

5) Install the center exhaust pipe. <Ref. to EX(H4DO)-14, INSTALLATION, Center Exhaust Pipe.>
6) Connect the battery ground terminal.

## C: INSPECTION

- Check the crossmember for bends or damage.
- Check that the cushion rubber is not stiff, cracked or otherwise damaged.

# 12.Extension Case Oil Seal

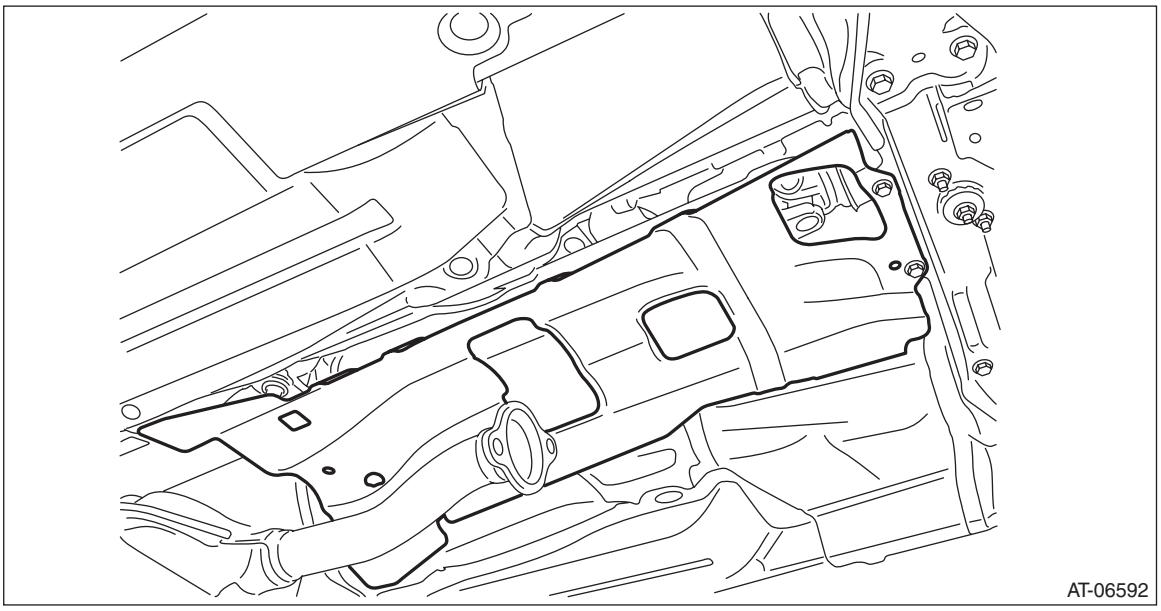
## A: INSPECTION

Check for leakage of CVTF from the joint section of transmission and propeller shaft. If a leak is found, inspect the propeller shaft and replace the oil seal.

## B: REPLACEMENT

**CAUTION:**
**Immediately after the vehicle has been running or after idling for a long time, the CVTF will be hot. Be careful not to burn yourself.**

1) Lift up the vehicle.
2) Remove the center exhaust pipe. <Ref. to EX(H4DO)-14, REMOVAL, Center Exhaust Pipe.>
3) Remove the center exhaust cover.



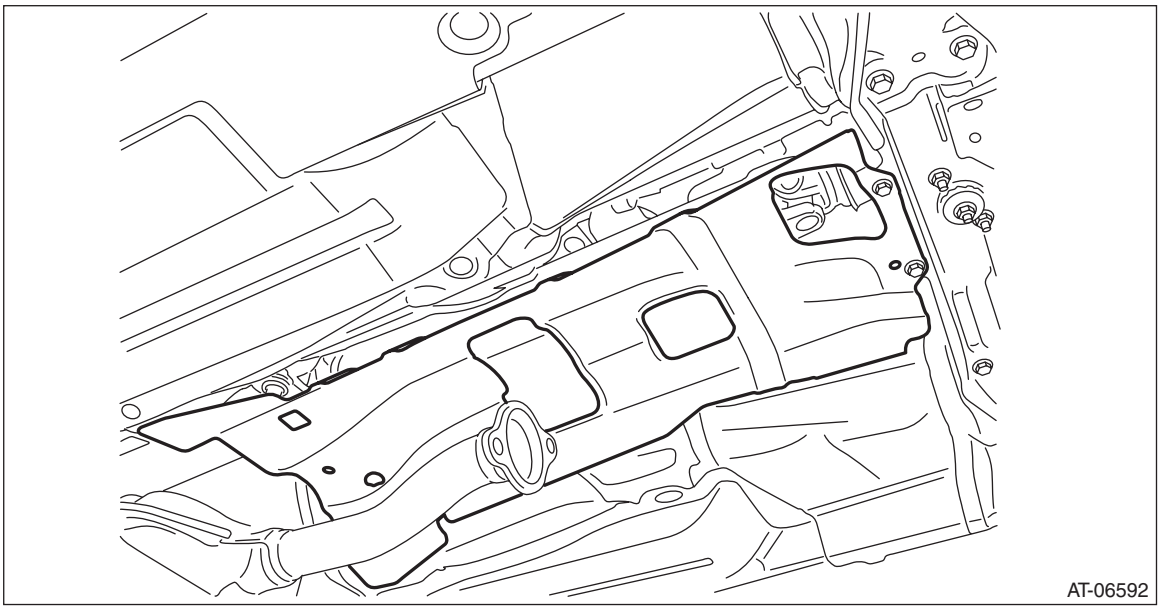
4) Clean the transmission exterior.
5) Remove the propeller shaft. <Ref. to DS-12, REMOVAL, Propeller Shaft.>
6) Using a screwdriver or ST, remove the oil seal trying not to damage the extension case.
ST 398527700 PULLER ASSY
7) Using the ST, install the oil seal.

NOTE:
- Use a new oil seal.
- Apply CVTF to the oil seal lip and press-fitting surface.

ST 498057300 OIL SEAL INSTALLER
8) Install the propeller shaft. <Ref. to DS-13, INSTALLATION, Propeller Shaft.>

9) Install the center exhaust cover.

***Tightening torque:***
***18 N·m (1.8 kgf-m, 13.3 ft-lb)***



10) Install the center exhaust pipe. <Ref. to EX(H4DO)-14, INSTALLATION, Center Exhaust Pipe.>
11) Adjust the CVTF level and check there is no leakage. <Ref. to CVT-34, ADJUSTMENT, CVTF.>

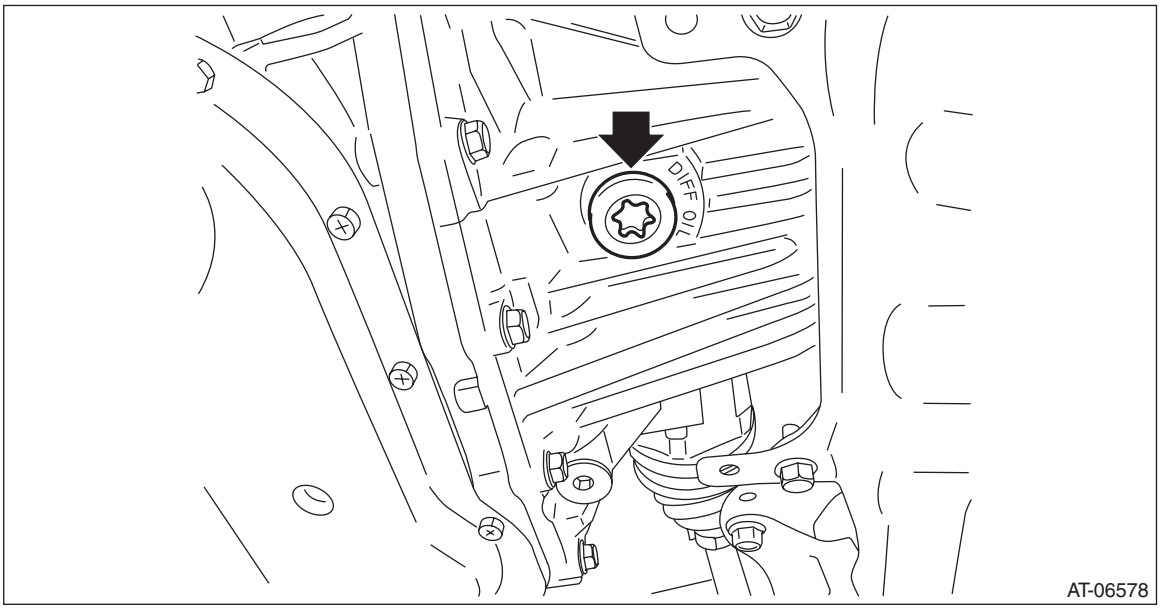
# 13.Differential Side Retainer Oil Seal

## A: INSPECTION

Check for leakage of gear oil from differential side retainer oil seal part. If there is an oil leak, inspect the front drive shaft and replace the oil seal.

## B: REPLACEMENT

**CAUTION:**
**• Immediately after the vehicle has been running or after idling for a long time, the differential gear oil will be hot. Be careful not to burn yourself.**
**• Be careful not to spill the differential gear oil on exhaust pipe to prevent it from emitting smoke or fire. If differential gear oil is spilled on the exhaust pipe, wipe it off completely.**
1) Remove the front wheels. <Ref. to WT-4, REMOVAL, Tire and Wheel.>
2) Remove the center exhaust pipe. <Ref. to EX(H4DO)-14, REMOVAL, Center Exhaust Pipe.>
3) Remove the differential gear oil drain plug using TORX® bit T70, and then drain differential gear oil.

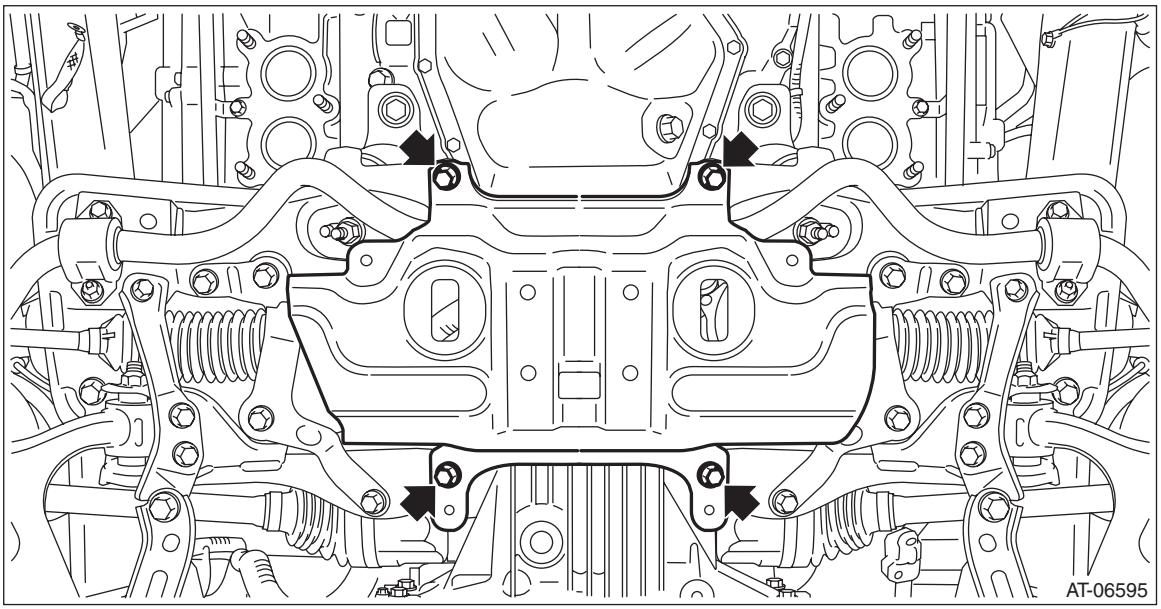


4) Tighten the differential gear oil drain plug.

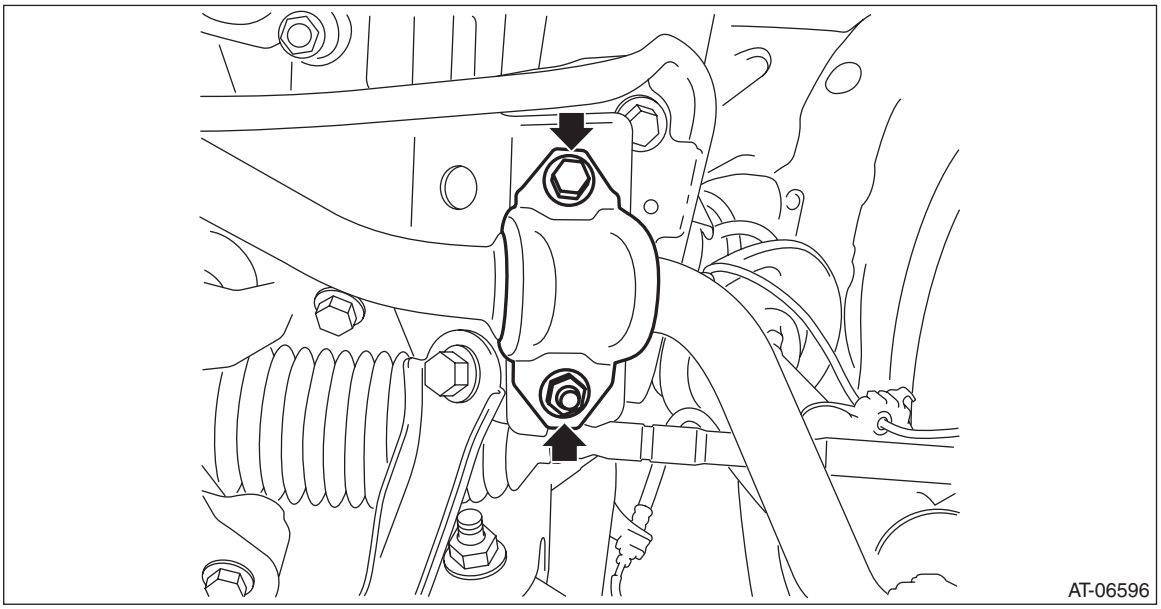
NOTE:
Use a new gasket.

