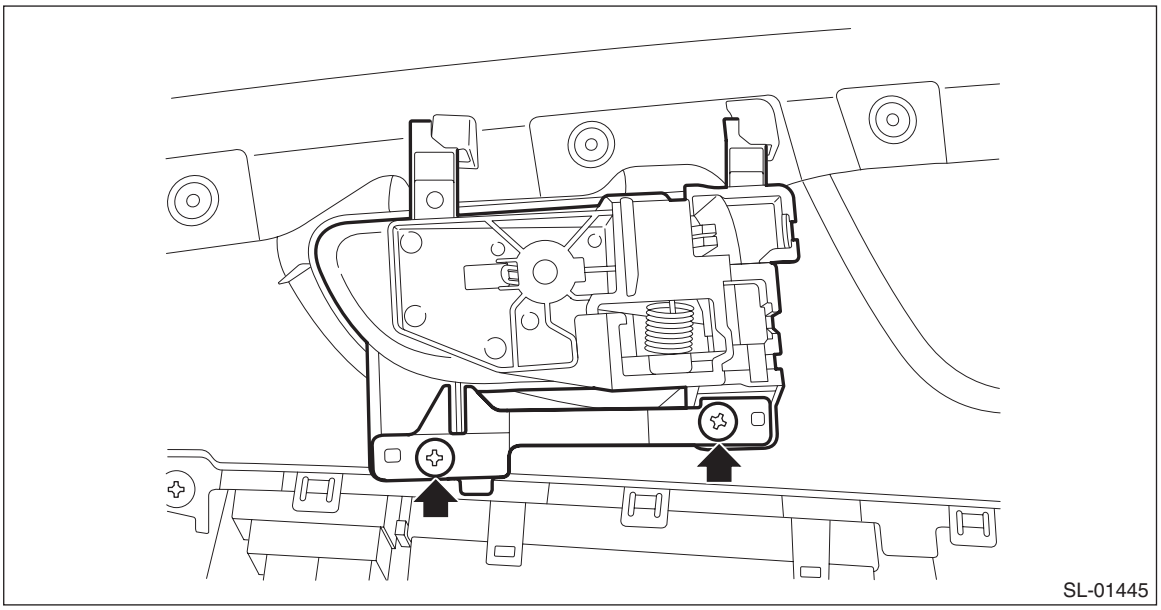
| | Step | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK CURRENT DATA.**<br>Display the data of «BATT voltage» and «IG power supply voltage» using the Subaru Select Monitor.<br>NOTE:<br>For detailed procedures, refer to “PC application help for Subaru Select Monitor”. | Does the «IG power supply voltage» indicate 0 V when the ignition is OFF, and fall within a range of ±1 V from the «BATT voltage» when the ignition is ON? | The ignition switch input circuit is OK. | Go to step **2**. |
| 2 | **CHECK IGNITION SWITCH CIRCUIT.**<br>1) Turn the ignition switch to OFF.<br>2) Disconnect the connector of body integrated unit.<br>3) Turn the ignition switch to ON.<br>4) Measure the voltage between the body integrated unit connector and chassis ground.<br>***Connector & terminal***<br>***(B281) No. 3 (+) — Chassis ground (–):*** | Is the voltage 10 V or more? | Check body integrated unit. <Ref. to BC(diag)-2, Basic Diagnostic Procedure.> | Check the harness for open or short circuit between body integrated unit and fuse. |

# 6. Front Inner Remote

## A: REMOVAL

1) Remove the trim panel - front door. <Ref. to EI-61, FRONT DOOR, REMOVAL, Door Trim.>
2) Remove the screw, and remove the remote assembly - door.

**CAUTION:**
**The remote assembly - door is tightened with the plate. Be careful not to drop or damage the part.**



## B: INSTALLATION

1) Before installation, check the following items.
- Cable is free from deformation such as fray.
- Grease is applied sufficiently to cable joints.

If grease is insufficient, add it as necessary before assembling the cable.
2) Install each part in the reverse order of removal.

**CAUTION:**
**Securely install the plate.**

## C: INSPECTION

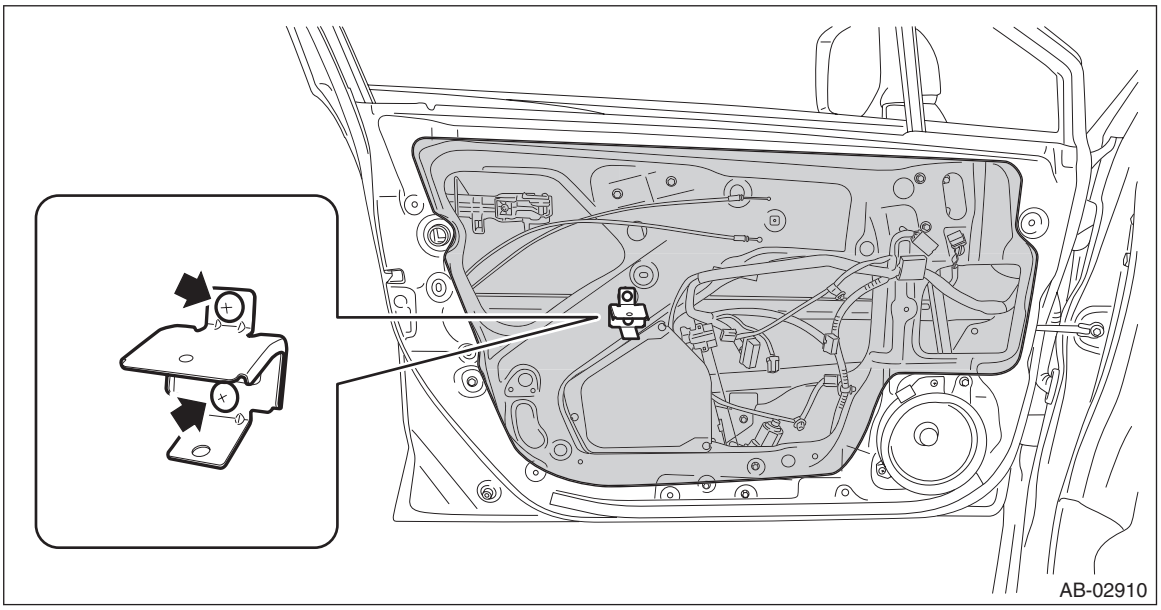
Check if the remote handle operates normally.
- If the lever is faulty, replace the remote handle.
- If the cable is deformed, replace the latch & actuator assembly - front.

# 7. Front Outer Handle

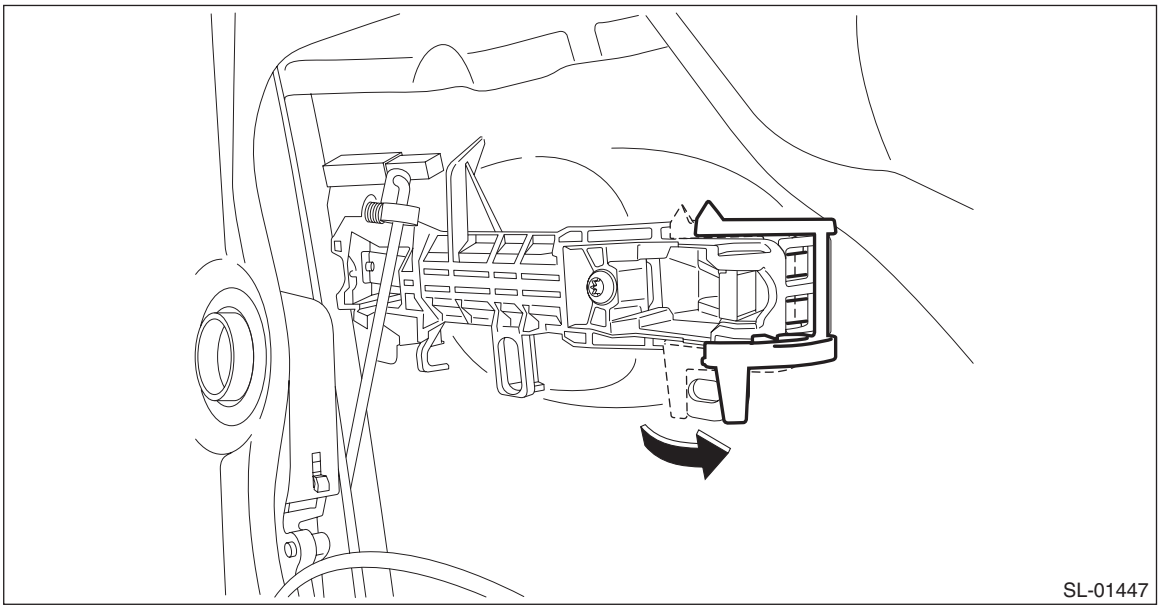
## A: REMOVAL

1) Raise the glass assembly - front door to the top position.
2) Remove the trim panel - front door. <Ref. to EI-61, FRONT DOOR, REMOVAL, Door Trim.>
3) Remove the sealing cover - front door.

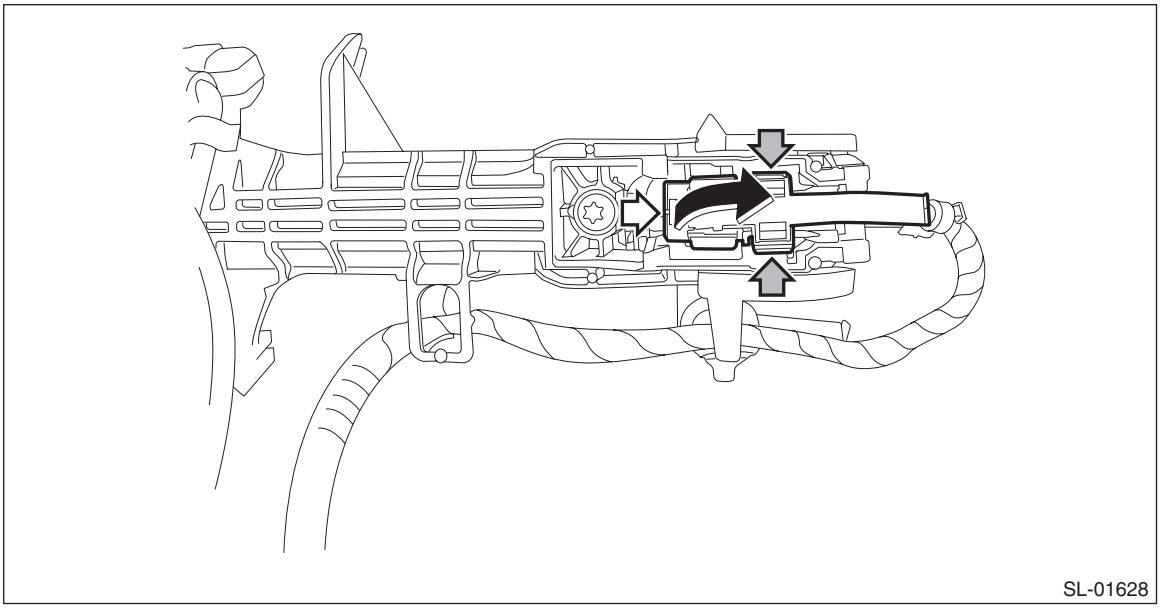
**CAUTION:**
- **Carefully remove the butyl tape. Excessive force will easily break the sealing cover - front door.**
- **If the sealing cover - front door gets broken, replace it with a new part.**
  (1) Remove the screw to remove the bracket - door trim front.
  (2) Disconnect connectors.
  (3) Carefully remove the butyl tape to remove the sealing cover - front door.



4) Remove the holder of the frame assembly - front door outer.



NOTE:
For model with keyless access, disconnect the harness clip and exterior antenna (touch sensor) connector.

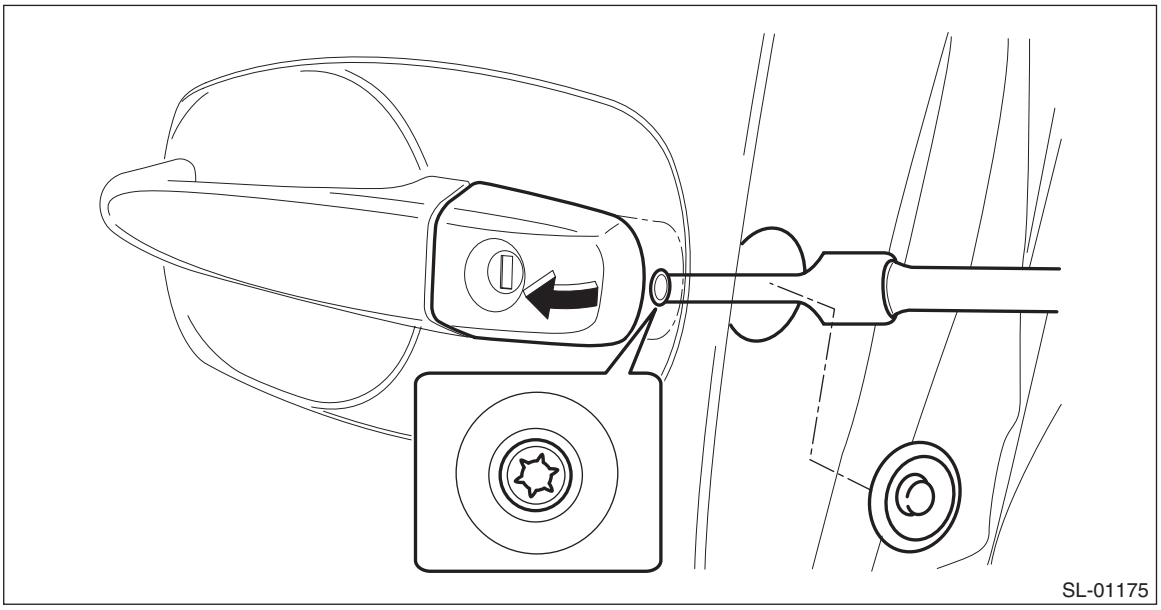


SL-01628

5) Remove the cover - handle front outer.

***Preparation tool:***
***TORX® T30***

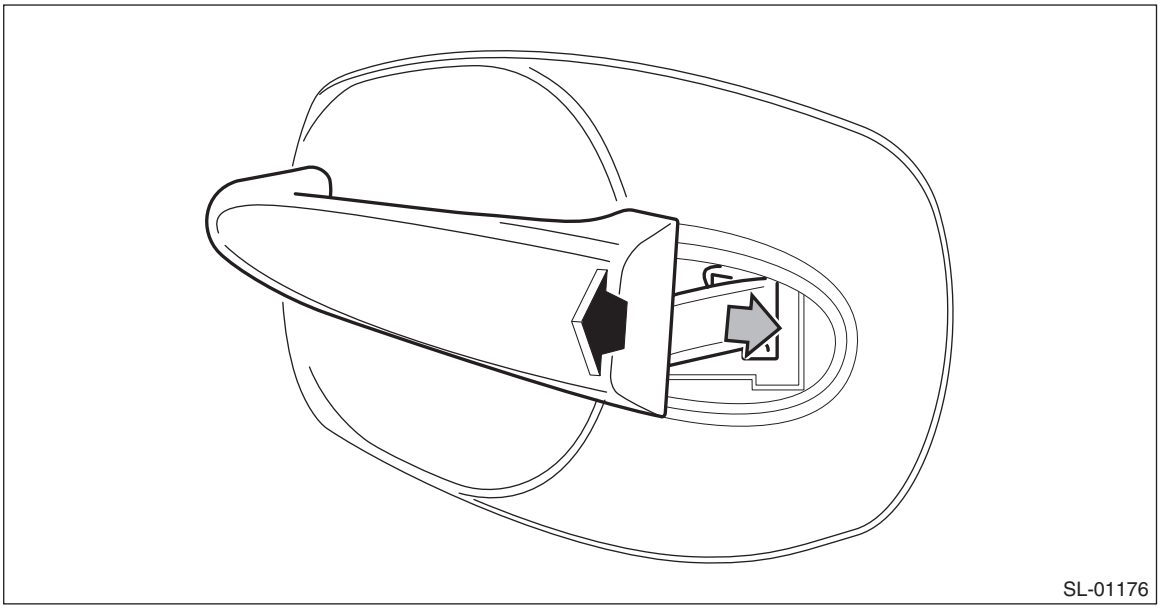
(1) Remove the plug at the rear end of the panel assembly - front door.
(2) Loosen the TORX® bolt and remove the cover - handle front outer.



SL-01175

6) Remove the handle - door outer by moving it rearward.

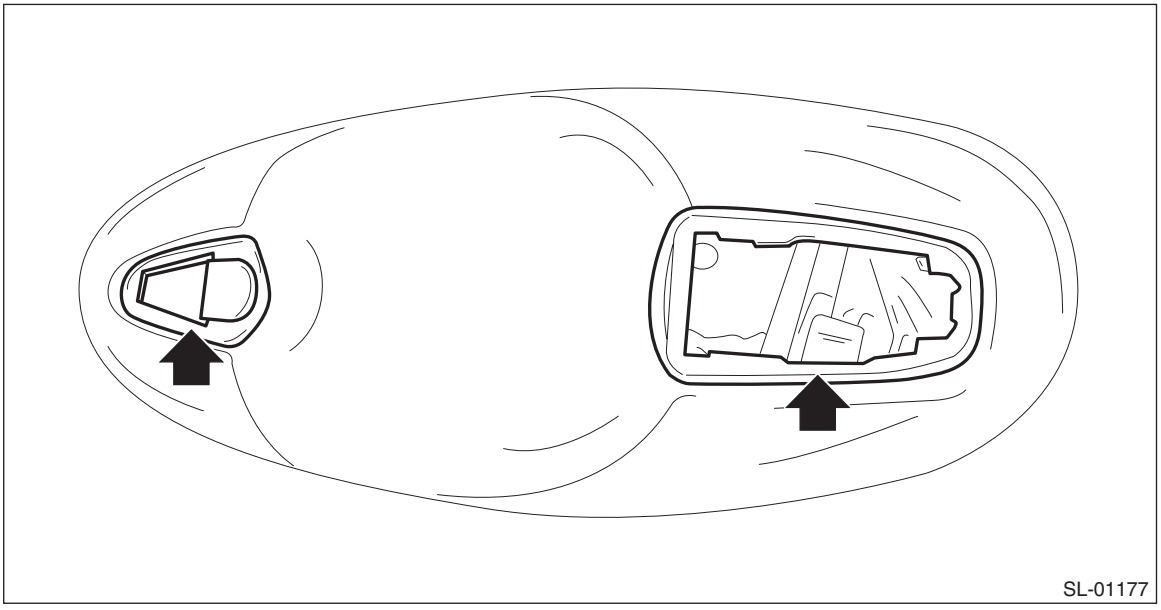
**CAUTION:**
**Do not apply excessive force to remove the handle - door outer from the panel assembly - front door. The panel assembly - front door may be deformed.**



7) Remove the frame assembly - front door outer.

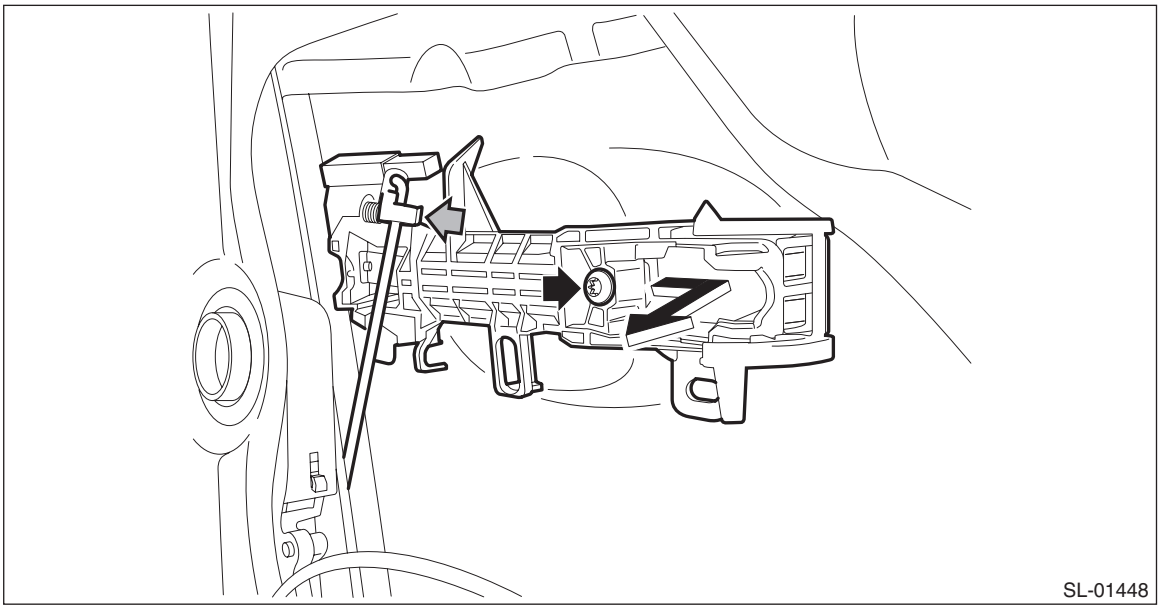
***Preparation tool:***
***TORX® T30***

(1) Remove the spacer - door handle outer.



(2) Remove the rod from the rod clamp of the frame assembly - front door outer.

(3) Loosen the TORX® bolt and remove the frame assembly - front door outer from inside the panel assembly - front door.



## B: INSTALLATION

1) Before installation, check the following items.
- Rod is free from deformation.
- Grease is applied sufficiently to rod joints.

If grease is insufficient, add it as necessary before assembling the rod.
2) Install each part in the reverse order of removal.

***Tightening torque:***
***Refer to "COMPONENT" of "General Description". <Ref. to SL-2, DOOR LOCK ASSEMBLY, COMPONENT, General Description.>***

## C: INSPECTION

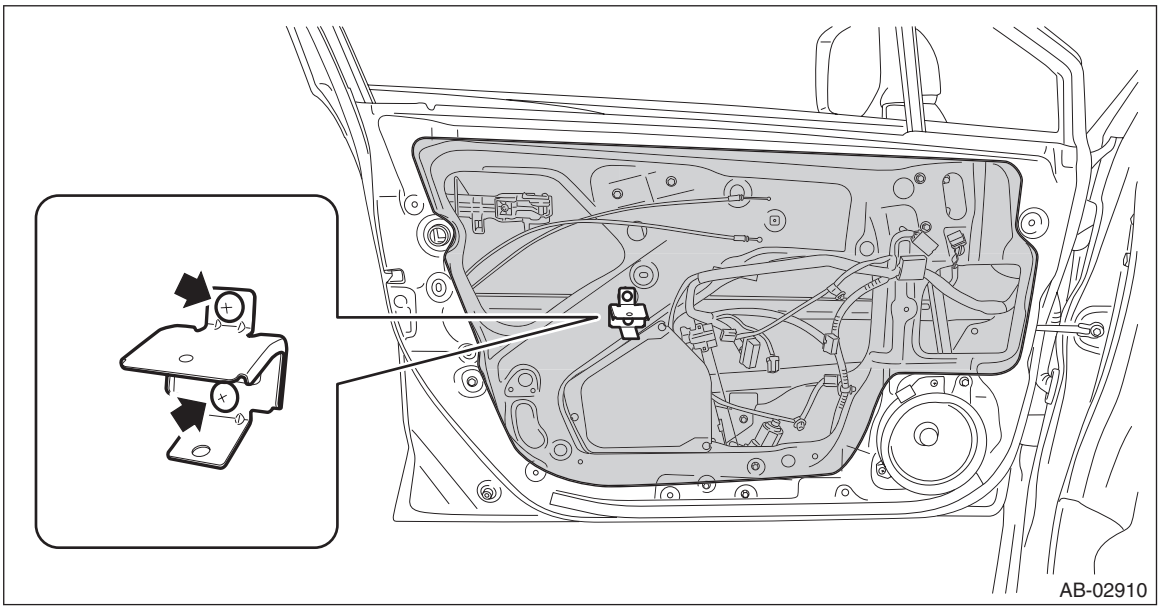
Check if the outer handle operates normally.
- If the lever is faulty, replace the handle - door outer.
- If the rod is deformed, replace the latch & actuator assembly - front.

# 8. Front Door Latch and Door Lock Actuator Assembly

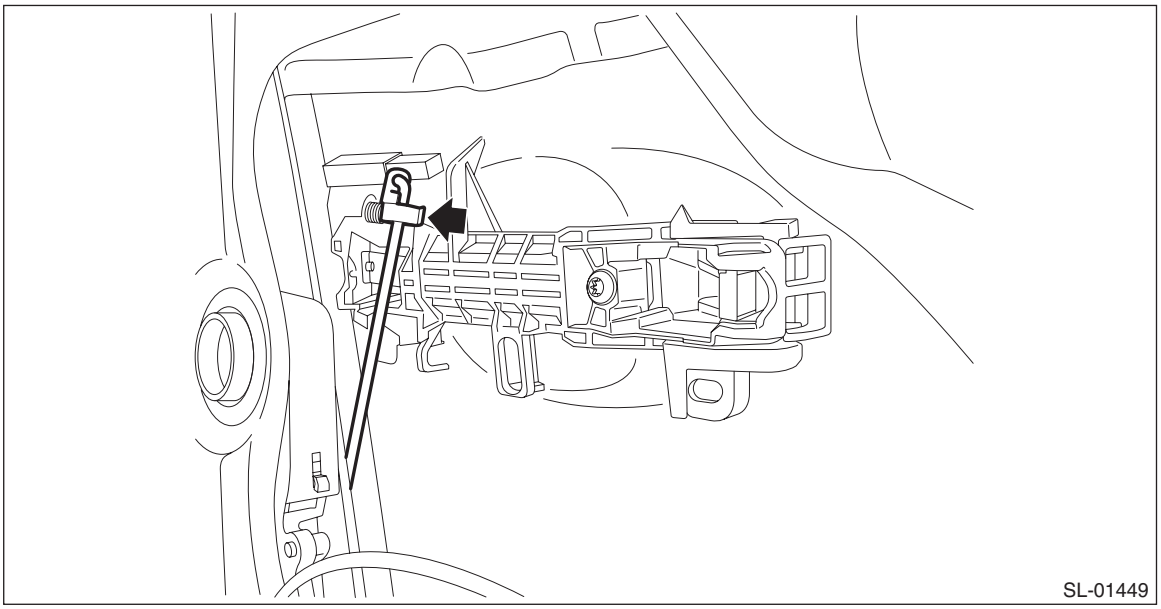
## A: REMOVAL

1) Raise the glass assembly - front door to the top position.
2) Remove the trim panel - front door. <Ref. to EI-61, FRONT DOOR, REMOVAL, Door Trim.>
3) Remove the sealing cover - front door.

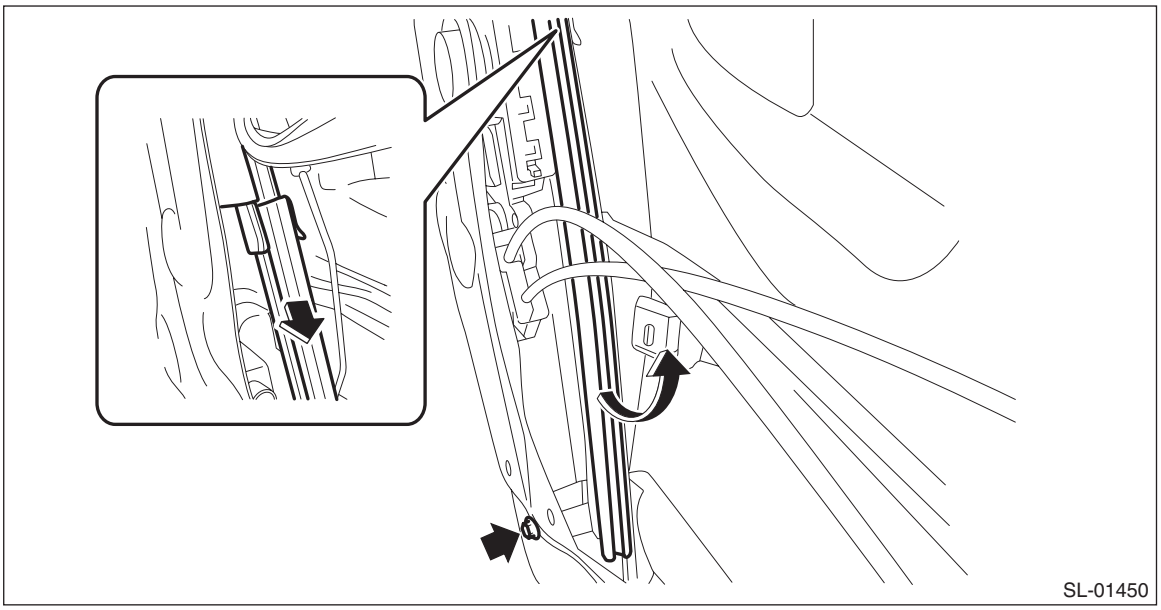
**CAUTION:**
- **Carefully remove the butyl tape. Excessive force will easily break the sealing cover - front door.**
- **If the sealing cover - front door gets broken, replace it with a new part.**
  (1) Remove the screw to remove the bracket - door trim front.
  (2) Disconnect connectors.
  (3) Carefully remove the butyl tape to remove the sealing cover - front door.



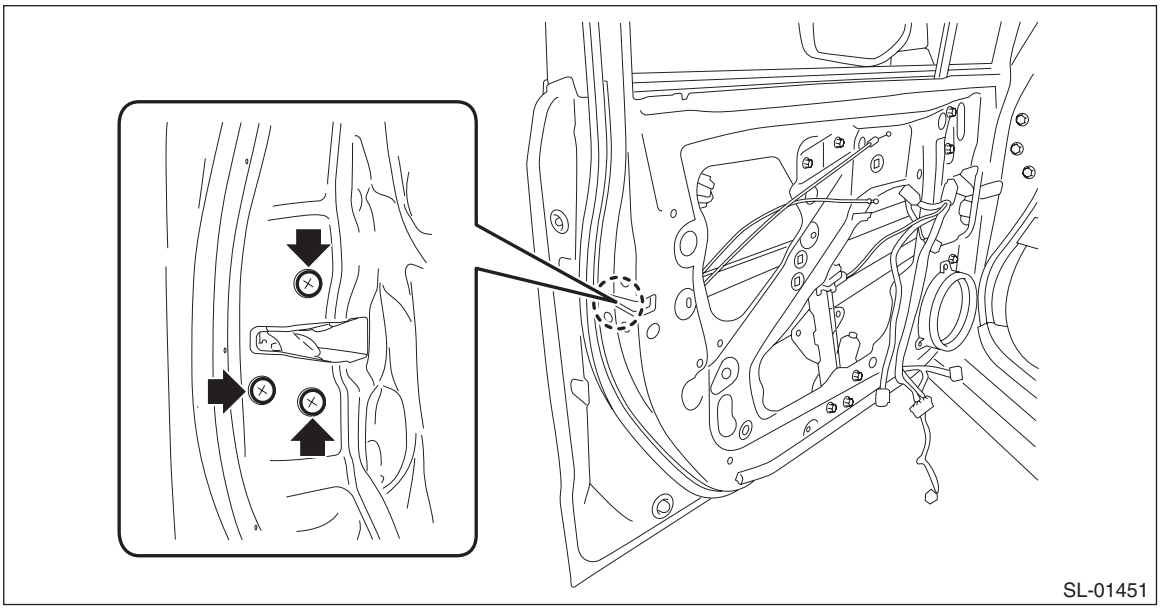
4) Remove the rod from the rod clamp of the frame assembly - front door outer.



5) Remove the sash COMPL - lower.
(1) Remove the lower side of the running channel - front door.
(2) Remove the bolts, and remove the sash COMPL - lower.



6) Remove the screws to remove the latch & actuator assembly - front.



## B: INSTALLATION

1) Before installation, check the following items.
- Cable and rod are free from deformation.
- Grease is applied sufficiently to rod joints.

If grease is insufficient, add it as necessary before assembling the rod.
2) Install each part in the reverse order of removal.

***Tightening torque:***
***Door lock assembly: <Ref. to SL-2, DOOR LOCK ASSEMBLY, COMPONENT, General Description.>***
***Sash COMPL - D3: 7.5 N·m (0.76 kgf-m, 5.5 ft-lb)***

# C: INSPECTION

## 1. LATCH

Check if the latch operates normally.
If the cable or rod is faulty, replace the latch & actuator assembly - front.

## 2. LOCK ACTUATOR

### UNIT INSPECTION

***Preparation tool:***
***Circuit tester***

1) Check door lock operation
Check the door lock operation when battery voltage is applied between the terminals of actuator.

| Terminal No. | Inspection conditions | Specification | Connection diagram |
|---|---|---|---|
| 4 (+) — 1 (–) | Apply battery voltage. | LOCK |  SL-01474 |
| 1 (+) — 4 (–) | | UNLOCK |  SL-01473 |

2) Check position switch
Check the resistance between actuator terminals.

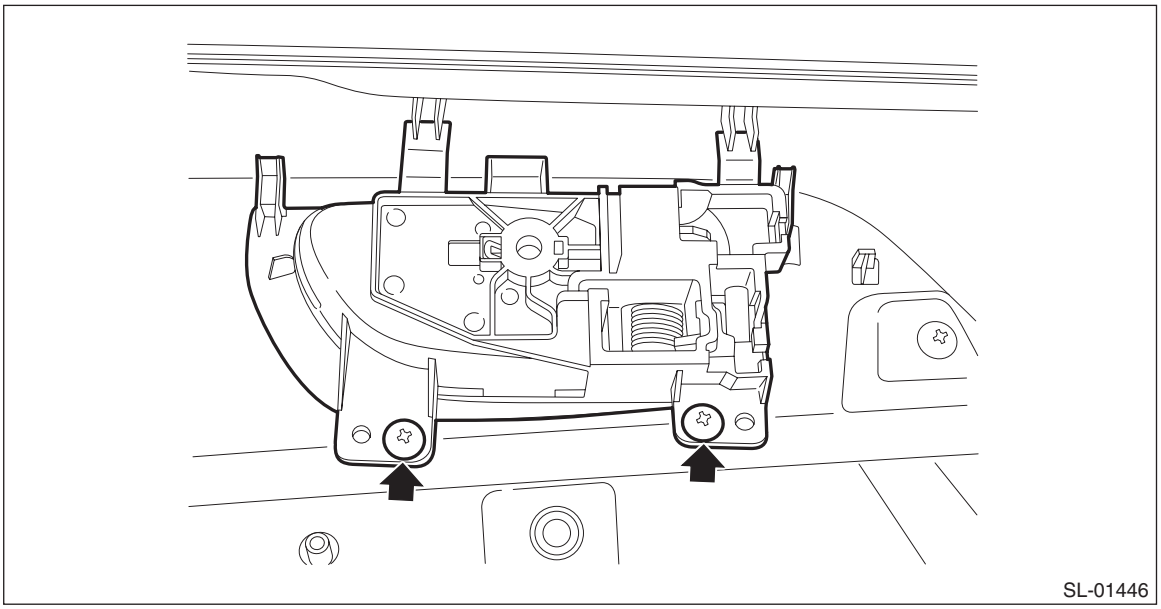
| Terminal No. | Inspection conditions | Standard | Connection diagram |
|---|---|---|---|
| 8 — 7 | LOCK | 1 MΩ or more |  SL-01568 |
| | UNLOCK | Less than 1 Ω | |

3) Replace the latch & actuator assembly - front if it is found defective.

# 9. Rear Inner Remote

## A: REMOVAL

1) Remove the trim panel - rear door. <Ref. to EI-62, REAR DOOR, REMOVAL, Door Trim.>
2) Remove the screw, and remove the remote assembly - door.



## B: INSTALLATION

1) Before installation, check the following items.
- Cable is free from deformation such as fray.
- Grease is applied sufficiently to cable joints.

If grease is insufficient, add it as necessary before assembling the cable.
2) Install each part in the reverse order of removal.

## C: INSPECTION

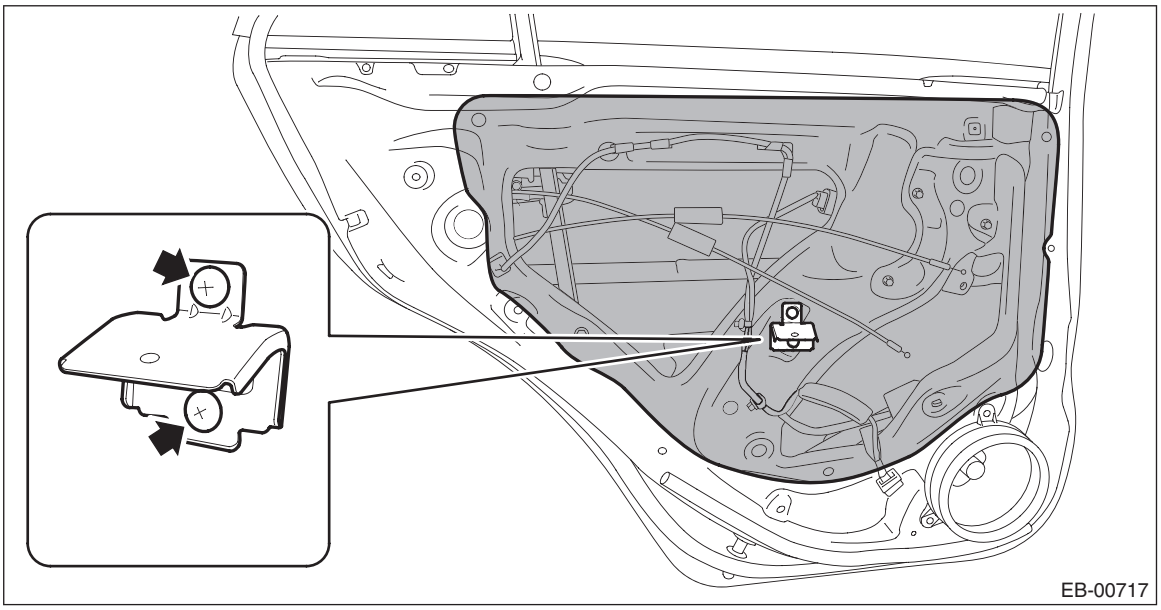
Check if the remote handle operates normally.
- If the lever is faulty, replace the remote handle.
- If the cable is deformed, replace the latch & actuator assembly - rear.

# 10.Rear Outer Handle

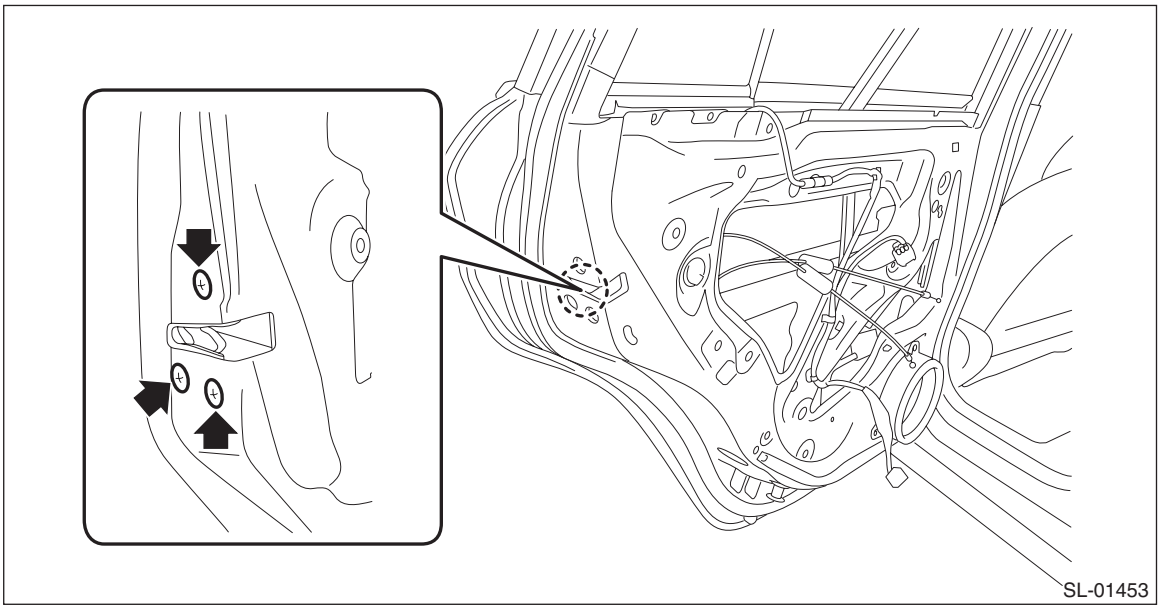
## A: REMOVAL

1) Raise the glass assembly - rear door to the top position.
2) Remove the trim panel - rear door. <Ref. to EI-62, REAR DOOR, REMOVAL, Door Trim.>
3) Remove the sealing cover - rear door.

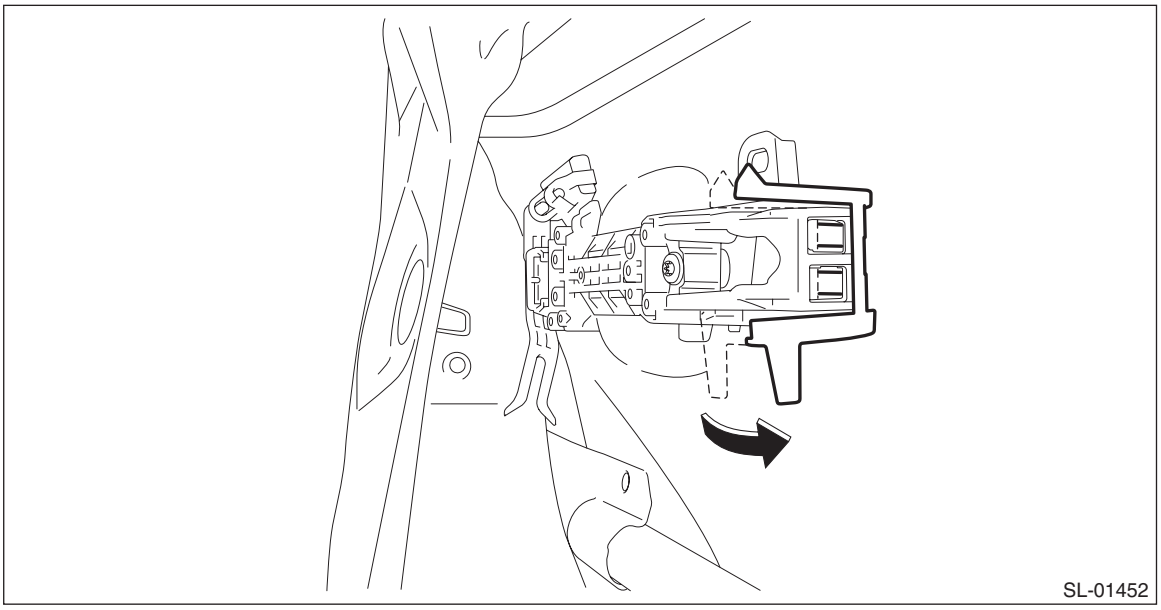
**CAUTION:**
- **Carefully remove the butyl tape. Excessive force will easily break the sealing cover - rear door.**
- **If the sealing cover - rear door gets broken, replace it with a new part.**
  (1) Remove the screw to remove the bracket - door trim rear.
  (2) Disconnect connectors.
  (3) Carefully remove the butyl tape to remove the sealing cover - rear door.



4) Remove the screws and move downward the latch & actuator assembly - rear.



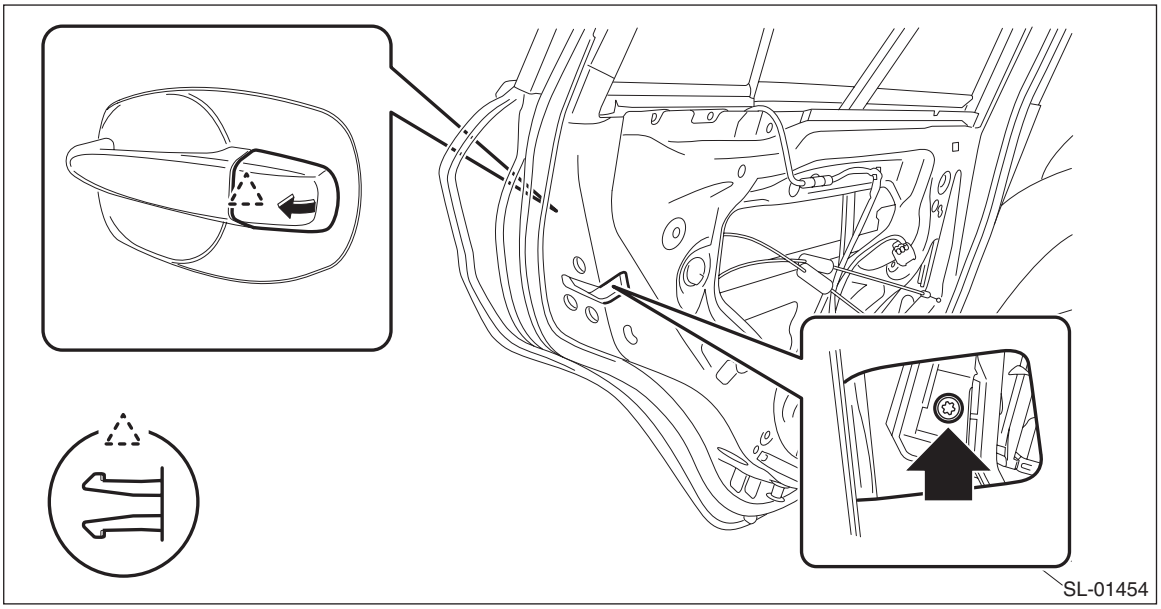
5) Remove the holder of the frame assembly - rear door outer.



6) Remove the cover - handle rear outer.

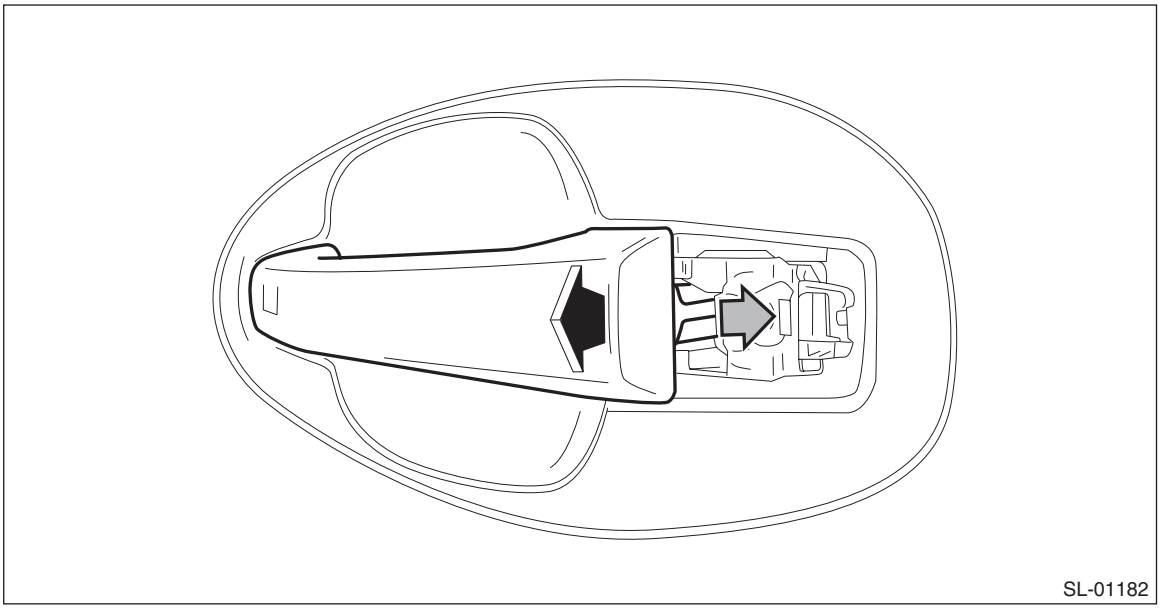
***PREPARATION TOOL:***
***TORX® T30***

(1) Loosen the TORX® bolt.
(2) Release the claws, and then remove the cover - handle rear outer.



7) Remove the handle - door outer by moving it rearward.

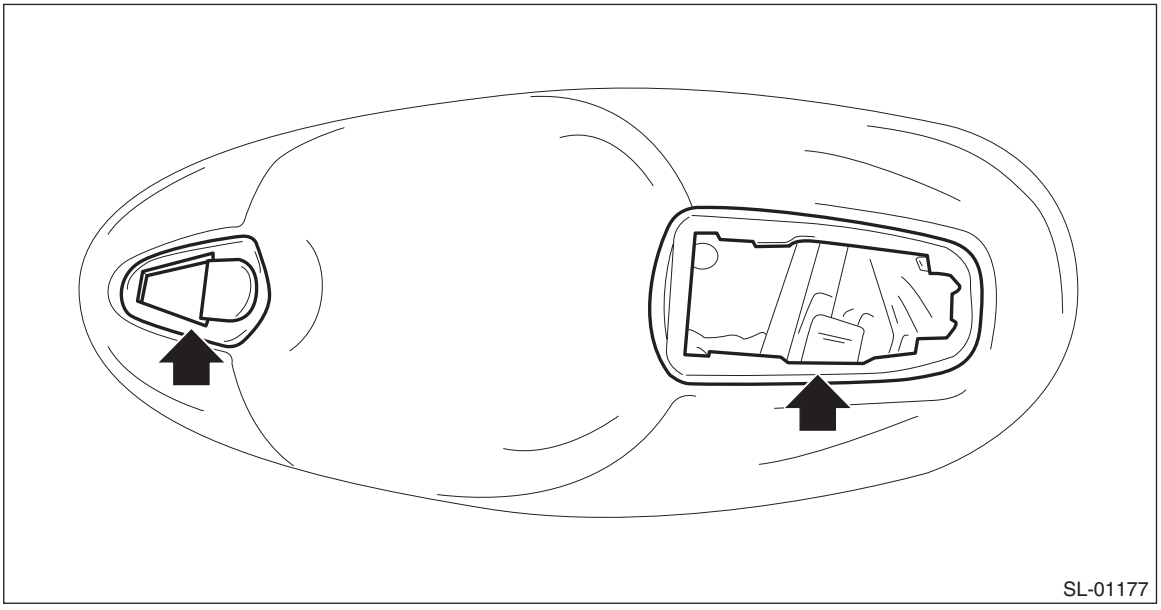
**CAUTION:**
**Do not apply excessive force to remove the handle - door outer from the panel assembly - rear door. The panel assembly - rear door may be deformed.**



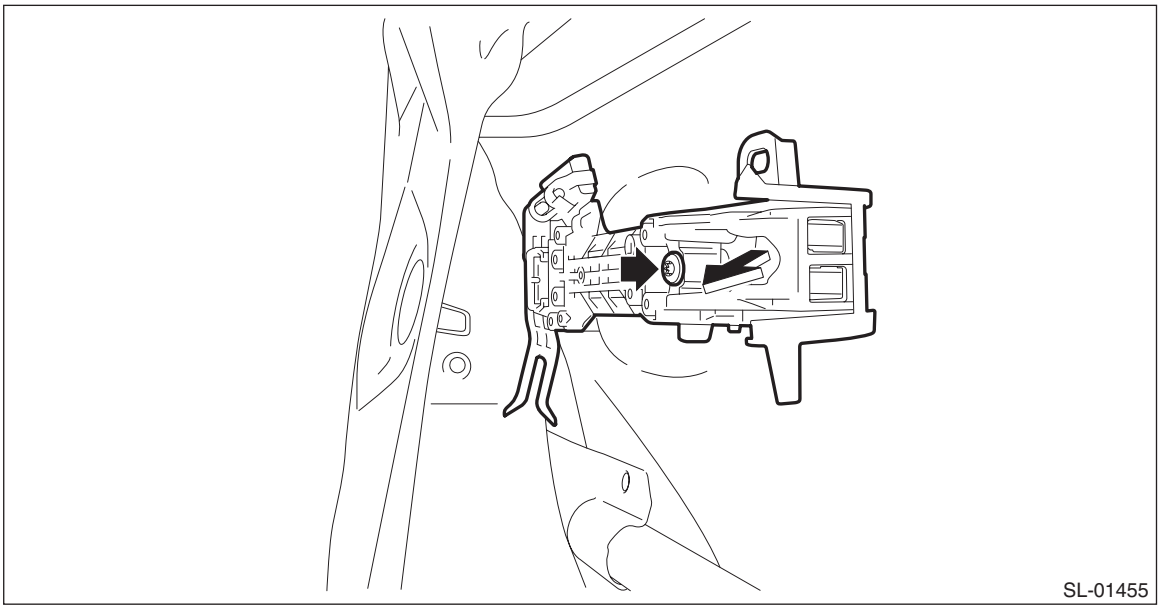
8) Remove the frame assembly - rear door outer.

***PREPARATION TOOL:***
***TORX® T30***

(1) Remove the spacer - door handle outer.



(2) Loosen the TORX® bolt and remove the frame assembly - rear door outer from inside the panel assembly - rear door.



## B: INSTALLATION

1) Before installation, check the following items.
- Lever is free from deformation.
- Grease is applied sufficiently to lever joints.

If grease is insufficient, add it as necessary before assembling.
2) Install each part in the reverse order of removal.

***Tightening torque:***
***Refer to "COMPONENT" of "General Description". <Ref. to SL-2, DOOR LOCK ASSEMBLY, COMPONENT, General Description.>***

## C: INSPECTION

Check if the outer handle operates normally.
If the lever is faulty, replace the handle - door outer.

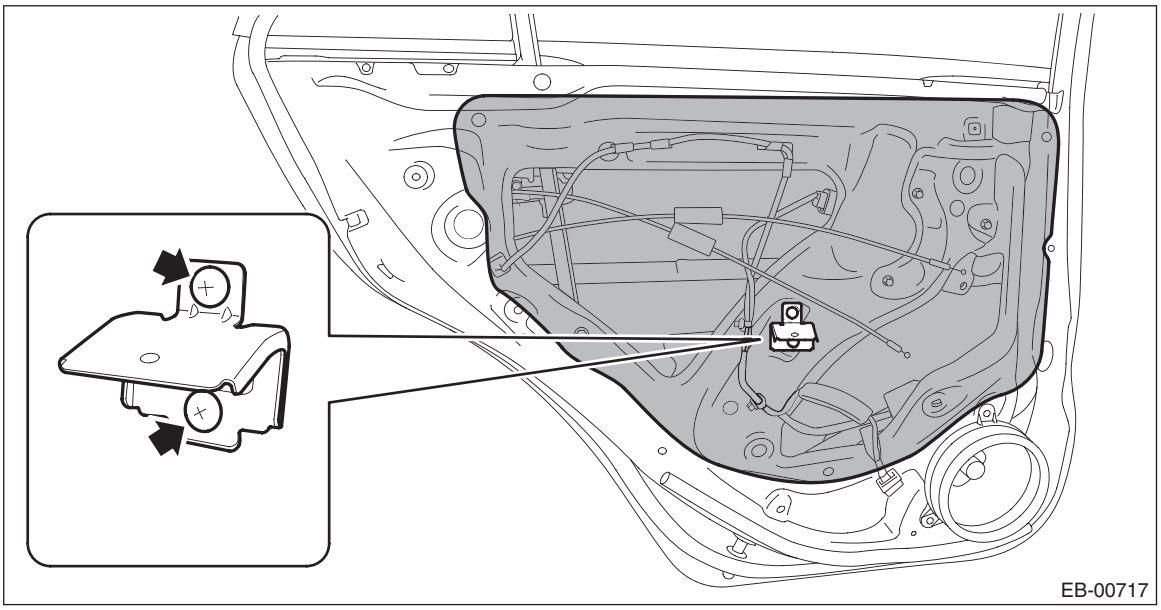
# 11.Rear Door Latch and Door Lock Actuator Assembly

## A: REMOVAL

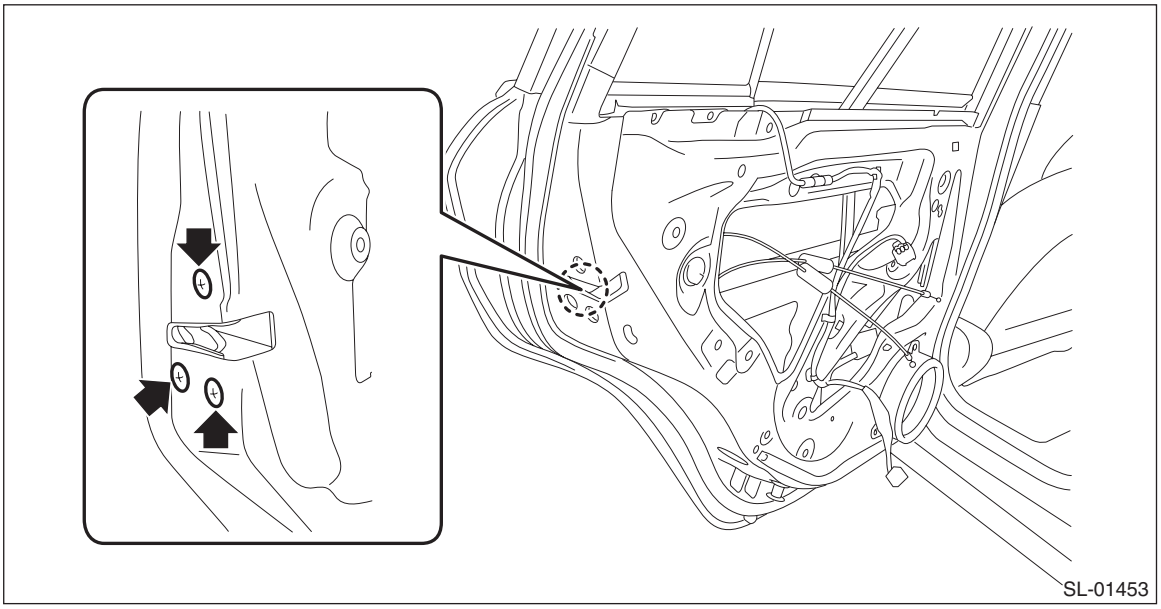
1) Disconnect the ground cable from battery.
2) Remove the trim panel - rear door. <Ref. to EI-62, REAR DOOR, REMOVAL, Door Trim.>
3) Remove the sealing cover - rear door.

**CAUTION:**
- **Carefully remove the butyl tape. Excessive force will easily break the sealing cover - rear door.**
- **If the sealing cover - rear door gets broken, replace it with a new part.**

(1) Remove the screw to remove the bracket - door trim rear.
(2) Disconnect connectors.
(3) Carefully remove the butyl tape to remove the sealing cover - rear door.



4) Remove the glass - rear window. <Ref. to GW-46, REMOVAL, Rear Window Glass.>
5) Remove the screws to remove the latch & actuator assembly - rear.



## B: INSTALLATION

1) Before installation, check the following items.
- Cable is free from deformation.
- Grease is applied sufficiently to lever joints.

If grease is insufficient, add it as necessary before assembling.
2) Install each part in the reverse order of removal.

***Tightening torque:***
***Refer to "COMPONENT" of "General Description". <Ref. to SL-2, DOOR LOCK ASSEMBLY, COMPONENT, General Description.>***

NOTE:
Make sure the child safety lock works correctly after installation.

## C: INSPECTION

### 1. LATCH

Check if the latch operates normally.
If the cable is faulty, replace the latch & actuator assembly - rear.

### 2. ACTUATOR

#### UNIT INSPECTION

1) Check door lock operation
Check the door lock operation when battery voltage is applied between the terminals of actuator.

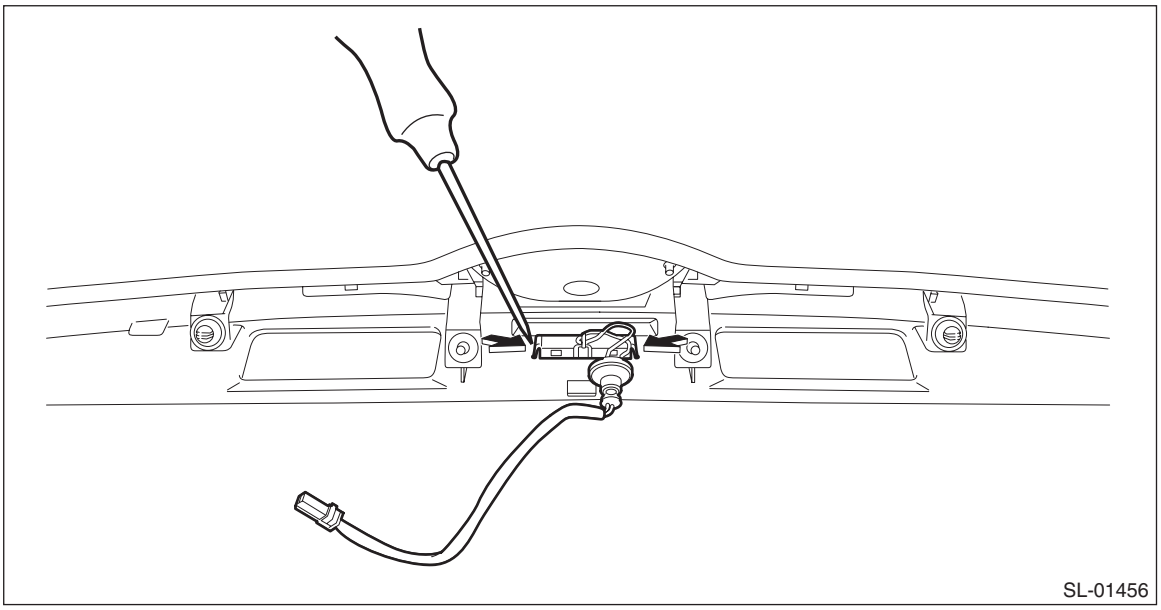
| Terminal No. | Inspection conditions | Specification | Connection diagram |
|---|---|---|---|
| 4 (+) — 1 (–) | Apply battery voltage. | LOCK |  SL-01474 |
| 1 (+) — 4 (–) | | UNLOCK |  SL-01473 |

2) If it does not operate properly as a result of inspection, replace the latch & actuator assembly - rear.

# 12.Rear Gate Opener Button

## A: REMOVAL

NOTE:
The button - opener rear gate is integrated with the rear lock button. (model with keyless access)
1) Remove the trim panel - rear gate. <Ref. to EI-147, REMOVAL, Rear Gate Trim.>
2) Remove the garnish assembly - rear gate. <Ref. to EI-152, REMOVAL, Rear Gate Garnish.>
3) Release the locks at both ends of the button - opener rear gate by pushing them with a flat tip screwdriver, and remove the button - opener rear gate.



## B: INSTALLATION

**CAUTION:**
**Make sure that the harness grommet is securely installed.**
**If not properly installed, this may cause leaks.**
Install each part in the reverse order of removal.

NOTE:
Refer to “INSTALLATION” of “Rear Gate Garnish”. <Ref. to EI-154, INSTALLATION, Rear Gate Garnish.>

# C: INSPECTION

## UNIT INSPECTION

***Preparation tool:***
***Circuit tester***

1) Check the resistance between switch terminals.

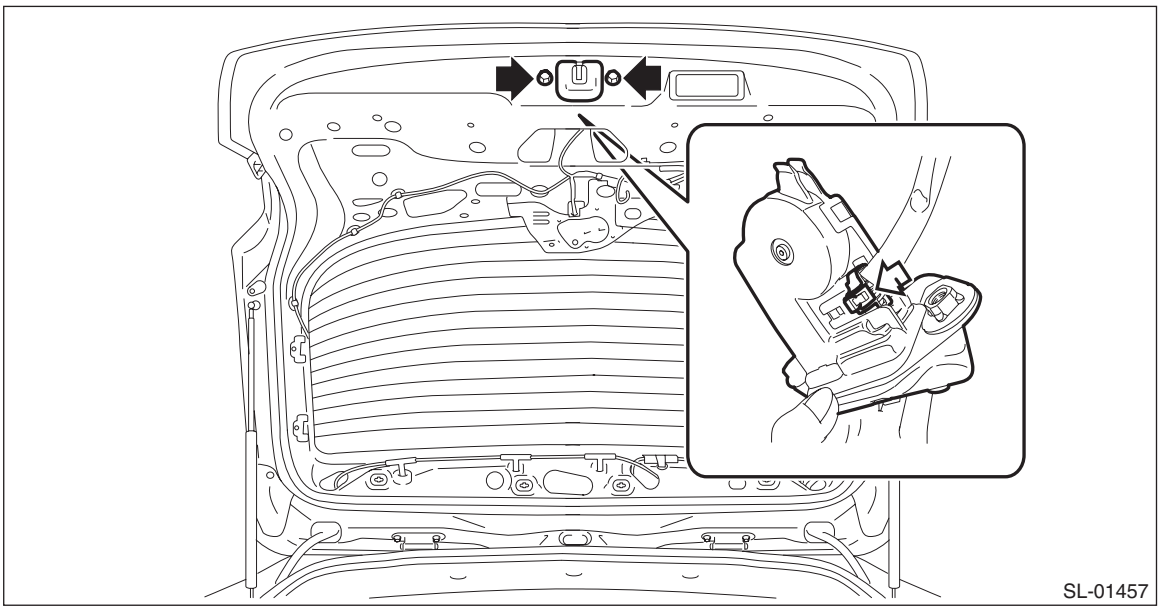
| Terminal No. | Inspection conditions | Standard | Connection diagram |
|---|---|---|---|
| 1 — 2 | OPEN | Less than 5 Ω |   SL-01578 |
| | CLOSE | 1 MΩ or more | |

2) If the inspection result is not within the standard, replace the button - opener rear gate.

# 13.Rear Gate Latch and Actuator Assembly

## A: REMOVAL

1) Disconnect the ground cable from battery.
2) Remove the trim panel - rear gate. <Ref. to EI-147, REMOVAL, Rear Gate Trim.>
3) Remove the latch and actuator - rear gate.
   (1) Disconnect the connector.
   (2) Remove the bolts, and remove the latch and actuator - rear gate.



## B: INSTALLATION

Install each part in the reverse order of removal.

***Tightening torque:***
***Refer to "COMPONENT" of "General Description". <Ref. to SL-3, REAR GATE LOCK AND TRUNK LID LOCK, COMPONENT, General Description.>***

# C: INSPECTION

## 1. LATCH

Check if the latch operates normally.
If latch deformation, abnormal wear, or unsmooth lock operation is observed, replace the latch and actuator - rear gate.

## 2. ACTUATOR

### UNIT INSPECTION

***PREPARATION TOOL:***
***Circuit tester***

1) Check door lock operation
Check the door lock operation when battery voltage is applied between the terminals of actuator.

| Terminal No. | Inspection conditions | Specification | Connection diagram |
|---|---|---|---|
| 1 (+) — 2 (–) | Connect battery to the terminals | OPEN |  SL-01477 |

2) Check switch
Check the resistance between actuator terminals.

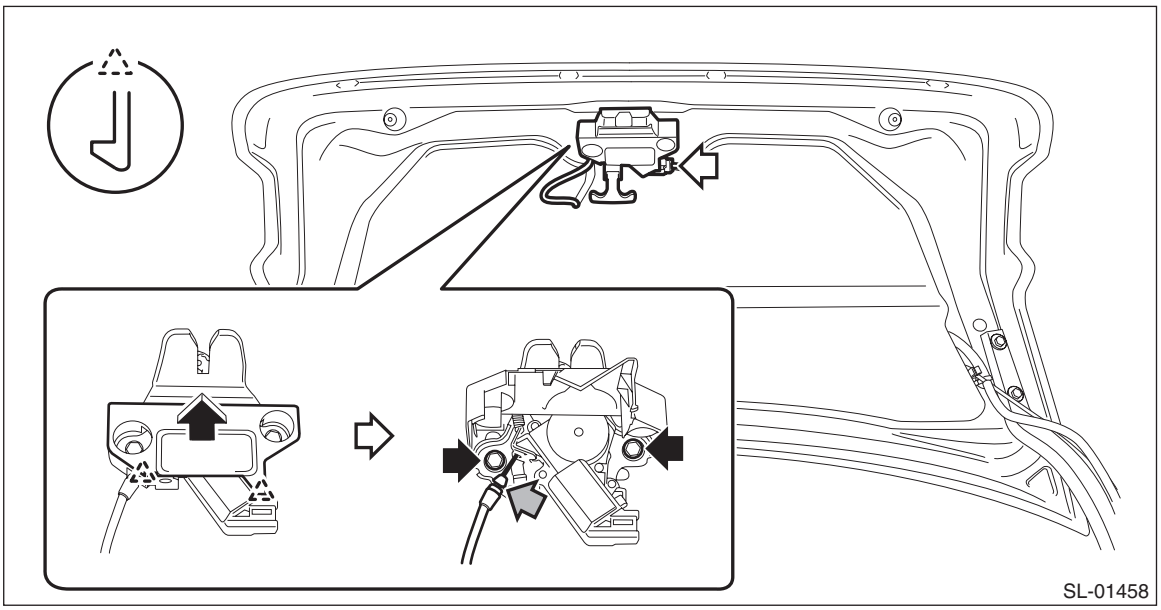
| Terminal No. | Inspection conditions | Specification | Connection diagram |
|---|---|---|---|
| 3 — 4 | OPEN | Less than 1.5 Ω |  SL-01478 |
| | CLOSE | 1 MΩ or more | |

3) If it does not operate properly as a result of inspection, replace the latch and actuator - rear gate.

# 14.Trunk Lid Latch and Actuator Assembly

## A: REMOVAL

1) Disconnect the ground cable from battery.
2) Remove the lock assembly - trunk lid.
   (1) Disconnect the connector.
   (2) Release the claws, and open the lock cover.
   (3) Remove the bolts, and disconnect the release cable, and then remove the lock assembly - trunk lid.



NOTE:
When disconnecting the release cable, refer to “TRUNK LID OPENER” of “Remote Openers”. <Ref. to SL-56, TRUNK LID OPENER, REMOVAL, Remote Openers.>

## B: INSTALLATION

1) Before installation, check the following items.
- Is the cable deformed?
- Grease is applied sufficiently to cable joints.

If grease is insufficient, add it as necessary before assembling the cable.
2) Install each part in the reverse order of removal.

***Tightening torque:***
***Refer to “COMPONENT” of “General Description”. <Ref. to SL-3, REAR GATE LOCK AND TRUNK LID LOCK, COMPONENT, General Description.>***

# C: INSPECTION

## 1. LATCH

Check if the latch operates normally.
If latch deformation, abnormal wear, or unsmooth lock operation is observed, replace the lock assembly - trunk lid.

## 2. ACTUATOR

### UNIT INSPECTION

***PREPARATION TOOL:***
***Circuit tester***

1) Check door lock operation
Check the door lock operation when battery voltage is applied between the terminals of actuator.

| Terminal No. | Inspection conditions | Specification | Connection diagram |
|---|---|---|---|
| 1 (+) — 2 (–) | Connect battery to the terminals | LOCK → UNLOCK |  SL-01517 |

2) CHECK SWITCH.
Check the resistance between actuator terminals.

| Terminal No. | Inspection conditions | Specification | Connection diagram |
|---|---|---|---|
| 2 — 3 | LOCK | 1 MΩ or more |  SL-01518 |
| | UNLOCK | Less than 1 Ω | |

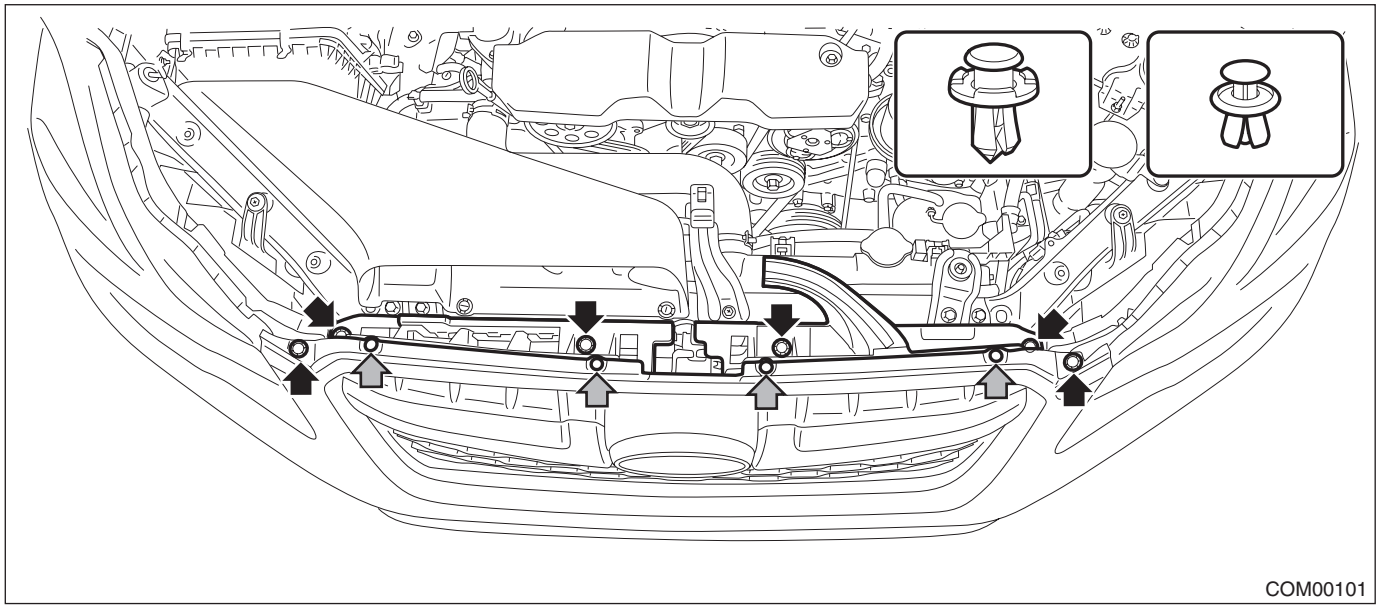
3) If it does not operate normally, replace the lock assembly - trunk lid.

# 15.Front Hood Lock Assembly

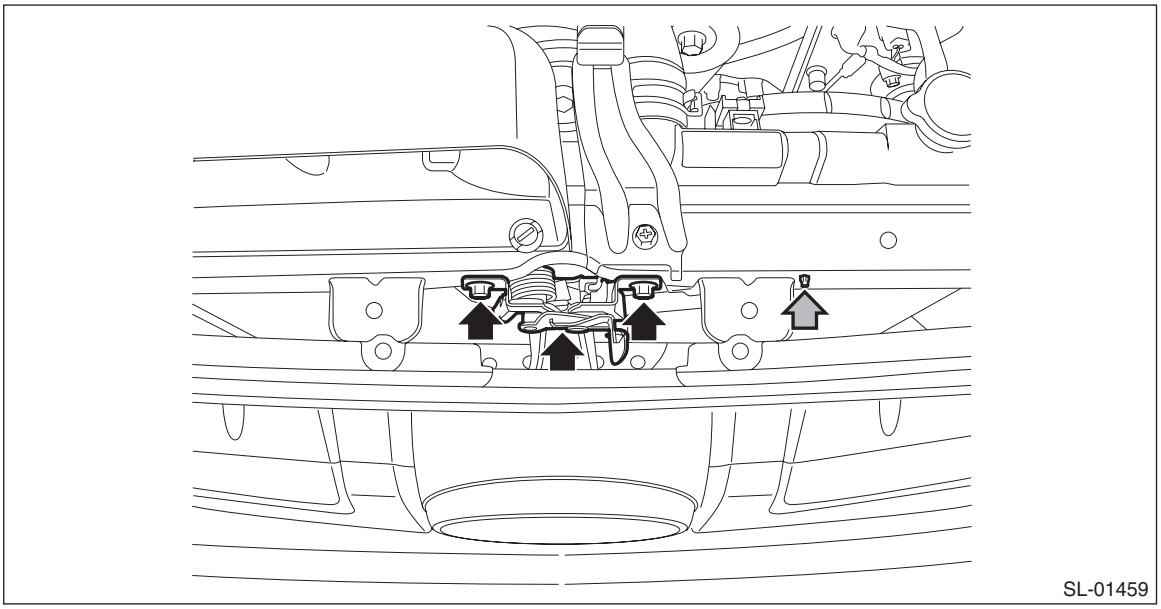
## A: REMOVAL

1) Open the front hood.
2) Remove the clip, and remove the bracket - grille.

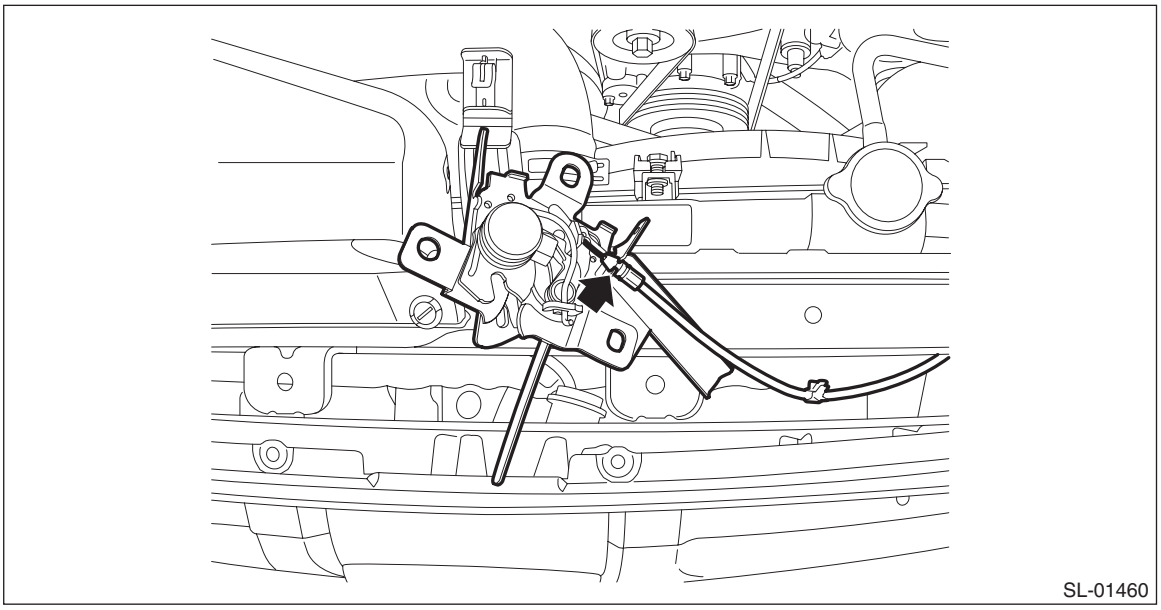
NOTE:
To prevent damage to the bracket - grille, make sure to remove all clips.



3) Remove the lock assembly - front hood.
   (1) Remove the bolt and clip.



(2) Disconnect the release cable, and detach the lock assembly - front hood.



NOTE:
When disconnecting the release cable, refer to “FRONT HOOD OPENER” of “Remote Openers”. <Ref. to SL-55, FRONT HOOD OPENER, REMOVAL, Remote Openers.>

## B: INSTALLATION

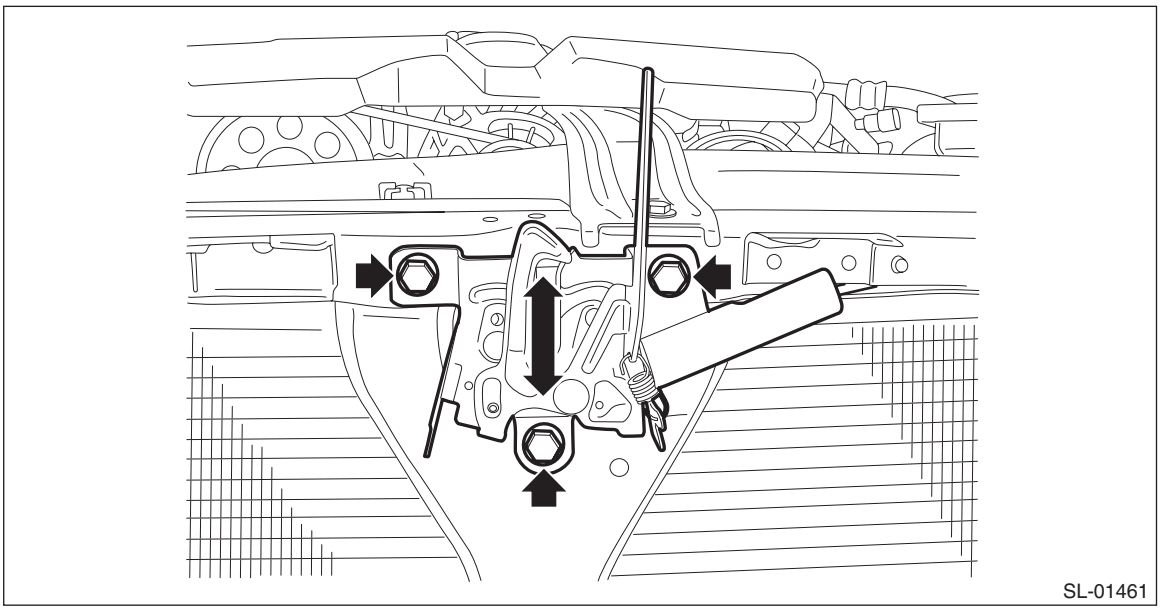
1) Before installation, check the following items.
- Is the cable deformed?
- Grease is applied sufficiently to cable joints.

If grease is insufficient, add it as necessary before assembling the cable.
2) Install each part in the reverse order of removal.

***Tightening torque:***
***Refer to “COMPONENT” of “General Description”. <Ref. to SL-4, FRONT HOOD LOCK, COMPONENT, General Description.>***

## C: ADJUSTMENT

1) Loosen the bolt, and adjust the lock assembly - front hood while moving it up and down.



2) After adjustment, tighten the bolts securely.

***Tightening torque:***
***Refer to "COMPONENT" of "General Description". <Ref. to SL-4, FRONT HOOD LOCK, COMPONENT, General Description.>***

## D: INSPECTION

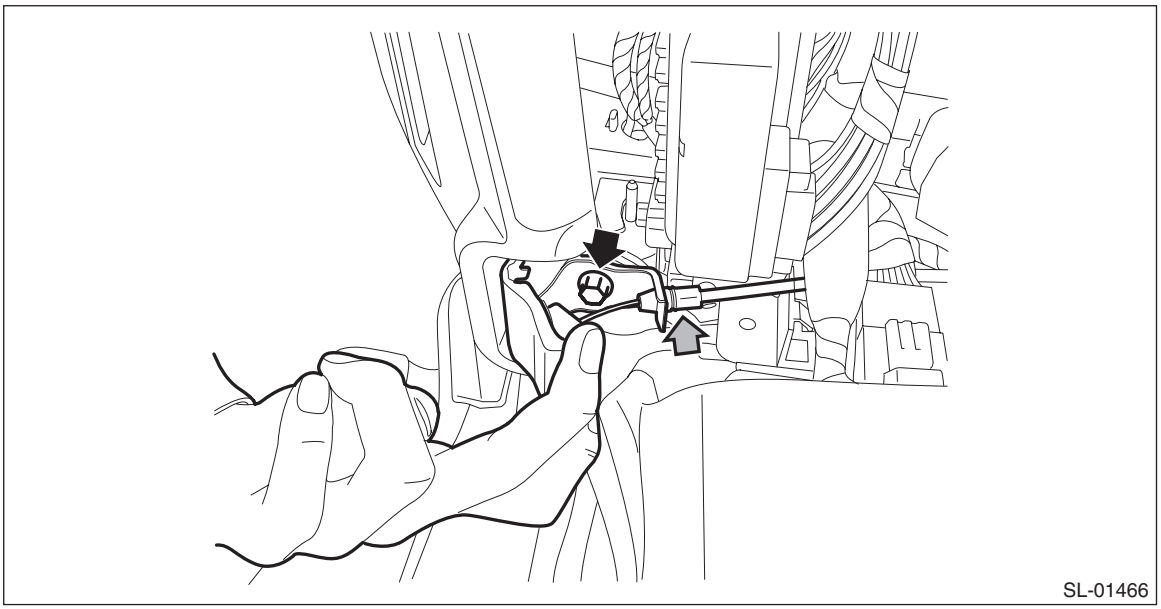
Check if the lock assembly operates normally.
If lever deformation, abnormal wear, or unsmooth lock operation is observed, replace the lock assembly - front hood.

# 16.Remote Openers

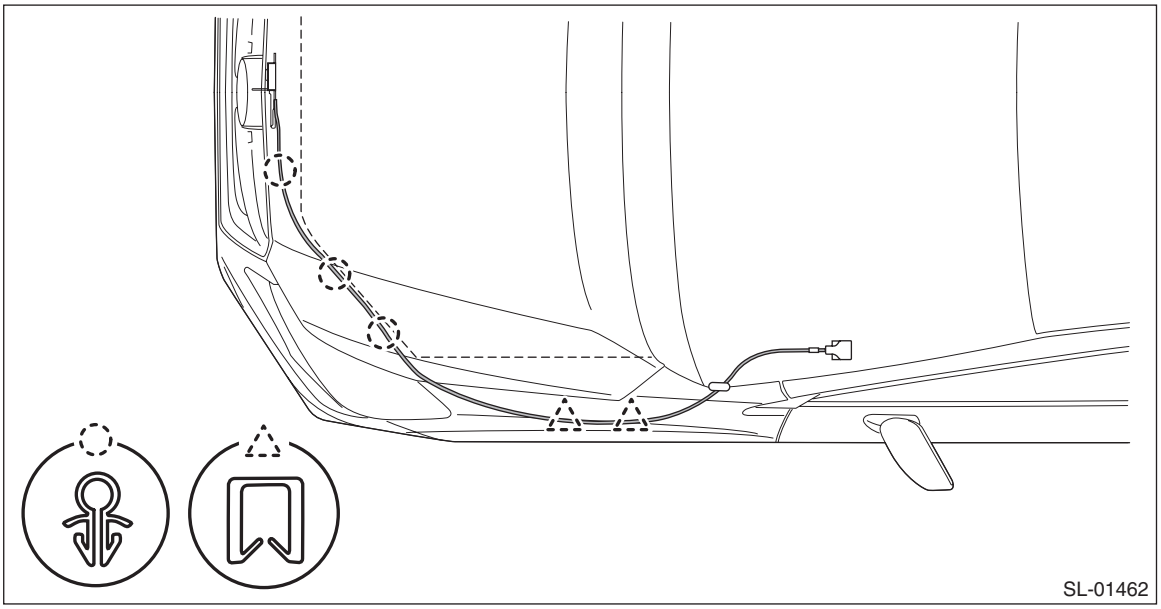
## A: REMOVAL

### 1. FRONT HOOD OPENER

1) Remove the opener handle.
   (1) Remove the cable.
   (2) Remove the bolt, and remove the opener handle.

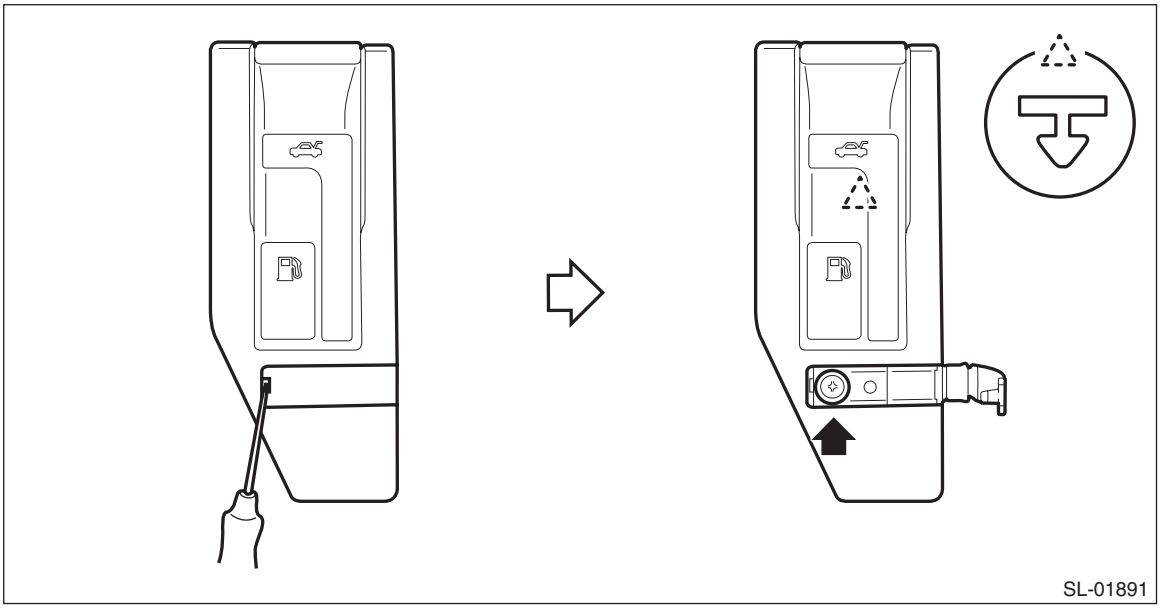


2) Remove the following parts and remove the cable clip and cable.
- Lock assembly - front hood: <Ref. to SL-52, REMOVAL, Front Hood Lock Assembly.>
- Cover assembly - instrument panel LWR driver: <Ref. to EI-65, REMOVAL, Instrument Panel Lower Cover.>

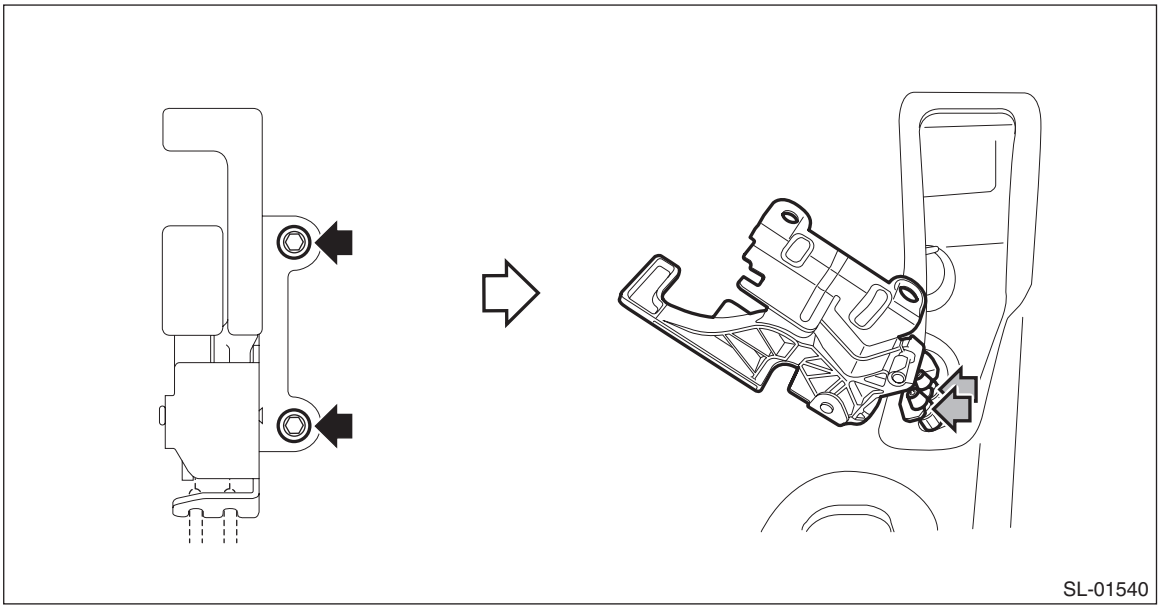


## 2. TRUNK LID OPENER

1) Remove the cover - handle.
   (1) Open the cover by using a flat tip screwdriver.
   (2) Remove the screws and detach the cover - handle.

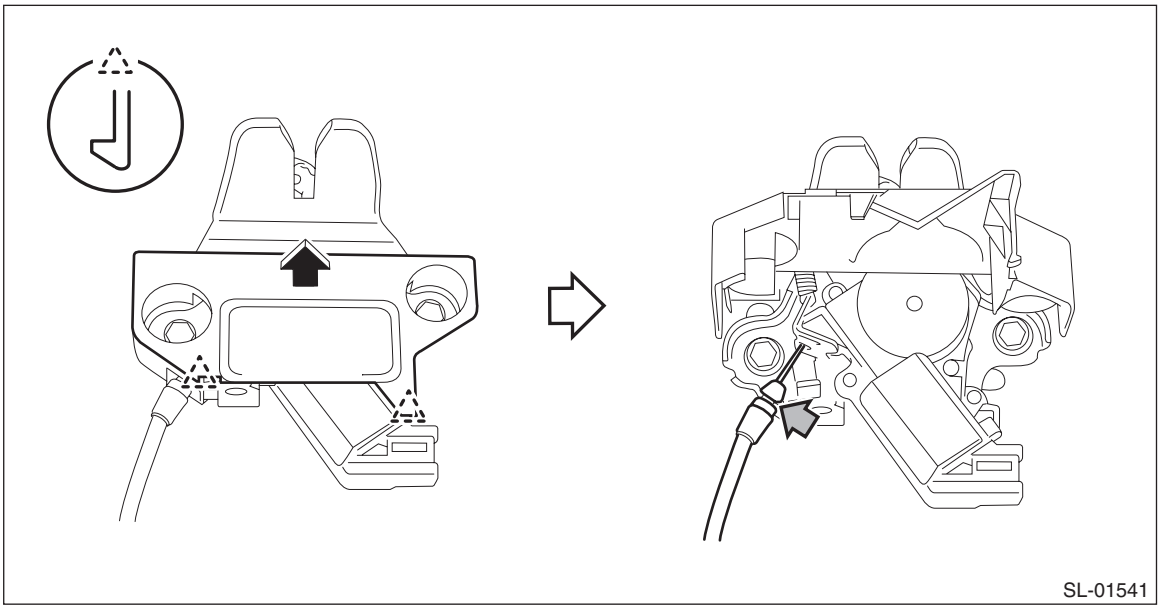


2) Remove the pull handle - opener.
   (1) Remove the nut.
   (2) Remove the cable from pull handle - opener.

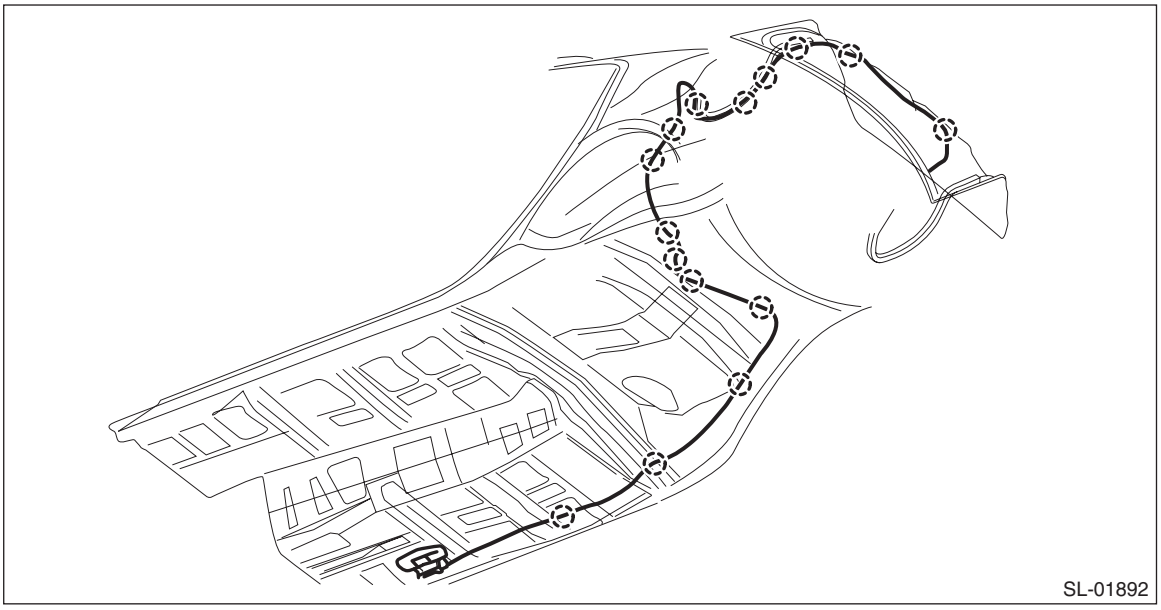


3) Remove the trim panel - trunk side RH. <Ref. to EI-117, TRUNK ROOM TRIM, REMOVAL, Trunk Room Trim.>
4) Remove the lower inner trim. <Ref. to EI-95, REMOVAL, Lower Inner Trim.>
5) Remove the trim panel - trunk lid. <Ref. to EI-117, TRUNK LID TRIM, REMOVAL, Trunk Room Trim.>

6) Disconnect the cable from the lock assembly - trunk lid.



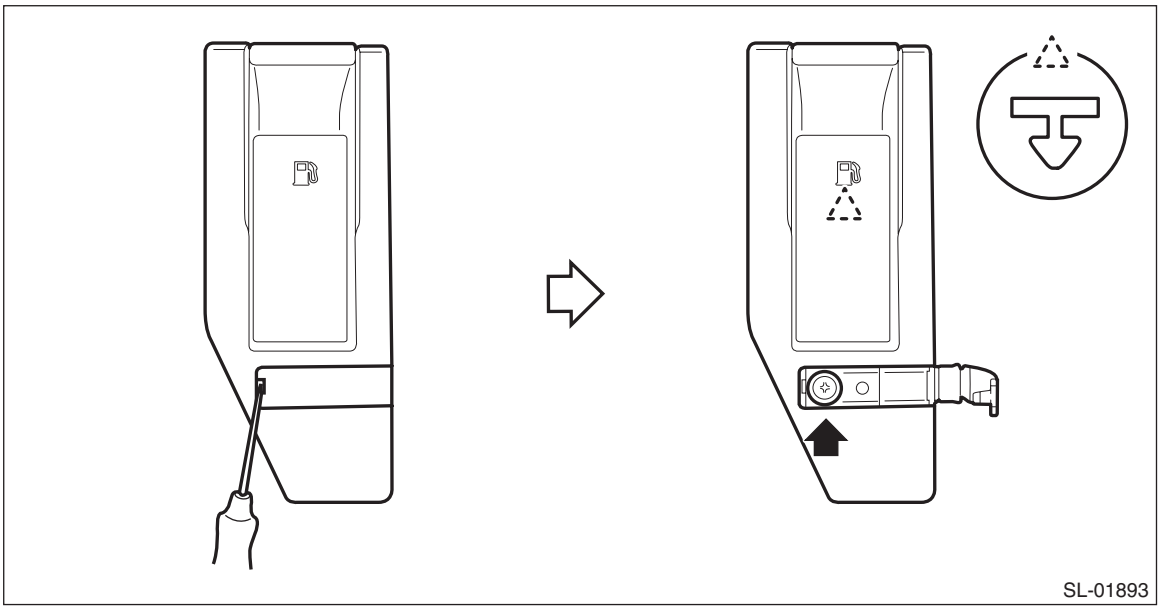
7) Remove the cable clip, and remove the cable.



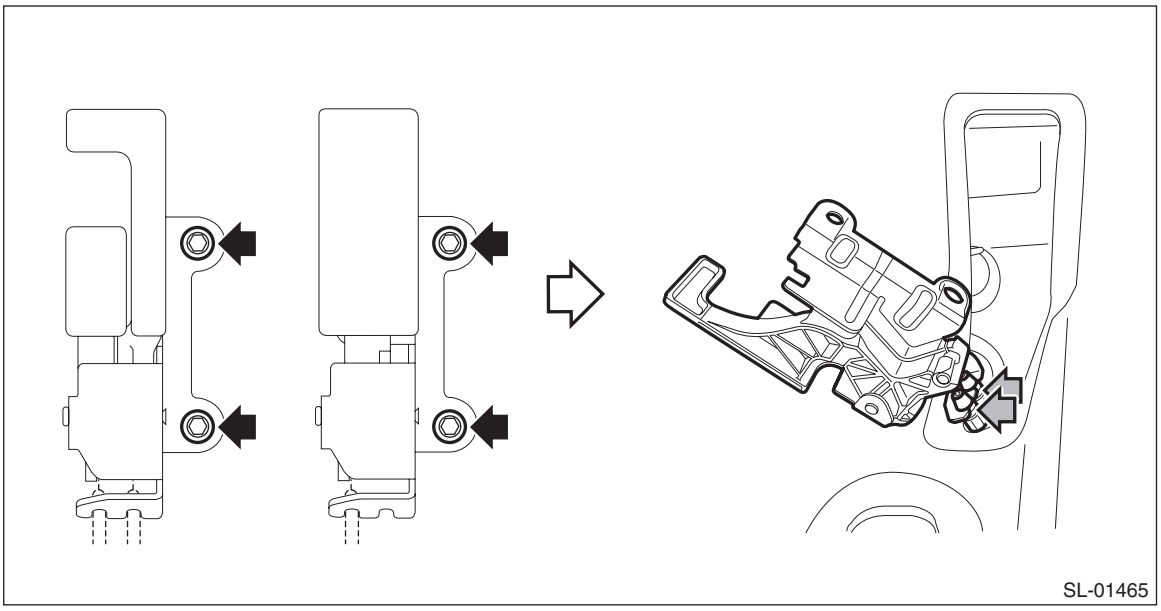
## 3. FUEL FLAP OPENER

1) Remove the cover - handle.
   (1) Open the cover by using a flat tip screwdriver.
   (2) Remove the screws and detach the cover - handle.
   - 4 door model

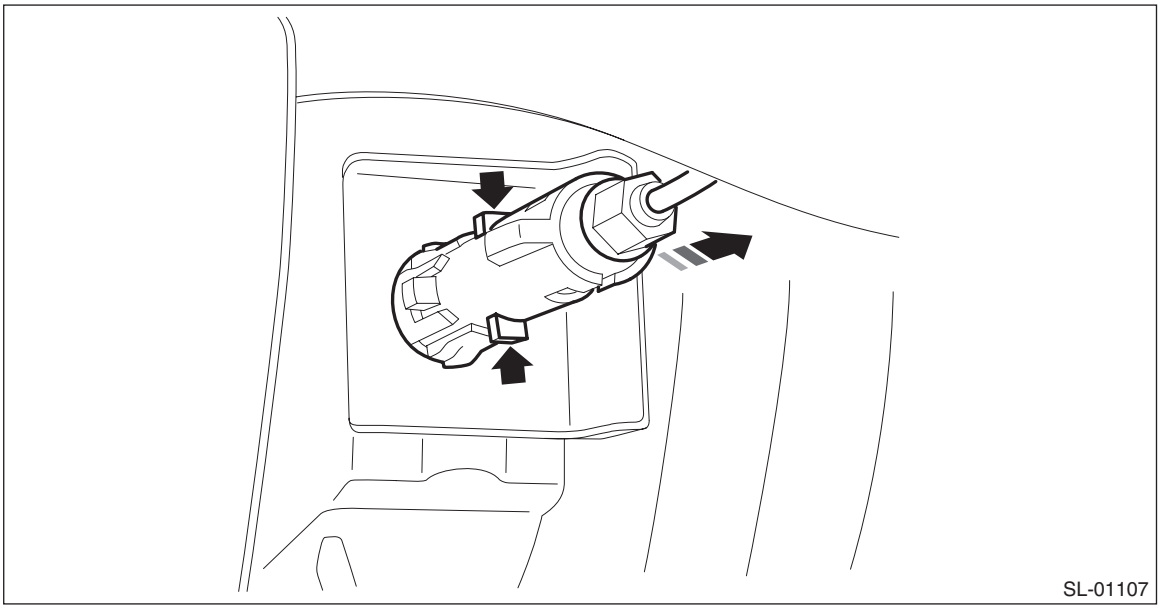
   - 5 door model/XV model



2) Remove the pull handle - opener.
(1) Remove the nut.
(2) Remove the cable from pull handle - opener.

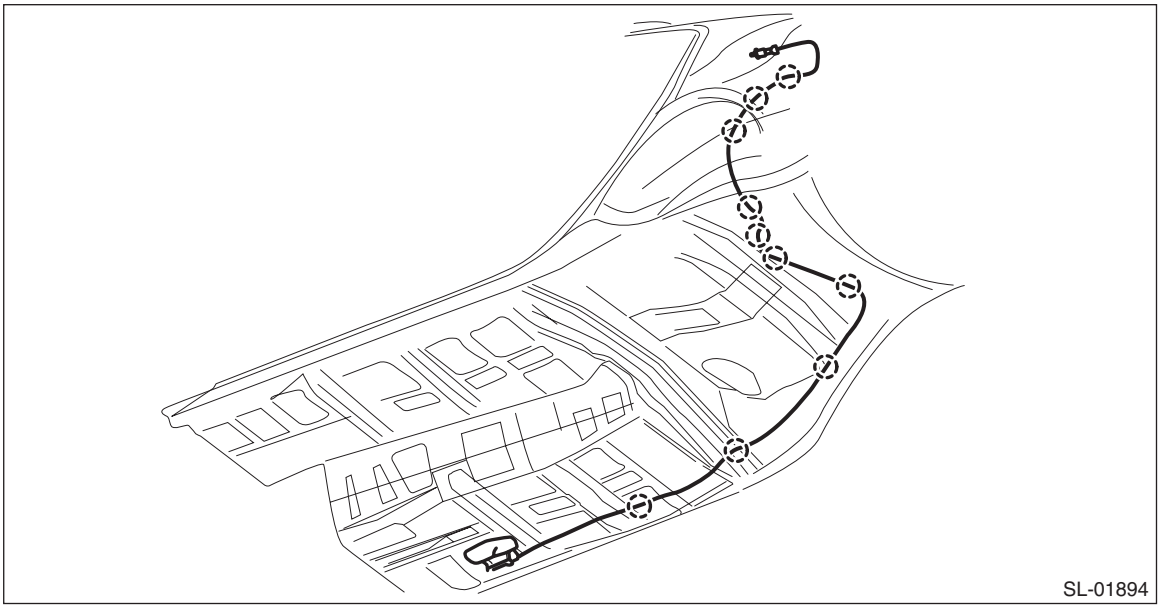


3) Remove the trim panel - trunk side RH. (4 door model) <Ref. to EI-117, TRUNK ROOM TRIM, REMOVAL, Trunk Room Trim.>
4) Remove the trim panel - rear apron RH. (5 door model/XV model) <Ref. to EI-108, 5 DOOR MODEL/XV MODEL, REMOVAL, Rear Quarter Trim.>
5) Remove the fuel lock inside the quarter panel.
(1) Press the claws of the fuel lock.
(2) While keeping the condition in step (1), pull the fuel lock to the rearward of the vehicle.

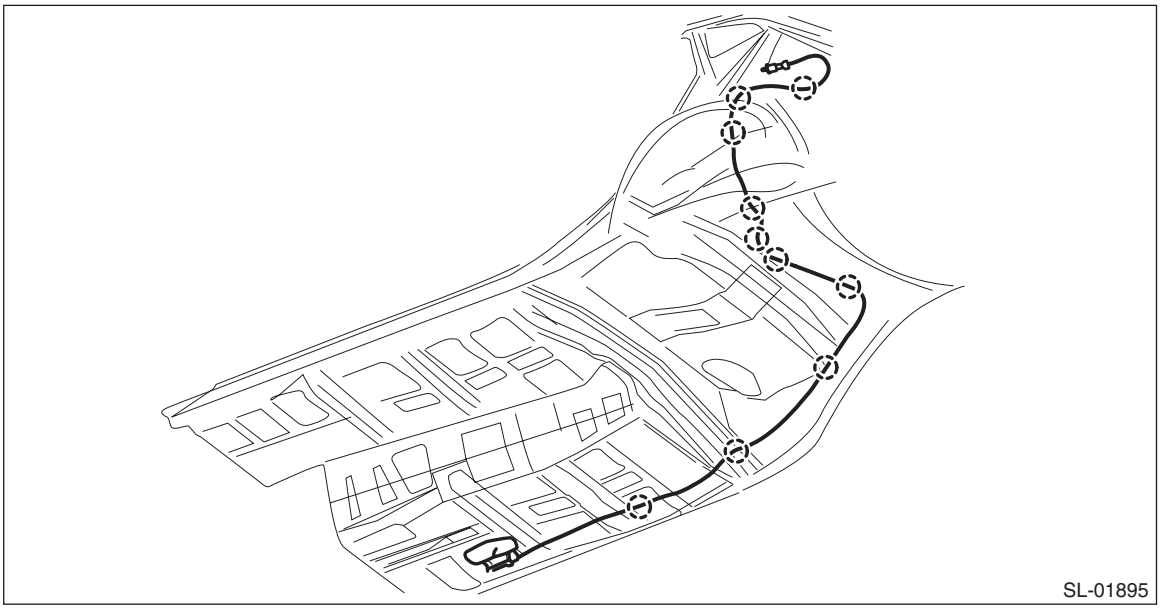


6) Remove the lower inner trim. <Ref. to EI-95, REMOVAL, Lower Inner Trim.>

7) Remove the cable clip, and remove the cable.
- 4 door model



- 5 door model/XV model



## B: INSTALLATION

1) Before installation, check the following items.
- Cable is free from deformation such as fray.

2) Install each part in the reverse order of removal.

***Tightening torque:***
***Front hood lock: <Ref. to SL-4, FRONT HOOD LOCK, COMPONENT, General Description.>***
***Remote opener: <Ref. to SL-5, REMOTE OPENER, COMPONENT, General Description.>***

## C: INSPECTION

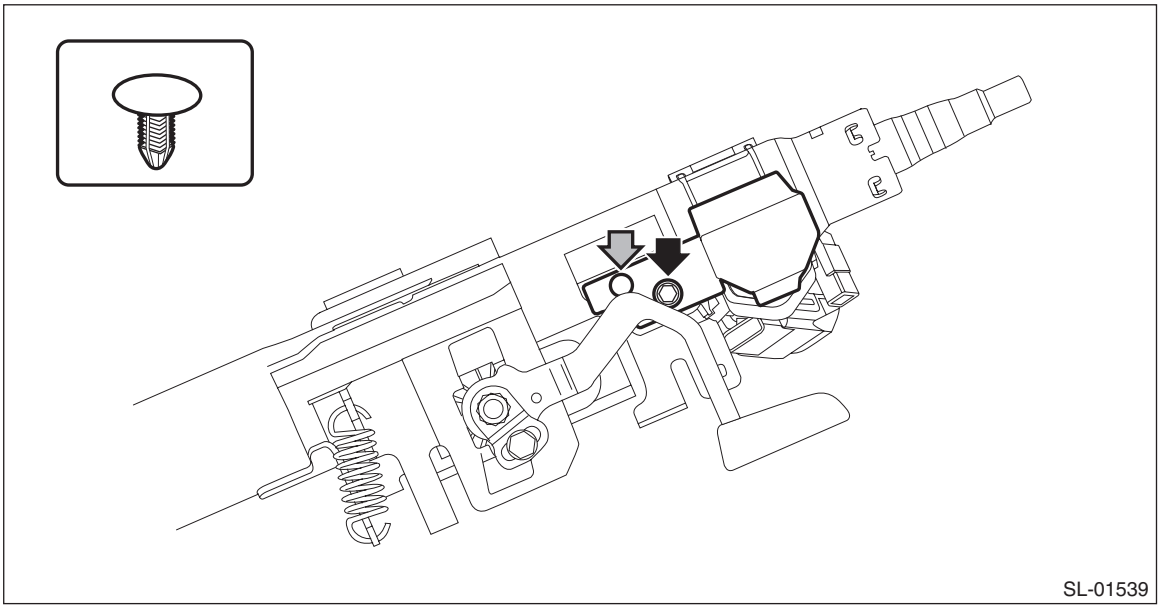
Check if the front hood and fuel flap operate normally.

# 17.Ignition Key Lock

## A: REPLACEMENT

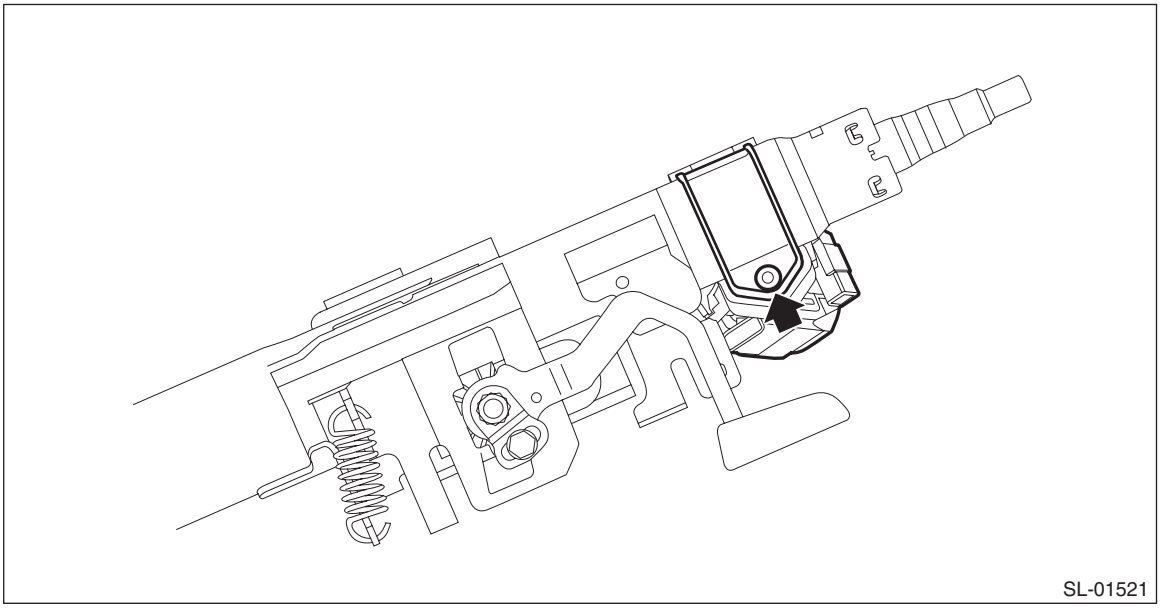
**CAUTION:**
**• Before handling the airbag module, refer to "CAUTION" of "General Description" in "AIRBAG SYSTEM". <Ref. to AB-11, CAUTION, General Description.>**
**• If the steering wheel and steering angle sensor (steering roll connector) are removed, perform "VDC sensor midpoint setting mode" of the VDC. <Ref. to VDC-19, VDC SENSOR MIDPOINT SETTING MODE, ADJUSTMENT, VDC Control Module and Hydraulic Control Unit (VDCCM&H/U).>**

1) Disconnect the ground cable from battery.
2) Remove the column assembly - steering. <Ref. to PS-18, REMOVAL, Steering Column.>
3) Remove the ignition key lock.
   (1) Secure the column assembly - steering in a vise.
   (2) Remove the bolts and clips, and remove the dynamic damper.



SL-01539

   (3) Use the reverse tap or drill to remove the set bolt and remove the ignition key lock.



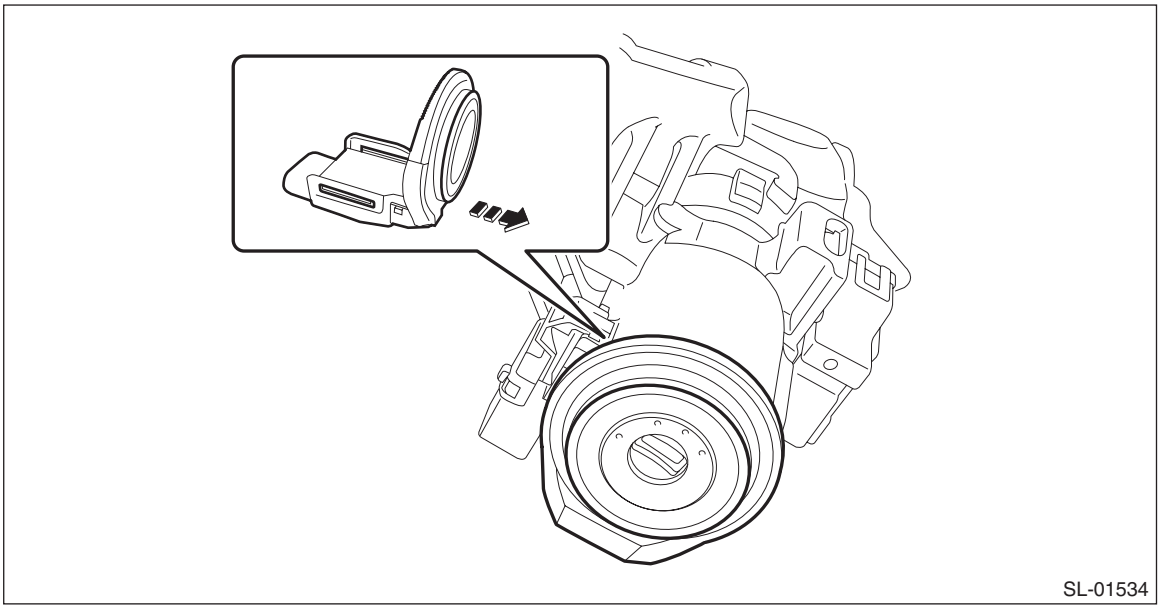
SL-01521

4) Install the ignition key lock.
   (1) Secure the ignition key lock to the column assembly - steering.
   (2) Use new set bolts. Tighten the bolt until the bolt head is broken (bolt head wrenched off).

## B: DISASSEMBLY

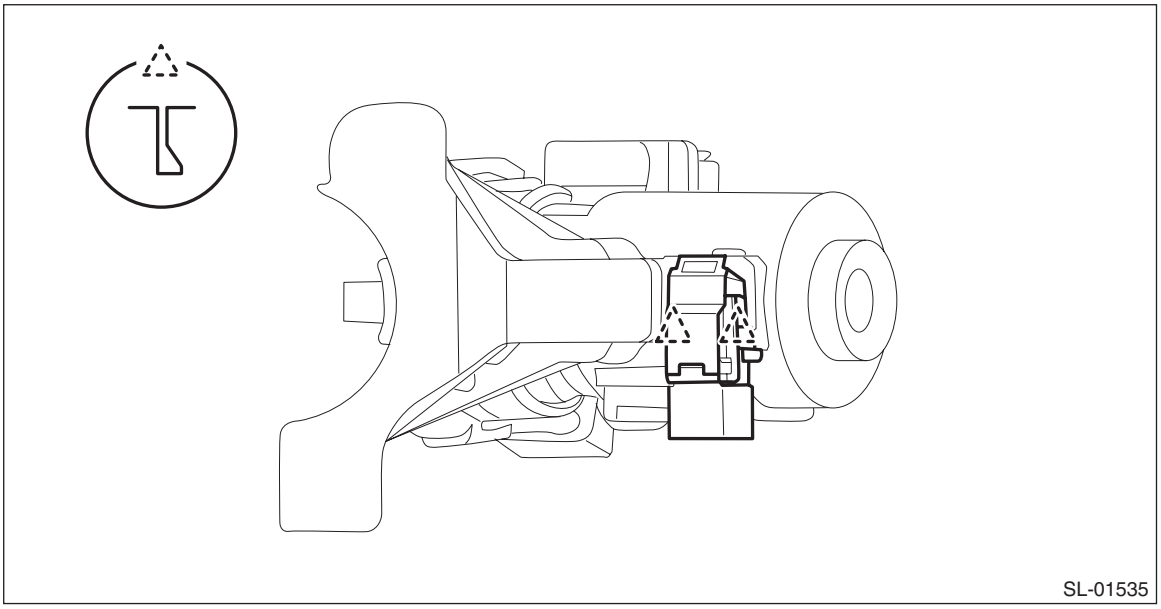
1) Remove the immobilizer antenna assembly.

**CAUTION:**
**Do not apply excessive force to remove the immobilizer antenna and lock. Otherwise they may be broken because those parts are the products made of a plastic.**



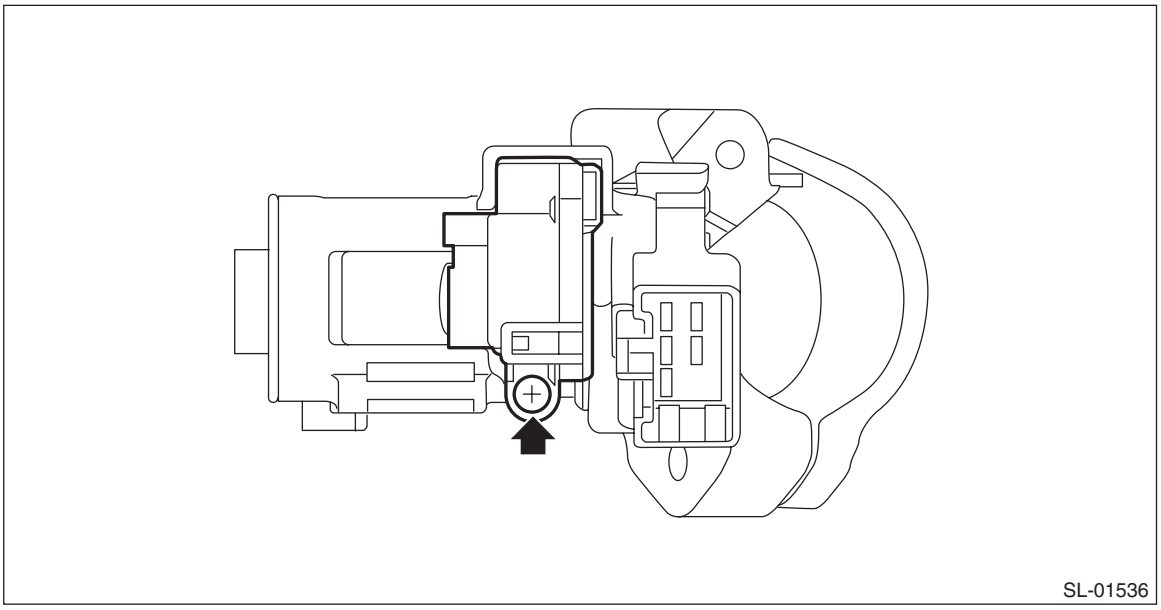
SL-01534

2) Release the claws, and pull the key warning switch downwards to remove.

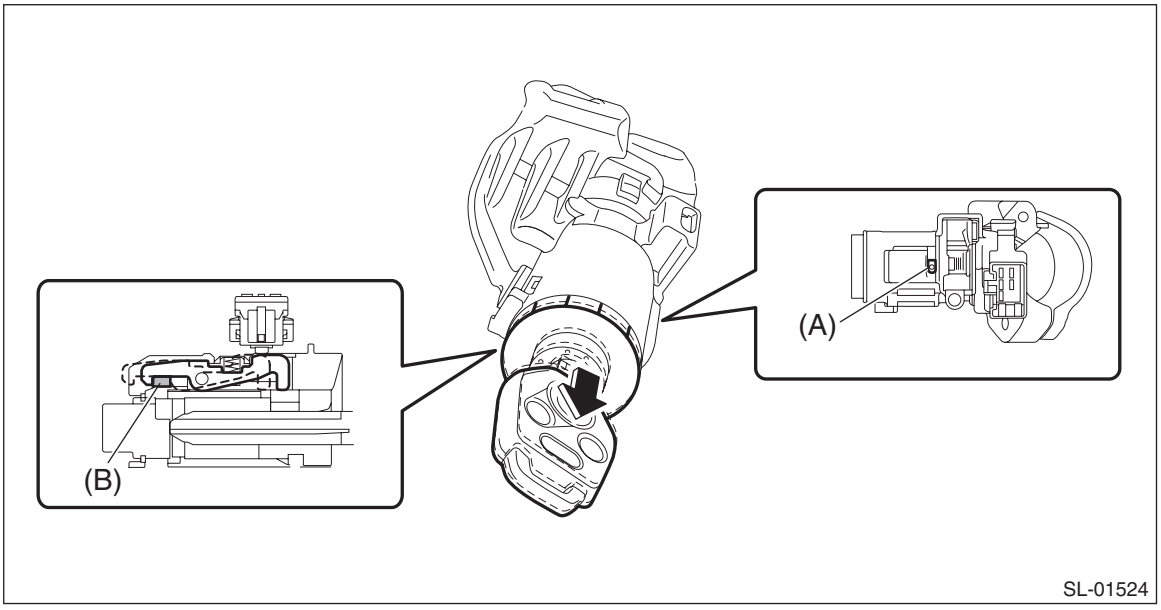


SL-01535

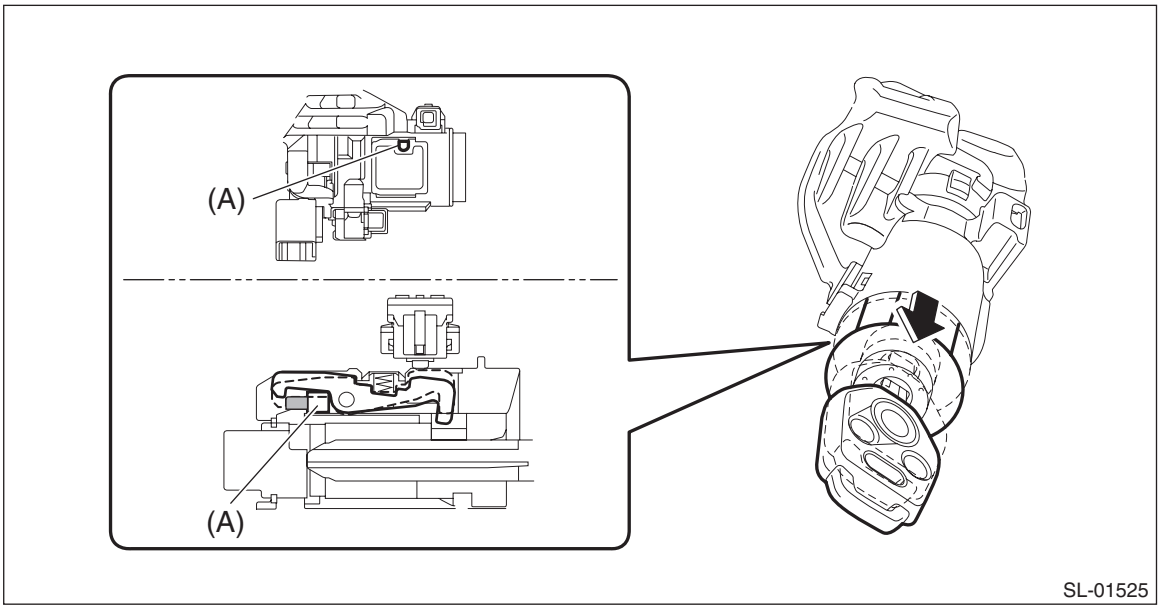
3) Remove the screws and remove the key lock solenoid.



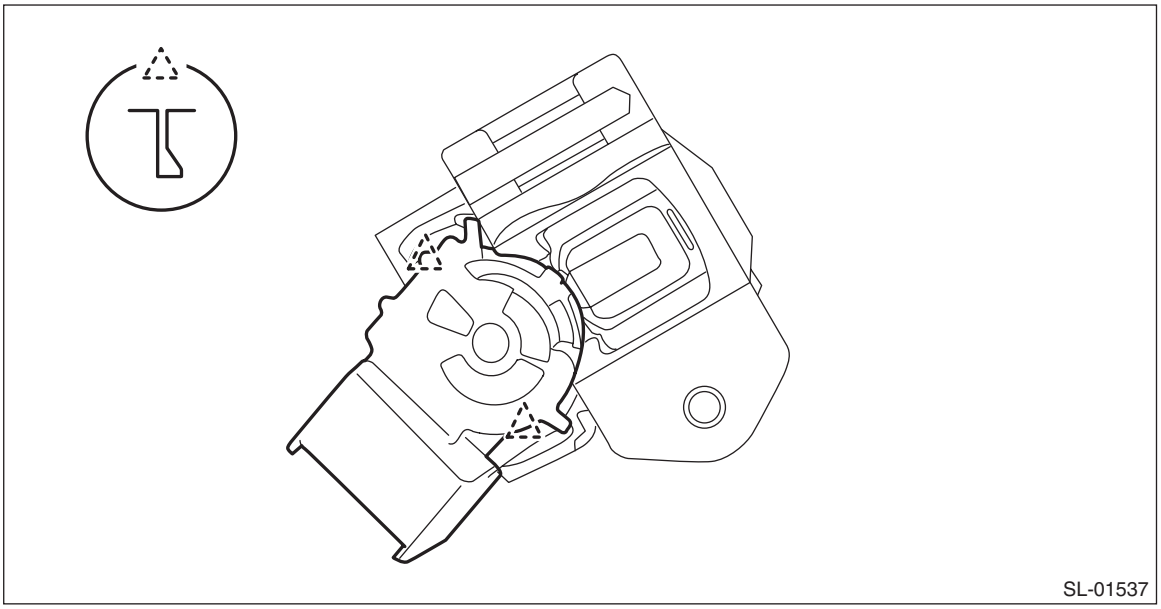
4) Replace the key cylinder.
(1) Insert the key into the key cylinder, and turn the key to the ACC position.
(2) Insert a flat tip screwdriver from the steering lock frame hole (A), and pull the key cylinder until the key cylinder claws touch the steering lock frame stopper (B).



(3) Insert a flat tip screwdriver from the steering lock frame hole (A), and release the claws to pull out the key cylinder.



5) Release the claws and remove the ignition switch assembly.

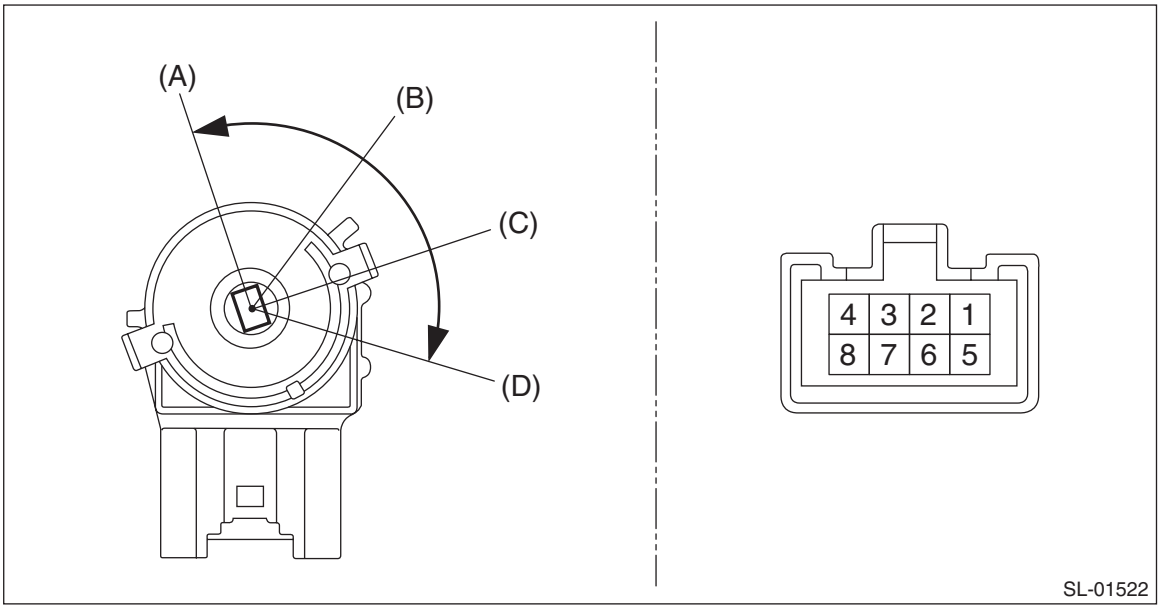


# C: INSPECTION

## UNIT INSPECTION

***PREPARATION TOOL:***
***Circuit tester***

1) Check the resistance between switch terminals.



| Terminal No. | Inspection conditions | | Standard |
|---|---|---|---|
| Between all terminals | (A) | LOCK | 1 MΩ or more |
| 2 — 4 | (B) | ACC | Less than 1 Ω |
| 1 — 2 — 4<br>5 — 6 | (C) | ON | Less than 1 Ω |
| 1 — 3 — 4<br>5 — 6 — 7 | (D) | ST | Less than 1 Ω |

2) Replace the ignition switch assembly if the inspection result is not within the standard.

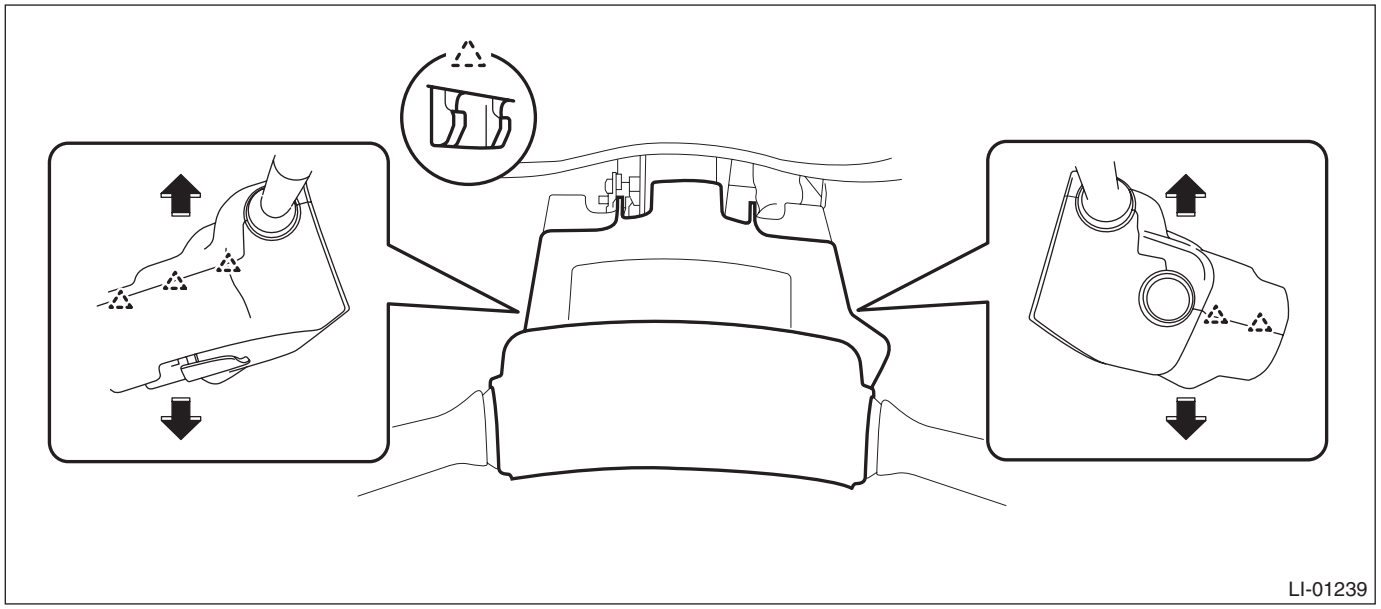
# 18.Key Lock Cylinders

## A: REPLACEMENT

### 1. STEERING LOCK

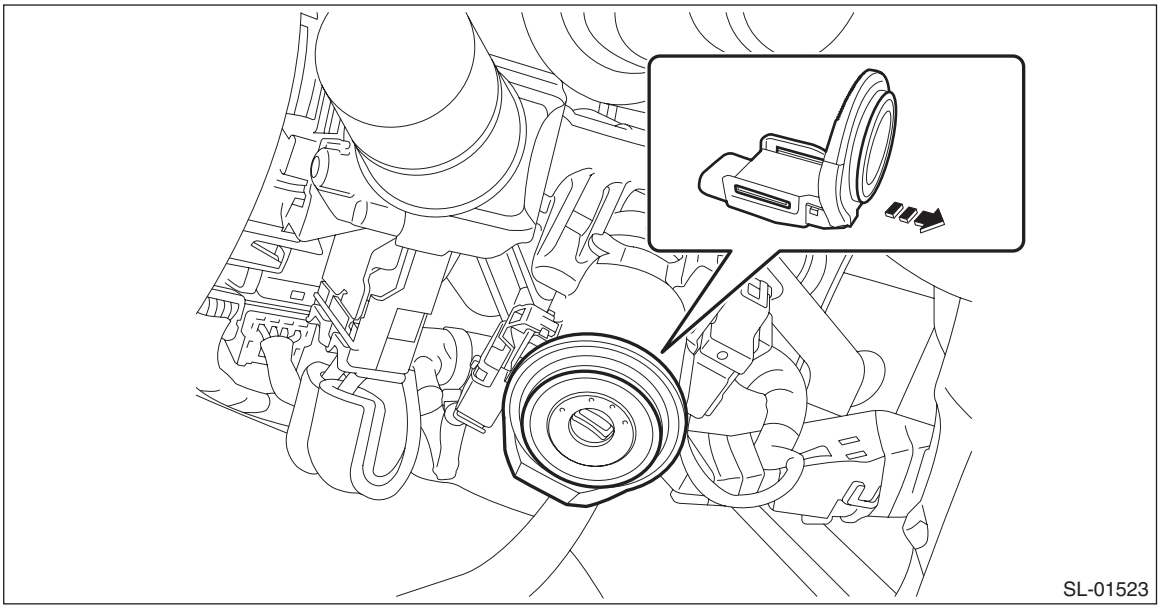
1) Disconnect the ground cable from battery.
2) Remove the cover assembly - column.
   (1) Remove the screws by turning the steering wheel to right and left.

   (2) Release the claw, and remove the cover assembly - column UPR and the cover assembly - column LWR.



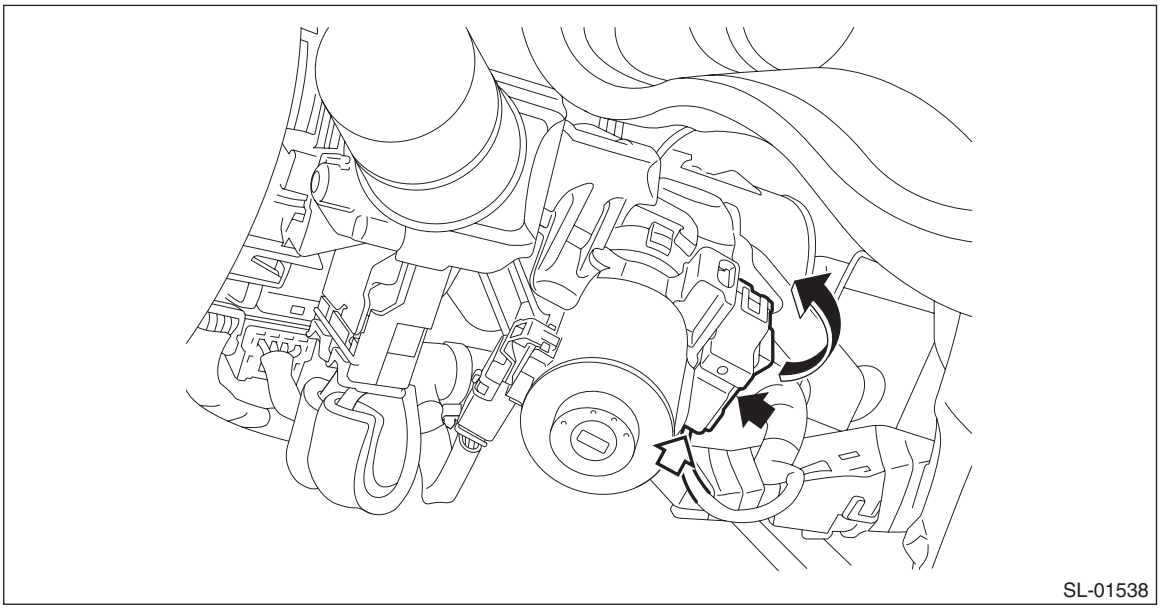
3) Disconnect the connector and remove the immobilizer antenna assembly.

**CAUTION:**
**Do not apply excessive force to remove the immobilizer antenna and lock. Otherwise they may be broken because those parts are the products made of a plastic.**



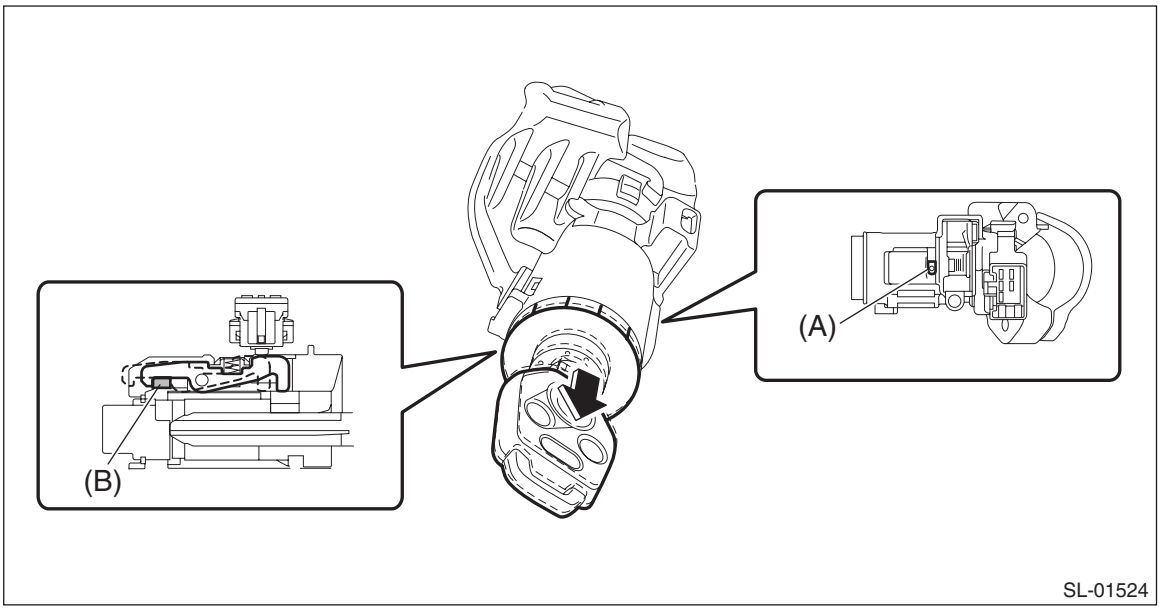
SL-01523

4) Remove the key lock solenoid.
(1) Disconnect the connector.
(2) Remove the screws and remove the key lock solenoid.

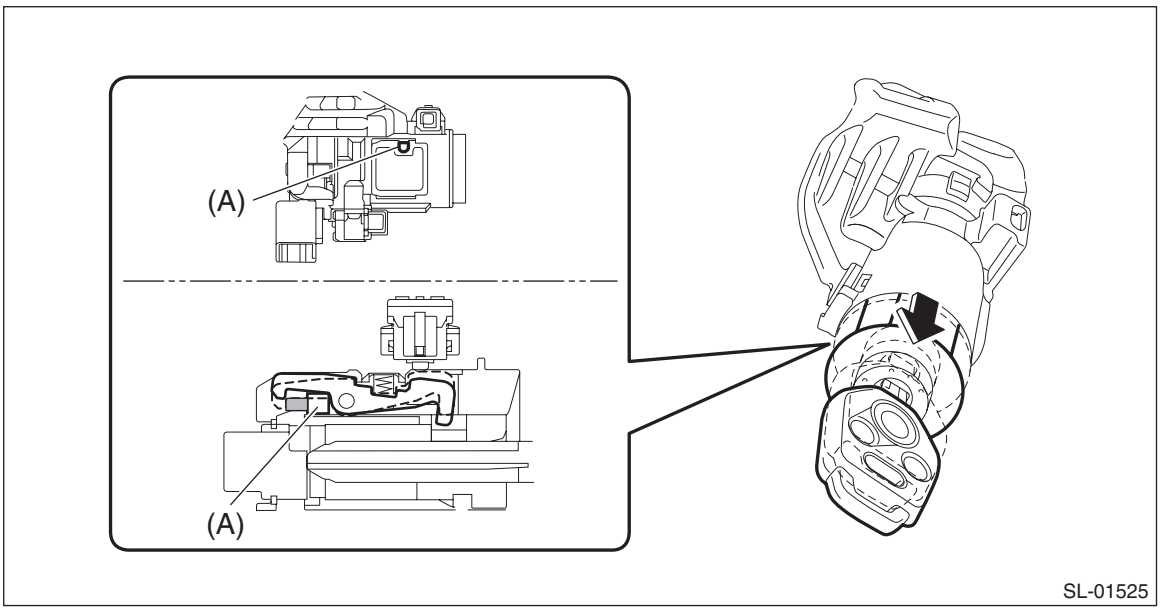


SL-01538

5) Replace the key cylinder.
(1) Insert the key into the key cylinder, and turn the key to the ACC position.
(2) Insert a flat tip screwdriver from the steering lock frame hole (A), and pull the key cylinder until the key cylinder claws touch the steering lock frame stopper (B).



(3) Insert a flat tip screwdriver from the steering lock frame hole (A), and release the claws to pull out the key cylinder.



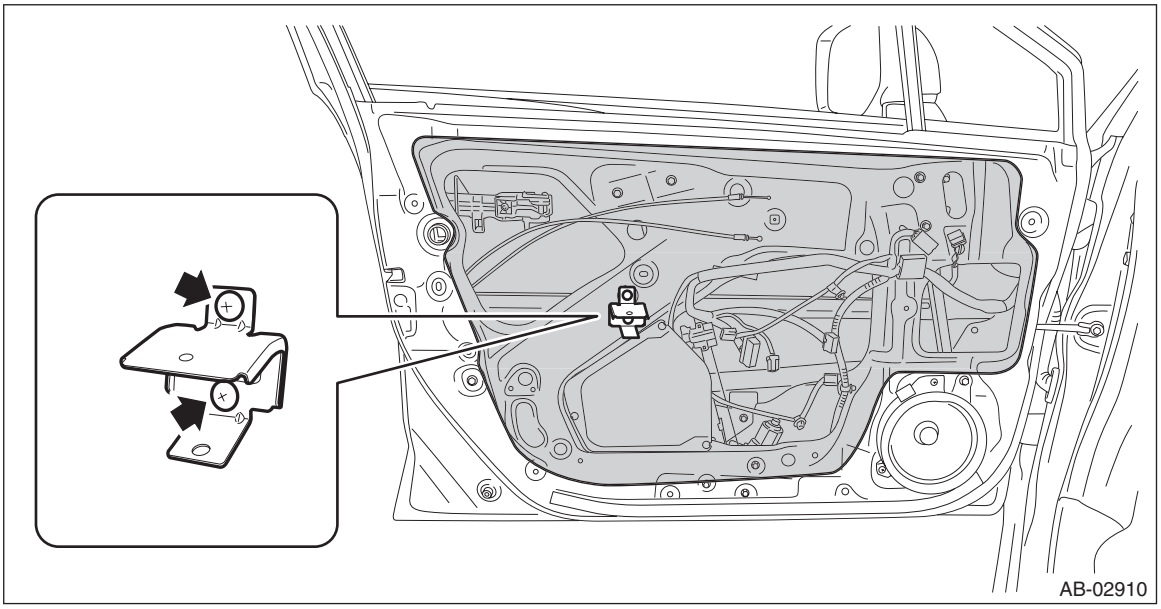
6) Install each part in the reverse order of removal.

## 2. FRONT DOOR

1) Raise the glass assembly - front door to the top position.
2) Remove the trim panel - front door. <Ref. to EI-61, FRONT DOOR, REMOVAL, Door Trim.>
3) Remove the sealing cover - front door.

**CAUTION:**
- **Carefully remove the butyl tape. Excessive force will easily break the sealing cover - front door.**
- **If the sealing cover - front door gets broken, replace it with a new part.**

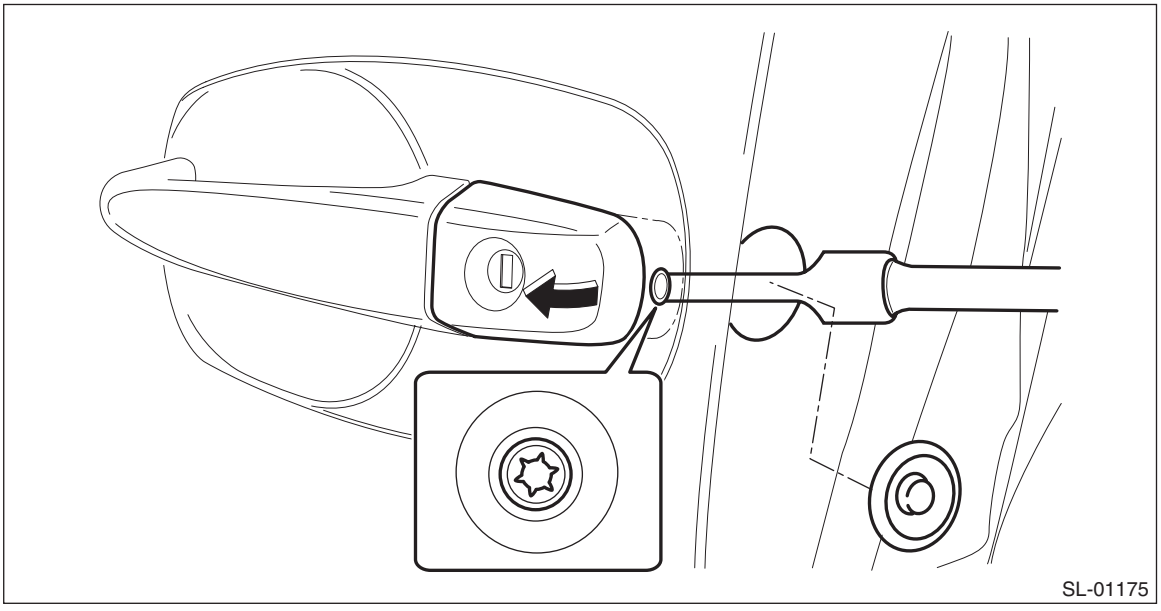
(1) Remove the screw to remove the bracket - door trim front.
(2) Disconnect connectors.
(3) Carefully remove the butyl tape to remove the sealing cover - front door.



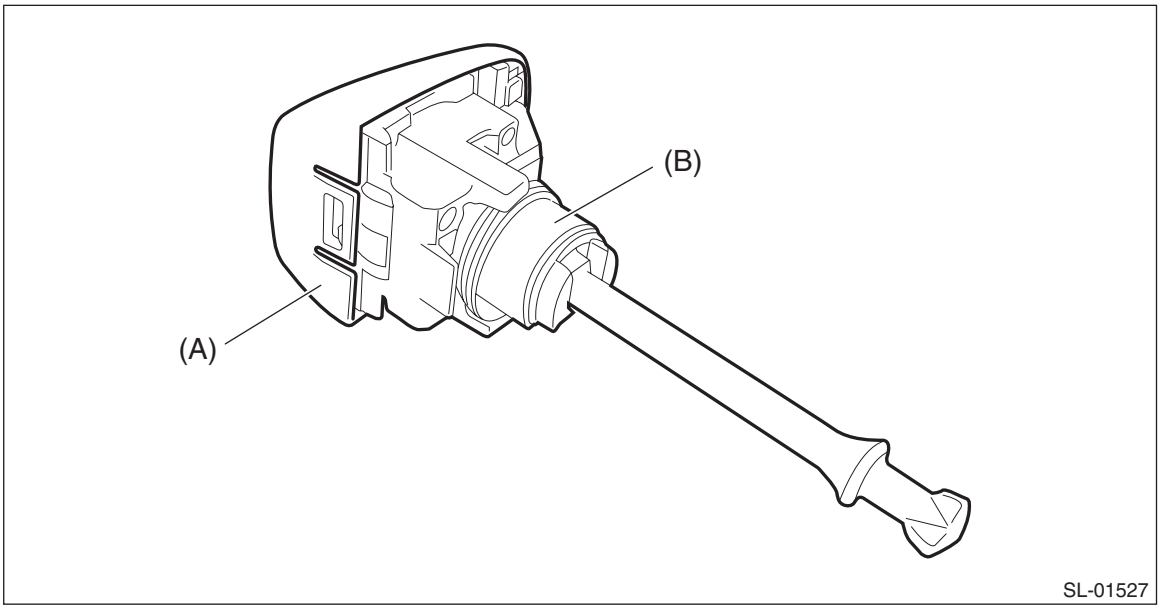
4) Remove the cover - handle front outer.

***PREPARATION TOOL:***
***TORX® T30***

(1) Remove the plug at the rear end of the panel assembly - front door.
(2) Loosen the TORX® bolt and remove the cover - handle front outer.



5) Remove the key cylinder (B) from the cover - handle front outer (A), and replace the key cylinder.

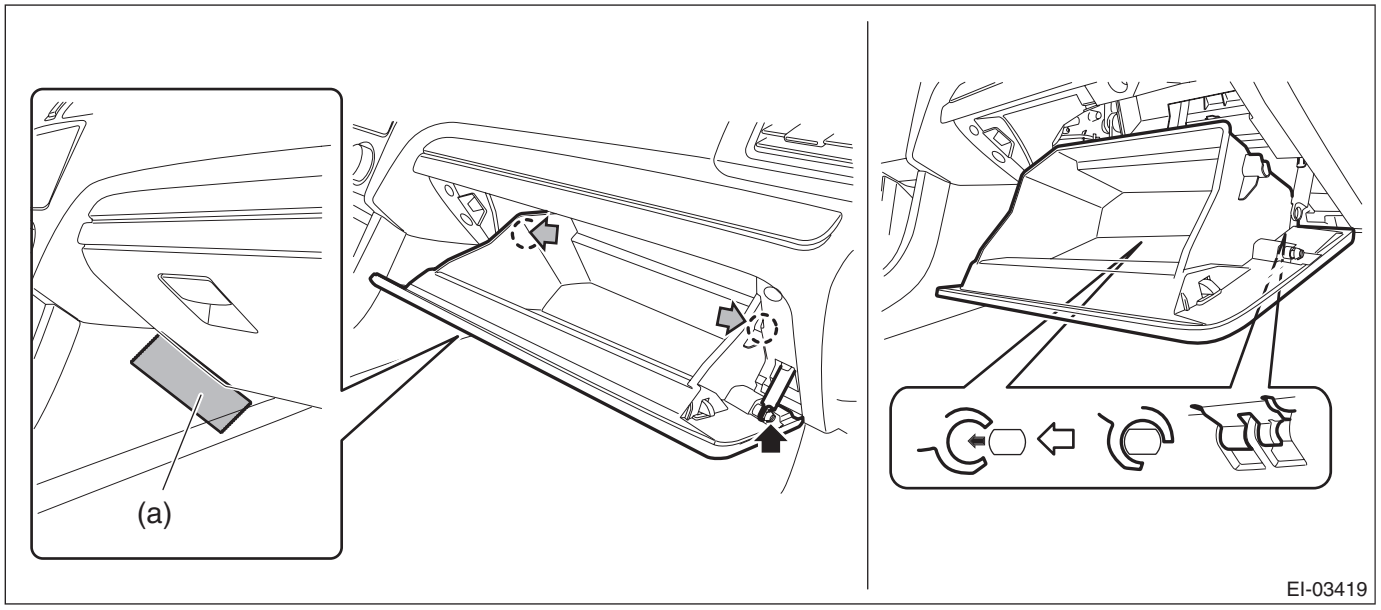


6) Install each part in the reverse order of removal.

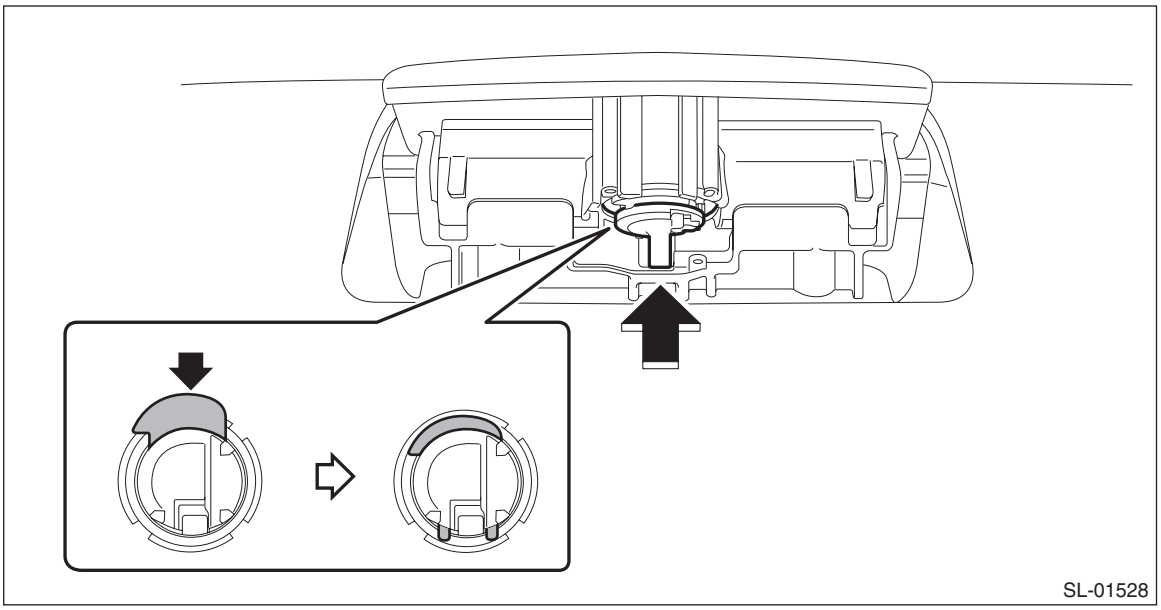
***Tightening torque:***
***Refer to "COMPONENT" of "General Description". <Ref. to SL-2, DOOR LOCK ASSEMBLY, COMPONENT, General Description.>***

## 3. GLOVE BOX LID

1) Remove the pocket assembly.
   (1) Attach the protective tape (a) to the panel center LWR.
   (2) Remove the damper COMPL - pocket.
   (3) Release the stoppers and remove the pocket assembly by pulling it toward you.



2) Replace the key cylinder.
   (1) Pull up the lock knob.
   (2) Push out the key cylinder from the pocket assembly while pressing in the metal plate.

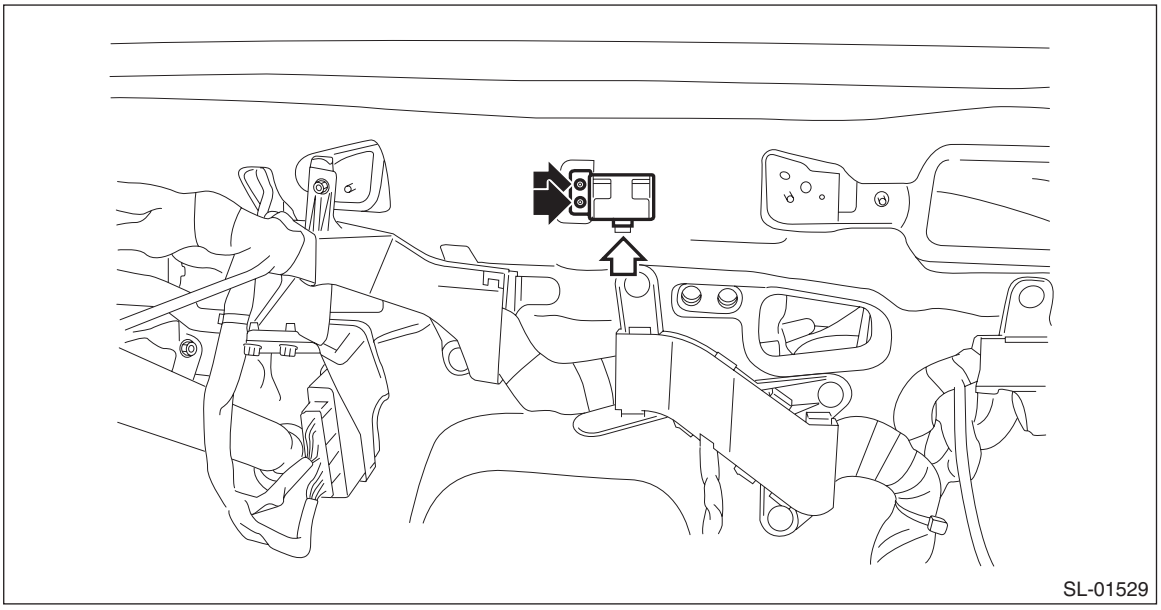


3) Install each part in the reverse order of removal.

# 19.Security Control Module

## A: REMOVAL

1) Remove the heater and cooling unit assembly. <Ref. to AC-59, REMOVAL, Heater and Cooling Unit.>
2) Remove the security control module.
   (1) Disconnect the connector.
   (2) Remove the nuts, and remove the security control module.



## B: INSTALLATION

Install each part in the reverse order of removal.

NOTE:
Refer to “INSTALLATION” of “Heater and Cooling Unit”. <Ref. to AC-62, INSTALLATION, Heater and Cooling Unit.>

***Tightening torque:***
***Security control module: 7.5 N·m (0.76 kgf-m, 5.5 ft-lb)***

# 20.Impact Sensor

## A: REMOVAL

1) Remove the key from ignition switch.
2) Close all the doors and rear gate.
3) Press the UNLOCK button of the keyless transmitter.
4) Disconnect the ground cable from battery.
5) Remove the impact sensor.
6) Change the impact sensor setting using the Subaru Select Monitor.

## B: INSTALLATION

1) Remove the key from ignition switch.
2) Close all the doors and rear gate.
3) Press the UNLOCK button of the keyless transmitter.
4) Disconnect the ground cable from battery.
5) Install the impact sensor.
6) Change the impact sensor setting using the Subaru Select Monitor.

## C: OPERATION

### 1. IMPACT SENSOR SETTING USING SUBARU SELECT MONITOR

1) Prepare the Subaru Select Monitor kit.
2) Turn the ignition switch to ON (engine OFF) and run the “PC application for Subaru Select Monitor”.
3) On «System Selection Menu» display, select {Integ. unit mode}.
4) Select {Unit customizing} from {Work Support}.
5) Make a impact monitor setting.
- When installing: ON
- When removing: OFF

6) Make a impact monitor ON/OFF setting.
- When installing: ON
- When removing: OFF

7) Turn the ignition switch to OFF, and then remove the Subaru Select Monitor.

## D: ADJUSTMENT

### 1. CHECK IMPACT SENSOR

1) Remove the key from ignition switch.
2) Close all the windows.
3) Close all the doors and rear gate. Leave open the front hood.
4) Press the LOCK button of the keyless transmitter from outside of vehicle.
5) Check that the security indicator light blinks twice within 0.5 seconds in 2 second cycles after 30 seconds.
6) Hit all windows with the palm with force repeatedly, to check for whether the security alarm operates. Lift up the front hood approx. 12 cm (4.7 in) or more, and then drop it off to check the operation of security alarm.
7) If NG, adjust the impact sensitivity.

## 2. IMPACT SENSITIVITY ADJUSTMENT

1) Prepare the Subaru Select Monitor kit.
2) Turn the ignition switch to ON (engine OFF) and run the “PC application for Subaru Select Monitor”.
3) On the «System Selection Menu», select the {Impact Sensor}.
4) Make a {Sensitivity Adjustment Mode}.
- Sensitivity can be adjusted in 11 levels (0 to 10).
- Initial setting is 5.
- Smaller number means more sensitive.
- Larger number means less sensitive.

5) Turn the ignition switch to OFF, and then remove the Subaru Select Monitor.

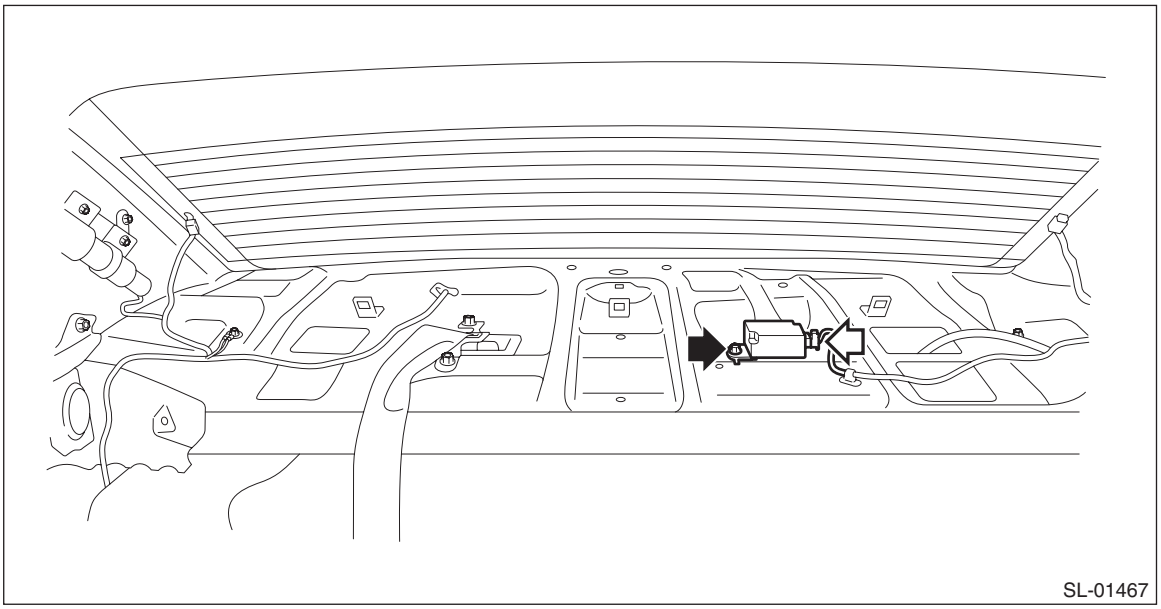
NOTE:
- Set the sensor so that it is not triggered by normal vibrations (someone reclining on the door, hit by a ball, etc.).
- Set the sensor to operate the alarm when the windshield glass or door is hit hard repeatedly, etc, where it can be assumed that there is an attempt to damage the car by a burglar, etc.
- Even if there is no burglary attempt, if there is vibration (road construction, elevated parking lots, passage of trains or boarding of ferries), the alarm can be triggered. Because of this, ask the customer about their parking conditions, and set an appropriate sensitivity level after discussion.
- If the sensitivity setting was not performed properly, a buzzer will sound four times. In this case, check that there is no error in CAN communication.

# 21.Keyless Entry Control Module

## A: REMOVAL

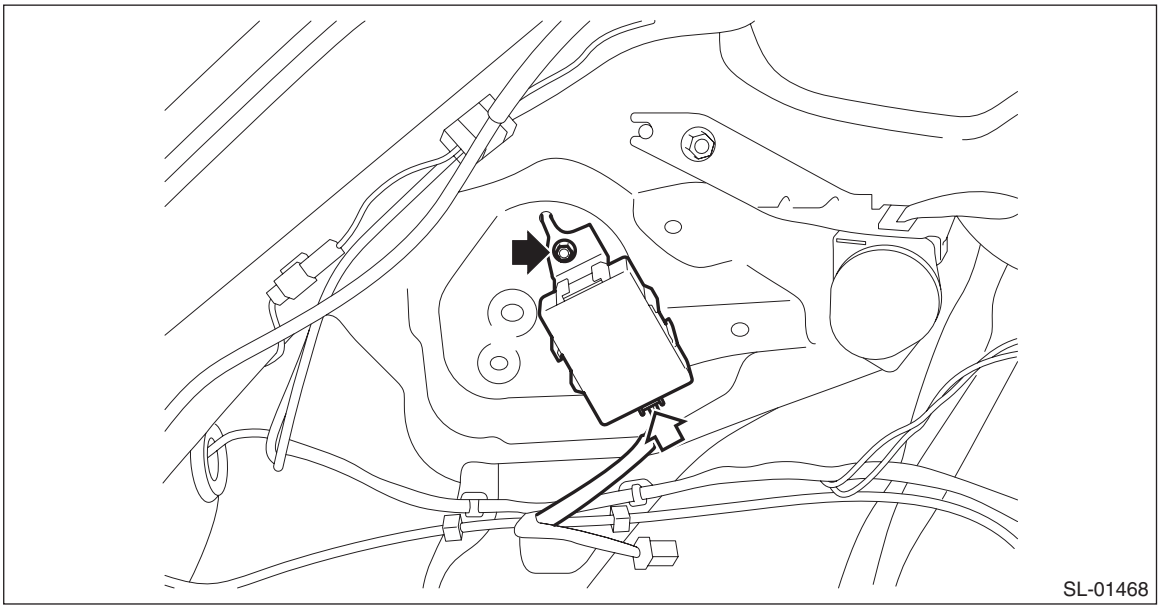
### 1. 4 DOOR MODEL

1) Disconnect the ground cable from battery.
2) Remove the trim panel assembly - rear shelf. <Ref. to EI-112, REMOVAL, Rear Shelf Trim.>
3) Remove the keyless entry control module.
   (1) Disconnect the connector.
   (2) Remove the bolt and then remove the keyless entry control module.



### 2. 5 DOOR MODEL/XV MODEL

1) Disconnect the ground cable from battery.
2) Remove the trim panel - rear apron LH. <Ref. to EI-105, REMOVAL, Rear Quarter Trim.>
3) Remove the keyless entry control module.
   (1) Disconnect the connector.
   (2) Remove the bolt and then remove the keyless entry control module.



## B: INSTALLATION

Install each part in the reverse order of removal.

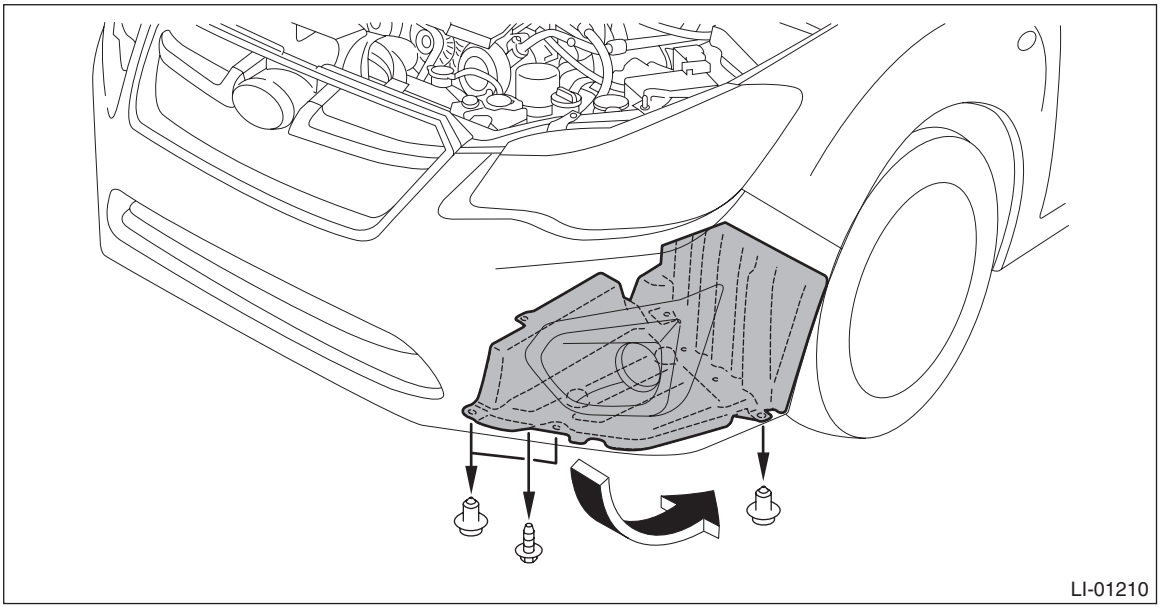
NOTE:
Refer to “INSTALLATION” of “Rear Shelf Trim” or “Rear Quarter Trim”.
- Rear shelf trim: <Ref. to EI-116, INSTALLATION, Rear Shelf Trim.>
- Rear quarter trim: <Ref. to EI-111, INSTALLATION, Rear Quarter Trim.>

***Tightening torque:***
***Keyless entry control module: 13 N·m (1.33 kgf-m, 9.6 ft-lb)***

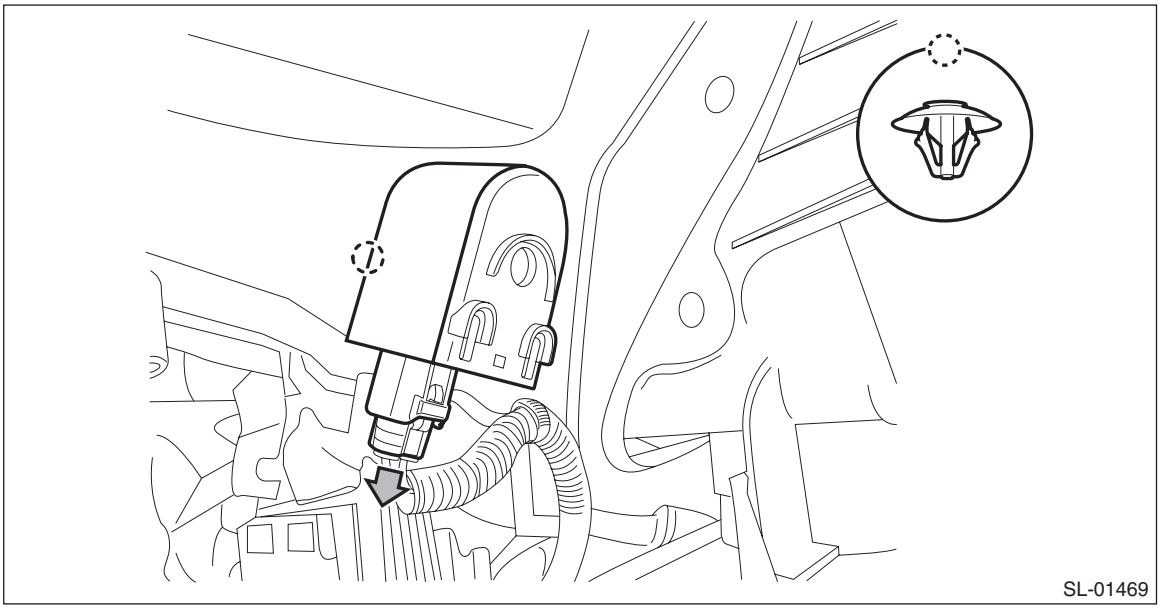
# 22.Keyless Buzzer

## A: REMOVAL

1) Disconnect the ground cable from battery.
2) Lift up the vehicle.
3) Remove the clips, and turn over the front side of the mud guard - front.



4) Remove the keyless buzzer.
   (1) Disconnect the connector.
   (2) Remove the clip and detach the keyless buzzer.



## B: INSTALLATION

Install each part in the reverse order of removal.

## C: INSPECTION

Using the Subaru Select Monitor, perform forced operation of the keyless buzzer. <Ref. to BC(diag)-15, OPERATION, User Customizing.>
If the buzzer does not sound, replace the keyless buzzer.

# 23.Body Integrated Unit

## A: NOTE

### 1. WHEN REPLACING THE BODY INTEGRATED UNIT

1) Check and record the current setting. <Ref. to BC(diag)-17, CONFIRM CURRENT SETTING, OPERATION, Registration Body Integrated Unit.>
2) Prepare all immobilizer keys already registered.

NOTE:
If some of the registered immobilizer keys are missing, the following parts must be replaced.
- Except for C0 and C5 models: Combination meter
- C0 and C5 models: Security control module

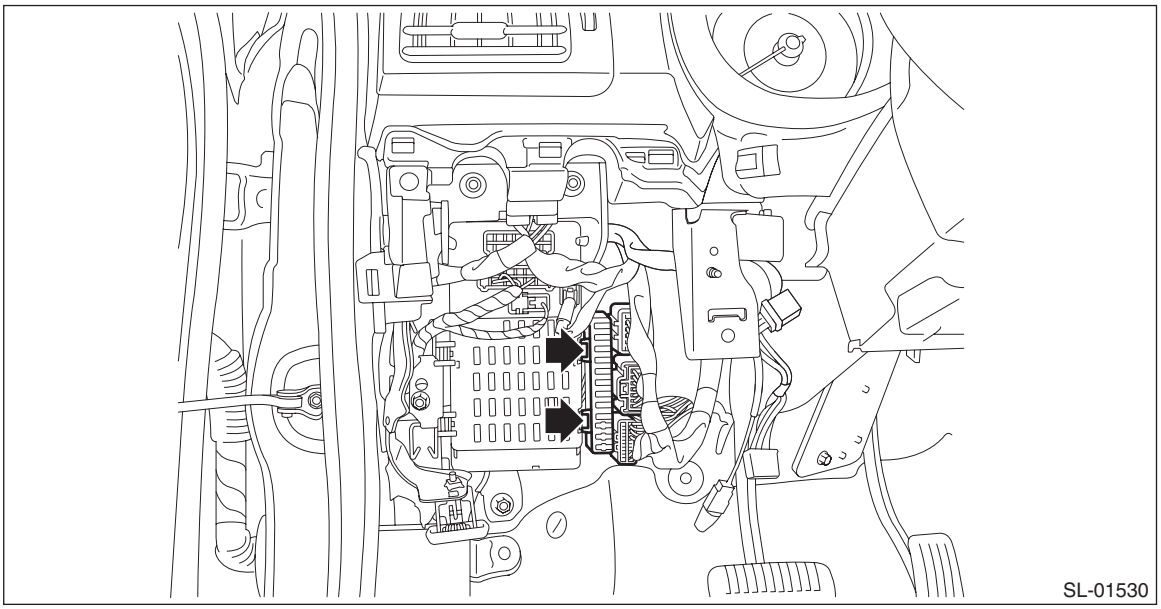
### 2. AFTER REPLACING THE BODY INTEGRATED UNIT

1) Register the immobilizer.

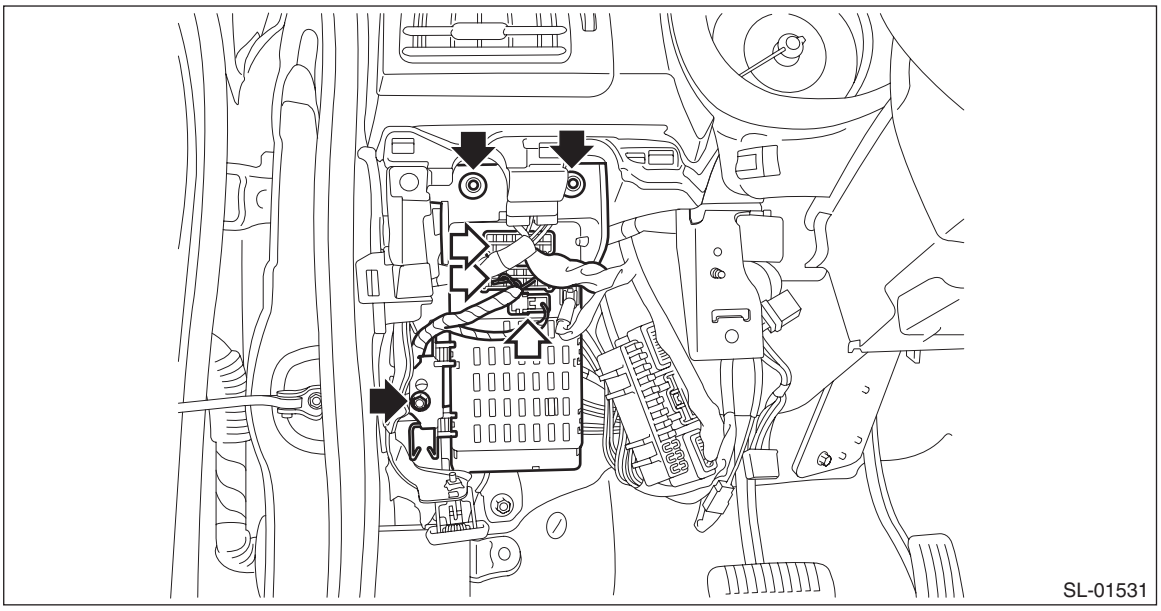
NOTE:
For detailed operation procedure, refer to the “REGISTRATION MANUAL FOR IMMOBILIZER”.
2) Set the current settings as recorded.

## B: REMOVAL

1) Remove the knee airbag module. <Ref. to AB-44, REMOVAL, Knee Airbag Module.>
2) Release the lock and remove the fuse holder.



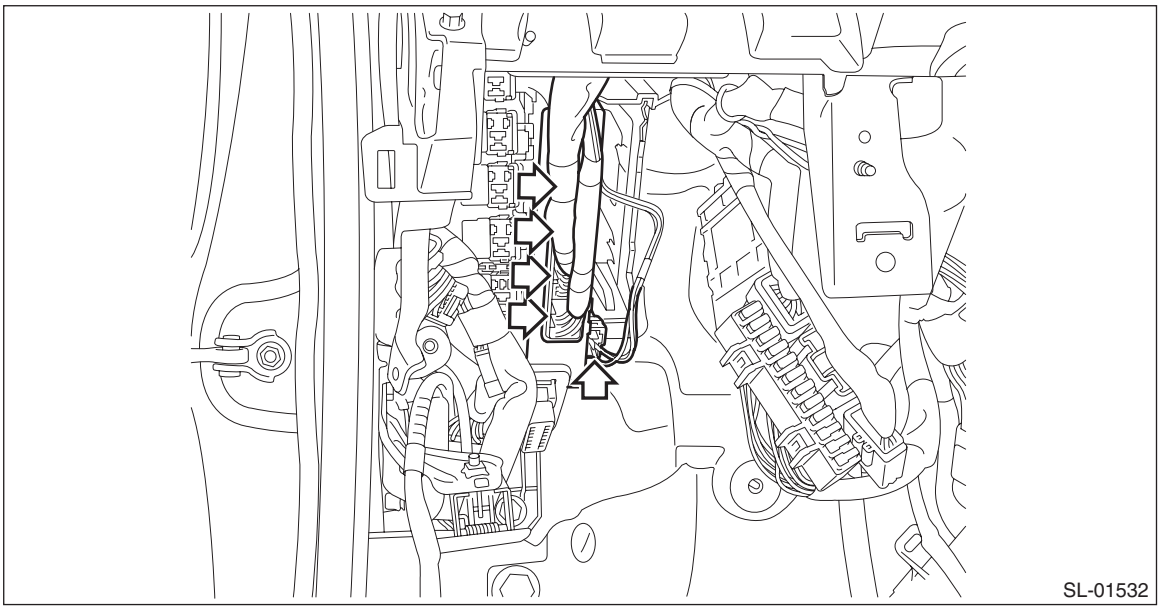
3) Remove the relay & fuse box.
(1) Disconnect the connector.
(2) Remove the bolts and nuts, and remove the relay & fuse box.



SL-01531

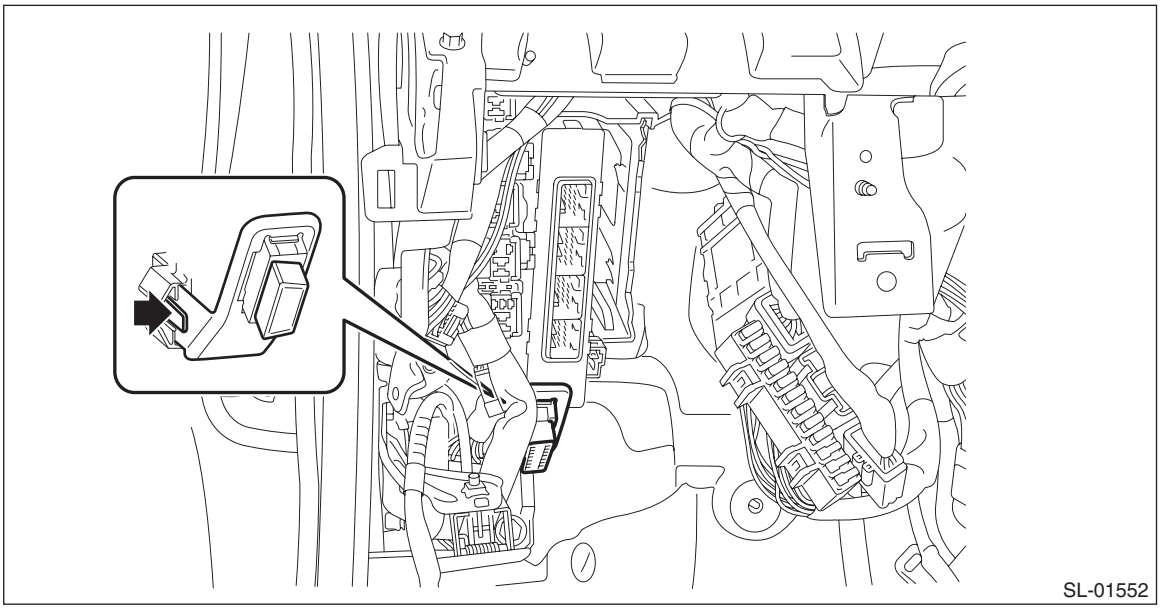
4) Remove the body integrated unit.

**CAUTION:**
**Be careful to keep water and other foreign materials away from body integrated unit.**
(1) Disconnect the connector.

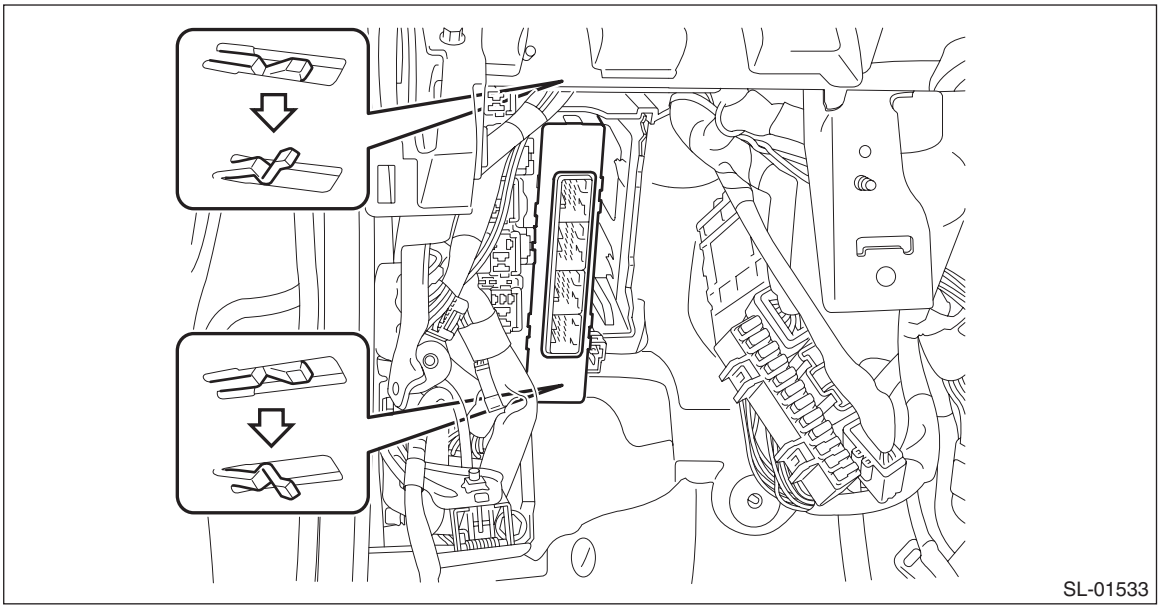


SL-01532

(2) Release the lock, and remove the data link connector bracket from the bracket.



(3) Release the claws, and pull out the body integrated unit from the bracket.



## C: INSTALLATION

**CAUTION:**
**• Before handling the airbag module, refer to "CAUTION" of "General Description" in "AIRBAG SYSTEM". <Ref. to AB-11, CAUTION, General Description.>**
**• Do not allow harness and connectors to interfere or get tangled up with other parts.**
Install each part in the reverse order of removal.

NOTE:
Refer to "INSTALLATION" of "Knee Airbag Module". <Ref. to AB-46, INSTALLATION, Knee Airbag Module.>

***Tightening torque:***
***Relay & fuse box: 7.5 N·m (0.76 kgf-m, 5.5 ft-lb)***

NOTE:
Make sure that there are no differences from the contents of the current settings after installation. <Ref. to BC(diag)-11, LIST, Read Current Data.>

# 24.Keyless Transmitter

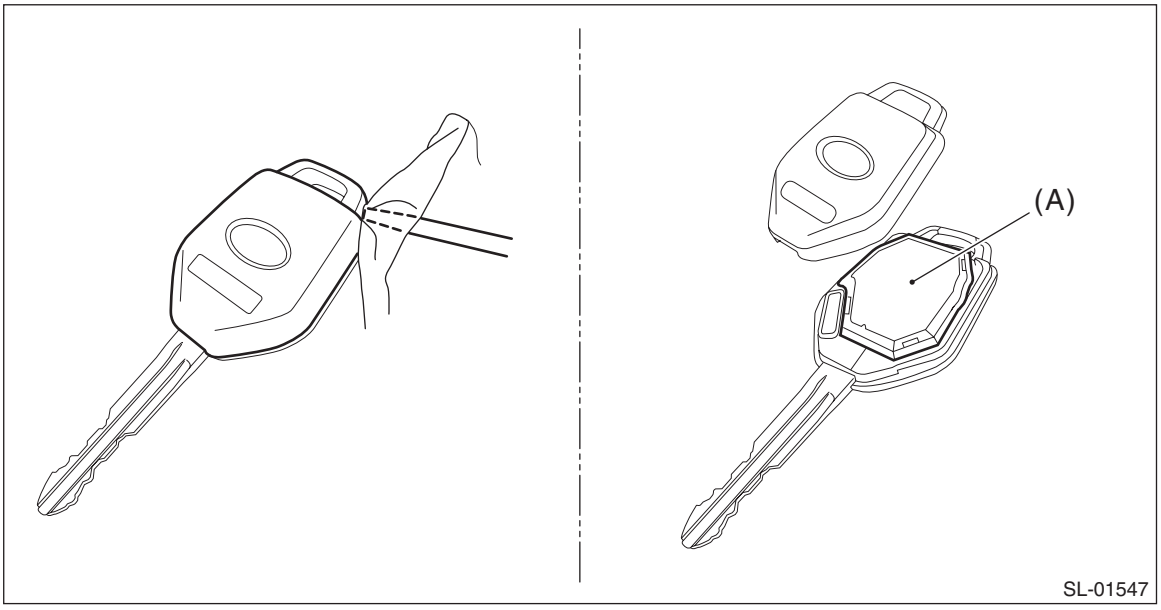
## A: REMOVAL

### 1. KEYLESS TRANSMITTER BATTERY

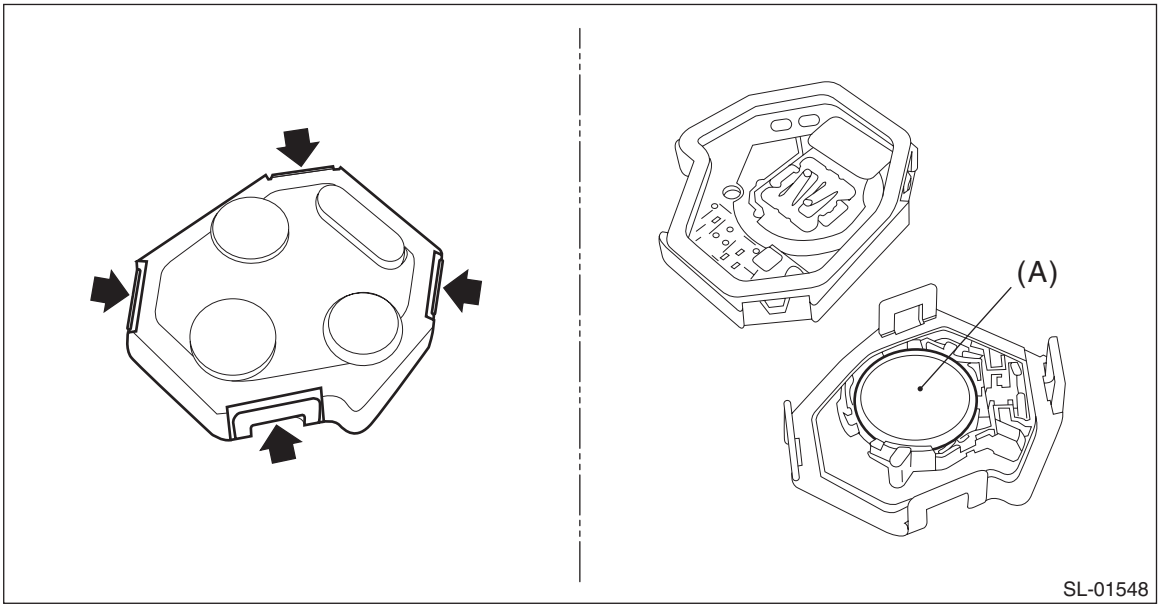
**CAUTION:**
**To prevent static electricity damage to the keyless transmitter printed circuit board, touch the steel area of building with hand to discharge static electricity carried on body or clothes before disassembling the keyless transmitter.**

1) Remove the keyless transmitter cover, and take out the transmitter case (A).

NOTE:
Use a flat tip screwdriver with protective tape or cloth in order not to damage the components.



2) Release the claws to open the transmitter case, then remove the battery (A).



## B: INSTALLATION

### 1. KEYLESS TRANSMITTER BATTERY

Install each part in the reverse order of removal.

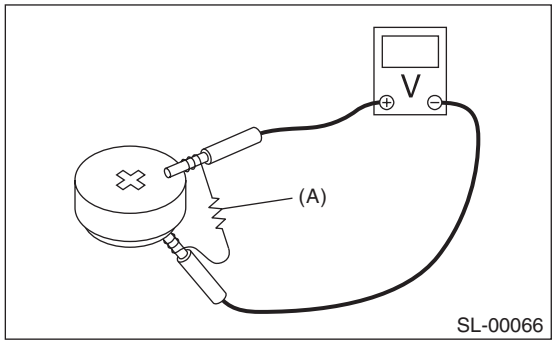
# C: INSPECTION

## 1. KEYLESS TRANSMITTER BATTERY

1) Check the keyless transmitter battery voltage.

***PREPARATION TOOL:***
***Circuit tester***

NOTE:
Complete the measurement within 5 seconds because the battery discharges during measurement.



| Battery terminal | Inspection Conditions | Standard |
|---|---|---|
| (+) — (–) | Connect resistor (A) 47 Ω | 2.5 — 3.0 V |

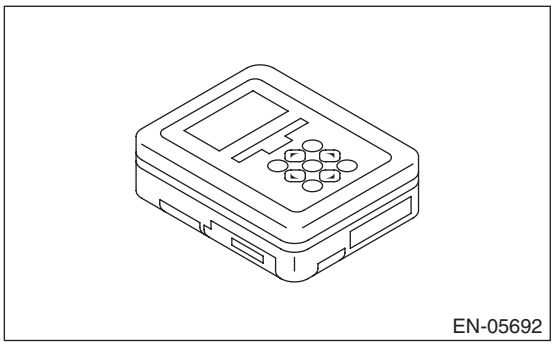
2) Replace the battery if the inspection result is not within the standard. (Use CR1620 or equivalent.)

# D: REPLACEMENT

## 1. REGISTRATION OF KEYLESS TRANSMITTER WITH SUBARU SELECT MONITOR

NOTE:
- A maximum of four keyless transmitters can be registered for each individual vehicle.
- When replacing or adding the keyless transmitter, new registration of transmitter is necessary.

1) Prepare the Subaru Select Monitor kit. <Ref. to SL-8, SPECIAL TOOL, PREPARATION TOOL, General Description.>



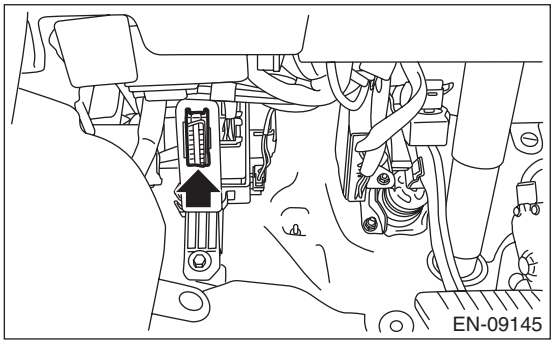
EN-05692

2) Prepare PC with Subaru Select Monitor installed.
3) Connect the USB cable to SDI (Subaru Diagnosis Interface) and USB port on the personal computer (dedicated port for the Subaru Select Monitor).

NOTE:
The dedicated port for the Subaru Select Monitor means the USB port which was used to install the Subaru Select Monitor.

4) Connect the diagnosis cable to SDI.
5) Connect SDI to data link connector located in the lower portion of the instrument panel (on the driver's side).

**CAUTION:**
**Do not connect scan tools other than the Subaru Select Monitor.**



EN-09145

6) Start the PC.
7) Turn the ignition switch to OFF and run the "PC application for Subaru Select Monitor".
8) On the «Main Menu» of the Subaru Select Monitor, select {Each System Check} → {Integ. unit mode} → {Work Support} → {Keyless ID registration}.
9) According to the directions on the screen, press the button of the transmitter to be registered in the LOCK → UNLOCK order. «When registration completed, external buzzer sound once.» Repeat the registration as many times as desired.
10) Press the [Exit] button to finish the operations.

NOTE:
When attempting to register a key that has already been registered, the external buzzer sounds twice.

# 25.Immobilizer Control Module

## A: NOTE

The control of immobilizer system is carried out in body integrated unit. For the detailed procedure, refer to the section of body integrated unit.

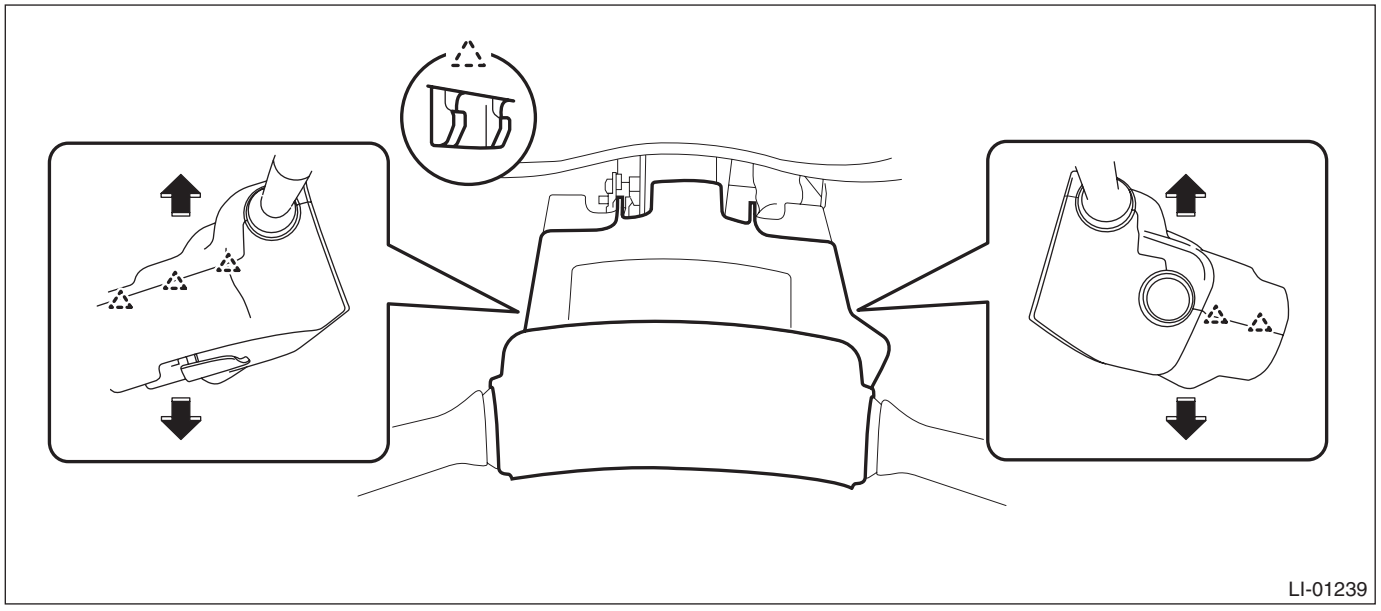
- Removal: <Ref. to SL-78, REMOVAL, Body Integrated Unit.>
- Installation: <Ref. to SL-80, INSTALLATION, Body Integrated Unit.>

# 26.Immobilizer Antenna

## A: REMOVAL

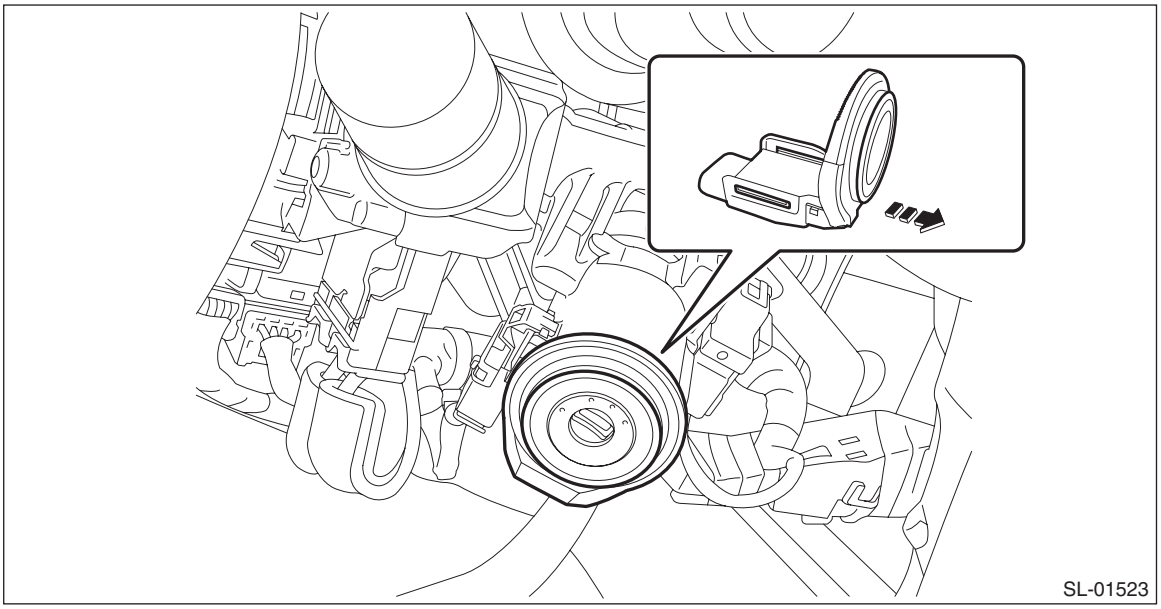
1) Disconnect the ground cable from battery.
2) Remove the cover assembly - column.
   (1) Remove the screws by turning the steering wheel to right and left.

   (2) Release the claw, and remove the cover assembly - column UPR and the cover assembly - column LWR.



3) Disconnect the connector and remove the immobilizer antenna assembly.

**CAUTION:**
**Do not apply excessive force to remove the immobilizer antenna and lock. Otherwise they may be broken because those parts are the products made of a plastic.**



## B: INSTALLATION

Install each part in the reverse order of removal.

# SUNROOF/T-TOP/CONVERTIBLE TOP (SUNROOF)

SR

| | | Page |
|---|---|---|
| 1. | General Description | 2 |
| 2. | Relay and Fuse | 4 |
| 3. | Sunroof Control System | 5 |
| 4. | Glass Lid | 7 |
| 5. | Sunroof Assembly | 12 |
| 6. | Sunroof Motor | 18 |

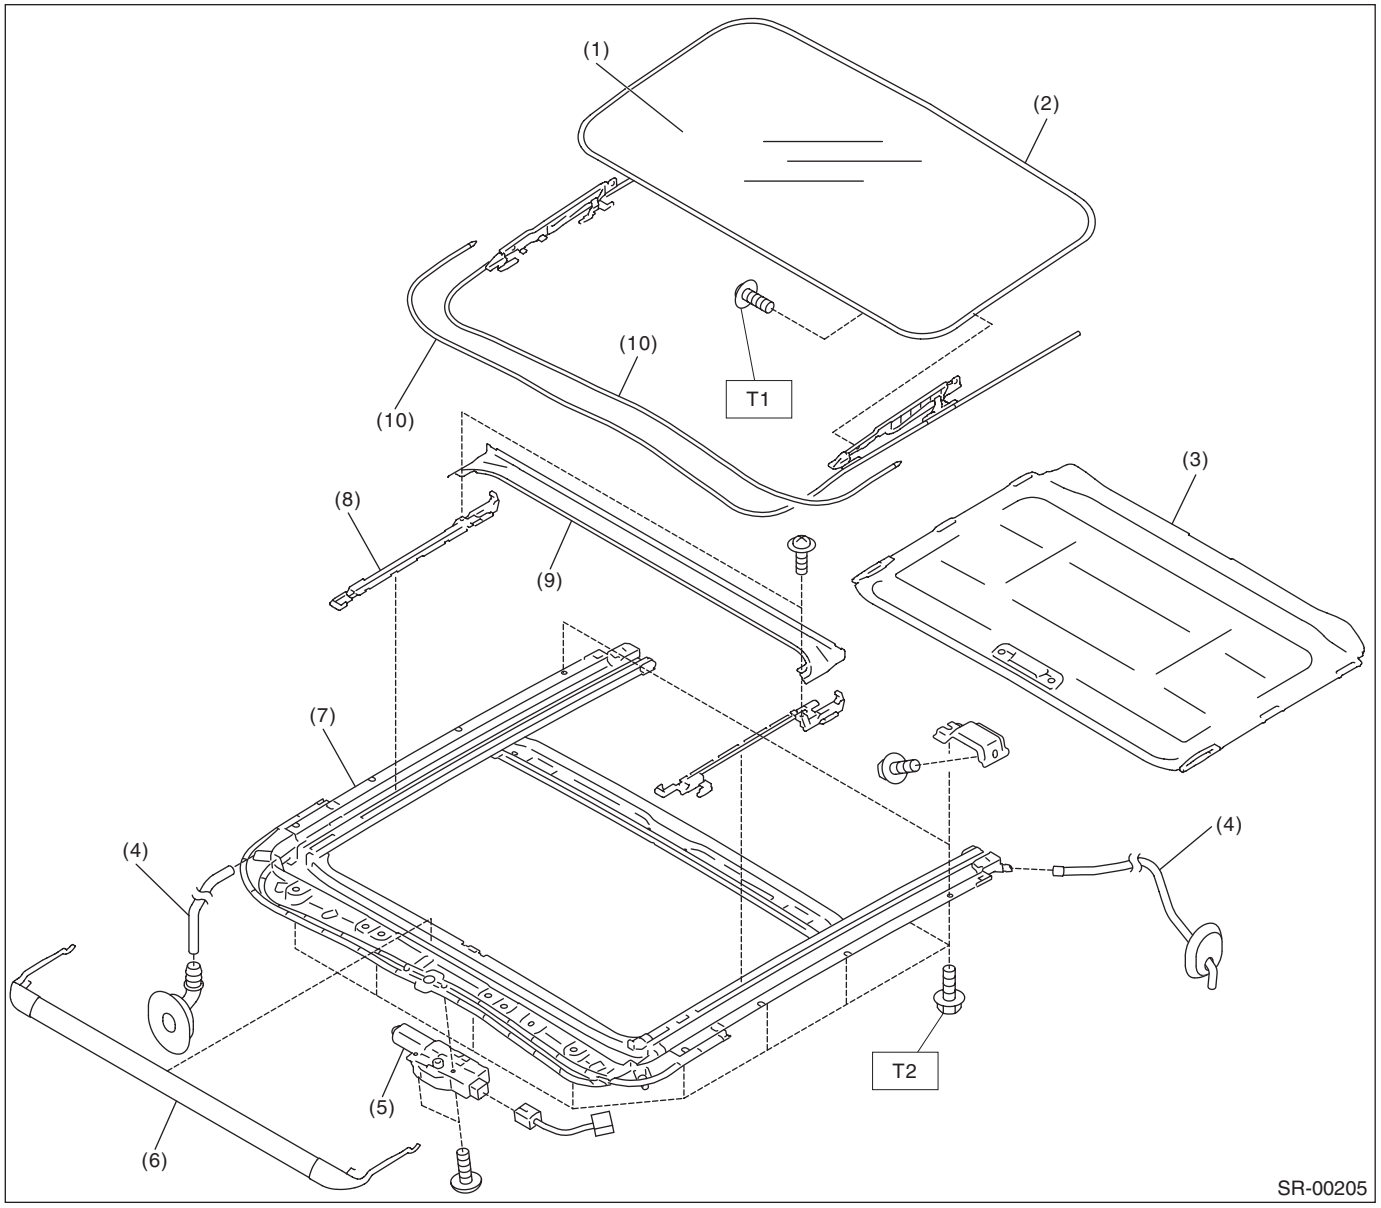
| 8. | Sunshade | 23 |

# 1. General Description

## A: COMPONENT



(1) Lid ASSY - sunroof
(2) Weather strip
(3) Sunshade ASSY
(4) Drain tube - sunroof
(5) Motor ASSY - sunroof
(6) Deflector ASSY - sunroof
(7) Rail ASSY - sunroof
(8) Link - drain sunroof
(9) Drain ASSY - sunroof
(10) Cable ASSY

***Tightening torque: N·m (kgf-m, ft-lb)***
***T1: 4.5 (0.46, 3.3)***
***T2: 6.0 (0.61, 4.4)***

## B: CAUTION

• Before disassembling or reassembling parts, always disconnect the battery ground cable from battery. When replacing the audio, control module and other parts provided with memory functions, record the memory contents before disconnecting the battery ground cable. Otherwise, the memory is cleared.
• Reassemble the parts in the reverse order of disassembly unless otherwise indicated.
• Adjust parts to the given specifications.
• Connect the connectors securely during reassembly.
• After reassembly, make sure that the each component operates normally.