***Tightening torque:***
***70 N·m (7.1 kgf-m, 51.6 ft-lb)***

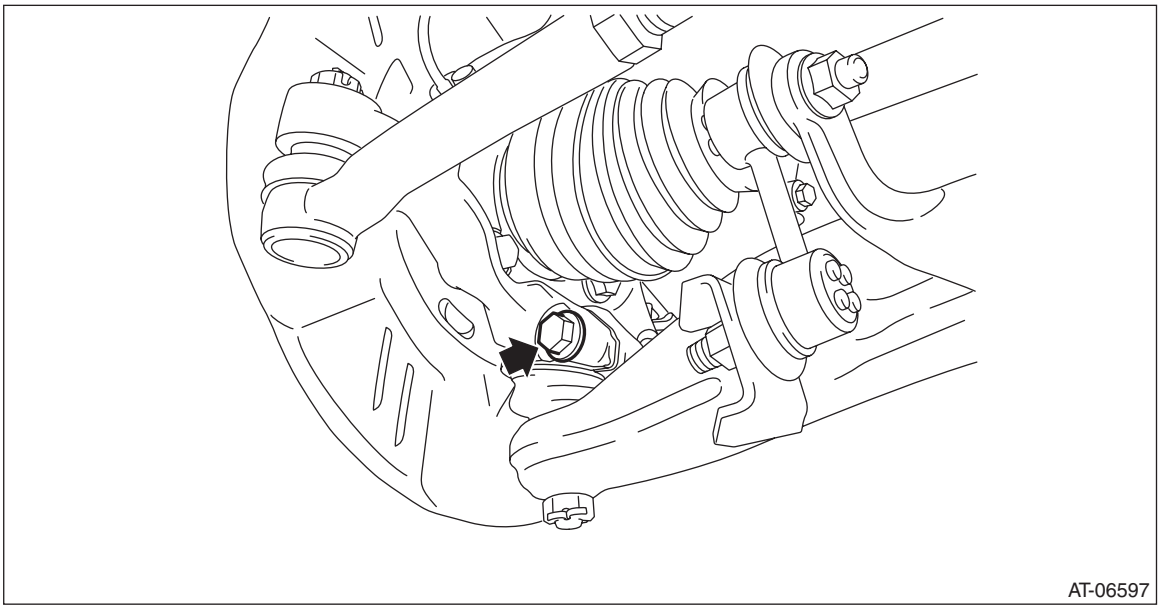
5) Remove the jack-up plate.



6) Remove the stabilizer bracket.



7) Remove the bolts which secure to the front housing, and separate the front arm and housing.



8) Using a crowbar, etc., pull out until the front drive shaft transmission side joint slides move smoothly.

NOTE:
Place cloth between the crowbar and the transmission in order to avoid damaging the transmission side retainer.

9) Hold the transmission side joint of the front drive shaft by hand and extract the housing from the transmission while pressing the housing outward, so as not to stretch the boot.

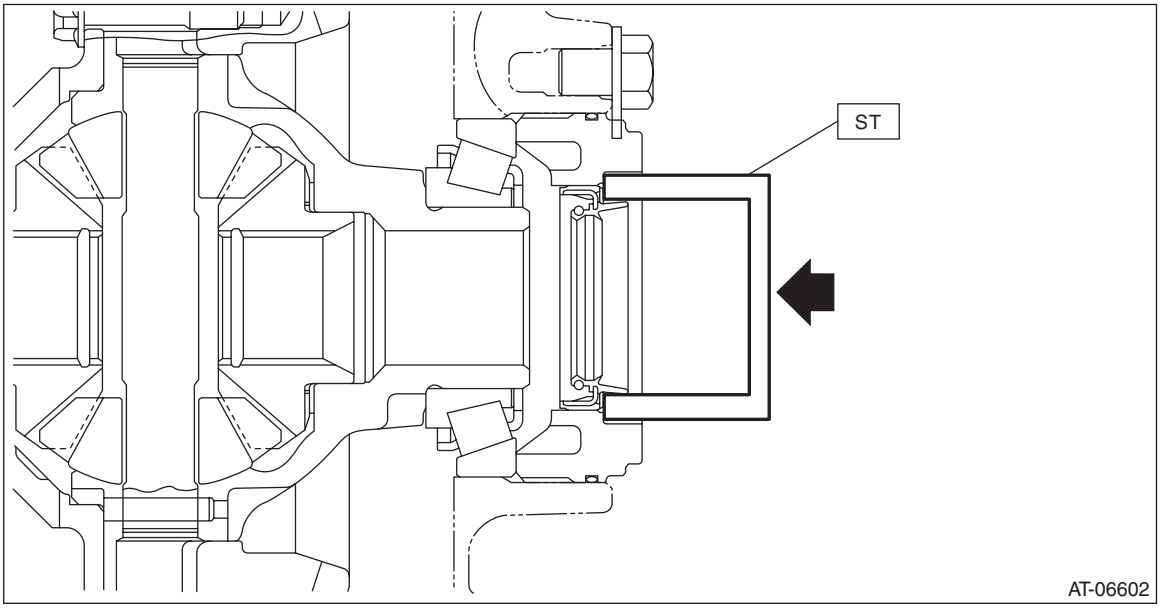
NOTE:
- Before pulling RH front drive shaft from transmission, turn the steering wheel to left hand full lock.
- Before pulling LH front drive shaft from transmission, turn the steering wheel to right hand full lock.

10) Remove the differential side retainer oil seal using driver wrapped with vinyl tape etc.

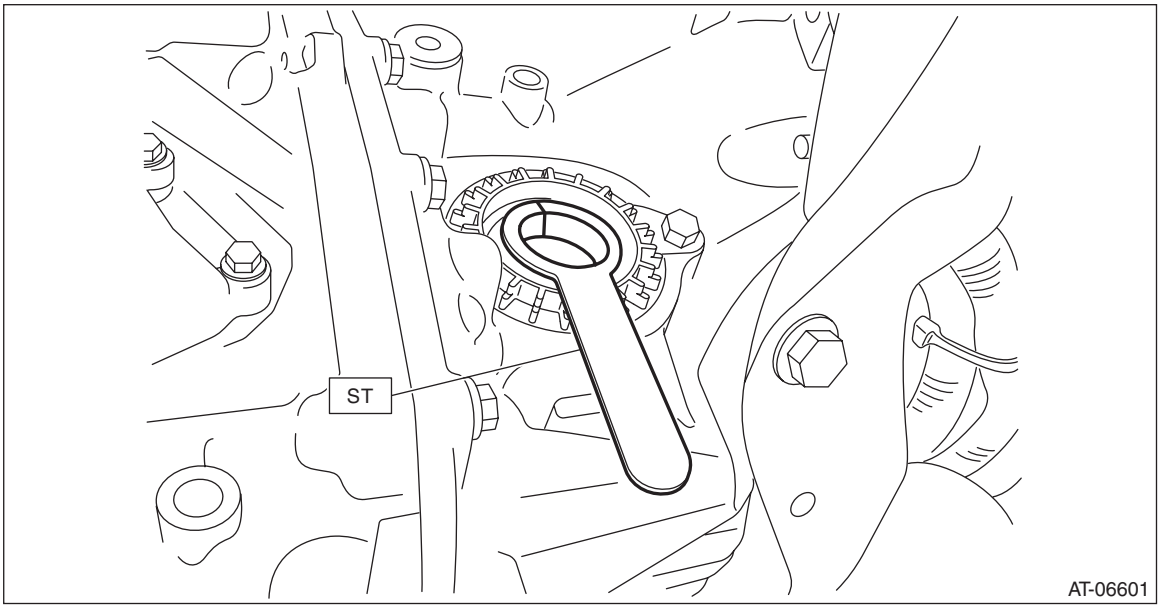
11) Using the ST, install the differential side retainer oil seal by lightly tapping with a hammer.

NOTE:
- Apply differential gear oil to the lip surface, so that the oil seal lip is not deformed.
- Apply differential gear oil to the press-fitting surface of oil seal and the differential side retainer.
- Oil seal has an identification mark (R, L). When installing oil seals, do not confuse the left and right.

ST 18675AA000 DIFFERENTIAL SIDE OIL SEAL INSTALLER



12) Set the ST to side retainer.
ST 28399SA010 OIL SEAL PROTECTOR



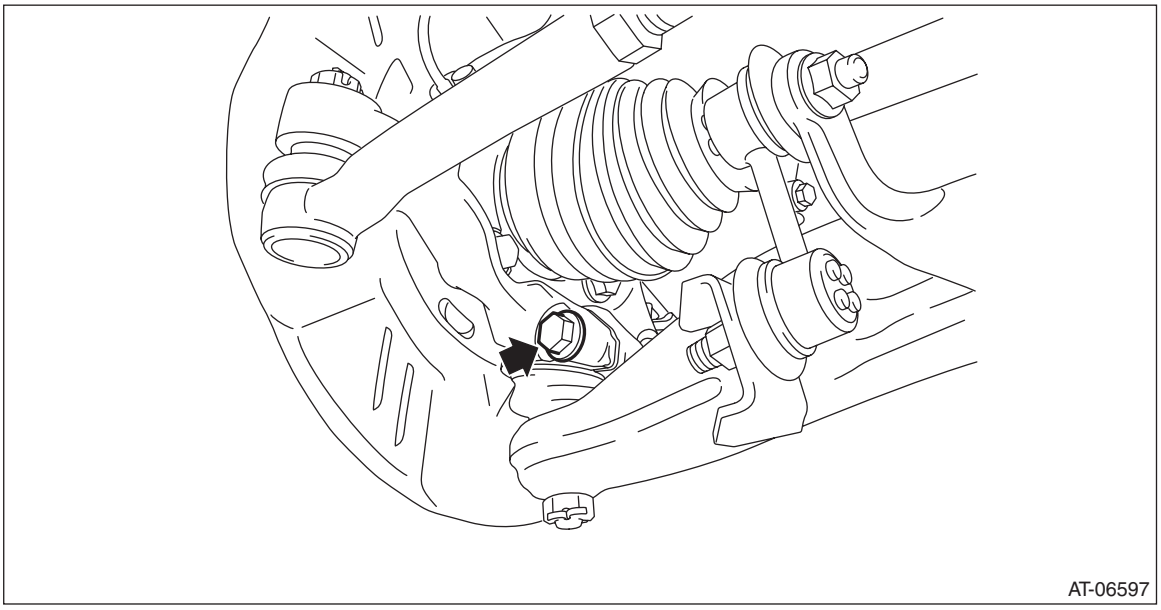
13) Replace the circlip of the drive shaft with a new part.
14) Insert the front drive shaft spline section into transmission and remove the ST (DIFFERENTIAL SIDE OIL SEAL INSTALLER).

NOTE:
- Apply grease to the side retainer oil seal lip.
- Before inserting RH front drive shaft into transmission, turn the steering wheel to left hand full lock.
- Before inserting LH front drive shaft into transmission, turn the steering wheel to right hand full lock.

15) Insert the drive shaft into the transmission securely by pressing the housing from outside of the vehicle.
16) Insert the ball joint into housing and secure with bolt.

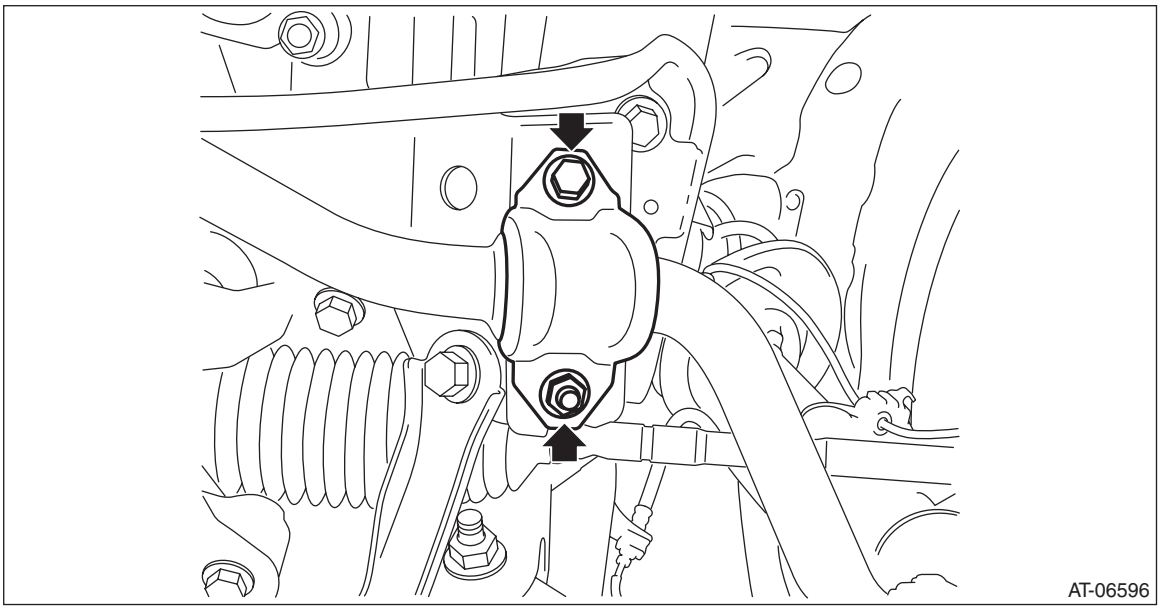
***Tightening torque:***
***50 N·m (5.1 kgf-m, 36.9 ft-lb)***

**CAUTION:**
- **Do not apply grease to the tapered portion of ball stud.**
- **Before tightening, make sure the lower side of housing and stepped section of ball joint are in contact.**



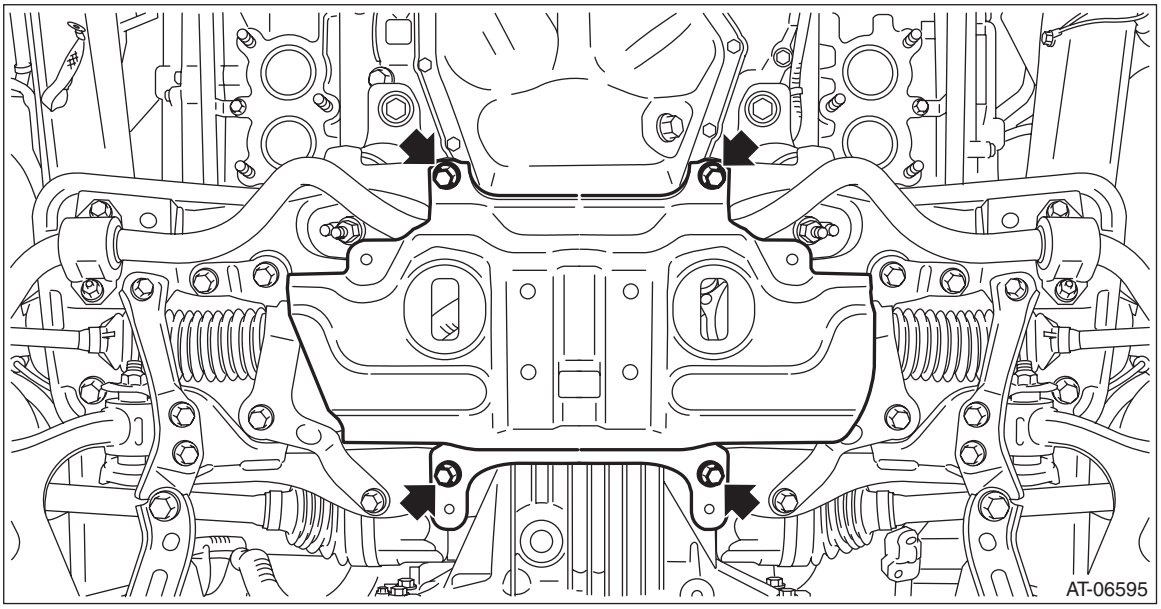
17) Install the stabilizer bracket.

***Tightening torque:***
***25 N·m (2.5 kgf-m, 18.4 ft-lb)***



18) Install the jack-up plate.

***Tightening torque:***
***60 N·m (6.1 kgf-m, 44.3 ft-lb)***



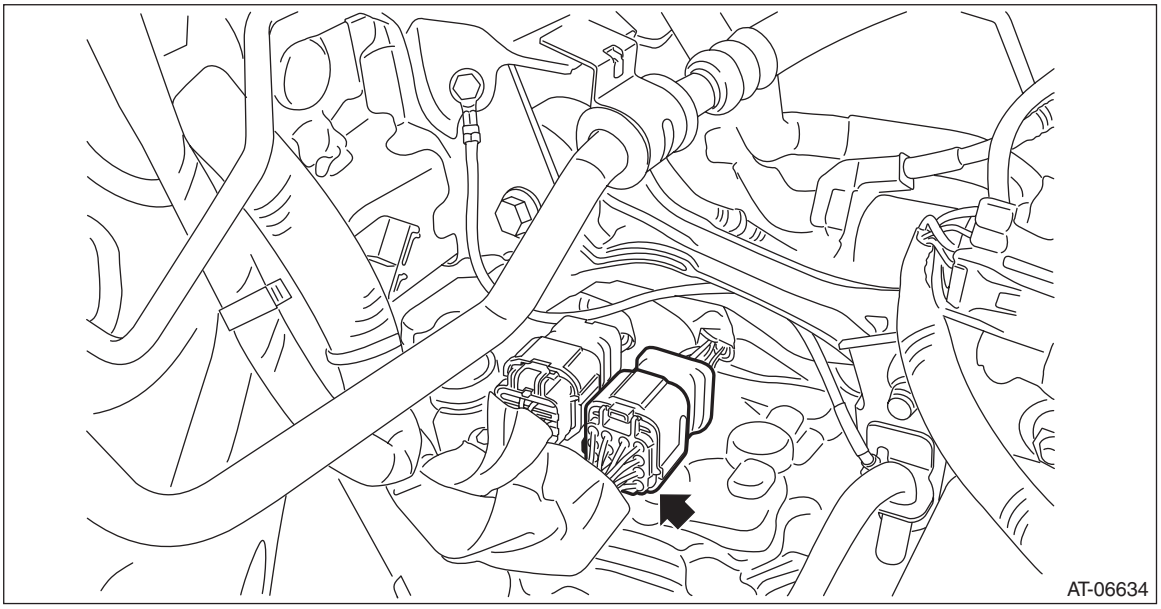
19) Install the center exhaust pipe. <Ref. to EX(H4DO)-14, INSTALLATION, Center Exhaust Pipe.>
20) Fill differential gear oil. <Ref. to CVT-39, Differential Gear Oil.>
21) Adjust the differential gear oil level, and check for leakage. <Ref. to CVT-39, ADJUSTMENT, Differential Gear Oil.>
22) Install the front wheels. <Ref. to WT-4, INSTALLATION, Tire and Wheel.>

# 14.Inhibitor Switch

## A: INSPECTION

When the driving condition or starter motor operation is improper, first check the shift linkage for improper operation. If the shift linkage is functioning properly, check the inhibitor switch.

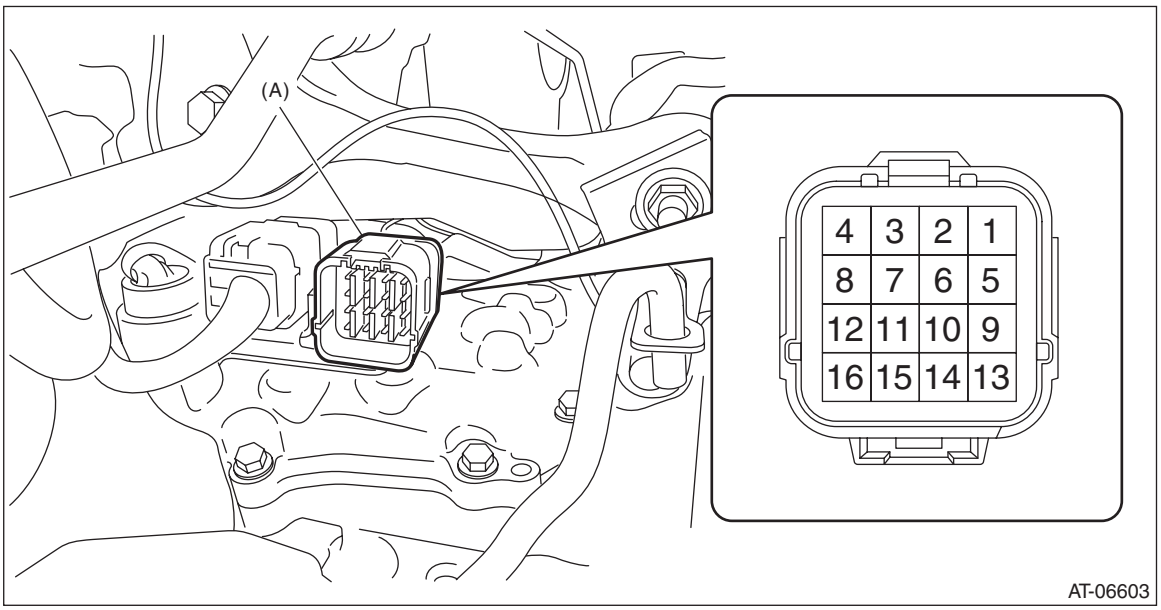
1) Remove the air intake boot assembly. <Ref. to IN(H4DO)-12, REMOVAL, Air Intake Boot.>
2) Disconnect the inhibitor harness connector.



3) Check for continuity in inhibitor switch circuit by shifting the select lever in “P”, “R”, “N” and “D” respectively.

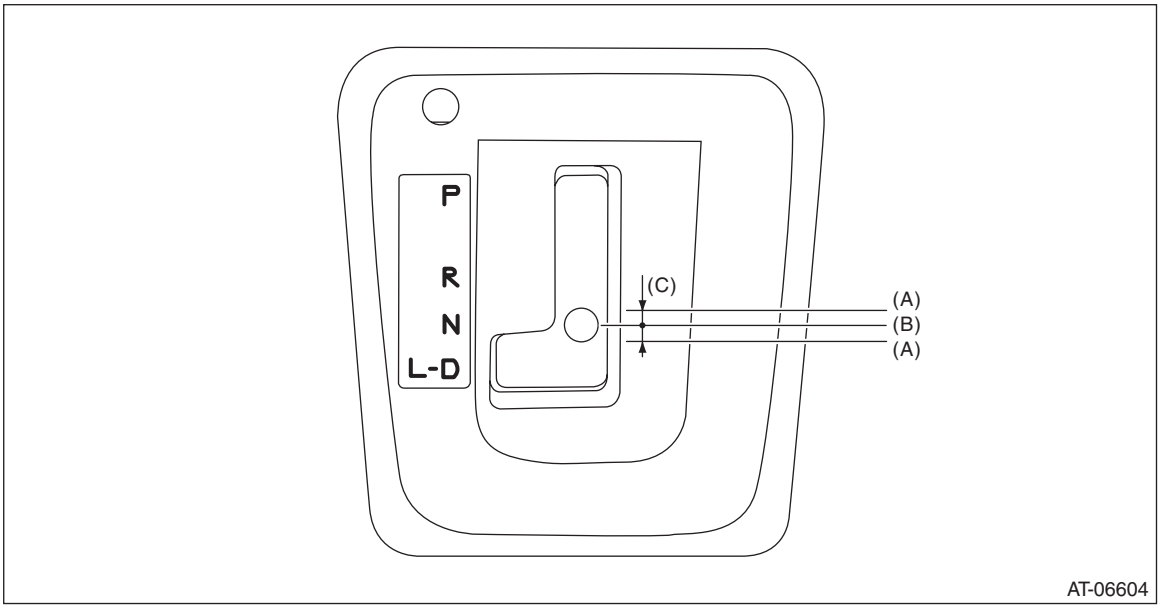
NOTE:
- Check that there is no continuity in the starter circuit when the select lever is in the “R” and “D” ranges.
- When inhibitor switch is normal, check there is no poor contact in vehicle side connector and no open circuit in harness.

| | Range | Terminal No. |
|---|---|---|
| Signal sent to TCM | P | 1 — 7 |
| | R | 2 — 7 |
| | N | 3 — 7 |
| | D | 4 — 7 |
| Starter circuit | P/N | 15 — 16 |
| Back-up light circuit | R | 13 — 14 |



(A) Inhibitor harness connector

4) Check that there is continuity at equal points when the select lever is moved 1.5° in both directions from the “N” range.
If there is continuity in only one direction or in other points, adjust the inhibitor switch. <Ref. to CVT-92, ADJUSTMENT, Inhibitor Switch.>

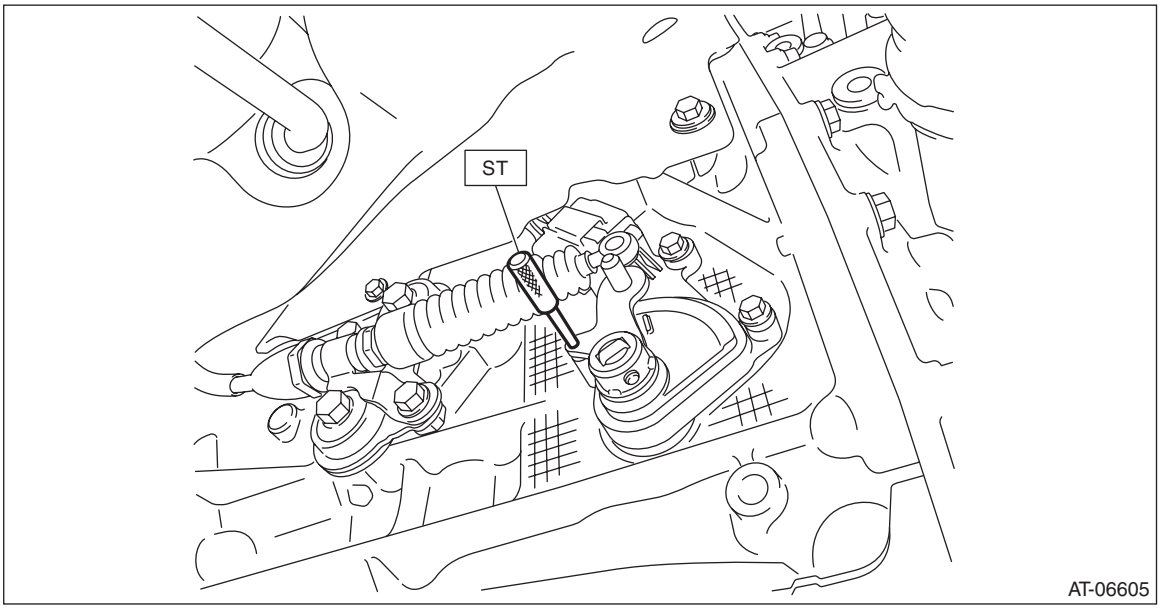


(A) Continuity does not exist.
(B) Continuity exists.
(C) 1.5°

5) Repeat the above inspection in other gear ranges. If there is fault, adjust the inhibitor switch and select cable. <Ref. to CVT-92, ADJUSTMENT, Inhibitor Switch.> <Ref. to CS-49, ADJUSTMENT, Select Cable.>