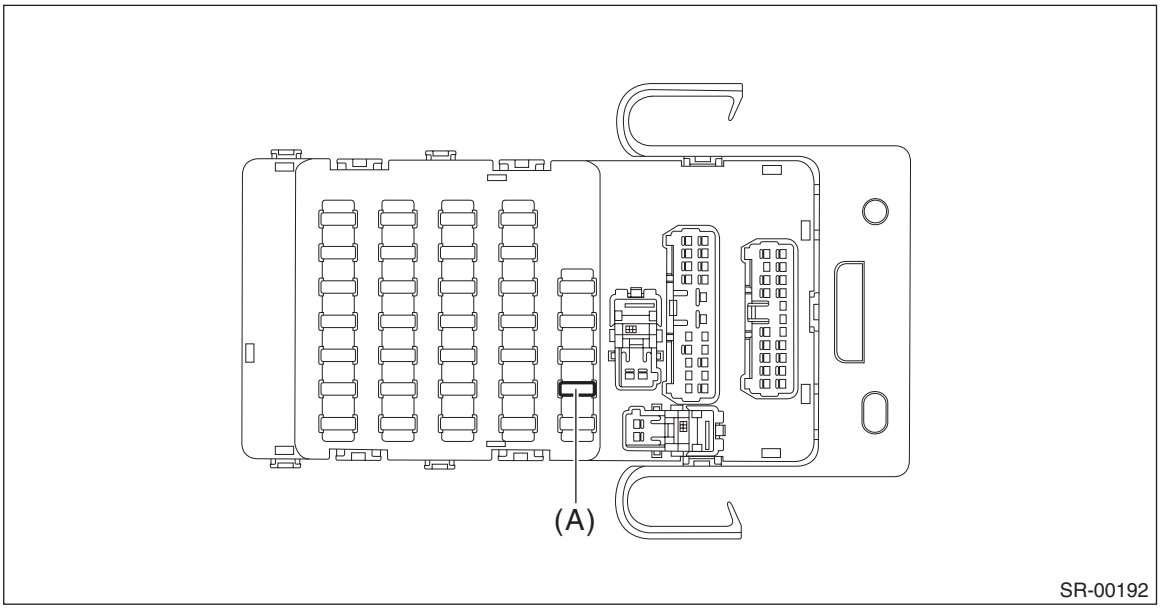
## C: PREPARATION TOOL

### 1. GENERAL TOOL

| TOOL NAME | REMARKS |
|---|---|
| Circuit tester | Used for measuring resistance and voltage. |
| Hexagon wrench | Used for forcibly driving the motor assembly - sunroof. Width across flat 4 mm (0.16 in) |
| TORX® T25 | Used for removing and installing the lid assembly - sunroof. |

# 2. Relay and Fuse

## A: LOCATION



| | | |
|---|---|---|
| Relay & fuse box | Fuse 10A (IG 2) | (A) |

NOTE:
For other related fuses, refer to the wiring diagram. <Ref. to WI-15, Power Supply Circuit.>

## B: INSPECTION

### 1. CHECK FUSE

1) Remove the fuse and check visually.
2) If the fuse is blown out, replace the fuse.

# 3. Sunroof Control System

## A: WIRING DIAGRAM

Refer to “Sunroof Control System” in the wiring diagram. <Ref. to WI-147, WIRING DIAGRAM, Sunroof Control System.>

## B: INSPECTION

| Symptoms | Inspection steps |
|---|---|
| Water leakage | 1. Check the roof panel and the lid assembly - sunroof for improper or poor sealing.<br>2. Check the drain tube - sunroof for clogging.<br>3. Check the joints of the rail assembly - sunroof for improper sealing and for proper installation to the body. |
| Booming noise, wind noise and other noise | 1. Check the lid assembly - sunroof and the roof panel for improper clearance.<br>2. Check the sunshade assembly and the trim panel - roof assembly for improper clearance. |
| Abnormal motor noise | 1. Check installing part of motor for looseness.<br>2. Check gears and bearings for wear.<br>3. Check cable assembly for wear.<br>4. Check cable pipe for deformities. |
| Failure of sunroof<br>(Motor operates properly.) | 1. Check guide rail for foreign particles.<br>2. Check guide rail for improper installation.<br>3. Check parts for mutual interference.<br>4. Check cable slider for improper clinching.<br>5. Check cable assembly for improper installation. |
| Motor does not rotate or rotate improperly. | 1. Check fuse for blown out.<br>2. Check switch for improper function.<br>3. Check motor assembly for incorrect terminal voltage.<br>4. Check the relay for improper operation.<br>5. Check harness for open or short and terminals for poor connections. |
| Incorrect reverse operation of the lid assembly - sunroof | Check guide rail for foreign particles. |

- Incorrect reverse operation of the lid assembly - sunroof while driving on rough road

The lid assembly - sunroof has auto-reverse function. When a force that exceeds a certain amount of load is applied to the lid assembly - sunroof, the glass lid moves in the reverse direction and then stops.
Therefore, if you operate (open or close) the lid assembly - sunroof while driving on rough road, the vibration may be judged as a force and the lid may incorrectly move in the reverse direction.
When the incorrect reverse operation is occurred repeatedly, perform inspection around the sunroof frame. If there are no problems, perform the initialization operation with following procedure.

## C: OPERATION

### 1. INITIALIZE OPERATION

**CAUTION:**
**During initialization, perform the position learning and the sliding learning. Sliding learning mode can not be initiated unless the position learning is performed.**

NOTE:
When initialize operation is performed, it is necessary to press the switch repeatedly as it operates for only at the moment when the switch is pressed, even when the switch is held down.

- Position learning

1) Position the lid assembly - sunroof at the full open position, and press and hold the tilt up switch for ten seconds.
2) The motion of the glass lid shifts to inching operation until it reaches the full close position. After that, it returns to the full open position and then stops.
3) Release the tilt up switch to finish the position learning.

- Sliding learning

4) Within six seconds after the position learning is finished, press and hold the tilt up switch again.
5) The lid assembly - sunroof moves to the full close position, full open position, and the full close position successively, and stops at the full close position.
6) Release the tilt up switch and turn the IG to OFF to finish the initializing.

## D: NOTE

For operation procedures of each component of the sunroof control system, refer to the respective section.

- Glass lid: <Ref. to SR-7, Glass Lid.>
- Sunroof assembly: <Ref. to SR-12, Sunroof Assembly.>
- Sunroof motor: <Ref. to SR-18, Sunroof Motor.>
- Sunroof switch: <Ref. to SR-20, Sunroof Switch.>
- Sunshade: <Ref. to SR-23, Sunshade.>

# 4. Glass Lid

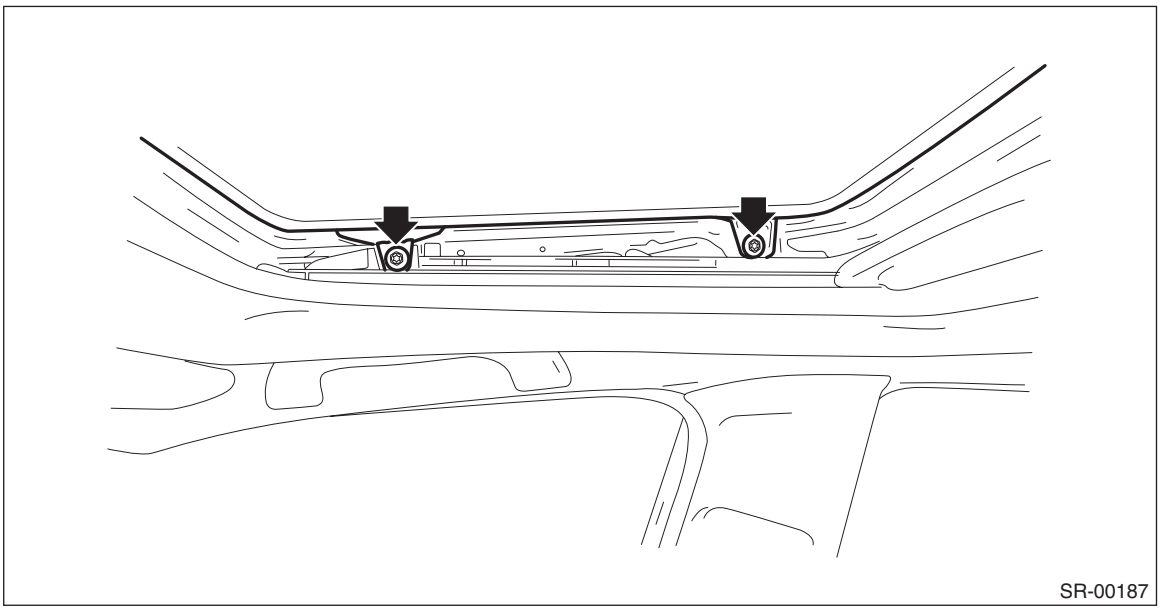
## A: REMOVAL

### 1. GLASS LID

1) Completely close the lid assembly - sunroof, and open the sunshade assembly.
2) Remove the TORX® bolt, and then remove the lid assembly - sunroof.

**CAUTION:**
**Be careful not to damage the lid assembly - sunroof.**

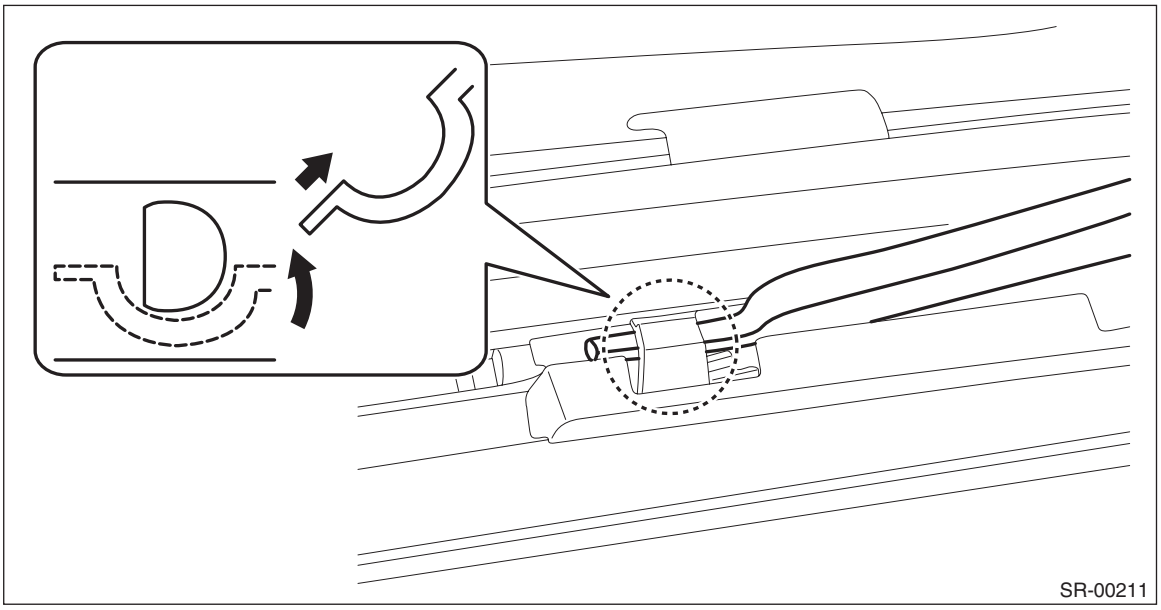
***PREPARATION TOOL:***
***TORX® T25***



## 2. DEFLECTOR ASSEMBLY

1) Open the lid assembly - sunroof and the sunshade assembly.
2) Remove the deflector assembly - sunroof.
   (1) Remove the spring from the rail assembly - sunroof.

   (2) While lifting up the deflector assembly - sunroof, remove the deflector assembly - sunroof from the hook on the rail assembly - sunroof.



# B: INSTALLATION

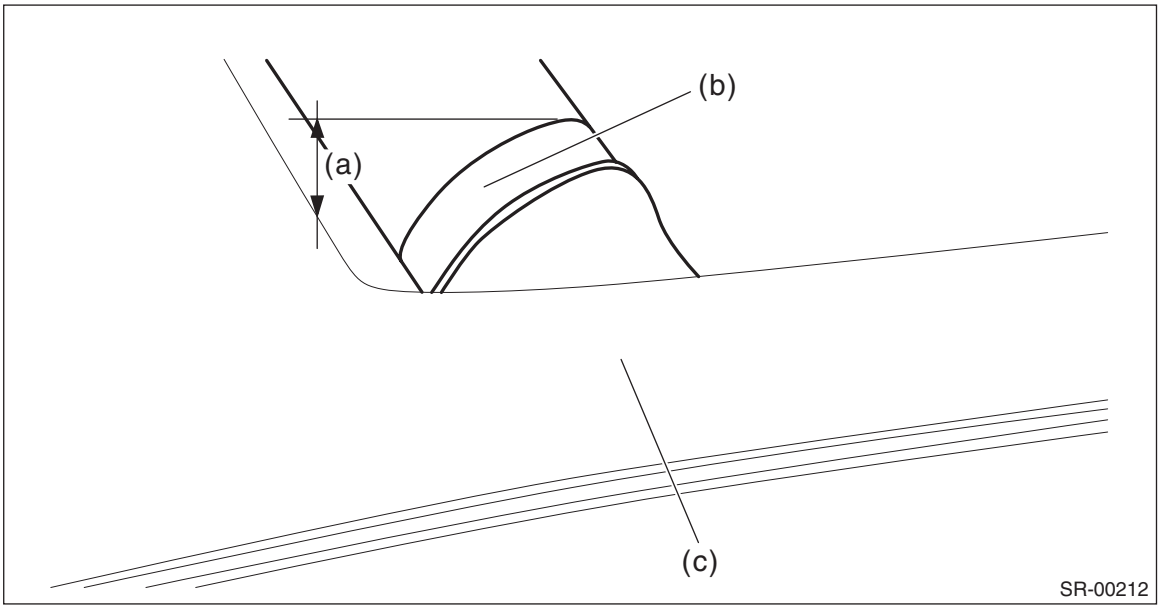
## 1. GLASS LID

Install each part in the reverse order of removal.

***Tightening torque:***
***Refer to "COMPONENT" of "General Description". <Ref. to SR-2, COMPONENT, General Description.>***

## 2. DEFLECTOR ASSEMBLY

1) Install each part in the reverse order of removal.
2) After installation, measure the height from the roof panel when deflector assembly - sunroof is activated.



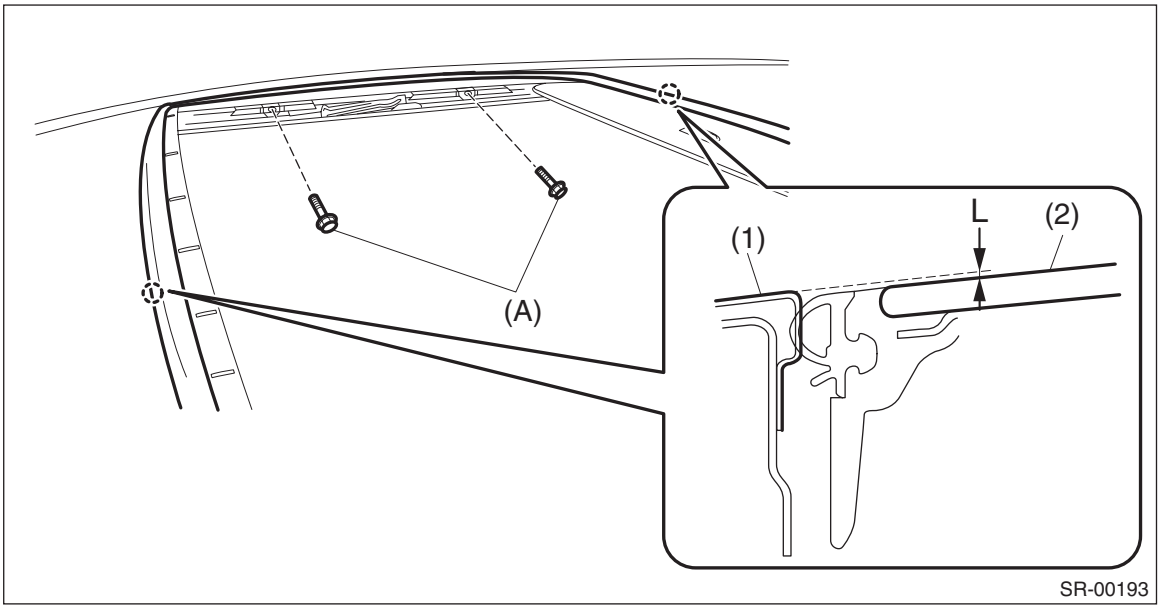
(a) 14 mm (0.55 in) (b) Deflector ASSY - sunroof (c) Roof panel

## C: ADJUSTMENT

Adjust the height of the lid assembly - sunroof and the roof panel.

- Loosen the lid assembly - sunroof mounting bolts (A), and then adjust the height by moving the lid assembly - sunroof side.

***Lid assembly - sunroof height difference L:***
***Lid assembly - sunroof to Roof panel: 0.7±1.0 mm (0.03±0.04 in)***



(1) Roof panel
(2) Lid ASSY - sunroof

## D: FORCED DRIVE

If the lid assembly - sunroof does not operate or the motor assembly is not supplied with power, move the lid assembly - sunroof using the hexagon wrench.

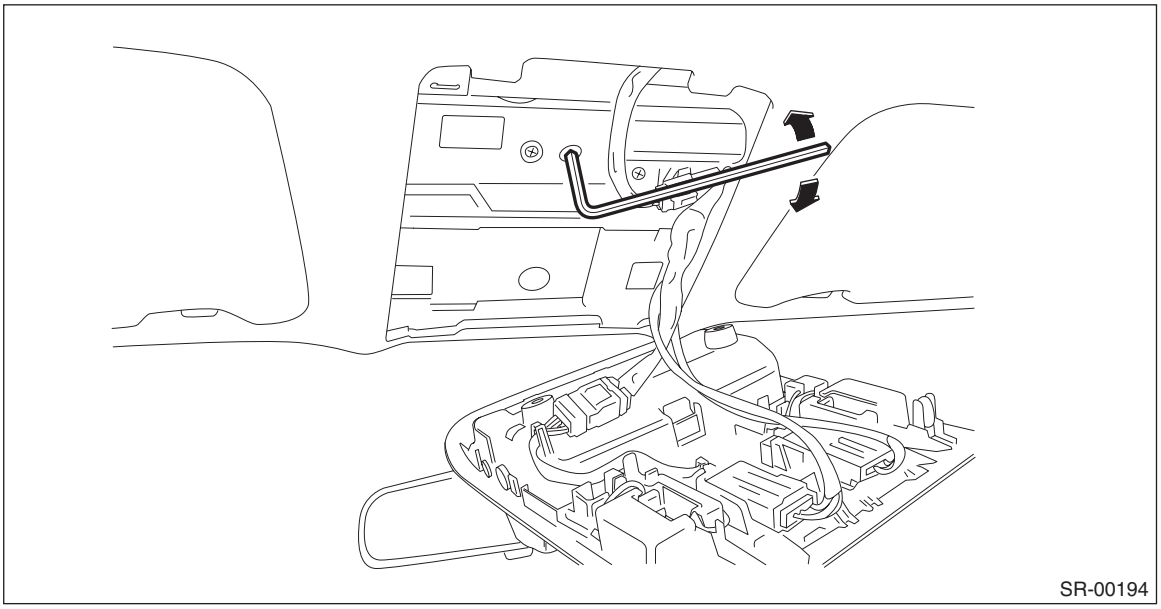
***PREPARATION TOOL:***
***Hexagon wrench: width across flat 4 mm (0.16 in)***

**CAUTION:**
**After a forced operation, make sure to perform an initialize operation. <Ref. to SR-6, INITIALIZE OPERATION, OPERATION, Sunroof Control System.>**

1) Remove the light assembly - map. <Ref. to LI-78, REMOVAL, Spot Map Light.>
2) Insert the hexagon wrench securely until it touches the motor shaft end.
3) Turn the hexagon wrench, and move the lid assembly - sunroof.

- Turning right, the lid assembly - sunroof opens.
- Turning left, the lid assembly - sunroof closes.

**CAUTION:**
**Be careful not to damage the adjacent parts with the rod end when moving the lid assembly - sunroof with the hexagon wrench.**



SR-00194

# 5. Sunroof Assembly

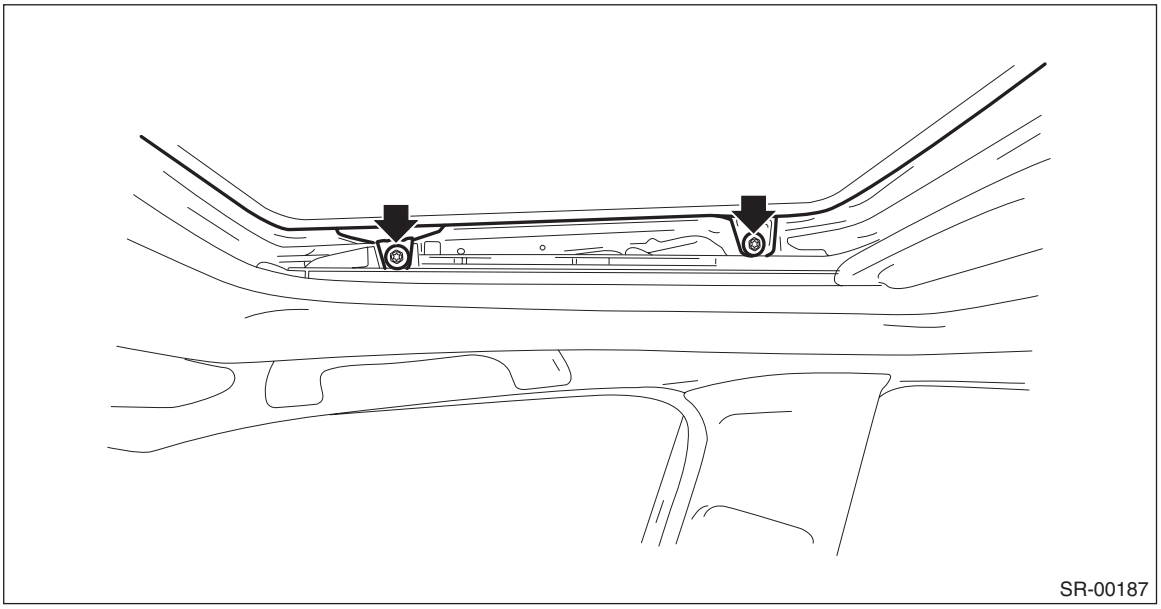
## A: REMOVAL

**CAUTION:**
**When removing the clip, use great care not to damage the trim panel - roof assembly.**

1) Remove the lid assembly - sunroof.
   (1) Completely close the lid assembly - sunroof, and open the sunshade assembly.
   (2) Remove the TORX® bolt, and then remove the lid assembly - sunroof.

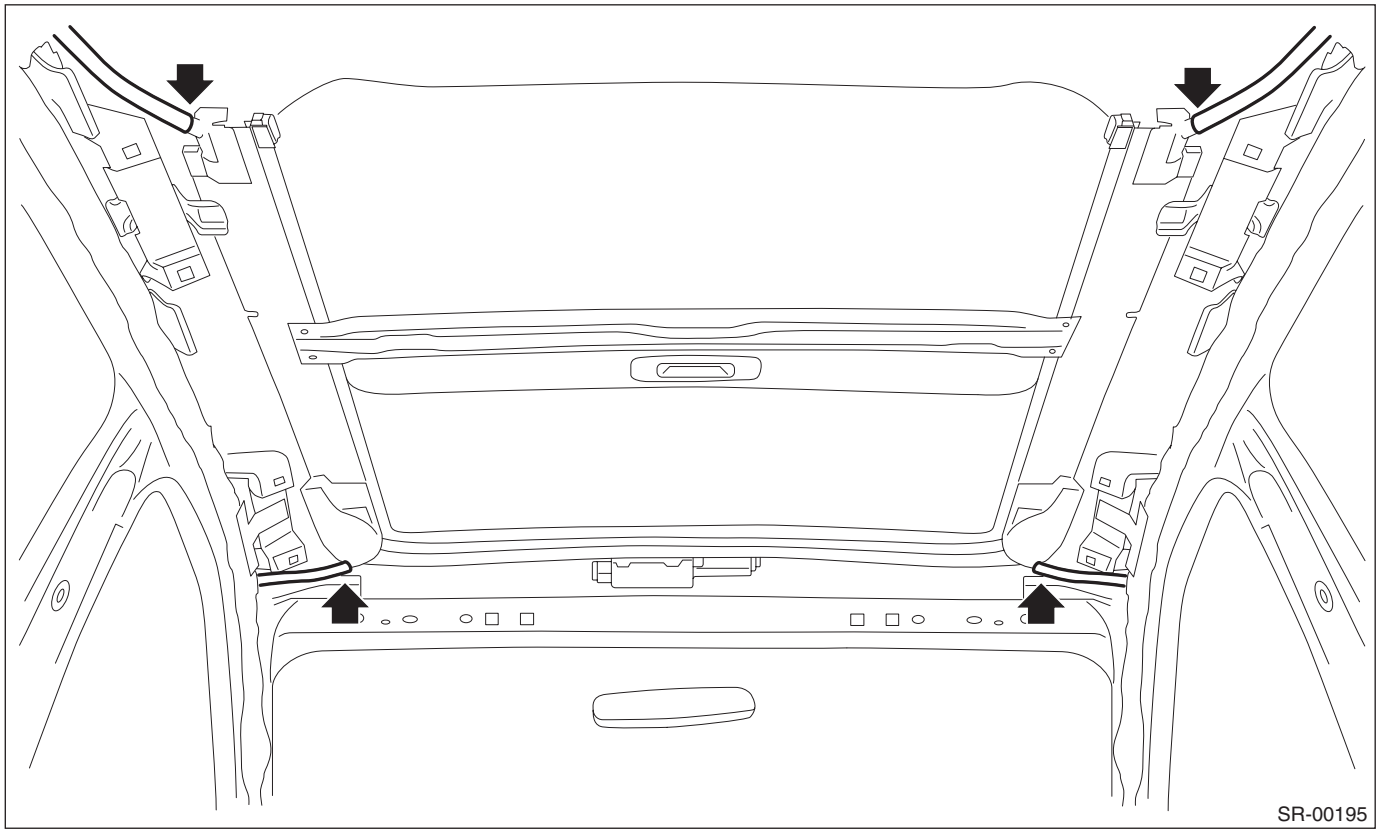
**CAUTION:**
**Be careful not to damage the lid assembly - sunroof.**

***PREPARATION TOOL:***
***TORX® T25***

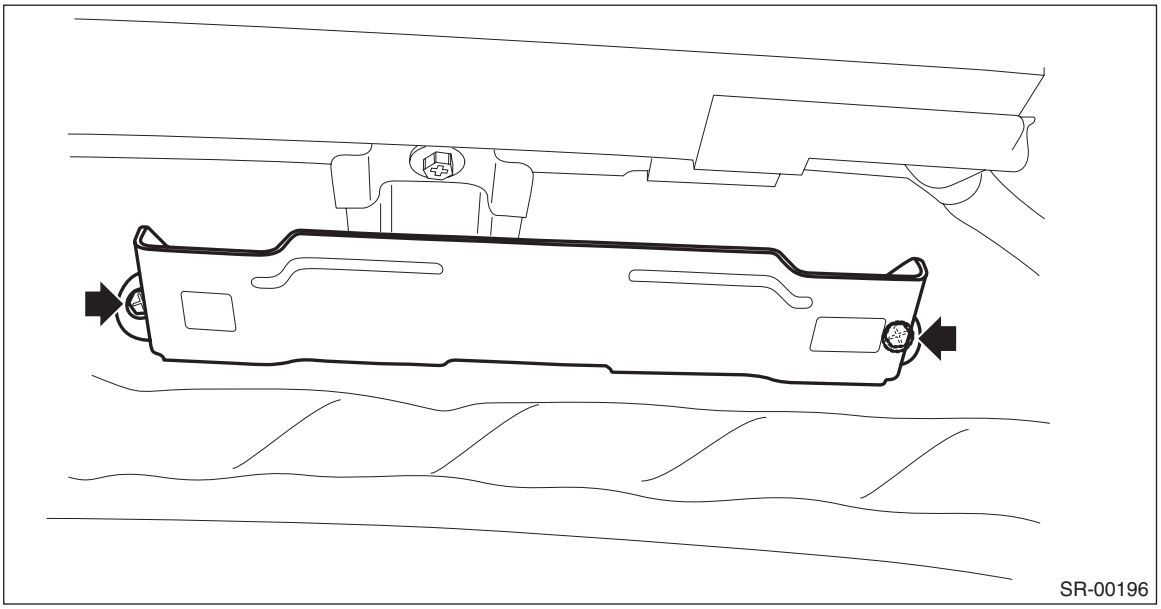


2) Remove the trim panel - roof assembly. <Ref. to EI-121, REMOVAL, Roof Trim.>
3) Disconnect the harness connector of the motor assembly.

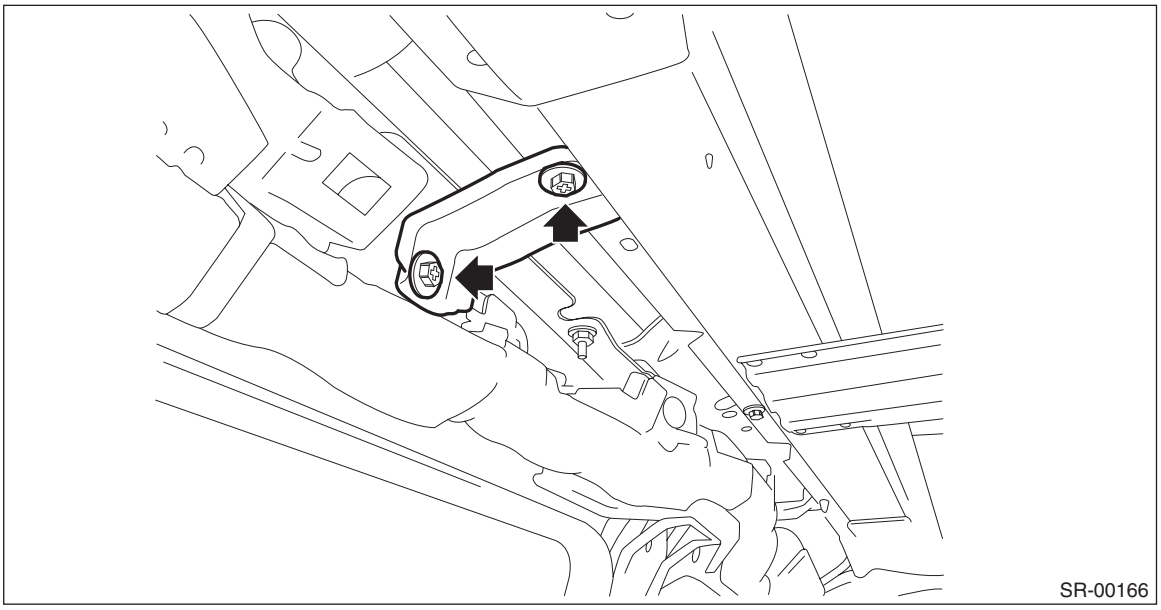
4) Remove the rail assembly.
(1) Remove the drain tube - sunroof.



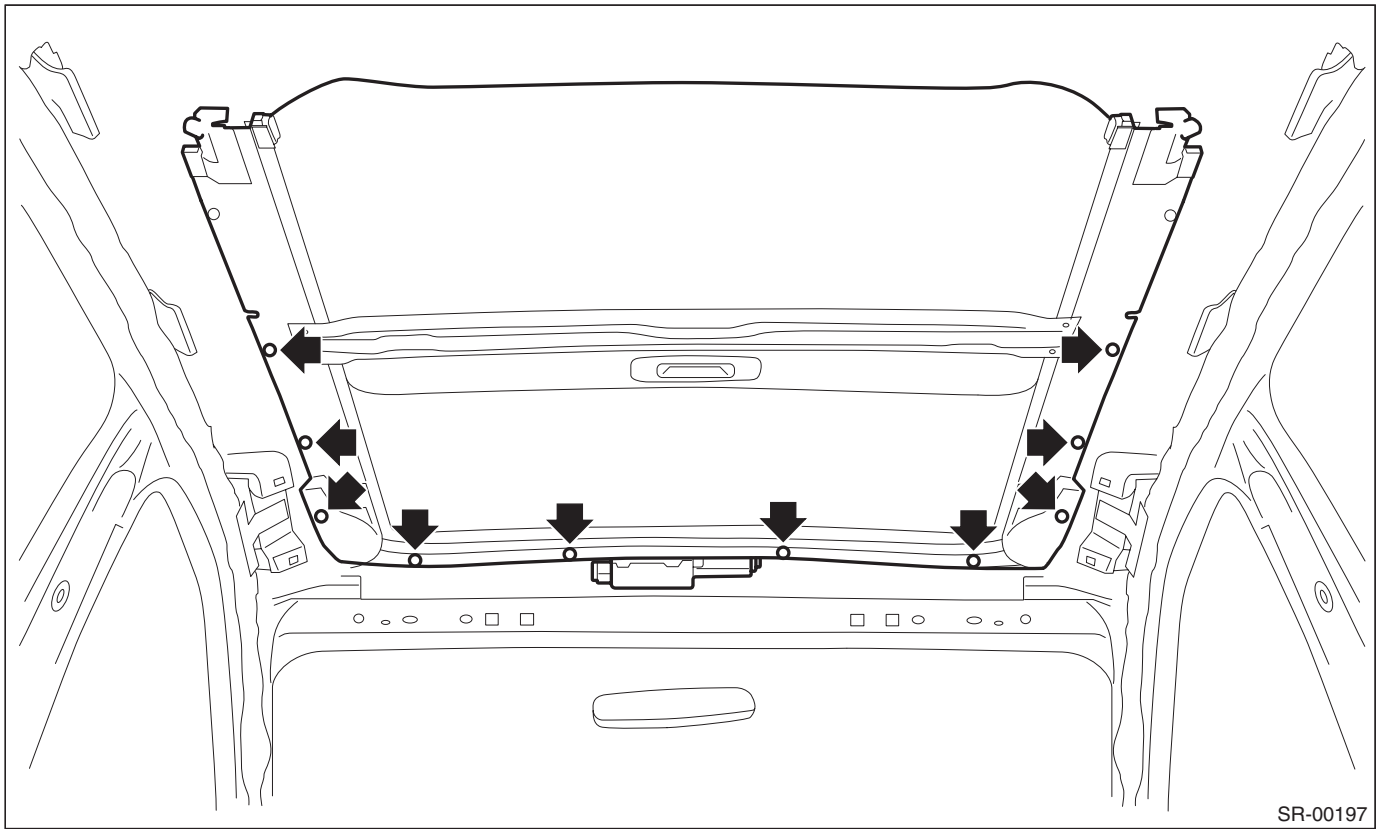
(2) Remove the bracket - assist rail.



(3) Remove the bolts and then remove the sunroof bracket.



(4) Remove the bolts, then remove the rail assembly.



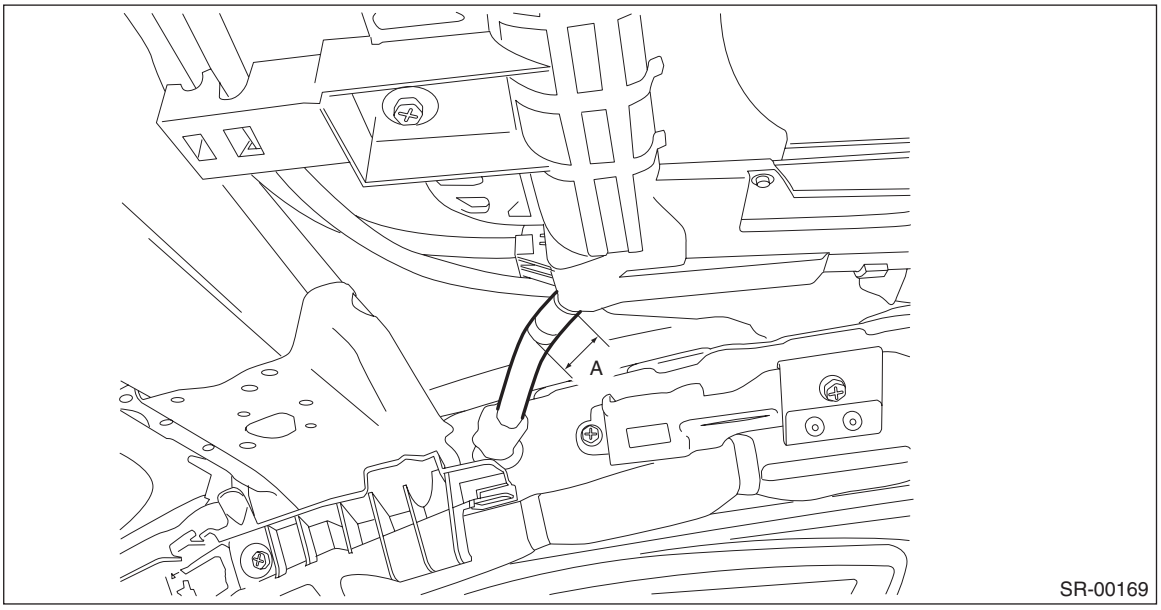
## B: INSTALLATION

**CAUTION:**
**Be careful not to snag the harness.**
Install each part in the reverse order of removal.

***Tightening torque:***
***Refer to "COMPONENT" of "General Description". <Ref. to SR-2, COMPONENT, General Description.>***

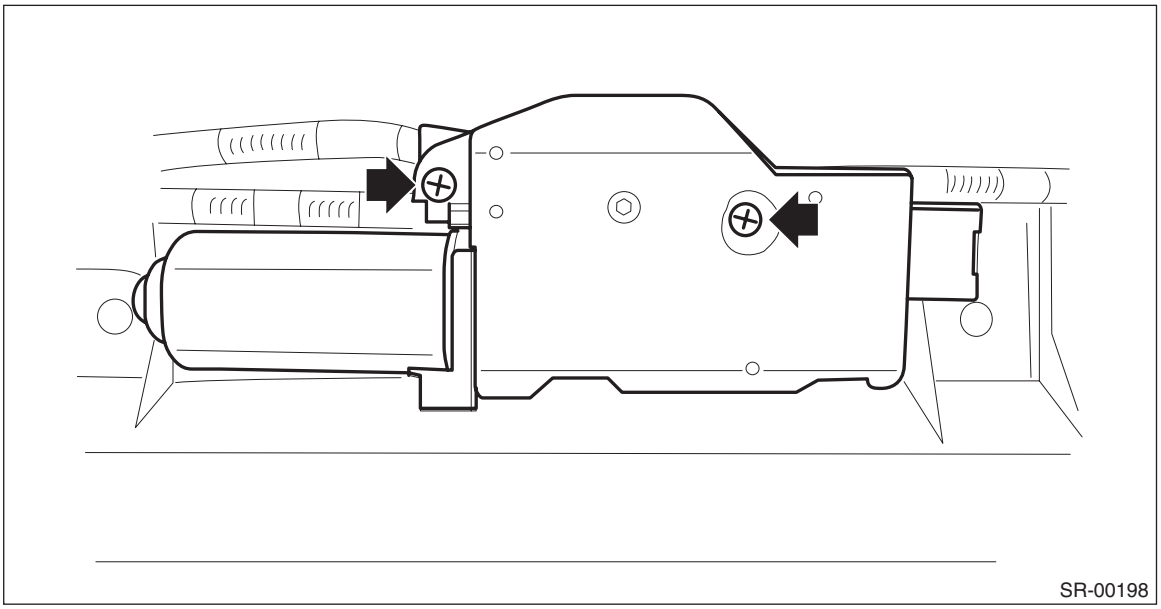
NOTE:
- Be sure to connect the harness connector.
- When installing the drain tube - sunroof, insert it securely into drain pipe.

***Length A:***
***15 mm (0.59 in) or more***

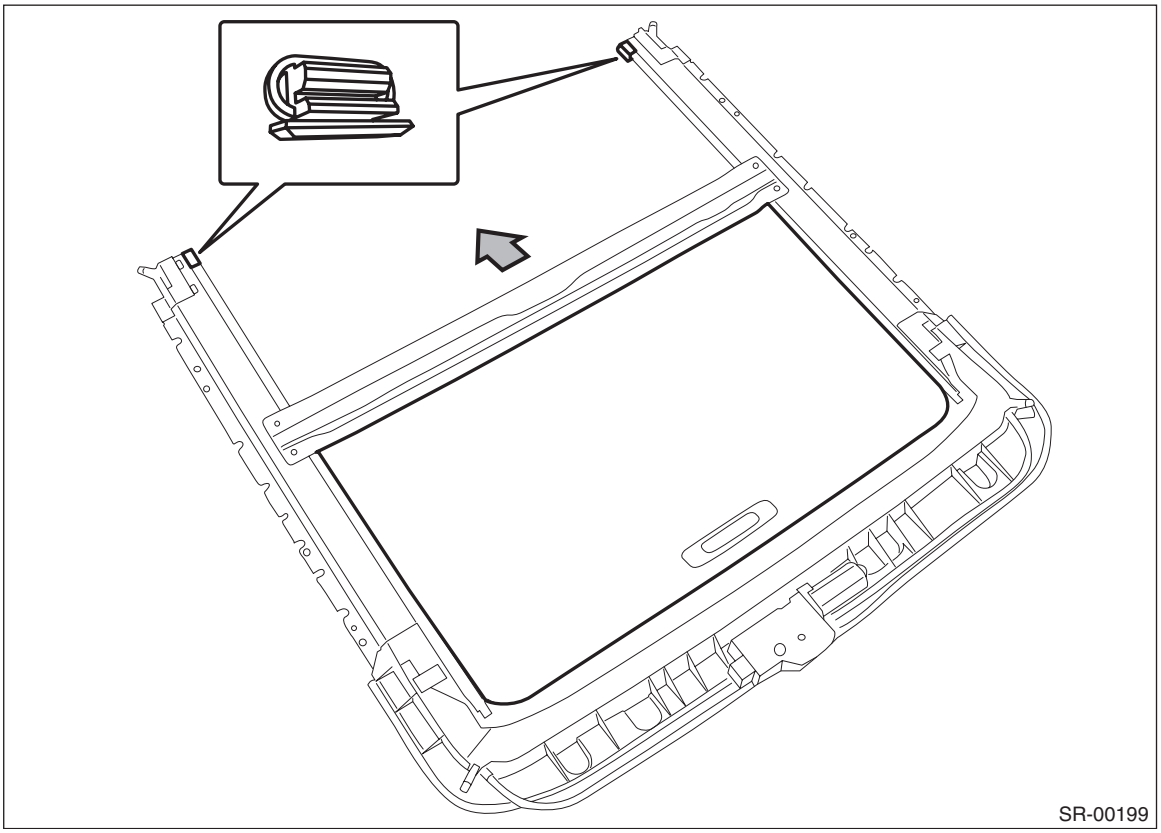


## C: DISASSEMBLY

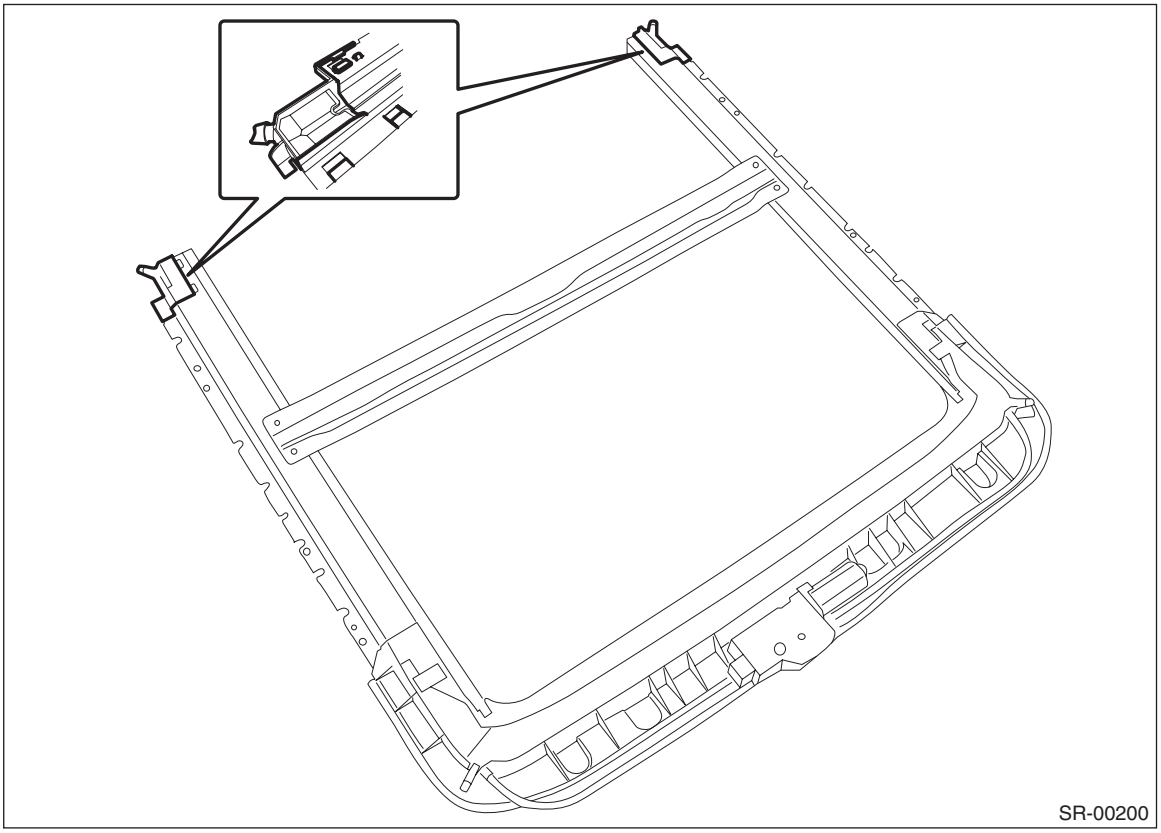
1) Remove the screw and remove the sunroof motor.



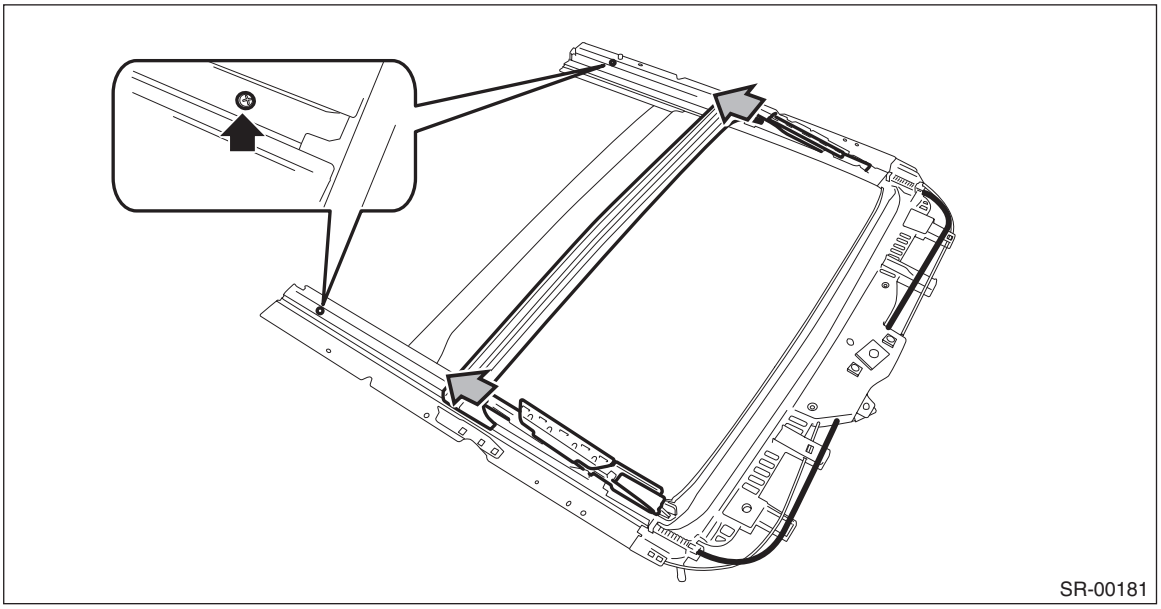
2) Remove the stopper rubber and pull out the sunshade assembly from the rail assembly - sunroof.



3) Disconnect the claws and then remove the drain holder.



4) Remove the screw and pull out the cable assembly from the rail assembly - sunroof.



## D: ASSEMBLY

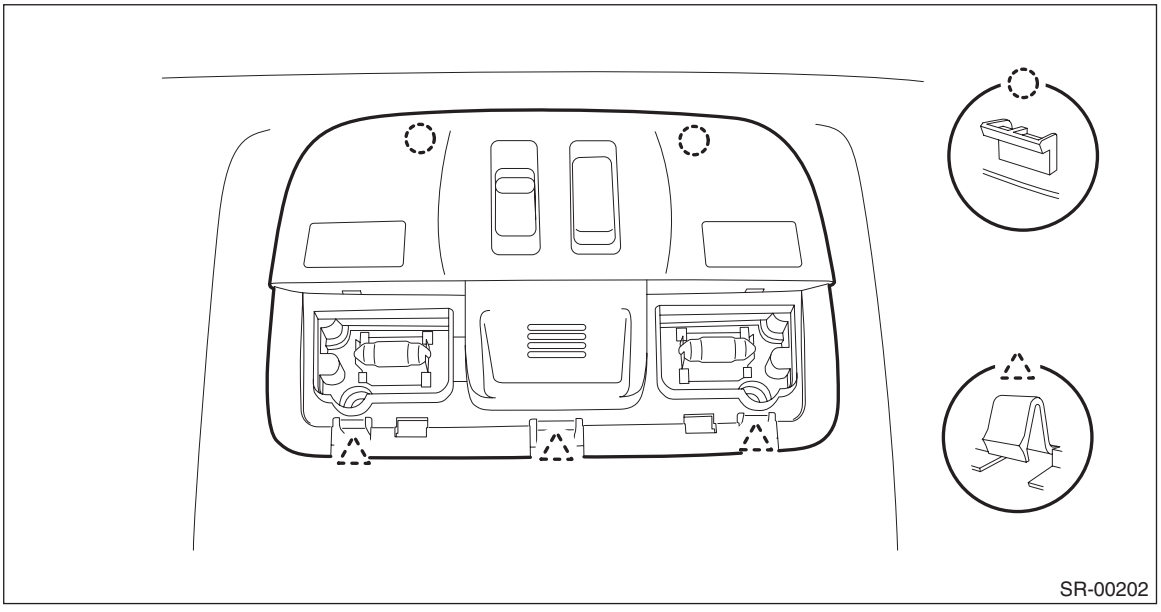
Install each part in the reverse order of removal.

# 6. Sunroof Motor

## A: REMOVAL

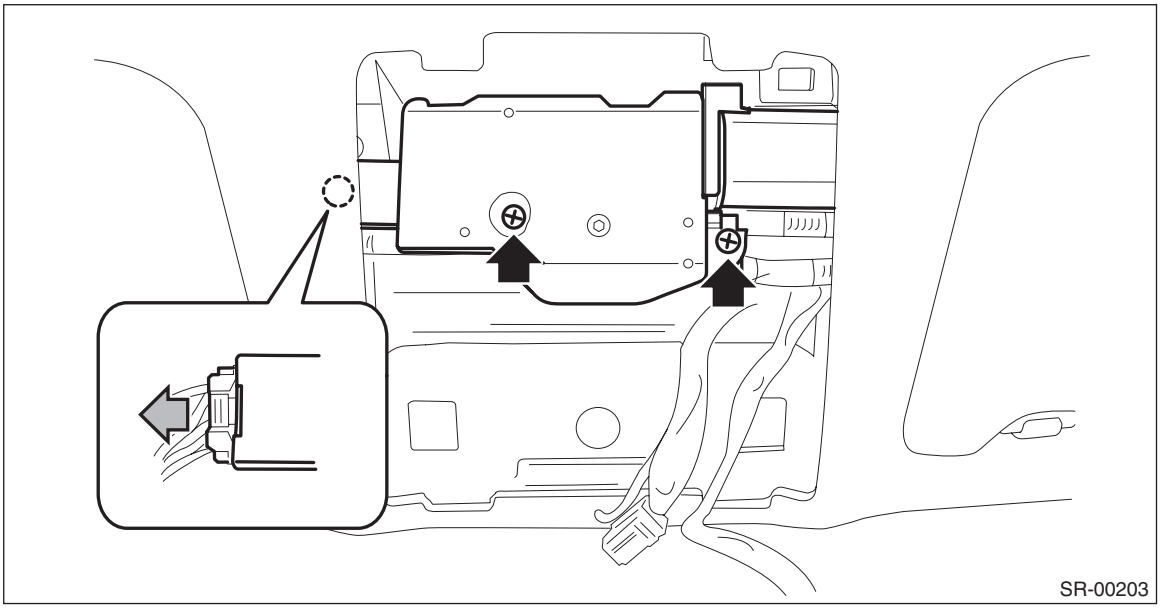
1) Completely close the lid assembly - sunroof.
2) Disconnect the ground cable from battery.
3) Remove the light assembly - map.
   (1) Remove the lens and detach the screws.

   (2) Release the clips and pull out the light assembly - map to disconnect the connectors.



4) Remove the motor assembly - sunroof.
   (1) Disconnect the harness connector.
   (2) Remove the screws and remove the motor assembly - sunroof.

**CAUTION:**
**When removing the motor assembly - sunroof, secure the cable assembly so that it does not move.**



## B: INSTALLATION

**CAUTION:**
**When installing the motor assembly - sunroof, be careful not to move the cable assembly.**
1) Install the motor assembly - sunroof.
2) Install the light assembly - map, and connect the ground cable to the battery.
3) Perform the initialize operation. <Ref. to SR-6, INITIALIZE OPERATION, OPERATION, Sunroof Control System.>
4) Check the operation of sunroof with following table below.

| Operation | Switch position |
|---|---|
| (1) Lid assembly - sunroof closes completely. | Close |
| (2) Lid assembly - sunroof is tilted up to the top position. | Tilt up |
| (3) Lid assembly - sunroof closes completely. | Tilt down |
| (4) Lid assembly - sunroof opens 295 mm (11.61 in) away from completely closed position. | Open |
| (5) Lid assembly - sunroof opens completely. | Open |
| (6) Lid assembly - sunroof closes completely. | Close |

## C: INSPECTION

Check the auto-reverse mechanism.

**CAUTION:**
**Do not place objects in the way to check the auto-reverse mechanism.**
1) Open the lid assembly - sunroof.
2) Forcefully push the lid assembly - sunroof in the opening direction during auto-closing, and check if the window auto-reverse mechanism operates properly.

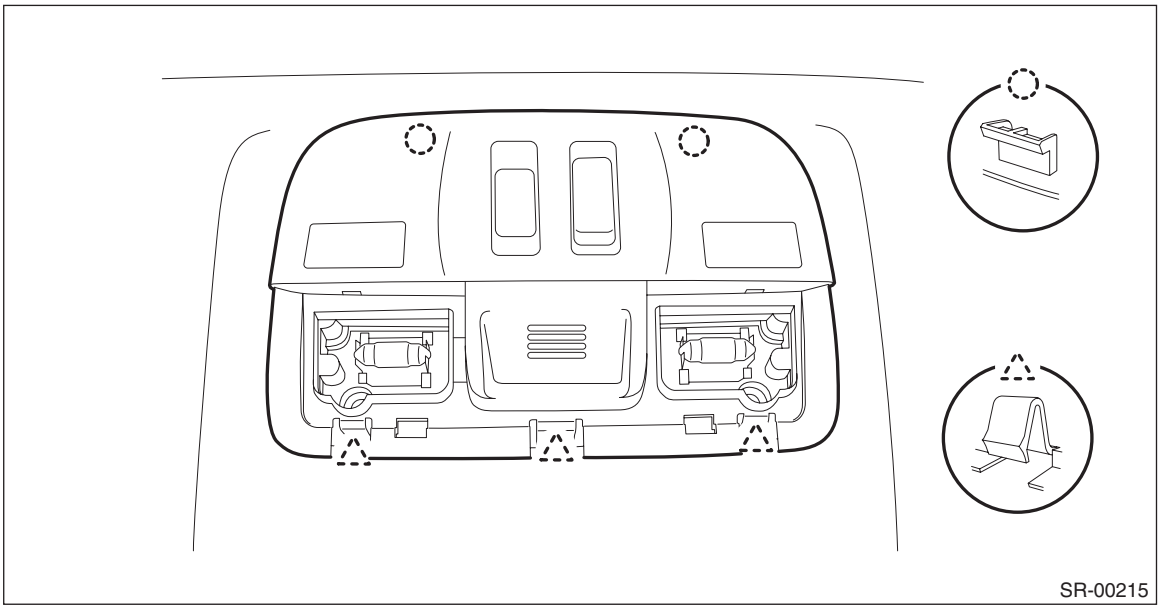
NOTE:
If the auto function is cancelled, perform the initialize operation. <Ref. to SR-6, INITIALIZE OPERATION, OPERATION, Sunroof Control System.>

# 7. Sunroof Switch

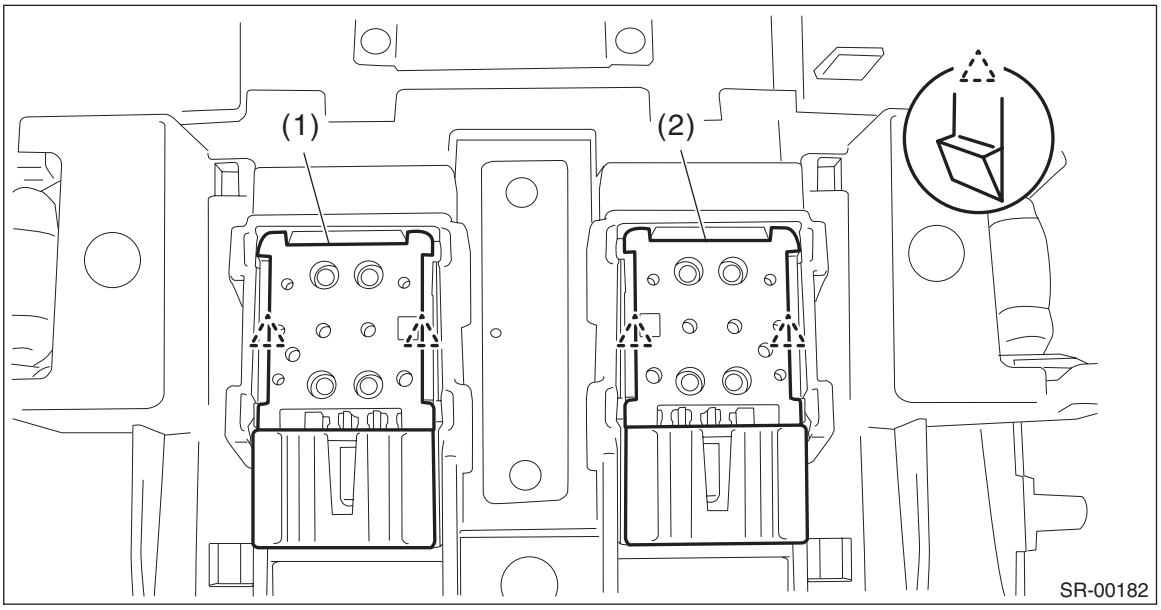
## A: REMOVAL

1) Disconnect the ground cable from battery.
2) Remove the light assembly - map.
   (1) Remove the lens and detach the screws.

   (2) Release the clips and pull out the light assembly - map to disconnect the connectors.



3) Release the claws and remove the sunroof switch from the light assembly - map.



(1) Sunroof switch (tilt)
(2) Sunroof switch (slide)

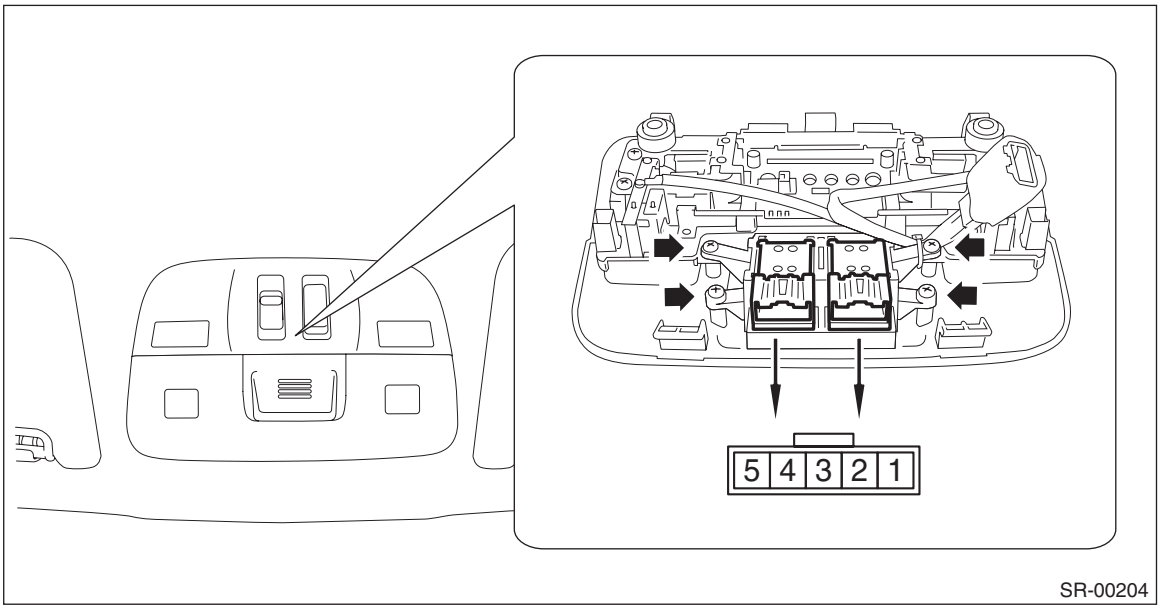
## B: INSTALLATION

Install each part in the reverse order of removal.

## C: INSPECTION

1) Remove the light assembly - map.
2) Disconnect the harness connector of sunroof switch.
3) Check the resistance between sunroof switch terminals.

***PREPARATION TOOL:***
***Circuit tester***



| Terminal No. | Inspection conditions | Standard | Connector No. |
|---|---|---|---|
| 1 — 3 | Open | Less than 1 Ω | R128 |
| 4 — 3 | Close | Less than 1 Ω | |
| 1 — 3 | Tilt up | Less than 1 Ω | R187 |
| 4 — 3 | Tilt down | Less than 1 Ω | |

4) Replace the sunroof switch if the inspection result is not within the standard.

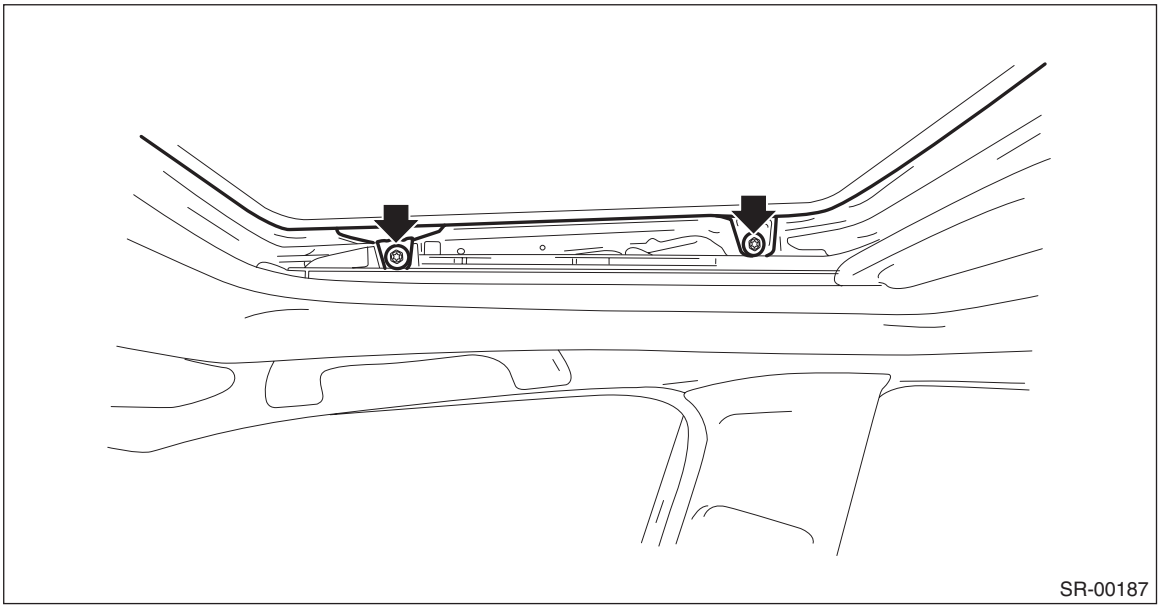
# 8. Sunshade

## A: REMOVAL

1) Remove the lid assembly - sunroof.
   (1) Completely close the lid assembly - sunroof, and open the sunshade assembly.
   (2) Remove the TORX® bolt, and then remove the lid assembly - sunroof.

**CAUTION:**
**Be careful not to damage the lid assembly - sunroof.**

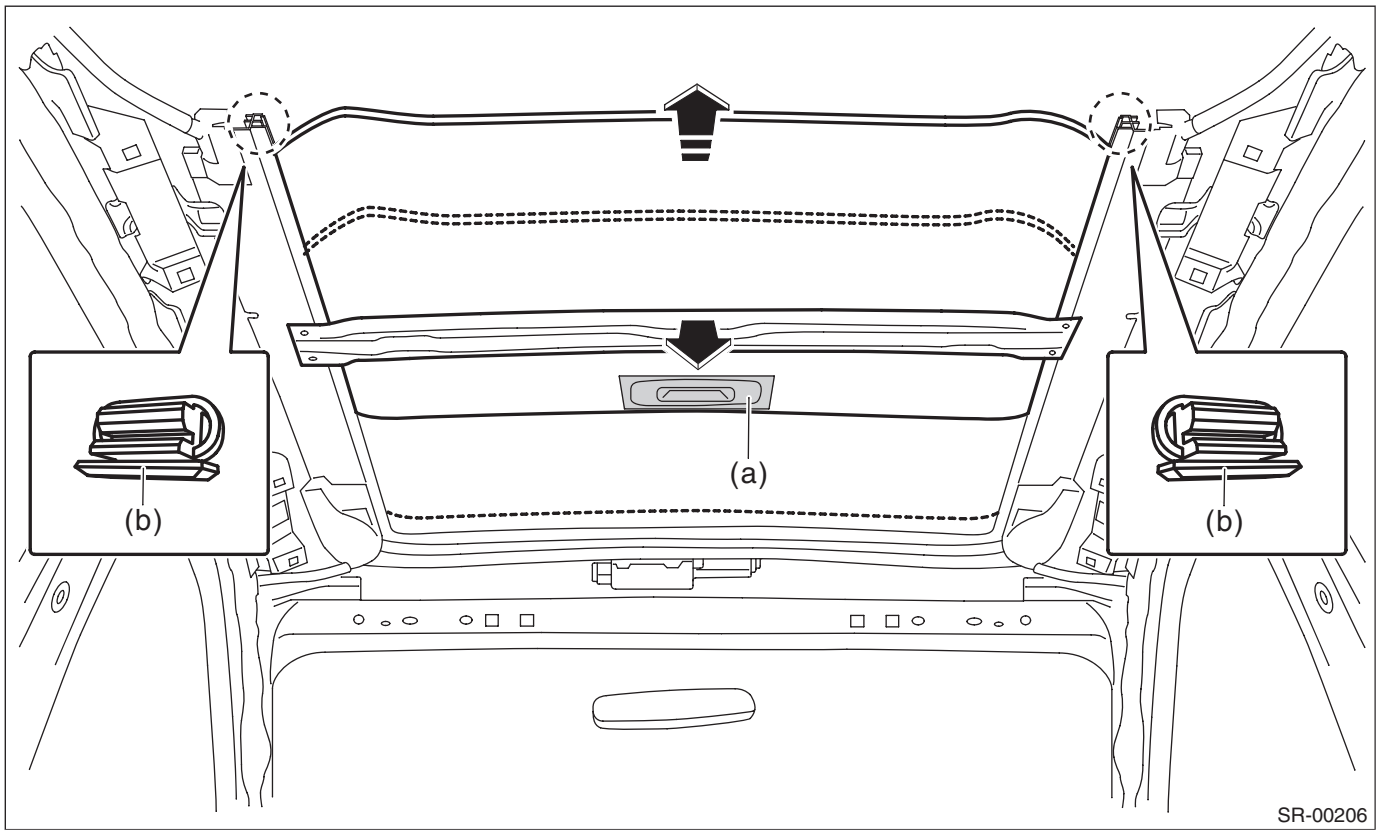
***PREPARATION TOOL:***
***TORX® T25***



2) Remove the trim panel - roof assembly. <Ref. to EI-121, REMOVAL, Roof Trim.>

3) Remove the sunshade assembly.
   (1) Attach protective tape (a) on the handle of sunshade assembly.
   (2) Remove the left and right stoppers (b).
   (3) Remove the sunshade assembly while pulling the center of the brace downward.

**CAUTION:**
**Be careful not to damage the sunshade assembly.**



## B: INSTALLATION

Install each part in the reverse order of removal.

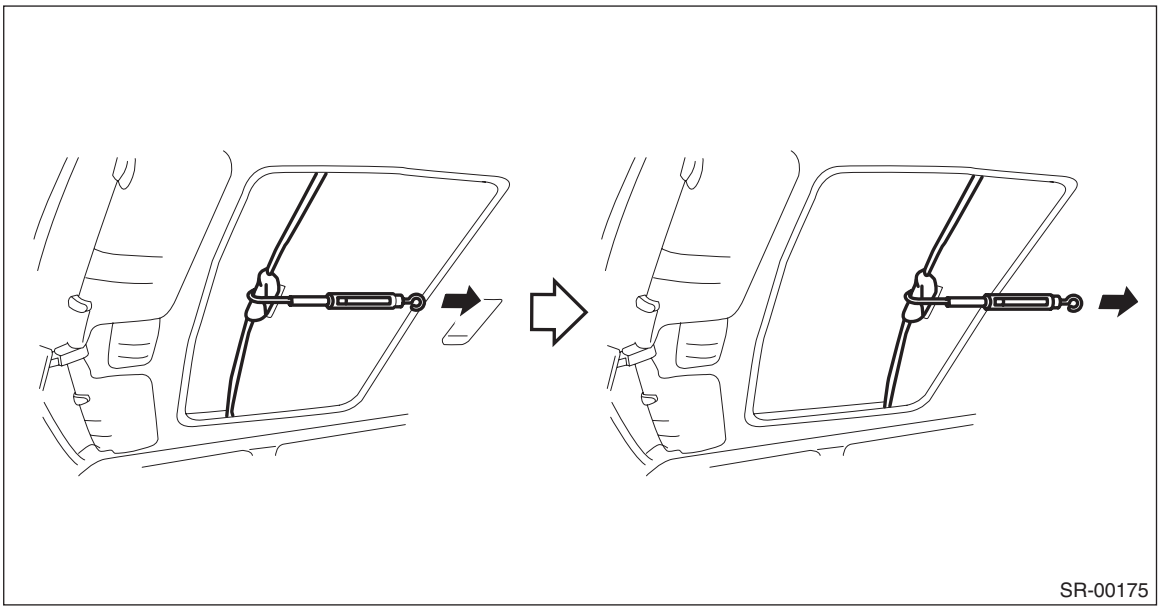
***Tightening torque:***
***Refer to "COMPONENT" of "General Description". <Ref. to SR-2, COMPONENT, General Description.>***

# C: INSPECTION

## 1. MOVING LOAD OF SUNSHADE ASSEMBLY

1) Attach a spring scale together with a cloth to the edge of sunshade assembly.
2) Pull the spring scale to check the moving load of the sunshade assembly.

***Moving load of sunshade assembly:***
***14±6 N (1.43 kgf, 3.1 lbf±0.61 kgf, 1.3 lbf)***



NOTE:
Moving load is larger at the beginning of pulling a spring scale, so take a spring scale reading while the sunshade assembly is sliding smoothly.
3) If the inspection result exceeds the standard, check the sunshade assembly or the rail assembly - sunroof for improper installation, and replace if necessary.

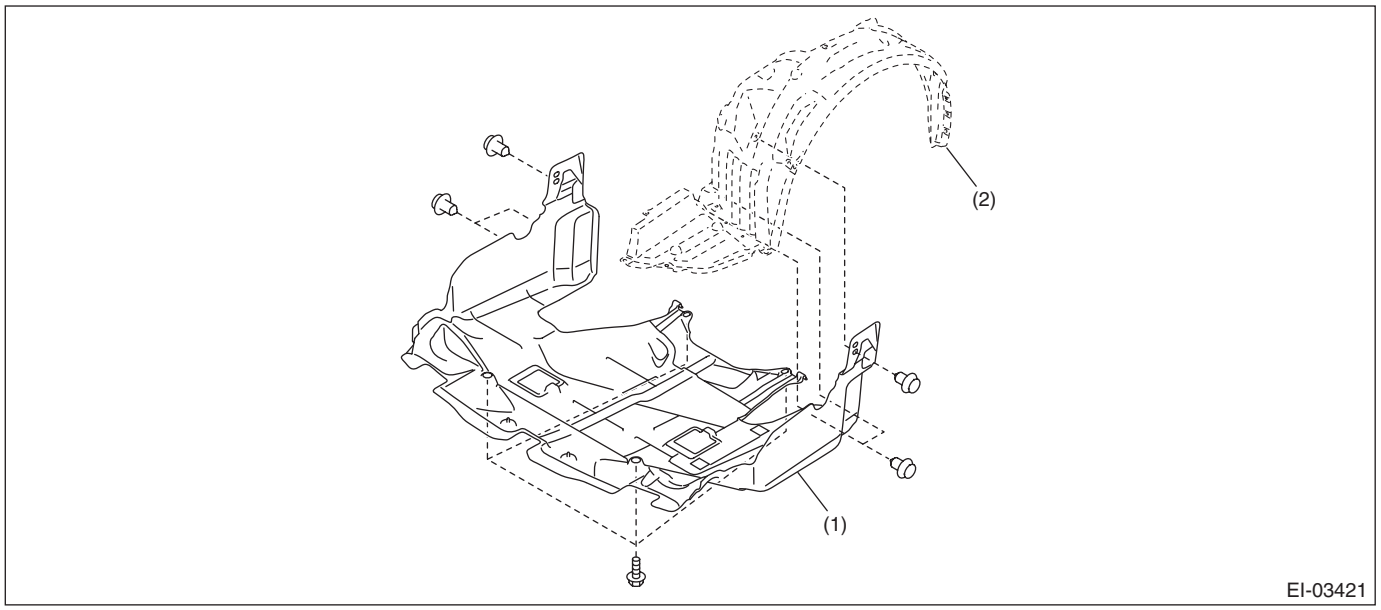
## B: PREPARATION TOOL

| TOOL NAME | REMARKS |
|---|---|
| Clip remover | Used for removing trim.<br>• KTC AP201-10A<br>• KTC AP201-N<br>• KTC AP203-10A<br>• KTC AP20L-10B<br>or equivalent |
| Clip clamp pliers | Used for removal of various clips and clamps.<br>• KTC CCP-190<br>or equivalent |

# 2. Front Under Cover

## A: REMOVAL

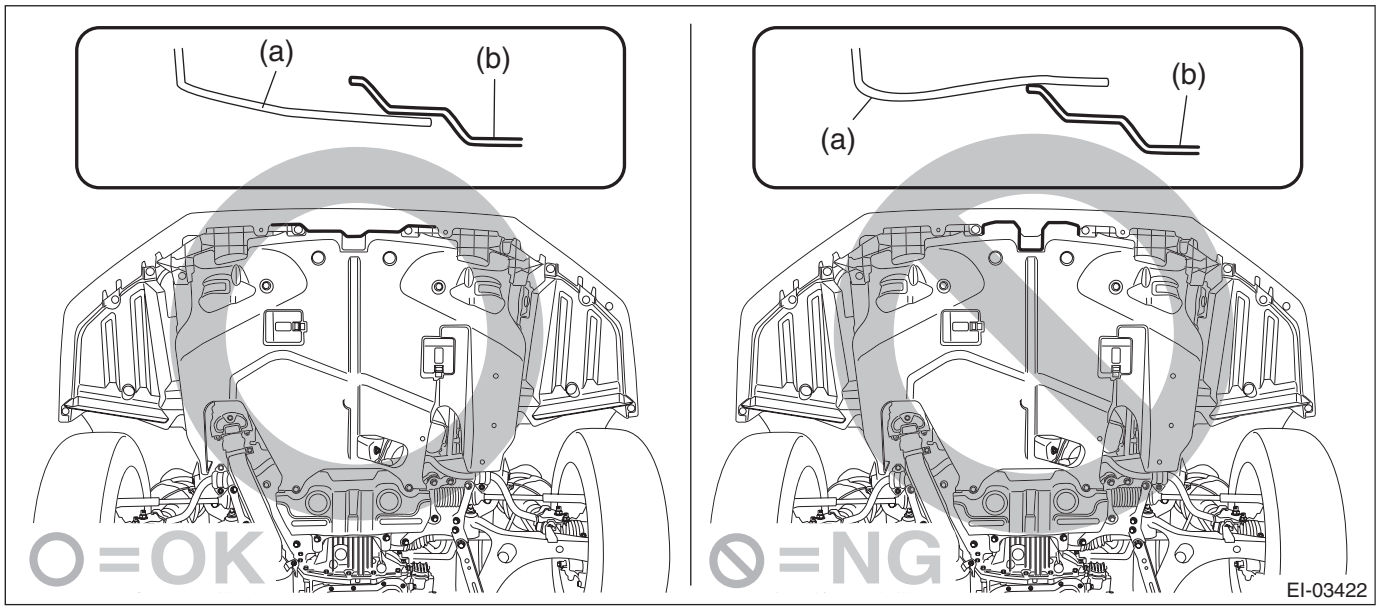
1) Lift up the vehicle.
2) Remove the bolts and clips, and remove the under cover - front.



(1) Under cover - front
(2) Mud guard - front

## B: INSTALLATION

**CAUTION:**
**Install the under cover so that the under cover front end (b) comes inside of the bumper face - front (a).**



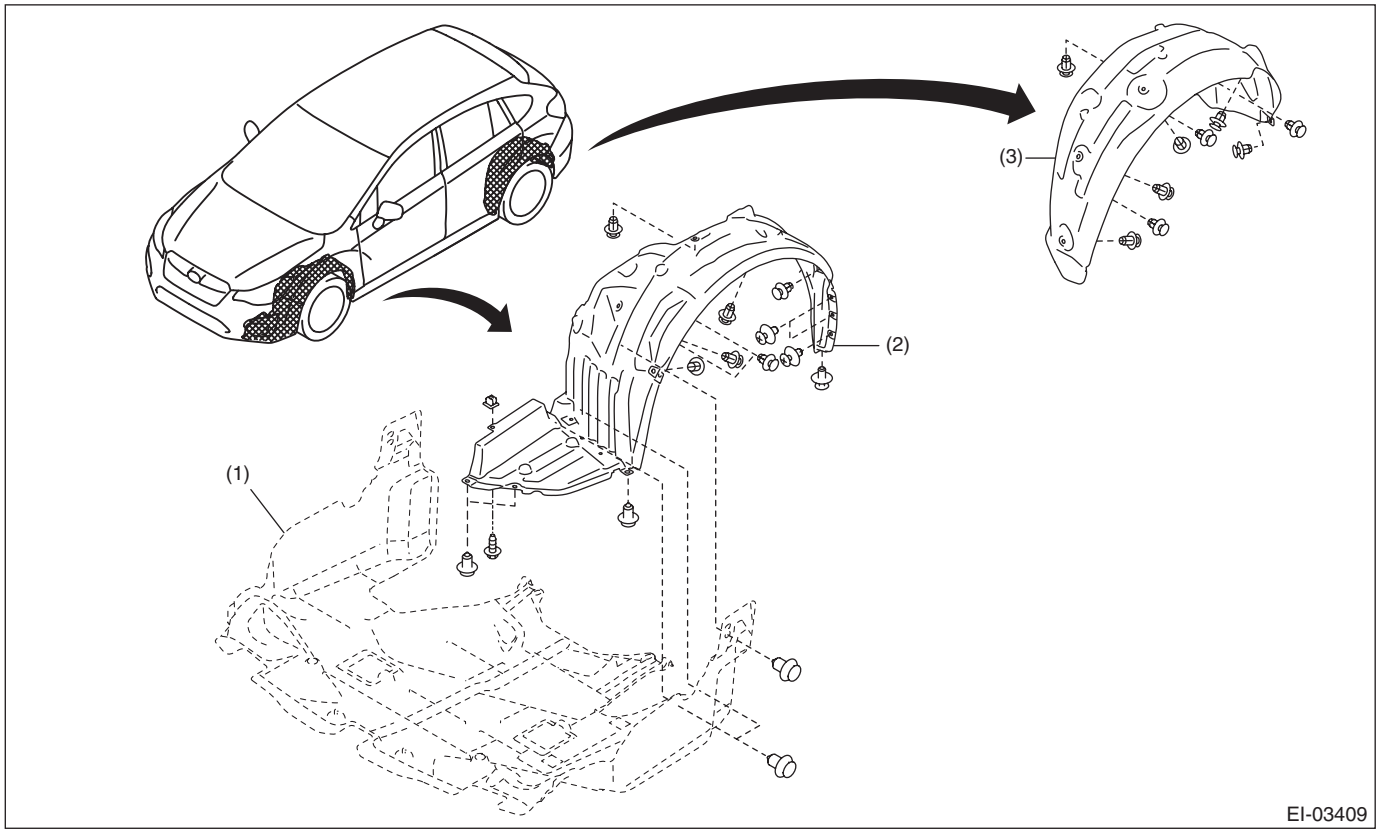
Install each part in the reverse order of removal.

***Tightening torque:***
***18 N·m (1.84 kgf-m, 13.3 ft-lb)***

# 3. Mud Guard

## A: REMOVAL

1) Lift up the vehicle.
2) Remove the wheels.
3) Remove the screws and clips to remove the mud guard.



(1) Under cover - front
(2) Mud guard - front
(3) Mud guard - rear

## B: INSTALLATION

Install each part in the reverse order of removal.

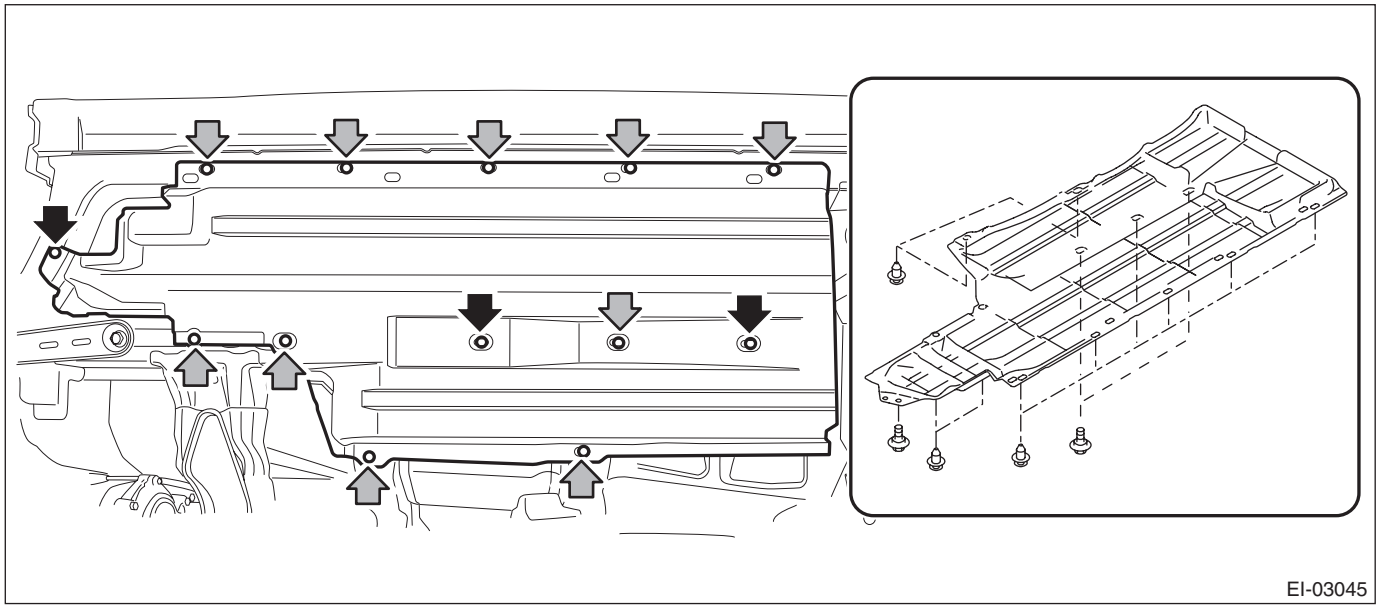
***Tightening torque:***
***Wheel nut: 120 N·m (10.24 kgf-m, 88.5 ft-lb)***

# 4. Floor Under Protector

## A: REMOVAL

1) Lift up the vehicle.

NOTE:
A plate type lift cannot be used.
2) Remove the bolts and clips, and remove the front under protector.



## B: INSTALLATION

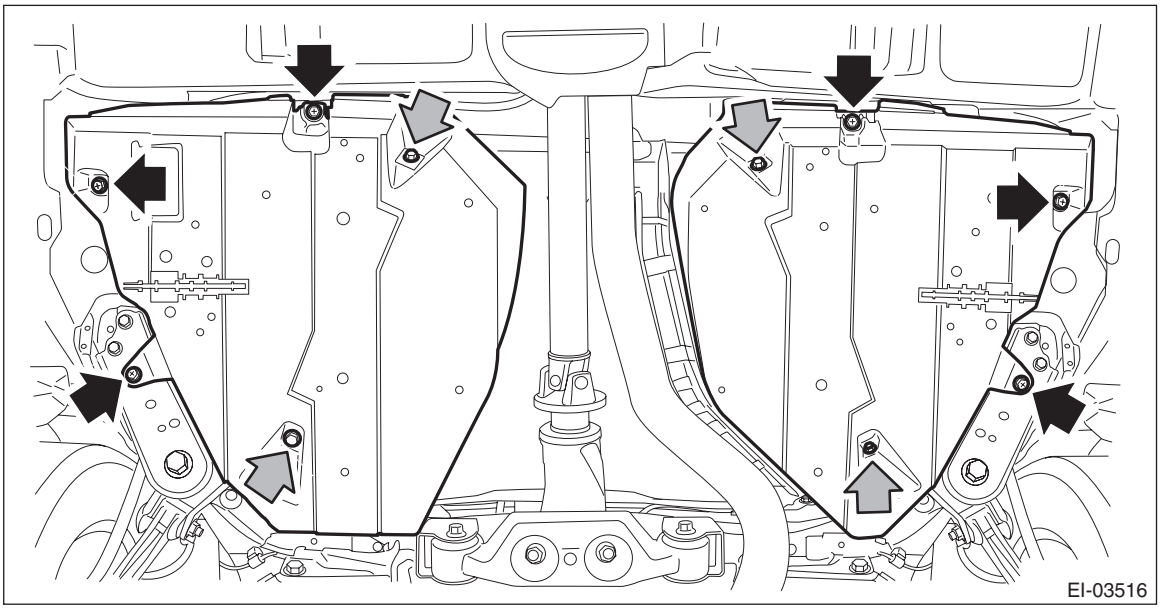
Install each part in the reverse order of removal.

***Tightening torque:***
***7.5 N·m (0.76 kgf-m, 5.5 ft-lb)***

# 5. Fuel Tank Protector

## A: REMOVAL

1) Lift up the vehicle.
2) Remove the bolts and nuts and remove the fuel tank protector.



## B: INSTALLATION

**CAUTION:**
**Do not reuse the nut (self locking nut). Always replace with a new part.**
Install each part in the reverse order of removal.

***Tightening torque:***
***Refer to "COMPONENT" of "General Description". <Ref. to EI-3, FUEL TANK PROTECTOR, COMPONENT, General Description.>***

# 6. Front Grille

## A: REMOVAL

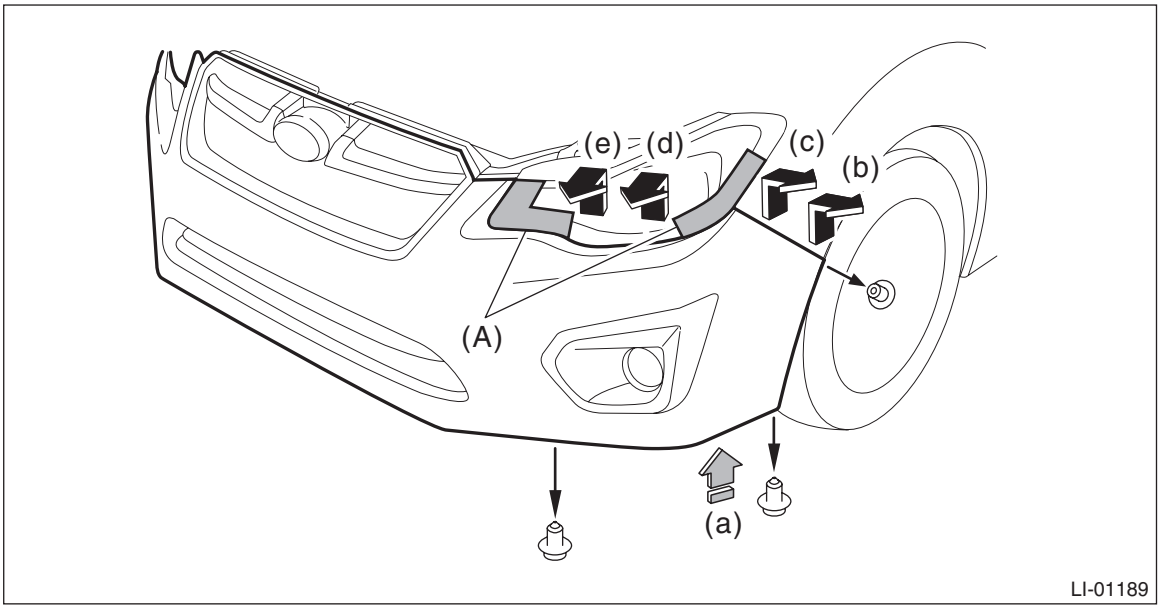
1) Remove the bumper face - front.
   (1) Remove the screws and clips, and turn over the mud guard - front, and then disconnect the connectors of the fog light assembly - front on the LH and RH sides. (Model with fog light)

   (2) Remove the clips at the upper side of the bumper face - front.
   (3) Remove the clips from the fender.
   (4) Remove the clips at the lower side of the bumper face - front.

   (5) Apply protective tape (A) to the light assembly - head.

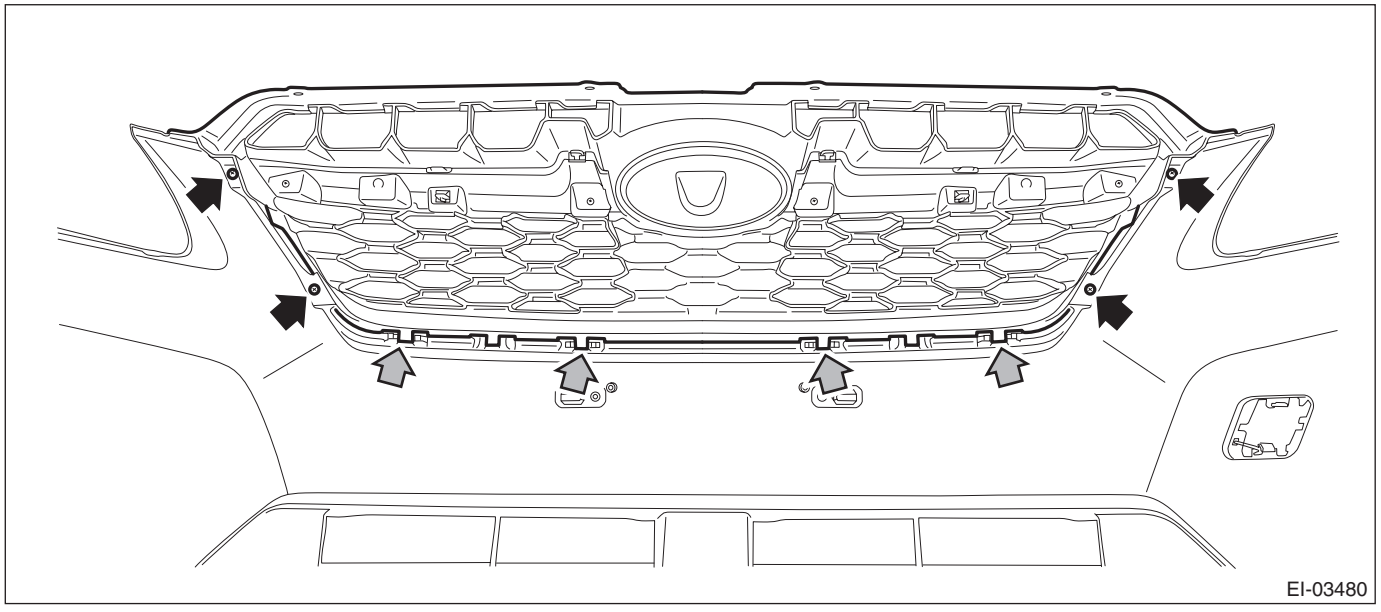
(6) Release the clips, and while pushing up the lower side (a) of the bumper face - front, remove in the order from (b) to (e).

**CAUTION:**
**Do not pull forcibly. It may damage the flange sections of the bumper face - front.**



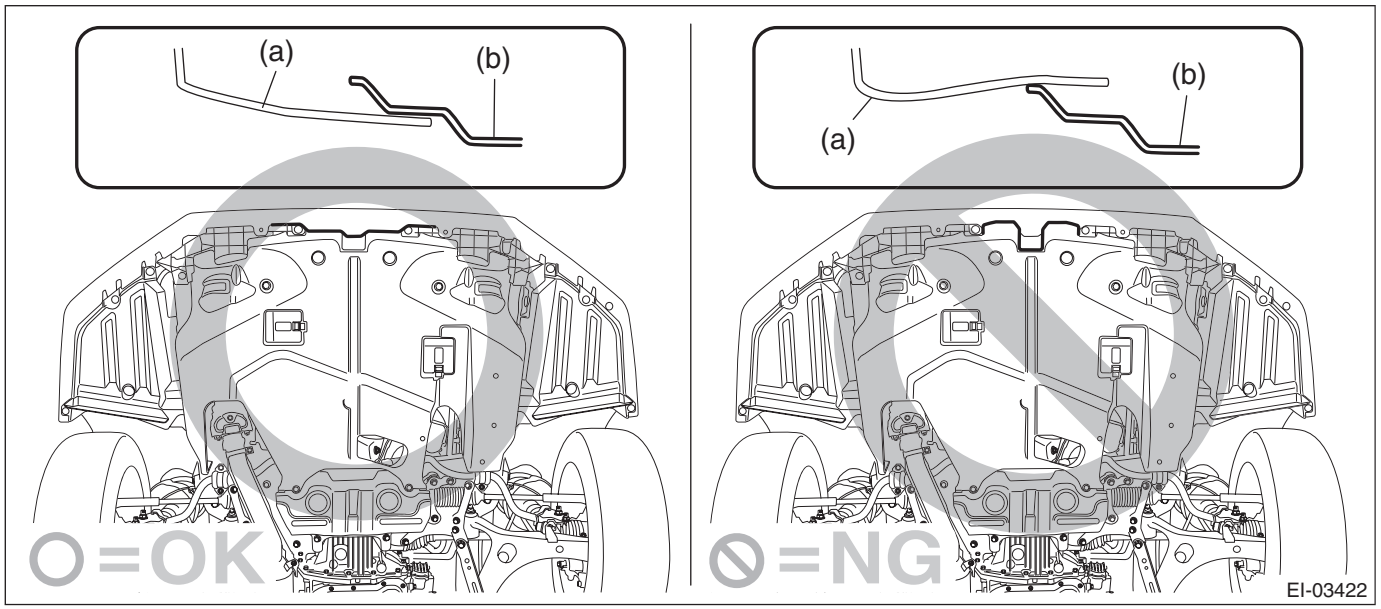
NOTE:
Detach the opposite side in the same manner.

2) Remove the front grille assembly.
(1) Remove the screws from the back side of the bumper face - front.
(2) Release the claws, and remove the front grille assembly.



## B: INSTALLATION

**CAUTION:**
**Install the bumper face - front so that the front end of the under cover (b) comes inside the bumper face - front (a).**



1) Install each part in the reverse order of removal.
2) Adjust the fog light beam. (model with fog light) <Ref. to LI-54, FOG LIGHT AIMING, ADJUSTMENT, Front Fog Light Assembly.>

# 7. Front Bumper

## A: REMOVAL

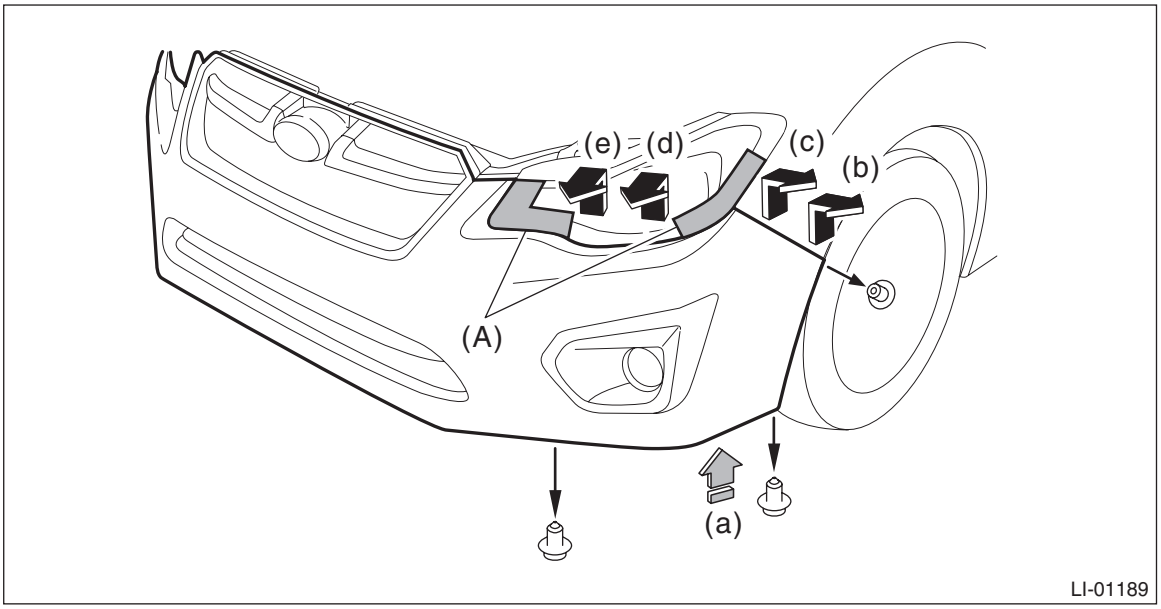
1) Disconnect the ground cable from battery.
2) Remove the bumper face - front.
   (1) Remove the screws and clips, and turn over the mud guard - front, and then disconnect the connectors of the fog light assembly - front on the LH and RH sides. (Model with fog light)

   (2) Remove the clips at the upper side of the bumper face - front.
   (3) Remove the clips from the fender.
   (4) Remove the clips at the lower side of the bumper face - front.

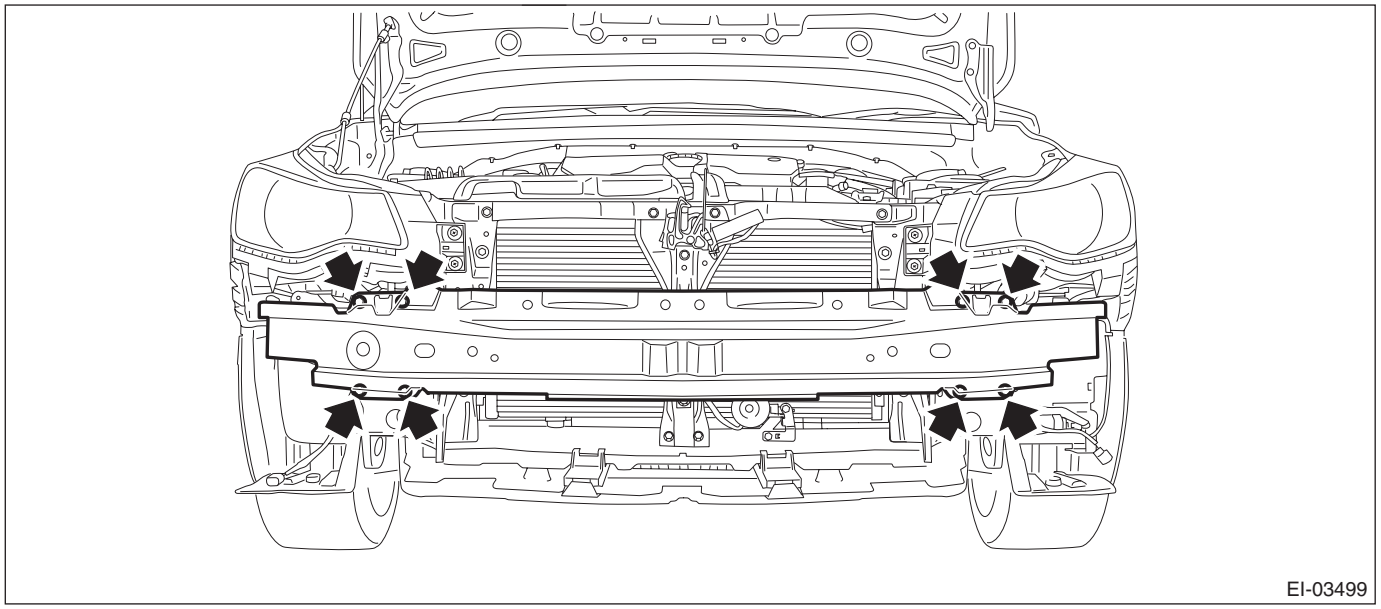
   (5) Apply protective tape (A) to the light assembly - head.

(6) Release the clips, and while pushing up the lower side (a) of the bumper face - front, remove in the order from (b) to (e).

**CAUTION:**
**Do not pull forcibly. It may damage the flange sections of the bumper face - front.**

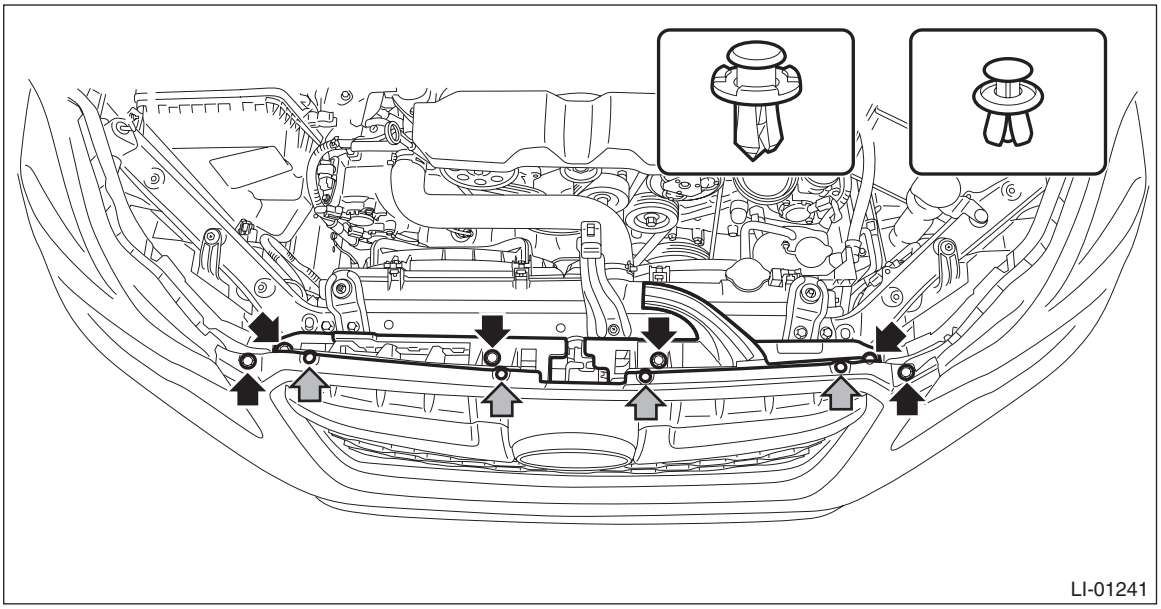


NOTE:
Detach the opposite side in the same manner.
3) Remove the bolts, and remove the bumper beam COMPL - front.



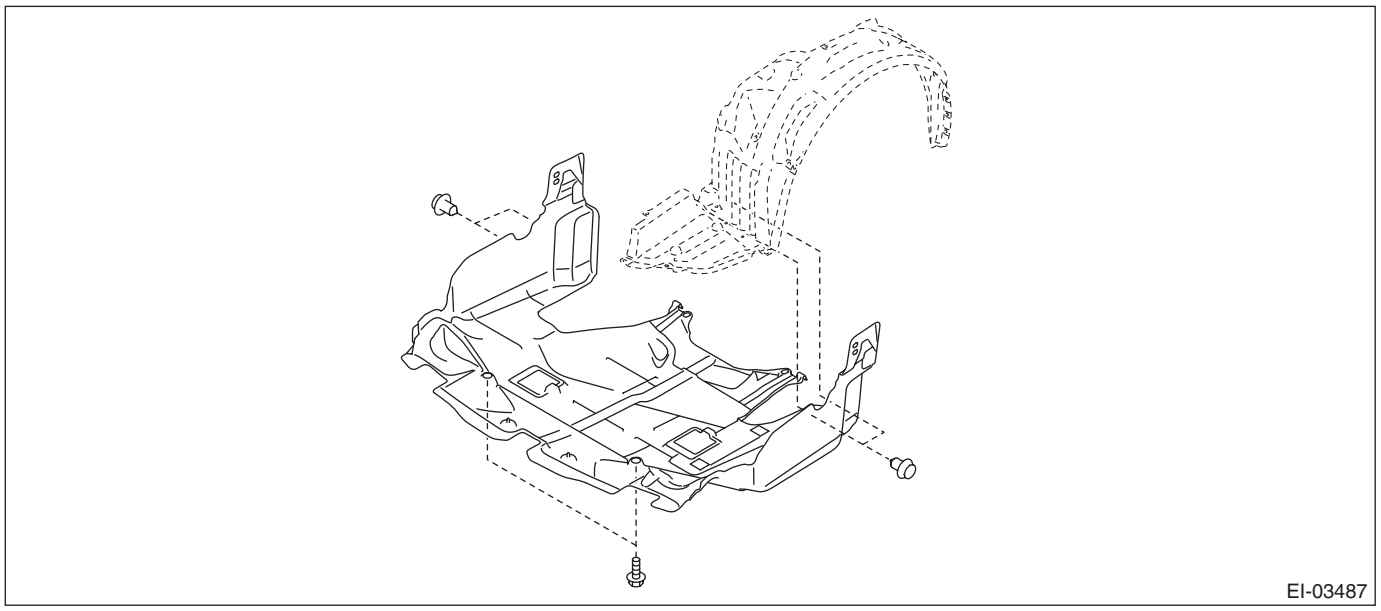
4) Remove the clip, and remove the bracket - grille.

**CAUTION:**
**To prevent damage to the bracket - grille, make sure to remove all clips.**

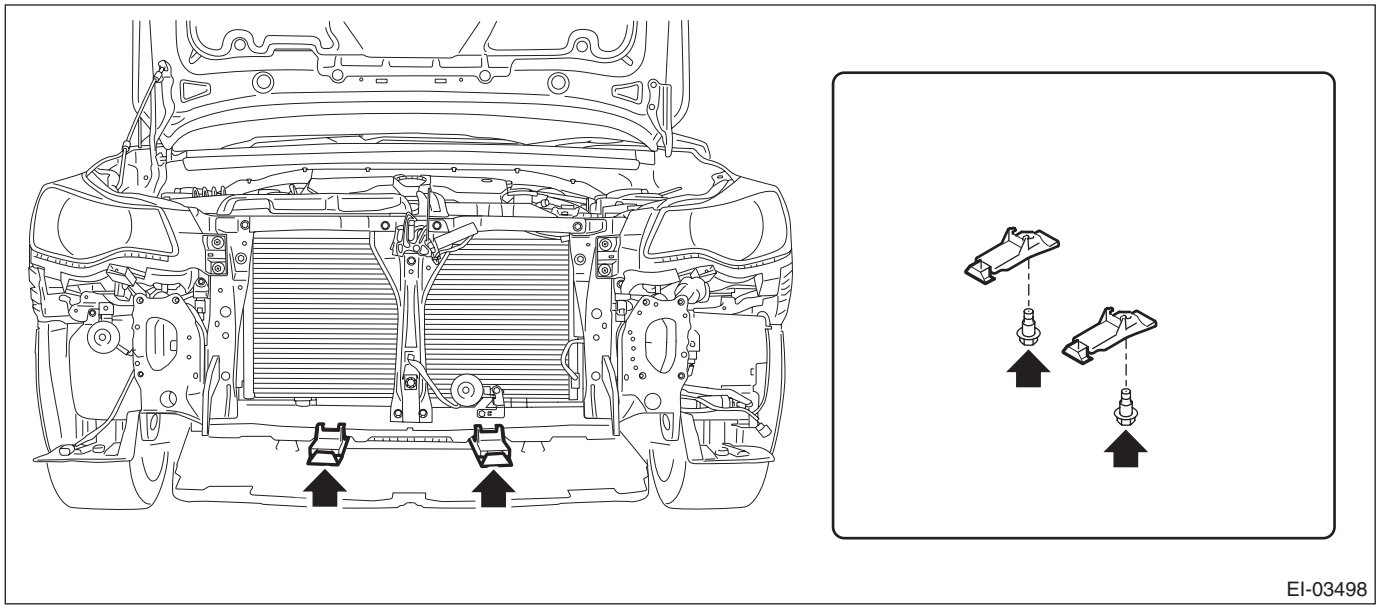


NOTE:
The bracket - grille can be removed without removing the bumper face - front.

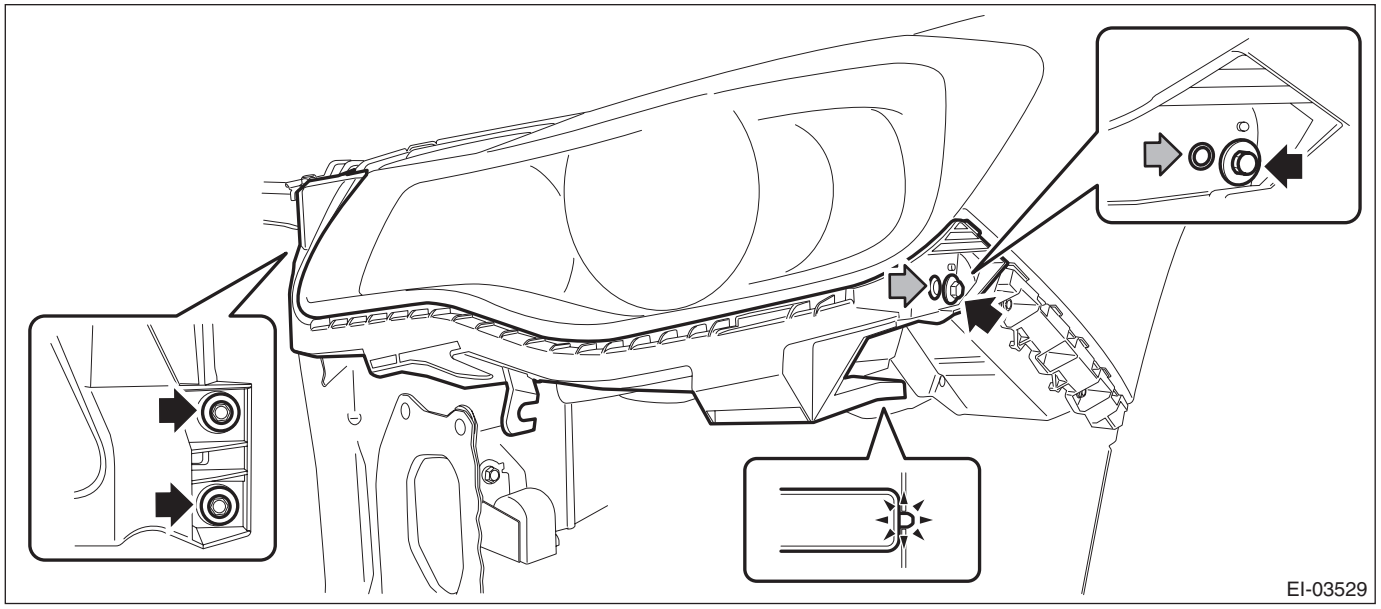
5) Remove the bracket - front center LWR.
(1) Remove the bolts and clips, and turn over the under cover - front.



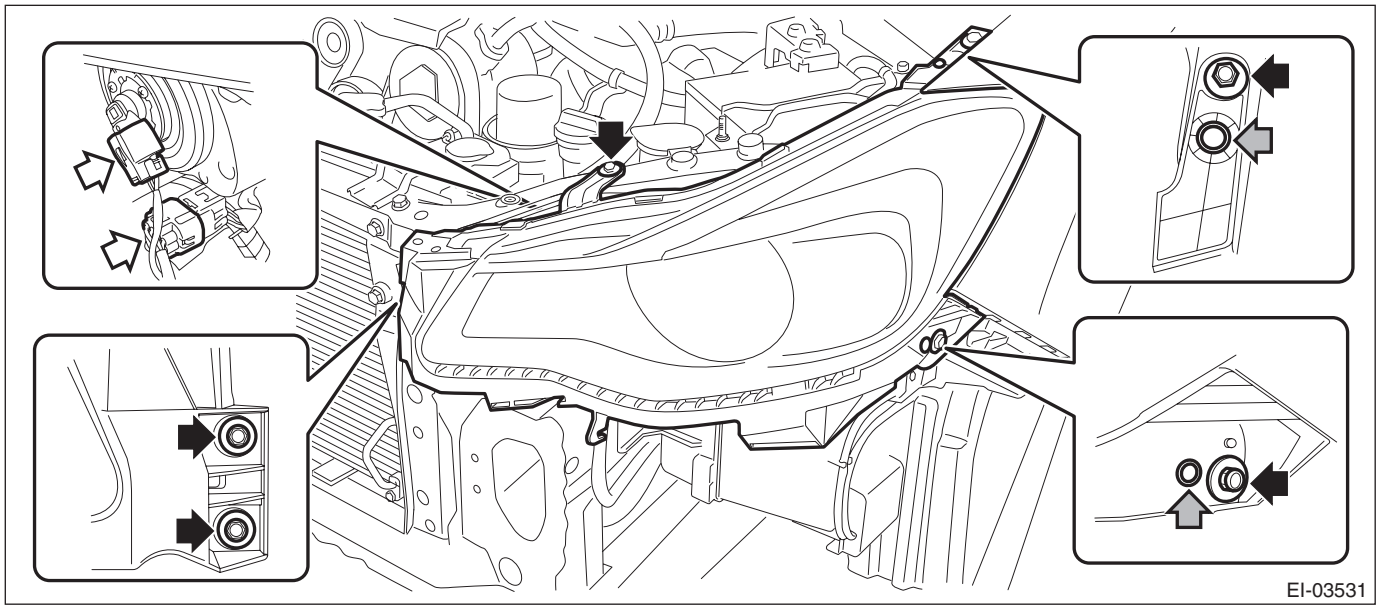
(2) Remove the bolts, and remove the bracket - front center LWR.



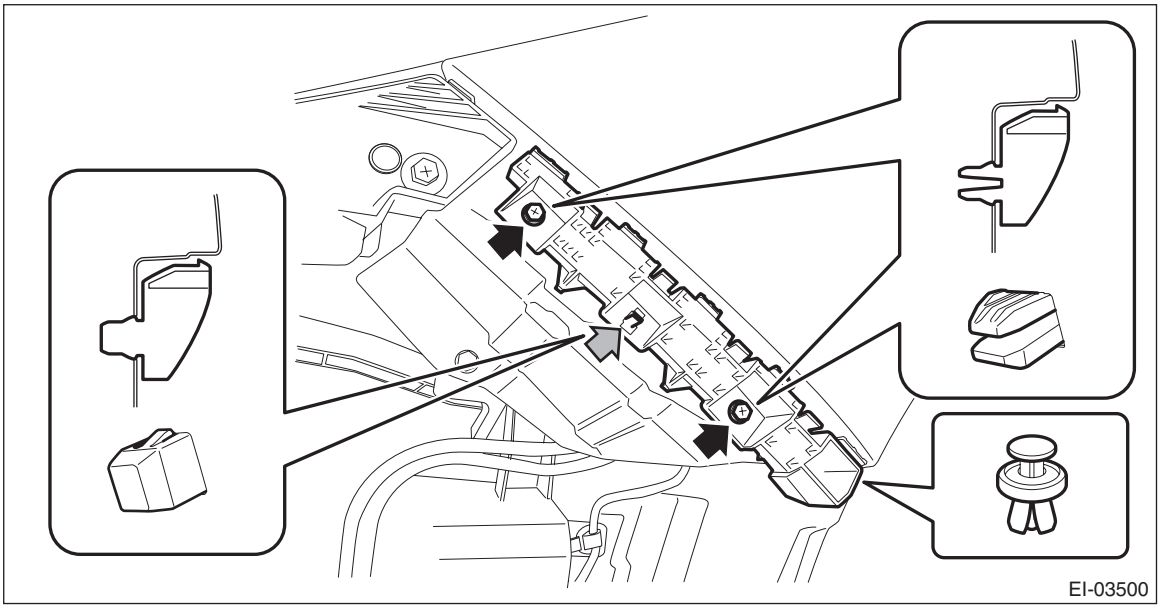
6) Remove the bolts and clips, and remove the bracket - front bumper corner.



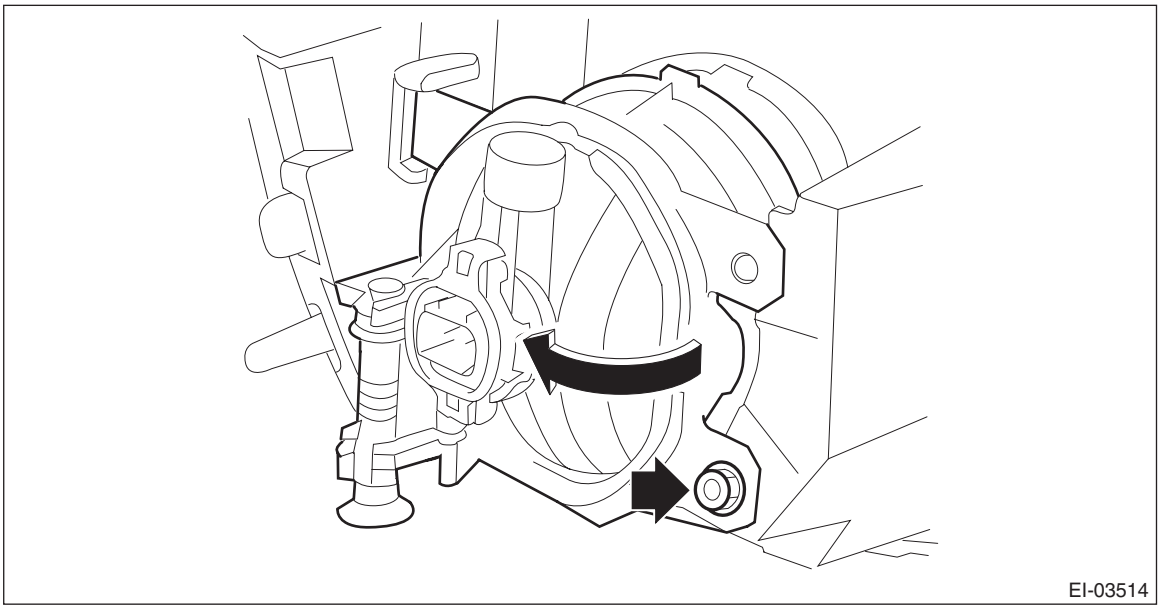
7) Remove the bracket - front bumper side.
(1) Remove the bolts and clips, and remove the light assembly - head and the bracket - front bumper corner.



(2) Remove the screws.
(3) Remove the claws from behind the fender COMPL - front, and remove the bracket - front bumper side.



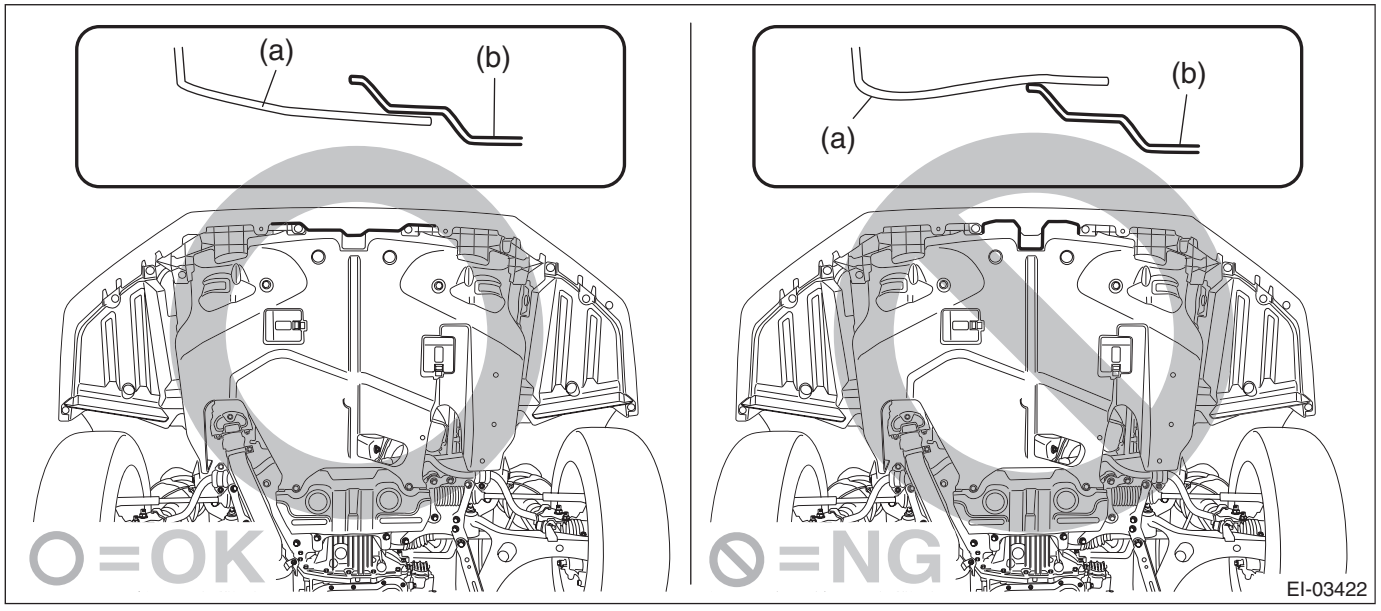
8) Remove the bolt and pin, and remove the fog light assembly - front.



## B: INSTALLATION

1) Install each part in the reverse order of removal.
2) Secure the flange section of the bumper face - front to the bracket - front bumper side.

**CAUTION:**
**Install the bumper face - front so that the front end of the under cover (b) comes inside the bumper face - front (a).**



***Tightening torque:***
***Refer to "COMPONENT" of "General Description". <Ref. to EI-4, FRONT BUMPER, COMPONENT, General Description.>***

3) Install each part in the reverse order of removal.
4) Adjust the headlight beam and fog light beam.
• Adjust the headlight beam. <Ref. to LI-34, HEADLIGHT BEAM ADJUSTMENT, ADJUSTMENT, Headlight Assembly.>
• Adjust the fog light beam. (model with fog light) <Ref. to LI-54, FOG LIGHT AIMING, ADJUSTMENT, Front Fog Light Assembly.>

# C: REPAIR

## 1. COATING METHOD FOR PP BUMPER

| Process No. | Process name | Job contents | |
|---|---|---|---|
| 1 | Bumper installation | Place the bumper on a paint worktable as required. Use the paint worktable conforming to inner shape of bumper if possible. |  EI-00234<br>(1) Bumper<br>(2) Set bumper section |
| 2 | Masking | Mask specified part (black base) with masking tape. Use masking tape for PP. | |
| 3 | Degreasing/ cleaning | Clean all parts to be painted with white gasoline, normal alcohol, etc. to remove dirt, oil, fat, etc. | |
| 4 | Primer paint | Apply primer to all parts to be painted, using spray gun. Use primer (clear). | |
| 5 | Drying | Dry at normal temperature. [10 — 15 min. at 20°C (68°F)]<br>In half-dried condition, PP primer paint is dissolved by solvent, e.g. thinner, etc.<br>Therefore, if dust or dirt must be removed, use ordinary alcohol etc. | |
| 6 | Top coat paint (I) | Non-colored | Metallic paint |
| | | Use section (block) paint for top coat.<br>For paint/hardener mixture, observe the specifications recommended by the manufacturers.<br>• Viscosity: 10 — 13 sec./20°C (68°F)<br>• Film thickness: 35 — 45 µ<br>• Spraying pressure: 245 — 343 kPa<br>(2.5 — 3.5 kgf/cm$^2$, 36 — 50 psi) | Use section (block) paint for top coat.<br>For paint/hardener mixture, observe the specifications recommended by the manufacturers.<br>• Viscosity: 10 — 13 sec./20°C (68°F)<br>• Film thickness: 15 — 20 µ<br>• Spraying pressure: 245 — 343 kPa<br>(2.5 — 3.5 kgf/cm$^2$, 36 — 50 psi) |
| 7 | Drying | Not required. | Dry at normal temperature [at least 10 min. at 20°C (68°F)].<br>In half-dried condition, avoid dust, dirt. |
| 8 | Top coat paint (II) | Not required. | Apply a clear coat to parts with top coat paint (I), three times at 5 — 7 minute intervals.<br>For paint/hardener mixture, observe the specifications recommended by the manufacturers.<br>• Viscosity: 14 — 16 sec./20°C (68°F)<br>• Film thickness: 25 — 30 µ<br>• Spraying pressure: 245 — 343 kPa<br>(2.5 — 3.5 kgf/cm$^2$, 36 — 50 psi) |
| 9 | Drying | 60°C (140°F), 60 min. or 80°C (176°F), 30 min.<br>If the temperature is higher than 80°C (176°F), PP may be deformed. Keep maximum temperature at 80°C (176°F) or less. | |
| 10 | Inspection | Check paint. | |
| 11 | Removal of masking | Remove the masking tape applied in procedure 2. | |

## 2. REPAIR INSTRUCTIONS FOR COLORED PP BUMPER

NOTE:
All PP bumpers are provided with a grained surface, and if the surface is damaged, it cannot normally be restored to its former condition. Damages limited to the shallow scratches that cause only a change in the luster of the base material or coating, can be almost fully restored. Before repairing a damaged area, explain this point to the customer and obtain an understanding about the matter.
Repair methods are outlined below, based on a classification of the extent of damage.
1) Minor damage causing only a change in the luster of the bumper due to a light touch
Almost restorable.

<table>
<tr><th>Process No.</th><th>Process name</th><th colspan="2">Job contents</th></tr>
<tr><td>1</td><td>Cleaning</td><td colspan="2">Clean the area to be repaired using water.</td></tr>
<tr><td>2</td><td>Sanding</td><td colspan="2">Grind the repairing area with #500 sand paper in a “feathering” motion.</td></tr>
<tr><td rowspan="3">3</td><td rowspan="3">Finish</td><td>Resin section</td><td>Coated section</td></tr>
<tr><td>Repeatedly apply wax to the affected area using soft cloth (such as flannel).<br>Recommended wax: Tire wax or equivalent</td><td rowspan="2">Perform either the same procedures as for the resin section or process No. 18 and subsequent in section 3), depending on the degree and nature of damage.</td></tr>
<tr><td>Polish the waxed area with clean cloth after 5 — 10 minutes.</td></tr>
</table>

2) Deep damage caused by scratching with fences etc.
A dent cannot be repaired but a whitened or swelled part can be removed.

<table>
<tr><th>Process No.</th><th>Process name</th><th colspan="2">Job contents</th></tr>
<tr><td>1</td><td>Cleaning</td><td colspan="2">Clean the damaged area with water.</td></tr>
<tr><td>2</td><td>Removal of damaged area</td><td colspan="2">Cut off protruding area, if any, due to collision, using a putty knife.</td></tr>
<tr><td>3</td><td>Sanding</td><td colspan="2">Grind the affected area with #100 — #500 sand paper.</td></tr>
<tr><td rowspan="2">4</td><td rowspan="2">Finish</td><td>Resin section</td><td>Coated section</td></tr>
<tr><td>Same as process No. 3 in section “1)”.</td><td>Perform process No. 12 and subsequent operations in section “3)”.</td></tr>
</table>

3) Deep damage such as a break or hole that requires filling
Much of the peripheral grained surface must be sacrificed for repair. The degree of restoration is not really worth the expense. (The surface, however, will become almost flush with adjacent areas.)

<table>
<tr><th>Process No.</th><th>Process name</th><th colspan="2">Job contents</th></tr>
<tr><td>1</td><td>Bumper removal</td><td colspan="2">Remove the bumper as required.</td></tr>
<tr><td>2</td><td>Removal of parts</td><td colspan="2">Remove the parts built into bumper as required.</td></tr>
<tr><td>3</td><td>Bumper placement</td><td>Place the bumper on a paint worktable as required.<br>It is recommended to use the paint worktable conforming to internal shape of bumper.</td><td> 
EI-00234<br>(1) Bumper<br>(2) Set bumper section</td></tr>
<tr><td>4</td><td>Surface preparation</td><td colspan="2">Remove dust, oil, etc. from areas to be repaired and surrounding areas, using a suitable solvent (white gasoline or alcohol, etc.).</td></tr>
<tr><td>5</td><td>Cutting</td><td>If the damage is a crack or a hole, cut a guide slit of 20 to 30 mm (0.79 to 1.18 in) in length along the crack or hole to the depth of the bumper base surface. Next, use a knife or grinder to carve a V-shaped groove in the area for repair.</td><td> 
EI-00235<br>(1) Paint surface<br>(2) PP base surface<br>(3) 20 — 30 mm (0.79 — 1.18 in)<br>(4) 3 mm (0.12 in)</td></tr>
<tr><td>6</td><td>Sanding (I)</td><td colspan="2">Grind beveled surface with sand paper (#40 — #60) to smooth finish.</td></tr>
<tr><td>7</td><td>Cleaning</td><td colspan="2">Clean the sanded surface with the same solvent as used in process No. 4.</td></tr>
<tr><td rowspan="2">8</td><td rowspan="2">Temporary welding</td><td colspan="2">Grind the side just opposite the beveled area with sand paper (#40 — #60) and clean using a solvent.<br>Temporarily spot-weld the side, using PP welding rod and heater gun.</td></tr>
<tr><td colspan="2"> 
EI-00236<br>(1) Welded point (Use heater gun and PP welding rod)<br>(2) PP base surface<br>(3) Beveled section<br>NOTE:<br>• Do not melt welding rod until it flows out. This results in reduced strength.<br>• Leave the welded spot unattended until it cools completely.</td></tr>
</table>

| Process No. | Process name | Job contents |
|---|---|---|
| 9 | Welding | Using a heater gun and PP welding rod, weld the beveled spot while melting both the rod and damaged area.<br>  <br><br>EI-00237<br>(1) Welding rod<br>(2) Melt hatched area<br>(3) Section<br>NOTE:<br>• Melt the sections indicated by hatched area.<br>• Do not melt the welding rod until it flows out, in order to provide strength.<br>• Always keep the heater gun 1 to 2 cm (0.4 to 0.8 in) away from the welding spot.<br>• Leave the welded spot unattended until it cools completely. |
| 10 | Sanding (II) | Remove excess part of weld with a putty knife. If a drill or disc wheel is used instead of the knife, operate it at a rate less than 1,500 rpm and grind the excess part little by little. A higher rpm will cause the PP substrate to melt from the heat.<br> <br>EI-00042<br>Sand the welded spot smooth with #240 sand paper. |
| 11 | Masking | Mask the black substrate section using masking tape. |
| 12 | Cleaning/ degreasing | Completely clean the entire coated area, using solvent similar to that used in process No. 4. |
| 13 | Primer coating | Apply a coat of primer for bumpers to the repaired surface and its surrounding areas. Mask these areas, if necessary.<br>NOTE:<br>Be sure to apply a coat of primer using a spray gun at a pressure of 245 — 343 kPa (2.5 — 3.5 kgf/cm$^2$, 36 — 50 psi). |
| 14 | Leave unattended | Leave the repaired area unattended at 20°C (68°F) for 10 to 15 minutes until primer is half-dry.<br>NOTE:<br>If dirt or dust comes in contact with the coated area, wipe it off with a cloth dampened with alcohol. (Do not use thinner since the coated area tends to melt.) |
| 15 | Surfacer coating | Apply a coat of surfacer for PP bumpers to the repaired area two or three times at an interval of 3 — 5 minutes.<br>For surfacer/hardener mixture, viscosity and paint thickness, observe the specifications of the surfacers to be used. |
| 16 | Drying | Allow the coated surface to dry for 20 minutes at 20°C (68°F) [or 30 minutes at 60°C (140°F)]. |
| 17 | Sanding (III) | Sand the coated surface and its surrounding areas using #400 sand paper and water. |
| 18 | Cleaning/ degreasing | Same as process No. 12. |

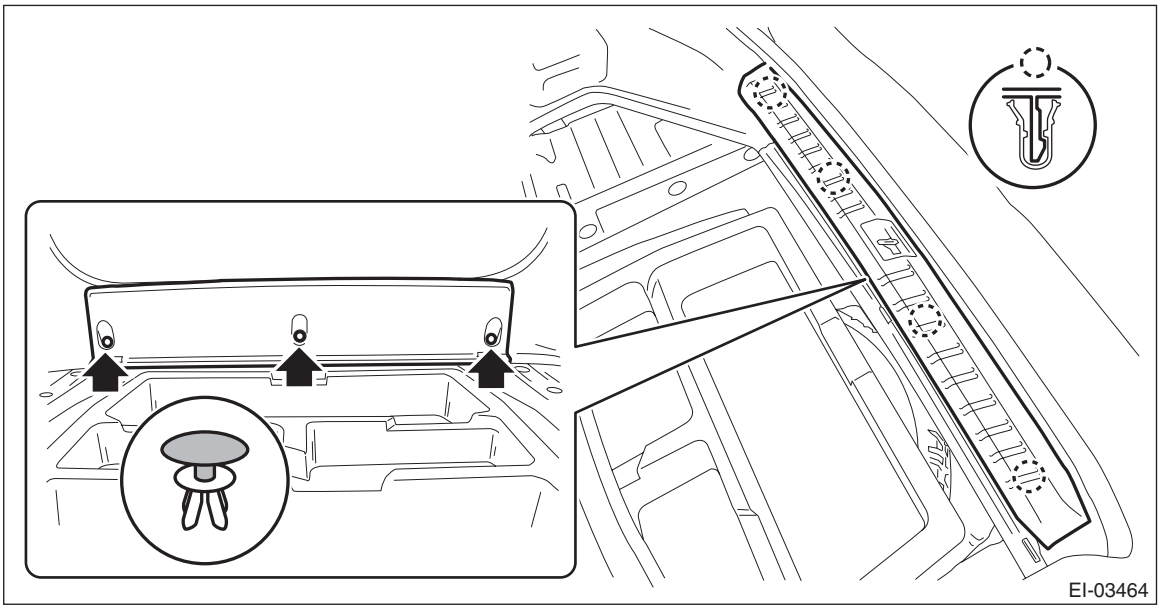
| Process No. | Process name | Job contents | |
|---|---|---|---|
| | | Non-colored | Metallic paint |
| 19 | Top coat (I) | Use a “block” coating method.<br>For paint/hardener mixture, observe the specifications recommended by the manufacturers.<br>• Viscosity: 11 — 13 sec./20°C (68°F)<br>• Coating film thickness: 40 — 50 µ<br>• Spraying pressure: 245 — 343 kPa (2.5 — 3.5 kgf/cm$^2$, 36 — 50 psi) | Use a “block” coating method.<br>For paint/hardener mixture, observe the specifications recommended by the manufacturers.<br>• Viscosity: 11 — 13 sec./20°C (68°F)<br>• Coating film thickness: 20 — 30 µ<br>• Spraying pressure: 245 — 343 kPa (2.5 — 3.5 kgf/cm$^2$, 36 — 50 psi) |
| 20 | Leave unattended | Not required. | Leave unattended at 20°C (68°F) for at least 10 minutes until the topcoated area is half-dry.<br>NOTE:<br>Be careful to keep dust or dirt from coming in contact with the affected area. |
| 21 | Top coat (II) | Not required. | Apply a clear coat three times at an interval of 3 to 5 minutes.<br>For paint/hardener mixture, observe the specifications recommended by the manufacturers.<br>• Viscosity: 10 — 13 sec./20°C (68°F)<br>• Coating film thickness: 20 — 30 µ<br>• Spraying pressure: 245 — 343 kPa (2.5 — 3.5 kgf/cm$^2$, 36 — 50 psi) |
| 22 | Drying | Allow the coated surface to dry for two hours at 20°C (68°F) or 30 minutes at 60°C (140°F).<br>NOTE:<br>Do not allow the temperature to exceed 80°C (176°F) since this will deform the PP substrate. | |
| 23 | Inspection | Carefully check the condition of the repaired area. | |
| 24 | Removal of masking | Remove the masking tape applied in process No. 11 and 13. | |
| 25 | Parts installation | Install parts on the bumper in reverse order of removal. | |
| 26 | Bumper installation | Install the bumper. | |

# 8. Rear Bumper

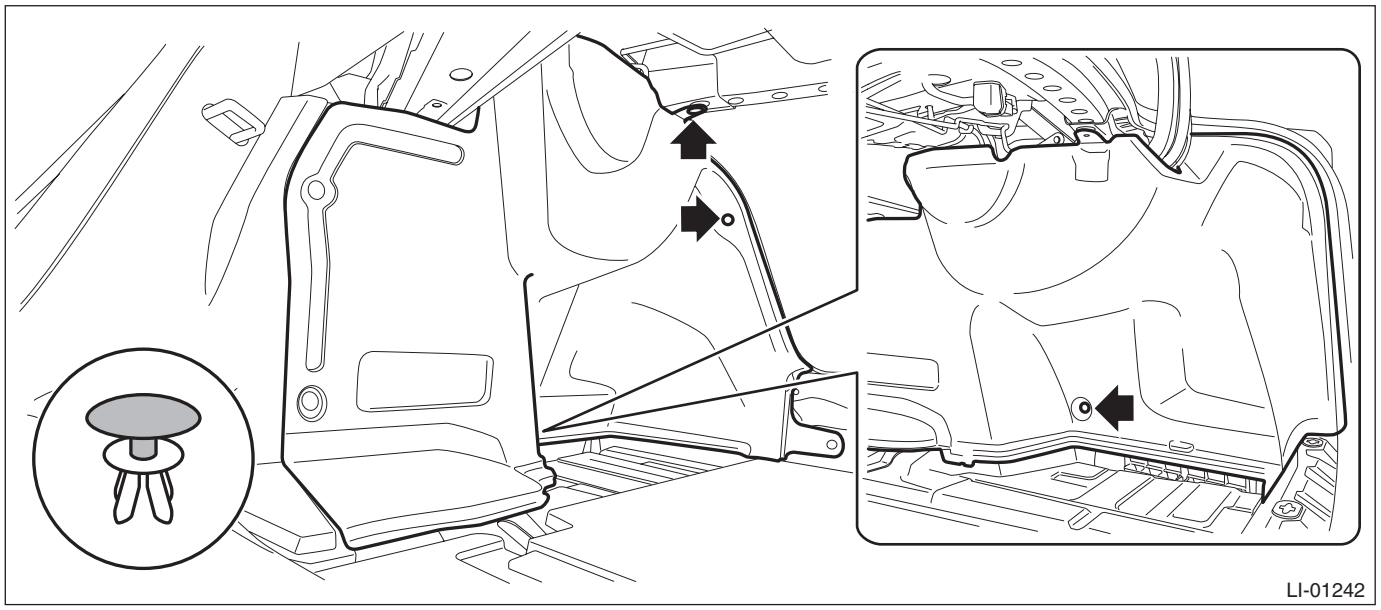
## A: REMOVAL

### 1. 4 DOOR MODEL

1) Disconnect the ground cable from battery.
2) Remove the trunk room mat.
3) Remove the trim panel - trunk rear.
   (1) Remove the clip.
   (2) Release the claws, and remove the trim panel - trunk rear.

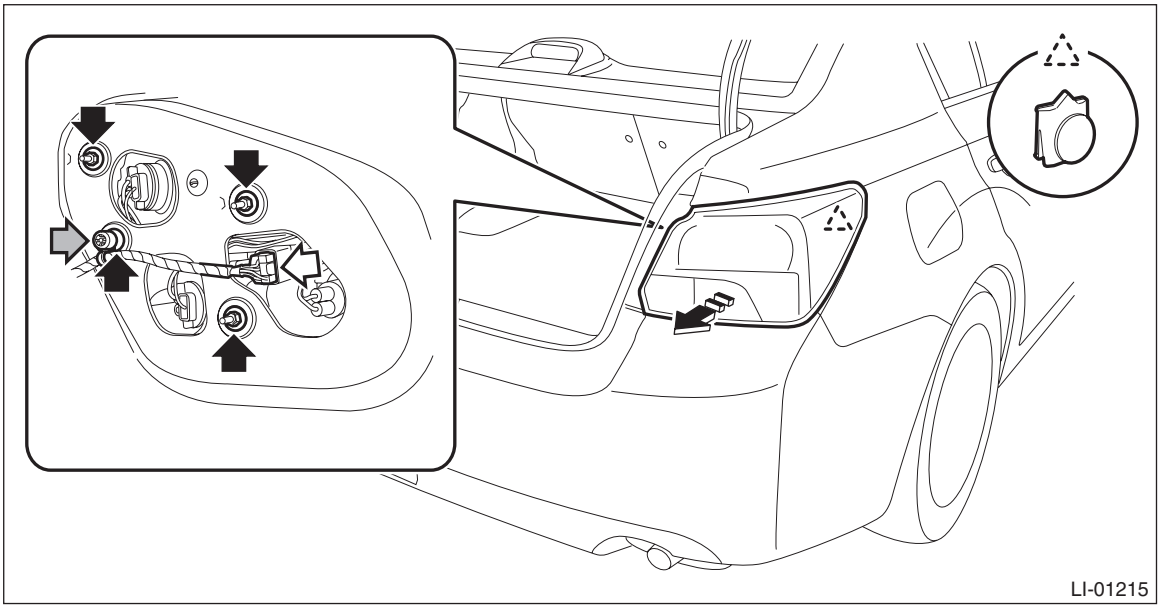


4) Remove the clips, and turn over the trim panel - trunk side.

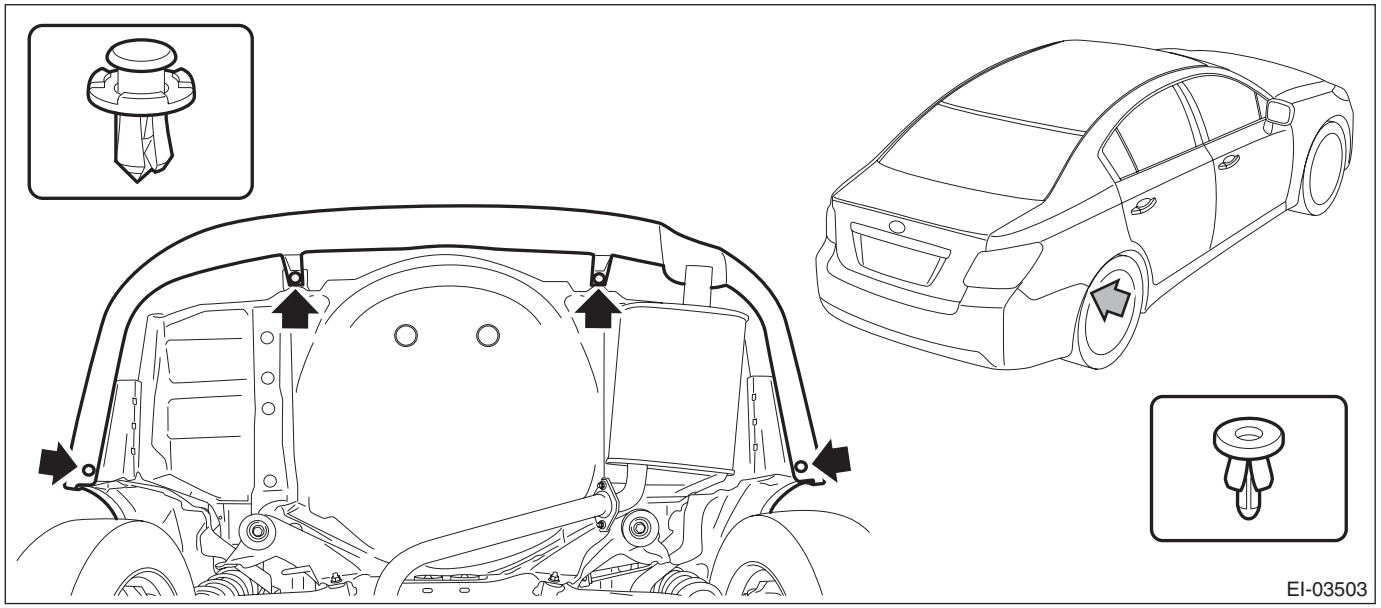


5) Remove the light assembly - rear combination.
(1) Remove the harness clamp and connector.
(2) Release the nuts and clips, then remove the light assembly - rear combination.

**CAUTION:**
**Be careful not to damage the clips.**



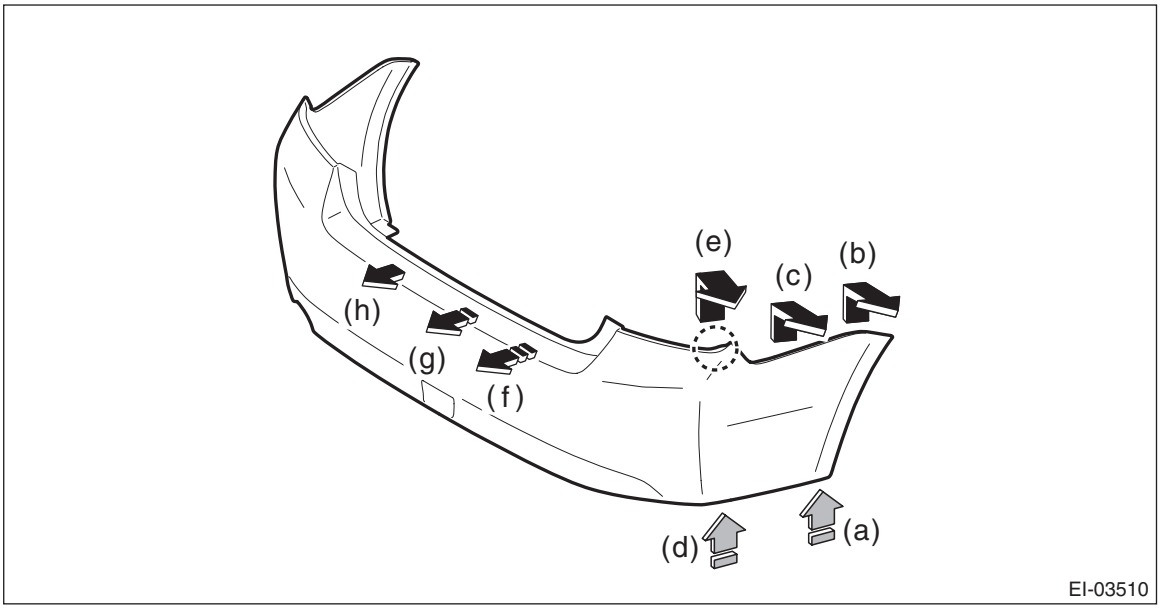
6) Remove the bumper face - rear.
(1) Remove the clips inside the wheel housing.
(2) Remove the clips at the lower side of the bumper face - rear.



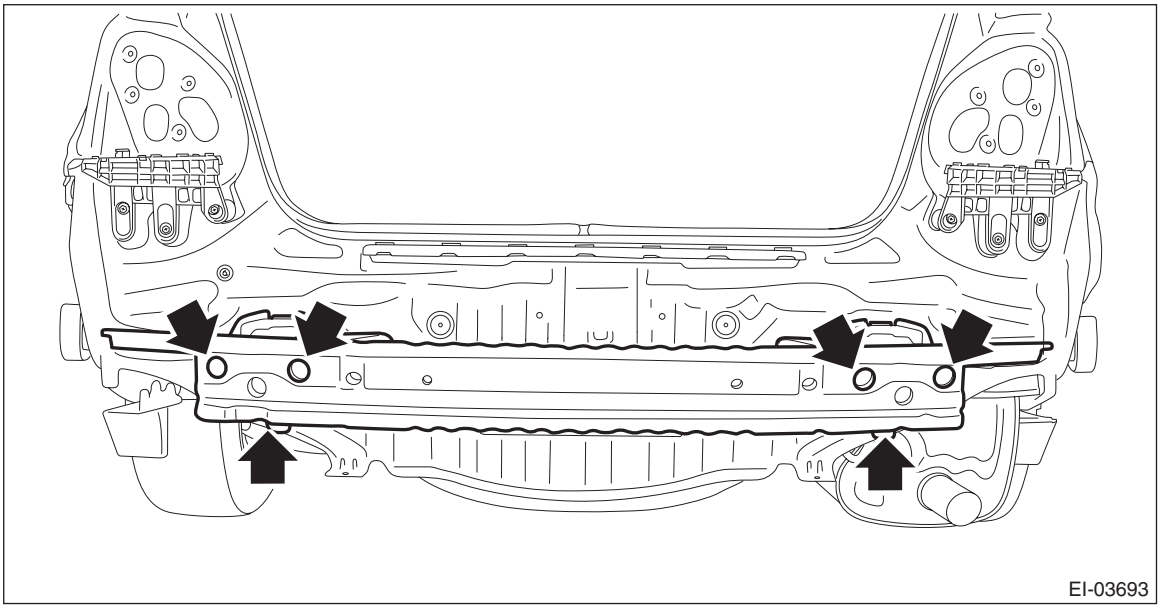
(3) Detach (b) and (c) while pulling up (a) of the bumper face - rear.
(4) Detach (e) while pulling up (d) of the bumper face - rear.
(5) Detach the opposite side in the same manner.

(6) Detach in order from (f) to (h) while pulling up the center part of the bumper face - rear.

**CAUTION:**
**Pulling with excessive force may damage the bracket.**

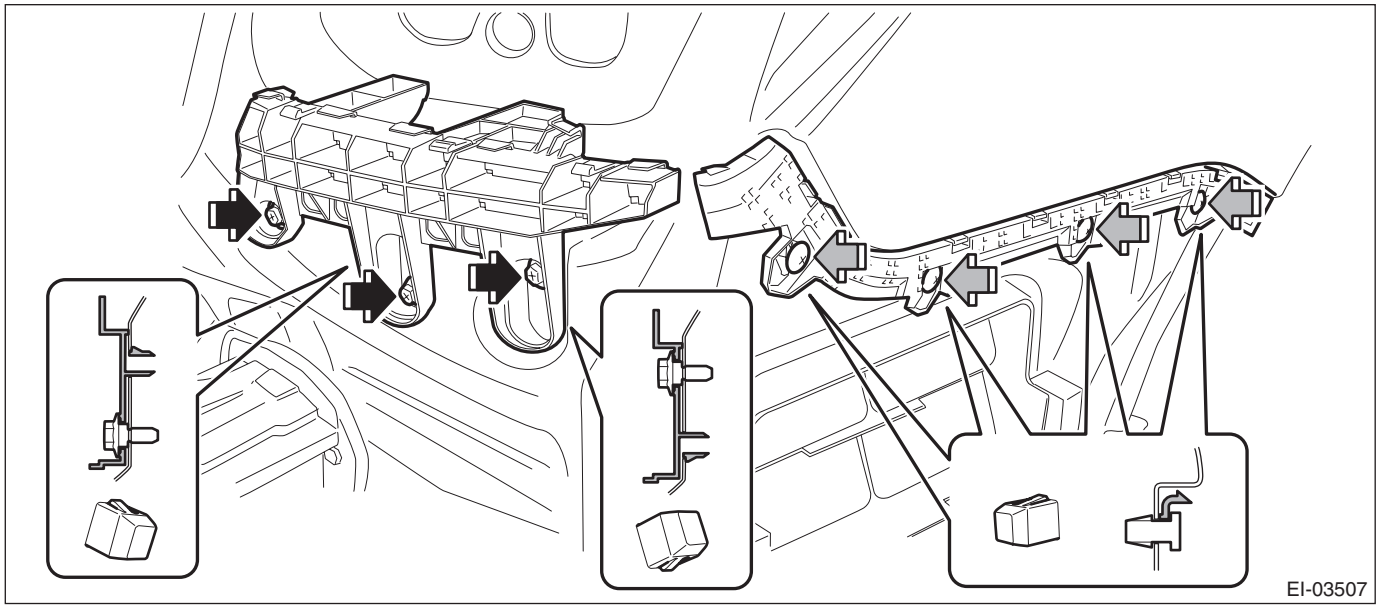


7) Remove the bolts and nuts, and remove the bumper beam COMPL - rear.



NOTE:
After all nuts are removed, raise the bumper beam COMPL - rear a little to remove it from vehicle body.

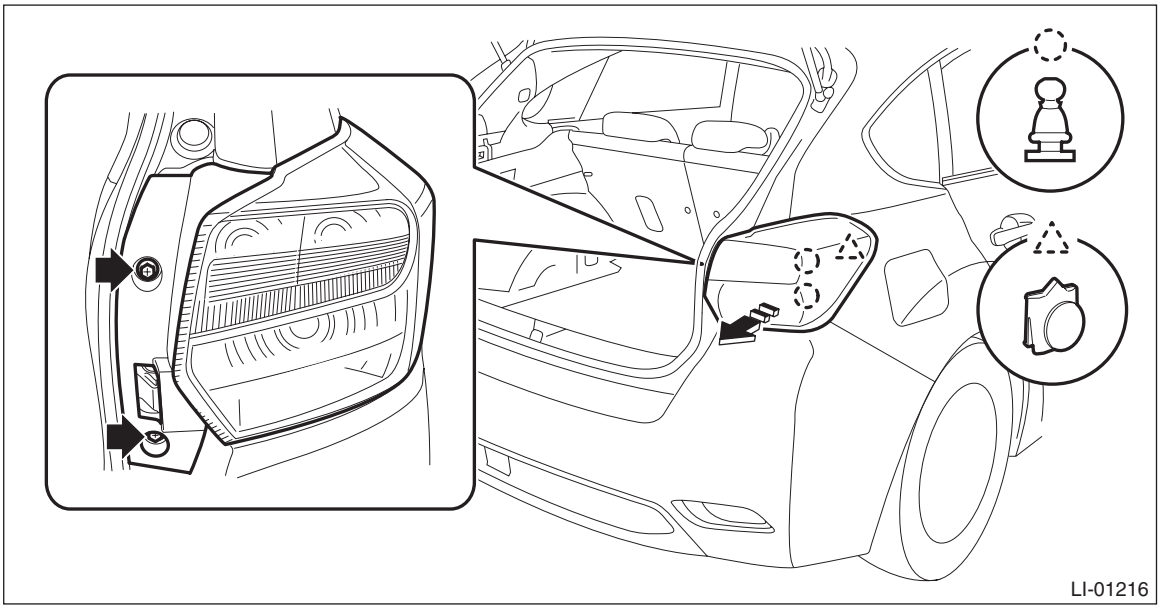
8) Remove bumper brackets.
(1) Remove the screws.
(2) Turn over the trim panel - trunk side, and detach the claw of the clip from the back side.



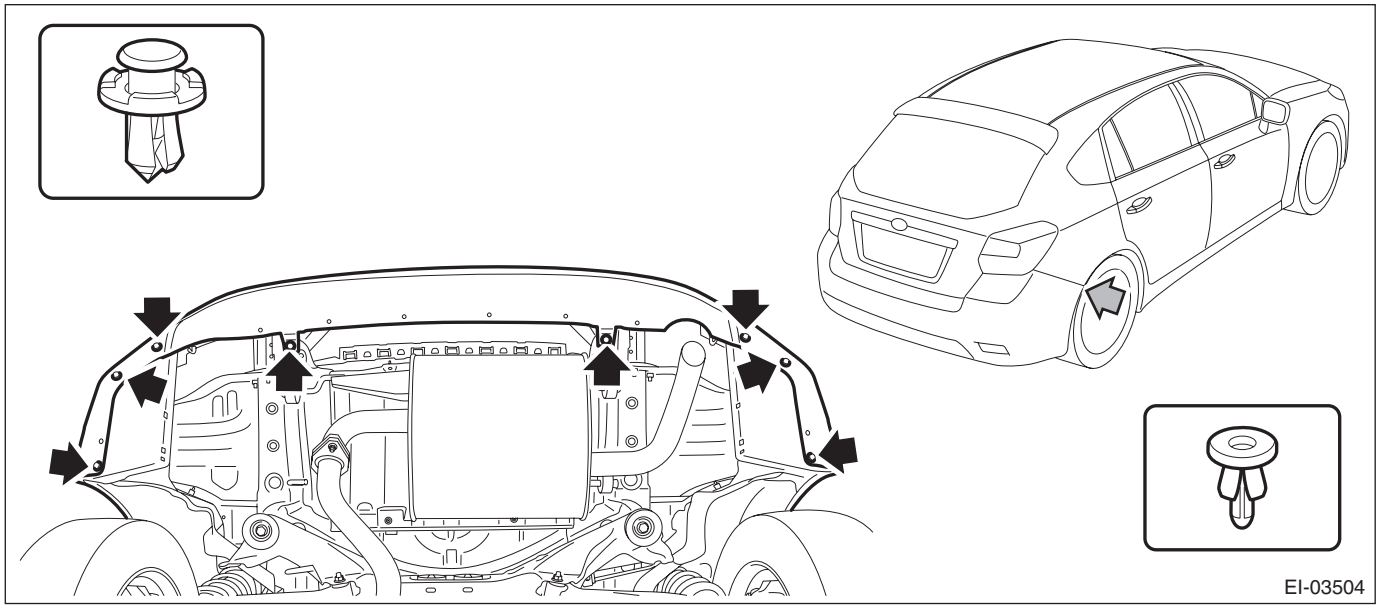
## 2. 5 DOOR MODEL/XV MODEL

1) Disconnect the ground cable from battery.
2) Remove the light assembly - rear combination.

**CAUTION:**
**Be careful not to damage the clips.**
(1) Release the bolts and clips, then pull out the light assembly - rear combination to the vehicle rear.
(2) Disconnect the connector and remove the light assembly - rear combination.

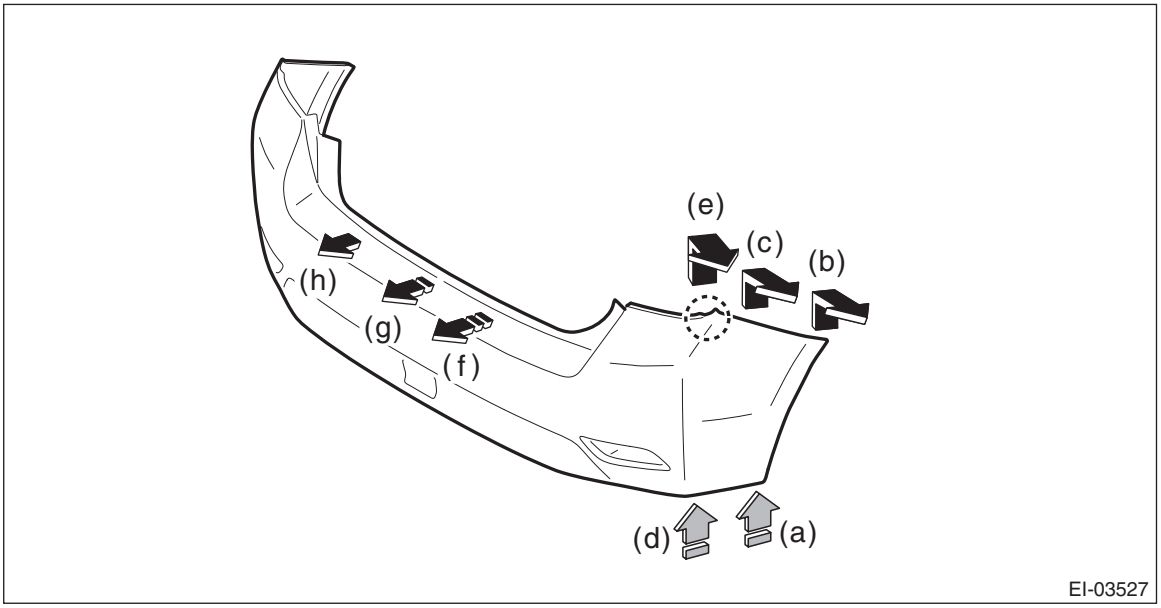


3) Remove the bumper face - rear.
(1) Remove the clips inside the wheel housing.
(2) Remove the clips at the lower side of the bumper face - rear.

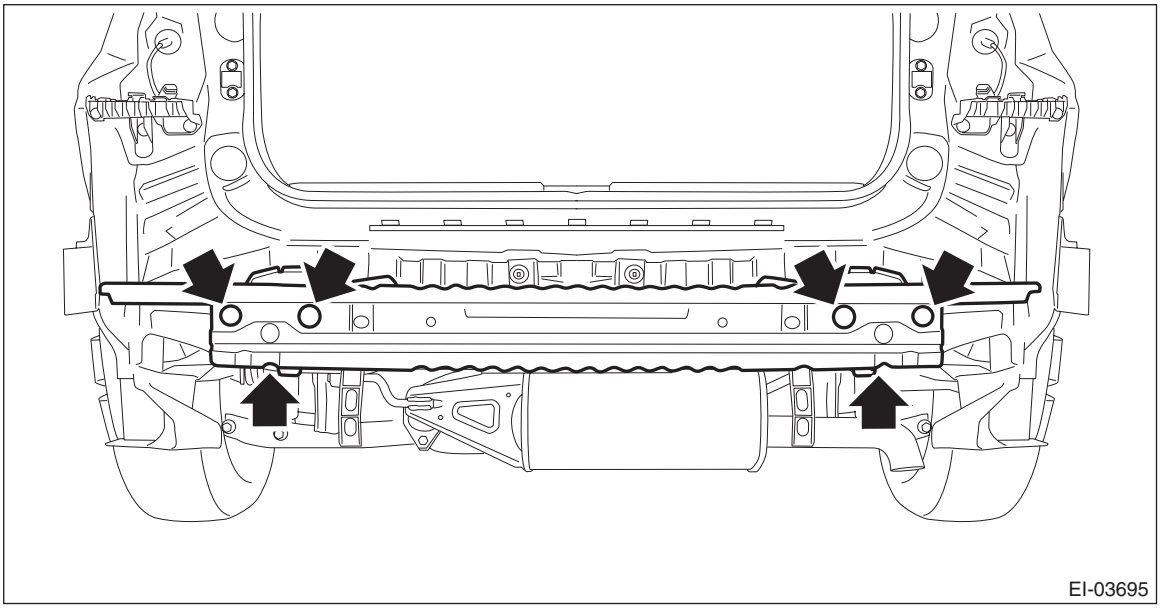


(3) Detach (b) and (c) while pulling up (a) of the bumper face - rear.
(4) Detach (e) while pulling up (d) of the bumper face - rear.
(5) Detach the opposite side in the same manner.
(6) Detach in order from (f) to (h) while pulling up the center part of the bumper face - rear.

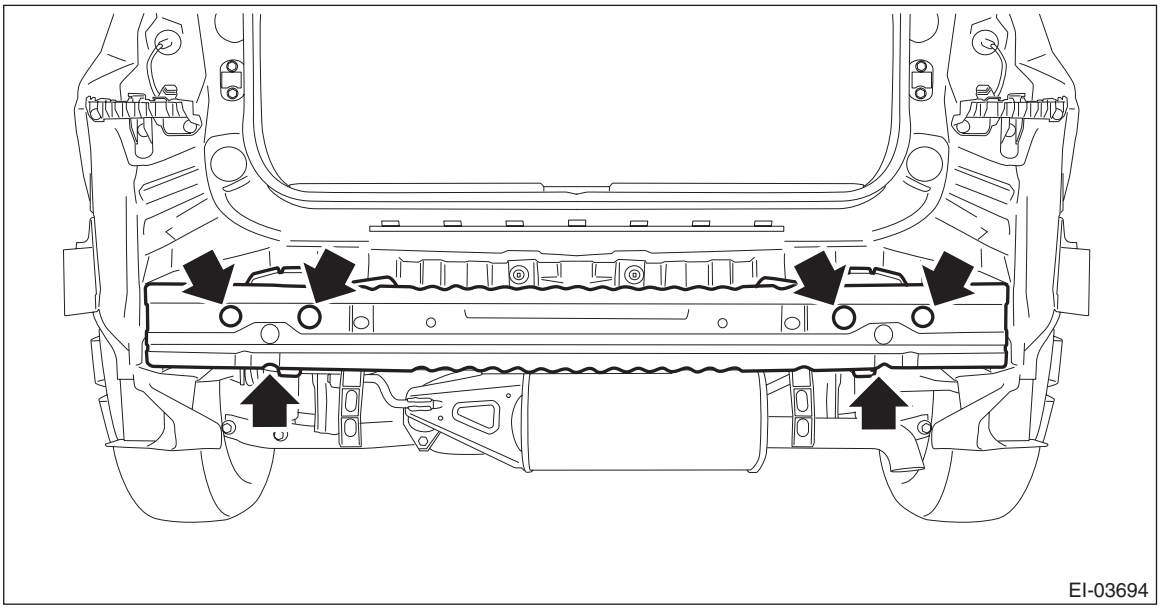
**CAUTION:**
**Pulling with excessive force may damage the bracket.**



4) Remove the bolts and nuts, and remove the bumper beam COMPL - rear.
- 5 door model/XV model

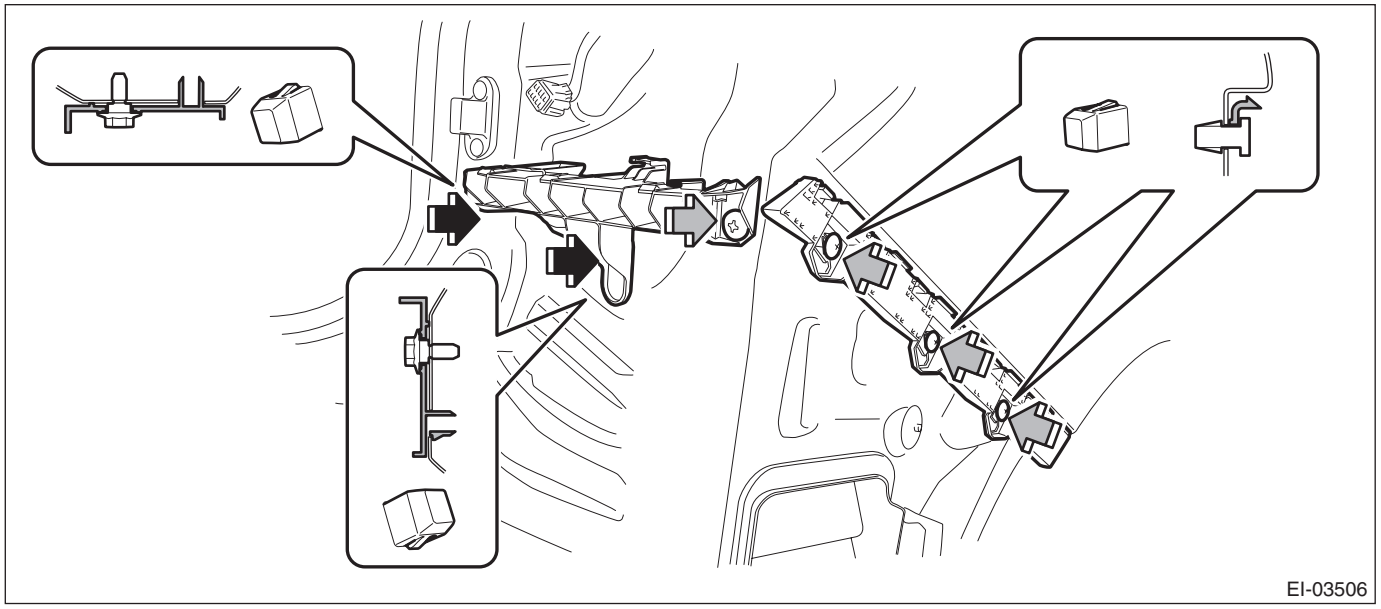


- XV model



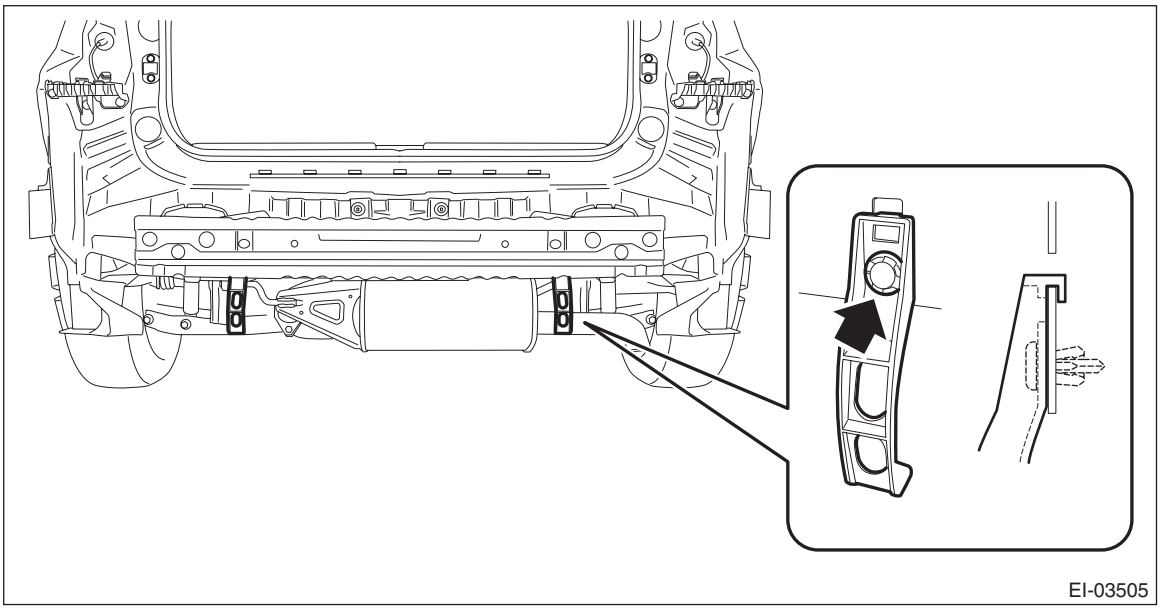
NOTE:
After all nuts are removed, raise the bumper beam COMPL - rear a little to remove it from vehicle body.

5) Remove bumper brackets.
(1) Remove the screws.
(2) Turn over the trim panel - trunk side, and detach the claw of the clip from the back side.



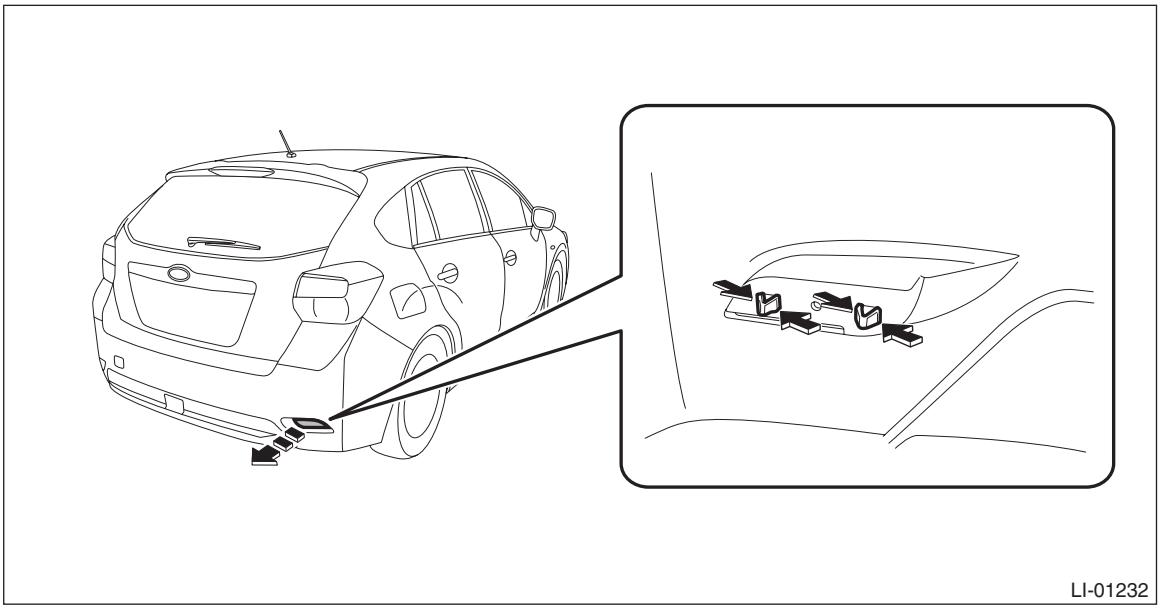
EI-03506

(3) Remove the clip, and remove the bracket - rear bumper lower.



EI-03505

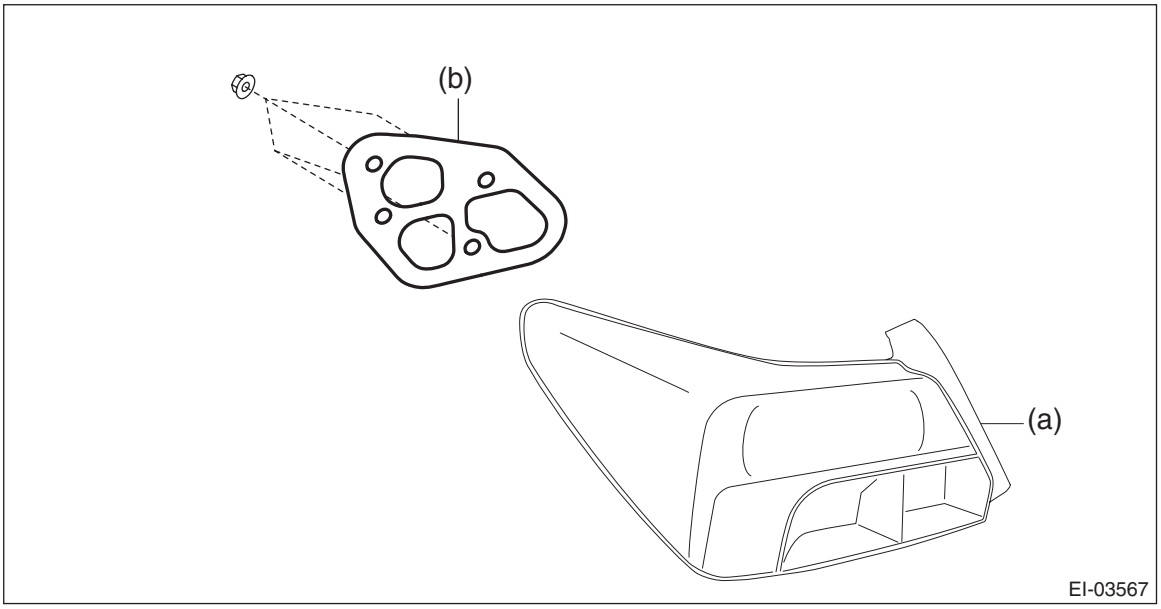
6) From behind the bumper, release the claws, and remove the reflex reflector assembly.



## B: INSTALLATION

Install each part in the reverse order of removal.

**CAUTION:**
**For 4 door model, replace the seal gasket (b) of the light assembly - rear combination (a) with a new part. If the seal gasket is reused, water leaks may occur.**



NOTE:
If the bumper face - rear comes off too easily, adjust the hook of the bracket side.

***Tightening torque:***
***Rear bumper component: <Ref. to EI-5, REAR BUMPER, COMPONENT, General Description.>***
***Light assembly - rear combination: 7.5 N·m (0.76 kgf-m, 5.5 ft-lb)***

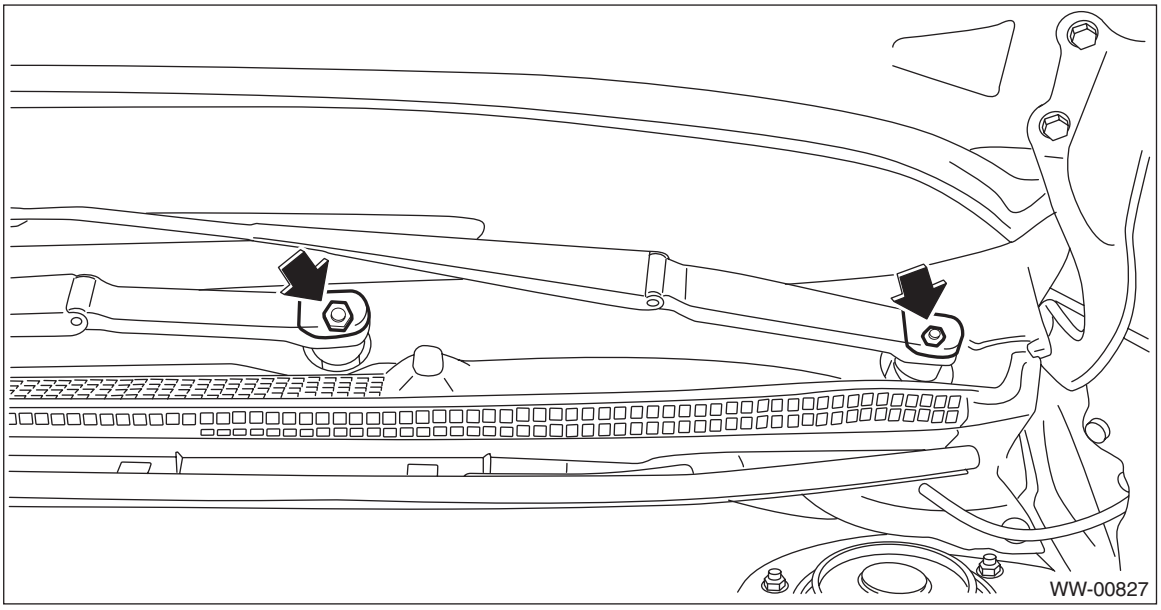
## C: REPAIR

Refer to the description concerning repair in “Front Bumper” section. <Ref. to EI-40, REPAIR, Front Bumper.>

# 9. Cowl Panel

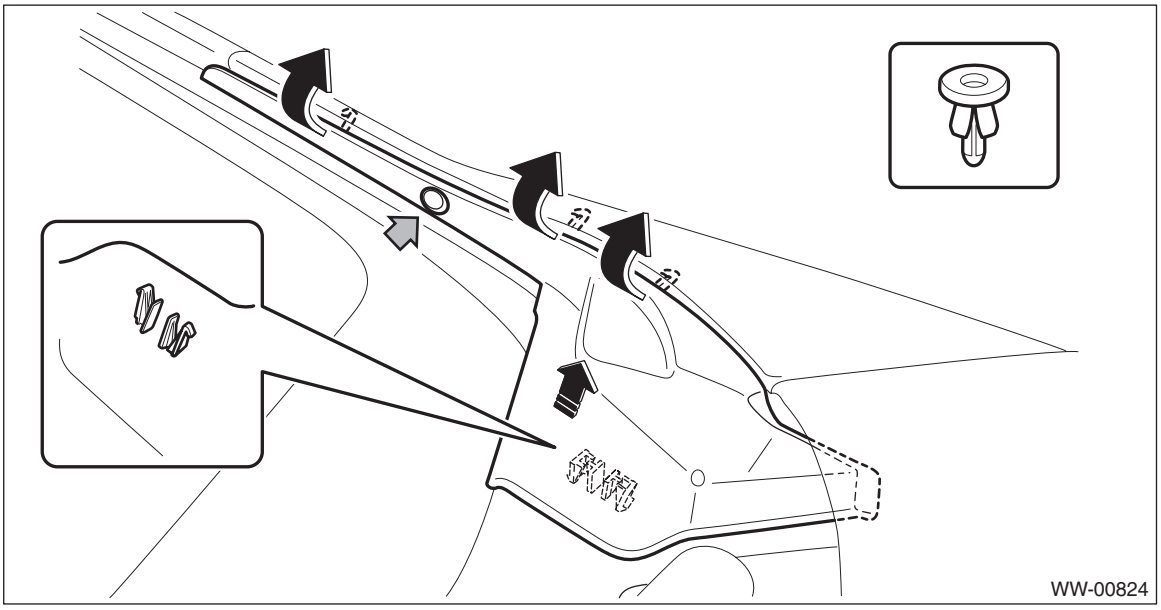
## A: REMOVAL

1) Open the front hood.
2) Remove the arm assembly - windshield wiper.
   (1) Remove the cover - windshield wiper arm.
   (2) Remove the nuts, and remove the arm assembly - windshield wiper.



3) Remove the cowl panel - side.
   (1) Remove the clips.
   (2) Release the claws, and then remove the cowl panel - side.

**CAUTION:**
**Pulling with excessive force may damage the cowl panel - side. If it is difficult to remove, use a plastic remover or equivalent tool.**



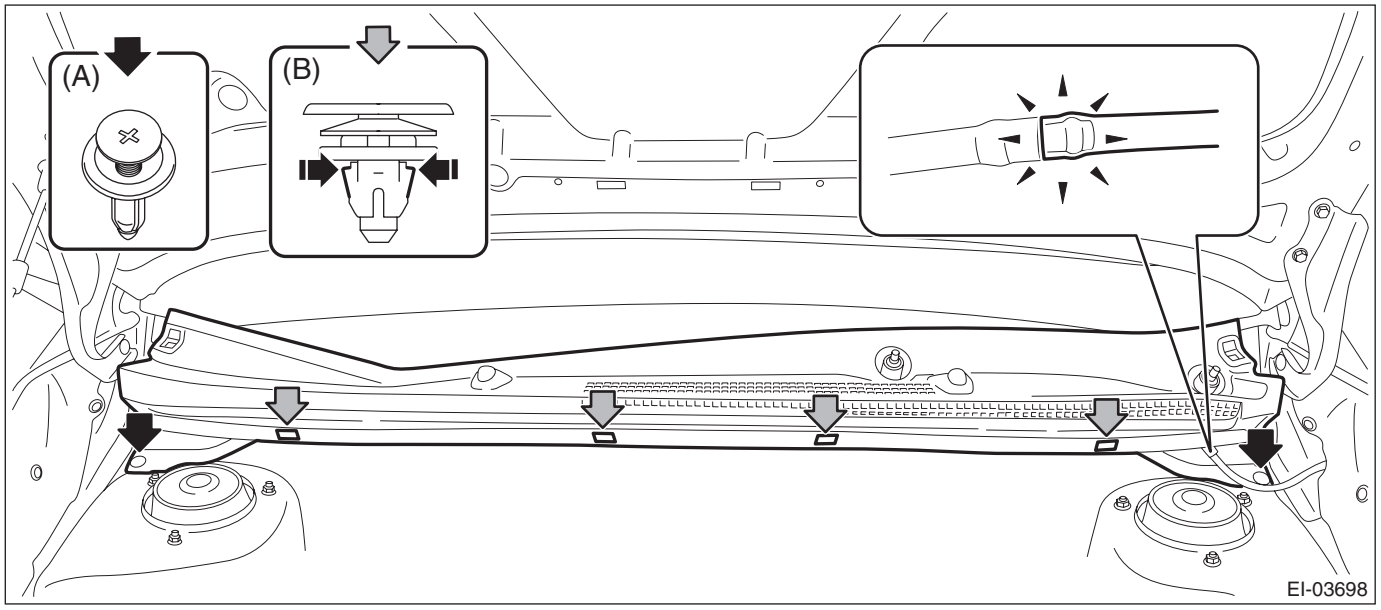
4) Remove the cowl panel assembly.

**CAUTION:**
**Before removing the cowl panel, use an air blower and nylon brush to sweep gravel from the lower area of the front side of the glass.**

(1) Disconnect the washer hose.
(2) Remove clips (A).
(3) Check the direction of the clip (B), and push the claws from both sides to remove it.

**CAUTION:**
**When removing the clip (B), push the claws of the clip first.**
**Be careful not to apply excessive force when pulling the clip (B), as the clip may become damaged.**

(4) Remove the cowl panel assembly by pulling it out towards the front of the vehicle.



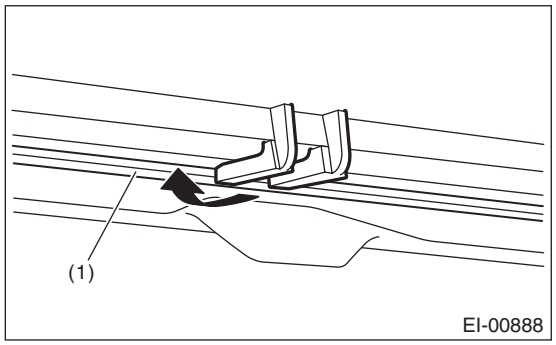
## B: INSTALLATION

**CAUTION:**
**Before installing the windshield glass and cowl panel, make sure there are no gravel in the installing area.**

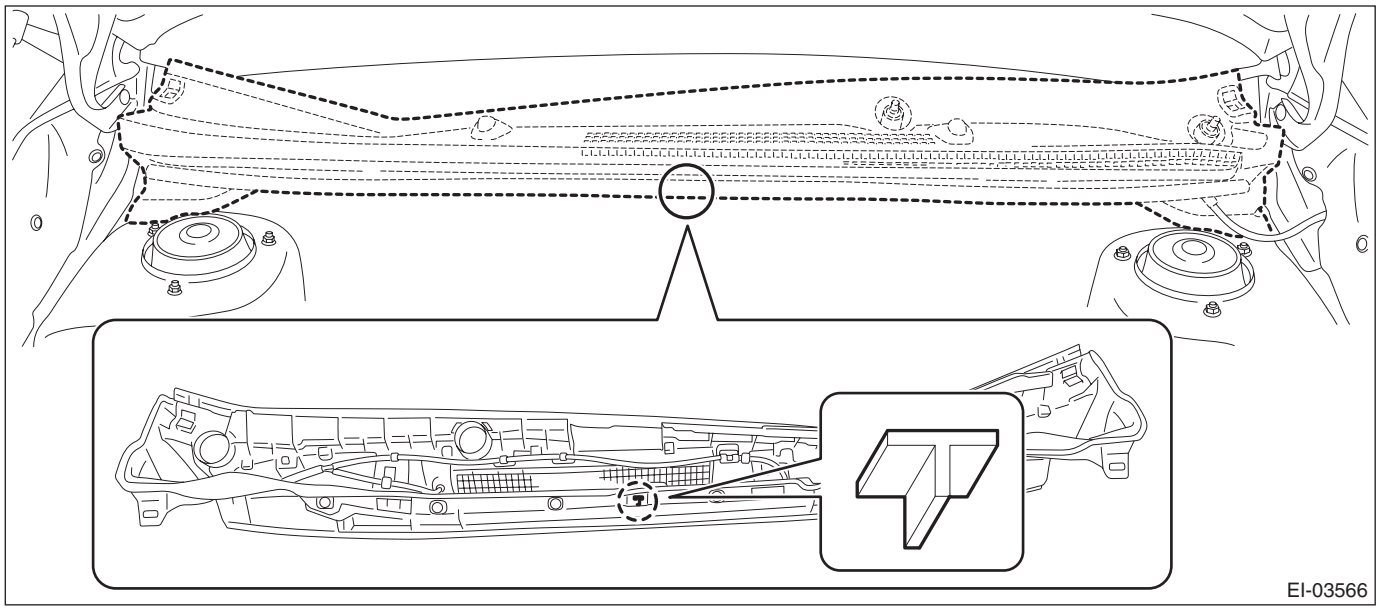
1) Install the cowl panel assembly.

**CAUTION:**
**If the cowl panel assembly cannot be installed properly, do not hit or set it forcibly. The claws of the cowl panel or the windshield glass may be damaged.**

(1) Hook the claw of the cowl panel on the lower end (1) of the windshield.



(2) Align the center claw of the cowl panel assembly to the cutout portion of the vehicle side, then install the cowl panel assembly.



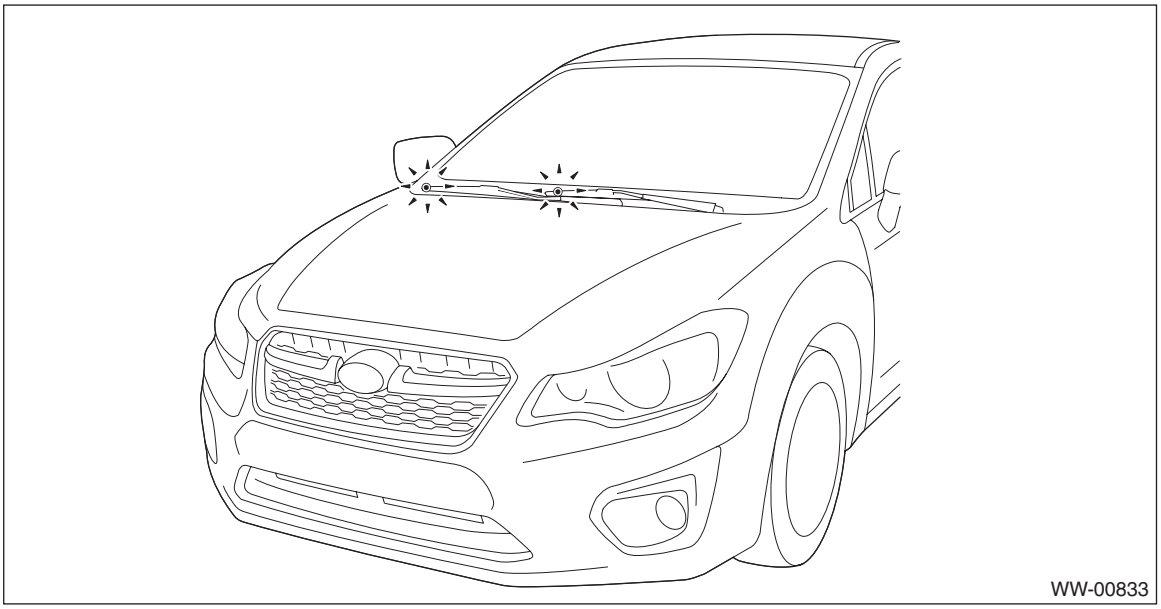
2) Install the arm assembly - windshield wiper.

(1) Assemble the arm assembly - windshield wiper so that the blade assembly - windshield wiper is aligned to the ceramic print point mark of the windshield glass.

(2) Tighten the arm assembly - windshield wiper to specified torque and install the cap.

***Tightening torque:***

***22 N·m (2.24 kgf-m, 16.2 ft-lb)***



3) Install the remaining parts in the reverse order of removal.

***Tightening torque:***

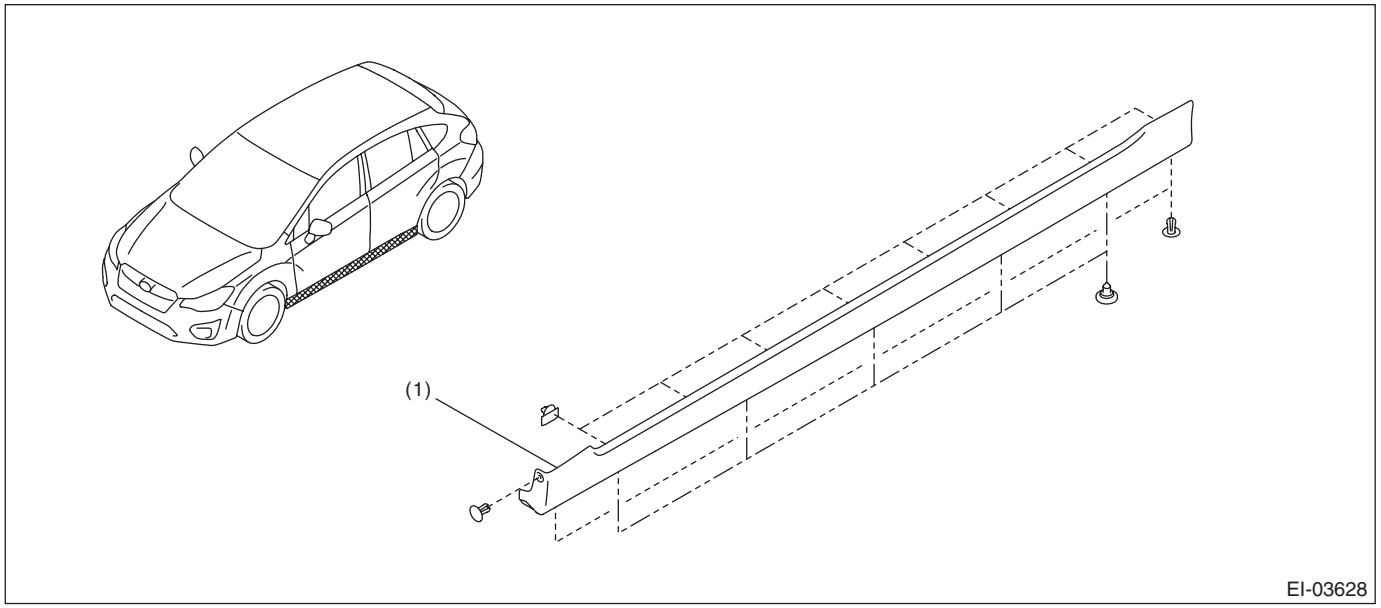
***Arm assembly - windshield wiper: <Ref. to WW-2, FRONT WIPER, COMPONENT, General Description.>***

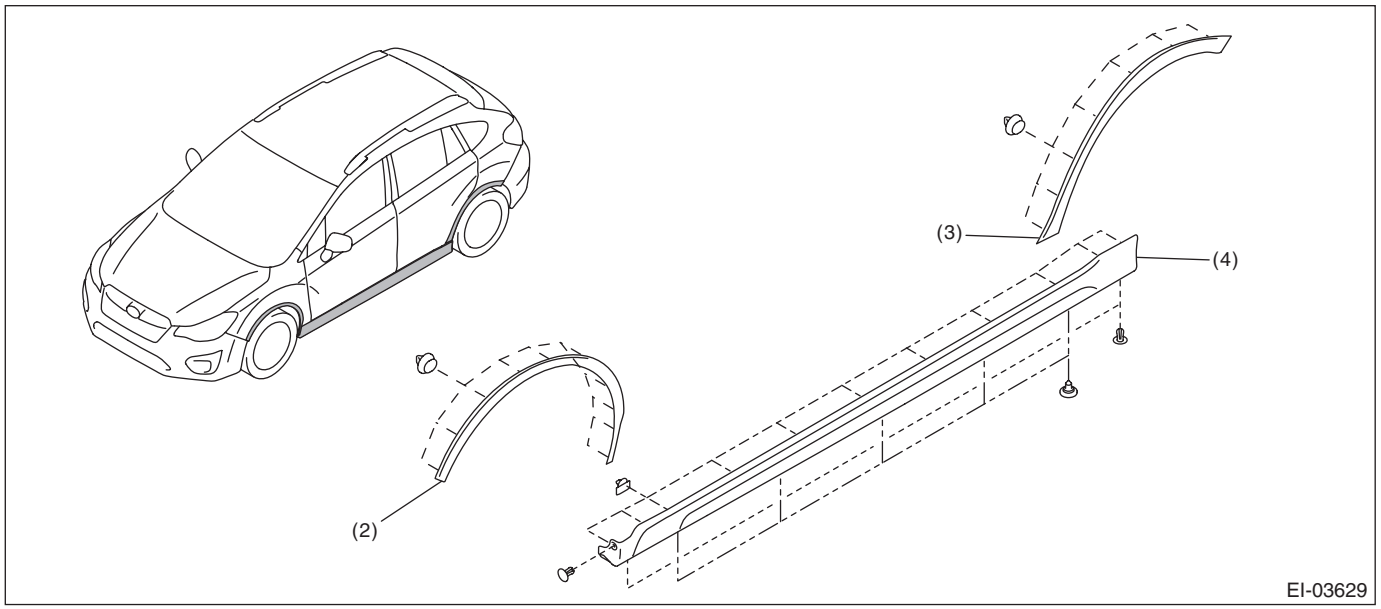
4) If the washer nozzles have been removed from the cowl panel assembly, adjust the washer spray positions. <Ref. to WW-36, ADJUSTMENT, Front Washer Nozzle.>

# 10.Side Sill Spoiler

## A: REMOVAL

Remove the clips and detach the side sill spoiler assembly.





(1) Garnish ASSY - side sill (except for XV model)
(2) Garnish ASSY - fender (XV model)
(3) Garnish ASSY - rear quarter (XV model)
(4) Garnish ASSY - side sill (XV model)

## B: INSTALLATION

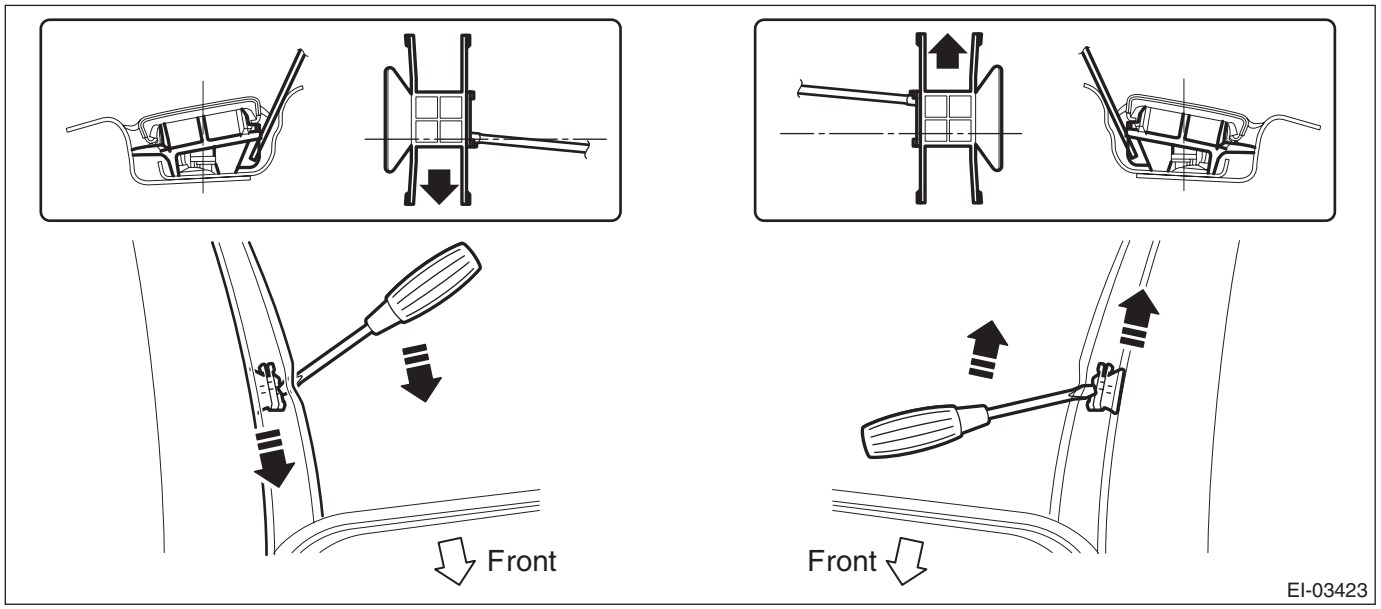
Install each part in the reverse order of removal.

# 11.Roof Molding

## A: REMOVAL

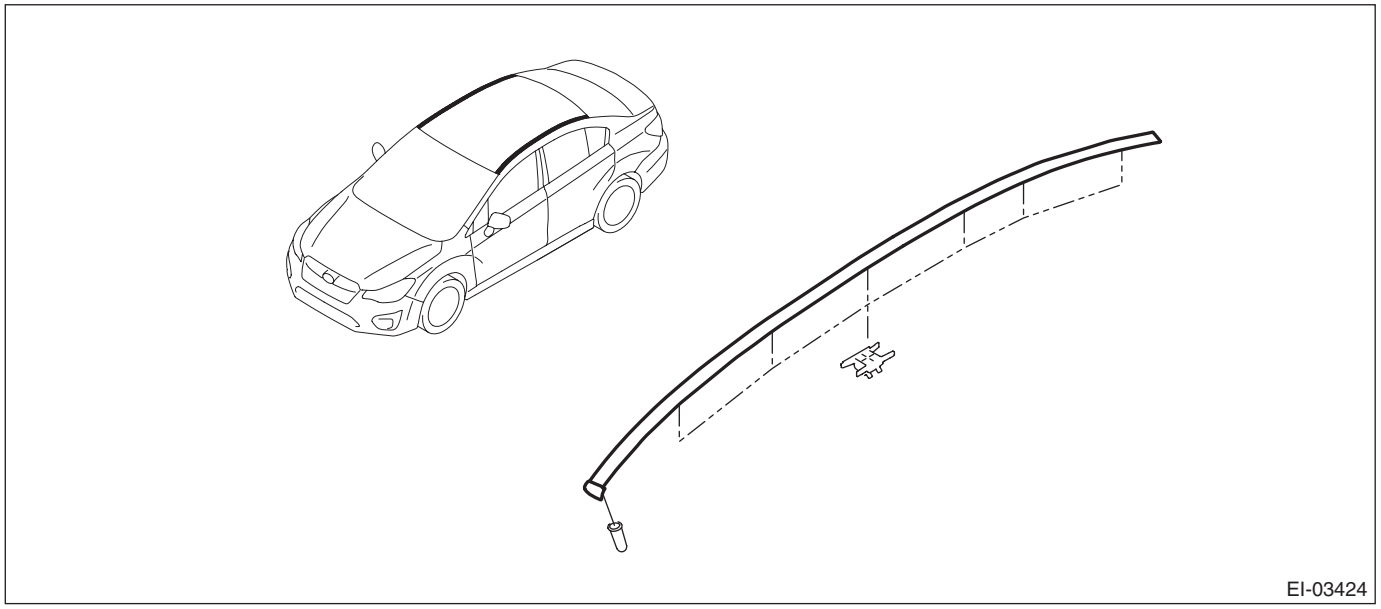
**CAUTION:**
**Be careful not to damage the body.**

1) Remove the roof rail assembly. (model with roof rail) <Ref. to EI-60, REMOVAL, Roof Rail.>
2) Turn over the front end of the molding - roof.
3) Slide the inner fastener in the direction of the arrow using a flat tip screwdriver, then remove the fastener from the stud on the vehicle side.

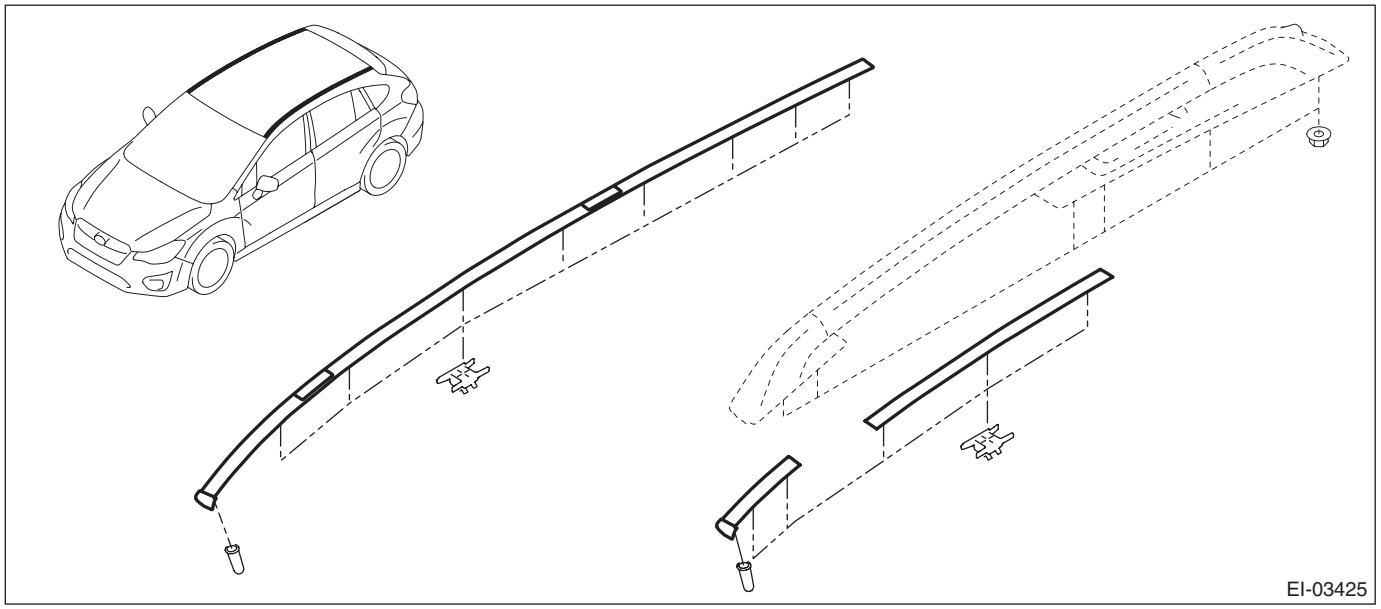


Right side: Slide towards the front of the vehicle.
Left side: Slide towards the rear of the vehicle.

- 4 door model: 6 locations per side



- 5 door model/XV model
  - Model without roof rail: 8 locations per side
  - Model with roof rail: 5 locations per side

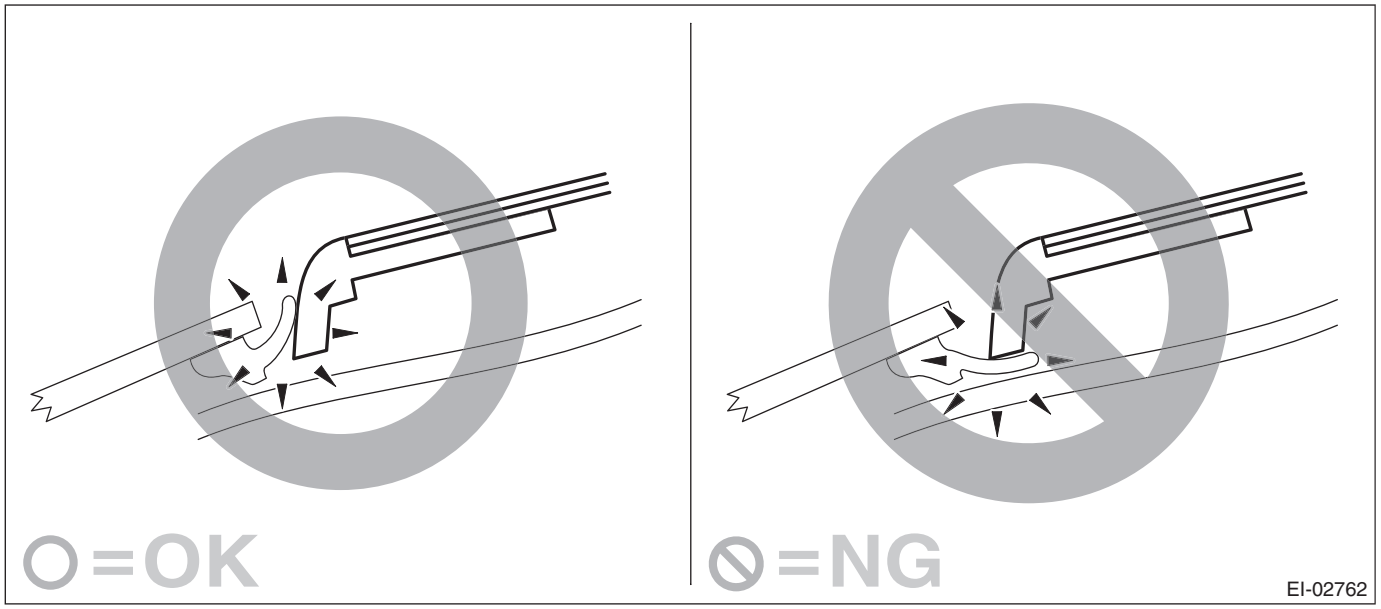


4) Pull up the molding - roof, and remove from the vehicle.