## B: ADJUSTMENT

1) Shift the select lever to “N” range.
2) Loosen the two bolts holding the inhibitor switch.
3) Insert the ST vertically into the holes of the shifter arm and switch body.
ST 499267300 STOPPER PIN



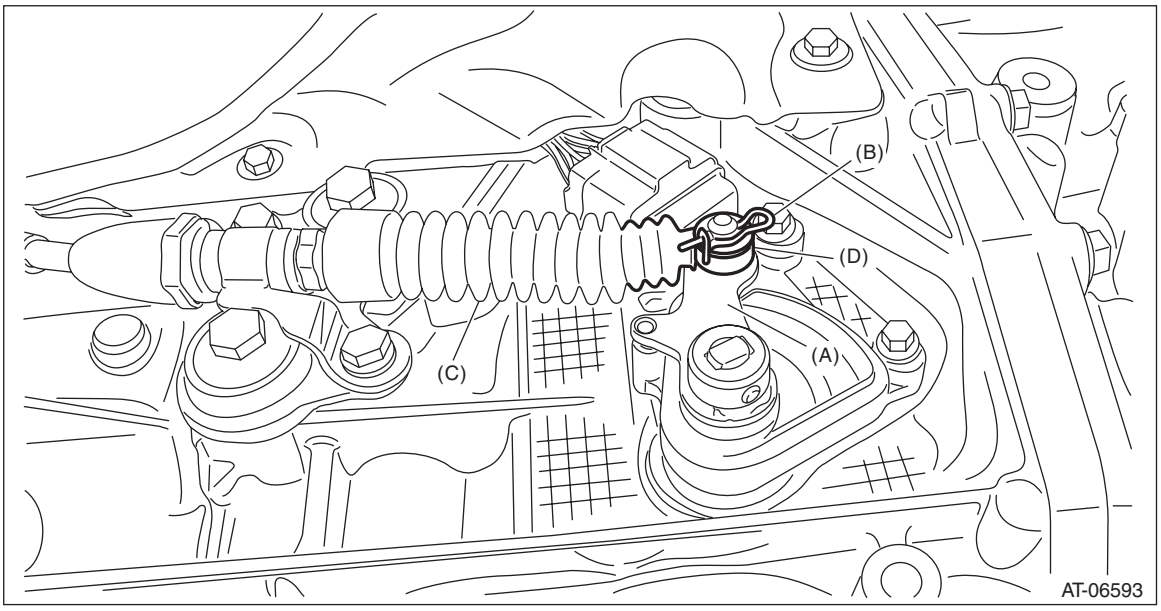
4) Tighten the two bolts holding the inhibitor switch.

***Tightening torque:***
***5 N·m (0.5 kgf-m, 3.7 ft-lb)***

5) Repeat the inspection of the inhibitor switch. If the inhibitor switch is determined to be “faulty”, replace it.

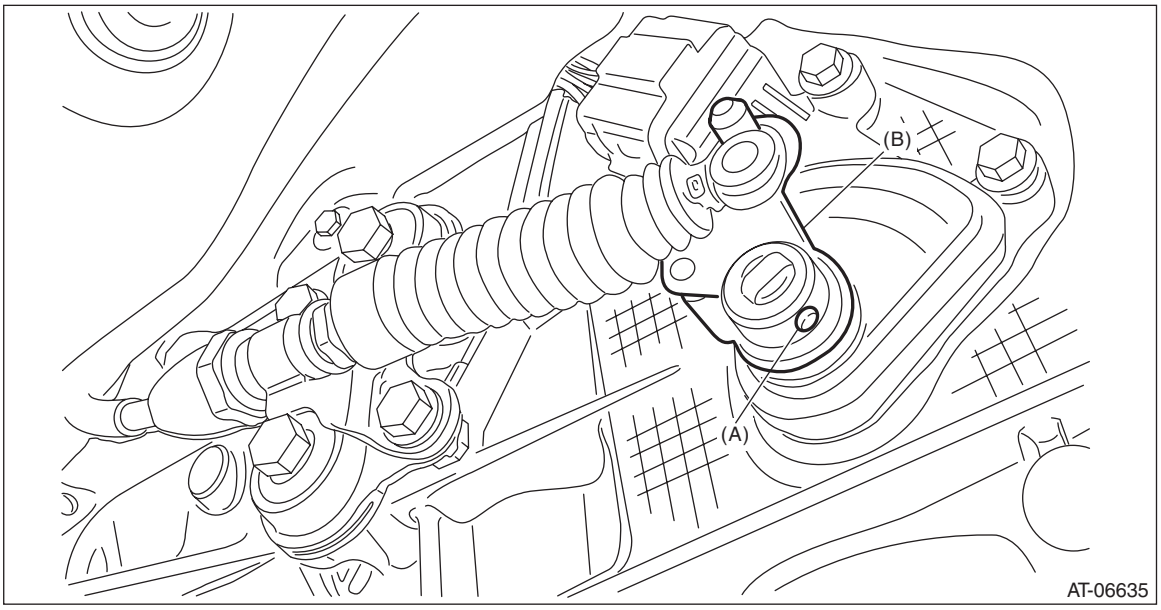
## C: REMOVAL

1) Shift the select lever to “N” range.
2) Disconnect the ground cable from battery.
3) Lift up the vehicle.
4) Remove the center exhaust pipe. <Ref. to EX(H4DO)-14, REMOVAL, Center Exhaust Pipe.>
5) Remove the snap pin and washer from the shifter arm.



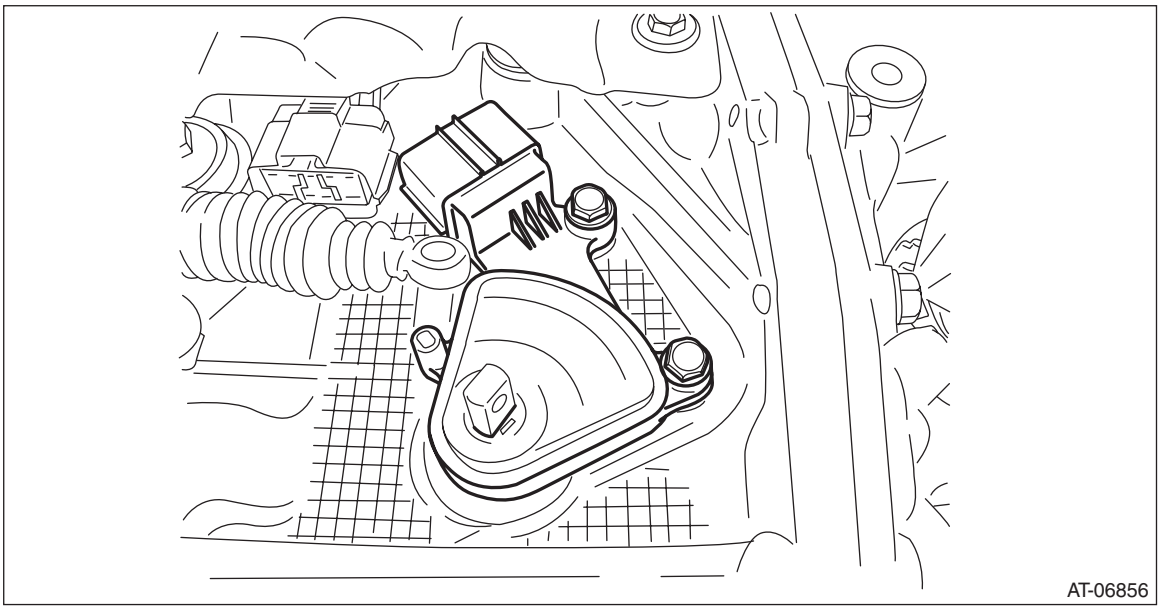
(A) Shifter arm
(B) Snap pin
(C) Select cable
(D) Washer

6) Remove the spring pin and shifter arm.



(A) Spring pin
(B) Shifter arm

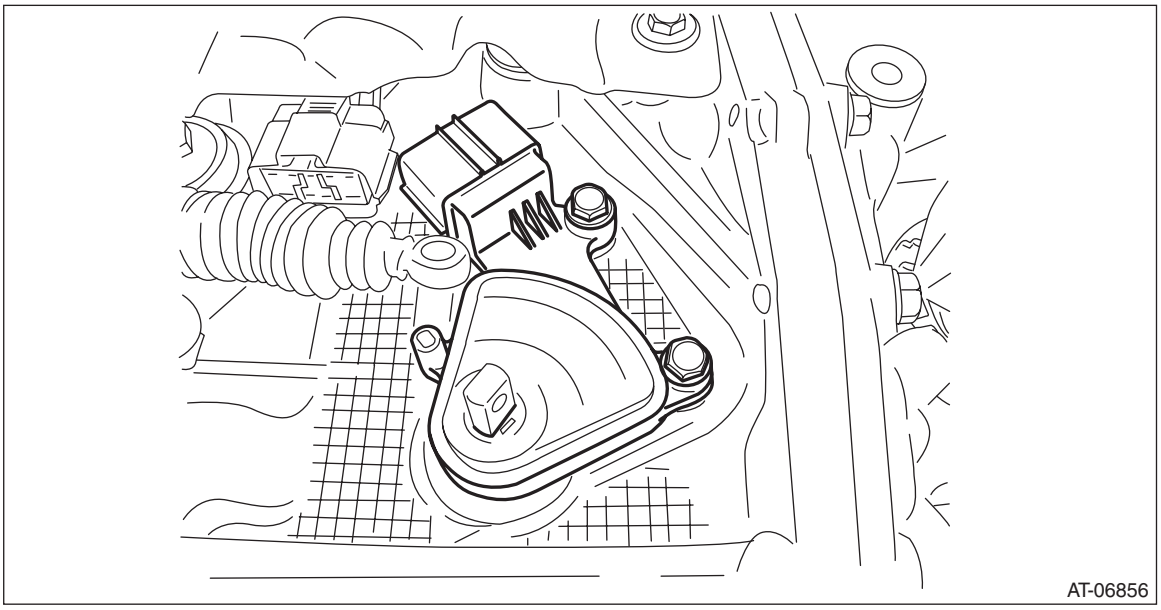
7) Remove the inhibitor harness connector from inhibitor switch.
8) Remove the two inhibitor switch securing bolts.



9) Remove the inhibitor switch from the transmission case.

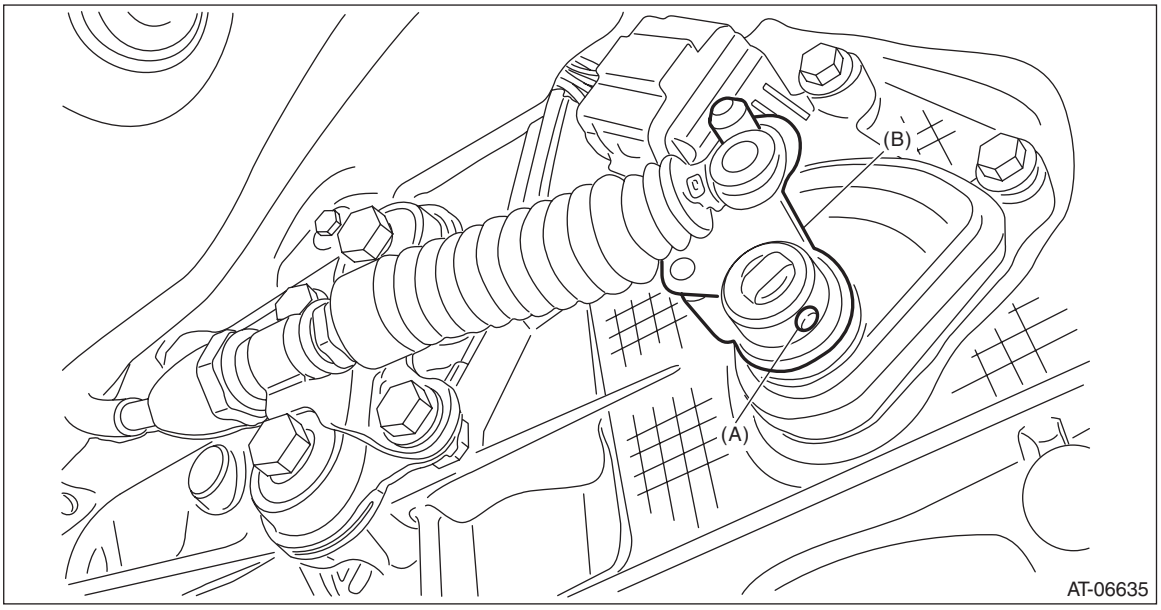
## D: INSTALLATION

1) Install the inhibitor switch to the transmission case temporarily.



2) Connect the inhibitor harness connector to the inhibitor switch.
3) Install the shifter arm and fix with the spring pin.

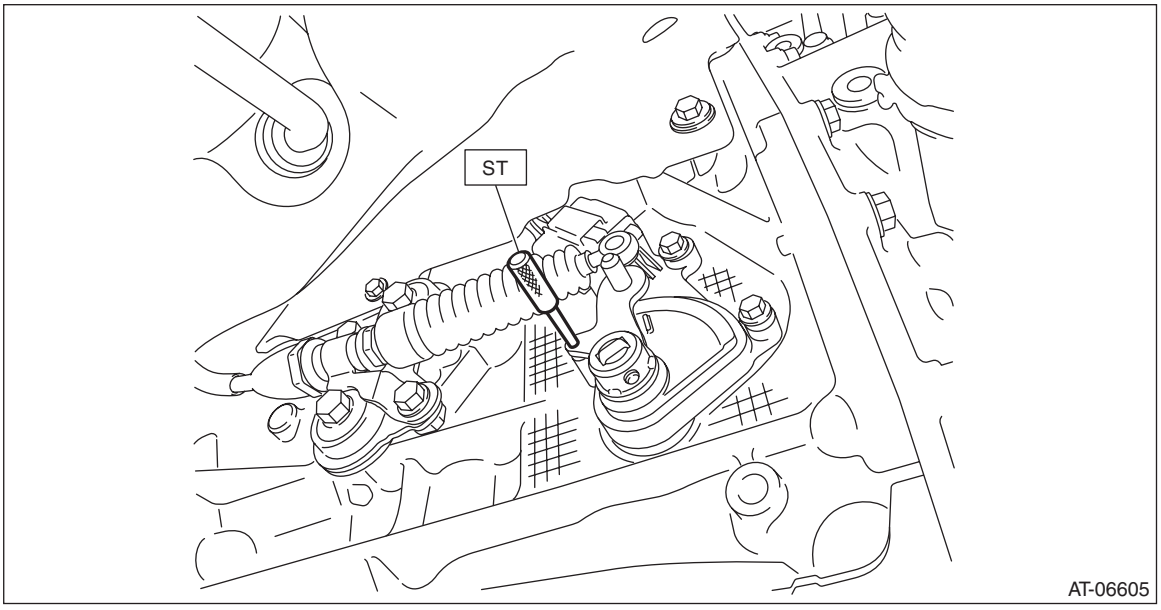
NOTE:
Use new spring pin.



(A) Spring pin
(B) Shifter arm

4) Shift the shifter arm to “N” range.

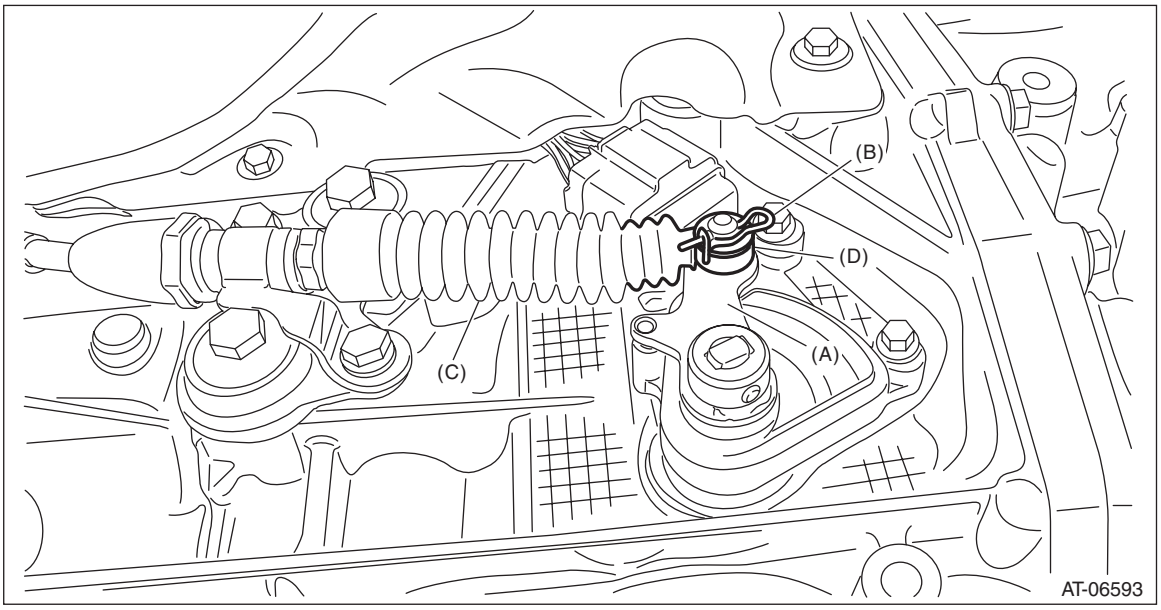
5) Install the ST vertically in the cutout of shifter arm and the hole of switch body.
ST 499267300 STOPPER PIN



6) Tighten the two bolts holding the inhibitor switch.

***Tightening torque:***
***5 N·m (0.5 kgf-m, 3.7 ft-lb)***

7) Install the select cable to the shifter arm.
8) Install the washer and snap pin to the shifter arm.



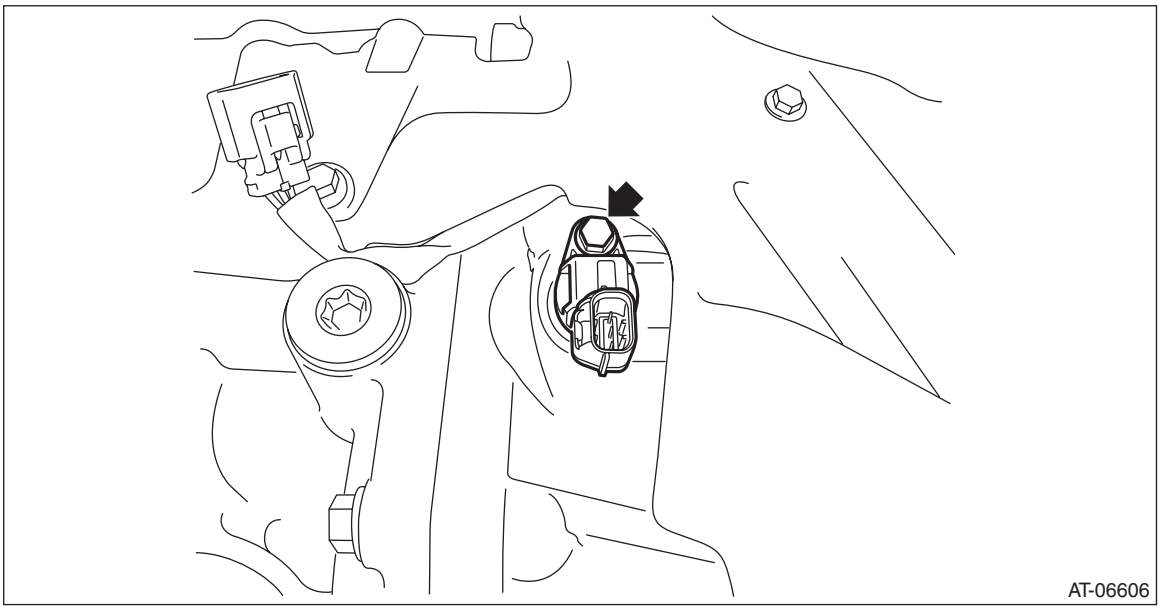
(A) Shifter arm
(B) Snap pin
(C) Select cable
(D) Washer

9) Install the center exhaust pipe. <Ref. to EX(H4DO)-14, INSTALLATION, Center Exhaust Pipe.>
10) Lower the vehicle.
11) Connect the battery ground terminal.
12) Check the inhibitor switch. <Ref. to CVT-90, INSPECTION, Inhibitor Switch.>

# 15.Turbine Speed Sensor

## A: REMOVAL

**CAUTION:**
**Be sure to prevent water or oil from contacting the connector terminal of turbine speed sensor. If adhesion occurs, replace with a new part.**
1) Lift up the vehicle.
2) Remove the harness connector from turbine speed sensor.
3) Remove the turbine speed sensor.



## B: INSTALLATION

**CAUTION:**
**Be sure to prevent water or oil from contacting the connector terminal of turbine speed sensor. If adhesion occurs, replace with a new part.**
Install in the reverse order of removal.

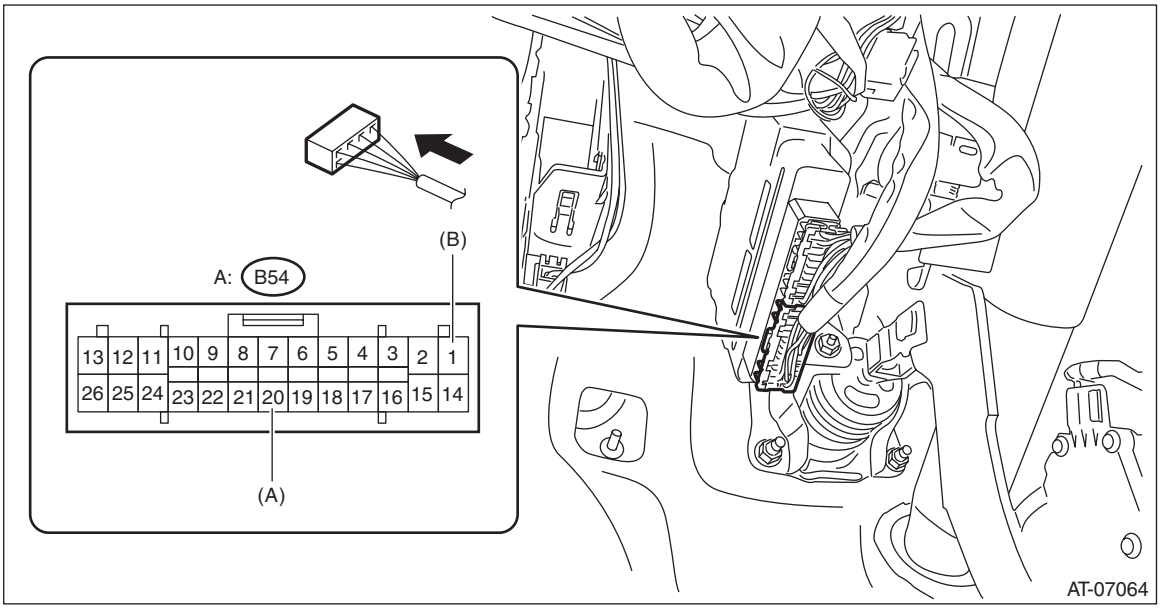
NOTE:
- Use new O-rings.
- Apply CVTF to the O-ring.

***Tightening torque:***
***7 N·m (0.7 kgf-m, 5.2 ft-lb)***

## C: INSPECTION

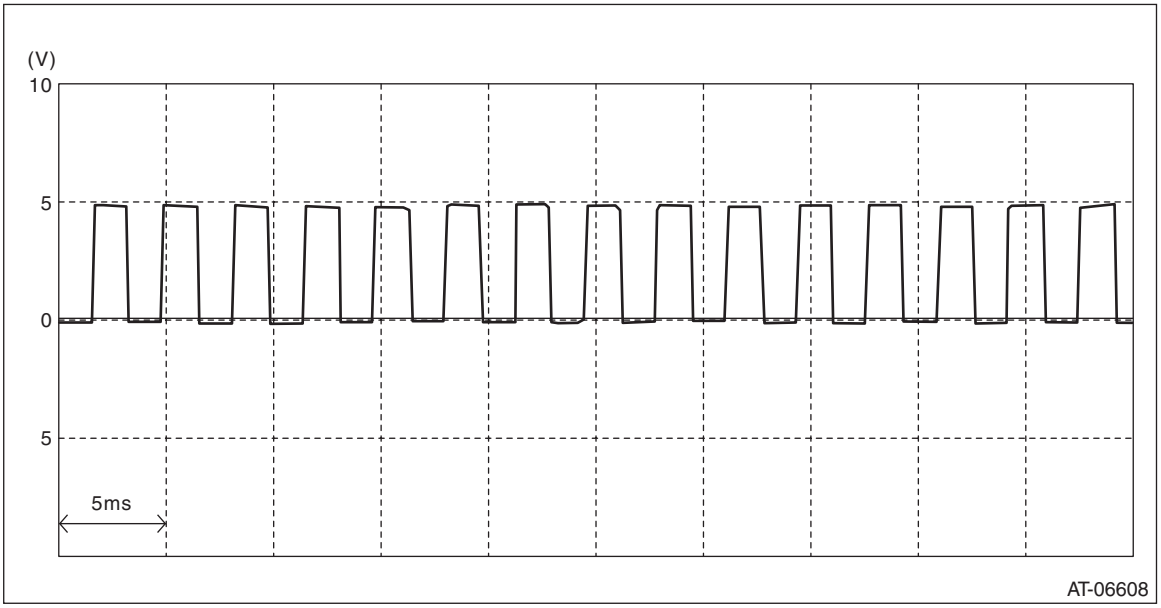
1) Remove the instrument panel lower cover. <Ref. to EI-65, REMOVAL, Instrument Panel Lower Cover.>
2) Set the probe of oscilloscope to TCM harness connector.