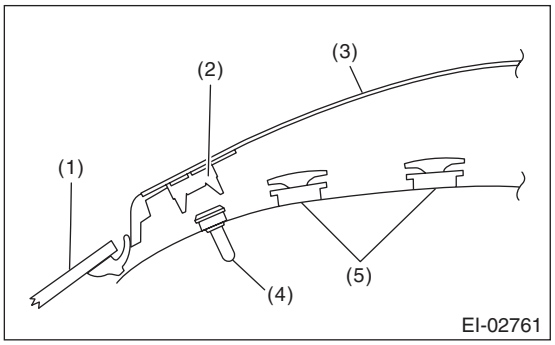
## B: INSTALLATION

1) Remove the clips from the molding - roof, and attach to the studs on the vehicle.

**CAUTION:**
- **Always replace the clips that were damaged during removal of the molding - roof with new parts.**
- **While installing the molding - roof, be careful not to catch the glass molding with the tip of the front side and rear side.**



2) Push the front end of the molding - roof against the front window, and attach the forward positioning clip onto the rivet on the body.



(1) Windshield
(2) Positioning clip
(3) Molding - roof
(4) Rivet
(5) Clip

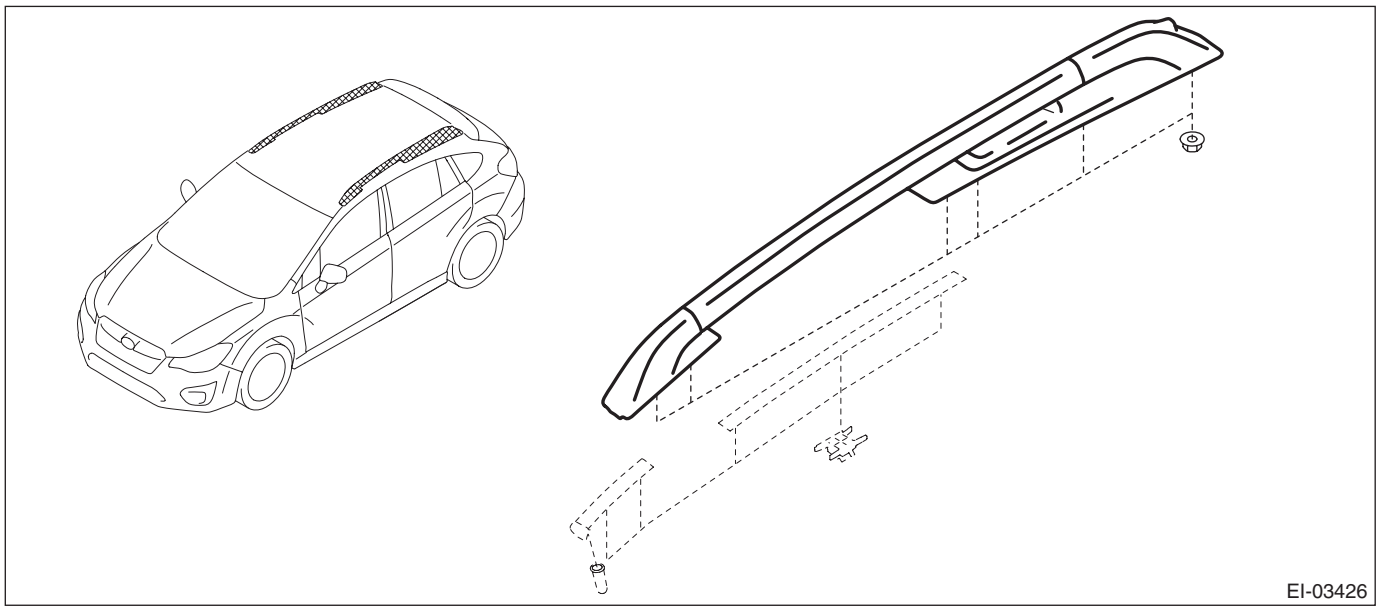
3) While pushing down the molding - roof from above, connect the molding - roof and the clip.

# 12.Roof Rail

## A: REMOVAL

1) Remove the trim panel - roof. <Ref. to EI-131, 5 DOOR MODEL/XV MODEL, REMOVAL, Roof Trim.>
2) Remove the curtain airbag module. <Ref. to AB-75, 5 DOOR MODEL/XV MODEL, REMOVAL, Curtain Airbag Module.>

**CAUTION:**
**• Before handling the airbag module, refer to "CAUTION" of "General Description" in "AIRBAG SYSTEM". <Ref. to AB-11, CAUTION, General Description.>**
**• Be careful not to damage the curtain airbag module during removal.**
3) Remove the six installing nuts.



## B: INSTALLATION

**CAUTION:**
**When removing or installing the roof rail, be careful not to scratch the body panel with the stud bolt of roof rail.**
Install each part in the reverse order of removal.

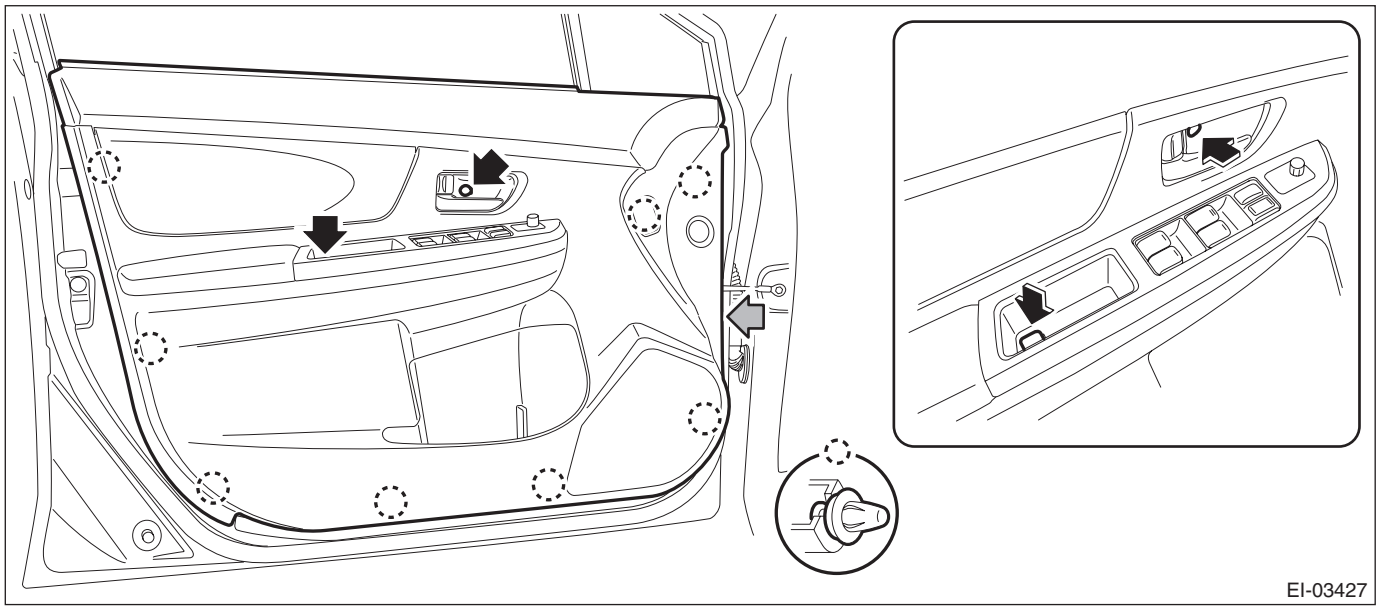
***Tightening torque:***
***7.5 N·m (0.76 kgf-m, 5.5 ft-lb)***

# 13.Door Trim

## A: REMOVAL

### 1. FRONT DOOR

1) Disconnect the ground cable from battery.
2) Remove the trim panel - front door.
   (1) Open the cover and remove the screw.
   (2) Remove the clips, and remove the trim panel - front door from the panel assembly - front door.

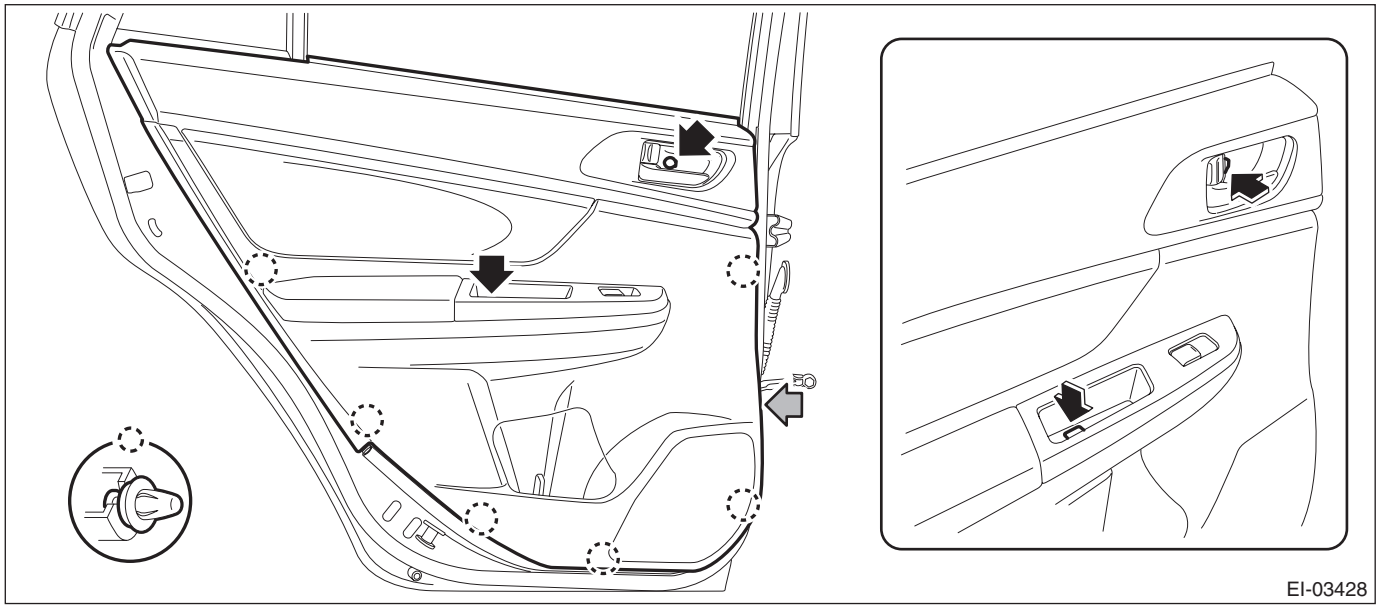


NOTE:
It is easier to remove the door trim if the removal is performed from the gray arrow section.
   (3) Detach the door lock cable (a) and door open cable (b) from the remote assembly - door.

   (4) Disconnect the harness connector and remove the trim panel - front door.
3) Remove each part as required.
- Remote assembly - door: <Ref. to SL-31, REMOVAL, Front Inner Remote.>
- Switch - power window main: <Ref. to GW-12, MAIN SWITCH, REMOVAL, Power Window Control Switch.>
- Weather strip - door INN: <Ref. to EI-63, DISASSEMBLY, Door Trim.>

## 2. REAR DOOR

1) Disconnect the ground cable from battery.
2) Remove the trim panel - rear door.
   (1) Open the cover and remove the screw.
   (2) Remove the clips, and remove the trim panel - rear door from the panel assembly - rear door.



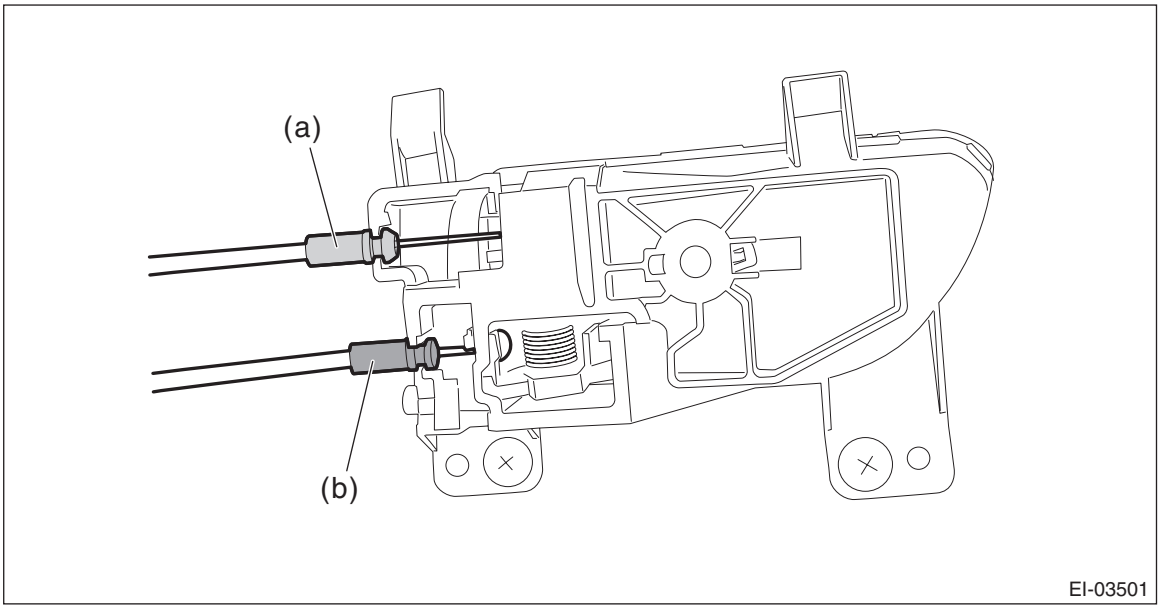
NOTE:
It is easier to remove the door trim if the removal is performed from the gray arrow section.
   (3) Detach the door lock cable (a) and door open cable (b) from the remote assembly - door.

   (4) Disconnect the harness connector and remove the trim panel - rear door.
3) Remove each part as required.
- Remote assembly - door: <Ref. to SL-39, REMOVAL, Rear Inner Remote.>
- Switch - power window sub: <Ref. to GW-13, SUB-SWITCH, REMOVAL, Power Window Control Switch.>
- Weather strip - door INN: <Ref. to EI-63, DISASSEMBLY, Door Trim.>

## B: INSTALLATION

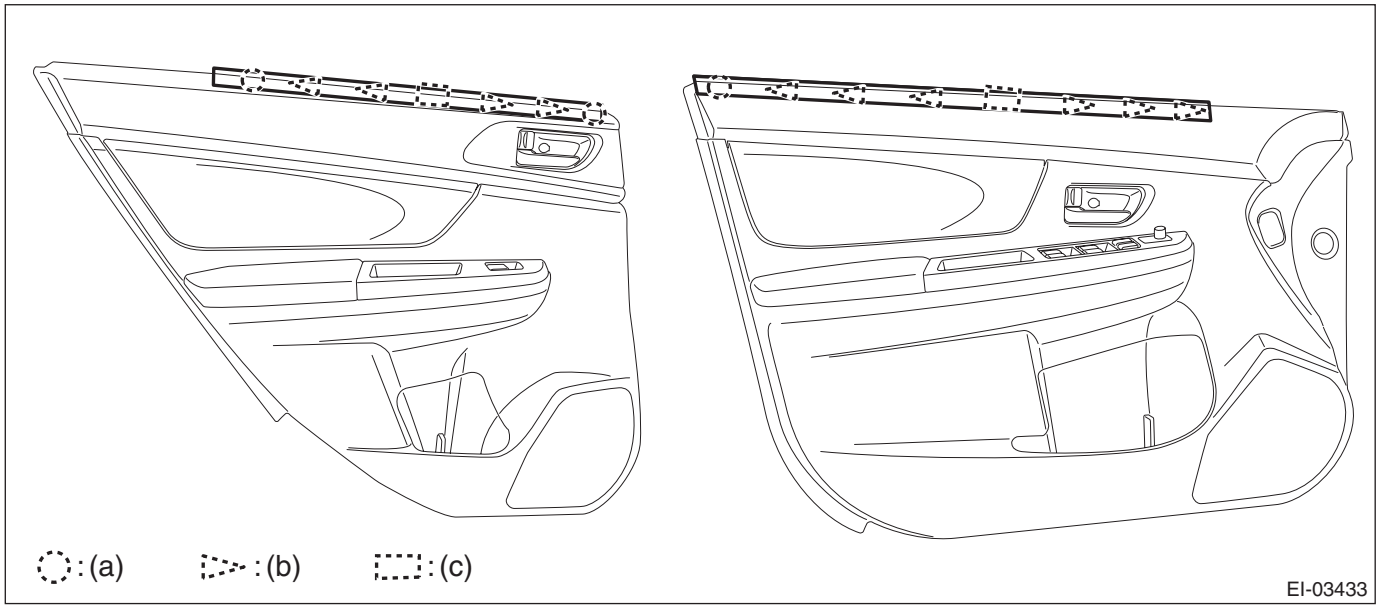
Install each part in the reverse order of removal.

NOTE:
Attach the door lock cable (a - end ball: small) to the upper side, and attach the door open cable (b - end ball: large) to the lower side.



## C: DISASSEMBLY

1) Remove the door trim.
2) Remove the rivets and claws, and remove the weather strip - door INN from the door trim.



(a) Rivet (b) Claw (c) Claw

NOTE:
Remove the rivets by using the rivet cutter or nippers.

## D: ASSEMBLY

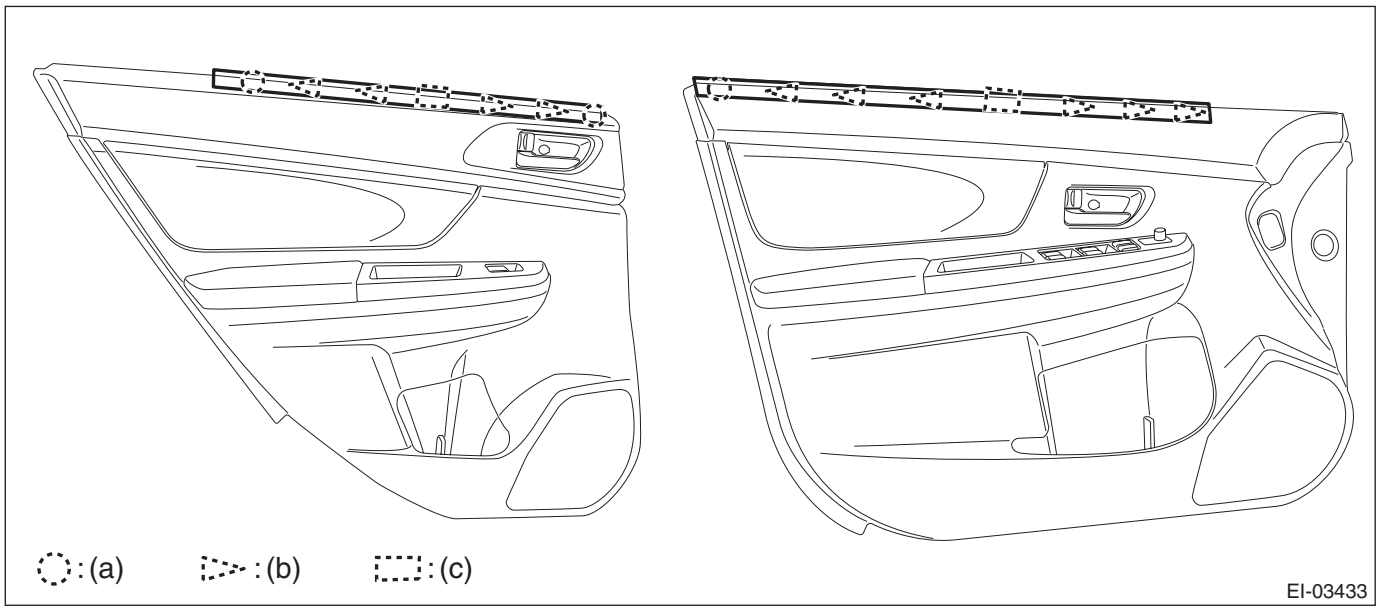
1) Bend the claws while pushing the weather strip - door INN against the door trim.

**CAUTION:**
**Be careful of the bending direction of the claws.**

2) Install the rivet.

**CAUTION:**
**The height of the crimped rivet must be 3 mm (0.12 in). Squash the rivets with the pliers if the crimping is not enough, because the rivet may interference with the door trim.**

***PREPARATION TOOL & REQUIRED MATERIALS:***
***Hand riveter (ϕ3.2 mm (0.13 in) compliant)***
***Rivet***



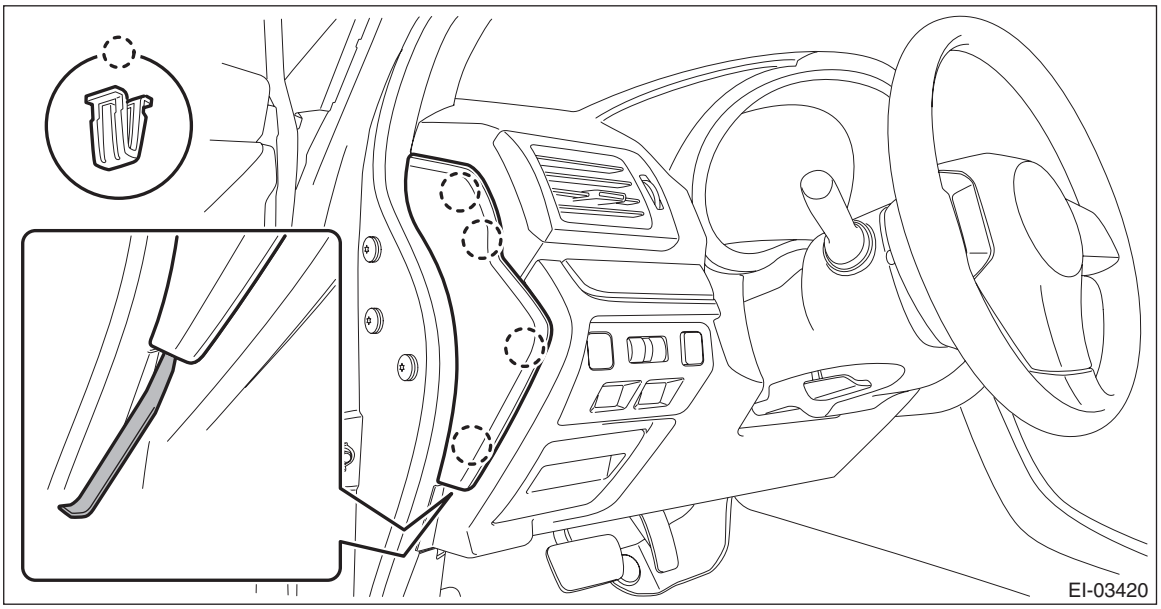
(a) Rivet
(b) Claw bending direction
(c) Claw bending direction: bend forward for LH side, backward for RH side.

3) After installing the weather strip - door INN, perform the following checks.
- Make sure there are no gaps between the weather strip - door INN and the door trim.
- Make sure there are no looseness when pulling the weather strip - door INN lightly.

# 14.Instrument Panel Lower Cover

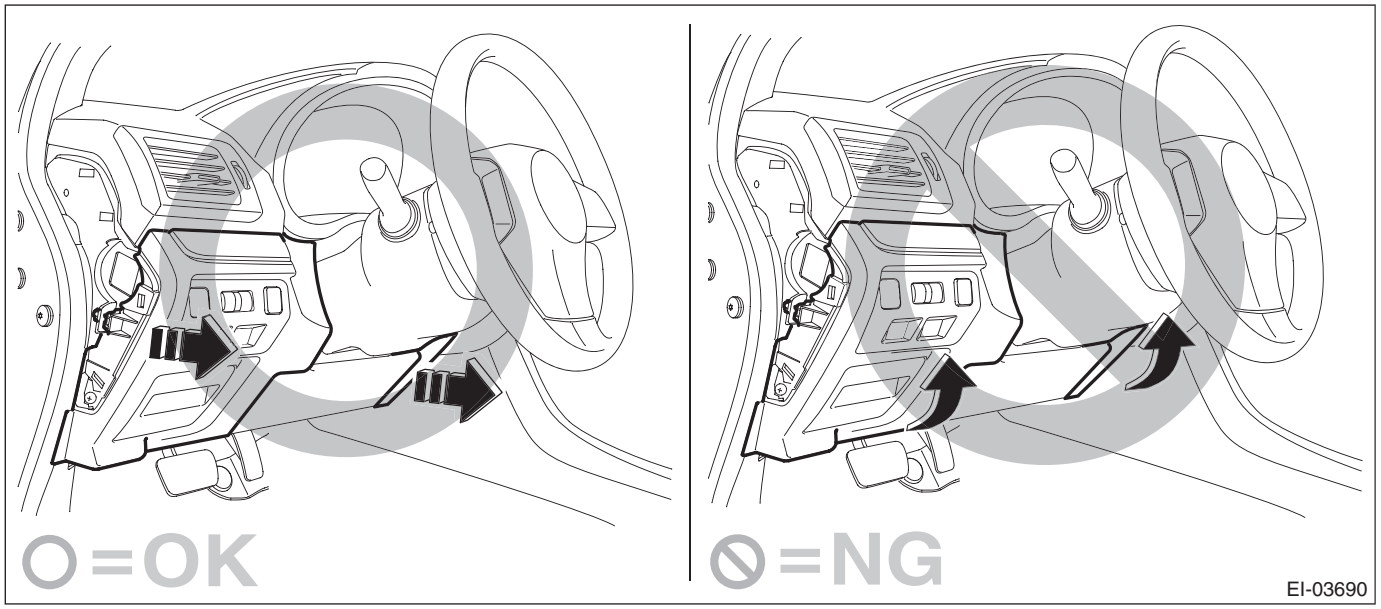
## A: REMOVAL

1) Disconnect the ground cable from battery and wait for at least 60 seconds before starting work.
2) Remove the clips, and remove the cover - instrument panel side LH.



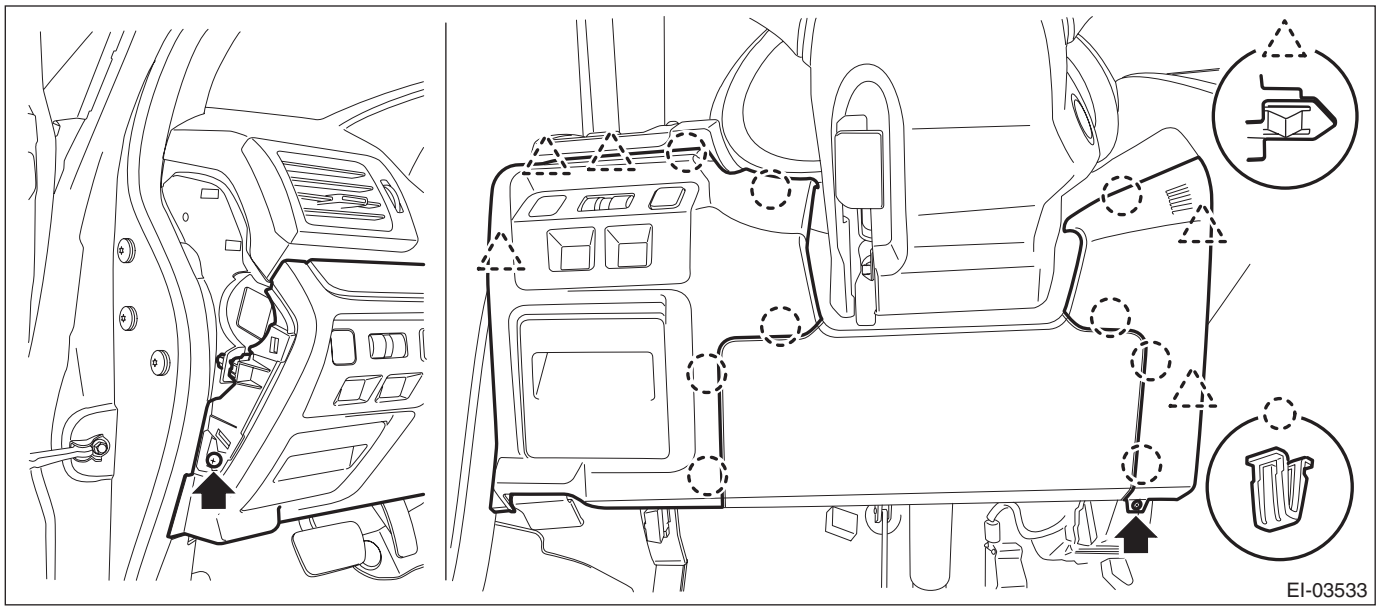
NOTE:
Using a plastic remover, open the cover - instrument panel side LH.
3) Remove the cover assembly - instrument panel LWR driver INN and OUT.

**CAUTION:**
**When removing the cover assembly - instrument panel LWR driver, be sure to pull it toward you. If attempting to remove by turning it upward, the claws may be damaged.**



(1) Remove the screws and release the clips and claws.

(2) Disconnect the harness connectors, and remove the cover assembly - instrument panel LWR driver INN and OUT.



## B: INSTALLATION

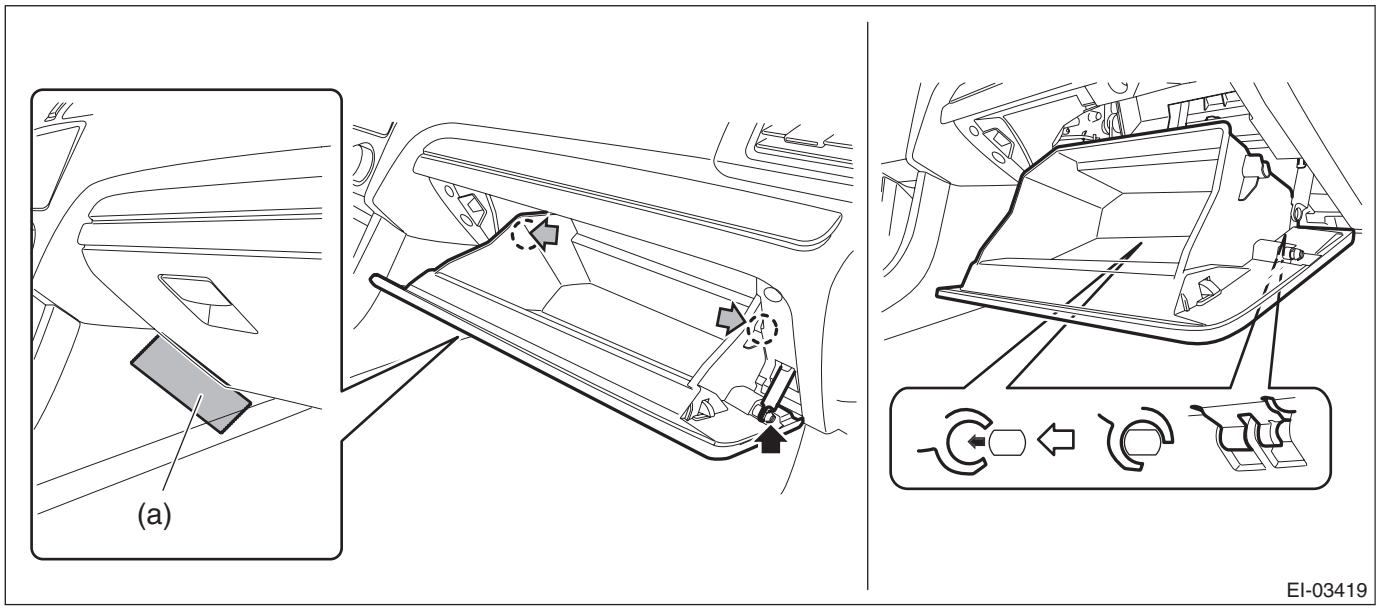
Install each part in the reverse order of removal.

# 15.Glove Box

## A: REMOVAL

NOTE:
Refer to “Security and Locks” section for key cylinder replacement. <Ref. to SL-70, GLOVE BOX LID, REPLACEMENT, Key Lock Cylinders.>

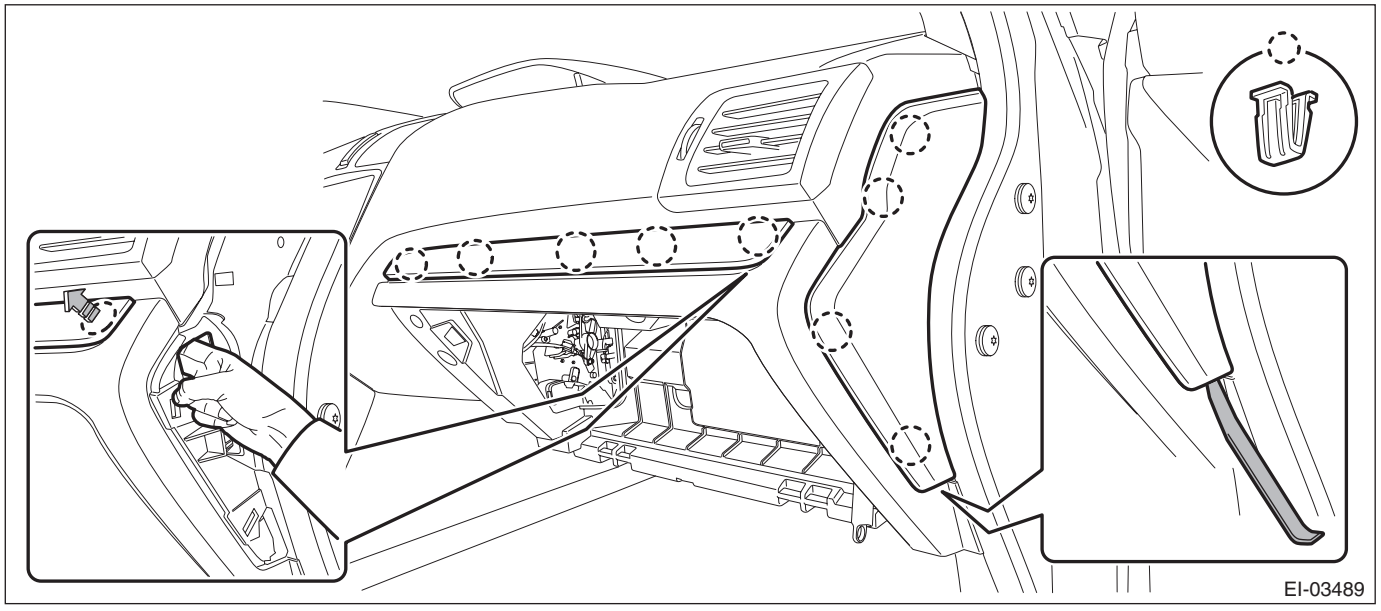
1) Remove the pocket assembly.
   (1) Attach the protective tape (a) to the panel center LWR.
   (2) Remove the damper COMPL - pocket.
   (3) Release the stoppers and remove the pocket assembly by pulling it toward you.



2) Remove the back panel - pocket.
   (1) Remove the clips, and remove the cover - instrument panel side RH.

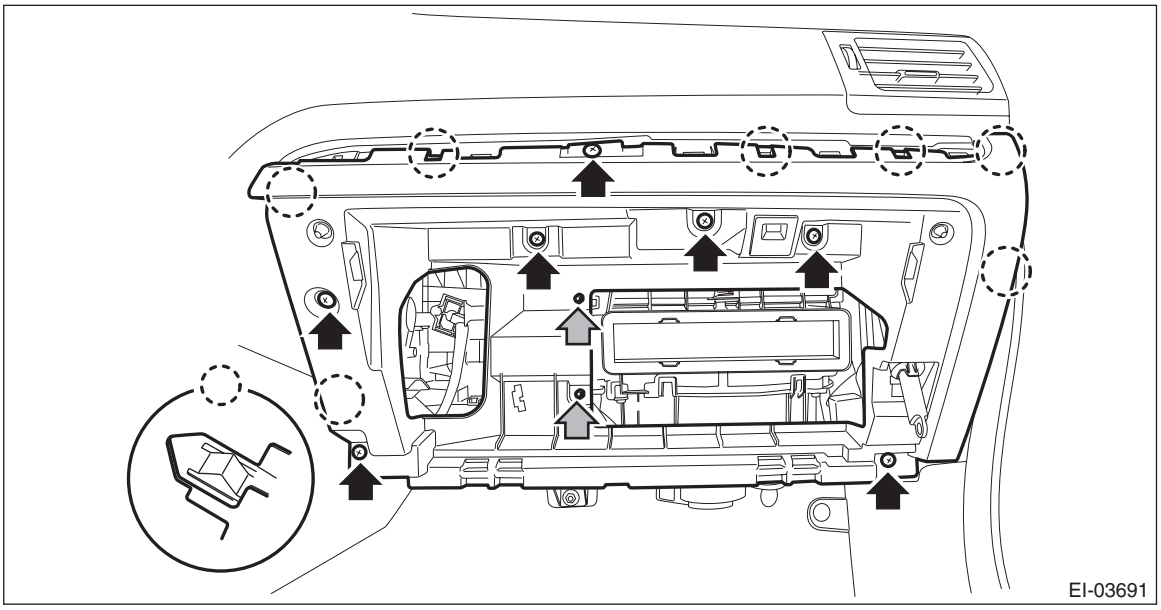
NOTE:
Remove the cover - instrument panel side RH by using a plastic remover.

   (2) Release the clips, and remove the ornament - panel assembly passenger.



NOTE:
To facilitate the removal, push the clip of the ornament - panel assembly passenger from the backside.

(3) Remove the screws, claws and harness clamp, then remove the back panel - pocket.



(4) Disconnect the glove box light LED connector.

## B: INSTALLATION

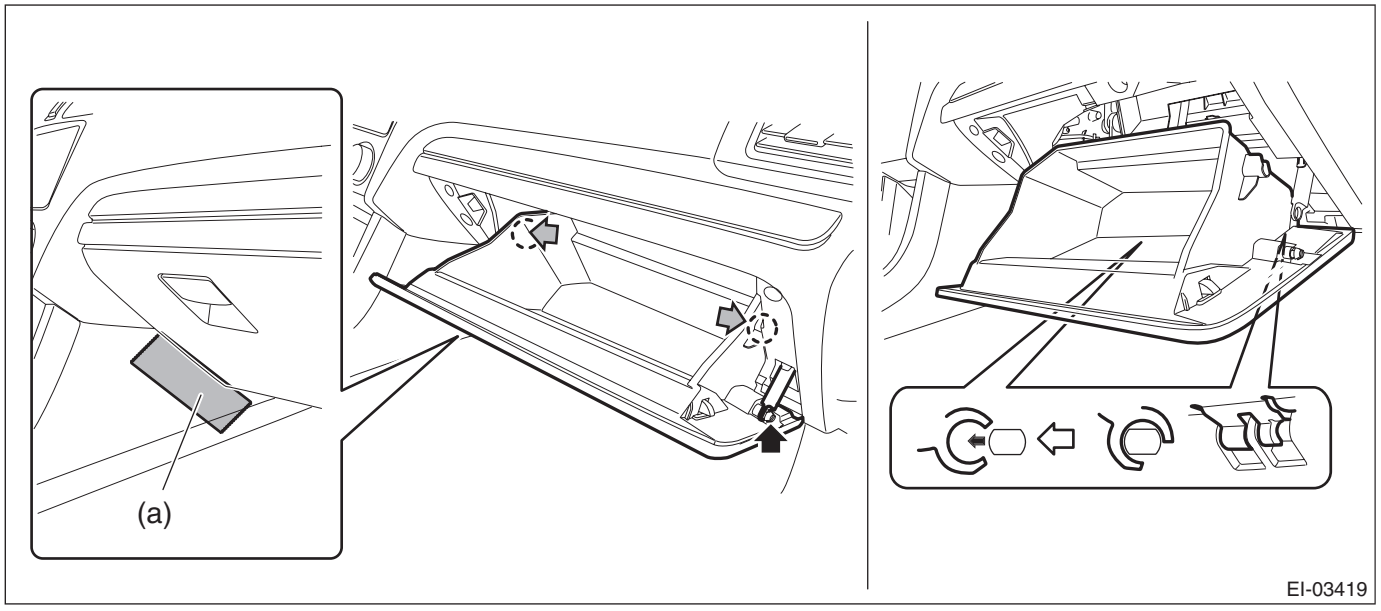
Install each part in the reverse order of removal.

# 16.Center Console

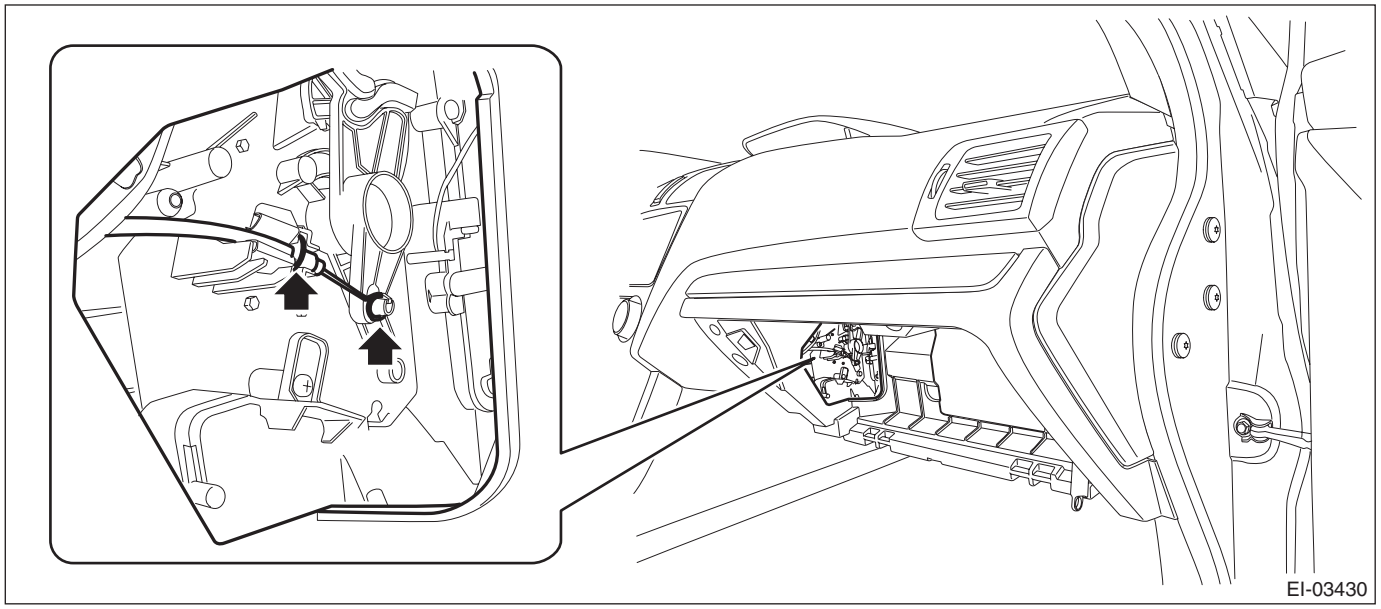
## A: REMOVAL

1) On manual A/C models, disconnect the control cables from both sides of the heater & cooling unit.
   (1) Disconnect the cable on the driver's side.

   (2) Attach the protective tape (a) to the panel center LWR.
   (3) Release the glove box dampers and stoppers, and remove the pocket assembly by pulling it toward you.



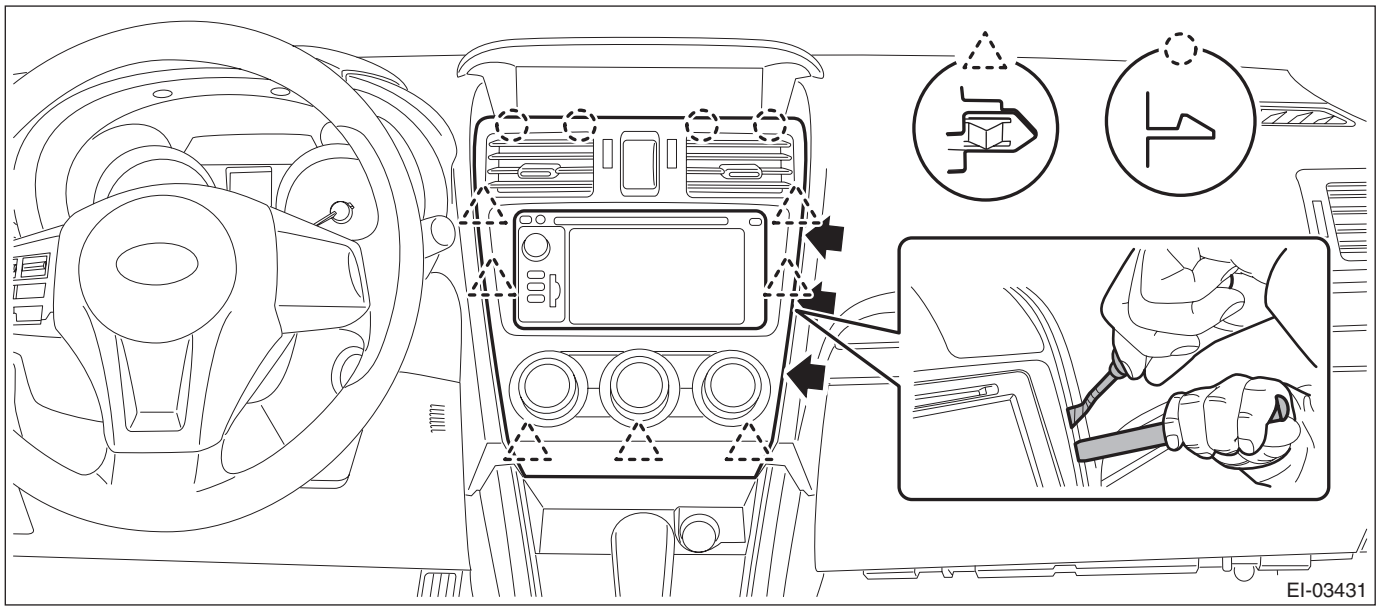
(4) Disconnect the cable on the passenger's side.



2) Remove the panel center assembly.

**CAUTION:**
- **Do not put your finger on the fin of the air vent grille. Doing so may damage the fin.**
- **Pull the panel center assembly slowly. Pulling with excessive force may damage the connector.**

(1) Insert a plastic remover to the three areas shown by the arrows, and lift up the panel center assembly slightly.
(2) With the panel center assembly lifted up slightly, release the claw by using a clip remover wrapped with protective tape.
(3) Release the rest of the claws, and pull out the panel center assembly.
(4) Disconnect the connectors, and remove the panel center assembly.



## B: INSTALLATION

**CAUTION:**
**After installing the panel center assembly, check that the air vent grille of the panel center assembly is inserted correctly into the air vent duct.**
Install each part in the reverse order of removal.

# 17.Console Box

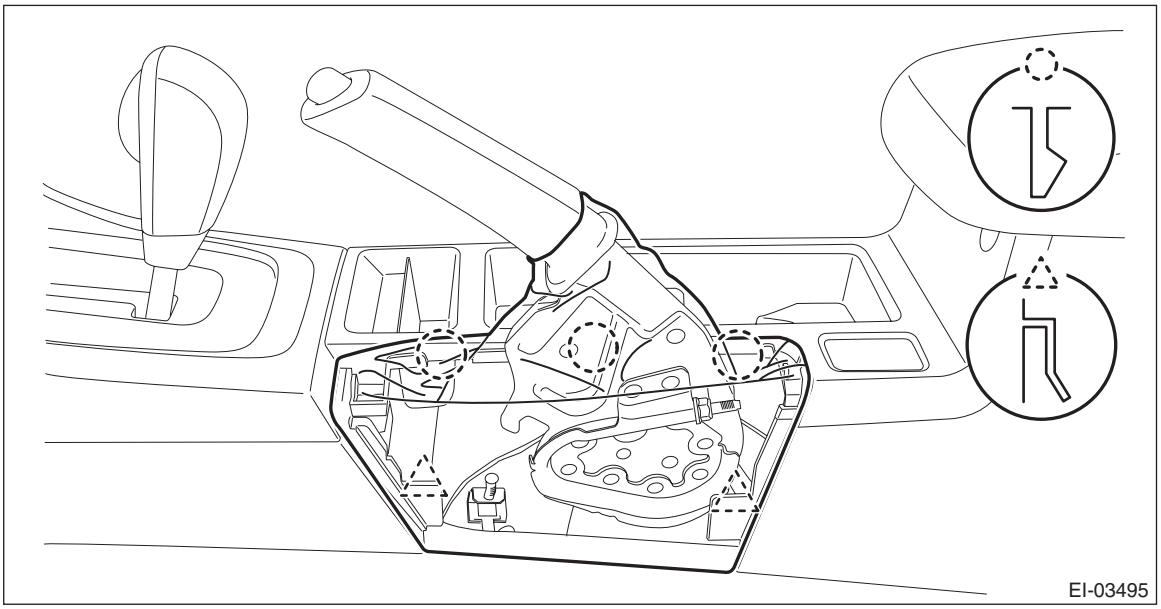
## A: REMOVAL

1) Disconnect the ground cable from battery.

NOTE:
On CVT models, shift the select lever into “D” before disconnecting the battery ground cable.

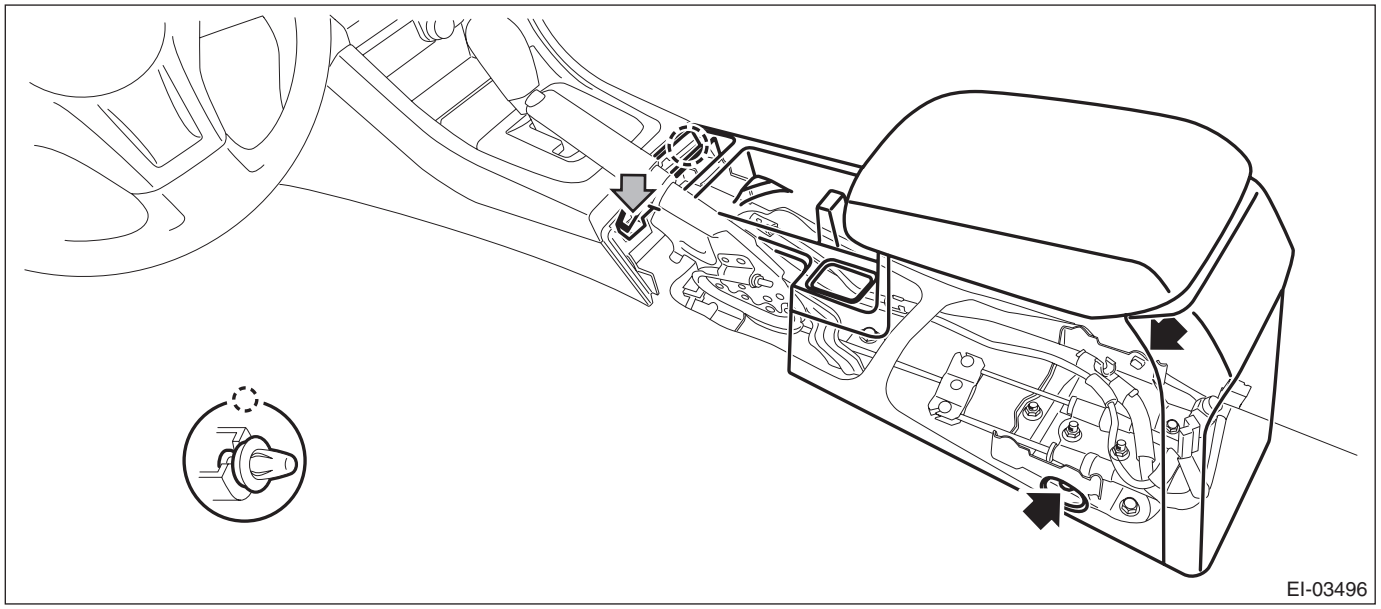
2) Remove the console box assembly.

(1) Release the claws, and then remove the boot - hand brake.

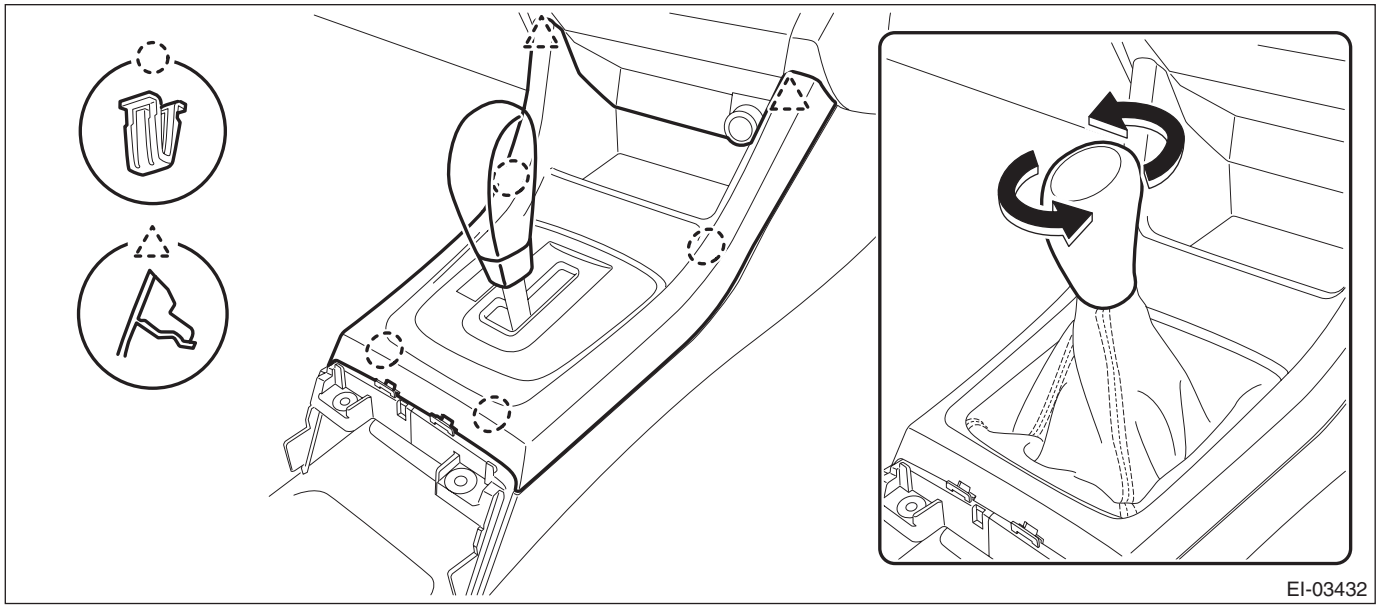


(2) Move the seat forward, and remove the bolts after detaching the left and right caps.

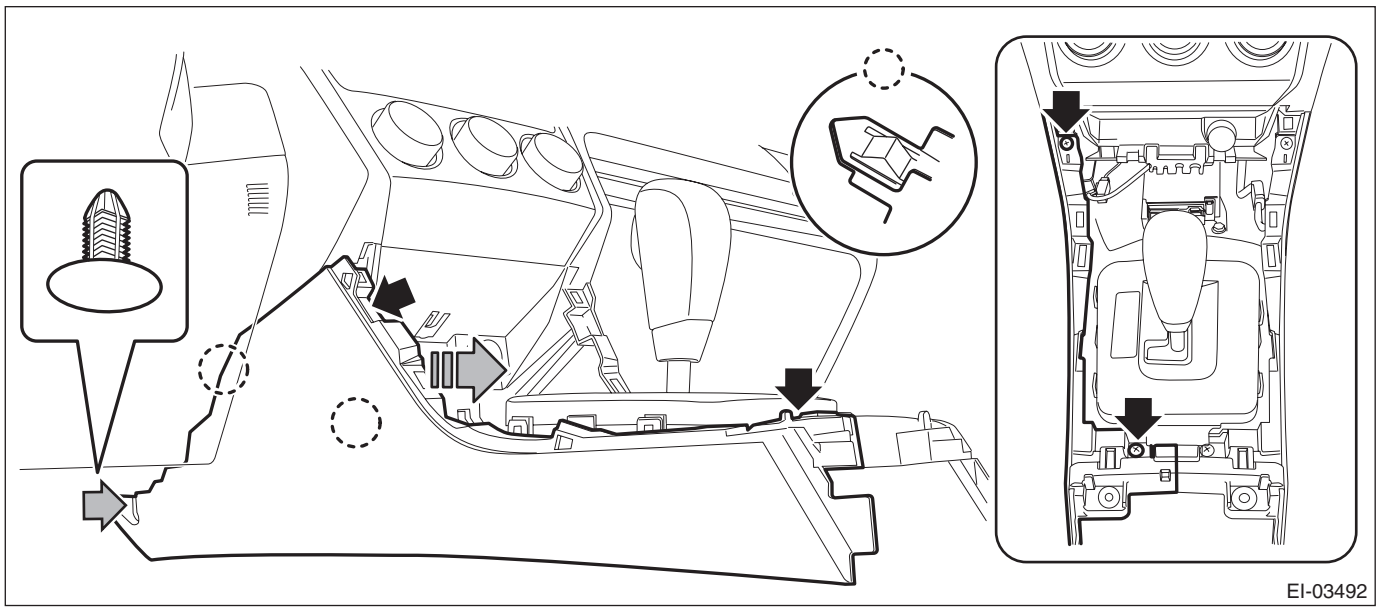
(3) Remove the screws and clips, disconnect the harness connector and remove the console box assembly.



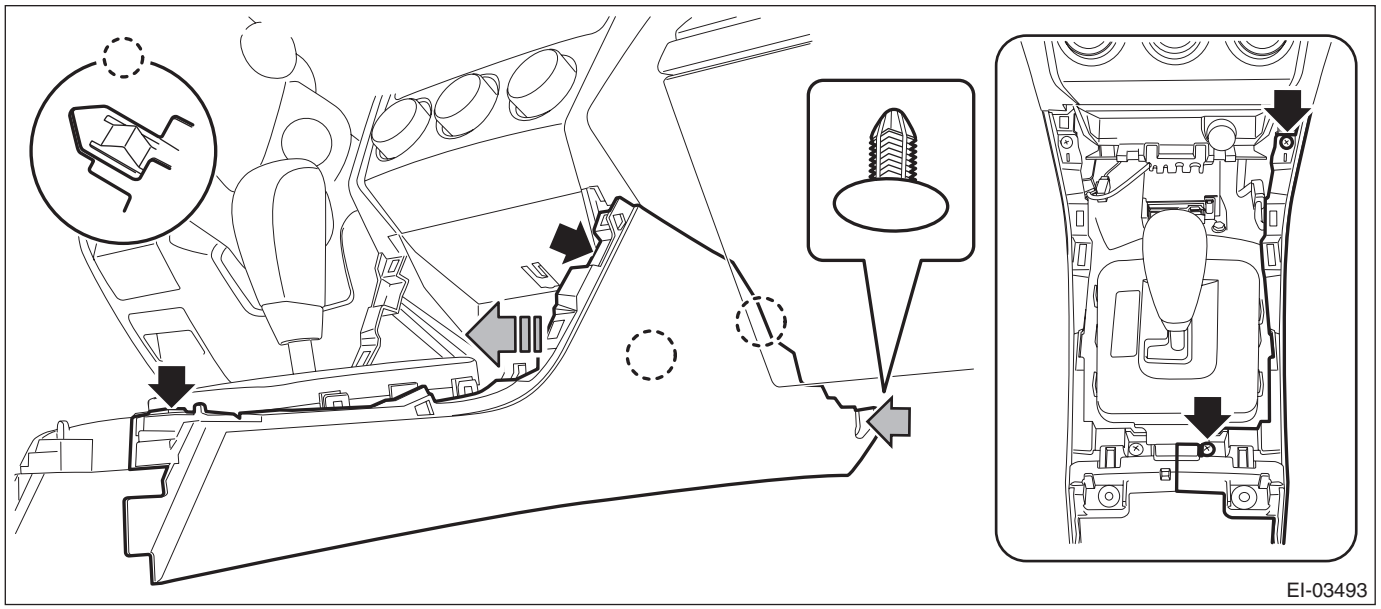
3) Remove the cover - shift lever.
   (1) Remove the shift knob. (MT model)
   (2) Release the clips and claws, then pull up the cover - shift lever.



4) Remove the left and right panel center LWR.
   (1) Remove the screws and clips.
   (2) Release the claws, and then pull the panel center LWR to remove.



EI-03492



EI-03493

## B: INSTALLATION

Install each part in the reverse order of removal.

***Tightening torque:***
***6.5 N·m (0.66 kgf-m, 4.8 ft-lb)***

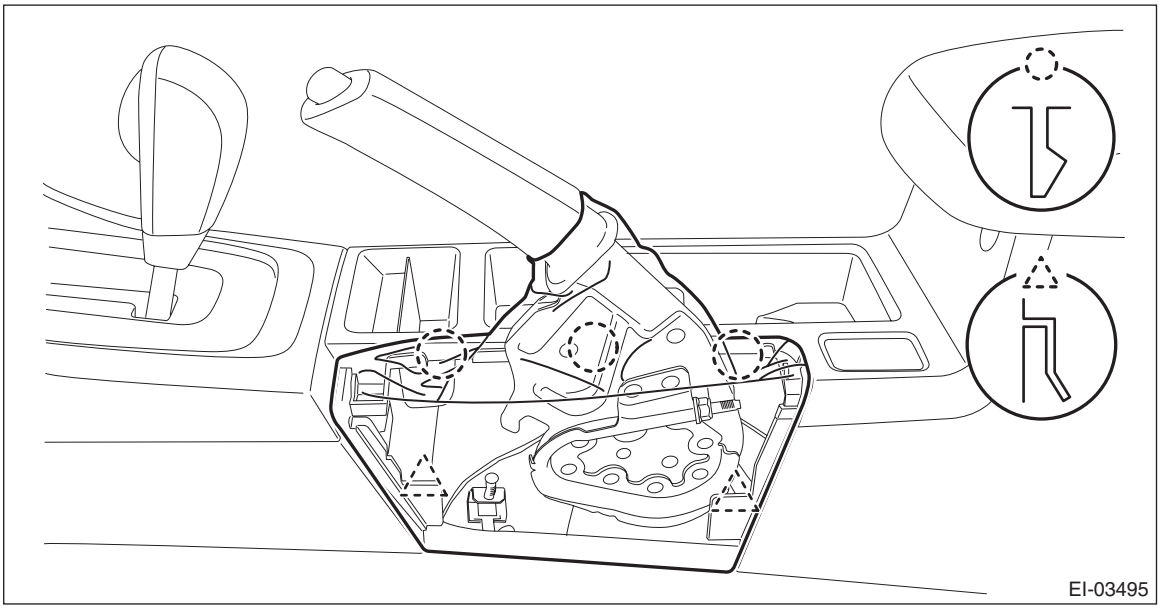
# 18.Instrument Panel Assembly

## A: REMOVAL

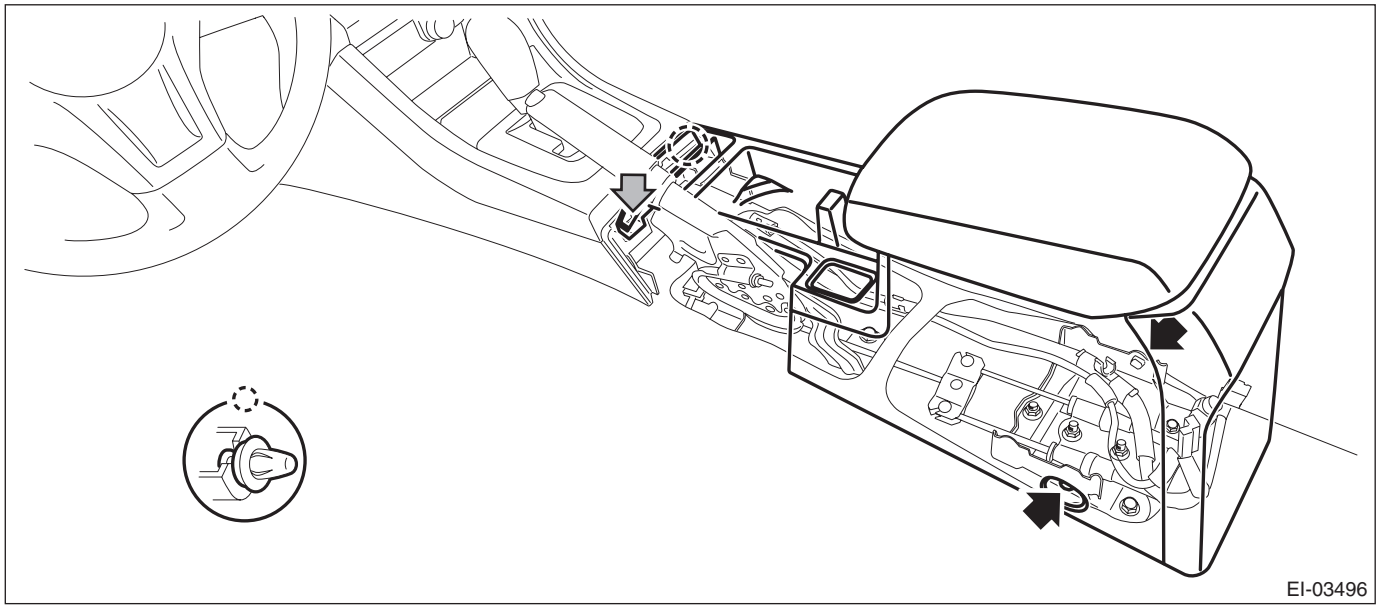
**CAUTION:**
**Be careful not to damage the airbag system harness when servicing the instrument panel. Damage may cause the system to malfunction.**

NOTE:
Remove the instrument panel assembly and the beam COMPL - steering as a unit.
1) Disconnect the ground cable from battery.

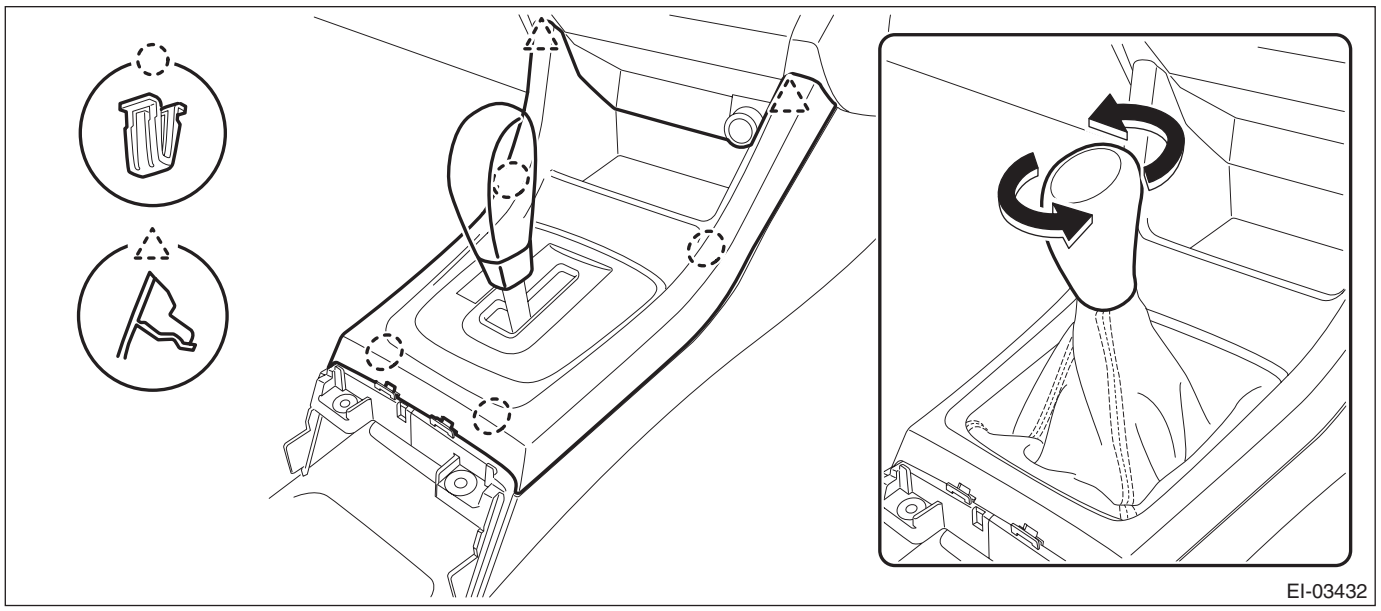
NOTE:
On CVT models, shift the select lever into “D” before disconnecting the battery ground cable.
2) Remove the console box assembly.
(1) Release the claws, and then remove the boot - hand brake.



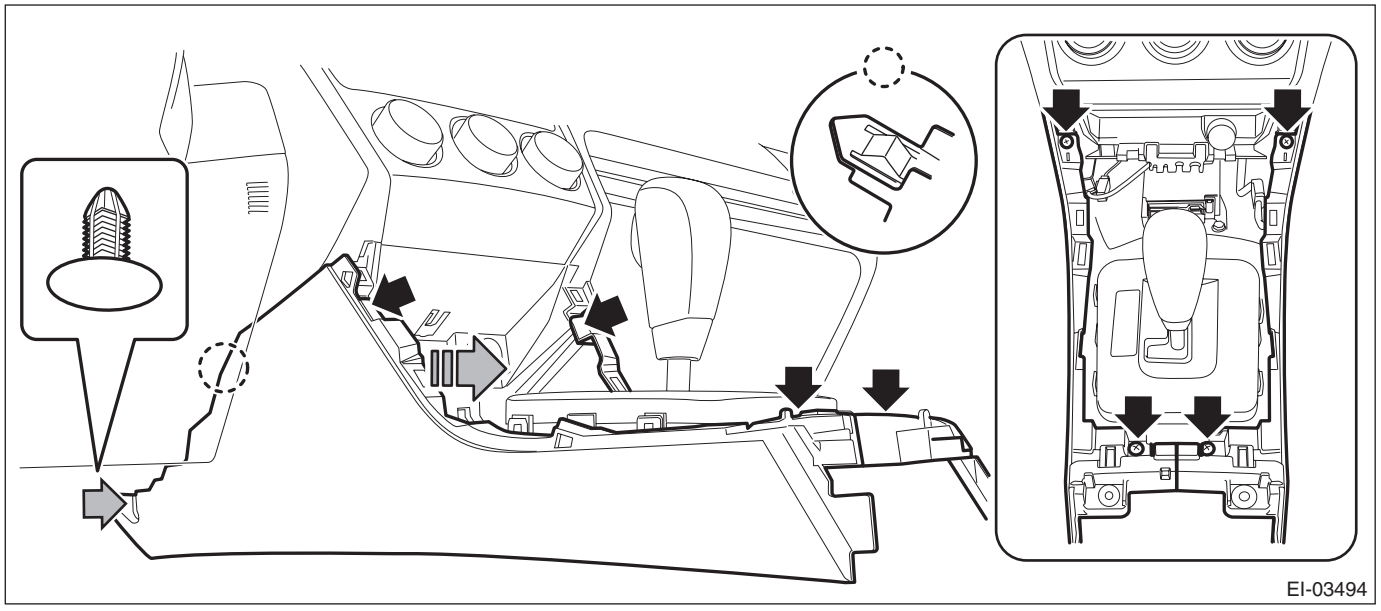
(2) Move the seat forward, and remove the bolts after detaching the left and right caps.
(3) Remove the screws, disconnect the harness connector and remove the console box assembly.



3) Remove the cover - shift lever.
   (1) Remove the shift knob. (MT model)
   (2) Release the clips and claws, then pull up the cover - shift lever.

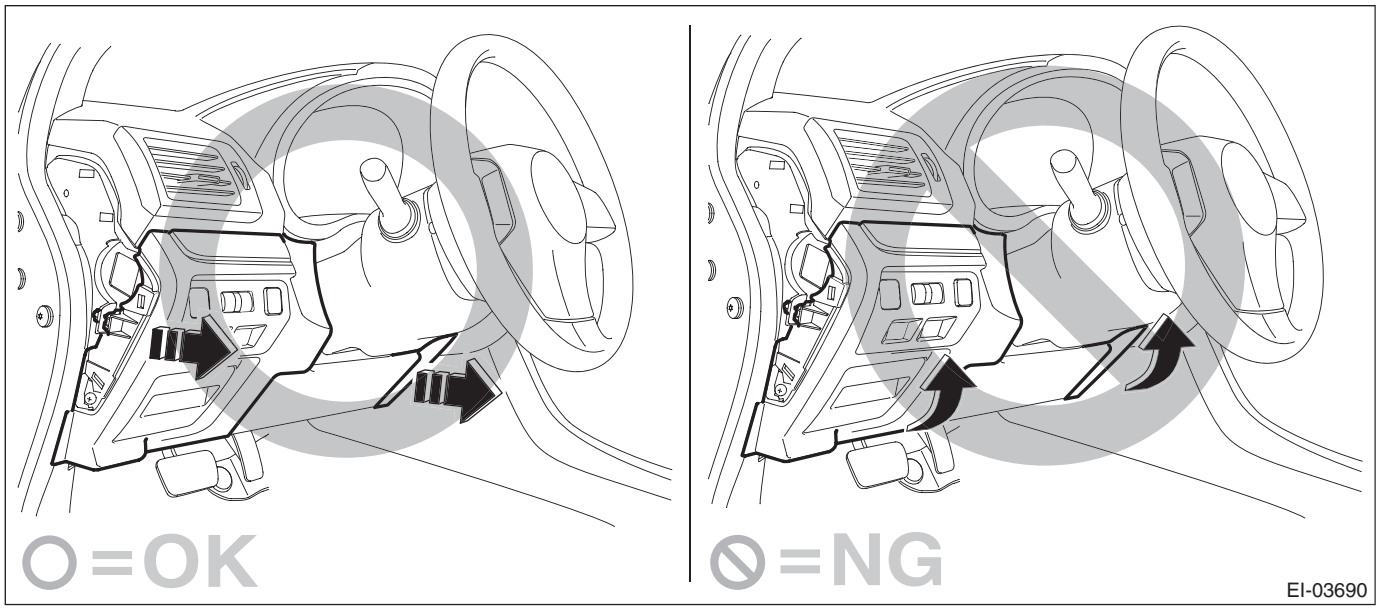


4) Remove the left and right panel center LWR.
   (1) Remove the screws and clips.
   (2) Release the claws, and then pull the panel center LWR to remove.

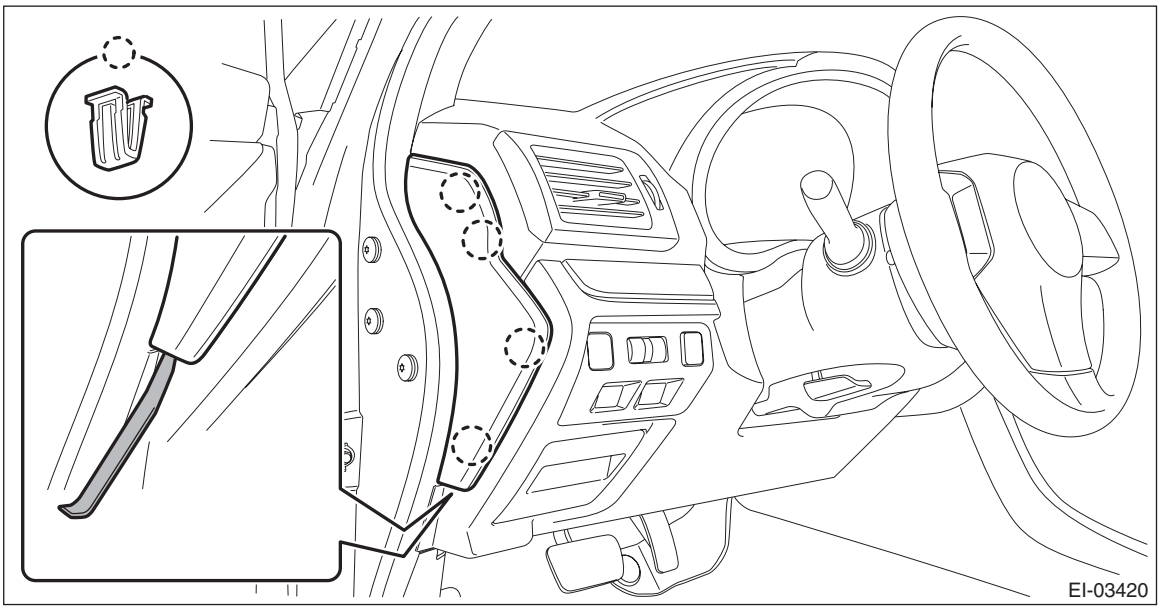


5) Remove the cover assembly - instrument panel LWR driver.

**CAUTION:**
**When removing the cover assembly - instrument panel LWR driver, be sure to pull it toward you. If attempting to remove by turning it upward, the claws may be damaged.**



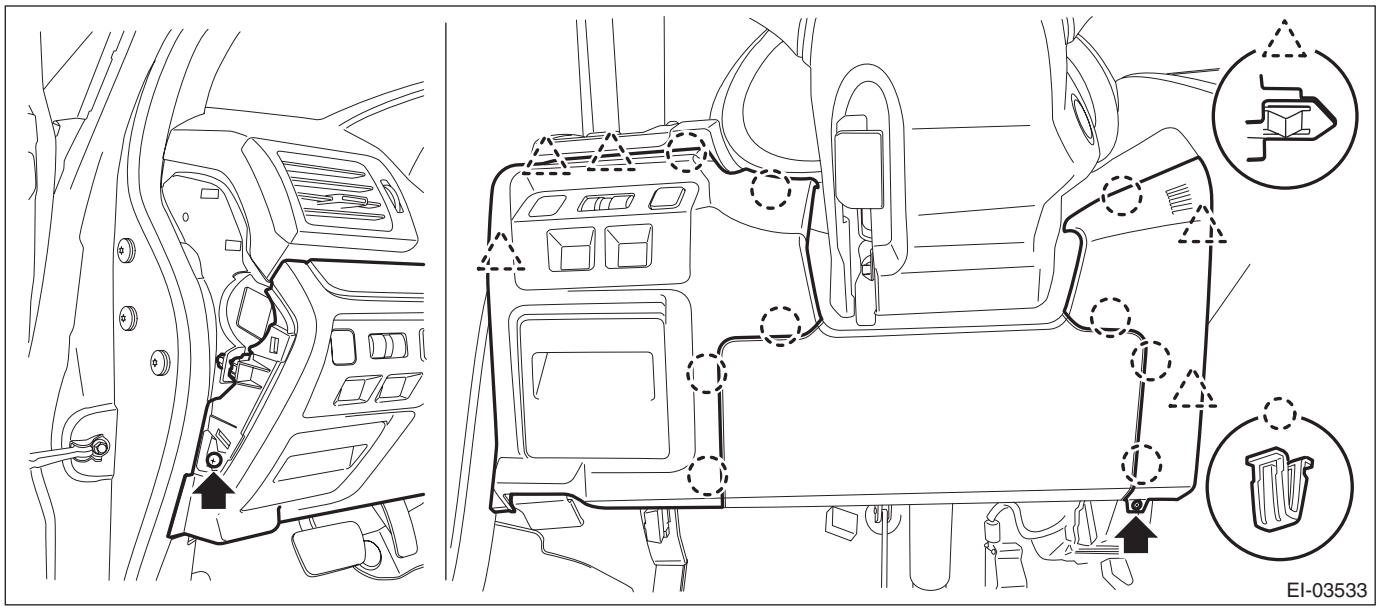
(1) Remove the clips, and remove the cover - instrument panel side LH.



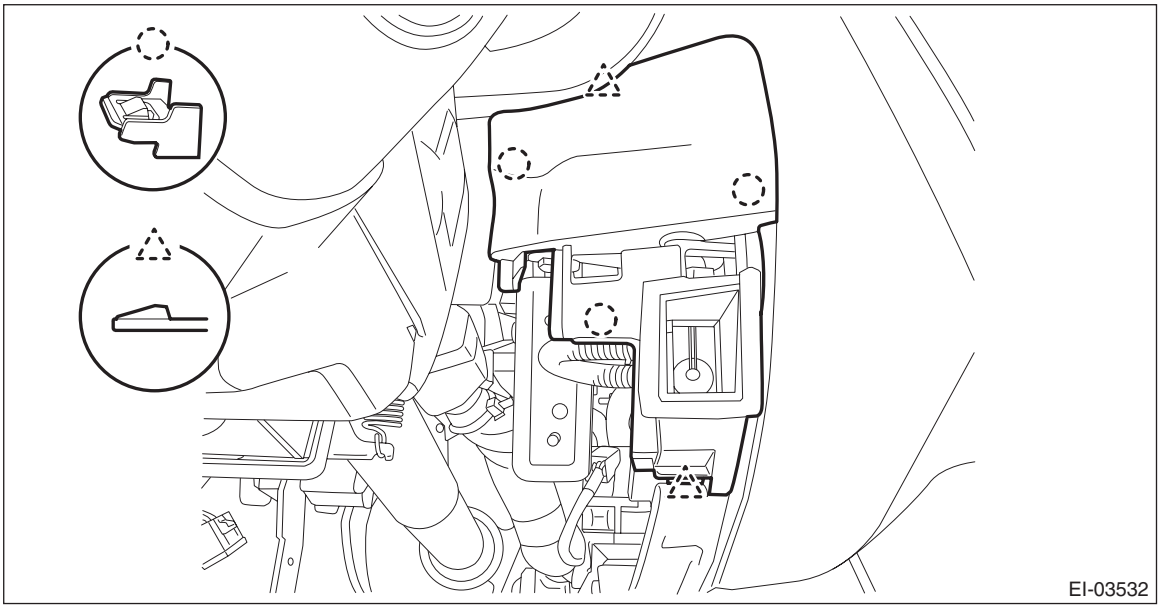
NOTE:
Using a plastic remover, open the cover - instrument panel side LH.

(2) Remove the screws and release the clips and claws.

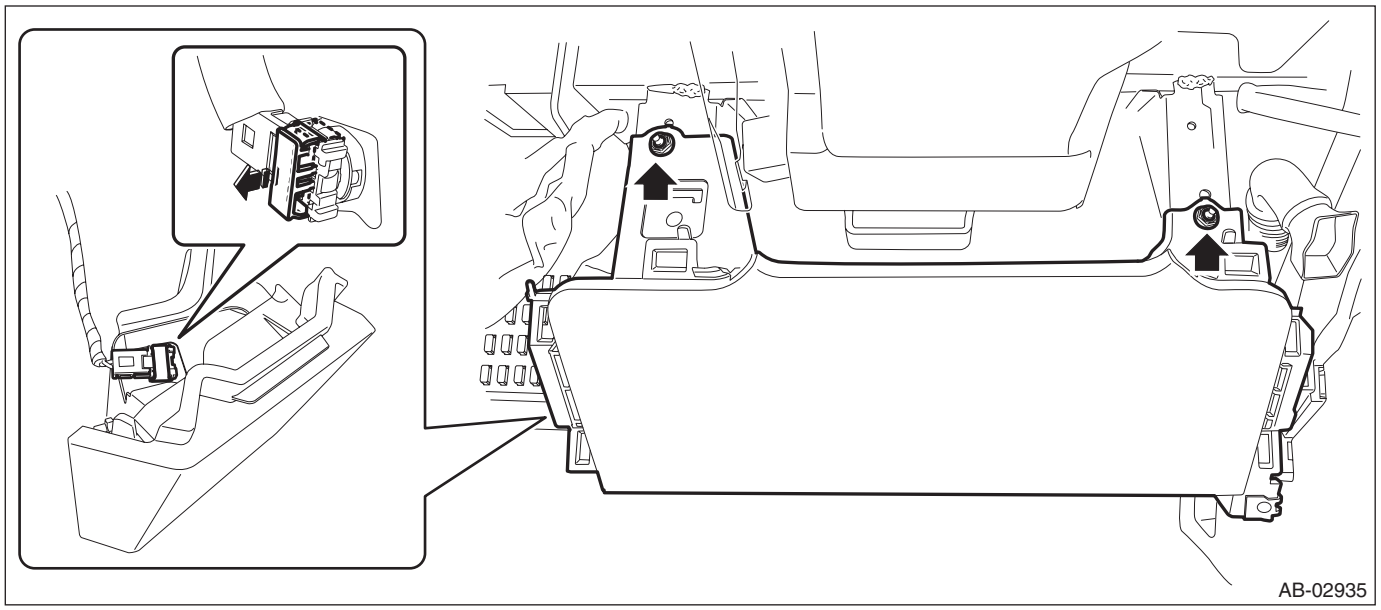
(3) Disconnect the harness connectors, and remove the cover assembly - instrument panel LWR driver INN and OUT.



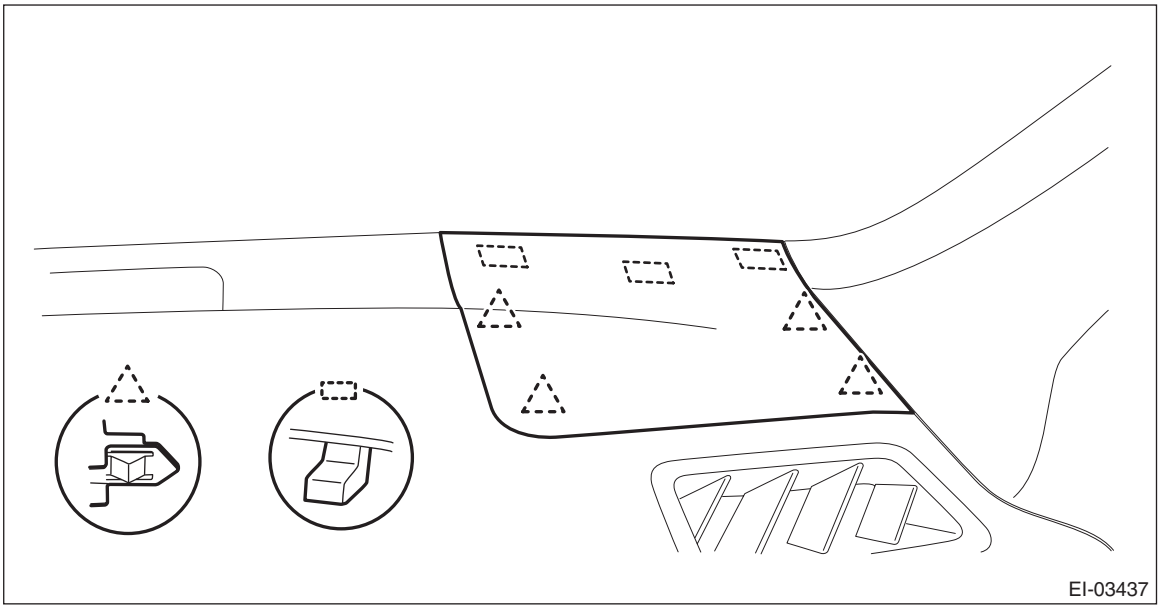
6) Remove the cover switch - starter.
(1) Release the claws and remove the cover switch - starter.
(2) Disconnect the connector and aspirator hose.



7) Remove the nuts to remove the knee airbag module and disconnect the harness connector. <Ref. to AB-33, KNEE AIRBAG MODULE, PROCEDURE, Airbag Connector.>



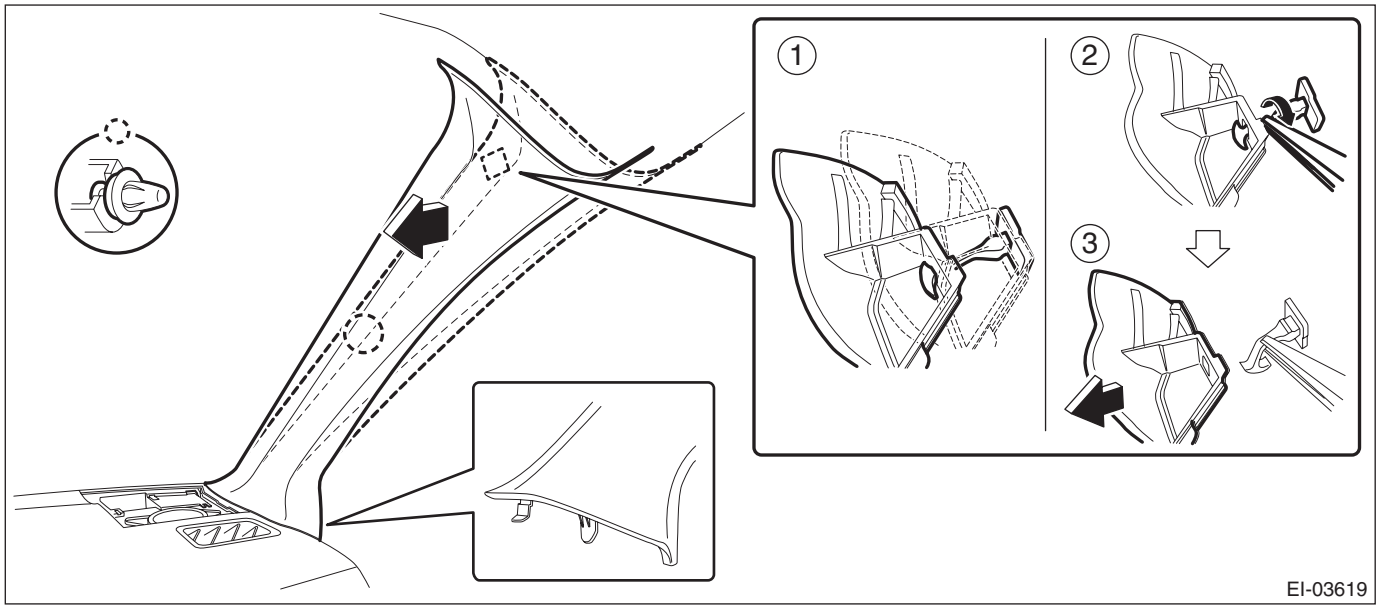
8) Release the clips and claws, then detach the left and right grille speaker side.



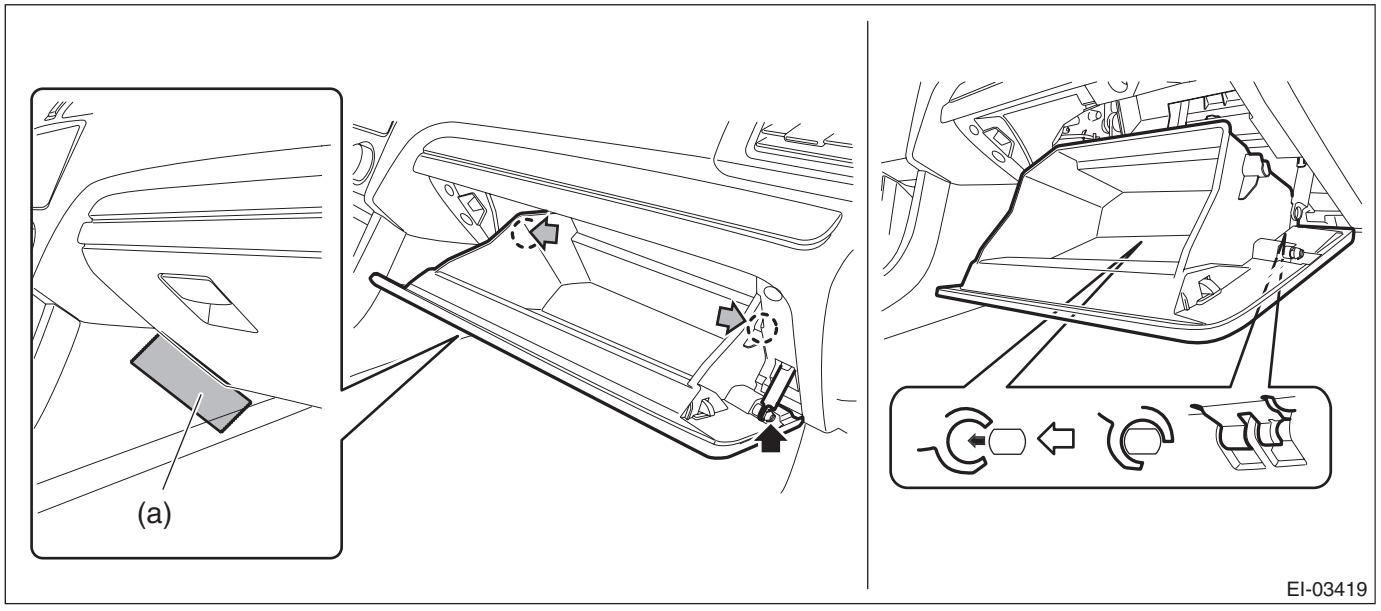
NOTE:
Remove the grille speaker side by using a plastic remover.

9) Remove the trim panel - front pillar UPR on the left and right sides.
(1) Pull the upper part of the trim panel - front pillar UPR towards the center of the vehicle.
(2) Insert long-nose pliers into the top part of the trim, grip the tether clip with the pliers and twist 90° in that position.

**CAUTION:**
**Be careful not to damage the pillar trim surface and curtain airbag module when inserting the pliers.**
(3) Holding the tether clip twisted as in the previous step, remove the trim panel - front pillar UPR from the tether clip.
(4) Remove the clips, and remove the trim panel - front pillar UPR.

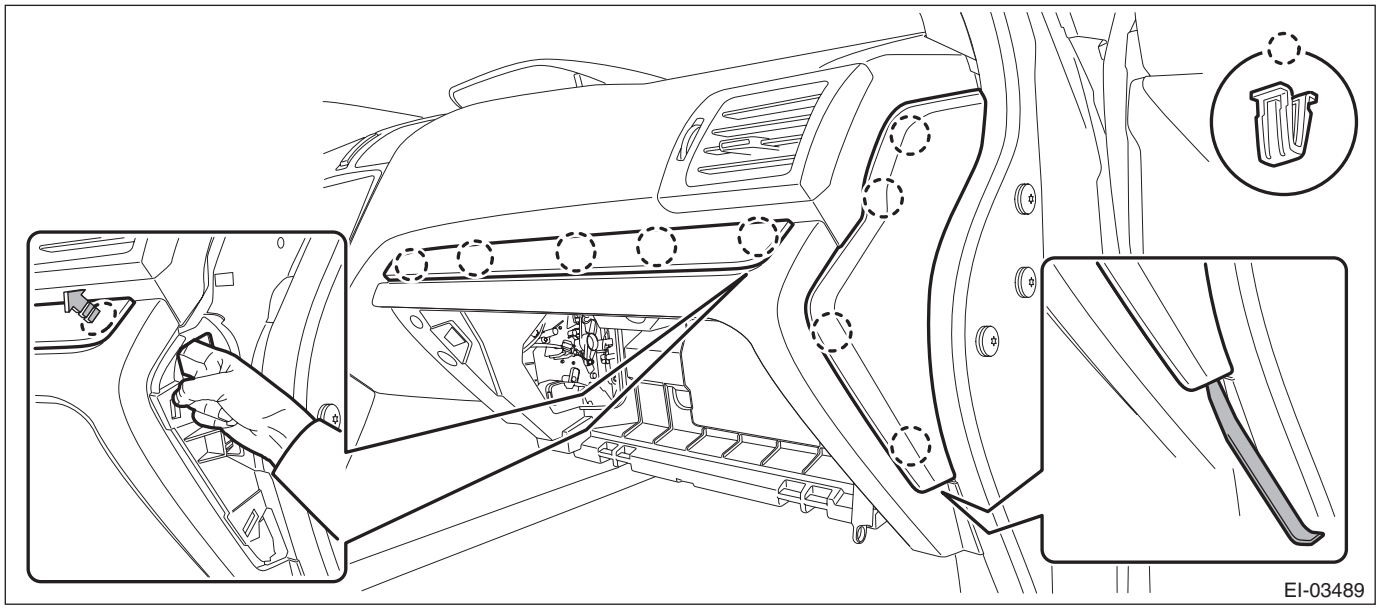


10) Remove the pocket assembly.
(1) Attach the protective tape (a) to the panel center LWR.
(2) Remove the damper COMPL - pocket.
(3) Release the stoppers and remove the pocket assembly by pulling it toward you.

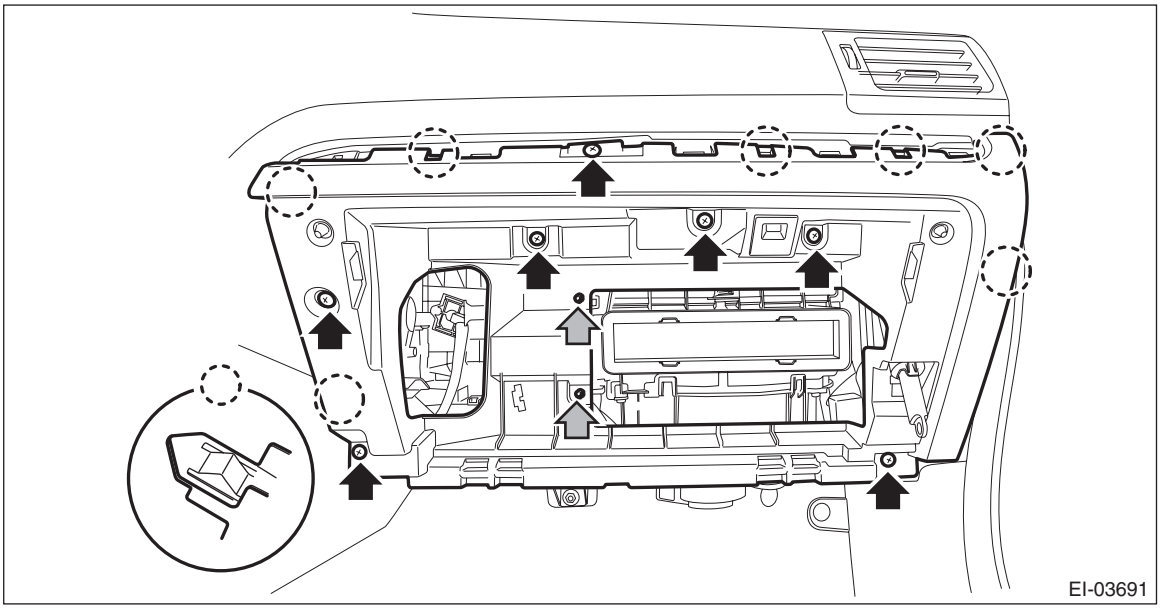


11) Remove the back panel - pocket.
(1) Remove the clips, and remove the cover - instrument panel side RH.

NOTE:
Remove the cover - instrument panel side RH by using a plastic remover.
(2) Release the clips, and remove the ornament - panel assembly passenger.

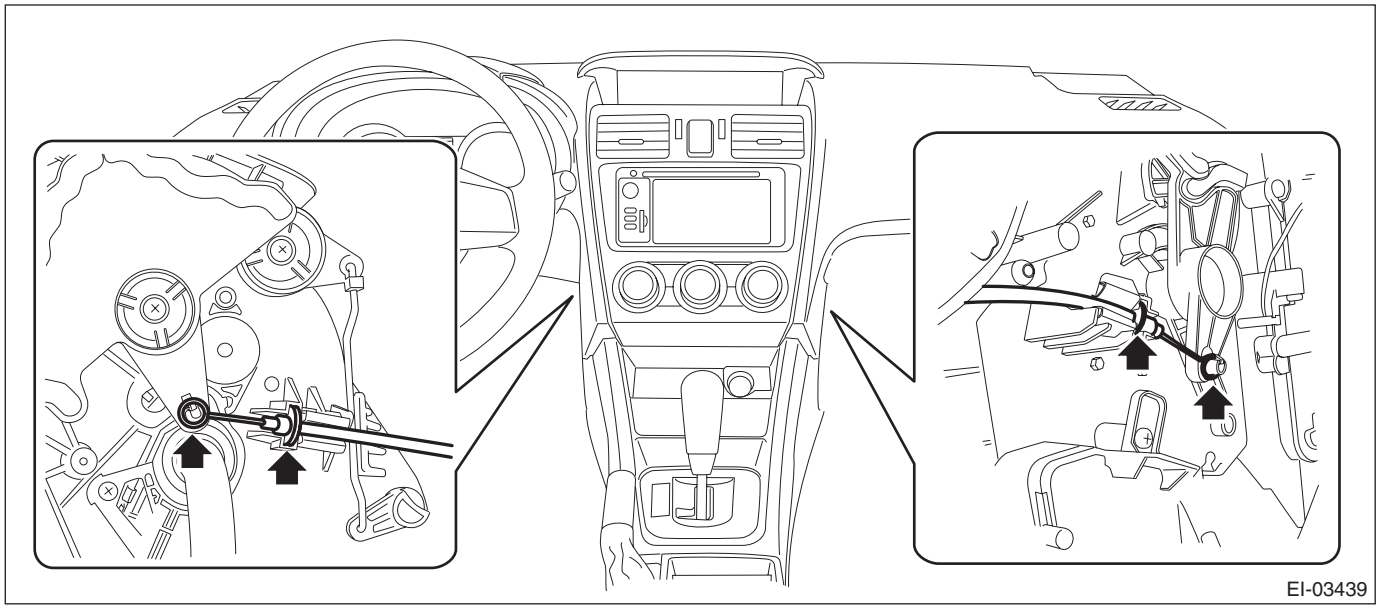


NOTE:
To facilitate the removal, push the clip of the ornament - panel assembly passenger from the backside.
(3) Remove the screws, claws and harness clamp, then remove the back panel - pocket.



(4) Disconnect the glove box light LED connector.

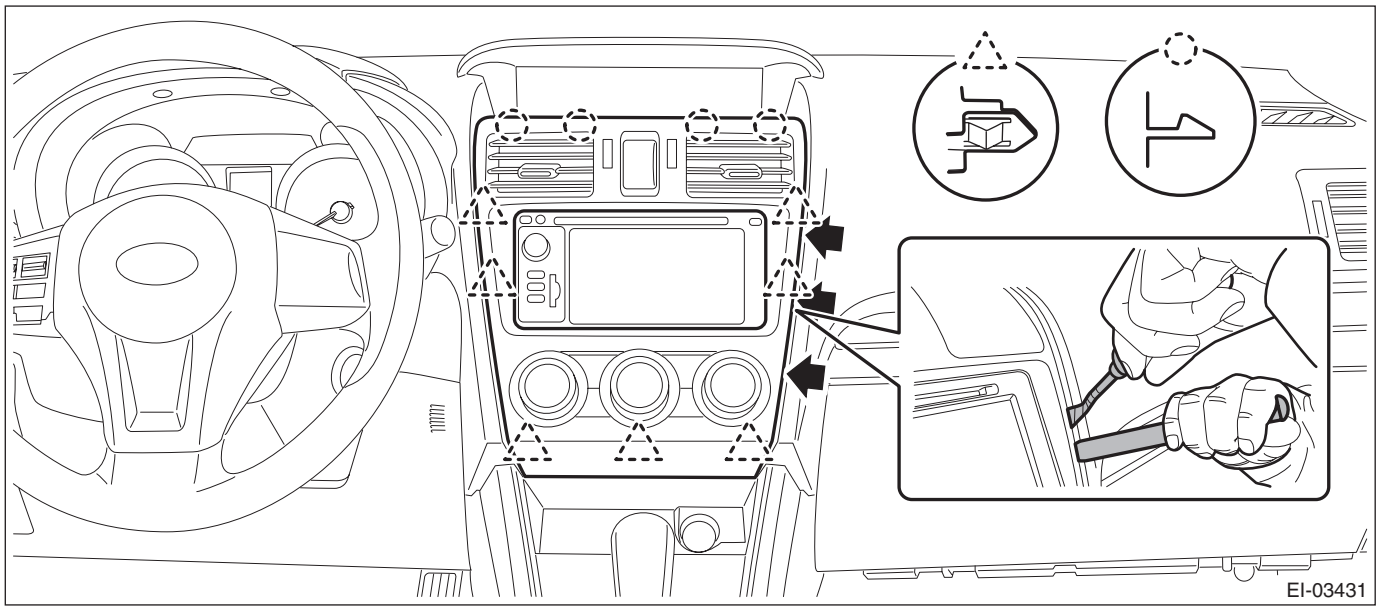
12) On manual A/C models, disconnect the control cables from both sides of the heater & cooling unit.



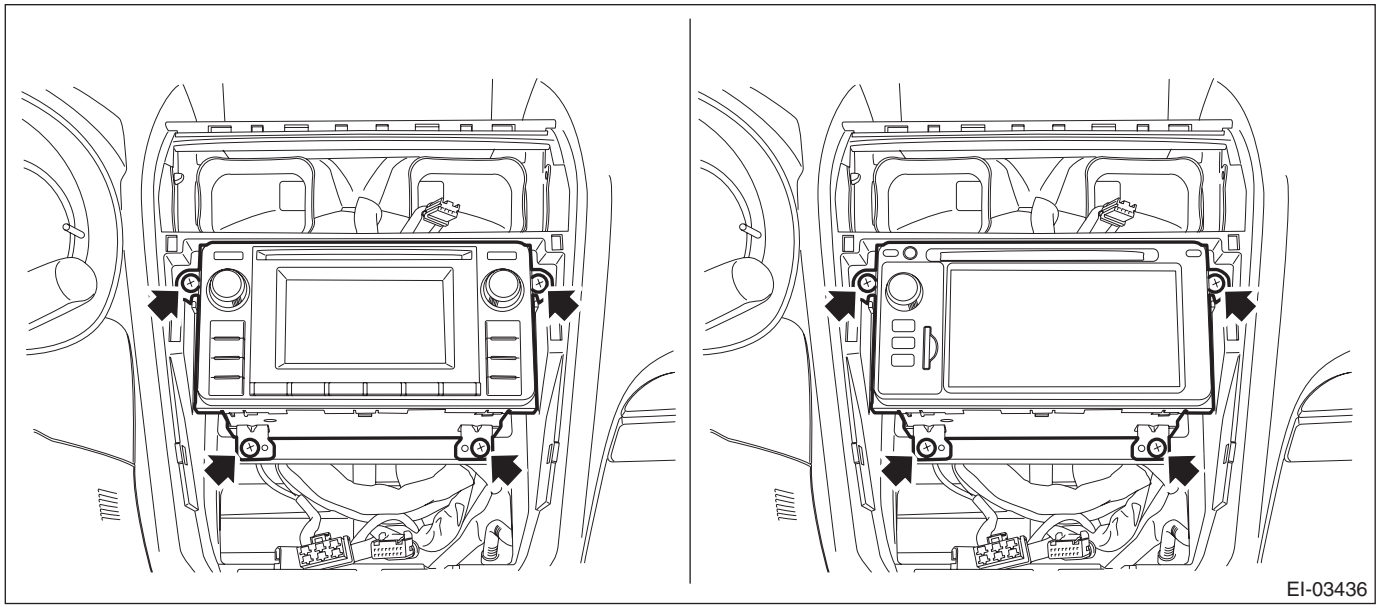
13) Remove the panel center assembly.

**CAUTION:**
- **Do not put your finger on the fin of the air vent grille. Doing so may damage the fin.**
- **Pull the panel center assembly slowly. Pulling with excessive force may damage the connector.**

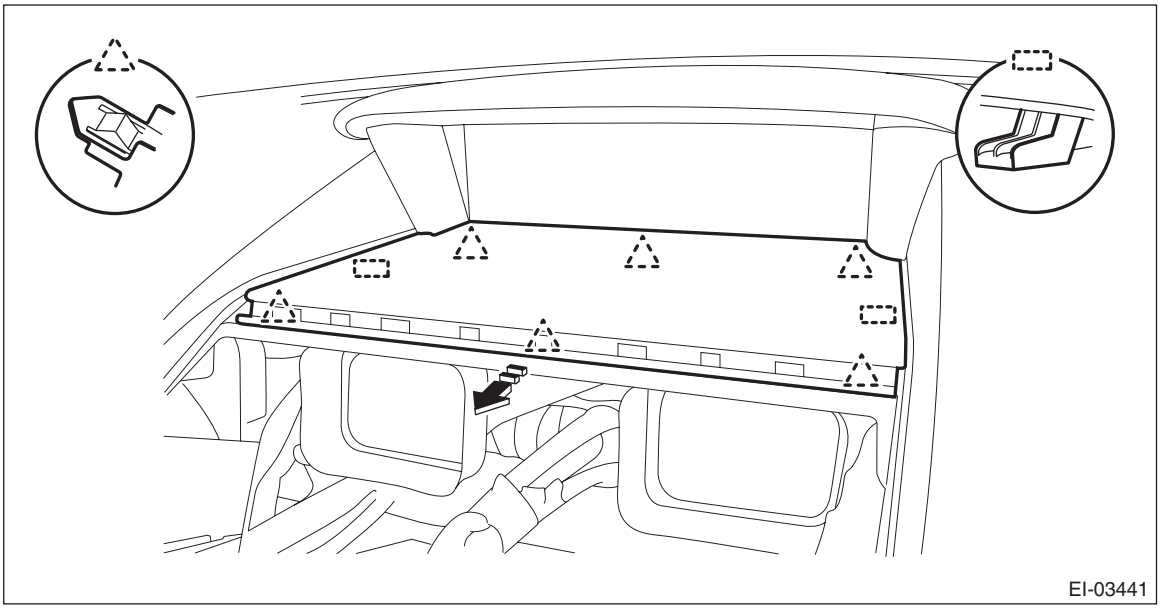
(1) Insert a plastic remover to the three areas shown by the arrows, and lift up the panel center assembly slightly.
(2) With the panel center assembly lifted up slightly, release the claw by using a clip remover wrapped with protective tape.
(3) Release the rest of the claws, and pull out the panel center assembly.
(4) Disconnect the connectors, and remove the panel center assembly.



14) Remove the audio assembly or navigation assembly.
(1) Remove the screws, and partially pull out the audio assembly or navigation assembly.
(2) Disconnect the connectors, and remove the audio assembly or navigation assembly.



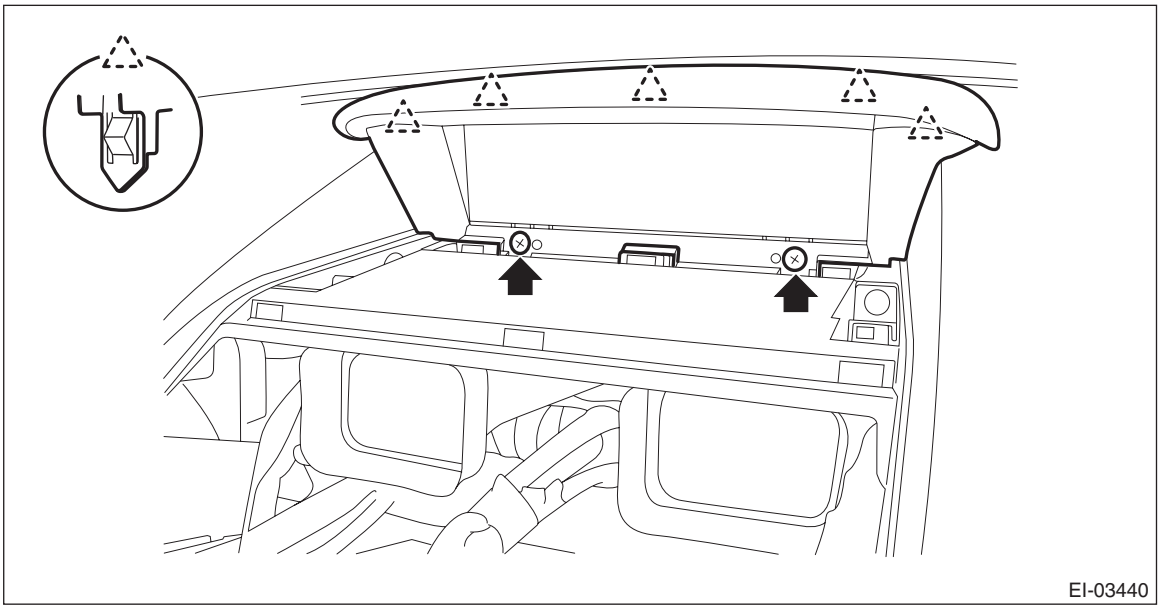
15) Remove the multi-function display assembly.
(1) Disconnect the claws and then remove the cover center UPR.



NOTE:
Lightly push up the back of the cover center UPR, hook the finger to the end portion and pull it toward you to remove it.
(2) Remove the screws and release the claws, then remove the panel - display assembly.

NOTE:
Remove the panel - display UPR & panel - display LWR and the multi-function display assembly as a unit.

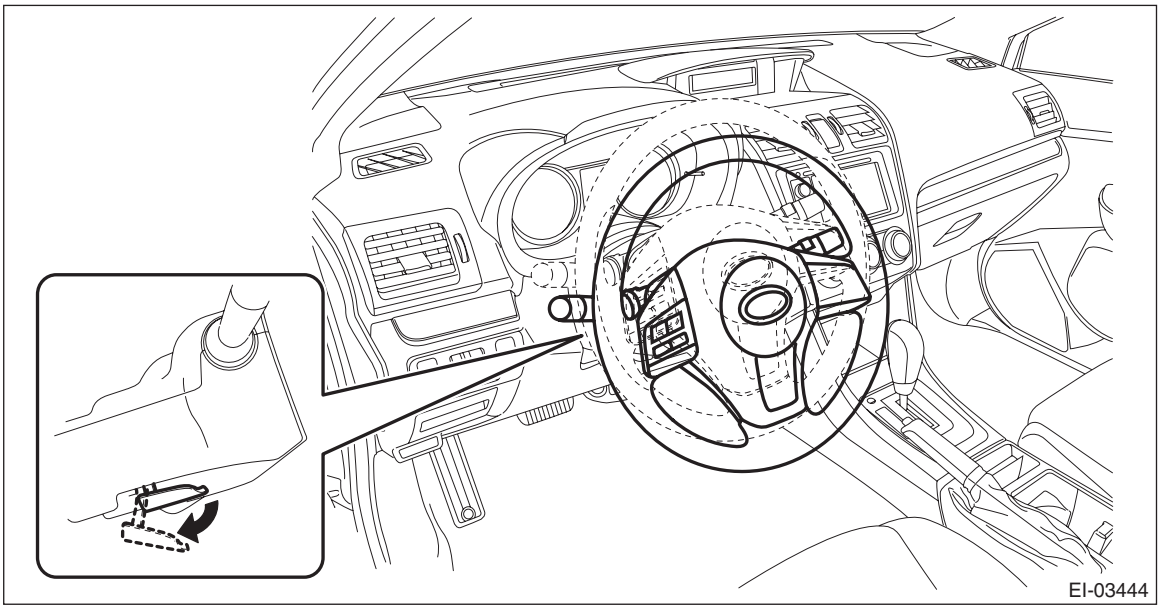
(3) Disconnect the connector and remove the multi-function display assembly.



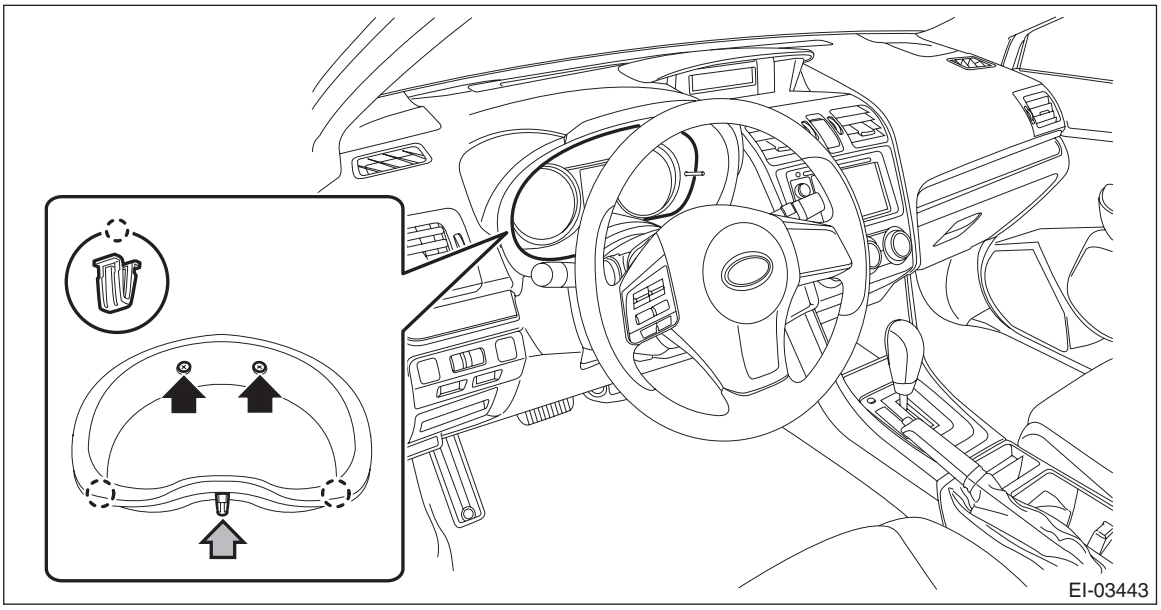
16) Remove the combination meter assembly.

**CAUTION:**
- **Be careful not to damage the meter or instrument panel.**
- **Pay particular attention to avoid damaging the meter glass.**

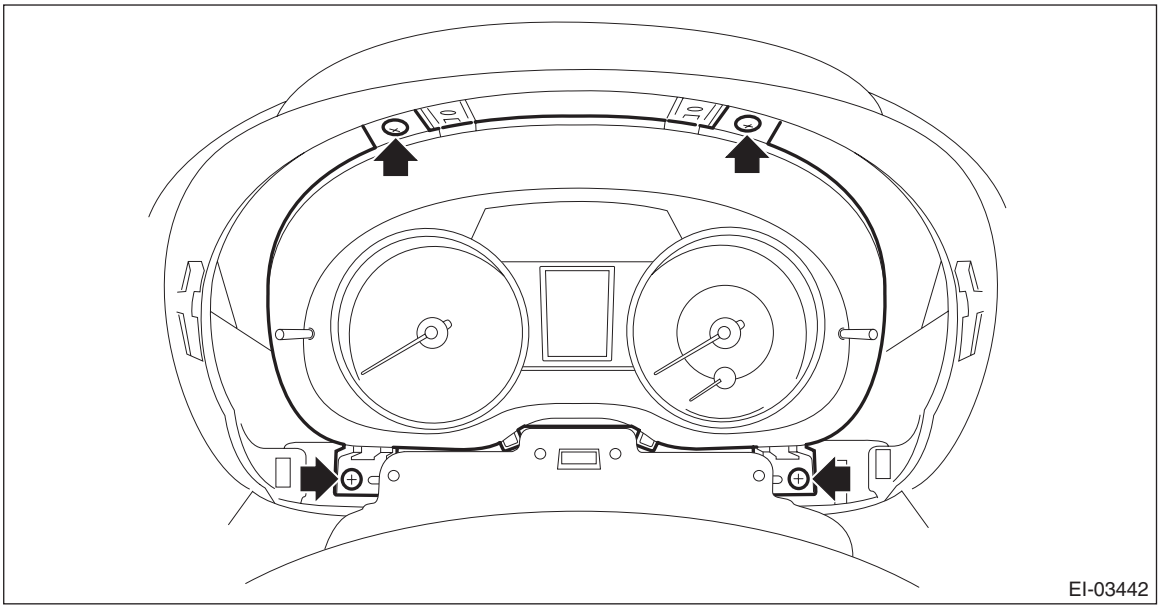
(1) Release the lock, tilt the steering column to the lowest end and fully extend the column by the telescopic system.



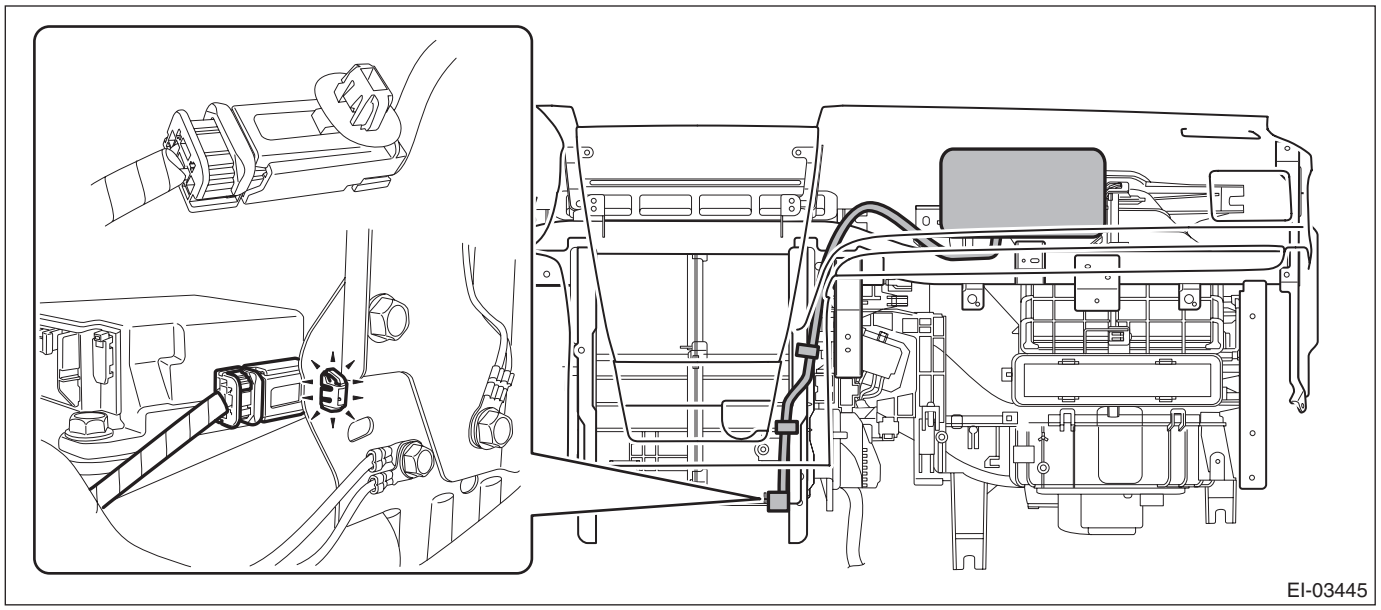
(2) Release the screws and clips, then detach the visor - combination meter.



(3) Remove the screws, disconnect the connector and remove the combination meter assembly.



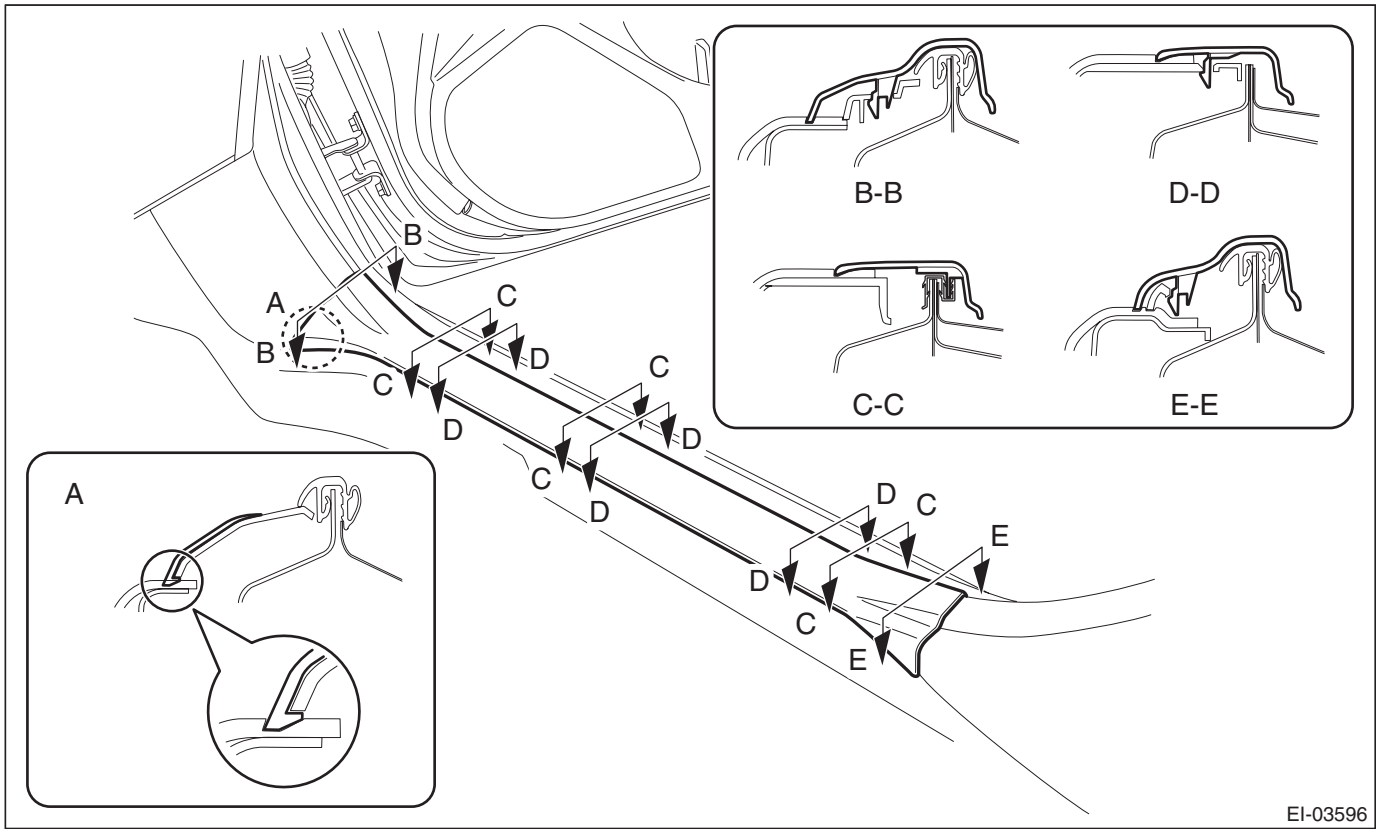
17) Disconnect the passenger's airbag module connector. <Ref. to AB-23, PASSENGER'S AIRBAG MODULE, PROCEDURE, Airbag Connector.>



EI-03445

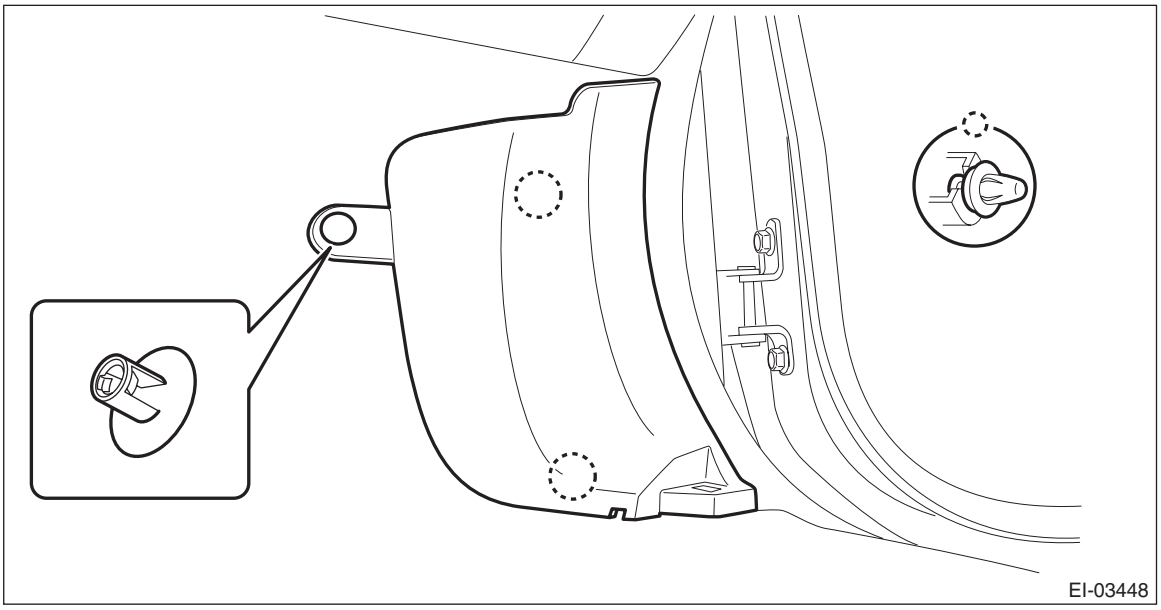
18) Remove the column assembly - steering. <Ref. to PS-18, REMOVAL, Steering Column.>
19) Release the claws, and then remove the cover side sill - front INN on LH and RH sides.

**CAUTION:**
**Do not pull with excessive force. Doing so may damage the claws of the cover side sill - front INN.**



EI-03596

20) Remove the clip, and remove the cover side sill - front on LH and RH sides.



21) Remove the body side weather strip - flange front.
22) Remove the instrument panel assembly and the beam COMPL - steering as a unit.

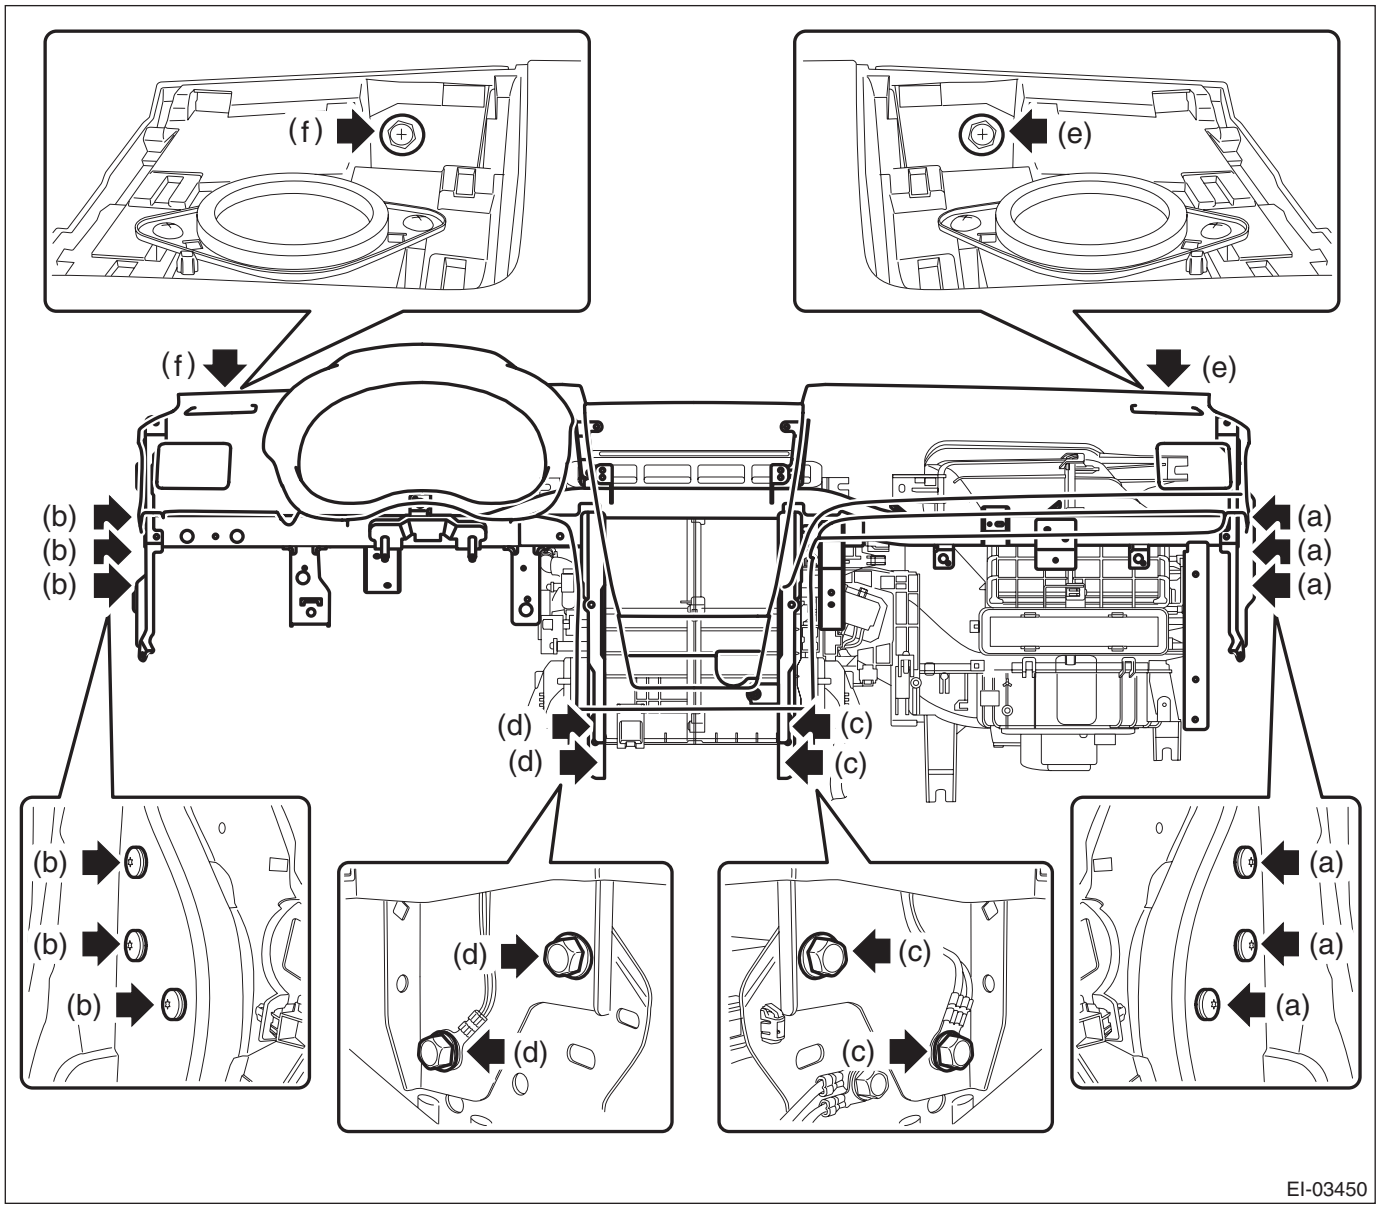
**CAUTION:**
**The instrument panel assembly and the beam COMPL - steering are heavy. Always work in a team of two persons when removing them from the vehicle, so as not to damage the vehicle interior.**

(1) Remove the fuse box and relay box.
(2) Disconnect all harness clamps and connectors of the instrument panel harness.
(3) Remove the TORX® bolt. (a), (b)

***Preparation tool:***
***TORX® T40***

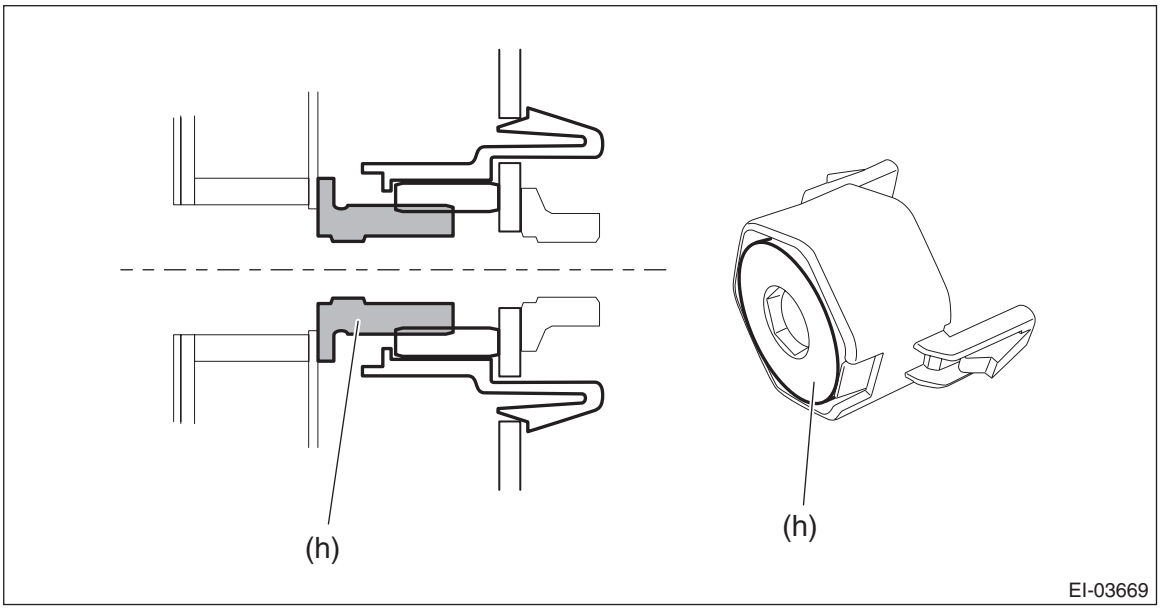
(4) Remove the bolts at the floor center. (c), (d)

(5) Remove the bolt. (e), (f)



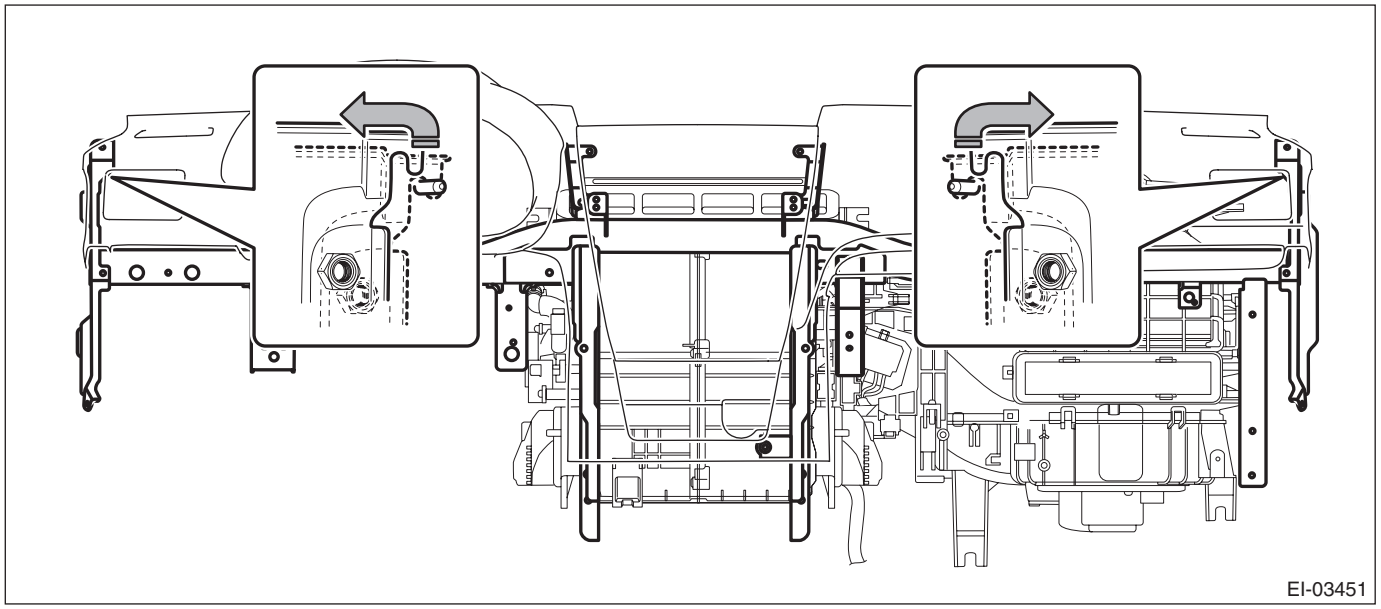
(6) Loosen the adjuster portion (h) of the adjuster - clip space. (only LH side of the beam COMPL - steering)

***Preparation tool:***
***Hexagon wrench: 8 mm (0.31 in)***

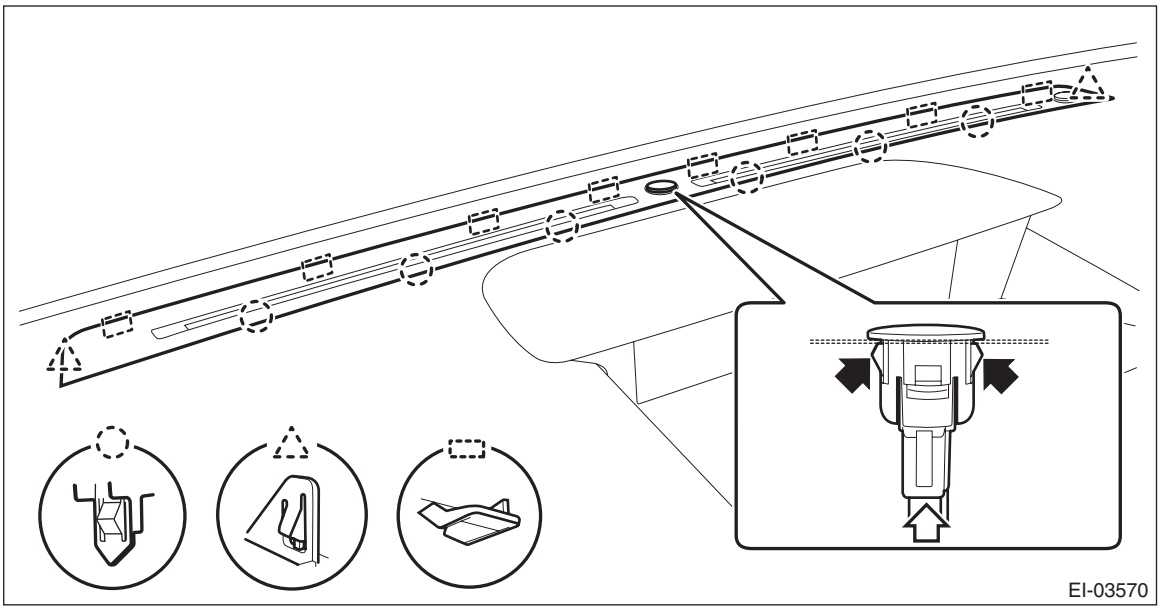


(7) Slightly lift the instrument panel assembly together with the beam COMPL - steering to detach the left and right pins. Then pull it toward you to remove the assembly.

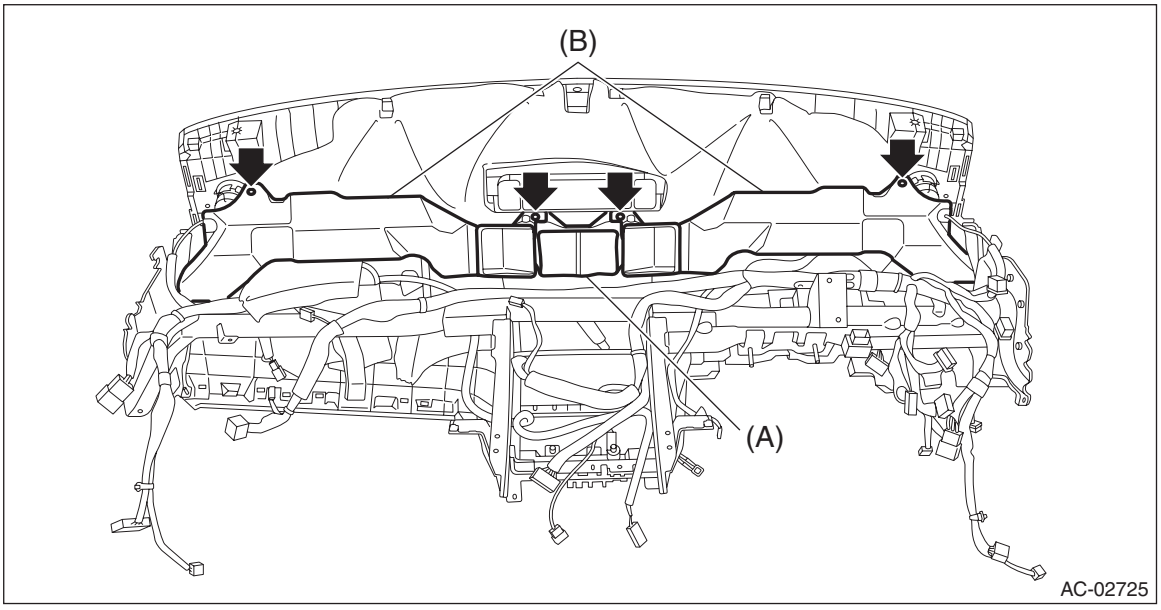
**CAUTION:**
**• Check that all harness clamps and connectors are detached.**
**• The instrument panel assembly and the beam COMPL - steering are heavy. Always work in a team of two persons when removing them from the vehicle, so as not to damage the vehicle interior.**



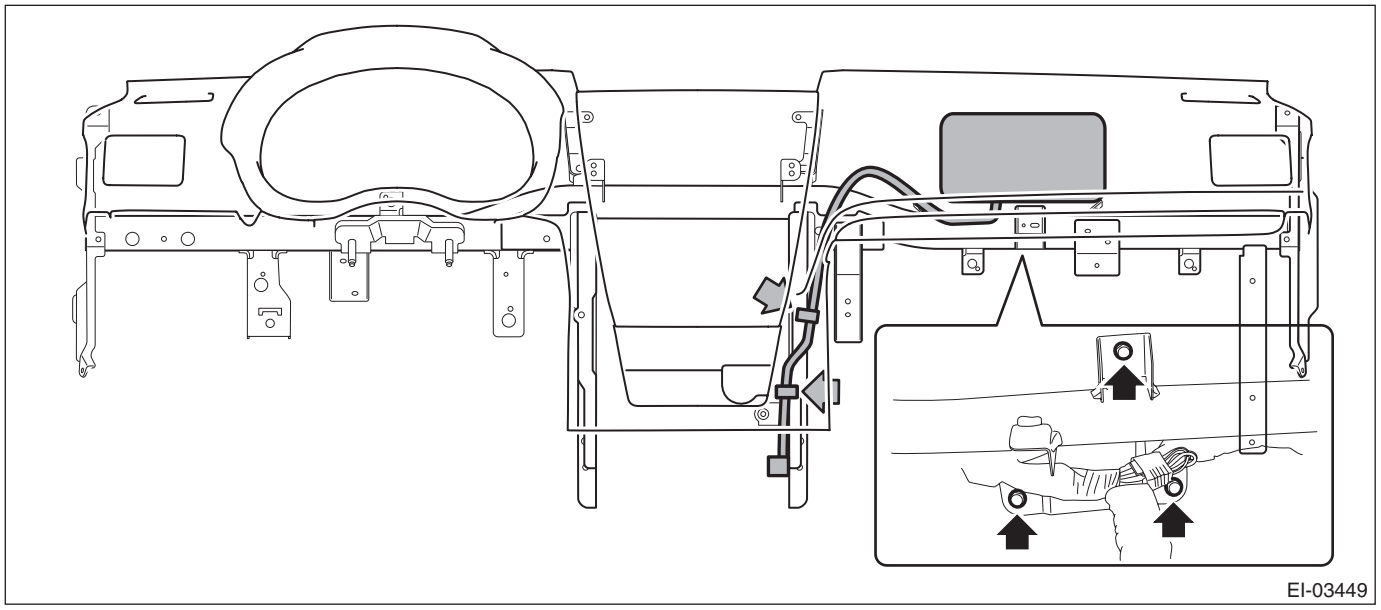
23) Remove the panel COMPL - instrument UPR.
(1) Disconnect the connector of the sensor - sunload.
(2) Release the claws, and remove the panel COMPL - instrument UPR.



24) Remove the screws and remove the front (A) and side vent duct (B) LH, RH.



25) Separate the panel COMPL - instrument and the beam COMPL - steering.
(1) Remove the clamps and bolts of the passenger's airbag module harness.



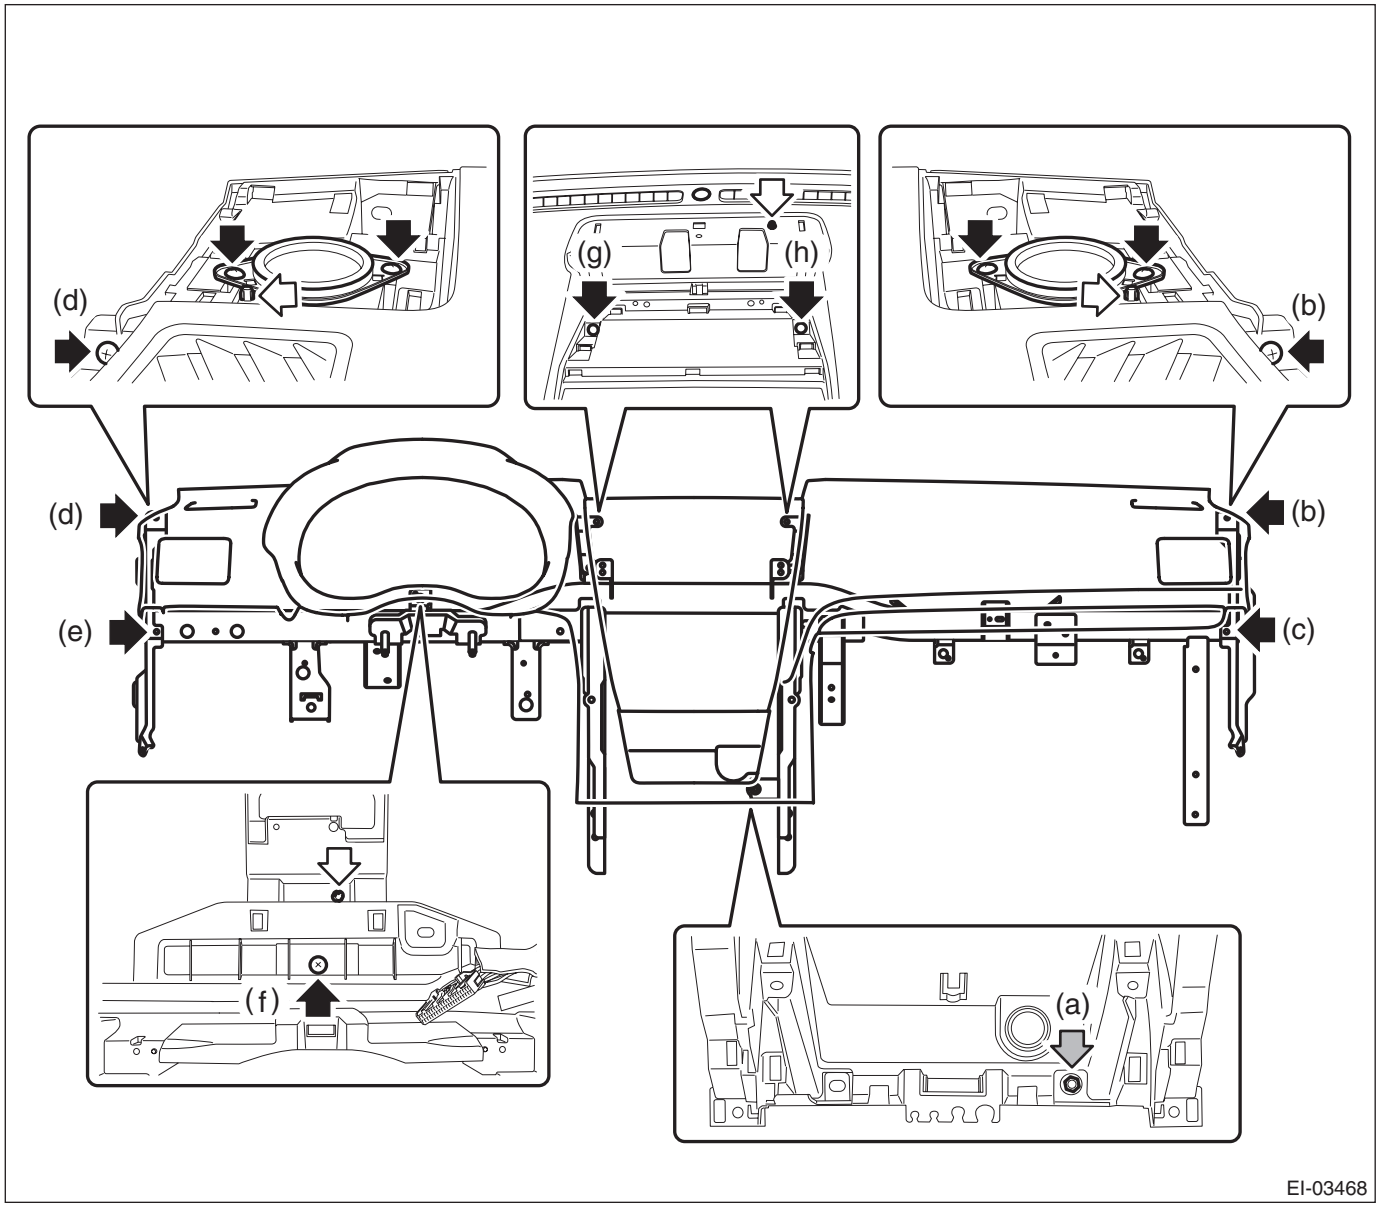
EI-03449

(2) Remove the left and right speakers.

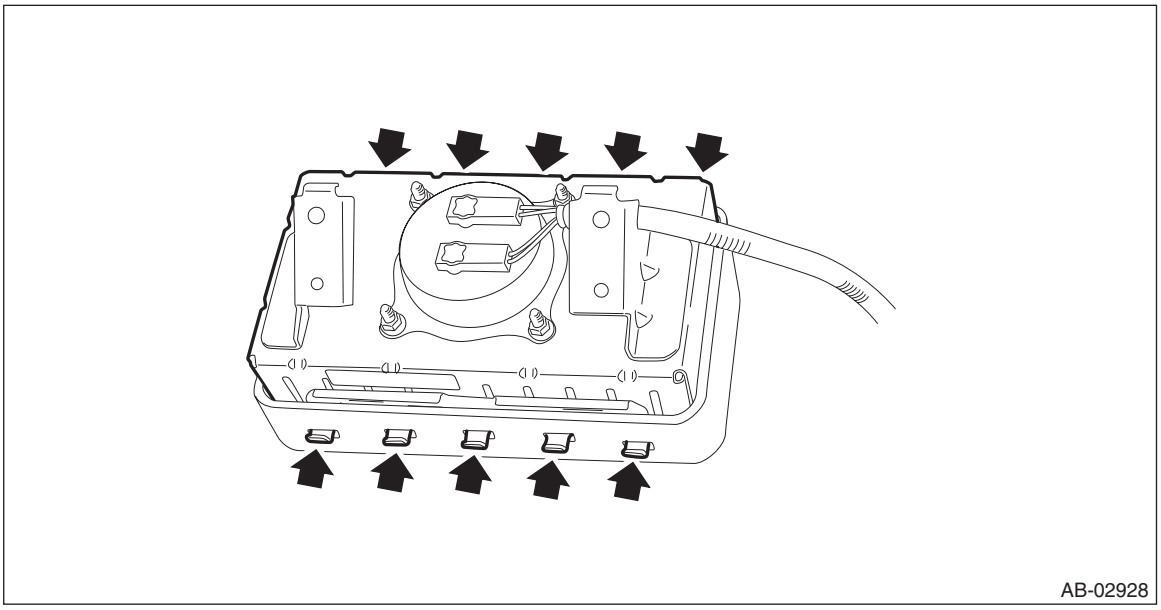
NOTE:
Detach the harness clamp together.

(3) Disconnect the front accessory socket connector.
(4) Remove the nut (a) and screws (b), (c), (d), (e), (f), (g) and (h).

(5) While being careful with the harness, separate the panel COMPL - instrument and the beam COMPL - steering.



26) Remove the claws, and remove the passenger's airbag module.



## B: INSTALLATION

1) Attach components until the instrument panel assembly is formed, in the reverse order of removal.

***Tightening torque:***
***Passenger's airbag module: 7.5 N·m (0.76 kgf-m, 5.5 ft-lb)***

NOTE:
Method of installing insulator
- Adhesive

Use polyurethane adhesive. When assembling the instrument panel assembly, wait until the adhesive has evaporated to prevent filling of the smell in the compartment.
- Double-sided tape

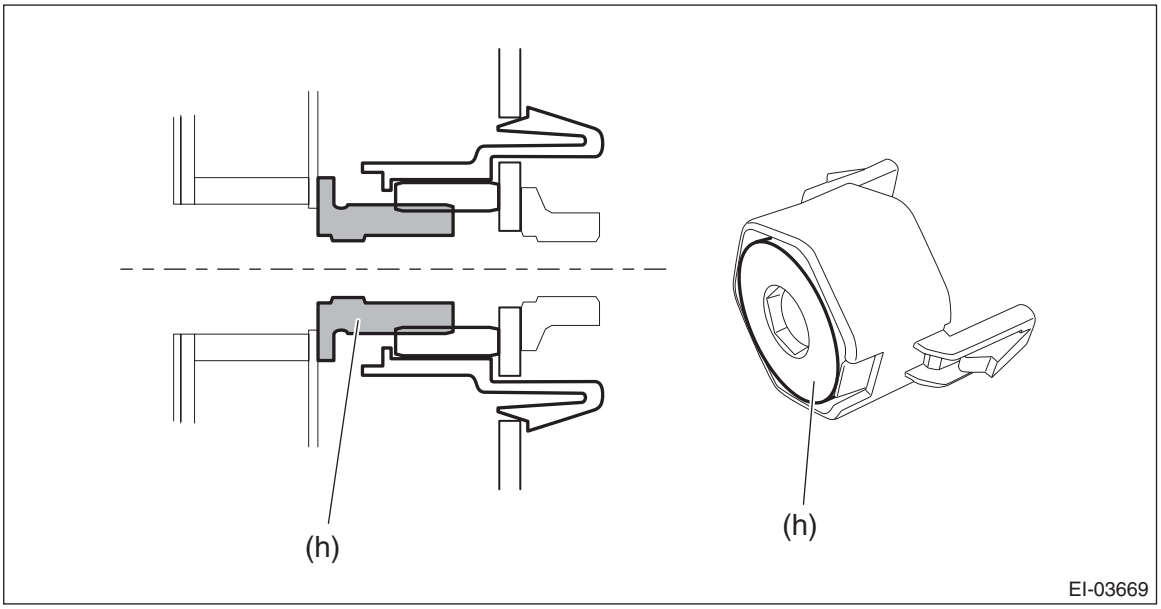
Use commercial double-sided tape. (Use strong double-sided adhesive tape.)
2) Insert the matching pins on the body side (three locations - one in the center and the remaining two on both sides) into the instrument panel assembly and the beam COMPL - steering.
3) Check that the matching pins are inserted securely, and then route the harness.

4) Secure the instrument panel assembly and the beam COMPL - steering to the vehicle body.
(1) Position the instrument panel assembly and the beam COMPL - steering to the vehicle body and tighten the adjuster - clip space.

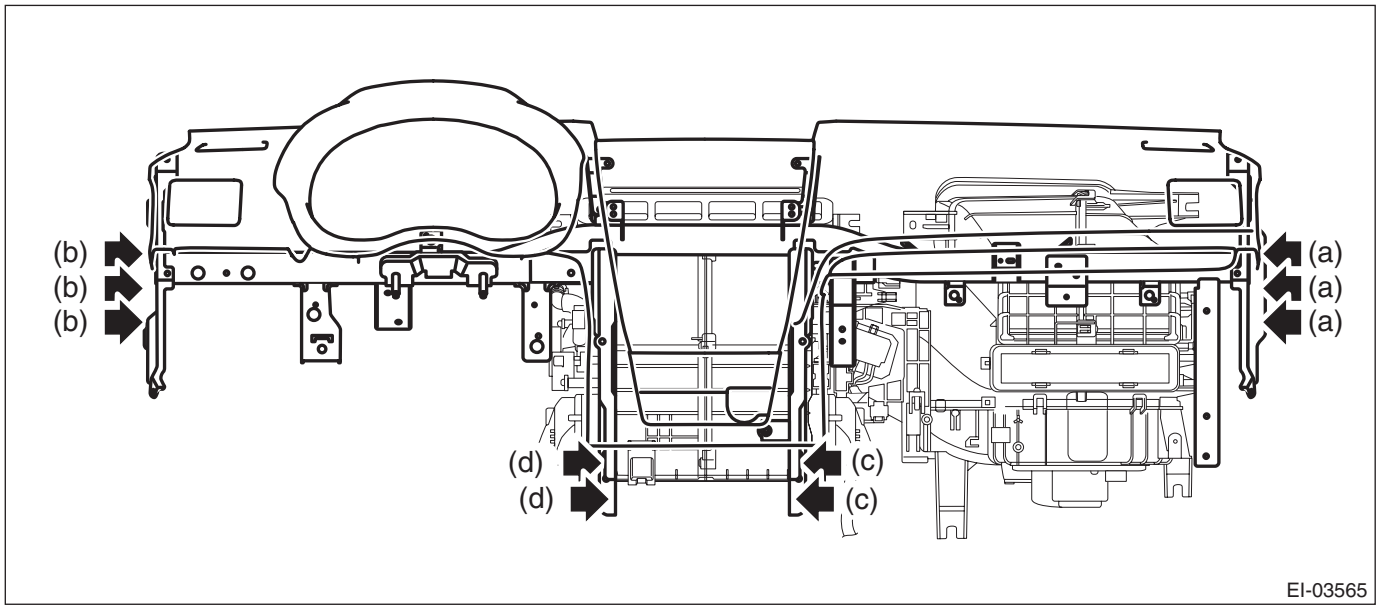
***Preparation tool:***
***Hexagon wrench: 8 mm (0.31 in)***

NOTE:
Tighten so that there is no gap between the adjuster portion (h) and the body.

***Tightening torque:***
***Adjuster - clip space: 0.4 — 4 N·m (0.04 — 0.41 kgf-m, 0.3 — 2.95 ft-lb)***



(2) Temporarily tighten the bolts (a), (b), (c) and (d) of the beam COMPL - steering.

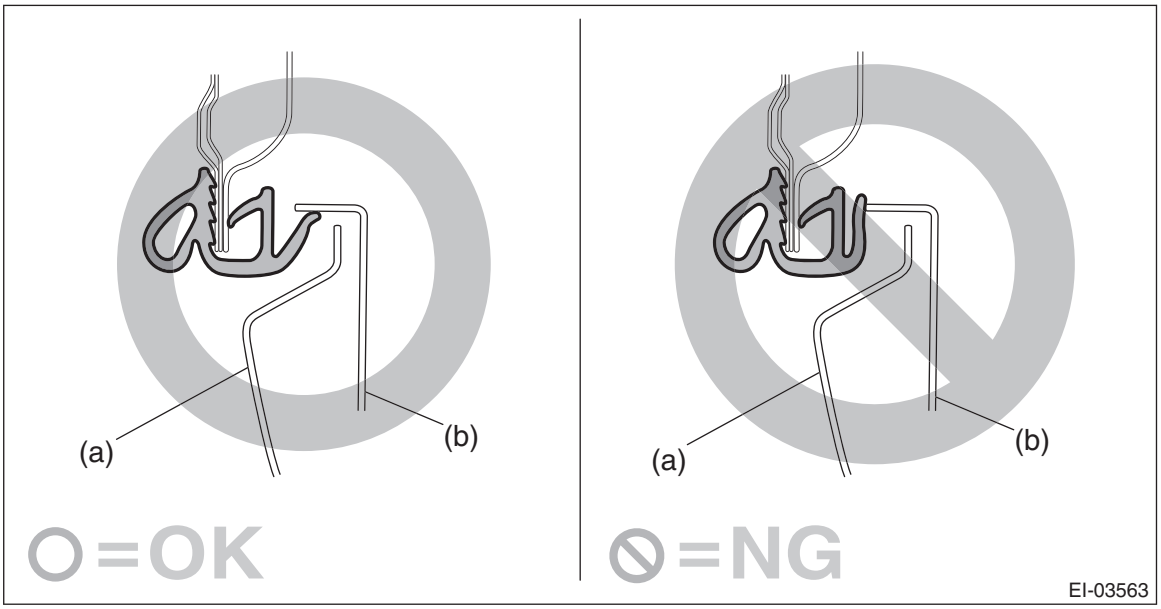


(3) Tighten the beam COMPL - steering in the order from (a) to (d) to the specified torque.

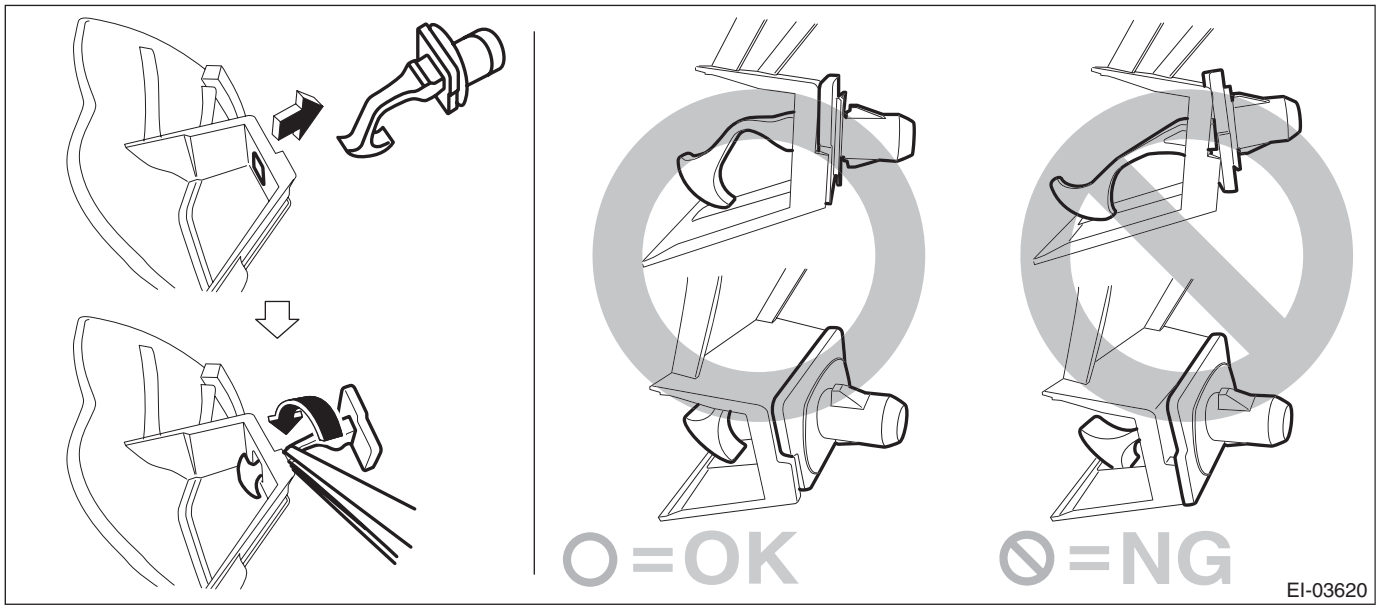
***Tightening torque:***
***Beam COMPL - steering: 25 N·m (2.55 kgf-m, 18.4 ft-lb)***

5) Install each part in the reverse order of removal.

**CAUTION:**
**• After installing the panel center assembly, check that the air vent grille of the panel center assembly is inserted correctly into the air vent duct.**
**• When installing the cover - instrument panel side (a), make sure that the body side weather strip - flange front does not come inside the panel COMPL - instrument (b).**



**• When reusing the tether clip on the upper part of the trim panel - front pillar UPR, check that there is no damage to the tether clip. If the tether clip is damaged, its holding force is reduced and the trim panel - front pillar UPR may come off. Be sure to replace it with a new tether clip.**
**• Do not reuse the tether clip removed from the upper part of the trim panel - front pillar UPR. Always replace with a new part.**
**• Check the installation status of the tether clips and install the trim panel - front pillar UPR.**



***Tightening torque:***
***Column assembly - steering: <Ref. to PS-3, STEERING WHEEL AND COLUMN, COMPONENT, General Description.>***
***Console box assembly: 6.5 N·m (0.66 kgf-m, 4.8 ft-lb)***

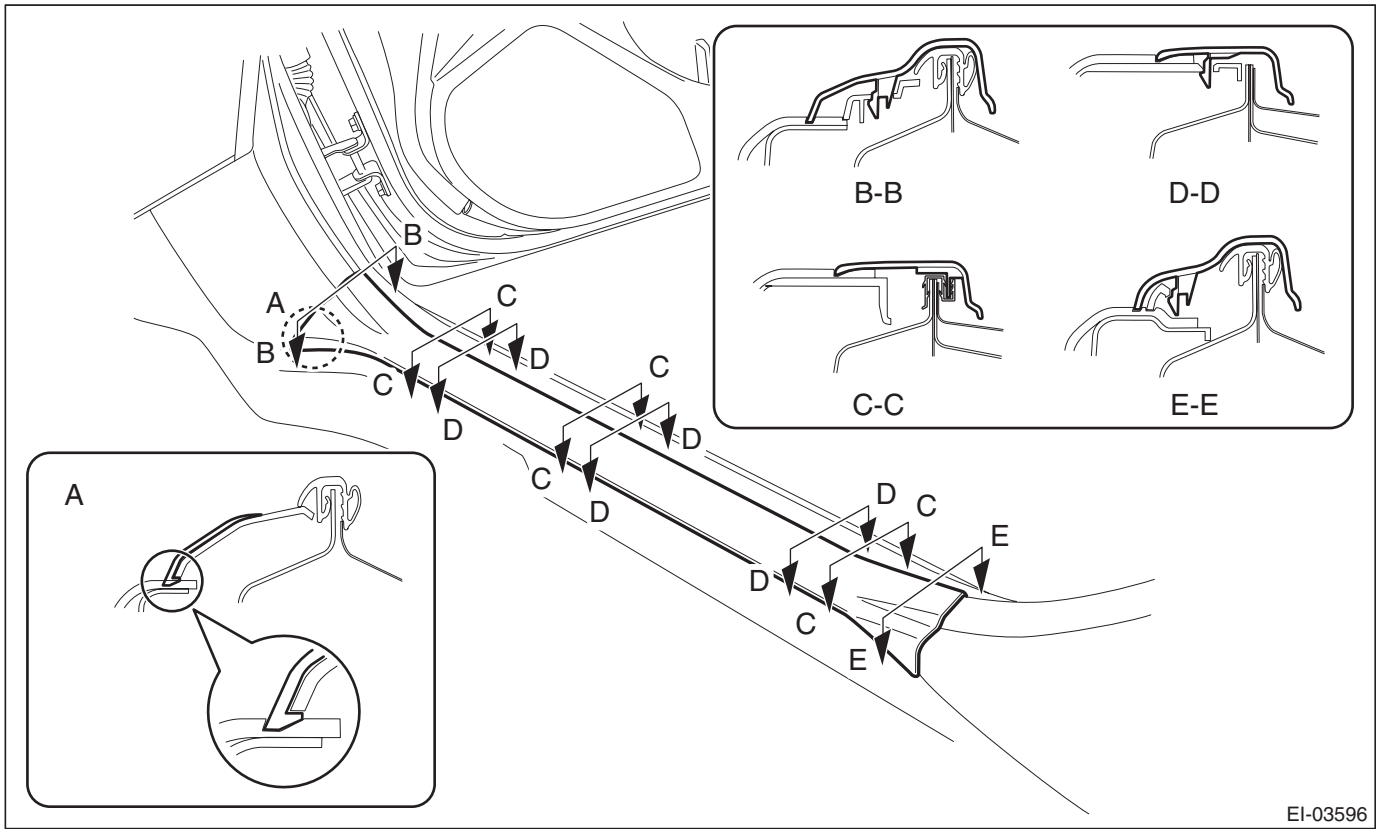
# 19.Lower Inner Trim

## A: REMOVAL

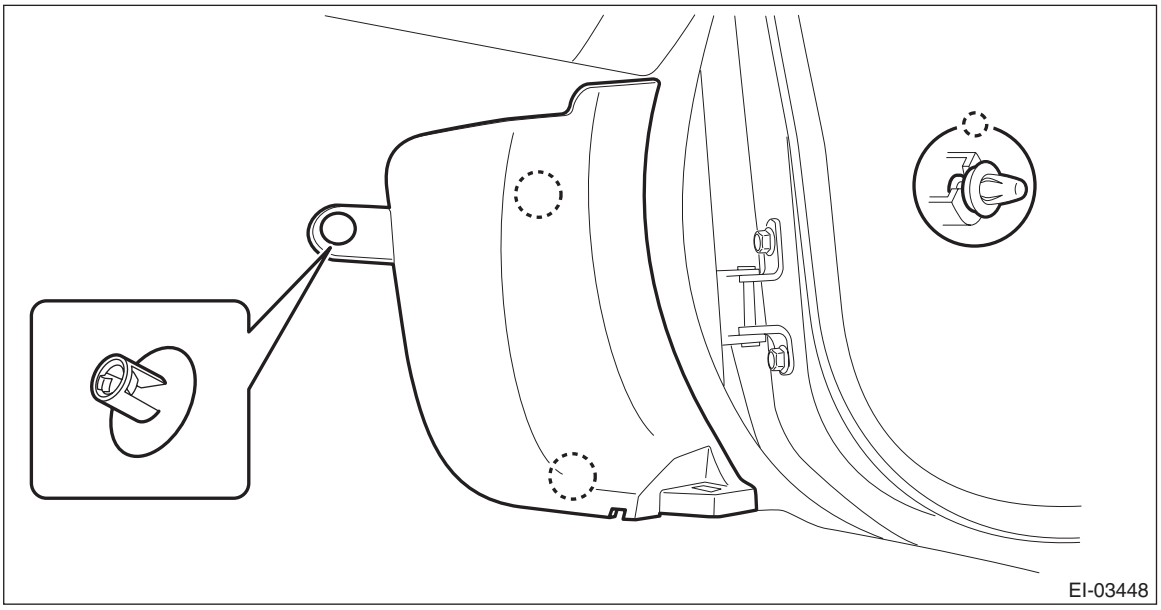
**CAUTION:**
**• Airbag system satellite safing sensor is located in the lower of the rear seat cushion center. Before removing the rear seat, refer to "CAUTION" of "General Description" in "AIRBAG SYSTEM" section. <Ref. to AB-11, CAUTION, General Description.>**
**• The airbag system is fitted with a backup power supply. After disconnecting the battery ground cable, the airbag may operate if you do not wait for 60 seconds before starting the service of airbag system.**

1) Release the claws, and then remove the cover side sill - front INN.

**CAUTION:**
**Do not pull with excessive force. Doing so may damage the claws of the cover side sill - front INN.**

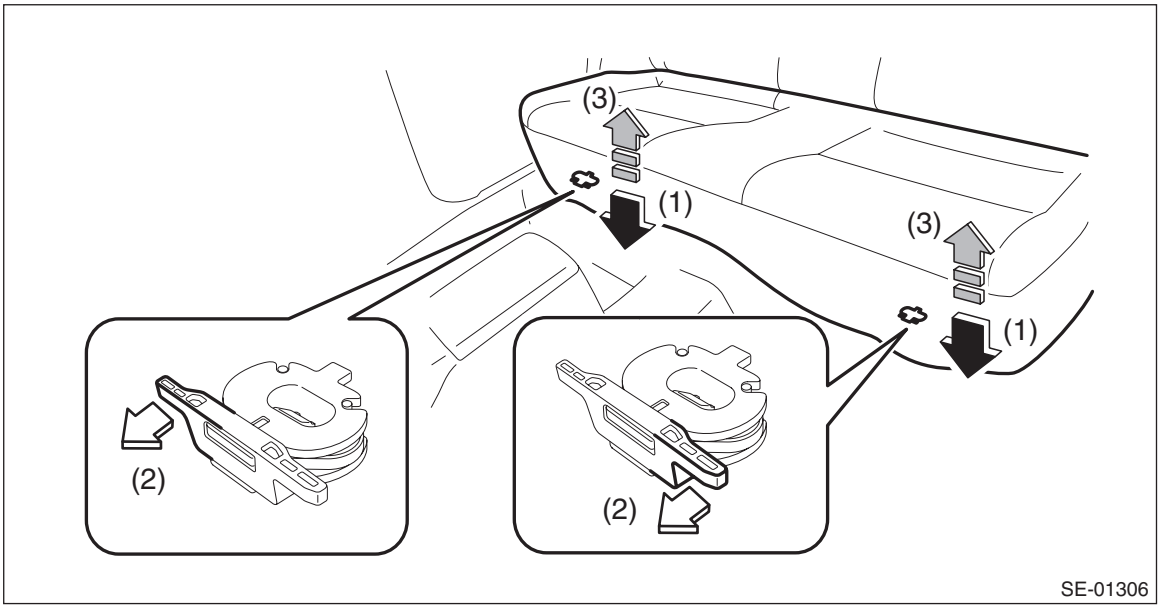


2) Remove the clips, and remove the cover side sill - front.

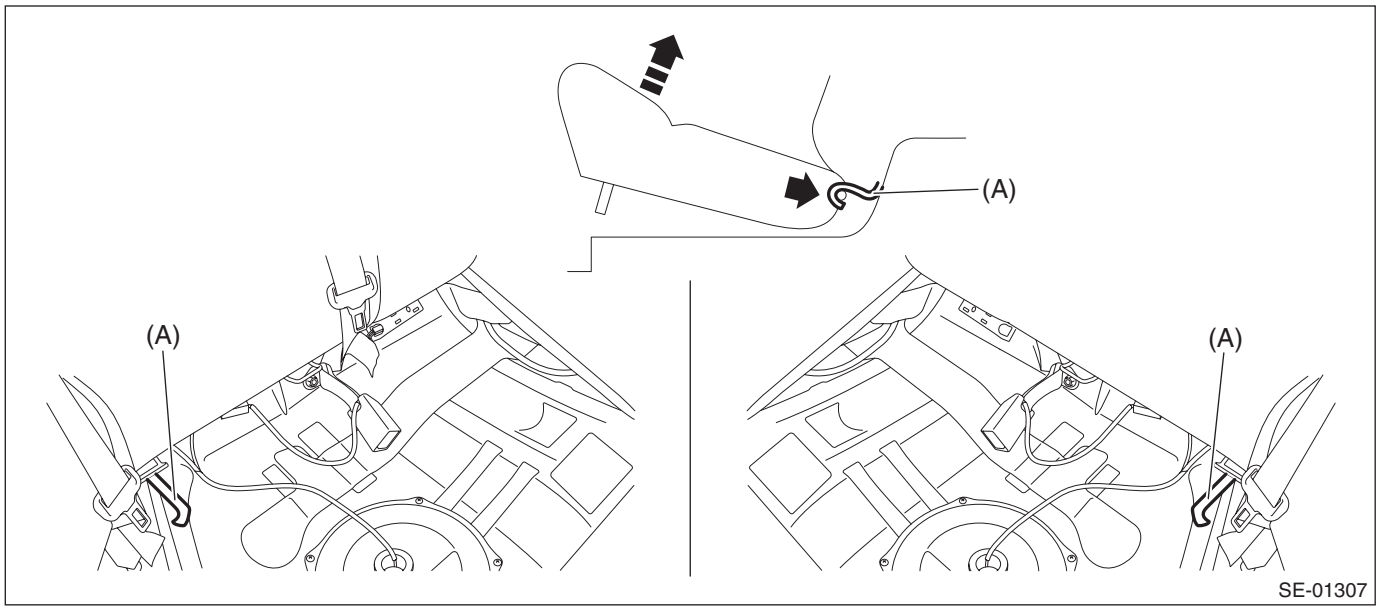


3) Remove the rear seat cushion assembly.
   (1) Push the corners of the rear seat cushion from above.
   (2) While pushing the corners of the rear seat cushion from above, pull the knob of the hook - seat cushion rear towards yourself.
   (3) While pulling the knob towards yourself, disconnect the hooks by lifting up the rear seat cushion.

NOTE:
Pull the left side of the knob to disconnect the LH side hook, and pull the right side of the knob to disconnect the RH side hook.

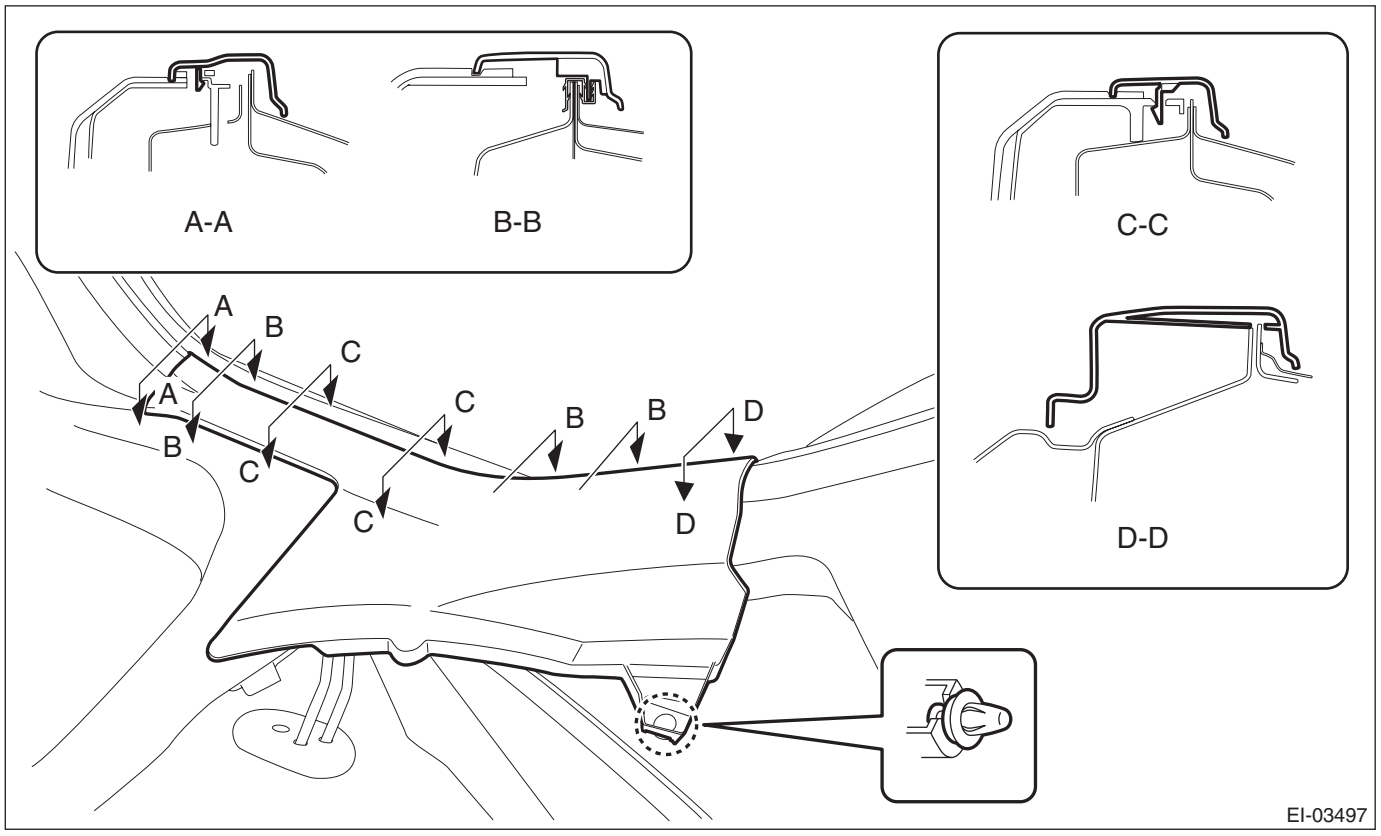


(4) Remove the hook (A) by pushing it back while lifting the front side of the rear seat cushion, and remove the rear seat cushion.



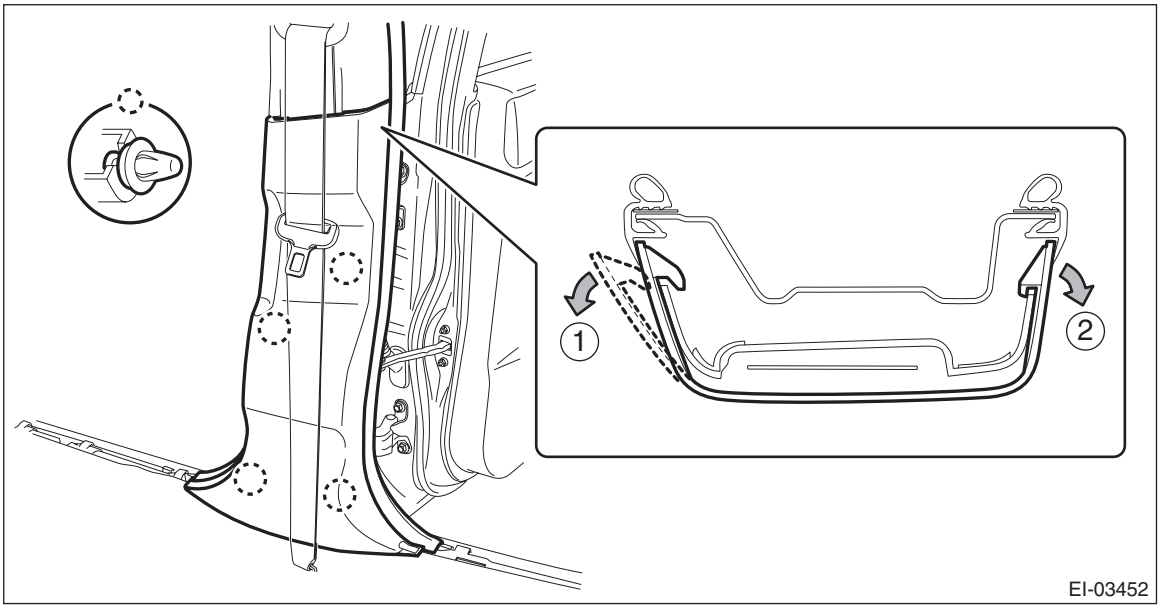
4) Release the clips and claws, and then remove the cover side sill - rear INN.

**CAUTION:**
**Do not pull with excessive force. Doing so may damage the claws of the cover side sill - rear INN.**

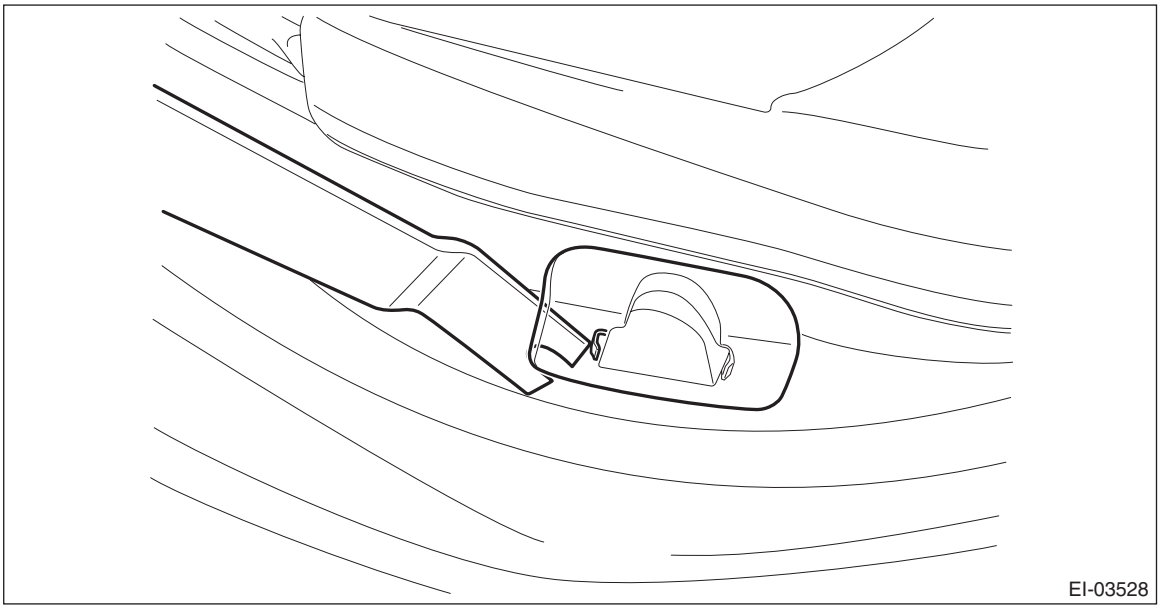


5) Remove the trim panel - center pillar LWR.
(1) Release the clip by pulling the trim panel - center pillar LWR toward you.
(2) Expand the claws of the trim panel - center pillar LWR outward, and remove it from the trim panel - center pillar UPR.

**CAUTION:**
**Do not expand the trim panel - center pillar LWR excessively. Doing so may damage the trim.**



NOTE:
First release the claw located to the front of the vehicle.
6) Disconnect the claws and remove the cover - catcher.

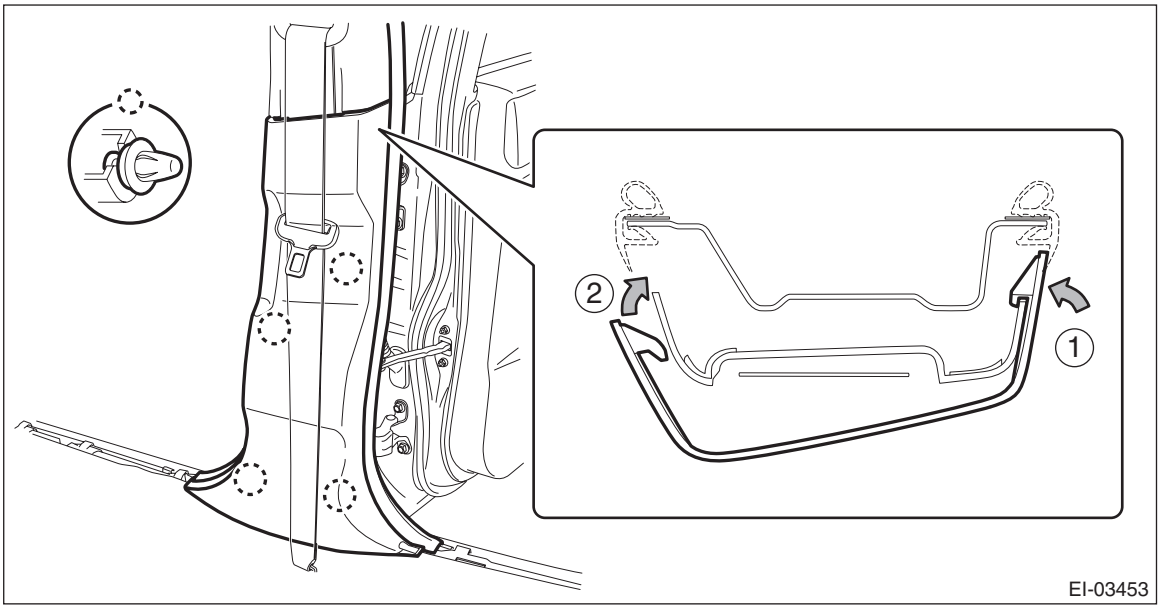


NOTE:
Remove the cover - catcher by using a plastic remover.

## B: INSTALLATION

Install each part in the reverse order of removal.

NOTE:
Assemble the trim panel - center pillar LWR to the trim panel - center pillar UPR securely.



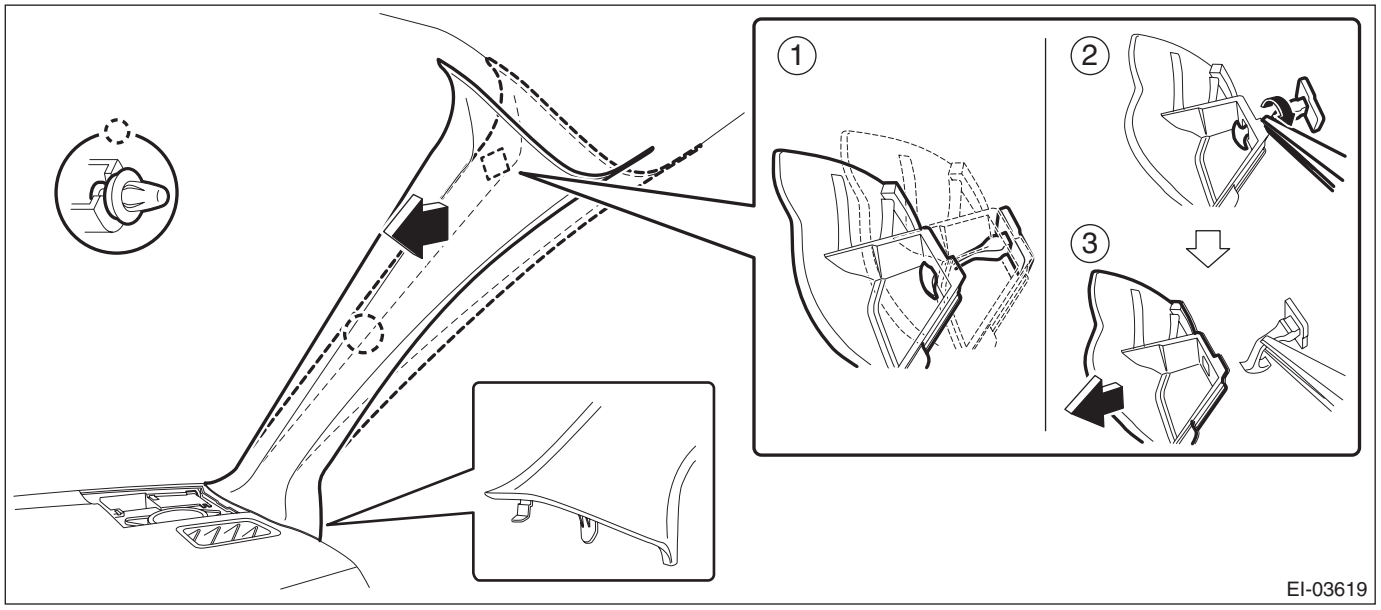
# 20.Upper Inner Trim

## A: REMOVAL

**CAUTION:**
**• Airbag system satellite safing sensor is located in the lower of the rear seat cushion center. Before removing the rear seat, refer to "CAUTION" of "General Description" in "AIRBAG SYSTEM" section. <Ref. to AB-11, CAUTION, General Description.>**
**• The airbag system is fitted with a backup power supply. After disconnecting the battery ground cable, the airbag may operate if you do not wait for 60 seconds before starting the service of airbag system.**

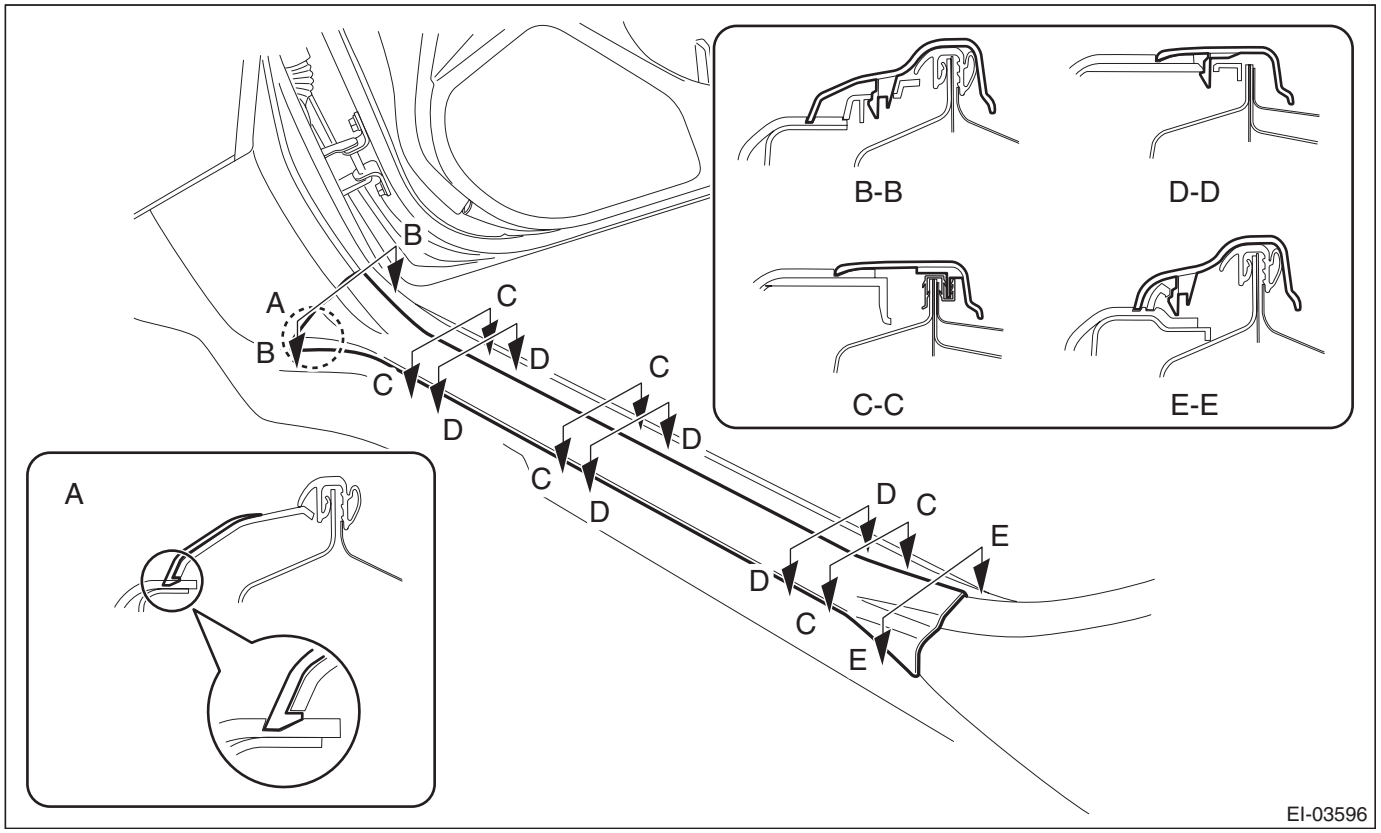
1) Remove the trim panel - front pillar UPR.
   (1) Pull the upper part of the trim panel - front pillar UPR towards the center of the vehicle.
   (2) Insert long-nose pliers into the top part of the trim, grip the tether clip with the pliers and twist 90° in that position.

**CAUTION:**
**Be careful not to damage the pillar trim surface and curtain airbag module when inserting the pliers.**
   (3) Holding the tether clip twisted as in the previous step, remove the trim panel - front pillar UPR from the tether clip.
   (4) Remove the clips, and remove the trim panel - front pillar UPR.



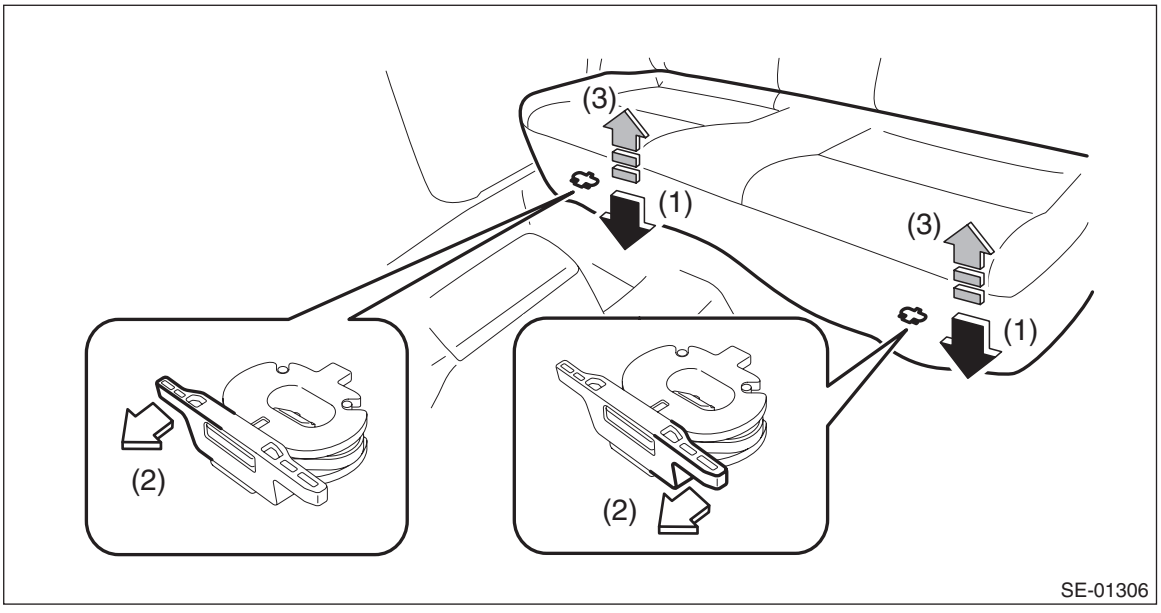
2) Release the claws, and then remove the cover side sill - front INN.

**CAUTION:**
**Do not pull with excessive force. Doing so may damage the claws of the cover side sill - front INN.**

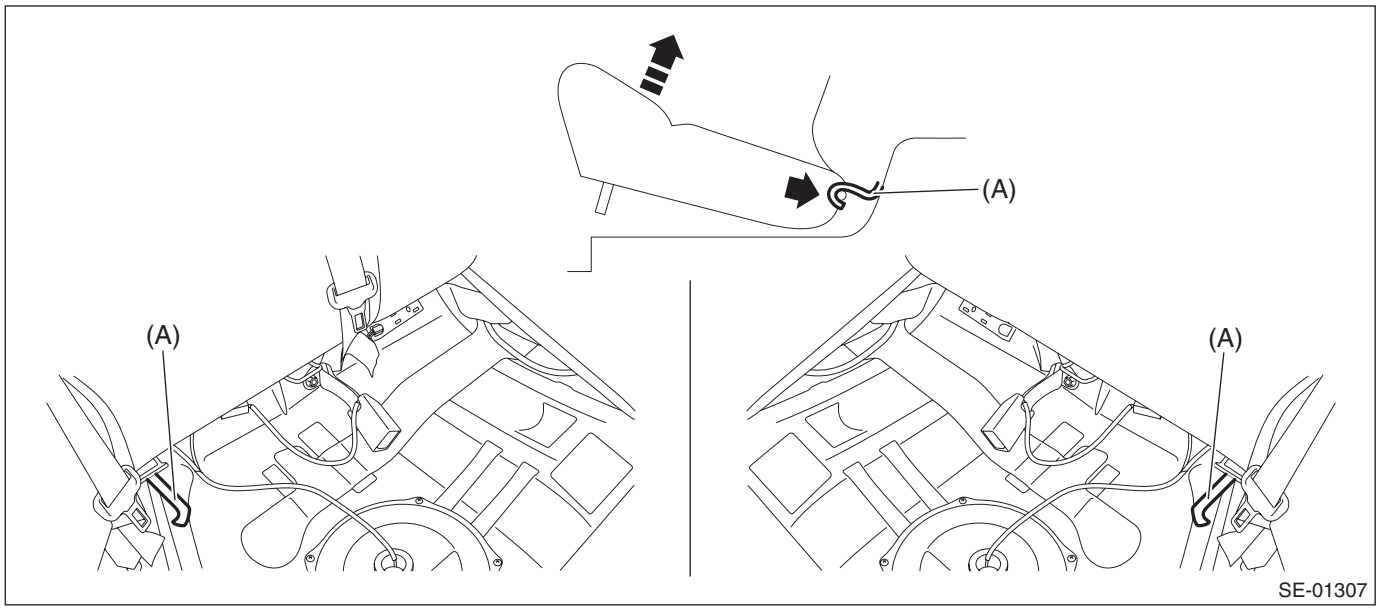


3) Remove the rear seat cushion assembly.
(1) Push the corners of the rear seat cushion from above.
(2) While pushing the corners of the rear seat cushion from above, pull the knob of the hook - seat cushion rear towards yourself.
(3) While pulling the knob towards yourself, disconnect the hooks by lifting up the rear seat cushion.

NOTE:
Pull the left side of the knob to disconnect the LH side hook, and pull the right side of the knob to disconnect the RH side hook.

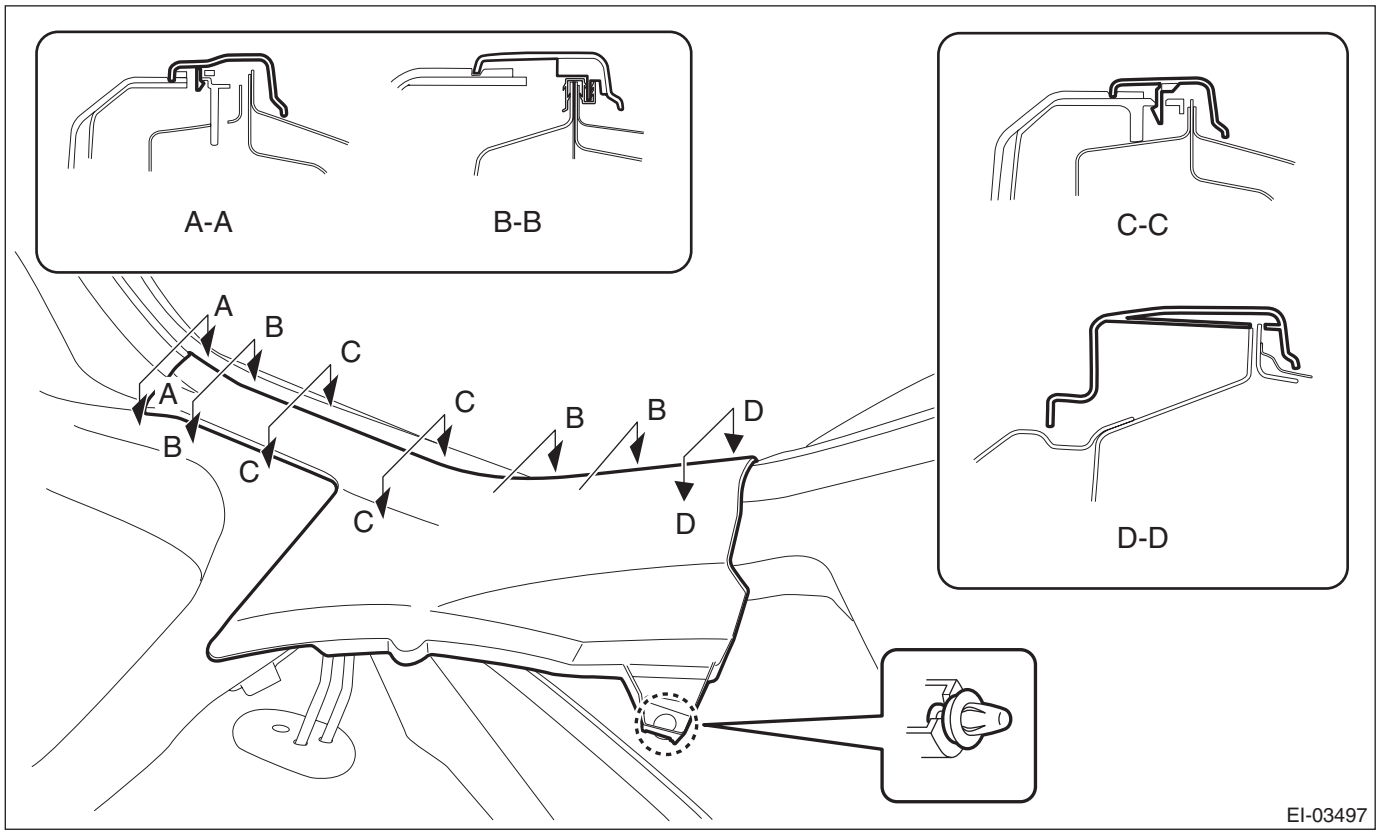


(4) Remove the hook (A) by pushing it back while lifting the front side of the rear seat cushion, and remove the rear seat cushion.



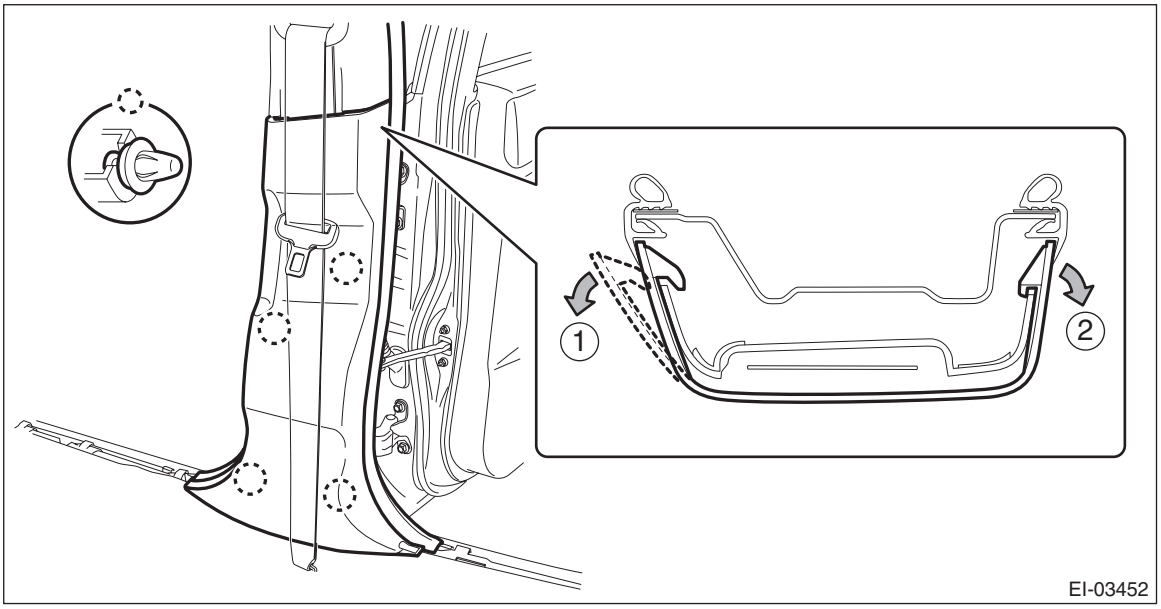
4) Release the clips and claws, and then remove the cover side sill - rear INN.

**CAUTION:**
**Do not pull with excessive force. Doing so may damage the claws of the cover side sill - rear INN.**



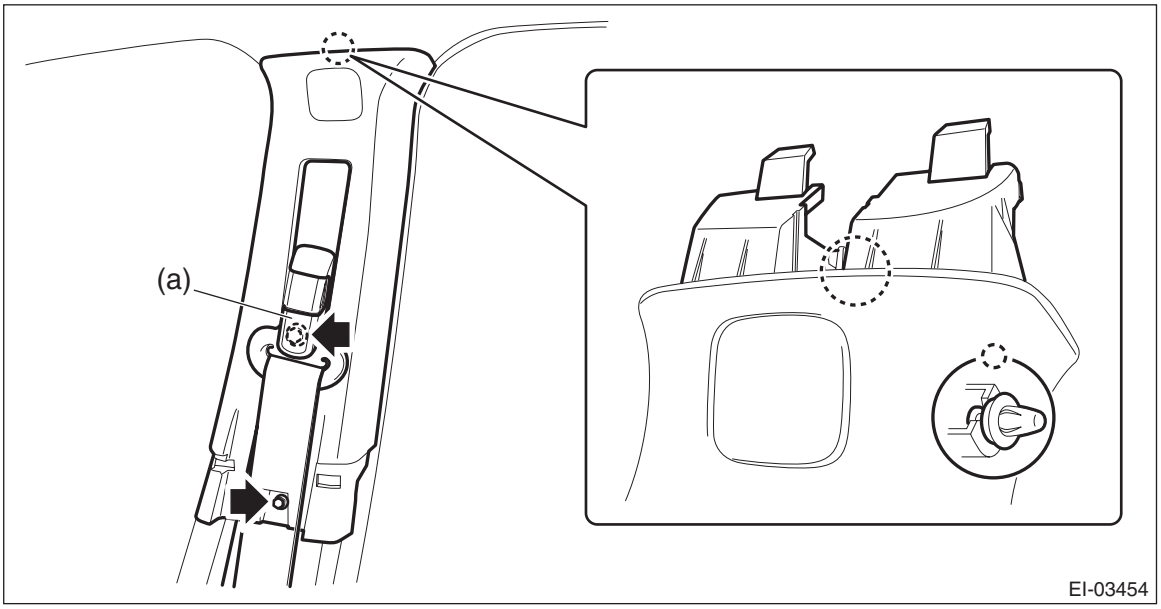
5) Remove the trim panel - center pillar LWR.
(1) Release the clip by pulling the trim panel - center pillar LWR toward you.
(2) Expand the claws of the trim panel - center pillar LWR outward, and remove it from the trim panel - center pillar UPR.

**CAUTION:**
**Do not expand the trim panel - center pillar LWR excessively. Doing so may damage the trim.**



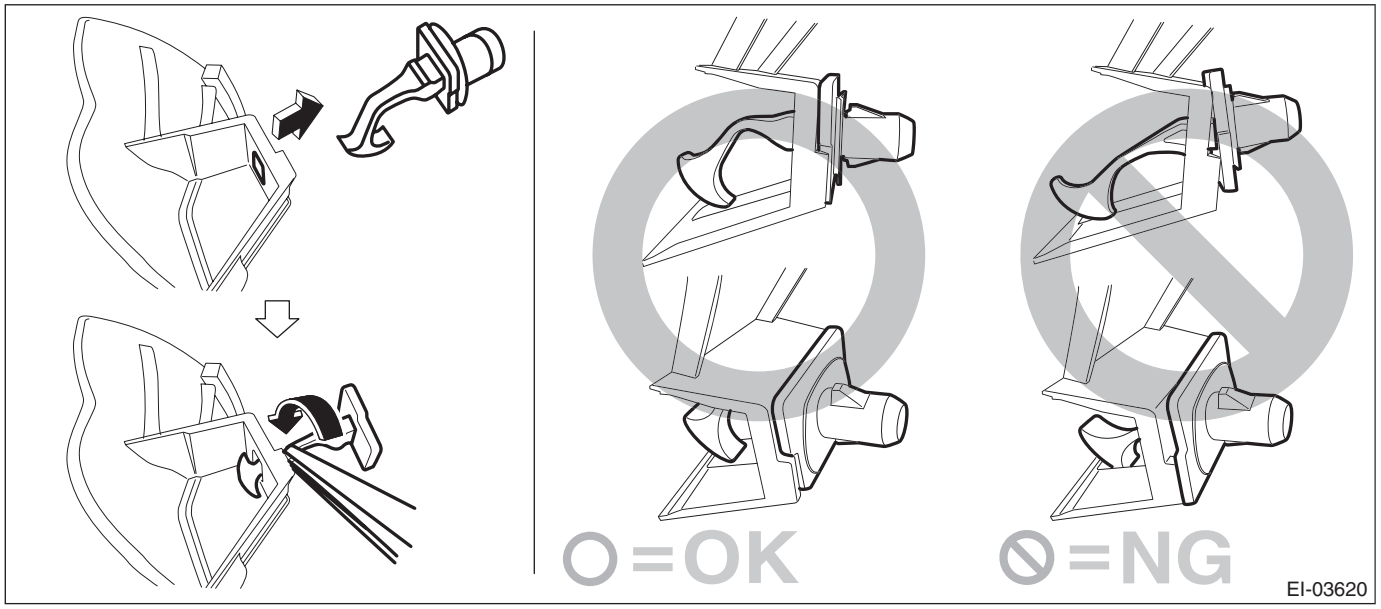
NOTE:
First release the claw located to the front of the vehicle.
6) Remove the trim panel - center pillar UPR.
(1) Remove the cover through (a), and remove the seat belt anchor bolt.
(2) Remove the bolt on the lower side of the trim panel - center pillar UPR.
(3) Remove the clip by pulling the upper part of the trim toward you, and while lowering the entire trim, remove the trim panel - center pillar UPR.

**CAUTION:**
**Do not reuse the upper clips of the trim panel - center pillar UPR. Once the clip is removed, its holding force is reduced. Be sure to replace it with a new clip.**



## B: INSTALLATION

**CAUTION:**
**• When reusing the tether clip on the upper part of the trim panel - front pillar UPR, check that there is no damage to the tether clip. If the clip is damaged, its holding force is reduced and the trim panel - front pillar UPR may come off. Be sure to replace it with a new clip.**
**• Do not reuse the tether clip removed from the upper part of the trim panel - front pillar UPR. Always replace with a new part.**
**• Do not reuse the upper clips of the trim panel - center pillar UPR. Once the clip is removed, its holding force is reduced. Be sure to replace it with a new clip.**
**• Before installing the trim panel - front pillar UPR, check the condition of protective non-woven fabric (white) of the curtain airbag. If it is damaged (airbag module cloth is exposed), replace the curtain airbag module assembly with a new part.**
1) Remove the remaining tether clips from the vehicle body.
2) Install the trim panel - front pillar UPR.
(1) Check the installation status of the tether clips and install the trim panel - front pillar UPR.



3) Install each part in the reverse order of removal.

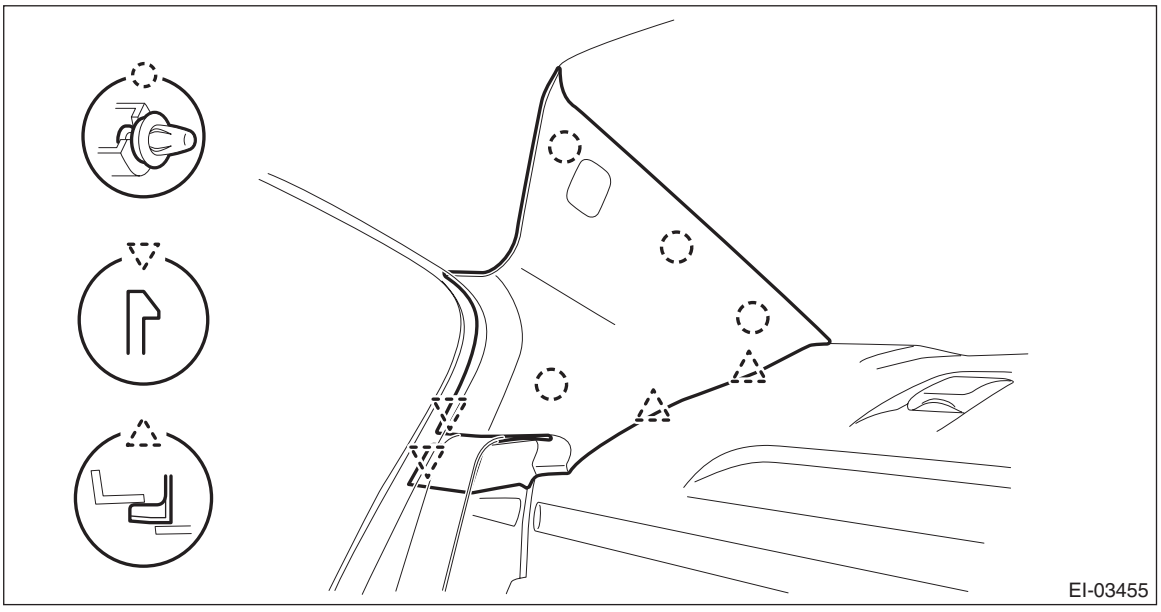
***Tightening torque***
***Front seat belt: <Ref. to SB-2, FRONT SEAT BELT, COMPONENT, General Description.>***

# 21.Rear Quarter Trim

## A: REMOVAL

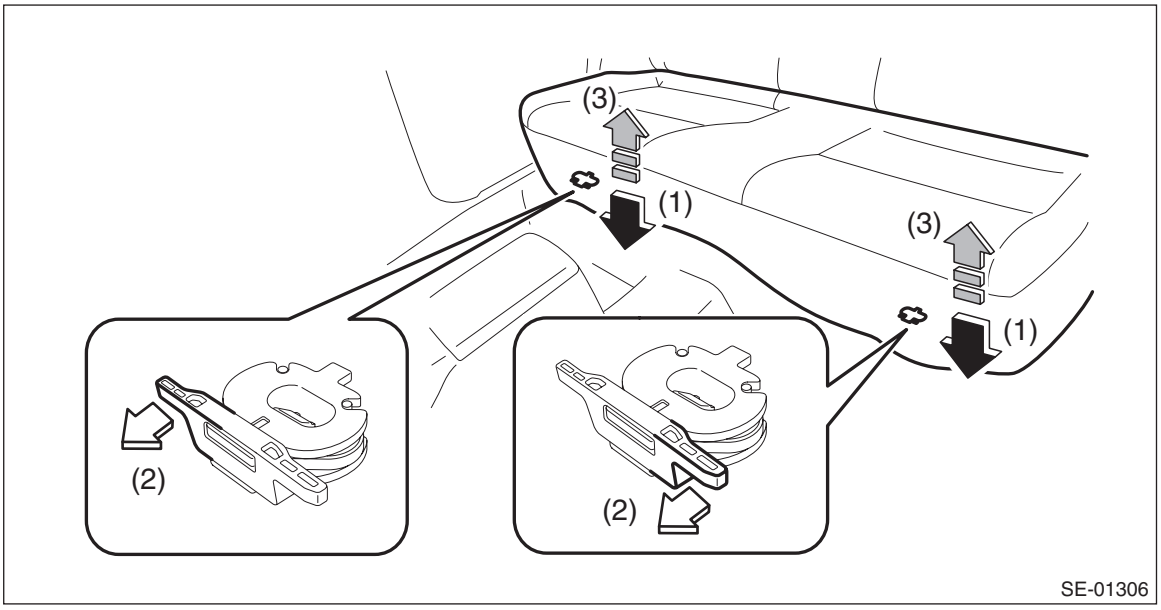
### 1. 4 DOOR MODEL

**CAUTION:**
**• Airbag system satellite safing sensor is located in the lower of the rear seat cushion center. Before removing the rear seat, refer to "CAUTION" of "General Description" in "AIRBAG SYSTEM" section. <Ref. to AB-11, CAUTION, General Description.>**
**• The airbag system is fitted with a backup power supply. After disconnecting the battery ground cable, the airbag may operate if you do not wait for 60 seconds before starting the service of airbag system.**
1) Disconnect the ground cable from battery and wait for at least 60 seconds before starting work.
2) Remove the clips, and remove the trim panel - rear pillar UPR.

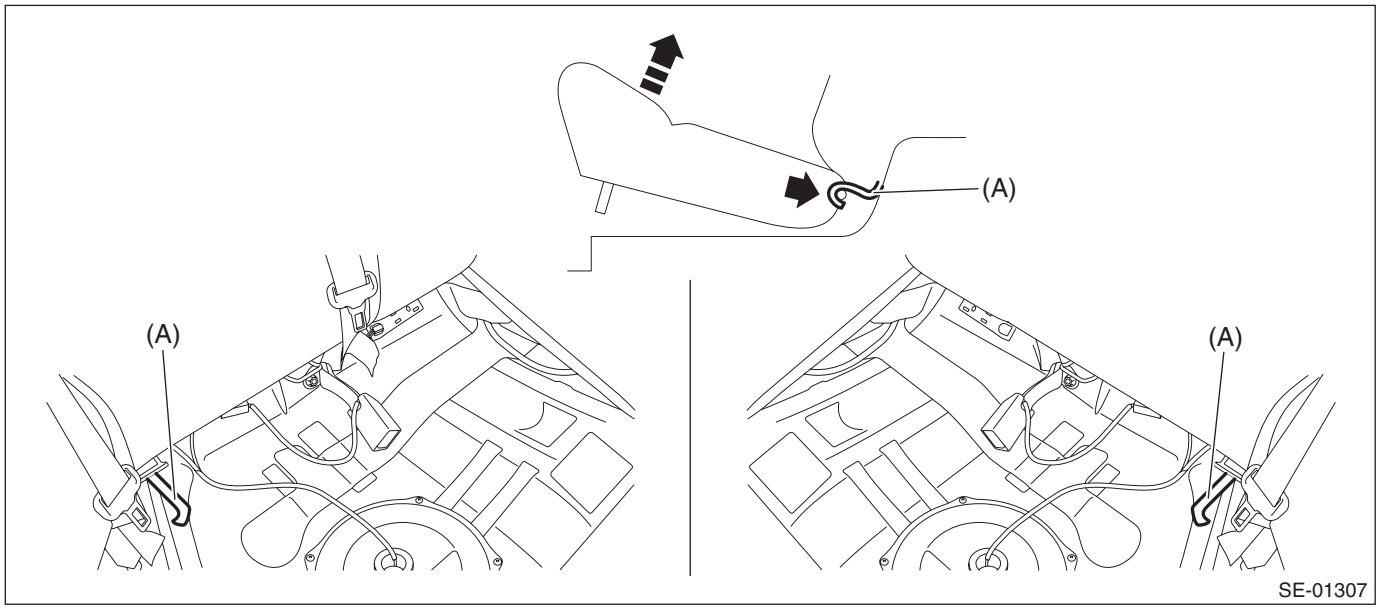


3) Remove the rear seat cushion assembly.
(1) Push the corners of the rear seat cushion from above.
(2) While pushing the corners of the rear seat cushion from above, pull the knob of the hook - seat cushion rear towards yourself.
(3) While pulling the knob towards yourself, disconnect the hooks by lifting up the rear seat cushion.

NOTE:
Pull the left side of the knob to disconnect the LH side hook, and pull the right side of the knob to disconnect the RH side hook.

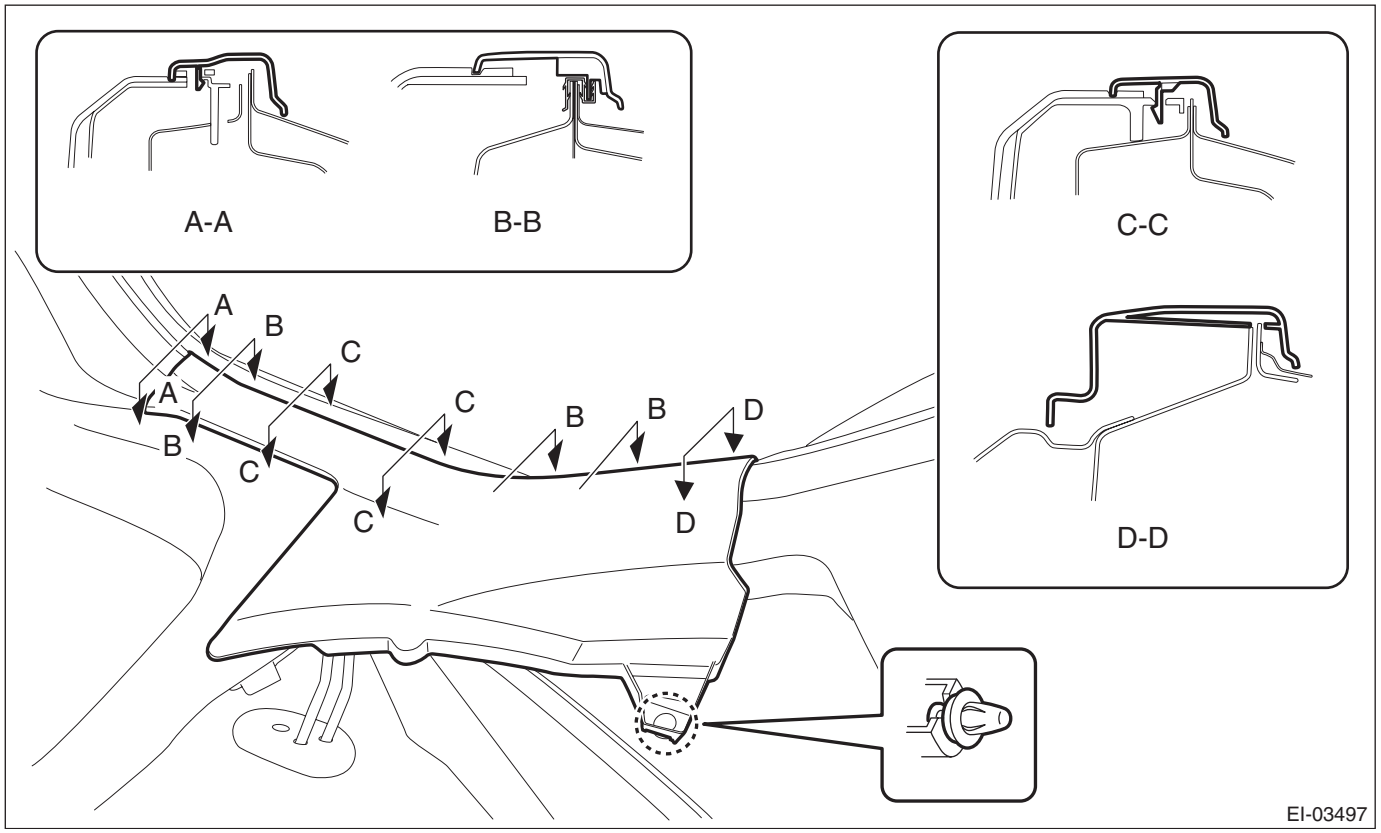


(4) Remove the hook (A) by pushing it back while lifting the front side of the rear seat cushion, and remove the rear seat cushion.

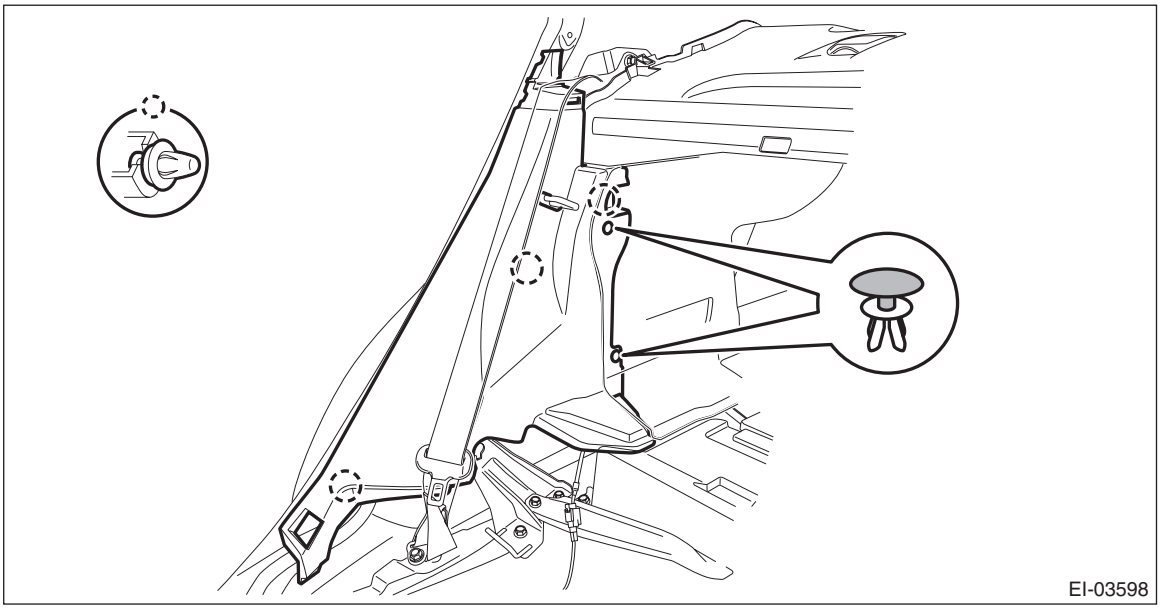


4) Release the clips and claws, and then remove the cover side sill - rear INN.

**CAUTION:**
**Do not pull with excessive force. Doing so may damage the claws of the cover side sill - rear INN.**



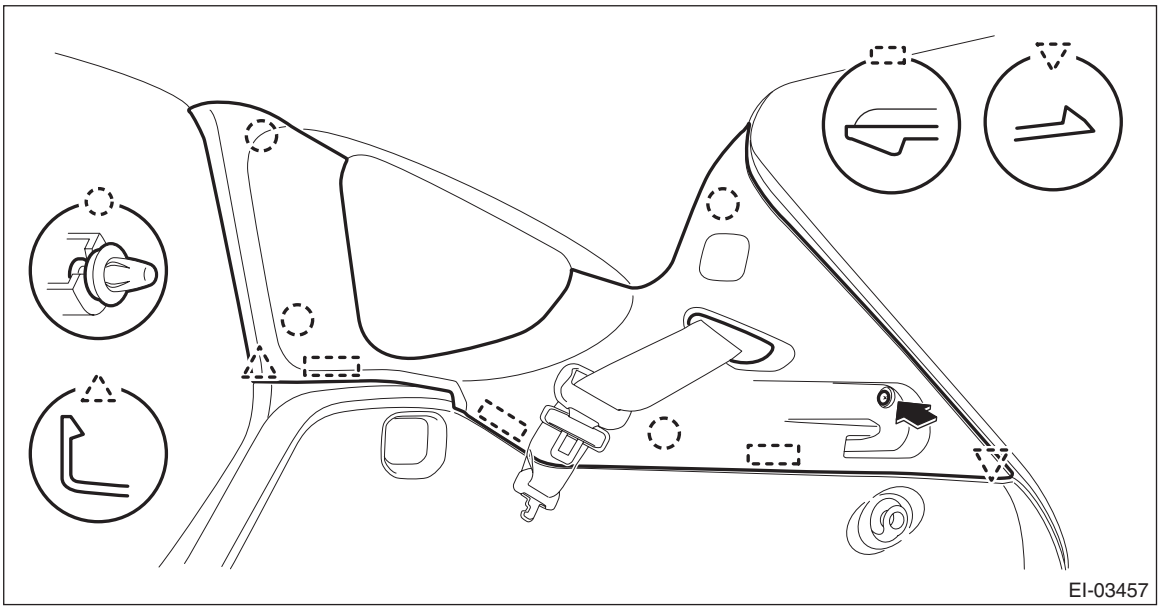
5) Remove the trim panel - rear pillar LWR.
(1) Remove the clips, and turn over the trim panel - trunk side.
(2) Remove the clips, and remove the trim panel - rear pillar LWR.



## 2. 5 DOOR MODEL/XV MODEL

**CAUTION:**
**• Airbag system satellite safing sensor is located in the lower of the rear seat cushion center. Before removing the rear seat, refer to "CAUTION" of "General Description" in "AIRBAG SYSTEM" section. <Ref. to AB-11, CAUTION, General Description.>**
**• The airbag system is fitted with a backup power supply. After disconnecting the battery ground cable, the airbag may operate if you do not wait for 60 seconds before starting the service of airbag system.**

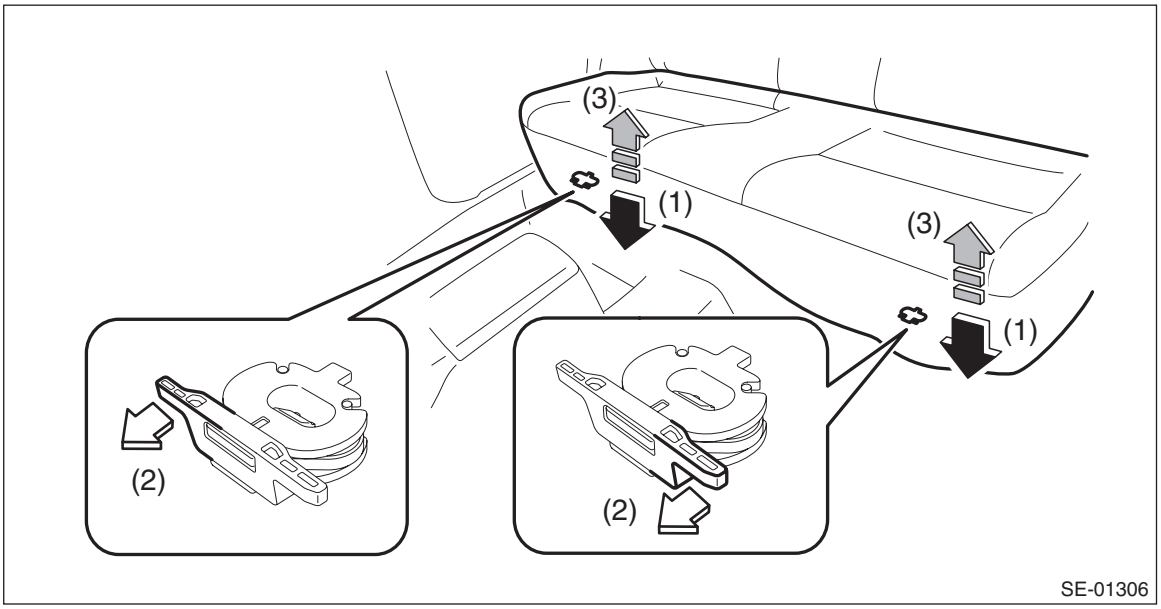
1) Disconnect the ground cable from battery and wait for at least 60 seconds before starting work.
2) Remove the screws and clips, and remove the trim panel - rear quarter pillar UPR.



EI-03457

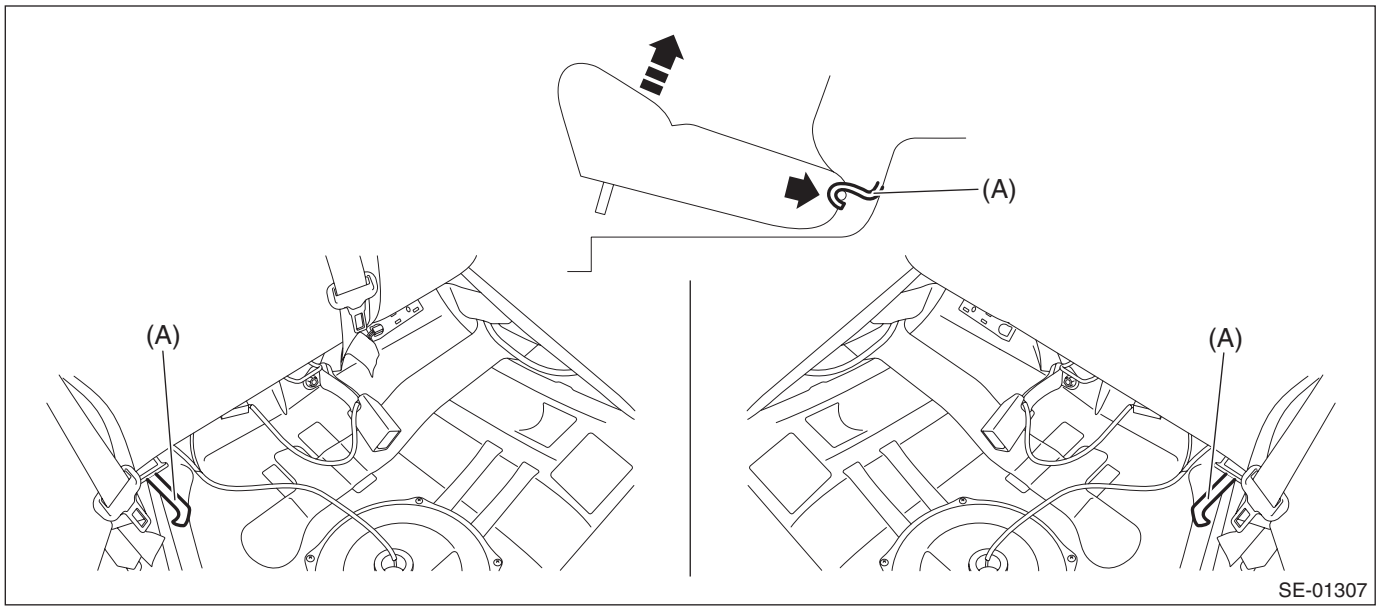
3) Remove the rear seat cushion assembly.
   (1) Push the corners of the rear seat cushion from above.
   (2) While pushing the corners of the rear seat cushion from above, pull the knob of the hook - seat cushion rear towards yourself.
   (3) While pulling the knob towards yourself, disconnect the hooks by lifting up the rear seat cushion.

NOTE:
Pull the left side of the knob to disconnect the LH side hook, and pull the right side of the knob to disconnect the RH side hook.



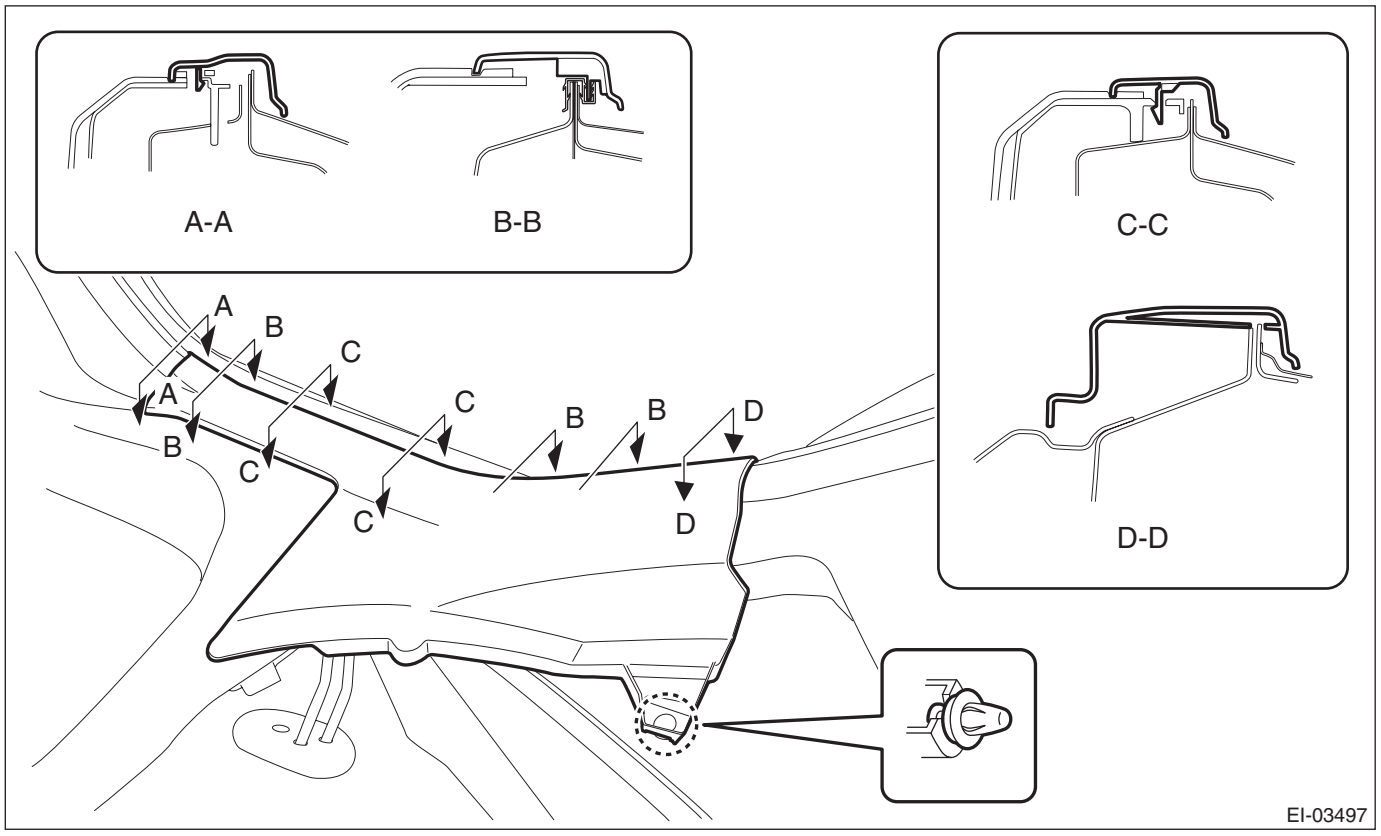
SE-01306

(4) Remove the hook (A) by pushing it back while lifting the front side of the rear seat cushion, and remove the rear seat cushion.

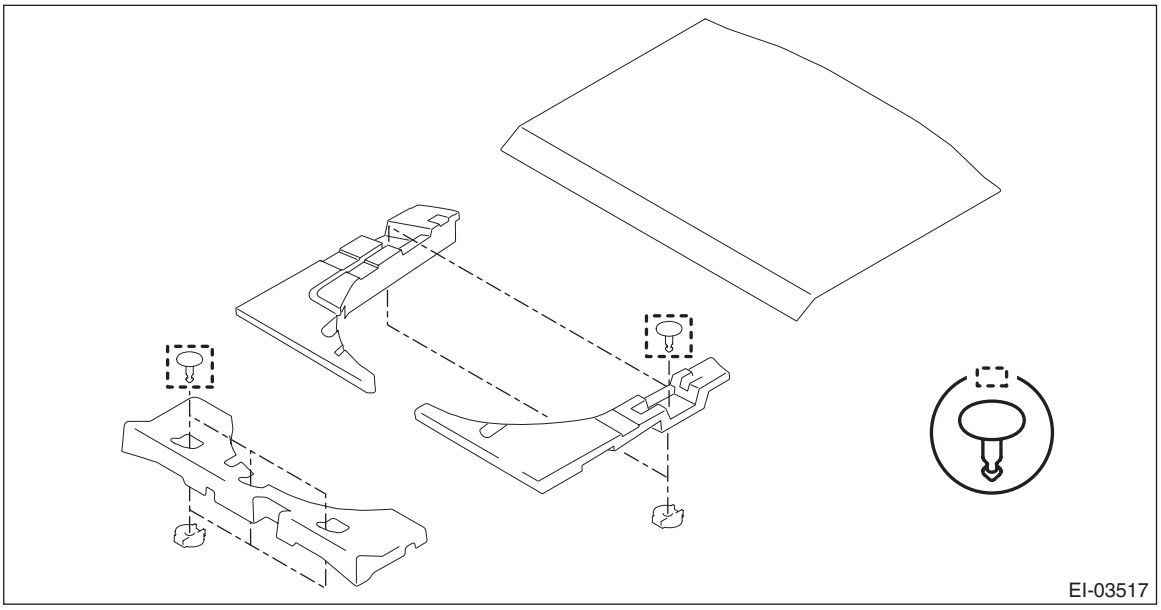


4) Release the clips and claws, and then remove the cover side sill - rear INN.

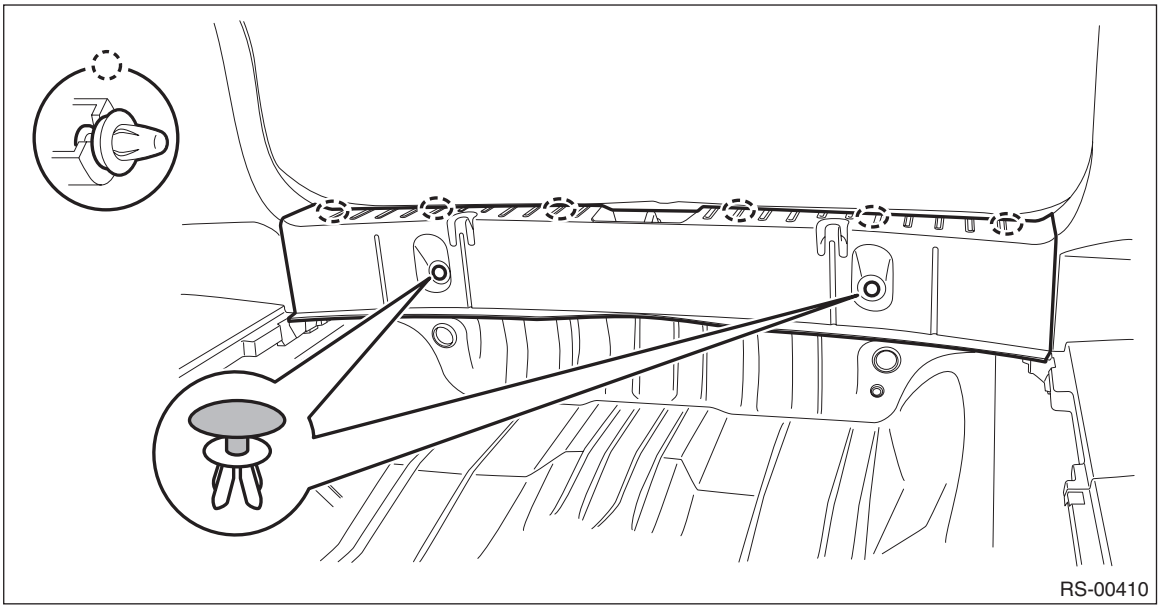
**CAUTION:**
**Do not pull with excessive force. Doing so may damage the claws of the cover side sill - rear INN.**



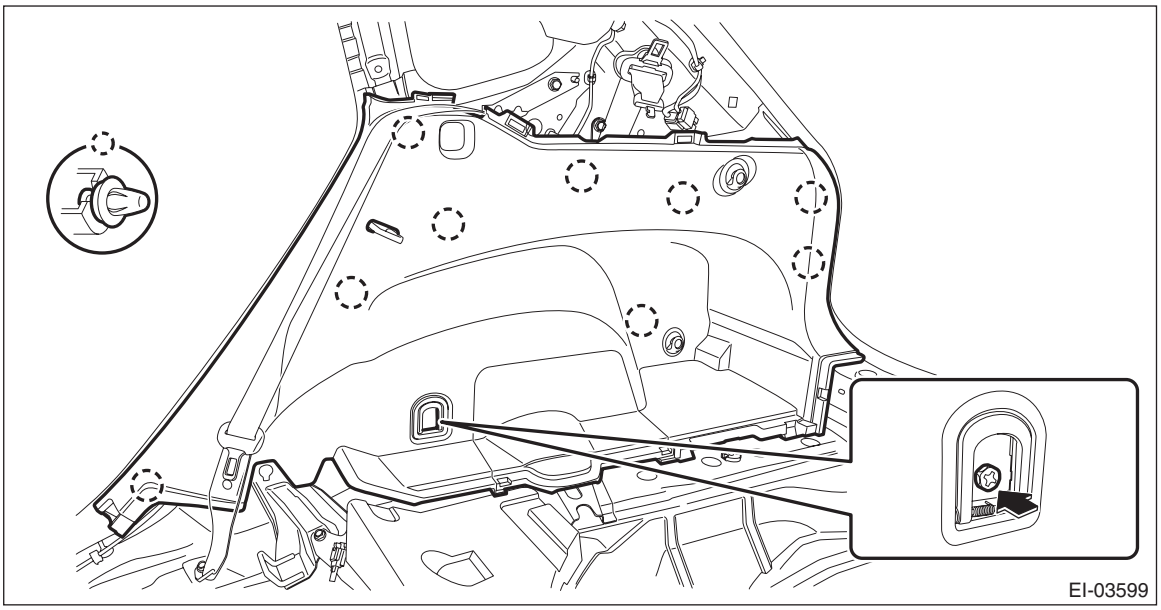
5) Remove the mat - rear floor CTR and the spacer - rear floor side.



6) Remove the clips, and remove the trim panel - rear skirt.



7) Remove the trim panel - rear apron.
   (1) Remove the caps, and then remove the screws.
   (2) Remove the clips, and remove the trim panel - rear apron.



## B: INSTALLATION

Install each part in the reverse order of removal.

***Tightening torque:***
***Rear seat backrest assembly: <Ref. to SE-5, REAR SEAT, COMPONENT, General Description.>***

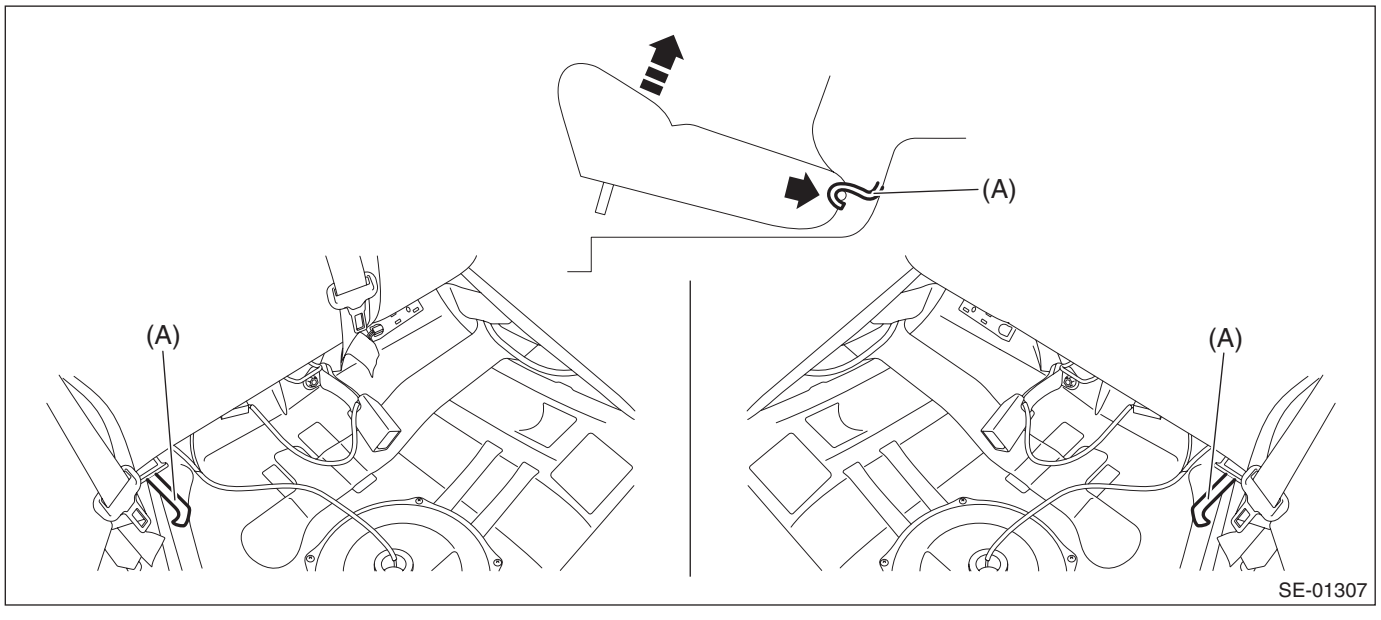
# 22.Rear Shelf Trim

## A: REMOVAL

**CAUTION:**
**• Airbag system satellite safing sensor is located in the lower of the rear seat cushion center. Before removing the rear seat, refer to "CAUTION" of "General Description" in "AIRBAG SYSTEM" section. <Ref. to AB-11, CAUTION, General Description.>**
**• The airbag system is fitted with a backup power supply. After disconnecting the battery ground cable, the airbag may operate if you do not wait for 60 seconds before starting the service of airbag system.**

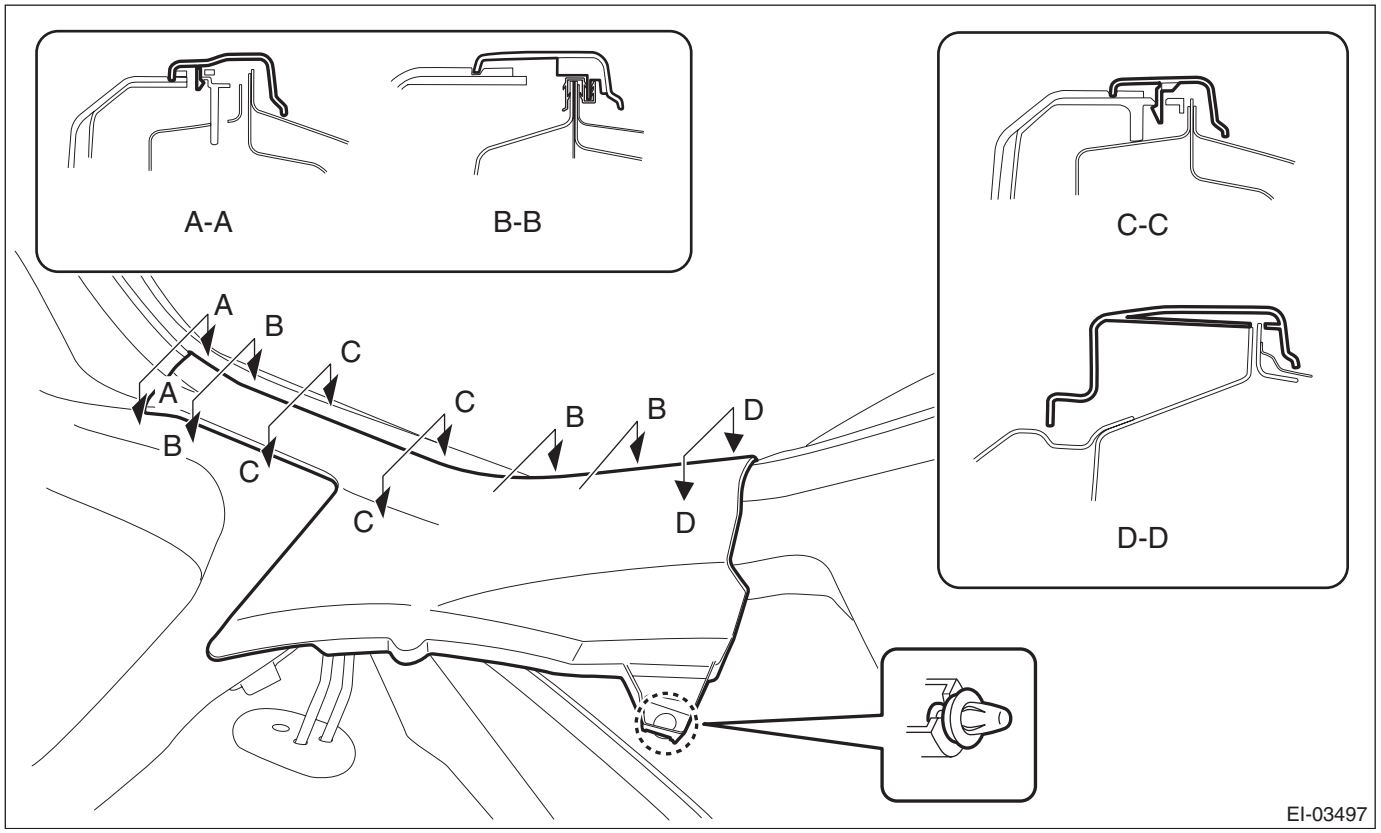
1) Disconnect the ground cable from battery and wait for at least 60 seconds before starting work.
2) Remove the rear seat cushion assembly.
   (1) Push the corners of the rear seat cushion from above.
   (2) While pushing the corners of the rear seat cushion from above, pull the knob of the hook - seat cushion rear towards yourself.
   (3) While pulling the knob towards yourself, disconnect the hooks by lifting up the rear seat cushion.

   (4) Remove the hook (A) by pushing it back while lifting the front side of the rear seat cushion, and remove the rear seat cushion.

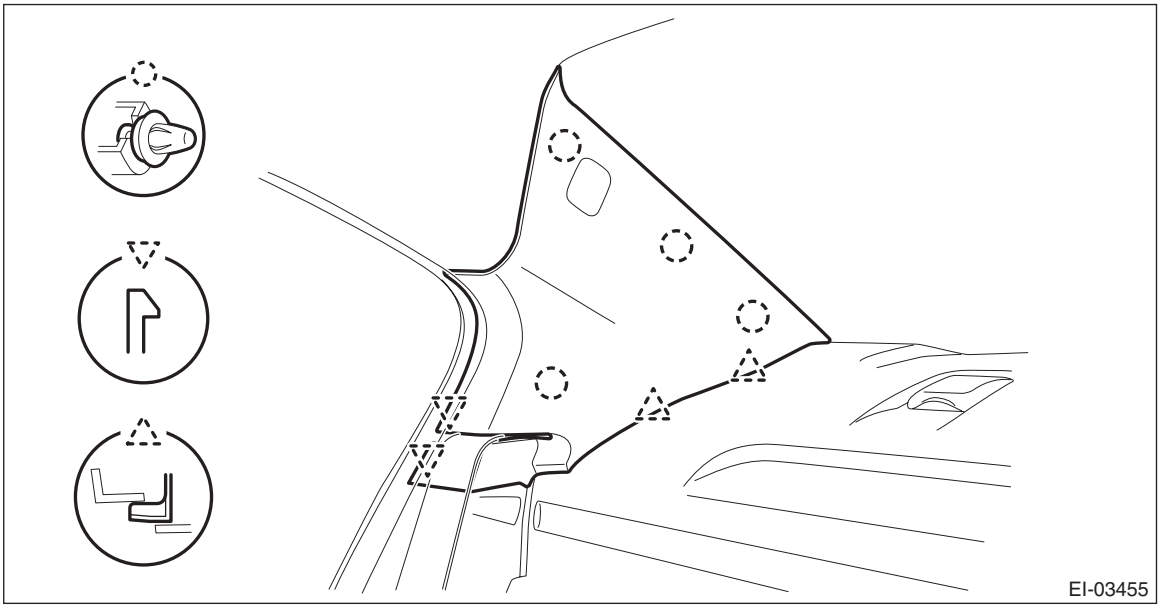


3) Release the clips and claws, and remove the side sill covers - rear INN on the left and right sides.

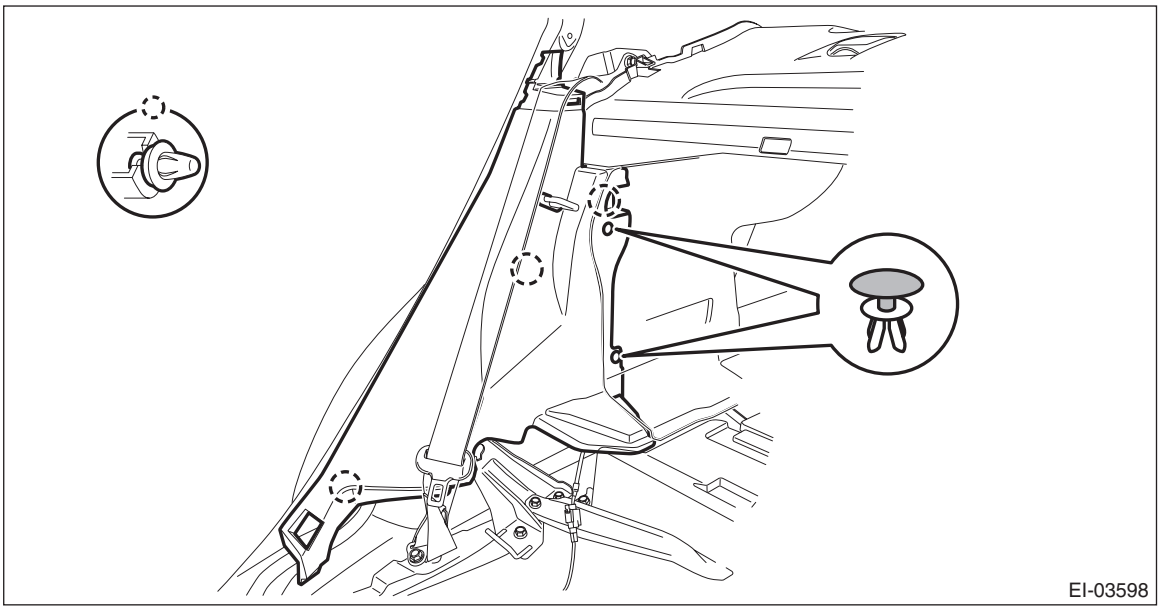
**CAUTION:**
**Do not pull with excessive force. Doing so may damage the claws of the side sill cover - rear INN.**



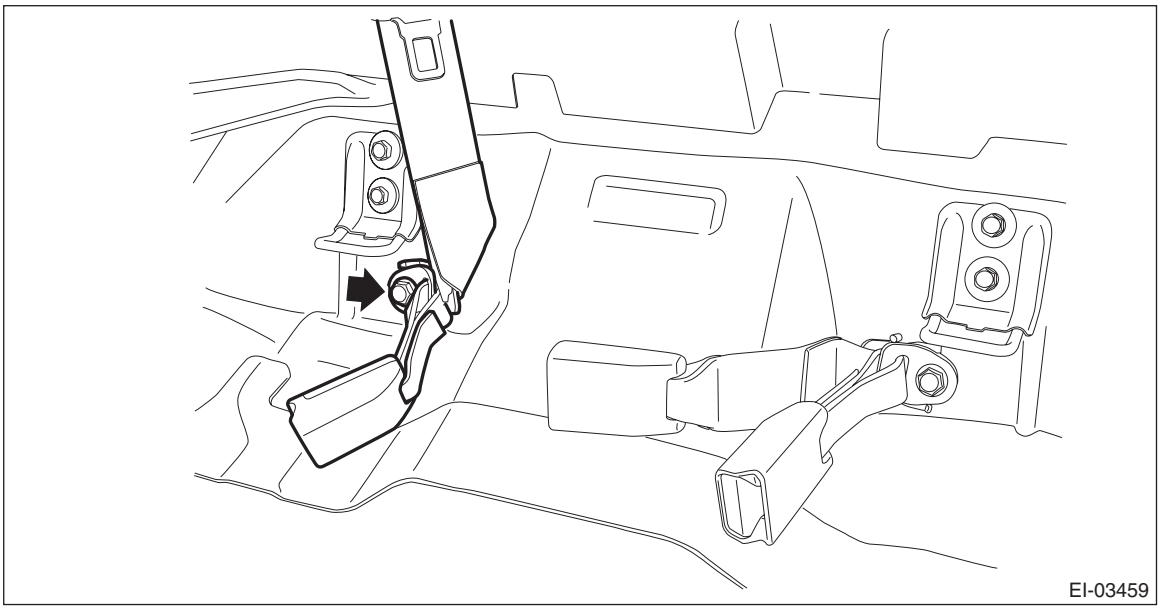
4) Remove the clips, and remove the trim panel - rear pillar UPR on the left and right sides.



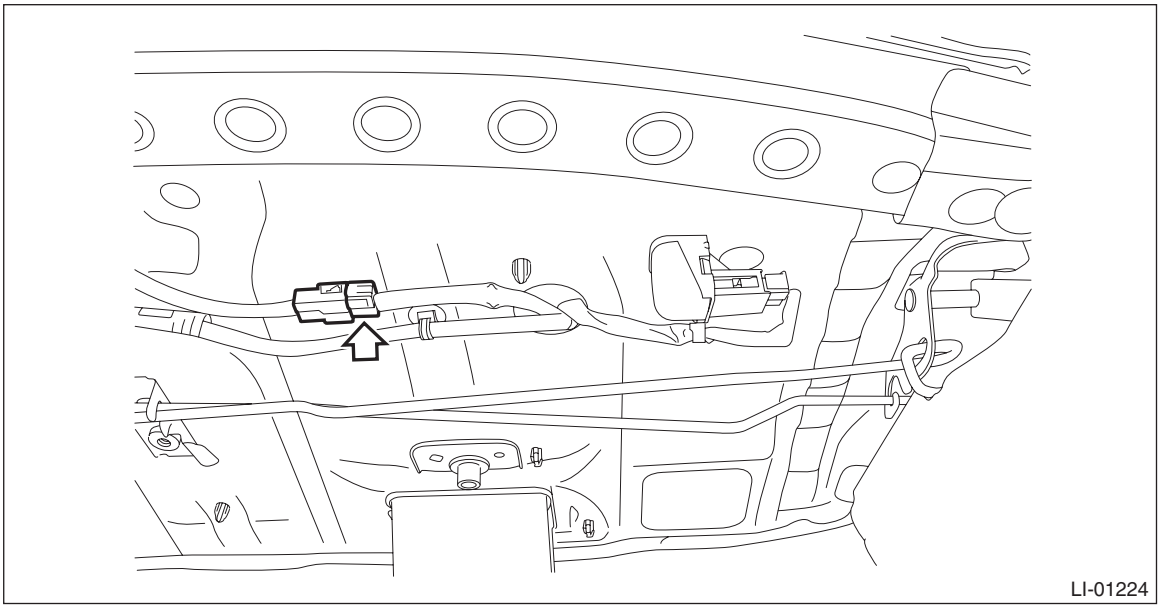
5) Remove the trim panel - rear pillar LWR on the left and right sides.
   (1) Remove the clips, and turn over the trim panel - trunk side.
   (2) Remove the clips, and remove the trim panel - rear pillar LWR.



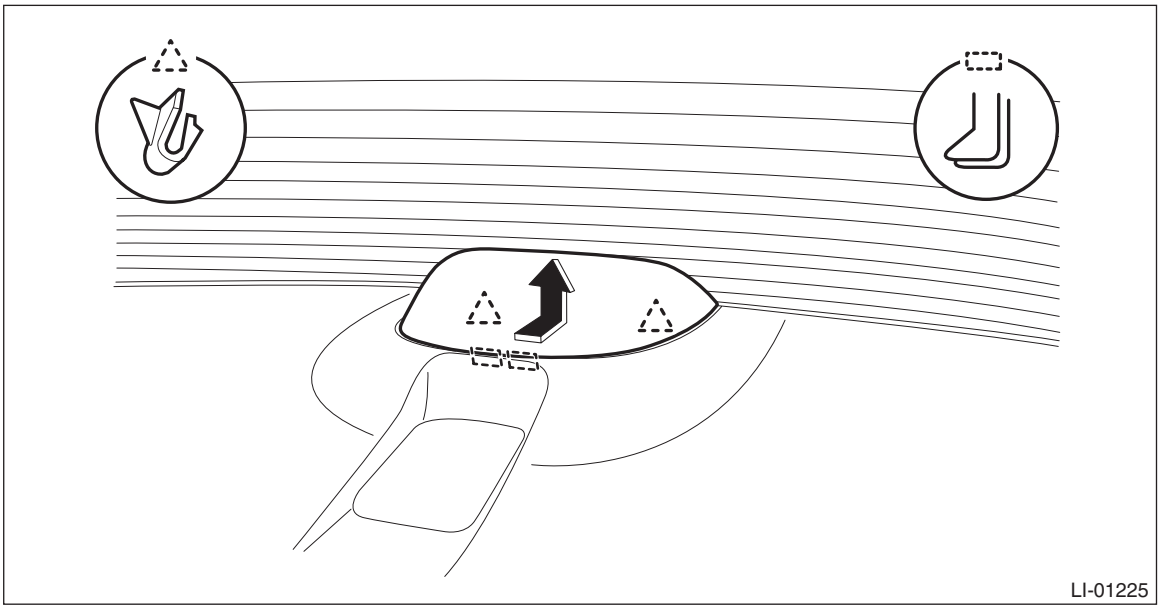
6) Remove the bolts, and remove the lower anchor of the seat belt - rear shoulder CTR.



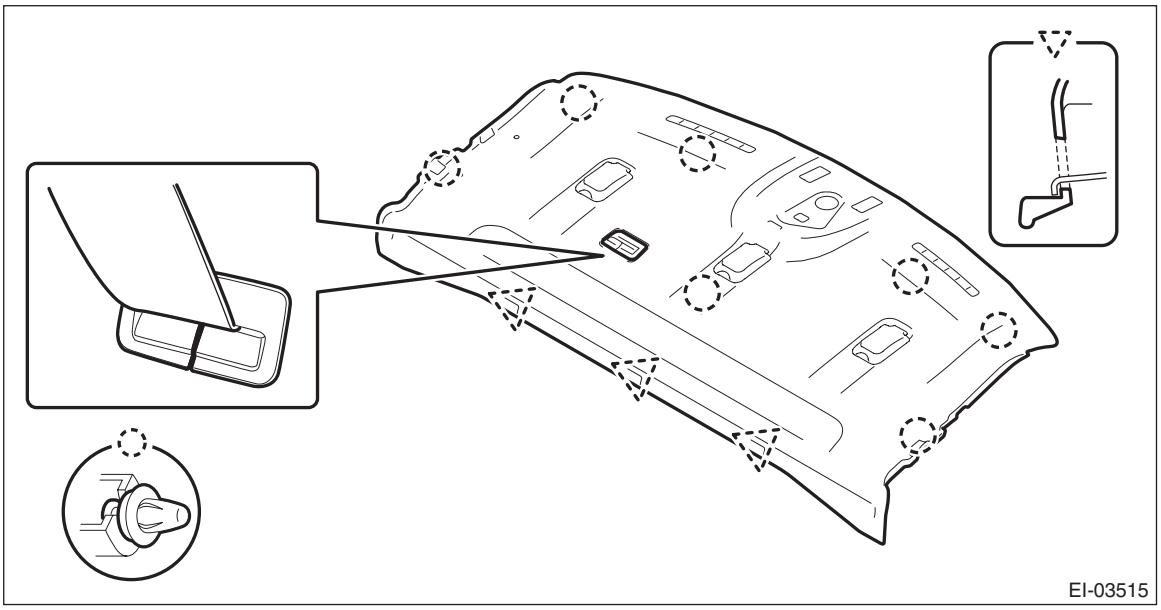
7) Remove the high-mounted stop light.
(1) Disconnect the connector.



(2) Release the claws, and remove the light assembly - high-mounted.



8) Remove the trim panel assembly - rear shelf.
(1) Release the clips to float the trim panel assembly - rear shelf.
(2) Release the belt guide, and guide the anchor of the seat belt - rear shoulder CTR to behind the trim panel - rear shelf assembly.
(3) Disconnect the connector of high-mounted stop light.
(4) Remove the trim panel assembly - rear shelf.



## B: INSTALLATION

**CAUTION:**
**Make sure that the claw behind the light assembly - high-mounted is securely attached to the trim panel assembly - rear shelf.**
Install each part in the reverse order of removal.

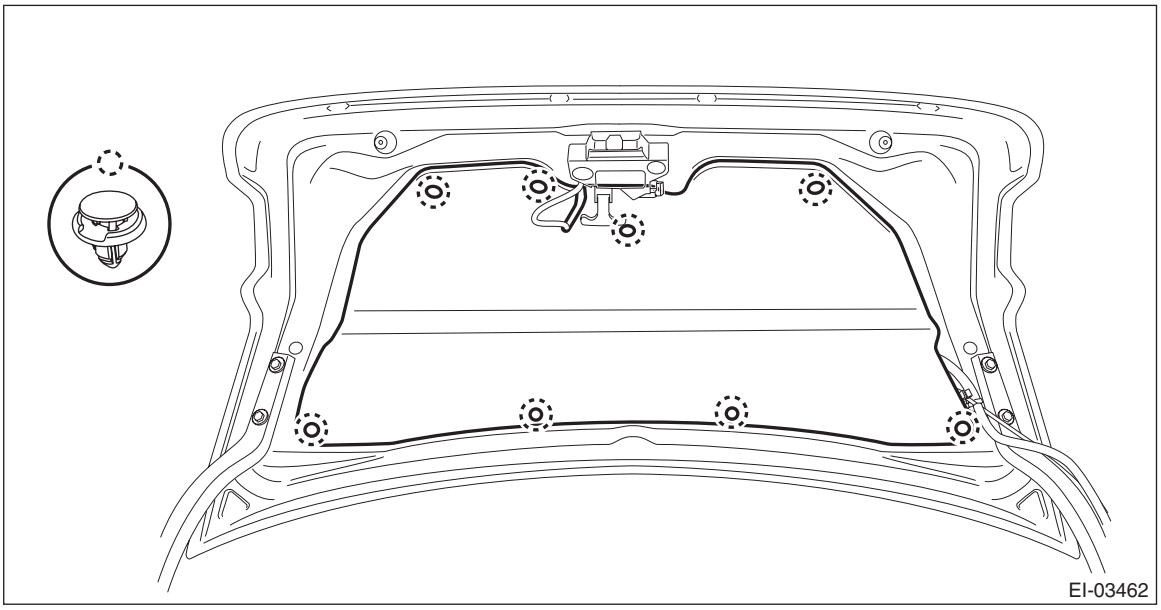
***Tightening torque:***
***Rear seat belt: <Ref. to SB-3, REAR SEAT BELT (4 DOOR MODEL), COMPONENT, General Description.>***
***Rear seat backrest assembly: <Ref. to SE-5, REAR SEAT, COMPONENT, General Description.>***

# 23.Trunk Room Trim

## A: REMOVAL

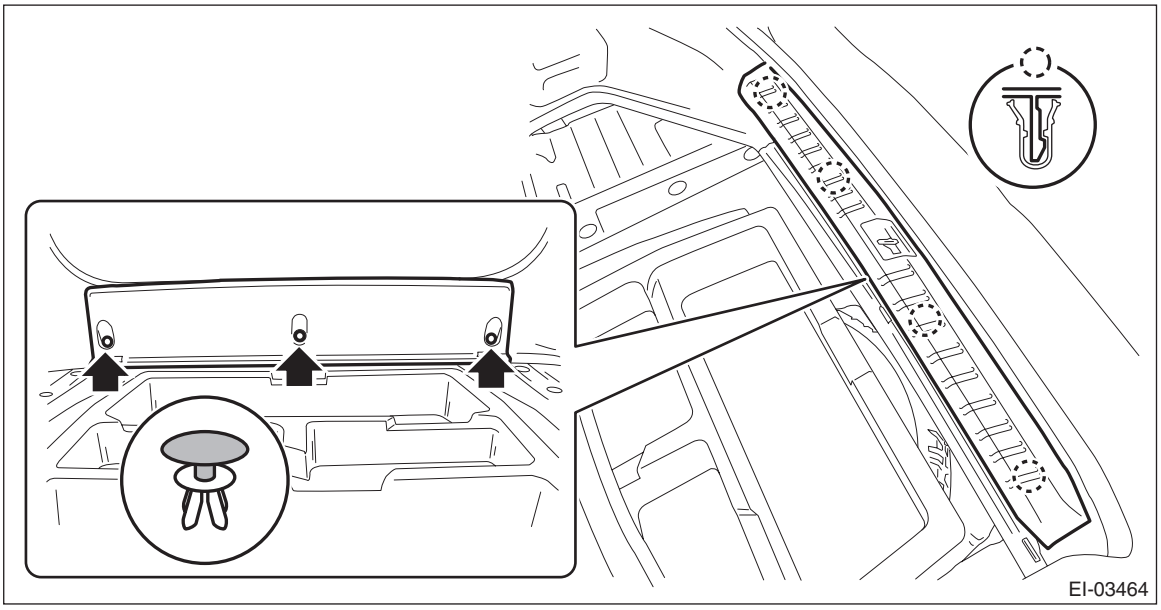
### 1. TRUNK LID TRIM

1) Open the trunk lid.
2) Remove the clips, and remove the trim panel - trunk lid.

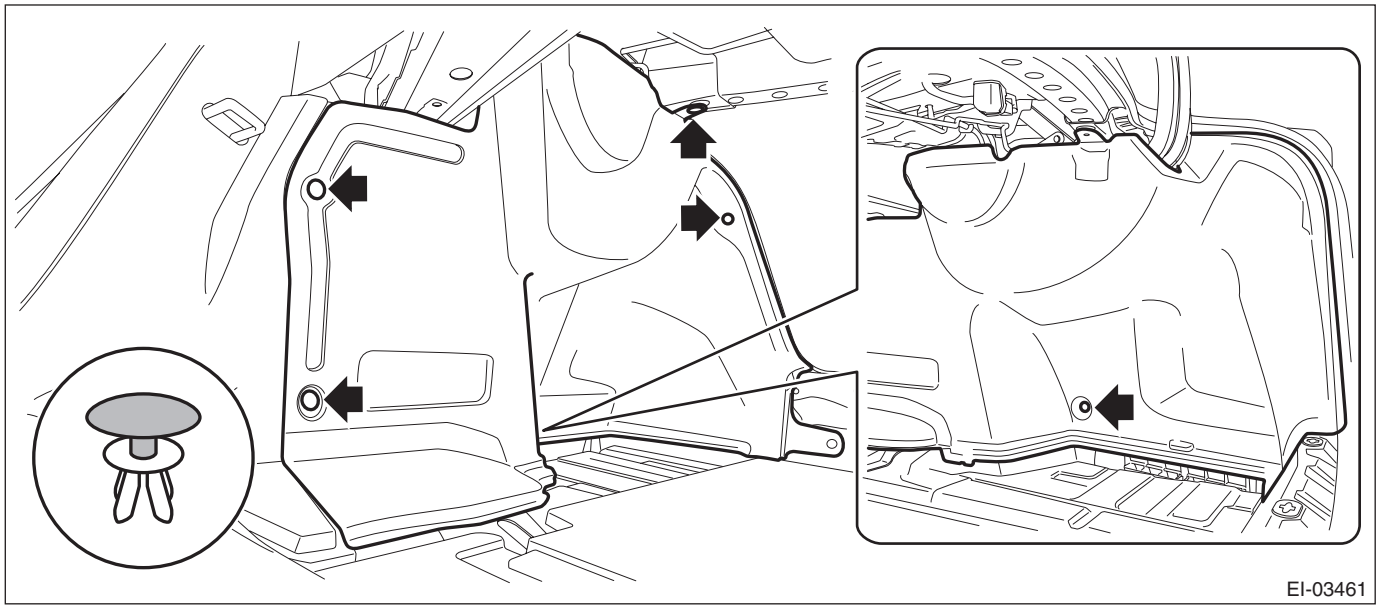


### 2. TRUNK ROOM TRIM

1) Tilt the backrest assembly forward.
2) Remove the mat - trunk.
3) Remove the trim panel - trunk rear.
   (1) Remove the clip.
   (2) Release the claws, and remove the trim panel - trunk rear.



4) Remove the clips, and remove the trim panel - trunk side.



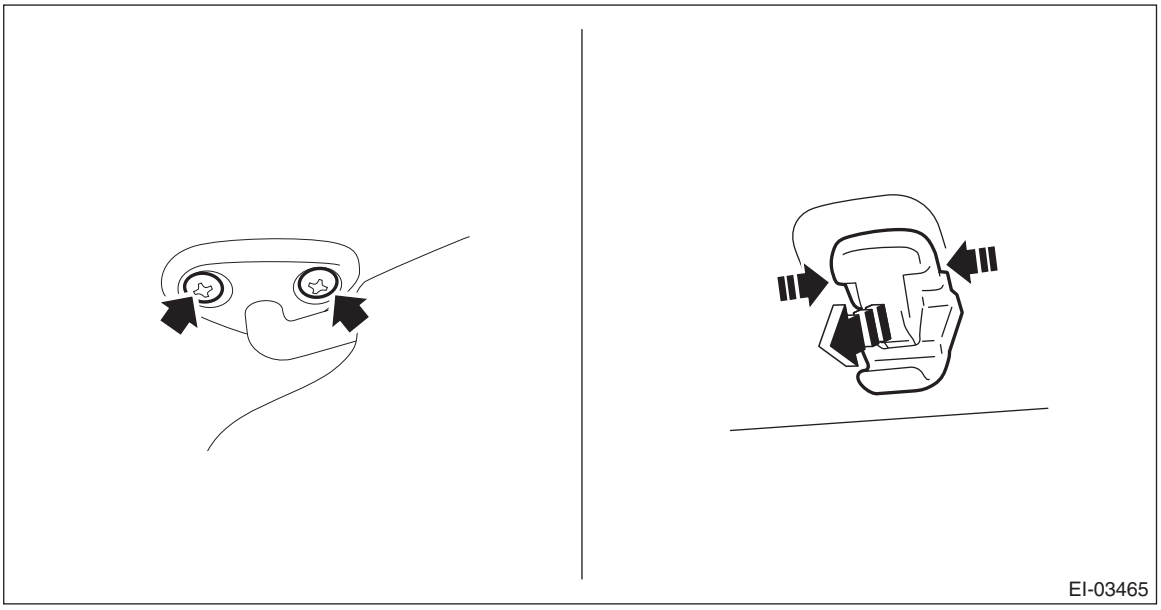
## B: INSTALLATION

Install each part in the reverse order of removal.

# 24.Sun Visor

## A: REMOVAL

1) Remove the screws and remove the sun visor assembly.
2) Remove the hook - sun visor.
   (1) Press both sides using a flat tip screwdriver.
   (2) Remove the hook - sun visor by pulling it toward you.



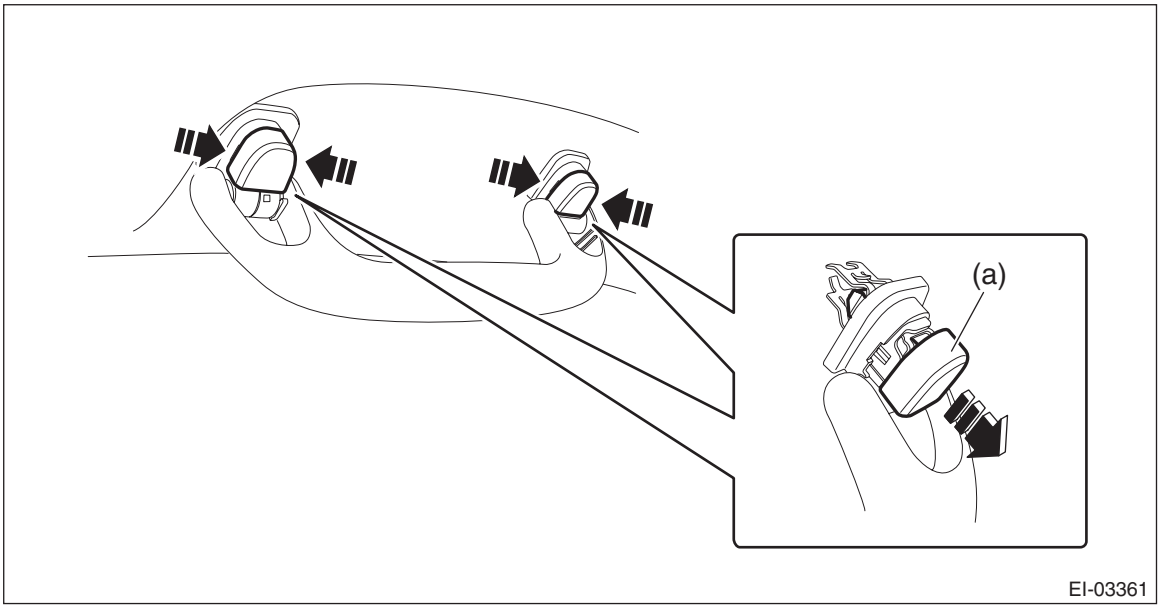
## B: INSTALLATION

Install each part in the reverse order of removal.

# 25.Assist Grip

## A: REMOVAL

Remove the assist rail.
1) Remove the cap (a) by pulling the both sides of the cap (a) using a flat tip screwdriver wrapped with a protection tape.
2) Pull the assist grip toward you (to the vehicle center) and remove the metal clip from the bracket.



## B: INSTALLATION

Install each part in the reverse order of removal.

# 26.Roof Trim

## A: REMOVAL

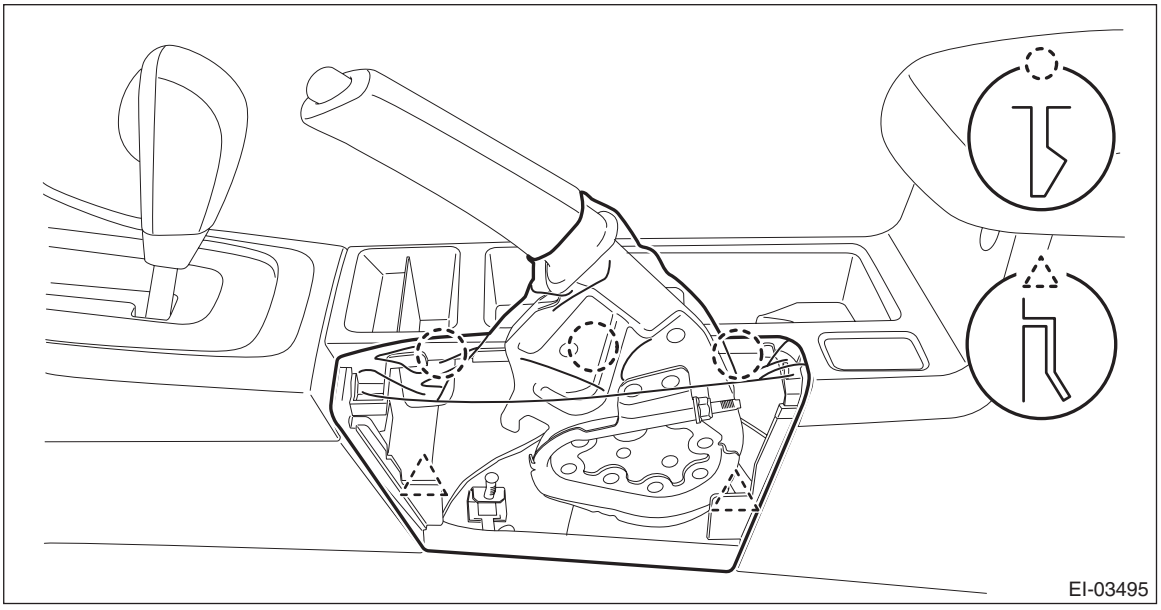
### 1. 4 DOOR MODEL

**CAUTION:**
**• Airbag system satellite safing sensor is located in the lower of the rear seat cushion center. Before removing the rear seat, refer to "CAUTION" of "General Description" in "AIRBAG SYSTEM" section. <Ref. to AB-11, CAUTION, General Description.>**
**• The airbag system is fitted with a backup power supply. After disconnecting the battery ground cable, the airbag may operate if you do not wait for 60 seconds before starting the service of airbag system.**

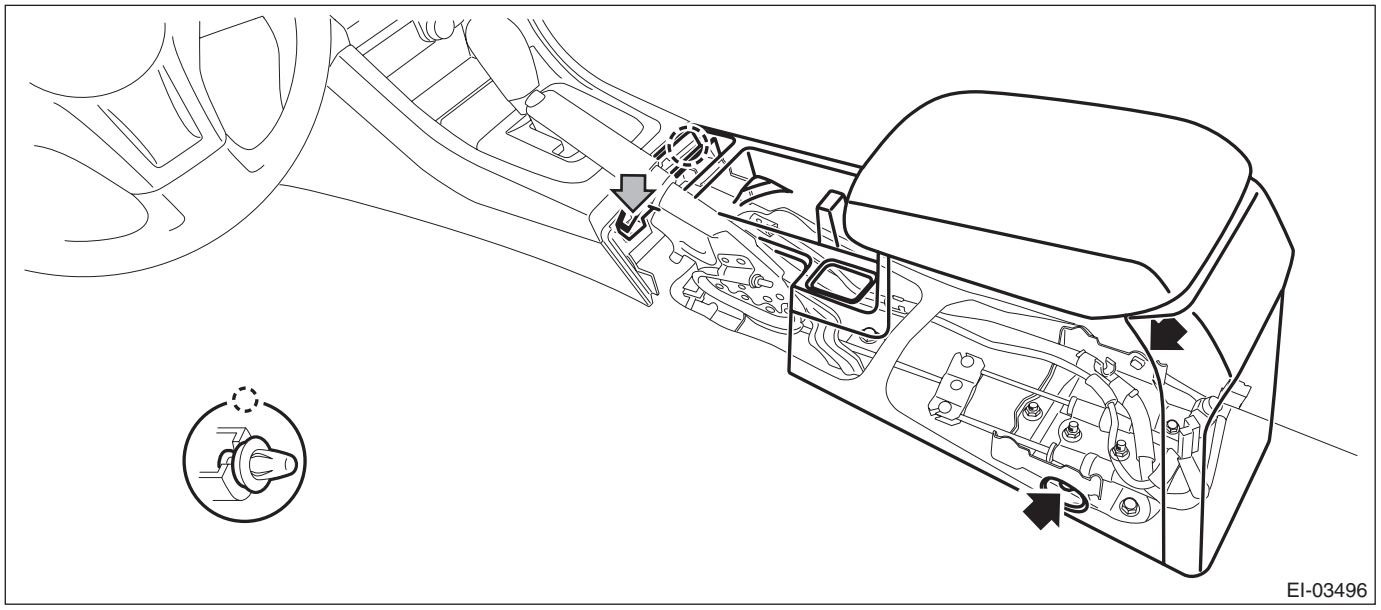
1) Disconnect the ground cable from battery and wait for at least 60 seconds before starting work.
2) Remove the driver's seat.
   (1) Tilt the backrest forward and move the seat to the front most position.
   (2) Remove the rear bolt cover (A) and remove the two bolts.
   (3) Move the seat to the rearmost position, and remove the front bolts.

   (4) Disconnect the connector under the front seat.
   • Seat belt warning light connector (driver's seat)
   • Side airbag module connector <Ref. to AB-31, SIDE AIRBAG MODULE, PROCEDURE, Airbag Connector.>
   • Seat heater connector (model with seat heater)
   (5) Remove the headrest and take out the driver's seat from the vehicle.
3) Adjust the passenger's seat position.
   (1) Remove the headrest.
   (2) Move the passenger's seat to the front-most position and tilt the backrest rearward.

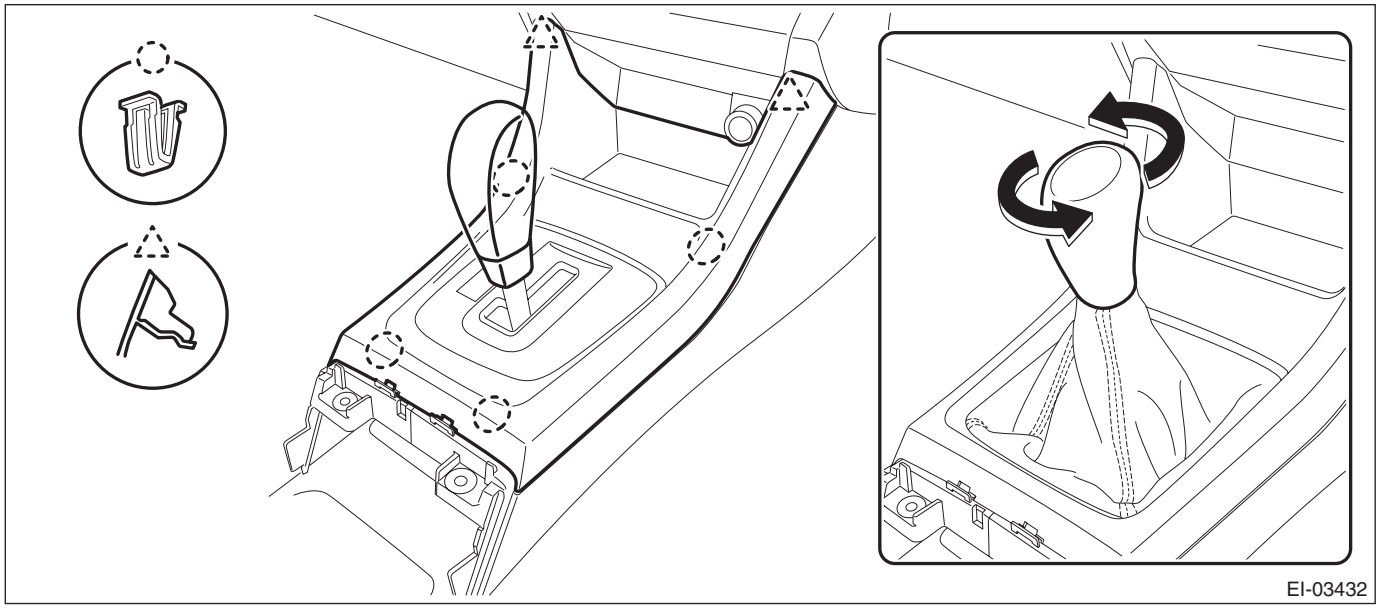
4) Remove the console box assembly.
(1) Release the claws, and then remove the boot - hand brake.



(2) Detach the left and right caps and remove the bolts.
(3) Remove the screws, disconnect the harness connector and remove the console box assembly.



5) Remove the cover - shift lever.
(1) Remove the shift knob. (MT model)
(2) Release the clips and claws, then pull up the cover - shift lever.

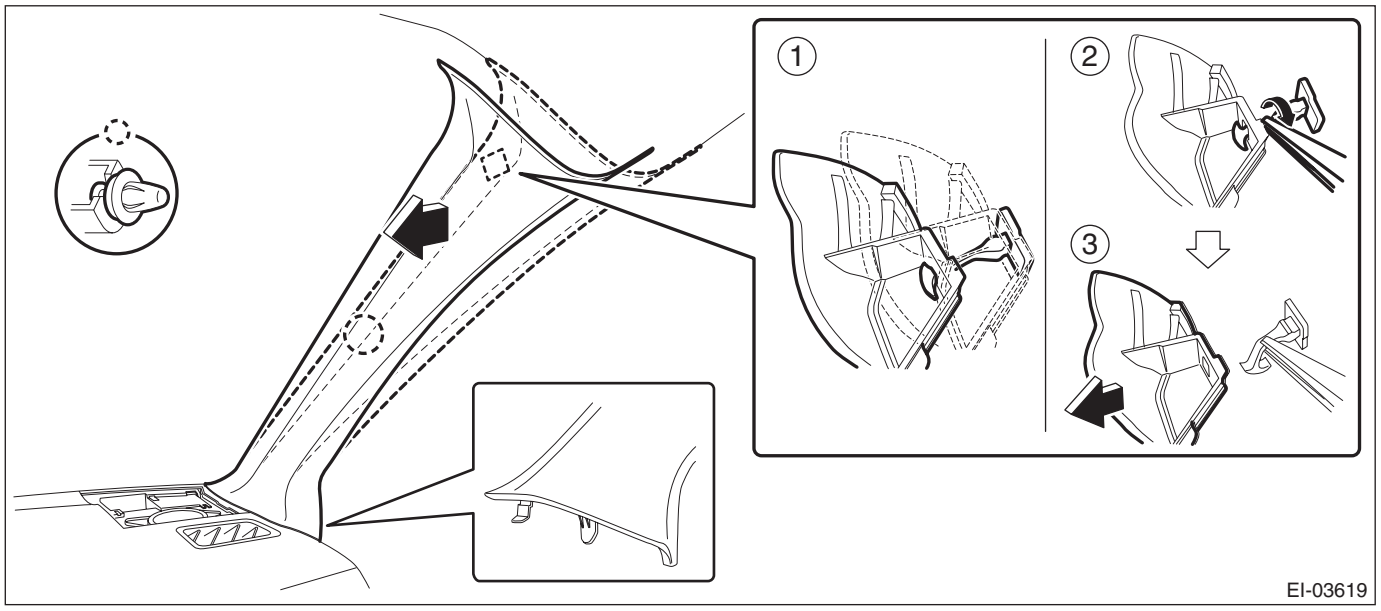


EI-03432

6) Cover the following areas to protect from damage.
- Steering wheel surface
- Instrument panel surface
- Glove box surface

7) Remove the trim panel - front pillar UPR on the left and right sides.
(1) Pull the upper part of the trim panel - front pillar UPR towards the center of the vehicle.
(2) Insert long-nose pliers into the top part of the trim, grip the tether clip with the pliers and twist 90° in that position.

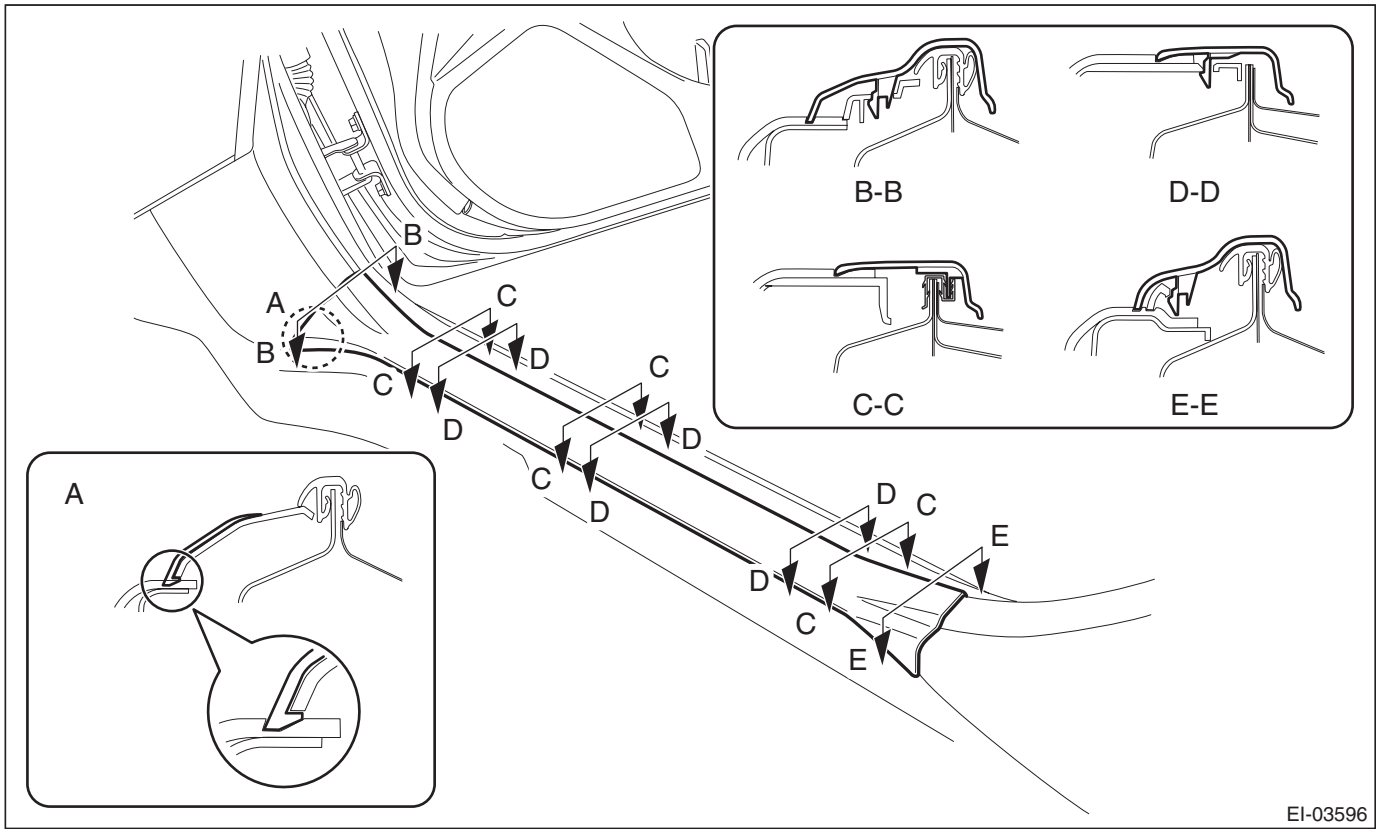
**CAUTION:**
**Be careful not to damage the pillar trim surface and curtain airbag module when inserting the pliers.**
(3) Holding the tether clip twisted as in the previous step, remove the trim panel - front pillar UPR from the tether clip.
(4) Remove the clips, and remove the trim panel - front pillar UPR.



EI-03619

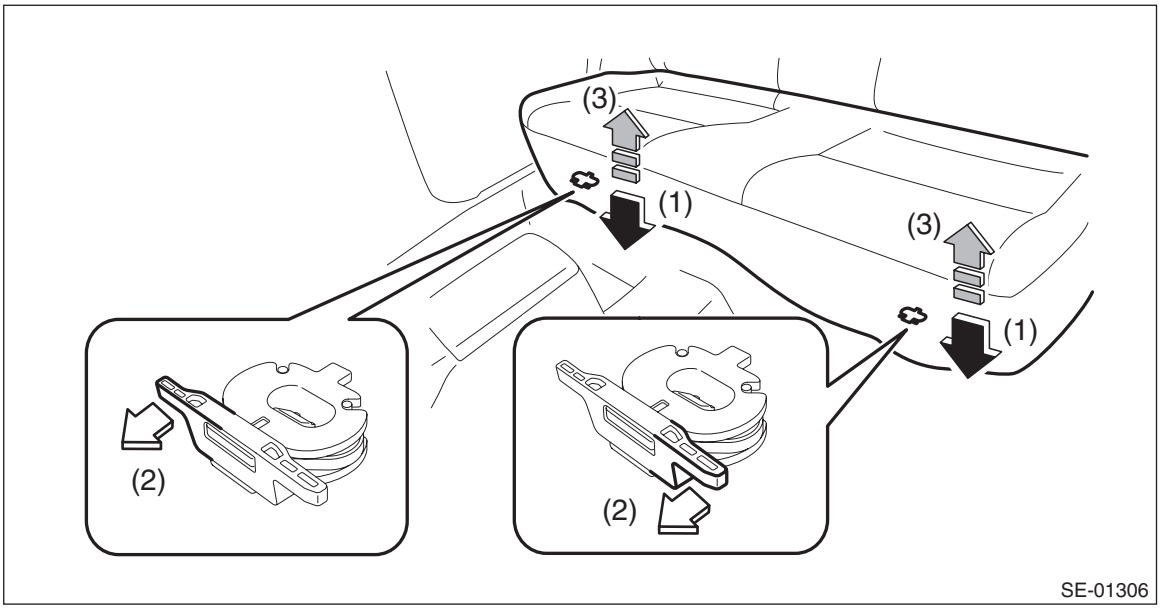
8) Release the claws, and then remove the cover side sill - front INN on LH and RH sides.

**CAUTION:**
**Do not pull with excessive force. Doing so may damage the claws of the cover side sill - front INN.**

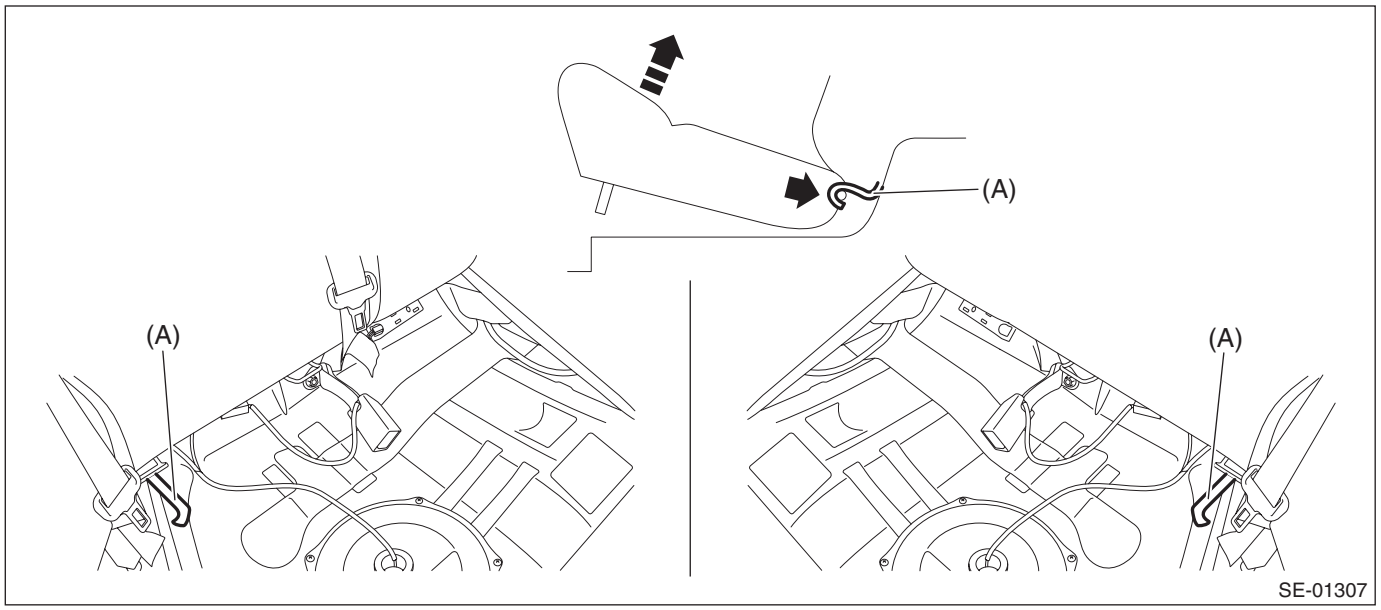


9) Remove the rear seat cushion assembly.
(1) Push the corners of the rear seat cushion from above.
(2) While pushing the corners of the rear seat cushion from above, pull the knob of the hook - seat cushion rear towards yourself.
(3) While pulling the knob towards yourself, disconnect the hooks by lifting up the rear seat cushion.

NOTE:
Pull the left side of the knob to disconnect the LH side hook, and pull the right side of the knob to disconnect the RH side hook.

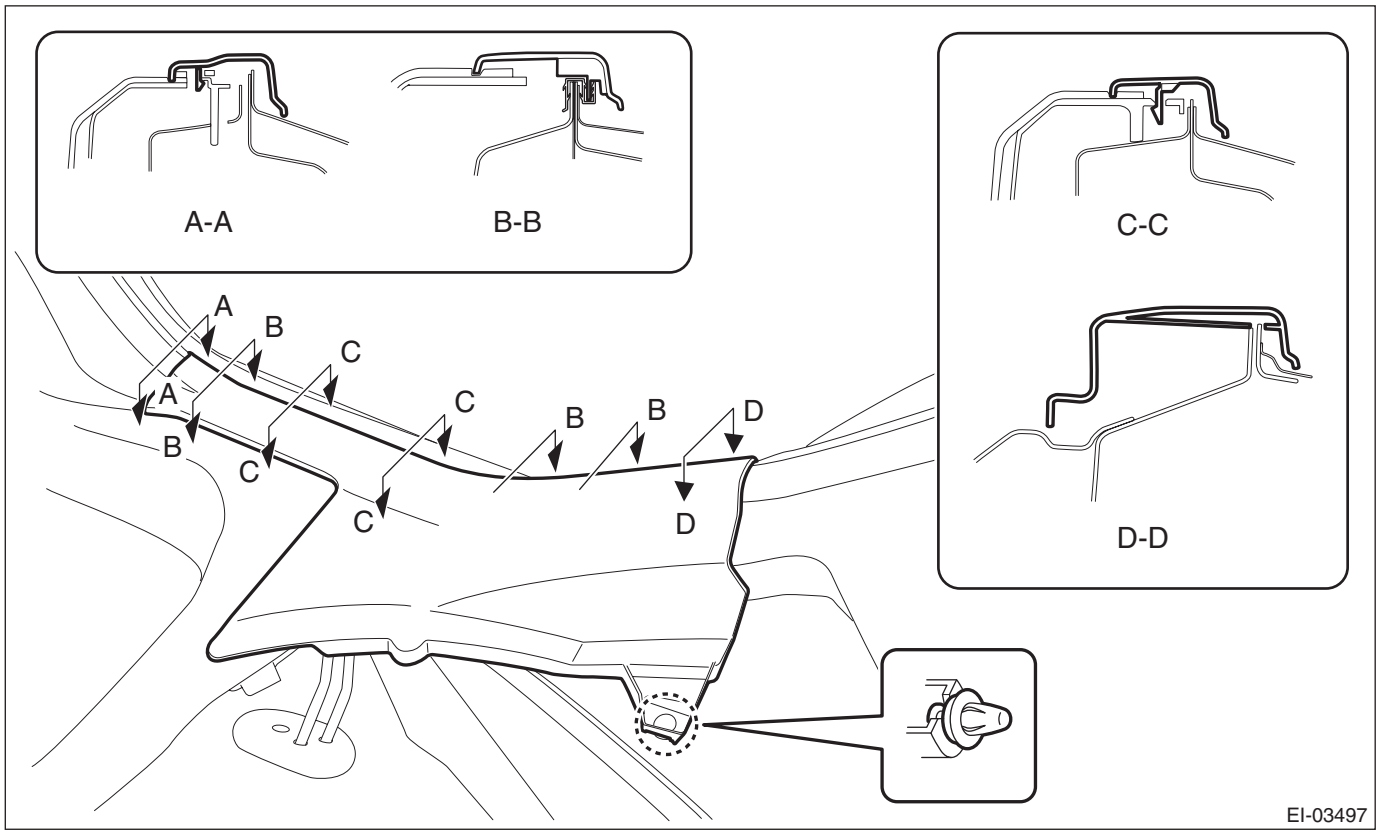


(4) Remove the hook (A) by pushing it back while lifting the front side of the rear seat cushion, and remove the rear seat cushion.



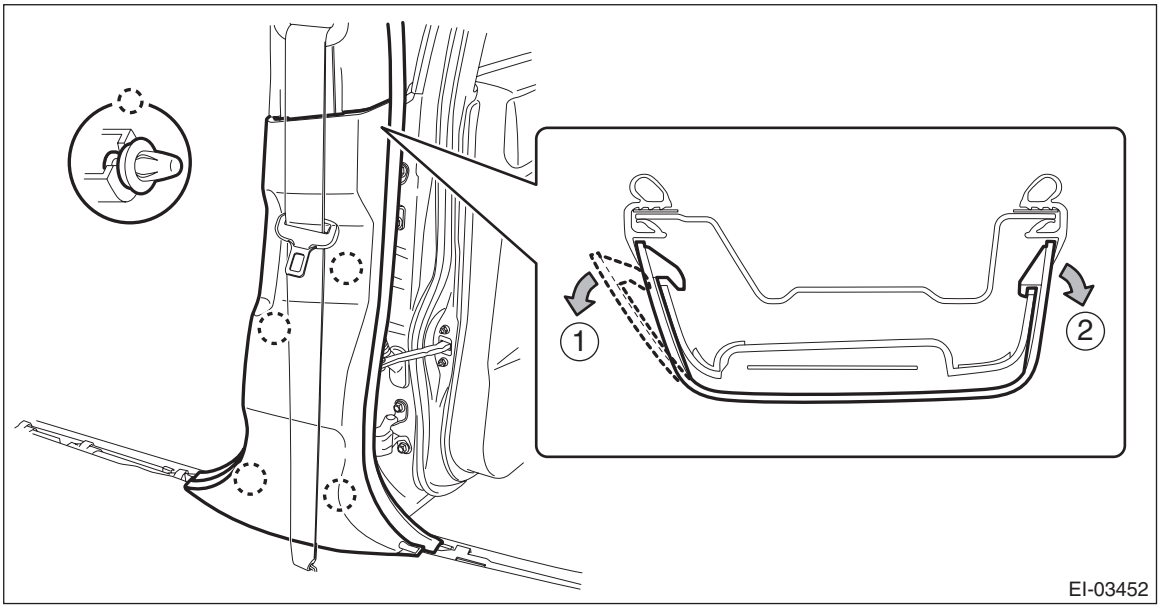
10) Release the clips and claws, and remove the cover side sill - rear INN on LH and RH sides.

**CAUTION:**
**Do not pull with excessive force. Doing so may damage the claws of the cover side sill - rear INN.**



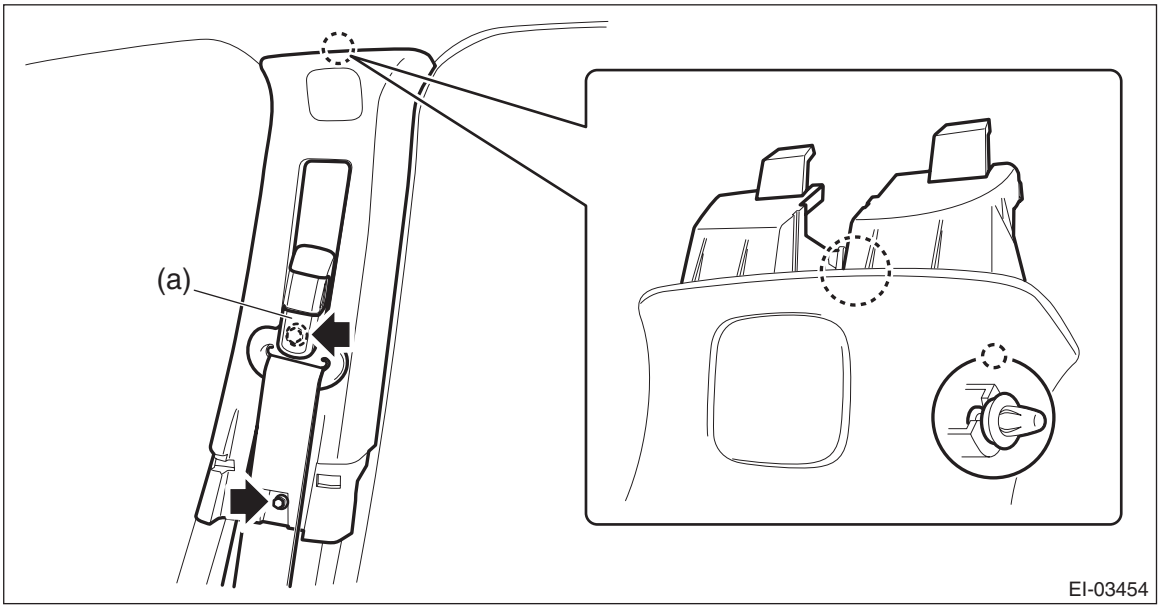
11) Remove the trim panel - center pillar LWR on the left and right sides.
(1) Release the clip by pulling the trim panel - center pillar LWR toward you.
(2) Expand the claws of the trim panel - center pillar LWR outward, and remove it from the trim panel - center pillar UPR.

**CAUTION:**
**Do not expand the trim panel - center pillar LWR excessively. Doing so may damage the trim.**

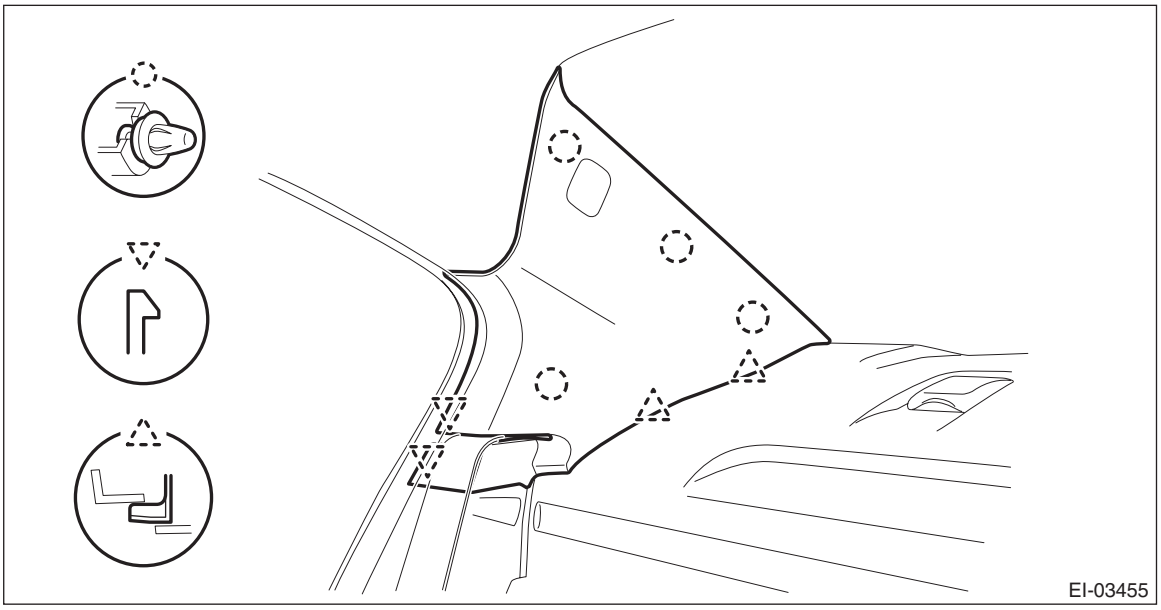


NOTE:
First release the claw located to the front of the vehicle.
12) Remove the trim panel - center pillar UPR on the left and right sides.
(1) Remove the cover through (a), and remove the seat belt anchor bolt.
(2) Remove the bolt on the lower side of the trim panel - center pillar UPR.
(3) Remove the clip by pulling the upper part of the trim toward you, and while lowering the entire trim, remove the trim panel - center pillar UPR.

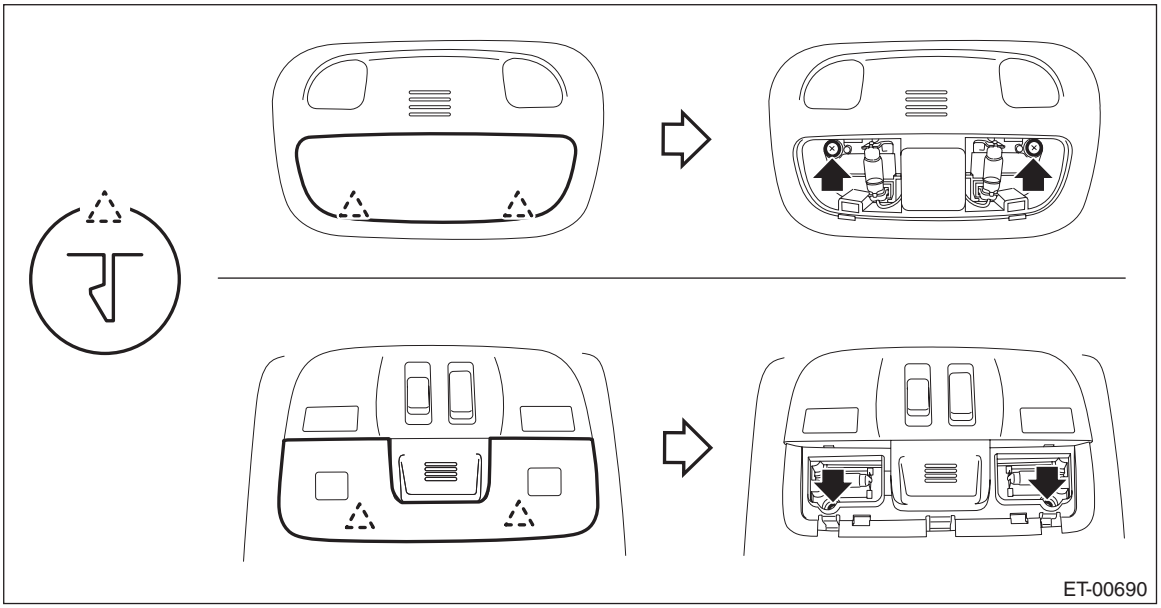
**CAUTION:**
**Do not reuse the upper clips of the trim panel - center pillar UPR. Once the clip is removed, its holding force is reduced. Be sure to replace it with a new clip.**



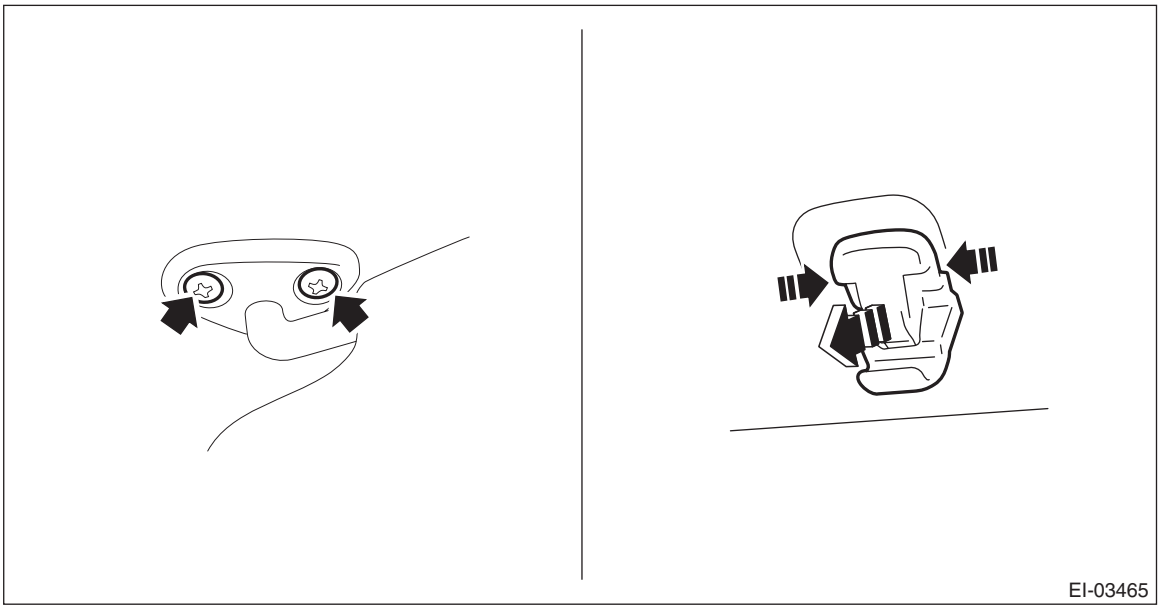
13) Remove the clips, and remove the trim panel - rear pillar UPR on the left and right sides.



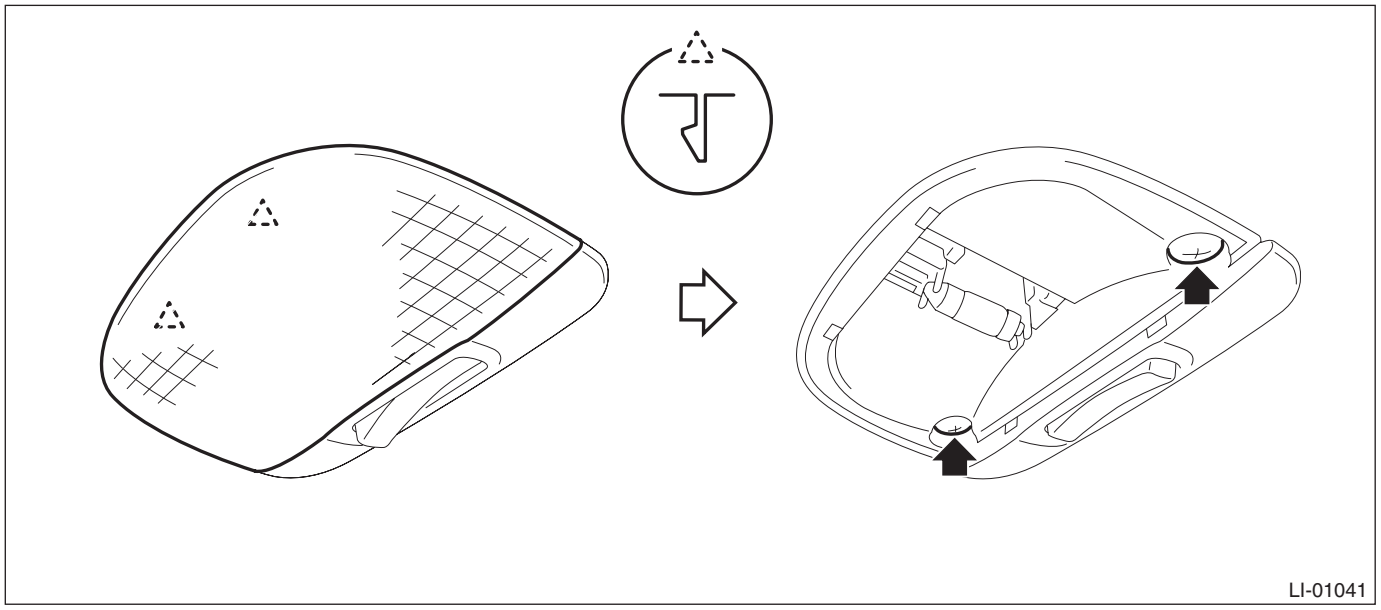
14) Remove the light assembly - map.
(1) Remove the lens and detach the screws.
(2) Disconnect the connector and remove the light assembly - map.



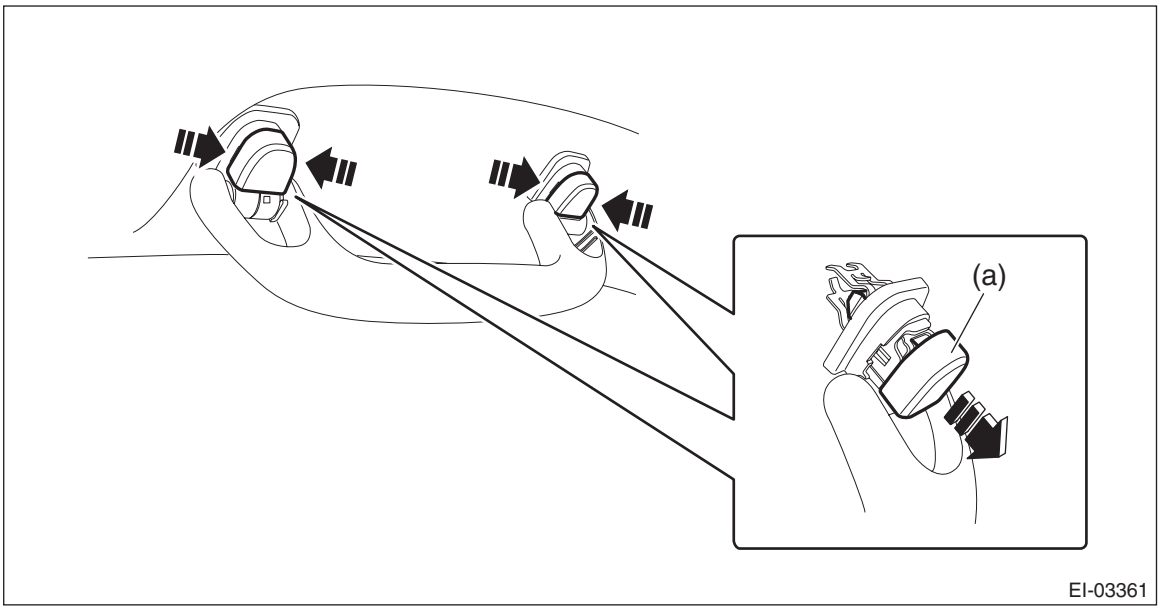
15) Remove the left and right sun visor assembly.
(1) Remove the screws and remove the sun visor assembly.
(2) Press both sides of the hook - sun visor using a flat tip screwdriver.
(3) Remove the hook - sun visor by pulling it toward you.



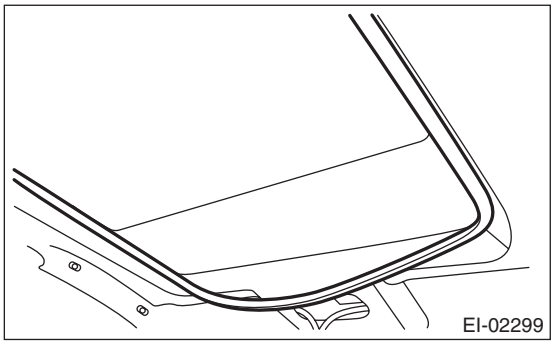
16) Remove the light assembly - room.
(1) Remove the lens and detach the screws.
(2) Disconnect the connector and remove the light assembly - room.



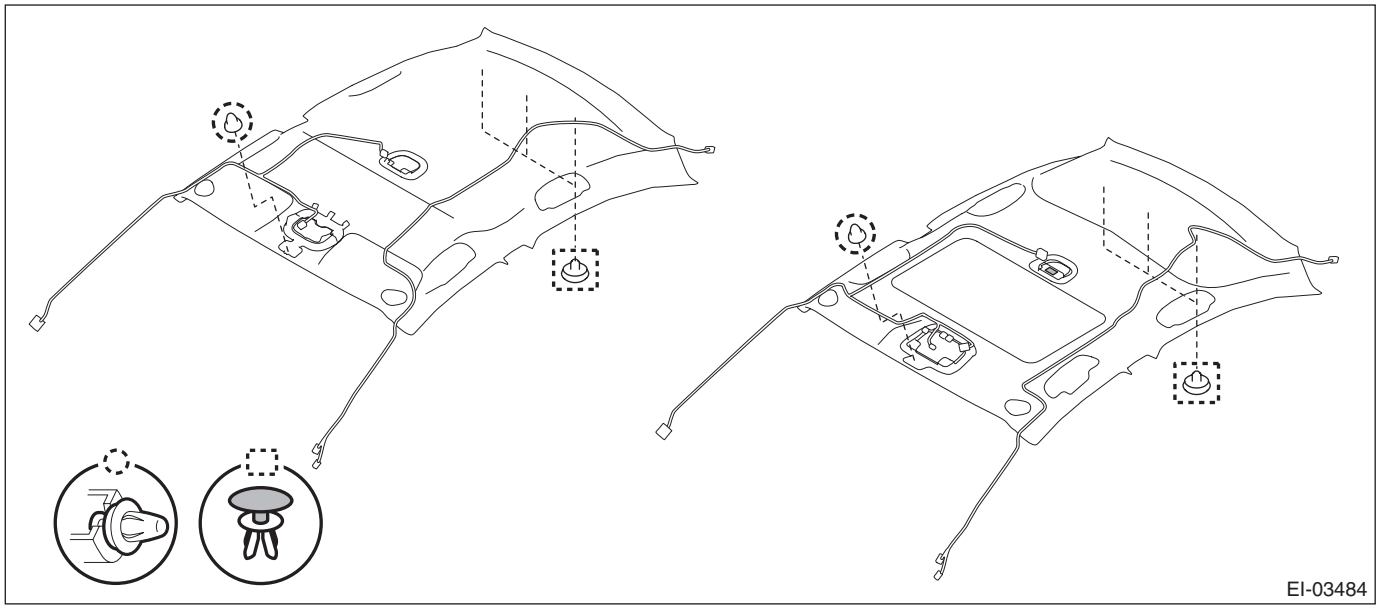
17) Remove all assist rails.
(1) Remove the cap (a) by pulling the both sides of the cap (a) using a flat tip screwdriver wrapped with a protection tape.
(2) Pull the assist grip toward you (to the vehicle center) and remove the metal clip from the bracket.



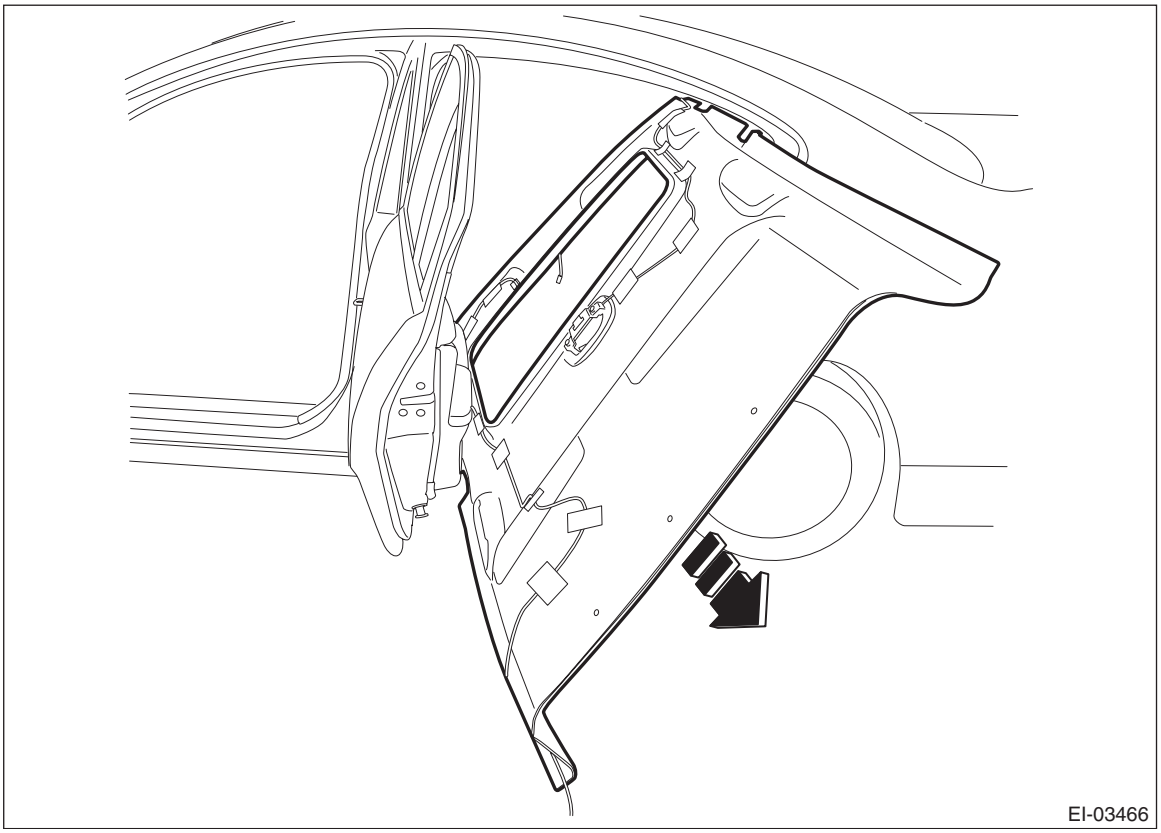
18) Remove the garnish - roof. (Model with sunroof)



19) Remove the trim panel - roof assembly.
(1) Remove the harness clamp of the cord assembly - antenna feeder and the cord - roof, and disconnect the connectors.
(2) Remove the clips and the Velcro tape behind the room light.
(3) Remove the weather strip - body side flange from the front/rear and left/right doors, and remove the trim panel - roof assembly.



(4) Take out the trim panel - roof assembly from the vehicle.

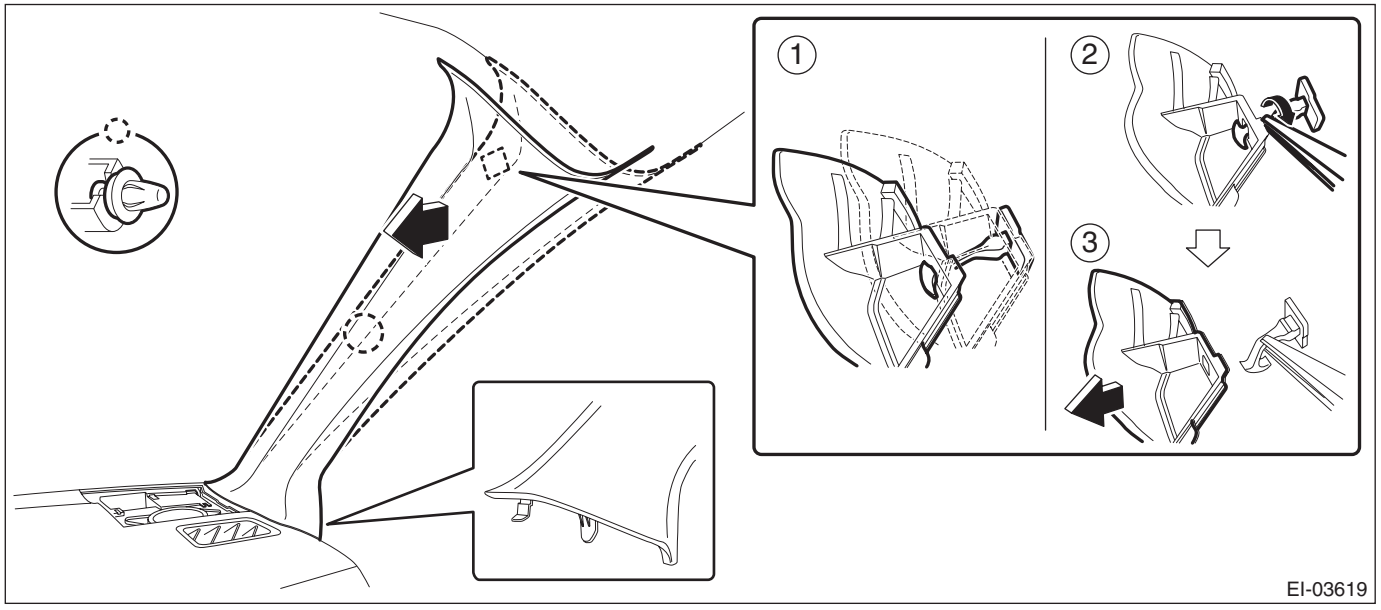


## 2. 5 DOOR MODEL/XV MODEL

**CAUTION:**
**• Airbag system satellite safing sensor is located in the lower of the rear seat cushion center. Before removing the rear seat, refer to "CAUTION" of "General Description" in "AIRBAG SYSTEM" section. <Ref. to AB-11, CAUTION, General Description.>**
**• The airbag system is fitted with a backup power supply. After disconnecting the battery ground cable, the airbag may operate if you do not wait for 60 seconds before starting the service of airbag system.**

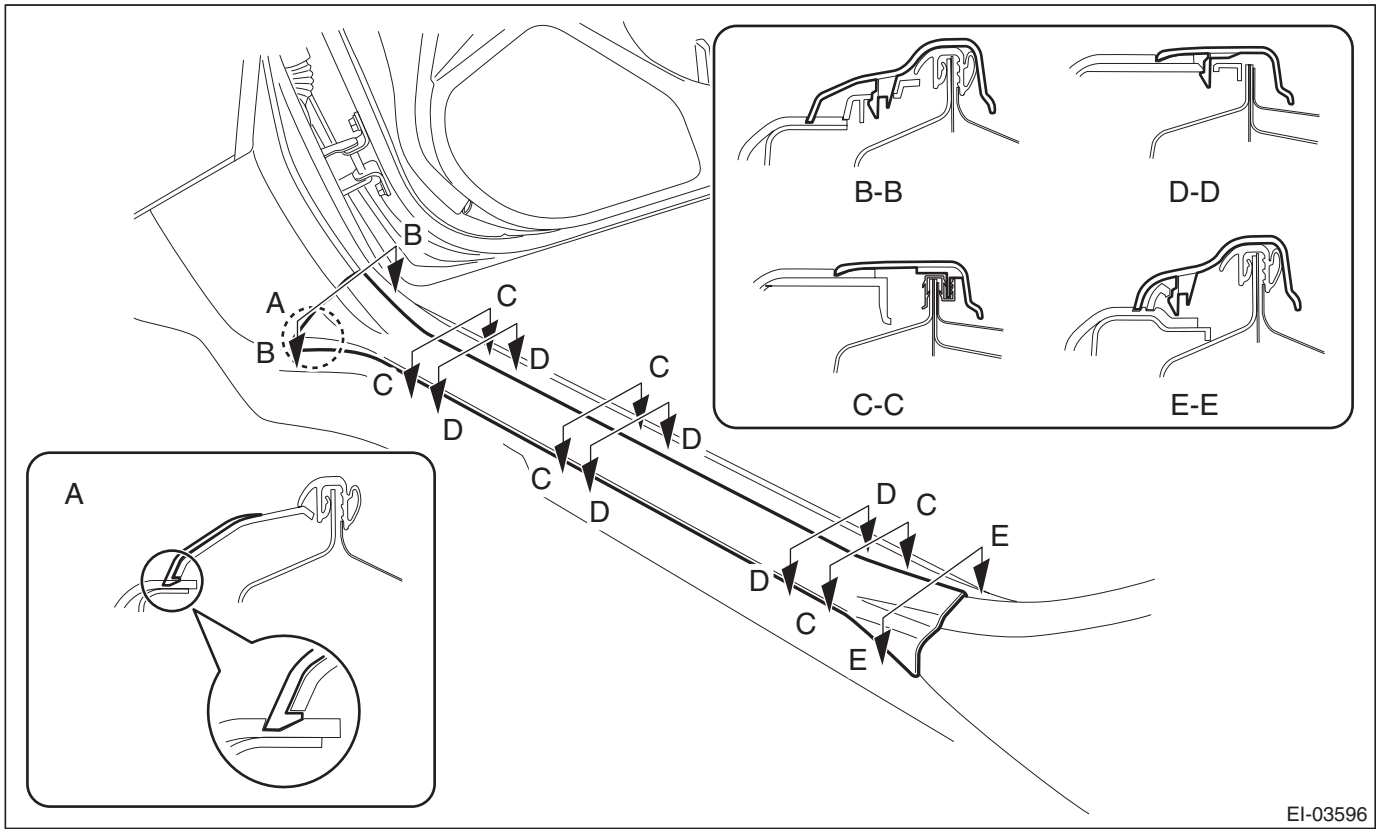
1) Disconnect the ground cable from battery and wait for at least 60 seconds before starting work.
2) Adjust the front seat position.
   (1) Remove the headrest.
   (2) Move the seat to the front-most position and tilt the backrest rearward.
3) Remove the trim panel - front pillar UPR on the left and right sides.
   (1) Pull the upper part of the trim panel - front pillar UPR towards the center of the vehicle.
   (2) Insert long-nose pliers into the top part of the trim, grip the tether clip with the pliers and twist 90° in that position.

**CAUTION:**
**Be careful not to damage the pillar trim surface and curtain airbag module when inserting the pliers.**
   (3) Holding the tether clip twisted as in the previous step, remove the trim panel - front pillar UPR from the tether clip.
   (4) Remove the clips, and remove the trim panel - front pillar UPR.



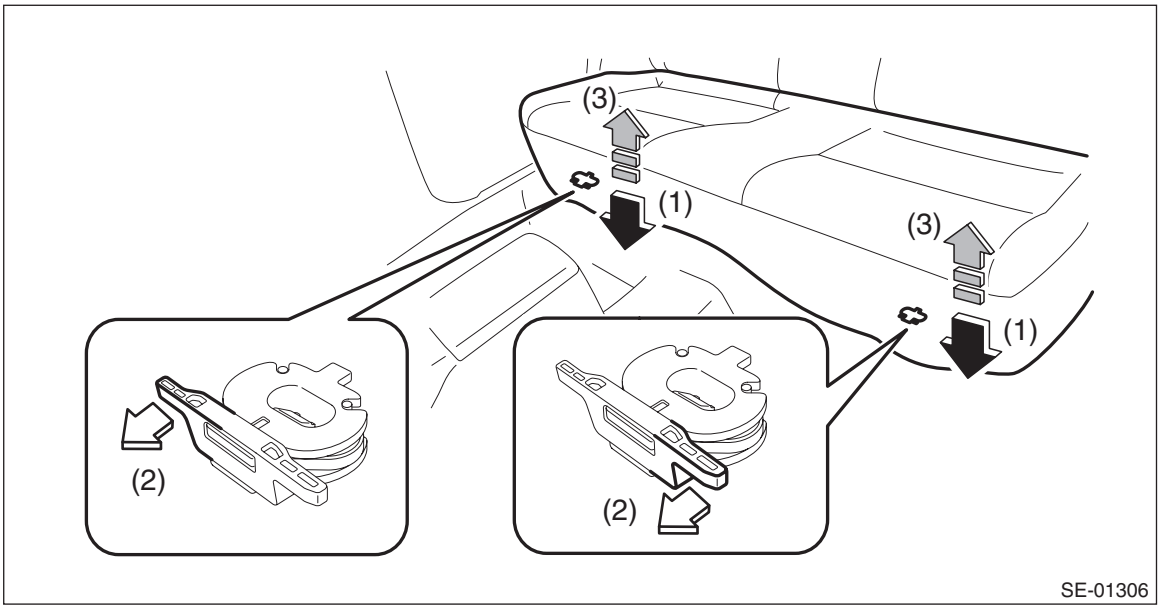
4) Release the claws, and then remove the cover side sill - front INN on LH and RH sides.

**CAUTION:**
**Do not pull with excessive force. Doing so may damage the claws of the cover side sill - front INN.**

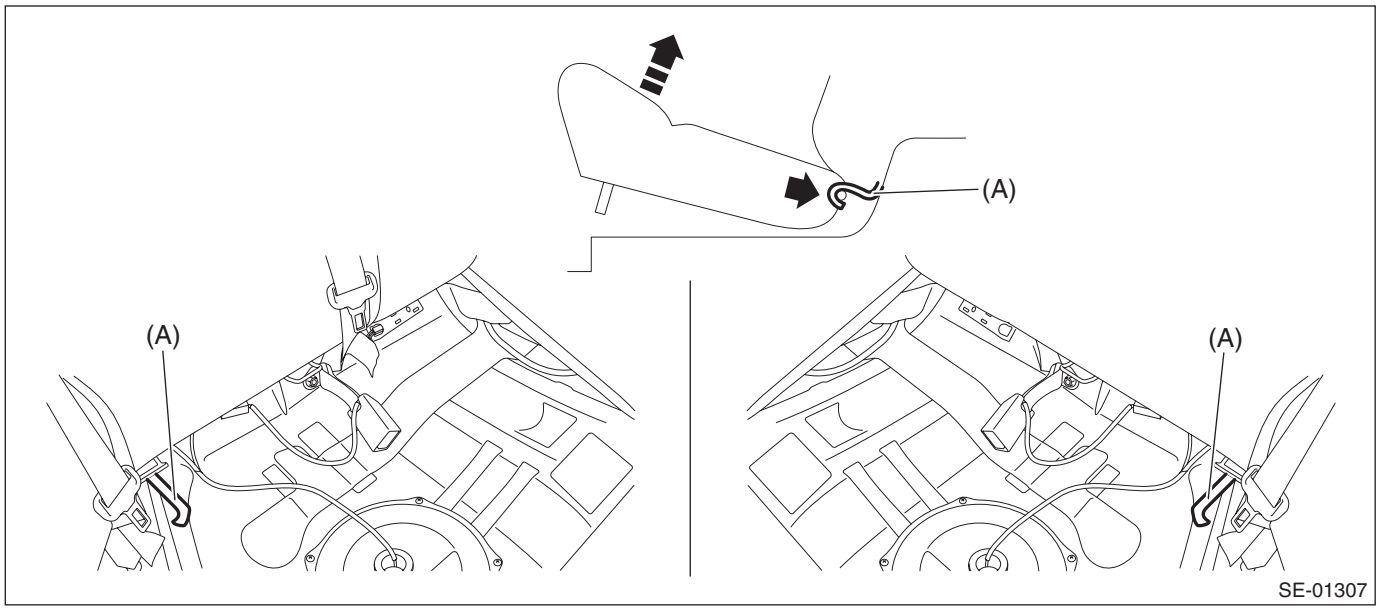


5) Remove the rear seat cushion assembly.
(1) Push the corners of the rear seat cushion from above.
(2) While pushing the corners of the rear seat cushion from above, pull the knob of the hook - seat cushion rear towards yourself.
(3) While pulling the knob towards yourself, disconnect the hooks by lifting up the rear seat cushion.

NOTE:
Pull the left side of the knob to disconnect the LH side hook, and pull the right side of the knob to disconnect the RH side hook.

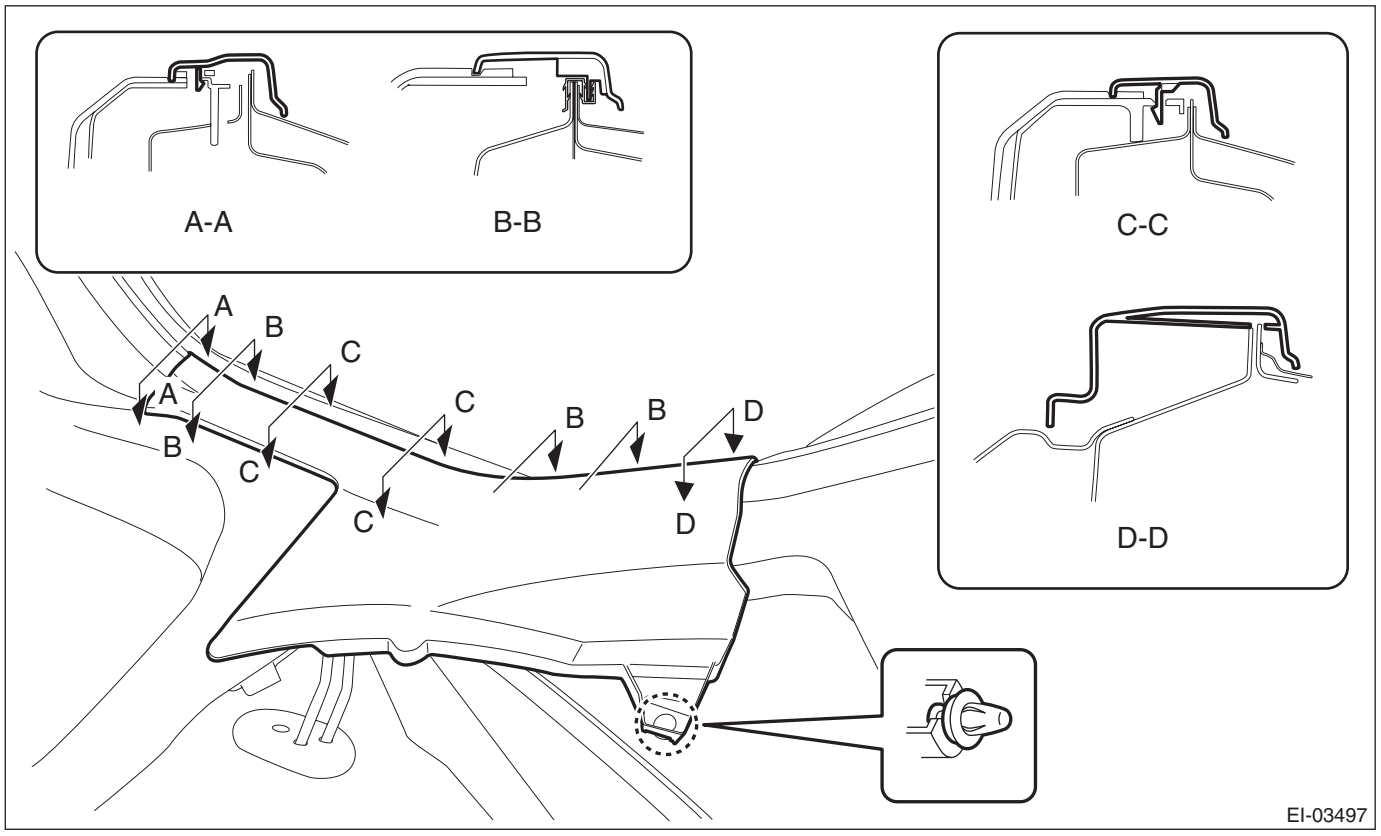


(4) Remove the hook (A) by pushing it back while lifting the front side of the rear seat cushion, and remove the rear seat cushion.



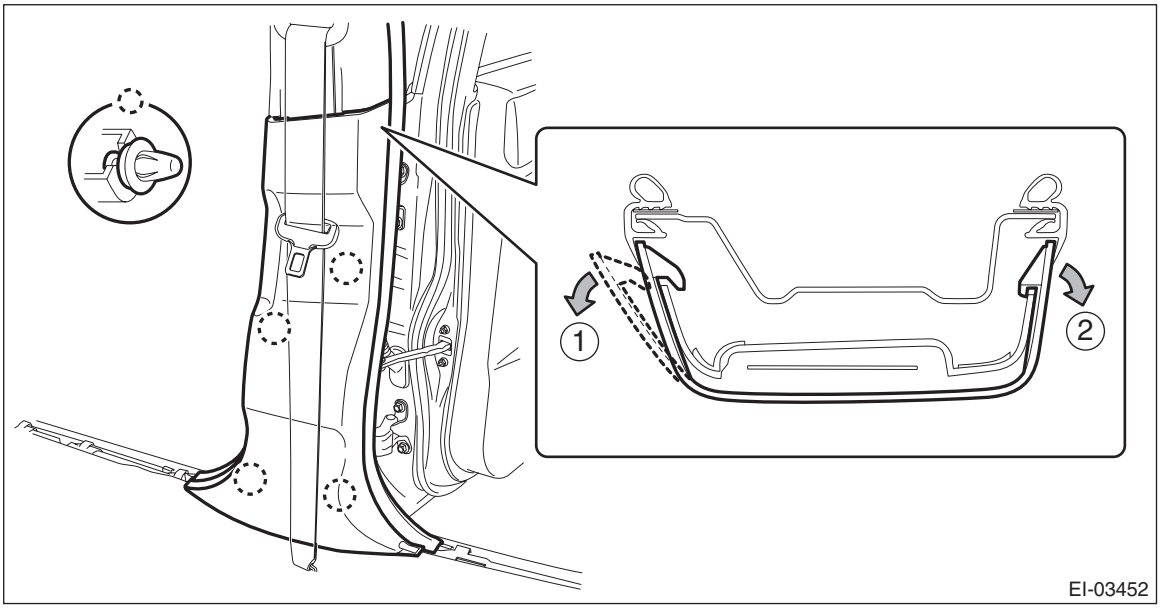
6) Release the clips and claws, and remove the cover side sill - rear INN on LH and RH sides.

**CAUTION:**
**Do not pull with excessive force. Doing so may damage the claws of the cover side sill - rear INN.**



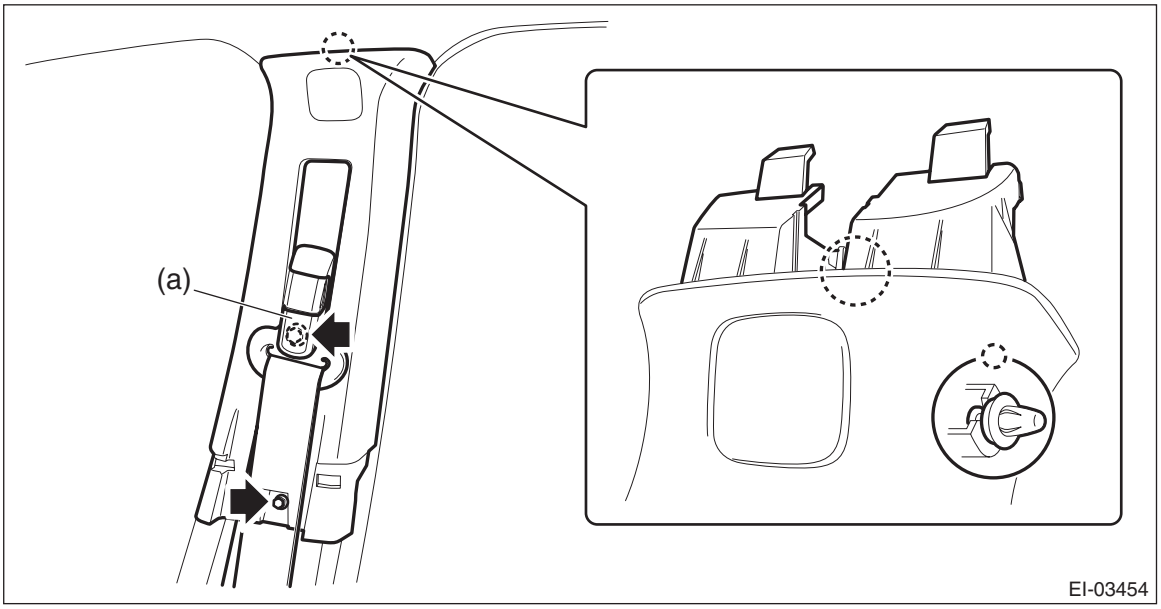
7) Remove the trim panel - center pillar LWR on the left and right sides.
   (1) Release the clip by pulling the trim panel - center pillar LWR toward you.
   (2) Expand the claws of the trim panel - center pillar LWR outward, and remove it from the trim panel - center pillar UPR.

**CAUTION:**
**Do not expand the trim panel - center pillar LWR excessively. Doing so may damage the trim.**

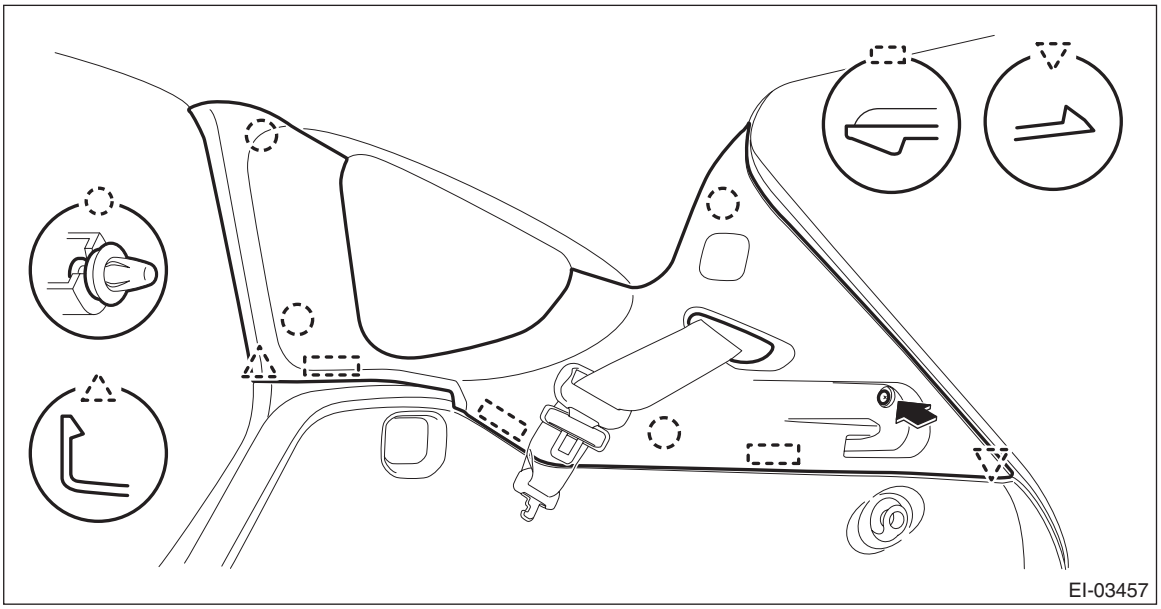


NOTE:
First release the claw located to the front of the vehicle.
8) Remove the trim panel - center pillar UPR on the left and right sides.
   (1) Remove the cover through (a), and remove the seat belt anchor bolt.
   (2) Remove the bolt on the lower side of the trim panel - center pillar UPR.
   (3) Remove the clip by pulling the upper part of the trim toward you, and while lowering the entire trim, remove the trim panel - center pillar UPR.

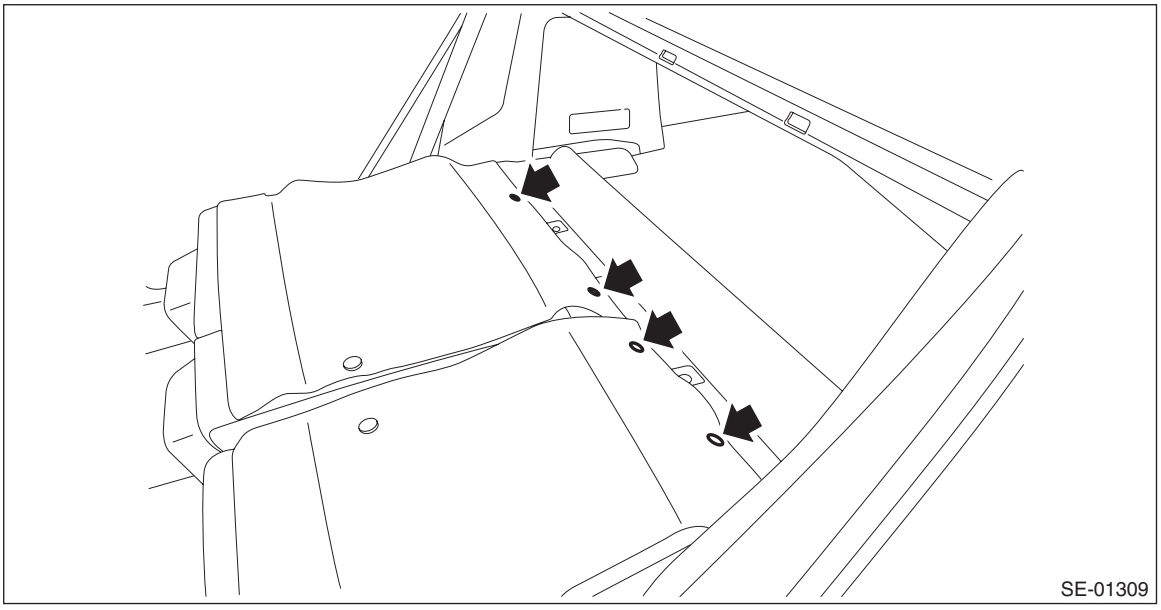
**CAUTION:**
**Do not reuse the upper clips of the trim panel - center pillar UPR. Once the clip is removed, its holding force is reduced. Be sure to replace it with a new clip.**



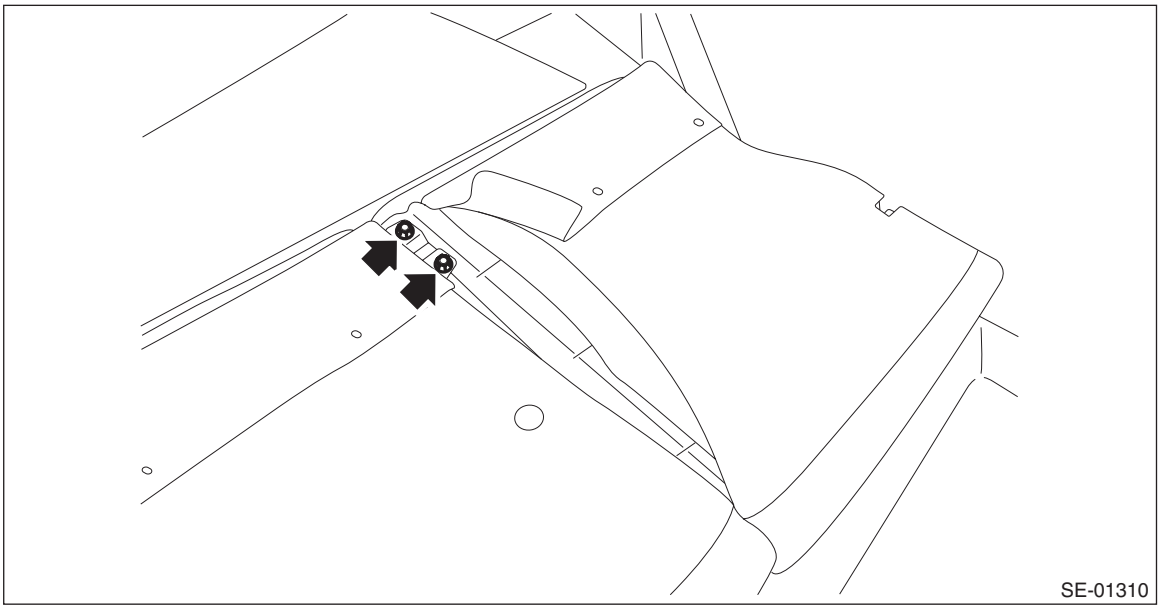
9) Remove the screws and clips, and remove the trim panel - rear quarter pillar UPR on the left and right sides.



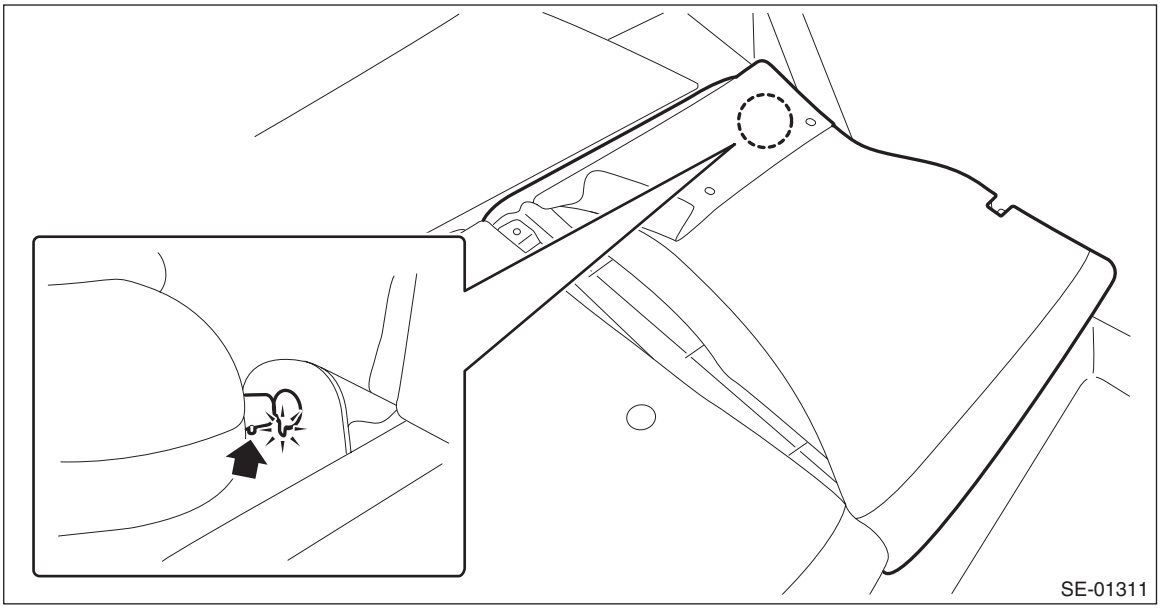
10) Remove the backrest assembly.
(1) Remove the pillow assembly - rear backrest, and tilt the backrest forward.
(2) Remove the clips located at the bottom of the cover COMPL - rear backrest LH and RH of the rear seat back.



(3) Turn over the cover COMPL - rear backrest to remove the bolts.

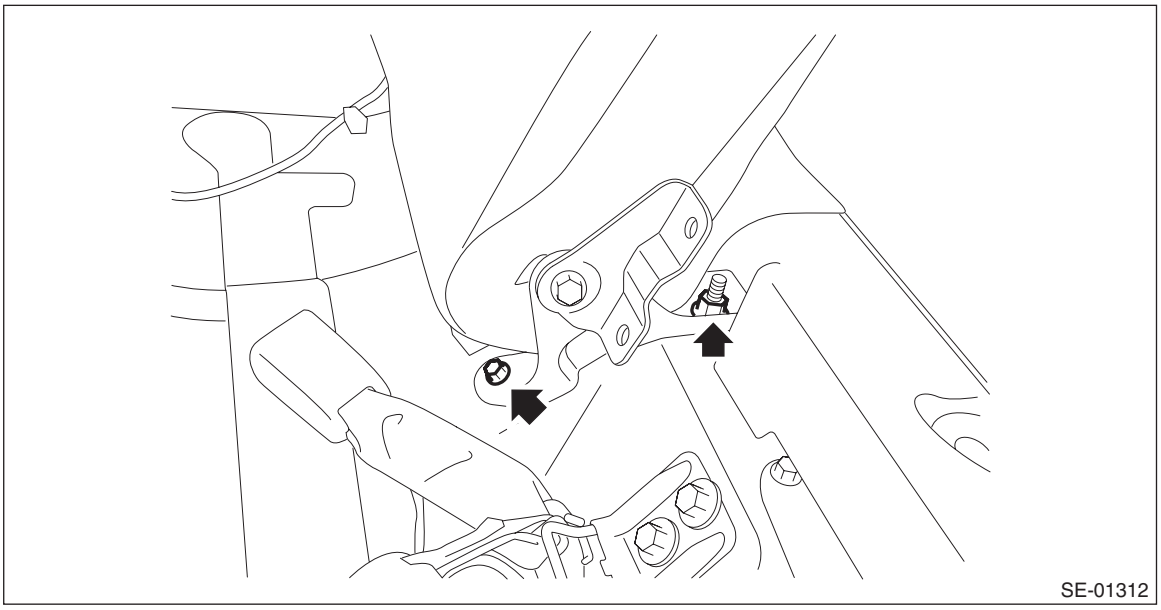


(4) Remove the backrest assembly LH from the hinge assembly.

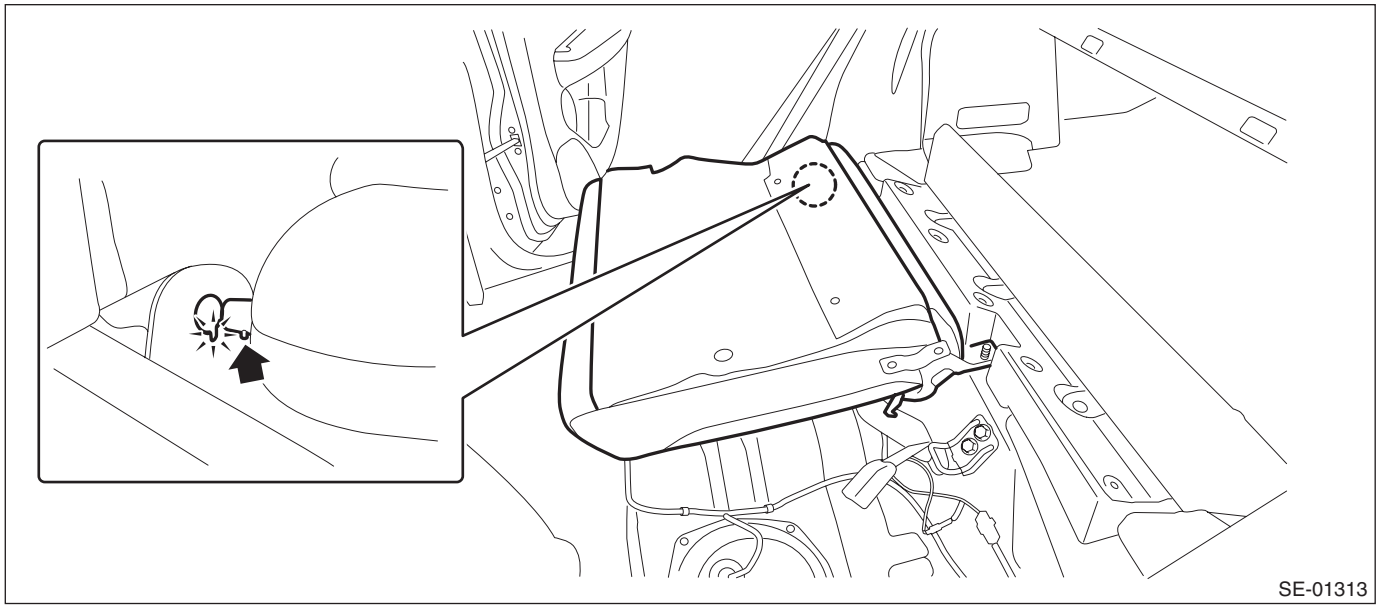


NOTE:
The backrest assembly cannot be removed unless pin positions on the hinge assembly side and backrest assembly side are aligned.

(5) Remove the bolts and nuts, and remove the backrest assembly RH.

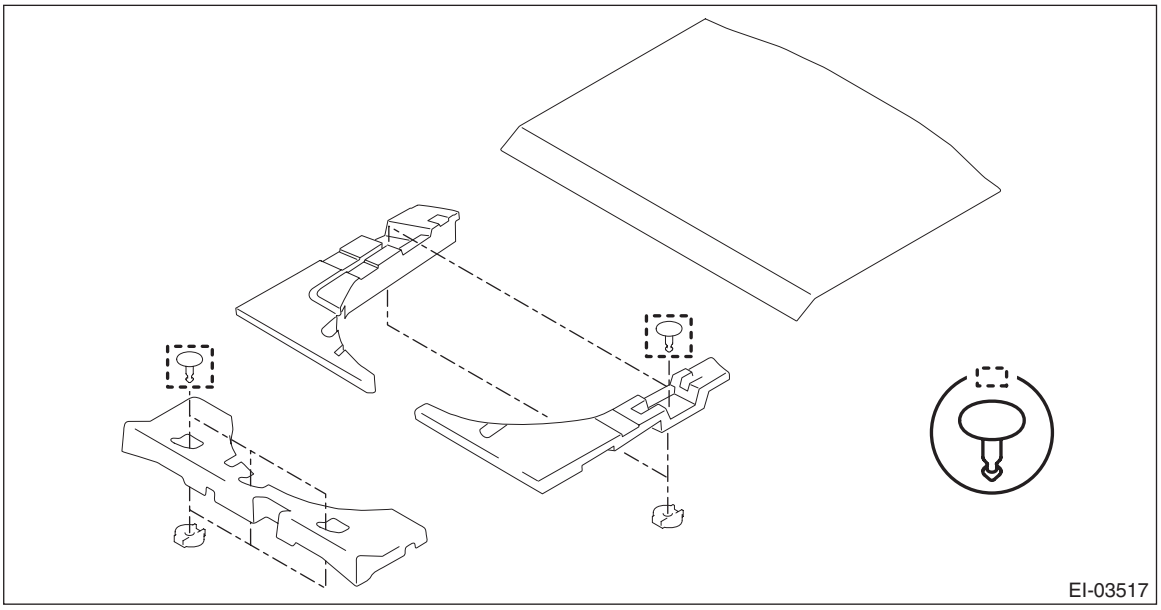


(6) Remove the backrest assembly RH from the hinge assembly.

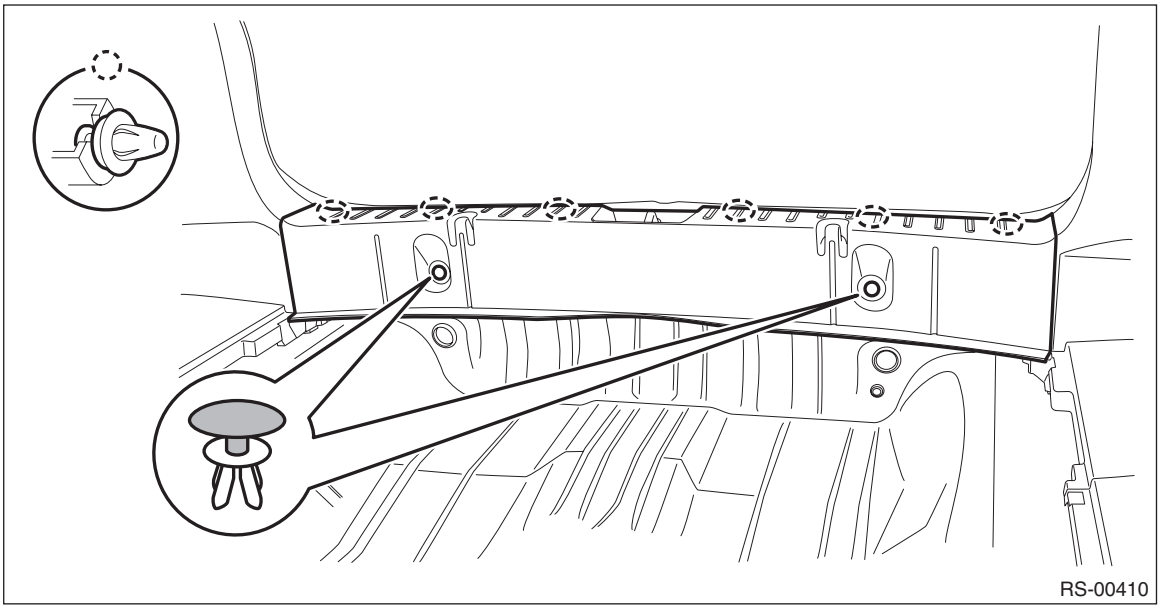


NOTE:
The backrest assembly cannot be removed unless pin positions on the hinge assembly side and backrest assembly side are aligned.

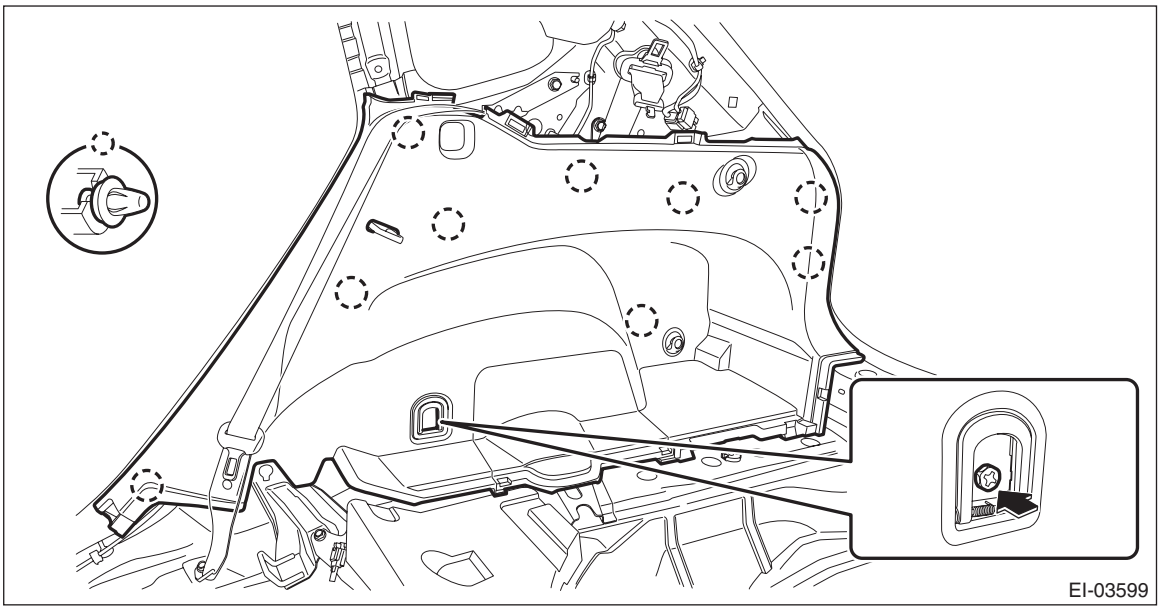
11) Remove the mat - rear floor CTR and the spacer - rear floor side.



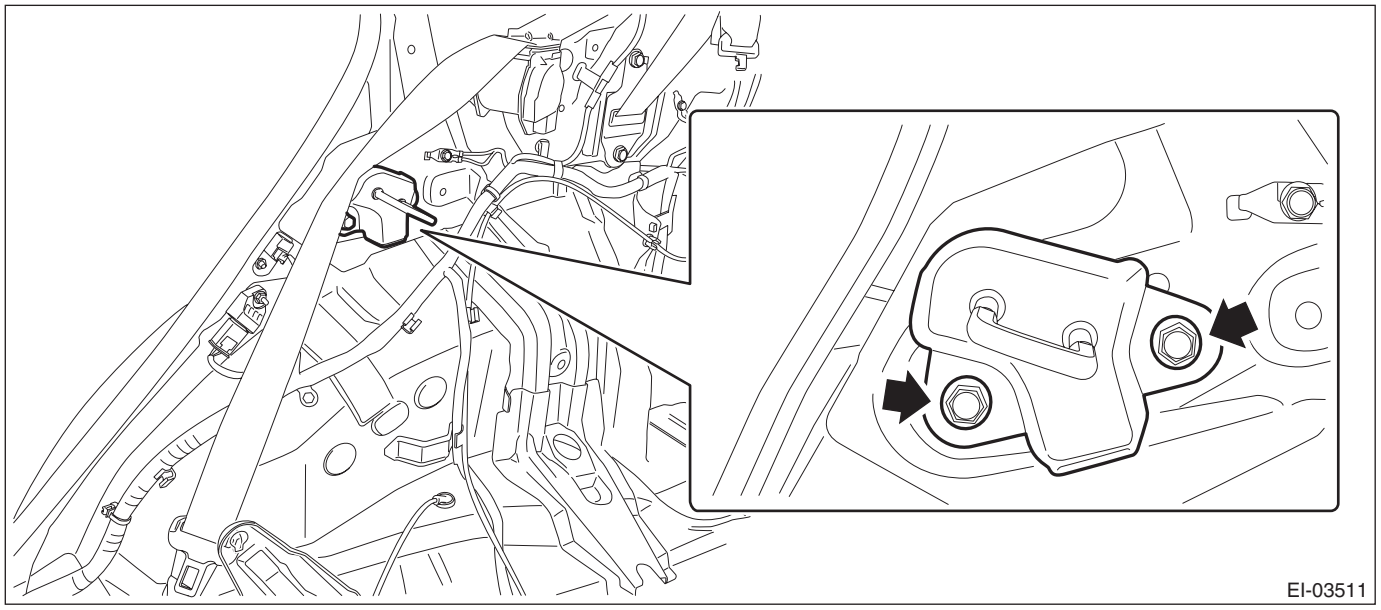
12) Remove the clips, and remove the trim panel - rear skirt.



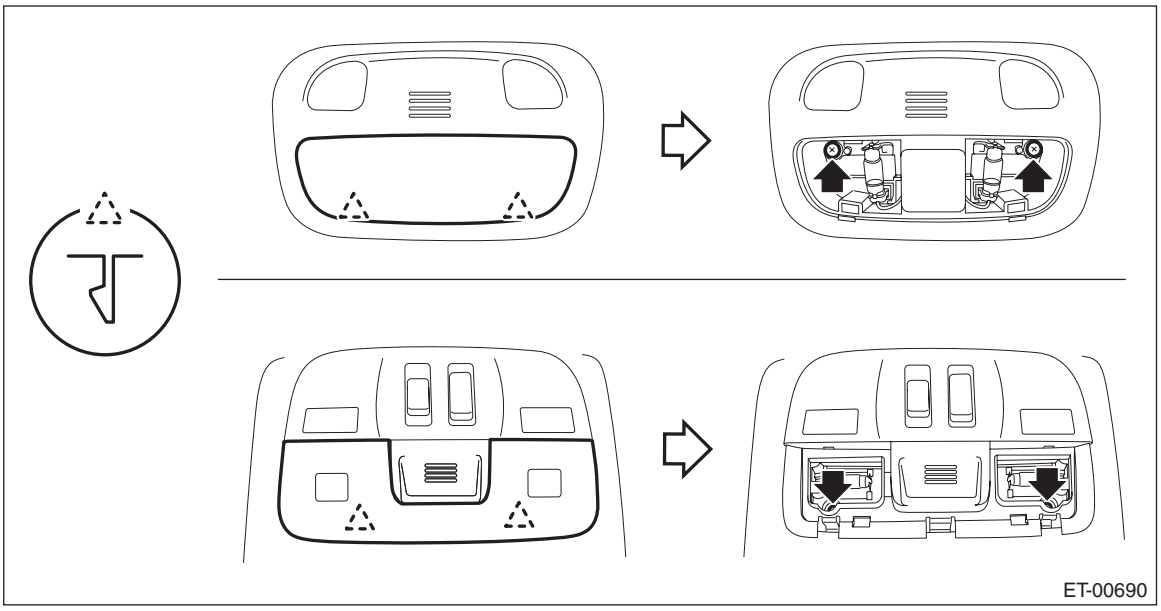
13) Remove the trim panel - rear apron on the left and right sides.
(1) Remove the caps, and then remove the screws.
(2) Remove the clips, and remove the trim panel - rear apron.



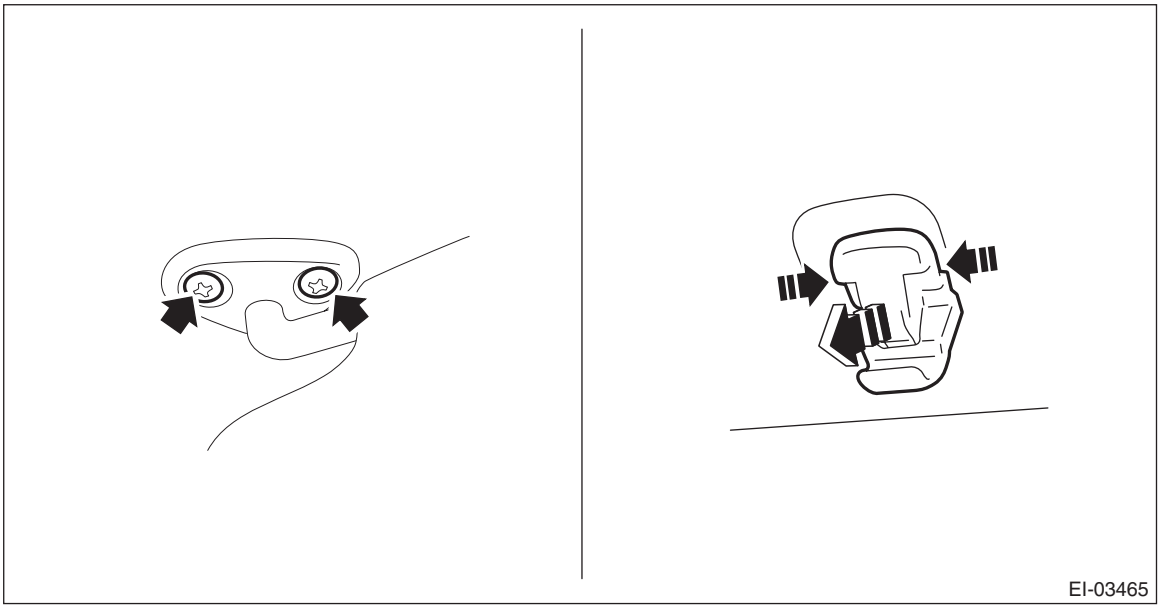
14) Remove the bolts, and remove the striker - backrest rear on the passenger's side.



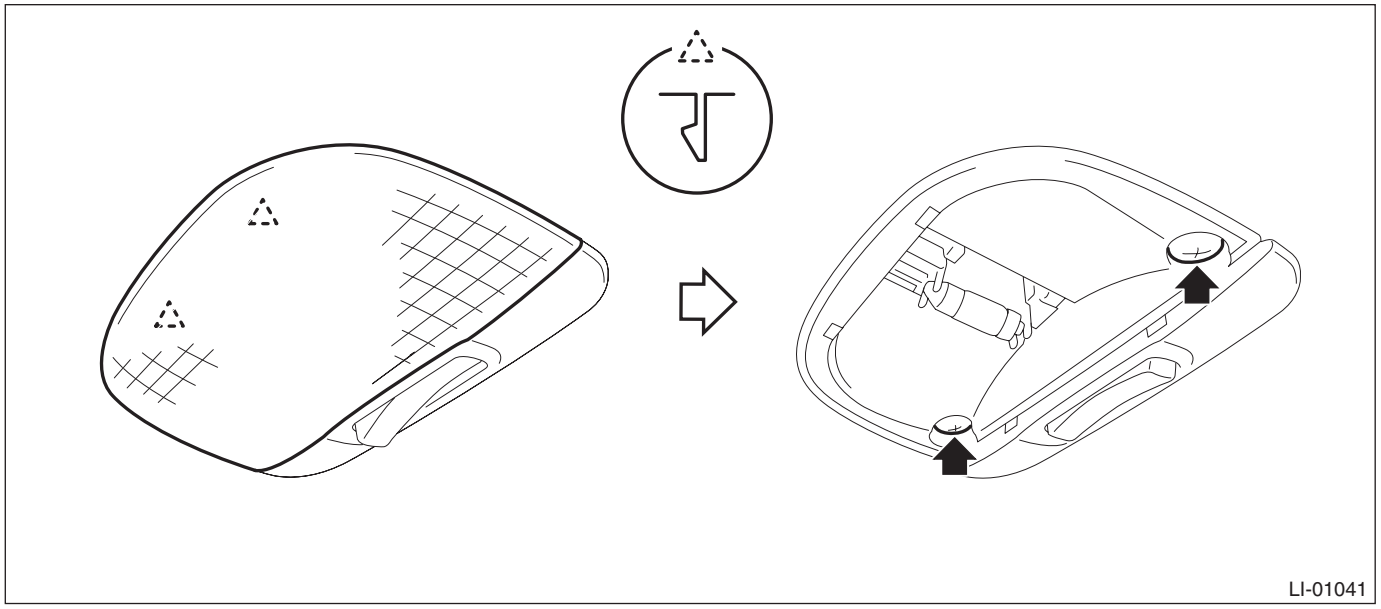
15) Remove the light assembly - map.
(1) Remove the lens and detach the screws.
(2) Disconnect the connector and remove the light assembly - map.



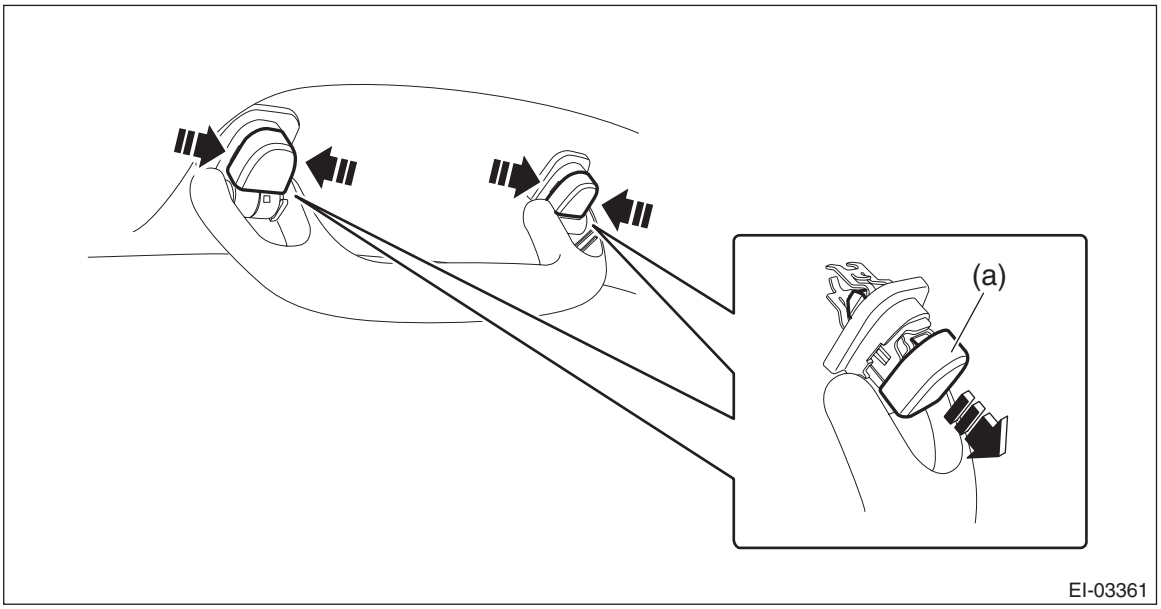
16) Remove the left and right sun visor assembly.
(1) Remove the screws and remove the sun visor assembly.
(2) Press both sides of the hook - sun visor using a flat tip screwdriver.
(3) Remove the hook - sun visor by pulling it toward you.



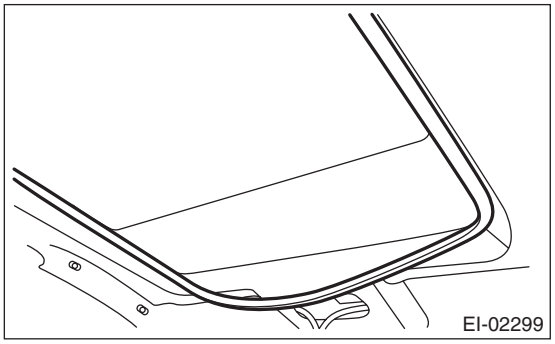
17) Remove the light assembly - room.
(1) Remove the lens and detach the screws.
(2) Disconnect the connector and remove the light assembly - room.



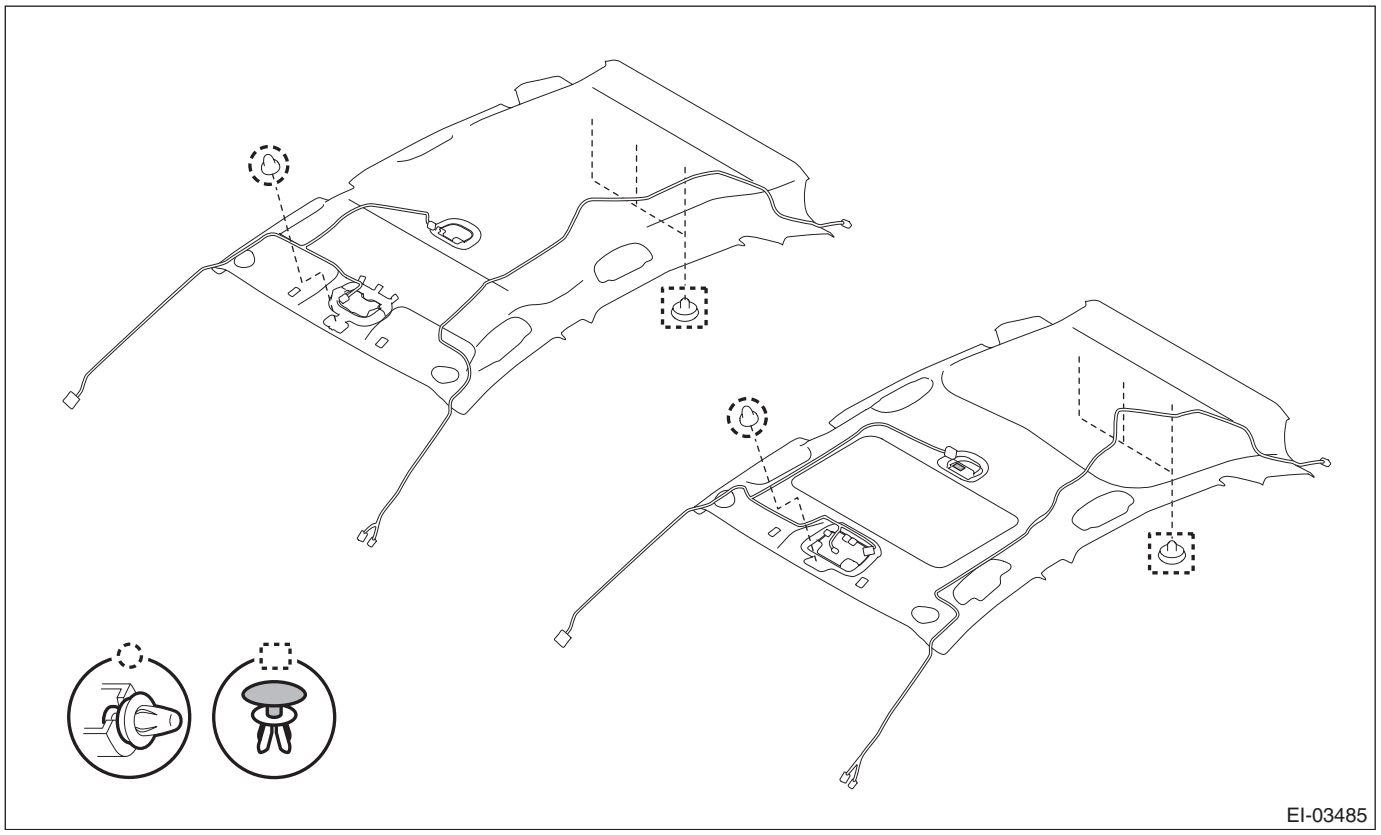
18) Remove all assist rails.
(1) Remove the cap (a) by pulling the both sides of the cap (a) using a flat tip screwdriver wrapped with a protection tape.
(2) Pull the assist grip toward you (to the vehicle center) and remove the metal clip from the bracket.



19) Remove the garnish - roof. (Model with sunroof)

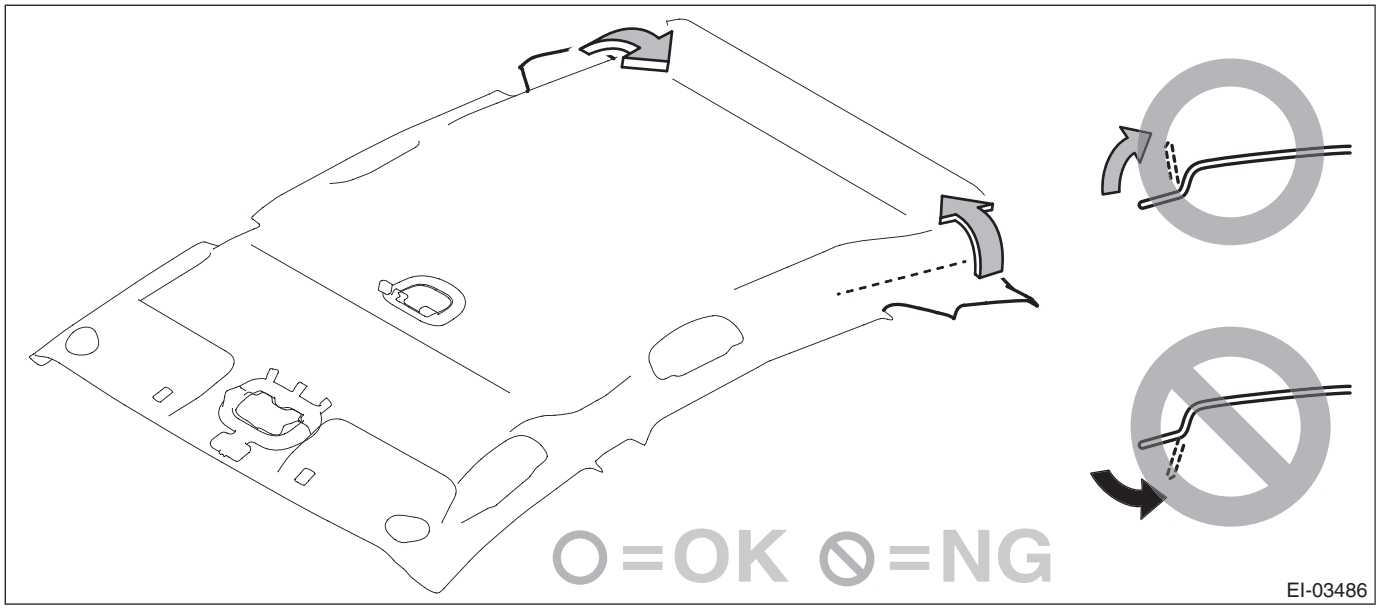


20) Remove the trim panel - roof assembly.
(1) Remove the harness clamp of the cord assembly - antenna feeder and the cord - roof, and disconnect the connectors.
(2) Remove the clips and remove the Velcro tape behind the room light.



(3) Remove the weather strip - body side flange from the front/rear and left/right doors, and remove the trim panel - roof assembly.
(4) Slightly bend the rear end of the trim panel - roof assembly along the character line, and take it out from the rear gate opening.

**CAUTION:**
**Be careful of the bending direction. If the direction is wrong, the trim panel - roof assembly may be wrinkled.**



## B: INSTALLATION

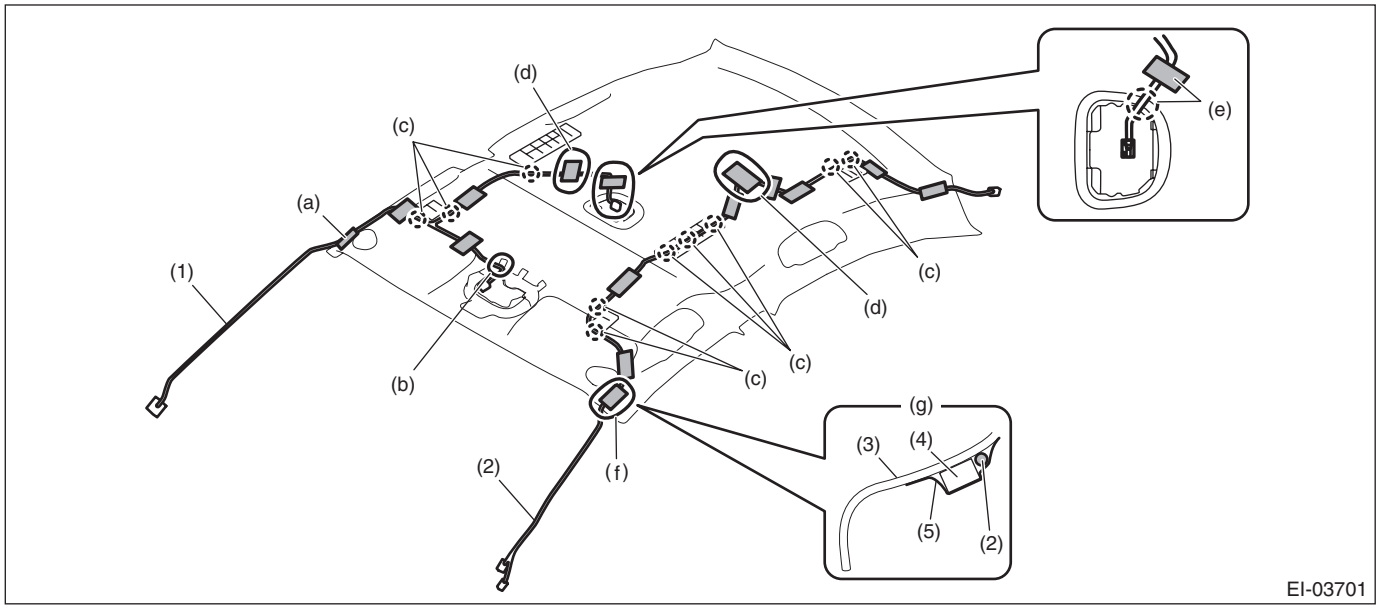
1) Attach the feeder cord and roof cord to the roof trim.

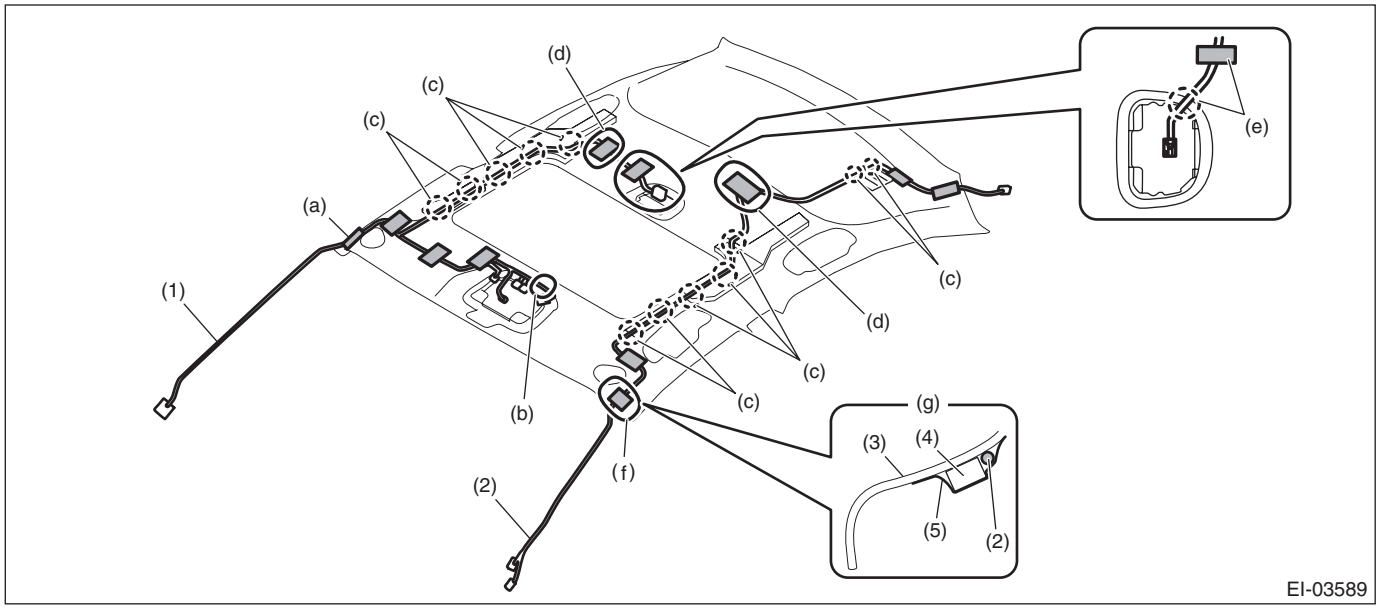
**CAUTION:**
**Route each cord carefully. The cord may interfere, thus preventing normal deployment of the curtain airbag when necessary.**

***Tape:***
***Item number: 86359SC000/TAPE***

NOTE:
Use the tape (service parts) by cutting into 80 mm × 50 mm (3.2 in × 2.0 in).

- 4 door model

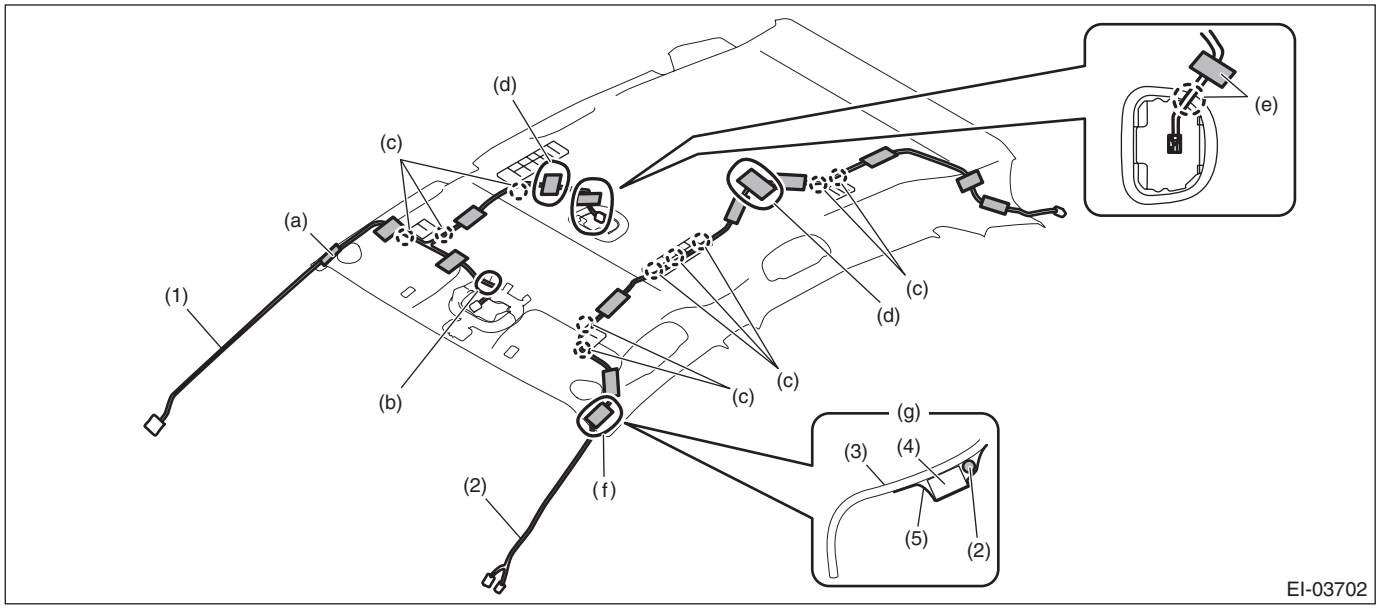




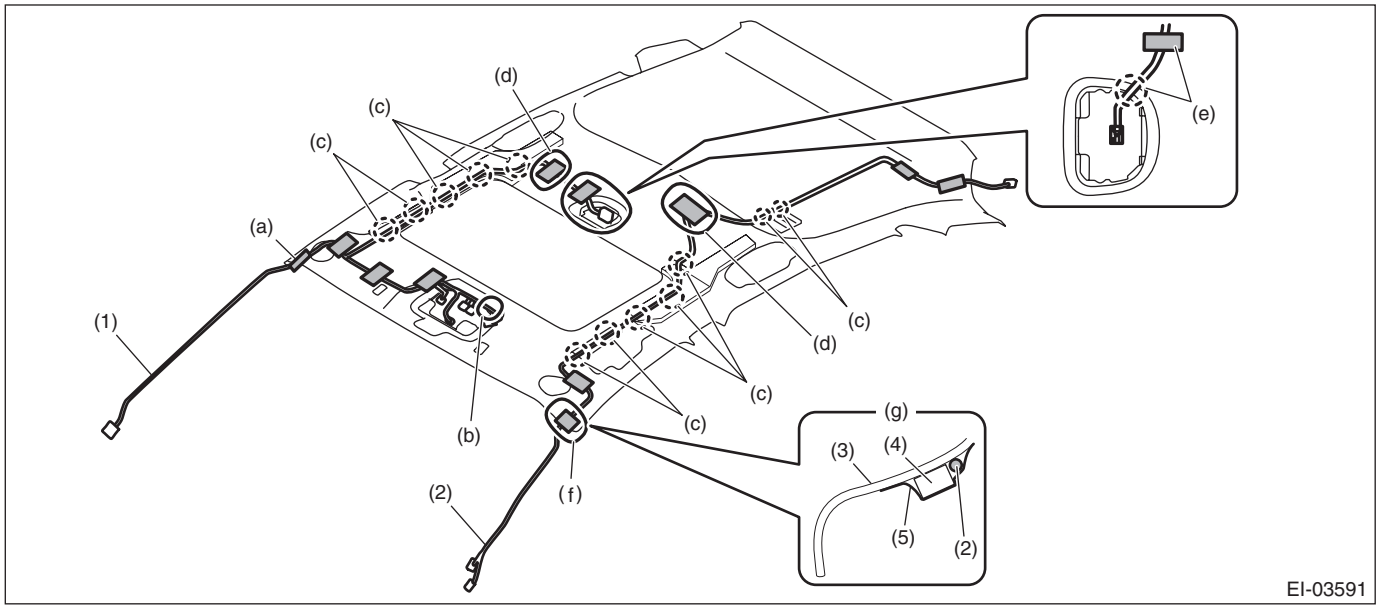
(1) Roof cord
(2) Feeder cord
(3) Trim panel - roof
(4) Cushion
(5) Tape

(a) Align the center of the marking (white tape) on the cord with the trim end, then secure using the tape.
(b) Align the marking (white tape) of the cord with the clamp to secure.
(c) Secure the cord to the roof pad clamp.
(d) Adjust the excess cord at (d) position and secure using the tape.
(e) Secure the marking (white tape) of the cord using the tape so that the marking cannot be viewed from the passenger room.
(f) Align the center of the marking (red tape) on the cord with the roof trim end, then secure using the tape.
(g) Route the cord along inside of the cushion (to the vehicle center) and secure using the tape.

- 5 door model/XV model



EI-03702



EI-03591

(1) Roof cord
(2) Feeder cord
(3) Trim panel - roof
(4) Cushion
(5) Tape

(a) Align the center of the marking (white tape) on the cord with the trim end, then secure using the tape.
(b) Align the marking (white tape) of the cord with the clamp to secure.
(c) Secure the cord to the roof pad clamp.
(d) Adjust the excess cord at (d) position and secure using the tape.
(e) Secure the marking (white tape) of the cord using the tape so that the marking cannot be viewed from the passenger room.
(f) Align the center of the marking (red tape) on the cord with the roof trim end, then secure using the tape.
(g) Route the cord along inside of the cushion (to the vehicle center) and secure using the tape.

2) Install each part in the reverse order of removal.