***Connector & terminal***
***(B54) No. 20 (+) — No. 1 (–):***



(A) + probe
(B) – probe

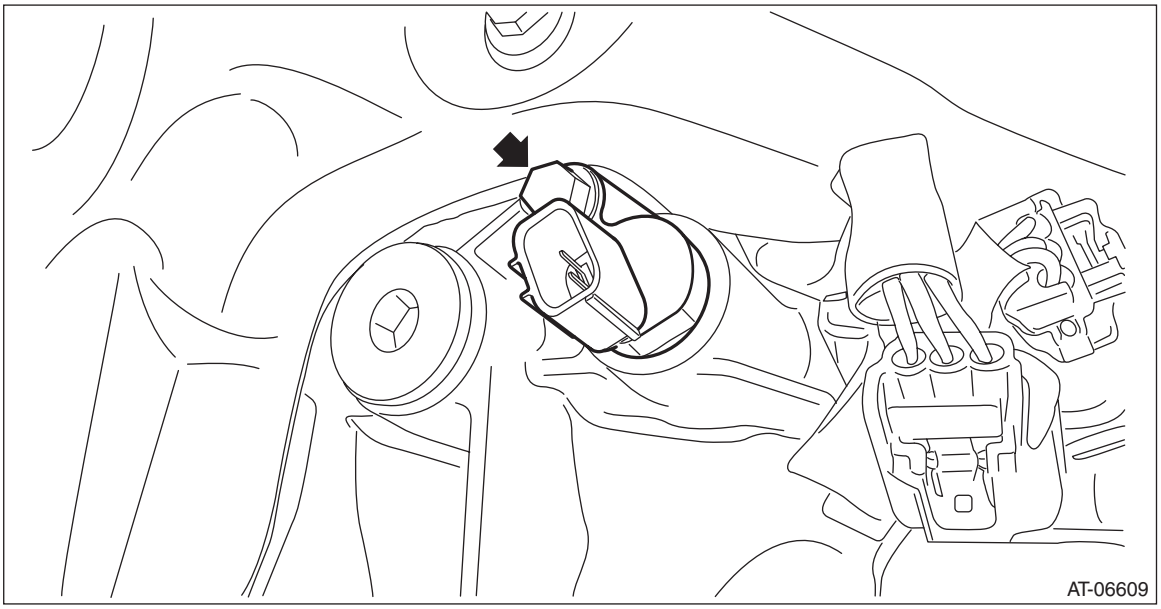
3) Start and warm up the engine.
4) Check the waveform and output voltage of the turbine speed sensor with engine idling.



# 16.Secondary Speed Sensor

## A: REMOVAL

**CAUTION:**
**• Be sure to prevent water or oil from contacting the connector terminal of secondary speed sensor. If adhesion occurs, replace with a new part.**
**• When secondary speed sensor is removed, CVTF leaks. After installing the secondary speed sensor, adjust the CVTF level.**
1) Lift up the vehicle.
2) Remove the harness connector from secondary speed sensor.
3) Remove the secondary speed sensor.



## B: INSTALLATION

**CAUTION:**
**• Be sure to prevent water or oil from contacting the connector terminal of secondary speed sensor. If adhesion occurs, replace with a new part.**
**• After installing the secondary speed sensor, adjust the CVTF level.**
Install in the reverse order of removal.

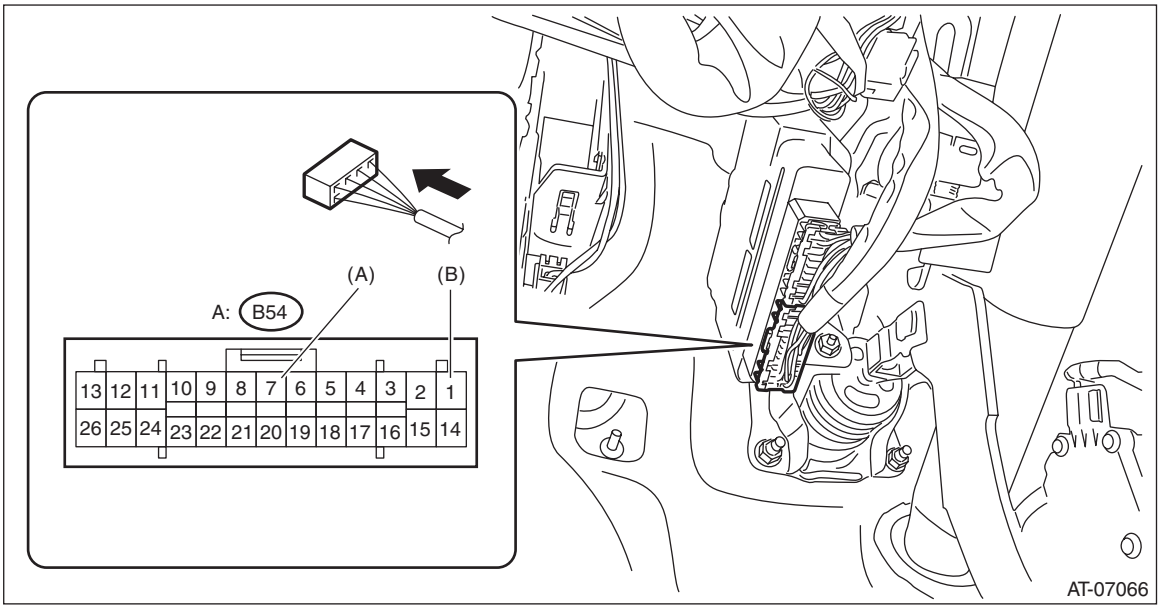
NOTE:
• Use new O-rings.
• Apply CVTF to the O-ring.

***Tightening torque:***
***7 N·m (0.7 kgf-m, 5.2 ft-lb)***

## C: INSPECTION

1) Remove the instrument panel lower cover. <Ref. to EI-65, REMOVAL, Instrument Panel Lower Cover.>
2) Set the probe of oscilloscope to TCM harness connector.

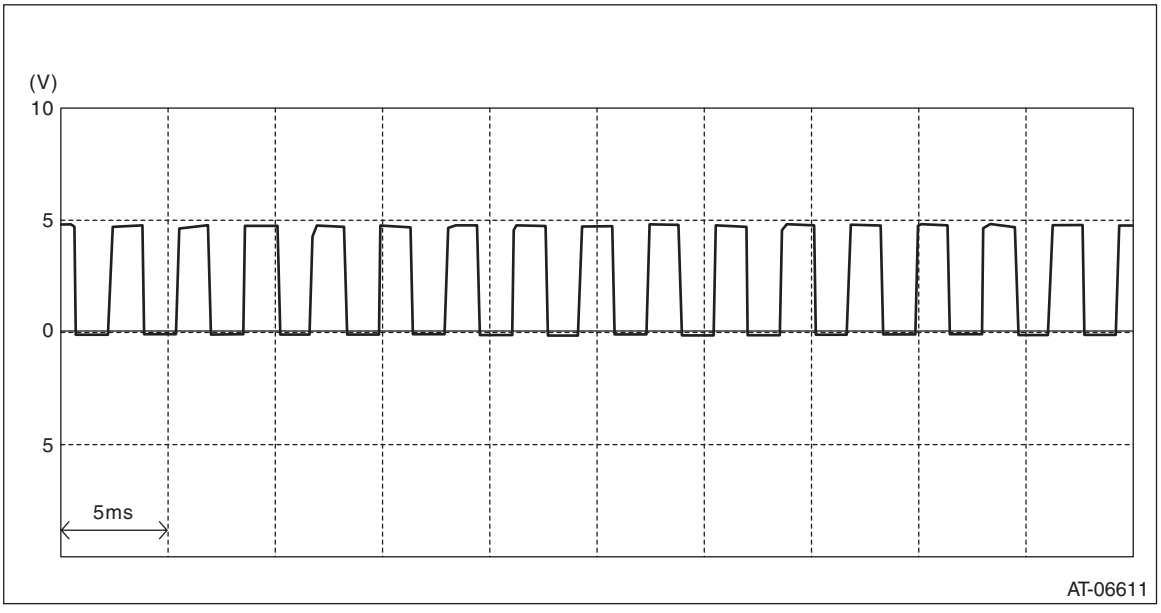
***Connector & terminal***
***(B54) No. 7 (+) — No. 1 (–):***



(A) + probe
(B) – probe

3) Start and warm up the engine.
4) Lift up the vehicle.

**CAUTION:**
**Lift up the vehicle until the tire bottom is 0.3 m (0.98 ft) or more above the ground.**
5) Shift the select lever to “D” range.
6) Check the waveform and output voltage of the secondary speed sensor with engine idling.

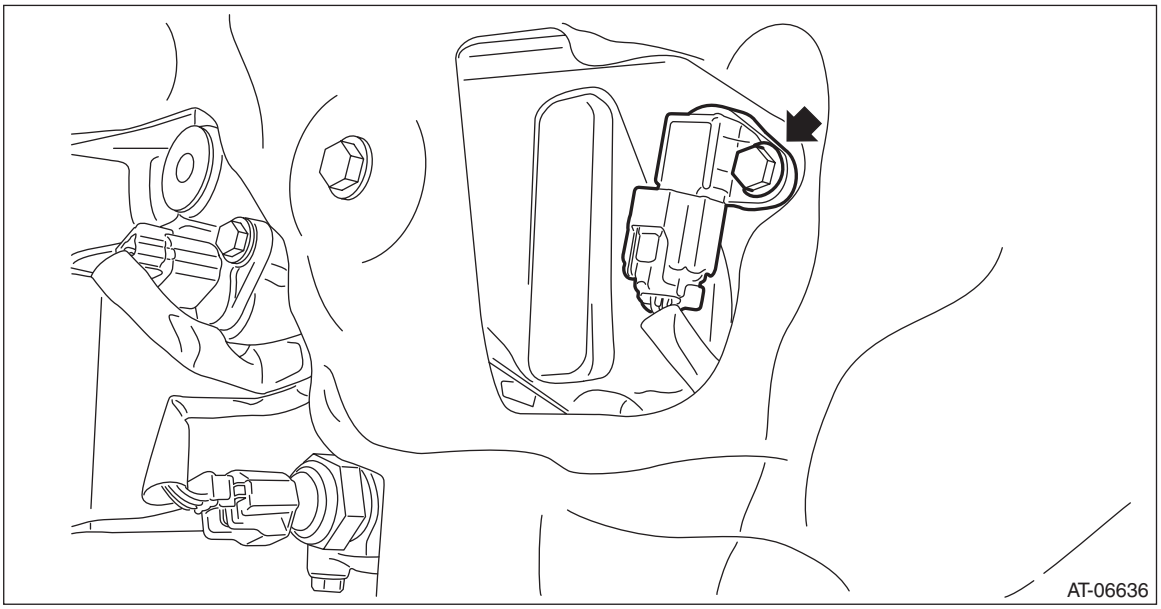


# 17.Primary Speed Sensor

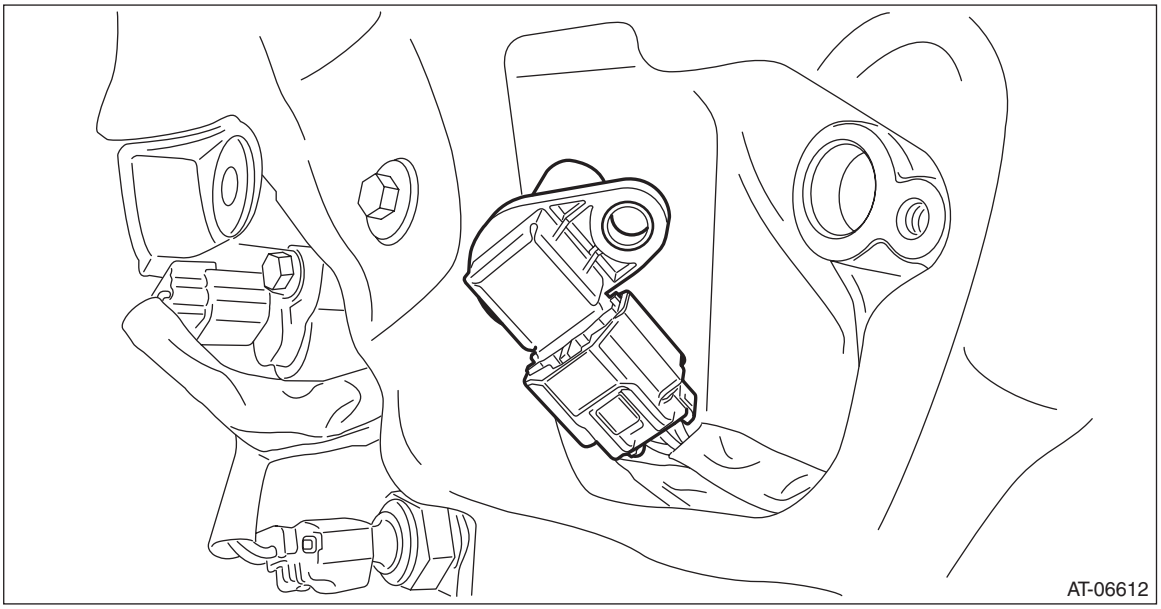
## A: REMOVAL

**CAUTION:**
**Be sure to prevent water or oil from contacting the connector terminal of primary speed sensor. If adhesion occurs, replace with a new part.**

1) Remove the transmission assembly. <Ref. to CVT-56, REMOVAL, Automatic Transmission Assembly.>
2) Remove the primary speed sensor.