**CAUTION:**
**• When reusing the tether clip on the upper part of the trim panel - front pillar UPR, check that there is no damage to the tether clip. If the clip is damaged, its holding force is reduced and the trim panel - front pillar UPR may come off. Be sure to replace it with a new clip.**
**• Do not reuse the tether clip removed from the upper part of the trim panel - front pillar UPR. Always replace with a new part.**
**• Do not reuse the upper clips of the trim panel - center pillar UPR. Once the clip is removed, its holding force is reduced. Be sure to replace it with a new clip.**
**• Before installing the trim panel - front pillar UPR, check the condition of protective non-woven fabric (white) of the curtain airbag. If it is damaged (airbag module cloth is exposed), replace the curtain airbag module assembly with a new part.**
**• Check the installation status of the tether clips and install the trim panel - front pillar UPR.**

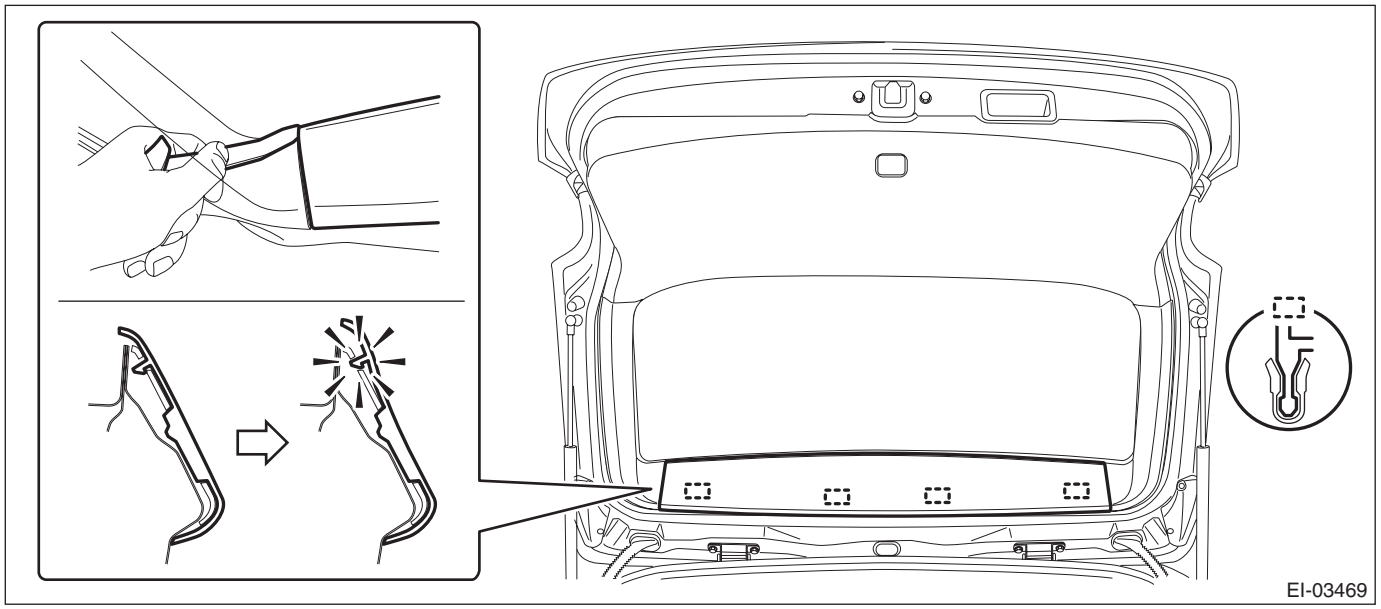
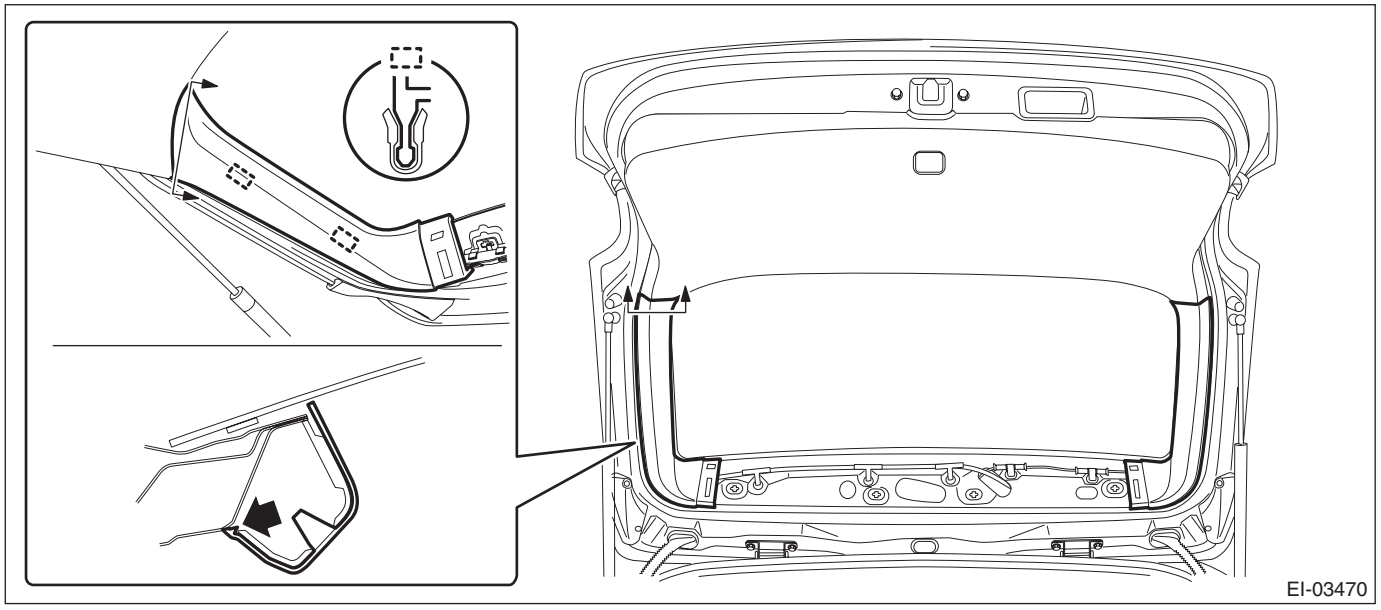
# 27.Rear Gate Trim

## A: REMOVAL

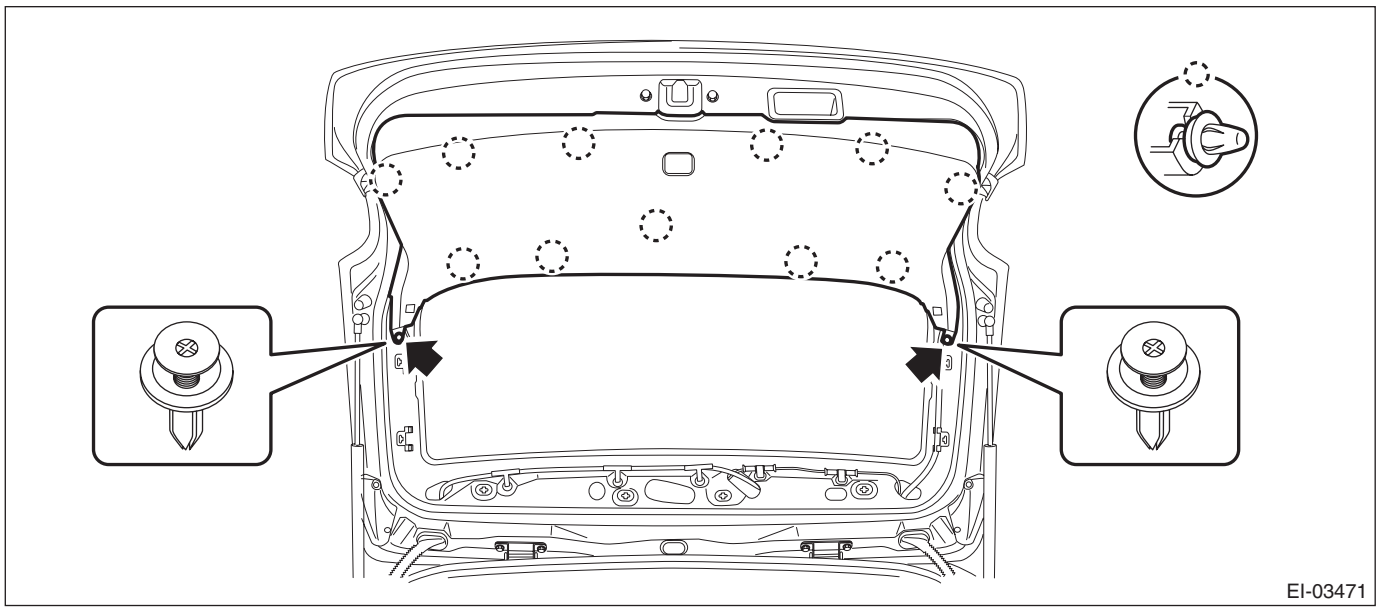
1) Remove the trim panel - rear gate UPR.
   (1) Remove the claws on the trim edge.
   (2) Release the claws in the center of trim, and remove the trim panel - rear gate UPR.



2) Remove the trim panel - rear gate pillar side.
   (1) Release the claws.
   (2) Remove the claws on the bottom of trim, and remove the trim panel - rear gate pillar side.



3) Remove the trim panel - rear gate LWR.
   (1) Remove the clips on both ends.
   (2) Release the clips, and remove the trim panel - rear gate LWR.



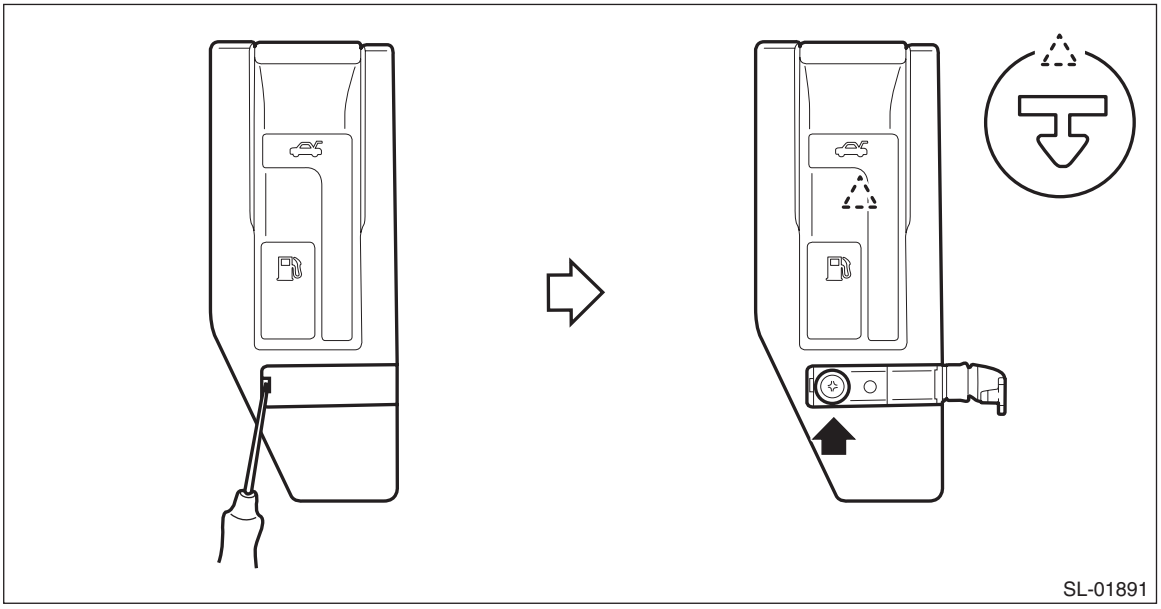
## B: INSTALLATION

Install each part in the reverse order of removal.

# 28.Floor Mat

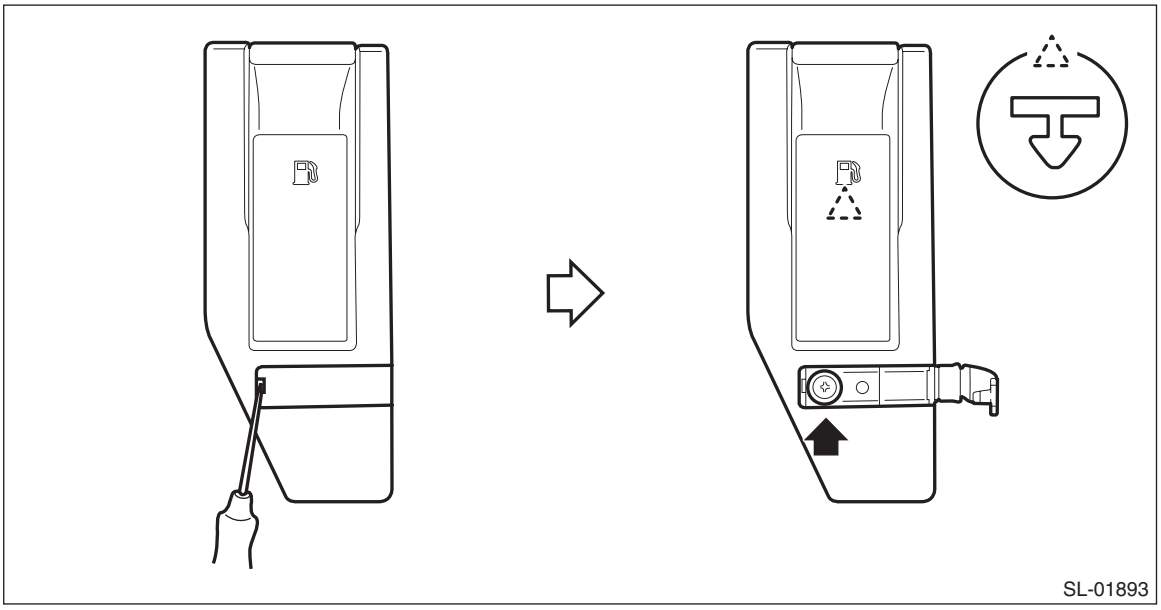
## A: REMOVAL

1) Remove the front seat assembly. <Ref. to SE-7, REMOVAL, Front Seat.>
2) Remove the rear seat cushion assembly. <Ref. to SE-22, REMOVAL, Rear Seat.>
3) Remove the console box assembly and panel center LWR. <Ref. to EI-71, REMOVAL, Console Box.>
4) Remove the lower inner trim. <Ref. to EI-95, REMOVAL, Lower Inner Trim.>
5) Remove the pull handle cover.
   (1) Open the cover by using a flat tip screwdriver.
   (2) Remove the screw and remove the pull handle cover.
   - 4 door model



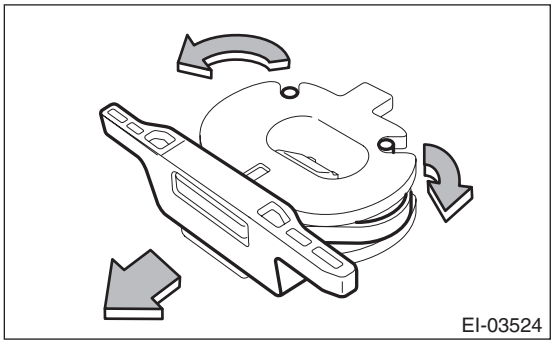
SL-01891

   - 5 door model/XV model

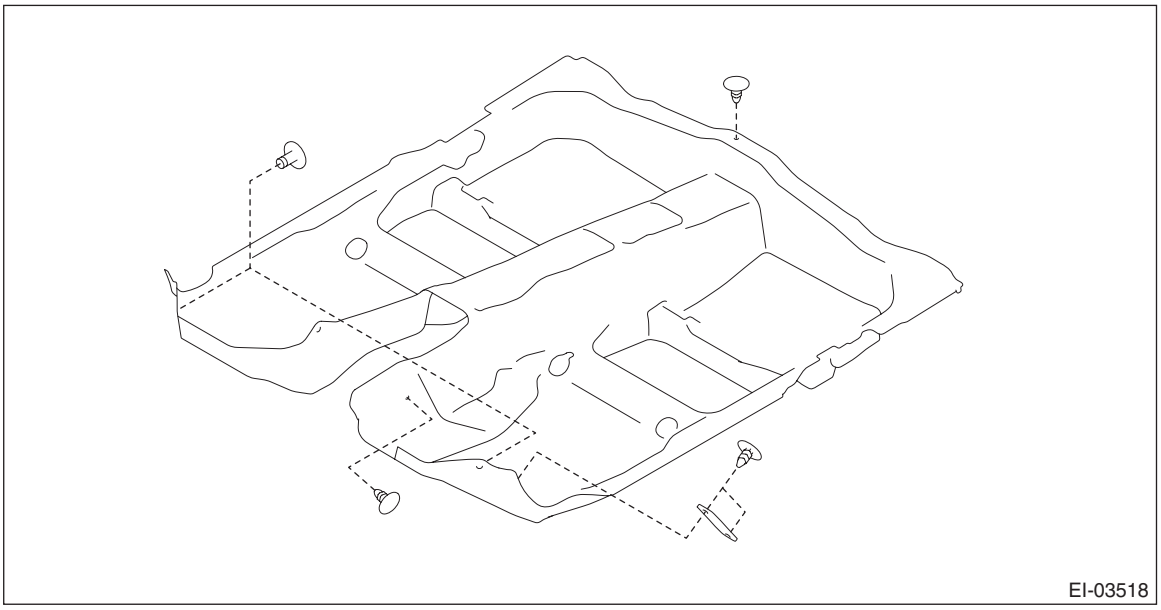


SL-01893

6) Remove the knobs of the hook - seat cushion rear.



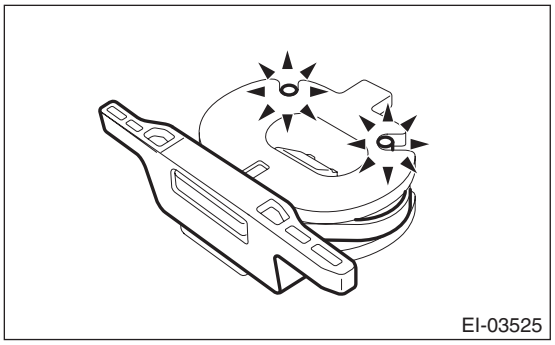
7) Take out the floor mat from the vehicle.
   (1) Remove the clips from the floor mat.
   (2) Remove the mat hook on both sides.
   (3) Take out the floor mat after folding down.



## B: INSTALLATION

Install each part in the reverse order of removal.

**CAUTION:**
**Make sure that the knobs of the hook - seat cushion rear are securely installed.**

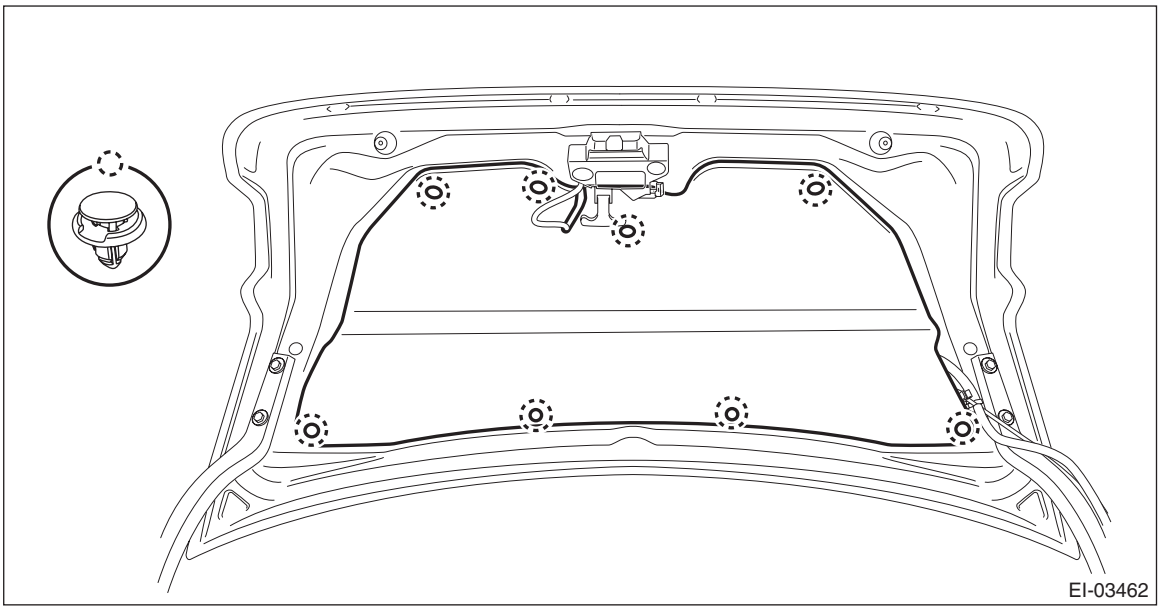


NOTE:
Secure the mat firmly with clips.

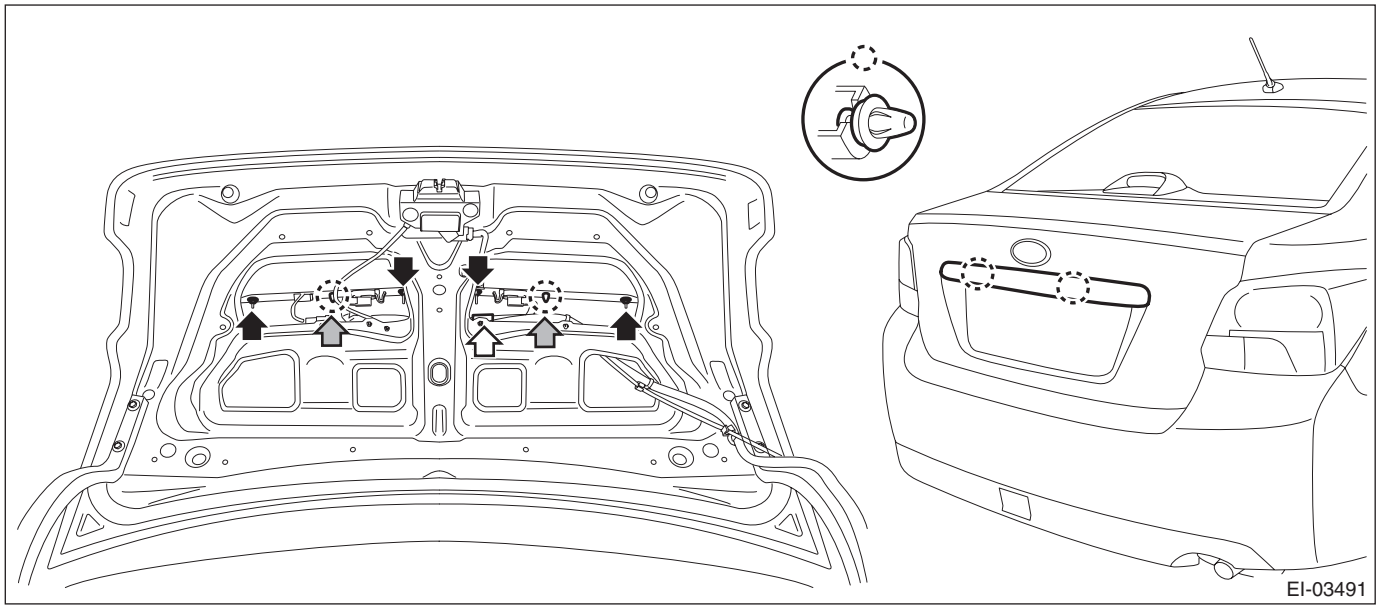
# 29.Trunk Lid Garnish

## A: REMOVAL

1) Remove the clips, and remove the trim panel - trunk lid.



2) Remove the garnish - trunk.
   (1) Remove the nut.
   (2) Remove the clips, and remove the garnish - trunk.



## B: INSTALLATION

Install each part in the reverse order of removal.

***Tightening torque:***

(8) Stopper - rear gate
(9) Buffer - body side
(10) Stay ASSY - rear gate
(11) Drip - rear gate

***Tightening torque: N·m (kgf-m, ft-lb)***
***T1: 7.5 (0.76, 5.5)***
***T2: 10 (1.02, 7.4)***
***T3: 20 (2.04, 14.8)***
***T4: 25 (2.55, 18.4)***

## C: CAUTION

Exterior body panels are heavy. When removing and installing them, do not drop and damage the panels. Also, be careful not to scratch the coated surfaces of the panels.

## D: PREPARATION TOOL

### 1. SPECIAL TOOL

| ILLUSTRATION | TOOL NUMBER | DESCRIPTION | REMARKS |
|---|---|---|---|
|  ST-925610000 | 925610000 | WRENCH | Used for removing and installing door hinge. |
|  ST-927780000 | 927780000 | REMOVER | Used for removing and installing the trunk torsion bar. |

### 2. GENERAL TOOL

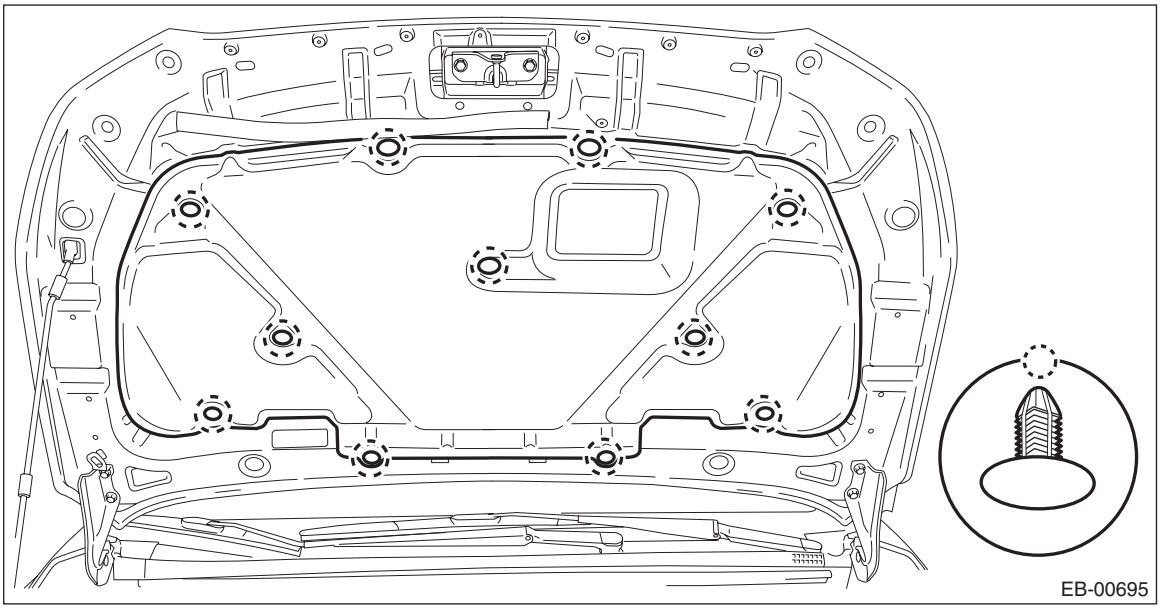
| TOOL NAME | REMARKS |
|---|---|
| Support jack | Used for supporting door panel. |
| Clip remover | Used for removing various types of clips |

# 2. Front Hood

## A: REMOVAL

### 1. FRONT HOOD INSULATOR

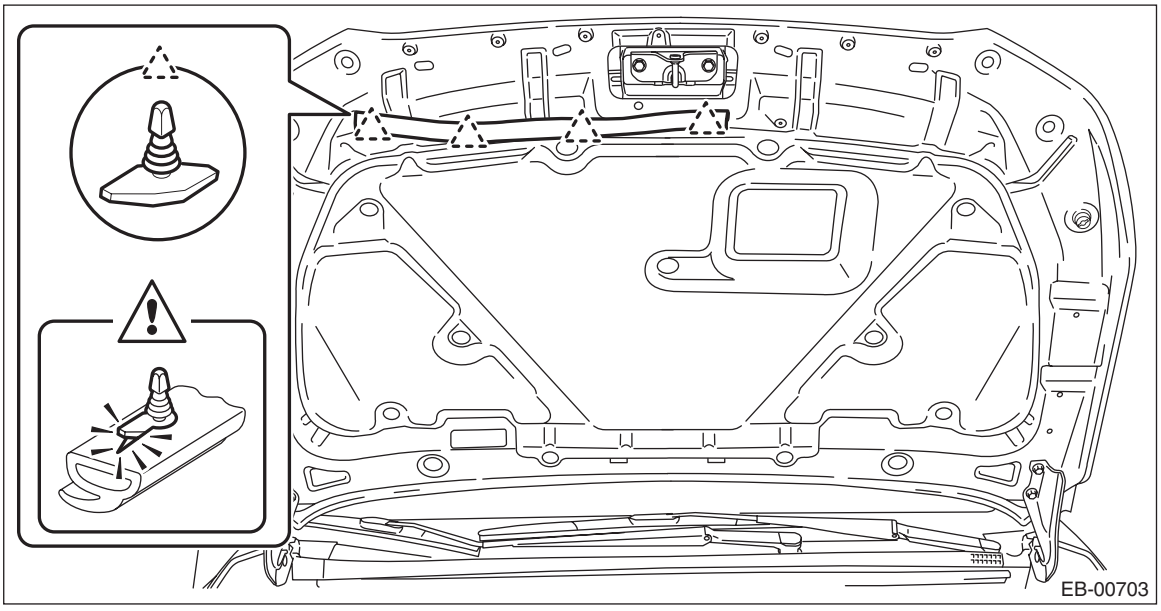
Remove the clips, and remove the insulator - front hood.



### 2. FRONT DUCT SEAL

Remove the clip, and remove the seal - front duct.

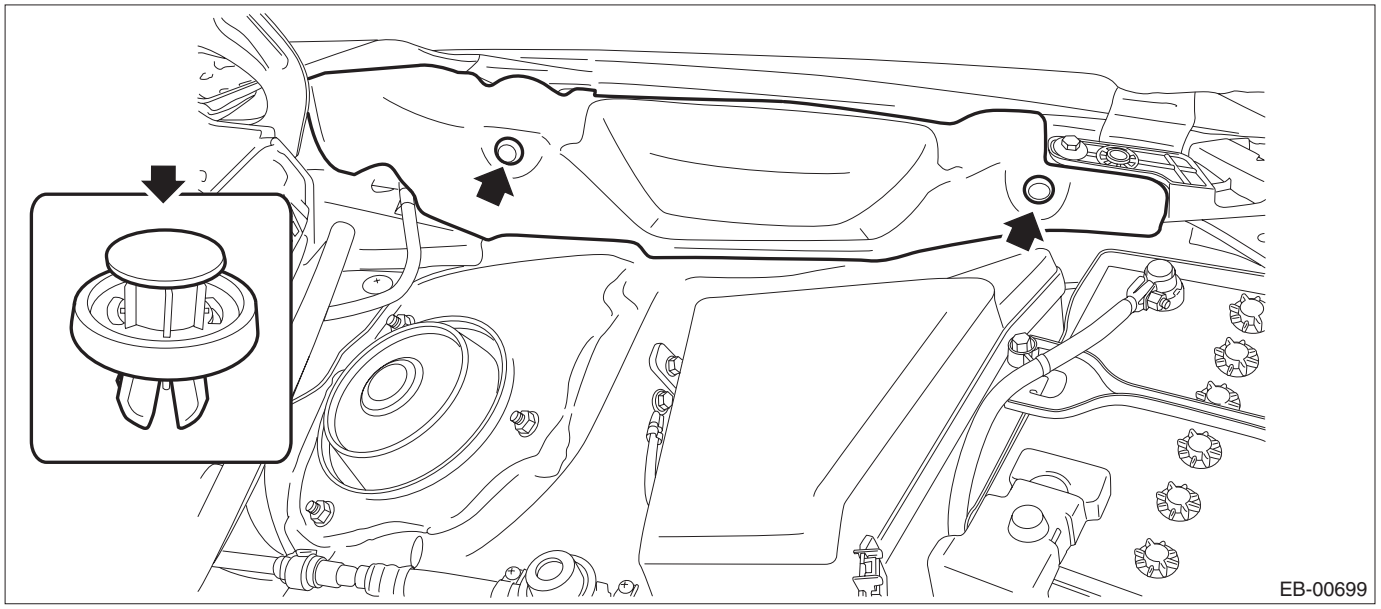
**CAUTION:**
**If the weather strip clip is removed with excessive force, the seal - front duct may be damaged. Be sure to use clip remover, etc. to remove.**



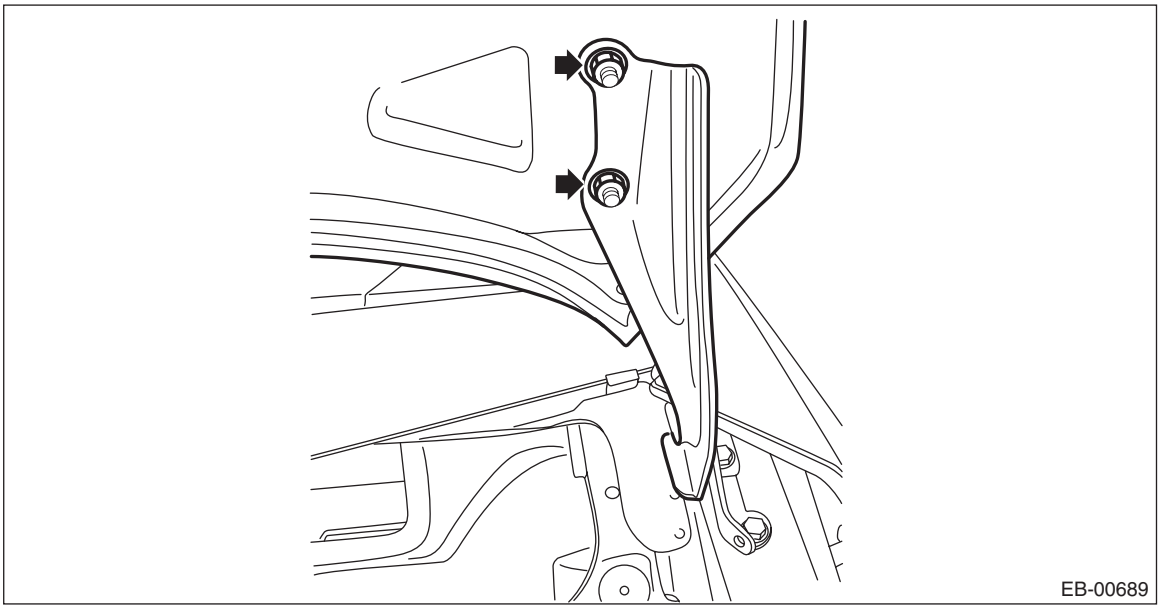
## 3. FRONT HOOD HINGE

**CAUTION:**
**The hood COMPL - front is heavy. When removing or installing the hinge COMPL - front hood, be sure to work in a group of two or more.**

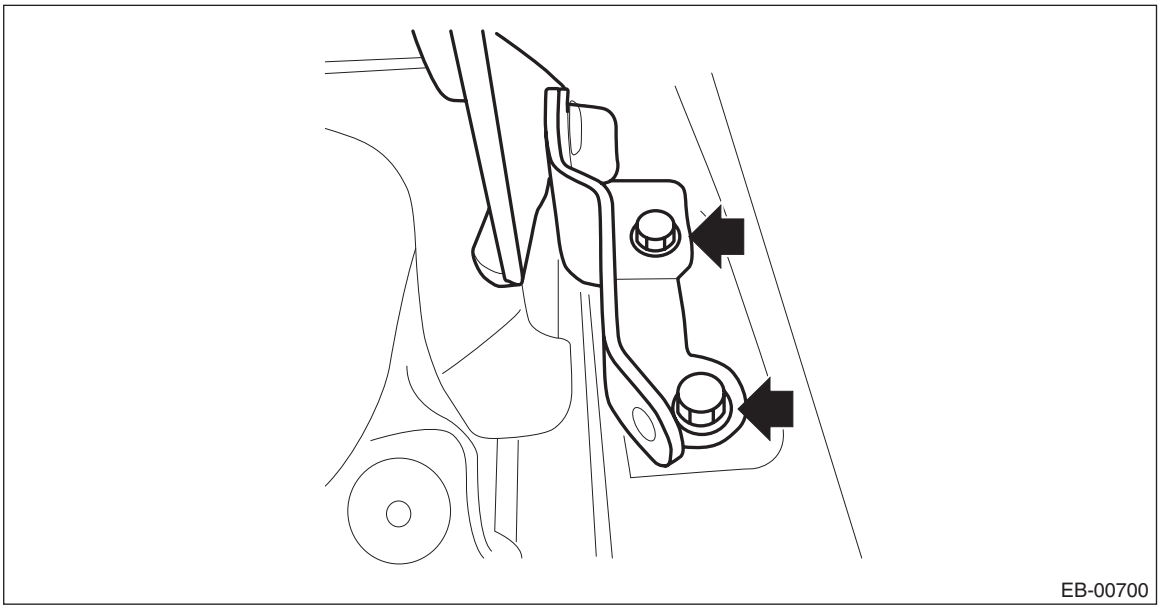
1) Remove the cover - front fender.
   (1) Remove the clip.
   (2) Release the claws by pulling them forward, and remove the cover - front fender.



2) Remove the fender COMPL - front. <Ref. to EB-15, REMOVAL, Front Fender.>
3) Remove the hood COMPL - front.
   (1) Remove the nut on the hood COMPL - front side, and remove the hood COMPL - front.



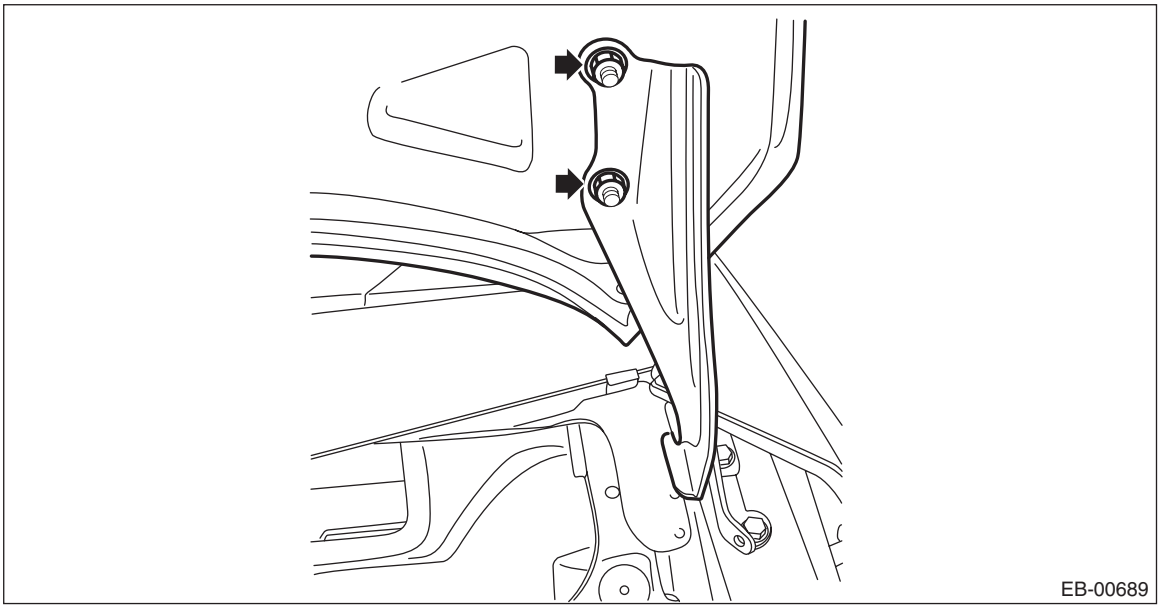
4) Remove the bolts, and remove the hinge COMPL - front hood.



## 4. FRONT HOOD PANEL

**CAUTION:**
**The hood COMPL - front is heavy. When removing or installing the hinge COMPL - front hood, be sure to work in a group of two or more.**

1) Remove the nut on the hood COMPL - front side, and remove the hood COMPL - front.



## B: INSTALLATION

**CAUTION:**
**The hood COMPL - front is heavy. When removing or installing the hinge COMPL - front hood, be sure to work in a group of two or more.**

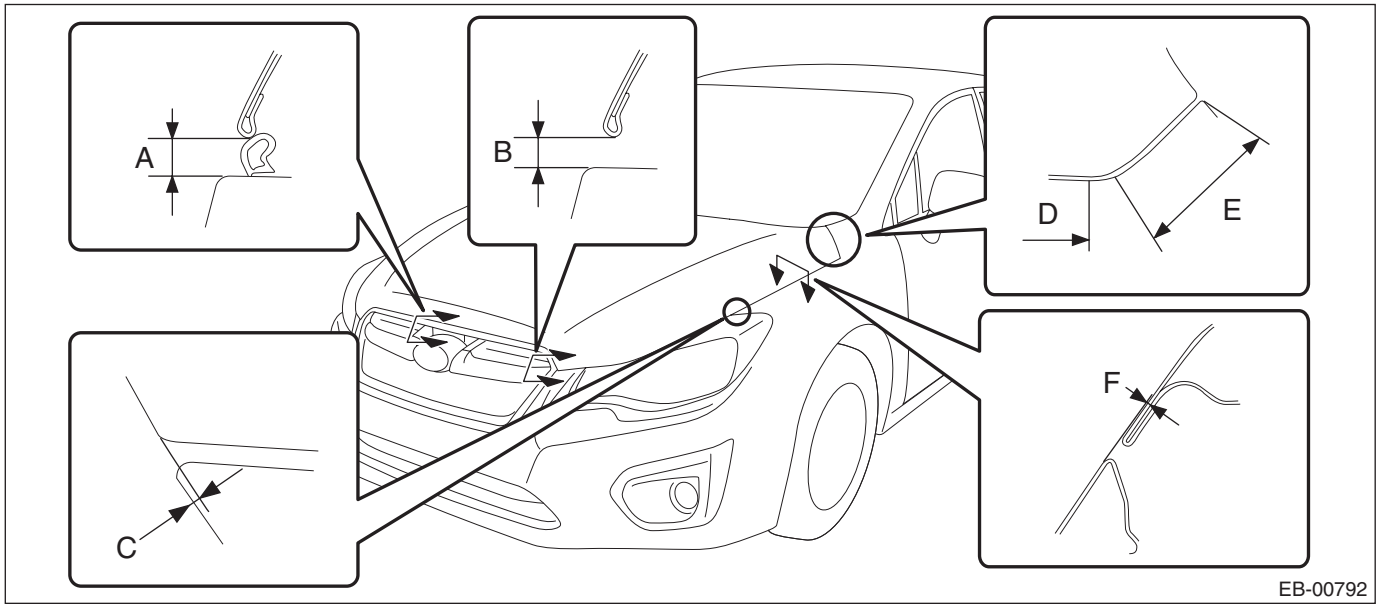
To install the insulator - front hood and the seal - front duct, follow the removal procedure in the reverse order.
Follow the procedure below to install the hinge COMPL - front hood and the hood COMPL - front.
1) Install the hinge COMPL - front hood to the vehicle body. (When the hinge COMPL - front hood is removed)
2) Temporarily install the hood COMPL - front to the hinge COMPL - front hood.

NOTE:
When installing the hood COMPL - front, make sure that a uniform clearance is created around it.
3) Adjust the clearance around the hood COMPL - front. <Ref. to EB-12, ADJUSTMENT, Front Hood.>
4) Tighten the bolts and nuts of the hinge COMPL - front hood.

***Tightening torque:***
***25 N·m (2.55 kgf-m, 18.4 ft-lb)***
5) Install each part of the hood COMPL - front in the reverse order of removal.

## C: ADJUSTMENT

Adjust the clearance around the hood COMPL - front as follows.



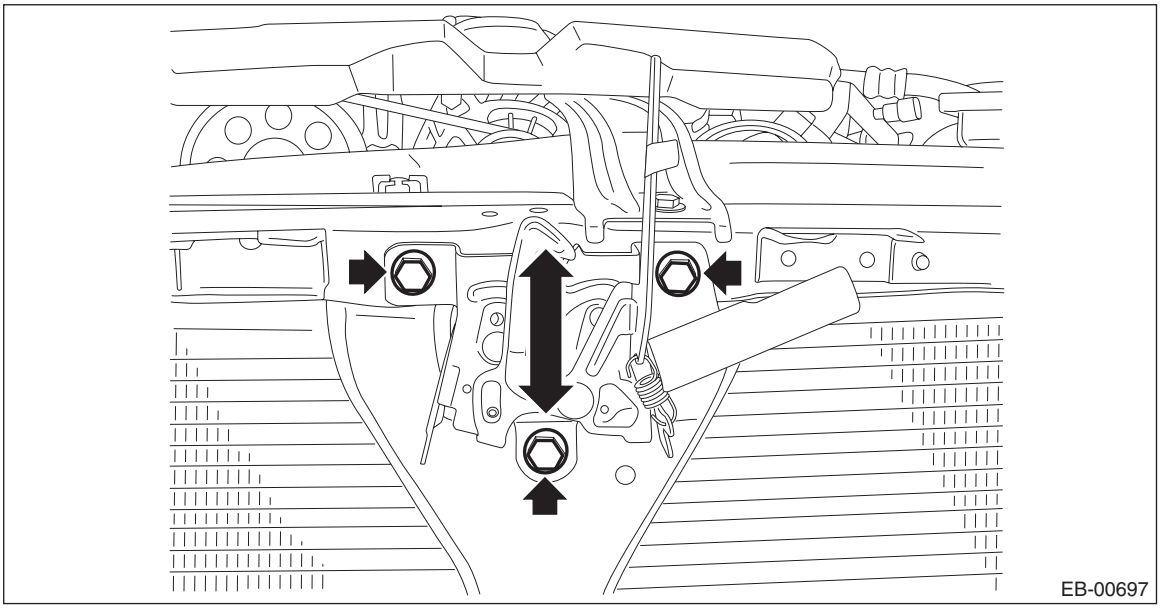
| Part | | Standard |
|---|---|---|
| A | Hood COMPL - front to Bumper face - front | 7.5±1.0 mm (0.30±0.04 in) |
| B | Hood COMPL - front to Bumper face - front | 6.0±1.0 mm (0.24±0.04 in) |
| C | Offset value: Hood COMPL - front to Front end of fender COMPL - front | 0+0.5, –1.0 mm (0+0.02, –0.04 in) |
| D | Hood COMPL - front to Fender COMPL - front (from front end to just before curved portion) | 3.5±1.0 mm (0.14±0.04 in) |
| E | Hood COMPL - front to Fender COMPL - front (from rear end to just before curved portion) | 4.5±1.0 mm (0.18±0.04 in) |
| F | Surface level gap: Hood COMPL - front to Fender COMPL - front | 0.5+0.5, –1.0 mm (0.02+0.02, –0.04 in) |

1) Adjust the horizontal position of the hood COMPL - front.
   (1) Loosen the attaching nuts of the hinge COMPL - front hood on the left and right sides.

   (2) Adjust the horizontal clearance of the hood COMPL - front, and tighten the attaching nuts of the hinge COMPL - front hood.

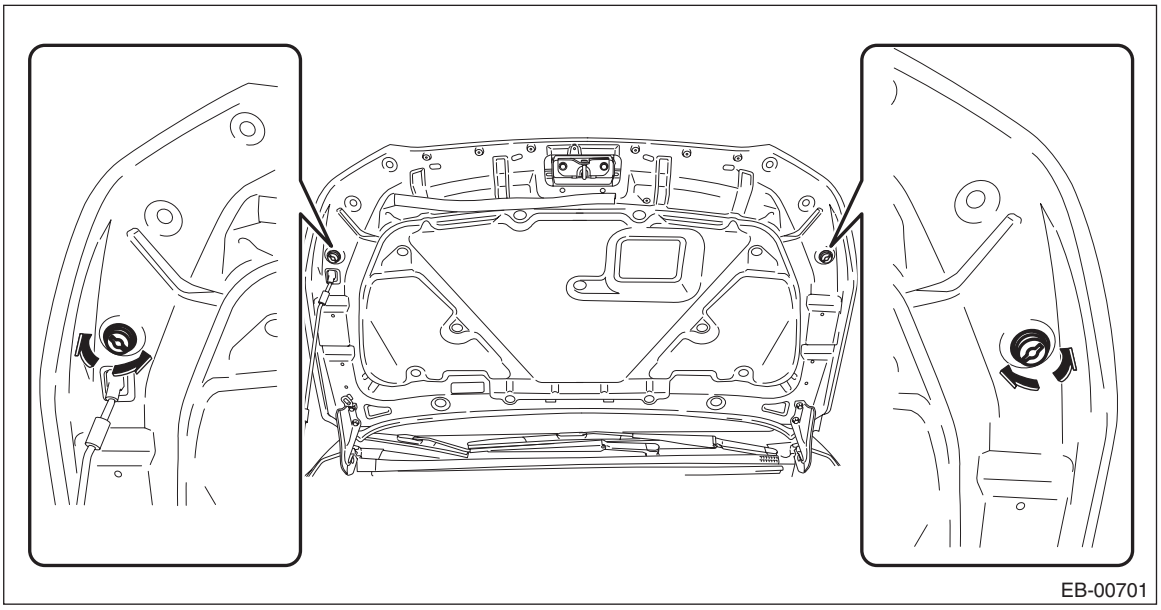
***Tightening torque:***
***25 N·m (2.55 kgf-m, 18.4 ft-lb)***

2) Adjust the front end height of the hood COMPL - front.
   (1) Loosen the bolts on the lock assembly - front hood.
   (2) Adjust the lock assembly - front hood by moving it up and down.



***Tightening torque:***
***33 N·m (3.36 kgf-m, 24.3 ft-lb)***

3) Rotate the buffer - front hood of the hood COMPL - front to adjust the height.



# 3. Front Fender

## A: REMOVAL

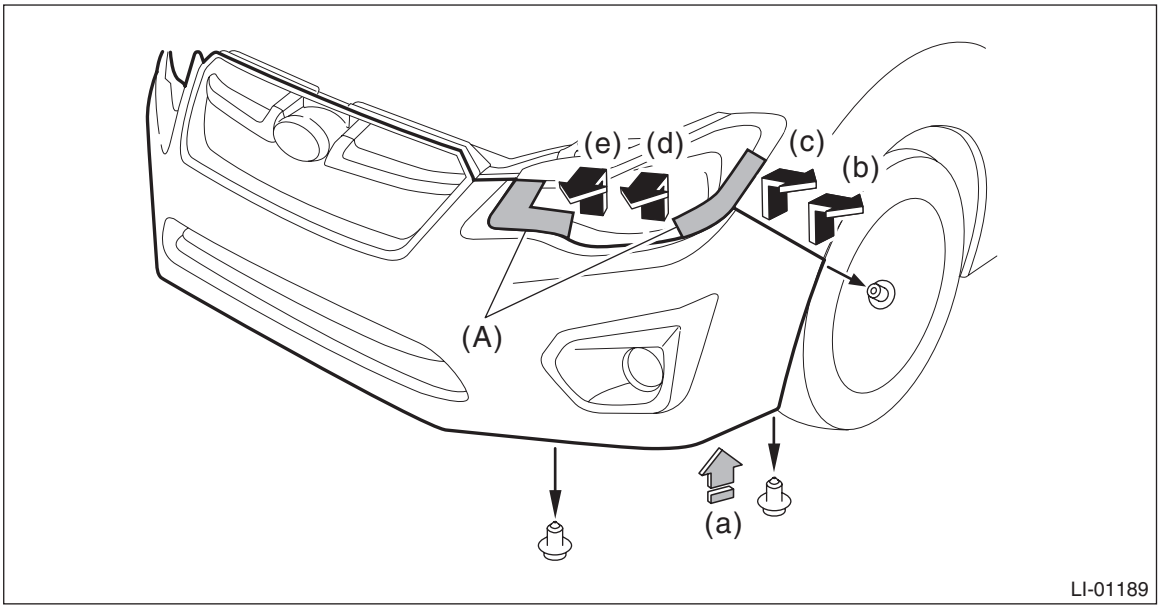
1) Disconnect the ground cable from battery.
2) Remove the bumper face - front.
   (1) Remove the screw and clips, and turn over the mud guard - front.
   (2) Disconnect the connectors of the left and right fog light assembly - front. (Model with fog light)

   (3) Remove the clips at the upper side of the bumper face - front.
   (4) Remove the clips from the fender.
   (5) Remove the clips at the lower side of the bumper face - front.

   (6) Apply protective tape (A) to the light assembly - head.

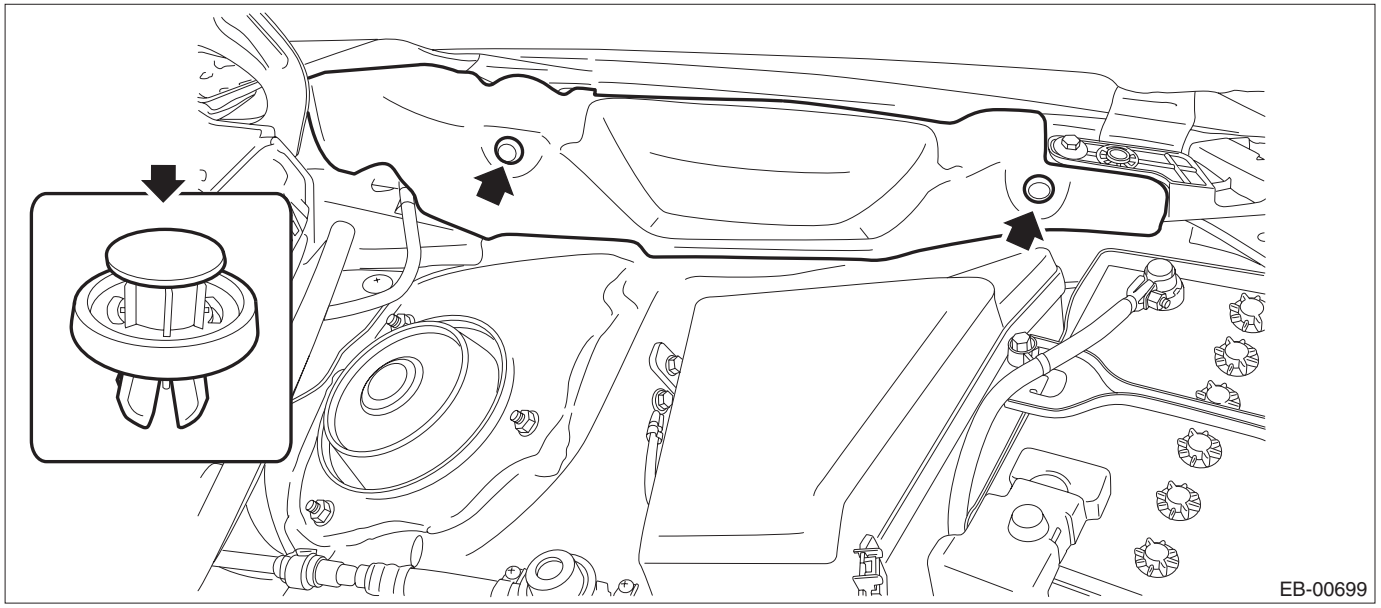
(7) Release the clips, and while pushing up the lower side (a) of the bumper face - front, remove in the order from (b) to (e).

**CAUTION:**
**Do not pull forcibly. It may damage the flange sections of the bumper face - front.**



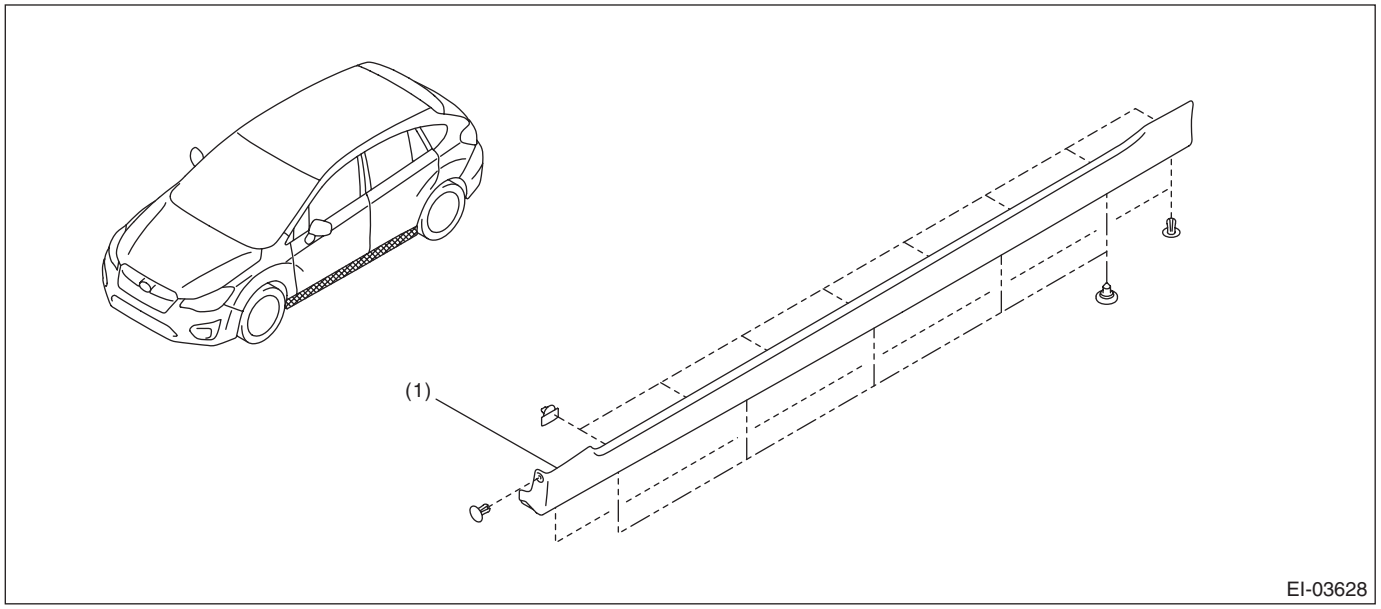
NOTE:
Detach the opposite side in the same manner.

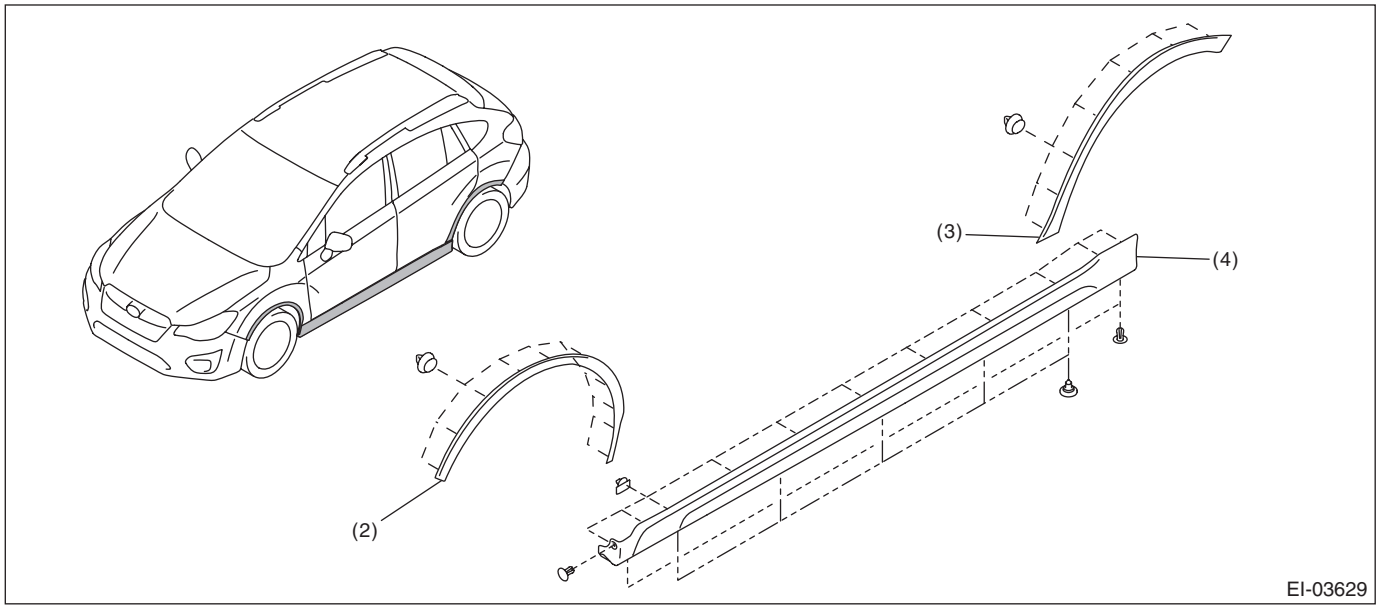
3) Remove the cover - front fender.
(1) Remove the clip.
(2) Release the claws by pulling them forward, and remove the cover - front fender.



(3) Remove the light assembly - head. <Ref. to LI-27, WHEN REMOVING RH SIDE, REMOVAL, Headlight Assembly.>

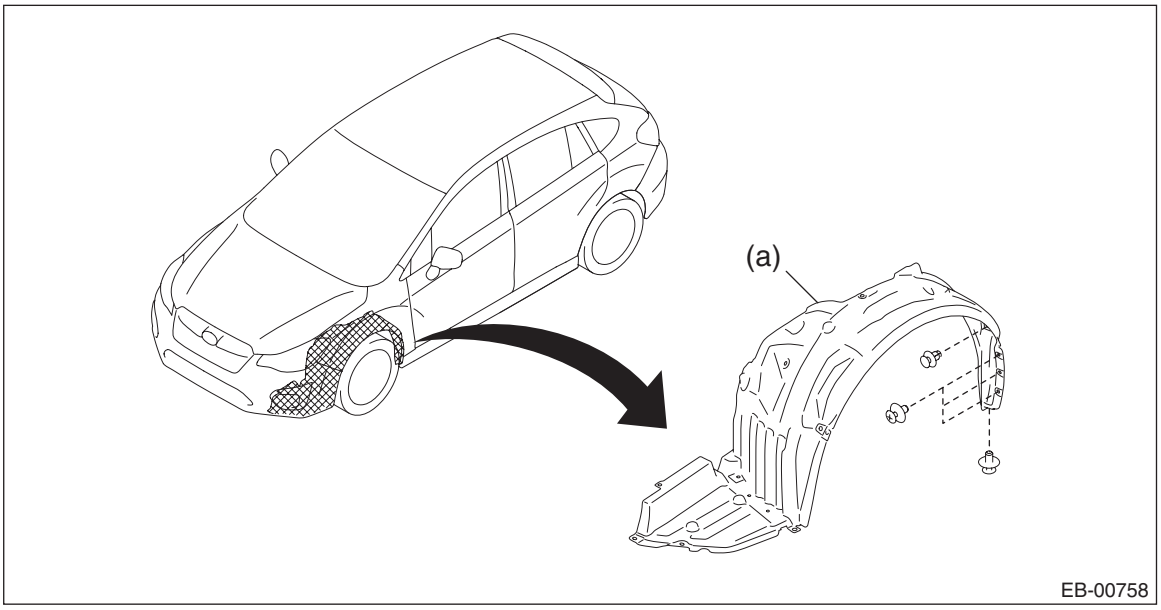
4) Remove the clips and detach the side sill spoiler assembly.



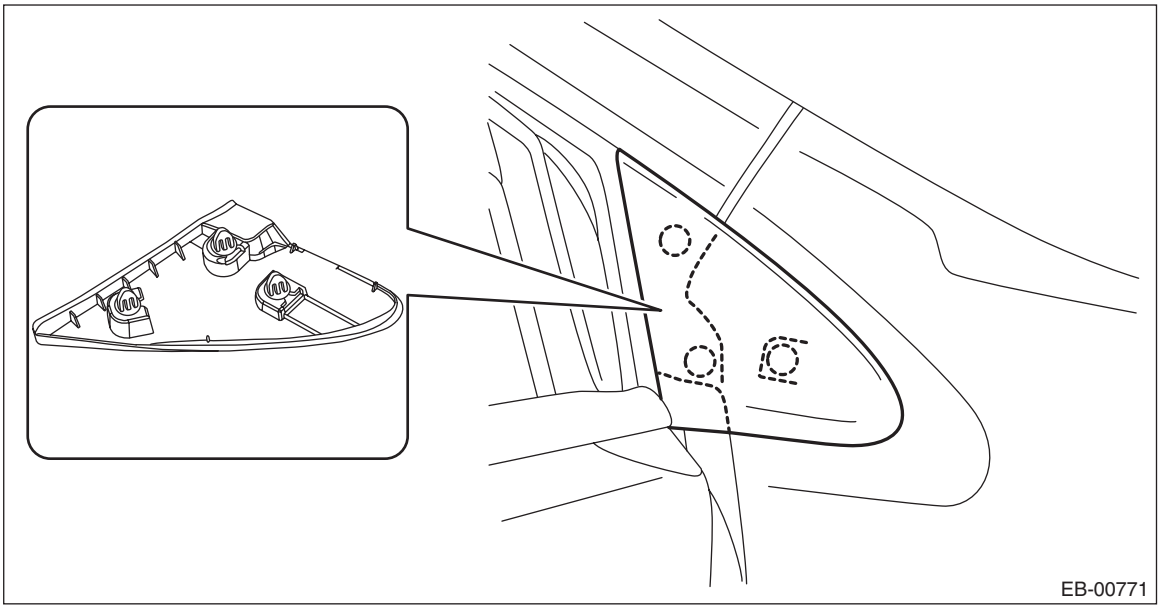


(1) Garnish ASSY - side sill (except for XV model)
(2) Garnish ASSY - fender (XV model)
(3) Garnish ASSY - rear quarter (XV model)
(4) Garnish ASSY - side sill (XV model)

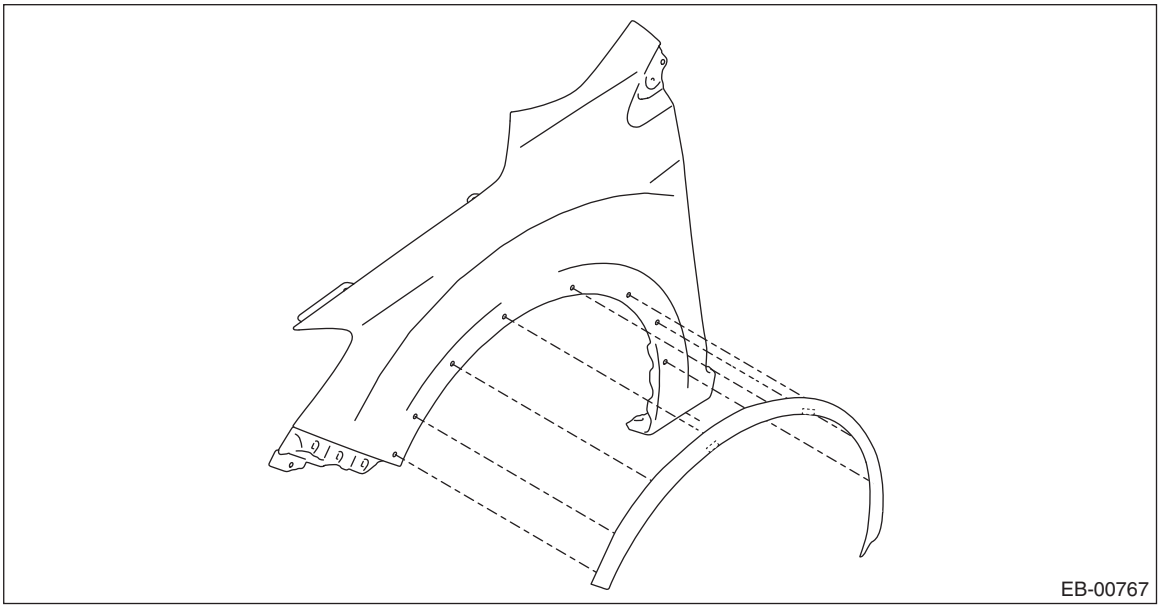
5) Remove the clips, and turn over the mud guard - front (a).



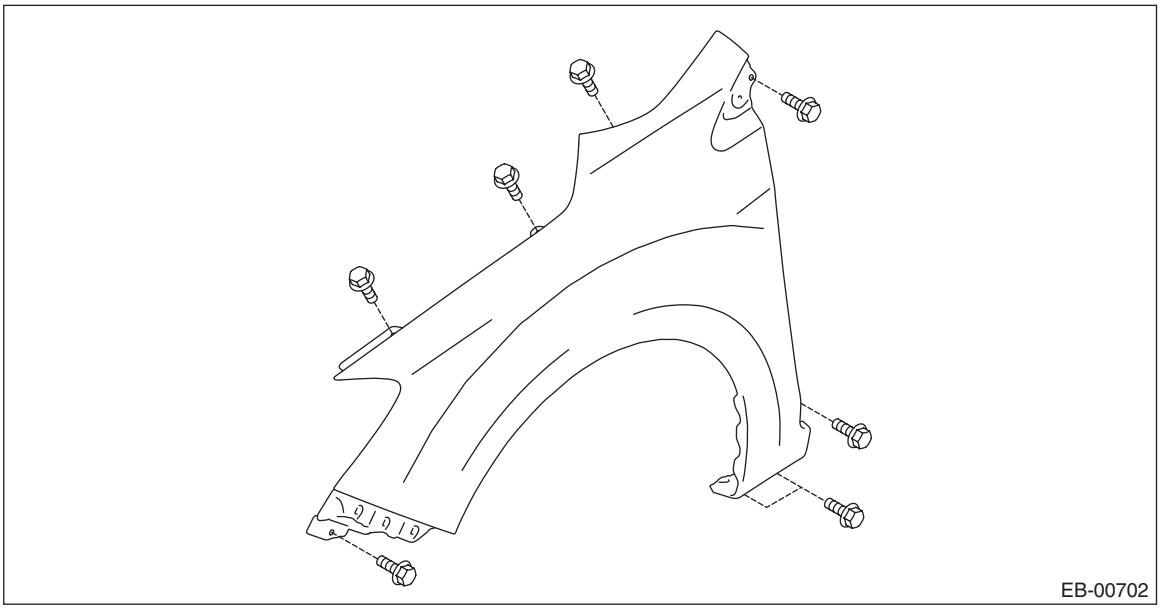
6) Remove the cover - front pillar assembly.



7) Remove the fender COMPL - front.
(1) Remove the garnish assembly - front fender. (XV model)



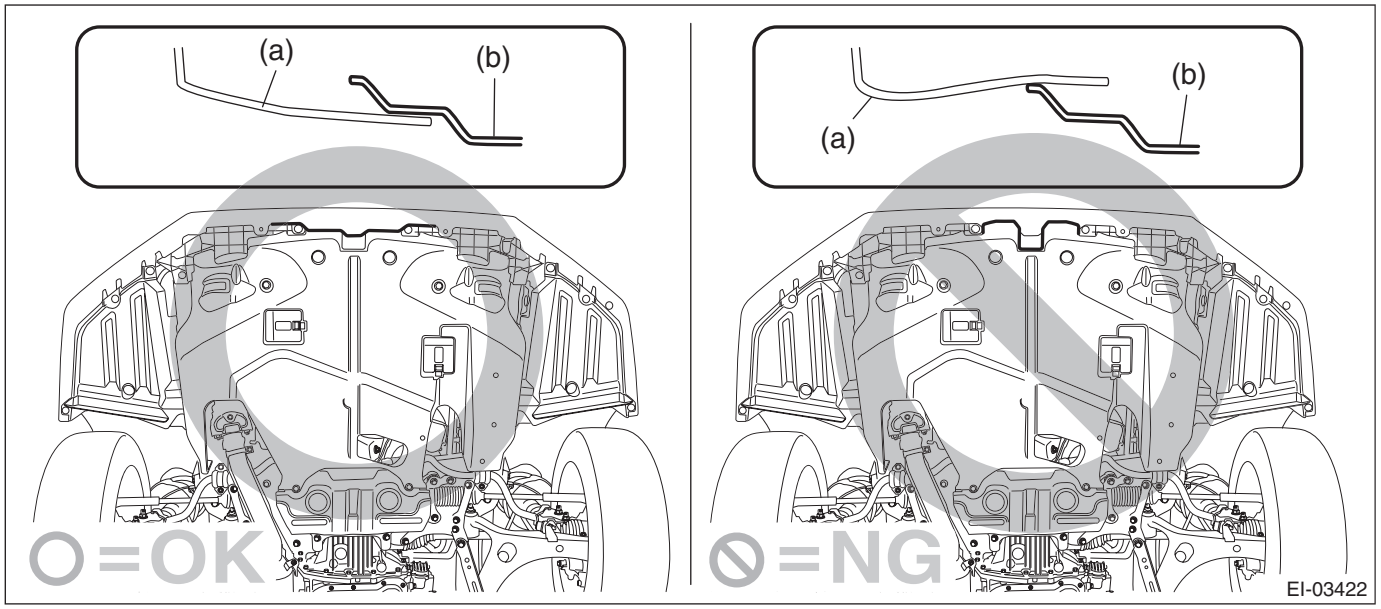
(2) Remove the bolts, and remove the fender COMPL - front.



## B: INSTALLATION

1) Install each part in the reverse order of removal.

**CAUTION:**
- **After installing the fender COMPL - front, be sure to perform headlight beam adjustment.**
- **Install the bumper face - front so that the front end of the under cover (b) comes inside the bumper face - front (a).**



***Tightening torque:***
***Fender COMPL - front: 7.5 N·m (0.76 kgf-m, 5.5 ft-lb)***
***Light assembly - head: 7.5 N·m (0.76 kgf-m, 5.5 ft-lb)***

NOTE:
When installing the fender COMPL - front, make sure that a uniform clearance is created around it.
- Fender COMPL - front to Hood COMPL - front: <Ref. to EB-12, ADJUSTMENT, Front Hood.>
- Fender COMPL - front to Panel assembly - front door: <Ref. to EB-28, ADJUSTMENT, Front Door.>

2) Adjust the headlight beam and fog light beam.
- Adjust the headlight beam. <Ref. to LI-34, HEADLIGHT BEAM ADJUSTMENT, ADJUSTMENT, Headlight Assembly.>
- Adjust the fog light beam. (Model with fog light) <Ref. to LI-54, FOG LIGHT AIMING, ADJUSTMENT, Front Fog Light Assembly.>

# 4. Front Door

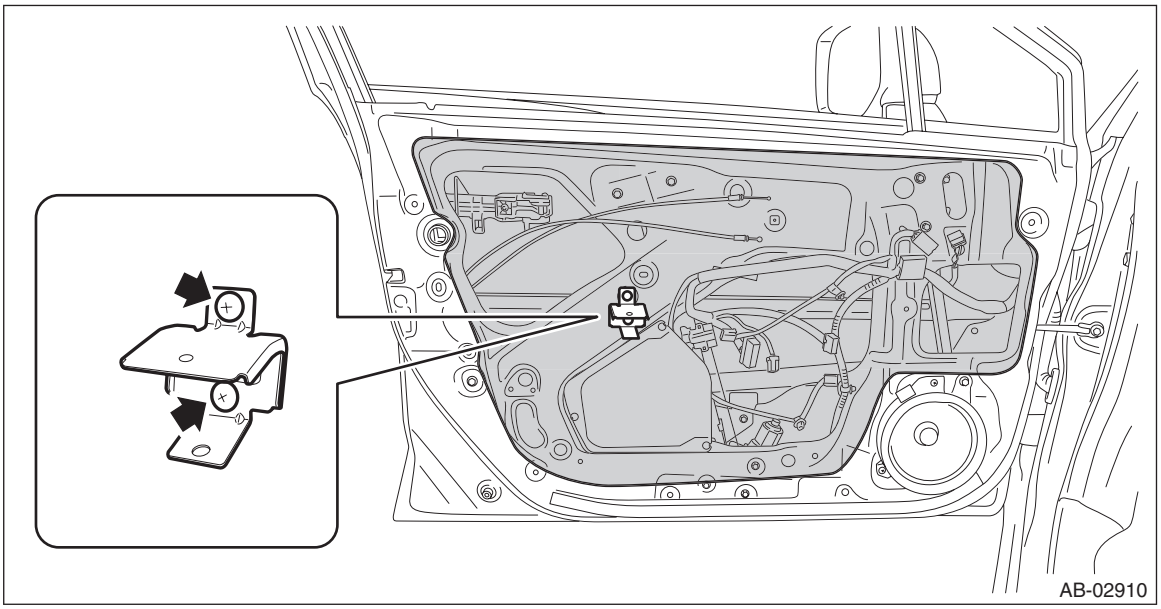
## A: REMOVAL

### 1. FRONT DOOR PANEL

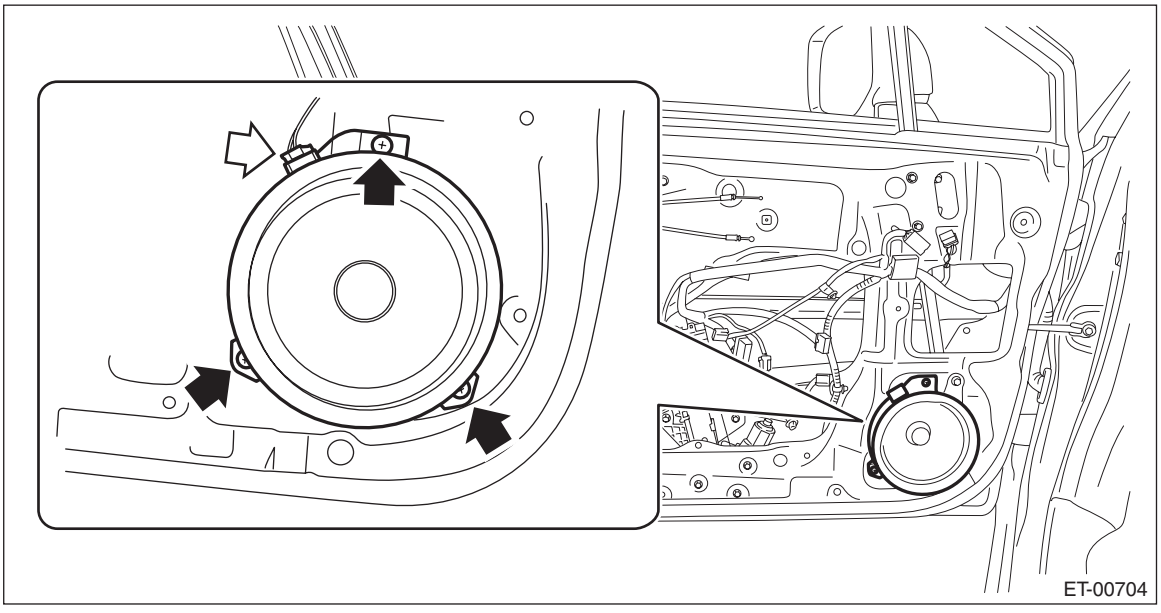
1) Disconnect the ground cable from battery and wait for at least 60 seconds before starting work.
2) Remove the trim panel - front door. <Ref. to EI-61, FRONT DOOR, REMOVAL, Door Trim.>
3) Remove the sealing cover - front door.

**CAUTION:**
- **Carefully remove the butyl tape. Excessive force will easily break the cover.**
- **If the sealing cover - front door gets broken, replace it with a new part.**

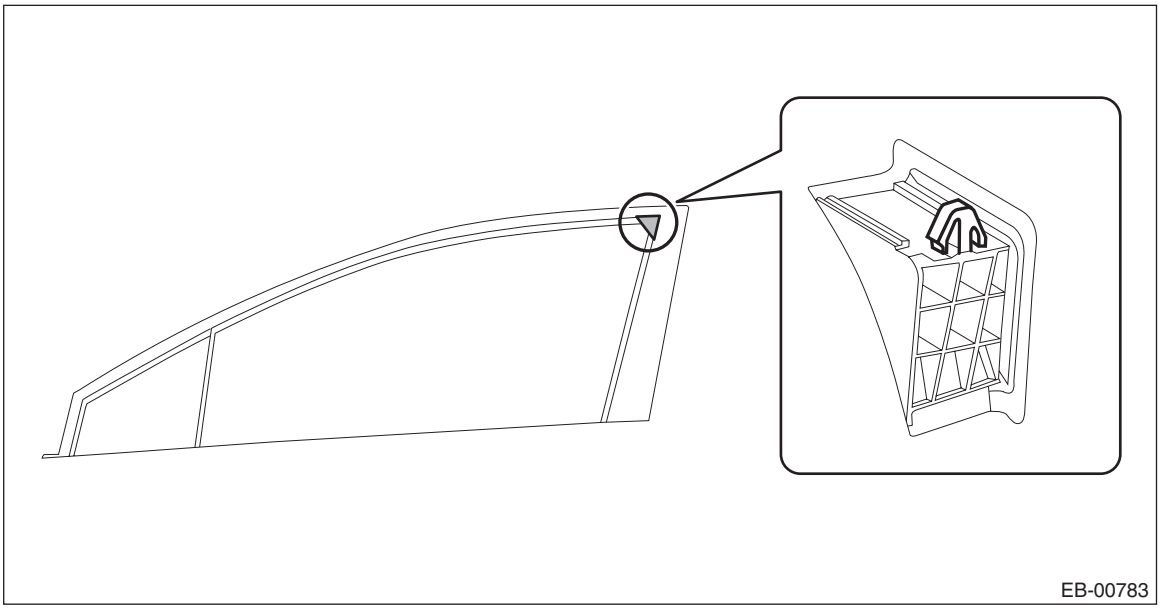
(1) Remove the screw to remove the bracket - door trim front.
(2) Carefully remove the butyl tape to remove the sealing cover - front door.



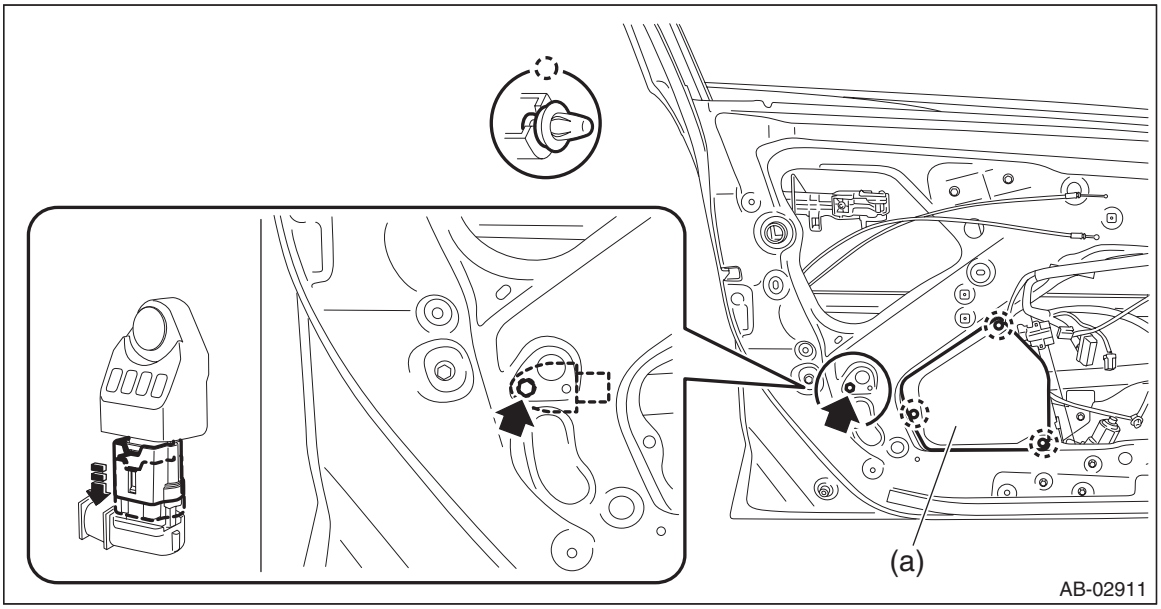
4) Remove the outer mirror assembly. <Ref. to GW-27, REMOVAL, Outer Mirror Assembly.>
5) Remove the front door speaker assembly.
(1) Remove the screws.
(2) Disconnect the connector and remove the front speaker assembly.



6) Remove the B pillar upper clip.



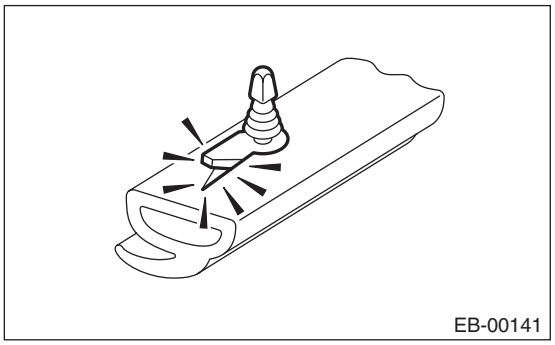
7) Remove the front door impact sensor assembly.
(1) Remove the front door inner pad (a).
(2) Remove the nuts and then remove the front door impact sensor assembly.
(3) Disconnect the airbag connector and remove the airbag door sensor assembly. <Ref. to AB-27, FRONT DOOR IMPACT SENSOR AND SATELLITE SAFING SENSOR, PROCEDURE, Airbag Connector.>



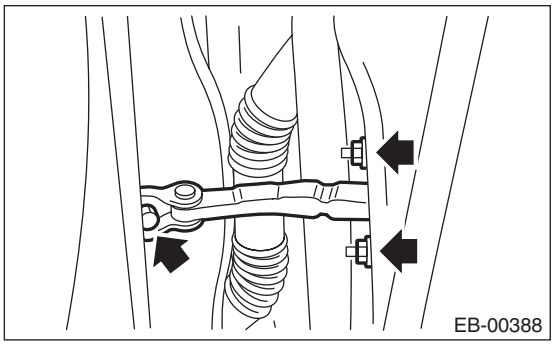
8) Remove the glass assembly - front door and the glass - front door partition. <Ref. to GW-18, REMOVAL, Front Door Glass.>
9) Remove the regulator & motor assembly - front of the front door. <Ref. to GW-21, REMOVAL, Front Regulator and Motor Assembly.>
10) Remove the latch and actuator assembly - front. <Ref. to SL-36, REMOVAL, Front Door Latch and Door Lock Actuator Assembly.>
11) Remove the handle - door outer. <Ref. to SL-32, REMOVAL, Front Outer Handle.>

12) Remove the weather strip - front door.

**CAUTION:**
**If the weather strip clip is removed with excessive force, the weather strip may be damaged. Be sure to use clip remover to remove.**

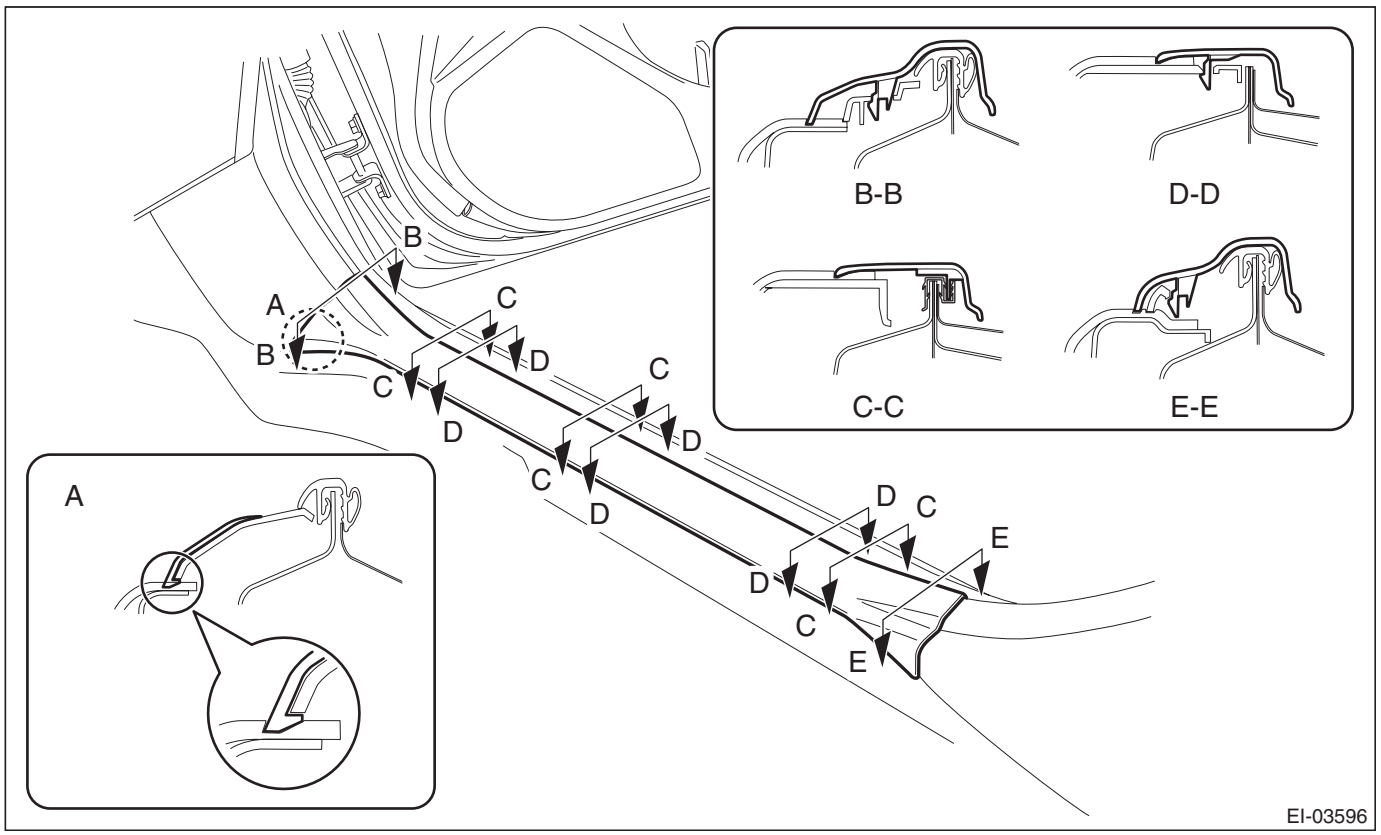


13) Remove the bolts and nuts, and then detach the checker assembly - front door.

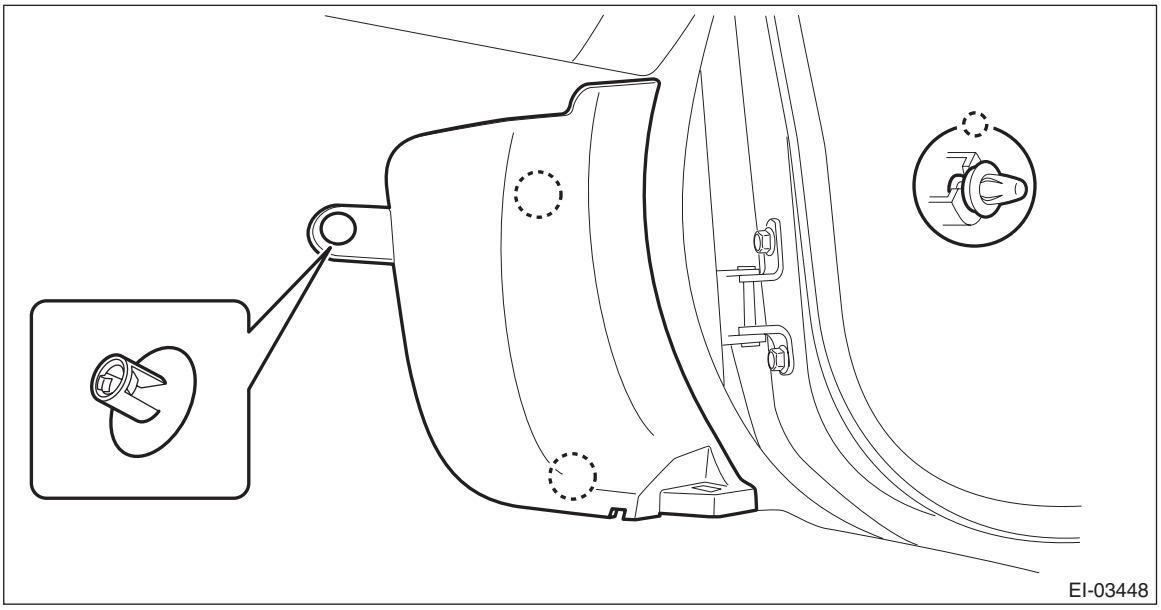


14) Release the claws, and then remove the cover side sill - front INN.

**CAUTION:**
**Do not pull with excessive force. Doing so may damage the claws of the cover side sill - front INN.**



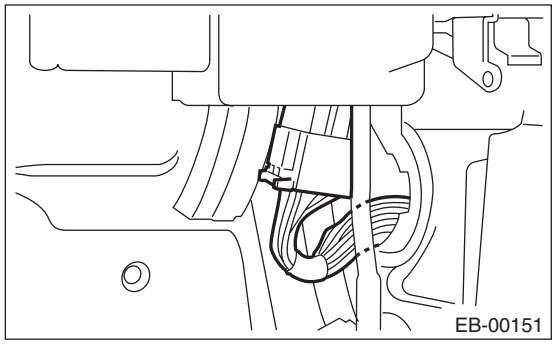
15) Remove the clips, and remove the cover side sill - front.



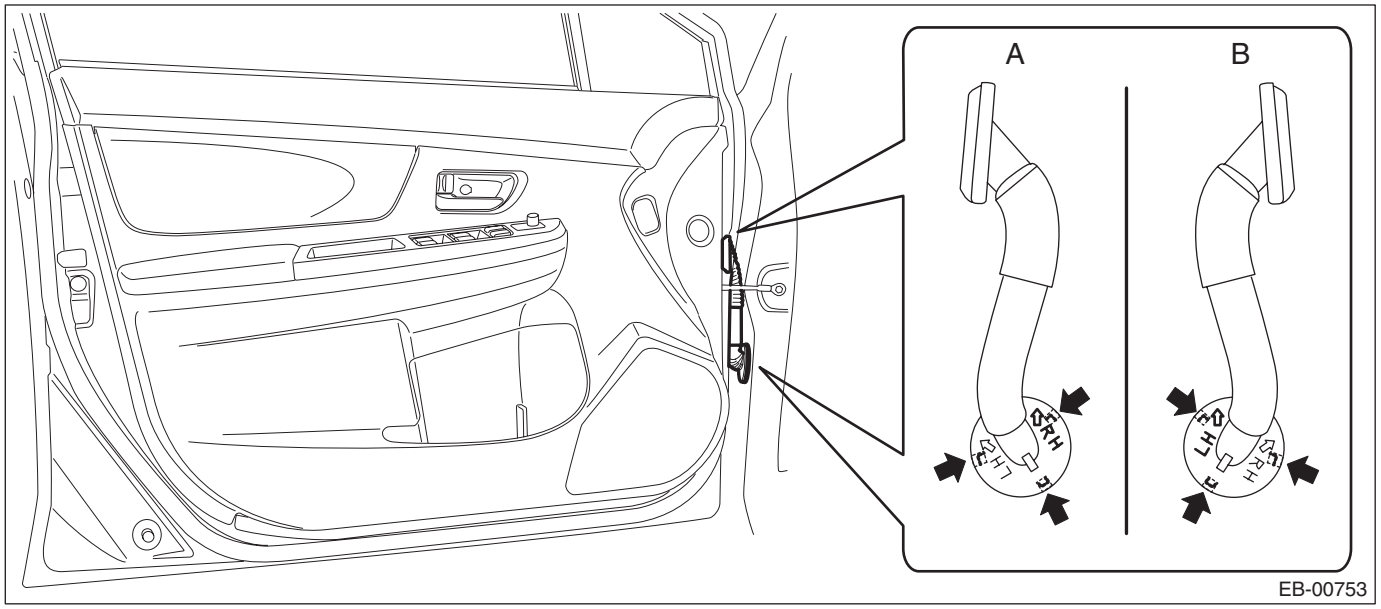
16) Disconnect the front door impact sensor harness connector. <Ref. to AB-28, FRONT DOOR IMPACT SENSOR (BETWEEN AIRBAG REAR HARNESS AND DOOR HARNESS), PROCEDURE, Airbag Connector.>

**CAUTION:**
**Always refer to "CAUTION" of "General Description" in the "AIRBAG SYSTEM" before performing any service that handles the airbag connectors. <Ref. to AB-11, CAUTION, General Description.>**

17) Disconnect the front door harness connectors.
(1) Disconnect the connector of door harness from body harness.

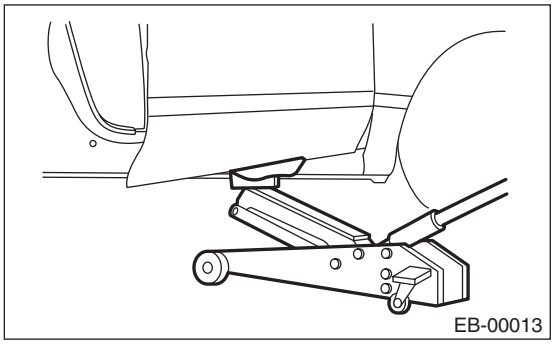


(2) Push in the claws to remove the grommet, and pull out the door harness connector.



| | |
|---|---|
| A | Driver's side |
| B | Passenger's side |

18) Before removing the panel assembly - front door, make the following preparations.

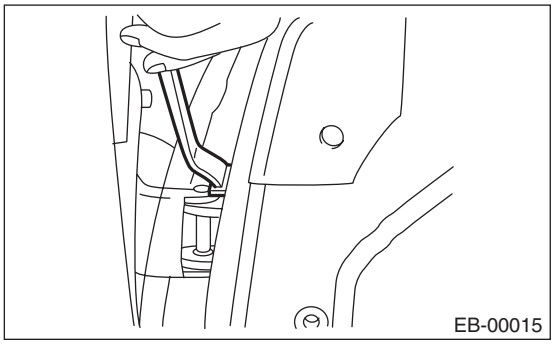


(1) Put a wooden block on a floor jack and place the jack under the panel assembly - front door.
(2) Support the panel assembly - front door with the jack to protect it from damage.

**CAUTION:**
**Do not excessively lift the panel assembly - front door with the floor jack. The door hinges may be damaged.**

19) Remove the door-side bolts for the upper hinge - front door and the lower hinge - front door to remove the panel assembly - front door.

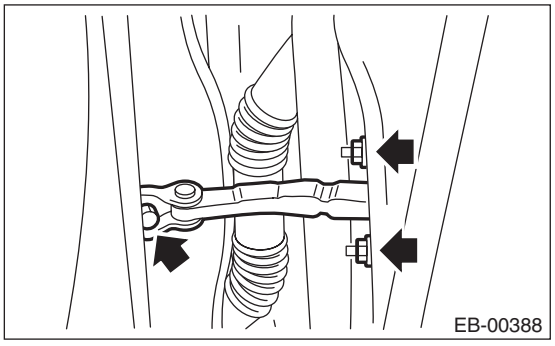
**CAUTION:**
**The panel assembly - front door is heavy. When removing and installing it, always work in a team of two or more persons.**



20) Remove the door hinge from vehicle.

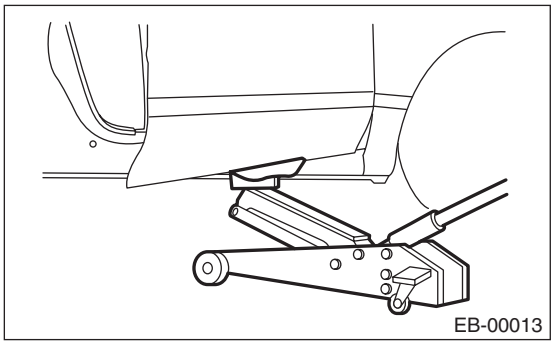
## 2. FRONT DOOR HINGE

1) Remove the bolts from the vehicle side to disconnect the checker assembly - front door.



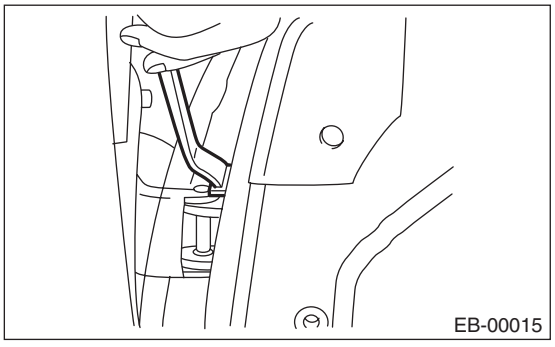
2) Before removing the door hinge, make the following preparations.
   (1) Put a wooden block on a floor jack and place the jack under the panel assembly - front door.
   (2) Support the panel assembly - front door with the jack to protect it from damage.

**CAUTION:**
**Do not excessively lift the panel assembly - front door with the floor jack. The door hinges may be damaged.**



3) Remove the bolts of the upper hinge - front door or the lower hinge - front door.

**CAUTION:**
**Do not remove the upper hinge - front door and the lower hinge - front door at the same time.**

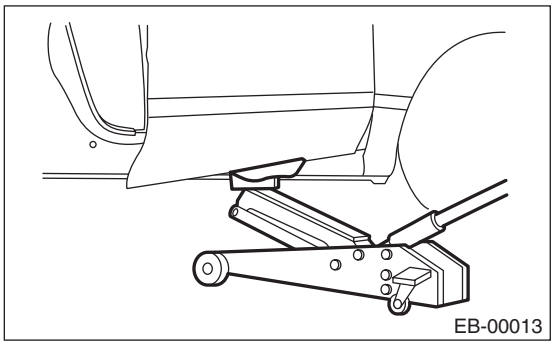


4) Remove the hinge - front door from the vehicle.

# B: INSTALLATION

## 1. FRONT DOOR PANEL

1) Put a wooden block on a jack and place the panel assembly - front door on it.



2) Apply grease to the sliding area of door hinges, and install the door hinge to vehicle.
3) Adjust the height by the jack, and temporarily install the panel assembly - front door to the upper hinge - front door and the lower hinge - front door.

NOTE:
• When installing the panel assembly - front door, make sure that a uniform clearance is created around the panel.
• Perform installation while paying attention to the assembly direction of the grommet.

4) Adjust the clearance around the panel assembly - front door. <Ref. to EB-28, ADJUSTMENT, Front Door.>
5) Tighten the bolts and nuts of the door hinge and the checker assembly - front door.

***Tightening torque:***
***Refer to "COMPONENT" of "General Description". <Ref. to EB-4, FRONT DOOR, COMPONENT, General Description.>***

6) Install door internal parts in the reverse order of removal.
7) Connect door harness connector, and install the cover side sill - front.

## 2. FRONT DOOR HINGE

1) Apply grease to the sliding area of door hinges, and install the door hinge to vehicle.
2) Adjust the height by the jack, and temporarily install the panel assembly - front door to the upper hinge - front door and the lower hinge - front door.

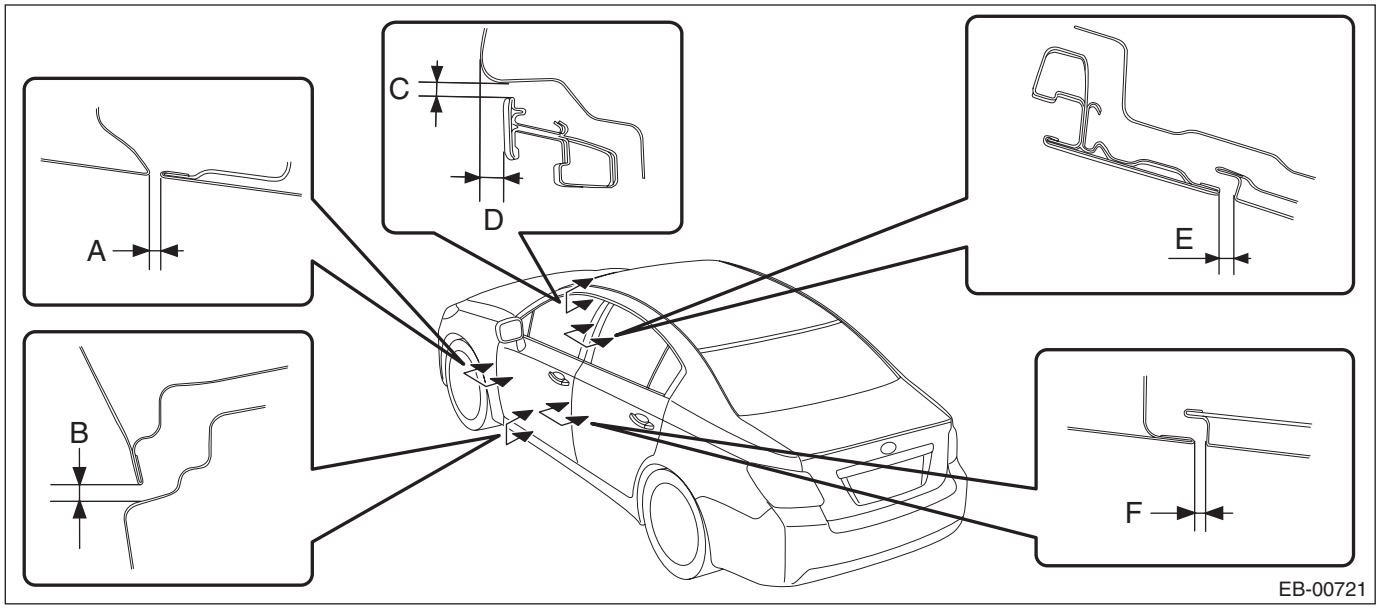
NOTE:
When installing the panel assembly - front door, make sure that a uniform clearance is created around the panel.

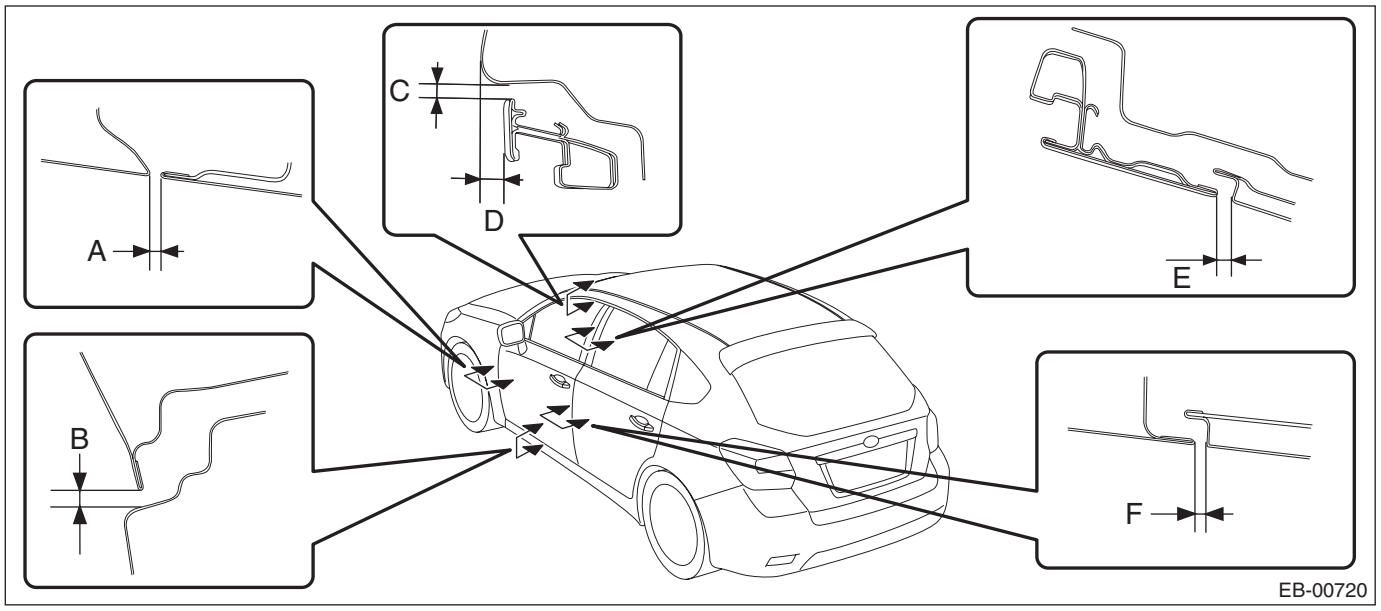
3) Adjust the clearance around the panel assembly - front door. <Ref. to EB-28, ADJUSTMENT, Front Door.>
4) Tighten the bolts and nuts of the door hinge and the checker assembly - front door.

***Tightening torque:***
***Refer to "COMPONENT" of "General Description". <Ref. to EB-4, FRONT DOOR, COMPONENT, General Description.>***

## C: ADJUSTMENT

Adjust the clearance around the panel assembly - front door as follows.



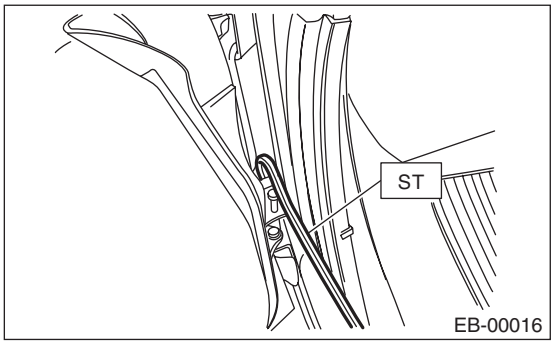


| Part | | Standard |
|---|---|---|
| A | Fender COMPL - front to Panel assembly - front door | 4.5±1.0 mm (0.18±0.04 in) |
| B | Panel assembly - front door to Side sill spoiler | 6.0+1.5, –1.0 mm (0.24+0.06, -0.04 in) |
| C | Roof panel to Front door sash | 5.1+1.5, –1.0 mm (0.20+0.06, -0.04 in) |
| D | Surface level gap between roof panel and front door sash | 7±1.5 mm (0.28±0.06 in) |
| E | Front door sash to Rear door sash | 5.5+1.5, –1.0 mm (0.22+0.06, -0.04 in) |
| F | Panel assembly - front door to Panel assembly - rear door | 4.5±1.0 mm (0.18±0.04 in) |

NOTE:
Common to 4 door model and 5 door model/XV model

1) Adjust the vertical and horizontal positions of the panel assembly - front door.

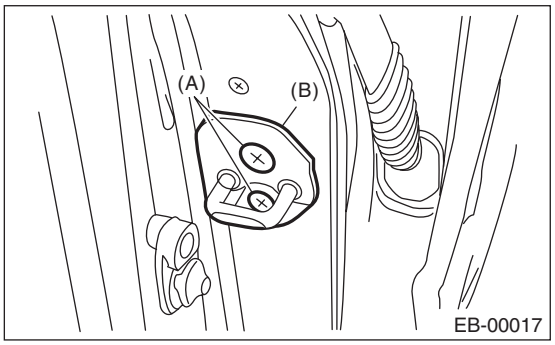
***Preparation tool:***
***ST: WRENCH (925610000)***



(1) Using ST, loosen the body side bolts of the upper hinge - front door and the lower hinge - front door.
(2) Adjust the vertical and horizontal clearance of the panel assembly - front door.

2) Adjust the surface level gap between the panel assembly - front door and the panel assembly - rear door.

**CAUTION:**
**Do not use an impact wrench. Welding area on the striker nut plate is easily broken.**

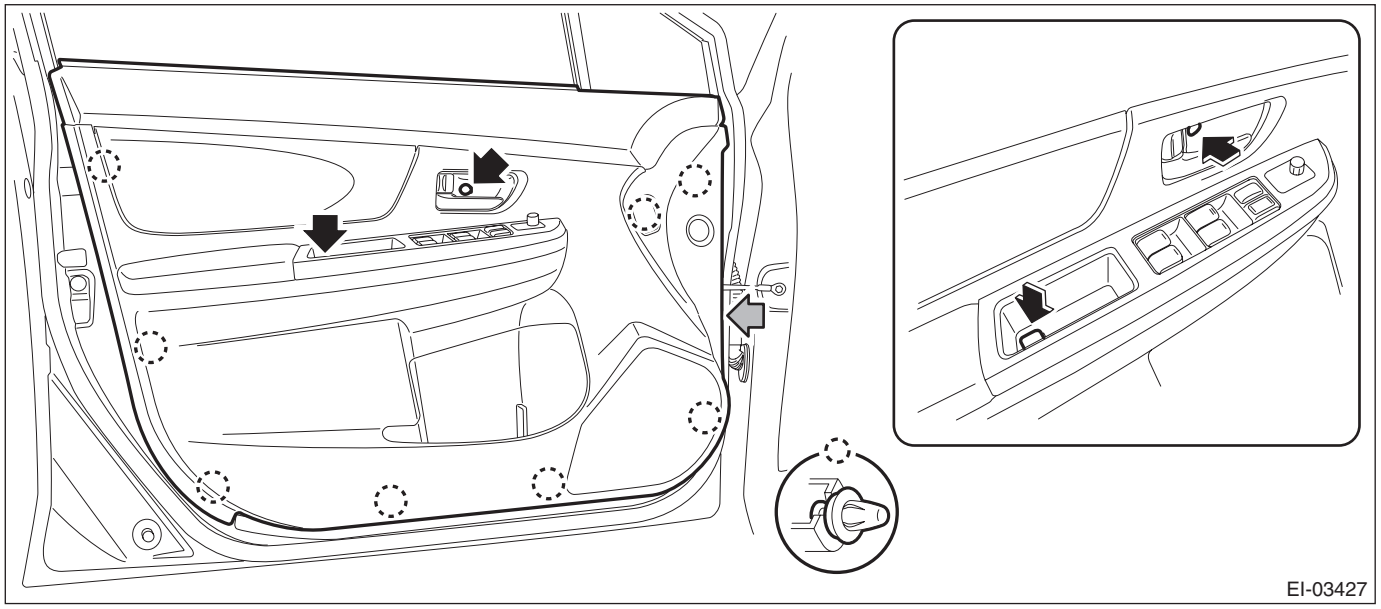


(1) Loosen the screws (A).
(2) Tap the striker - front door (B) using a plastic hammer to adjust the surface level gap between the rear end of the panel assembly - front door and the front end of the panel assembly - rear door.

# 5. Front Sealing Cover

## A: REMOVAL

1) Disconnect the ground cable from battery.
2) Remove the trim panel - front door.
   (1) Open the cover and remove the screw.
   (2) Remove the clips, and remove the trim panel - front door from the panel assembly - front door.



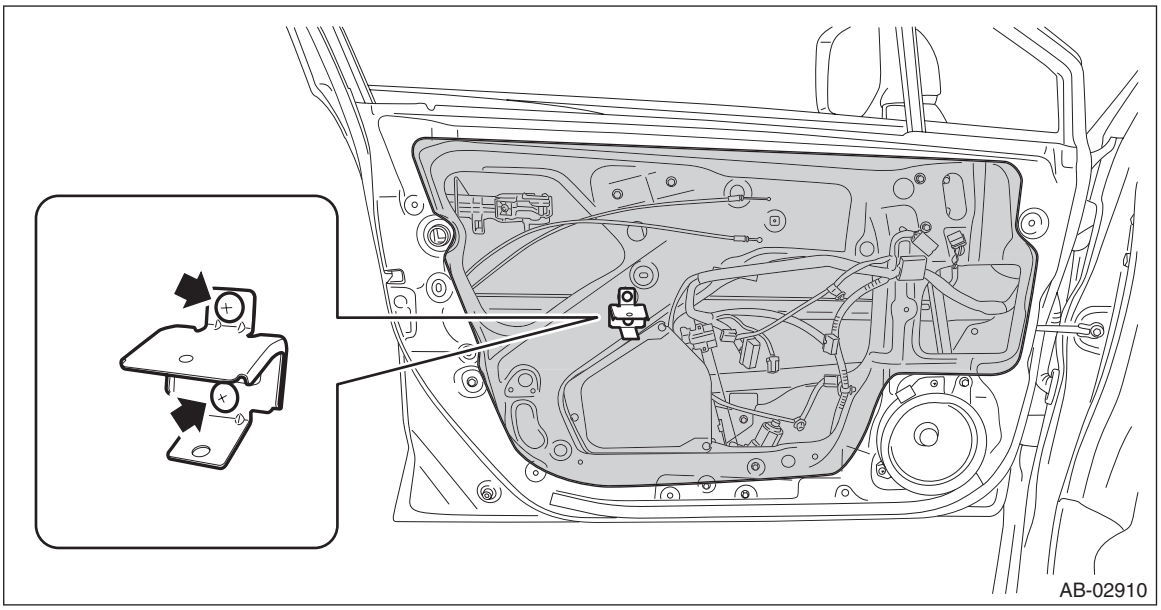
NOTE:
It is easier to remove the trim panel - front door if the removal is performed from the gray arrow section.
   (3) Detach the door lock cable (a) and door open cable (b) from the remote assembly - door.

   (4) Disconnect the harness connector and remove the trim panel - front door.

3) Remove the sealing cover - front door.

**CAUTION:**
- **Carefully remove the butyl tape. Excessive force will easily break the cover.**
- **If the sealing cover - front door gets broken, replace it with a new part.**

(1) Remove the screw to remove the bracket - door trim front.
(2) Carefully remove the butyl tape to remove the sealing cover - front door.



## B: INSTALLATION

**CAUTION:**
- **If the sealing cover - front door gets broken, replace it with a new part.**
- **Apply a uniform bead of butyl tape.**
- **Attach the sealing cover - front door, keeping it from becoming wrinkled.**
- **Breaks in the bead will allow water leakage and contamination.**

1) Install each part in the reverse order of removal.
2) When replacing the sealing cover - front door, use the butyl tape.
3) Press the butyl tape-applied area firmly to prevent any floating on surface.

***Butyl tape:***
***3M8626 or the equivalent***

## C: INSPECTION

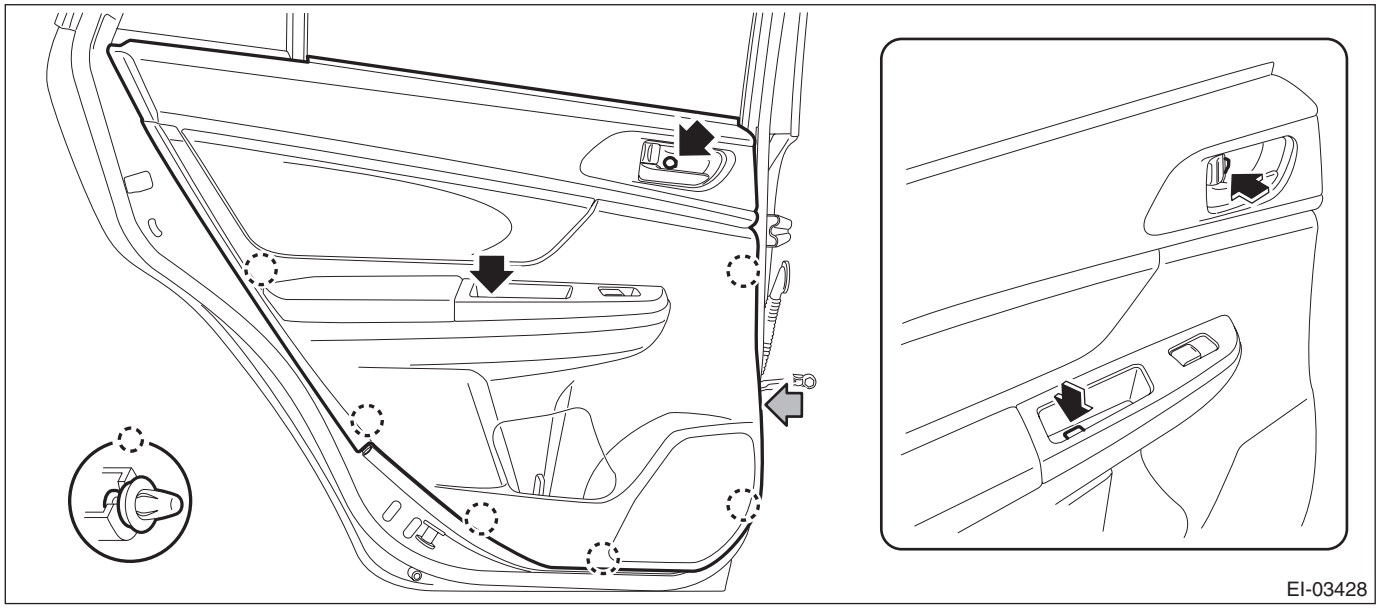
If the sealing cover - front door is broken, replace it with a new part.

# 6. Rear Door

## A: REMOVAL

### 1. REAR DOOR PANEL

1) Disconnect the ground cable from battery.
2) Remove the trim panel - rear door.
   (1) Open the cover and remove the screw.
   (2) Remove the clips, and remove the trim panel - rear door from the panel assembly - rear door.

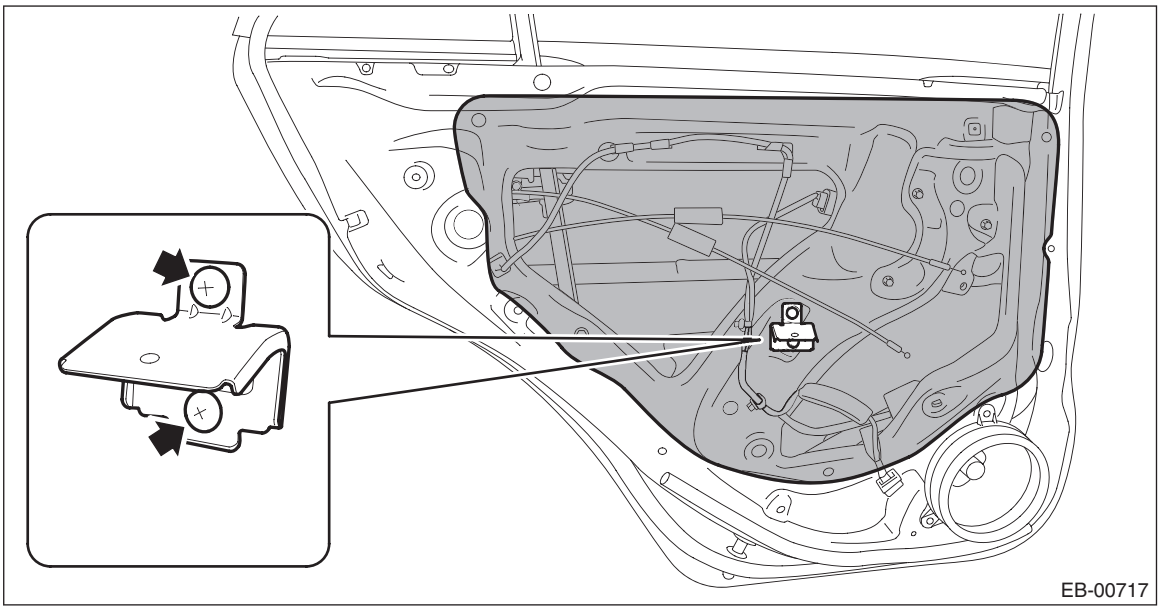


NOTE:
It is easier to remove the trim panel - rear door if the removal is performed from the gray arrow section.
   (3) Detach the door lock cable (a) and door open cable (b) from the remote assembly - door.

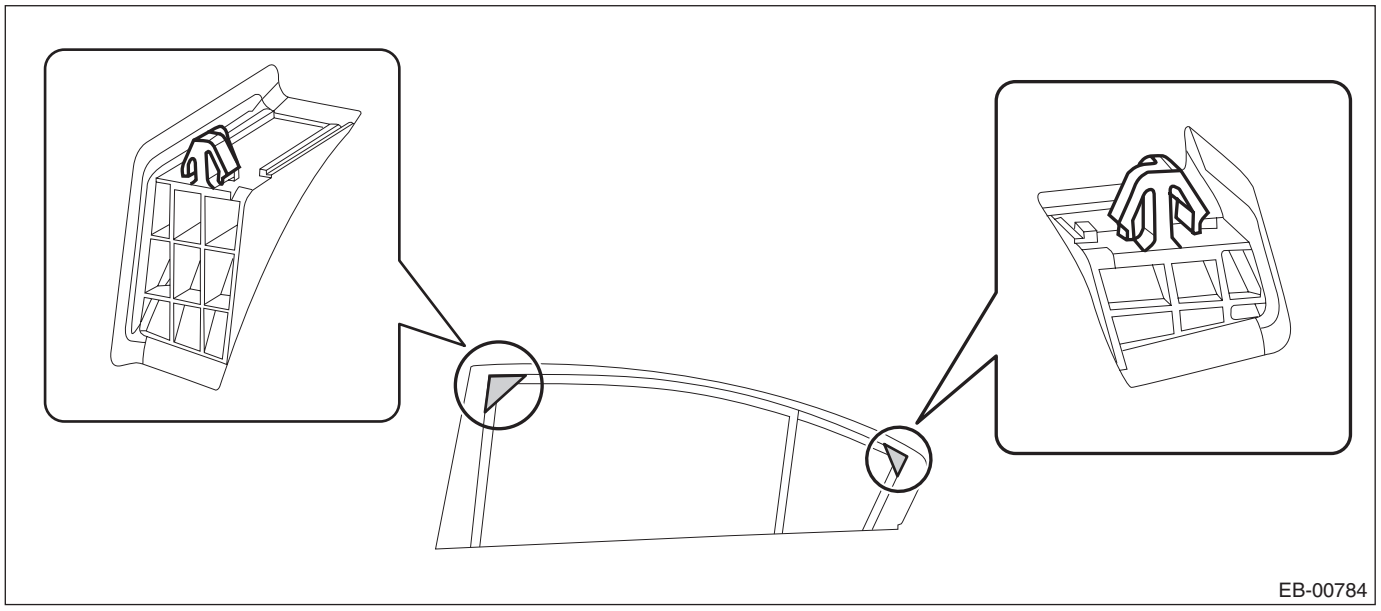
   (4) Disconnect the harness connector and remove the trim panel - rear door.

3) Remove the sealing cover - rear door.

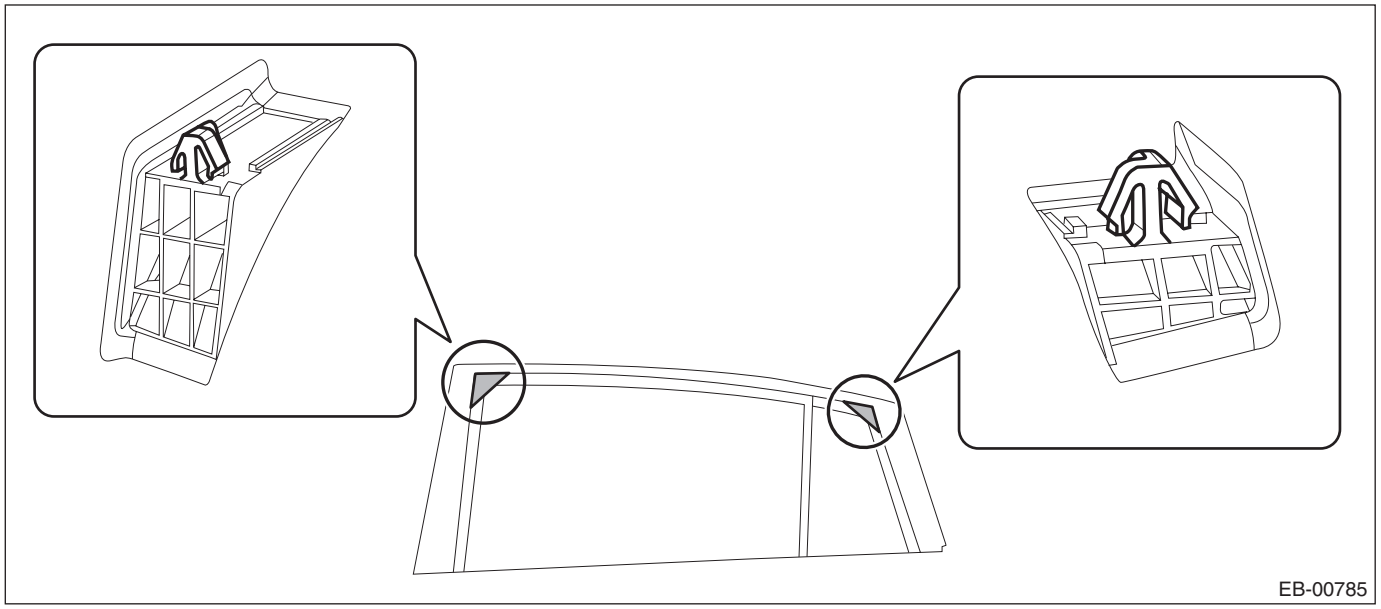
**CAUTION:**
- **Carefully remove the butyl tape. Excessive force will easily break the cover.**
- **If the sealing cover - rear door gets broken, replace it with a new part.**
  (1) Remove the screw to remove the bracket - door trim rear.
  (2) Carefully remove the butyl tape to remove the sealing cover - rear door.



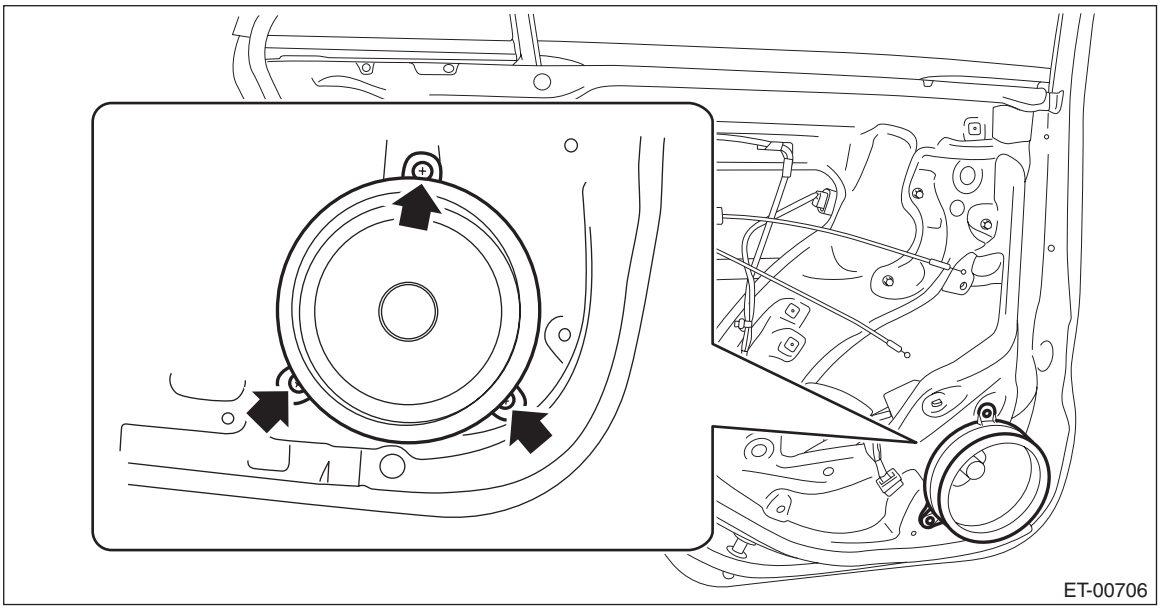
4) Remove the B pillar upper clip.
- 4 door model



- 5 door model/XV model



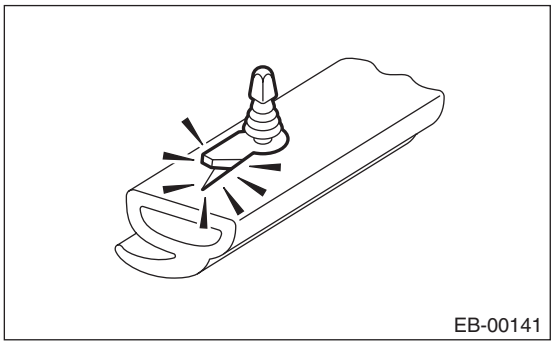
5) Remove the rear door speaker assembly.
   (1) Remove the screws.
   (2) Disconnect the connector behind the speaker and remove the rear speaker assembly.



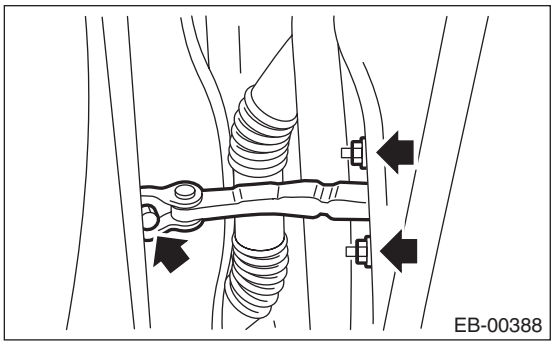
6) Remove the sash COMPL - rear partition and the glass assembly - rear door. <Ref. to GW-34, REMOVAL, Rear Door Glass.>
7) Remove the regulator - rear. <Ref. to GW-36, REMOVAL, Rear Regulator and Motor Assembly.>
8) Remove the latch and actuator assembly - rear. <Ref. to SL-44, REMOVAL, Rear Door Latch and Door Lock Actuator Assembly.>
9) Remove the cover - handle rear outer. <Ref. to SL-40, REMOVAL, Rear Outer Handle.>

10) Remove the rear door weather strip.

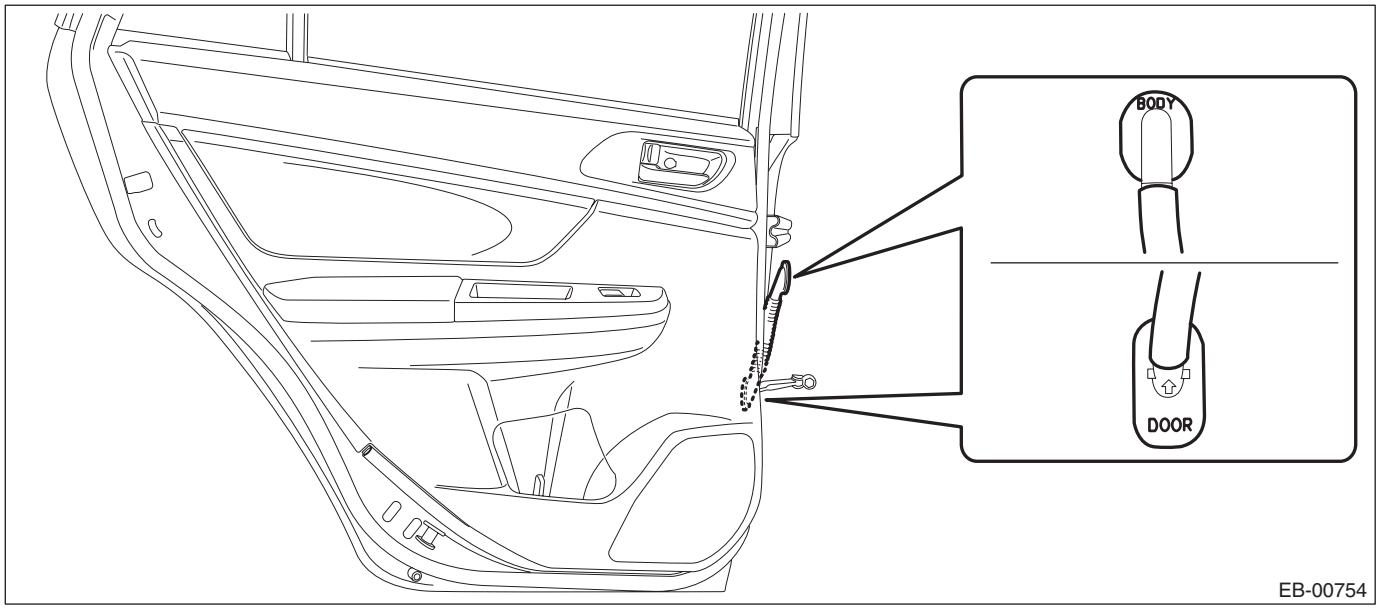
**CAUTION:**
**If the weather strip clip is removed with excessive force, the weather strip may be damaged. Be sure to use clip remover to remove.**



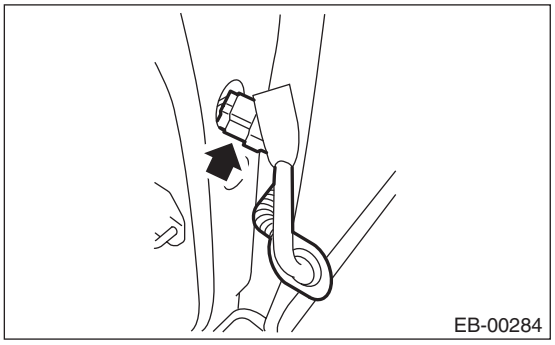
11) Remove the bolts and nuts, and then detach the checker assembly - rear door.



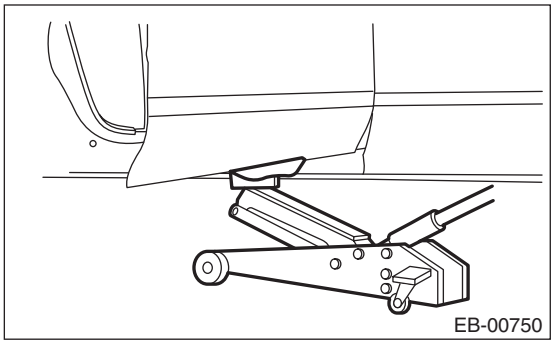
12) Disconnect the rear door harness connectors.
(1) Remove the grommet and pull out the rear door harness connector from inside the center pillar.



(2) Disconnect the rear door harness connectors.



13) Before removing the panel assembly - rear door, make the following preparations.

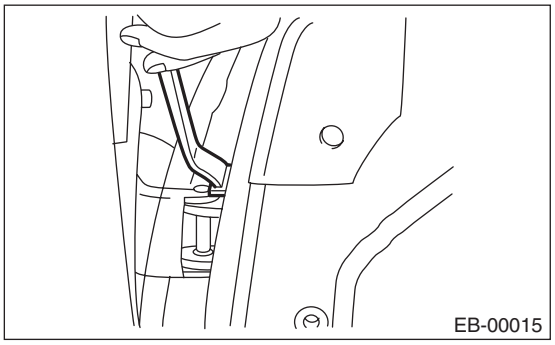


(1) Put a wooden block on a floor jack and place the jack under the panel assembly - rear door.
(2) Support the panel assembly - rear door with the jack to protect it from damage.

**CAUTION:**
**Do not excessively lift the panel assembly - rear door with the floor jack. The door hinges may be damaged.**

14) Remove the door-side bolts for the upper hinge - rear door and the lower hinge - rear door to remove the panel assembly - rear door.

**CAUTION:**
**The panel assembly - rear door is heavy. When removing and installing it, always work in a team of two or more persons.**



15) Remove the door hinge from vehicle. <Ref. to EB-36, REAR DOOR HINGE, REMOVAL, Rear Door.>

## 2. REAR DOOR HINGE

1) Open the panel assembly - front door, and remove the bolts of the upper hinge - rear door or the lower hinge - rear door.

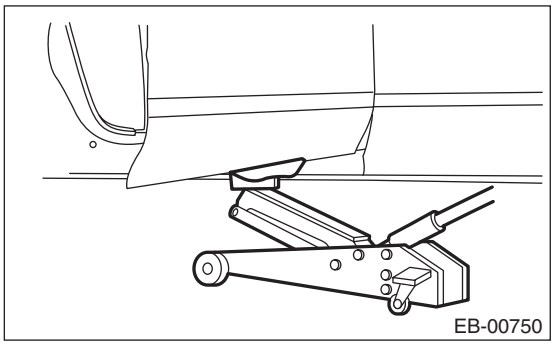
**CAUTION:**
- **Do not remove the upper hinge - front door and the lower hinge - front door at the same time.**
- **Removal and installation of the panel assembly - rear door must be performed with the door closed.**

2) Remove the rear door hinge from vehicle.

# B: INSTALLATION

## 1. REAR DOOR PANEL

1) Put a wooden block on a jack and place the panel assembly - rear door on it.



2) Apply grease to the moving part of door hinges.
3) Adjust the height by the jack, and temporarily install the panel assembly - rear door to the upper hinge - rear door and the lower hinge - rear door.

NOTE:
• When installing the panel assembly - rear door, make sure that a uniform clearance is created around the panel.
• Perform installation while paying attention to the assembly direction of the grommet.

4) Adjust the clearance around the panel assembly - rear door. <Ref. to EB-38, ADJUSTMENT, Rear Door.>
5) Tighten the bolts and nuts of the door hinge and the checker assembly - rear door.

***Tightening torque:***
***Refer to "COMPONENT" of "General Description". <Ref. to EB-5, REAR DOOR, COMPONENT, General Description.>***

6) Install door internal parts in the reverse order of removal.
7) Connect the door harness connector, and install the trim panel - center pillar LWR.

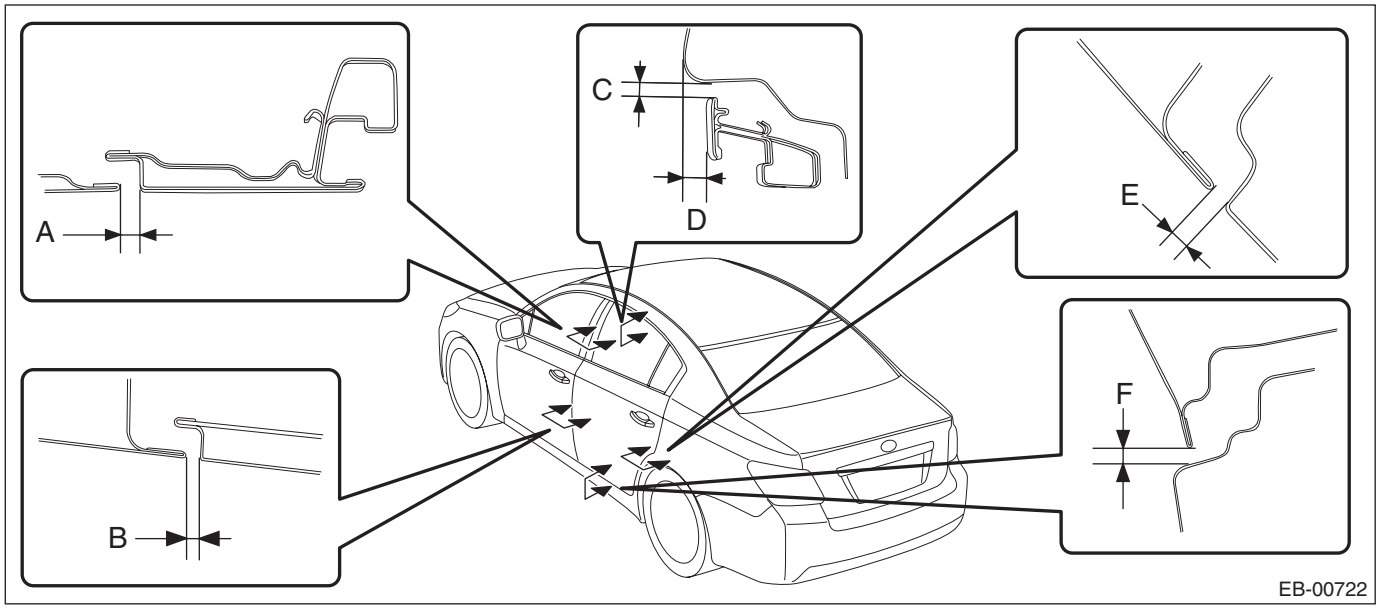
## 2. REAR DOOR HINGE

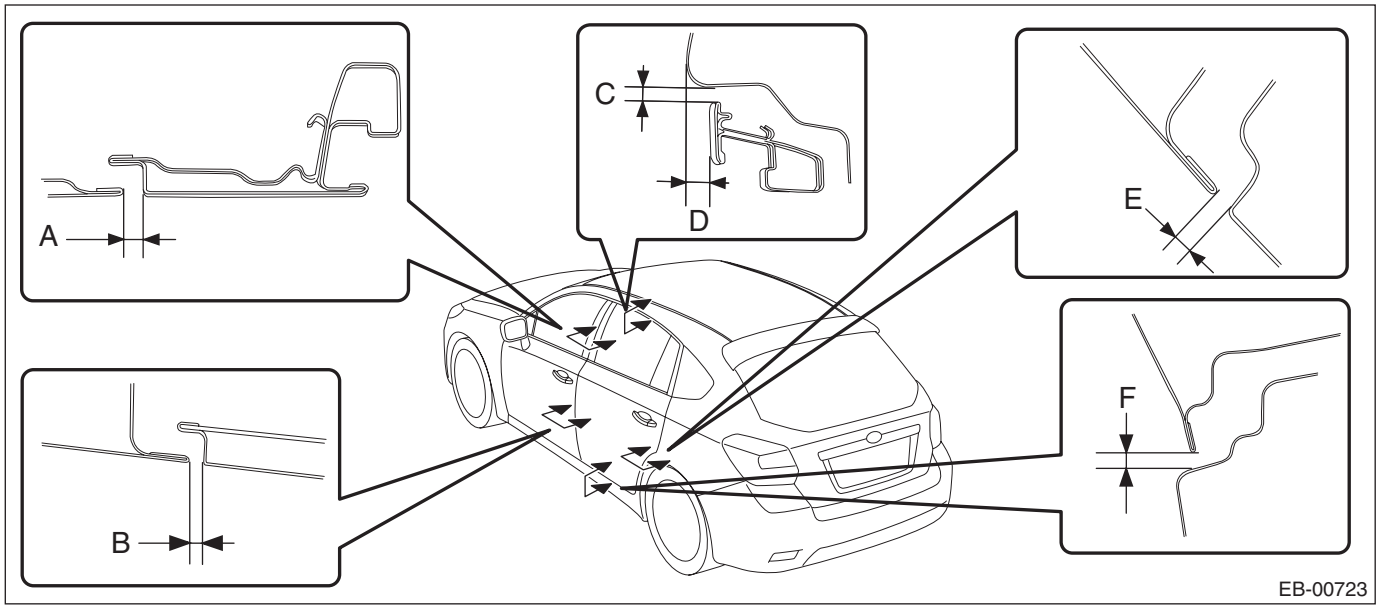
1) Apply grease to the moving part of door hinges.
2) Adjust the clearance around the panel assembly - rear door. <Ref. to EB-38, ADJUSTMENT, Rear Door.>
3) Tighten the door hinge bolts.

***Tightening torque:***
***Refer to "COMPONENT" of "General Description". <Ref. to EB-5, REAR DOOR, COMPONENT, General Description.>***

## C: ADJUSTMENT

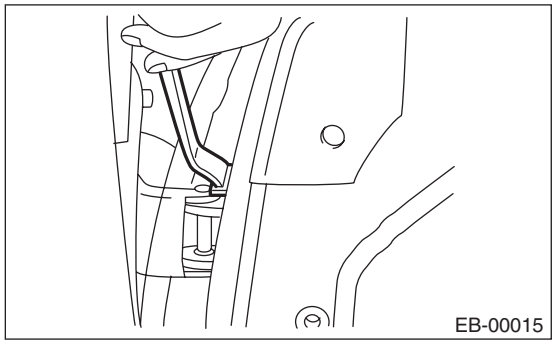
Adjust the clearance around the panel assembly - rear door as follows.





| Part | | Standard |
|---|---|---|
| A | Front door sash to Rear door sash | 5.5+1.5, -1.0 mm (0.22+0.06, -0.04 in) |
| B | Panel assembly - front door to Panel assembly - rear door | 4.5±1.0 mm (0.18±0.04 in) |
| C | Roof panel to Rear door sash | 5.1+1.5, -1.0 mm (0.20+0.06, -0.04 in) |
| D | Surface level gap between roof panel and rear door sash | 6.6±1.5 mm (0.26±0.06 in) |
| E | Panel assembly - rear door to Rear quarter panel | 4.1±1.0 mm (0.16±0.04 in) |
| F | Panel assembly - rear door to Side sill spoiler | 6.0±1.5 mm (0.24±0.06 in) |

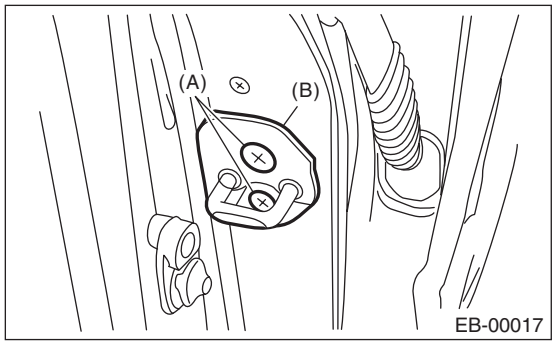
1) Adjust the vertical and horizontal positions of the panel assembly - rear door.



(1) Loosen the body side bolts of the upper hinge - rear door and the lower hinge - rear door.
(2) Adjust the vertical and horizontal clearance of the panel assembly - rear door.

2) Adjust the surface level gap between the panel assembly - rear door and the body.

**CAUTION:**
**Do not use an impact wrench. Welding area on the striker nut plate is easily broken.**

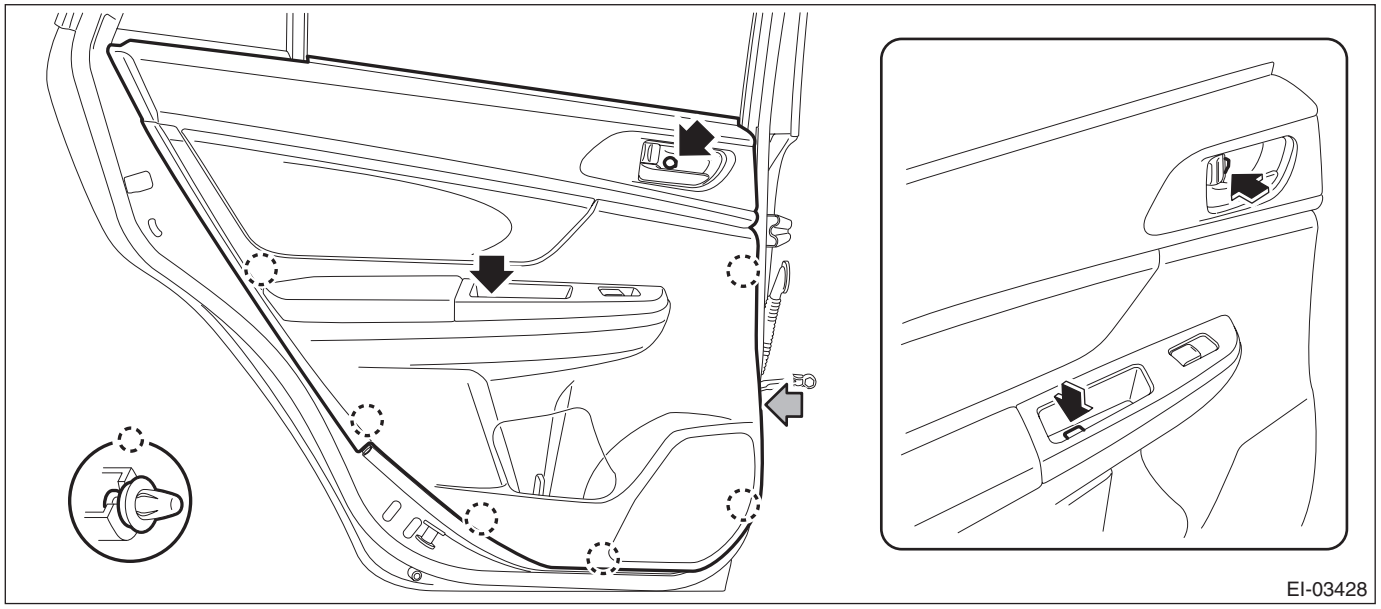


(1) Loosen the screws (A).
(2) Tap the striker - rear door (B) using a plastic hammer to adjust the surface level gap between the rear end of the panel assembly - rear door and the rear quarter.

# 7. Rear Sealing Cover

## A: REMOVAL

1) Disconnect the ground cable from battery.
2) Remove the trim panel - rear door.
   (1) Open the cover and remove the screw.
   (2) Remove the clips, and remove the trim panel - rear door from the panel assembly - rear door.

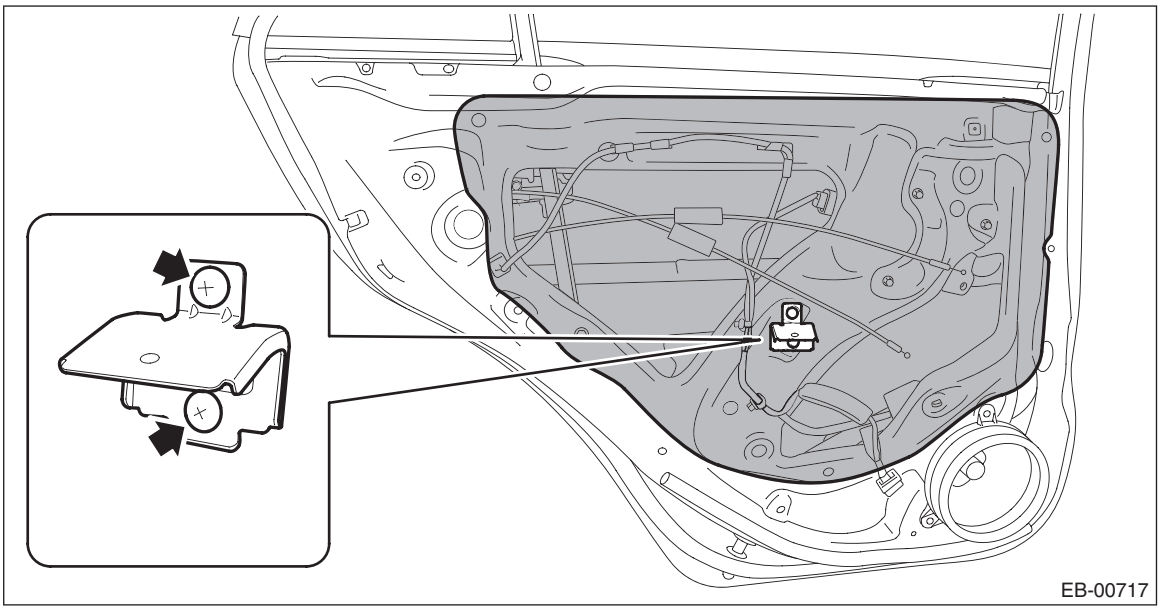


NOTE:
It is easier to remove the door trim if the removal is performed from the gray arrow section.
   (3) Detach the door lock cable (a) and door open cable (b) from the remote assembly - door.

   (4) Disconnect the harness connector and remove the trim panel - rear door.

3) Remove the sealing cover - rear door.

**CAUTION:**
- **Carefully remove the butyl tape. Excessive force will easily break the cover.**
- **If the sealing cover - rear door gets broken, replace it with a new part.**
  (1) Remove the screw to remove the bracket - door trim rear.
  (2) Carefully remove the butyl tape to remove the sealing cover - rear door.



## B: INSTALLATION

**CAUTION:**
- **If the sealing cover - rear door gets broken, replace it with a new part.**
- **Apply a butyl tape evenly.**
- **Attach the sealing cover - rear door, keeping it from becoming wrinkled.**
- **If the butyl tape is applied unevenly, it will cause water leakage and soiling.**

1) Install each part in the reverse order of removal.
2) When replacing the sealing cover - rear door, use the butyl tape.
3) Press the butyl tape-applied area firmly to prevent any floating on surface.

***Butyl tape:***
***3M8626 or the equivalent***

## C: INSPECTION

If the sealing cover - rear door is broken, replace it with a new part.

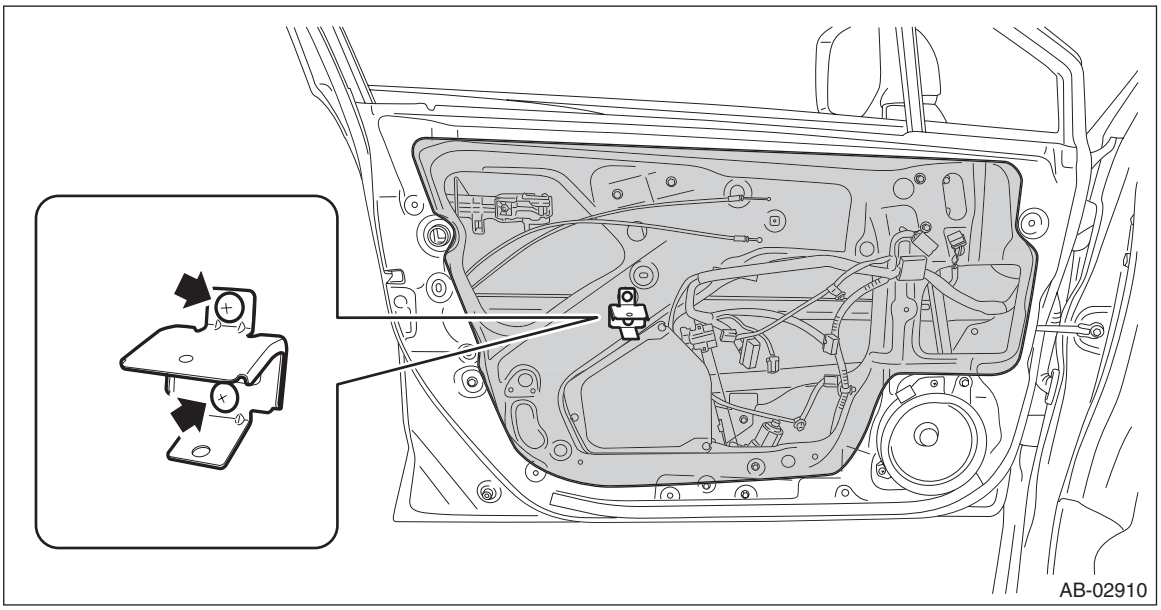
# 8. Door Sash Tape

## A: REMOVAL

### 1. FRONT DOOR

1) Disconnect the ground cable from battery.
2) Remove the trim panel - front door. <Ref. to EI-61, FRONT DOOR, REMOVAL, Door Trim.>
3) Remove the outer mirror assembly. <Ref. to GW-27, REMOVAL, Outer Mirror Assembly.>
4) Remove the sealing cover - front door.

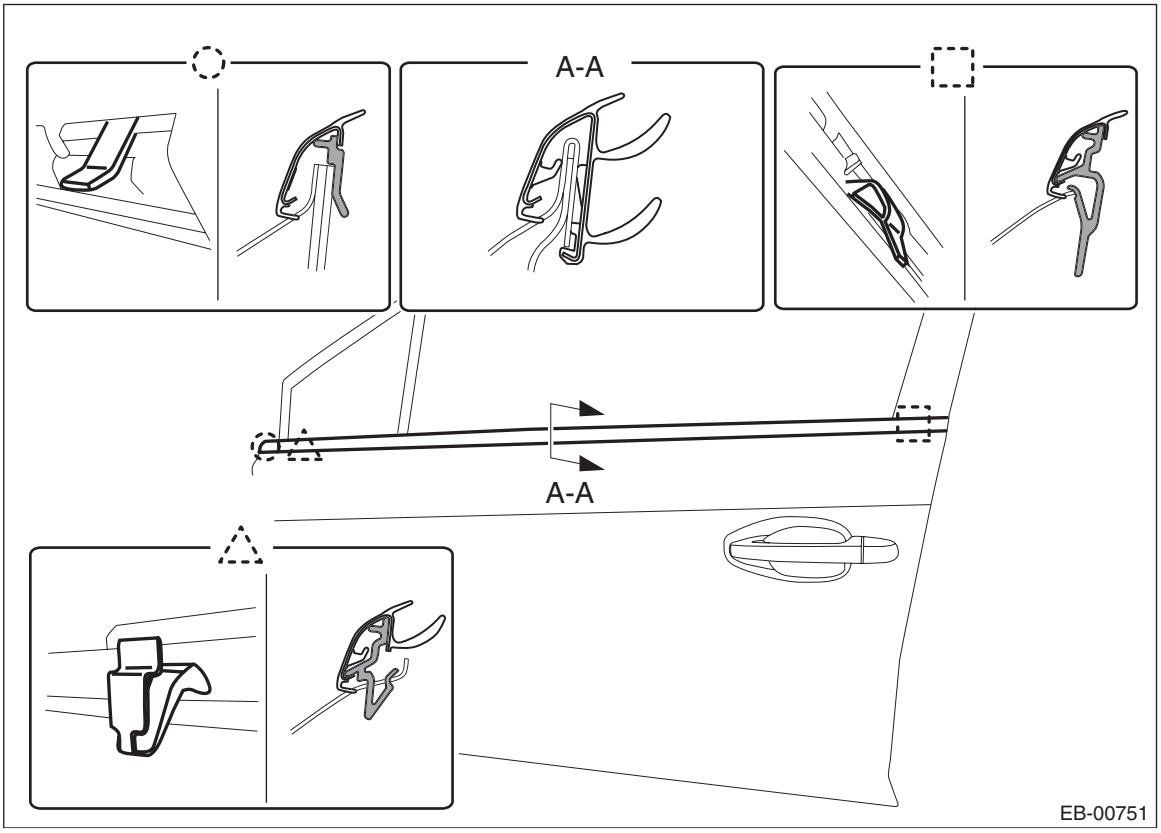
**CAUTION:**
- **Carefully remove the butyl tape. Excessive force will easily break the cover.**
- **If the sealing cover - front door gets broken, replace it with a new part.**



5) Remove the glass assembly - front door. <Ref. to GW-18, REMOVAL, Front Door Glass.>
6) Remove the running channel - front door.

7) Remove the weather strip outer - front door.

**CAUTION:**
- **When removing the weather strip outer, be careful not to damage the vehicle.**
- **Do not reuse the weather strip outer. Always replace with a new part.**



8) Peel the door sash tape from the door sash.

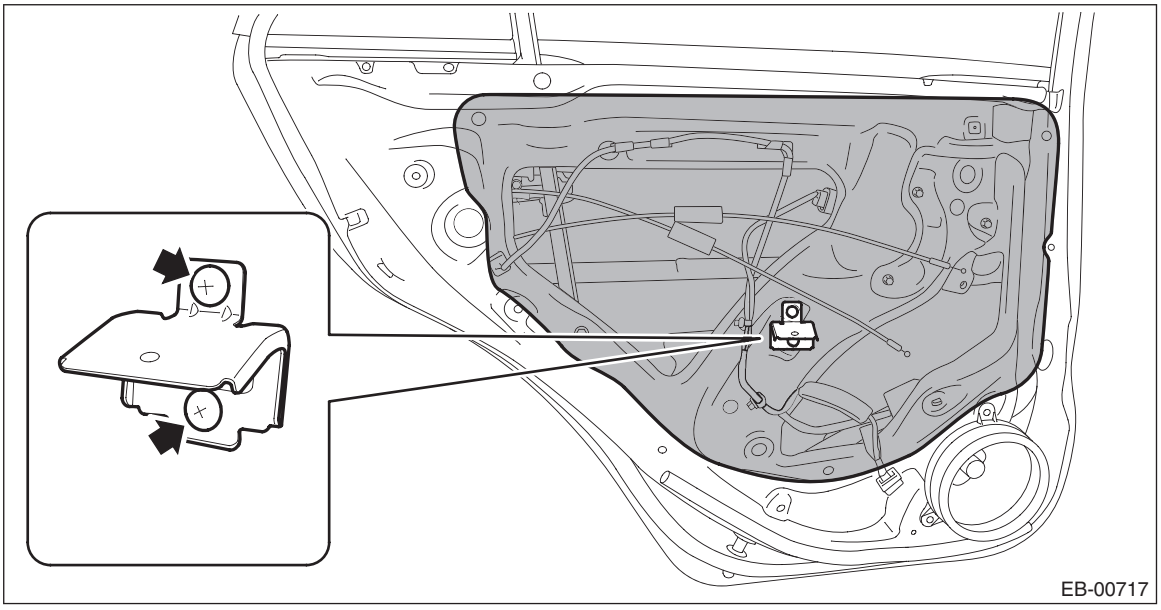
NOTE:
- If the tape is difficult to detach, warm it by a hot air drier.

Use a household hairdryer. Do not use industrial dryers.
- If tape residue is remaining on the door sash, wipe clean.

## 2. REAR DOOR

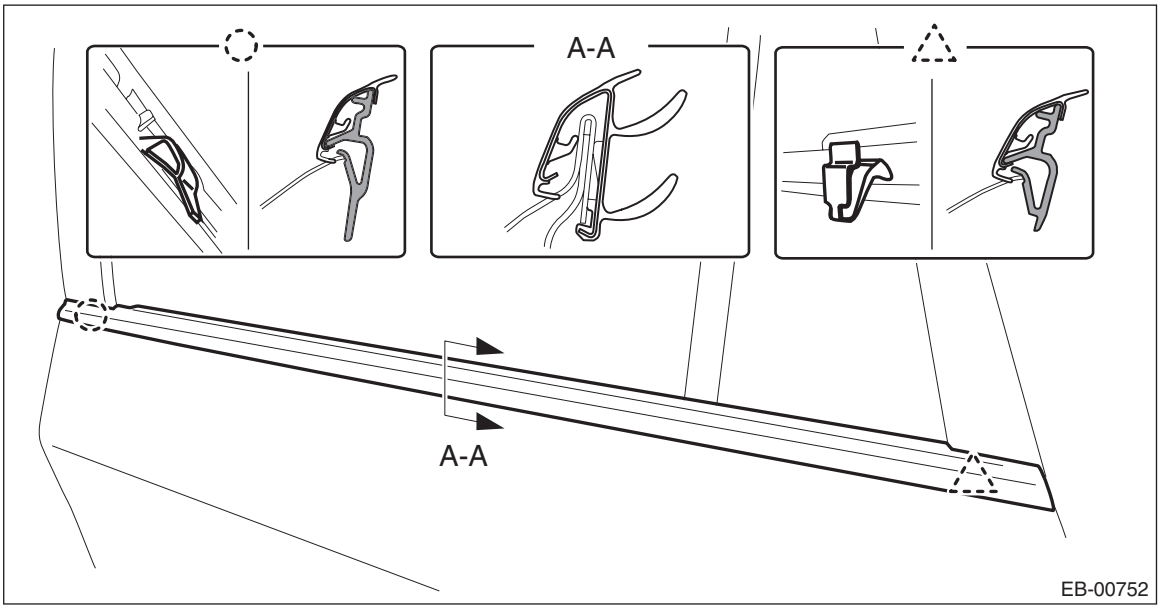
1) Disconnect the ground cable from battery.
2) Remove the trim panel - rear door. <Ref. to EI-62, REAR DOOR, REMOVAL, Door Trim.>
3) Remove the sealing cover - rear door.

**CAUTION:**
- **Carefully remove the butyl tape. Excessive force will easily break the cover.**
- **If the sealing cover - rear door gets broken, replace it with a new part.**



4) Remove the glass assembly - rear door. <Ref. to GW-34, REMOVAL, Rear Door Glass.>
5) Remove the running channel - rear door.
6) Remove the weather strip outer - rear door.

**CAUTION:**
- **When removing the weather strip outer, be careful not to damage the vehicle.**
- **Do not reuse the weather strip outer. Always replace with a new part.**

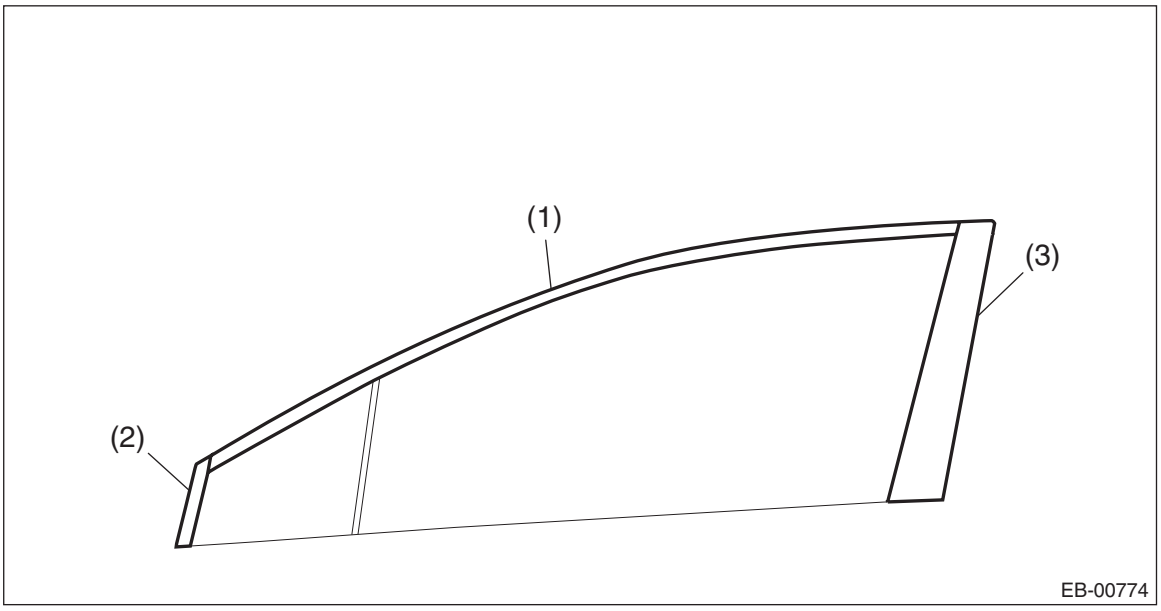


7) Peel the door sash tape from the door sash.

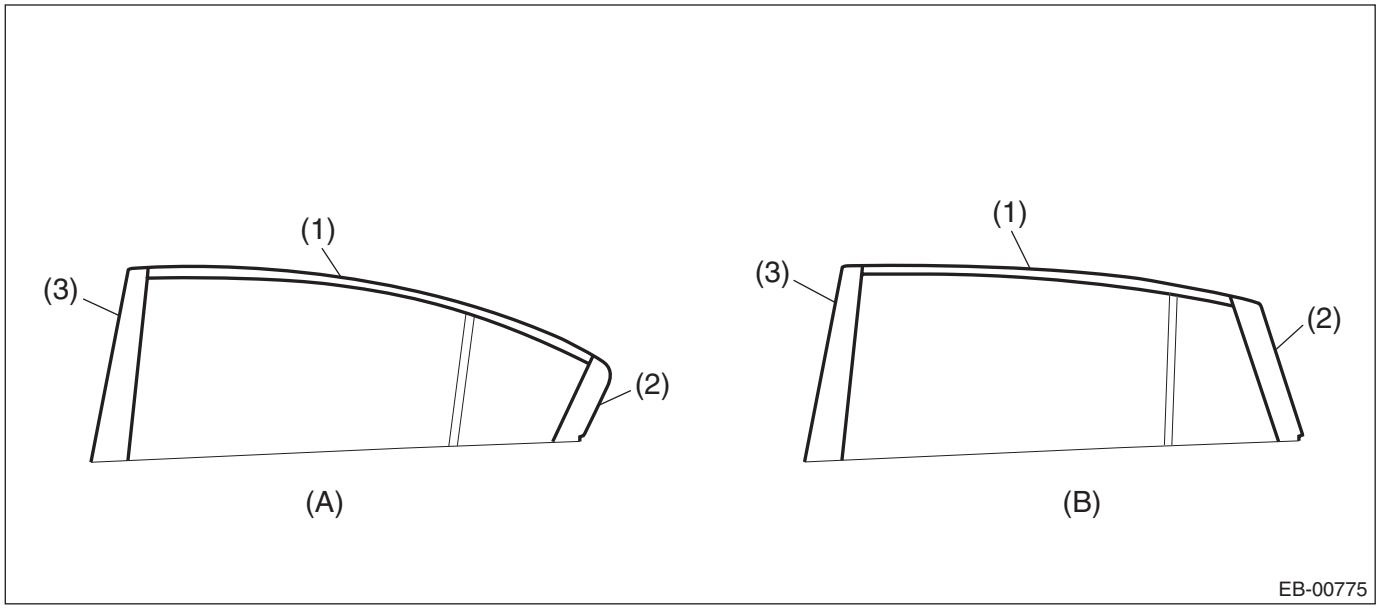
NOTE:
• If the tape is difficult to detach, warm it by a hot air drier.
Use a household hairdryer. Do not use industrial dryers.
• If tape residue is remaining on the door sash, wipe clean.

## B: INSTALLATION

**CAUTION:**
**• Do not reuse the removed door sash tape. Replace it with a new tape.**
**• Press evenly along the sash when applying the tape using a spatula or similar object to make sure no bubbles are formed.**
**If air bubbles are formed, reapply the tape.**
**• If the tape is wrinkled, etc. during application, replace the tape.**
**• Be sure to press the ends of the tape firmly to adhere securely. If the tape comes off at the ends or where folded, the adhesive strength is weakened and the tape may peel off.**
**• There are locations where the tape ends will overlap each other. When applying the tape, be careful of the order of their application.**
**• Front**



- **Rear**

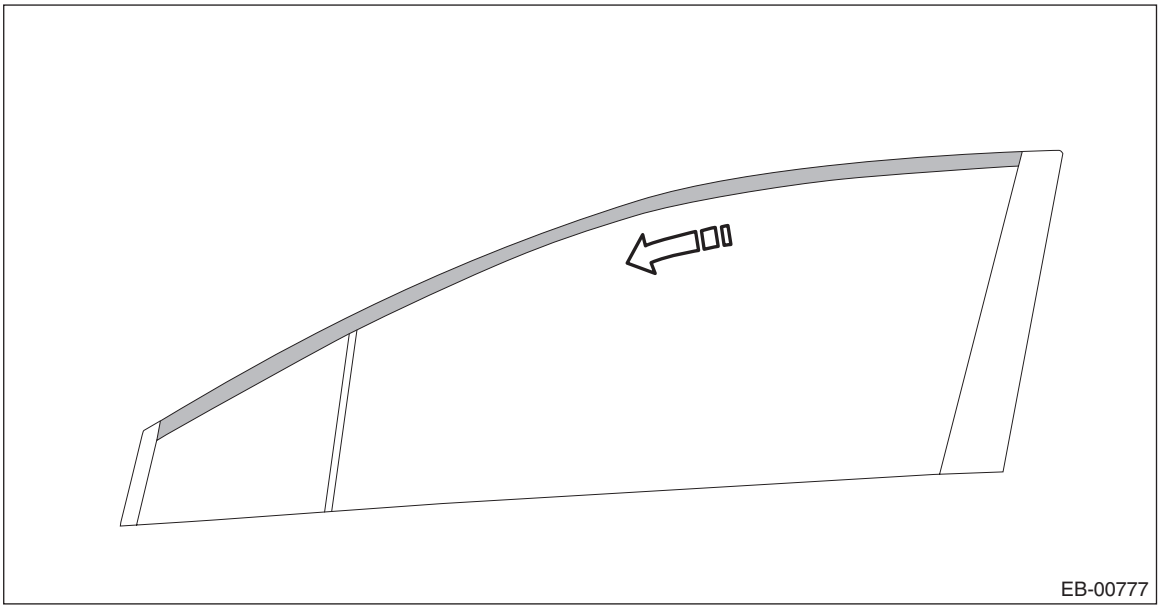


(A) 4 door model (B) 5 door model/XV model

## 1. FRONT DOOR

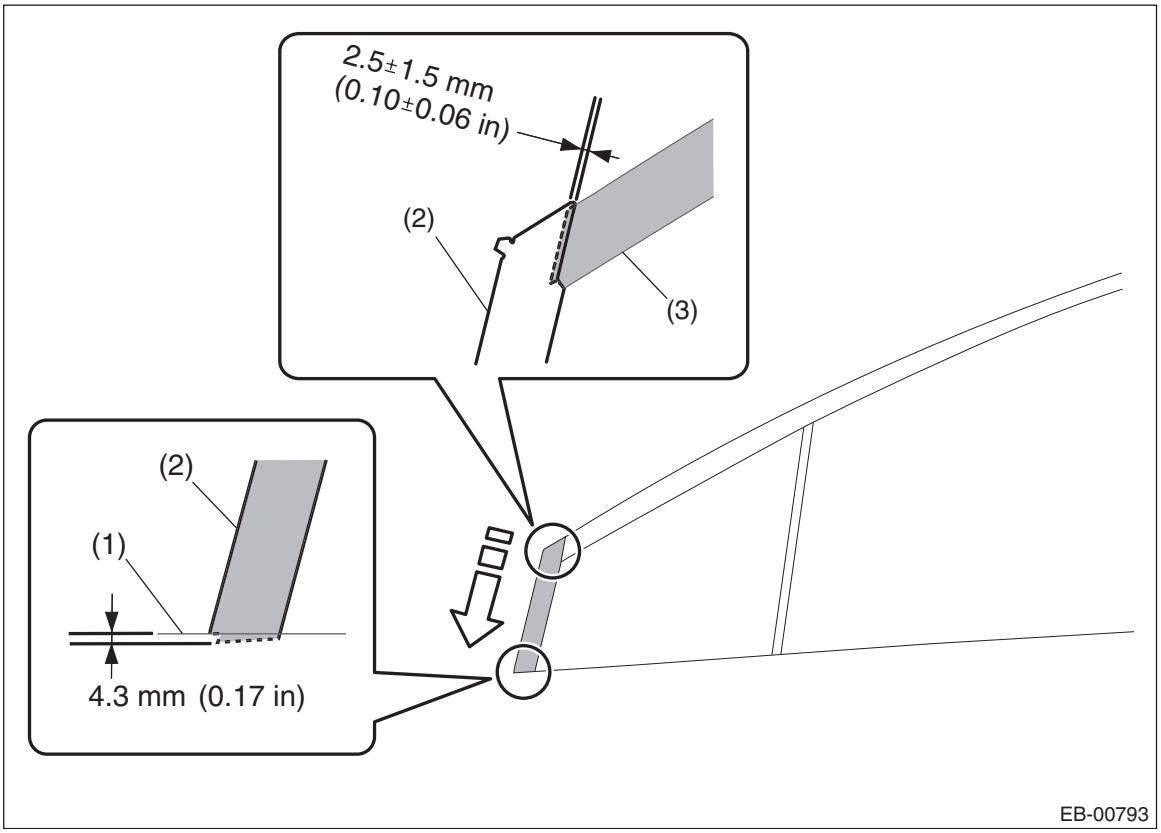
1) Apply the front door sash tape - medium from the rear of the vehicle towards the front.

NOTE:
Apply the end of the tape to the position shown in the figure.



2) Apply the front door sash tape - front from the top of the vehicle towards the bottom.

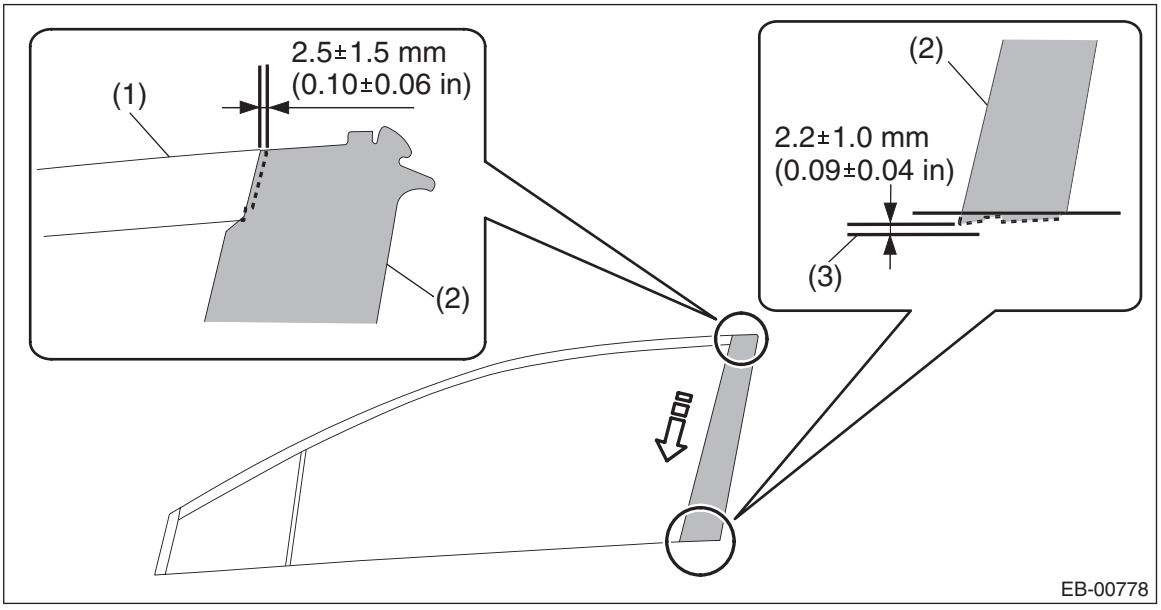
NOTE:
Apply the end of the tape to the position shown in the figure.



(1) Upper end of weather strip (2) Front door sash tape - front (3) Front door sash tape - medium

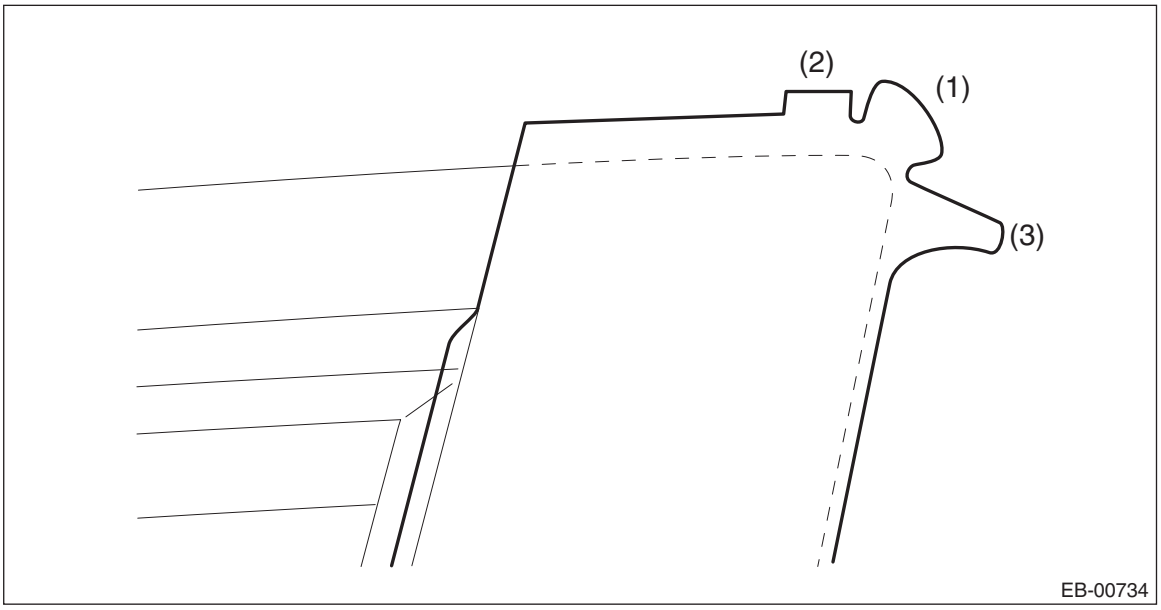
3) Apply the front door sash tape - rear from the top of the vehicle towards the bottom.

NOTE:
Apply the end of the tape to the position shown in the figure.



(1) Front door sash tape - medium (2) Front door sash tape - rear (3) End of panel outer

4) Fold the corners at the door upper end area in the order of (1) - (3).



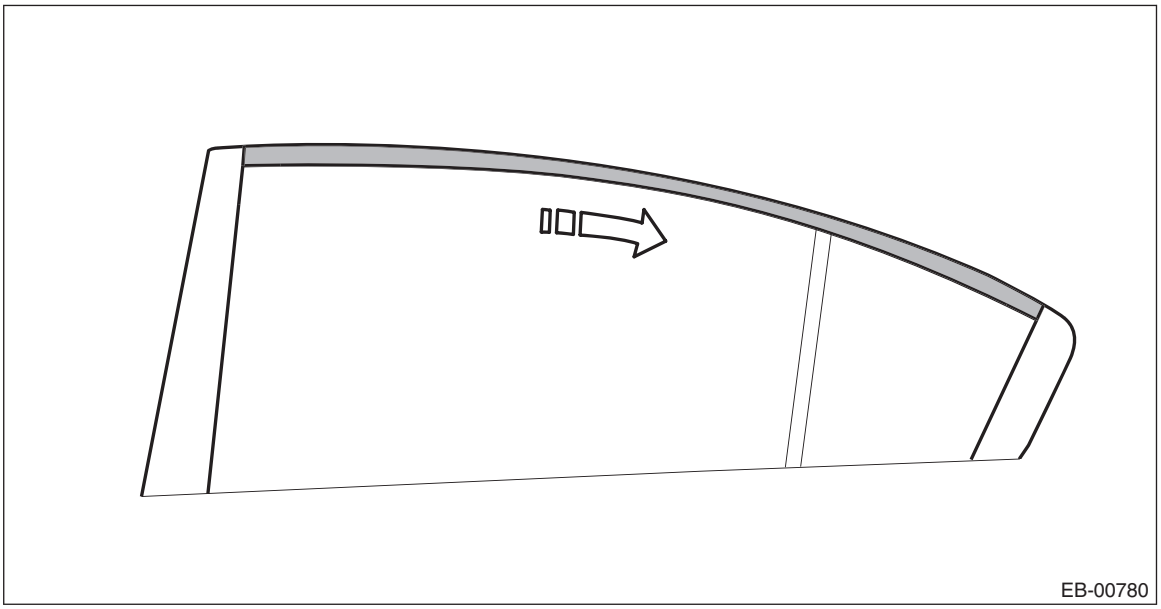
5) Thereafter, install door parts in the reverse order of disassembly.
6) When installing the panel assembly - front door, make sure that a uniform clearance is created around the panel. For the dimension of clearance, refer to “SPECIFICATION” in “General Description”. <Ref. to EB-2, SPECIFICATION, General Description.>

## 2. REAR DOOR

**4 door model**

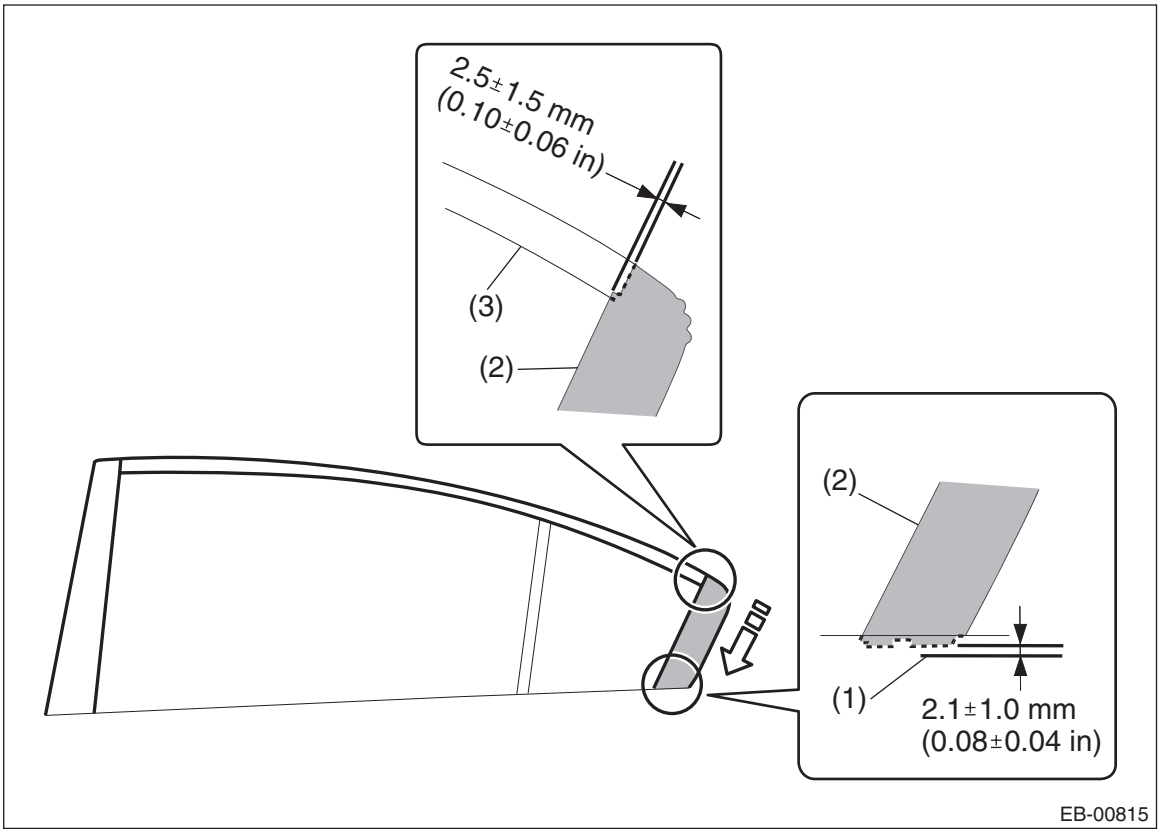
1) Apply the rear door sash tape - medium from the front of the vehicle towards the rear.

NOTE:
Apply the end of the tape to the position shown in the figure.



2) Apply the rear door sash tape - rear from the top of the vehicle towards the bottom.

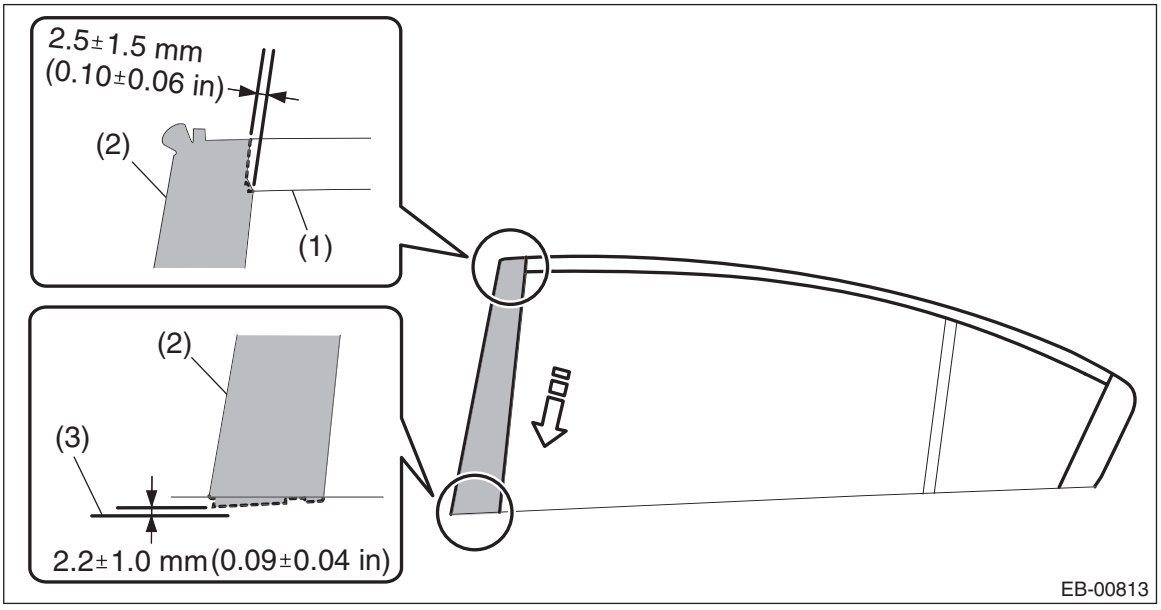
NOTE:
Apply the end of the tape to the position shown in the figure.



(1) End of panel outer (2) Rear door sash tape - rear (3) Rear door sash tape - medium

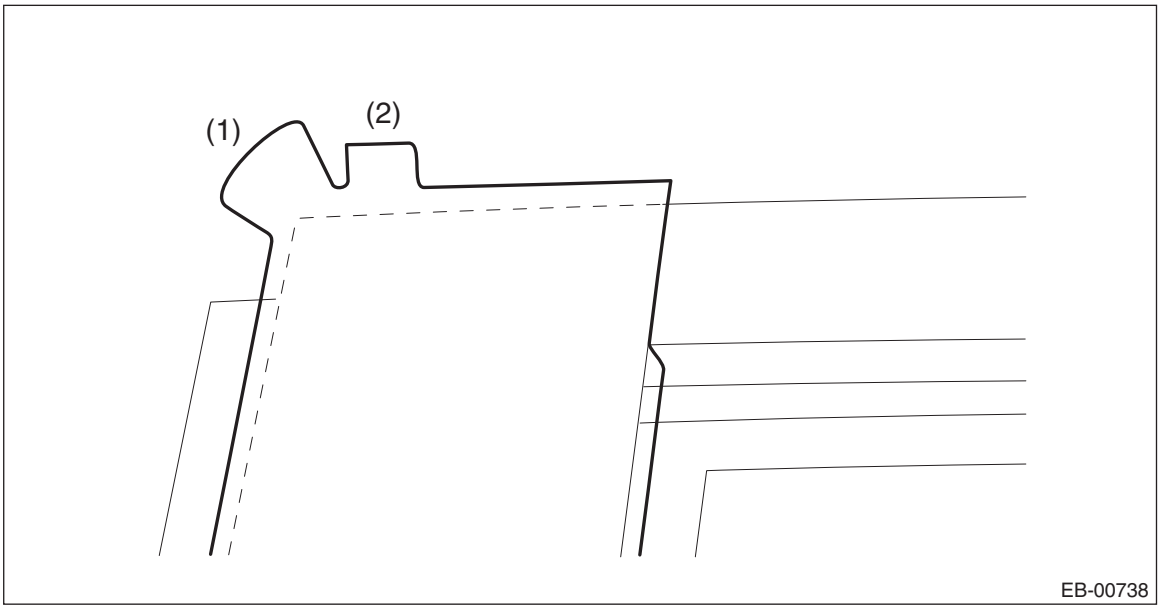
3) Apply the rear door sash tape - front from the top of the vehicle towards the bottom.

NOTE:
Apply the end of the tape to the position shown in the figure.



(1) Rear door sash tape - medium (2) Rear door sash tape - front (3) End of panel outer

4) Fold the corners at the door upper end area in the order of (1) - (2).



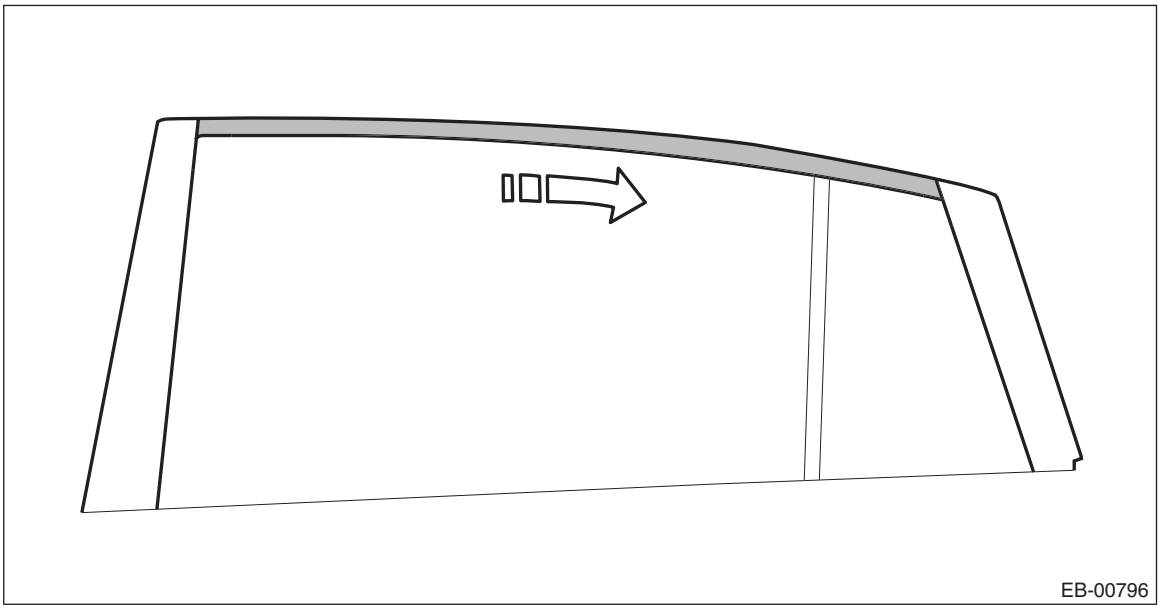
5) Thereafter, install door parts in the reverse order of disassembly.
6) When installing the panel assembly - front door, make sure that a uniform clearance is created around the panel. For the dimension of clearance, refer to “SPECIFICATION” in “General Description”. <Ref. to EB-2, SPECIFICATION, General Description.>

## 3. REAR DOOR

**5 door model/XV model**

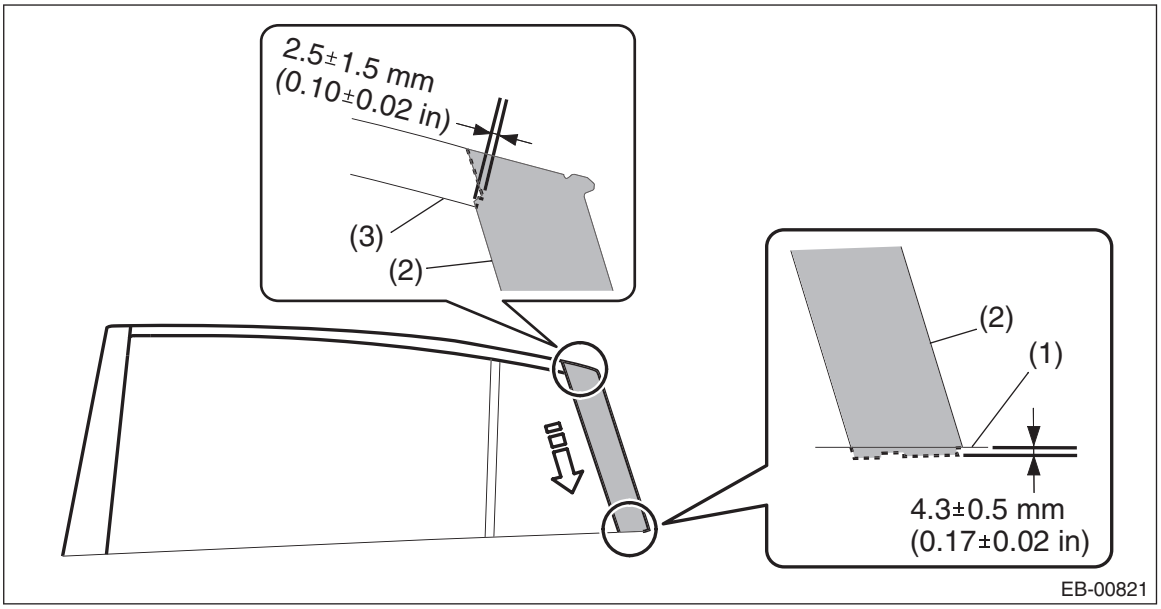
1) Apply the rear door sash tape - medium from the front of the vehicle towards the rear.

NOTE:
Apply the end of the tape to the position shown in the figure.



2) Apply the rear door sash tape - rear from the top of the vehicle towards the bottom.

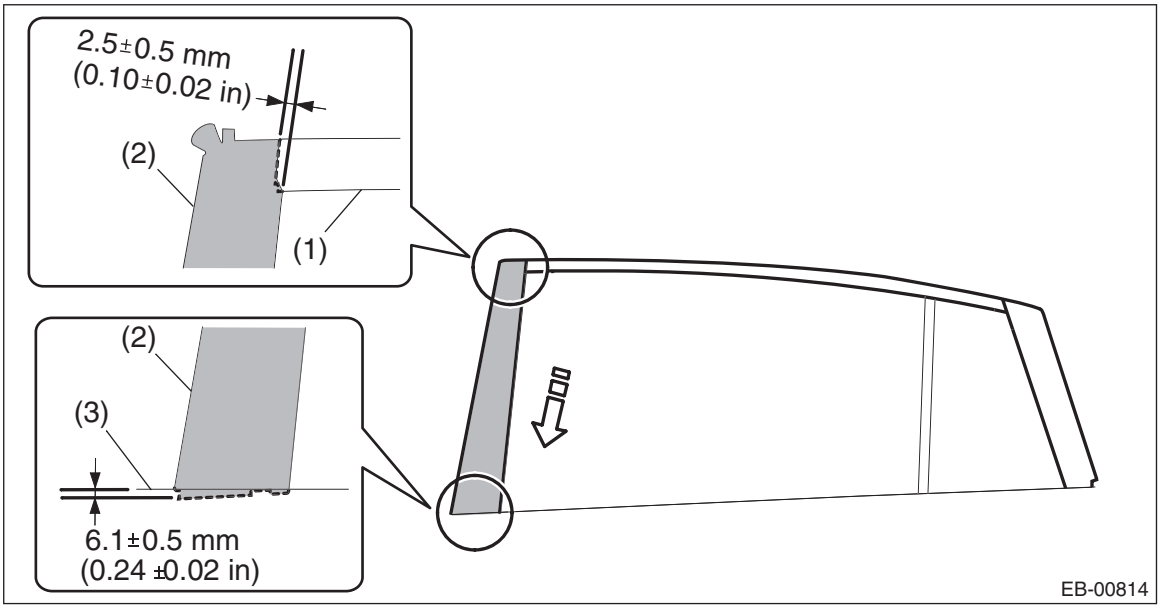
NOTE:
Apply the end of the tape to the position shown in the figure.



(1) Upper end of weather strip (2) Rear door sash tape - rear (3) Rear door sash tape - medium

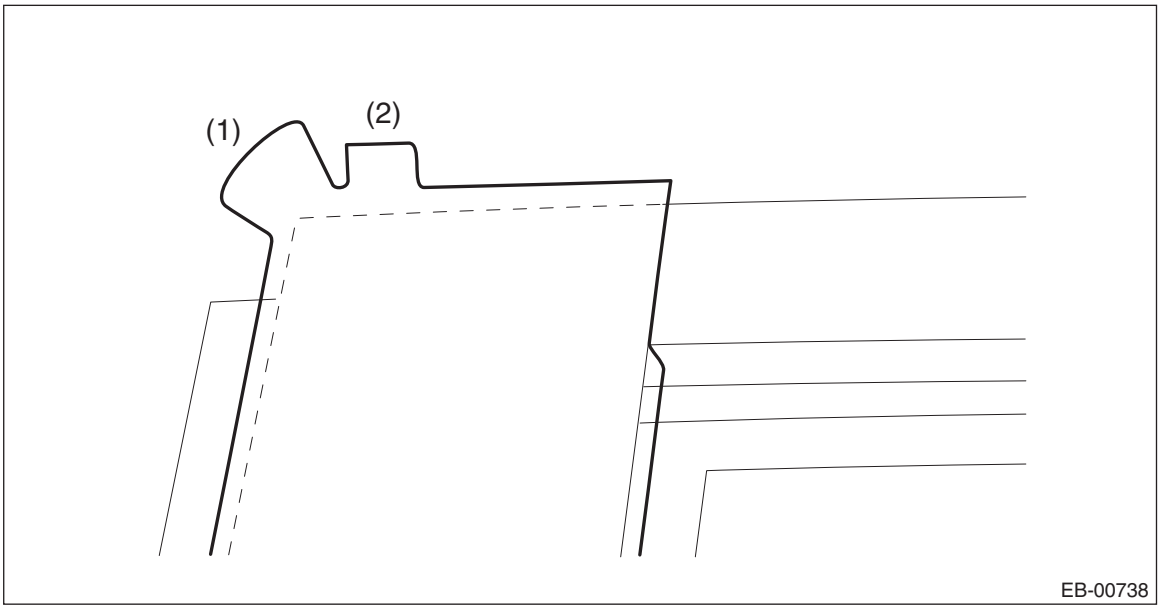
3) Apply the rear door sash tape - front from the top of the vehicle towards the bottom.

NOTE:
Apply the end of the tape to the position shown in the figure.



(1) Rear door sash tape - medium (2) Rear door sash tape - front (3) Upper end of weather strip

4) Fold the corners at the door upper end area in the order of (1) - (2).



5) Thereafter, install door parts in the reverse order of disassembly.
6) When installing the panel assembly - front door, make sure that a uniform clearance is created around the panel. For the dimension of clearance, refer to “SPECIFICATION” in “General Description”. <Ref. to EB-2, SPECIFICATION, General Description.>

# 9. Trunk Lid

## A: REMOVAL

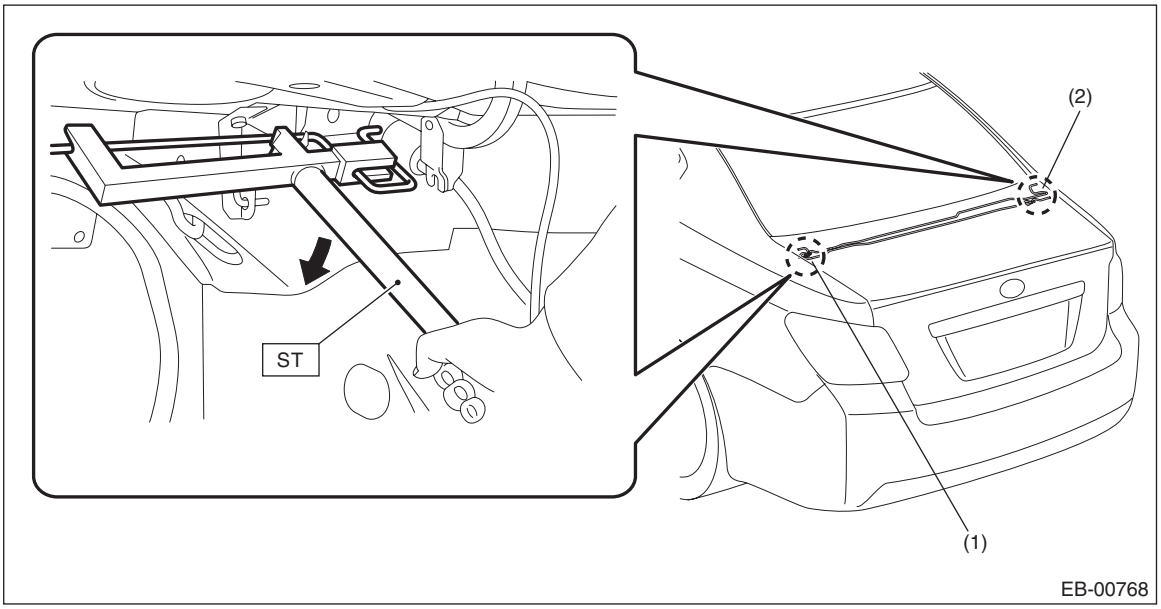
### 1. TORSION BAR

1) Open the trunk lid COMPL.
2) Using the ST, remove the torsion bar - trunk lid.

**CAUTION:**
**During removal and installation, handle the torsion bar - trunk lid carefully, because it will generate reactive force.**

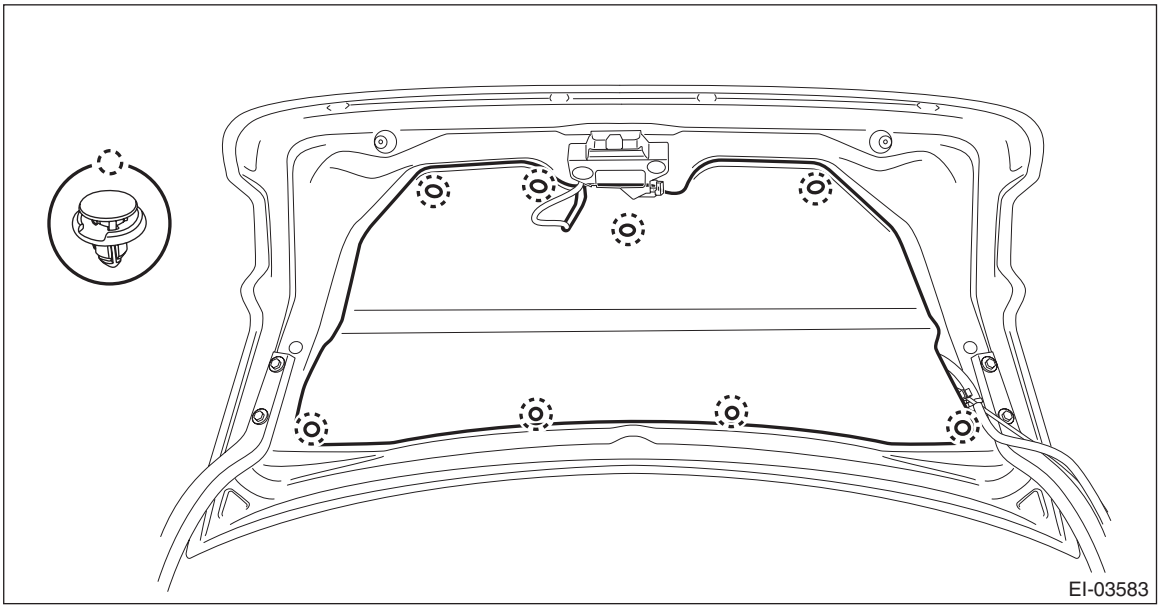
***Preparation tool:***
***ST: REMOVER (927780000)***

(1) Remove the torsion bar - trunk lid on the LH side from the hinge link.
(2) Remove the torsion bar - trunk lid on the RH side from the hinge link.

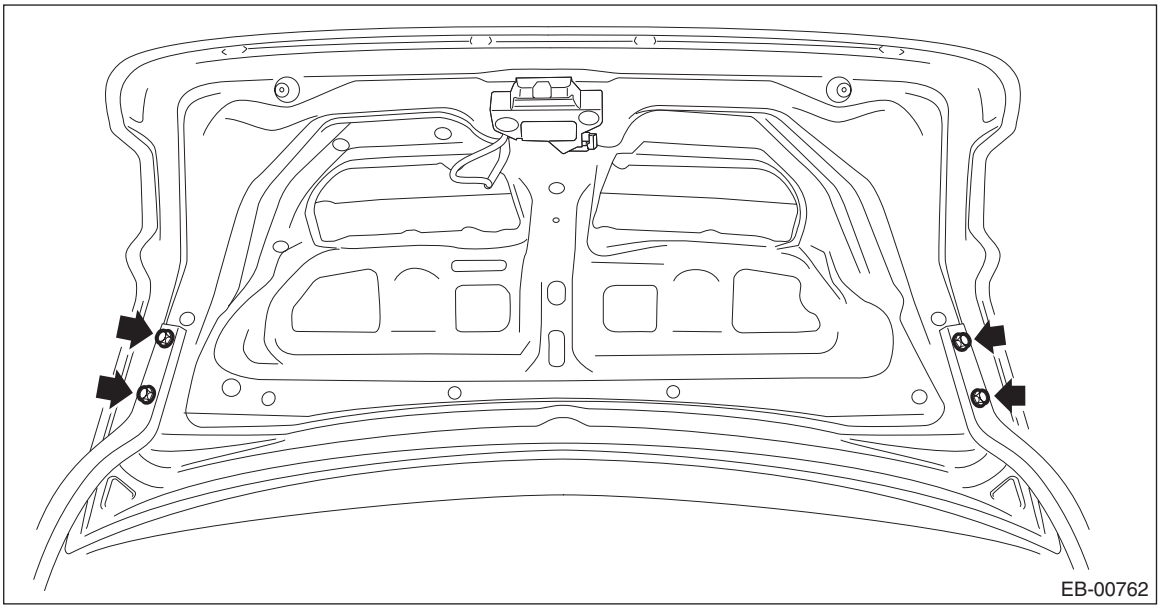


### 2. TRUNK LID PANEL

1) Disconnect the ground cable from battery.
2) Remove the clips, and remove the trim panel - trunk lid.



3) Disconnect the connector to remove the trunk lid harness.
4) Remove the lock assembly - trunk lid. <Ref. to SL-50, REMOVAL, Trunk Lid Latch and Actuator Assembly.>
5) Remove the garnish - trunk. <Ref. to EI-151, REMOVAL, Trunk Lid Garnish.>
6) Remove the trunk lid COMPL.
   (1) Remove the grommet and pull out the trunk lid harness. (RH side only)
   (2) Remove the left and right bolts, and remove the trunk lid COMPL.



7) Remove the trunk lid arm assembly.
   (1) Remove the torsion bar - trunk lid from the trunk lid arm. <Ref. to EB-53, TORSION BAR, REMOVAL, Trunk Lid.>
   (2) Remove the trim panel assembly - rear shelf. <Ref. to EI-112, REMOVAL, Rear Shelf Trim.>
   (3) Remove the bolts, then remove the trunk lid arm assembly.

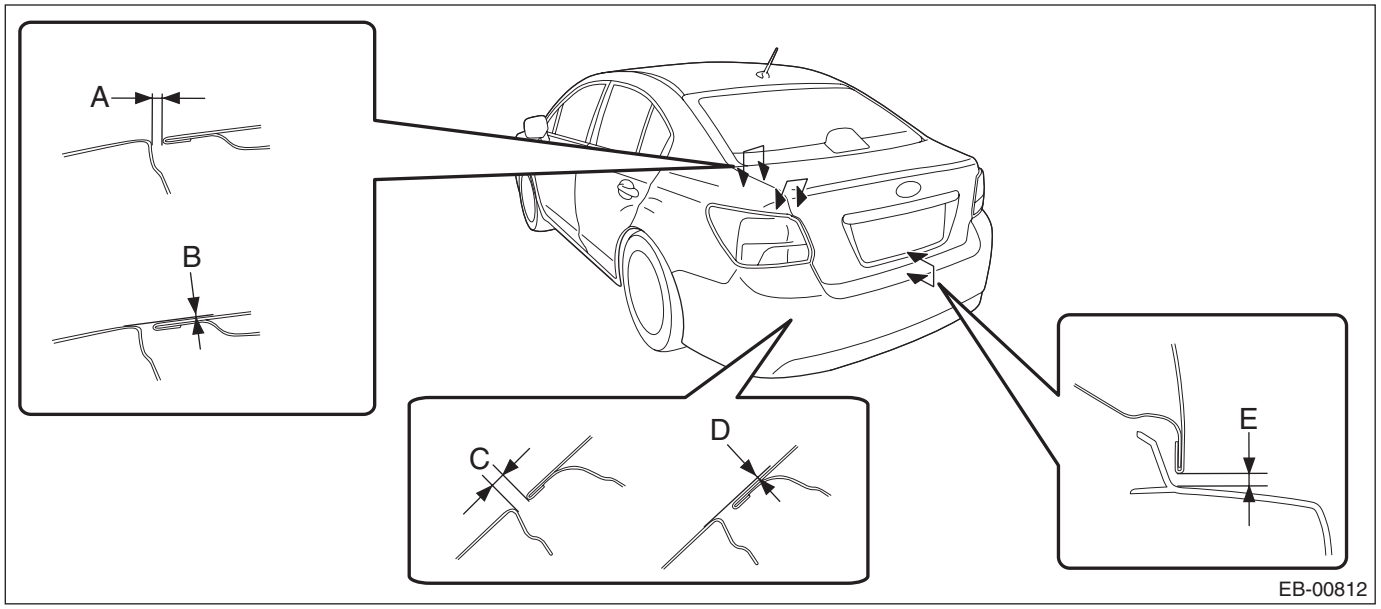
## B: INSTALLATION

1) Install each part in the reverse order of removal.
2) Apply grease to the rotating area of hinges.
3) Install while paying attention to make a uniform clearance around the trunk lid COMPL. <Ref. to EB-55, ADJUSTMENT, Trunk Lid.>

***Tightening torque:***
***Refer to "COMPONENT" of "General Description". <Ref. to EB-6, TRUNK LID PANEL, COMPONENT, General Description.>***

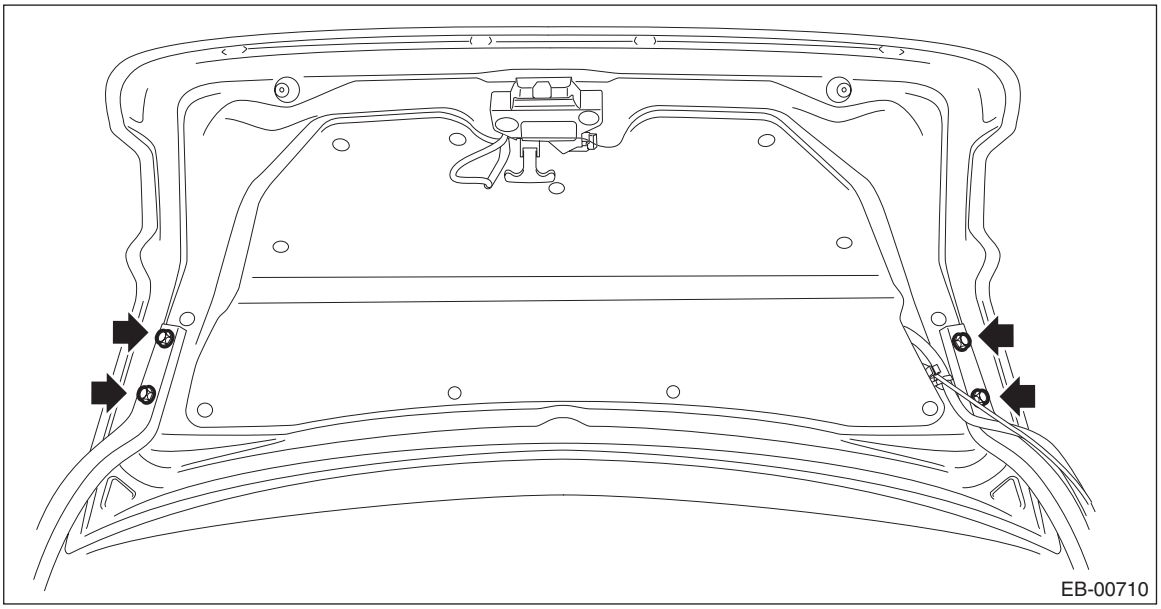
## C: ADJUSTMENT

Adjust the clearance around the trunk lid COMPL as follows.

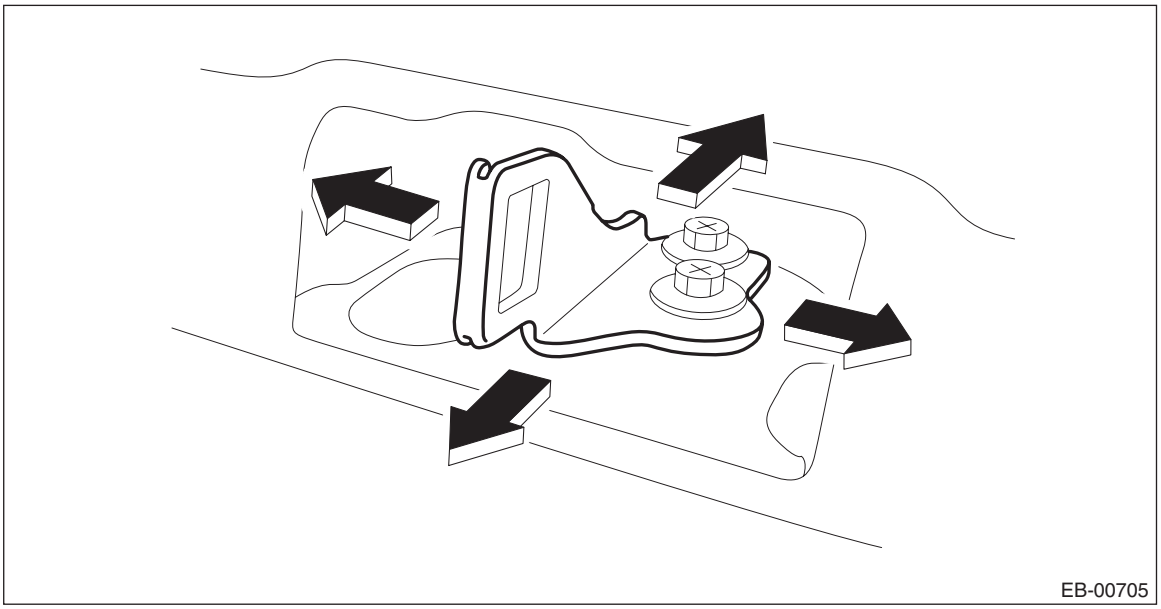


| Part | | Standard |
|---|---|---|
| A | Trunk lid COMPL to Rear quarter panel | 3.5±1.0 mm (0.14±0.04 in) |
| B | Surface level gap between trunk lid COMPL and rear quarter panel | –0.5+1.0, –0.5 mm (–0.02+0.04, –0.02 in) |
| C | Trunk lid COMPL to Rear quarter panel | 3.5±1.0 mm (0.14±0.04 in) |
| D | Surface level gap between trunk lid COMPL and rear quarter panel | –0.5±0.7 mm (0.02±0.03 in) |
| E | Trunk lid COMPL to Bumper face - rear | 7.5±1.0 mm (0.3±0.04 in) |

1) Adjust the horizontal position of the trunk lid COMPL.
   (1) Loosen the mounting bolt.
   (2) Adjust the horizontal clearance of the trunk lid COMPL.



2) Adjust the surface level gap between the trunk lid COMPL and the body.
   (1) Remove the trim panel - trunk rear.
   (2) Loosen the bolt.
   (3) Tap the striker - trunk using a plastic hammer to adjust the surface level gap between the trunk lid COMPL and the body.



# 10.Rear Gate

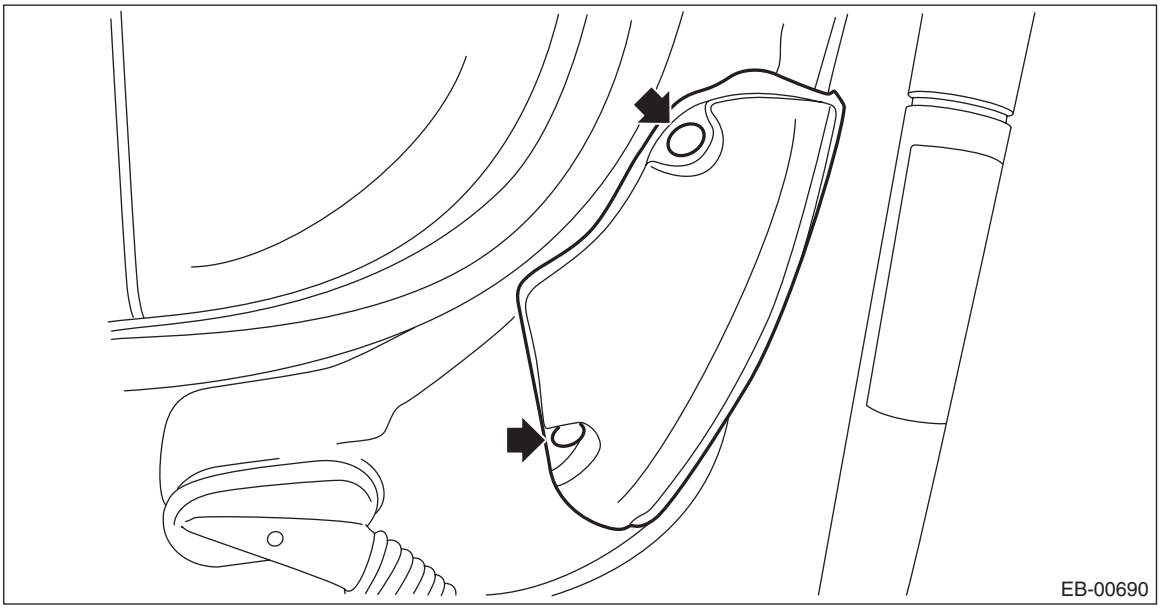
## A: REMOVAL

**CAUTION:**
**The panel - rear gate is heavy. When removing and installing it, always work in a team of two or more persons.**

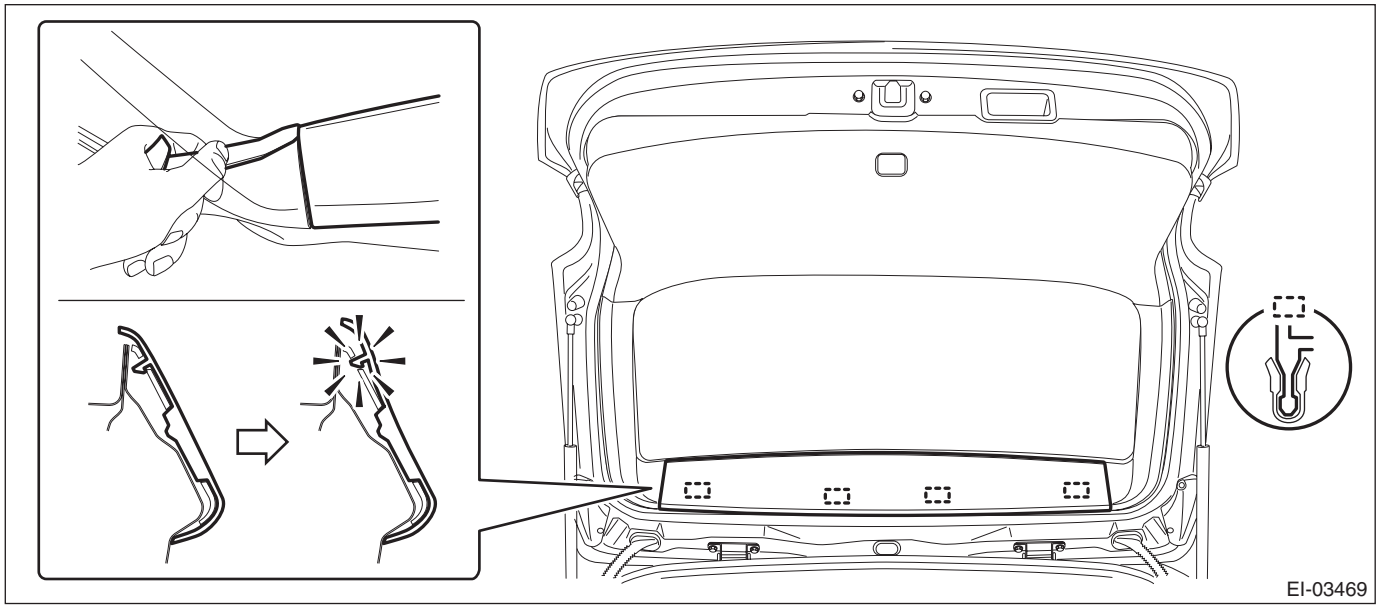
### 1. REAR GATE PANEL

1) Disconnect the ground cable from battery.
2) Remove the following parts. <Ref. to EI-152, REMOVAL, Rear Gate Garnish.>
- Trim panel - rear gate
- Arm assembly - rear wiper and motor assembly - rear wiper
- Garnish assembly - rear gate

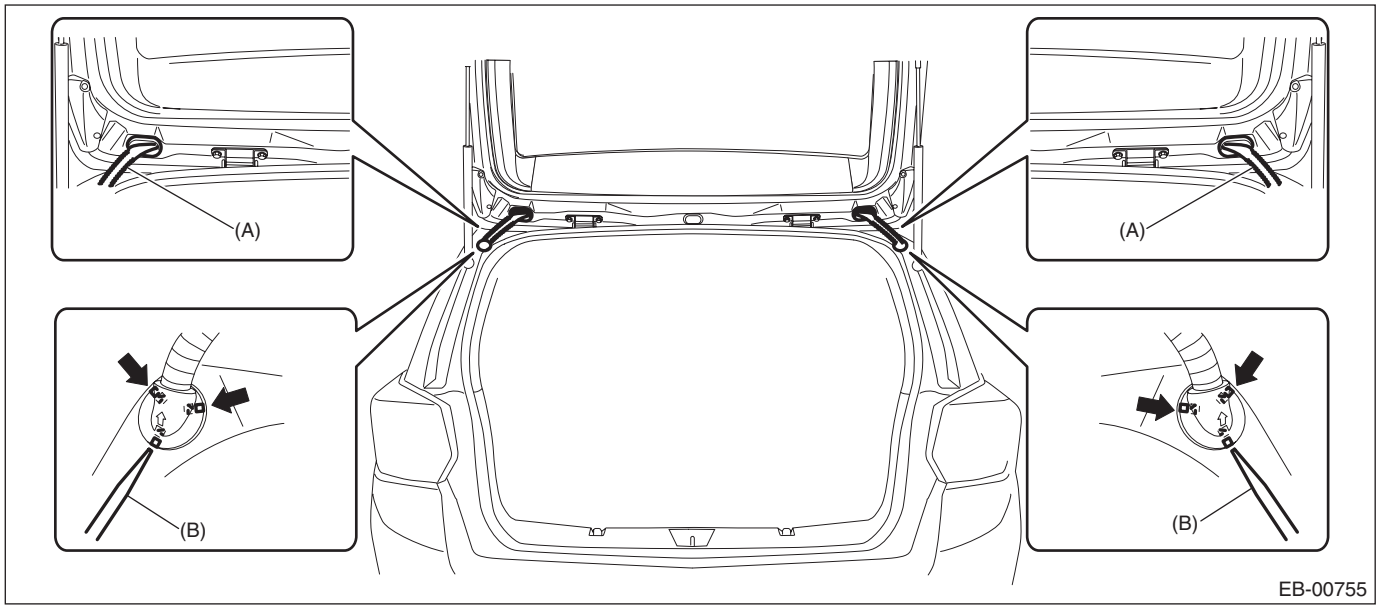
3) Remove the light assembly - high-mounted and the nozzle - rear washer. <Ref. to WW-44, REMOVAL, Rear Washer.>
4) Remove the rear gate latch and actuator - rear gate. <Ref. to SL-48, REMOVAL, Rear Gate Latch and Actuator Assembly.>
5) Remove the clips, and remove the drip - rear gate.



6) Remove the trim panel - rear gate UPR.
   (1) Remove the claws on the trim edge.
   (2) Release the claws in the center of trim, and remove the trim panel - rear gate UPR.



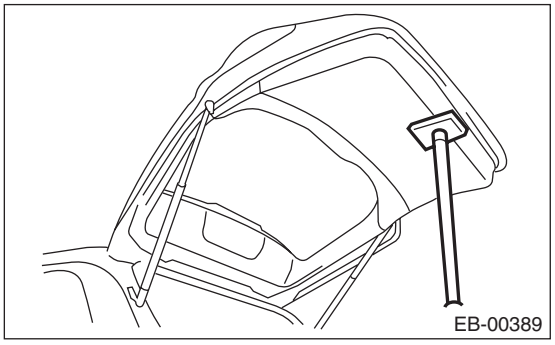
7) Remove the rubber duct (A).
   (1) Pull out the claw while pushing it using a flat tip screwdriver (B) or similar tools.
   (2) Remove the rubber duct (A) connection.



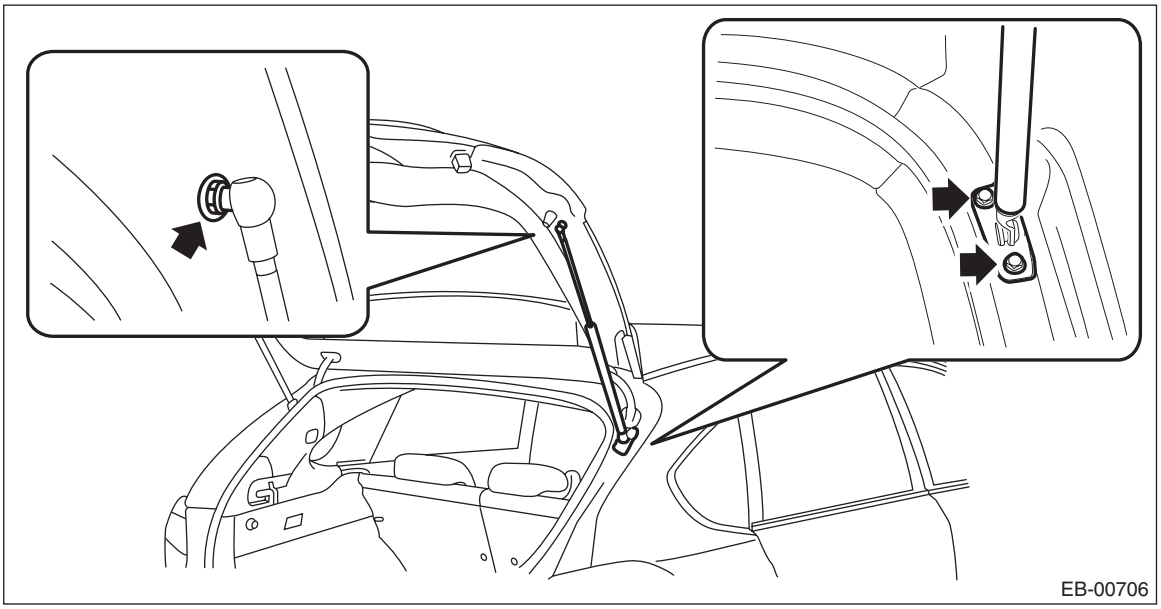
8) Pull out the harness and the hose assembly - rear washer from the panel - rear gate.
9) Remove harness clip of each harness from the panel - rear gate.

10) Before removing the stay assembly - rear gate, prevent the panel - rear gate from closing by using a prop or the like.

**CAUTION:**
**If the prop comes off, operators may get injured and vehicle may get damaged. Make sure to support the panel - rear gate with secure material to prevent injury or damage.**

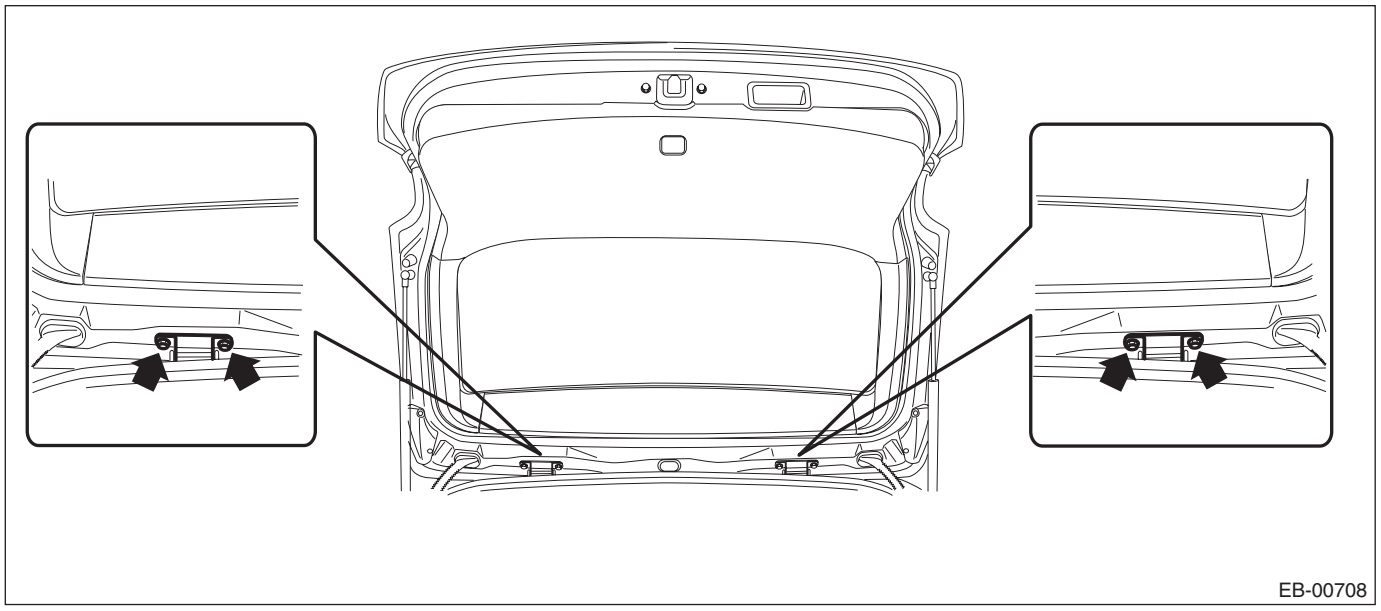


11) Remove the mounting bolts from the stay assembly - rear gate.



12) Remove the bolts of the hinge - rear gate, and remove the panel - rear gate.

**CAUTION:**
**The panel - rear gate is heavy. When removing and installing it, always work in a team of two or more persons.**



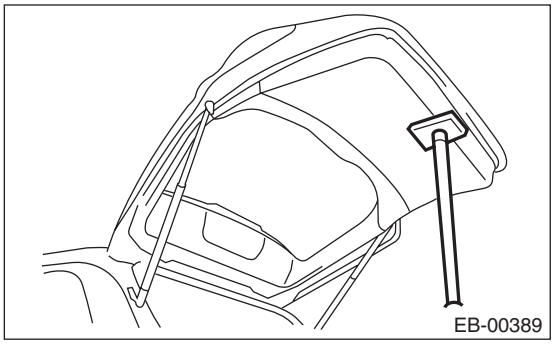
13) Remove the hinge - rear gate from the vehicle.

## 2. REAR GATE DAMPER STAY

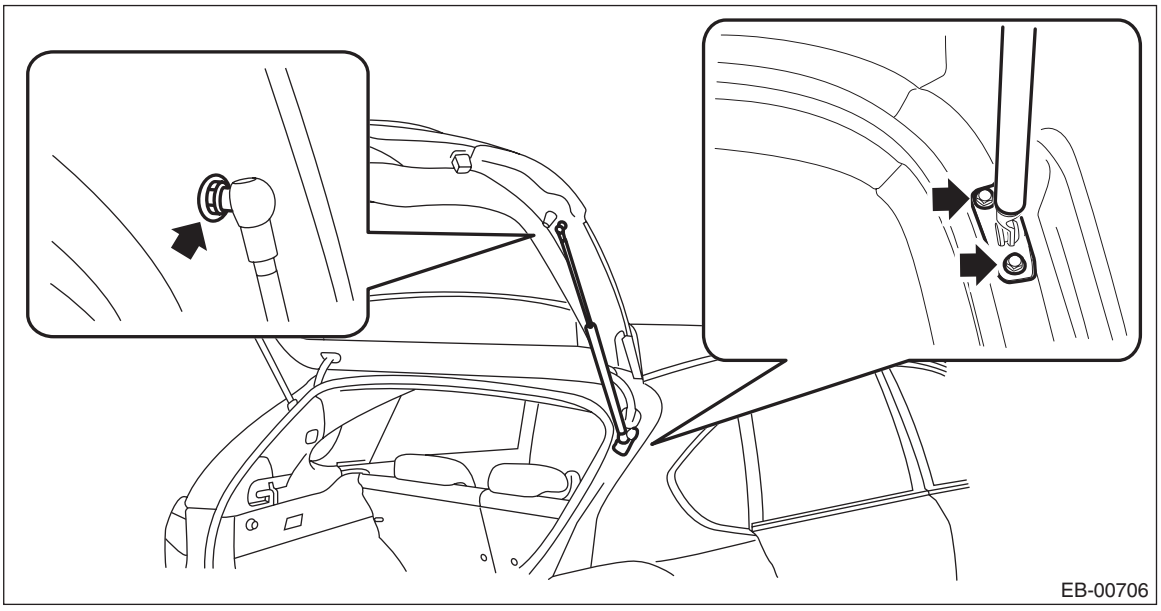
**CAUTION:**
- **Do not damage piston rods and oil seals.**
- **Never disassemble cylinders: They contain gas.**
- **The panel - rear gate is heavy. When removing and installing it, always work in a team of two or more persons.**

1) Before removing the stay assembly - rear gate, prevent the panel - rear gate from closing by using a prop or the like.

**CAUTION:**
**If the prop comes off, operators may get injured and vehicle may get damaged. Make sure to support the panel - rear gate with secure material to prevent injury or damage.**



2) Remove the mounting bolts and remove the stay assembly - rear gate.



# B: INSTALLATION

## 1. REAR GATE PANEL

**CAUTION:**
**The panel - rear gate is heavy. When removing and installing it, always work in a team of two or more persons.**

1) Install the hinge - rear gate to the vehicle body.
2) Temporarily install the panel - rear gate to the hinge - rear gate.

NOTE:
When installing, make sure that a uniform clearance is created around the panel - rear gate.

3) Adjust the clearance around the panel - rear gate. <Ref. to EB-63, ADJUSTMENT, Rear Gate.>
4) Tighten the bolts of the hinge - rear gate.

***Tightening torque:***
***25 N·m (2.55 kgf-m, 18.4 ft-lb)***

5) Install each part in the reverse order of removal.

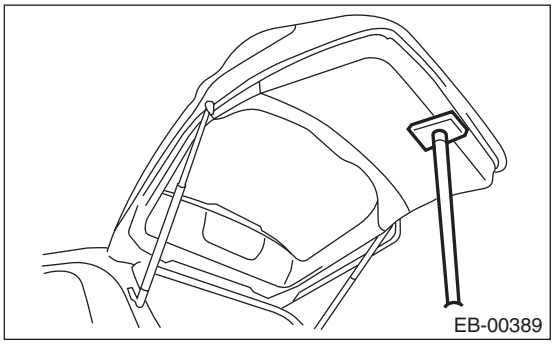
***Tightening torque:***
***Rear gate parts: <Ref. to EB-7, REAR GATE, COMPONENT, General Description.>***
***Garnish assembly - rear gate: 4.5 N·m (0.46 kgf-m, 3.3 ft-lb)***
***Arm assembly - rear wiper and motor assembly - rear wiper: <Ref. to WW-3, REAR WIPER, COMPONENT, General Description.>***

## 2. REAR GATE DAMPER STAY

**CAUTION:**
**The panel - rear gate is heavy. When removing and installing it, always work in a team of two or more persons.**

1) Prevent the panel - rear gate from closing using prop or the like.

**CAUTION:**
**If the prop comes off, operators may get injured and vehicle may get damaged. Make sure to support the panel - rear gate with secure material to prevent injury or damage.**

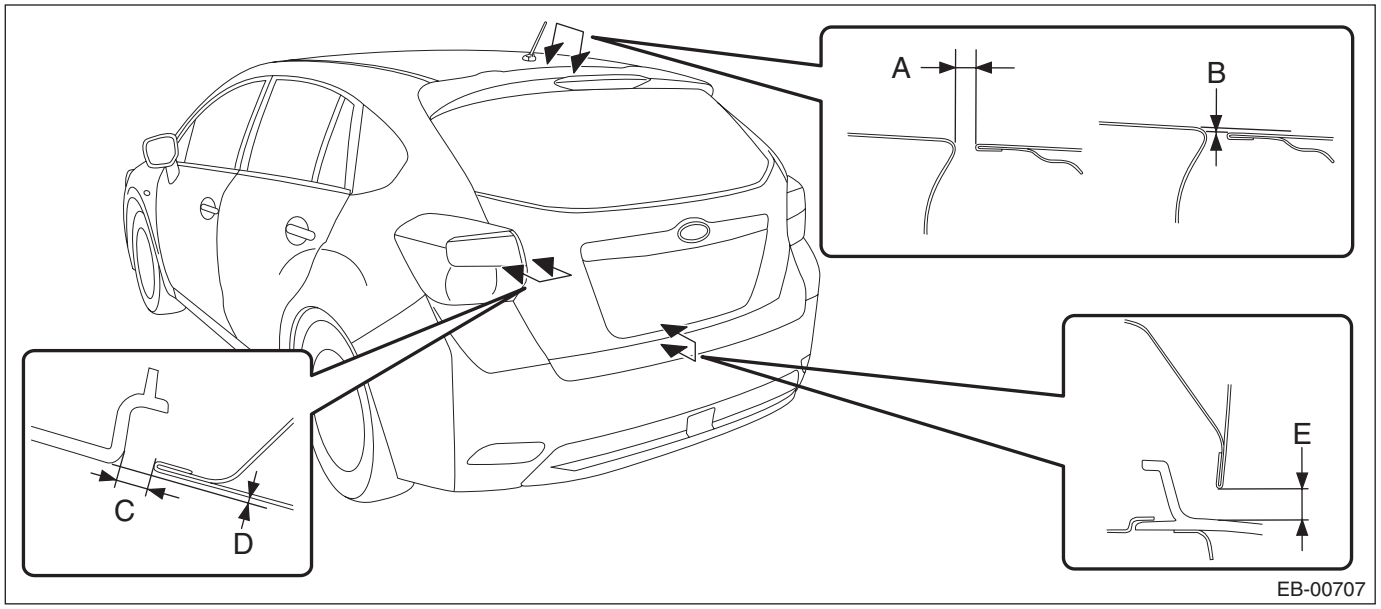


2) Install each part in the reverse order of removal.

***Tightening torque:***
***Refer to "COMPONENT" of "General Description". <Ref. to EB-7, REAR GATE, COMPONENT, General Description.>***

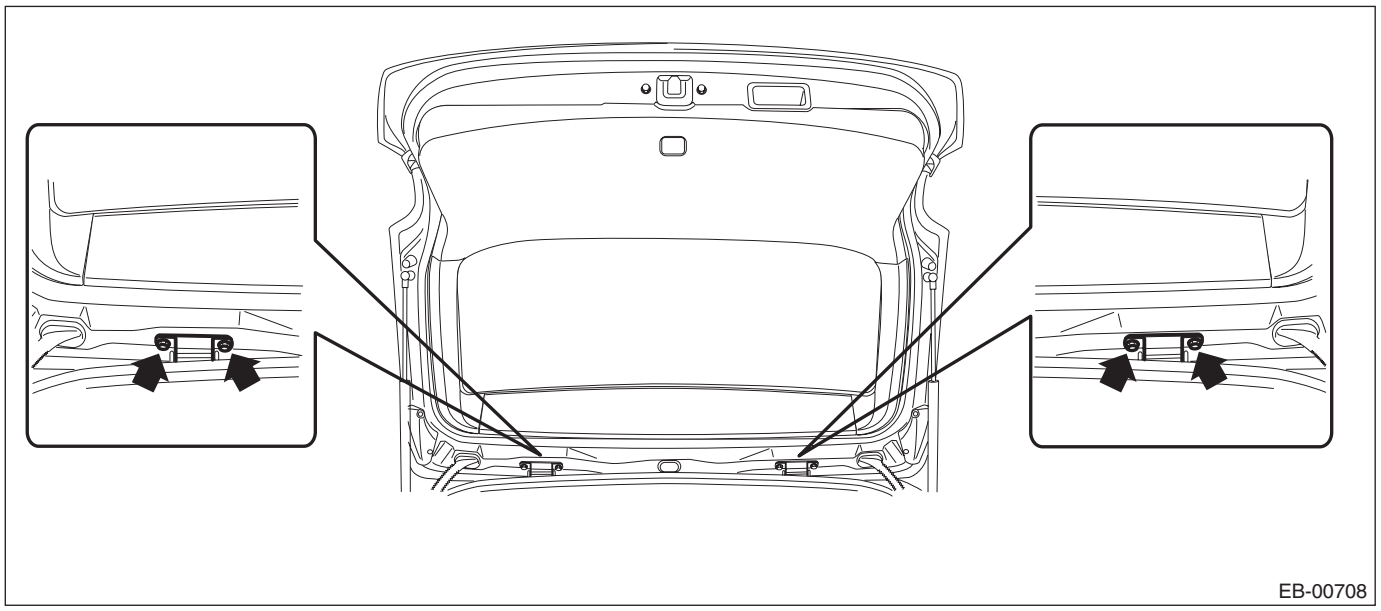
## C: ADJUSTMENT

Adjust the clearance around the panel - rear gate as follows.



| Part | | Standard |
|---|---|---|
| A | Panel - rear gate to Roof panel | 6.0+1.0, –0.5 mm (0.24+0.04, –0.02 in) |
| B | Surface level gap: Panel - rear gate to Roof panel | 1.0±1.0 mm (0.04±0.04 in) |
| C | Panel - rear gate to Light assembly - rear combination | 6.0±1.0 mm (0.24±0.04 in) |
| D | Surface level gap: Panel - rear gate to Light assembly - rear combination | 1.0±1.0 mm (0.04±0.04 in) |
| E | Panel - rear gate to Bumper face - rear | 8.0±1.5 mm (0.31±0.06 in) |

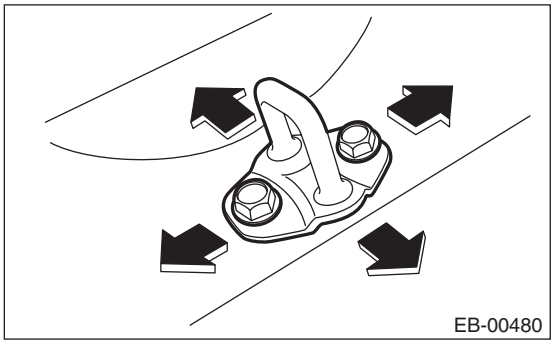
1) Adjust the vertical and horizontal positions of the panel - rear gate.



(1) Loosen the mounting bolts of the hinge - rear gate.
(2) Adjust the vertical and horizontal clearance of the panel - rear gate.

***Tightening torque:***
***25 N·m (2.55 kgf-m, 18.4 ft-lb)***

2) Adjust the surface level gap between the panel - rear gate and the body.



(1) Remove the trim panel - rear skirt.
(2) Loosen the bolt.
(3) Tap the striker - rear gate using a plastic hammer to adjust the surface level gap between the panel - rear gate and the body.

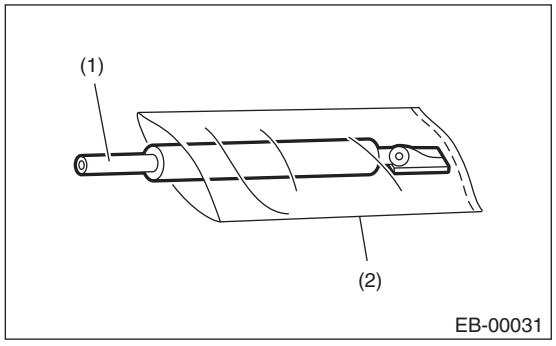
***Tightening torque:***
***25 N·m (2.55 kgf-m, 18.4 ft-lb)***

# D: DISPOSAL

## 1. REAR GATE DAMPER STAY

**CAUTION:**
**Gas is colorless, odorless, and harmless. However, gas pressure may spray cutting powder or oil. Be sure to wear dust-resistant goggles.**

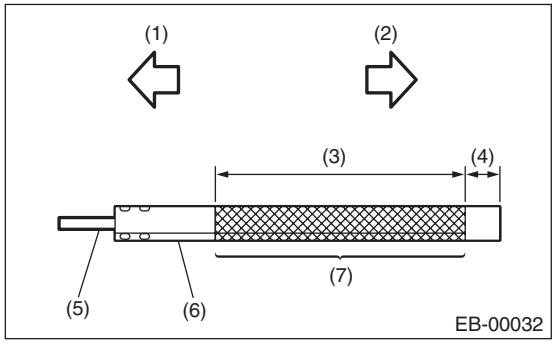
1) Cover with a vinyl sack as shown in the figure.



(1) Stay ASSY - rear gate
(2) Vinyl sack

NOTE:
Prevent the vinyl sack from being caught by drill cutting edge.

2) Lift the body side slightly with piston rods fully extended, and secure the body side with vise.
Drill a hole of 2 to 3 mm (0.08 to 0.12 in) diameter at a point 6 to 196 mm (0.24 to 7.72 in) from the body side, and bleed the gas in the stay assembly - rear gate completely.



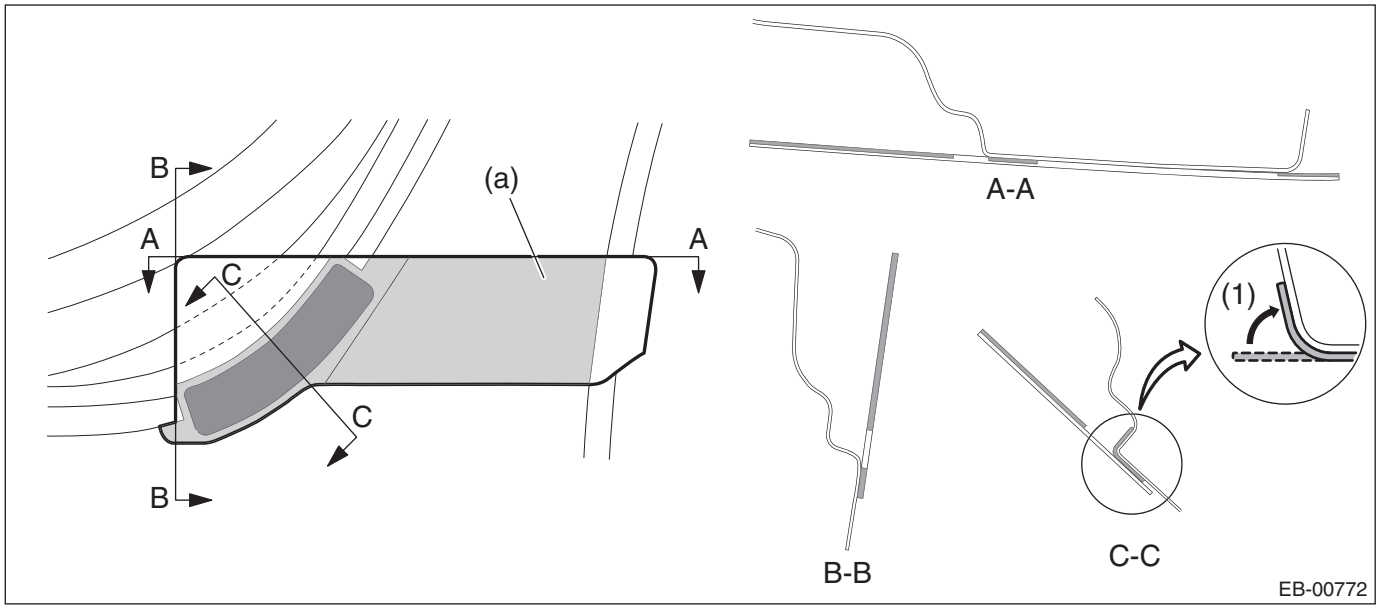
(1) Door side
(2) Body side
(3) 196 mm (7.72 in)
(4) 6 mm (0.24 in)
(5) Piston rod
(6) Cylinder
(7) Portion to be drilled

# 11.Protector Tape

## A: INSTALLATION

Apply the protector tape by the following steps.

### 1. REAR QUARTER PROTECTOR (MODELS WITHOUT SIDE SILL SPOILER)



(1) Apply the protector tape by aligning it to the rounded edge.

1) Clean the area around applying position to remove any foreign objects on body.
2) Detach the backing paper from the temporary retention area (a) and apply the protector tape after positioning it correctly.
3) Detach the backing papers, and moisten the applying area and the backside of protector tape by spraying liquid (mild detergent solution at 3% concentration).
4) Apply the protector tape to the vehicle body.

**CAUTION:**
**Remove the water or air bubbles out of the protector tape by using the plastic or rubber spatula.**
5) Detach the application tape and temporary retention tape.
6) Bend the tack-in end and apply it as shown by (1) in the figure.

# CRUISE CONTROL SYSTEM

# CC

| | | Page |
|---|---|---|
| 1. | General Description | 2 |
| 2. | Relay and Fuse | 4 |
| 3. | Cruise Control System | 5 |
| 4. | Cruise Control Module | 6 |
| 5. | Cruise Control Command Switch | 7 |
| 6. | Combination Meter | 11 |

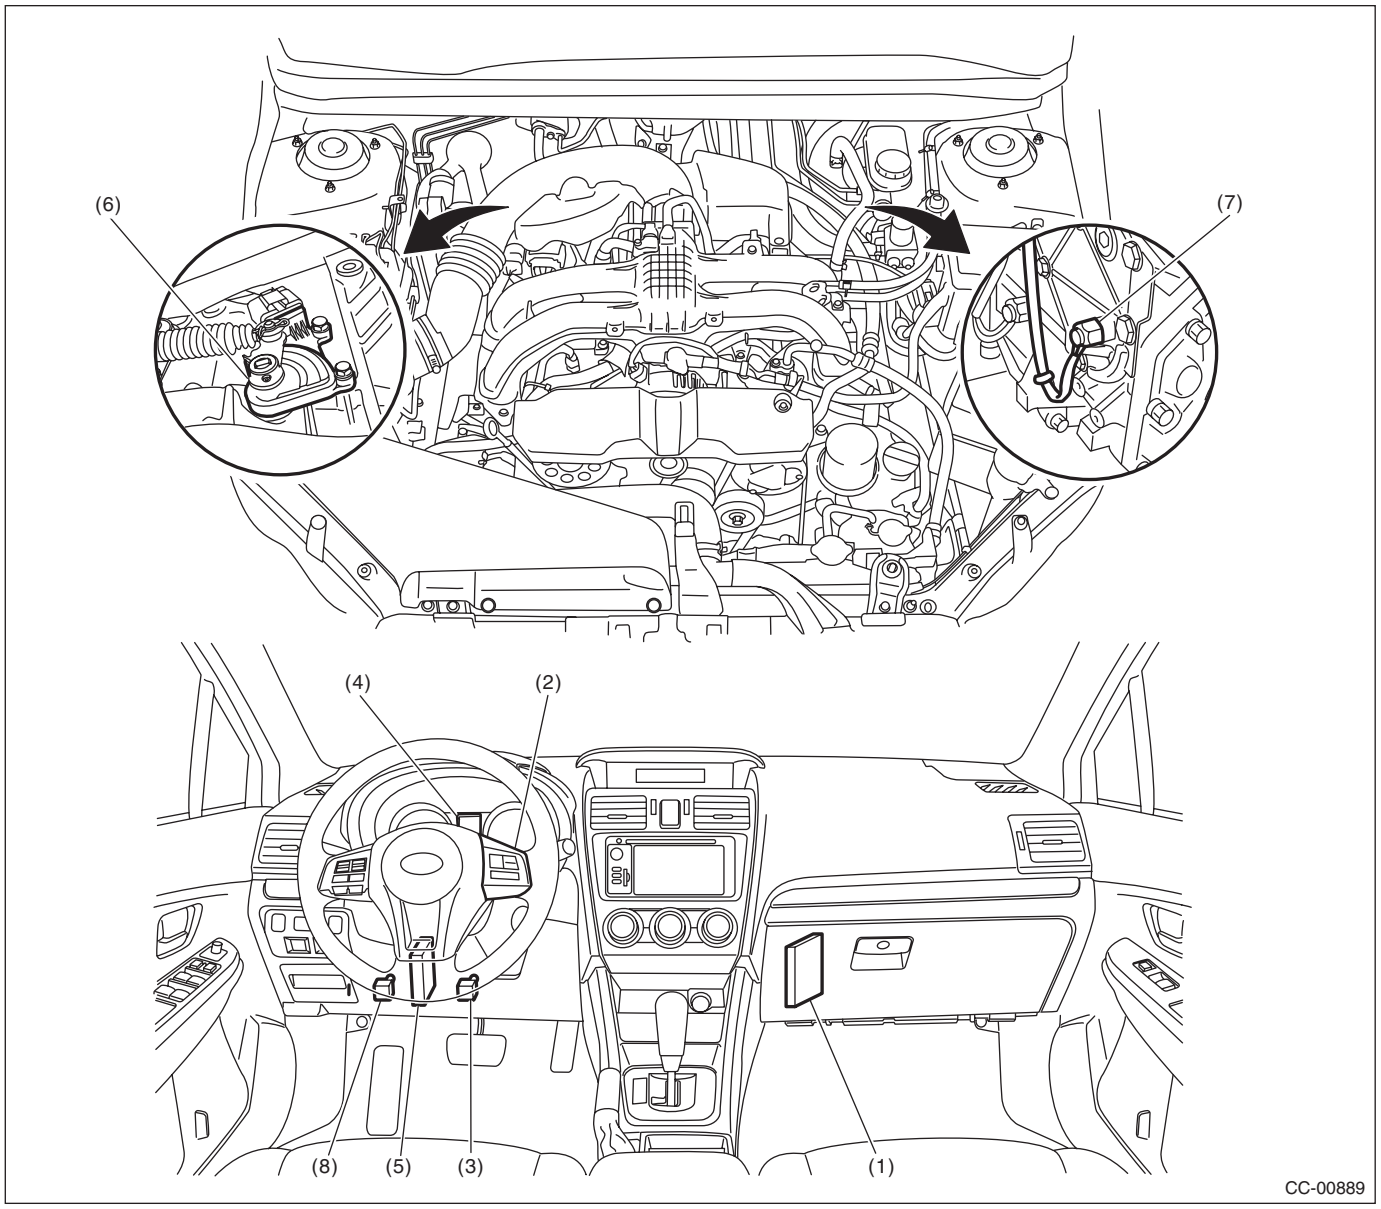
| 8. | Clutch Switch | 13 |
| 9. | Inhibitor Switch | 14 |
| 10. | Transmission Control Module (TCM) | 15 |
| 11. | Neutral Position Switch | 16 |
| 12. | Diagnostics with Phenomenon | 17 |

# 1. General Description

## A: COMPONENT



(1) Engine control module (ECM)
(2) Cruise control command switch
(3) Stop light and brake switch
(4) Cruise indicator light and cruise set indicator light
(5) Transmission control module (TCM) (CVT model)
(6) Inhibitor switch (CVT model)
(7) Neutral position switch (MT model)
(8) Clutch switch (MT model)

## B: CAUTION

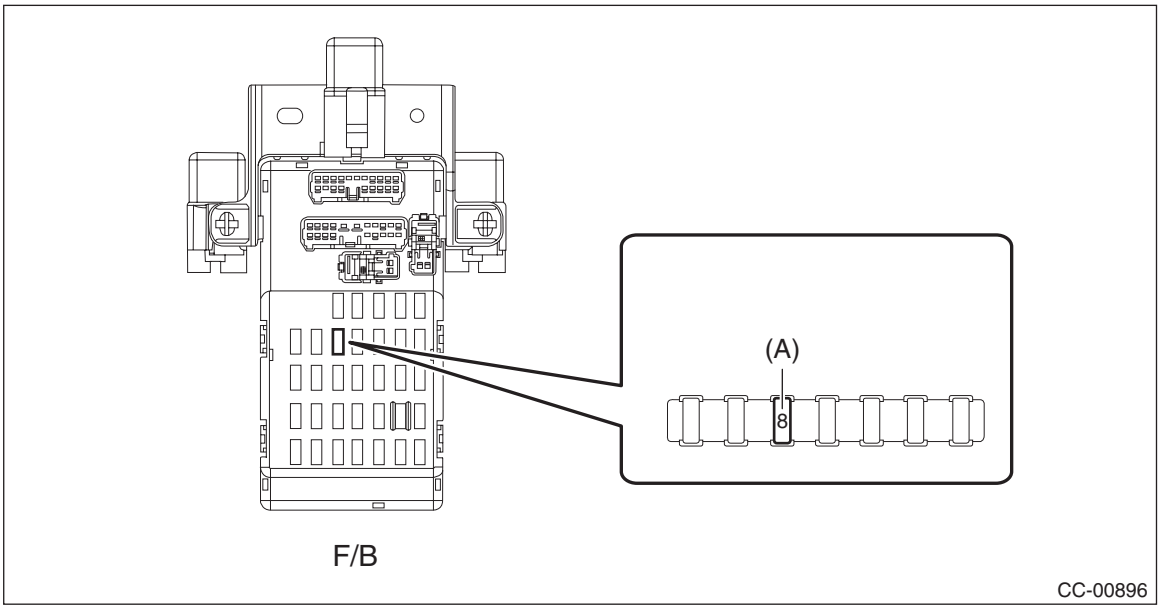
• Before disassembling or reassembling parts, always disconnect the battery ground cable from battery. When replacing the audio, control module and other parts provided with memory functions, record the memory contents before disconnecting the battery ground cable. Otherwise, the memory is cleared.
• Reassemble the parts in the reverse order of disassembly procedure unless otherwise indicated.
• Adjust parts to the given specifications.
• Connect the connectors securely during reassembly.
• After reassembly, make sure that the each component operates normally.
• Yellow connectors and harnesses with yellow tapes around them are the connectors and harnesses for the airbag system. Using a tester above such circuits may cause malfunction of airbag system. Follow the cautions of “AIRBAG SYSTEM” in this case. <Ref. to AB-11, CAUTION, General Description.>
• Be careful not to damage the airbag system wiring harness when servicing electrical parts and switches.
• If the steering wheel and steering angle sensor (steering roll connector) are removed, perform “VDC sensor midpoint setting mode” of the VDC. <Ref. to VDC-19, VDC SENSOR MIDPOINT SETTING MODE, ADJUSTMENT, VDC Control Module and Hydraulic Control Unit (VDCCM&H/U).>

## C: PREPARATION TOOL

| TOOL NAME | REMARKS |
|---|---|
| Circuit tester | Used for measuring resistance and voltage. |
| Steering wheel puller | Used for removing the steering wheel. |

# 2. Relay and Fuse

## A: LOCATION



| | | |
|---|---|---|
| Relay & fuse box | Fuse 15A (stop light & brake switch) | (A) |

NOTE:
For other related fuses, refer to the wiring diagram. <Ref. to WI-15, Power Supply Circuit.>

## B: INSPECTION

### 1. CHECK FUSE

1) Remove the fuse and inspect visually.
2) If the fuse is blown out, replace the fuse.

NOTE:
If the fuse is blown again, check the system wiring harness.

# 3. Cruise Control System

## A: WIRING DIAGRAM

Refer to “Cruise Control System” in the wiring diagram. <Ref. to WI-61, WIRING DIAGRAM, Cruise Control System.>

## B: INSPECTION

Refer to “Basic Diagnostic Procedure” of “CRUISE CONTROL SYSTEM (DIAGNOSTICS)”. <Ref. to CC(diag)-2, Basic Diagnostic Procedure.>

## C: NOTE

For operation procedures of each component of the cruise control system, refer to the respective section.

- Cruise control unit: <Ref. to CC-6, Cruise Control Module.>
- Cruise control command switch: <Ref. to CC-7, Cruise Control Command Switch.>
- Combination meter: <Ref. to CC-11, Combination Meter.>
- Stop light & brake switch: <Ref. to CC-12, Stop Light & Brake Switch.>
- Clutch switch: <Ref. to CC-13, Clutch Switch.>
- Inhibitor switch: <Ref. to CC-14, Inhibitor Switch.>
- Transmission control module (TCM): <Ref. to CC-15, Transmission Control Module (TCM).>
- Neutral position switch: <Ref. to CC-16, Neutral Position Switch.>

# 4. Cruise Control Module

## A: NOTE

The control of cruise control system is carried out in engine control module (ECM).

## B: REMOVAL

For removal procedures of the control module, refer to “FUEL INJECTION (FUEL SYSTEM)”. <Ref. to FU(H4DO)-102, REMOVAL, Engine Control Module (ECM).>

## C: INSTALLATION

For installation procedures of the control module, refer to “FUEL INJECTION (FUEL SYSTEM)”. <Ref. to FU(H4DO)-103, INSTALLATION, Engine Control Module (ECM).>

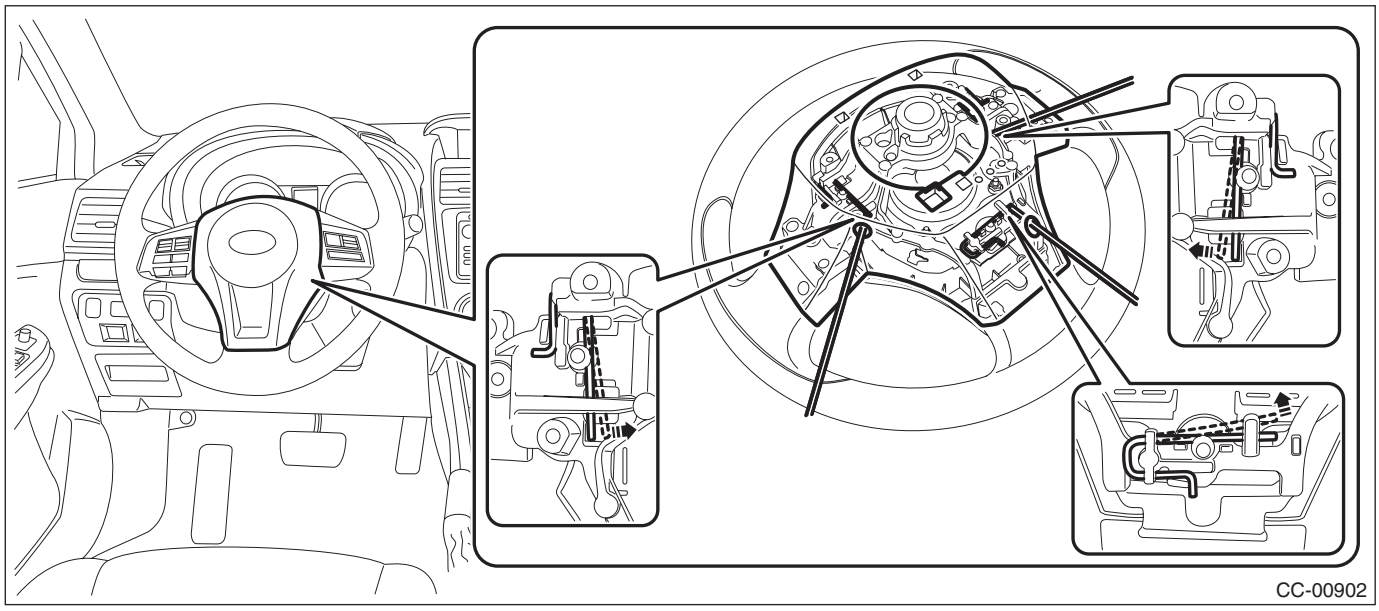
# 5. Cruise Control Command Switch

## A: REMOVAL

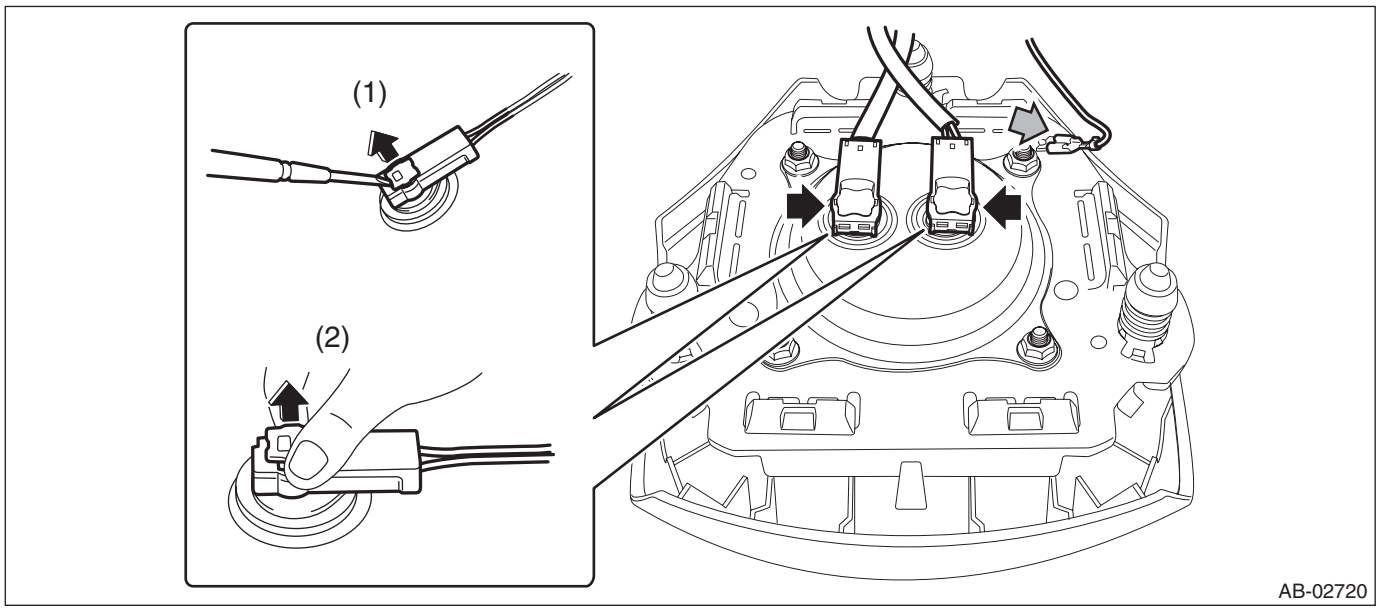
1) Position the front wheels straight ahead. (After moving a vehicle 5 m (16 ft) or more with front wheels positioned straight ahead, make sure that the vehicle moves straight ahead.)
2) Turn the ignition switch to OFF.
3) Disconnect the ground cable from battery and wait for at least 60 seconds before starting work.
4) Remove the driver's airbag module.

**CAUTION:**
**Before handling the airbag module, refer to "CAUTION" of "General Description" in "AIRBAG SYSTEM". <Ref. to AB-11, CAUTION, General Description.>**

(1) Using a hexagon wrench wrapped with protective tape, push in the snap pins to disengage the locks (3 places).



(2) Disconnect the horn harness and airbag connector, and remove the driver's airbag module. <Ref. to AB-20, PROCEDURE, Airbag Connector.>

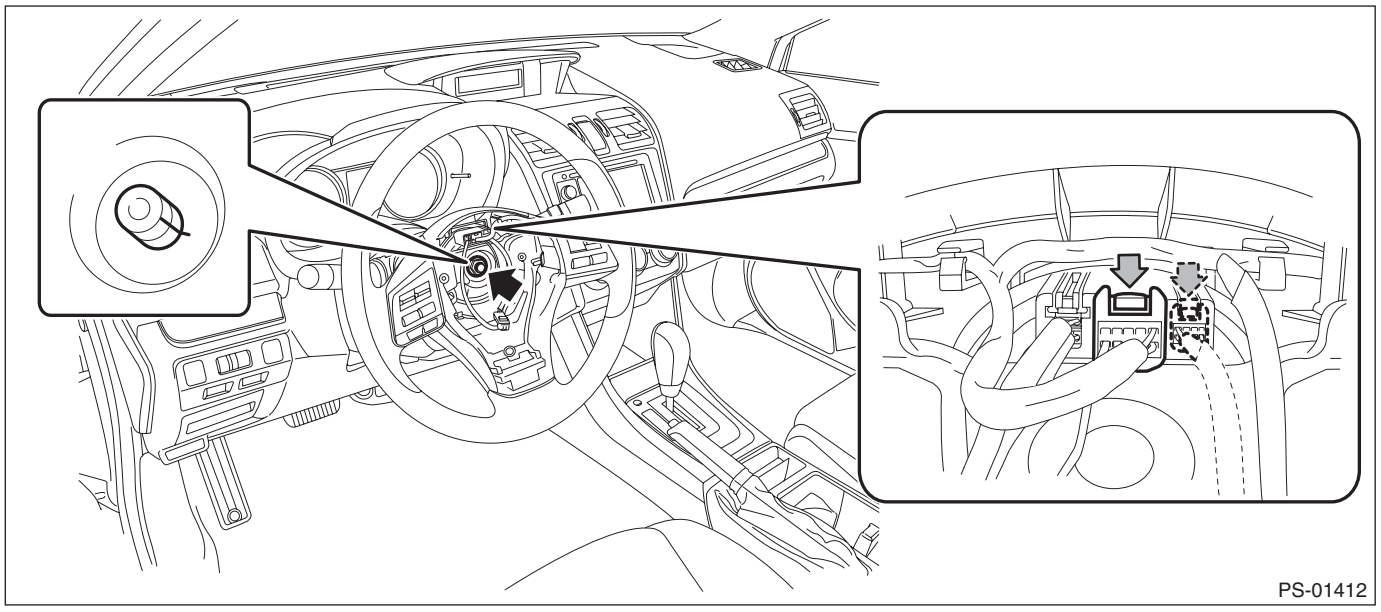


5) Remove the steering wheel.

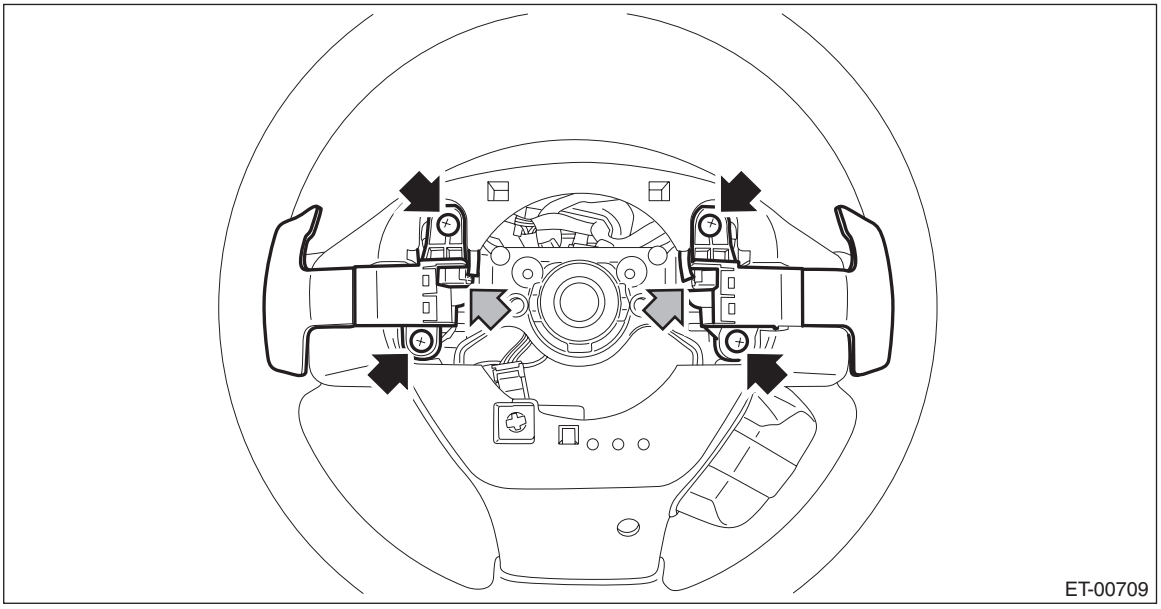
**CAUTION:**
- **Always use the steering wheel puller for removal to avoid deforming the steering wheel.**
- **If the steering wheel has been removed, make sure that the roll connector is not turned from the original position.**

(1) Disconnect the connector and remove the nut.
(2) Put alignment marks and remove the steering wheel using a steering wheel puller.

***PREPARATION TOOL:***
***Steering wheel puller***

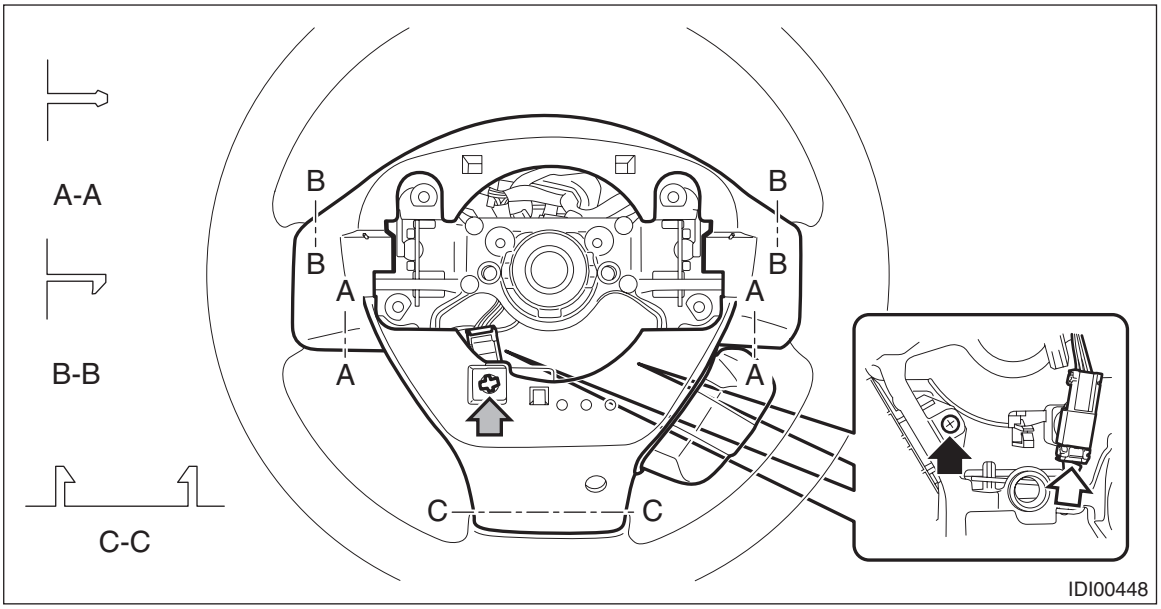


6) Remove the cruise control command switch assembly.
(1) Remove the screw, disconnect the connector and remove the paddle shift switch. (Model with paddle shift)

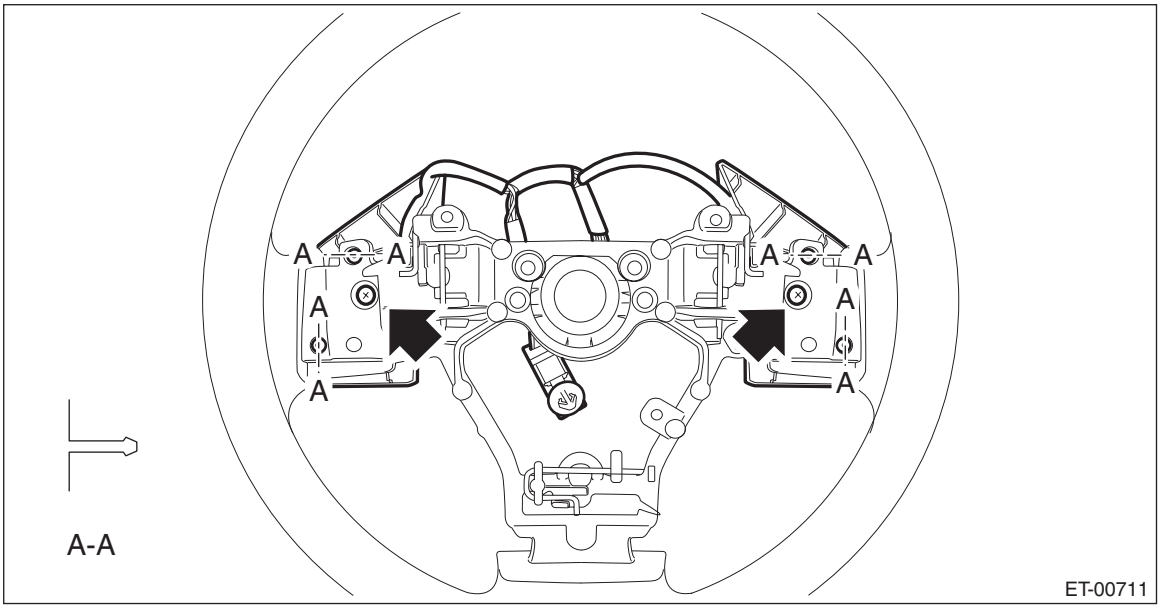


(2) Release the claws and clips, and remove the lower cover - steering wheel LWR.

NOTE:
For model with steering switch, remove the connector and screw.



(3) Remove the screw to remove the cruise control command switch assembly.



## B: INSTALLATION

**CAUTION:**
**• Before handling the airbag module, refer to "CAUTION" of "General Description" in "AIRBAG SYSTEM". <Ref. to AB-11, CAUTION, General Description.>**
**• Do not allow harness and connectors to interfere or get tangled up with other parts.**
**• If the steering wheel and steering angle sensor (steering roll connector) are removed, perform "VDC sensor midpoint setting mode" of the VDC. <Ref. to VDC-19, VDC SENSOR MIDPOINT SETTING MODE, ADJUSTMENT, VDC Control Module and Hydraulic Control Unit (VDCCM&H/U).>**
1) Before installing steering wheel, be sure to adjust the direction of steering roll connector with steering wheel. <Ref. to AB-109, ADJUSTMENT, Roll Connector.>
2) Install each part in the reverse order of removal.

NOTE:
Align the alignment marks on the steering wheel and the column assembly - steering.

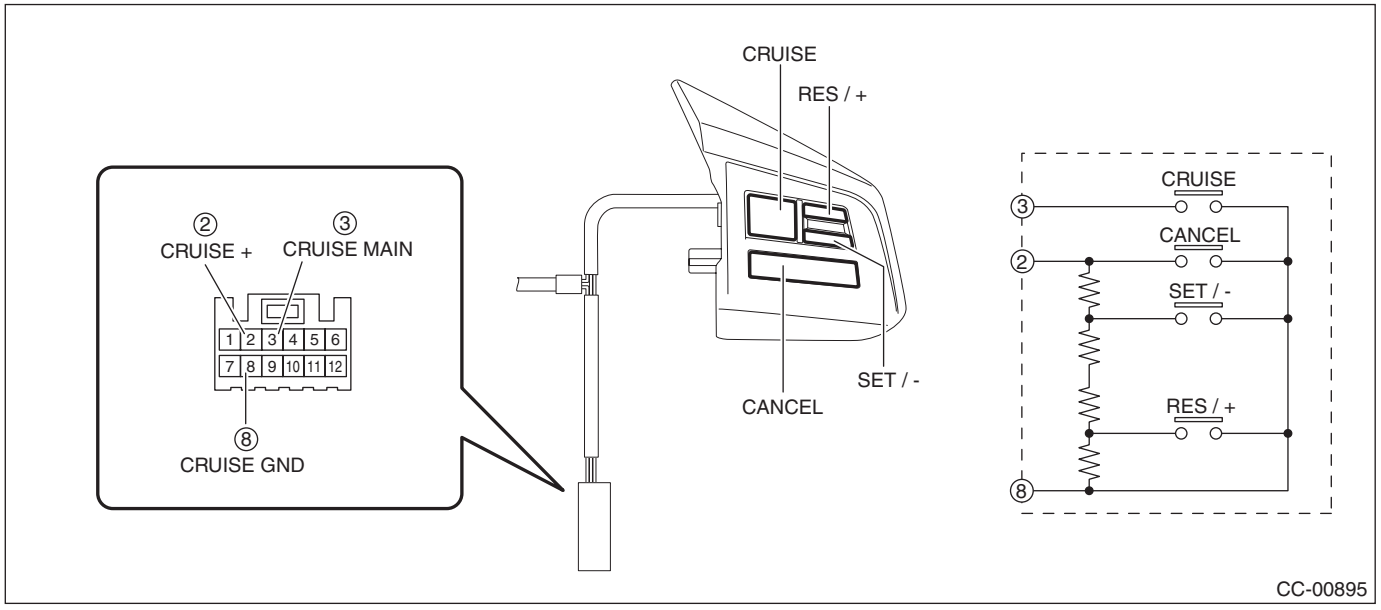
***Tightening torque:***
***Steering wheel: 39 N·m (3.98 kgf-m, 28.8 ft-lb)***

***Clearance:***
***Between cover assembly - column and steering wheel: 4 — 6 mm (0.16 — 0.24 in)***

## C: INSPECTION

**UNIT INSPECTION**

***PREPARATION TOOL:***
***Circuit tester***
1) Check the resistance between switch terminals.



| Terminal No. | Inspection conditions | | Standard |
|---|---|---|---|
| 2 — 8 | CANCEL<br>SET/–<br>RES/+ | All OFF | Approx. 4020 Ω |
| 2 — 8 | CANCEL | ON | Less than 1 Ω |
| 2 — 8 | SET/– | ON | Approx. 250 Ω |
| 2 — 8 | RES/+ | ON | Approx. 1470 Ω |
| 3 — 8 | CRUISE<br>(MAIN) | OFF | 1 MΩ or more |
| 3 — 8 | | ON | Less than 1 Ω |

2) Replace the cruise control command switch assembly if the inspection result is not within the standard.

# 6. Combination Meter

## A: NOTE

For the combination meter, refer to “INSTRUMENTATION/DRIVER INFO” section. <Ref. to IDI-17, Combination Meter.>

# 7. Stop Light & Brake Switch

## A: NOTE

For stop light and brake switch, refer to “BRAKE” section. <Ref. to BR-74, INSPECTION, Stop Light Switch.>

# 8. Clutch Switch

## A: NOTE

For clutch switch, refer to “CLUTCH SYSTEM” section. <Ref. to CL-26, Clutch Switch.>

# 9. Inhibitor Switch

## A: NOTE

For inhibitor switch, refer to “CONTINUOUSLY VARIABLE TRANSMISSION” section. <Ref. to CVT-90, Inhibitor Switch.>

# 10.Transmission Control Module (TCM)

## A: NOTE

For transmission control module (TCM), refer to “CONTINUOUSLY VARIABLE TRANSMISSION” section. <Ref. to CVT-136, Transmission Control Module (TCM).>

# 11.Neutral Position Switch

## A: NOTE

For neutral position switch, refer to “MANUAL TRANSMISSION AND DIFFERENTIAL” section. <Ref. to 5MT-35, Switches and Harness.>

# 12.Diagnostics with Phenomenon

## A: INSPECTION

Refer to “Diagnostics with Phenomenon” of “CRUISE CONTROL SYSTEM (DIAGNOSTICS)” section. <Ref. to CC(diag)-11, Diagnostics with Phenomenon.>

# CRUISE CONTROL SYSTEM (DIAGNOSTICS)

# 1. Basic Diagnostic Procedure

## A: PROCEDURE

**CAUTION:**
**• Before performing all diagnostics or cruise control diagnostics, always start the engine and make sure that the initial illumination of the ABS/VDC warning light has been ended. (If you start the diagnostics before performing the above procedures, the cancel code "43" is recorded and CRUISE indicator does not illuminate even though the CRUISE switch is pressed.)**
**• When performing diagnosis, observe the legal speed limit on the road.**
**• The cancel code will be also appear when cruise control is cancelled by the driver's operation. Do not confuse them.**
**• Be sure to get an assistant to support the diagnosis while driving, and have him/her operate the select monitor.**

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK MALFUNCTION INDICATOR LIGHT.**<br>Make sure the malfunction indicator light illuminates. | Does the malfunction indicator light illuminate? | Go to step **5**. | Go to step **2**. |
| 2 | **CHECK CRUISE INDICATOR LIGHT.**<br>Make sure the cruise indicator light blinks. | Does the cruise indicator light blink? | Go to step **7**. | Go to step **3**. |
| 3 | **CHECK CRUISE SWITCH OPERATION.**<br>Check the CRUISE switch operation. (Check the illumination of the CRUISE indicator.) | Is the CRUISE switch turned on? (Does the CRUISE indicator illuminate?) | Go to step **4**. | Go to phenomenon 1. <Ref. to CC(diag)-11, DIAGNOSTIC PROCEDURE WITH PHENOMENON, Diagnostics with Phenomenon.> |
| 4 | **CHECK CRUISE CONTROL SET OPERATION.**<br>Check the cruise control setting operation. | Can the cruise control be set while driving at 40 km/h (25 MPH) or more? | Go to step **8**. | Go to step **7**. |
| 5 | **CHECK DTC.**<br>Read all DTCs using the Subaru Select Monitor. | Is an engine or ABS/VDC related DTC displayed? | Record the DTC.<br>Go to step **6**. | Go to phenomenon 2. <Ref. to CC(diag)-11, DIAGNOSTIC PROCEDURE WITH PHENOMENON, Diagnostics with Phenomenon.> |
| 6 | **CHECK FREEZE FRAME DATA.**<br>Using the Subaru Select Monitor, check the Freeze Frame Data or Information in Trouble State. | Was the Freeze Frame Data or Information in Trouble State recorded? | Record the data.<br>Perform the diagnosis according to the engine or ABS/VDC related DTC. | Perform the diagnosis according to the engine or ABS/VDC related DTC. |
| 7 | **CHECK CANCEL CODE.**<br>Using the Subaru Select Monitor, read the cancel codes.<br>NOTE:<br>• Do not turn the ignition switch to OFF after the cruise control is deactivated.<br>• Do not operate the cruise control command switch after the cruise control is deactivated.<br>If the above is performed, the cancel code will be cleared. | Is it possible to read the cancel codes? | Perform the diagnosis according to the cancel code. <Ref. to CC(diag)-13, LIST, List of Cancel Code.> | Go to step **8**. |

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 8 | **CHECK SET INDICATOR.**<br>Check the illumination of the SET indicator. | Does the SET indicator illuminate? | Go to step **9**. | Go to phenomenon 3. <Ref. to CC(diag)-11, DIAGNOSTIC PROCEDURE WITH PHENOMENON, Diagnostics with Phenomenon.> |
| 9 | **CHECK VEHICLE SPEED IS HELD WITHIN SET SPEED.**<br>Make sure the vehicle speed is held within set speed. | Is the vehicle speed kept within setting speed ±3 km/h (±2 MPH)? (Make sure that on a level road.) | Go to step **10**. | Go to phenomenon 4. <Ref. to CC(diag)-11, DIAGNOSTIC PROCEDURE WITH PHENOMENON, Diagnostics with Phenomenon.> |
| 10 | **CHECK RES/+ OPERATION.**<br>Check the RES/+ switch operation. | Does the vehicle speed increase or return to set speed after RES/+ switch has been pressed? | Go to step **11**. | Go to phenomenon 5. <Ref. to CC(diag)-11, DIAGNOSTIC PROCEDURE WITH PHENOMENON, Diagnostics with Phenomenon.> |
| 11 | **CHECK SET/– OPERATION.**<br>Check the SET/– switch operation. | Does the vehicle speed decrease after SET/– switch has been pressed? | Go to step **12**. | Go to phenomenon 6. <Ref. to CC(diag)-11, DIAGNOSTIC PROCEDURE WITH PHENOMENON, Diagnostics with Phenomenon.> |
| 12 | **CANCEL OPERATION CHECK.**<br>Check the CANCEL switch operation. | Is the cruise control released after CANCEL switch has been pressed? | Go to step **13**. | Go to phenomenon 7. <Ref. to CC(diag)-11, DIAGNOSTIC PROCEDURE WITH PHENOMENON, Diagnostics with Phenomenon.> |
| 13 | **CHECK CRUISE CONTROL RELEASE OPERATION.**<br>Check the cruise control release operation. | Is the cruise control released after brake pedal has been depressed? | Go to step **14**. | Go to phenomenon 8. <Ref. to CC(diag)-11, DIAGNOSTIC PROCEDURE WITH PHENOMENON, Diagnostics with Phenomenon.> |

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 14 | **CHECK CRUISE CONTROL RELEASE OPERATION.**<br>Check the cruise control release operation. | Is the cruise control released after shifting to the neutral position? | Go to step **15**. | Go to phenomenon 9. <Ref. to CC(diag)-11, DIAGNOSTIC PROCEDURE WITH PHENOMENON, Diagnostics with Phenomenon.> |
| 15 | **CHECK CRUISE CONTROL RELEASE OPERATION.**<br>Check the cruise control release operation. | Is the cruise control released after depressing the clutch pedal? | Finish the diagnosis. | Go to phenomenon 10. <Ref. to CC(diag)-11, DIAGNOSTIC PROCEDURE WITH PHENOMENON, Diagnostics with Phenomenon.> |

# 2. General Description

## A: CAUTION

Airbag system wiring harness is routed near the cruise control command switch.

**CAUTION:**
**• Do not use the electrical test equipment on the airbag system wiring harnesses and connector circuits.**
**• Be careful not to damage the airbag system wiring harness when servicing the cruise control command switch. Airbag system wiring harness is routed near the cruise control command switch.**

# 5. Subaru Select Monitor

## A: OPERATION

### 1. GENERAL DESCRIPTION

The on-board diagnosis function of the cruise control system uses Subaru Select Monitor.
The on-board diagnosis function operates in two categories, which are used depending on the type of problems;
1) Cruise Control Cancel Conditions Diagnosis:
(1) This category of diagnosis requires actual vehicle driving in order to determine the cause, as when cruise speed is cancelled during driving although cruise cancel condition is not entered.
(2) Cruise control memory in ECM stores the cancel code which occurred during driving. When there are multiple cancel code, they are shown on the Subaru Select Monitor.

**CAUTION:**
**• The cruise control memory stores not only the cruise "cancel" which occurred (although "cancel" operation is not entered by the driver), but also the "cancel" condition input by the driver.**
**• The content of the latest memory (the latest code) is cleared when the ignition switch is turned to OFF. However, memory contents set by the diagnosis of faulty switches related to the system and cruise control will remain as trouble history (memory code) after the ignition switch is turned to OFF.**
2) Real-time Diagnosis:
Real-time diagnosis function is used to determine whether or not the input signal system is in good order, according to signal emitted from switches, sensors, etc.
(1) Vehicle cannot be driven at cruise speed when the problem occurs in the cruise control system or relevant circuits.
(2) Monitor the signal conditions from switches and sensors.

### 2. BASIC OPERATION

For the operation procedure, refer to the "PC application help for Subaru Select Monitor".

# 6. Read Cancel Code

## A: OPERATION

1) On «Main Menu» display, select {Each System Check}.
On «System Selection Menu» display, select {Engine Control System} and select the [OK]. Select [OK] after the engine type information is displayed.
2) Drive vehicle at 40 km/h (25 MPH) or more and set the cruise control.

**CAUTION:**
**• When performing diagnosis, observe the legal speed limit on the road.**
**• The cancel code will be also appear when cruise control is cancelled by the driver's operation. Do not confuse them.**
**• Be sure to get an assistant to support the diagnosis while driving, and have him/her operate the select monitor.**
3) When the set speed is cancelled by itself (without any cancel operations such as applying brake) or when the cruise control could not be set by performing the setting operation, selecting the {Cancel Code(s) Display} on the engine malfunction diagnosis screen will display the cancel code on the select monitor display.

NOTE:
The {Latest Diagnostic Code(s)} and {Memorized Diagnostic Code(s)} are contained in the cancel code. The latest code recognized during current test drive is displayed in {Latest Diagnostic Code(s)}. Cancel codes resulting from fault diagnosis of switches relating to the system and cruise control are also displayed in {Memorized Diagnostic Code(s)}.
4) Perform Engine DTC Clear Memory operation. <Ref. to EN(H4DO)(diag)-57, OPERATION, Clear Memory Mode.>
Cancel codes for switches relating to the system and cruise control are deleted by clearing memory on the engine side.

NOTE:
• The latest code will be cleared by turning ignition switch to OFF.
• For detailed operation procedures, refer to "PC application help for Subaru Select Monitor".
• For details on cancel codes, refer to List of Cancel Code. <Ref. to CC(diag)-13, List of Cancel Code.>

# 7. Real-time Diagnosis

## A: OPERATION

1) Select {Current Data Display & Save} in «Engine Diagnosis» display screen.
2) Make sure that normal display is shown when operated as follows:
- Depress and release the brake pedal. (Stop light switch and brake switch are turned ON.)
- Turn the “CRUISE” switch to ON.
- Turn the “CANCEL” switch to ON.
- Turn the “SET/–” switch to ON.
- Turn the “RES/+” switch to ON.
- Depress or release the clutch switch.
- Place the shift lever in any position other than neutral.

NOTE:
For detailed operation procedures, refer to “PC application help for Subaru Select Monitor”.

# 8. Diagnostics with Phenomenon

## A: DIAGNOSTIC PROCEDURE WITH PHENOMENON

| Phenomenon | | Check item | Reference |
|---|---|---|---|
| 1 | CRUISE switch is not turned ON. (CRUISE indicator does not illuminate.) Or the cruise control is cancelled without CRUISE switch operation. | (1) Perform cruise cancel conditions diagnosis. | Perform the diagnosis according to displayed cancel code. |
| | | (2) Perform the real-time diagnosis. | Check the input signal of cruise control system. |
| | | (3) Check the cruise control command switch. | <Ref. to CC(diag)-15, 11, Diagnostic Procedure with Cancel Code.> |
| | | (4) Check the CRUISE indicator. | <Ref. to CC(diag)-12, CHECK CRUISE INDICATOR LIGHT AND CRUISE SET INDICATOR LIGHT, Diagnostics with Phenomenon.> |
| 2 | Cruise control cannot be set. Or the cruise control is cancelled without canceling operation. | (1) Perform cruise cancel conditions diagnosis. | Perform the diagnosis according to displayed cancel code. |
| | | (2) Perform the real-time diagnosis. | Check the input signal of cruise control system. |
| | | (3) Check the cruise control command switch. | <Ref. to CC(diag)-15, 11, Diagnostic Procedure with Cancel Code.> |
| | | (4) Check stop light switch and brake switch. | <Ref. to BR-71, Stop Light Switch.> <Ref. to CC(diag)-17, 12, Diagnostic Procedure with Cancel Code.> |
| | | (5) Check clutch switch. | <Ref. to CL-26, Clutch Switch.> <Ref. to CC(diag)-19, 13, Diagnostic Procedure with Cancel Code.> |
| | | (6) Check the neutral position switch. | <Ref. to CC(diag)-20, 14, Diagnostic Procedure with Cancel Code.> <Ref. to CC(diag)-25, 62, Diagnostic Procedure with Cancel Code.> |
| | | (7) Check vehicle speed sensor. | <Ref. to CC(diag)-23, 22, Diagnostic Procedure with Cancel Code.> |
| 3 | SET indicator does not illuminate. | Check the SET indicator. | <Ref. to CC(diag)-12, CHECK CRUISE INDICATOR LIGHT AND CRUISE SET INDICATOR LIGHT, Diagnostics with Phenomenon.> |
| 4 | Vehicle speed is not held within set speed ±3 km/h (±2 MPH). | Check the vehicle speed sensor. | <Ref. to CC(diag)-23, 22, Diagnostic Procedure with Cancel Code.> |
| 5 | Vehicle speed does not increase or does not return to set speed after RES/+ switch has been pressed. | (1) Perform the real-time diagnosis. | Check the input signal of cruise control system. |
| | | (2) Check the RES/+ switch. | <Ref. to CC(diag)-15, 11, Diagnostic Procedure with Cancel Code.> |
| 6 | Vehicle speed does not decrease after SET/– switch has been pressed. | (1) Perform the real-time diagnosis. | Check the input signal of cruise control system. |
| | | (2) Check the SET/– switch. | <Ref. to CC(diag)-15, 11, Diagnostic Procedure with Cancel Code.> |
| 7 | Cruise control is not released after CANCEL switch has been pressed. | (1) Perform the real-time diagnosis. | Check the input signal of cruise control system. |
| | | (2) Check the CANCEL switch. | <Ref. to CC(diag)-15, 11, Diagnostic Procedure with Cancel Code.> |
| 8 | Cruise control is not released after brake pedal has been depressed. | (1) Perform the real-time diagnosis. | Check the input signal of cruise control system. |
| | | (2) Check stop light switch and brake switch. | <Ref. to CC(diag)-17, 12, Diagnostic Procedure with Cancel Code.> <Ref. to BR-73, INSTALLATION, Stop Light Switch.> |
| 9 | Cruise control is not released after shifting to the neutral position. | (1) Perform the real-time diagnosis. | Check the input signal of cruise control system. |
| | | (2) Check the neutral position switch. | <Ref. to CC(diag)-20, 14, Diagnostic Procedure with Cancel Code.> <Ref. to CC-16, Neutral Position Switch.> |
| 10 | Cruise control is not released after clutch pedal has been depressed. | (1) Perform the real-time diagnosis. | Check the input signal of cruise control system. |
| | | (2) Check clutch switch. | <Ref. to CC(diag)-19, 13, Diagnostic Procedure with Cancel Code.> <Ref. to CL-26, CLUTCH SWITCH, INSTALLATION, Clutch Switch.> |

## B: CHECK CRUISE INDICATOR LIGHT AND CRUISE SET INDICATOR LIGHT

**TROUBLE SYMPTOM:**

Cruise control can be set, but the CRUISE indicator and SET indicator do not illuminate.

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK CRUISE INDICATOR LIGHT AND CRUISE SET INDICATOR LIGHT.**<br>Check the combination meter. <Ref. to IDI-7, OPERATION, Combination Meter System.> | Do the CRUISE & SET indicators illuminate? | Go to step **2**. | Replace the meter case assembly. <Ref. to IDI-17, Combination Meter.> |
| 2 | **CHECK LAN SYSTEM.**<br>Perform the diagnosis for LAN system. <Ref. to LAN(diag)-2, Basic Diagnostic Procedure.> | Is a DTC of the LAN system detected? | Perform the diagnosis according to DTC for LAN system. | Replace the ECM. <Ref. to FU(H4DO)-102, Engine Control Module (ECM).> |

# 9. List of Cancel Code

## A: LIST

NOTE:
- The cancel code is registered even when cancel is performed intentionally by the driver.
- Cancel codes are cleared if the ignition switch is turned to OFF.
- If a different cancel code is input after a cancel code (latest code) has been input, the latest code is overwritten.
- If the cruise indicator light is flashing, a malfunction is occurring in the system or cruise control related switch. The cancel code at this time is saved even after ignition switch is OFF as a memory code of a past malfunction.
- To display a cancel code, use the Subaru Select Monitor to read the code after the cruise control is deactivated during a driving test.

| Cancel code | Item | Contents of diagnosis | Note |
|---|---|---|---|
| 11 | Main switch | CRUISE switch of cruise control command switch is turned to OFF, and then the cruise control is released. | This code is displayed without operating the CRUISE switch. <Ref. to CC(diag)-15, 11, Diagnostic Procedure with Cancel Code.> |
| 12 | Stop & brake switch | Stop light switch or brake switch is turned to ON, and then the cruise control is released. | This code is displayed without depressing the brake pedal. <Ref. to CC(diag)-17, 12, Diagnostic Procedure with Cancel Code.> |
| 13 | Clutch switch | Clutch switch is turned to ON, and then the cruise control is released. | This code is displayed without depressing the clutch pedal. <Ref. to CC(diag)-19, 13, Diagnostic Procedure with Cancel Code.> |
| 14 | Neutral switch | Neutral position switch is turned to ON, and then the cruise control is released. | This code is displayed without shifting to neutral position. <Ref. to CC(diag)-20, 14, Diagnostic Procedure with Cancel Code.> |
| 15 | Cancel switch | Cancel switch is turned to ON, and then the cruise control is released. | This code is displayed without operating the cancel switch. <Ref. to CC(diag)-21, 15, Diagnostic Procedure with Cancel Code.> |
| 16 | Ignition switch | Ignition switch is turned to OFF, and then the cruise control is released. | This code is displayed without operating the ignition switch. <Ref. to CC(diag)-22, 16, Diagnostic Procedure with Cancel Code.> |
| 21 | Cruise control switch malfunction when the ignition switch is ON | When the ignition switch is turned to ON, each switch of cruise control command switch is already turned to ON. | This code is displayed when the ignition switch is turned to ON without operating the cruise control command switch. <Ref. to CC(diag)-22, 21, Diagnostic Procedure with Cancel Code.> |
| 22 | Abnormality of change in vehicle speed | Malfunction of vehicle speed signal variation is detected. | <Ref. to CC(diag)-23, 22, Diagnostic Procedure with Cancel Code.> |
| 24 | Abnormality of switches related to cruise control | Open circuit of the cruise control switch is detected during cruise driving. (The system is judged as model without cruise control.) | This code is displayed with normal operation. <Ref. to CC(diag)-23, 24, Diagnostic Procedure with Cancel Code.> |
| 31 | Abnormal engine speed Signal | • Abnormal increase of engine speed is detected.<br>• Gear is placed in Neutral, 1st or Reverse position. | Cruise in 2nd shift position or more. <Ref. to CC(diag)-23, 31, Diagnostic Procedure with Cancel Code.> |

# List of Cancel Code

| Cancel code | Item | Contents of diagnosis | Note |
|---|---|---|---|
| 32 | Cruse Control out of Range | • Controlled vehicle speed decreased under the limit during cruising.<br>• Set operation was performed at vehicle speed unavailable for setting.<br>• RESUME operation was performed without memorized vehicle speed. | This code is displayed, though the vehicle speed is increased to the speed available for cruise set and set operation was performed again. <Ref. to CC(diag)-23, 32, Diagnostic Procedure with Cancel Code.> |
| 34 | Prohibition of cruise control at continuing big Accel. angle | The vehicle has been driven at higher speed than set vehicle speed for an abnormally long time (approximately 10 minutes) during cruise driving. | This code is displayed when driving for a long period of time at higher speed than appropriate cruise set vehicle speed by operating accelerator pedal. In this case, the cruise setting is deactivated. <Ref. to CC(diag)-24, 34, Diagnostic Procedure with Cancel Code.> |
| 35 | Prohibition of cruise control at vehicle speed F/B malfunction | Set vehicle speed cannot be kept because of some reasons (steep uphill, parking brake, abnormal decrease of engine output, etc.) during cruise driving. | This code is displayed when driving condition is not suitable for cruise control. Perform cruise set operation again after clearing the possible cause. <Ref. to CC(diag)-24, 35, Diagnostic Procedure with Cancel Code.> |
| 41 | VDC/TCS/EPB Operating | Vehicle dynamics control (VDC), TCS or EPB is operated during cruise driving or cruise setting. | This code is displayed when driving condition is not suitable for cruise control. Perform cruise set operation again after clearing the possible cause. <Ref. to CC(diag)-24, 41, Diagnostic Procedure with Cancel Code.> |
| 43 | ABS/VDC Failure | • During cruise driving or cruise setting, the situation that some or all functions for ABS or VDC can not work is detected.<br>• CRUISE indicator does not illuminate even though you pressed the CRUISE switch before starting the engine. | <Ref. to CC(diag)-24, 43, Diagnostic Procedure with Cancel Code.> |
| 44 | Body Integrated unit Failure | Body integrated unit system malfunction is detected during cruise driving or cruise setting. | <Ref. to CC(diag)-24, 44, Diagnostic Procedure with Cancel Code.> |
| 45 | Meter Failure | Combination meter malfunction is detected during cruise driving or cruise setting. | <Ref. to CC(diag)-24, 45, Diagnostic Procedure with Cancel Code.> |
| 49 | TCM Failure | Transmission control module (TCM) malfunction is detected during cruise driving or cruise setting. | <Ref. to CC(diag)-24, 49, Diagnostic Procedure with Cancel Code.> |
| 61 | Brake switch abnormal | Malfunction in the stop light & brake switch is detected. | <Ref. to CC(diag)-25, 61, Diagnostic Procedure with Cancel Code.> |
| 62 | Neutral switch abnormal | Neutral position switch malfunction is detected. | <Ref. to CC(diag)-25, 62, Diagnostic Procedure with Cancel Code.> |
| 63 | Abnormality 1 of change in vehicle speed | Malfunction of vehicle speed signal variation is detected. | <Ref. to CC(diag)-25, 63, Diagnostic Procedure with Cancel Code.> |
| 64 | Engine Sensor Failure 1 | Malfunction related to engine is detected. | <Ref. to CC(diag)-25, 64, Diagnostic Procedure with Cancel Code.> |
| 65 | Abnormality of switches related to cruise control 1 | Cruise control command switch malfunction is detected. (When the switch is pressed ON for a long time (approximately two minutes), stuck ON condition is detected.) | <Ref. to CC(diag)-25, 65, Diagnostic Procedure with Cancel Code.> |
| 66 | Cruise Control Calculation Error | Cruise control calculation (microcomputer) malfunction is detected. | <Ref. to CC(diag)-25, 66, Diagnostic Procedure with Cancel Code.> |

# 10.Diagnostic Procedure with Cancel Code

## A: 11

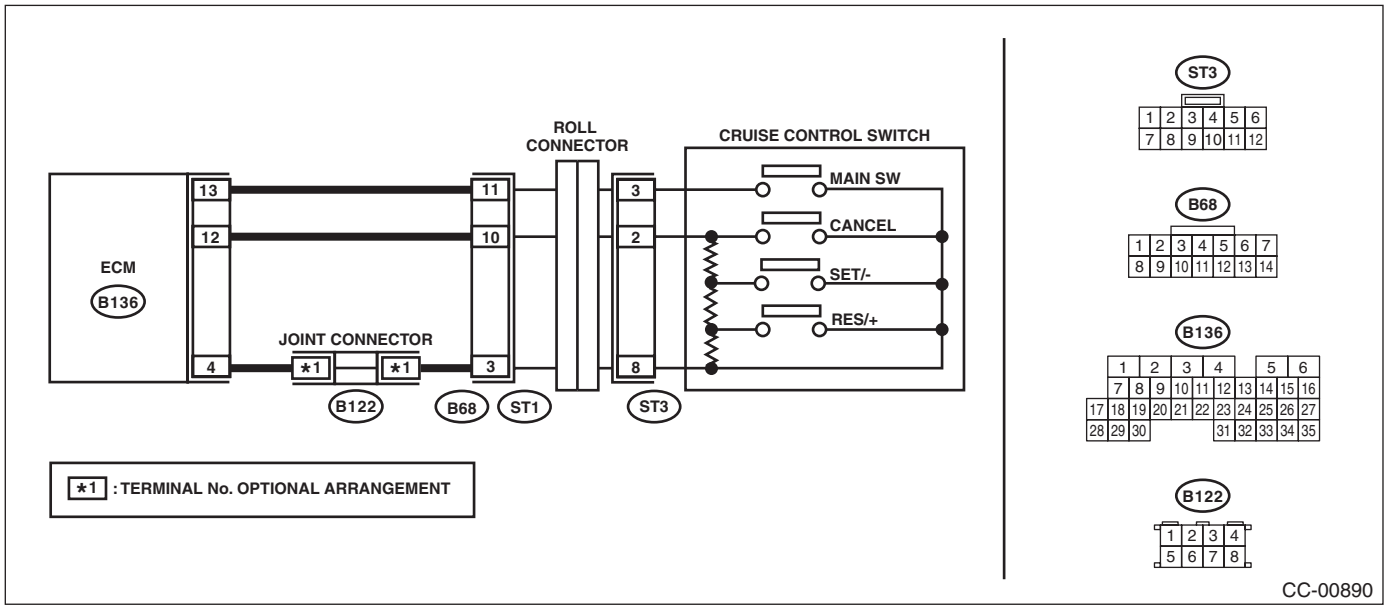
When CRUISE switch is pressed, or a malfunction related to CRUISE switch occurs, this is detected.

**TROUBLE SYMPTOM:**

- Cruise control cannot be set. (Cancelled immediately.)
- Cruise control cannot be released.

**WIRING DIAGRAM:**

Cruise Control System <Ref. to WI-61, WIRING DIAGRAM, Cruise Control System.>



| | Step | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK CRUISE CONTROL COMMAND SWITCH CIRCUIT.**<br>1) Remove the driver's airbag module. <Ref. to AB-42, REMOVAL, Driver's Airbag Module.><br>2) Disconnect the harness connector of cruise control command switch.<br>3) Turn the ignition switch to ON.<br>4) Measure the voltage between harness connector terminal and chassis ground.<br>***Connector & terminal***<br>***(ST3) No. 3 (+) — Chassis ground (–):***<br>***(ST3) No. 2 (+) — Chassis ground (–):*** | Is the voltage 5 V or more? | Go to step **2**. | Check the harness between cruise control command switch and ECM, and the steering roll connector for open or short circuit, or for poor contact. |
| 2 | **CHECK CRUISE CONTROL COMMAND SWITCH CIRCUIT.**<br>1) Turn the ignition switch to OFF.<br>2) Remove the cruise control command switch. <Ref. to CC-7, REMOVAL, Cruise Control Command Switch.><br>3) Measure the resistance between harness connector terminal and chassis ground.<br>***Connector & terminal***<br>***(ST3) No. 8 — Chassis ground:*** | Is the resistance less than 10 Ω? | Go to step **3**. | Check for open circuit between cruise control command switch, ECM, and chassis ground and check the ECM. |
| 3 | **CHECK CRUISE CONTROL COMMAND SWITCH.**<br>Measure the resistance between switch terminals when the cruise control command switch is not depressed.<br>***Terminals***<br>***No. 2 — No. 8:*** | Is the resistance approx. 4 kΩ? | Go to step **4**. | Replace the cruise control command switch.<br><Ref. to CC-7, Cruise Control Command Switch.> |

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 4 | **CHECK CANCEL SWITCH.**<br>1) Turn the ignition switch to OFF.<br>2) Remove the cruise control command switch. <Ref. to CC-7, REMOVAL, Cruise Control Command Switch.><br>3) Measure the resistance between switch terminals with the CANCEL switch pressed.<br>***Terminals***<br>***No. 2 — No. 8:*** | Is the resistance approx. less than 1 Ω when the CANCEL switch is pressed? | Go to step **5**. | Replace the cruise control command switch. <Ref. to CC-7, Cruise Control Command Switch.> |
| 5 | **CHECK SET/– SWITCH.**<br>Measure the resistance between the switch terminals with the SET/– switch pressed.<br>***Terminals***<br>***No. 2 — No. 8:*** | Is the resistance approx. 250 Ω when the SET/– switch is pressed? | Go to step **6**. | Replace the cruise control command switch. <Ref. to CC-7, Cruise Control Command Switch.> |
| 6 | **CHECK RES/+ SWITCH.**<br>Measure the resistance between the switch terminals with the RES/+ switch pressed.<br>***Terminals***<br>***No. 2 — No. 8:*** | Is the resistance approx. 1,500 Ω when the RES/+ switch is pressed? | Replace the ECM. <Ref. to FU(H4DO)-102, Engine Control Module (ECM).> | Replace the cruise control command switch. <Ref. to CC-7, Cruise Control Command Switch.> |

## B: 12

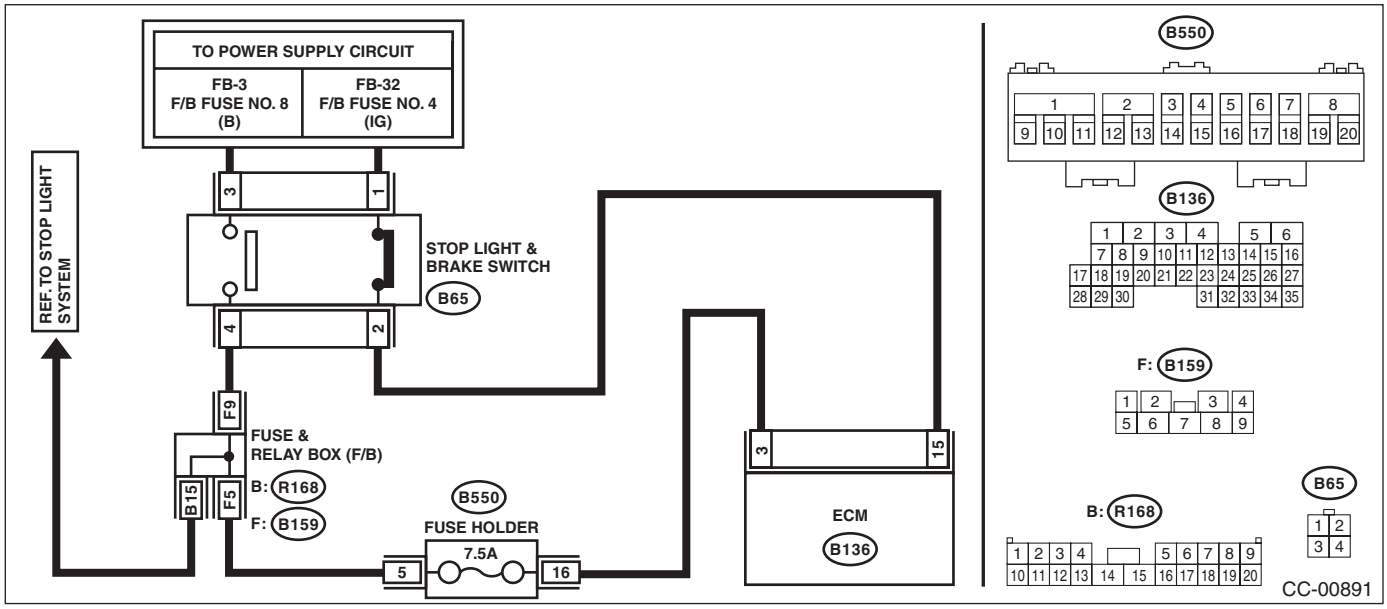
Detected when brake pedal is depressed or malfunction related to stop light & brake switch occurs.

**TROUBLE SYMPTOM:**

- Cruise control cannot be set.
- Cruise control cannot be released.

**WIRING DIAGRAM:**

Cruise Control System <Ref. to WI-61, WIRING DIAGRAM, Cruise Control System.>



| Step | | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK STOP LIGHT & BRAKE SWITCH.**<br>Check the stop light & brake switch. <Ref. to CC-12, Stop Light & Brake Switch.> | Is the stop light & brake switch and installation position OK? | Go to step **2**. | Replace the stop light & brake switch. Or adjust the installation position. |
| 2 | **CHECK STOP LIGHT & BRAKE SWITCH CIRCUIT.**<br>1) Turn the ignition switch to OFF.<br>2) Disconnect the stop light & brake switch harness connector.<br>3) Turn the ignition switch to ON.<br>4) Measure the voltage between harness connector terminal and chassis ground.<br>***Connector & terminal***<br>***(B65) No. 3 (+) — Chassis ground (–):*** | Is the voltage 10 V or more? | Go to step **3**. | • Check fuse No. 8 (in fuse & relay box).<br>• Check for open or short in the harness between stop light & brake switch and fuse & relay box. |
| 3 | **CHECK STOP LIGHT & BRAKE SWITCH CIRCUIT.**<br>Measure the voltage between harness connector terminal and chassis ground.<br>***Connector & terminal***<br>***(B65) No. 1 (+) — Chassis ground (–):*** | Is the voltage 10 V or more? | Go to step **4**. | • Check fuse No. 4 (in fuse & relay box).<br>• Check for open or short in the harness between stop light & brake switch and fuse & relay box. |

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 4 | **CHECK STOP LIGHT & BRAKE SWITCH CIRCUIT.**<br>1) Turn the ignition switch to OFF.<br>2) Disconnect the harness connector of ECM.<br>3) Measure the resistance between ECM harness connector terminal and stop light & brake switch harness connector terminal.<br>***Connector & terminal***<br>***(B136) No. 3 — (B65) No. 4:***<br>***(B136) No. 15 — (B65) No. 2:*** | Is the resistance less than 10 Ω? | Replace the ECM. <Ref. to FU(H4DO)-102, Engine Control Module (ECM).> | Repair the harness. |

## C: 13

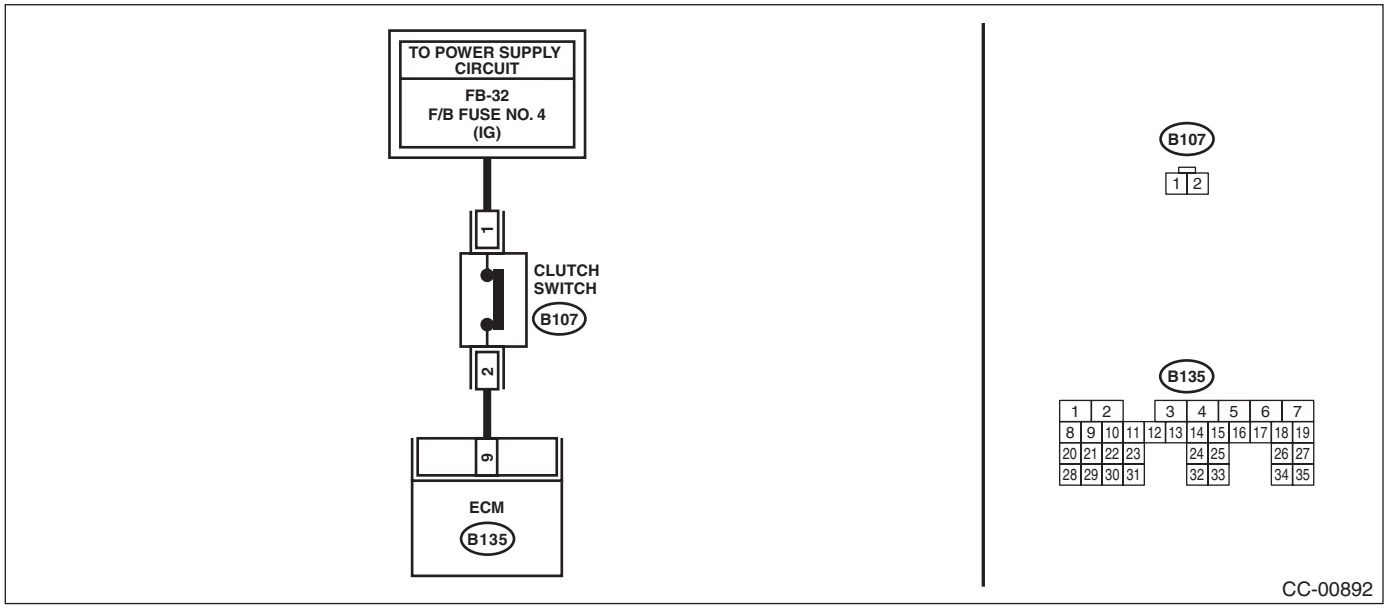
Detected when clutch pedal is depressed or malfunction related to clutch switch occurs.

**TROUBLE SYMPTOM:**

- Cruise control cannot be set.
- Cruise control cannot be released.

**WIRING DIAGRAM:**

Cruise Control System <Ref. to WI-61, WIRING DIAGRAM, Cruise Control System.>



| Step | | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK CLUTCH SWITCH.**<br>Check the clutch switch. <Ref. to CC-13, Clutch Switch.> | Is the clutch switch and installation position OK? | Go to step **2**. | Replace the clutch switch. Or adjust the installation position. |
| 2 | **CHECK CLUTCH SWITCH CIRCUIT.**<br>1) Turn the ignition switch to OFF.<br>2) Disconnect the clutch switch harness connector.<br>3) Turn the ignition switch to ON.<br>4) Measure the voltage between harness connector terminal and chassis ground.<br>***Connector & terminal***<br>***(B107) No. 1 (+) — Chassis ground (–):*** | Is the voltage 10 V or more? | Go to step **3**. | • Check fuse No. 4 (in fuse & relay box).<br>• Check open or shorted circuit of harness between clutch switch and fuse & relay box. |
| 3 | **CHECK CLUTCH SWITCH CIRCUIT.**<br>1) Turn the ignition switch to OFF.<br>2) Disconnect the harness connector of ECM.<br>3) Measure the resistance between clutch switch harness connector terminal and ECM harness connector terminal.<br>***Connector & terminal***<br>***(B107) No. 2 — (B135) No. 9:*** | Is the resistance less than 10 Ω? | Replace the ECM. <Ref. to FU(H4DO)-102, Engine Control Module (ECM).> | Repair the harness. |

## D: 14

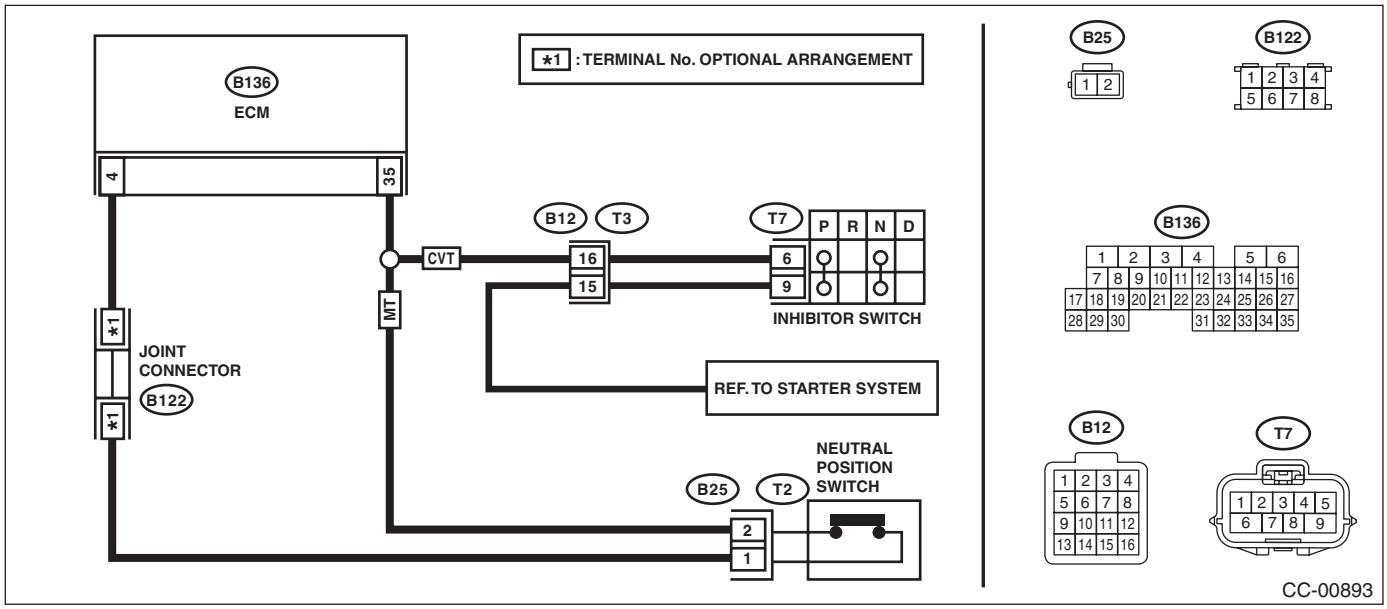
Detected when select lever is set in the neutral position, or when malfunction related to neutral position switch occurs.

**TROUBLE SYMPTOM:**

Cruise control cannot be set.

**WIRING DIAGRAM:**

Cruise Control System <Ref. to WI-61, WIRING DIAGRAM, Cruise Control System.>



| Step | | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK TRANSMISSION TYPE.** | Is the transmission type CVT? | Go to step **2**. | Go to step **5**. (MT model) |
| 2 | **CHECK INHIBITOR SWITCH CIRCUIT.**<br>1) Turn the ignition switch to OFF.<br>2) Disconnect the inhibitor switch harness connector.<br>3) Turn the ignition switch to ON.<br>4) Measure the voltage between harness connector terminal and chassis ground.<br>***Connector & terminal***<br>***(T7) No. 6 (+) — Chassis ground (–):*** | Is the voltage 10 V or more? | Go to step **3**. | Check for open or short in the harness between inhibitor switch and ECM. |
| 3 | **CHECK INHIBITOR SWITCH CIRCUIT.**<br>1) Turn the ignition switch to OFF.<br>2) Disconnect the starter motor harness connector.<br>3) Measure the resistance between inhibitor switch harness connector terminal and starter motor.<br>***Connector & terminal***<br>***(T7) No. 9 — Starter motor:*** | Is the resistance less than 10 Ω? | Go to step **4**. | Repair the harness. |
| 4 | **CHECK INHIBITOR SWITCH.**<br>Remove and check the inhibitor switch. <Ref. to CC-14, Inhibitor Switch.> | Is the inhibitor switch working normal? | Replace the ECM. <Ref. to FU(H4DO)-102, Engine Control Module (ECM).> | Replace the inhibitor switch. |

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 5 | **CHECK NEUTRAL POSITION SWITCH CIRCUIT.**<br>1) Turn the ignition switch to OFF.<br>2) Disconnect the neutral position switch harness connector.<br>3) Turn the ignition switch to ON.<br>4) Measure the voltage between harness connector terminal and chassis ground.<br>***Connector & terminal***<br>***(B25) No. 2 (+) — Chassis ground (–):*** | Is the voltage 10 V or more? | Go to step **6**. | Check for open or short in the harness between neutral position switch and ECM. |
| 6 | **CHECK NEUTRAL POSITION SWITCH CIRCUIT.**<br>1) Turn the ignition switch to OFF.<br>2) Measure resistance between harness connector terminal of neutral position switch and chassis ground.<br>***Connector & terminal***<br>***(B25) No. 1 — Chassis ground:*** | Is the resistance less than 10 Ω? | Go to step **7**. | Repair the harness. |
| 7 | **CHECK NEUTRAL POSITION SWITCH.**<br>Remove and check the neutral position switch. <Ref. to CC-16, Neutral Position Switch.> | Is the neutral position switch OK? | Replace the ECM. <Ref. to FU(H4DO)-102, Engine Control Module (ECM).> | Replace the neutral position switch. |

## E: 15

Detected when CANCEL switch is pressed or malfunction related to CRUISE switch occurs.

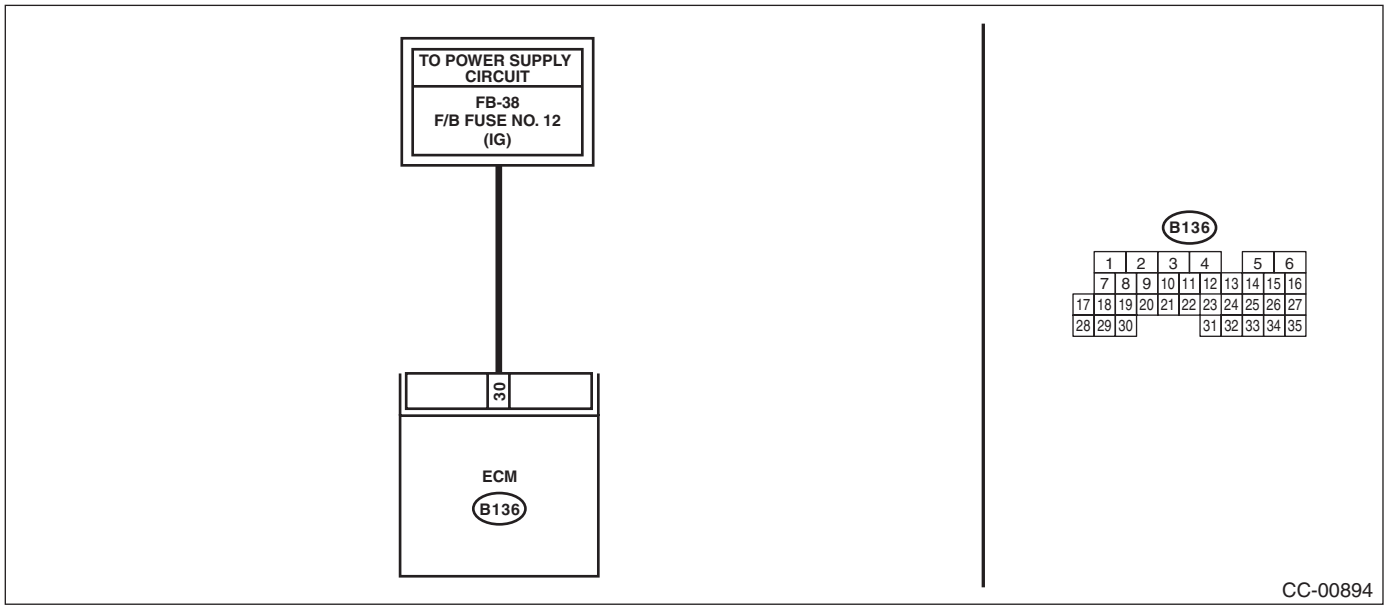
**TROUBLE SYMPTOM:**

- Cruise control cannot be set. (Cancelled immediately.)
- Cruise control cannot be released.

Refer to DTC 11 for diagnostic procedure.
<Ref. to CC(diag)-15, 11, Diagnostic Procedure with Cancel Code.>

## F: 16

Detected when ignition switch is turned to OFF or malfunction related to the ignition switch occurs.
**TROUBLE SYMPTOM:**
Cruise control cannot be set.
**WIRING DIAGRAM:**
Cruise Control System <Ref. to WI-61, WIRING DIAGRAM, Cruise Control System.>



| Step | | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK IGNITION SWITCH CIRCUIT.**<br>1) Turn the ignition switch to OFF.<br>2) Disconnect the ECM harness connector.<br>3) Turn the ignition switch to ON.<br>4) Measure the voltage between harness connector terminal and chassis ground.<br>***Connector & terminal***<br>***(B136) No. 30 (+) — Chassis ground (–):*** | Is the voltage 10 V or more? | Check for poor contact of ECM connector. | • Check fuse No. 12 (in fuse & relay box).<br>• Check the harness for open or short circuit between ignition switch and ECM. |

## G: 21

Cruise control command switch malfunction is detected.
**TROUBLE SYMPTOM:**
- Cruise control cannot be set. (Cancelled immediately.)
- Cruise control cannot be released.

Refer to DTC 11 for diagnostic procedure.
<Ref. to CC(diag)-15, 11, Diagnostic Procedure with Cancel Code.>

## H: 22

Malfunction related to vehicle speed sensor is detected.
**DIAGNOSIS:**
Open or shorted circuit in vehicle speed sensor system.
**TROUBLE SYMPTOM:**
Cruise control cannot be set. (Cancelled immediately.)

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK ABS OR VDC WARNING LIGHT.**<br>1) Turn the ignition switch to ON.<br>2) After the initial operation of combination meter is completed, check if ABS or VDC warning light continues to illuminate. | Does the warning light continue to illuminate? | Check the VDCCM. <Ref. to VDC(diag)-2, Basic Diagnostic Procedure.> | Go to step **2**. |
| 2 | **CHECK DTC OF LAN COMMUNICATION CIRCUIT.**<br>Read the DTC of body integrated unit using Subaru Select Monitor. | Is DTC displayed? | Perform inspection according to DTC. | Replace the ECM. <Ref. to FU(H4DO)-102, Engine Control Module (ECM).> |

## I: 24

Malfunction in cruise control-related switch is detected.
**TROUBLE SYMPTOM:**
- Cruise control cannot be set. (Cancelled immediately.)
- Cruise control cannot be released.

Refer to DTC 11 for diagnostic procedure.
<Ref. to CC(diag)-15, 11, Diagnostic Procedure with Cancel Code.>

## J: 31

Engine speed signal malfunction is detected.
Abnormal increase of engine speed is detected.
Gear is placed in 1st or Reverse position.
After driving at the 2nd gear position or higher, perform the cruise setting again. If a cancel code is not detected, it is normal.

## K: 32

This DTC is detected out of vehicle speed range.
Increase vehicle speed high enough to allow the cruise control to function, and then perform setting operation again.
If cancel code is still detected after setting cruise again, perform the diagnosis for DTC 22.
Refer to DTC 22 for diagnostic procedure.
<Ref. to CC(diag)-23, 22, Diagnostic Procedure with Cancel Code.>

## L: 34

The vehicle has been driven at a speed higher than set speed for a long time (approximately 10 minutes) during cruise driving.
This cancel code is detected when driving for a long period of time at a speed higher than appropriate for cruise control setting by operating the accelerator pedal.
Perform the cruise control setting operation again. If the cancel code is not detected, it is normal.

## M: 35

Detected when it is impossible to perform the vehicle speed feedback.
Set vehicle speed cannot be kept for some reasons (steep uphill, unreleased parking brake, etc.) during cruise driving.
Cancel code is detected when driving conditions are not suitable for cruise control.
Perform cruise set operation again after clearing the possible cause.

## N: 41

VDC/TCS/EPB is operated.
Vehicle dynamics control (VDC) or TCS/EPB is operated during cruise driving or cruise setting.
<Ref. to VDC(diag)-2, PROCEDURE, Basic Diagnostic Procedure.>

## O: 43

- The situation that some or all functions for ABS/VDC can not work is detected.

During cruise driving or cruise setting, the situation that some or all functions for ABS/VDC can not work is detected.
<Ref. to VDC(diag)-2, PROCEDURE, Basic Diagnostic Procedure.>

- CRUISE indicator does not illuminate even though you pressed the CRUISE switch before starting the engine.

Detected when the CRUISE switch is pressed during the initial diagnosis of ABS/VDC. It is normal if the CRUISE indicator illuminates when you press the CRUISE switch again after starting the engine and confirming that the initial illumination of the ABS/VDC warning light has been ended.

## P: 44

Body integrated unit malfunction is detected.
Body integrated unit system malfunction is detected during cruise driving or cruise setting.
<Ref. to LAN(diag)-2, PROCEDURE, Basic Diagnostic Procedure.>

## Q: 45

Malfunction of the combination meter is detected.
Combination meter malfunction is detected during cruise driving or cruise setting.
<Ref. to LAN(diag)-2, PROCEDURE, Basic Diagnostic Procedure.>

## R: 49

Automatic transmission malfunction is detected.
Automatic transmission malfunction is detected during cruise driving or cruise control setting.
<Ref. to CVT(diag)-2, PROCEDURE, Basic Diagnostic Procedure.>

## S: 61

Malfunction in the stop light & brake switch is detected.
**TROUBLE SYMPTOM:**
- Cruise control cannot be set.
- Cruise control cannot be released.

Refer to DTC 12 for diagnostic procedure.
<Ref. to CC(diag)-17, 12, Diagnostic Procedure with Cancel Code.>

## T: 62

Neutral position switch malfunction is detected.
**TROUBLE SYMPTOM:**
Cruise control cannot be set.
Refer to DTC 14 for diagnostic procedure.
<Ref. to CC(diag)-20, 14, Diagnostic Procedure with Cancel Code.>

## U: 63

Malfunction of vehicle speed signal variation is detected.
**TROUBLE SYMPTOM:**
Cruise control cannot be set. (Cancelled immediately.)
Refer to DTC 22 for diagnostic procedure.
<Ref. to CC(diag)-23, 22, Diagnostic Procedure with Cancel Code.>

## V: 64

Malfunction related to engine is detected.
Refer to the Engine Diagnostic Procedure for diagnostic procedure.
<Ref. to EN(H4DO)(diag)-2, PROCEDURE, Basic Diagnostic Procedure.>

## W: 65

Cruise control command switch malfunction is detected.
While the command switch is pressed ON for a long time (approximately two minutes), stuck ON condition is detected.
**TROUBLE SYMPTOM:**
- Cruise control cannot be set. (Cancelled immediately.)
- Cruise control cannot be released.

Refer to DTC 11 for diagnostic procedure.
<Ref. to CC(diag)-15, 11, Diagnostic Procedure with Cancel Code.>

## X: 66

Cruise control calculation malfunction is detected.
Refer to the Engine Diagnostic Procedure for diagnostic procedure.
<Ref. to EN(H4DO)(diag)-2, PROCEDURE, Basic Diagnostic Procedure.>

# 1. Basic Diagnostic Procedure

## A: PROCEDURE

**CAUTION:**
**When the body integrated unit is replaced, registration of the immobilizer system is required. For details, refer to the "REGISTRATION MANUAL FOR IMMOBILIZER".**

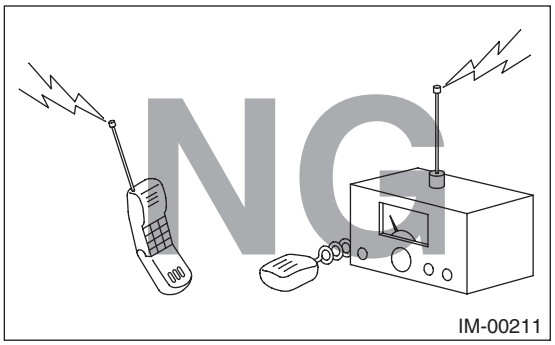
| | Step | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CONFIRM NUMBER OF REGISTERED IMMOBILIZER KEY.**<br>Confirm the number of registered immobilizer key. For details, refer to the "REGISTRATION MANUAL FOR IMMOBILIZER". | Is the number of registration 0? | Register the immobilizer system. | Go to step **2**. |
| 2 | **CHECK SECURITY INDICATOR LIGHT.**<br>1) Remove the ignition key from ignition switch.<br>2) Wait at least 60 seconds. | Does the security indicator light blink? | Go to step **3**. | Check the security indicator light circuit. <Ref. to IM(diag)-11, CHECK SECURITY INDICATOR LIGHT CIRCUIT, INSPECTION, Diagnostics Chart for Security Indicator Light.> |
| 3 | **CHECK KEY SWITCH.**<br>Insert the ignition key in the ignition switch. (OFF or ACC) | Does the security indicator light remain blinking? | Check the key switch circuit. <Ref. to IM(diag)-13, CHECK KEY SWITCH CIRCUIT, INSPECTION, Diagnostics Chart for Security Indicator Light.> | Go to step **4**. |
| 4 | **CHECK SECURITY INDICATOR LIGHT.**<br>Check the security indicator light status in the condition of step 3. | Does the security indicator light go off? | Go to step **7**. | Go to step **5**. |
| 5 | **CHECK SECURITY INDICATOR LIGHT.**<br>Turn the ignition switch to ON. | Does the security indicator light go off? | Go to step **7**. | Go to step **6**. |
| 6 | **CHECK ENGINE START.**<br>Turn the ignition switch to START. | Does the starter operate? | Check the LAN communication system. <Ref. to LAN(diag)-2, Basic Diagnostic Procedure.> | Go to step **8**. |
| 7 | **CHECK ENGINE START.**<br>Turn the ignition switch to START. | Does the engine start? | Immobilizer system is normal. | Go to step **9**. |
| 8 | **CHECK DTC.**<br>Read the DTC of body integrated unit and ECM using Subaru Select Monitor. | Is the DTC displayed on screen? | Go to step **10**. | Replace the body integrated unit. <Ref. to SL-78, Body Integrated Unit.> |
| 9 | **CHECK DTC.**<br>Read the DTC of body integrated unit and ECM using Subaru Select Monitor. | Is the DTC displayed on screen? | Go to step **10**. | Perform the diagnosis for engine system. <Ref. to EN(H4DO)(diag)-66, PROCEDURE, Diagnostics for Engine Starting Failure.> |

| Step | | Check | Yes | No |
|---|---|---|---|---|
| 10 | **CHECK FREEZE FRAME DATA.**<br>Using the Subaru Select Monitor, check the Freeze Frame Data. | Are the data recorded? | Record the data.<br>Go to step **11**. | Go to step **11**. |
| 11 | **PERFORM DIAGNOSIS.**<br>1) Inspect using the “Diagnostic Procedure with Diagnostic Trouble Code (DTC)”. <Ref. to IM(diag)-16, Diagnostic Procedure with Diagnostic Trouble Code (DTC).><br>2) Repair the trouble cause.<br>3) Perform the Clear Memory Mode.<br>4) Read DTCs again. | Is the DTC displayed on screen? | Inspect using the “Diagnostic Procedure with Diagnostic Trouble Code (DTC)”. <Ref. to IM(diag)-16, Diagnostic Procedure with Diagnostic Trouble Code (DTC).> | Finish the diagnosis. |

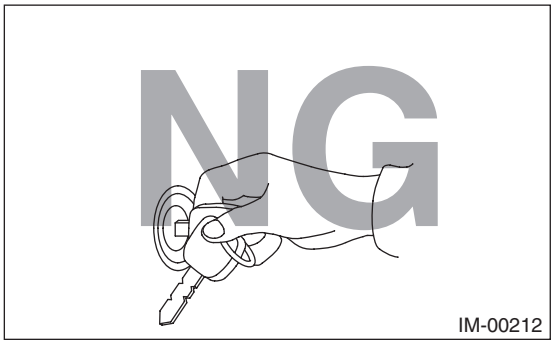
# 2. General Description

## A: CAUTION

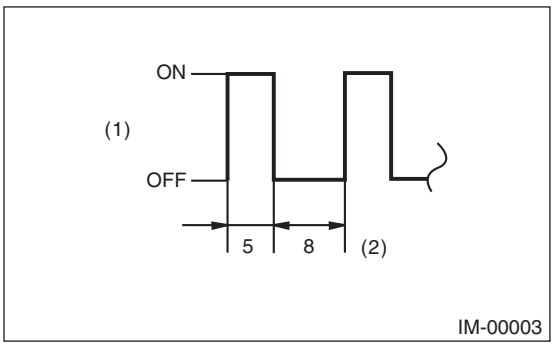
**CAUTION:**
**• Do not use the electrical test equipment on the airbag system wiring harnesses and connector circuits.**
**• Be careful not to damage the airbag system wiring harness.**
**• While diagnostic items are being checked, do not operate radios, portable telephones, etc. which emit electromagnetic waves near or inside the vehicle.**



**• When turning the ignition switch to ON or OFF while diagnostic items are being checked, do not allow keys with different ID codes close to the ignition switch. If the ignition key is on a key holder, remove it from the key holder before performing diagnoses.**



**• When repeatedly turning the ignition switch to ON or OFF while diagnostic items are being checked, it should be switched in cycles of "ON" for at least 5 seconds → "OFF" for at least 8 seconds.**



(1) Ignition switch position
(2) Sec.

**• If the engine fails to start with a registered ignition key, detach the ignition key from ignition switch and wait for approx. 1 second until security indicator light begins to flash. And then start the engine again.**
**• Before performing the diagnostics, obtain all keys for the vehicle from the owner.**
**• Do not register a body integrated unit already registered to another vehicle to diagnose failures or inspect functions.**

# B: PREPARATION TOOL

## 1. SPECIAL TOOL

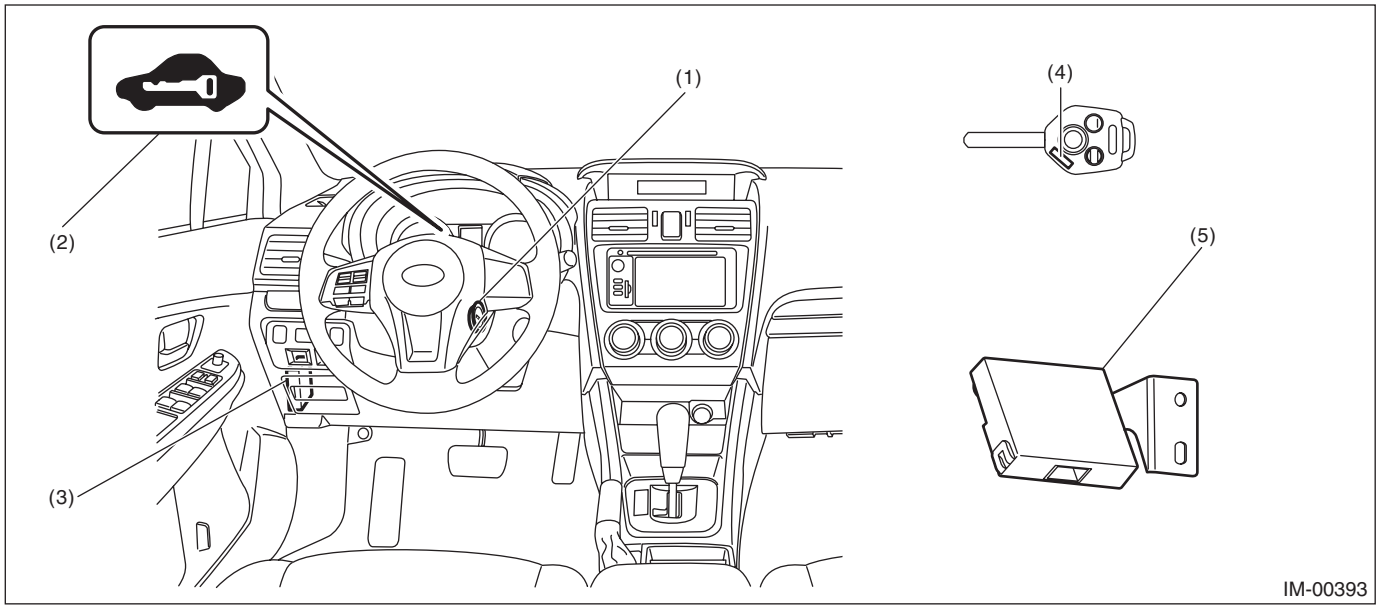
| ILLUSTRATION | TOOL NUMBER | DESCRIPTION | REMARKS |
|---|---|---|---|
|  ST1B022XU0 | 1B022XU0 | SUBARU SELECT MONITOR III KIT | Used for troubleshooting the electrical system. |

## 2. GENERAL TOOL

| TOOL NAME | REMARKS |
|---|---|
| Circuit tester | Used for measuring resistance, voltage and current. |

# 3. Electrical Component Location

## A: LOCATION



(1) Antenna
(2) Security indicator light (LED bulb)
(3) Body integrated unit
(4) Transponder
(5) Security control module (only for Canada models)

# 4. Immobilizer Control Module I/O Signal

## A: WIRING DIAGRAM

### 1. IMMOBILIZER

<Ref. to WI-100, WIRING DIAGRAM, Immobilizer System.>

# 5. Subaru Select Monitor

## A: OPERATION

### 1. HOW TO USE THE SUBARU SELECT MONITOR

For the operation procedure, refer to the “PC application help for Subaru Select Monitor”.

### 2. READ DIAGNOSTIC TROUBLE CODE (DTC) FOR ENGINE AND BODY INTEGRATED UNIT

Refer to “Read Diagnostic Trouble Code” for information about how to indicate DTC. <Ref. to IM(diag)-9, Read Diagnostic Trouble Code (DTC).>

NOTE:
If a problem is detected, repair the trouble cause. <Ref. to IM(diag)-20, DTC P1572 IMM CIRCUIT FAILURE (EXCEPT ANTENNA CIRCUIT), Diagnostic Procedure with Diagnostic Trouble Code (DTC).>

# 6. Read Diagnostic Trouble Code (DTC)

## A: OPERATION

### 1. ECM

For the operation procedure, refer to the “PC application help for Subaru Select Monitor”.

NOTE:
For detailed concerning DTC, refer to the List of Diagnostic Trouble Codes (DTC). <Ref. to IM(diag)-14, LIST, List of Diagnostic Trouble Code (DTC).>

### 2. BODY INTEGRATED UNIT

For the operation procedure, refer to the “PC application help for Subaru Select Monitor”.

NOTE:
For detailed concerning DTC, refer to the List of Diagnostic Trouble Codes (DTC). <Ref. to IM(diag)-14, LIST, List of Diagnostic Trouble Code (DTC).>

# 7. Clear Memory Mode

## A: OPERATION

### 1. ECM

For the operation procedure, refer to the “PC application help for Subaru Select Monitor”.

NOTE:
Initial diagnosis of electronic throttle control is performed after memory clearance. Wait for 10 seconds or more after turning the ignition switch to ON, and then start the engine.

### 2. BODY INTEGRATED UNIT

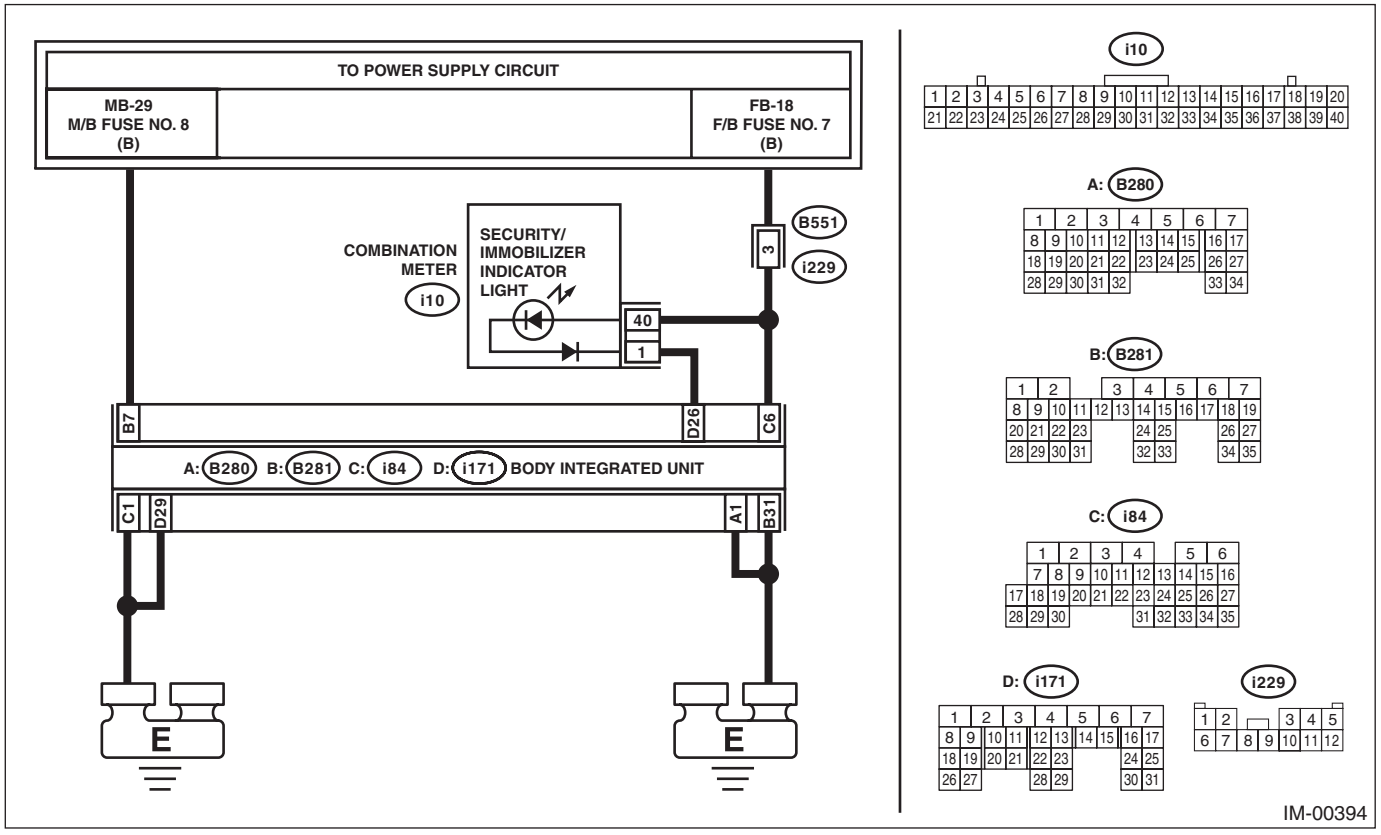
For the operation procedure, refer to the “PC application help for Subaru Select Monitor”.

# 8. Diagnostics Chart for Security Indicator Light

## A: INSPECTION

### 1. CHECK SECURITY INDICATOR LIGHT CIRCUIT

**CAUTION:**
**When the body integrated unit is replaced, registration of the immobilizer system is required. For details, refer to the "REGISTRATION MANUAL FOR IMMOBILIZER".**
**WIRING DIAGRAM:**
Immobilizer system <Ref. to WI-100, WIRING DIAGRAM, Immobilizer System.>

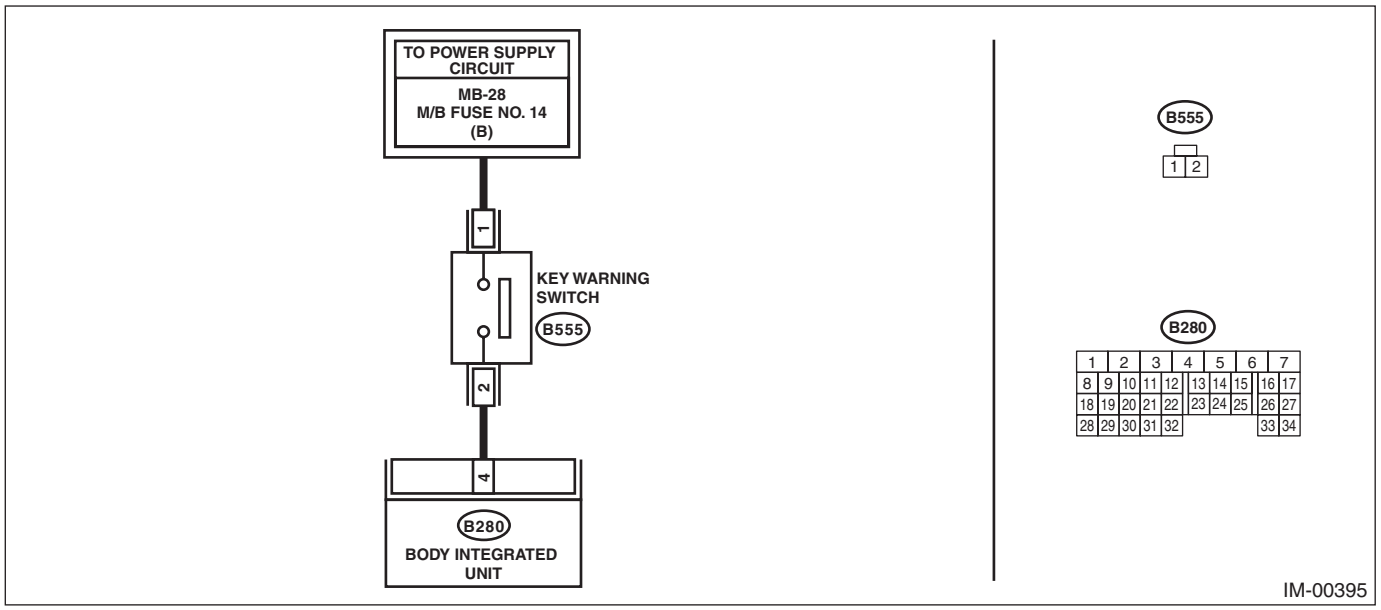


| Step | | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK FUSE.**<br>1) Remove the ignition key from ignition switch.<br>2) Check the fuse (M/B No. 8). | Is the fuse OK? | Go to step **2**. | Replace the fuse. If the replaced fuse blows out easily, repair the short circuit in the harness between the fuse and body integrated unit. |
| 2 | **CHECK SECURITY INDICATOR LIGHT.**<br>1) Disconnect the connector from body integrated unit.<br>2) Connect the resistor (100 Ω) between the body integrated unit connector terminal (i171) No. 26 and chassis ground. | Does the security indicator light illuminate? | Go to step **3**. | Go to step **5**. |

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 3 | **CHECK BODY INTEGRATED UNIT GROUND CIRCUIT.**<br>Measure the resistance between the body integrated unit connector terminal and chassis ground.<br>***Connector & terminal***<br>***(B280) No. 1 — Chassis ground:***<br>***(B281) No. 31 — Chassis ground:***<br>***(i84) No. 1 — Chassis ground:***<br>***(i171) No. 29 — Chassis ground:*** | Is the resistance less than 10 Ω? | Go to step **4**. | Repair the open circuit of the body integrated unit ground circuit. |
| 4 | **CHECK BODY INTEGRATED UNIT POWER SUPPLY CIRCUIT.**<br>Measure the voltage between the body integrated unit connector terminal and chassis ground.<br>***Connector & terminal***<br>***(B281) No. 7 (+) — Chassis ground (–):***<br>***(i84) No. 6 (+) — Chassis ground (–):*** | Is the voltage 10 V or more? | Replace the body integrated unit. <Ref. to SL-78, Body Integrated Unit.> | Check the harness for open or short circuit between body integrated unit and fuse. |
| 5 | **CHECK COMBINATION METER CIRCUIT.**<br>1) Remove the combination meter. <Ref. to IDI-17, Combination Meter.><br>2) Measure the voltage between combination meter connector terminal and chassis ground.<br>***Connector & terminal***<br>***(i10) No. 40 (+) — Chassis ground (–):*** | Is the voltage 10 V or more? | Go to step **6**. | Check for an open or short circuit in the harness between the combination meter and fuse. |
| 6 | **CHECK COMBINATION METER CIRCUIT.**<br>Measure the resistance between the body integrated unit connector terminal and combination meter connector terminal.<br>***Connector & terminal***<br>***(i171) No. 26 — (i10) No. 1:*** | Is the resistance less than 10 Ω? | LED bulb is defective. Replace the combination meter case assembly. <Ref. to IDI-19, DISASSEMBLY, Combination Meter.> | Repair the harness or connector. |

## 2. CHECK KEY SWITCH CIRCUIT

**CAUTION:**
**When the body integrated unit is replaced, registration of the immobilizer system is required. For details, refer to the "REGISTRATION MANUAL FOR IMMOBILIZER".**
**WIRING DIAGRAM:**
Immobilizer system <Ref. to WI-100, WIRING DIAGRAM, Immobilizer System.>



| Step | | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK POWER SUPPLY CIRCUIT.**<br>1) Disconnect the connector from key warning switch.<br>2) Measure the voltage between key warning switch connector terminal and chassis ground.<br>***Connector & terminal***<br>***(B555) No. 1 (+) — Chassis ground (–):*** | Is the voltage 10 V or more? | Go to step **2**. | Check the harness for an open or short between the key warning switch and fuse. |
| 2 | **CHECK KEY WARNING SWITCH.**<br>1) Insert the ignition key in the ignition switch. (OFF or ACC)<br>2) Measure the resistance between key warning switch connector terminals.<br>***Connector & terminal***<br>***No. 1 — No. 2:*** | Is the resistance less than 1 Ω? | Go to step **3**. | Replace the key warning switch. |
| 3 | **CHECK KEY WARNING SWITCH.**<br>1) Remove the ignition key from ignition switch.<br>2) Measure the resistance between key warning switch connector terminals.<br>***Connector & terminal***<br>***No. 1 — No. 2:*** | Is the resistance 1 MΩ or more? | Go to step **4**. | Replace the key warning switch. |
| 4 | **CHECK HARNESS BETWEEN KEY WARNING SWITCH AND BODY INTEGRATED UNIT.**<br>1) Disconnect the connector from body integrated unit.<br>2) Measure the resistance between key warning switch connector terminal and body integrated unit connector terminal.<br>***Connector & terminal***<br>***(B555) No. 2 — (B280) No. 4:*** | Is the resistance less than 10 Ω? | Replace the body integrated unit. <Ref. to SL-78, Body Integrated Unit.> | Repair the harness between key warning switch and body integrated unit. |

# 9. List of Diagnostic Trouble Code (DTC)

## A: LIST

### 1. ECM

| DTC | Item | Contents of diagnosis | Index No. |
|---|---|---|---|
| P0513 | Incorrect Immobilizer Key | Incorrect immobilizer key (Use of unregistered key in body integrated unit) | <Ref. to IM(diag)-16, DTC P0513 INCORRECT IMMOBILIZER KEY, Diagnostic Procedure with Diagnostic Trouble Code (DTC).> |
| P1570 | Antenna | Faulty antenna | <Ref. to IM(diag)-17, DTC P1570 ANTENNA, Diagnostic Procedure with Diagnostic Trouble Code (DTC).> |
| P1571 | Reference Code Incompatibility | Reference code incompatibility between body integrated unit and ECM | <Ref. to IM(diag)-19, DTC P1571 REFERENCE CODE INCOMPATIBILITY, Diagnostic Procedure with Diagnostic Trouble Code (DTC).> |
| P1572 | IMM Circuit Failure (Except Antenna Circuit) | Communication failure between body integrated unit and ECM | <Ref. to IM(diag)-20, DTC P1572 IMM CIRCUIT FAILURE (EXCEPT ANTENNA CIRCUIT), Diagnostic Procedure with Diagnostic Trouble Code (DTC).> |
| P1574 | Key Communication Failure | Communication failure between key and body integrated unit | <Ref. to IM(diag)-22, DTC P1574 KEY COMMUNICATION FAILURE, Diagnostic Procedure with Diagnostic Trouble Code (DTC).> |
| P1576 | EGI Control Module EEPROM | ECM malfunctioning | <Ref. to IM(diag)-22, DTC P1576 EGI CONTROL MODULE EEPROM, Diagnostic Procedure with Diagnostic Trouble Code (DTC).> |
| P1577 | IMM Control Module EEPROM | Body integrated unit malfunctioning | <Ref. to IM(diag)-23, DTC P1577 IMM CONTROL MODULE EEPROM, Diagnostic Procedure with Diagnostic Trouble Code (DTC).> |
| P1578 | Meter Failure (Except for model for Canada) | • Reference code incompatibility between combination meter and body integrated unit<br>• Communication failure between body integrated unit and ECM | <Ref. to IM(diag)-23, DTC P1578 METER FAILURE, Diagnostic Procedure with Diagnostic Trouble Code (DTC).> |
| | Meter Failure (Model for Canada) | • Reference code incompatibility between body integrated unit and security control module<br>• Communication failure between body integrated unit and ECM | |

NOTE:
Perform diagnosis of engine DTC when a DTC other than an immobilizer DTC is detected. <Ref. to EN(H4DO)(diag)-82, List of Diagnostic Trouble Code (DTC).>

## 2. BODY INTEGRATED UNIT

| DTC | Item | Contents of diagnosis | Index No. | Relation between ECM and DTC |
|---|---|---|---|---|
| B1401 | M Collation NG | Reference code incompatibility between combination meter and body integrated unit | <Ref. to IM(diag)-24, DTC B1401 M COLLATION NG, Diagnostic Procedure with Diagnostic Trouble Code (DTC).> | P1578 |
| B1402 | Immobilizer Key Collation NG | • Incorrect immobilizer key (Use of unregistered key in body integrated unit)<br>• Faulty antenna<br>• Communication failure between key and body integrated unit | <Ref. to IM(diag)-24, DTC B1402 IMMOBILIZER KEY COLLATION NG, Diagnostic Procedure with Diagnostic Trouble Code (DTC).> | • P0513<br>• P1570<br>• P1574 |
| B1405 | SCU Collation NG | Reference code incompatibility between body integrated unit and security control module | <Ref. to IM(diag)-25, DTC B1405 SCU COLLATION NG, Diagnostic Procedure with Diagnostic Trouble Code (DTC).> | P1578 |
| B1406 | SCU_EEPROM_NG | Malfunction of security control module | <Ref. to IM(diag)-25, DTC B1406 SCU_EEPROM_NG, Diagnostic Procedure with Diagnostic Trouble Code (DTC).> | P1578 |
| B1407 | M Communication Abnormal | Communication failure between body integrated unit and combination meter | <Ref. to IM(diag)-26, DTC B1407 M COMMUNICATION ABNORMAL, Diagnostic Procedure with Diagnostic Trouble Code (DTC).> | P1578 |
| B1408 | Meter EEPROM Abnormal | Combination meter malfunction | <Ref. to IM(diag)-26, DTC B1408 METER EEPROM ABNORMAL, Diagnostic Procedure with Diagnostic Trouble Code (DTC).> | P1578 |
| B1409 | SCU Communication Abnormal | Communication failure between body integrated unit and security control module | <Ref. to IM(diag)-27, DTC B1409 SCU COMMUNICATION ABNORMAL, Diagnostic Procedure with Diagnostic Trouble Code (DTC).> | P1578 |
| B1410 | Transponder Communication Abnormal | Communication failure between key and body integrated unit | <Ref. to IM(diag)-29, DTC B1410 TRANSPONDER COMMUNICATION ABNORMAL, Diagnostic Procedure with Diagnostic Trouble Code (DTC).> | P1574 |
| B1411 | Immobilizer Antenna Abnormal | Faulty antenna | <Ref. to IM(diag)-29, DTC B1411 IMMOBILIZER ANTENNA ABNORMAL, Diagnostic Procedure with Diagnostic Trouble Code (DTC).> | P1570 |

NOTE:
The starter relay control is performed in immobilizer system. When the body integrated unit detects a nonconformity of reference code, it immediately outputs a starter relay cut signal to ECM, and then ECM stops the starter relay operation. In this case, engine does not start, and DTC is not recorded in ECM. Check that the engine does not start on the DTC of body integrated unit.

# 10.Diagnostic Procedure with Diagnostic Trouble Code (DTC)

## A: DTC P0513 INCORRECT IMMOBILIZER KEY

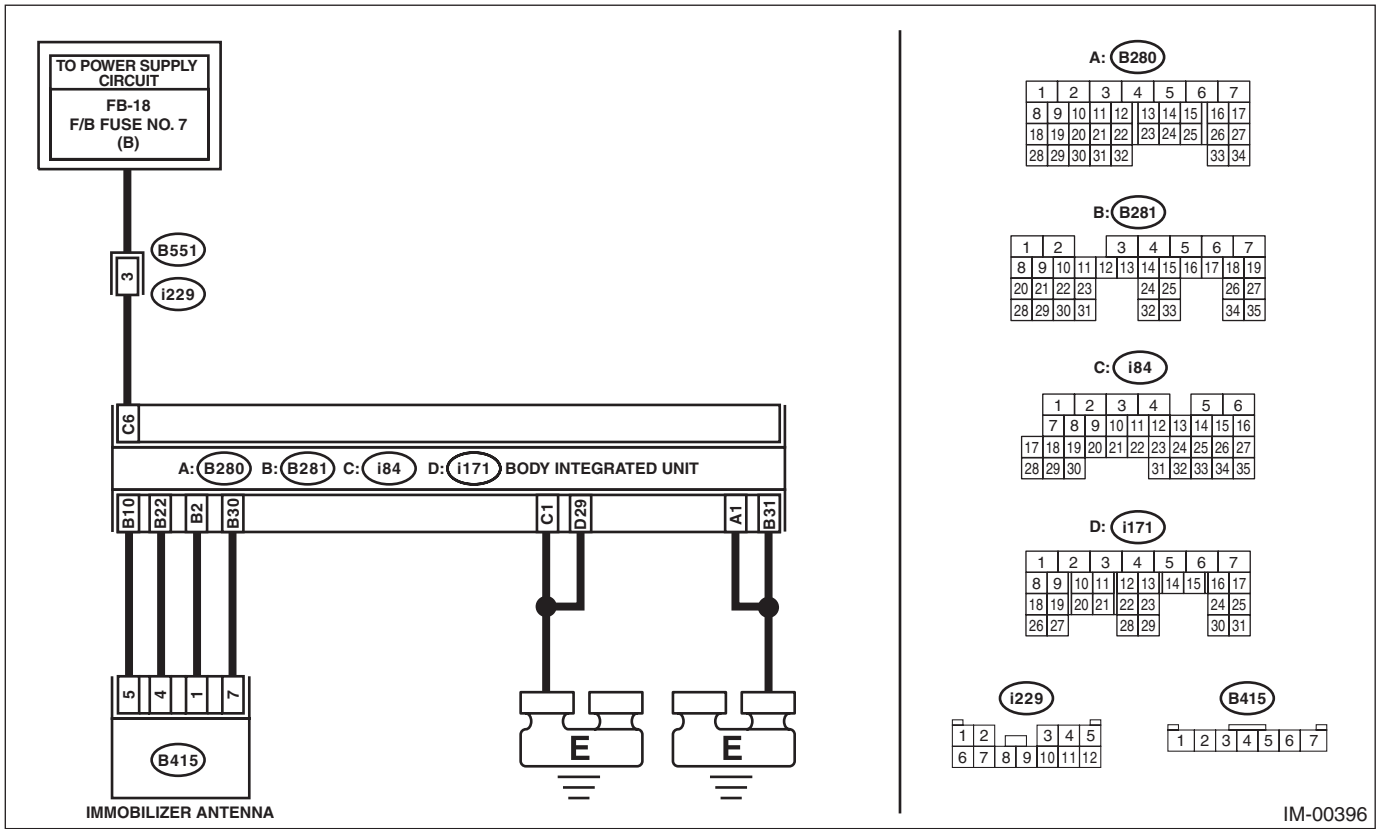
**CAUTION:**
**When the body integrated unit is replaced, registration of the immobilizer system is required. For details, refer to the "REGISTRATION MANUAL FOR IMMOBILIZER".**
**DTC DETECTING CONDITION:**
Incorrect immobilizer key (Use of unregistered key in body integrated unit)

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 1 | **PERFORM IGNITION KEY REGISTRATION.** Perform key registration. Refer to the "REGISTRATION MANUAL FOR IMMOBILIZER". | Is key registration complete? | Finish the diagnosis. | Replace ignition keys (including transponder) which cannot be registered. Go to step **2**. |
| 2 | **PERFORM IGNITION KEY REGISTRATION.** Perform key registration. Refer to the "REGISTRATION MANUAL FOR IMMOBILIZER". | Is key registration complete? | Finish the diagnosis. | Replace the body integrated unit. <Ref. to SL-78, Body Integrated Unit.> |

## B: DTC P1570 ANTENNA

**DTC DETECTING CONDITION:**
Faulty antenna

**CAUTION:**
**When the body integrated unit is replaced, registration of the immobilizer system is required. For details, refer to the "REGISTRATION MANUAL FOR IMMOBILIZER".**
**WIRING DIAGRAM:**
Immobilizer system <Ref. to WI-100, WIRING DIAGRAM, Immobilizer System.>



| Step | | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK BODY INTEGRATED UNIT POWER SUPPLY CIRCUIT.**<br>1) Turn the ignition switch to OFF.<br>2) Disconnect the connector from body integrated unit.<br>3) Measure the voltage between the body integrated unit connector terminal and chassis ground.<br>***Connector & terminal***<br>***(i84) No. 6 (+) — Chassis ground (–):*** | Is the voltage 10 V or more? | Go to step **2**. | Check the harness for open or short circuit between body integrated unit and fuse. |
| 2 | **CHECK BODY INTEGRATED UNIT GROUND CIRCUIT.**<br>Measure the resistance between the body integrated unit connector terminal and chassis ground.<br>***Connector & terminal***<br>***(B280) No. 1 — Chassis ground:***<br>***(B281) No. 31 — Chassis ground:***<br>***(i84) No. 1 — Chassis ground:***<br>***(i171) No. 29 — Chassis ground:*** | Is the resistance less than 10 Ω? | Go to step **3**. | Repair the open circuit of the body integrated unit ground circuit. |

| Step | | Check | Yes | No |
|---|---|---|---|---|
| 3 | **CHECK ANTENNA POWER SUPPLY CIRCUIT.**<br>1) Connect the connector to body integrated unit.<br>2) Disconnect the connector from the antenna.<br>3) Insert the ignition key into the key cylinder, then measure the voltage between the antenna connector terminal and the chassis ground.<br>***Connector & terminal***<br>***(B415) No. 1 (+) — Chassis ground (–):*** | Is the voltage 5±0.5 V approx. 200 ms after inserting the ignition key into the key cylinder? And then, does the voltage return to 0 V within 2 s? | Go to step **5**. | Go to step **4**. |
| 4 | **CHECK ANTENNA POWER SUPPLY CIRCUIT.**<br>1) Disconnect the connector from body integrated unit.<br>2) Measure the resistance of body integrated unit connector terminal and antenna connector terminal.<br>***Connector & terminal***<br>***(B281) No. 2 — (B415) No. 1:*** | Is the resistance less than 10 Ω? | Replace the body integrated unit. <Ref. to SL-78, Body Integrated Unit.> | Repair the harness or connector between body integrated unit and antenna. |
| 5 | **CHECK ANTENNA GROUND CIRCUIT.**<br>Measure the resistance between antenna connector terminal and chassis ground.<br>***Connector & terminal***<br>***(B417) No. 7 — Chassis ground:*** | Is the resistance less than 10 Ω? | Go to step **7**. | Go to step **6**. |
| 6 | **CHECK ANTENNA GROUND CIRCUIT.**<br>1) Disconnect the connector from body integrated unit.<br>2) Measure the resistance between antenna connector terminal and chassis ground.<br>***Connector & terminal***<br>***(B281) No. 30 — (B415) No. 7:*** | Is the resistance less than 10 Ω? | Replace the body integrated unit. <Ref. to SL-78, Body Integrated Unit.> | Repair the harness or connector between body integrated unit and antenna. |
| 7 | **CHECK ANTENNA COMMUNICATION CIRCUIT.**<br>Measure the resistance of body integrated unit connector terminal and antenna connector terminal.<br>***Connector & terminal***<br>***(B281) No. 10 — (B415) No. 5:***<br>***(B281) No. 22 — (B415) No. 4:*** | Is the resistance less than 10 Ω? | Go to step **8**. | Repair the harness or connector between body integrated unit and antenna. |
| 8 | **CHECK ANTENNA.**<br>1) Replace the immobilizer antenna.<br>2) Insert the ignition key in the ignition switch. (OFF or ACC)<br>3) Check DTC of body integrated unit. | Is DTC B1411 detected? | Replace the body integrated unit. <Ref. to SL-78, Body Integrated Unit.> | Antenna has a failure. |

## C: DTC P1571 REFERENCE CODE INCOMPATIBILITY

**DTC DETECTING CONDITION:**
Reference code incompatibility between body integrated unit and ECM

**CAUTION:**
**When the body integrated unit is replaced, registration of the immobilizer system is required. For details, refer to the "REGISTRATION MANUAL FOR IMMOBILIZER".**

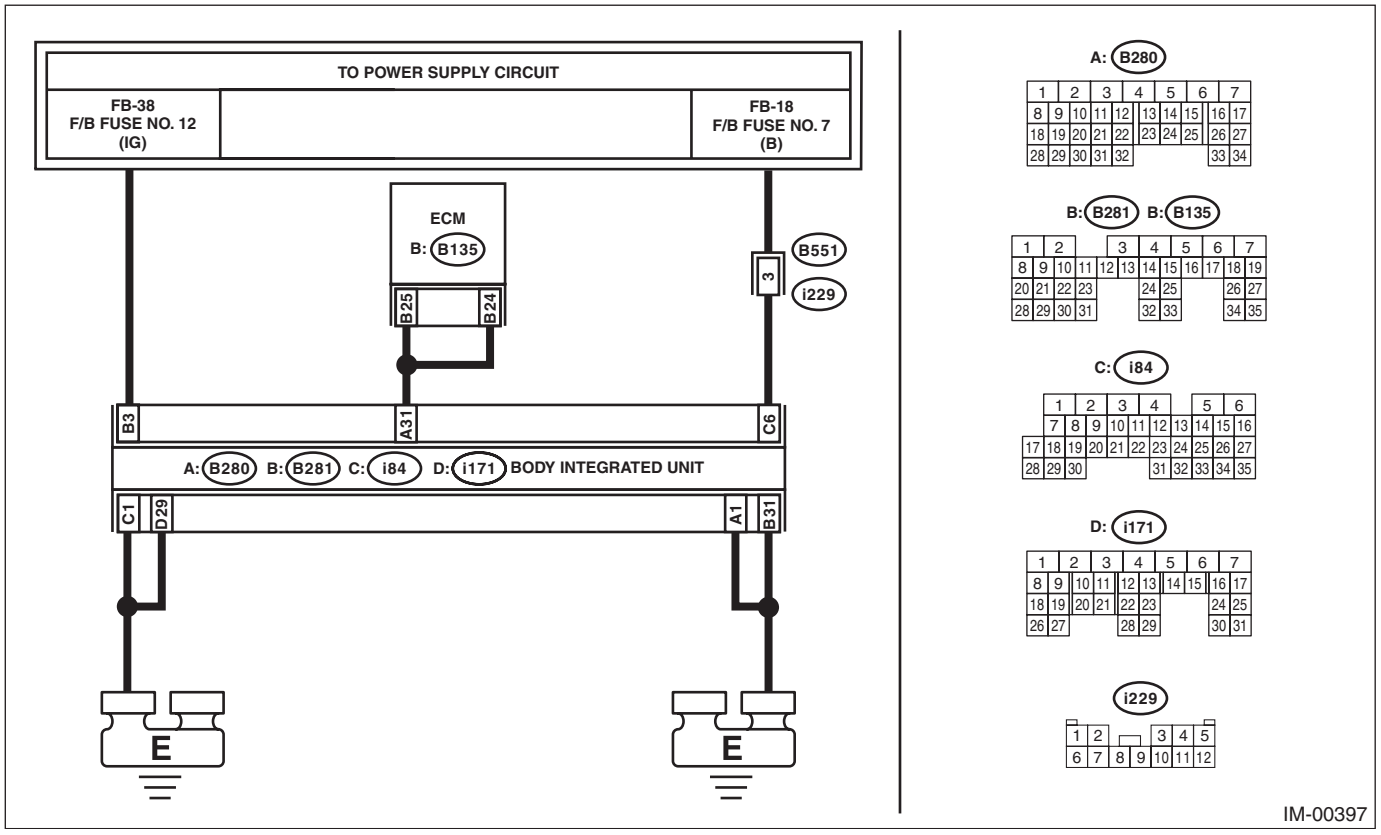
| | Step | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CONFIRM NUMBER OF REGISTERED IMMOBILIZER KEY.**<br>Confirm the number of registered immobilizer key. Refer to the "REGISTRATION MANUAL FOR IMMOBILIZER". | Is the number of registration 0? | Go to step **2**. | Go to step **3**. |
| 2 | **PERFORM IMMOBILIZER SYSTEM REGISTRATION.**<br>Register the immobilizer system. Refer to the "REGISTRATION MANUAL FOR IMMOBILIZER". | Is registration complete? | Finish the diagnosis. | Go to step **4**. |
| 3 | **PERFORM ECM REGISTRATION.**<br>Perform ECM registration. Refer to the "REGISTRATION MANUAL FOR IMMOBILIZER". | Is registration complete? | Finish the diagnosis. | Go to step **4**. |
| 4 | **CHECK FOR ANY OTHER DTC ON DISPLAY.** | Is any other DTC displayed? | Perform the diagnosis according to DTC. | Go to step **5**. |
| 5 | **PERFORM ECM REGISTRATION.**<br>1) Replace the ECM.<br>2) Perform ECM registration. Refer to the "REGISTRATION MANUAL FOR IMMOBILIZER". | Is registration complete? | Finish the diagnosis. | Replace the body integrated unit. <Ref. to SL-78, Body Integrated Unit.> |

# D: DTC P1572 IMM CIRCUIT FAILURE (EXCEPT ANTENNA CIRCUIT)

**DTC DETECTING CONDITION:**
Communication failure between body integrated unit and ECM

**CAUTION:**
**When the body integrated unit is replaced, registration of the immobilizer system is required. For details, refer to the "REGISTRATION MANUAL FOR IMMOBILIZER".**

**WIRING DIAGRAM:**
Immobilizer system <Ref. to WI-100, WIRING DIAGRAM, Immobilizer System.>



| Step | | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK BODY INTEGRATED UNIT POWER SUPPLY CIRCUIT.**<br>1) Turn the ignition switch to OFF.<br>2) Disconnect the connector from body integrated unit.<br>3) Measure the voltage between the body integrated unit connector terminal and chassis ground.<br>***Connector & terminal***<br>***(i84) No. 6 (+) — Chassis ground (–):*** | Is the voltage 10 V or more? | Go to step **2**. | Check the harness for open or short circuit between body integrated unit and fuse. |
| 2 | **CHECK BODY INTEGRATED UNIT POWER SUPPLY CIRCUIT.**<br>1) Turn the ignition switch to ON.<br>2) Measure the voltage between the body integrated unit connector terminal and chassis ground.<br>***Connector & terminal***<br>***(B281) No. 3 (+) — Chassis ground (–):*** | Is the voltage 10 V or more? | Go to step **3**. | Check the harness for open or short circuit between the body integrated unit and ignition switch. |

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 3 | **CHECK BODY INTEGRATED UNIT GROUND CIRCUIT.**<br>1) Turn the ignition switch to OFF.<br>2) Measure the resistance between the body integrated unit connector terminal and chassis ground.<br>***Connector & terminal***<br>***(B280) No. 1 — Chassis ground:***<br>***(B281) No. 31 — Chassis ground:***<br>***(i84) No. 1 — Chassis ground:***<br>***(i171) No. 29 — Chassis ground:*** | Is the resistance less than 10 Ω? | Go to step **4**. | Repair the open circuit of the body integrated unit ground circuit. |
| 4 | **CHECK GROUND CIRCUIT FOR ECM.**<br>Measure the resistance between the ECM ground terminal and engine ground. | Is the resistance less than 10 Ω? | Go to step **5**. | Repair the ECM ground circuit. |
| 5 | **CHECK HARNESS BETWEEN BODY INTEGRATED UNIT AND ECM.**<br>1) Disconnect the connector from ECM.<br>2) Measure the resistance between body integrated unit connector terminal and ECM connector terminal.<br>***Connector & terminal***<br>***(B280) No. 31 — (B135) No. 25:***<br>***(B280) No. 31 — (B135) No. 24:*** | Is the resistance less than 10 Ω? | Go to step **6**. | Repair the open circuit of the harness between the body integrated unit and ECM. |
| 6 | **CHECK COMMUNICATION CIRCUIT HARNESS.**<br>1) Turn the ignition switch to ON.<br>2) Measure the voltage between the body integrated unit connector terminal and chassis ground.<br>***Connector & terminal***<br>***(B280) No. 31 (+) — Chassis ground (–):*** | Is the voltage 6 V or more? | Repair the harness between body integrated unit and ECM. | Go to step **7**. |
| 7 | **CHECK COMMUNICATION CIRCUIT HARNESS.**<br>Measure the voltage between ECM connector terminal and engine ground.<br>***Connector & terminal***<br>***(B135) No. 25 (+) — Engine ground (–):***<br>***(B135) No. 24 (+) — Engine ground (–):*** | Is the voltage 6 V or more? | Repair the harness between body integrated unit and ECM. | Go to step **8**. |
| 8 | **CHECK COMMUNICATION CIRCUIT HARNESS.**<br>1) Turn the ignition switch to OFF.<br>2) Measure the resistance between the body integrated unit connector terminal and chassis ground.<br>***Connector & terminal***<br>***(B280) No. 31 — Chassis ground:*** | Is the resistance less than 10 Ω? | Repair the harness between body integrated unit and ECM. | Go to step **9**. |
| 9 | **CHECK COMMUNICATION CIRCUIT HARNESS.**<br>Measure the resistance between ECM connector terminal and engine ground.<br>***Connector & terminal***<br>***(B135) No. 25 — Engine ground:***<br>***(B135) No. 24 — Engine ground:*** | Is the resistance less than 10 Ω? | Repair the harness between body integrated unit and ECM. | Go to step **10**. |
| 10 | **CHECK ECM.**<br>1) Replace the ECM. (Do not perform ECM registration.)<br>2) Turn the ignition switch to ON.<br>3) Wait for 5 seconds.<br>4) Read the DTC relating the ECM using the Subaru Select Monitor. | Is DTC P1572 detected? | Replace the body integrated unit. <Ref. to SL-78, Body Integrated Unit.> | ECM has a failure. Perform ECM registration. Refer to the “REGISTRATION MANUAL FOR IMMOBILIZER”. |

## E: DTC P1574 KEY COMMUNICATION FAILURE

**DTC DETECTING CONDITION:**
Communication failure between key and body integrated unit

**CAUTION:**
**When the body integrated unit is replaced, registration of the immobilizer system is required. For details, refer to the "REGISTRATION MANUAL FOR IMMOBILIZER".**

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK IGNITION KEY.**<br>1) Remove the ignition key from the ignition switch.<br>2) Insert the ignition key into the ignition switch, and then turn the ignition switch to ON.<br>3) Read the DTC of body integrated unit using Subaru Select Monitor. | Is DTC B1410 detected? | Go to step **2**. | Finish the diagnosis. |
| 2 | **CHECK IGNITION KEY.**<br>1) Prepare another ignition key.<br>2) Insert the ignition key into the ignition switch, and then turn the ignition switch to ON.<br>3) Read the DTC of body integrated unit using Subaru Select Monitor. | Is DTC B1410 detected? | Go to step **3**. | Ignition key unit was defective. |
| 3 | **CHECK IMMOBILIZER ANTENNA.**<br>1) Replace the immobilizer antenna.<br>2) Insert the ignition key into the ignition switch, and then turn the ignition switch to ON.<br>3) Read the DTC of body integrated unit using Subaru Select Monitor. | Is DTC B1410 detected? | Replace the body integrated unit. <Ref. to SL-78, Body Integrated Unit.> | Immobilizer antenna was defective. |

## F: DTC P1576 EGI CONTROL MODULE EEPROM

**DTC DETECTING CONDITION:**
- ECM malfunctioning
- Inaccessible ROM in ECM during key registration.

**CAUTION:**
**When the ECM is replaced, registration of the immobilizer system is required. For details, refer to the "REGISTRATION MANUAL FOR IMMOBILIZER".**

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 1 | **PERFORM ECM REGISTRATION.**<br>Perform ECM registration. Refer to the "REGISTRATION MANUAL FOR IMMOBILIZER". | Is registration complete? | Finish the diagnosis. | Go to step **2**. |
| 2 | **PERFORM ECM REGISTRATION.**<br>Perform ECM registration. Refer to the "REGISTRATION MANUAL FOR IMMOBILIZER". | Is registration complete? | Finish the diagnosis. | Go to step **3**. |
| 3 | **PERFORM ECM REGISTRATION.**<br>Perform ECM registration. Refer to the "REGISTRATION MANUAL FOR IMMOBILIZER". | Is registration complete? | Finish the diagnosis. | Replace the ECM. <Ref. to FU(H4DO)-102, Engine Control Module (ECM).> |

## G: DTC P1577 IMM CONTROL MODULE EEPROM

**DTC DETECTING CONDITION:**

- Body integrated unit malfunctioning
- Failed to access ROM inside the body integrated unit.

**CAUTION:**
**When the body integrated unit is replaced, registration of the immobilizer system is required. For details, refer to the "REGISTRATION MANUAL FOR IMMOBILIZER".**

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 1 | **PERFORM ECM REGISTRATION.**<br>Perform ECM registration. Refer to the "REGISTRATION MANUAL FOR IMMOBILIZER". | Is registration complete? | Finish the diagnosis. | Go to step **2**. |
| 2 | **PERFORM ECM REGISTRATION.**<br>Perform ECM registration. Refer to the "REGISTRATION MANUAL FOR IMMOBILIZER". | Is registration complete? | Finish the diagnosis. | Go to step **3**. |
| 3 | **PERFORM ECM REGISTRATION.**<br>Perform ECM registration. Refer to the "REGISTRATION MANUAL FOR IMMOBILIZER". | Is registration complete? | Finish the diagnosis. | Replace the body integrated unit. <Ref. to SL-78, Body Integrated Unit.> |

## H: DTC P1578 METER FAILURE

**DTC DETECTING CONDITION:**

- Except Canada models

Reference code incompatibility between combination meter and body integrated unit or communication failure between body integrated unit and ECM

- Canada models

Reference code incompatibility between security control module and body integrated unit or communication failure between body integrated unit and ECM

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK DTC.**<br>Read the DTC of body integrated unit using Subaru Select Monitor. | Is any of DTC B1401, B1405, B1406, B1407, B1408 or B1409 detected? | Perform the diagnosis according to the DTC. | <Ref. to IM(diag)-20, DTC P1572 IMM CIRCUIT FAILURE (EXCEPT ANTENNA CIRCUIT), Diagnostic Procedure with Diagnostic Trouble Code (DTC).> |

## I: DTC B1401 M COLLATION NG

**DTC DETECTING CONDITION:**
Reference code incompatibility between combination meter and body integrated unit

**CAUTION:**
**When the combination meter is replaced, registration of the immobilizer system is required. For details, refer to the "REGISTRATION MANUAL FOR IMMOBILIZER".**

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK DTC.**<br>Read the DTC of body integrated unit using Subaru Select Monitor. | Is any of DTC B1407 or B1408 detected? | Perform the diagnosis according to the DTC. | Go to step **2**. |
| 2 | **CHECK COMBINATION METER REGISTRATION.**<br>Perform registration of combination meter. Refer to the "REGISTRATION MANUAL FOR IMMOBILIZER". | Is registration complete? | Finish the diagnosis. | Go to step **3**. |
| 3 | **CHECK DTC.**<br>Read the DTC of body integrated unit using Subaru Select Monitor. | Is any of DTC B1407 or B1408 detected? | Perform the diagnosis according to the DTC. | Replace the combination meter. <Ref. to IDI-17, Combination Meter.> |

## J: DTC B1402 IMMOBILIZER KEY COLLATION NG

**DTC DETECTING CONDITION:**
- Incorrect immobilizer key (Use of unregistered key in body integrated unit)
- Faulty antenna
- Communication failure between key and body integrated unit

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK DTC.**<br>Read the DTC of body integrated unit using Subaru Select Monitor. | Is any of DTC B1410 or B1411 detected? | Perform the diagnosis according to the DTC. | <Ref. to IM(diag)-16, DTC P0513 INCORRECT IMMOBILIZER KEY, Diagnostic Procedure with Diagnostic Trouble Code (DTC).> |

## K: DTC B1405 SCU COLLATION NG

**DTC DETECTING CONDITION:**

Reference code incompatibility between security control module and body integrated unit

**CAUTION:**

**When the security control module is replaced, registration of the immobilizer system is required. For details, refer to the "REGISTRATION MANUAL FOR IMMOBILIZER".**

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK DTC.**<br>Read the DTC of body integrated unit using Subaru Select Monitor. | Is any of DTC B1406 or B1409 detected? | Perform the diagnosis according to DTC. | Go to step **2**. |
| 2 | **PERFORM SECURITY CONTROL MODULE REGISTRATION.**<br>Perform security control module registration. Refer to the "REGISTRATION MANUAL FOR IMMOBILIZER". | Is registration complete? | Finish the diagnosis. | Go to step **3**. |
| 3 | **CHECK DTC.**<br>Read the DTC of body integrated unit using Subaru Select Monitor. | Is any of DTC B1406 or B1409 detected? | Perform the diagnosis according to DTC. | Replace the security control module. <Ref. to SL-72, Security Control Module.> |

## L: DTC B1406 SCU_EEPROM_NG

**DTC DETECTING CONDITION:**

- Defective security control module
- ROM of security control module cannot be accessed

**CAUTION:**

**When the security control module is replaced, registration of the immobilizer system is required. For details, refer to the "REGISTRATION MANUAL FOR IMMOBILIZER".**

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 1 | **PERFORM SECURITY CONTROL MODULE REGISTRATION.**<br>1) Perform security control module registration. Refer to the "REGISTRATION MANUAL FOR IMMOBILIZER".<br>2) Read the DTC of body integrated unit using Subaru Select Monitor. | Is DTC B1406 detected? | Replace the security control module. <Ref. to SL-72, Security Control Module.> | Finish the diagnosis. |

## M: DTC B1407 M COMMUNICATION ABNORMAL

**DTC DETECTING CONDITION:**
Communication failure between body integrated unit and combination meter

**CAUTION:**
**When the combination meter is replaced, registration of the immobilizer system is required. For details, refer to the "REGISTRATION MANUAL FOR IMMOBILIZER".**

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK DTC.**<br>Read the DTC of body integrated unit using Subaru Select Monitor. | Is DTC of the body integrated unit except for DTC B1407 displayed? | Perform the diagnosis according to the DTC. | Replace the combination meter. <Ref. to IDI-17, Combination Meter.> |

## N: DTC B1408 METER EEPROM ABNORMAL

**DTC DETECTING CONDITION:**
Defective combination meter

**CAUTION:**
**When the combination meter is replaced, registration of the immobilizer system is required. For details, refer to the "REGISTRATION MANUAL FOR IMMOBILIZER".**

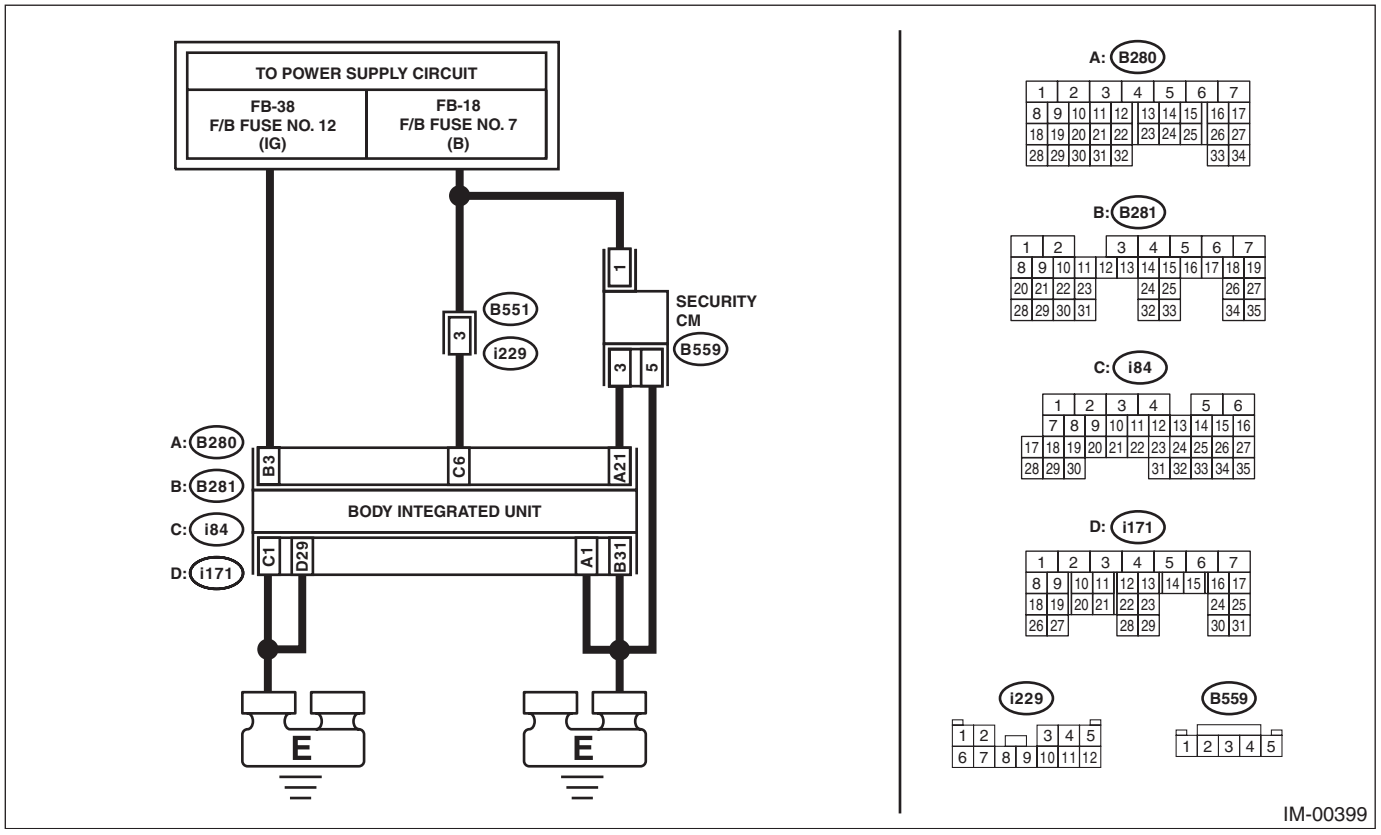
| | Step | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK COMBINATION METER REGISTRATION.**<br>1) Perform registration of combination meter. Refer to the "REGISTRATION MANUAL FOR IMMOBILIZER".<br>2) Read the DTC of body integrated unit using Subaru Select Monitor. | Is DTC B1408 detected? | Replace the combination meter. <Ref. to IDI-17, Combination Meter.> | Finish the diagnosis. |

## O: DTC B1409 SCU COMMUNICATION ABNORMAL

**DTC DETECTING CONDITION:**
Communication failure between body integrated unit and security control module

**CAUTION:**
**When the body integrated unit is replaced, registration of the immobilizer system is required. For details, refer to the "REGISTRATION MANUAL FOR IMMOBILIZER".**

**WIRING DIAGRAM:**
Immobilizer system <Ref. to WI-100, WIRING DIAGRAM, Immobilizer System.>



| Step | | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK BODY INTEGRATED UNIT POWER SUPPLY CIRCUIT.**<br>1) Turn the ignition switch to OFF.<br>2) Disconnect the connector from body integrated unit.<br>3) Measure the voltage between the body integrated unit connector terminal and chassis ground.<br>***Connector & terminal***<br>***(i84) No. 6 (+) — Chassis ground (–):*** | Is the voltage 10 V or more? | Go to step **2**. | Check the harness for open or short circuit between body integrated unit and fuse. |
| 2 | **CHECK BODY INTEGRATED UNIT POWER SUPPLY CIRCUIT.**<br>1) Turn the ignition switch to ON.<br>2) Measure the voltage between the body integrated unit connector terminal and chassis ground.<br>***Connector & terminal***<br>***(B281) No. 3 (+) — Chassis ground (–):*** | Is the voltage 10 V or more? | Go to step **3**. | Check the harness for open or short circuit between the body integrated unit and ignition switch. |

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 3 | **CHECK BODY INTEGRATED UNIT GROUND CIRCUIT.**<br>1) Turn the ignition switch to OFF.<br>2) Measure the resistance between the body integrated unit connector terminal and chassis ground.<br>***Connector & terminal***<br>***(B280) No. 1 — Chassis ground:***<br>***(B281) No. 31 — Chassis ground:***<br>***(i84) No. 1 — Chassis ground:***<br>***(i171) No. 29 — Chassis ground:*** | Is the resistance less than 10 Ω? | Go to step **4**. | Repair the open circuit of the body integrated unit ground circuit. |
| 4 | **CHECK SECURITY CONTROL MODULE POWER SUPPLY CIRCUIT.**<br>1) Disconnect the connector from the security control module.<br>2) Measure the power supply between security control module connector terminal and chassis ground.<br>***Connector & terminal***<br>***(B559) No. 1 (+) — Chassis ground (–):*** | Is the voltage 10 V or more? | Go to step **5**. | Check for an open or short circuit in the harness between security control module and fuse. |
| 5 | **CHECK SECURITY CONTROL MODULE GROUND CIRCUIT.**<br>Measure the resistance between security control module connector terminal and chassis ground.<br>***Connector & terminal***<br>***(B559) No. 5 — Chassis ground:*** | Is the resistance less than 10 Ω? | Go to step **6**. | Repair the open circuit of the security control module ground circuit. |
| 6 | **CHECK HARNESS BETWEEN BODY INTEGRATED UNIT AND SECURITY CONTROL MODULE.**<br>Measure the resistance between the body integrated unit connector terminal and security control module connector terminal.<br>***Connector & terminal***<br>***(B280) No. 21 — (B559) No. 3:*** | Is the resistance less than 10 Ω? | Go to step **7**. | Repair the harness between body integrated unit and security control module. |
| 7 | **CHECK COMMUNICATION CIRCUIT HARNESS.**<br>1) Turn the ignition switch to ON.<br>2) Measure the voltage between security control module connector terminal and chassis ground.<br>***Connector & terminal***<br>***(B559) No. 3 (+) — Chassis ground (–):*** | Is the voltage 6 V or more? | Repair the harness between body integrated unit and security control module. | Go to step **8**. |
| 8 | **CHECK COMMUNICATION CIRCUIT HARNESS.**<br>1) Turn the ignition switch to ON.<br>2) Measure the voltage between the body integrated unit connector terminal and chassis ground.<br>***Connector & terminal***<br>***(B280) No. 21 (+) — Chassis ground (–):*** | Is the voltage 6 V or more? | Repair the harness between body integrated unit and security control module. | Go to step **9**. |
| 9 | **CHECK COMMUNICATION CIRCUIT HARNESS.**<br>1) Turn the ignition switch to OFF.<br>2) Measure the resistance between security control module connector terminal and chassis ground.<br>***Connector & terminal***<br>***(B559) No. 3 — Chassis ground:*** | Is the resistance less than 10 Ω? | Repair the harness between body integrated unit and ECM. | Go to step **10**. |

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 10 | **CHECK COMMUNICATION CIRCUIT HARNESS.**<br>1) Turn the ignition switch to ON.<br>2) Measure the resistance between the body integrated unit connector terminal and chassis ground.<br>***Connector & terminal***<br>***(B280) No. 21 — Chassis ground:*** | Is the resistance less than 10 Ω? | Repair the harness between body integrated unit and security control module. | Go to step **11**. |
| 11 | **CHECK SECURITY CONTROL MODULE.**<br>1) Replace the security control module. (Do not perform security control module registration.)<br>2) Turn the ignition switch to ON.<br>3) Read the DTC of body integrated unit using Subaru Select Monitor. | Is DTC B1409 detected? | Replace the body integrated unit. <Ref. to SL-78, Body Integrated Unit.> | Security control module was defective. Perform security control module registration. Refer to the “REGISTRATION MANUAL FOR IMMOBILIZER”. |

## P: DTC B1410 TRANSPONDER COMMUNICATION ABNORMAL

NOTE:
Refer to DTC P1574 for diagnostic procedure. <Ref. to IM(diag)-22, DTC P1574 KEY COMMUNICATION FAILURE, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>

## Q: DTC B1411 IMMOBILIZER ANTENNA ABNORMAL

NOTE:
Refer to DTC P1570 for diagnostic procedure. <Ref. to IM(diag)-17, DTC P1570 ANTENNA, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>

# LAN SYSTEM (DIAGNOSTICS)

# *LAN(diag)*

| | | Page |
|---|---|---|
| 1. | Basic Diagnostic Procedure | 2 |
| 2. | Check List for Interview | 4 |
| 3. | General Description | 5 |
| 4. | Electrical Component Location | 7 |
| 5. | Control Module I/O Signal | 8 |
| 6. | Subaru Select Monitor | 9 |

| 8. | Clear Memory Mode | 23 |
| 9. | CAN Communication Circuit Check | 24 |
| 10. | List of Diagnostic Trouble Code (DTC) | 50 |
| 11. | Diagnostic Procedure with Diagnostic Trouble Code (DTC) | 85 |
| 12. | General Diagnostic Table | 125 |

# 1. Basic Diagnostic Procedure

## A: PROCEDURE

**CAUTION:**
**• Subaru Select Monitor is required for reading DTC, performing diagnosis, reading current data, customizing and active test (compulsory drive).**
**• Remove foreign matter (dust, water, oil, etc.) from each control module connector during removal and installation.**
**• For model with immobilizer, registration of immobilizer may be needed after the replacement of controller etc. For detailed procedure, refer to the "REGISTRATION MANUAL FOR IMMOBILIZER".**

NOTE:
• To check harness for open or short circuits, shake the suspected trouble spot or connector.
• Check List for Interview <Ref. to LAN(diag)-4, Check List for Interview.>

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK PRE-INSPECTION.**<br>Ask the customer when and how the trouble occurred using the interview check list. <Ref. to LAN(diag)-4, Check List for Interview.> | Did you interview the customer? | Go to step **2**. | Interview the customer. |
| 2 | **BASIC INSPECTION (CAN DIAGNOSTIC IS NOT USED).**<br>Check components which might affect CAN communication problem. <Ref. to LAN(diag)-5, INSPECTION WITHOUT USING CAN DIAGNOSTIC, INSPECTION, General Description.> | Is the component that might affect CAN communication problem normal? | Go to step **3**. | Repair or replace each component. |
| 3 | **CHECK COMMUNICATION FOR INITIALIZING.**<br>Communicate with the all systems by connecting the Subaru Select Monitor. | Is the communication for initializing finished for all modules? | Go to step **4**. | Check the error of communication for initializing. <Ref. to LAN(diag)-9, COMMUNICATION FOR INITIALIZING IMPOSSIBLE, Subaru Select Monitor.> |
| 4 | **BASIC INSPECTION (CAN DIAGNOSTIC IS USED).**<br>Check components which might affect CAN communication problem. <Ref. to LAN(diag)-5, INSPECTION USING CAN DIAGNOSTIC, INSPECTION, General Description.> | Is the component that might affect CAN communication problem normal? | Go to step **5**. | Repair or replace each component. |
| 5 | **CHECK DTC.**<br>1) Start the engine and read all DTCs.<br>NOTE:<br>When the engine does not start, perform the diagnosis for the engine start malfunction. <Ref. to EN(H4DO)(diag)-66, Diagnostics for Engine Starting Failure.><br>2) Record all DTCs and freeze frame data. | Is DTC U**** displayed on Subaru Select Monitor? | Go to step **6**. | Go to step **7**. |
| 6 | **CHECK DTC.**<br>1) Perform the inspection using the DTC check sheet. <Ref. to LAN(diag)-52, CHECK USING THE DTC CHECK SHEET, LIST, List of Diagnostic Trouble Code (DTC).><br>2) Using the Subaru Select Monitor, read all DTCs. | Is DTC U**** displayed on Subaru Select Monitor? | Go to step **8**. | Go to step **7**. |

| Step | | Check | Yes | No |
|---|---|---|---|---|
| 7 | **PERFORM GENERAL DIAGNOSTICS.**<br>Inspect using the “General Diagnostic Table”. <Ref. to LAN(diag)-125, General Diagnostic Table.> | Is result of inspection OK? | LAN system is normal. | Go to step **8**. |
| 8 | **PERFORM DIAGNOSIS.**<br>1) Correct the cause of trouble.<br>2) Perform the Clear Memory Mode. <Ref. to LAN(diag)-23, OPERATION, Clear Memory Mode.><br>3) Read the DTC. <Ref. to LAN(diag)-22, OPERATION, Read Diagnostic Trouble Code (DTC).> | Is DTC displayed on Subaru Select Monitor? | Repeat step 8 until DTC is not shown. | Finish the diagnosis. |

# 2. Check List for Interview

## A: CHECK

Inspect the following item about the vehicle's state.

### 1. DISPLAY STATUS IN THE COMBINATION METER

| | | |
|---|---|---|
| Display status in the combination meter | Engine coolant temperature gauge display | ❑ OK / ❑ NG |
| | Fuel gauge display | ❑ OK / ❑ NG |
| | Tachometer display | ❑ OK / ❑ NG (0 rpm at idling etc.) |
| Display of other indicators | Malfunction indicator light | ❑ ON / ❑ Blink / ❑ OFF |
| | SPORT indicator light (AT warning light) | ❑ ON / ❑ Blink / ❑ OFF |
| | ABS warning light | ❑ ON / ❑ Blink / ❑ OFF |
| | VDC warning light | ❑ ON / ❑ Blink / ❑ OFF |
| | Immobilizer indicator light | ❑ ON / ❑ Blink / ❑ OFF |
| | AT OIL TEMP warning light | ❑ ON / ❑ Blink / ❑ OFF |
| | Tire pressure warning light | ❑ ON / ❑ Blink / ❑ OFF |
| | Engine coolant temperature warning light | ❑ Blue light ON / ❑ Red light ON / ❑ Red light blinks / ❑ Blue and red lights blink |
| | CRUISE indicator | ❑ ON / ❑ Blink / ❑ OFF |
| | Shift indicator | ❑ OK / ❑ NG |
| | Fuel level warning light | ❑ ON / ❑ Blink / ❑ OFF |
| | Airbag warning light | ❑ ON / ❑ OFF |
| | VDC OFF indicator | ❑ ON / ❑ OFF |
| | Brake warning light | ❑ ON / ❑ OFF |
| | Headlight beam leveler indicator | ❑ ON / ❑ OFF |

### 2. CONDITIONS UNDER WHICH TROUBLE OCCURS

| | |
|---|---|
| Driving condition | ❑ At standstill (While idling)<br>❑ When the vehicle is running Vehicle speed km/h (MPH)<br>❑ While accelerating Acceleration km/h (MPH) to km/h (MPH)<br>❑ Decelerating (With braking) Deceleration km/h (MPH) to km/h (MPH)<br>❑ Decelerating (Without braking) Deceleration km/h (MPH) to km/h (MPH) |
| | ❑ Flat road<br>❑ Uphill<br>❑ Downhill<br>❑ Gravel road<br>❑ Bumpy road<br>❑ Snowy road |
| | Does it occur when operating any part?<br>Operated part:<br>**TROUBLE SYMPTOM:** |
| | Are there any other troubles occurred?<br>From where:<br>**TROUBLE SYMPTOM:** |

# 3. General Description

## A: CAUTION

### 1. SUPPLEMENTAL RESTRAINT SYSTEM "AIRBAG"

Airbag system wiring harness is routed near the body integrated unit and twisted pair line.

**CAUTION:**

**• Do not use the electrical test equipment on all airbag system wiring harnesses and connectors.**

**• Be careful not to damage the airbag system wiring harness when servicing the body integrated unit and LAN system.**

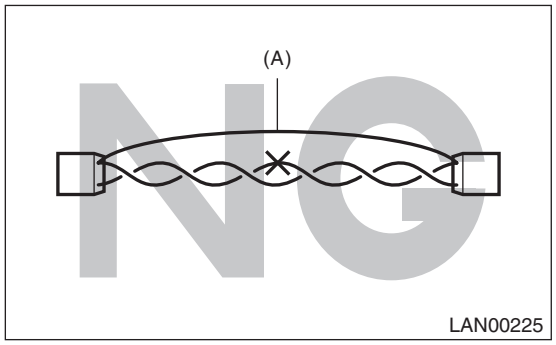
### 2. LAN SYSTEM

• Bus line of LAN system is twisted pair line. Be careful not to by-pass or partly unbind the twisted pair line.

• Do not make clearance between bus lines (CAN High, CAN Low).

• Difference of bus line length should be within 10 cm (3.94 in).

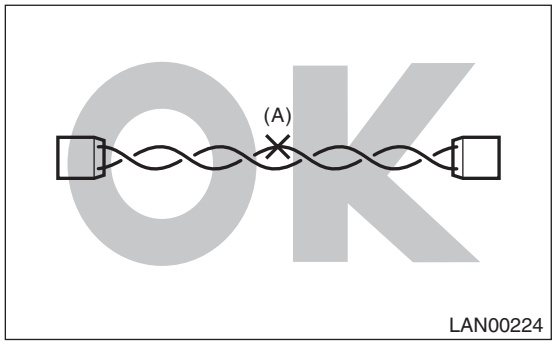
• Fray near the connector should be within 8 cm (3.14 in).



(A) Bypass wire connection

• If the characteristics of the twisted pair line are changed, it may extremely weaken against noise.

• When repairing the harness, connect the wires using soldering and protect it with insulating tape etc.



(A) Soldering and protection with insulating tape

## B: INSPECTION

### 1. INSPECTION WITHOUT USING CAN DIAGNOSTIC

Before performing diagnostics, check the following item which might affect body integrated unit malfunctions.

1) Measure the battery voltage and check electrolyte.

***Standard voltage: 12 V or more***

***Specific gravity: 1.260 or more***

2) Check the fuse condition.

Make sure that ampere of the fuse is setting value, and it is not blown out.

3) Check the connecting condition of harness and harness connector.

4) Confirm key illumination does not blink with ignition switch turned to ON.

### 2. INSPECTION USING CAN DIAGNOSTIC

Before performing diagnostics, check the following item which might affect body integrated unit malfunctions.

1) Confirm settings of body integrated unit are corresponded to vehicle equipment. <Ref. to BC(diag)-17, OPERATION, Registration Body Integrated Unit.>

2) Make sure that the User Customizing of the body integrated unit matches the vehicle equipment. <Ref. to BC(diag)-15, OPERATION, User Customizing.>

3) Confirm "Factory initial setting" of body integrated unit registrations is set to "Market".

# C: PREPARATION TOOL

## 1. SPECIAL TOOL

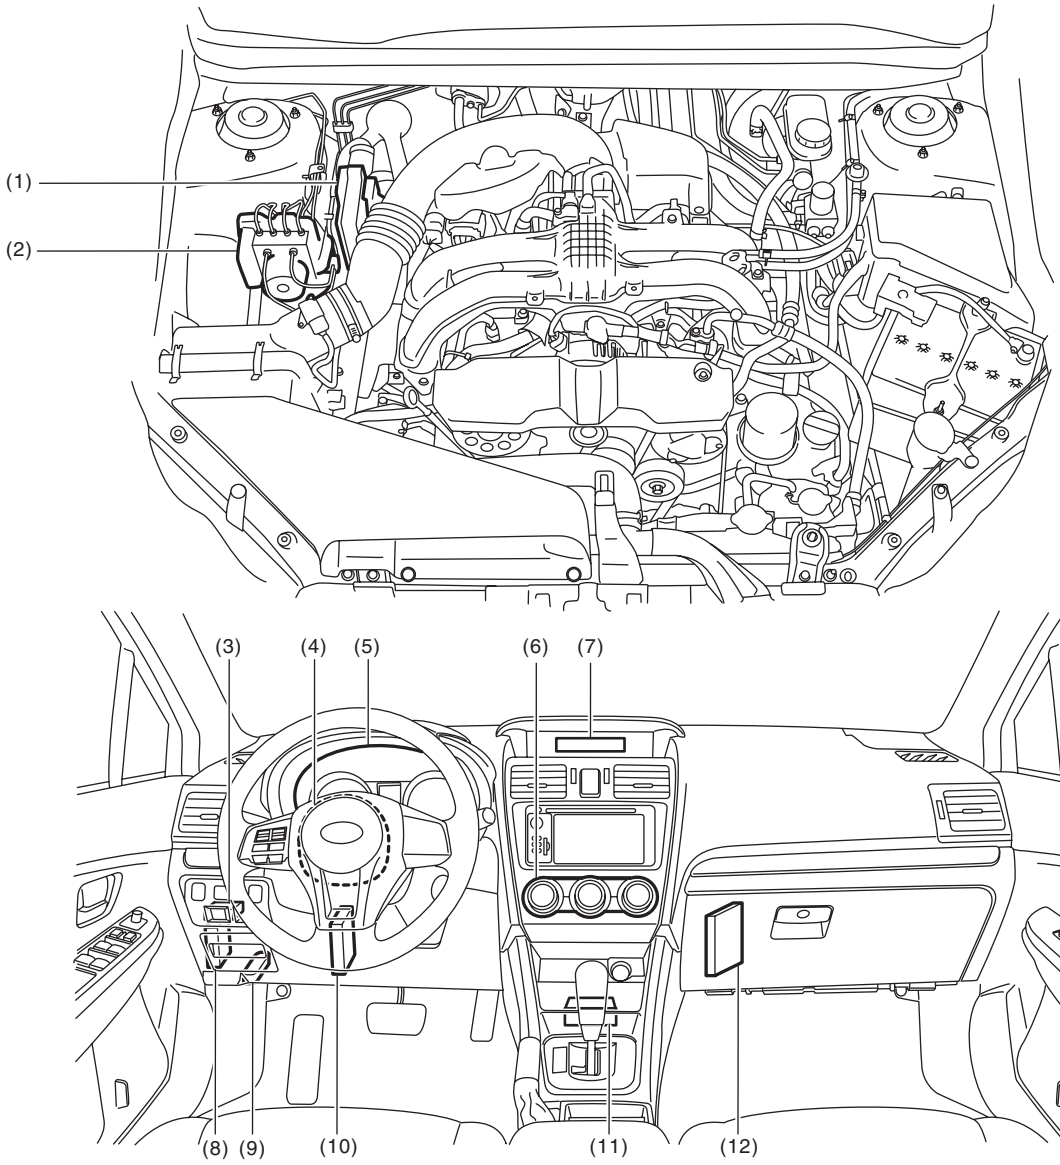
| ILLUSTRATION | TOOL NUMBER | DESCRIPTION | REMARKS |
|---|---|---|---|
|  ST1B022XU0 | 1B022XU0 | SUBARU SELECT MONITOR III KIT | Used for troubleshooting the electrical system. |

## 2. GENERAL TOOL

| TOOL NAME | REMARKS |
|---|---|
| Circuit tester | Used for measuring resistance, voltage and current. |

# 4. Electrical Component Location

## A: LOCATION



(1) Power steering CM
(2) VDC CM
(3) Auto headlight beam leveler CM
(4) Steering angle sensor
(5) Combination meter
(6) A/C control panel
(7) MFD
(8) Body integrated unit
(9) Data link connector
(10) TCM
(11) Airbag CM
(12) ECM

# 5. Control Module I/O Signal

## A: ELECTRICAL SPECIFICATION

- Body integrated unit

For I/O signals of the body integrated unit, refer to BODY CONTROL SYSTEM (DIAGNOSTICS). <Ref. to BC(diag)-6, Control Module I/O Signal.>

- Engine control module

For I/O signals of ECM, refer to ENGINE (DIAGNOSTICS). <Ref. to EN(H4DO)(diag)-19, Engine Control Module (ECM) I/O Signal.>

- Transmission control module

For I/O signals of TCM, refer to AUTOMATIC TRANSMISSION (DIAGNOSTICS). <Ref. to CVT(diag)-11, Transmission Control Module (TCM) I/O Signal.>

- VDC control module

For I/O signals of VDC CM, refer to VEHICLE DYNAMICS CONTROL (VDC) (DIAGNOSTICS). <Ref. to VDC(diag)-12, Control Module I/O Signal.>

- Power steering CM

For unit I/O signals of power steering CM, refer to POWER ASSISTED SYSTEM (POWER STEERING) (DIAGNOSTICS). <Ref. to PS(diag)-10, Control Module I/O Signal.>

- A/C control panel

For unit I/O signals of A/C control panel, refer to HVAC SYSTEM (DIAGNOSTICS). <Ref. to AC(diag)-6, Auto A/C Control Module I/O Signal.>

- Combination meter

For I/O signals of combination meter, refer to INSTRUMENTATION/DRIVER INFO (DIAGNOSTICS). <Ref. to IDI(diag)-6, Control Module I/O Signal.>

- Airbag control module

For I/O signals of the airbag control module, refer to AIRBAG SYSTEM (DIAGNOSTICS). <Ref. to AB(diag)-20, Airbag Control Module I/O Signal.>

- High grade MFD

For I/O signals of high grade MFD, refer to INSTRUMENTATION/DRIVER INFO (DIAGNOSTICS). <Ref. to IDI(diag)-6, Control Module I/O Signal.>

- Auto headlight beam leveler CM

For I/O signals of auto headlight beam leveler CM, refer to INSTRUMENTATION/DRIVER INFO (DIAGNOSTICS). <Ref. to AL(diag)-6, Control Module I/O Signal.>

- Data link connector

For I/O signals of data link connector, refer to ENGINE (DIAGNOSTICS). <Ref. to EN(H4DO)(diag)-30, Data Link Connector.>

* CAN sleep state:
Hold on for approx. one minute with ignition OFF and the doors, trunk, rear gate all closed.