3) Remove the harness connector from primary speed sensor.



## B: INSTALLATION

**CAUTION:**
**Be sure to prevent water or oil from contacting the connector terminal of primary speed sensor. If adhesion occurs, replace with a new part.**
Install in the reverse order of removal.

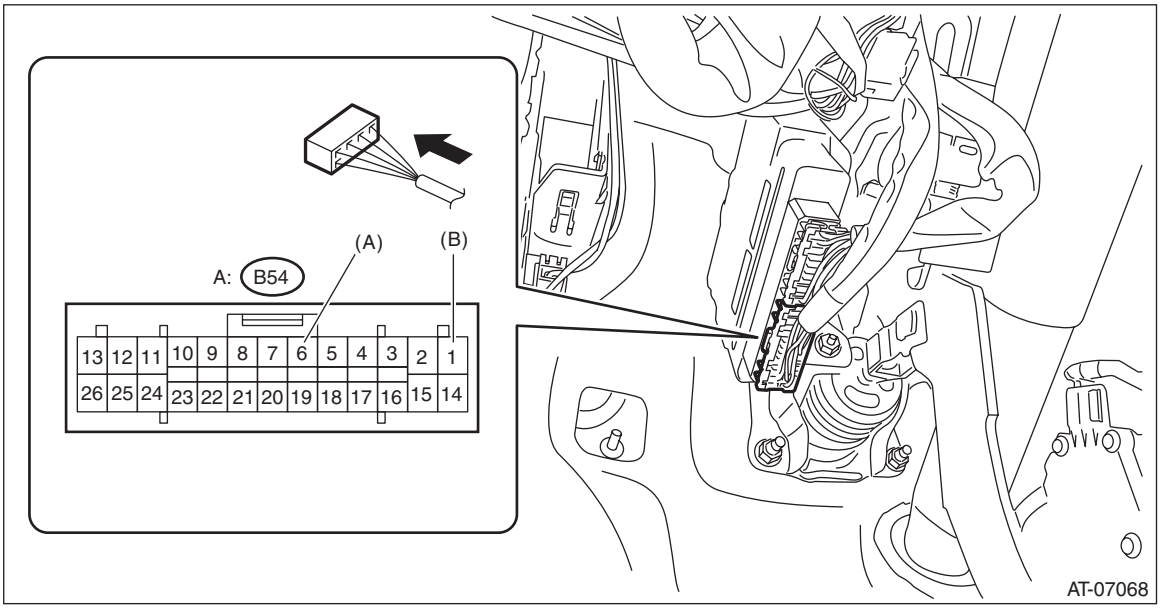
NOTE:
- Use new O-rings.
- Apply CVTF to the O-ring.

***Tightening torque:***
***7 N·m (0.7 kgf-m, 5.2 ft-lb)***

## C: INSPECTION

1) Remove the instrument panel lower cover. <Ref. to EI-65, REMOVAL, Instrument Panel Lower Cover.>
2) Set the probe of oscilloscope to TCM harness connector.

***Connector & terminal***
***(B54) No. 6 (+) — No. 1 (–):***

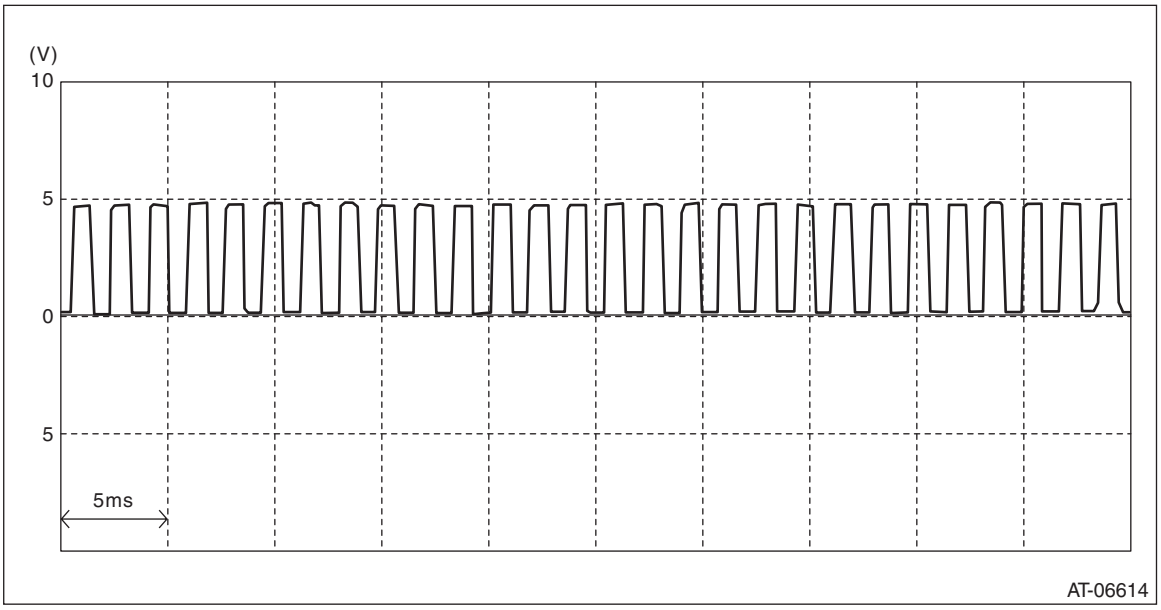


(A) + probe
(B) – probe

3) Start and warm up the engine.
4) Lift up the vehicle.

**CAUTION:**
**Lift up the vehicle until the tire bottom is 0.3 m (0.98 ft) or more above the ground.**
5) Shift the select lever to “D” range.

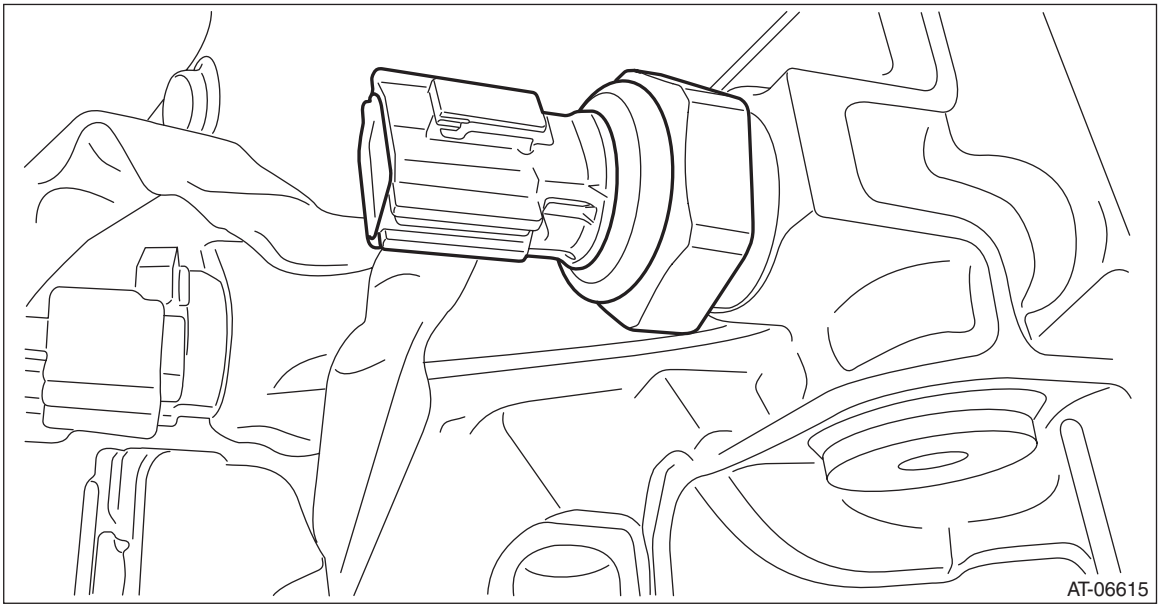
6) Check the waveform of primary speed sensor with engine idling running.



# 18.Secondary Pressure Sensor

## A: REMOVAL

**CAUTION:**
**• Be sure to prevent water or oil from contacting the connector terminal of secondary pressure sensor. If adhesion occurs, replace with a new part.**
**• When secondary pressure sensor is removed, CVTF leaks. After installing the secondary pressure sensor, adjust the CVTF level.**
1) Disconnect the ground cable from battery.
2) Lift up the vehicle.
3) Remove the secondary pressure sensor connector.
4) Remove the secondary pressure sensor.



## B: INSTALLATION

**CAUTION:**
**• Be sure to prevent water or oil from contacting the connector terminal of secondary pressure sensor. If adhesion occurs, replace with a new part.**
**• After installing the secondary pressure sensor, adjust the CVTF level.**
Install in the reverse order of removal.

NOTE:
Use new O-rings.

***Tightening torque:***
***39 N·m (4.0 kgf-m, 28.8 ft-lb)***

## C: INSPECTION

1) Start and warm up the engine.
2) Shift the select lever to “P” or “N” range.
3) Depress the brake pedal and hold it.
4) Check “secondary pressure sensor voltage” by using Subaru Select Monitor while the engine is idling. <Ref. to CVT(diag)-16, OPERATION, Subaru Select Monitor.>

***Standard***
***Approx. 0.8 V***

5) Check “secondary pressure sensor voltage” by using Subaru Select Monitor while the engine is stopped and the ignition switch is turned on. <Ref. to CVT(diag)-16, OPERATION, Subaru Select Monitor.>

***Specification:***
***Approx. 0.5 V***

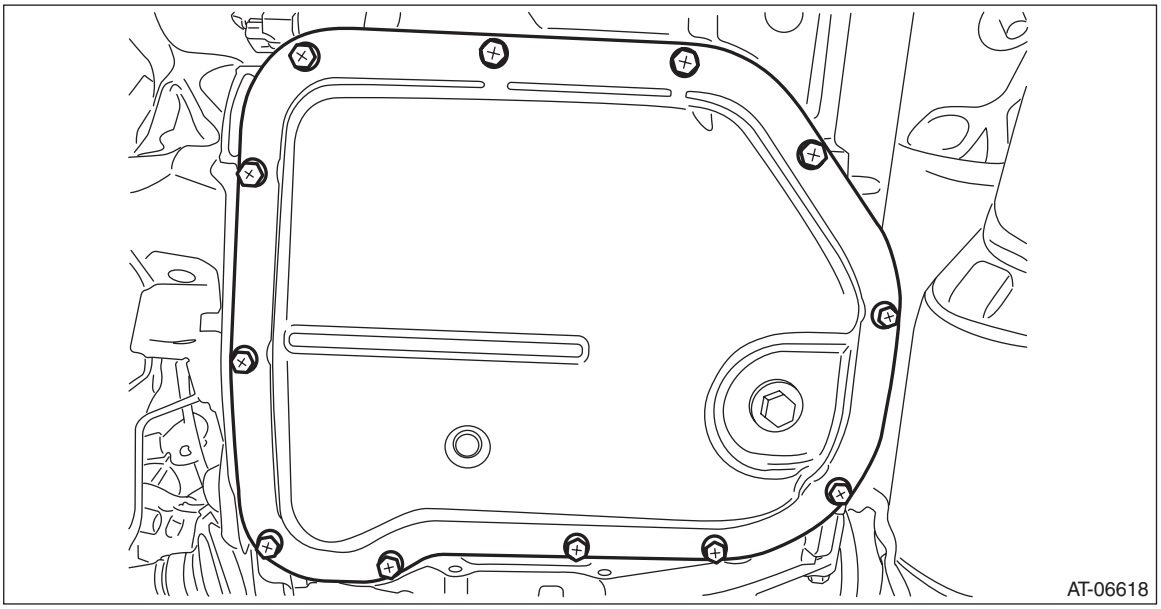
# 19.Oil Pan and Strainer

## A: REMOVAL

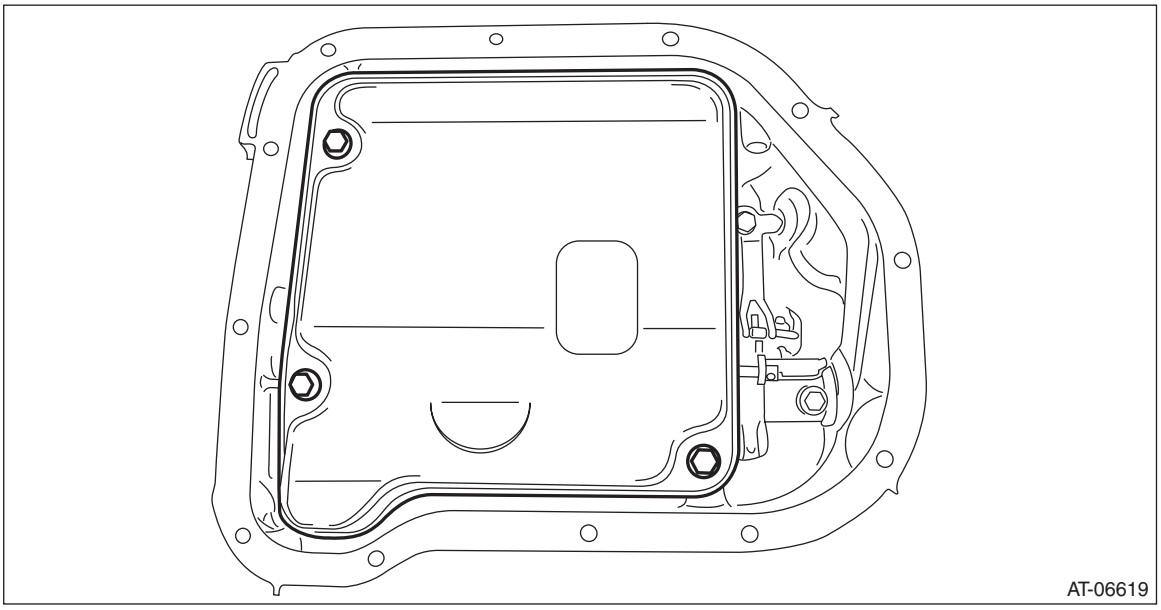
**CAUTION:**
**• Directly after the vehicle has been running or the engine has been long idle running, the CVTF is hot. Be careful not to burn yourself.**
**• Be careful not to spill CVTF on the exhaust pipe to prevent it from emitting smoke or causing a fire. If the CVTF adheres, wipe it off completely.**

1) Lift up the vehicle.
2) Clean the transmission exterior.
3) Remove the CVTF drain plug to drain CVTF.
4) Remove the oil pan.