## B: WIRING DIAGRAM

<Ref. to WI-46, WIRING DIAGRAM, CAN Communication System.>

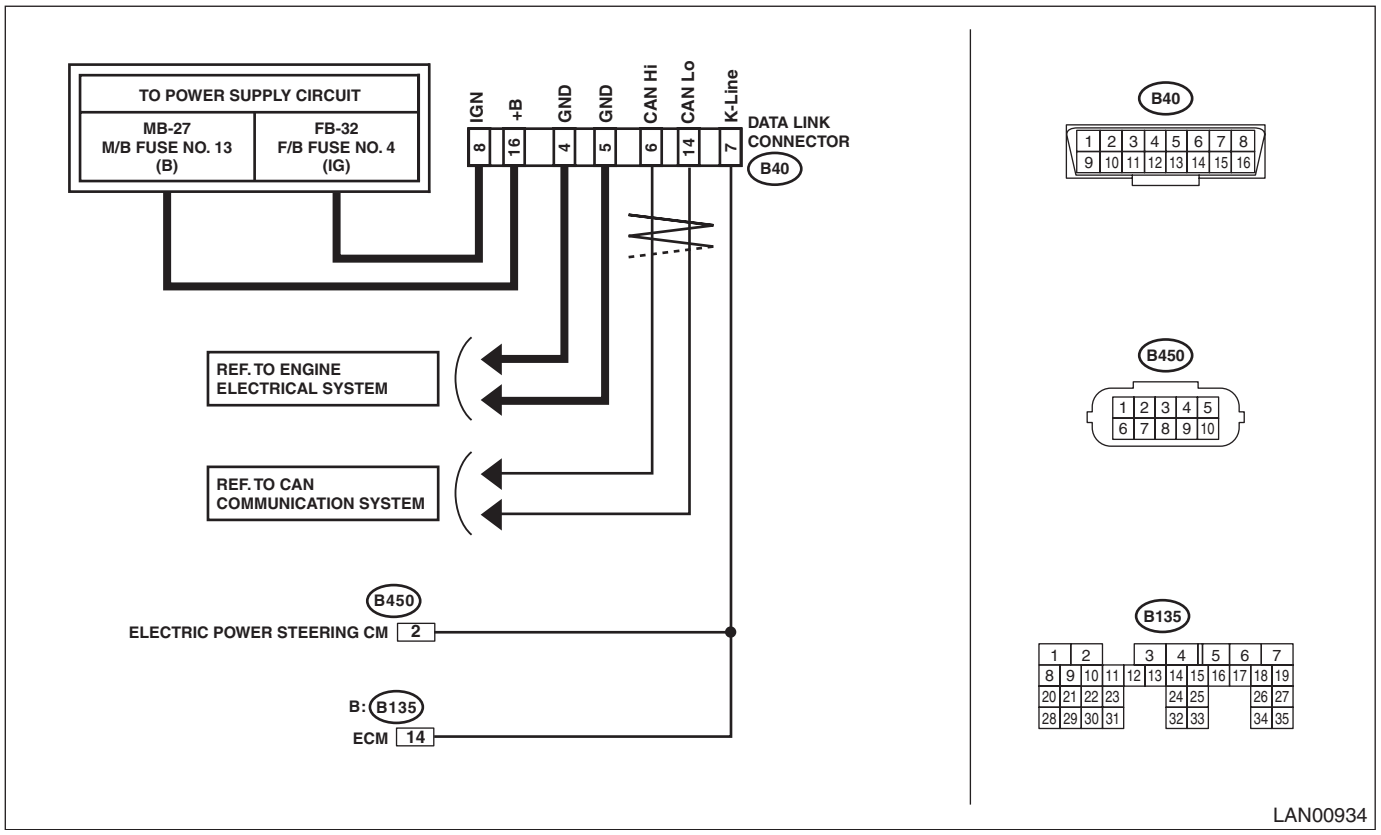
# 6. Subaru Select Monitor

## A: OPERATION

For details of basic operations, refer to “PC application help for Subaru Select Monitor”.

## B: COMMUNICATION FOR INITIALIZING IMPOSSIBLE

**DIAGNOSIS:**
Subaru Select Monitor communication line is open or shorted.
**TROUBLE SYMPTOM:**
Not communicable with Subaru Select Monitor.
**WIRING DIAGRAM:**
CAN communication system <Ref. to WI-46, WIRING DIAGRAM, CAN Communication System.>

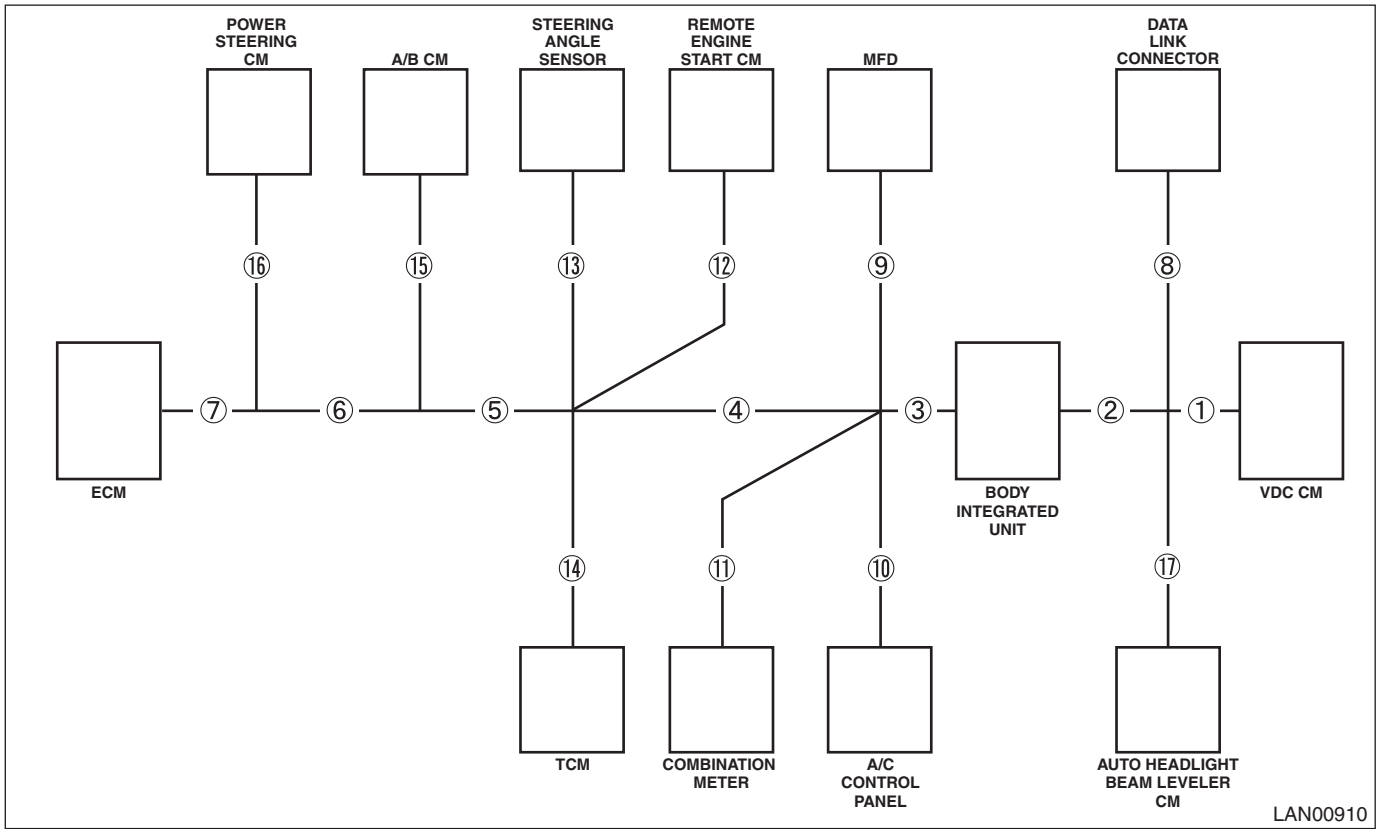


| Step | | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK SUBARU SELECT MONITOR.**<br>1) Connect the Subaru Select Monitor to another vehicle.<br>2) Check communication condition between Subaru Select Monitor and vehicle. | Is communication performed normally? | Go to step **2**. | Subaru Select Monitor unit or diagnosis cable is faulty. Or check the fuse on the vehicle side. |

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 2 | **CHECK COMMUNICATION FOR INITIALIZING ERROR.**<br>Perform the communication for initializing with the following modules by connecting the Subaru Select Monitor. (only for installed modules)<br>• VDC<br>• Body integrated unit<br>• Meter<br>• High grade MFD (C0 model only)<br>• A/C<br>• A/B<br>• Auto headlight beam leveler<br>• TCM | Is the communication possible with all modules? | Go to step **3**. | Perform the inspection using the check sheet of communication for initializing. <Ref. to LAN(diag)-11, CHECK USING THE CHECK SHEET OF COMMUNICATION FOR INITIALIZING, COMMUNICATION FOR INITIALIZING IMPOSSIBLE, Subaru Select Monitor.> |
| 3 | **CHECK K-LINE.**<br>1) Establish the communication between Select Monitor and K-Line communication module.<br>2) Using a tester, check continuity between the modules that did not communicate with Select Monitor.<br>***Connector & terminal***<br>***(B40) No. 7 — (B135) No. 14 (ECM):***<br>***(B40) No. 7 — (B450) No. 2 (electric power steering):*** | Is there continuity? | Go to step **4**. | Repair or replace the open circuit. |
| 4 | **CHECK K-LINE.**<br>Using a tester, check continuity between K-line and chassis ground.<br>***Connector & terminal***<br>***(B40) No. 7 — Chassis ground:*** | Is there continuity? | Repair or replace the short circuit portion. | Go to step **5**. |
| 5 | **CHECK K-LINE.**<br>Using a tester, check voltage between K-line and chassis ground.<br>***Connector & terminal***<br>***(B40) No. 7 (+) — Chassis ground (–):*** | Is the voltage 5 V or more with IG ON? | Repair or replace the short circuit portion. | Go to step **6**. |
| 6 | **CHECK K-LINE.**<br>Use a tester to check for continuity in the ground circuit.<br>***Connector & terminal***<br>***(B40) No. 4 — Chassis ground:***<br>***(B40) No. 5 — Chassis ground:*** | Is there continuity? | Go to step **8**. | Go to step **7**. |
| 7 | **CHECK K-LINE.**<br>1) Disconnect the ECM connector.<br>2) Use a tester to check for continuity in the ground circuit.<br>***Connector & terminal***<br>***(B40) No. 4 — (B137) No. 3:***<br>***(B40) No. 5 — (B136) No. 4:*** | Is there continuity? | Check ECM ground. | Repair or replace the open circuit. |
| 8 | **CHECK K-LINE.**<br>1) Turn the ignition switch to ON.<br>2) Using a tester, check the power supply of data link connector.<br>***Connector & terminal***<br>***(B40) No. 8 (+) — Chassis ground (–):***<br>***(B40) No. 16 (+) — Chassis ground (–):*** | Is the voltage 10 V or more? | K-Line is normal. Check the power supply circuit of each module. | Check the power supply circuits to the data link connector. |

## 1. CHECK USING THE CHECK SHEET OF COMMUNICATION FOR INITIALIZING

- **Network diagram**



- **Check sheet of communication for initializing**

LAN00911

(A) Installation check
(B) Communication initialization
(C) K-Line
(D) CAN
(E) Wiring location

VDC: VDC CM
BIU: Body integrated unit
MFD: High grade MFD
A/C: A/C control panel
MET: Combination meter
RST: Remote engine starter CM
STR: Steering angle sensor
TCM: TCM
A/B: AB CM
EPS: Power steering CM
EGI: ECM
HL: Auto headlight beam leveler CM

1) Module installation check
(1) Write "-" marks in the field for installation check if the vehicle to be inspected does not have relevant module.
(2) Write "-" marks in all blank fields on the same row that the "-" mark has filled in.

NOTE:
Example of writing <Ref. to LAN(diag)-14, EXAMPLE OF WRITING FOR THE CHECK SHEET OF COMMUNICATION FOR INITIALIZING, COMMUNICATION FOR INITIALIZING IMPOSSIBLE, Subaru Select Monitor.>

2) SSM communication initialization check
(1) Write "○" marks in the field for communication initialization if the module succeeded in the communication for initializing with Select Monitor.
If the communication with all modules is not possible, go to 3).
(2) Write "○" marks in all blank fields on the same row that the "○" mark has filled in.
(3) When at least one field in a column of wiring location is filled with the "○" mark, then the wiring for that location is normal, Write "○" marks in all blank fields on the same column that the "○" mark has filled in under the circled number.
(4) Check the open circuit of the modules which have no "○" mark in their columns of the wiring location in ascending order. (only for installed modules)
(5) If the communication is not possible after checking all harnesses, check the module power supply line.
(6) Replace the module if the power supply line is normal.

NOTE:
• Example of writing <Ref. to LAN(diag)-14, EXAMPLE OF WRITING FOR THE CHECK SHEET OF COMMUNICATION FOR INITIALIZING, COMMUNICATION FOR INITIALIZING IMPOSSIBLE, Subaru Select Monitor.>
• Inspection using the communication for initializing of Subaru Select Monitor cannot be used to diagnose the wiring location marked with "-". Example of DTC data not received <Ref. to LAN(diag)-54, EXAMPLE OF DTC DATA NOT RECEIVED, LIST, List of Diagnostic Trouble Code (DTC).> and DTC matrix <Ref. to LAN(diag)-60, DTC MATRIX, LIST, List of Diagnostic Trouble Code (DTC).> should be used to identify the faulty portion.

3) SSM communication initialization check (impossible to communicate with all modules)

NOTE:
If at least one module becomes possible to communicate, return to 2).
(1) Check for the short circuit to ground. <Ref. to LAN(diag)-27, GROUND SHORT INSPECTION, INSPECTION, CAN Communication Circuit Check.> If it is normal, go to the next.
(2) Check for the short circuit to battery. <Ref. to LAN(diag)-29, BATTERY SHORT INSPECTION, INSPECTION, CAN Communication Circuit Check.> If it is normal, go to the next.
(3) Perform the inspection for the resistance of 52 Ω or less (short between wires). <Ref. to LAN(diag)-33, 52 Ω OR LESS, INSPECTION, CAN Communication Circuit Check.> If it is normal, go to the next.
(4) Check for the open circuit of network diagram No. 8 (data link connector).

# 7. Read Diagnostic Trouble Code (DTC)

## A: OPERATION

For details of operation procedures, refer to “PC application help for Subaru Select Monitor”.

# 8. Clear Memory Mode

## A: OPERATION

For details of operation procedures, refer to “PC application help for Subaru Select Monitor”.

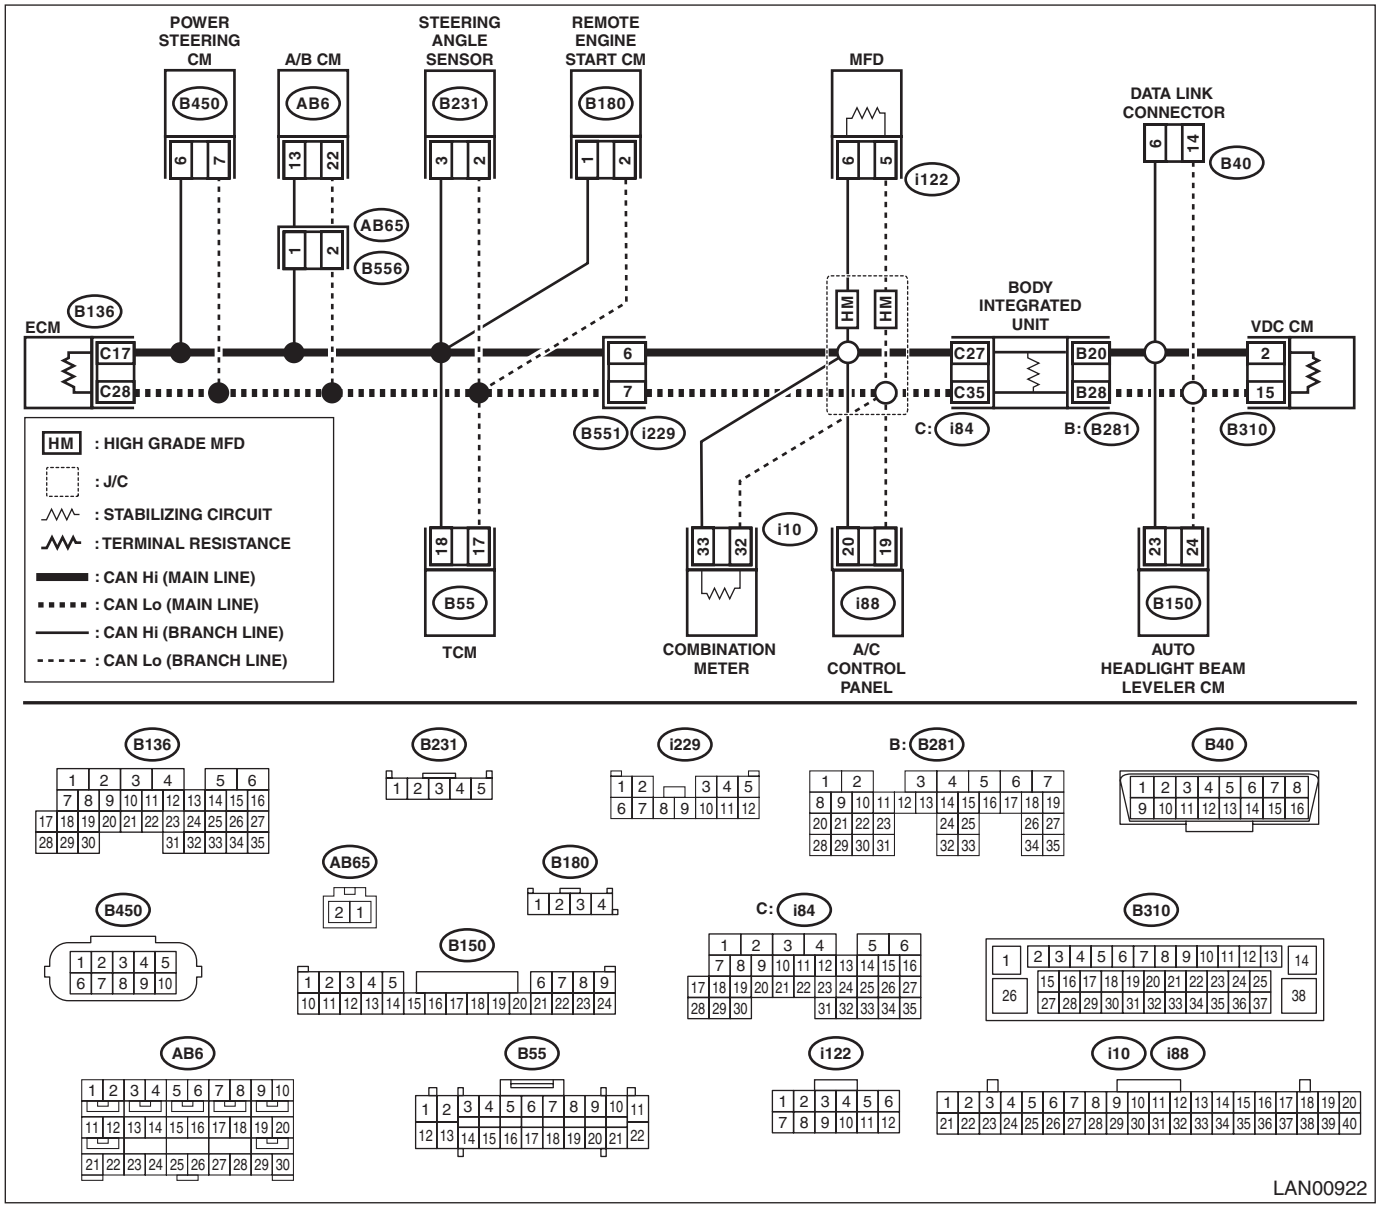
# 9. CAN Communication Circuit Check

## A: PROCEDURE

NOTE:
When measuring the resistance of CAN communication circuit, measure it in sleep status.
To be in the sleep status, turn the ignition switch OFF, stop the key and switch operations, keep all the doors, trunk and rear gate closed, and then left them untouched for one minute or more.

**WIRING DIAGRAM:**

- CVT Control System <Ref. to WI-66, WIRING DIAGRAM, CVT Control System.>
- Electric Power Steering System <Ref. to WI-73, WIRING DIAGRAM, Electric Power Steering System.>
- Engine electrical system <Ref. to WI-74, WIRING DIAGRAM, Engine Electrical System.>
- CAN communication system <Ref. to WI-46, WIRING DIAGRAM, CAN Communication System.>



| | Step | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK FROM DATA LINK CONNECTOR.**<br>Using the tester, measure the resistance between terminals.<br>***Connector & terminal***<br>***(B40) No. 6 — Chassis ground:***<br>***(B40) No. 14 — Chassis ground:*** | Is the resistance 10 Ω or less? | Check for ground short. <Ref. to LAN(diag)-27, GROUND SHORT INSPECTION, INSPECTION, CAN Communication Circuit Check.> | Go to step **2**. |
| 2 | **CHECK FROM DATA LINK CONNECTOR.**<br>1) Turn the ignition switch to ON.<br>2) Using the tester, measure the voltage between terminals.<br>***Connector & terminal***<br>***(B40) No. 6 — Chassis ground:***<br>***(B40) No. 14 — Chassis ground:*** | Is the voltage 5 V or less? | Go to step **3**. | Check for battery short. <Ref. to LAN(diag)-29, BATTERY SHORT INSPECTION, INSPECTION, CAN Communication Circuit Check.> |
| 3 | **CHECK FROM DATA LINK CONNECTOR.**<br>1) Turn the ignition switch to OFF.<br>2) Using the tester, measure the resistance between terminals.<br>***Connector & terminal***<br>***(B40) No. 6 — No. 14:*** | Is the resistance 52 Ω or less? | Perform the inspection for the resistance of 52 Ω or less. <Ref. to LAN(diag)-33, 52 Ω OR LESS, INSPECTION, CAN Communication Circuit Check.> | Go to step **4**. |
| 4 | **CHECK FROM DATA LINK CONNECTOR.**<br>Using the tester, measure the resistance between terminals.<br>***Connector & terminal***<br>***(B40) No. 6 — No. 14:*** | Is the resistance 62 Ω or more? | Perform the inspection for the resistance of 62 Ω or more. <Ref. to LAN(diag)-36, 62 Ω OR MORE, INSPECTION, CAN Communication Circuit Check.> | A related line may be open. Perform the inspection for 53 — 61 Ω relevant to the detected DTC. <Ref. to LAN(diag)-26, LIST, CAN Communication Circuit Check.> |

## B: LIST

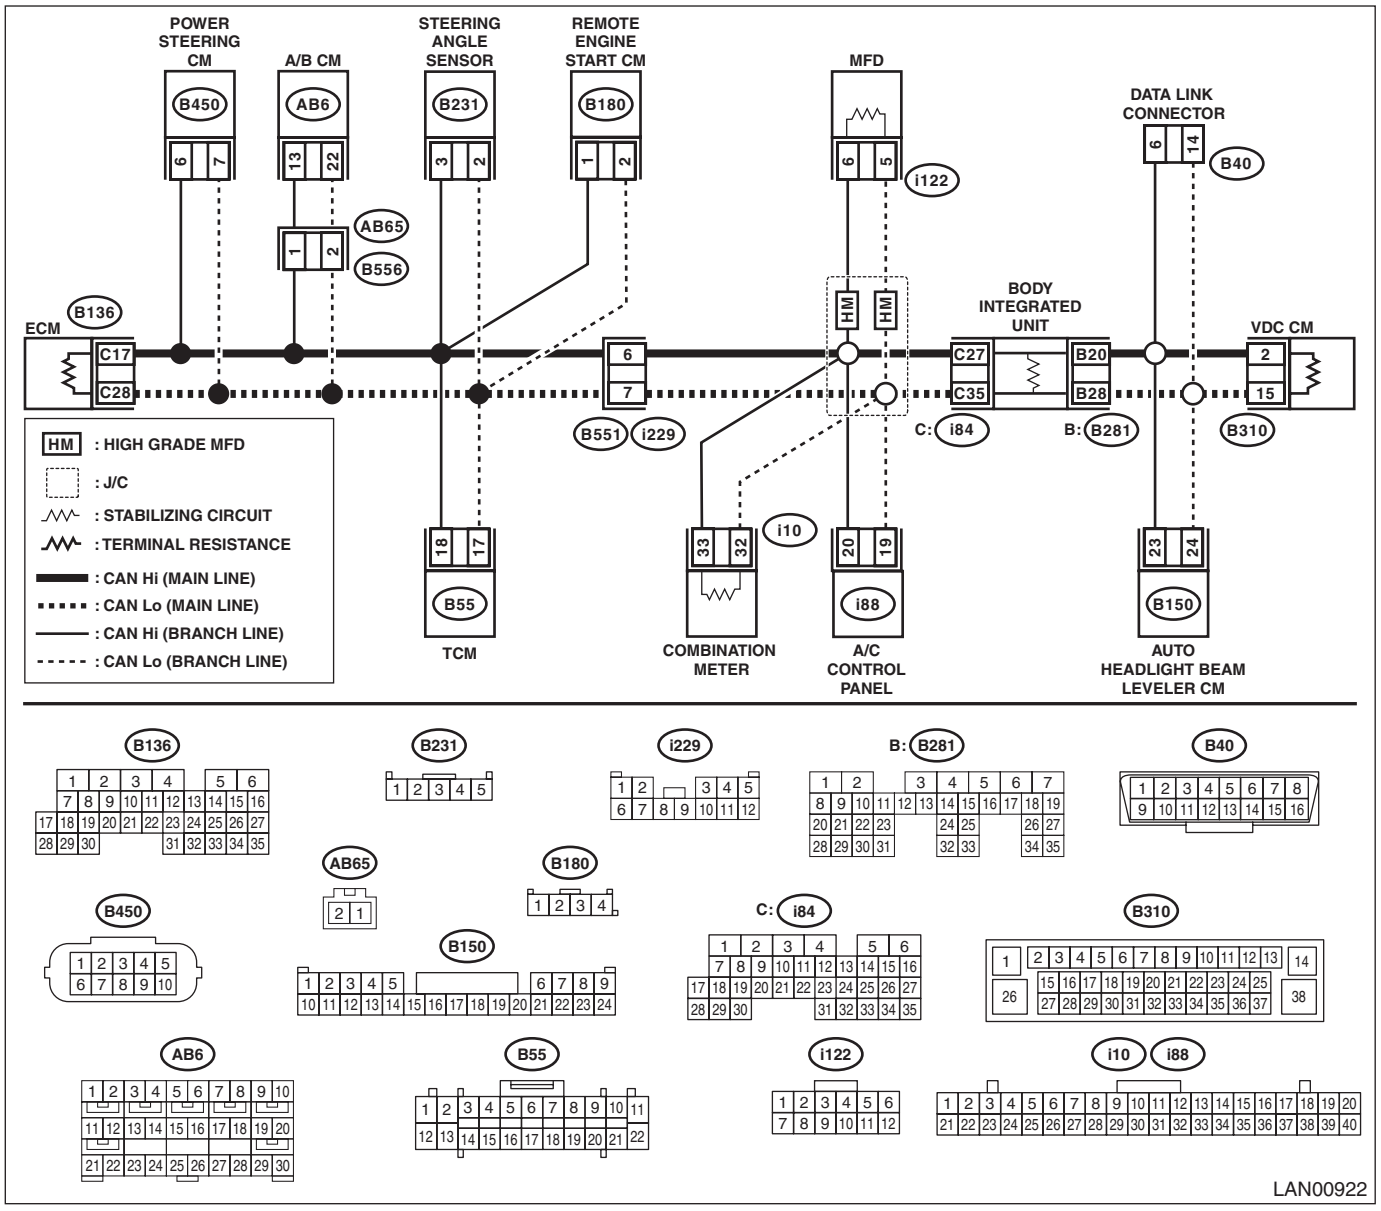
| Resistance value between CAN Hi and Lo | Contents of inspection | Remarks |
|---|---|---|
| Ground short inspection | <Ref. to LAN(diag)-27, GROUND SHORT INSPECTION, INSPECTION, CAN Communication Circuit Check.> | Shorted to ground in the communication circuit or control module. |
| Battery short inspection | <Ref. to LAN(diag)-29, BATTERY SHORT INSPECTION, INSPECTION, CAN Communication Circuit Check.> | Shorted to battery power supply in the communication circuit or control module. |
| 53 — 61 Ω | <Ref. to LAN(diag)-31, 53 — 61 Ω, INSPECTION, CAN Communication Circuit Check.> | Combined resistance of end resistance does not have malfunction; short to ground or +B short of the CAN communication circuit is possible, however. |
| 52 Ω or less | <Ref. to LAN(diag)-33, 52 Ω OR LESS, INSPECTION, CAN Communication Circuit Check.> | Resistance is lower than combined resistance of end resistance. Short to CAN Hi and CAN Lo on the CAN communication circuit is possible. |
| 62 Ω or more | <Ref. to LAN(diag)-36, 62 Ω OR MORE, INSPECTION, CAN Communication Circuit Check.> | Resistance is higher than combined resistance of end resistance. Open circuit of CAN communication circuit is possible. |
| Related lines 53 — 61 Ω (TCM) | <Ref. to LAN(diag)-38, RELATED LINES 53 — 61 Ω (TCM), INSPECTION, CAN Communication Circuit Check.> | No TCM data is received. Perform inspection when faulty is detected. |
| Related lines 53 — 61 Ω (steering angle sensor) | <Ref. to LAN(diag)-40, RELATED LINES 53 — 61 Ω (STEERING ANGLE SENSOR), INSPECTION, CAN Communication Circuit Check.> | No steering angle sensor data is received. Perform inspection when faulty is detected. |
| Related line 53 — 61 Ω (A/C control panel) | <Ref. to LAN(diag)-41, RELATED LINE 53 — 61 Ω (A/C CONTROL PANEL), INSPECTION, CAN Communication Circuit Check.> | No A/C data is received. Perform inspection when faulty is detected. |
| Related lines 53 — 61 Ω (electric power steering CM) | <Ref. to LAN(diag)-42, RELATED LINES 53 — 61 Ω (ELECTRIC POWER STEERING CM), INSPECTION, CAN Communication Circuit Check.> | No electric power steering data is received. Perform inspection when faulty is detected. |
| Related lines 53 — 61 Ω (combination meter) | <Ref. to LAN(diag)-44, RELATED LINES 53 — 61 Ω (COMBINATION METER), INSPECTION, CAN Communication Circuit Check.> | No meter data is received. Perform inspection when faulty is detected. |
| Related lines 53 — 61 Ω (MFD) | <Ref. to LAN(diag)-45, RELATED LINES 53 — 61 Ω (MFD), INSPECTION, CAN Communication Circuit Check.> | No MFD data is received. Perform inspection when faulty is detected. |
| Related lines 53 — 61 Ω (airbags) | <Ref. to LAN(diag)-46, RELATED LINES 53 — 61 Ω (A/B CM), INSPECTION, CAN Communication Circuit Check.> | No airbag data is received. Perform inspection when faulty is detected. |
| Related lines 53 — 61 Ω (headlight beam leveler) | <Ref. to LAN(diag)-47, RELATED LINES 53 — 61 Ω (HEADLIGHT BEAM LEVELER), INSPECTION, CAN Communication Circuit Check.> | No headlight beam leveler data is received. Perform inspection when faulty is detected. |
| Related lines 53 — 61 Ω (remote engine starter) | <Ref. to LAN(diag)-48, RELATED LINES 53 — 61 Ω (REMOTE ENGINE STARTER), INSPECTION, CAN Communication Circuit Check.> | Perform inspection when the remote engine starter does not operate, while the mobile key side operates normally. |

# C: INSPECTION

## 1. GROUND SHORT INSPECTION

### WIRING DIAGRAM:

CAN communication system <Ref. to WI-46, WIRING DIAGRAM, CAN Communication System.>



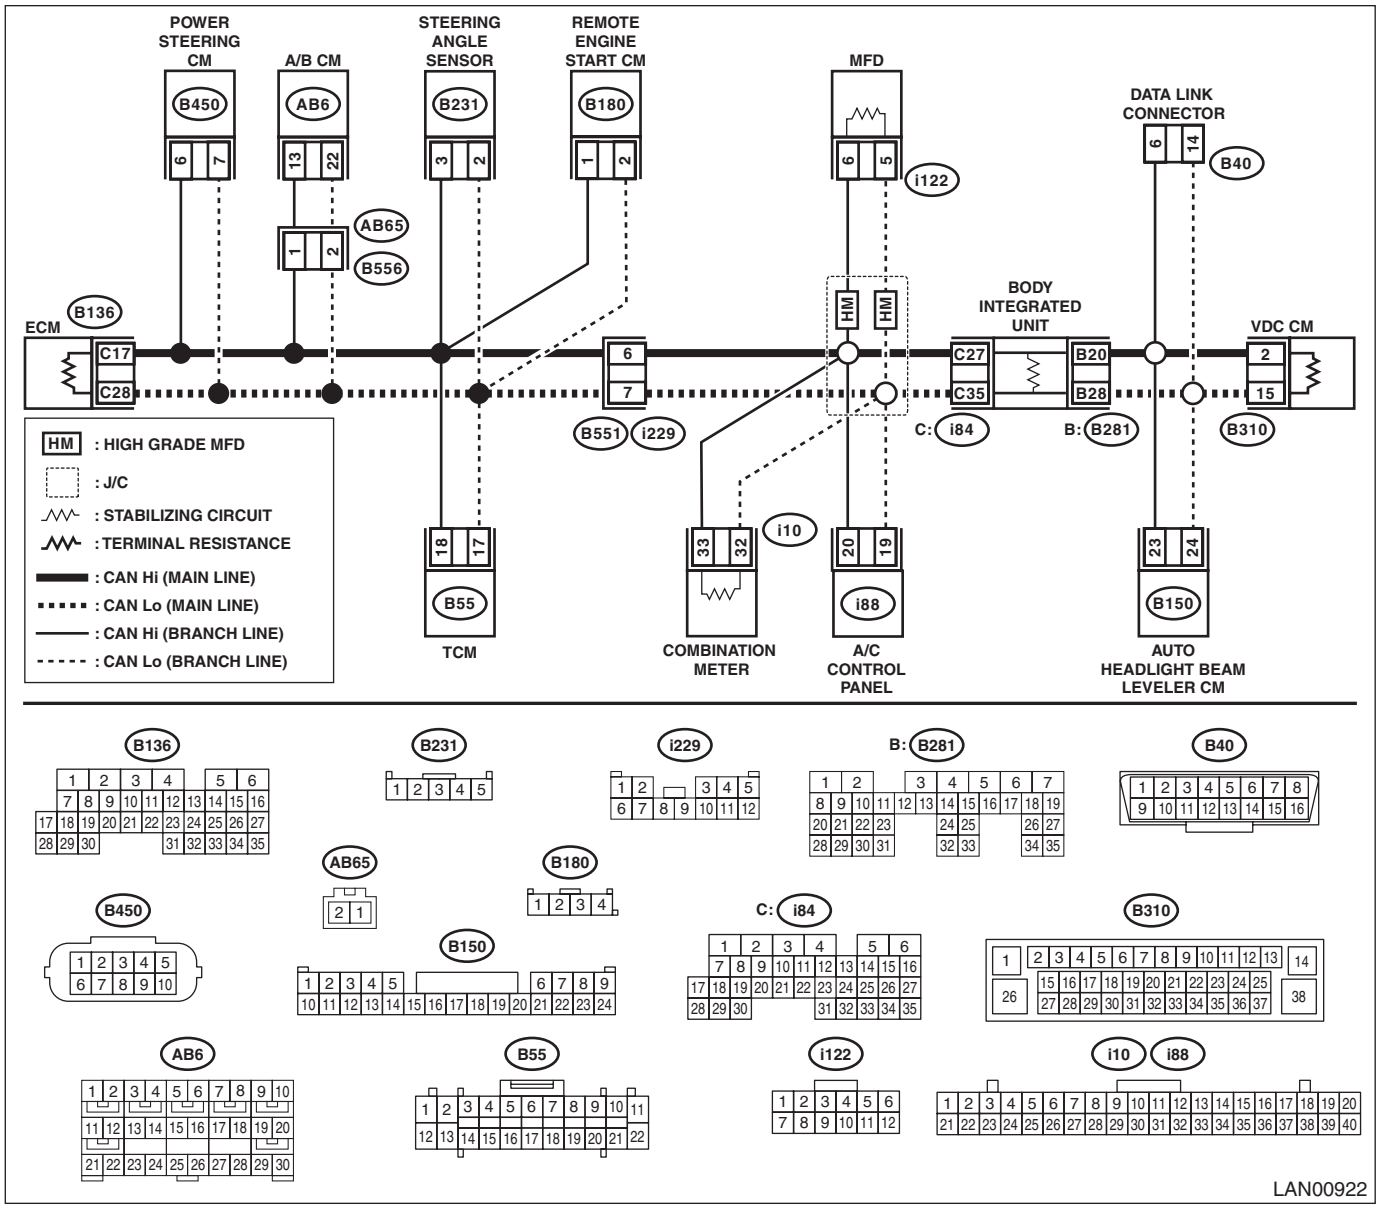
NOTE:
Main wiring harness or related lines may be shorted to ground, or shorted to ground in one of the control modules.

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK BETWEEN RELATED LINES AND MAIN WIRING HARNESS.**<br>Using the tester, measure the resistance between terminals.<br>***Connector & terminal***<br>***(B40) No. 6 — Chassis ground:***<br>***(B40) No. 14 — Chassis ground:*** | Is the resistance 10 Ω or less? | Go to step **2**. | Currently, it is normal. |
| 2 | **CHECK CONTROL MODULE.**<br>With the tester connected, disconnect control module.<br>NOTE:<br>Disconnect the body integrated unit at the end.<br>***Connector & terminal***<br>***(B40) No. 6 — Chassis ground:***<br>***(B40) No. 14 — Chassis ground:*** | Did the resistance change to 10 Ω or more? | Replace the control module whose resistance has changed. When the value changed at disconnecting the body integrated unit,<br>Go to step **3**. | Repair or replace the short circuit of the main wiring harness and related lines between body integrated unit and VDC CM. |
| 3 | **CHECK BETWEEN MAIN WIRING HARNESSES.**<br>Using the tester, measure the resistance between terminals.<br>***Connector & terminal***<br>***(i84) No. 27 — Chassis ground:***<br>***(i84) No. 35 — Chassis ground:*** | Is the resistance 10 Ω or less? | Repair or replace the short circuit of the main wiring harness and related lines between ECM and body integrated unit. | Replace the body integrated unit. <Ref. to SL-78, REMOVAL, Body Integrated Unit.> |

## 2. BATTERY SHORT INSPECTION

**WIRING DIAGRAM:**

CAN communication system <Ref. to WI-46, WIRING DIAGRAM, CAN Communication System.>



NOTE:
Main wiring harness or related lines may be shorted to battery circuit, or shorted to battery circuit in one of the control modules.

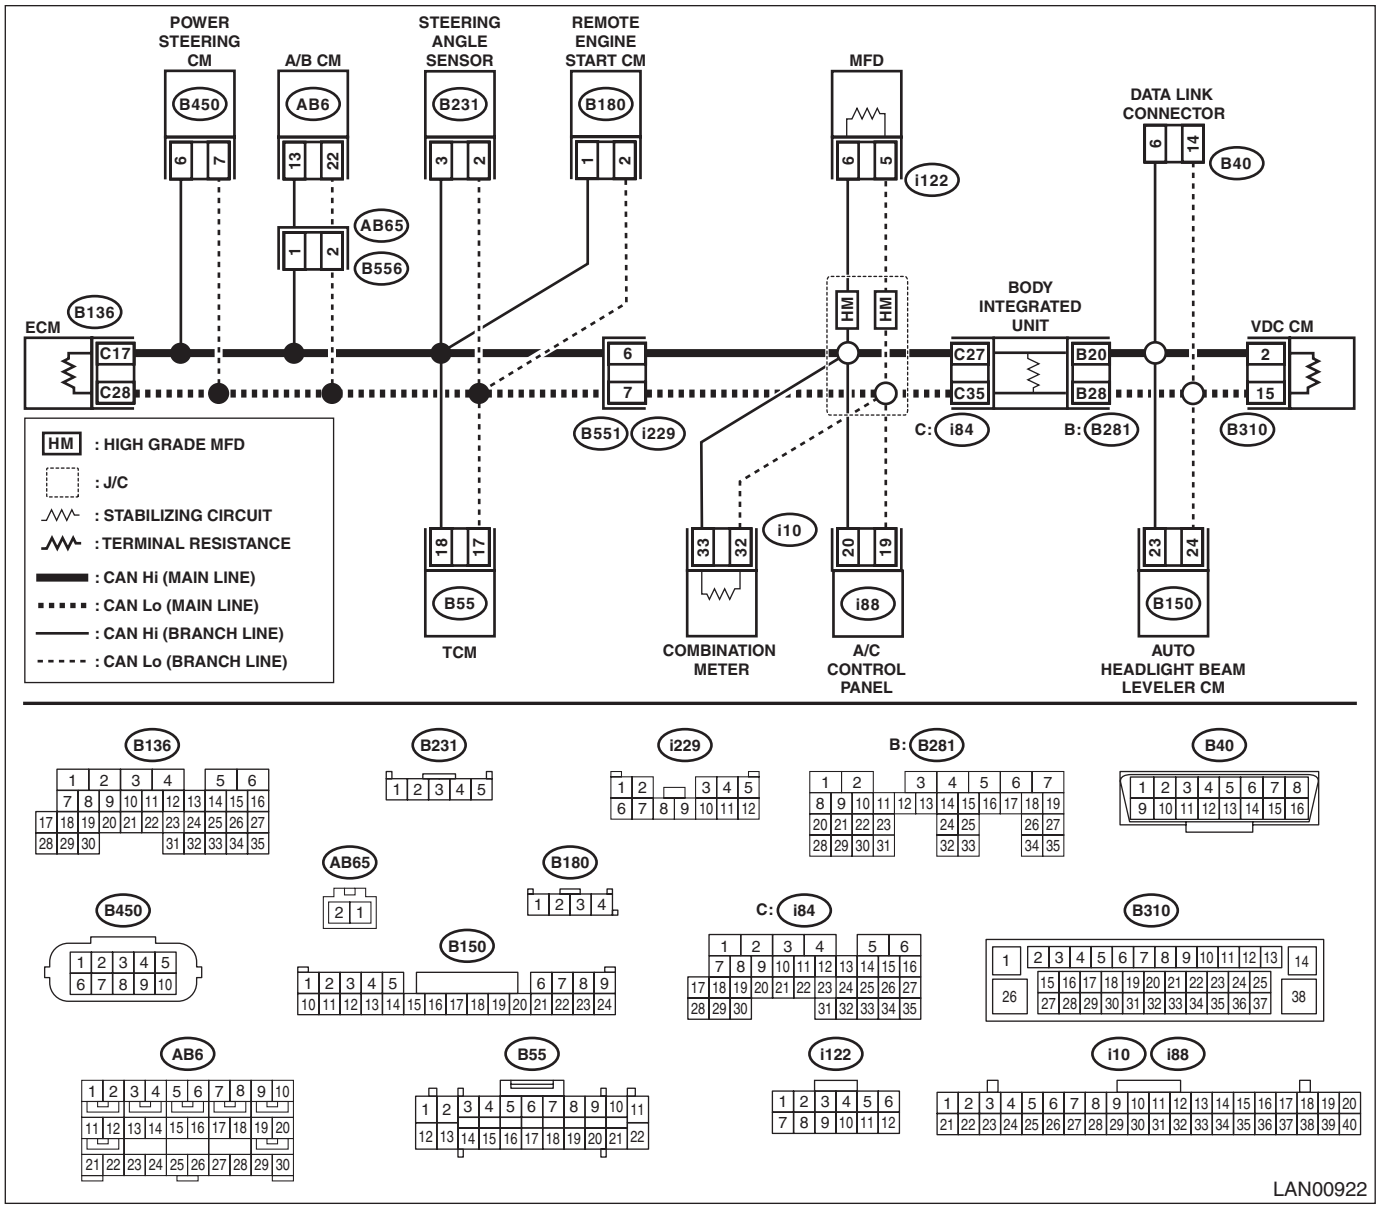
| Step | | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK BETWEEN RELATED LINES AND MAIN WIRING HARNESS.**<br>1) Turn the ignition switch to ON.<br>2) Using the tester, measure the voltage between terminals.<br>***Connector & terminal***<br>***(B40) No. 6 — Chassis ground:***<br>***(B40) No. 14 — Chassis ground:*** | Is the voltage 5 V or less? | Currently, it is normal. | Go to step **2**. |

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 2 | **CHECK CONTROL MODULE.**<br>With the tester connected, disconnect control module.<br>NOTE:<br>Disconnect the body integrated unit at the end.<br>***Connector & terminal***<br>***(B40) No. 6 — Chassis ground:***<br>***(B40) No. 14 — Chassis ground:*** | Did the voltage change to 5 V or less? | Replace the control module whose voltage has changed. When the value changed at disconnecting the body integrated unit,<br>Go to step **3**. | Repair or replace the short circuit of the harness between body integrated unit and VDC CM. |
| 3 | **CHECK BETWEEN MAIN WIRING HARNESSES.**<br>Using the tester, measure the voltage between terminals.<br>***Connector & terminal***<br>***(i84) No. 27 — Chassis ground:***<br>***(i84) No. 35 — Chassis ground:*** | Is the voltage 5 V or less? | Replace the body integrated unit. <Ref. to SL-78, REMOVAL, Body Integrated Unit.> | Repair or replace the short circuit of the harness between ECM and body integrated unit. |

### 3. 53 — 61 Ω

**WIRING DIAGRAM:**

CAN communication system <Ref. to WI-46, WIRING DIAGRAM, CAN Communication System.>



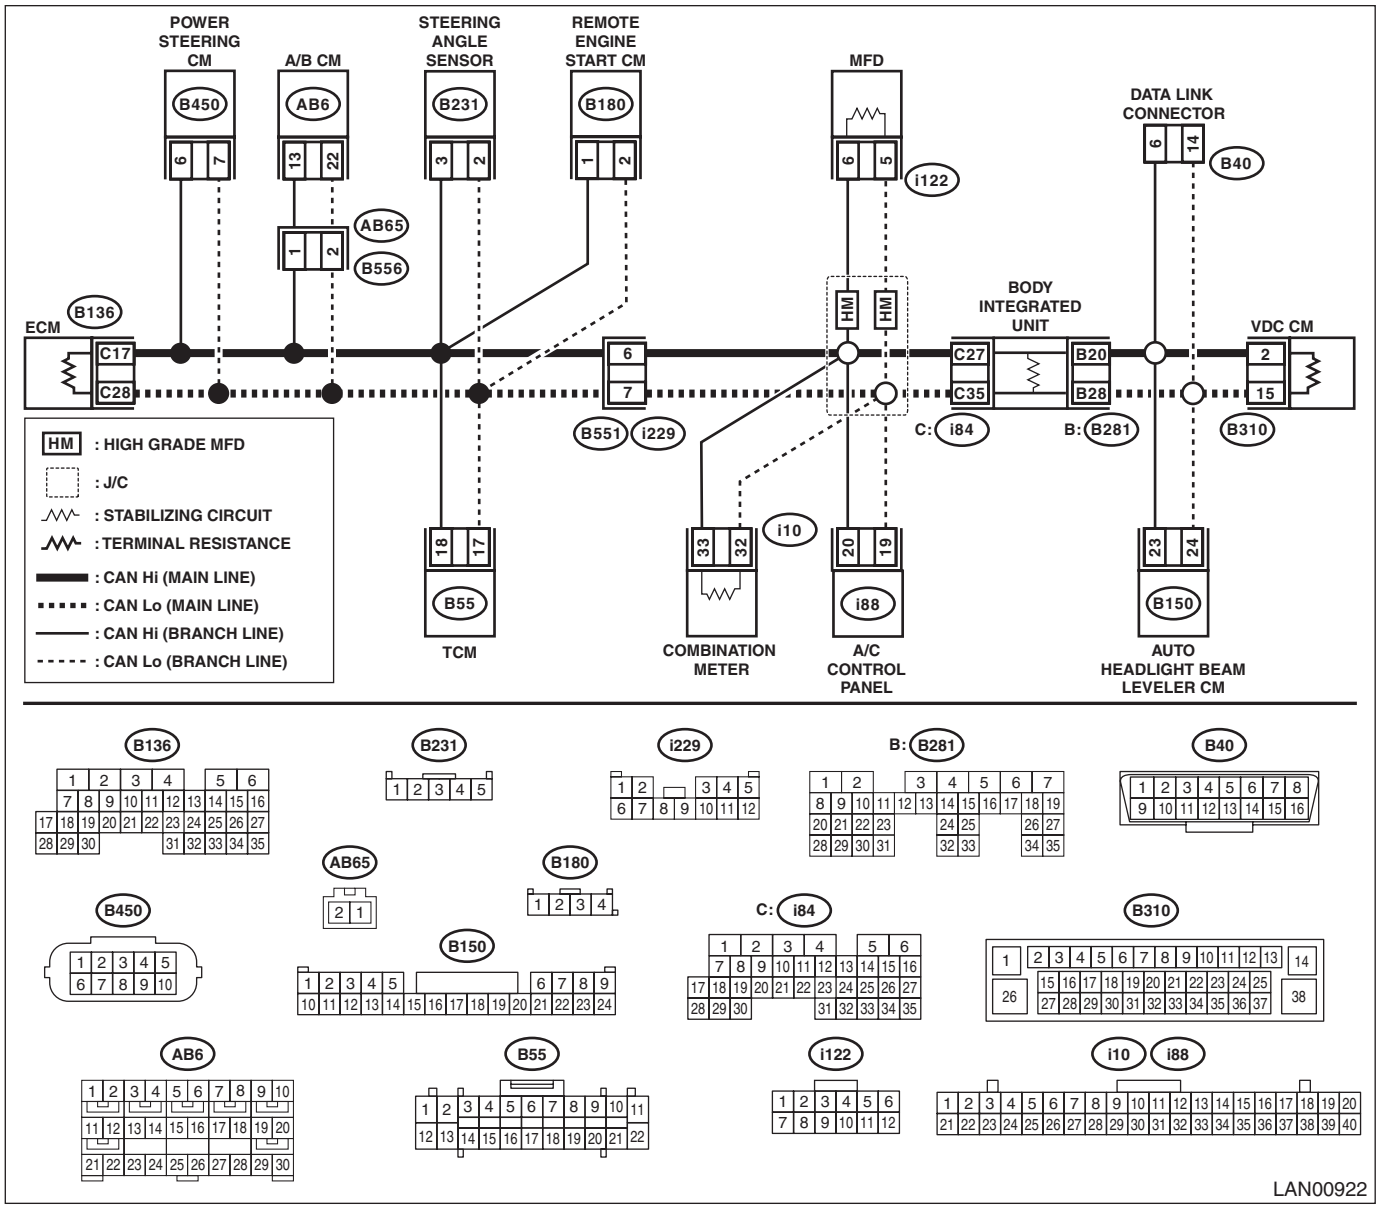
NOTE:
When the measured resistance value is 53 — 61 Ω, main wiring harness or related lines may be shorted to ground, or shorted to power supply line, or related line may be open.

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK BETWEEN RELATED LINES AND MAIN WIRING HARNESS.**<br>Using the tester, measure the resistance between terminals.<br>***Connector & terminal***<br>***(B40) No. 6 — Chassis ground:***<br>***(B40) No. 14 — Chassis ground:*** | Is the resistance 10 Ω or less? | Go to step **2**. | Go to step **4**. |
| 2 | **CHECK CONTROL MODULE.**<br>With the tester connected, disconnect control module.<br>NOTE:<br>Disconnect the body integrated unit at the end.<br>***Connector & terminal***<br>***(B40) No. 6 — Chassis ground:***<br>***(B40) No. 14 — Chassis ground:*** | Did the resistance change to 10 Ω or more? | Replace the control module whose resistance has changed. When the value changed at disconnecting the body integrated unit,<br>Go to step **3**. | Repair or replace the short circuit of the harness between body integrated unit and VDC CM. |
| 3 | **CHECK MAIN WIRING HARNESS AND RELATED LINES.**<br>Using the tester, measure the resistance between terminals.<br>***Connector & terminal***<br>***(i84) No. 27 — Chassis ground:***<br>***(i84) No. 35 — Chassis ground:*** | Is the resistance 10 Ω or less? | Repair or replace the short circuit of the harness between ECM and body integrated unit. | Replace the body integrated unit. <Ref. to SL-78, REMOVAL, Body Integrated Unit.> |
| 4 | **CHECK BETWEEN RELATED LINES AND MAIN WIRING HARNESS.**<br>1) Turn the ignition switch to ON.<br>2) Using the tester, measure the voltage between terminals.<br>***Connector & terminal***<br>***(B40) No. 6 — Chassis ground:***<br>***(B40) No. 14 — Chassis ground:*** | Is the voltage 5 V or less? | CAN communication circuit is normal. | Go to step **5**. |
| 5 | **CHECK CONTROL MODULE.**<br>With the tester connected, disconnect control module.<br>NOTE:<br>Disconnect the body integrated unit at the end.<br>***Connector & terminal***<br>***(B40) No. 6 — Chassis ground:***<br>***(B40) No. 14 — Chassis ground:*** | Did the voltage change to 5 V or less? | Replace the control module whose voltage has changed. When the value changed at disconnecting the body integrated unit,<br>Go to step **6**. | Repair or replace the short circuit of the harness between body integrated unit and VDC CM. |
| 6 | **CHECK HARNESS.**<br>Using a tester, measure the voltage between terminals and chassis ground.<br>***Connector & terminal***<br>***(i84) No. 27 — Chassis ground:***<br>***(i84) No. 35 — Chassis ground:*** | Is the voltage 5 V or less? | Replace the body integrated unit. <Ref. to SL-78, REMOVAL, Body Integrated Unit.> | Repair or replace the short circuit of the harness between ECM and body integrated unit. |

## 4. 52 Ω OR LESS

**WIRING DIAGRAM:**

CAN communication system <Ref. to WI-46, WIRING DIAGRAM, CAN Communication System.>



NOTE:

When the bus line is measured, combined resistance of end resistance (120 Ω) in ECM and end resistance (120 Ω) in VDC CM can be measured. The combined resistance is approximately 53 — 61 Ω with the stabilizing circuit included. When the measured resistance value is 52 Ω or less, main wiring harness or related lines may be shorted, or combined resistance may have changed because resistance other than end resistance is created on the circuit.

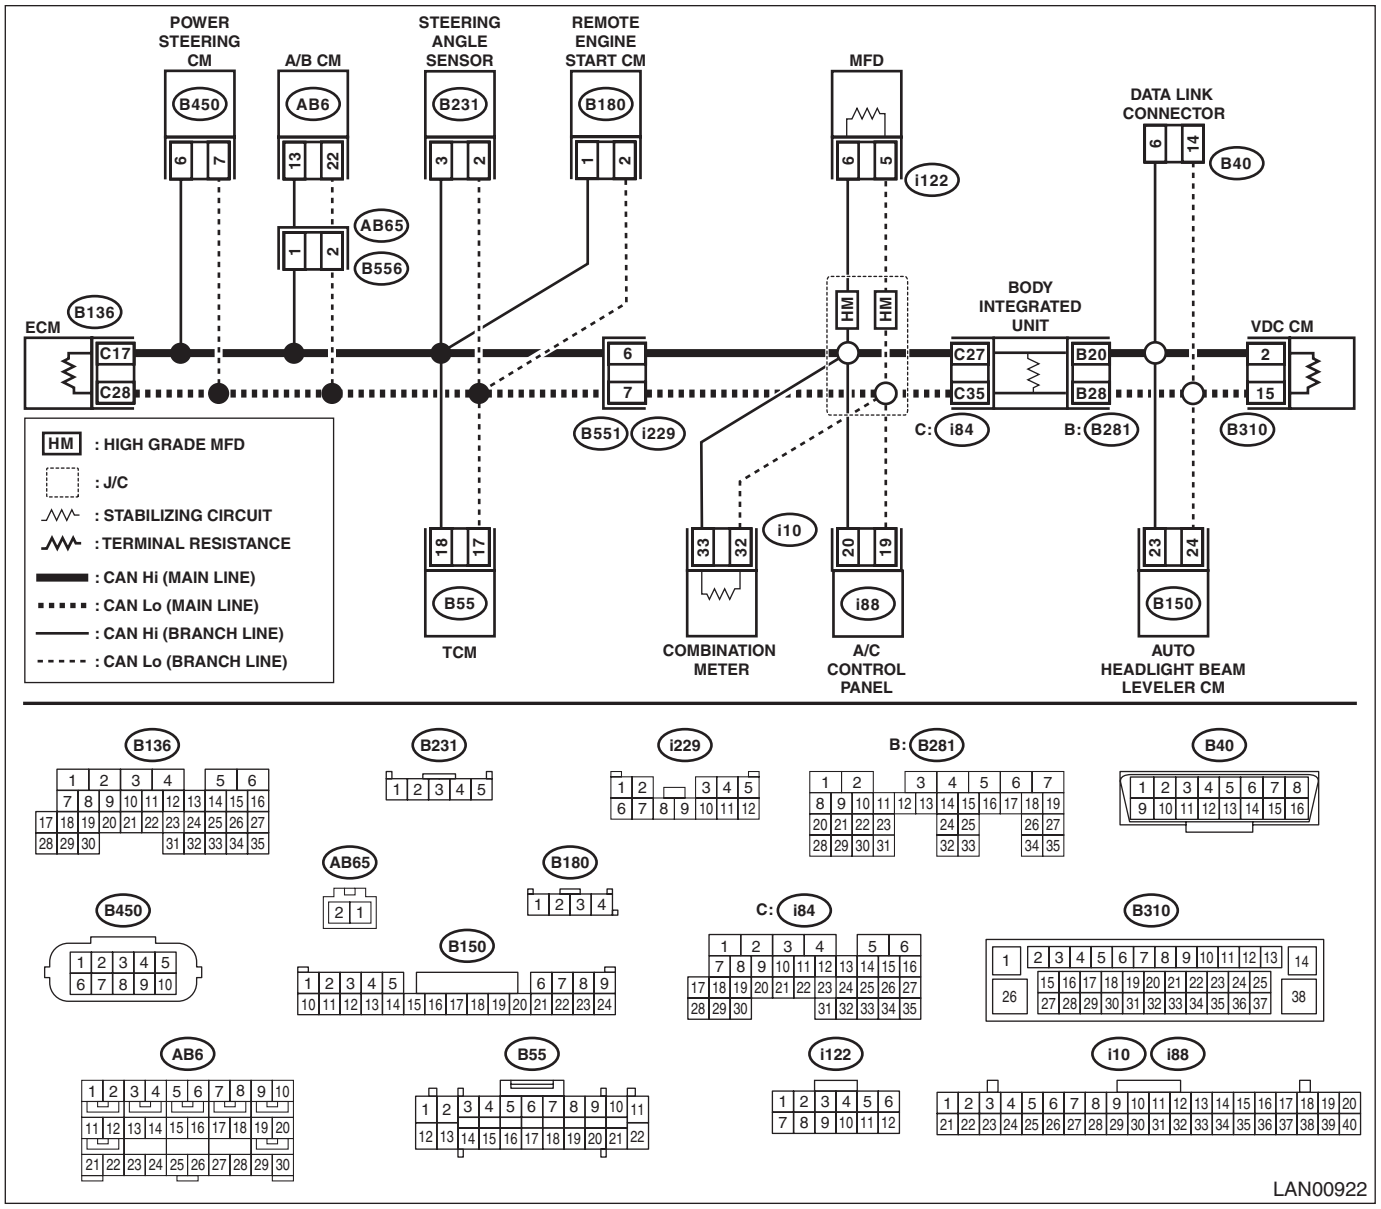
| | Step | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK BETWEEN RELATED LINES AND MAIN WIRING HARNESS.**<br>Using the tester, measure the resistance between terminals.<br>***Connector & terminal***<br>***(B40) No. 6 — No. 14:*** | Is the resistance 10 Ω or less? | Go to step **2**. | Go to step **4**. |
| 2 | **CHECK MAIN WIRING HARNESS AND RELATED LINES.**<br>With a tester connected, disconnect control module connectors in order.<br>NOTE:<br>Disconnect the body integrated unit at the end.<br>***Connector & terminal***<br>***(B40) No. 6 — No. 14:*** | Is there any control module whose condition has changed from short state? | Replace the control module whose resistance has changed. When the value changed at disconnecting the body integrated unit,<br>Go to step **3**. | Repair or replace the short circuit of the harness between body integrated unit and VDC CM. |
| 3 | **CHECK BETWEEN MAIN WIRING HARNESSES.**<br>Using the tester, measure the resistance between terminals.<br>***Connector & terminal***<br>***(i84) No. 27 — No. 35:*** | Is the resistance 10 Ω or less? | Repair or replace the short circuit of the harness between ECM and body integrated unit. | Replace the body integrated unit. <Ref. to SL-78, REMOVAL, Body Integrated Unit.> |
| 4 | **CHECK CONTROL MODULE.**<br>1) Disconnect ECM and VDC CM connectors.<br>2) Using a tester, measure the resistance between control module terminals.<br>***Connector & terminal***<br>***(B136) No. 17 — No. 28:***<br>***(B310) No. 2 — No. 15:*** | Is the resistance 114 — 126 Ω? | Go to step **5**. | Replace the control module whose end resistance value is out of the specified range. |
| 5 | **CHECK CONTROL MODULE.**<br>1) Disconnect the connector of body integrated unit.<br>2) Using a tester, measure the resistance between control module terminals.<br>***Connector & terminal***<br>***(B281) No. 28 — (i84) No. 27:***<br>***(B281) No. 20 — (i84) No. 35:*** | Is the resistance 2,850 — 3,150 Ω? | Go to step **6**. | Replace the body integrated unit. <Ref. to SL-78, REMOVAL, Body Integrated Unit.> |
| 6 | **CHECK CONTROL MODULE.**<br>Using a tester, measure the resistance between control module terminals.<br>***Connector & terminal***<br>***(B281) No. 28 — (i84) No. 35:***<br>***(B281) No. 20 — (i84) No. 27:*** | Is the resistance less than 1 Ω? | Go to step **7**. | Replace the body integrated unit. <Ref. to SL-78, REMOVAL, Body Integrated Unit.> |
| 7 | **CHECK CONTROL MODULE.**<br>1) Disconnect the combination meter connector.<br>2) Using a tester, measure the resistance between control module terminals.<br>***Connector & terminal***<br>***(i10) No. 32 — No. 33:*** | Is the resistance 2,850 — 3,150 Ω? | Go to step **8**. | Replace the combination meter. |
| 8 | **CHECK CONTROL MODULE (ONLY FOR MODELS WITH HIGH GRADE MFD).**<br>1) Disconnect the MFD connector.<br>2) Using a tester, measure the resistance between control module terminals.<br>***Connector & terminal***<br>***(i122) No. 5 — No. 6:*** | Is the resistance 2,850 — 3,150 Ω? | Go to step **9**. | Replace the MFD. |

| Step | | Check | Yes | No |
|---|---|---|---|---|
| 9 | **CHECK HARNESS.**<br>Using the tester, check the short circuit portion of each harness.<br>***Connector & terminal***<br>***(B281) No. 28 — No. 20:*** | Is the resistance 1 MΩ or more? | Go to step **11**. | Go to step **10**. |
| 10 | **CHECK CONTROL MODULE.**<br>With a tester connected, disconnect control modules in order.<br>***Connector & terminal***<br>***(B281) No. 28 — No. 20:*** | Are there any control modules whose resistance changed to 1 MΩ or more? | Replace the control module that has changed. | Repair or replace the harness part which has resistance component. |
| 11 | **CHECK CONTROL MODULE.**<br>With a tester connected, disconnect control modules in order.<br>***Connector & terminal***<br>***(i84) No. 27 — No. 35:*** | Is there any control module whose resistance has changed to 1 MΩ or more? | Replace the control module that has changed. | Repair or replace the harness part which has resistance component. |

## 5. 62 Ω OR MORE

**WIRING DIAGRAM:**

CAN communication system <Ref. to WI-46, WIRING DIAGRAM, CAN Communication System.>



NOTE:

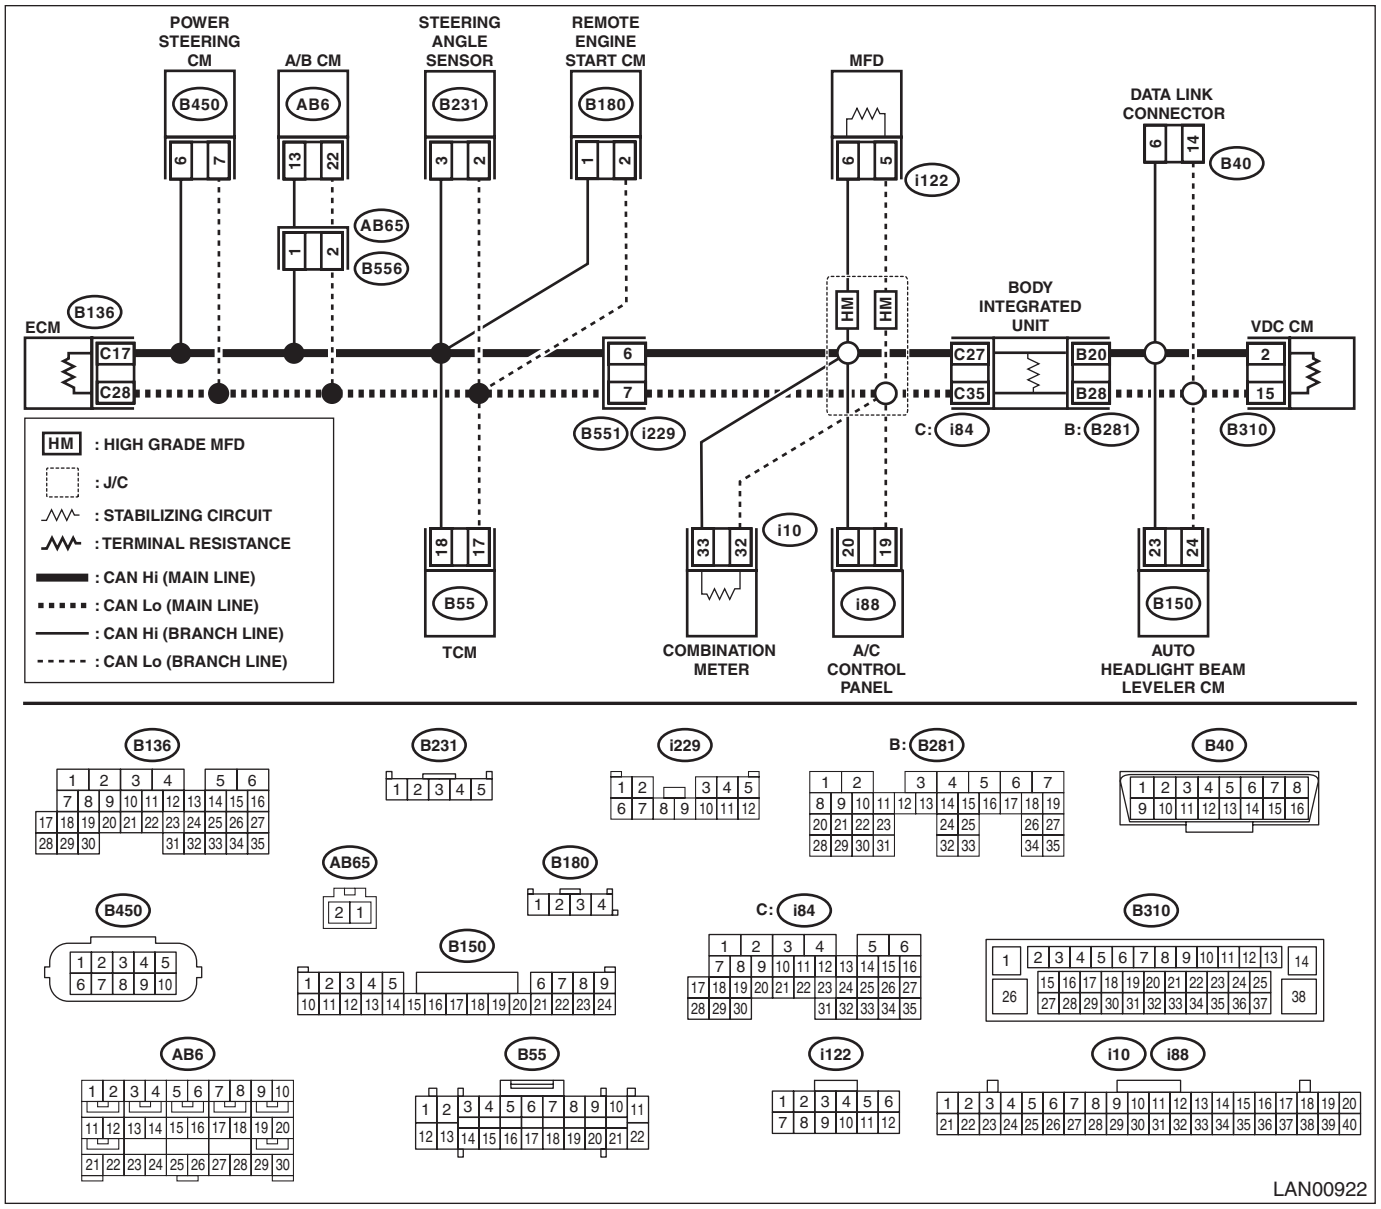
When CAN communication circuit is measured, combined resistance of end resistance (120 Ω) in ECM and end resistance (120 Ω) in VDC CM can be measured. The combined resistance is approximately 53 — 61 Ω with the stabilizing circuit included. When the measured resistance value is 62 Ω or more, either one of the end resistances, or stabilizing circuit, or main wiring harness may have malfunction such as open circuit.

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK CONTROL MODULE.**<br>1) Disconnect ECM and VDC CM connectors.<br>2) Using a tester, measure the resistance between control module terminals.<br>***Connector & terminal***<br>***(B136) No. 17 — No. 28:***<br>***(B310) No. 2 — No. 15:*** | Is the resistance 114 — 126 Ω? | Go to step **2**. | Replace the control module whose value is out of the specification. |
| 2 | **CHECK CONTROL MODULE.**<br>1) Disconnect the connector of body control module.<br>2) Using a tester, measure the resistance between control module terminals.<br>***Connector & terminal***<br>***(B281) No. 28 — (i84) No. 27:***<br>***(B281) No. 20 — (i84) No. 35:*** | Is the resistance 2,850 — 3,150 Ω? | Go to step **3**. | Replace the body integrated unit. <Ref. to SL-78, REMOVAL, Body Integrated Unit.> |
| 3 | **CHECK CONTROL MODULE.**<br>Using the tester, measure the resistance between terminals.<br>***Connector & terminal***<br>***(B281) No. 28 — (i84) No. 35:***<br>***(B281) No. 20 — (i84) No. 27:*** | Is the resistance less than 1 Ω? | Go to step **4**. | Replace the body integrated unit. <Ref. to SL-78, REMOVAL, Body Integrated Unit.> |
| 4 | **CHECK CONTROL MODULE.**<br>1) Disconnect the combination meter connector.<br>2) Using a tester, measure the resistance between control module terminals.<br>***Connector & terminal***<br>***(i10) No. 32 — No. 33:*** | Is the resistance 2,850 — 3,150 Ω? | Go to step **5**. | Replace the combination meter. |
| 5 | **CHECK CONTROL MODULE (ONLY FOR MODELS WITH HIGH GRADE MFD).**<br>1) Disconnect the MFD connector.<br>2) Using a tester, measure the resistance between control module terminals.<br>***Connector & terminal***<br>***(i122) No. 5 — No. 6:*** | Is the resistance 2,850 — 3,150 Ω? | Go to step **6**. | Replace the MFD. |
| 6 | **CHECK HARNESS.**<br>Using a tester, check continuity between terminals.<br>***Connector & terminal***<br>***(B40) No. 6 — (B310) No. 2:***<br>***(B40) No. 14 — (B310) No. 15:***<br>***(B40) No. 6 — (B281) No. 20:***<br>***(B40) No. 14 — (B281) No. 28:*** | Is there continuity? | Go to step **7**. | Repair or replace the open circuit of harness. |
| 7 | **CHECK HARNESS.**<br>1) Disconnect the ECM connector.<br>2) Using a tester, check continuity between terminals.<br>***Connector & terminal***<br>***(i84) No. 27 — (B136) No. 17:***<br>***(i84) No. 35 — (B136) No. 28:*** | Is there continuity? | It is possible that temporary poor communication occurs. | Repair or replace the open circuit of harness. |

## 6. RELATED LINES 53 — 61 Ω (TCM)

**WIRING DIAGRAM:**

CAN communication system <Ref. to WI-46, WIRING DIAGRAM, CAN Communication System.>



NOTE:

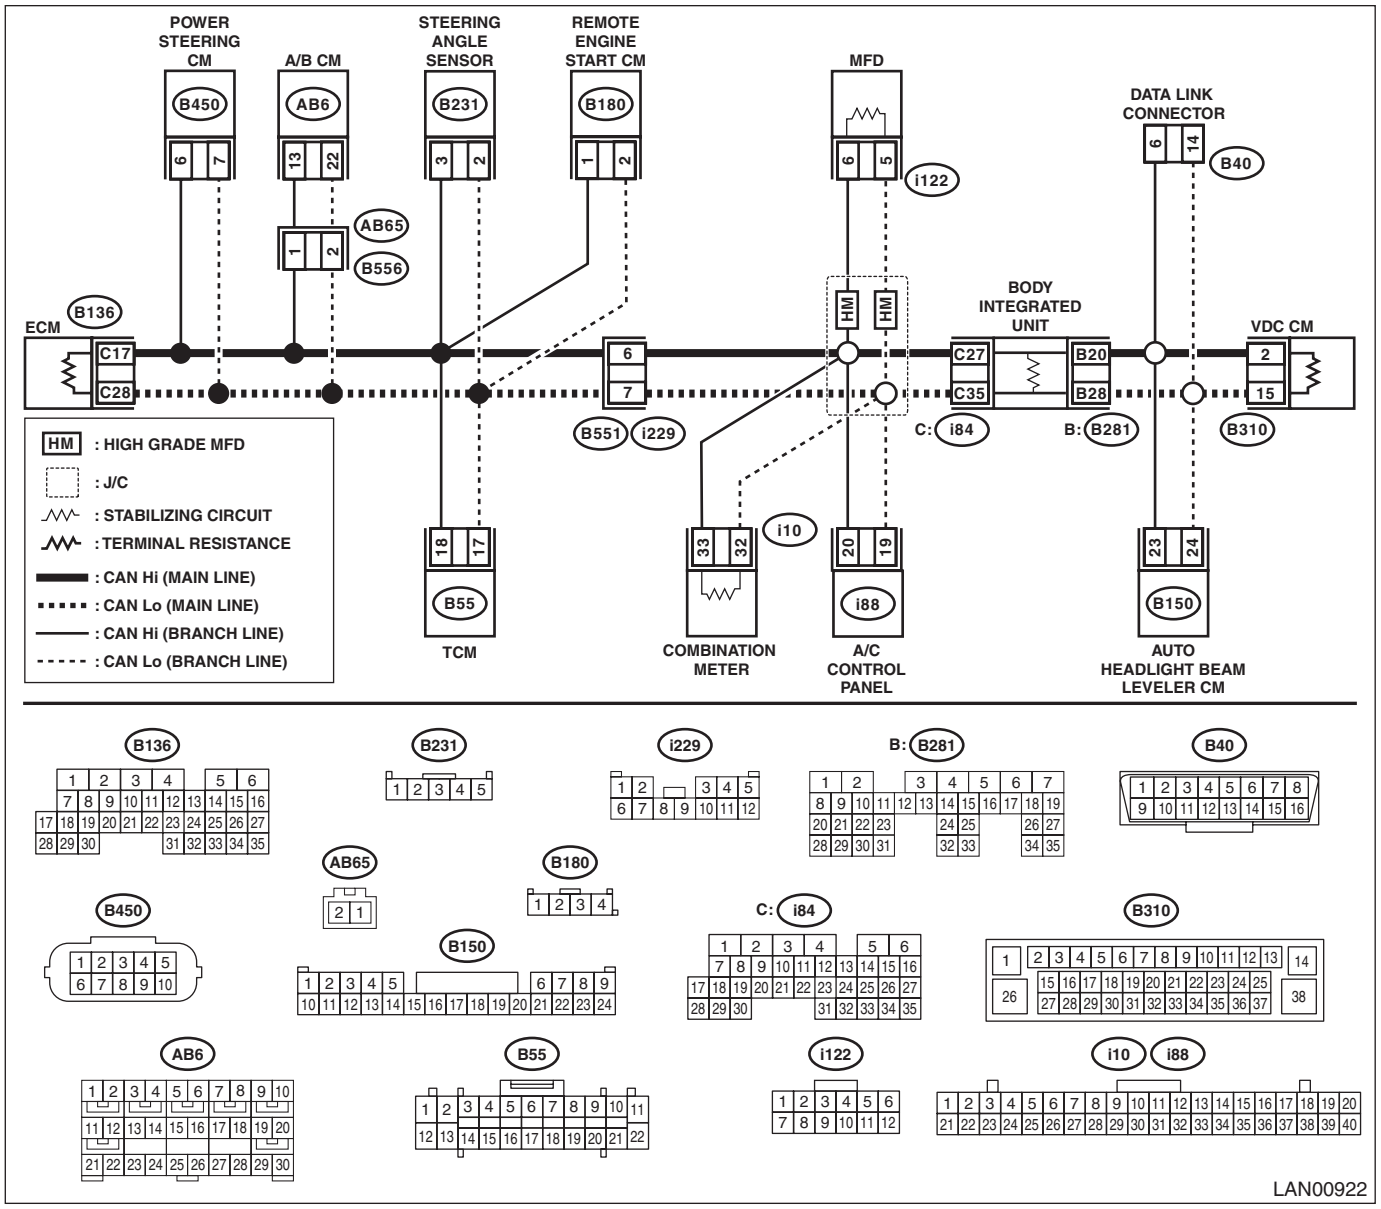
Perform inspection when no data is received, or faulty is detected. This is different from power supply shorted or ground shorted.

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK BETWEEN RELATED LINES AND MAIN WIRING HARNESS.**<br>1) Disconnect the TCM connector.<br>2) Using the tester, measure the resistance between terminals.<br>***Connector & terminal***<br>***(B55) No. 17 — No. 18:*** | Is the resistance 400 Ω or more? | Related lines between TCM and main wiring harness is open, or main wiring harness is open at two places or more. | Go to step **2**. |
| 2 | **CHECK RELATED LINES.**<br>Using the tester, measure the resistance between terminals.<br>***Connector & terminal***<br>***(B55) No. 17 — (B40) No. 14:***<br>***(B55) No. 18 — (B40) No. 6:*** | Is the resistance 10 Ω or more? | Repair or replace the open circuit portion of TCM related lines. | Check DTC of TCM. <Ref. to CVT(diag)-18, OPERATION, Read Diagnostic Trouble Code (DTC).> |

## 7. RELATED LINES 53 — 61 Ω (STEERING ANGLE SENSOR)

**WIRING DIAGRAM:**

CAN communication system <Ref. to WI-46, WIRING DIAGRAM, CAN Communication System.>

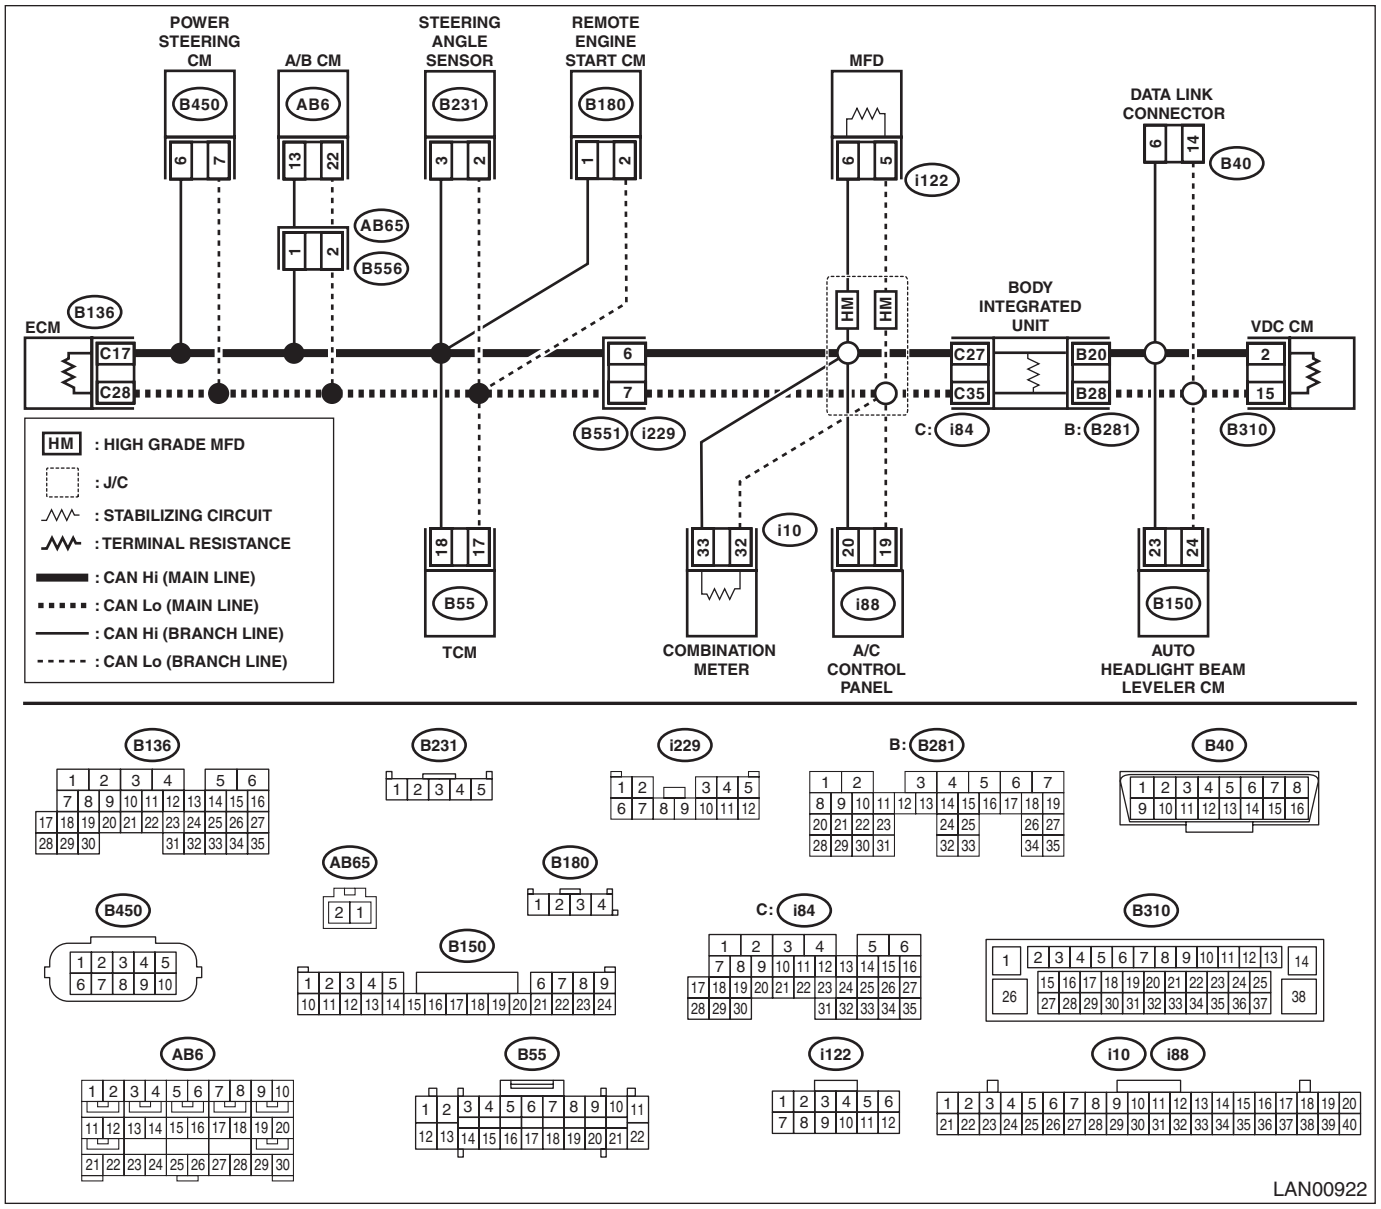


| Step | | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK BETWEEN RELATED LINES AND MAIN WIRING HARNESS.**<br>1) Disconnect the steering angle sensor connector.<br>2) Using the tester, measure the resistance between terminals.<br>***Connector & terminal***<br>***(B231) No. 2 — No. 3:*** | Is the resistance 400 Ω or more? | Related lines between steering angle sensor and main wiring harness is open, or main wiring harness is open at two places or more. | Go to step **2**. |
| 2 | **CHECK RELATED LINES.**<br>Using the tester, measure the resistance between terminals.<br>***Connector & terminal***<br>***(B231) No. 2 — (B40) No. 14:***<br>***(B231) No. 3 — (B40) No. 6:*** | Is the resistance 10 Ω or more? | Repair or replace the open circuit portion of steering angle sensor related lines. | Check DTC of VDC CM. <Ref. to VDC(diag)-22, OPERATION, Read Diagnostic Trouble Code (DTC).> |

## 8. RELATED LINE 53 — 61 Ω (A/C CONTROL PANEL)

**WIRING DIAGRAM:**

CAN communication system <Ref. to WI-46, WIRING DIAGRAM, CAN Communication System.>

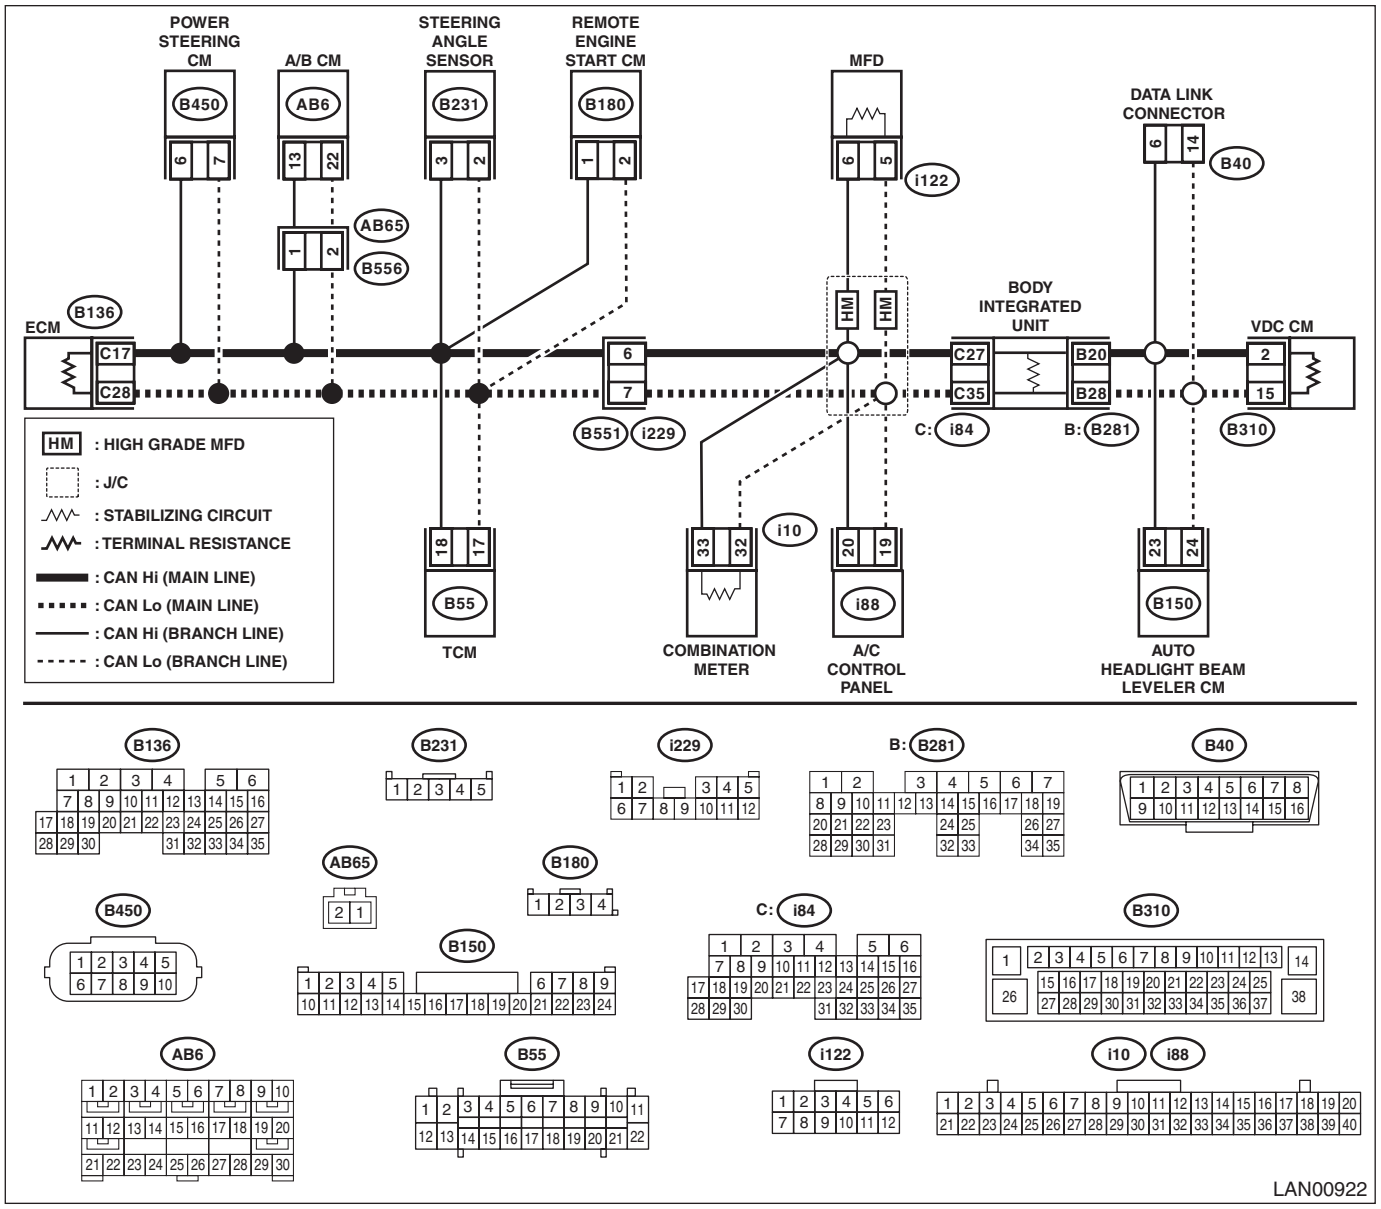


| Step | | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK BETWEEN RELATED LINES AND MAIN WIRING HARNESS.**<br>1) Disconnect the A/C control panel connector.<br>2) Using the tester, measure the resistance between terminals.<br>***Connector & terminal***<br>***(i88) No. 19 — No. 20:*** | Is the resistance 400 Ω or more? | Related lines between A/C control panel and main wiring harness is open, or main wiring harness is open at two places or more. | Go to step **2**. |
| 2 | **CHECK RELATED LINES.**<br>Using the tester, measure the resistance between terminals.<br>***Connector & terminal***<br>***(i88) No. 19 — (B40) No. 14:***<br>***(i88) No. 20 — (B40) No. 6:*** | Is the resistance 10 Ω or more? | Repair or replace the open circuit of A/C control panel related lines. | Check the DTC of A/C control panel. <Ref. to AC(diag)-42, Read Diagnostic Trouble Code (DTC).> |

## 9. RELATED LINES 53 — 61 Ω (ELECTRIC POWER STEERING CM)

### WIRING DIAGRAM:

CAN communication system <Ref. to WI-46, WIRING DIAGRAM, CAN Communication System.>



| | Step | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK BETWEEN RELATED LINES AND MAIN WIRING HARNESS.**<br>1) Disconnect the electric power steering CM connector.<br>2) Using the tester, measure the resistance between terminals.<br>***Connector & terminal***<br>***(B450) No. 6 — No. 7:*** | Is the resistance 400 Ω or more? | Related lines or main wiring harness between electric power steering CM and main wiring harness is open at two places or more. | Go to step **2**. |

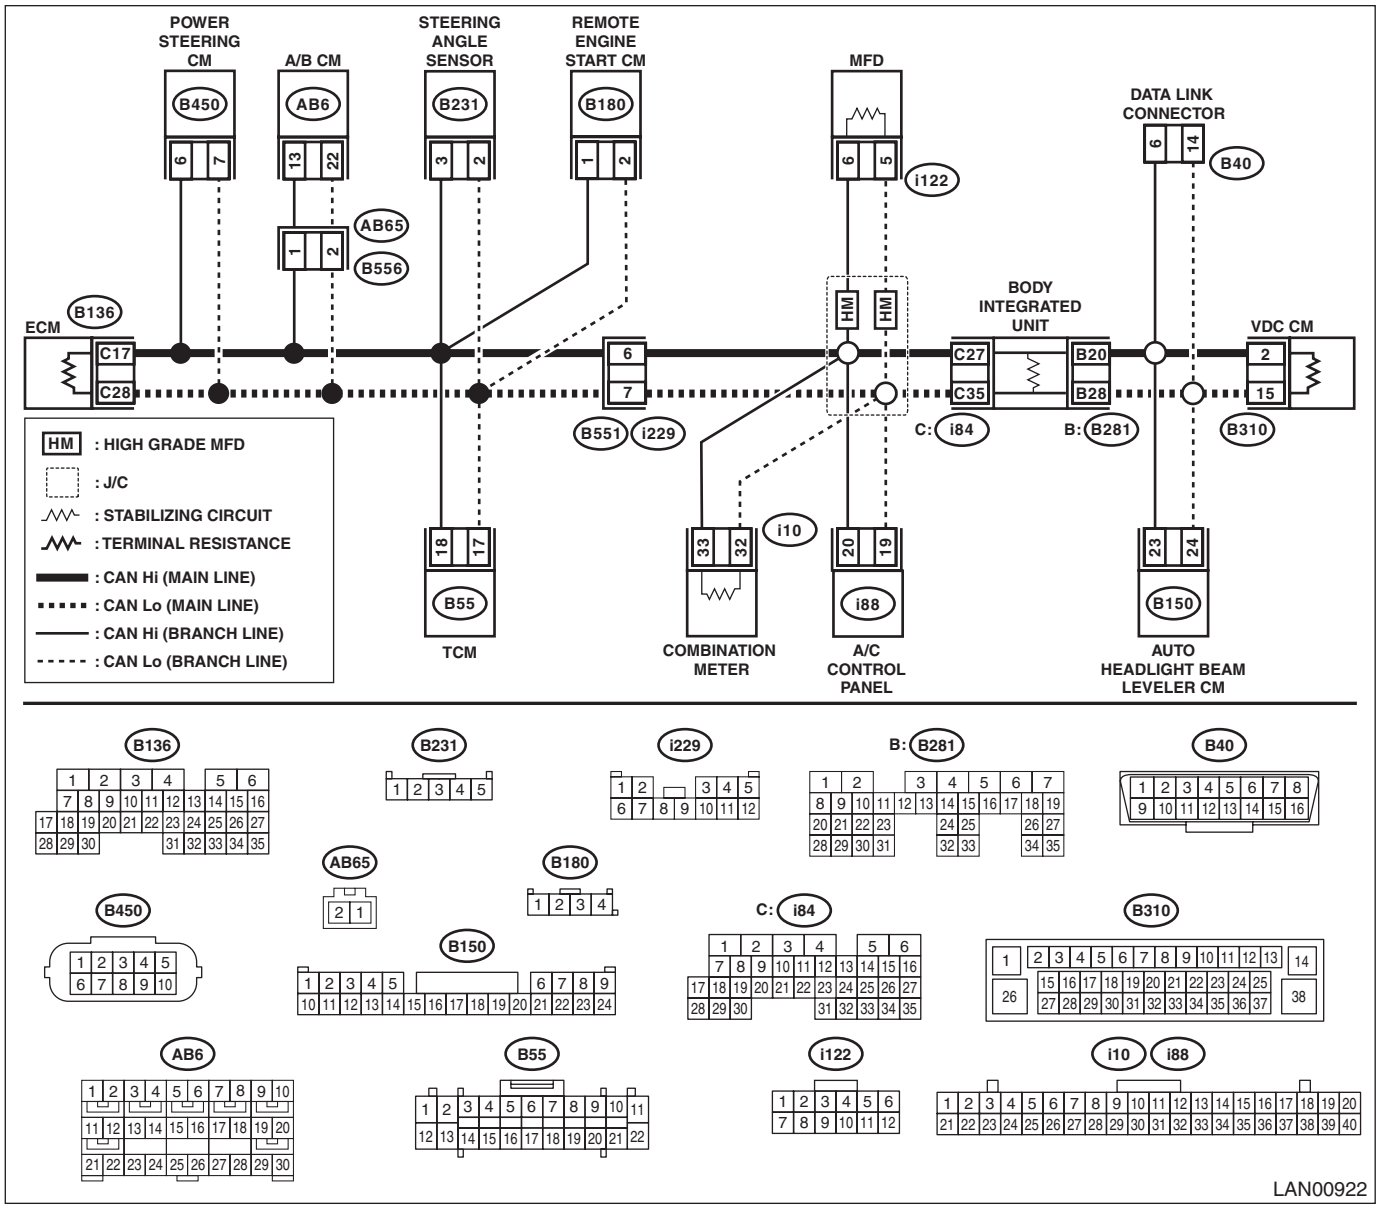
## 10.RELATED LINES 53 — 61 Ω (COMBINATION METER)

### WIRING DIAGRAM:

CAN communication system <Ref. to WI-46, WIRING DIAGRAM, CAN Communication System.>

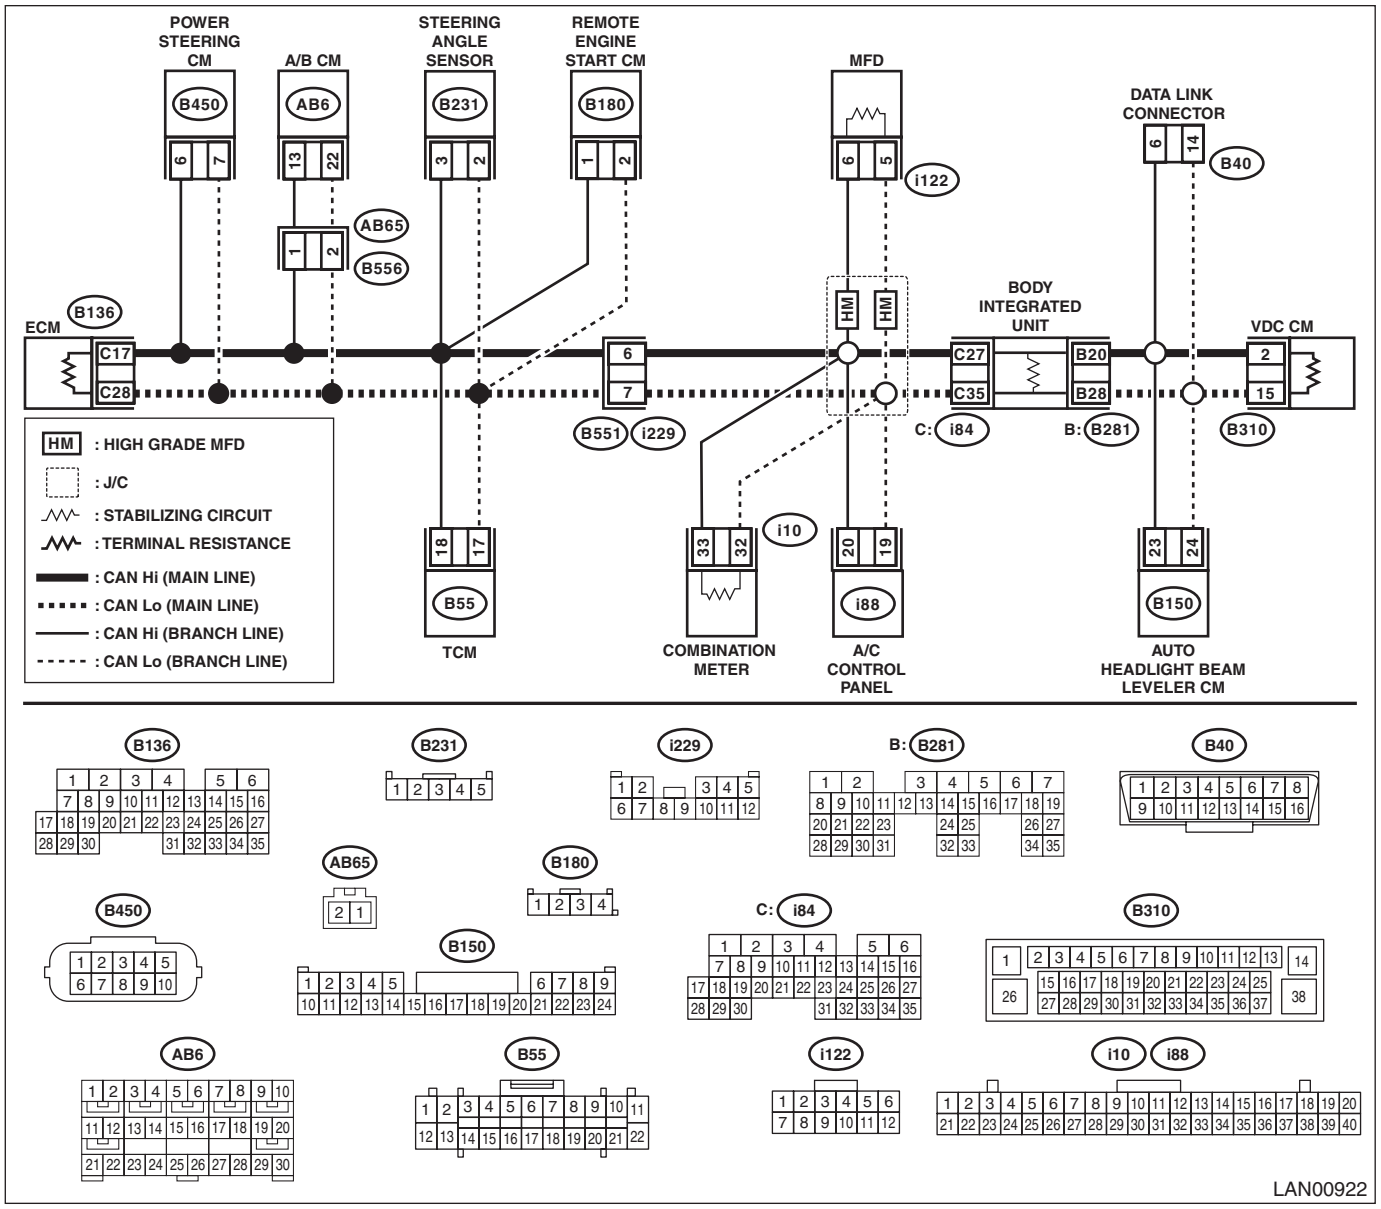


| Step | | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK BETWEEN RELATED LINES AND MAIN WIRING HARNESS.**<br>1) Disconnect the combination meter connector.<br>2) Using the tester, measure the resistance between terminals.<br>***Connector & terminal***<br>***(i10) No. 32 — No. 33:*** | Is the resistance 400 Ω or more? | Related lines between combination meter and main wiring harness is open, or main wiring harness is open at two places or more. | Go to step **2**. |
| 2 | **CHECK RELATED LINES.**<br>Using the tester, measure the resistance between terminals.<br>***Connector & terminal***<br>***(i10) No. 32 — (B40) No. 14:***<br>***(i10) No. 33 — (B40) No. 6:*** | Is the resistance 10 Ω or more? | Repair or replace the open circuit portion of combination meter related lines. | Check DTC of combination meter. |

## 11.RELATED LINES 53 — 61 Ω (MFD)

**WIRING DIAGRAM:**

CAN communication system <Ref. to WI-46, WIRING DIAGRAM, CAN Communication System.>

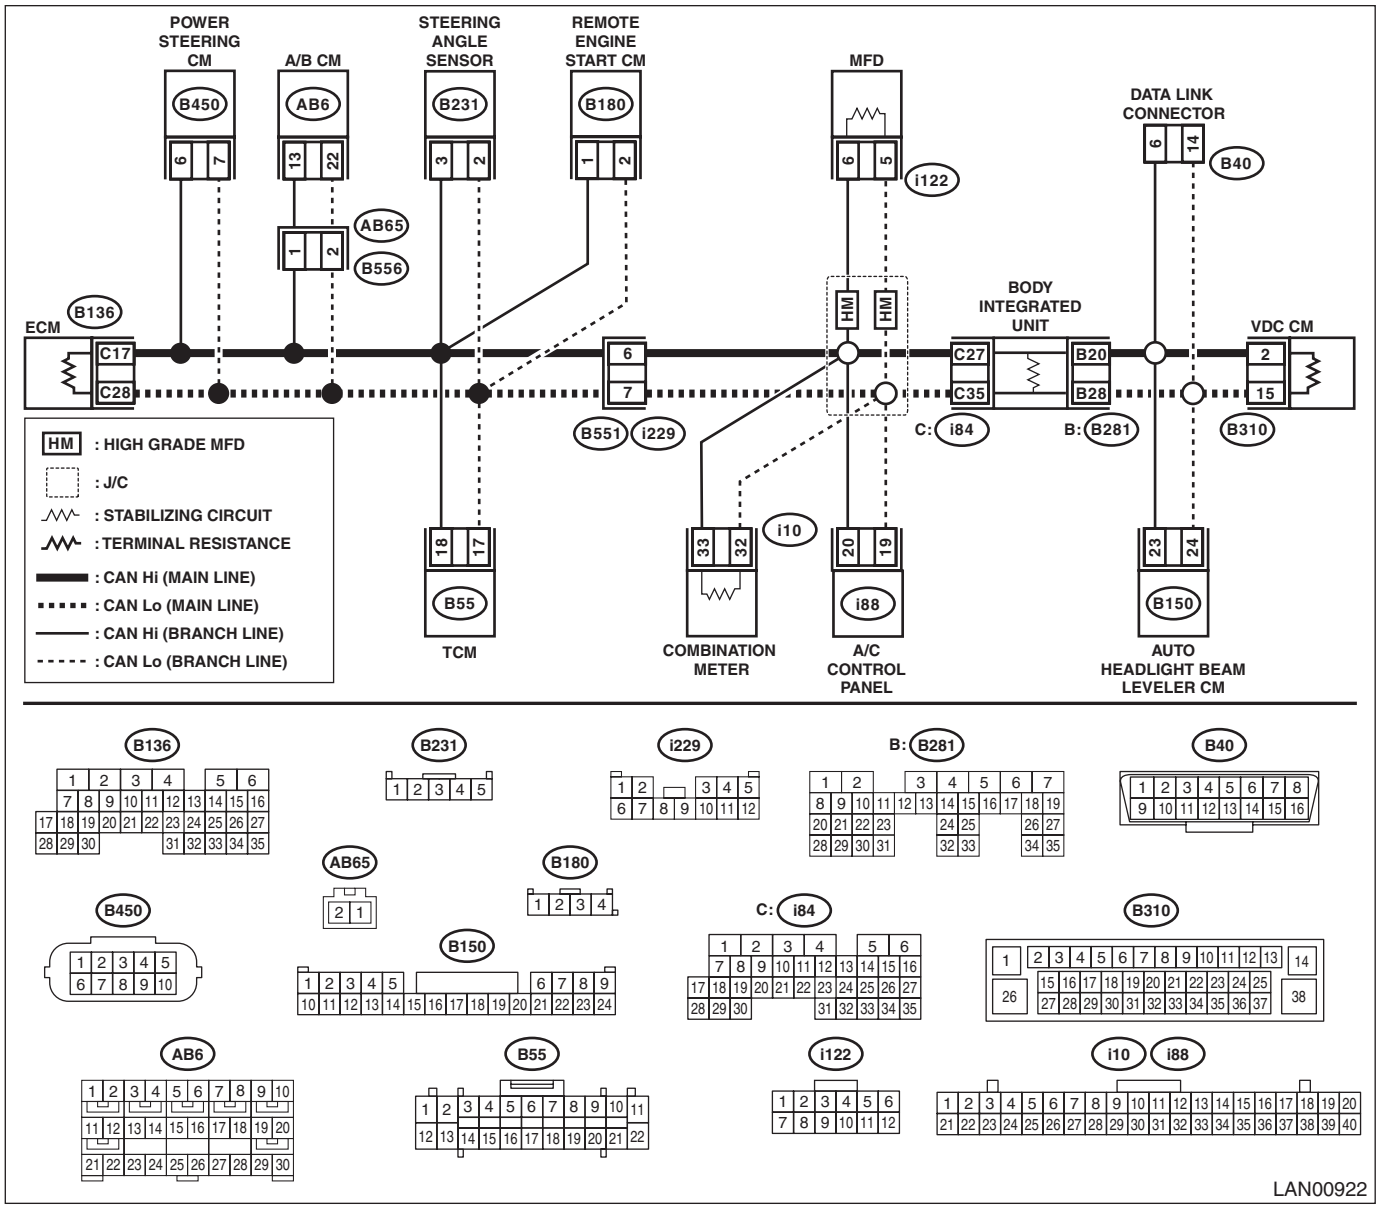


| Step | | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK BETWEEN RELATED LINES AND MAIN WIRING HARNESS.**<br>1) Disconnect the MFD connector.<br>2) Using the tester, measure the resistance between terminals.<br>***Connector & terminal***<br>***(i122) No. 5 — No. 6:*** | Is the resistance 400 Ω or more? | Related lines between MFD and main wiring harness is open, or main wiring harness is open at two places or more. | Go to step **2**. |
| 2 | **CHECK RELATED LINES.**<br>Using the tester, measure the resistance between terminals.<br>***Connector & terminal***<br>***(i122) No. 5 — (B40) No. 14:***<br>***(i122) No. 6 — (B40) No. 6:*** | Is the resistance 10 Ω or more? | Repair or replace the open circuit of MFD related lines. | Check DTC of MFD. |

## 12.RELATED LINES 53 — 61 Ω (A/B CM)

**WIRING DIAGRAM:**

CAN communication system <Ref. to WI-46, WIRING DIAGRAM, CAN Communication System.>

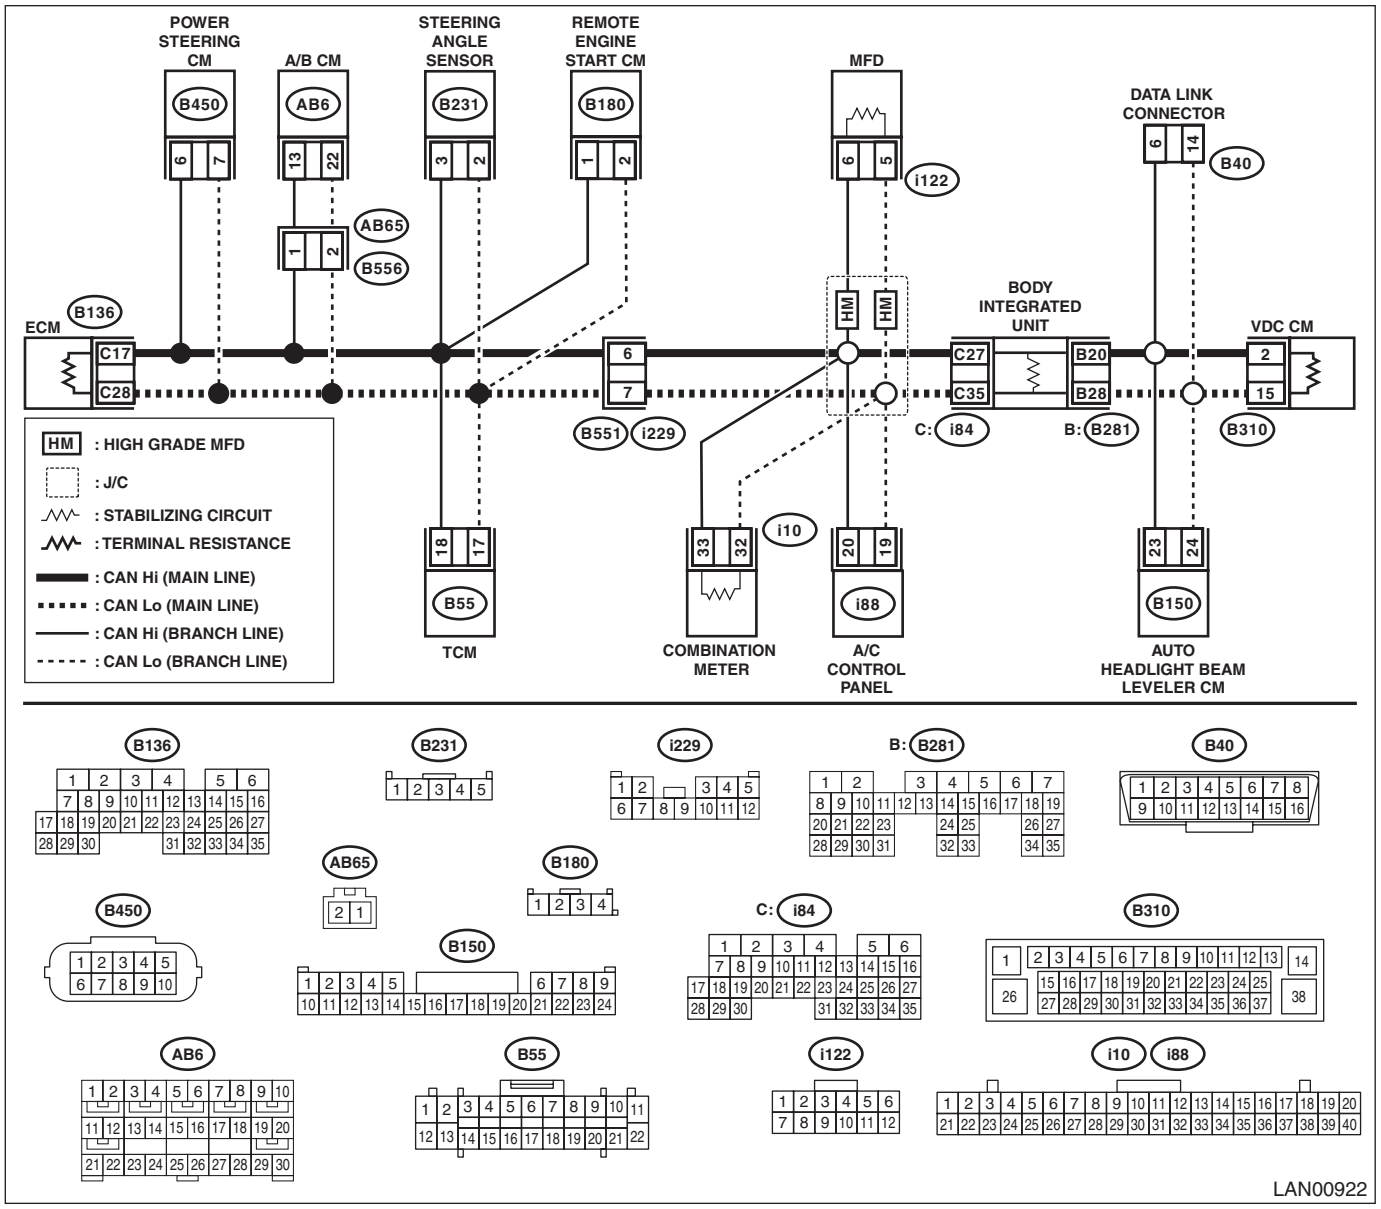


| Step | | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK BETWEEN RELATED LINES AND MAIN WIRING HARNESS.**<br>1) Disconnect the A/B CM connector.<br>2) Using the tester, measure the resistance between terminals.<br>***Connector & terminal***<br>***(AB6) No. 13 — No. 22:*** | Is the resistance 400 Ω or more? | Related lines between A/B CM and main wiring harness is open, or main wiring harness is open at two places or more. | Go to step **2**. |
| 2 | **CHECK RELATED LINES.**<br>Using the tester, measure the resistance between terminals.<br>***Connector & terminal***<br>***(AB6) No. 22 — (B40) No. 14:***<br>***(AB6) No. 13 — (B40) No. 6:*** | Is the resistance 10 Ω or more? | Repair or replace the open circuit of A/B CM related lines. | Check DTC of A/B CM. |

## 13.RELATED LINES 53 — 61 Ω (HEADLIGHT BEAM LEVELER)

**WIRING DIAGRAM:**

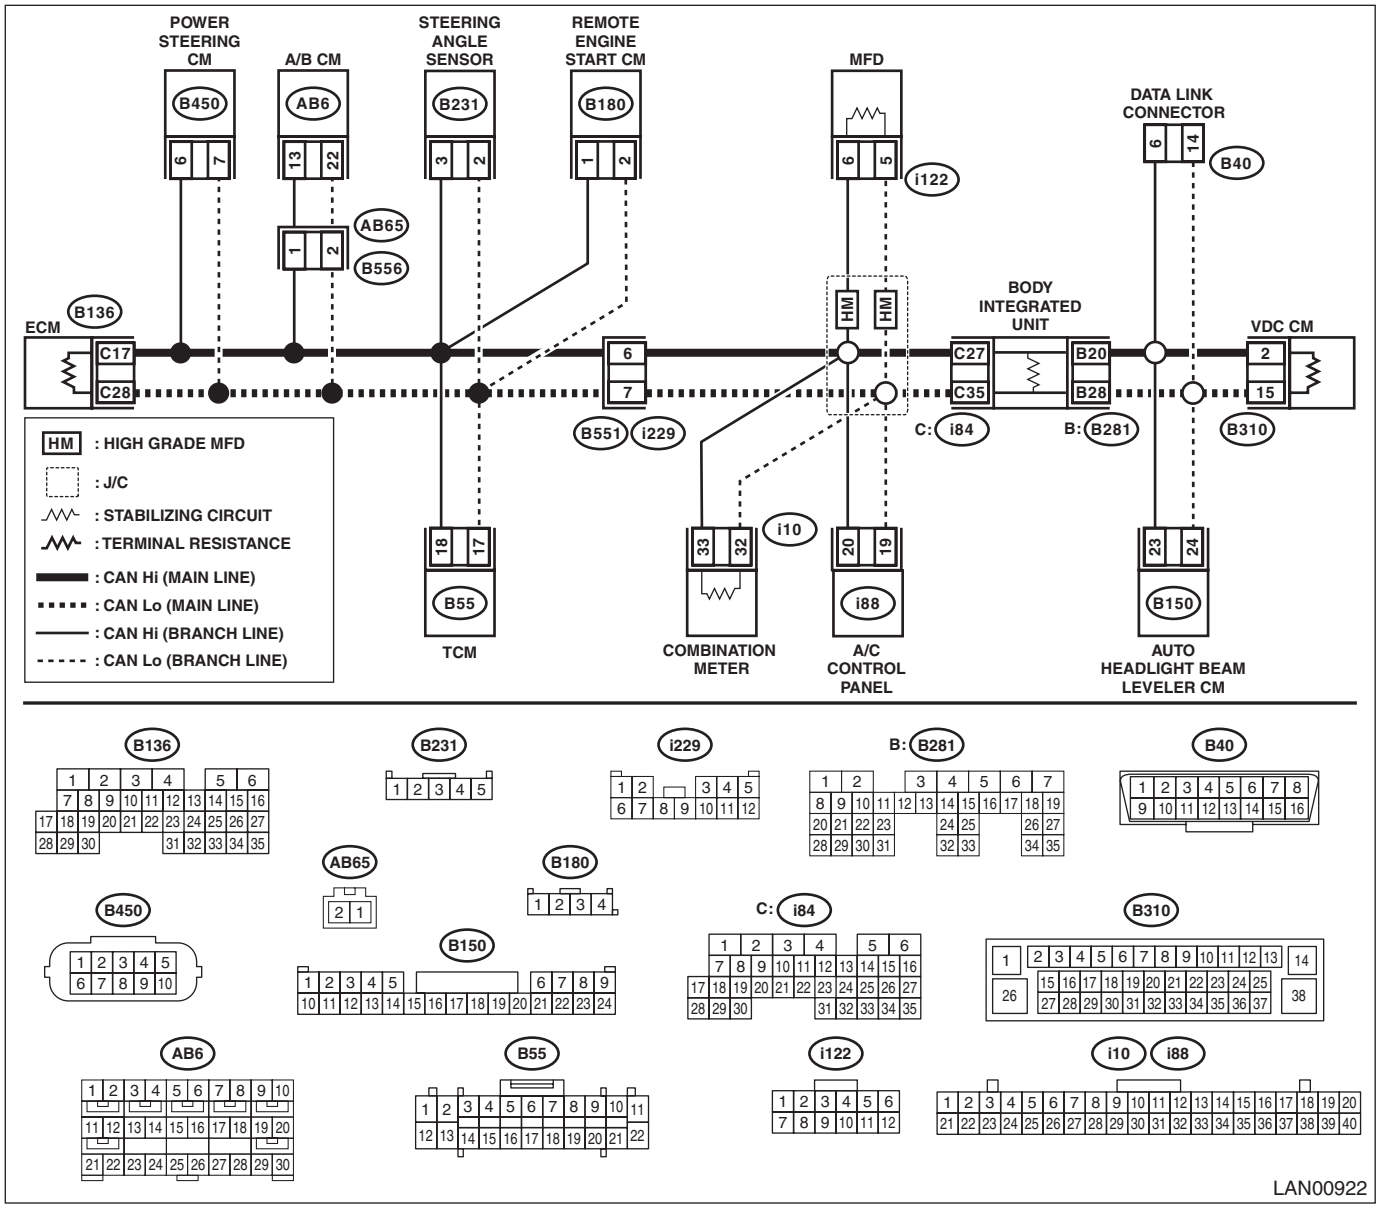
CAN communication system <Ref. to WI-46, WIRING DIAGRAM, CAN Communication System.>



| Step | | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK BETWEEN RELATED LINES AND MAIN WIRING HARNESS.**<br>1) Disconnect the headlight beam leveler CM connector.<br>2) Using the tester, measure the resistance between terminals.<br>***Connector & terminal***<br>***(B150) No. 23 — No. 24:*** | Is the resistance 400 Ω or more? | Related lines between headlight beam leveler CM and main wiring harness is open, or main wiring harness is open at two places or more. | Go to step **2**. |
| 2 | **CHECK RELATED LINES.**<br>Using the tester, measure the resistance between terminals.<br>***Connector & terminal***<br>***(B150) No. 24 — (B40) No. 14:***<br>***(B150) No. 23 — (B40) No. 6:*** | Is the resistance 10 Ω or more? | Repair or replace the open circuit portion of headlight beam leveler CM related lines. | Check DTC of headlight beam leveler system. |

## 14.RELATED LINES 53 — 61 Ω (REMOTE ENGINE STARTER)

### WIRING DIAGRAM:



| | Step | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK BETWEEN RELATED LINES AND MAIN WIRING HARNESS.**<br>1) Disconnect the remote engine start CM connector.<br>2) Using the tester, measure the resistance between terminals.<br>***Connector & terminal***<br>***(B180) No. 1 — No. 2:*** | Is the resistance 400 Ω or more? | Related lines between remote engine start CM and main wiring harness is open, or main wiring harness is open at two places or more. | Go to step **2**. |
| 2 | **CHECK RELATED LINES.**<br>Using the tester, measure the resistance between terminals.<br>***Connector & terminal***<br>***(B180) No. 1 — (B40) No. 6:***<br>***(B180) No. 2 — (B40) No. 14:*** | Is the resistance 10 Ω or more? | Repair or replace the open circuit portion of remote engine start CM related lines. | The communication harness is normal. Check the remote engine starter CM or the mobile key. |

# 10.List of Diagnostic Trouble Code (DTC)

## A: LIST

| DTC | Item | Content of diagnosis | Note |
|---|---|---|---|
| U1201 | CAN-HS Counter Abnormal | High speed CAN communication error | <Ref. to LAN(diag)-85, DTC U1201 CAN-HS COUNTER ABNORMAL, Diagnostic Procedure with Diagnostic Trouble Code (DTC).> |
| U0073 | Control Module Communication Bus “A” Off | Communication of some module is shut down. | <Ref. to LAN(diag)-87, DTC U0073 CONTROL MODULE COMMUNICATION BUS “A” OFF, Diagnostic Procedure with Diagnostic Trouble Code (DTC).> |
| U0401 | Invalid Data Received From ECM/PCM “A” | Error data is received from ECM. | <Ref. to LAN(diag)-89, DTC U0401 INVALID DATA RECEIVED FROM ECM/PCM “A”, Diagnostic Procedure with Diagnostic Trouble Code (DTC).> |
| U0402 | Invalid Data Received From TCM | Error data is received from TCM. | <Ref. to LAN(diag)-91, DTC U0402 INVALID DATA RECEIVED FROM TCM, Diagnostic Procedure with Diagnostic Trouble Code (DTC).> |
| U0416 | Invalid Data Received From Vehicle Dynamics Control Module | Error data is received from VDC module. | <Ref. to LAN(diag)-93, DTC U0416 INVALID DATA RECEIVED FROM VEHICLE DYNAMICS CONTROL MODULE, Diagnostic Procedure with Diagnostic Trouble Code (DTC).> |
| U0420 | Invalid Data Received From Power Steering Control Module | Error data is received from EPS module. | <Ref. to LAN(diag)-95, DTC U0420 INVALID DATA RECEIVED FROM POWER STEERING CONTROL MODULE, Diagnostic Procedure with Diagnostic Trouble Code (DTC).> |
| U0422 | Invalid Data Received From Body Control Module | Error data is received from body integrated unit. | <Ref. to LAN(diag)-97, DTC U0422 INVALID DATA RECEIVED FROM BODY CONTROL MODULE, Diagnostic Procedure with Diagnostic Trouble Code (DTC).> |
| U0423 | Invalid Data Received From Instrument Panel Cluster Control Module | Error data is received from meter. | <Ref. to LAN(diag)-99, DTC U0423 INVALID DATA RECEIVED FROM INSTRUMENT PANEL CLUSTER CONTROL MODULE, Diagnostic Procedure with Diagnostic Trouble Code (DTC).> |
| U0424 | Invalid Data Received From HVAC Control Module | Error data is received from A/C control panel. | <Ref. to LAN(diag)-101, DTC U0424 INVALID DATA RECEIVED FROM HVAC CONTROL MODULE, Diagnostic Procedure with Diagnostic Trouble Code (DTC).> |
| U0428 | Invalid Data Received From Steering Angle Sensor Module | Error data is received from steering angle sensor. | <Ref. to LAN(diag)-103, DTC U0428 INVALID DATA RECEIVED FROM STEERING ANGLE SENSOR MODULE, Diagnostic Procedure with Diagnostic Trouble Code (DTC).> |
| U0452 | Invalid Data Received From Restraints Control Module | Error data is received from airbag module. | <Ref. to LAN(diag)-105, DTC U0452 INVALID DATA RECEIVED FROM RESTRAINTS CONTROL MODULE, Diagnostic Procedure with Diagnostic Trouble Code (DTC).> |
| U0100 | Lost Communication With ECM/PCM “A” | Data does not arrive from ECM. | <Ref. to LAN(diag)-107, DTC U0100 LOST COMMUNICATION WITH ECM/PCM “A”, Diagnostic Procedure with Diagnostic Trouble Code (DTC).> |
| U0101 | Lost Communication With TCM | Data does not arrive from TCM. | <Ref. to LAN(diag)-109, DTC U0101 LOST COMMUNICATION WITH TCM, Diagnostic Procedure with Diagnostic Trouble Code (DTC).> |
| U0122 | Lost Communication With Vehicle Dynamics Control Module | Data does not arrive from VDC module. | <Ref. to LAN(diag)-111, DTC U0122 LOST COMMUNICATION WITH VEHICLE DYNAMICS CONTROL MODULE, Diagnostic Procedure with Diagnostic Trouble Code (DTC).> |

| DTC | Item | Content of diagnosis | Note |
|---|---|---|---|
| U0126 | Lost Communication With Steering Angle Sensor Module | Data does not arrive from steering angle sensor. | <Ref. to LAN(diag)-113, DTC U0126 LOST COMMUNICATION WITH STEERING ANGLE SENSOR MODULE, Diagnostic Procedure with Diagnostic Trouble Code (DTC).> |
| U0131 | Lost Communication With Power Steering Control Module | Data does not arrive from EPS module. | <Ref. to LAN(diag)-115, DTC U0131 LOST COMMUNICATION WITH POWER STEERING CONTROL MODULE, Diagnostic Procedure with Diagnostic Trouble Code (DTC).> |
| U0140 | Lost Communication With Body Control Module | Data does not arrive from body integrated unit. | <Ref. to LAN(diag)-117, DTC U0140 LOST COMMUNICATION WITH BODY CONTROL MODULE, Diagnostic Procedure with Diagnostic Trouble Code (DTC).> |
| U0151 | Lost Communication With Restraints Control Module | Data does not arrive from airbag module. | <Ref. to LAN(diag)-119, DTC U0151 LOST COMMUNICATION WITH RESTRAINTS CONTROL MODULE, Diagnostic Procedure with Diagnostic Trouble Code (DTC).> |
| U0155 | Lost Communication With Instrument Panel Cluster (IPC) Control Module | Data does not arrive from meter. | <Ref. to LAN(diag)-121, DTC U0155 LOST COMMUNICATION WITH INSTRUMENT PANEL CLUSTER (IPC) CONTROL MODULE, Diagnostic Procedure with Diagnostic Trouble Code (DTC).> |
| U0164 | Lost Communication With HVAC Control Module | Data does not arrive from A/C control panel. | <Ref. to LAN(diag)-123, DTC U0164 LOST COMMUNICATION WITH HVAC CONTROL MODULE, Diagnostic Procedure with Diagnostic Trouble Code (DTC).> |
| U1120 | Lost Communication With Autostart Stop Control Module | Data does not arrive from combination meter. | <Ref. to LAN(diag)-124, DTC U1120 LOST COMMUNICATION WITH AUTOSTART STOP CONTROL MODULE, Diagnostic Procedure with Diagnostic Trouble Code (DTC).> |

## 1. CHECK USING THE DTC CHECK SHEET

### DTC check sheet

| EGI | | | | — | — | — | | — | — | | — | — | — | | — | — | — | | — | — | | — | — | — |

LAN00923

(A) Installation check
(B) Bus off detection
(C) Data no-receive detection
(D) Data abnormal detection

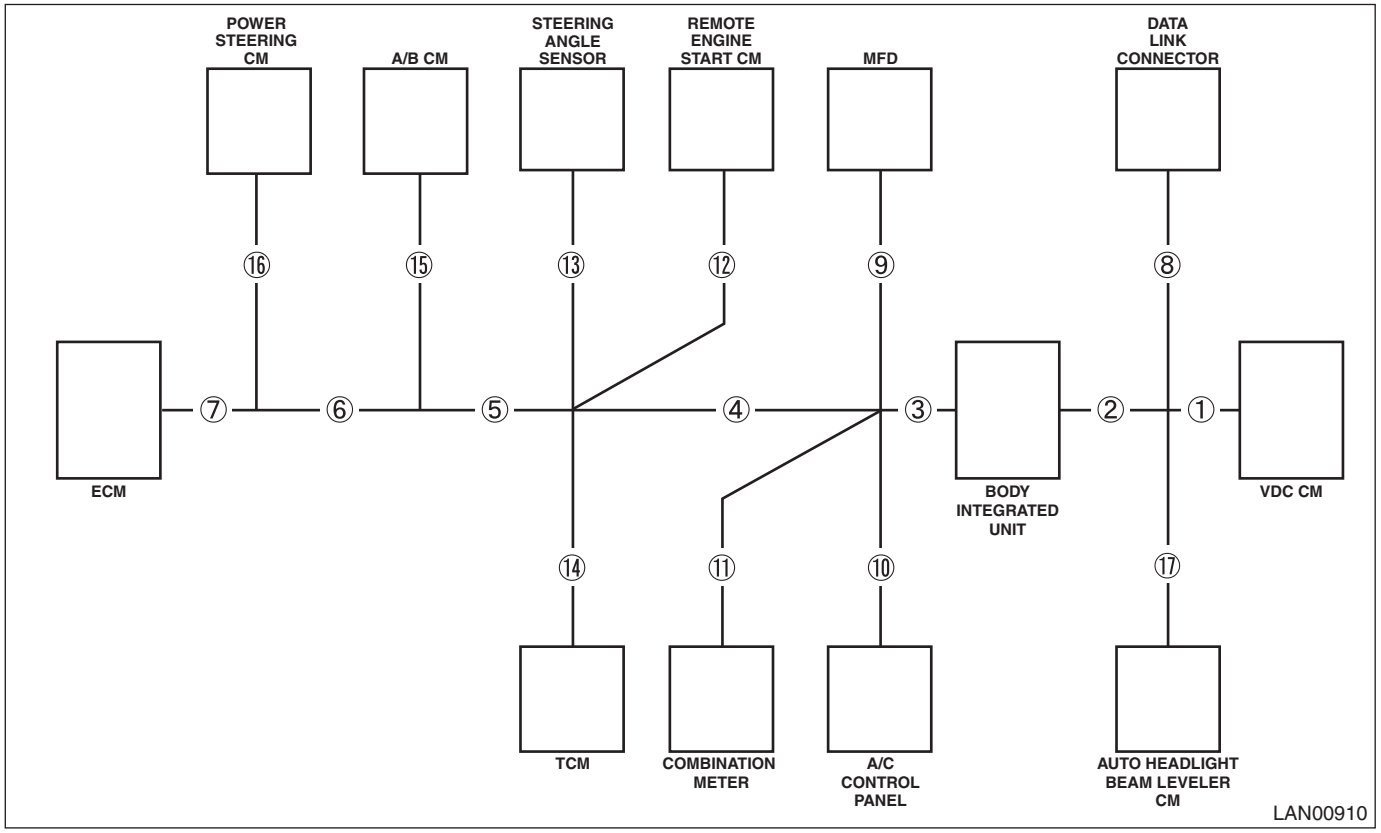
VDC: VDC CM
BIU: Body integrated unit
MFD: High grade MFD
A/C: A/C control panel
MET: Combination meter
RST: Remote engine starter CM
STR: Steering angle sensor
TCM: TCM
A/B: AB CM
EPS: Power steering CM
EGI: ECM
HL: Auto headlight beam leveler CM

1) Module installation check
   (1) Write “-” marks in the field for installation check if the vehicle to be inspected does not have relevant module.
   (2) Write “-” marks in all blank fields on the same row that the “-” mark has filled in.
2) Buss off detection / data not received

NOTE:
It becomes impossible for CAN diagnostic module to read DTC, if there is a current malfunction of open harness (data not received). If this occurs, perform the “Check using the check sheet of communication for initializing” <Ref. to LAN(diag)-11, CHECK USING THE CHECK SHEET OF COMMUNICATION FOR INITIALIZING, COMMUNICATION FOR INITIALIZING IMPOSSIBLE, Subaru Select Monitor.>, and use this sheet to confirm that the corresponding part becomes the past malfunction.
   (1) Mark “X” in the field corresponding to the DTCs that has been detected by each module in the check sheet.
   (2) Identify and repair the faulty part by referring to the example of DTC data not received and the DTC matrix. <Ref. to LAN(diag)-54, EXAMPLE OF DTC DATA NOT RECEIVED, LIST, List of Diagnostic Trouble Code (DTC).> <Ref. to LAN(diag)-60, DTC MATRIX, LIST, List of Diagnostic Trouble Code (DTC).>
3) Data abnormal detection

NOTE:
If the buss off occurs or data is not received, perform the diagnosis for these problems first.
   (1) If several modules detect the DTC for the same module, replace the detected module.
   (2) If one module detects the DTC, replace the module of the detected side.
   (3) If it does not return to the normal operation, re-install the module which has been replaced, and replace the module of the detected side.
   (4) If it does not return to the normal operation, replace both modules.

## 2. EXAMPLE OF DTC DATA NOT RECEIVED



When ④ (main wiring harness between combination meter and steering angle sensor) is open

## 3. DTC MATRIX

NOTE:
Perform the following procedure when using this chart in which the detailed trouble mode corresponds to the trouble status.
1. Search the trouble mode that corresponds to the vehicle status from the chart.
2. Perform the repair that corresponds to the trouble mode.

<table>
<tr><td colspan="2">Control module<br>(which module vicinity)</td><td rowspan="4">Trouble mode 1</td><td rowspan="4">Trouble mode 2</td><td rowspan="4">Trouble mode 3</td><td rowspan="4">Trouble mode 4</td><td rowspan="4">Trouble mode 5</td><td rowspan="4">...</td><td rowspan="4">...</td><td rowspan="4">Trouble mode n</td></tr>
<tr><td colspan="2">Detailed location<br>(which location)</td></tr>
<tr><td colspan="2">Detailed trouble mode<br>(What kind)</td></tr>
<tr><td colspan="2">Trouble status<br>(trouble exists/trouble existed)</td></tr>
<tr><td rowspan="10">DTC reading result from each module using Subaru Select Monitor</td><td>VDC CM</td><td rowspan="10">Vehicle status 1</td><td rowspan="10">Vehicle status 2</td><td rowspan="10">Vehicle status 3</td><td rowspan="10">Vehicle status 4</td><td rowspan="10">Vehicle status 5</td><td rowspan="10">...</td><td rowspan="10">...</td><td rowspan="10">Vehicle status n</td></tr>
<tr><td>Body integrated unit</td></tr>
<tr><td>Combination meter</td></tr>
<tr><td>MFD</td></tr>
<tr><td>A/C control panel</td></tr>
<tr><td>TCM</td></tr>
<tr><td>...</td></tr>
<tr><td>...</td></tr>
<tr><td>ECM</td></tr>
<tr><td colspan="2">Indicators illuminate/blink.</td></tr>
</table>

1. Hi-side circuit of CAN communication circuit is open.

NOTE:
- If the module has a limit of DTC memory and the number of DTC occurrence exceeds the limit, older DTCs are preferentially stored.
- When there is no description in Current, it is referred to as “None”.
- When DTC is in parentheses, it is referred to as “Not always occur”.
- “Trouble exists” is referred to as the status before performing inspection and repair. “Trouble existed” is referred to as the status before performing DTC clear after repair.

*1: When U0073 occurs, other U-codes are not stored. (Judge timing affects the storing order.)
*2: The number of DTC memory is limited to 8 items. (Older items are preferentially stored.)
*3: The number of DTC memory is limited to 5 items. (Older items are preferentially stored.)
*4: The number of DTC memory is limited to 2 items. (Older items are preferentially stored.)
*5: All types of DTCs can be simultaneously stored. When U0073 occurs, other U-codes are not displayed.
*6: All types of DTCs can be simultaneously stored.
*7: The number of DTC memory is limited to 1 item for Current and 3 items for Latest.
*8: If C1431 contains a current malfunction after repair, perform IGN OFF → ON. (It remains immediately after repair.)
*9: When this code is displayed, perform the diagnosis as COMMUNICATION MALFUNCTION (METER ECU) (U0155). DTC that occurs in “Current” is displayed in top of the “Latest” list.

2. Lo-side circuit of CAN communication circuit is open.

NOTE:
- If the module has a limit of DTC memory and the number of DTC occurrence exceeds the limit, older DTCs are preferentially stored.
- When there is no description in Current, it is referred to as “None”.
- When DTC is in parentheses, it is referred to as “Not always occur”.
- “Trouble exists” is referred to as the status before performing inspection and repair. “Trouble existed” is referred to as the status before performing DTC clear after repair.

*1: When U0073 occurs, other U-codes are not stored. (Judge timing affects the storing order.)
*2: The number of DTC memory is limited to 8 items. (Older items are preferentially stored.)
*3: The number of DTC memory is limited to 5 items. (Older items are preferentially stored.)
*4: The number of DTC memory is limited to 2 items. (Older items are preferentially stored.)
*5: All types of DTCs can be simultaneously stored. When U0073 occurs, other U-codes are not displayed.
*6: All types of DTCs can be simultaneously stored.
*7: The number of DTC memory is limited to 1 item for Current and 3 items for Latest.
*8: If C1431 contains a current malfunction after repair, perform IGN OFF → ON. (It remains immediately after repair.)
*9: When this code is displayed, perform the diagnosis as COMMUNICATION MALFUNCTION (METER ECU) (U0155). DTC that occurs in “Current” is displayed in top of the “Latest” list.

3. Hi/Lo-side circuit of CAN communication circuit is open.

NOTE:
- If the module has a limit of DTC memory and the number of DTC occurrence exceeds the limit, older DTCs are preferentially stored.
- When there is no description in Current, it is referred to as “None”.
- When DTC is in parentheses, it is referred to as “Not always occur”.
- “Trouble exists” is referred to as the status before performing inspection and repair. “Trouble existed” is referred to as the status before performing DTC clear after repair.

*1: When U0073 occurs, other U-codes are not stored. (Judge timing affects the storing order.)
*2: The number of DTC memory is limited to 8 items. (Older items are preferentially stored.)
*3: The number of DTC memory is limited to 5 items. (Older items are preferentially stored.)
*4: The number of DTC memory is limited to 2 items. (Older items are preferentially stored.)
*5: All types of DTCs can be simultaneously stored. When U0073 occurs, other U-codes are not displayed.
*6: All types of DTCs can be simultaneously stored.
*7: The number of DTC memory is limited to 1 item for Current and 3 items for Latest.
*8: If C1431 contains a current malfunction after repair, perform IGN OFF → ON. (It remains immediately after repair.)
*9: When this code is displayed, perform the diagnosis as COMMUNICATION MALFUNCTION (METER ECU) (U0155). DTC that occurs in “Current” is displayed in top of the “Latest” list.

4. Power supply-output short, GND-output short and short circuit in CAN communication circuit

NOTE:
- If the module has a limit of DTC memory and the number of DTC occurrence exceeds the limit, older DTCs are preferentially stored.
- When there is no description in Current, it is referred to as “None”.
- When DTC is in parentheses, it is referred to as “Not always occur”.
- “Trouble exists” is referred to as the status before performing inspection and repair. “Trouble existed” is referred to as the status before performing DTC clear after repair.

*8: If C1431 contains a current malfunction after repair, perform IGN OFF → ON. (It remains immediately after repair.)
*9: This can only be detected by inspection using a tester.
*10: In this trouble mode, a faulty portion can only be identified by inspection using a tester.

# 11.Diagnostic Procedure with Diagnostic Trouble Code (DTC)

## A: DTC U1201 CAN-HS COUNTER ABNORMAL

**DTC DETECTING CONDITION:**

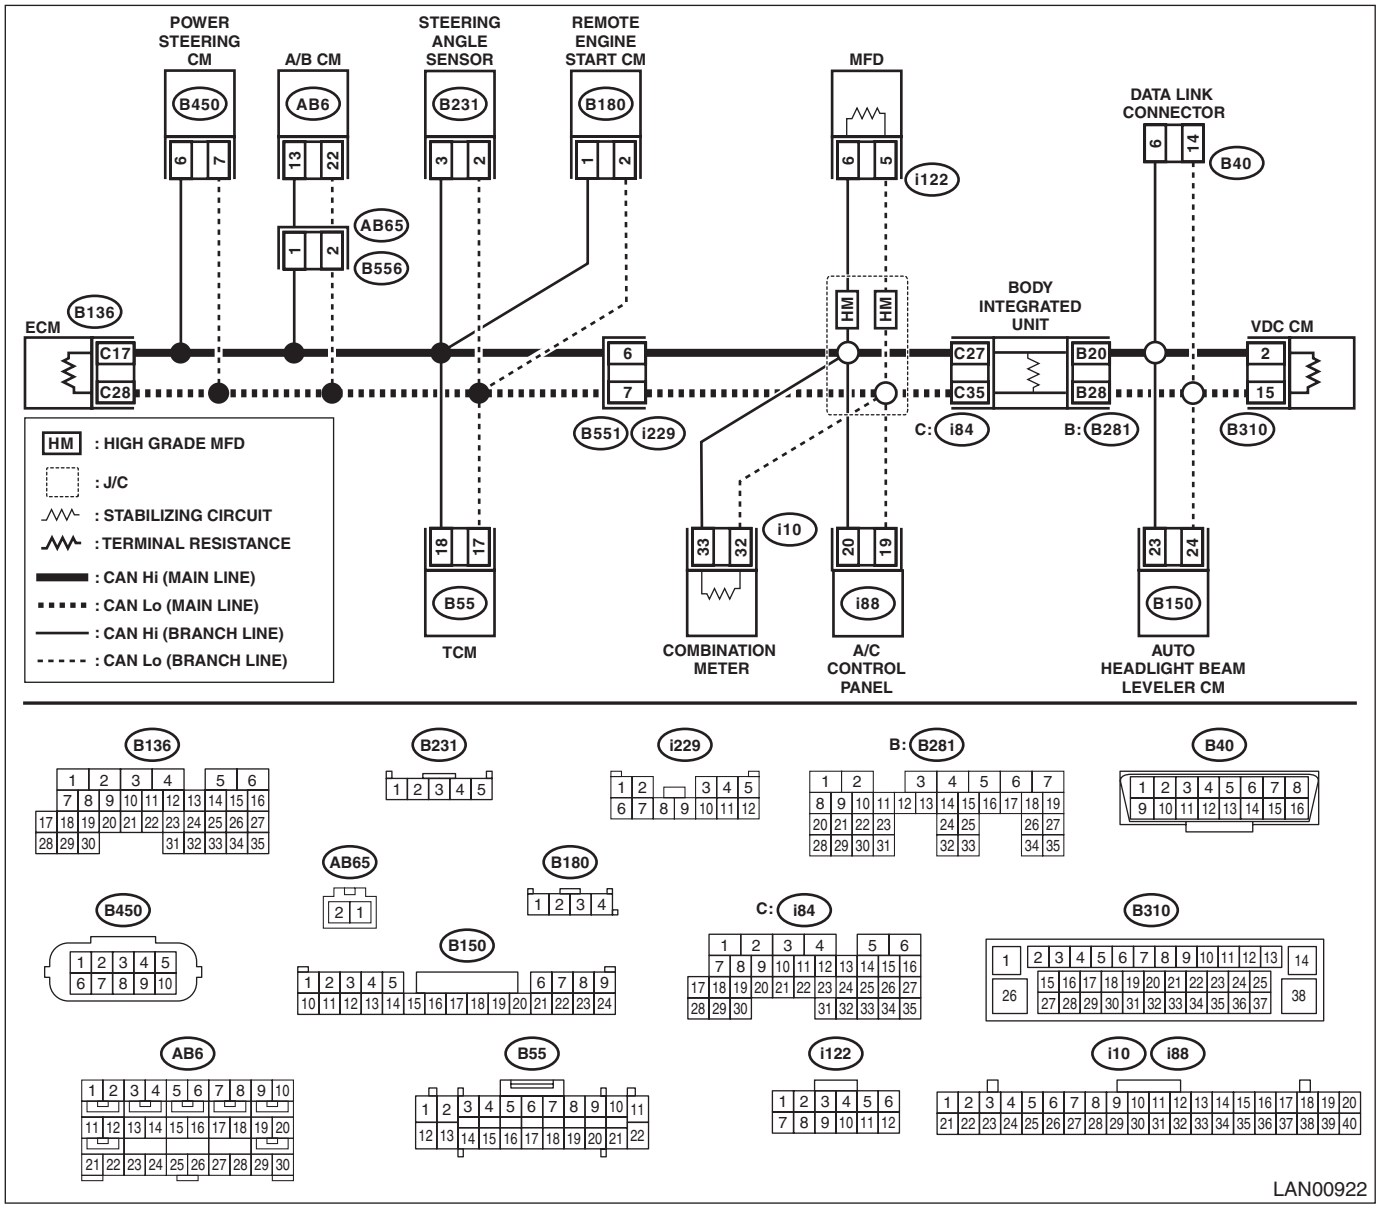
Communication is unstable because of high speed CAN communication error.

**TROUBLE SYMPTOM:**

- Display of combination meter indicates faulty.
- Control faulty may occur due to CAN communication error.

**WIRING DIAGRAM:**

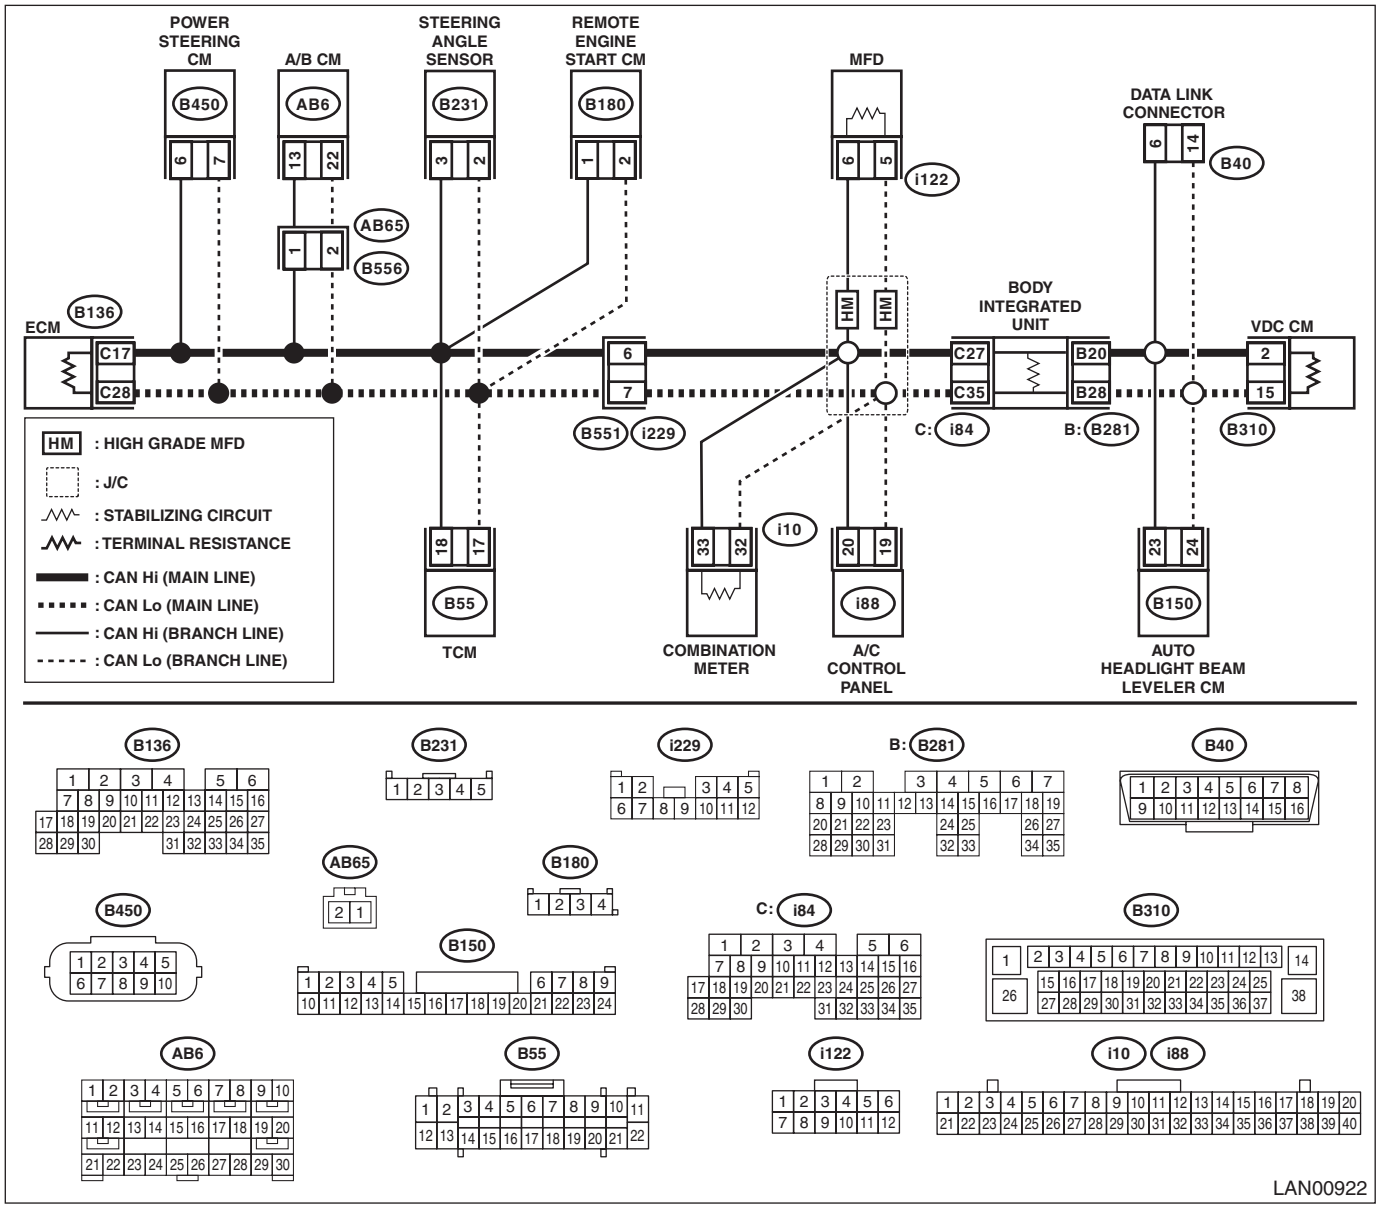
CAN communication system <Ref. to WI-46, WIRING DIAGRAM, CAN Communication System.>



| | Step | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK CAN COMMUNICATION CIRCUIT.**<br>Check CAN communication circuit. <Ref. to LAN(diag)-24, PROCEDURE, CAN Communication Circuit Check.> | Is CAN communication circuit faulty? | Repair the faulty portion, following the diagnosis procedure. | Go to step **2**. |
| 2 | **CHECK DTC.**<br>1) Start the engine.<br>2) Using the Subaru Select Monitor, read DTC of CAN system. | Is U0073 a current malfunction? | Perform the diagnosis of U0073. <Ref. to LAN(diag)-87, DTC U0073 CONTROL MODULE COMMUNICATION BUS "A" OFF, Diagnostic Procedure with Diagnostic Trouble Code (DTC).> | Go to step **3**. |
| 3 | **CHECK DTC.**<br>Check the displayed DTC. | Is U1201 a current malfunction? | Go to step **4**. | It is possible that temporary poor communication occurs. Perform the clear memory. |
| 4 | **CHECK DTC.**<br>1) Turn the ignition switch to ON.<br>2) Using the Subaru Select Monitor, read DTC of CAN system. | Is U1201 a current malfunction? | Go to step **5**. | It is possible that temporary poor communication occurs. Perform the clear memory. |
| 5 | **CHECK CONTROL MODULE.**<br>1) Turn the ignition switch to OFF.<br>2) Disconnect the control modules other than body integrated unit in order.<br>NOTE:<br>When disconnecting ECM or VDC CM, connect resistance of 120 Ω between CAN Hi and CAN Lo as an alternative of end resistance.<br>3) Turn the ignition switch to ON.<br>4) Using the Subaru Select Monitor, read DTC of CAN system. | Is there any control module that U1201 is not detected as current malfunction? | Replace the control module. | Repeat 1) to 4) in step 5 until U1201 is not detected. |

# B: DTC U0073 CONTROL MODULE COMMUNICATION BUS “A” OFF

**DTC DETECTING CONDITION:**
Integrated unit communication is shut down because of high speed CAN error.
**TROUBLE SYMPTOM:**
CAN communication is not normal.
**WIRING DIAGRAM:**
CAN communication system <Ref. to WI-46, WIRING DIAGRAM, CAN Communication System.>

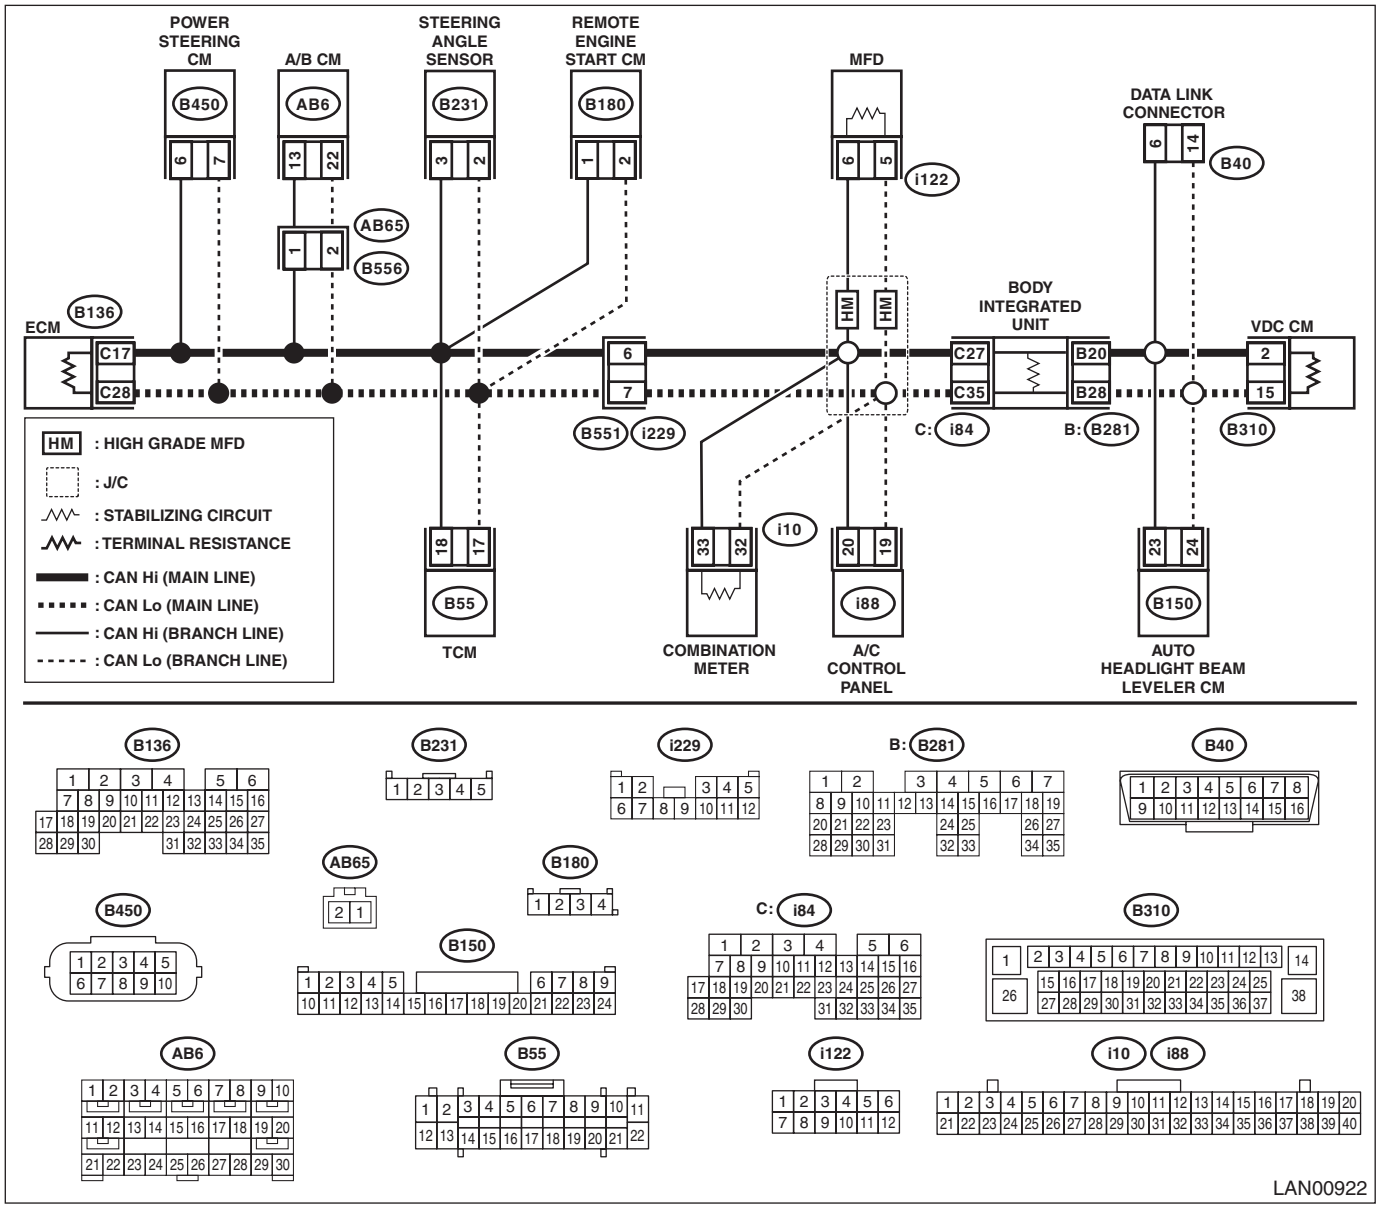


| Step | | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK DTC.**<br>1) Start the engine.<br>2) Using the Subaru Select Monitor, read DTC of CAN system. | Is U0073 a current malfunction? | Go to step **2**. | It may be a temporary poor contact. Perform the clear memory. |
| 2 | **CHECK CAN COMMUNICATION CIRCUIT.**<br>Check CAN communication circuit. <Ref. to LAN(diag)-24, PROCEDURE, CAN Communication Circuit Check.> | Is CAN communication circuit faulty? | Repair the faulty portion, following the diagnosis procedure. | Go to step **3**. |

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 3 | **CHECK DTC.**<br>1) Perform the inspection using the DTC check sheet. <Ref. to LAN(diag)-52, CHECK USING THE DTC CHECK SHEET, LIST, List of Diagnostic Trouble Code (DTC).><br>2) Using the Subaru Select Monitor, read DTC of CAN system. | Is U0073 a current malfunction? | Go to step **4**. | System is normal. |
| 4 | **CHECK CONTROL MODULE.**<br>1) Turn the ignition switch to OFF.<br>2) Disconnect the control modules other than body integrated unit in order.<br>NOTE:<br>When disconnecting ECM or VDC CM, connect resistance of 120 Ω between CAN Hi and CAN Lo as an alternative of end resistance.<br>3) Turn the ignition switch to ON.<br>4) Using the Subaru Select Monitor, read DTC of CAN system. | Is there any control module that U0073 is not detected as current malfunction? | Replace the control module. | Repeat 1) to 4) in step 3 until U0073 is not detected. |

## C: DTC U0401 INVALID DATA RECEIVED FROM ECM/PCM "A"

**DTC DETECTING CONDITION:**
Defective data from ECM.
**TROUBLE SYMPTOM:**
Defective data on CAN communication occurs.
**WIRING DIAGRAM:**
CAN communication system <Ref. to WI-46, WIRING DIAGRAM, CAN Communication System.>

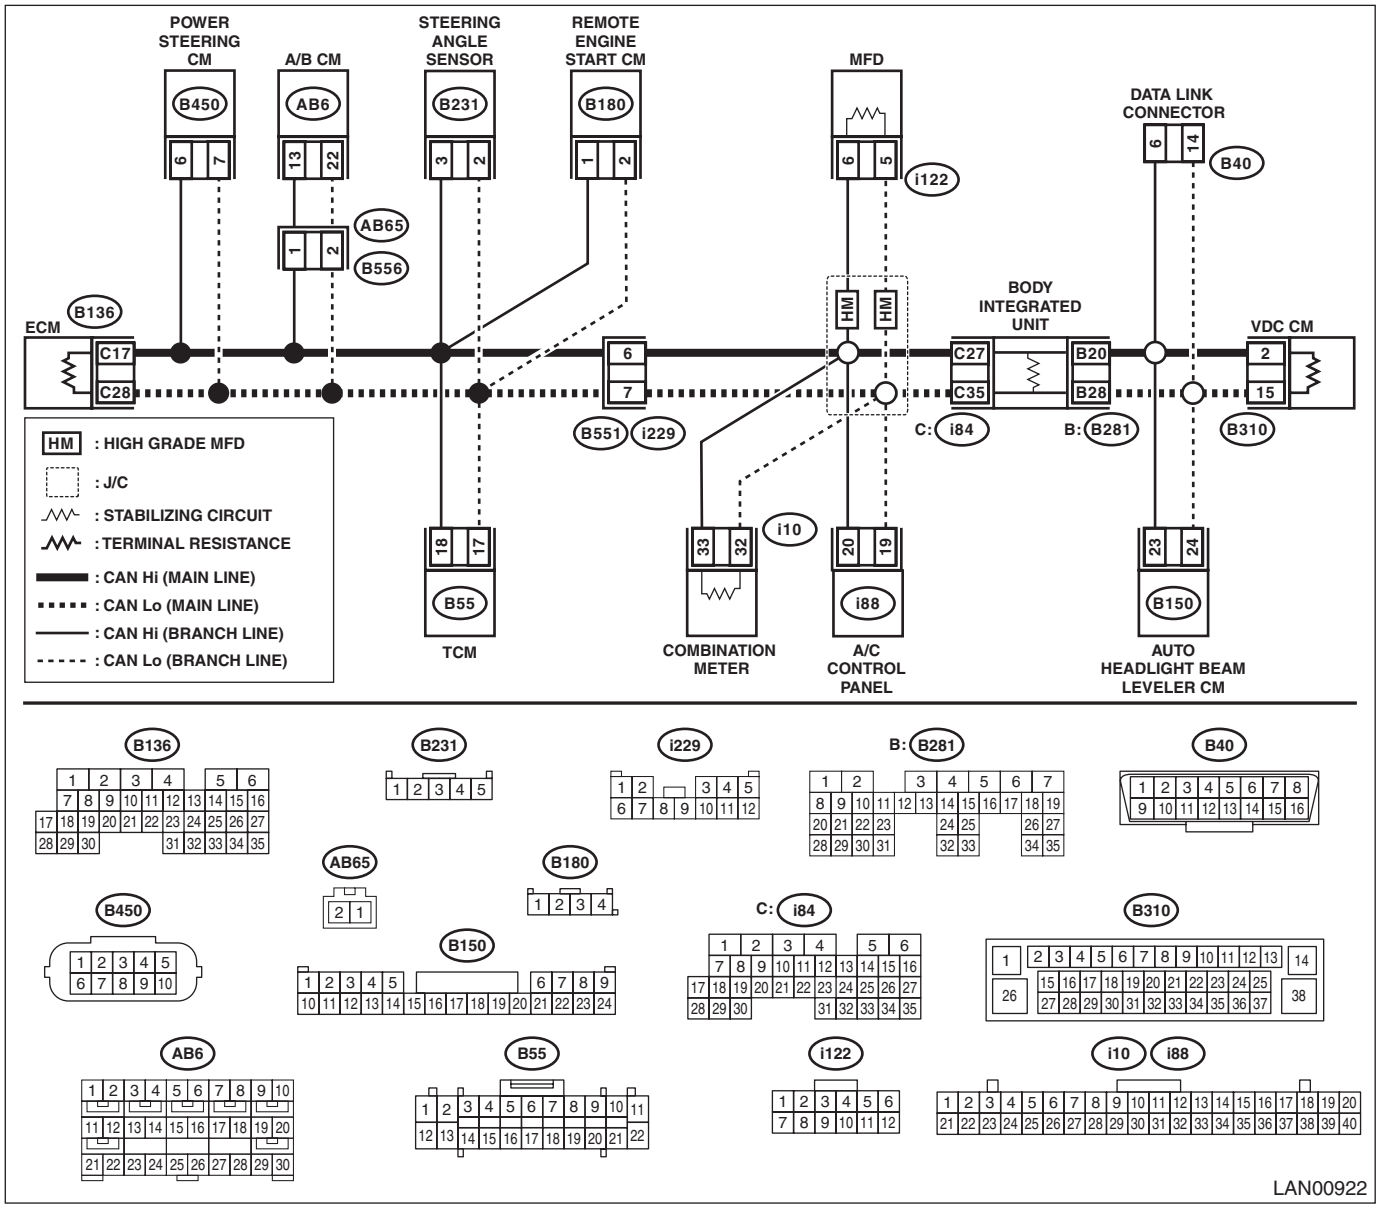


| Step | | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK DTC.**<br>Check the displayed DTC. | Are DTCs other than U*** displayed? | Perform the diagnosis according to DTC. | Go to step **2**. |
| 2 | **CHECK DTC.**<br>Check the displayed DTC. | Is DTC for the buss off or the data no-receive displayed? | Perform the diagnosis according to DTC. | Go to step **3**. |
| 3 | **CHECK DTC.**<br>Check the displayed DTC. | Is U0401 a current malfunction? | Go to step **4**. | Go to step **8**. |

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 4 | **CHECK DTC.**<br>1) Turn the ignition switch to OFF.<br>2) Disconnect the ECM connector.<br>3) Connect the disconnected connectors.<br>4) Read the DTC using Subaru Select Monitor. | Is U0401 a current malfunction? | Go to step **5**. | Go to step **8**. |
| 5 | **CHECK DTC.**<br>Using the Subaru Select Monitor, read DTC of all the systems. | Is the engine data abnormal detected in several modules? | Replace the ECM. <Ref. to FU(H4DO)-102, Engine Control Module (ECM).> | Go to step **6**. |
| 6 | **REPLACE MODULE.**<br>1) Replace the ECM.<br>2) Read the DTC using Subaru Select Monitor. | Is U0401 a current malfunction? | Go to step **7**. | System is normal. |
| 7 | **CHECK MODULE.**<br>1) Reinstall the ECM.<br>2) Replace the module that the DTC has been detected.<br>3) Read the DTC using Subaru Select Monitor. | Is U0401 a current malfunction? | Replace the ECM. <Ref. to FU(H4DO)-102, Engine Control Module (ECM).> | System is normal. |
| 8 | **CHECK HARNESS.**<br>1) Shake the harness, and check for poor contact.<br>2) Using the Subaru Select Monitor, read DTC of CAN system. | Is U0401 a current malfunction? | Repair the poor contact of harness, or replace the harness. | Go to step **9**. |
| 9 | **CHECK CONNECTOR.**<br>Check the connector used for high speed CAN for poor contact. | Is there poor contact of connector? | Repair the connector that has poor contact, or replace harness. | It is possible that temporary poor communication occurs. Delete the DTC. |

# D: DTC U0402 INVALID DATA RECEIVED FROM TCM

**DTC DETECTING CONDITION:**
Received error data from TCM.
**TROUBLE SYMPTOM:**
SPORT indicator light blinks.
**WIRING DIAGRAM:**
CAN communication system <Ref. to WI-46, WIRING DIAGRAM, CAN Communication System.>

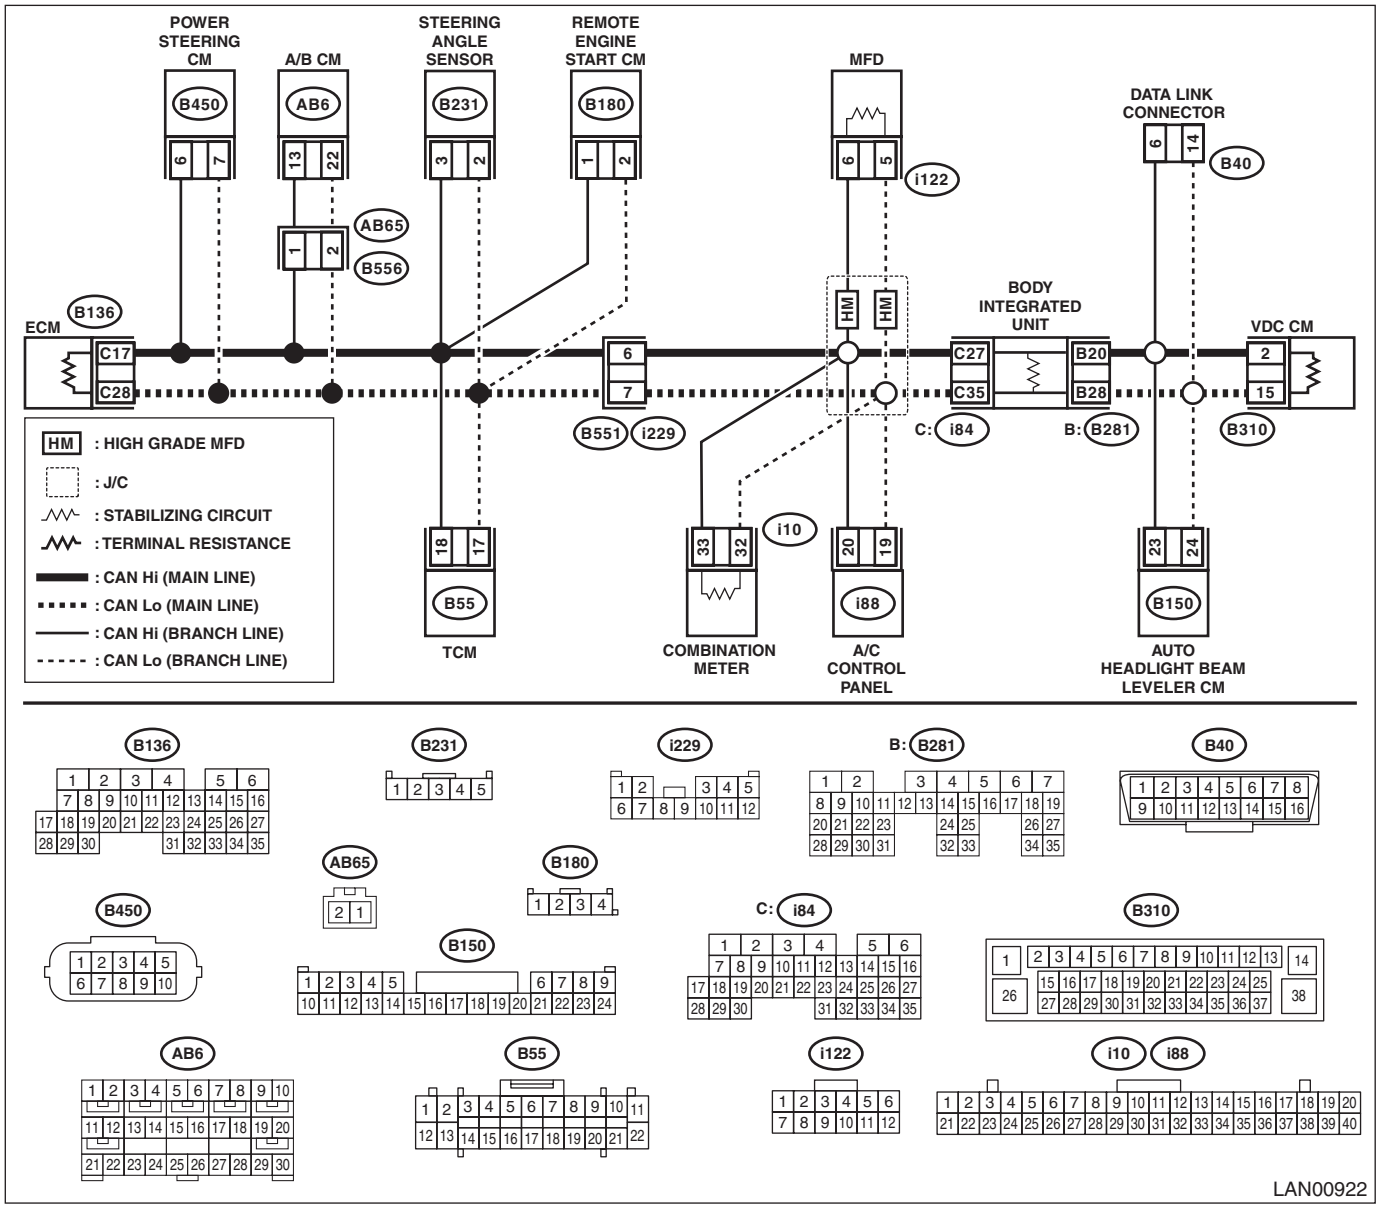


| Step | | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK DTC.**<br>Check the displayed DTC. | Are DTCs other than U*** displayed? | Perform the diagnosis according to DTC. | Go to step **2**. |
| 2 | **CHECK DTC.**<br>Check the displayed DTC. | Is DTC for the buss off or the data no-receive displayed? | Perform the diagnosis according to DTC. | Go to step **3**. |
| 3 | **CHECK DTC.**<br>Check the displayed DTC. | Is U0402 a current malfunction? | Go to step **4**. | Go to step **8**. |

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 4 | **CHECK DTC.**<br>1) Turn the ignition switch to OFF.<br>2) Disconnect the TCM connector.<br>3) Connect the disconnected connectors.<br>4) Read the DTC using Subaru Select Monitor. | Is U0402 a current malfunction? | Go to step **5**. | Go to step **8**. |
| 5 | **CHECK DTC.**<br>Using the Subaru Select Monitor, read DTC of all the systems. | Is the transmission data abnormal detected in several modules? | Replace the TCM. <Ref. to CVT-136, Transmission Control Module (TCM).> | Go to step **6**. |
| 6 | **REPLACE MODULE.**<br>1) Replace the TCM.<br>2) Read the DTC using Subaru Select Monitor. | Is U0402 a current malfunction? | Go to step **7**. | System is normal. |
| 7 | **CHECK MODULE.**<br>1) Reinstall the TCM.<br>2) Replace the module that the DTC has been detected.<br>3) Read the DTC using Subaru Select Monitor. | Is U0402 a current malfunction? | Replace the TCM. <Ref. to CVT-136, Transmission Control Module (TCM).> | System is normal. |
| 8 | **CHECK HARNESS.**<br>1) Shake the harness, and check for poor contact.<br>2) Using the Subaru Select Monitor, read DTC of CAN system. | Is U0402 a current malfunction? | Repair the poor contact of harness, or replace the harness. | Go to step **9**. |
| 9 | **CHECK CONNECTOR.**<br>Check the connector used for high speed CAN for poor contact. | Is there poor contact of connector? | Repair the connector that has poor contact, or replace harness. | It is possible that temporary poor communication occurs. Delete the DTC. |

# E: DTC U0416 INVALID DATA RECEIVED FROM VEHICLE DYNAMICS CONTROL MODULE

**DTC DETECTING CONDITION:**
Data from VDCCM is faulty.
**TROUBLE SYMPTOM:**
ABS warning light and VDC warning light illuminate.
**WIRING DIAGRAM:**
CAN communication system <Ref. to WI-46, WIRING DIAGRAM, CAN Communication System.>

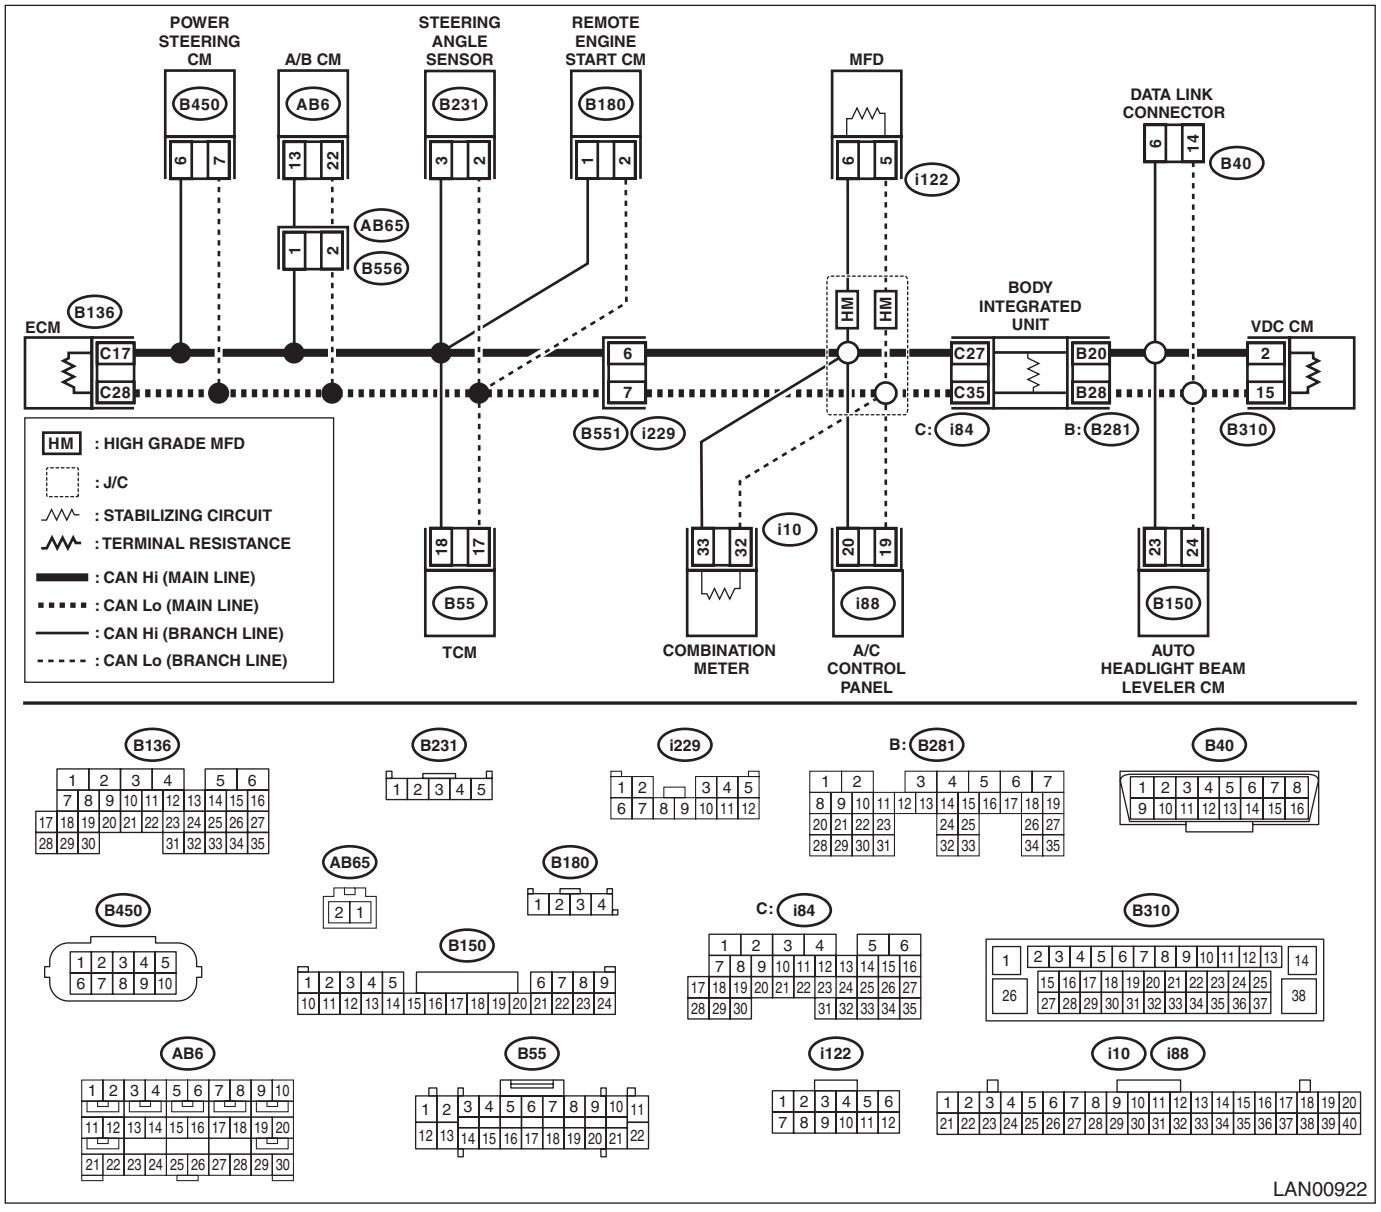


| Step | | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK DTC.**<br>Check the displayed DTC. | Are DTCs other than U*** displayed? | Perform the diagnosis according to DTC. | Go to step **2**. |
| 2 | **CHECK DTC.**<br>Check the displayed DTC. | Is DTC for the buss off or the data no-receive displayed? | Perform the diagnosis according to DTC. | Go to step **3**. |
| 3 | **CHECK DTC.**<br>Check the displayed DTC. | Is U0416 a current malfunction? | Go to step **4**. | Go to step **8**. |

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 4 | **CHECK DTC.**<br>1) Turn the ignition switch to OFF.<br>2) Disconnect the VDC CM connector.<br>3) Connect the disconnected connectors.<br>4) Read the DTC using Subaru Select Monitor. | Is U0416 a current malfunction? | Go to step **5**. | Go to step **8**. |
| 5 | **CHECK DTC.**<br>Using the Subaru Select Monitor, read DTC of all the systems. | Is the VDC data abnormal detected in several modules? | Replace the VDC CM. <Ref. to VDC-9, VDC Control Module and Hydraulic Control Unit (VDCCM&H/U).> | Go to step **6**. |
| 6 | **REPLACE MODULE.**<br>1) Replace the VDC CM.<br>2) Read the DTC using Subaru Select Monitor. | Is U0416 a current malfunction? | Go to step **7**. | System is normal. |
| 7 | **CHECK MODULE.**<br>1) Reinstall the VDC CM.<br>2) Replace the module that the DTC has been detected.<br>3) Read the DTC using Subaru Select Monitor. | Is U0416 a current malfunction? | Replace the VDC CM. <Ref. to VDC-9, VDC Control Module and Hydraulic Control Unit (VDCCM&H/U).> | System is normal. |
| 8 | **CHECK HARNESS.**<br>1) Shake the harness, and check for poor contact.<br>2) Using the Subaru Select Monitor, read DTC of CAN system. | Is U0416 a current malfunction? | Repair the poor contact of harness, or replace the harness. | Go to step **9**. |
| 9 | **CHECK CONNECTOR.**<br>Check the connector used for high speed CAN for poor contact. | Is there poor contact of connector? | Repair the connector that has poor contact, or replace harness. | It is possible that temporary poor communication occurs. Delete the DTC. |

# F: DTC U0420 INVALID DATA RECEIVED FROM POWER STEERING CONTROL MODULE

**DTC DETECTING CONDITION:**
Defective data was transmitted from EPS CM.
**TROUBLE SYMPTOM:**
Cooperation control with EPS CM does not operate properly.
**WIRING DIAGRAM:**
CAN communication system <Ref. to WI-46, WIRING DIAGRAM, CAN Communication System.>



| Step | | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK DTC.**<br>Check the displayed DTC. | Are DTCs other than U*** displayed? | Perform the diagnosis according to DTC. | Go to step **2**. |
| 2 | **CHECK DTC.**<br>Check the displayed DTC. | Is DTC for the buss off or the data no-receive displayed? | Perform the diagnosis according to DTC. | Go to step **3**. |
| 3 | **CHECK DTC.**<br>Check the displayed DTC. | Is U0420 a current malfunction? | Go to step **4**. | Go to step **8**. |

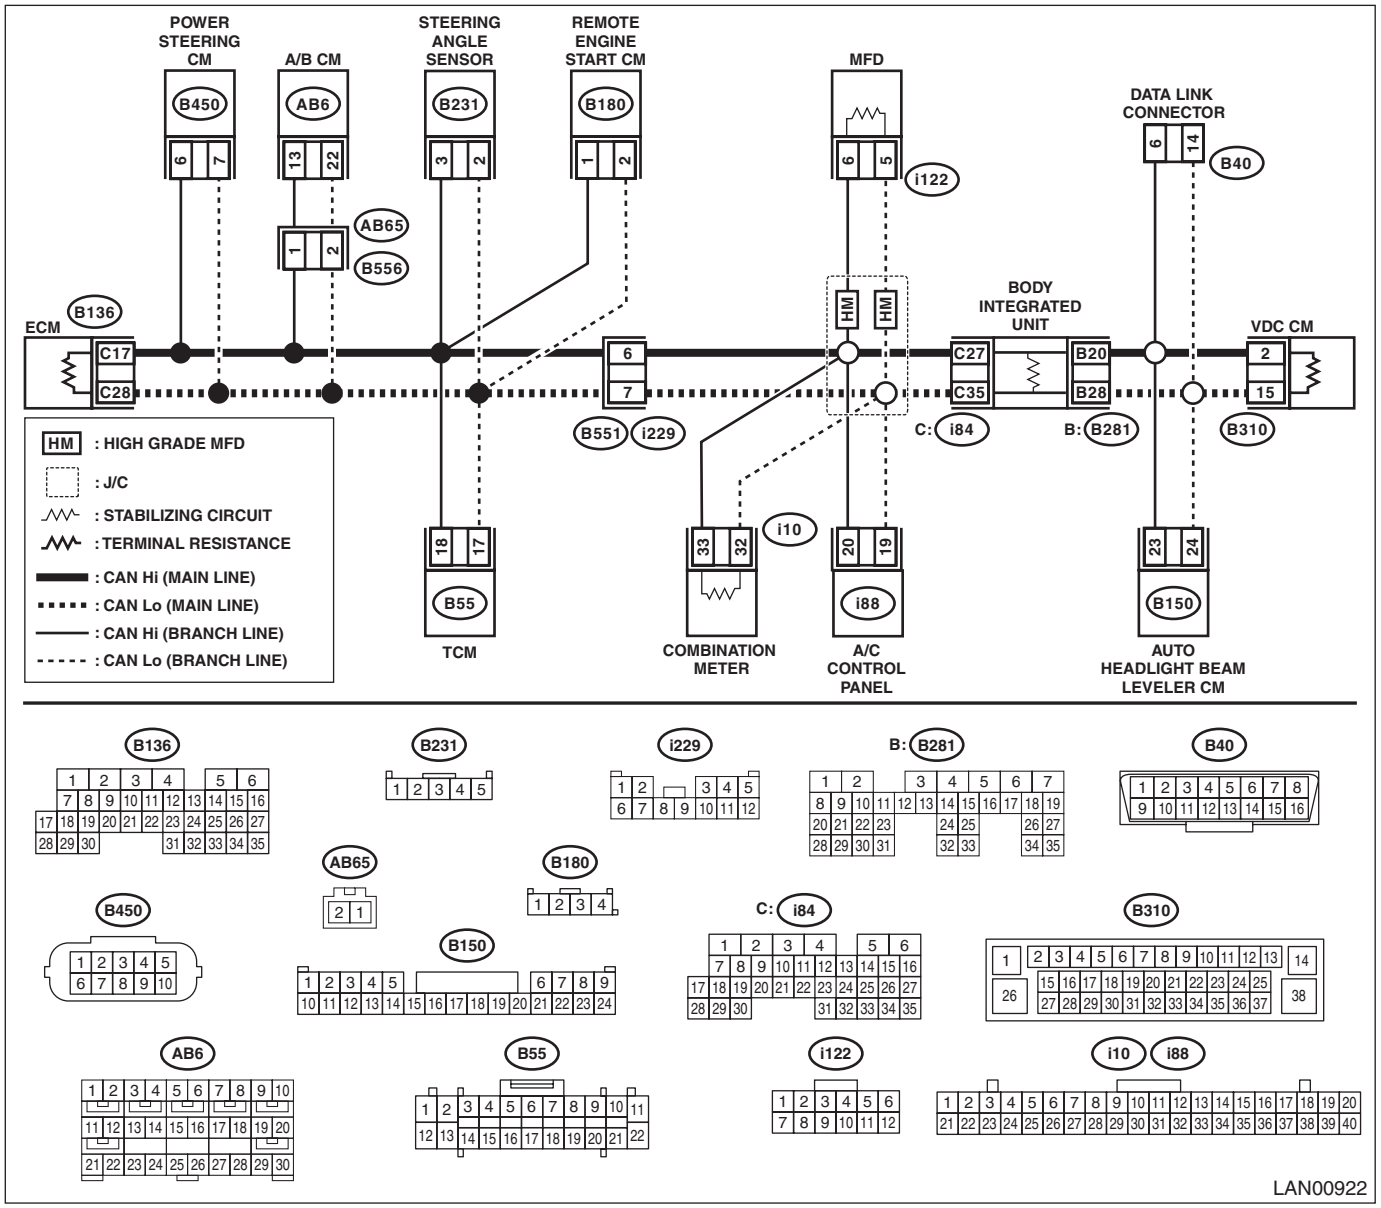
| | Step | Check | Yes | No |
|---|---|---|---|---|
| 4 | **CHECK DTC.**<br>1) Turn the ignition switch to OFF.<br>2) Disconnect the power steering CM connector.<br>3) Connect the disconnected connectors.<br>4) Read the DTC using Subaru Select Monitor. | Is U0420 a current malfunction? | Go to step **5**. | Go to step **8**. |
| 5 | **CHECK DTC.**<br>Using the Subaru Select Monitor, read DTC of all the systems. | Is the electric power steering data abnormal detected in several modules? | Replace the power steering CM. <Ref. to PS-42, Power Steering Control Module.> | Go to step **6**. |
| 6 | **REPLACE MODULE.**<br>1) Replace the power steering CM.<br>2) Read the DTC using Subaru Select Monitor. | Is U0420 a current malfunction? | Go to step **7**. | System is normal. |
| 7 | **CHECK MODULE.**<br>1) Reinstall the power steering CM.<br>2) Replace the module that the DTC has been detected.<br>3) Read the DTC using Subaru Select Monitor. | Is U0420 a current malfunction? | Replace the power steering CM. <Ref. to PS-42, Power Steering Control Module.> | System is normal. |
| 8 | **CHECK HARNESS.**<br>1) Shake the harness, and check for poor contact.<br>2) Using the Subaru Select Monitor, read DTC of CAN system. | Is U0420 a current malfunction? | Repair the poor contact of harness, or replace the harness. | Go to step **9**. |
| 9 | **CHECK CONNECTOR.**<br>Check the connector used for high speed CAN for poor contact. | Is there poor contact of connector? | Repair the connector that has poor contact, or replace harness. | It is possible that temporary poor communication occurs. Delete the DTC. |

# G: DTC U0422 INVALID DATA RECEIVED FROM BODY CONTROL MODULE

**DTC DETECTING CONDITION:**
Defective data was transmitted from body integrated unit.

**TROUBLE SYMPTOM:**
Cooperation control with body integrated unit does not operate properly.

**WIRING DIAGRAM:**
CAN communication system <Ref. to WI-46, WIRING DIAGRAM, CAN Communication System.>

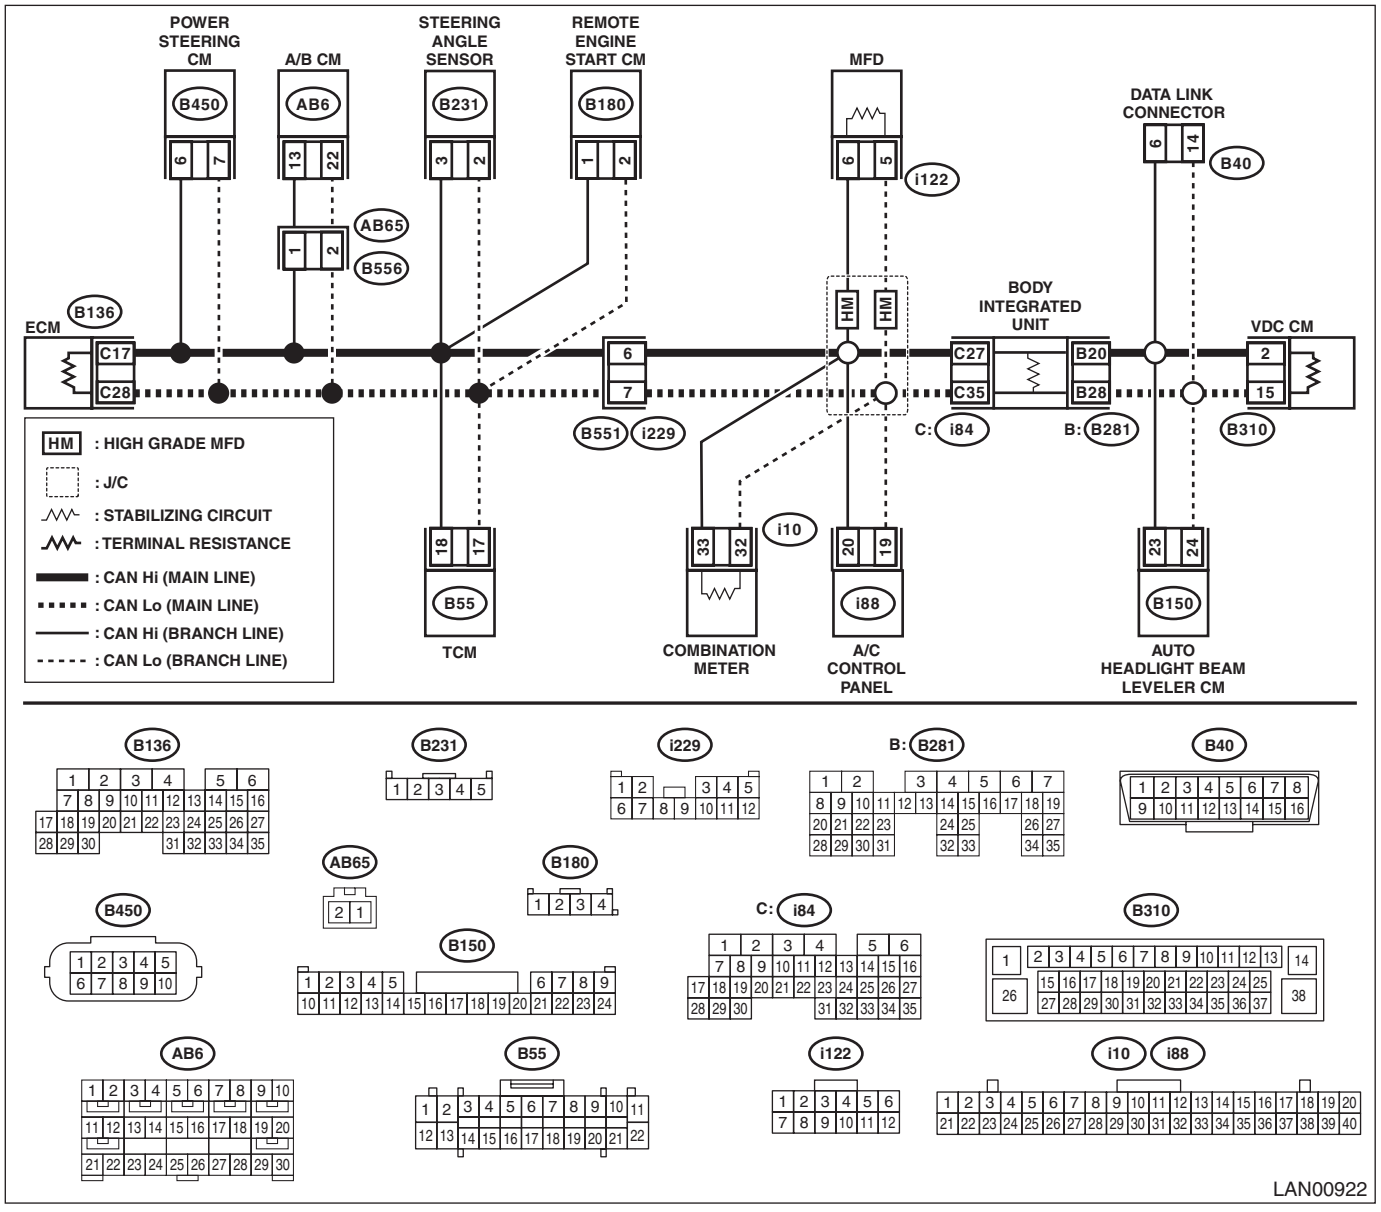


| Step | | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK DTC.**<br>Check the displayed DTC. | Are DTCs other than U*** displayed? | Perform the diagnosis according to DTC. | Go to step **2**. |
| 2 | **CHECK DTC.**<br>Check the displayed DTC. | Is DTC for the buss off or the data no-receive displayed? | Perform the diagnosis according to DTC. | Go to step **3**. |
| 3 | **CHECK DTC.**<br>Check the displayed DTC. | Is U0422 a current malfunction? | Go to step **4**. | Go to step **8**. |

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 4 | **CHECK DTC.**<br>1) Turn the ignition switch to OFF.<br>2) Disconnect the body integrated unit connector.<br>3) Connect the disconnected connectors.<br>4) Read the DTC using Subaru Select Monitor. | Is U0422 a current malfunction? | Go to step **5**. | Go to step **8**. |
| 5 | **CHECK DTC.**<br>Using the Subaru Select Monitor, read DTC of all the systems. | Is the body integrated data abnormal detected in several modules? | Replace the body integrated unit. <Ref. to SL-78, Body Integrated Unit.> | Go to step **6**. |
| 6 | **REPLACE MODULE.**<br>1) Replace the body integrated unit.<br>2) Read the DTC using Subaru Select Monitor. | Is U0422 a current malfunction? | Go to step **7**. | System is normal. |
| 7 | **CHECK MODULE.**<br>1) Reinstall the body integrated unit.<br>2) Replace the module that the DTC has been detected.<br>3) Read the DTC using Subaru Select Monitor. | Is U0422 a current malfunction? | Replace the body integrated unit. <Ref. to SL-78, Body Integrated Unit.> | System is normal. |
| 8 | **CHECK HARNESS.**<br>1) Shake the harness, and check for poor contact.<br>2) Using the Subaru Select Monitor, read DTC of CAN system. | Is U0422 a current malfunction? | Repair the poor contact of harness, or replace the harness. | Go to step **9**. |
| 9 | **CHECK CONNECTOR.**<br>Check the connector used for high speed CAN for poor contact. | Is there poor contact of connector? | Repair the connector that has poor contact, or replace harness. | It is possible that temporary poor communication occurs. Delete the DTC. |

## H: DTC U0423 INVALID DATA RECEIVED FROM INSTRUMENT PANEL CLUSTER CONTROL MODULE

**DTC DETECTING CONDITION:**
Defective data was transmitted from combination meter.
**TROUBLE SYMPTOM:**
Display of combination meter does not operate properly.
**WIRING DIAGRAM:**
CAN communication system <Ref. to WI-46, WIRING DIAGRAM, CAN Communication System.>



| Step | | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK DTC.**<br>Check the displayed DTC. | Are DTCs other than U*** displayed? | Perform the diagnosis according to DTC. | Go to step **2**. |
| 2 | **CHECK DTC.**<br>Check the displayed DTC. | Is DTC for the buss off or the data no-receive displayed? | Perform the diagnosis according to DTC. | Go to step **3**. |
| 3 | **CHECK DTC.**<br>Check the displayed DTC. | Is U0423 a current malfunction? | Go to step **4**. | Go to step **8**. |

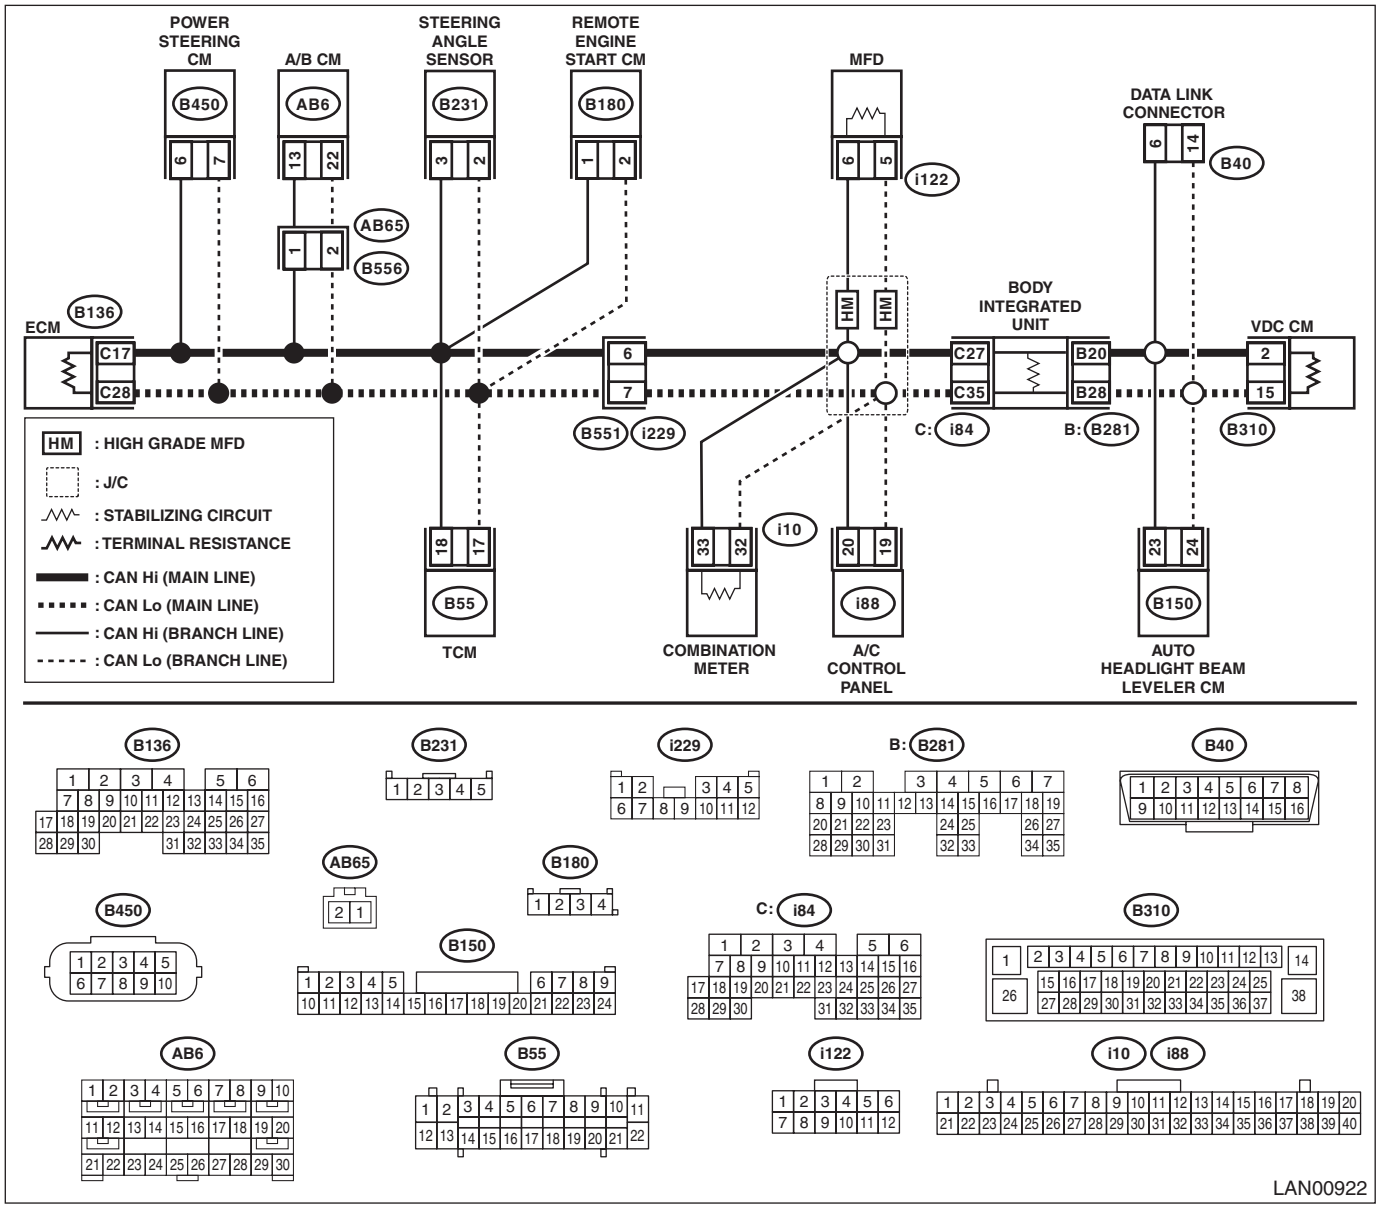
| | Step | Check | Yes | No |
|---|---|---|---|---|
| 4 | **CHECK DTC.**<br>1) Turn the ignition switch to OFF.<br>2) Disconnect the combination meter connector.<br>3) Connect the disconnected connectors.<br>4) Read the DTC using Subaru Select Monitor. | Is U0423 a current malfunction? | Go to step **5**. | Go to step **8**. |
| 5 | **CHECK DTC.**<br>Using the Subaru Select Monitor, read DTC of all the systems. | Is the meter data abnormal detected in several modules? | Replace the combination meter. <Ref. to IDI-17, Combination Meter.> | Go to step **6**. |
| 6 | **REPLACE MODULE.**<br>1) Replace the combination meter.<br>2) Read the DTC using Subaru Select Monitor. | Is U0423 a current malfunction? | Go to step **7**. | System is normal. |
| 7 | **CHECK MODULE.**<br>1) Replace the current combination meter with the original combination meter.<br>2) Replace the module that the DTC has been detected.<br>3) Read the DTC using Subaru Select Monitor. | Is U0423 a current malfunction? | Replace the combination meter. <Ref. to IDI-17, Combination Meter.> | System is normal. |
| 8 | **CHECK HARNESS.**<br>1) Shake the harness, and check for poor contact.<br>2) Using the Subaru Select Monitor, read DTC of CAN system. | Is U0423 a current malfunction? | Repair the poor contact of harness, or replace the harness. | Go to step **9**. |
| 9 | **CHECK CONNECTOR.**<br>Check the connector used for high speed CAN for poor contact. | Is there poor contact of connector? | Repair the connector that has poor contact, or replace harness. | It is possible that temporary poor communication occurs. Delete the DTC. |

# I: DTC U0424 INVALID DATA RECEIVED FROM HVAC CONTROL MODULE

**DTC DETECTING CONDITION:**
Defective data was transmitted from A/C control panel.

**TROUBLE SYMPTOM:**
Cooperation control of air conditioner does not operate properly.

**WIRING DIAGRAM:**
CAN communication system <Ref. to WI-46, WIRING DIAGRAM, CAN Communication System.>

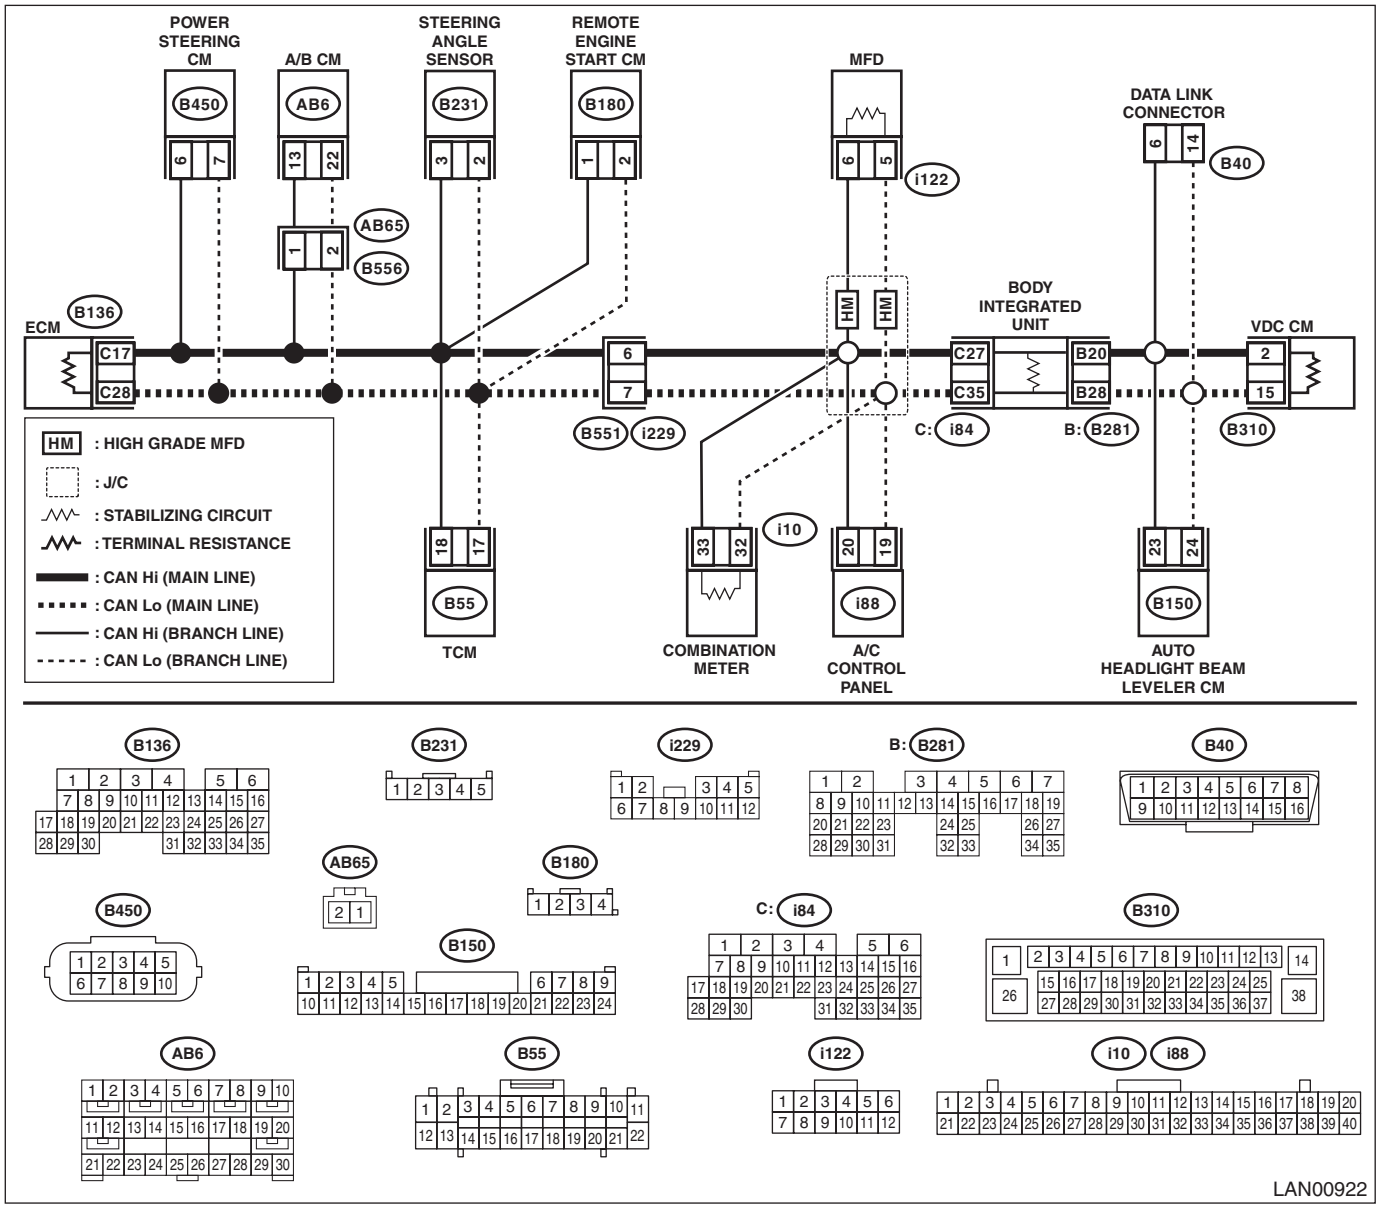


| Step | | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK DTC.**<br>Check the displayed DTC. | Are DTCs other than U*** displayed? | Perform the diagnosis according to DTC. | Go to step **2**. |
| 2 | **CHECK DTC.**<br>Check the displayed DTC. | Is DTC for the buss off or the data no-receive displayed? | Perform the diagnosis according to DTC. | Go to step **3**. |
| 3 | **CHECK DTC.**<br>Check the displayed DTC. | Is U0424 a current malfunction? | Go to step **4**. | Go to step **8**. |

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 4 | **CHECK DTC.**<br>1) Turn the ignition switch to OFF.<br>2) Disconnect the A/C control panel connector.<br>3) Connect the disconnected connectors.<br>4) Read the DTC using Subaru Select Monitor. | Is U0424 a current malfunction? | Go to step **5**. | Go to step **8**. |
| 5 | **CHECK DTC.**<br>Using the Subaru Select Monitor, read DTC of all the systems. | Is the air conditioner data abnormal detected in several modules? | Replace the A/C control panel. | Go to step **6**. |
| 6 | **REPLACE MODULE.**<br>1) Replace the A/C control panel.<br>2) Read the DTC using Subaru Select Monitor. | Is U0424 a current malfunction? | Go to step **7**. | System is normal. |
| 7 | **CHECK MODULE.**<br>1) Restore the A/C control panel.<br>2) Replace the module that the DTC has been detected.<br>3) Read the DTC using Subaru Select Monitor. | Is U0424 a current malfunction? | Replace the A/C control panel. | System is normal. |
| 8 | **CHECK HARNESS.**<br>1) Shake the harness, and check for poor contact.<br>2) Read the DTC using Subaru Select Monitor. | Is U0424 a current malfunction? | Repair the poor contact of harness, or replace the harness. | Go to step **9**. |
| 9 | **CHECK CONNECTOR.**<br>Check the connector used for high speed CAN for poor contact. | Is there poor contact of connector? | Repair the connector that has poor contact, or replace harness. | It is possible that temporary poor communication occurs. Delete the DTC. |

## J: DTC U0428 INVALID DATA RECEIVED FROM STEERING ANGLE SENSOR MODULE

**DTC DETECTING CONDITION:**
Defective data was transmitted from steering angle sensor.
**TROUBLE SYMPTOM:**
VDC CM does not operate normally.
**WIRING DIAGRAM:**
CAN communication system <Ref. to WI-46, WIRING DIAGRAM, CAN Communication System.>

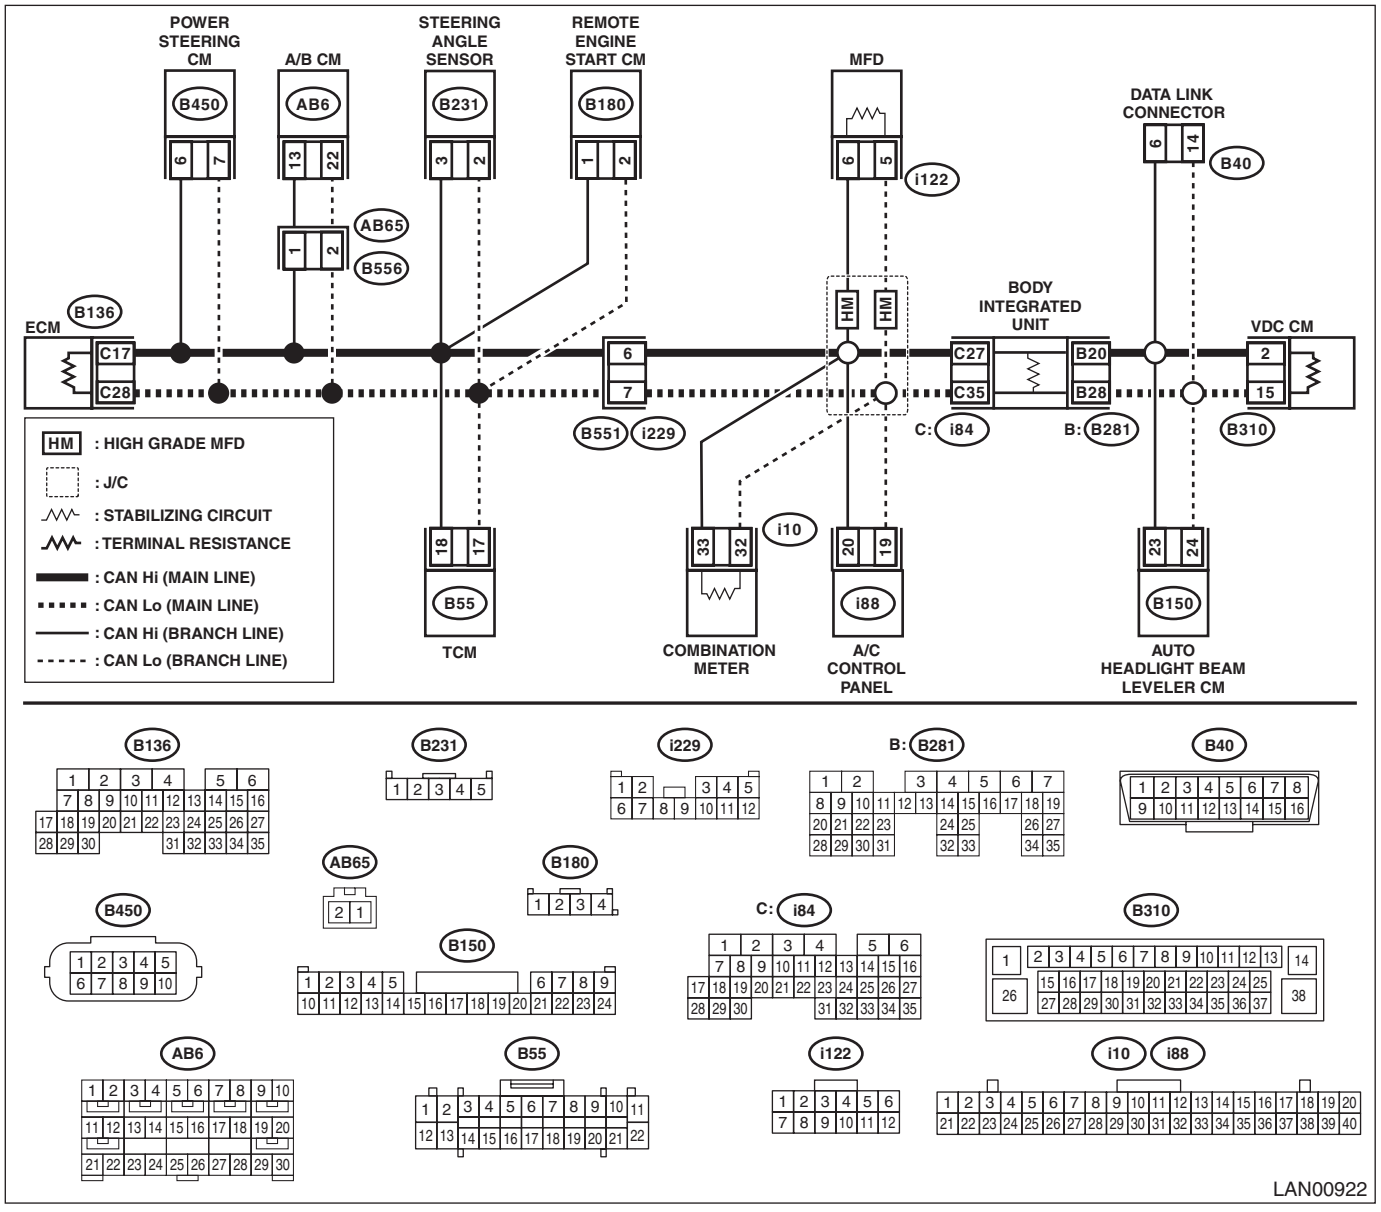


| Step | | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK DTC.**<br>Check the displayed DTC. | Are DTCs other than U*** displayed? | Perform the diagnosis according to DTC. | Go to step **2**. |
| 2 | **CHECK DTC.**<br>Check the displayed DTC. | Is DTC for the buss off or the data no-receive displayed? | Perform the diagnosis according to DTC. | Go to step **3**. |
| 3 | **CHECK DTC.**<br>Check the displayed DTC. | Is U0428 a current malfunction? | Go to step **4**. | Go to step **8**. |

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 4 | **CHECK DTC.**<br>1) Turn the ignition switch to OFF.<br>2) Disconnect the steering angle sensor connector.<br>3) Connect the disconnected connectors.<br>4) Read the DTC using Subaru Select Monitor. | Is U0428 a current malfunction? | Go to step **5**. | Go to step **8**. |
| 5 | **CHECK DTC.**<br>Using the Subaru Select Monitor, read DTC of all the systems. | Is the steering angle sensor data abnormal detected in several modules? | Replace the steering angle sensor. <Ref. to VDC-27, Steering Angle Sensor.> | Go to step **6**. |
| 6 | **REPLACE MODULE.**<br>1) Replace the steering angle sensor.<br>2) Read the DTC using Subaru Select Monitor. | Is U0428 a current malfunction? | Go to step **7**. | System is normal. |
| 7 | **CHECK MODULE.**<br>1) Reinstall the steering angle sensor.<br>2) Replace the module that the DTC has been detected.<br>3) Read the DTC using Subaru Select Monitor. | Is U0428 a current malfunction? | Replace the steering angle sensor. <Ref. to VDC-27, Steering Angle Sensor.> | System is normal. |
| 8 | **CHECK HARNESS.**<br>1) Shake the harness, and check for poor contact.<br>2) Using the Subaru Select Monitor, read DTC of CAN system. | Is U0428 a current malfunction? | Repair the poor contact of harness, or replace the harness. | Go to step **9**. |
| 9 | **CHECK CONNECTOR.**<br>Check the connector used for high speed CAN for poor contact. | Is there poor contact of connector? | Repair the connector that has poor contact, or replace harness. | It is possible that temporary poor communication occurs. Delete the DTC. |

# K: DTC U0452 INVALID DATA RECEIVED FROM RESTRAINTS CONTROL MODULE

**DTC DETECTING CONDITION:**
Defective data was transmitted from A/B CM.
**TROUBLE SYMPTOM:**
Cooperation control with airbag does not operate properly.
**WIRING DIAGRAM:**
CAN communication system <Ref. to WI-46, WIRING DIAGRAM, CAN Communication System.>

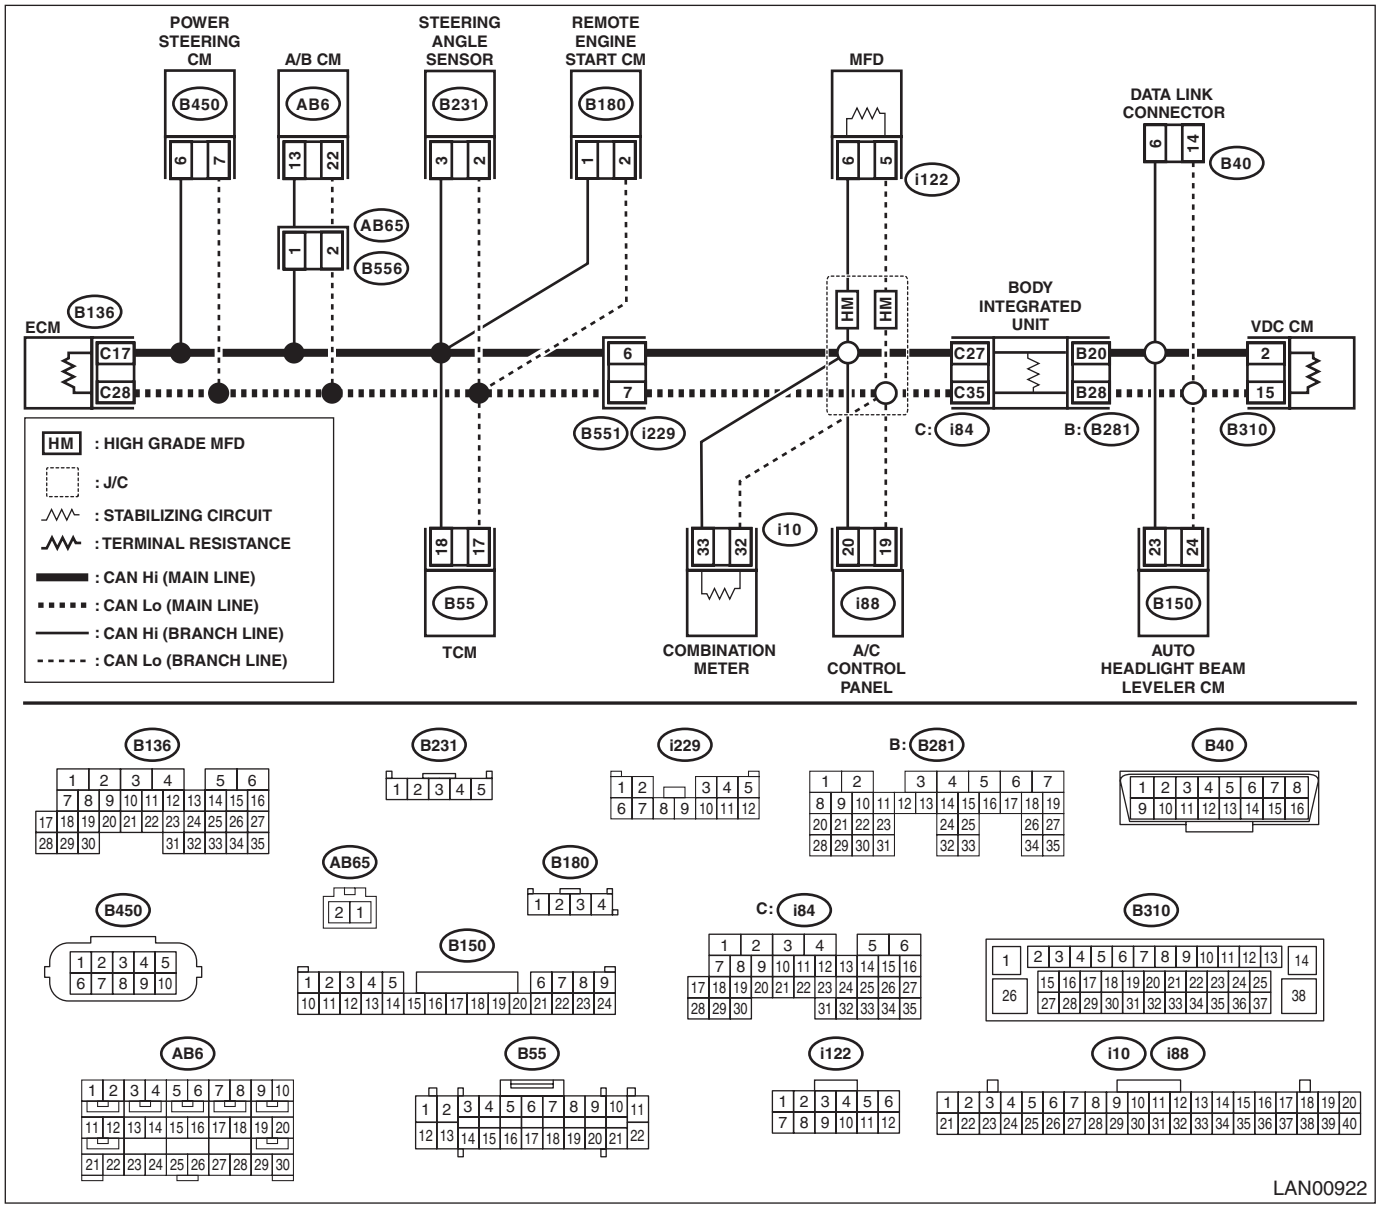


| Step | | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK DTC.**<br>Check the displayed DTC. | Are DTCs other than U*** displayed? | Perform the diagnosis according to DTC. | Go to step **2**. |
| 2 | **CHECK DTC.**<br>Check the displayed DTC. | Is DTC for the buss off or the data no-receive displayed? | Perform the diagnosis according to DTC. | Go to step **3**. |
| 3 | **CHECK DTC.**<br>Check the displayed DTC. | Is U0452 a current malfunction? | Go to step **4**. | Go to step **8**. |

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 4 | **CHECK DTC.**<br>1) Turn the ignition switch to OFF.<br>2) Disconnect the A/B CM connector.<br>3) Connect the disconnected connectors.<br>4) Read the DTC using Subaru Select Monitor. | Is U0452 a current malfunction? | Go to step **5**. | Go to step **8**. |
| 5 | **CHECK DTC.**<br>Using the Subaru Select Monitor, read DTC of all the systems. | Is the airbag data abnormal detected in several modules? | Replace the A/B CM. <Ref. to AB-77, Airbag Control Module.> | Go to step **6**. |
| 6 | **REPLACE MODULE.**<br>1) Replace the A/B CM.<br>2) Read the DTC using Subaru Select Monitor. | Is U0452 a current malfunction? | Go to step **7**. | System is normal. |
| 7 | **CHECK MODULE.**<br>1) Reinstall the A/B CM.<br>2) Replace the module that the DTC has been detected.<br>3) Read the DTC using Subaru Select Monitor. | Is U0452 a current malfunction? | Replace the A/B CM. <Ref. to AB-77, Airbag Control Module.> | System is normal. |
| 8 | **CHECK HARNESS.**<br>1) Shake the harness, and check for poor contact.<br>2) Using the Subaru Select Monitor, read DTC of CAN system. | Is U0452 a current malfunction? | Repair the poor contact of harness, or replace the harness. | Go to step **9**. |
| 9 | **CHECK CONNECTOR.**<br>Check the connector used for high speed CAN for poor contact. | Is there poor contact of connector? | Repair the connector that has poor contact, or replace harness. | It is possible that temporary poor communication occurs. Delete the DTC. |

# L: DTC U0100 LOST COMMUNICATION WITH ECM/PCM "A"

**DTC DETECTING CONDITION:**
Not received data from ECM.
**TROUBLE SYMPTOM:**
Cooperation control of transmission may not operate properly.
**WIRING DIAGRAM:**
CAN communication system <Ref. to WI-46, WIRING DIAGRAM, CAN Communication System.>

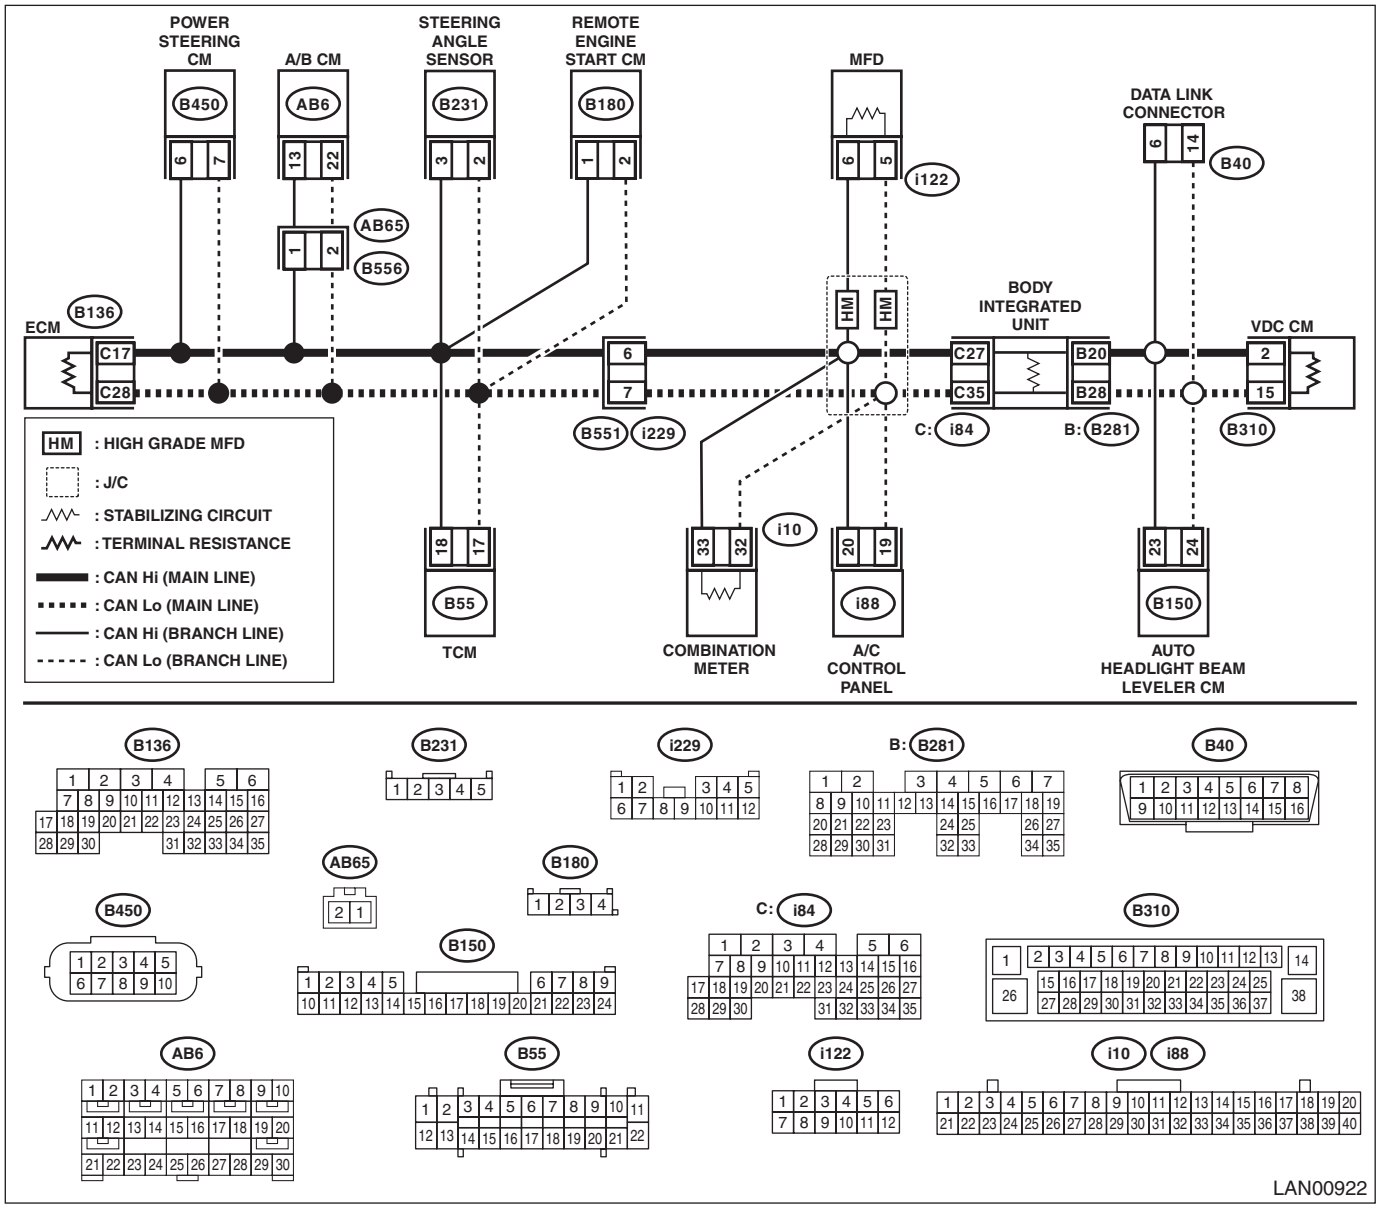


| Step | | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK DTC.**<br>Check the displayed DTC. | Are DTCs other than U*** displayed? | Perform the diagnosis according to DTC. | Go to step **2**. |
| 2 | **CHECK DTC.**<br>Check the displayed DTC. | Is U0100 a current malfunction? | Go to step **3**. | Go to step **7**. |
| 3 | **CHECK DTC.**<br>1) Check CAN communication circuit. <Ref. to LAN(diag)-24, CAN Communication Circuit Check.><br>2) Read the DTC using Subaru Select Monitor. | Is U0100 a current malfunction? | Go to step **4**. | Go to step **7**. |

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 4 | **CHECK DTC.**<br>Using the Subaru Select Monitor, read DTC of all the systems. | Is the engine data no-receive detected in several modules? | Replace the ECM. <Ref. to FU(H4DO)-102, Engine Control Module (ECM).> | Go to step **5**. |
| 5 | **REPLACE MODULE.**<br>1) Replace the ECM.<br>2) Read the DTC using Subaru Select Monitor. | Is U0100 a current malfunction? | Go to step **6**. | System is normal. |
| 6 | **CHECK MODULE.**<br>1) Reinstall the ECM.<br>2) Replace the module that the DTC has been detected.<br>3) Read the DTC using Subaru Select Monitor. | Is U0100 a current malfunction? | Replace the ECM. <Ref. to FU(H4DO)-102, Engine Control Module (ECM).> | System is normal. |
| 7 | **CHECK HARNESS.**<br>1) Shake the harness, and check for poor contact.<br>2) Read the DTC using Subaru Select Monitor. | Is U0100 a current malfunction? | Repair the poor contact of harness, or replace the harness. | Go to step **8**. |
| 8 | **CHECK CONNECTOR.**<br>Check the connector used for high speed CAN for poor contact. | Is there poor contact of connector? | Repair the connector that has poor contact, or replace harness. | It is possible that temporary poor communication occurs. Delete the DTC. |

# M: DTC U0101 LOST COMMUNICATION WITH TCM

**DTC DETECTING CONDITION:**
Not received data from TCM.
**TROUBLE SYMPTOM:**
Cooperation control with transmission is not performed.
**WIRING DIAGRAM:**
CAN communication system <Ref. to WI-46, WIRING DIAGRAM, CAN Communication System.>

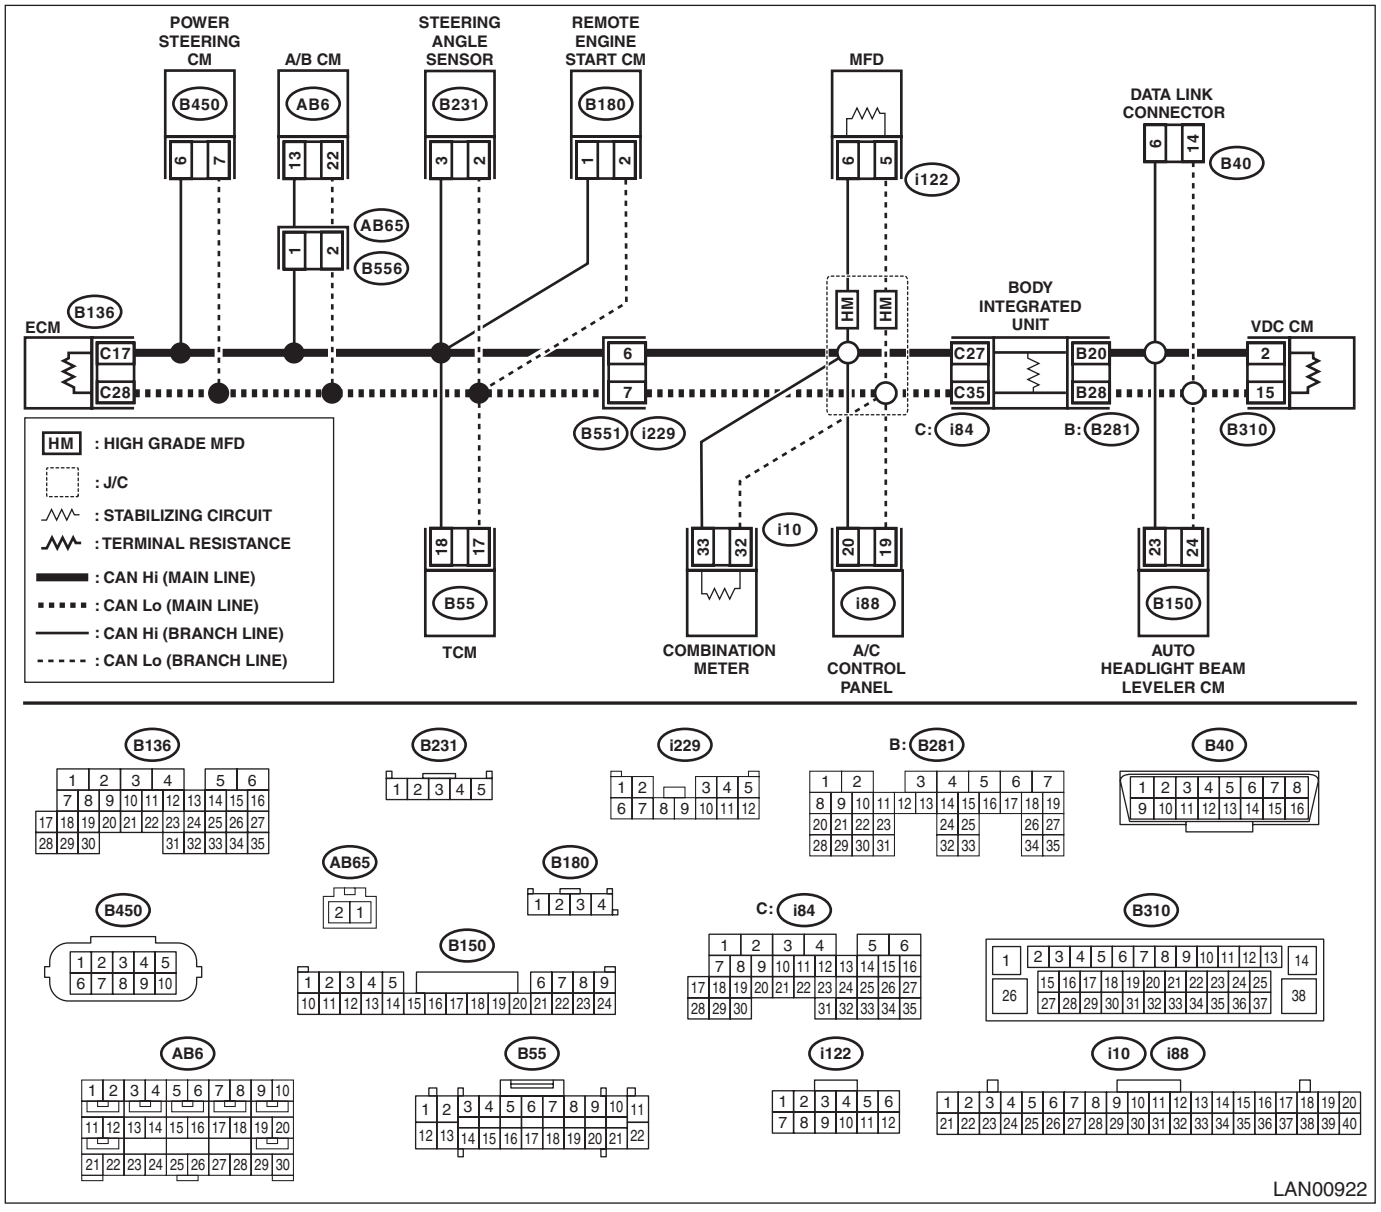


| Step | | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK DTC.**<br>Check the displayed DTC. | Are DTCs other than U*** displayed? | Perform the diagnosis according to DTC. | Go to step **2**. |
| 2 | **CHECK DTC.**<br>Check the displayed DTC. | Is U0101 a current malfunction? | Go to step **3**. | Go to step **7**. |
| 3 | **CHECK DTC.**<br>1) Check CAN communication circuit. <Ref. to LAN(diag)-24, CAN Communication Circuit Check.><br>2) Read the DTC using Subaru Select Monitor. | Is U0101 a current malfunction? | Go to step **4**. | Go to step **7**. |

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 4 | **CHECK DTC.**<br>Using the Subaru Select Monitor, read DTC of all the systems. | Is the transmission data no-receive detected in several modules? | Replace the TCM. <Ref. to CVT-136, Transmission Control Module (TCM).> | Go to step **5**. |
| 5 | **REPLACE MODULE.**<br>1) Replace the TCM.<br>2) Read the DTC using Subaru Select Monitor. | Is U0101 a current malfunction? | Go to step **6**. | System is normal. |
| 6 | **CHECK MODULE.**<br>1) Reinstall the TCM.<br>2) Replace the module that the DTC has been detected.<br>3) Read the DTC using Subaru Select Monitor. | Is U0101 a current malfunction? | Replace the TCM. <Ref. to CVT-136, Transmission Control Module (TCM).> | System is normal. |
| 7 | **CHECK HARNESS.**<br>1) Shake the harness, and check for poor contact.<br>2) Read the DTC using Subaru Select Monitor. | Is U0101 a current malfunction? | Repair the poor contact of harness, or replace the harness. | Go to step **8**. |
| 8 | **CHECK CONNECTOR.**<br>Check the connector used for high speed CAN for poor contact. | Is there poor contact of connector? | Repair the connector that has poor contact, or replace harness. | It is possible that temporary poor communication occurs. Delete the DTC. |

# N: DTC U0122 LOST COMMUNICATION WITH VEHICLE DYNAMICS CONTROL MODULE

**DTC DETECTING CONDITION:**
No data from VDCCM is received.
**TROUBLE SYMPTOM:**
ABS warning light and VDC warning light illuminate.
**WIRING DIAGRAM:**
CAN communication system <Ref. to WI-46, WIRING DIAGRAM, CAN Communication System.>

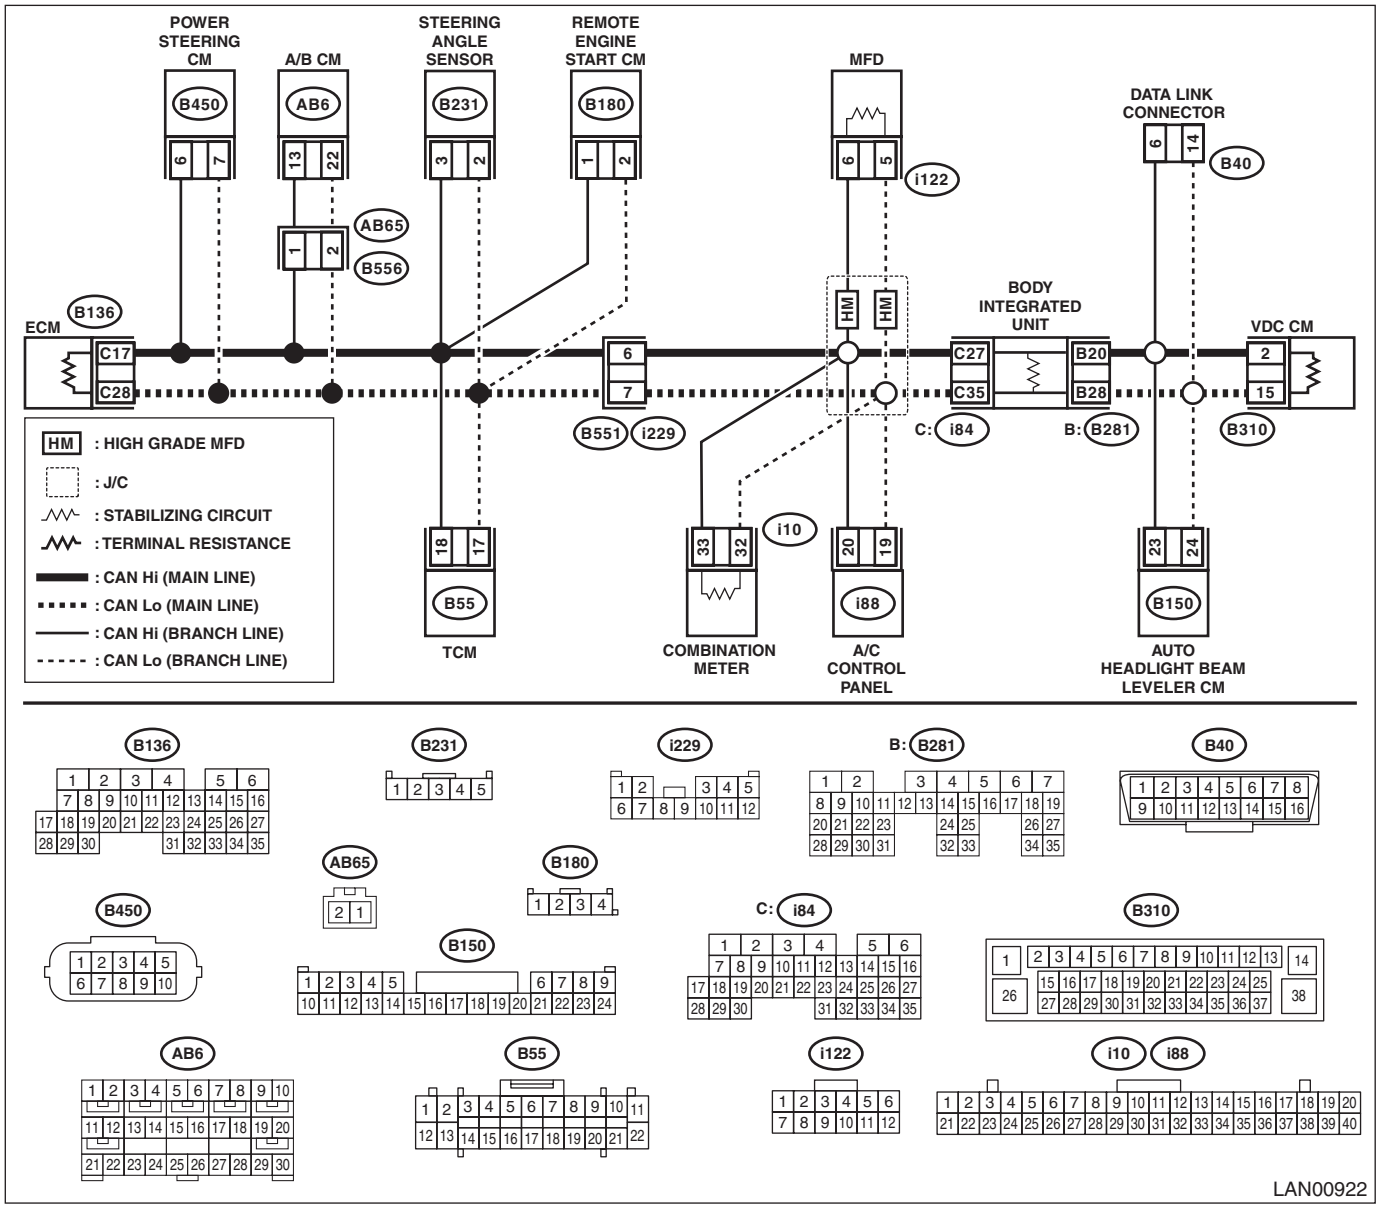


| Step | | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK DTC.**<br>Check the displayed DTC. | Are DTCs other than U*** displayed? | Perform the diagnosis according to DTC. | Go to step **2**. |
| 2 | **CHECK DTC.**<br>Check the displayed DTC. | Is U0122 a current malfunction? | Go to step **3**. | Go to step **7**. |

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 3 | **CHECK DTC.**<br>1) Check CAN communication circuit. <Ref. to LAN(diag)-24, CAN Communication Circuit Check.><br>2) Read the DTC using Subaru Select Monitor. | Is U0122 a current malfunction? | Go to step **4**. | Go to step **7**. |
| 4 | **CHECK DTC.**<br>Using the Subaru Select Monitor, read DTC of all the systems. | Is the VDC data no-receive detected in several modules? | Replace the VDC CM. <Ref. to VDC-9, VDC Control Module and Hydraulic Control Unit (VDCCM&H/U).> | Go to step **5**. |
| 5 | **REPLACE MODULE.**<br>1) Replace the VDC CM.<br>2) Read the DTC using Subaru Select Monitor. | Is U0122 a current malfunction? | Go to step **6**. | System is normal. |
| 6 | **CHECK MODULE.**<br>1) Reinstall the VDC CM.<br>2) Replace the module that the DTC has been detected.<br>3) Read the DTC using Subaru Select Monitor. | Is U0122 a current malfunction? | Replace the VDC CM. <Ref. to VDC-9, VDC Control Module and Hydraulic Control Unit (VDCCM&H/U).> | System is normal. |
| 7 | **CHECK HARNESS.**<br>1) Shake the harness, and check for poor contact.<br>2) Read the DTC using Subaru Select Monitor. | Is U0122 a current malfunction? | Repair the poor contact of harness, or replace the harness. | Go to step **8**. |
| 8 | **CHECK CONNECTOR.**<br>Check the connector used for high speed CAN for poor contact. | Is there poor contact of connector? | Repair the connector that has poor contact, or replace harness. | It is possible that temporary poor communication occurs. Delete the DTC. |

# O: DTC U0126 LOST COMMUNICATION WITH STEERING ANGLE SENSOR MODULE

**DTC DETECTING CONDITION:**
No data is received from steering angle sensor.
**TROUBLE SYMPTOM:**
VDC CM does not operate normally.
**WIRING DIAGRAM:**
CAN communication system <Ref. to WI-46, WIRING DIAGRAM, CAN Communication System.>

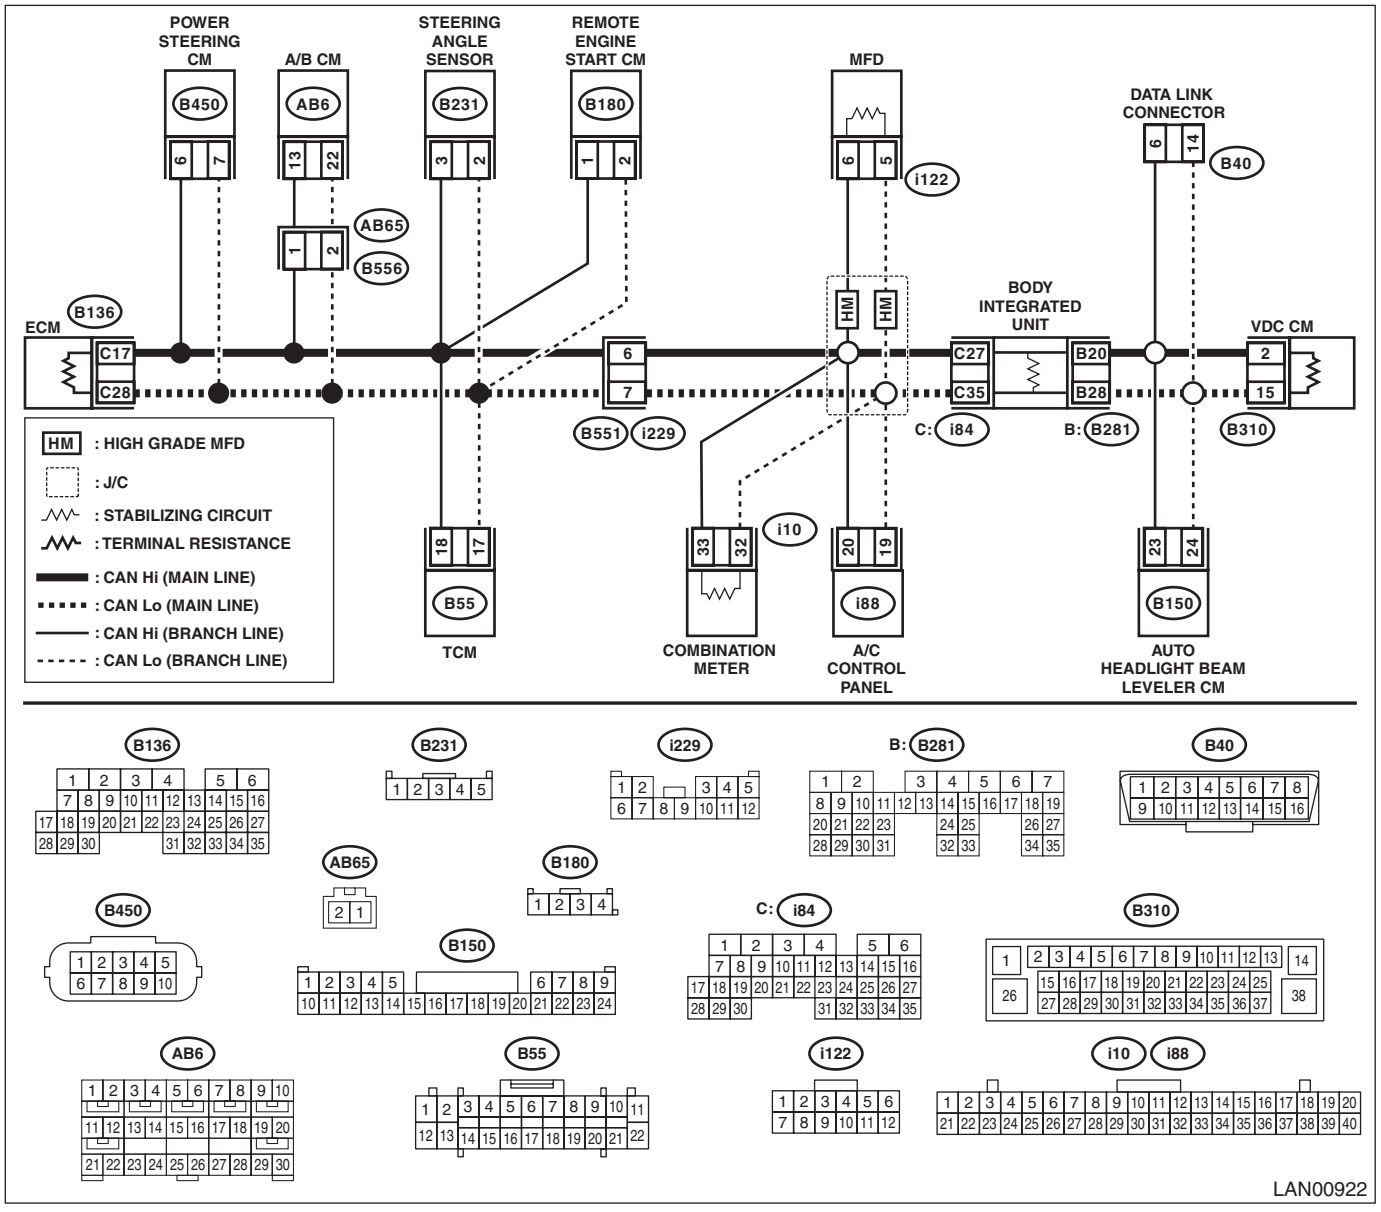


| Step | | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK DTC.**<br>Check the displayed DTC. | Are DTCs other than U*** displayed? | Perform the diagnosis according to DTC. | Go to step **2**. |
| 2 | **CHECK DTC.**<br>Check the displayed DTC. | Is U0126 a current malfunction? | Go to step **3**. | Go to step **7**. |

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 3 | **CHECK DTC.**<br>1) Check CAN communication circuit. <Ref. to LAN(diag)-24, CAN Communication Circuit Check.><br>2) Read the DTC using Subaru Select Monitor. | Is U0126 a current malfunction? | Go to step **4**. | Go to step **7**. |
| 4 | **CHECK DTC.**<br>Using the Subaru Select Monitor, read DTC of all the systems. | Is the steering angle sensor data no-receive detected in several modules? | Replace the steering angle sensor. <Ref. to VDC-27, Steering Angle Sensor.> | Go to step **5**. |
| 5 | **REPLACE MODULE.**<br>1) Replace the steering angle sensor.<br>2) Read the DTC using Subaru Select Monitor. | Is U0126 a current malfunction? | Go to step **6**. | System is normal. |
| 6 | **CHECK MODULE.**<br>1) Reinstall the steering angle sensor.<br>2) Replace the module that the DTC has been detected.<br>3) Read the DTC using Subaru Select Monitor. | Is U0126 a current malfunction? | Replace the steering angle sensor. <Ref. to VDC-27, Steering Angle Sensor.> | System is normal. |
| 7 | **CHECK HARNESS.**<br>1) Shake the harness, and check for poor contact.<br>2) Read the DTC using Subaru Select Monitor. | Is U0126 a current malfunction? | Repair the poor contact of harness, or replace the harness. | Go to step **8**. |
| 8 | **CHECK CONNECTOR.**<br>Check the connector used for high speed CAN for poor contact. | Is there poor contact of connector? | Repair the connector that has poor contact, or replace harness. | It is possible that temporary poor communication occurs. Delete the DTC. |

# P: DTC U0131 LOST COMMUNICATION WITH POWER STEERING CONTROL MODULE

**DTC DETECTING CONDITION:**
No data is received from power steering CM.
**TROUBLE SYMPTOM:**
Cooperation control with power steering CM does not operate properly.
**WIRING DIAGRAM:**
CAN communication system <Ref. to WI-46, WIRING DIAGRAM, CAN Communication System.>

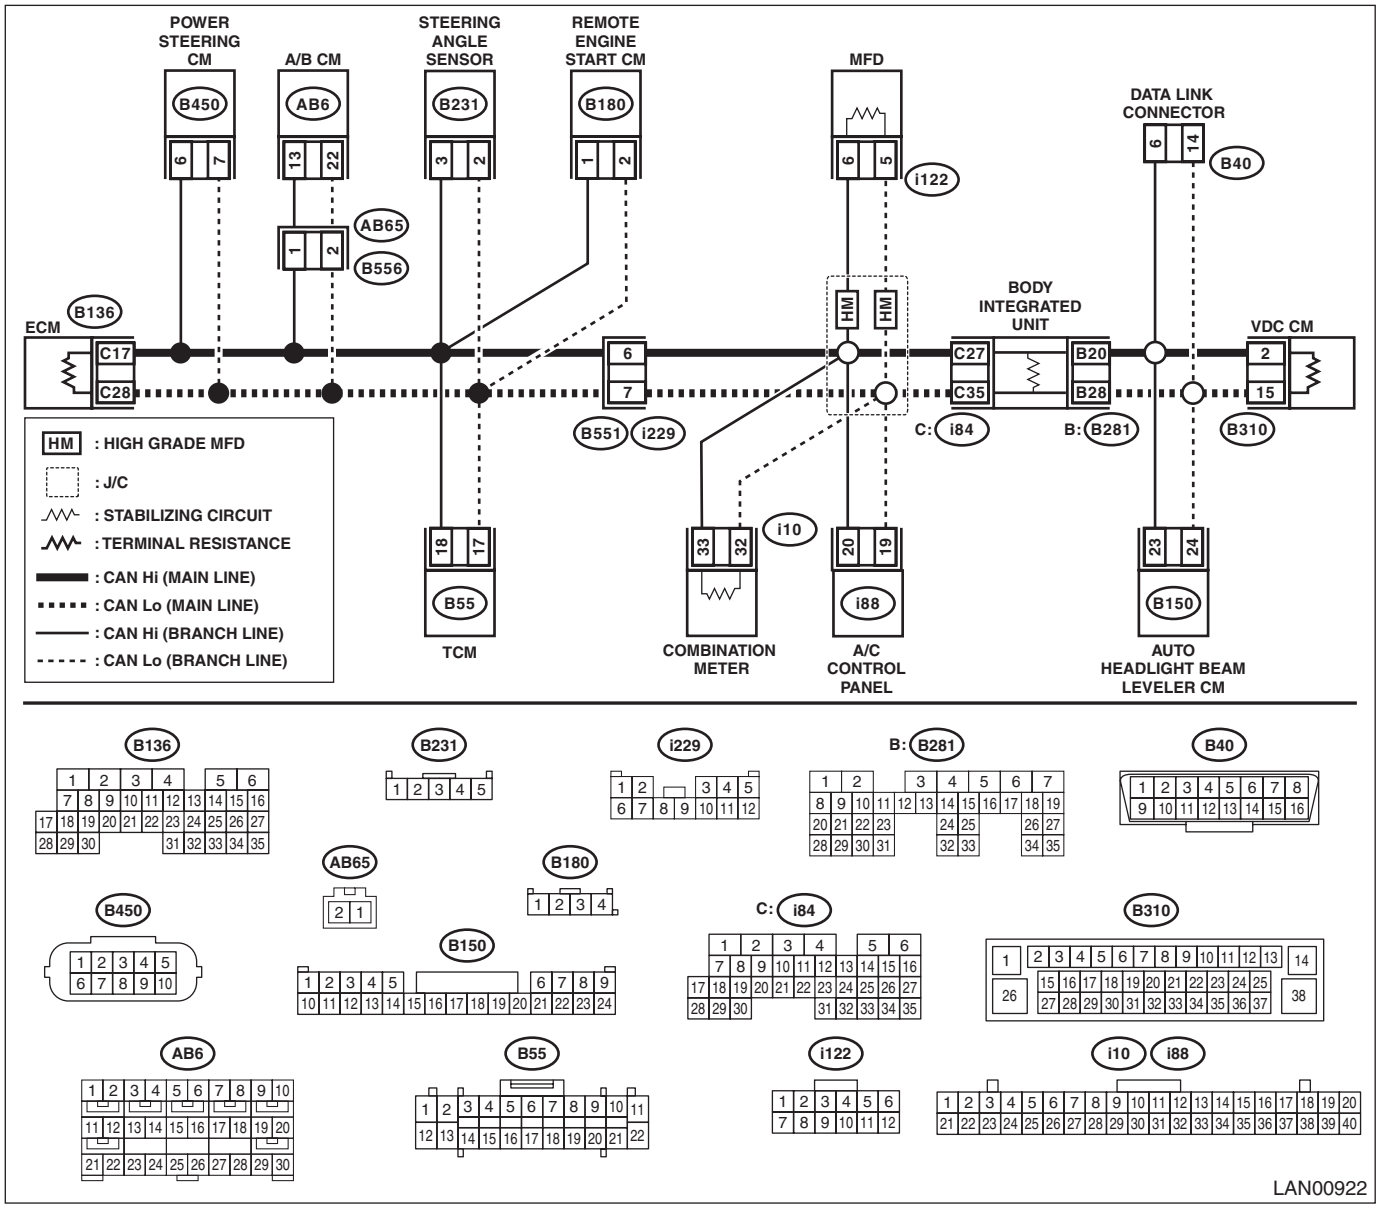


| Step | | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK DTC.**<br>Check the displayed DTC. | Are DTCs other than U*** displayed? | Perform the diagnosis according to DTC. | Go to step **2**. |
| 2 | **CHECK DTC.**<br>Check the displayed DTC. | Is U0131 a current malfunction? | Go to step **3**. | Go to step **7**. |

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 3 | **CHECK DTC.**<br>1) Check CAN communication circuit. <Ref. to LAN(diag)-24, CAN Communication Circuit Check.><br>2) Read the DTC using Subaru Select Monitor. | Is U0131 a current malfunction? | Go to step **4**. | Go to step **7**. |
| 4 | **CHECK DTC.**<br>Using the Subaru Select Monitor, read DTC of all the systems. | Is the electric power steering data no-receive detected in several modules? | Replace the power steering CM. <Ref. to PS-42, Power Steering Control Module.> | Go to step **5**. |
| 5 | **REPLACE MODULE.**<br>1) Replace the power steering CM.<br>2) Read the DTC using Subaru Select Monitor. | Is U0131 a current malfunction? | Go to step **6**. | System is normal. |
| 6 | **CHECK MODULE.**<br>1) Reinstall the power steering CM.<br>2) Replace the module that the DTC has been detected.<br>3) Read the DTC using Subaru Select Monitor. | Is U0131 a current malfunction? | Replace the power steering CM. <Ref. to PS-42, Power Steering Control Module.> | System is normal. |
| 7 | **CHECK HARNESS.**<br>1) Shake the harness, and check for poor contact.<br>2) Read the DTC using Subaru Select Monitor. | Is U0131 a current malfunction? | Repair the poor contact of harness, or replace the harness. | Go to step **8**. |
| 8 | **CHECK CONNECTOR.**<br>Check the connector used for high speed CAN for poor contact. | Is there poor contact of connector? | Repair the connector that has poor contact, or replace harness. | It is possible that temporary poor communication occurs. Delete the DTC. |

# Q: DTC U0140 LOST COMMUNICATION WITH BODY CONTROL MODULE

**DTC DETECTING CONDITION:**
No data is received from body integrated unit.
**TROUBLE SYMPTOM:**
Cooperation control with body integrated unit does not operate properly.
**WIRING DIAGRAM:**
CAN communication system <Ref. to WI-46, WIRING DIAGRAM, CAN Communication System.>

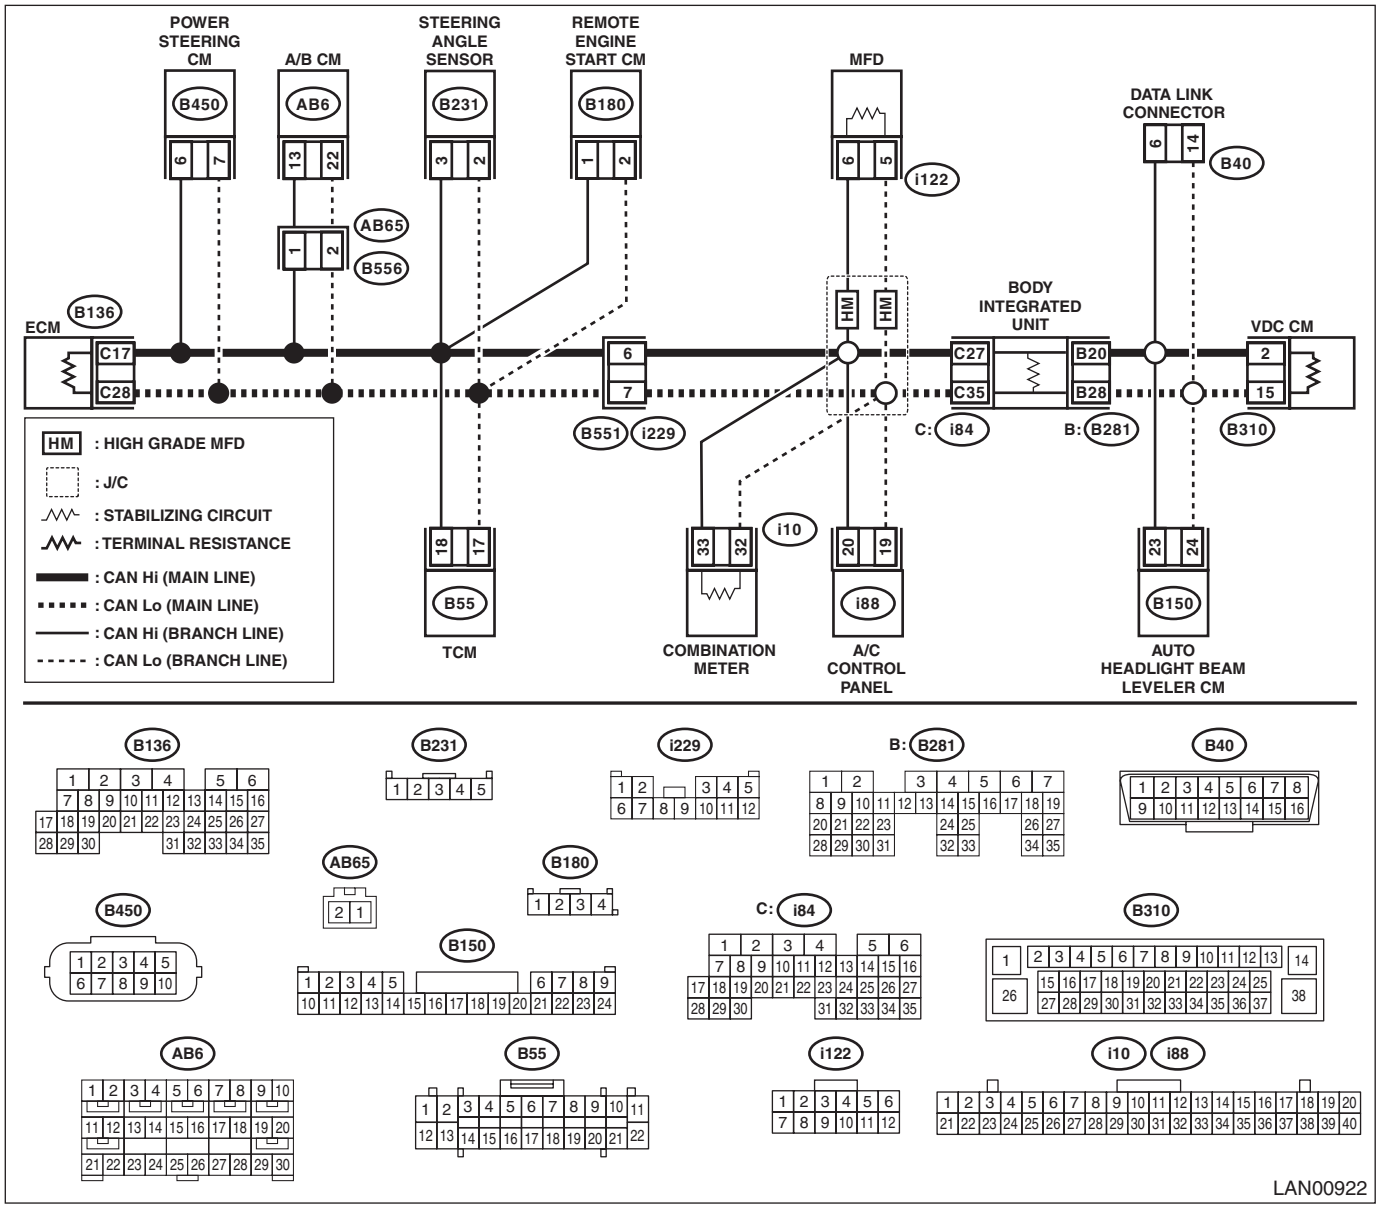


| Step | | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK DTC.**<br>Check the displayed DTC. | Are DTCs other than U*** displayed? | Perform the diagnosis according to DTC. | Go to step **2**. |
| 2 | **CHECK DTC.**<br>Check the displayed DTC. | Is U0140 a current malfunction? | Go to step **3**. | Go to step **7**. |
| 3 | **CHECK DTC.**<br>1) Check CAN communication circuit. <Ref. to LAN(diag)-24, CAN Communication Circuit Check.><br>2) Read the DTC using Subaru Select Monitor. | Is U0140 a current malfunction? | Go to step **4**. | Go to step **7**. |

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 4 | **CHECK DTC.**<br>Using the Subaru Select Monitor, read DTC of all the systems. | Is the body integrated data no-receive detected in several modules? | Replace the body integrated unit. <Ref. to SL-78, Body Integrated Unit.> | Go to step **5**. |
| 5 | **REPLACE MODULE.**<br>1) Replace the body integrated unit.<br>2) Read the DTC using Subaru Select Monitor. | Is U0140 a current malfunction? | Go to step **6**. | System is normal. |
| 6 | **CHECK MODULE.**<br>1) Reinstall the body integrated unit.<br>2) Replace the module that the DTC has been detected.<br>3) Read the DTC using Subaru Select Monitor. | Is U0140 a current malfunction? | Replace the body integrated unit. <Ref. to SL-78, Body Integrated Unit.> | System is normal. |
| 7 | **CHECK HARNESS.**<br>1) Shake the harness, and check for poor contact.<br>2) Read the DTC using Subaru Select Monitor. | Is U0140 a current malfunction? | Repair the poor contact of harness, or replace the harness. | Go to step **8**. |
| 8 | **CHECK CONNECTOR.**<br>Check the connector used for high speed CAN for poor contact. | Is there poor contact of connector? | Repair the connector that has poor contact, or replace harness. | It is possible that temporary poor communication occurs. Delete the DTC. |

# R: DTC U0151 LOST COMMUNICATION WITH RESTRAINTS CONTROL MODULE

**DTC DETECTING CONDITION:**
No data is received from A/B CM.
**TROUBLE SYMPTOM:**
Cooperation control with A/B CM does not operate properly.
**WIRING DIAGRAM:**
CAN communication system <Ref. to WI-46, WIRING DIAGRAM, CAN Communication System.>

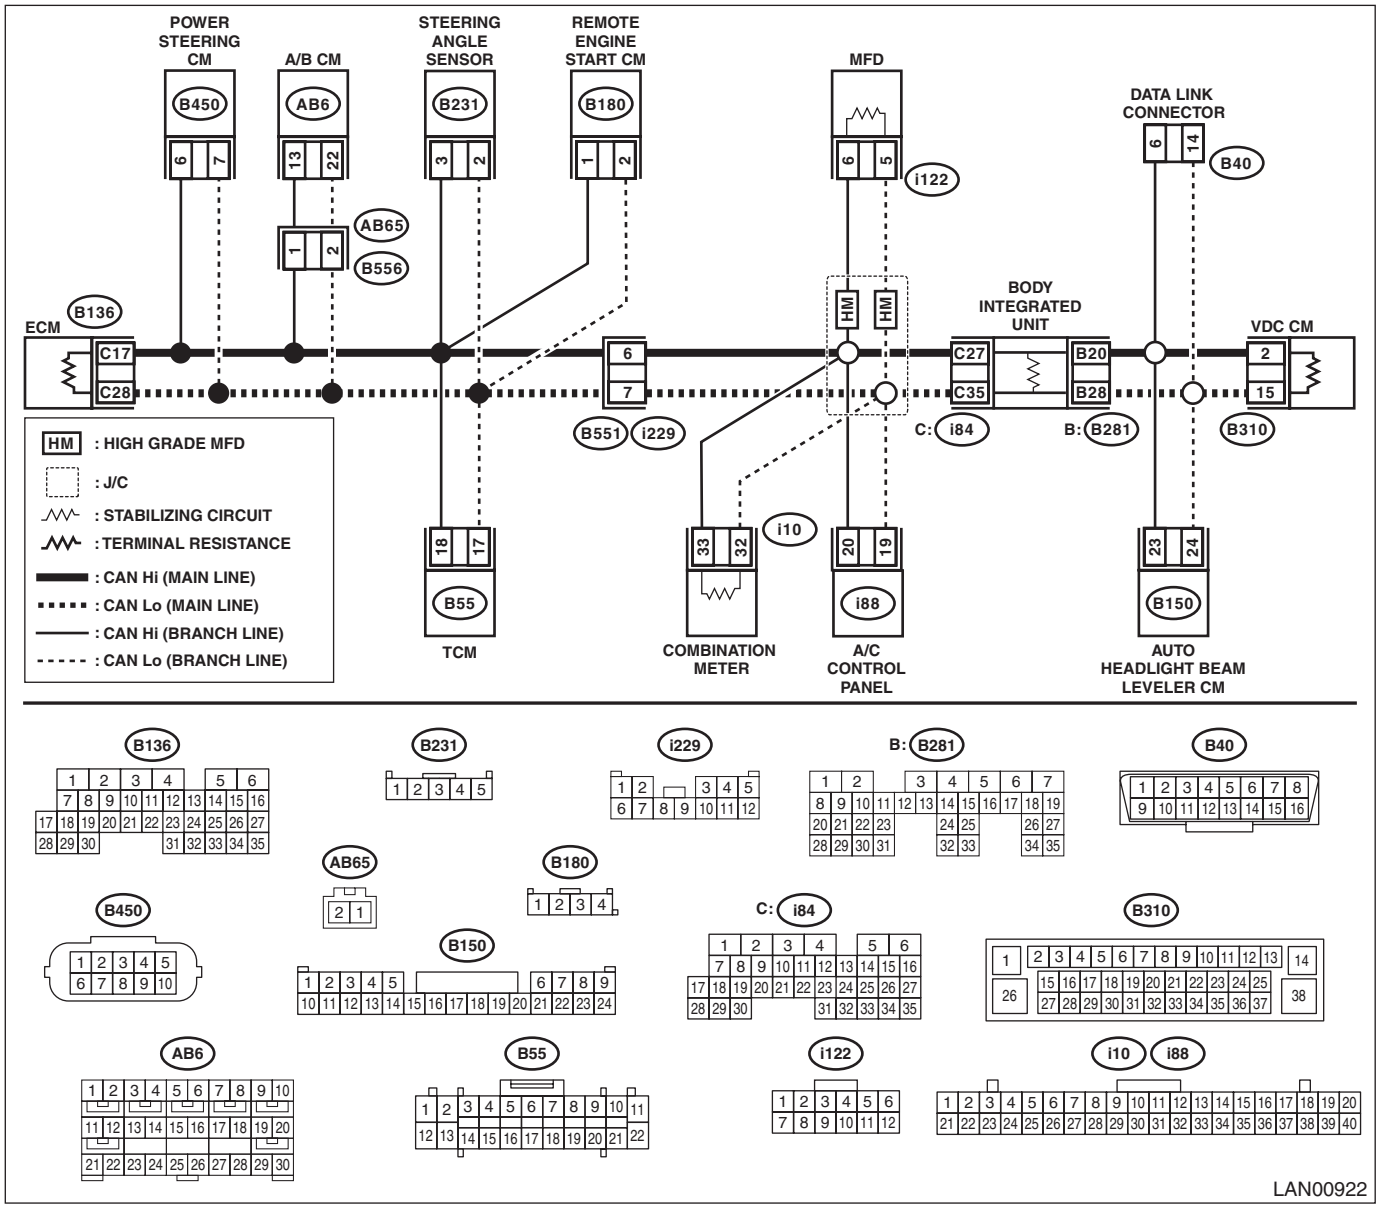


| Step | | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK DTC.**<br>Check the displayed DTC. | Are DTCs other than U*** displayed? | Perform the diagnosis according to DTC. | Go to step **2**. |
| 2 | **CHECK DTC.**<br>Check the displayed DTC. | Is U0151 a current malfunction? | Go to step **3**. | Go to step **7**. |
| 3 | **CHECK DTC.**<br>1) Check CAN communication circuit. <Ref. to LAN(diag)-24, CAN Communication Circuit Check.><br>2) Read the DTC using Subaru Select Monitor. | Is U0151 a current malfunction? | Go to step **4**. | Go to step **7**. |

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 4 | **CHECK DTC.**<br>Using the Subaru Select Monitor, read DTC of all the systems. | Is the airbag data no-receive detected in several modules? | Replace the A/B CM. <Ref. to AB-77, Airbag Control Module.> | Go to step **5**. |
| 5 | **REPLACE MODULE.**<br>1) Replace the A/B CM.<br>2) Read the DTC using Subaru Select Monitor. | Is U0151 a current malfunction? | Go to step **6**. | System is normal. |
| 6 | **CHECK MODULE.**<br>1) Reinstall the A/B CM.<br>2) Replace the module that the DTC has been detected.<br>3) Read the DTC using Subaru Select Monitor. | Is U0151 a current malfunction? | Replace the A/B CM. <Ref. to AB-77, Airbag Control Module.> | System is normal. |
| 7 | **CHECK HARNESS.**<br>1) Shake the harness, and check for poor contact.<br>2) Read the DTC using Subaru Select Monitor. | Is U0151 a current malfunction? | Repair the poor contact of harness, or replace the harness. | Go to step **8**. |
| 8 | **CHECK CONNECTOR.**<br>Check the connector used for high speed CAN for poor contact. | Is there poor contact of connector? | Repair the connector that has poor contact, or replace harness. | It is possible that temporary poor communication occurs. Delete the DTC. |

# S: DTC U0155 LOST COMMUNICATION WITH INSTRUMENT PANEL CLUSTER (IPC) CONTROL MODULE

**DTC DETECTING CONDITION:**
No data received from combination meter.
**TROUBLE SYMPTOM:**
Display of combination meter does not operate properly.
**WIRING DIAGRAM:**
CAN communication system <Ref. to WI-46, WIRING DIAGRAM, CAN Communication System.>

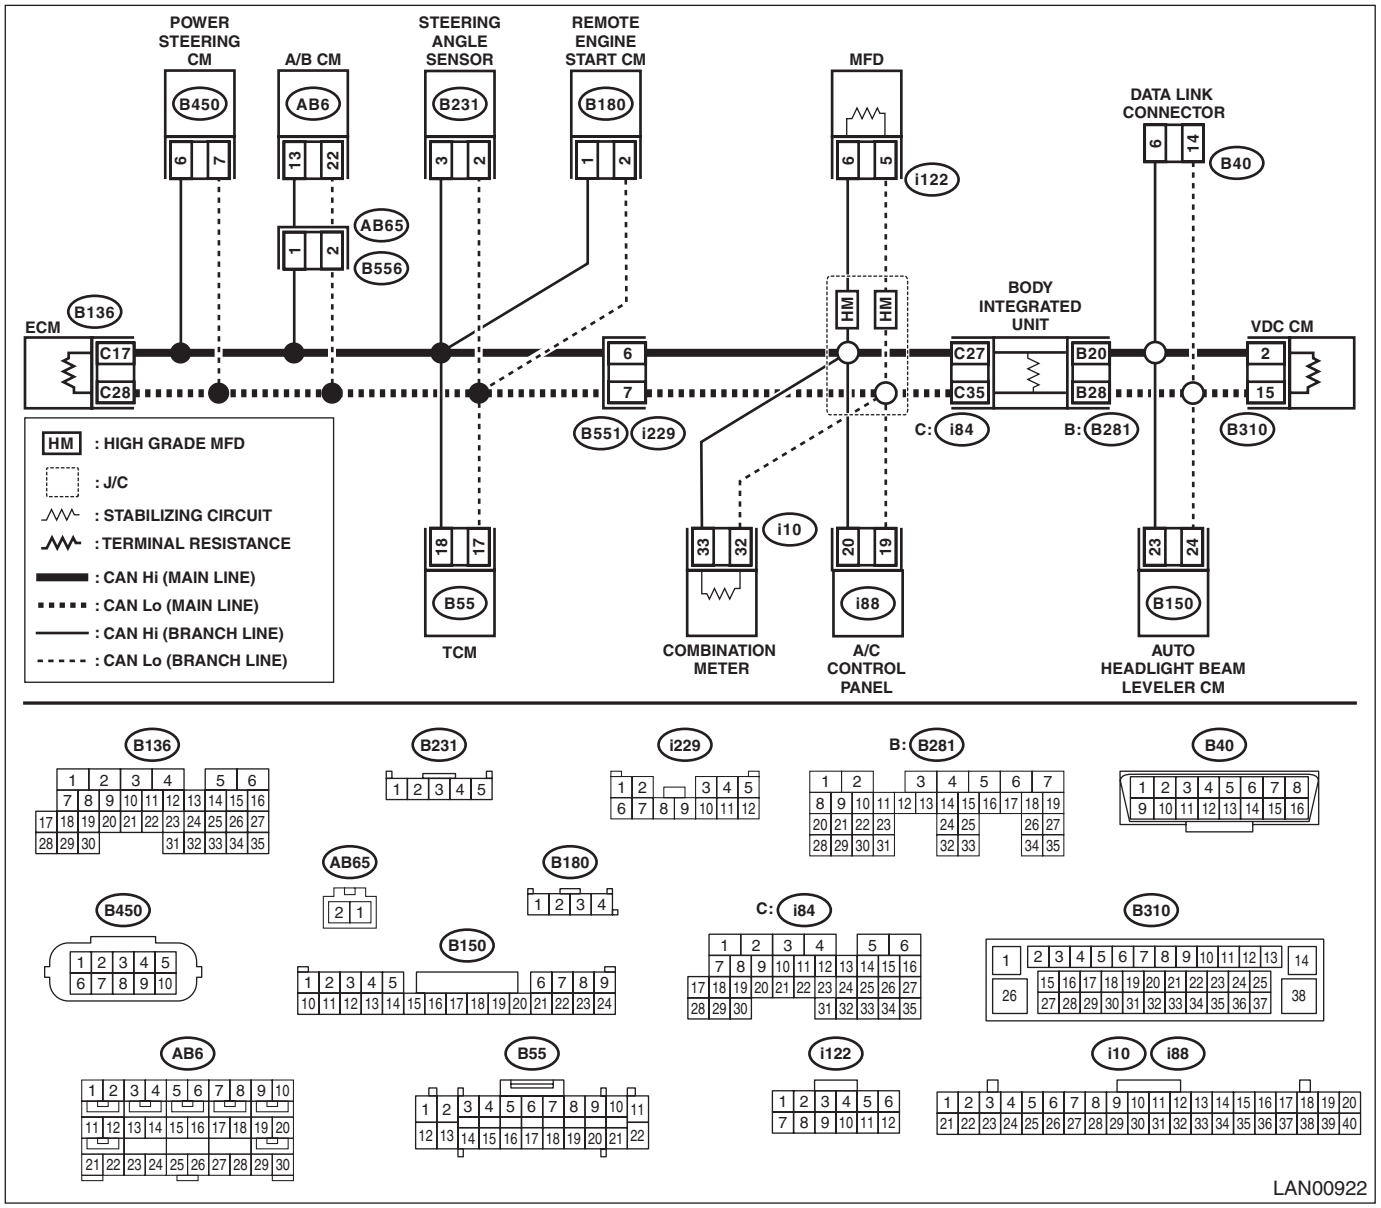


| Step | | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK DTC.**<br>Check the displayed DTC. | Are DTCs other than U*** displayed? | Perform the diagnosis according to DTC. | Go to step **2**. |
| 2 | **CHECK DTC.**<br>Check the displayed DTC. | Is U0155 a current malfunction? | Go to step **3**. | Go to step **7**. |

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 3 | **CHECK DTC.**<br>1) Check CAN communication circuit. <Ref. to LAN(diag)-24, CAN Communication Circuit Check.><br>2) Read the DTC using Subaru Select Monitor. | Is U0155 a current malfunction? | Go to step **4**. | Go to step **7**. |
| 4 | **CHECK DTC.**<br>Using the Subaru Select Monitor, read DTC of all the systems. | Is the meter data no-receive detected in several modules? | Replace the meter. <Ref. to IDI-17, Combination Meter.> | Go to step **5**. |
| 5 | **REPLACE MODULE.**<br>1) Replace the combination meter.<br>2) Read the DTC using Subaru Select Monitor. | Is U0155 a current malfunction? | Go to step **6**. | System is normal. |
| 6 | **CHECK MODULE.**<br>1) Replace the current combination meter with the original combination meter.<br>2) Replace the module that the DTC has been detected.<br>3) Read the DTC using Subaru Select Monitor. | Is U0155 a current malfunction? | Replace the combination meter. <Ref. to IDI-17, Combination Meter.> | System is normal. |
| 7 | **CHECK HARNESS.**<br>1) Shake the harness, and check for poor contact.<br>2) Read the DTC using Subaru Select Monitor. | Is U0155 a current malfunction? | Repair the poor contact of harness, or replace the harness. | Go to step **8**. |
| 8 | **CHECK CONNECTOR.**<br>Check the connector used for high speed CAN for poor contact. | Is there poor contact of connector? | Repair the connector that has poor contact, or replace harness. | It is possible that temporary poor communication occurs. Delete the DTC. |

# T: DTC U0164 LOST COMMUNICATION WITH HVAC CONTROL MODULE

**DTC DETECTING CONDITION:**
No data is received from A/C control panel.
**TROUBLE SYMPTOM:**
Cooperation control of air conditioner does not operate properly.
**WIRING DIAGRAM:**
CAN communication system <Ref. to WI-46, WIRING DIAGRAM, CAN Communication System.>



| Step | | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK DTC.**<br>Check the displayed DTC. | Are DTCs other than U*** displayed? | Perform the diagnosis according to DTC. | Go to step **2**. |
| 2 | **CHECK DTC.**<br>Check the displayed DTC. | Is U0164 a current malfunction? | Go to step **3**. | Go to step **7**. |
| 3 | **CHECK DTC.**<br>1) Check CAN communication circuit. <Ref. to LAN(diag)-24, CAN Communication Circuit Check.><br>2) Read the DTC using Subaru Select Monitor. | Is U0164 a current malfunction? | Go to step **4**. | Go to step **7**. |

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 4 | **CHECK DTC.**<br>Using the Subaru Select Monitor, read DTC of all the systems. | Is the air conditioner data no-receive detected in several modules? | Replace the A/C control panel. | Go to step **5**. |
| 5 | **REPLACE MODULE.**<br>1) Replace the A/C control panel.<br>2) Read the DTC using Subaru Select Monitor. | Is U0164 a current malfunction? | Go to step **6**. | System is normal. |
| 6 | **CHECK MODULE.**<br>1) Restore the A/C control panel.<br>2) Replace the module that the DTC has been detected.<br>3) Read the DTC using Subaru Select Monitor. | Is U0164 a current malfunction? | Replace the A/C control panel. | System is normal. |
| 7 | **CHECK HARNESS.**<br>1) Shake the harness, and check for poor contact.<br>2) Read the DTC using Subaru Select Monitor. | Is U0164 a current malfunction? | Repair the poor contact of harness, or replace the harness. | Go to step **8**. |
| 8 | **CHECK CONNECTOR.**<br>Check the connector used for high speed CAN for poor contact. | Is there poor contact of connector? | Repair the connector that has poor contact, or replace harness. | It is possible that temporary poor communication occurs. Delete the DTC. |

## U: DTC U1120 LOST COMMUNICATION WITH AUTOSTART STOP CONTROL MODULE

NOTE:
The electric power steering CM identifies whether the auto start stop function is provided or not using information from the combination meter. Therefore, this DTC may be detected if lost communication with the combination meter occurs.
For the diagnostic procedure, refer to DTC U0155 LOST COMMUNICATION WITH INSTRUMENT PANEL CLUSTER (IPC) CONTROL MODULE. <Ref. to LAN(diag)-121, DTC U0155 LOST COMMUNICATION WITH INSTRUMENT PANEL CLUSTER (IPC) CONTROL MODULE, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>

# 12.General Diagnostic Table

## A: INSPECTION

| Item | Operation | Specifications | | Note |
|---|---|---|---|---|
| | | YES | NO | |
| Diagnostic code | DTC is displayed when inspecting all DTCs. | Perform the diagnosis according to DTC. | System is normal. | — |
| Speedometer | Faster vehicle speed than the actual speed is displayed. | VDC CM data may not be received. | System is normal. | Also, check vehicle speed pulse circuit. |
| Fuel gauge | Fuel is present, but displayed less than actual amount. | Communication error may be present. | System is normal. | Also, check the fuel gauge. |
| Fuel level warning light | Fuel is present, but the light illuminates. | Communication error may be present. | System is normal. | Also, check the fuel gauge. |
| Engine coolant temperature light | Engine coolant temperature light blinks in red and blue alternately. | Communication error may be present. | System is normal. | Check the engine coolant light related items. |
| [S], [I] or [S#] indicator | Blinking. | Communication error may be present. | System is normal. | Check the intelligent switch. |
| VDC indicator | Illuminating. | Communication error may be present. | System is normal. | Check that VDC is not operating. |
| VDC OFF indicator | Illuminating. | Communication error may be present. | System is normal. | Check that VDC is not OFF. |
| Brake warning, etc. | Illuminating. | Brake fluid may be low in amount, or communication error may be present. | System is normal. | Check brake related items. |
| Shift position | Not displayed. | Communication error may be present. | System is normal. | Also, check AT system. |
| AT temperature light | Blinking. | Communication error may be present. | System is normal. | Also, check AT system. |
| Door indicator | Not displayed. | Communication error may be present. | System is normal. | Check the door switch. |
| Clearance indicator | Not illuminating. | Communication error may be present. | System is normal. | Check the combination switch. |
| Hi beam indicator | Not illuminating. | Communication error may be present. | System is normal. | Check the combination switch. |
| Front fog indicator | Not illuminating. | Communication error may be present. | System is normal. | Check the combination switch. |
| Illumination | Illuminating at the maximum brightness. | Communication error may be present. | System is normal. | Also, check the illumination switch. |
| Cruise control indicator | Not illuminating. | Communication error may be present. | System is normal. | Check the cruise control system. |
| AWD indicator | Not illuminating. | Communication error may be present. | System is normal. | Check TCM. |
| Hill hold indicator | Not illuminating. | Communication error may be present. | System is normal. | Also, check VDC CM. |

# 1. Basic Diagnostic Procedure

## A: PROCEDURE

**CAUTION:**
**• Subaru Select Monitor is required for reading DTC, performing diagnosis and reading current data.**
**• Remove foreign matter (dust, water, oil, etc.) from the body integrated unit connector during removal and installation.**
**• Registration of the immobilizer is necessary after the replacement of the control module, etc. For detailed procedure, refer to the REGISTRATION MANUAL FOR IMMOBILIZER.**

NOTE:
• To check harness for open or short circuits, shake the suspected trouble spot or connector.
• Check List for Interview <Ref. to BC(diag)-3, Check List for Interview.>

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK PRE-INSPECTION.**<br>Ask the customer when and how the trouble occurred using the interview check list. <Ref. to BC(diag)-3, Check List for Interview.> | Did you interview the customer? | Go to step **2**. | Interview the customer. |
| 2 | **BASIC INSPECTION.**<br>Check components which might affect body control. <Ref. to BC(diag)-4, INSPECTION, General Description.> | Is the component that might influence the body control problem normal? | Go to step **3**. | Repair or replace each component. |
| 3 | **CHECK DTC.**<br>1) Read the DTC. <Ref. to BC(diag)-9, OPERATION, Read Diagnostic Trouble Code (DTC).><br>NOTE:<br>If the communication function of the Subaru Select Monitor cannot be executed properly, check the communication circuit. <Ref. to LAN(diag)-9, COMMUNICATION FOR INITIALIZING IMPOSSIBLE, Subaru Select Monitor.><br>2) Record all DTCs and freeze frame data. | Is DTC displayed on Subaru Select Monitor? | Go to step **5**. | Go to step **4**. |
| 4 | **PERFORM GENERAL DIAGNOSTICS.**<br>Inspect using the “General Diagnostics Table”. <Ref. to BC(diag)-37, General Diagnostic Table.> | Is result of inspection OK? | The body control system is normal. | Go to step **5**. |
| 5 | **PERFORM DIAGNOSIS.**<br>1) Correct the cause of trouble.<br>2) Perform the Clear Memory Mode. <Ref. to BC(diag)-10, OPERATION, Clear Memory Mode.><br>3) Read the DTC. <Ref. to BC(diag)-9, OPERATION, Read Diagnostic Trouble Code (DTC).> | Is DTC displayed on Subaru Select Monitor? | Repeat step 5 until DTC is not shown. | Finish the diagnosis. |

# 2. Check List for Interview

## A: CHECK

Inspect the following items regarding the vehicle's state.

| Body Control System Check List for Interview | | Date of Vehicle Bring-in | Year Month Day |
|---|---|---|---|
| Customer's name | | Registration No. | Initial year of registration<br>Year Month Date |
| | | Vehicle model | Frame number |
| Interviewer | Inspector | Engine type | Odometer reading |
| Customer specified content | | | |
| Date and time when the trouble occurred | | Frequency of trouble occurrence | |
| Condition of trouble occurrence | | Weather | |
| Road conditions | | Occurrence location | |
| Accessory installation condition | | | |
| Trouble condition | | | |
| ❑ Diagnostic code | | | ❑ ( ) |

# 3. General Description

## A: CAUTION

### 1. SRS AIRBAG SYSTEM

Airbag system wiring harness is routed near the body integrated unit and body control circuits.

**CAUTION:**
- **Do not use the electrical test equipment on all airbag system wiring harnesses and connectors.**
- **Be careful not to damage the airbag system wiring harness, when servicing the body control system.**

## B: INSPECTION

Before performing diagnosis, check the following items which might affect body control system problems.
1) Measure the battery voltage and check electrolyte.

***Standard voltage: 12 V or more***

***Specific gravity: 1.260 or more***
2) Check the fuse condition.
Make sure that ampere of the fuse is setting value, and it is not blown out.
3) Check the connecting condition of harness and harness connector.
4) Confirm settings of body integrated unit are corresponded to vehicle equipment. <Ref. to BC(diag)-17, OPERATION, Registration Body Integrated Unit.>
5) Make sure that the User Customizing of the body integrated unit matches the vehicle equipment. <Ref. to BC(diag)-15, OPERATION, User Customizing.>
6) Confirm “Factory initial setting” of body integrated unit registrations is “Market”.
7) Confirm key illumination does not blink with ignition switch turned to ON.

## C: PREPARATION TOOL

### 1. SPECIAL TOOL

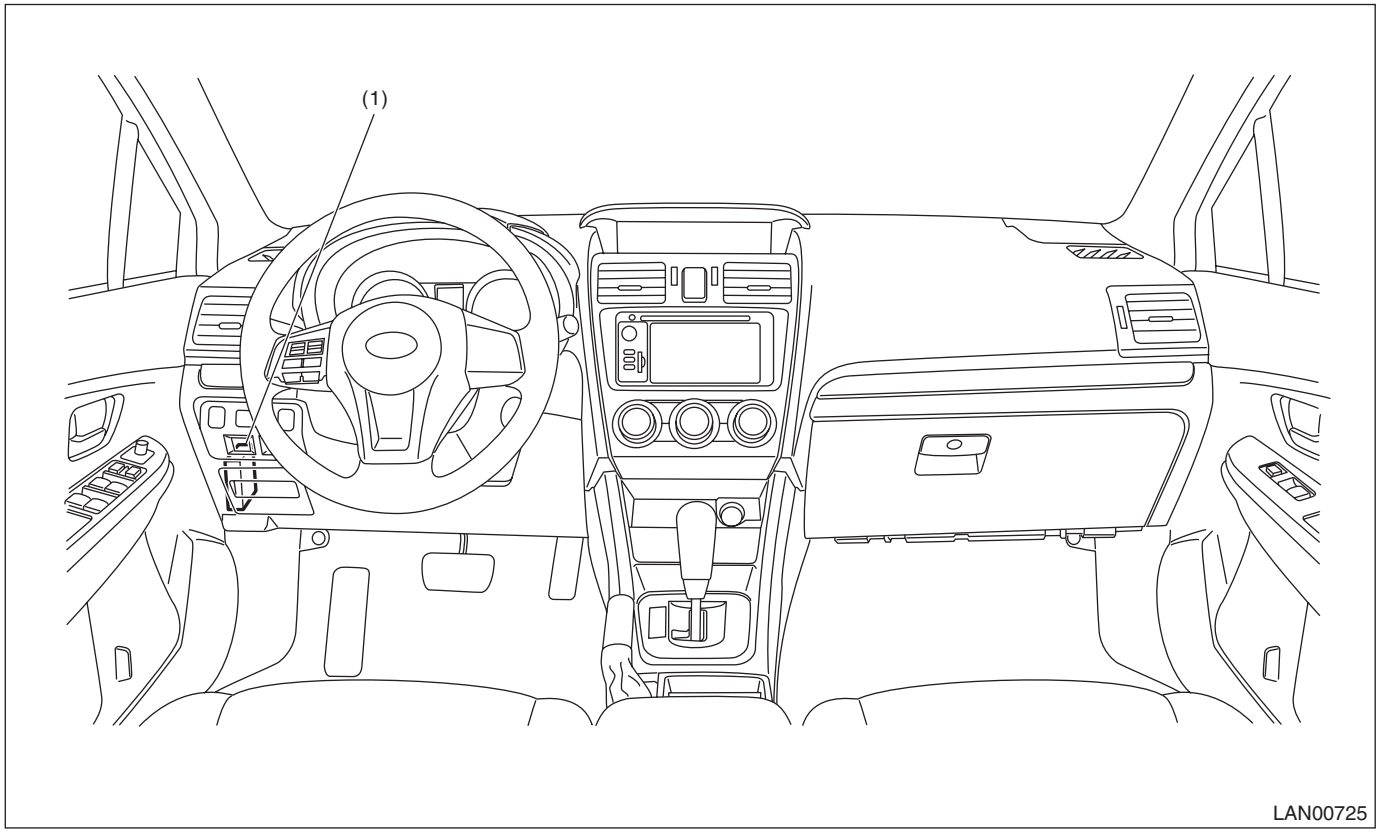
| ILLUSTRATION | TOOL NUMBER | DESCRIPTION | REMARKS |
|---|---|---|---|
|  ST1B022XU0 | 1B022XU0 | SUBARU SELECT MONITOR III KIT | Used for troubleshooting the electrical system. |

### 2. GENERAL TOOL

| TOOL NAME | REMARKS |
|---|---|
| Circuit tester | Used for measuring resistance, voltage and current. |

# 4. Electrical Component Location

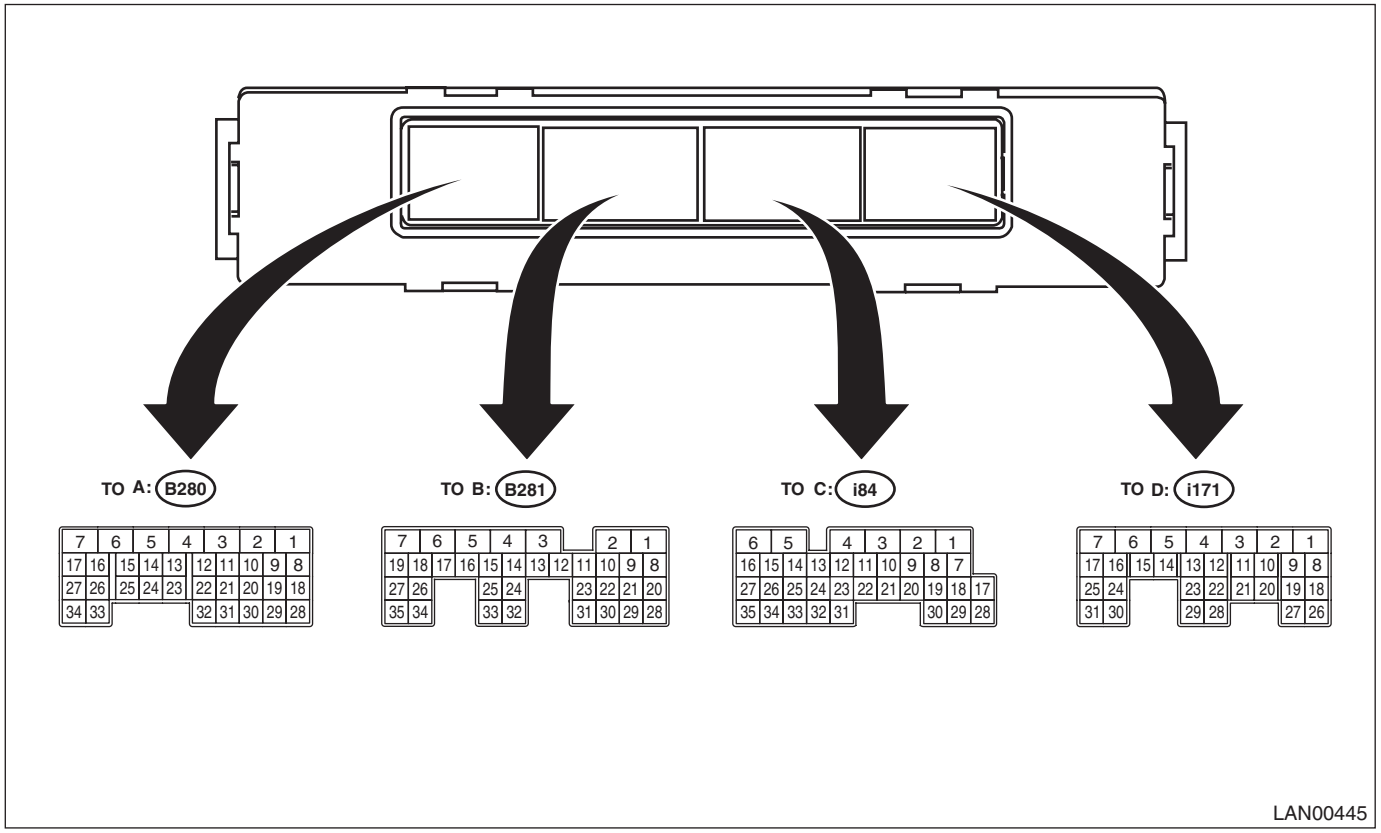
## A: LOCATION



(1) Body integrated unit

# 5. Control Module I/O Signal

## A: ELECTRICAL SPECIFICATION



| Description | Terminal No. | Signal (V or Ω) | Note |
|---|---|---|---|
| | | Ignition switch ON (engine OFF) | |
| Ignition power supply (rear wiper) | A5 ←→ chassis ground | Less than 1.5 V → 10 — 13 V | Ignition switch OFF → ON |
| Battery power supply (shift lock/ key lock) | B6 ←→ chassis ground | 10 — 13 V | Always |
| Battery power supply (door lock) | D1 ←→ chassis ground | 10 — 13 V | Always |
| Battery power supply (control) | C6 ←→ chassis ground | 10 — 13 V | Always |
| Ground | A1 ←→ chassis ground | Less than 1.5 V | Always |
| | B31 ←→ chassis ground | | |
| | C1 ←→ chassis ground | | |
| | D29 ←→ chassis ground | | |
| Battery power supply (back-up) | B7 ←→ chassis ground | 10 — 13 V | Always |
| Ignition power supply | B3 ←→ chassis ground | Less than 1.5 V → 10 — 13 V | Ignition switch OFF → ON |
| ACC power supply | A32 ←→ chassis ground | Less than 1.5 V → 10 — 13 V | Ignition switch OFF → Accessory ON |
| Key-in switch | A4 ←→ chassis ground | Less than 1.5 V → 10 — 13 V | Key inserted |
| P range SW | B18 ←→ chassis ground | 8 V or more → less than 1.5 V | P range to other than P range |
| Stop light SW | A10 ←→ chassis ground | Less than 1.5 V → 8 V | Stop light switch OFF → ON |
| Door SW (driver's) | C14 ←→ chassis ground | 8 V or more → less than 1.5 V | Front right door closed → open |
| Door SW (passenger's) | C13 ←→ chassis ground | 8 V or more → less than 1.5 V | Front left door closed → open |
| Door SW (rear right) | C25 ←→ chassis ground | 8 V or more → less than 1.5 V | Rear right door closed → open |

| Description | Terminal No. | Signal (V or Ω) | Note |
|---|---|---|---|
| | | Ignition switch ON (engine OFF) | |
| Door SW (rear left) | C24 ←→ chassis ground | 8 V or more → less than 1.5 V | Rear left door closed → open |
| Rear gate SW/trunk SW | C33 ←→ chassis ground | 8 V or more → less than 1.5 V | Rear gate/trunk closed → open |
| Opener SW (trunk/rear gate) | C10 ←→ chassis ground | 8 V or more → less than 1.5 V | Rear gate/trunk opener switch ON |
| Manual switch (LOCK) | C9 ←→ chassis ground | 8 V or more → less than 1.5 V | Door lock switch ON |
| Manual switch (UNLOCK) | C20 ←→ chassis ground | 8 V or more → less than 1.5 V | Door unlock switch ON |
| Lighting AUTO | B16 ←→ chassis ground | 8 V or more → less than 1.5 V | Switch at AUTO position |
| Lighting II | A34 ←→ chassis ground | 8 V or more → less than 1.5 V | Switch at II position |
| | B34 ←→ chassis ground | | |
| Lighting I | B17 ←→ chassis ground | 8 V or more → less than 1.5 V | Switch at I position |
| Dimmer passing | B25 ←→ chassis ground | 8 V or more → less than 1.5 V | Switch at passing position |
| Dimmer Hi beam | B15 ←→ chassis ground | 8 V or more → less than 1.5 V | Switch at Hi beam position |
| Front fog light SW | B26 ←→ chassis ground | 8 V or more → less than 1.5 V | Front fog light switch ON |
| Illumination sensor power supply | B1 ←→ A29 | Less than 1.5 V → 4.5 V or more | Ignition switch OFF → ON |
| Illumination sensor signal | A19 | 0.2 — 4.5 V | Ignition switch OFF → ON |
| Ground (illumination sensor) | A29 ←→ chassis ground | Less than 1.5 V | Always |
| Rear wiper SW ON | A12 ←→ chassis ground | 8 V or more → less than 1.5 V | Switch at ON position |
| Rear wiper SW INT | A22 ←→ chassis ground | 8 V or more → less than 1.5 V | Switch at INT position |
| Rear washer SW | A30 ←→ chassis ground | 8 V or more → less than 1.5 V | Switch at ON position |
| Illumination SW (Vi1) | D12 ←→ chassis ground | Approx. 5 V | While clearance light illuminates |
| Illumination SW (Vi2) | D22 ←→ chassis ground | 0.5 — 4.8 V | |
| Illumination SW (Vi3) | D28 ←→ chassis ground | Less than 1.5 V | Always |
| Bright SW | C21 ←→ chassis ground | 8 V or more → less than 1.5 V | Switch at ON position |
| Reverse SW (MT) | B12 ←→ chassis ground | Less than 1.5 V → 8 V or more | Reverse SW ON |
| Impact sensor | A11 ←→ chassis ground | 8 V or more | Apply an impact |
| Hi-speed CAN communication circuit 1 (Hi) | B20 | Serial communication | Except for sleep status*1 |
| Hi-speed CAN communication circuit 1 (Lo) | B28 | | |
| Hi-speed CAN communication circuit 2 (Hi) | C27 | Serial communication | Except for sleep status*1 |
| Hi-speed CAN communication circuit 2 (Lo) | C35 | | |
| Immobilizer antenna (B) | B22 | Serial communication | Communication with ignition key in progress |
| Immobilizer antenna (A) | B10 | | |
| Immobilizer antenna amplifier GND | B30 ←→ chassis ground | Less than 1.5 V | Always |
| Immobilizer antenna amplifier power supply | B2 ←→ B30 | 4.5 — 5.5 V | Always |
| Security UART | A21 | Serial communication | Always |
| Front wiper return | A2 ←→ chassis ground | 8 V | When front wiper is operated |
| Rear washer switch | A30 ←→ chassis ground | 8 V or more → less than 1.5 V | When rear washer switch is ON |
| Door UNLOCK (driver's seat) output | D4 ←→ chassis ground | Less than 0.5 V → 8 V or more | When driver's side door unlock is output |
| Keyless entry communication line | D11 | Serial communication | When door lock/unlock is operated with the keyless transmitter, or when TPMS is operated |

| Description | Terminal No. | Signal (V or Ω) | Note |
|---|---|---|---|
| | | Ignition switch ON (engine OFF) | |
| Rear defogger switch | C18 ←→ chassis ground | Less than 1.5 V → 8 V or more | When the rear defogger switch is ON |
| Parking brake switch | C32 ←→ chassis ground | 8 V or more → less than 1.5 V | When parking brake is ON |
| Shift lock solenoid | B5 ←→ chassis ground | Less than 1.5 V → 8 V or more | When shift lock is operating (AT models) |
| Key actuator | B4 ←→ chassis ground | Less than 1.5 V → 8 V or more | LOCK status ON (AT models) |
| Rear wiper ON output | A7 ←→ chassis ground | Less than 0.5 V → 8 V or more | Rear wiper operation in progress |
| Rear wiper return | A6 ←→ chassis ground | Less than 0.5 V → 8 V or more | Rear wiper operation in progress |
| Door LOCK output | D2 ←→ chassis ground | Less than 0.5 V → 8 V or more | When LOCK signal is output |
| Door UNLOCK output | D3 ←→ chassis ground | Less than 0.5 V → 8 V or more | When UNLOCK signal is output |
| Rear gate/trunk UNLOCK output | D7 ←→ chassis ground | Less than 0.5 V → 8 V or more | When UNLOCK signal is output |
| Lighting relay power supply | A3 ←→ chassis ground | 10 — 13 V | ACC or key-in SW ON |
| | B19 ←→ chassis ground | 10 — 13 V | ACC or key-in SW ON |
| Lighting relay Hi output | A17 ←→ chassis ground | 8 V or more → less than 1.0 V | Dimmer SW at Hi position |
| Lighting relay Lo output | B35 ←→ chassis ground | 8 V or more → less than 1.0 V | Lighting II SW at ON position |
| Lighting Lo relay output 2 | A27 ←→ chassis ground | 8 V or more → less than 1.0 V | Lighting II SW at ON position |
| Lighting relay I output | A16 ←→ chassis ground | 8 V or more → less than 1.0 V | Lighting I SW at ON position |
| Front fog light output | A15 ←→ chassis ground | 8 V or more → less than 1.0 V | Front fog light SW at ON position |
| DRL cancel output | D10 ←→ chassis ground | 8 V or more → less than 1.0 V | Headlight switch ON or Hi beam ON, passing switch ON |
| Illumination output | B8 | Pulse output | Illumination ON |
| | C16 | Pulse output | Illumination ON |
| Key ring illumination | A25 | Pulse output | Illumination ON |
| Room light output | C4 | Pulse output | Room light ON (doors interlocked) |
| Map light output | D8 | Pulse output | Map light ON (keyless answer-back, etc.) |
| Luggage/trunk light output | C3 | Pulse output | Luggage/trunk at open state |
| Rear defogger relay output | A26 ←→ chassis ground | 8 V or more → less than 1.0 V | Rear defogger SW ON |
| Wiper deicer relay output | D9 ←→ chassis ground | 8 V or more → less than 1.0 V | Wiper deicer SW ON |
| Turn/hazard output | D18 ←→ chassis ground | 8 V or more → less than 1.0 V | When answer-back is output |
| Security horn output | A24 ←→ chassis ground | 8 V or more → less than 1.0 V | When security is operating |
| Security light | D26 | Pulse control | When security light is illuminating |
| Answer-back buzzer output | A20 ←→ chassis ground | 8 V or more → less than 1.0 V | When answer-back operates |
| Immobilizer communication | A31 | Serial communication | |

*1: For CAN sleep state, hold on for approx. one minute with ignition OFF and the doors, trunk, and rear gate all closed.

# 6. Read Diagnostic Trouble Code (DTC)

## A: OPERATION

For details concerning the work procedure, refer to the “PC application help for Subaru Select Monitor”.

NOTE:
For details concerning DTC, refer to List of Diagnostic Trouble Code (DTC). <Ref. to BC(diag)-20, List of Diagnostic Trouble Code (DTC).>

# 7. Clear Memory Mode

## A: OPERATION

For details concerning the work procedure, refer to the “PC application help for Subaru Select Monitor”.

# 8. Read Current Data

## A: OPERATION

For details concerning the work procedure, refer to the “PC application help for Subaru Select Monitor”.

## B: LIST

| Items to be displayed | Unit of measure | Remarks | Note |

NOTE:
For detailed operation procedures, refer to “PC application help for Subaru Select Monitor”.

# 9. User Customizing

## A: OPERATION

1) On «Main Menu» display, select {Each System Check}.
2) On «System Selection Menu» display, select {Integ. unit mode}.
3) On «Integ. unit mode failure diag.» display, select {Work Support}.
4) On «Work Support» display, select {Unit customizing}.
5) Change the setting with UP/DOWN key and set with the [OK] key.

List of User Customizing item

| Data | Initial setting value | Customize setting | Remarks |
|---|---|---|---|
| Off delay time | 30s | OFF | Room light off delay time can be selected. |
| | | 10 Sec | |
| | | 20 Sec | |
| | | 30s | |
| Auto Light Sensitivity Adjustment | Normal | Dull | Slow response |
| | | Normal | Standard |
| | | Sensitive | Quick response |
| | | Very sensitive | Fairly quick response |
| Power rear gate setting | — (*1) | ON | Fixed at OFF because this is not applicable. |
| | | OFF | |
| Back auto rear wiper setting | — (*1) | ON | Fixed at OFF because this is not applicable. |
| | | OFF | |
| TPMS Setting | — (*1) | TPMS | Set to “ON” for model with TPMS. |
| | | No TPMS | |
| Rr defogger op. mode | Normal | Normal | Automatically stops in 15 minutes after switch is turned to ON. |
| | | Continuous | Repeats active condition for 15 minutes and inactive condition for 2 minutes until switch is turned to OFF. |
| Security Alarm Setup | ON | ON | Security alarm (hazard, horn or siren) in active condition |
| | | OFF | Security alarm in inactive condition |
| Impact Sensor Setup | OFF | ON | Workable when Impact Sensor Setup is set to “ON”. Impact sensor function becomes activated. |
| | | OFF | Impact sensor in inactive condition (Set to “OFF” in models without sensors.) |
| Alarm delay setup | ON | | After the keyless lock operation, the alarm monitor starts after the following delay time has passed. |
| | | ON | Delay time is 30 seconds. |
| | | OFF | Delay time is 0 seconds. |
| Lockout prevention | ON | ON | key lockout prevention function is activated. (The function does not operate if safety knob is locked by hand.) |
| | | OFF | Key lockout prevention function is deactivated. |
| Impact sensor (OP) | OFF | ON | Vehicle is controlled in impact sensor equipped mode. (Make sure to set to “OFF” for models without the impact sensor. When “ON”, hazard, horn or siren become activated by keyless lock (alarm monitor start).) |
| | | OFF | Vehicle is controlled in no impact sensor mode. |
| Buzzer sounding setting | ON | ON | When lock/unlock is selected by keyless entry system operation, buzzer operates. |
| | | OFF | When lock/unlock is selected by keyless entry system operation, buzzer does not operate. |

| Data | Initial setting value | Customize setting | Remarks |
|---|---|---|---|
| Abnormal warning lamp flashing setting | ON | ON | When lock/unlock is selected by keyless entry system operation, hazard blinks. |
| | | OFF | When lock/unlock is selected by keyless entry system operation, hazard does not interlock. |
| Passive Alarm | OFF | ON | |
| | | OFF | |
| Door open warning | ON | ON | |
| | | OFF | |
| Dome Light Alarm Setting | OFF | ON | Room light illuminates interlocking with alarm. |
| | | OFF | Room light does not illuminate interlocking with alarm. |
| Auto A/C ECU Setting | — | ON | Diagnoses with auto A/C CM. |
| | | OFF | Diagnoses without auto A/C CM. |
| wiperdeicer | — | ON | Wiper deicer control is performed. |
| | | OFF | Wiper deicer control is not performed. |
| Illumination Control On/Off | ON | ON | |
| | | OFF | |
| Sedan/Wagon Setting | — | Sedan | Body control is performed by Sedan. |
| | | Wagon | Body control is performed by Wagon. |
| MT/AT Setting | — | MT | Body control is performed by MT. |
| | | AT | Body control is performed by AT. |
| 6MT Setting | — | 6MT | Body control is performed by 6MT. |
| | | Other than 6MT | Body control is performed by other than 6MT. |
| Illumination Sensor Setting | — (*1) | ON | Set to “ON” for model with auto light. |
| | | OFF | |
| Factory initial setting | Market | Market | Customize setting is reset when mode is switched from Market to Factory. |
| | | Factory | |

*1: Customization item according to the actual vehicle equipment

6) After setting, make sure that the setting changed in the {Current Data Display & Save} is same as vehicle equipment.

**CAUTION:**
- **the above settings must match the actual vehicle equipment.**
- **Do not change settings except for setting above while setting the functions.**
- **Be sure not to change Factory initial setting except when installing a new body integrated unit.**

NOTE:
For detailed operation procedures, refer to “PC application help for Subaru Select Monitor”.

# 10.Registration Body Integrated Unit

## A: OPERATION

### 1. CONFIRM CURRENT SETTING

1) On «Main Menu» display, select {Others}.
2) On «Others» display, select {Customized Setting}.
3) Save the setting.

Required items for new registration. (Except for system not equipped)

| Item | Item to confirm | | | | Remarks |
|---|---|---|---|---|---|
| number of regist. | 1 | 2 | 3 | 4 | Number of registered ID |
| Off delay time | OFF | 10 Sec | 20 Sec | 30s | Setting for lighting off time |
| Auto Light Sensitivity Adjustment | Dull | Normal (Standard) | Sensitive | Very sensitive | 1st (slow) — 4th (fairly quick) |
| Power rear gate setting | ON | | OFF | | N/A |
| Back auto rear wiper setting | ON | | OFF | | N/A |
| TPMS Setting | TPMS | | No TPMS | | |
| Rr defogger op. mode | Normal | | Continuous | | |
| Security Alarm Setup | ON | | OFF | | |
| Impact Sensor Setup | ON | | OFF | | Option setting |
| Alarm delay setup | ON | | OFF | | |
| Lockout prevention | ON | | OFF | | |
| Impact sensor | ON | | OFF | | Option setting |
| Buzzer sounding setting | ON | | OFF | | |
| Abnormal warning lamp flashing setting | ON | | OFF | | |
| Passive Alarm | ON | | OFF | | |
| Door open warning | ON | | OFF | | |
| Dome Light Alarm Setting | ON | | OFF | | |
| Auto A/C ECU Setting | ON | | OFF | | |
| wiperdeicer | ON | | OFF | | Option setting |
| Illumination Control On/Off | ON | | OFF | | |
| Sedan/Wagon Setting | Wagon | | Sedan | | |
| MT/AT Setting | MT | | AT | | |
| 6MT Setting | 6MT | | Other than 6MT | | |
| Illumination Sensor Setting | ON | | OFF | | |
| Factory initial setting | Factory | | Market | | Do not change to factory mode. |

## 2. REGISTRATION BODY INTEGRATED UNIT (FUNCTION SETTING)

**CAUTION:**
**For the body integrated unit, function selection is available to control the entire vehicle systems. It is possible to control the original functions of vehicle when registrations of body integrated unit and function setting are corresponded to vehicle equipment.**
**If registrations and function setting are different from vehicle equipment, vehicle system does not operate normally and diagnosis cannot be performed correctly. Pay attention to following item.**
- **Be sure to correspond registrations, or User Customizing settings to vehicle equipment.**
- **Do not change the settings of vehicle improperly.**
- **Make sure that the key illumination does not blink with ignition switch ON, or that the body integrated unit registration item, "Factory initial setting", is set as "Market". If "Factory initial setting" is set to "Factory", key illumination blinks when ignition key is turned ON, to notify that the settings are unconfirmed.**
- **Key illumination does not blink with ignition switch turned to ON and go off with door closed.**
- **Be sure to register immobilizer if body integrated unit is replaced with a new part.**
- **Make a registration of immobilizer when the parts related to immobilizer have been replaced. Refer to the "REGISTRATION MANUAL FOR IMMOBILIZER".**

1) On «Main Menu» display, select {Each System Check}.
2) On «System Selection Menu» display, select {Integ. unit mode}.
3) Click the [OK] button after the control module name (integrated unit) is displayed.
4) On «Integ. unit mode failure diag.» display, select {Work Support}.
5) On «Work Support» display, select {Unit customizing}.
6) Change the setting to the contents saved at confirmation of current setting.

**CAUTION:**
- **To perform normal operation of vehicle and diagnosis, the above settings must match the actual vehicle equipment.**
- **When the body integrated unit is new or in Factory mode, the key illumination blinks, and user customizing is incomplete. Check the user customizing settings.**
- **Be sure not to change Factory initial setting except when installing a new body integrated unit.**

NOTE:
"Factory" mode:
- Body integrated unit has not been set yet. It can be recognized by key illumination blinking with ignition switch turned to ON.
- All replacement body integrated units are set to "Factory" mode. When replacing a body integrated unit, be sure to perform the registration operation.

"Market" mode:
- Each settings have been set. It can be recognized by key ring illumination coming on in concocting with room light and going off with ignition switch turned to ON.

7) Perform the Factory initial setting. On the «Unit customizing» display screen of Subaru Select Monitor, select the {Factory initial setting}.
8) Change the mode from Factory to Market.
9) Turn the ignition switch to OFF to settle the setting.
10) Change the Subaru Select Monitor system selection to «Immobilizer» to register the immobilizer key.
11) Perform the registration according to the procedures of the "IMMOBILIZER REGISTRATION OPERATION MANUAL".
12) When key registration is completed, "Do you want to register remote engine start?" is displayed. Perform registration only for equipped models.
13) Perform the User Customizing. <Ref. to BC(diag)-15, OPERATION, User Customizing.>

NOTE:
For detailed operation procedures, refer to "PC application help for Subaru Select Monitor".

# 11.Function Check

## A: OPERATION

NOTE:
In order to check the body integrated unit function, inspect the body integrated unit and actuator using Subaru Select Monitor without operating switches.
1) On «Main Menu» display, select {Each System Check}.
2) On «System Selection Menu» display, select {Integ. unit mode}.
3) On «Integ. unit mode failure diag.» display, select {Work Support}.
4) On «Work Support» display, select {Active Test}.
5) Select an item to be operated on «Active Test» display, and press the [OK] button.
6) Pressing [Next] starts, [End] cancels the operation and [OK] returns to the System Operation Check Mode display screen.

NOTE:
• If not equipped (based on area or condition), process will not go on.
• For detailed operation procedures, refer to “PC application help for Subaru Select Monitor”.

# 12.List of Diagnostic Trouble Code (DTC)

## A: LIST

| DTC | Item | Content of diagnosis | Note |
|---|---|---|---|
| None | Communication for Initializing Impossible | Subaru Select Monitor communication is open or shorted. | <Ref. to LAN(diag)-9, COMMUNICATION FOR INITIALIZING IMPOSSIBLE, Subaru Select Monitor.> |
| B1100 | Integ. Unit System Error | Body integrated unit internal error | <Ref. to BC(diag)-21, DTC B1100 INTEG. UNIT SYSTEM ERROR, Diagnostic Procedure with Diagnostic Trouble Code (DTC).> |
| B1101 | BATT P/Supply Malfunction Cont | Voltage malfunction caused by poor contact of battery power supply control circuits | <Ref. to BC(diag)-22, DTC B1101 BATT P/SUPPLY MALFUNCTION CONT, Diagnostic Procedure with Diagnostic Trouble Code (DTC).> |
| B1102 | BATT P/Supply Malfunction Backup | Voltage malfunction caused by poor contact of battery power supply backup circuits | <Ref. to BC(diag)-24, DTC B1102 BATT P/SUPPLY MALFUNCTION BACKUP, Diagnostic Procedure with Diagnostic Trouble Code (DTC).> |
| B1103 | Ignition Power Failure | Voltage malfunction caused by poor contact of IGN power supply circuits | <Ref. to BC(diag)-26, DTC B1103 IGNITION POWER FAILURE, Diagnostic Procedure with Diagnostic Trouble Code (DTC).> |
| B1104 | ACC Power Failure | Voltage malfunction caused by poor contact of ACC power supply circuits | <Ref. to BC(diag)-28, DTC B1104 ACC POWER FAILURE, Diagnostic Procedure with Diagnostic Trouble Code (DTC).> |
| B1105 | Key Interlock Circuit Abnormal | GND-output short of key interlock circuit | <Ref. to BC(diag)-30, DTC B1105 KEY INTERLOCK CIRCUIT ABNORMAL, Diagnostic Procedure with Diagnostic Trouble Code (DTC).> |
| B1106 | Shift Lock Circuit Failure | Voltage malfunction caused by poor contact of shift lock circuits | <Ref. to BC(diag)-32, DTC B1106 SHIFT LOCK CIRCUIT FAILURE, Diagnostic Procedure with Diagnostic Trouble Code (DTC).> |
| B1401 | M Collation NG | Malfunction related immobilizer | <Ref. to BC(diag)-34, DTC B1401 M COLLATION NG, Diagnostic Procedure with Diagnostic Trouble Code (DTC).> |
| B1402 | Immobilizer Key Collation NG | Malfunction related immobilizer | <Ref. to BC(diag)-34, DTC B1402 IMMOBILIZER KEY COLLATION NG, Diagnostic Procedure with Diagnostic Trouble Code (DTC).> |
| B1405 | SCU Collation NG | Malfunction related immobilizer | <Ref. to BC(diag)-34, DTC B1405 SCU COLLATION NG, Diagnostic Procedure with Diagnostic Trouble Code (DTC).> |
| B1406 | SCU_EEPROM_NG | Malfunction of security control module | <Ref. to BC(diag)-34, DTC B1406 SCU_EEPROM_NG, Diagnostic Procedure with Diagnostic Trouble Code (DTC).> |
| B1407 | M Communication Abnormal | Communication failure between body integrated unit and combination meter | <Ref. to BC(diag)-34, DTC B1407 M COMMUNICATION ABNORMAL, Diagnostic Procedure with Diagnostic Trouble Code (DTC).> |
| B1408 | Meter EEPROM Abnormal | Combination meter malfunction | <Ref. to BC(diag)-34, DTC B1408 METER EEPROM ABNORMAL, Diagnostic Procedure with Diagnostic Trouble Code (DTC).> |
| B1409 | SCU Communication Abnormal | Communication failure between body integrated unit and security control module | <Ref. to BC(diag)-34, DTC B1409 SCU COMMUNICATION ABNORMAL, Diagnostic Procedure with Diagnostic Trouble Code (DTC).> |
| B1410 | Transponder Communication Abnormal | Communication failure between key and body integrated unit | <Ref. to BC(diag)-34, DTC B1410 TRANSPONDER COMMUNICATION ABNORMAL, Diagnostic Procedure with Diagnostic Trouble Code (DTC).> |
| B1411 | Immobilizer Antenna Abnormal | Faulty antenna | <Ref. to BC(diag)-34, DTC B1411 IMMOBILIZER ANTENNA ABNORMAL, Diagnostic Procedure with Diagnostic Trouble Code (DTC).> |
| B1500 | Keyless UART Com. Malfunction | Open or short circuit in keyless UART circuit | <Ref. to BC(diag)-35, DTC B1500 KEYLESS UART COM. MALFUNCTION, Diagnostic Procedure with Diagnostic Trouble Code (DTC).> |

# 13.Diagnostic Procedure with Diagnostic Trouble Code (DTC)

## A: DTC B1100 INTEG. UNIT SYSTEM ERROR

**DTC DETECTING CONDITION:**
System error in body integrated unit
**TROUBLE SYMPTOM:**
LAN communication immobilizer function may not be executed normally.

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK DTC.**<br>Check DTC indicated by body integrated unit. | Is B1100 current malfunction? | Go to step **2**. | Temporary EEPROM access error occurred. |
| 2 | **CHECK CONNECTOR.**<br>1) Turn the ignition switch to OFF.<br>2) Disconnect the body integrated unit connector.<br>3) Connect the disconnected connectors.<br>4) Read the DTC of body integrated unit using Subaru Select Monitor. | Is B1100 current malfunction? | Replace the body integrated unit. <Ref. to SL-78, REMOVAL, Body Integrated Unit.> | Temporary EEPROM access error occurred. |

# B: DTC B1101 BATT P/SUPPLY MALFUNCTION CONT

**DTC DETECTING CONDITION:**

- Voltage malfunction caused by poor contact of battery power supply control circuit
- Battery voltage of body integrated unit is not within the 8.5 — 16.5 V range.

**TROUBLE SYMPTOM:**

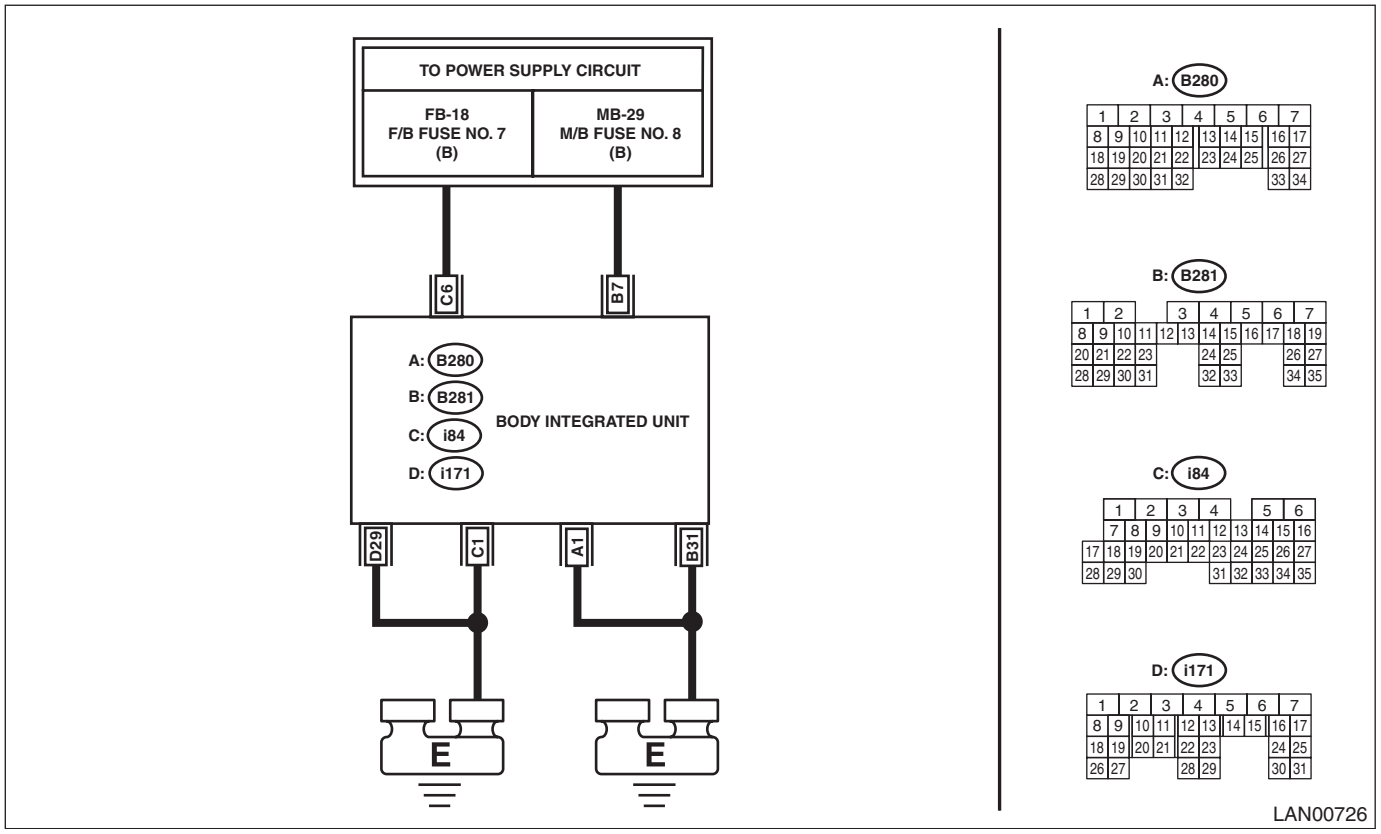
Functions of body integrated unit stop.

NOTE:

When B1102 BATT P/SUPPLY MALFUNCTION BACKUP is output at the same time, all the function of body integrated unit may not operate.

**WIRING DIAGRAM:**

Immobilizer system <Ref. to WI-100, WIRING DIAGRAM, Immobilizer System.>



| | Step | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK DTC.**<br>Read the DTC of body integrated unit using Subaru Select Monitor. | Is B1101 current malfunction? | Go to step **2**. | Go to step **5**. |
| 2 | **CHECK DTC.**<br>1) Turn the ignition switch to OFF.<br>2) Disconnect and then connect the body integrated unit connector.<br>3) Wait approx. 2 minutes.<br>4) Turn the ignition switch to ON.<br>5) Read the DTC of body integrated unit using Subaru Select Monitor. | Is B1101 current malfunction? | Go to step **3**. | Go to step **5**. |
| 3 | **CHECK FUSE.**<br>1) Turn the ignition switch to OFF.<br>2) Check the fuse. | Is the fuse OK? | Go to step **4**. | Replace the defective fuse. |

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 4 | **CHECK HARNESS.**<br>1) Disconnect the body integrated unit connector.<br>2) Using the tester, measure the voltage between terminals.<br>***Connector & terminal***<br>***(i84) No. 6 (+) — Chassis ground (–):*** | Is the voltage 8.5 — 16.5 V? | Replace the body integrated unit. <Ref. to SL-78, REMOVAL, Body Integrated Unit.> | Repair the harness between body integrated unit and fuse. |
| 5 | **CHECK CONNECTOR.**<br>1) Turn the ignition switch to OFF.<br>2) Disconnect the body integrated unit connector. | Is there poor contact of connector? | Repair or replace the poor contact of connector. | A temporary change of voltage occurred. |

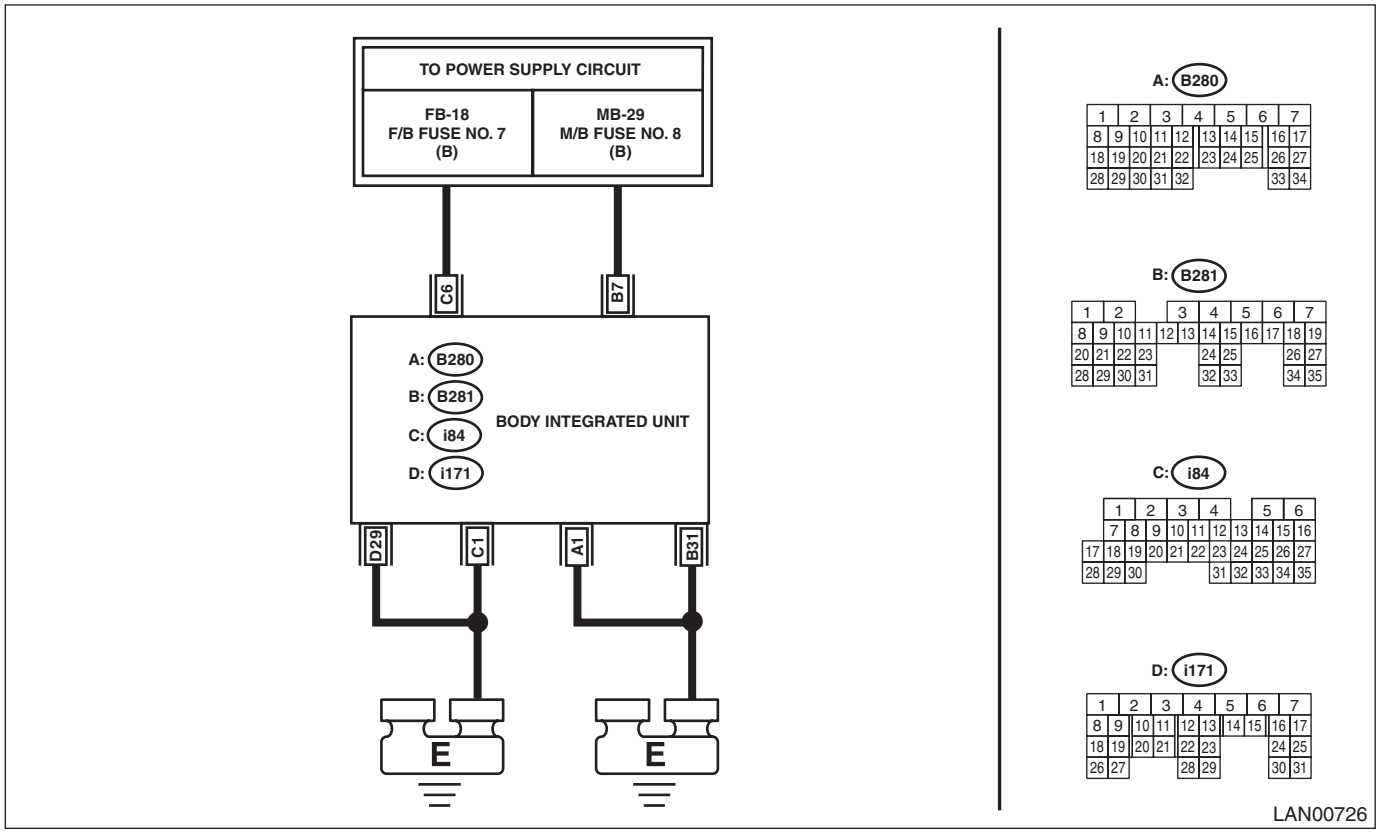
## C: DTC B1102 BATT P/SUPPLY MALFUNCTION BACKUP

**DTC DETECTING CONDITION:**
Voltage malfunction caused by poor contact of battery power supply backup circuits

**TROUBLE SYMPTOM:**
Illuminations for the keyless entry, map light, luggage light, trunk light, room light, and ignition switch do not turn on.

NOTE:
When B1101 BATT P/SUPPLY MALFUNCTION CONT. is output at the same time, all function of body integrated unit may not operate.

**WIRING DIAGRAM:**
Immobilizer system <Ref. to WI-100, WIRING DIAGRAM, Immobilizer System.>

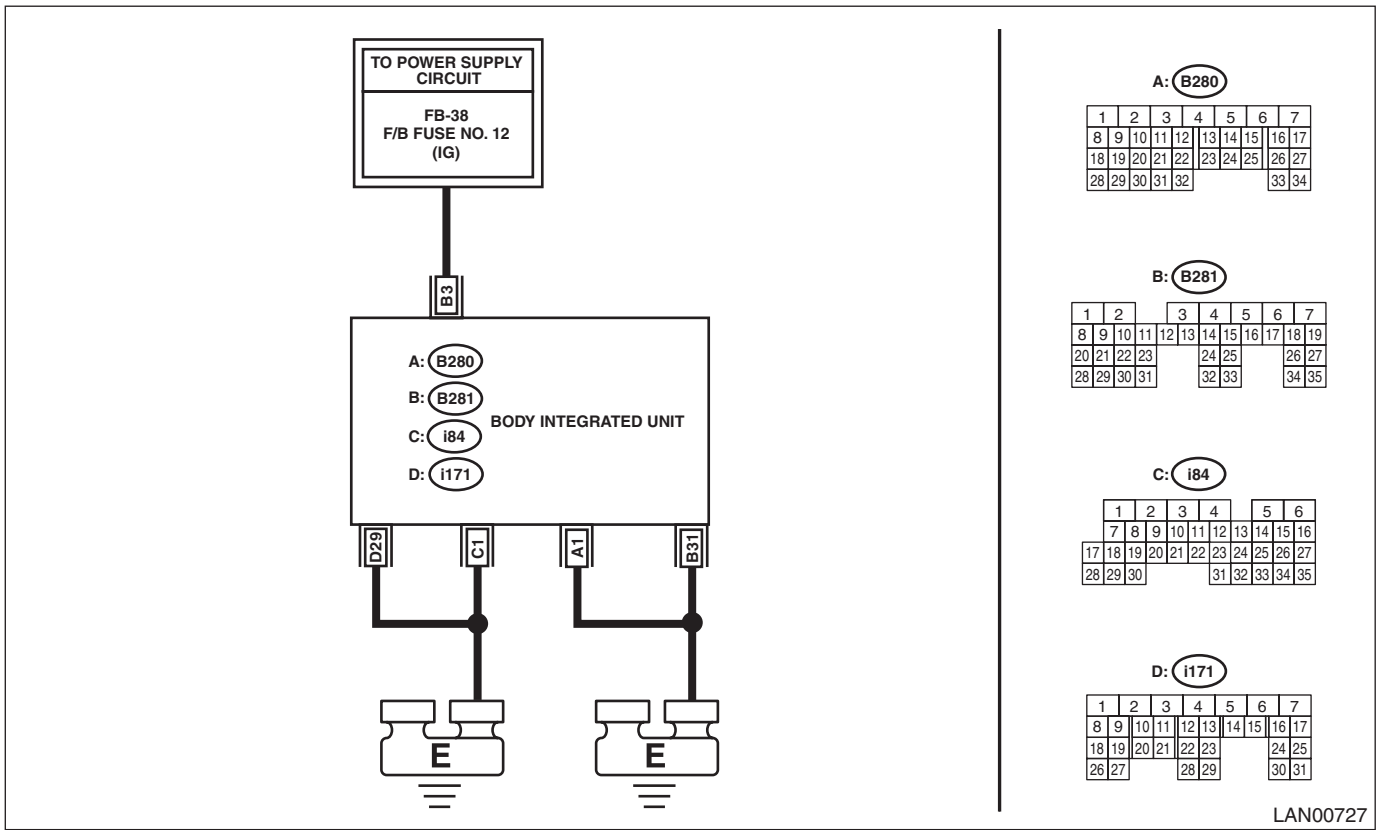


| Step | | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK DTC.**<br>Read the DTC of body integrated unit using Subaru Select Monitor. | Is B1102 current malfunction? | Go to step **2**. | Go to step **5**. |
| 2 | **CHECK DTC.**<br>1) Turn the ignition switch to OFF.<br>2) Disconnect and then connect the body integrated unit connector.<br>3) Wait approx. 2 minutes.<br>4) Turn the ignition switch to ON.<br>5) Read the DTC of body integrated unit using Subaru Select Monitor. | Is B1102 current malfunction? | Go to step **3**. | Go to step **5**. |
| 3 | **CHECK FUSE.**<br>1) Turn the ignition switch to OFF.<br>2) Check the fuse. | Is the fuse OK? | Go to step **4**. | Replace the defective fuse. |

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 4 | **CHECK HARNESS.**<br>1) Disconnect the body integrated unit connector.<br>2) Using the tester, measure the voltage between terminals.<br>***Connector & terminal***<br>***(B281) No. 7 (+) — Chassis ground (–):*** | Is the voltage 8.5 — 16.5 V? | Replace the body integrated unit. <Ref. to SL-78, REMOVAL, Body Integrated Unit.> | Repair the harness between body integrated unit and fuse. |
| 5 | **CHECK CONNECTOR.**<br>1) Turn the ignition switch to OFF.<br>2) Disconnect the body integrated unit connector. | Is there poor contact of connector? | Repair or replace the poor contact of connector. | A temporary change of voltage occurred. |

## D: DTC B1103 IGNITION POWER FAILURE

**DTC DETECTING CONDITION:**
Voltage malfunction caused by poor contact of IGN power supply circuits
**TROUBLE SYMPTOM:**
Symptoms such as shift lock or wiper not operating may occur.
**WIRING DIAGRAM:**
Shift lock control system <Ref. to WI-142, WIRING DIAGRAM, Shift Lock Control System.>

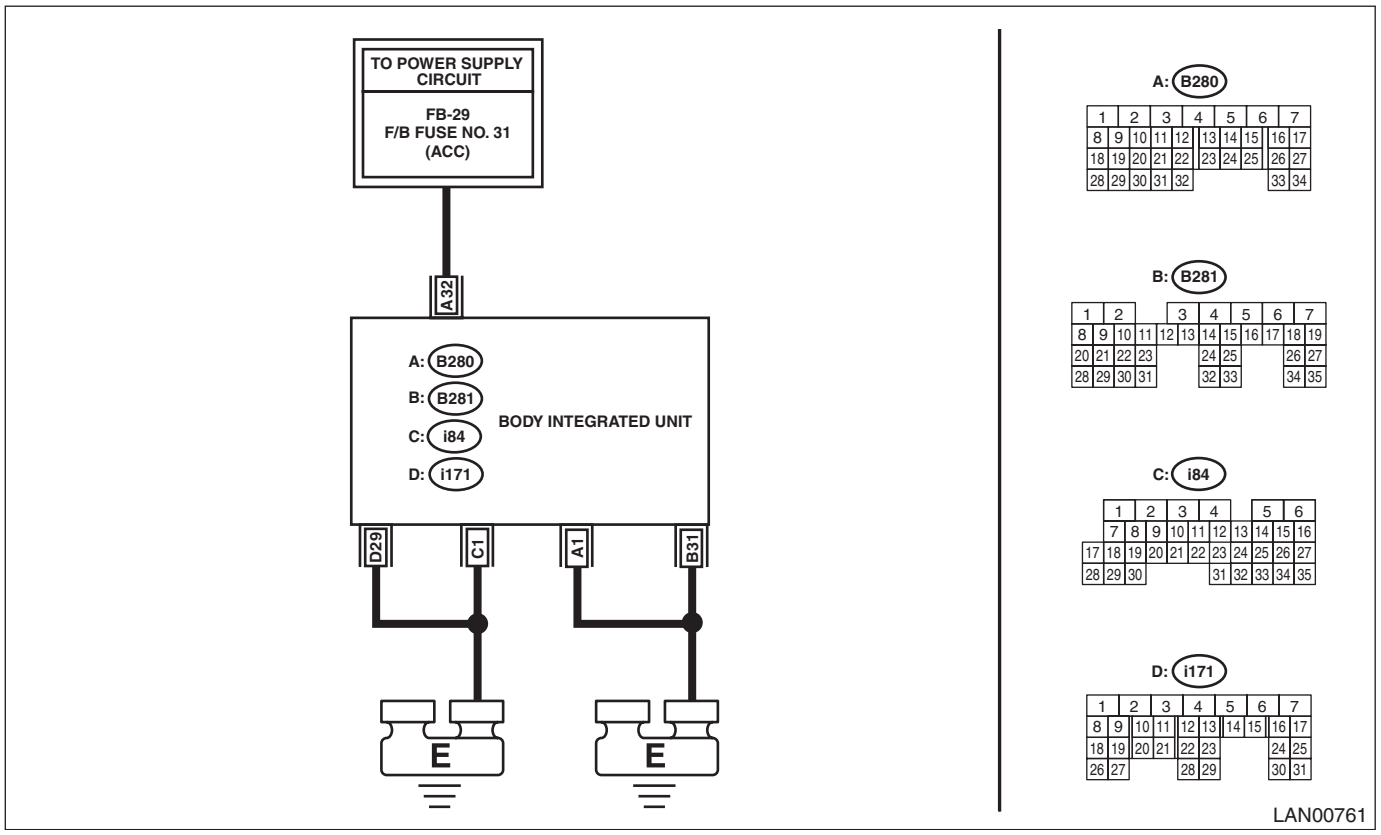


| Step | | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK DTC.**<br>Read the DTC of body integrated unit using Subaru Select Monitor. | Is B1103 current malfunction? | Go to step **2**. | Go to step **5**. |
| 2 | **CHECK DTC.**<br>1) Turn the ignition switch to OFF.<br>2) Disconnect and then connect the body integrated unit connector.<br>3) Wait approx. 2 minutes.<br>4) Turn the ignition switch to ON.<br>5) Read the DTC of body integrated unit using Subaru Select Monitor. | Is B1103 current malfunction? | Go to step **3**. | Go to step **5**. |
| 3 | **CHECK FUSE.**<br>1) Turn the ignition switch to OFF.<br>2) Check the fuse. | Is the fuse OK? | Go to step **4**. | Replace the defective fuse. |
| 4 | **CHECK HARNESS.**<br>1) Disconnect the body integrated unit connector.<br>2) Using the tester, measure the voltage between terminals.<br>***Connector & terminal***<br>***(B281) No. 3 (+) — Chassis ground (–):*** | Is the voltage 8.5 — 16.5 V? | Replace the body integrated unit. <Ref. to SL-78, REMOVAL, Body Integrated Unit.> | Repair the harness between body integrated unit and fuse. |

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 5 | **CHECK CONNECTOR.**<br>1) Turn the ignition switch to OFF.<br>2) Disconnect the body integrated unit connector. | Is there poor contact of connector? | Repair or replace the poor contact of connector. | A temporary change of voltage occurred. |

## E: DTC B1104 ACC POWER FAILURE

**DTC DETECTING CONDITION:**
Voltage malfunction caused by poor contact of ACC power supply circuit
**TROUBLE SYMPTOM:**
DRL may not illuminate.
**WIRING DIAGRAM:**
Shift lock control system <Ref. to WI-142, WIRING DIAGRAM, Shift Lock Control System.>



| Step | | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK DTC.**<br>Read the DTC of body integrated unit using Subaru Select Monitor. | Is B1104 current malfunction? | Go to step **2**. | Go to step **5**. |
| 2 | **CHECK DTC.**<br>1) Turn the ignition switch to OFF.<br>2) Disconnect and then connect the body integrated unit connector.<br>3) Wait approx. 2 minutes.<br>4) Turn the ignition switch to ON.<br>5) Read the DTC of body integrated unit using Subaru Select Monitor. | Is B1104 current malfunction? | Go to step **3**. | Go to step **5**. |
| 3 | **CHECK FUSE.**<br>1) Turn the ignition switch to OFF.<br>2) Check the fuse. | Is the fuse OK? | Go to step **4**. | Replace the defective fuse. |
| 4 | **CHECK HARNESS.**<br>1) Disconnect the body integrated unit connector.<br>2) Using the tester, measure the voltage between terminals.<br>***Connector & terminal***<br>***(B280) No. 32 (+) — Chassis ground (–):*** | Is the voltage 8.5 — 16.5 V? | Replace the body integrated unit. <Ref. to SL-78, REMOVAL, Body Integrated Unit.> | Repair the harness between body integrated unit and fuse. |

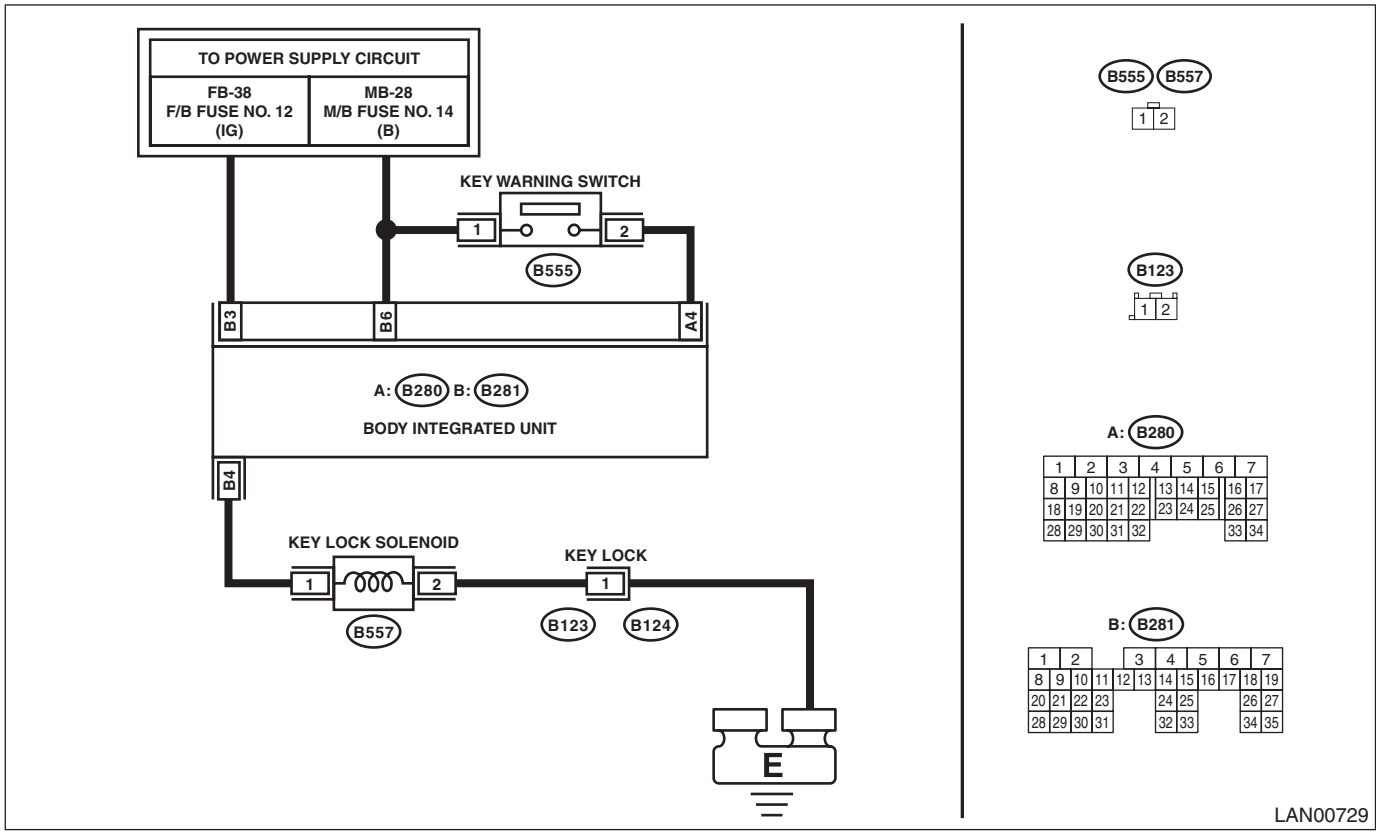
| | Step | Check | Yes | No |
|---|---|---|---|---|
| 5 | **CHECK CONNECTOR.**<br>1) Turn the ignition switch to OFF.<br>2) Disconnect the body integrated unit connector. | Is there poor contact of connector? | Repair or replace the poor contact of connector. | A temporary change of voltage occurred. |

# F: DTC B1105 KEY INTERLOCK CIRCUIT ABNORMAL

**DTC DETECTING CONDITION:**
Ground short of key interlock circuit

**TROUBLE SYMPTOM:**
Key interlock does not keep lock condition.

**WIRING DIAGRAM:**
Shift lock control system <Ref. to WI-142, WIRING DIAGRAM, Shift Lock Control System.>

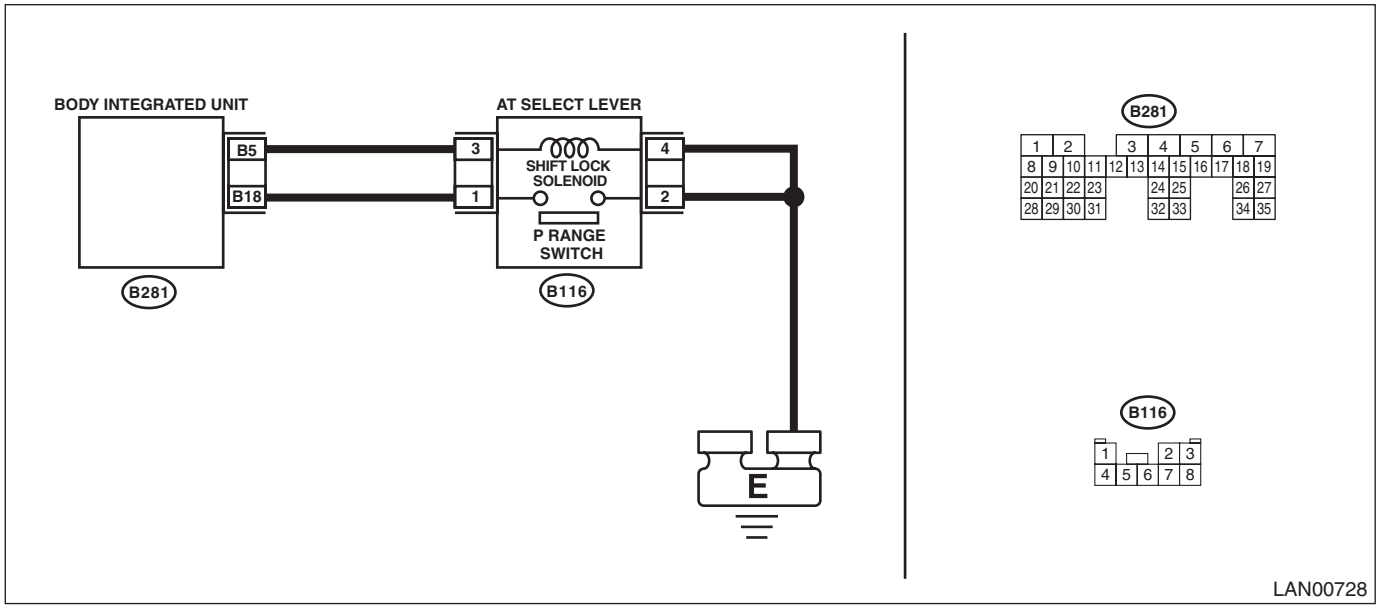


| Step | | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK DTC.**<br>1) Insert the ignition key.<br>2) Turn the ignition switch to ON.<br>3) Shift to the Neutral range.<br>4) Read the DTC of body integrated unit using Subaru Select Monitor. | Is B1105 current malfunction? | Go to step **2**. | Go to step **8**. |
| 2 | **CHECK DTC.**<br>1) Shift the select lever to P range.<br>2) Remove the ignition key.<br>3) Disconnect the key actuator connector (B557) and body integrated unit connector (B281).<br>4) Connect the disconnected connectors.<br>5) Insert the ignition key.<br>6) Turn the ignition switch to ON and shift into Neutral.<br>7) Read the DTC of body integrated unit using Subaru Select Monitor. | Is B1105 current malfunction? | Go to step **3**. | Go to step **8**. |

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 3 | **CHECK KEY ACTUATOR.**<br>1) Turn the ignition switch to OFF.<br>2) Disconnect the key actuator connector (B557).<br>3) Measure the resistance between key actuator connectors.<br>***Connector & terminal***<br>***(B557) No. 1 — No. 2:*** | Is the resistance 12 — 14.5 Ω? | Go to step **4**. | Replace the key actuator. |
| 4 | **CHECK KEY ACTUATOR.**<br>Connect the battery terminals to the key actuator.<br>***Terminals***<br>***(B557) No. 2 — positive terminal:***<br>***(B557) No. 1 — ground terminal:*** | Is the actuator activated and then key locked? | Go to step **5**. | Replace the key actuator. |
| 5 | **CHECK HARNESS.**<br>1) Disconnect the body integrated unit connector (B281).<br>2) Measure the resistance between body integrated unit and key actuator using tester.<br>***Connector & terminal***<br>***(B557) No. 1 — (B281) No. 4:*** | Is the resistance less than 10 Ω? | Go to step **6**. | Repair or replace the open circuit of harness. |
| 6 | **CHECK HARNESS.**<br>Measure the resistance between body integrated unit and chassis ground using tester.<br>***Connector & terminal***<br>***(B281) No. 4 — Chassis ground:*** | Is the resistance 1 MΩ or more? | Go to step **7**. | Repair or replace the short circuit of the harness. |
| 7 | **CHECK HARNESS.**<br>1) Connect the body integrated unit.<br>2) Turn the ignition switch to ON.<br>3) Measure the voltage between body integrated unit and chassis ground using tester.<br>***Connector & terminal***<br>***(B281) No. 4 (+) — Chassis ground (–):*** | Is the voltage 6 V or more? | Repair or replace the short circuit of the harness. | Replace the body integrated unit. <Ref. to SL-78, REMOVAL, Body Integrated Unit.> |
| 8 | **CHECK CONNECTOR.**<br>1) Turn the ignition switch to OFF.<br>2) Disconnect the body integrated unit connector (B281) and key actuator connector (B557). | Is there poor contact at disconnected connector terminal? | Repair the terminal where poor contact exists, or replace harness. | It is possible that temporary poor contact occurs. |

## G: DTC B1106 SHIFT LOCK CIRCUIT FAILURE

**DTC DETECTING CONDITION:**
Open or power supply-output short, GND-output short in shift lock circuit.
**TROUBLE SYMPTOM:**
Shift lock does not be released or remain locked.
**WIRING DIAGRAM:**
Shift lock control system <Ref. to WI-142, WIRING DIAGRAM, Shift Lock Control System.>



| Step | | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK DTC.**<br>1) Turn the ignition switch to ON.<br>2) Keep the Parking range for approx. 5 seconds.<br>3) Read the DTC of body integrated unit using Subaru Select Monitor. | Is B1106 current malfunction? | Go to step **6**. | Go to step **2**. |
| 2 | **CHECK DTC.**<br>1) Turn the ignition switch to OFF.<br>2) Disconnect the shift lock solenoid connector.<br>3) Connect the disconnected connectors.<br>4) Turn the ignition switch to ON, then keep the Parking range for approx. 5 seconds.<br>5) Read the DTC of body integrated unit using Subaru Select Monitor. | Is B1106 current malfunction? | Go to step **3**. | Go to step **7**. |
| 3 | **CHECK HARNESS.**<br>1) Turn the ignition switch to OFF.<br>2) Disconnect the shift lock solenoid connector.<br>3) Using the tester, measure the resistance between terminals.<br>***Connector & terminal***<br>***(B116) No. 4 — Chassis ground:*** | Is the resistance less than 10 Ω? | Go to step **4**. | Repair or replace the open circuit of harness. |
| 4 | **CHECK SHIFT LOCK SOLENOID.**<br>Using a tester, measure the resistance between shift lock solenoid terminals.<br>***Connector & terminal***<br>***(B116) No. 4 — No. 3:*** | Is the resistance less than 27 — 31 Ω? | Go to step **5**. | Replace the shift lock solenoid. <Ref. to CS-33, DISASSEMBLY, Select Lever.> |

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 5 | **CHECK SHIFT LOCK SOLENOID.**<br>Connect the battery terminal to shift lock solenoid.<br>***Connector & terminal***<br>***(B116) No. 3 — positive terminal:***<br>***(B116) No. 4 — ground terminal:*** | Does the shift lock solenoid operate and then release the lock? | Go to step **6**. | Replace the shift lock solenoid. <Ref. to CS-33, DISASSEMBLY, Select Lever.> |

| 6 | **CHECK CONTROL MODULE.**<br>1) Turn the ignition switch to OFF.<br>2) Remove the keyless entry control module.<br>3) Install a keyless entry control module that was operating normally on another vehicle. | Does it operate with the remote control key of another vehicle? | Replace the keyless entry control module. <Ref. to SL-75, REMOVAL, Keyless Entry Control Module.> | Replace the body integrated unit. |
| 7 | **CHECK CONNECTOR.**<br>Check the connector used for keyless communication for poor contact. | Is there poor contact of connector? | Repair the connector that has poor contact, or replace harness. | It is possible that temporary poor communication occurs. Delete the DTC. |

# 14.General Diagnostic Table

## A: INSPECTION

Using the Subaru Select Monitor, read DTC, or check the following data on the current data display to make judgments.

| Item | Operation | Specifications | | Note |
|---|---|---|---|---|
| | | YES | NO | |
| Diagnostic code | DTC is not displayed when inspecting all DTCs. | DTC is not displayed. | Perform the diagnosis according to DTC. | — |
| Clearance light<br>(Low beam)<br>(High beam) | Clearance light and low/high beams illuminate normally when the switch is operated. Indicator in the meter illuminates at the same time. | System is normal. | Check the lighting system, combination meter system and LAN system. | — |
| Auto light | When the area around the light control sensor is darkened after the ignition switch and the lighting switch (AUTO) are turned to ON, the clearance light and the low beam illuminate after 15 seconds. Indicator in the combination meter illuminates at the same time. | System is normal. | Check the lighting system, combination system and LAN system. | — |
| | When the ignition switch and the lighting switch (AUTO) are turned to ON after the area around the light control sensor is darkened, the clearance light and the low beam illuminate immediately. Indicator in the combination meter illuminates at the same time. | | | — |
| Fog light | Front fog light illuminates when the switch is operated. Indicator in the meter illuminates at the same time. | System is normal. | Check the lighting system, combination meter system and LAN system. | — |
| Rear defogger | Rear defogger operates when the switch is operated. The indicator illuminates at the same time. | System is normal. | Check the rear window defogger system and A/C system. | — |
| Wiper deicer | Wiper deicer operates when the switch is operated. The indicator illuminates at the same time.<br>When the ambient temperature is 5°C (41°F) or higher, press the switch 3 seconds or more to forcibly activate the system. | System is normal. | Check the wiper deicer system and A/C system. | Wiper deicer operates when “Wiper deicer setting” of the body integrated unit is set to on. |
| DRL | After starting the engine and releasing the parking brake, the DRL illuminates. | System is normal. | Check the lighting system and LAN system. | — |
| Rear wiper | Rear wiper operates when the switch is operated. | System is normal. | Check wiper or washer system. | Depending on user customizing “Sedan/Wagon Setting” of the body integrated unit, vehicle sensory time varies. |
| Key interlock | • Key cannot be removed in other than P range.<br>• Key can be removed in other than P range. | System is normal. | Check the body control system. | — |

# General Diagnostic Table

| Item | Operation | Specifications | | Note |
|---|---|---|---|---|
| | | YES | NO | |
| Shift lock | The select lever can be moved from the P range to other ranges only when the brake pedal is depressed with IG ON. | System is normal. | Check the body control system. | — |
| Key warning switch alarm | When the driver's door is open without the key removed, the buzzer sounds. | System is normal. | Check the combination meter and body control system. | — |
| Door lock | The doors lock/unlock when the door switch is operated. Rear gate/ trunk opens when the rear gate/ trunk release switch is operated. | System is normal. | Check the security & lock and body control system. | If user customizing "Sedan/Wagon Setting" is different, trunk and rear gate do not open. |
| Keyless entry | The lock locks/unlocks when the keyless transmitter is operated. Trunk/rear gate unlocks when trunk/ rear gate unlock button is operated. | System is normal. | Check the keyless entry and body control system. | — |
| Answer back | Answer-back operates when the keyless entry locks/unlocks. | System is normal. | Check the security & lock system, and LAN system. | — |
| Room light | The light illuminates/goes off according to the door open/close. | System is normal. | Check the room light system, security & lock system, and LAN system. | — |
| Map light | The light illuminates/goes off according to the door open/close. (Except for rear gate) | System is normal. | Check the spot map light, security & lock system, and LAN system. | — |
| Luggage/trunk light | The light illuminates/goes off according to the rear gate open/ close. | System is normal. | Check the luggage/ trunk light, security & lock system, and LAN system. | — |
| Key illumination | The light illuminates/goes off according to the driver's door open/ close. | System is normal. | Check the ignition switch illumination, security & lock, and LAN system. | — |
| Illumination control | Illumination volume control is available. | System is normal. | Check the illumination control switch, combination meter, and body control system. | Illumination volume control is not available when user customizing "Illumination Control On/Off" of the body integrated unit is set to off. |
| Engine start | Engine starts. | System is normal. | Check the engine system, immobilizer, and LAN system. | — |
| Vehicle security | Security monitoring/security canceling can be performed by operating the keyless entry. | System is normal. | Check the security & lock system, and LAN system. | Security monitoring starts and at the same time the warning buzzer sounds, when impact sensor is not connected and user customizing "Impact Sensor" of the body integrated unit is set to on. |

# WIRING SYSTEM SECTION

This service manual has been prepared to provide SUBARU service personnel with the necessary information and data for the correct maintenance and repair of SUBARU vehicles.
This manual includes the procedures for maintenance, disassembling, reassembling, inspection and adjustment of components and diagnostics for guidance of experienced mechanics.
Please peruse and utilize this manual fully to ensure complete repair work for satisfying our customers by keeping their vehicle in optimum condition. When replacement of parts during repair work is needed, be sure to use SUBARU genuine parts.

All information, illustration and specifications contained in this manual are based on the latest product information available at the time of publication approval.

FUJI HEAVY INDUSTRIES LTD. G1140BE6

# 1. Basic Diagnostic Procedure

## A: BASIC PROCEDURES

### 1. GENERAL DESCRIPTION

The most important purpose of diagnostics is to quickly determine which part is malfunctioning, to save time and labor.

### 2. IDENTIFICATION OF TROUBLE SYMPTOM

Determine what the problem is based on the symptom.

### 3. PROBABLE CAUSE OF TROUBLE

Look at the wiring diagram and check the system's circuit. Then check the switch, relay, fuse, ground, etc.

### 4. LOCATION AND REPAIR OF TROUBLE

1) Using the diagnostics, narrow down the causes.
2) If necessary, use a voltmeter, ohmmeter, etc.
3) Before replacing certain component parts (switch, relay, etc.), check the power supply, ground, for open wiring harness, poor connectors, etc. If no problem is encountered, check the component parts.

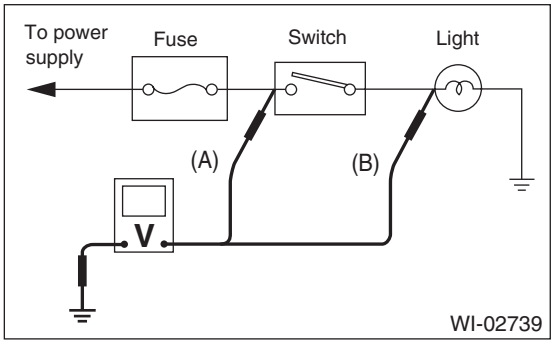
### 5. SYSTEM OPERATION CHECK

After repairing, ensure that the system operates properly.

## B: BASIC INSPECTION

### 1. VOLTAGE MEASUREMENT

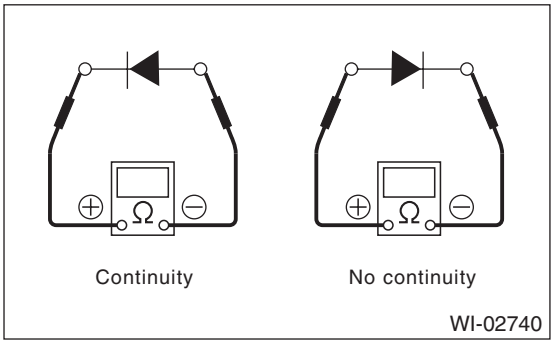
1) Using a voltmeter, connect the negative lead to a good ground point or negative battery terminal and the positive lead to the connector or component terminal.
2) Contact the positive lead of the voltmeter on connector (A). The voltmeter will indicate a voltage.
3) Touch connector (B) with the positive probe. The voltmeter will indicate no voltage.



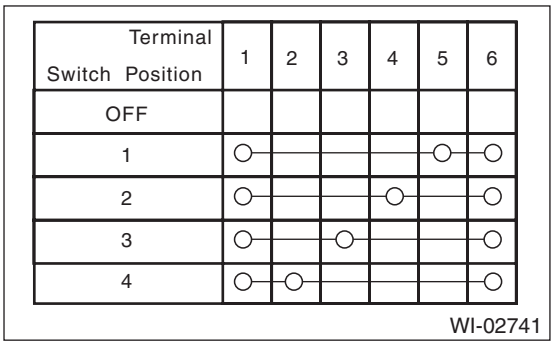
4) With the test set-up held as it is, turn the switch to ON. The voltmeter will indicate a voltage and, at the same time, the light will illuminate.
5) The circuit is in good order. If a problem such as a light failing to illuminate occurs, use the procedures outlined above to track down the malfunction.

### 2. CIRCUIT CONTINUITY CHECKS

1) Disconnect the battery terminal or connector so there is no voltage between the check points.
Contact the two leads of an ohmmeter to each of the check points.
If the circuit has diodes, reverse the two leads and check again.
2) Use an ohmmeter to check for diode continuity.
When contacting the negative lead to the diode positive side and the positive lead to the negative side, there should be continuity.
When contacting the two leads in reverse, there should be no continuity.



3) The symbol "❍ — ❍" indicates that continuity exists between two points or terminals. For example, when a switch position is at "3", continuity exists among terminals 1, 3 and 6, as shown in the table below.



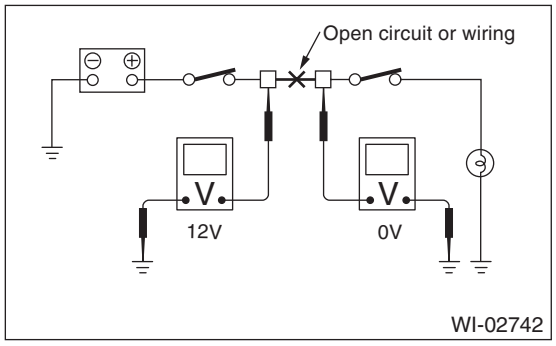
| Terminal / Switch Position | 1 | 2 | 3 | 4 | 5 | 6 |
|---|---|---|---|---|---|---|
| OFF | | | | | | |
| 1 | ○ | | | | ○ | ○ |
| 2 | ○ | | | ○ | | ○ |
| 3 | ○ | | ○ | | | ○ |
| 4 | ○ | ○ | | | | ○ |

WI-02741

## 3. HOW TO DETERMINE AN OPEN CIRCUIT

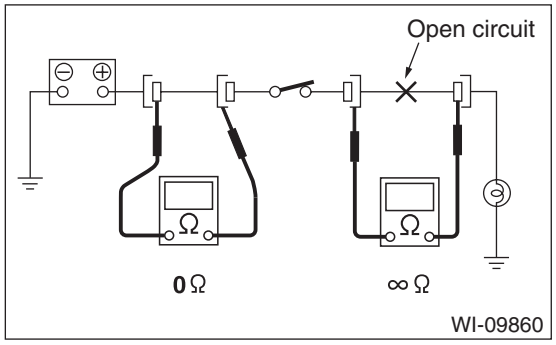
1) WITH VOLTMETER:

An open circuit is determined by measuring the voltage between respective connectors and ground using a voltmeter, starting with the connector closest to the power supply. The power supply must be turned ON so that current flows in the circuit. If voltage is not present between a particular connector and ground, the circuit between that connector and the previous connector is open.



2) WITH OHMMETER:

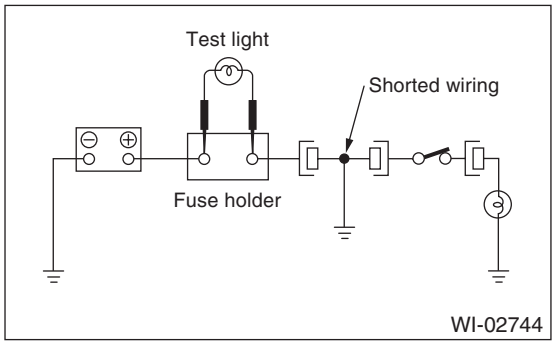
Disconnect all connectors affected, and check continuity in the wiring between adjacent connectors. When the ohmmeter indicates “infinite”, the wiring is open.



## 4. HOW TO DETERMINE A SHORT CIRCUIT

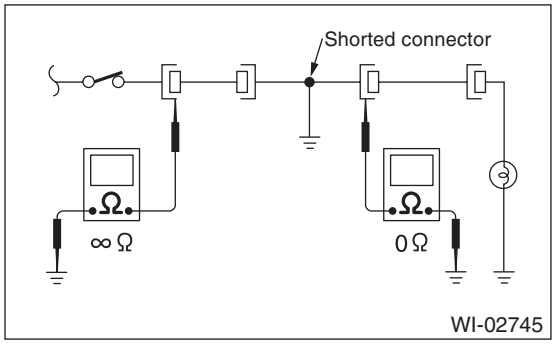
1) WITH TEST LIGHT:

Connect a test light (rated at approx. 3 watts) in place of the blown fuse and allow current to flow through the circuit. Disconnect one connector at a time from the circuit. Starting with the one located farthest from the power supply. If the test light goes out when a connector is disconnected, the wiring between that connector and the next connector (farther from the power supply) is shorted.



2) WITH OHMMETER:

Disconnect all affected connectors, and check continuity between each connector and ground. When the ohmmeter indicates continuity between a particular connector and a ground, that connector is shorted.

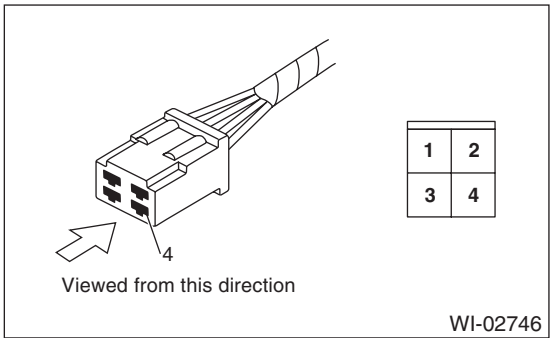


# C: HOW TO READ WIRING DIAGRAMS

## 1. WIRING DIAGRAM

The wiring diagram of each system is illustrated so that you can understand the path through which the electric current flows from the battery.
Sketches and codes are used in the diagrams. They should read as follows:

- Each connector and its terminal position are indicated by a sketch of the connector in a disconnected state which is viewed from the front.

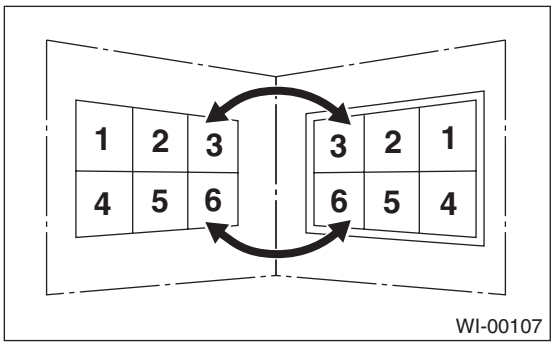


- The number of poles or pins, presence of a lock are indicated in the sketch of each connector. In the sketch, the highest pole number refers to the number of poles which the connector has. For example, the sketch of the connector shown in figure indicates the connector has 9 poles.

| Connector used in vehicle | Connector shown in wiring diagram | | |
|---|---|---|---|
| | Sketch | Symbol | Number of poles |
|  |  |  | Numbered in order from upper right to lower left. |
|  |  | | Numbered in order from upper left to lower right. |

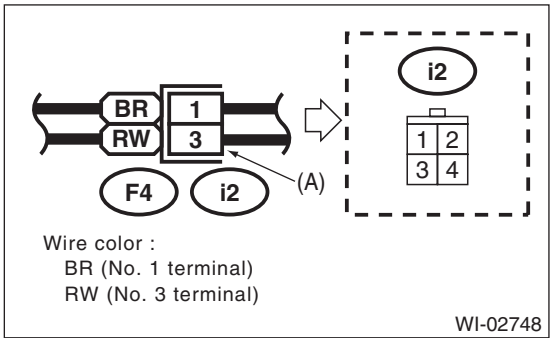
WI-02747

• When one set of connectors is viewed from the front side, the pole numbers of one connector are symmetrical to those of the other. When these two connectors are connected as a unit, the poles which have the same number are joined.

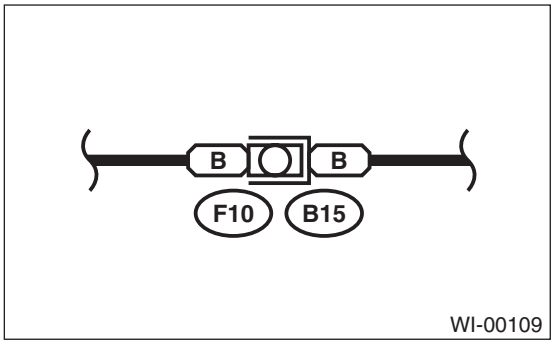


• WIRING DIAGRAM:
The connectors are numbered along with the number of poles, external colors, and mating connections in the accompanying list.
• The sketch of each connector in the wiring diagram usually shows the (A) side of the connector. The relationship between the wire color, terminal number and connector is described in the figure.

NOTE:
A wire which runs in one direction from a connector terminal sometimes may have a different color from that which runs in the other direction from that terminal.

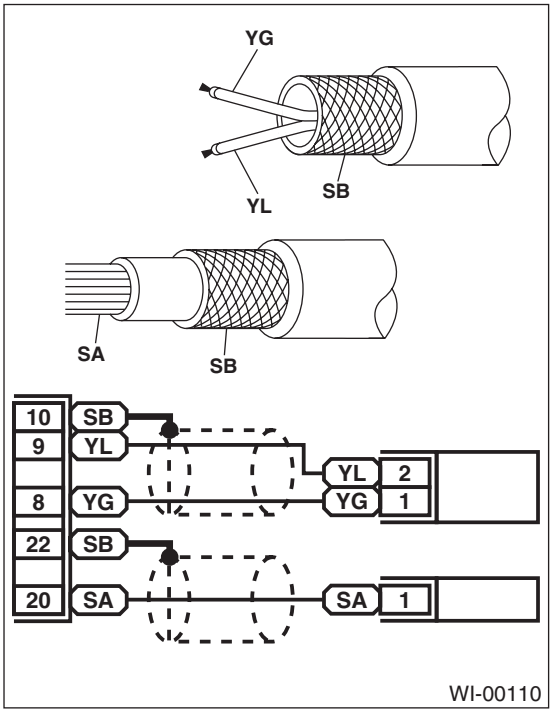


• In the wiring diagram, connectors which have no terminal number refer to one-pole types. Sketches of these connectors are omitted intentionally.

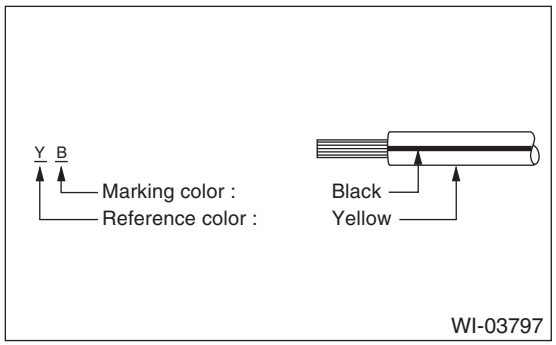


• The following color codes are used to indicate the colors of the wires.

| Color code | Color |
|---|---|
| L | Blue |
| B | Black |
| Y | Yellow |
| G | Green |
| R | Red |
| W | White |
| Br | Brown |
| Lg | Light green |
| Gr | Gray |
| P | Pink |
| Or | Orange |
| Sb | Light blue |
| V | Violet |
| SA | Sealed (inner) |
| SB | Sealed (outer) |



• The wire color code, which consists of two letters (or three letters including Br or Lg), indicates the standard color (base color of the wire covering) by its first letter and the stripe marking by its second letter.



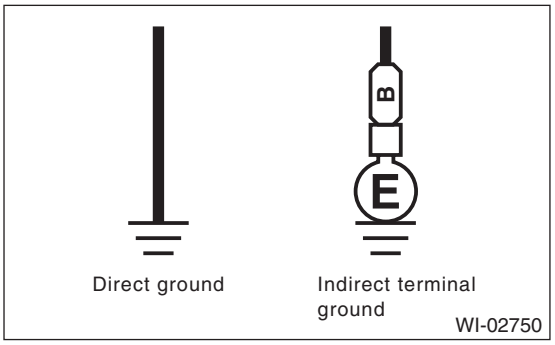
• The table lists the nominal sectional areas and allowable currents of the wires.

**CAUTION:**
**When replacing or repairing a wire, be sure to use the same size and type of the wire which was originally used.**

NOTE:
• The allowable current in the table indicates the tolerable amperage of each wire at an ambient temperature of 40°C (104°F).
• The allowable current changes with ambient temperature. Also, it changes if a bundle of more than two wires is used.

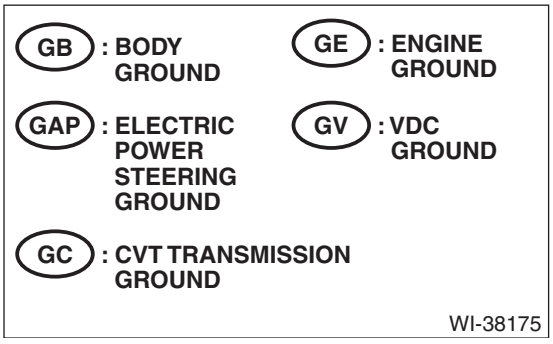
| Nominal sectional area $mm^2$ | No. of strands/ strand diameter | Outside diameter of wiring mm | Allowable current Amps/ 40°C (104°F) |
|---|---|---|---|
| 0.3 | 7/0.26 | 1.8 | 7 |
| 0.5 | 7/0.32 | 2.2 (or 2.0) | 12 |
| 0.75 | 30/0.18 | 2.6 (or 2.4) | 16 |
| 0.85 | 11/0.32 | 2.4 (or 2.2) | 16 |
| 1.25 | 16/0.32 | 2.7 (or 2.5) | 21 |
| 2 | 26/0.32 | 3.1 (or 2.9) | 28 |
| 3 | 41/0.32 | 3.8 (or 3.6) | 38 |
| 5 | 65/0.32 | 4.6 (or 4.4) | 51 |
| 8 | 50/0.45 | 5.5 | 67 |

• Each unit is either directly grounded to the body or indirectly grounds through a harness ground terminal. Different symbols are used in the wiring diagram to identify the two grounding systems.



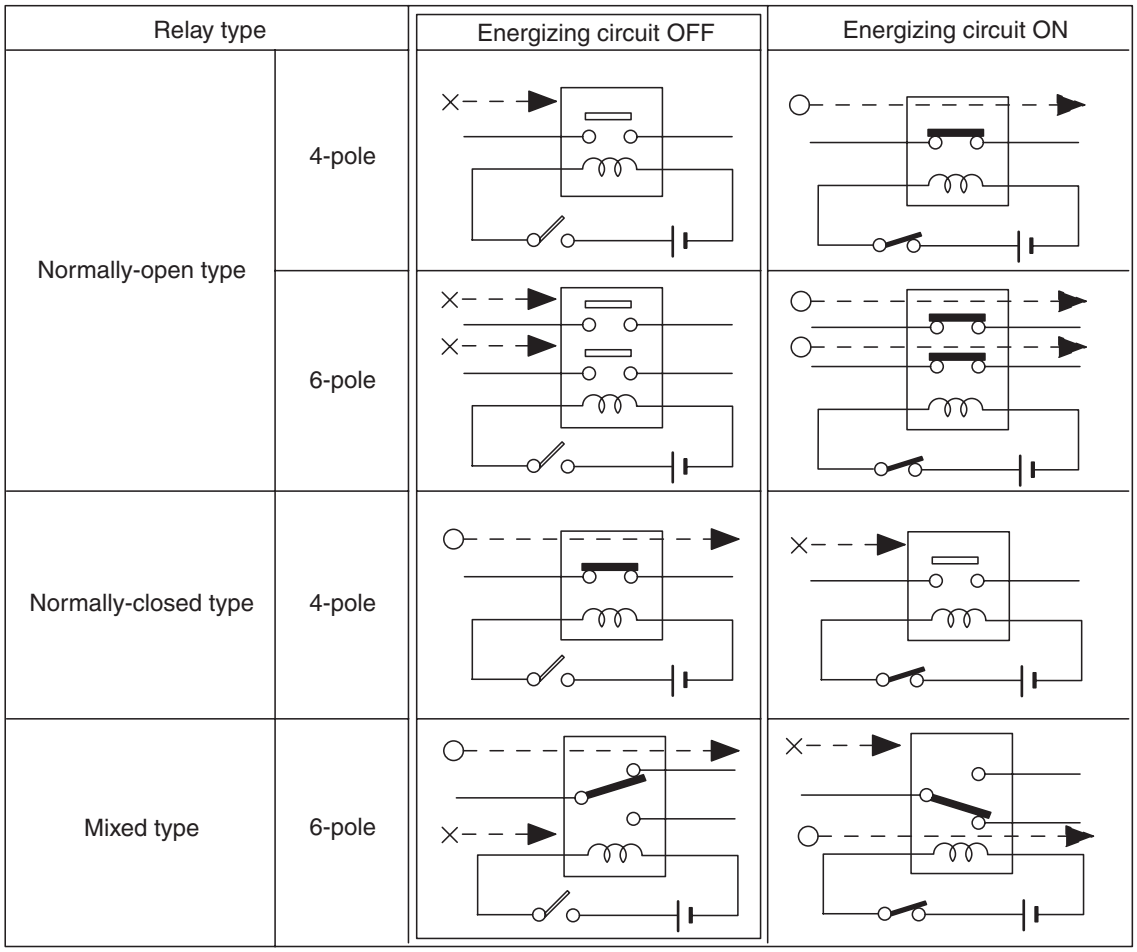
• The ground points shown in the wiring diagram refer to the following:

NOTE:
All wiring harnesses are provided with a ground point which must be securely connected.



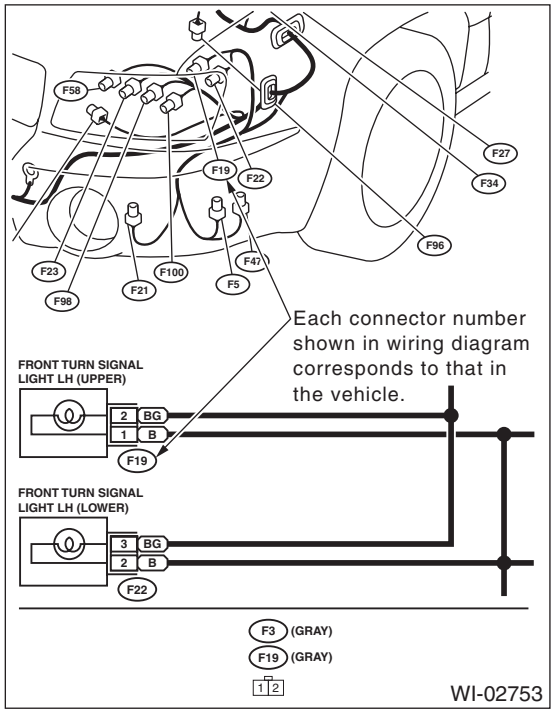
- Relays are classified as normally-open or normally-closed.

The normally-closed relay has one or more contacts. The wiring diagram shows the relay mode when the energizing circuit is OFF.



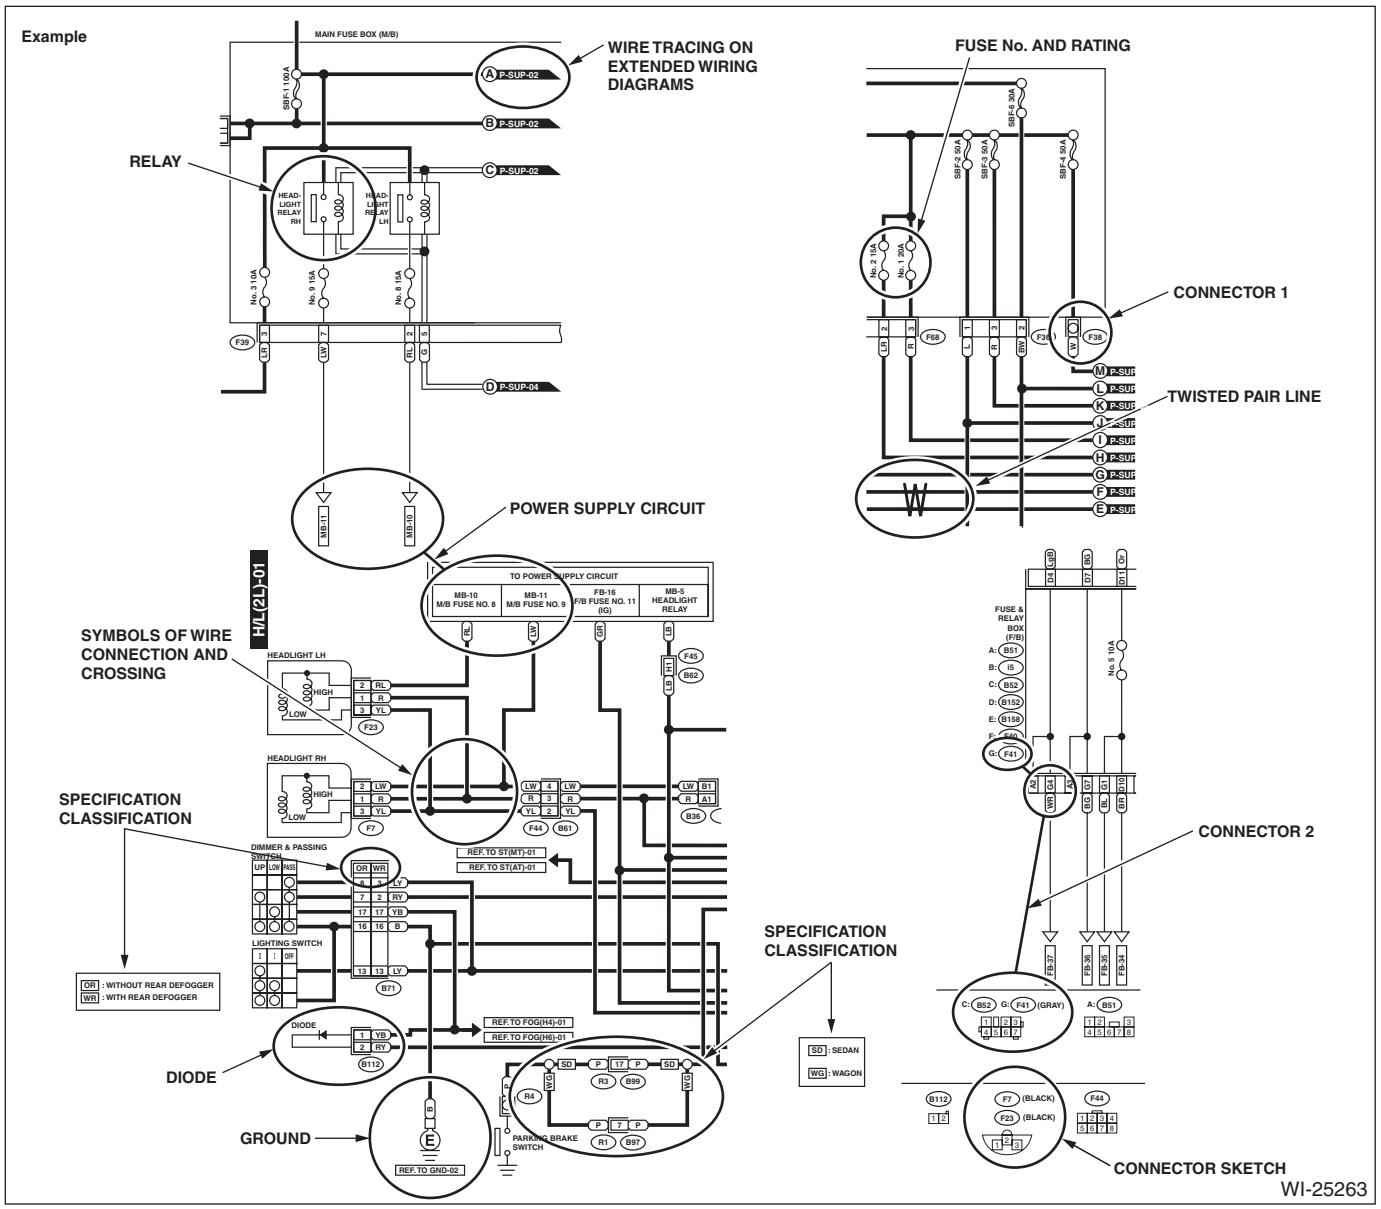
• Each connector number shown in the wiring diagram corresponds to that in the wiring harness. The location of each connector in the actual vehicle is determined by reading the first character of the connector (for example, a “F” for F8, “i” for i16, etc.) and the type of wiring harness. The first character of each connector number corresponds to the area or system of the vehicle.

| Symbol | Wiring harness and cord |
|---|---|
| F | Front wiring harness |
| B | Bulkhead wiring harness |
| E | Engine wiring harness |
| T | Transmission cord |
| D | Door cord LH & RH, Rear gate cord<br>Rear door cord LH & RH, Rear defogger cord |
| i | Instrument panel wiring harness |
| R | Rear wiring harness,<br>Fuel tank cord,<br>Roof cord, Rear gate cord |
| AB | Airbag wiring harness |



# D: SYMBOLS IN WIRING DIAGRAMS

A number of symbols are used in each wiring diagram to easily identify parts or circuits.



### 1. RELAY

A symbol used to indicate a relay.

### 2. CONNECTOR 1

The sketch of the connector indicates the one-pole types.

### 3. WIRING CONNECTION

Some wiring diagrams are indicated in foldouts for convenience. Wiring destinations are indicated where necessary by corresponding symbols. (When two pages are needed for clear indication)

### 4. FUSE NO. & RATING

The “FUSE No. & RATING” corresponds with that used in the fuse box (main fuse box, fuse and joint box).

### 5. CONNECTOR 2

- Each connector is indicated by a symbol.
- Each terminal number is indicated in the corresponding wiring diagram in an abbreviated form.
- For example, terminal number “G4” refers to No. 4 terminal of connector (G: F41) shown in the connector sketch.

### 6. CONNECTOR SKETCH

- Each connector sketch clearly identifies the shape and color of a connector as well as terminal locations. Non-colored connectors are indicated in natural color.
- When more than two types of connector number are indicated in a connector sketch, it means that the same type connectors are used.

### 7. GROUND

Each grounding point can be located easily by referring to the corresponding wiring harness.

### 8. DIODE

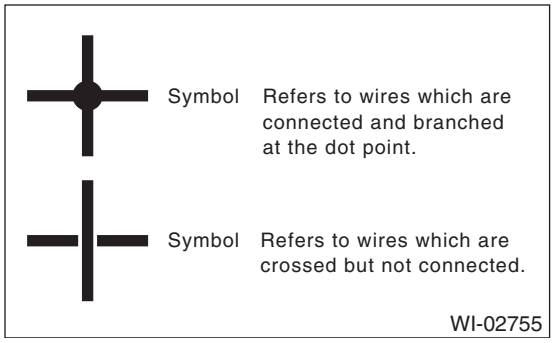
A symbol is used to indicate a diode.

### 9. WIRE TRACING ON EXTENDED WIRING DIAGRAMS

For a wiring diagram extending over at least two pages, a symbol (consisting of the same characters with arrows), facilitates wire tracing from one page to the next.

A ←→ A, B ←→ B

### 10.SYMBOLS OF WIRE CONNECTION AND CROSSING



### 11.POWER SUPPLY CIRCUIT

A symbol is used to indicate the power supply in each wiring diagram.

“MB – 5”, “MB – 6”, etc., which are used as power-supply symbols throughout the text, correspond with those shown in the “DC POWER SUPPLY CIRCUIT” in the wiring diagram.

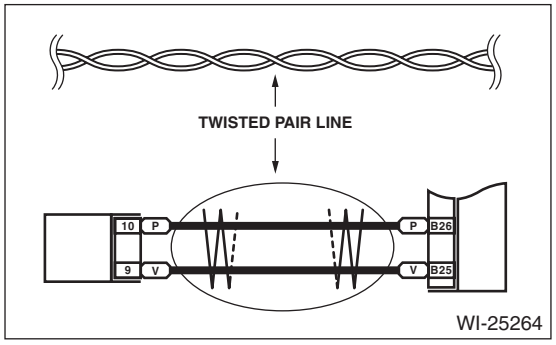
Accordingly, using the “DC POWER SUPPLY CIRCUIT” and wiring diagrams permits service personnel to understand the entire electrical arrangement of a system.

### 12.CLASSIFICATION BY SPECIFICATION

When the wiring diagram differ according to vehicle specifications, the specification difference is described by using abbreviations.

### 13.TWISTED PAIR LINE

The twisted pair line is indicated by a symbol in the wiring diagrams.



## E: CONNECTOR SYMBOL IN WIRING HARNESS

A number of connector symbols are used in each wiring diagram to easily identify the wiring harness connectors.

| Standard type: Female | | |
|---|---|---|
| Pole: From 1 to 8 | Pole: From 9 to 20 | Pole: More than 21 |
|  |  |  |
| | |  |
| Standard type: Male | | |
|  |  |  |
|  |  |  |

| Water proof type: Female | | |
|---|---|---|

## F: ABBREVIATION IN WIRING DIAGRAMS

| Abbr. | Full name |
|---|---|
| ABS | Anti-lock Brake System |
| ACC | Accessory |
| A/C | Air Conditioner |
| ASSY | Assembly |
| AT | Automatic Transmission |
| A/F | Air/Fuel (Air fuel ratio sensor) |
| ATF | Automatic Transmission Fluid |
| AUX | Auxiliary Audio Input Terminal |
| AWD | All Wheel Drive |
| B | Battery |
| CAN | Controller Area Network |
| CM | Control Module |
| CVT | Continuously Variable Transmission |
| D | Drive range or Down |
| DN | Down |
| E | Ground |
| ELCM | Evaporative Leak Check Module |
| ECO | Economy |
| ECM | Engine Control Module |
| EEPROM | Electrically Erasable Programmable Read-Only Memory |
| EGR | Exhaust Gas Recirculation |
| F/B | Fuse & Relay Box |
| FL | Front Left |
| FR | Front Right |
| G | Gravity (G sensor) |
| H/L | Headlight |
| HI | High |
| I/F | Interface |
| IG | Ignition |
| INT | Intermittent |
| ISO | International Organization for Standardization |
| J/C | Joint Connector |
| LCD | Liquid Crystal Display |
| LH | Left Hand |
| LO | Low |
| LWR | Lower |
| M | Motor |
| M/B | Main Fuse Box |
| MFD | Multi Function Display |
| MT | Manual Transmission |
| N | Neutral Range |
| NAVI | Navigation |
| OP | Open or Optional Parts |
| P | Parking or Parking range |
| PASS | Passing |
| PCV | Positive Crankcase Ventilation Valve |
| R | Reverse Range |

| Abbr. | Full name |

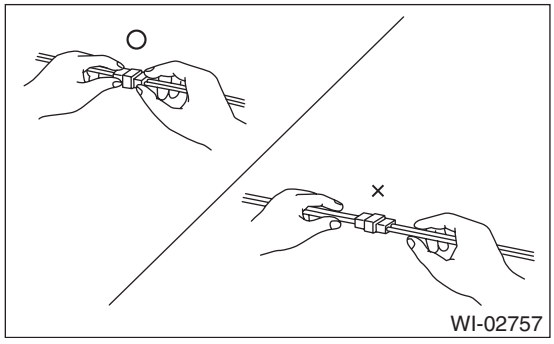
# 2. Working Precautions

## A: PRECAUTIONS WHEN WORKING WITH THE PARTS MOUNTED ON THE VEHICLE

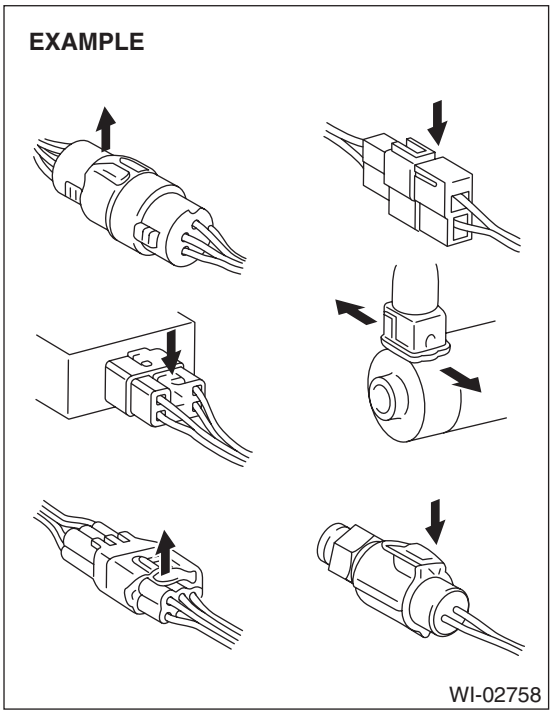
1) When working under a vehicle which is jacked-up, always be sure to use rigid rack.
2) The parking brake must always be applied during working. Also, in automatic transmission vehicles, keep the select lever set to the P (Parking) range.
3) Be sure the workshop is properly ventilated when running the engine. Further, be careful not to touch the belt or fan while the engine is operating.
4) Be careful not to touch hot metal parts, especially the radiator and exhaust system immediately after the engine has been turned off.

## B: PRECAUTIONS IN TROUBLE DIAGNOSIS AND REPAIR OF ELECTRIC PARTS

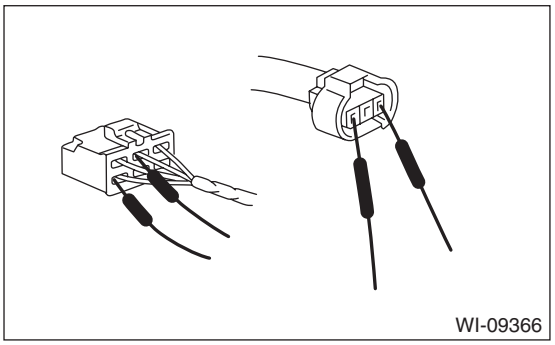
1) The battery cable must be disconnected from the battery's (–) terminal, and the ignition switch must be set to the OFF position, unless otherwise required by the diagnostics.
2) Securely fasten the wiring harness with clamps and clips so that the harness does not interfere with the body end parts, edges, bolts or screws.
3) When installing parts, be careful not to catch them on the wiring harness.
4) When disconnecting a connector, do not pull the wires, but pull while holding the connector body.



5) Some connectors are provided with a lock. One type of such a connector is disconnected by pushing the lock, and the other, by moving the lock up. In either type the lock shape must be identified before attempting to disconnect the connector.
To connect, insert the connector until it snaps and confirm that it is connected securely.



6) When checking continuity between connector terminals, or measuring voltage across the terminal and ground, always touch tester probe(s) to terminals from the wiring connection side. If the probe is too thick to gain access to the terminal, use "mini" test leads.
To check water-proof connectors (which are not measurable from the wiring side), touch test probes on the terminal side and be careful not to bend or damage the terminals.



7) Sensors, relays, electrical unit, etc., are sensitive to strong impacts.
Handle them with care so that they are not dropped or mishandled.