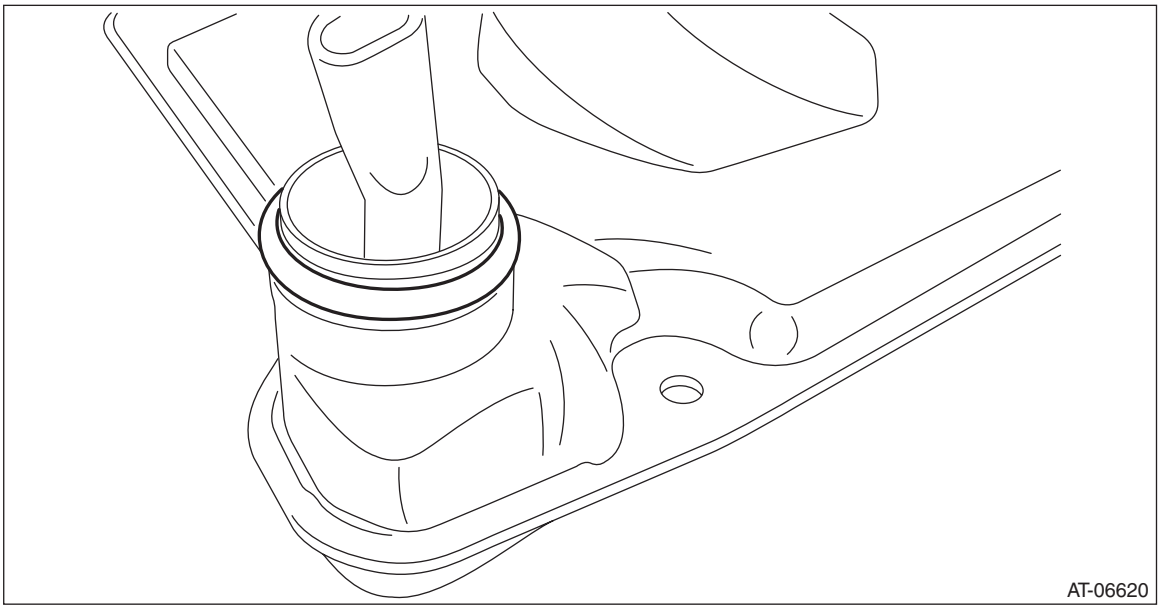
**CAUTION:**
**Be careful not to allow foreign matter such as dust or dirt to enter the oil pan.**



5) Remove the magnet.
6) Remove the oil strainer.



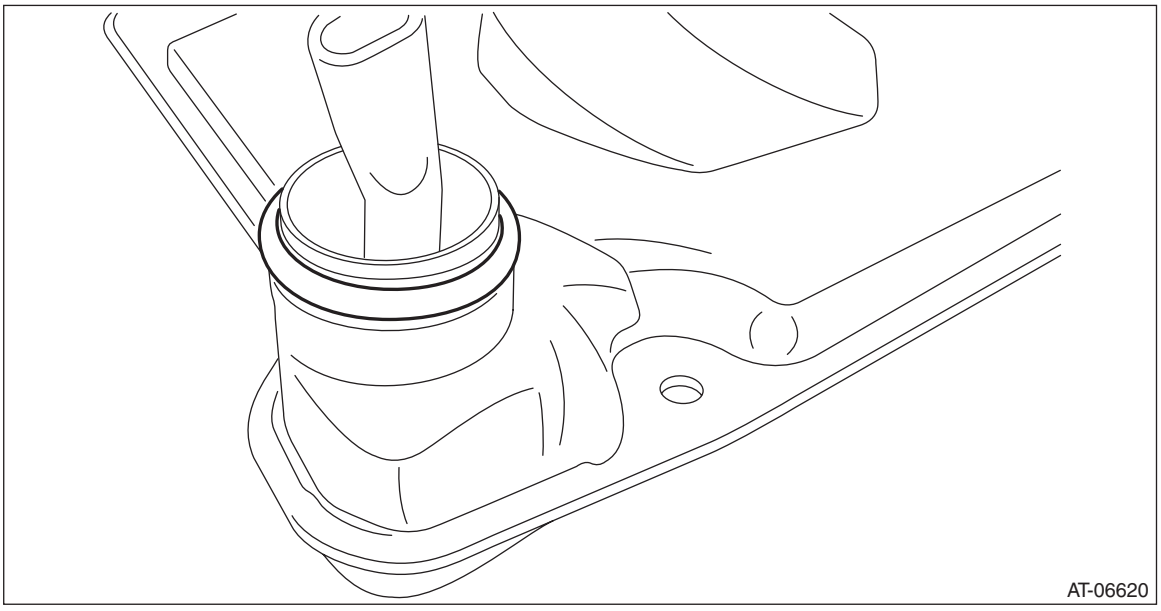
7) Remove the O-ring from oil strainer.



## B: INSTALLATION

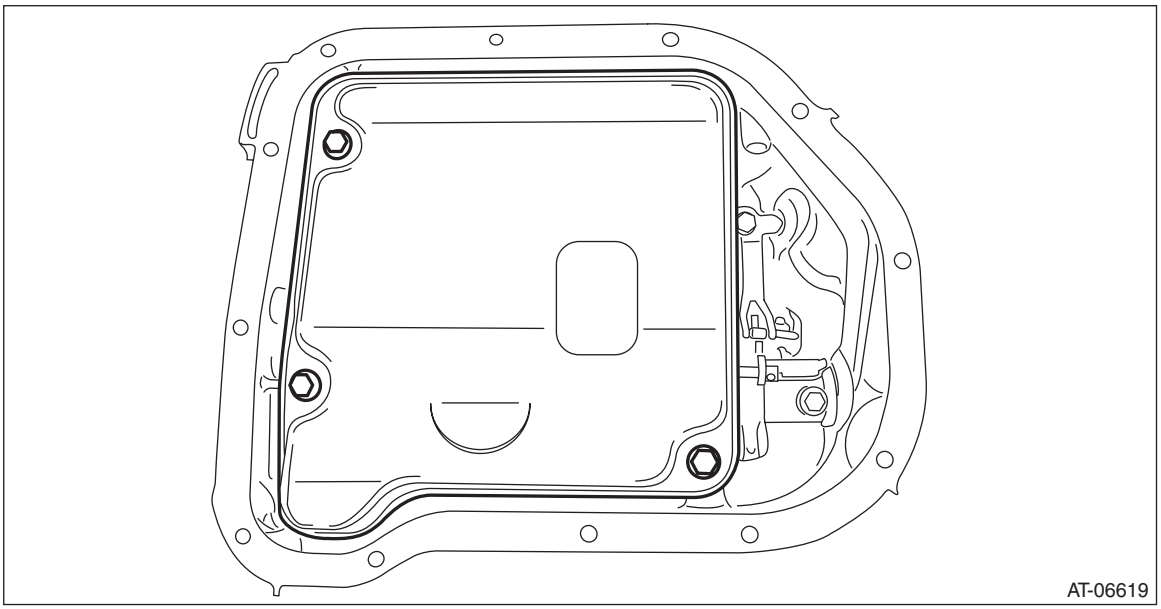
1) Clean the mating surface of oil pan and transmission case.
2) Install the O-ring to the oil strainer.

NOTE:
- Use new O-rings.
- Apply CVTF to the O-ring.



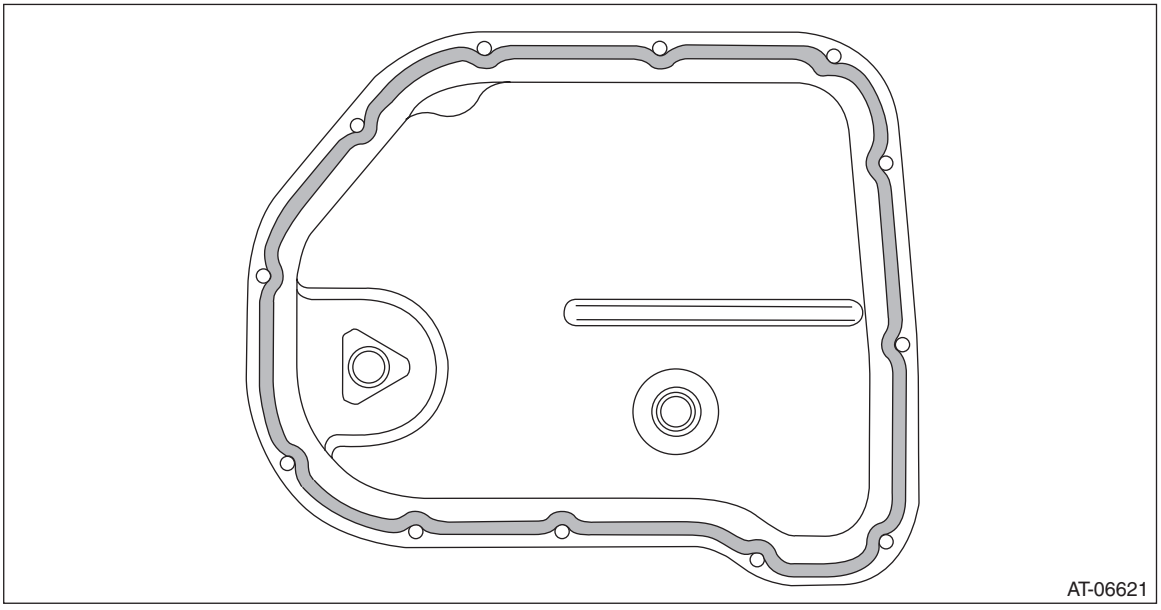
3) Install the oil strainer.

***Tightening torque:***
***9 N·m (0.9 kgf-m, 6.6 ft-lb)***



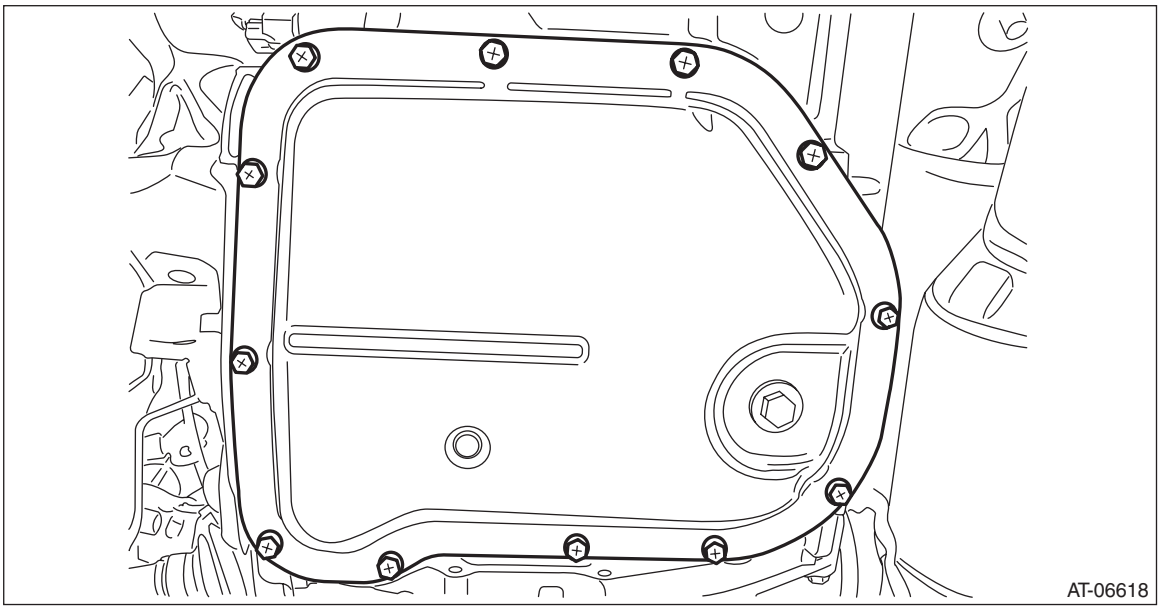
4) Clean the magnet.
5) Attach the magnet at the specified position of the oil pan.
6) Apply liquid gasket all around the oil pan mating surface seamlessly.

***Liquid gasket:***
***THREE BOND 1217B (Part No. K0877YA020) or equivalent***



7) Install the oil pan by equally tightening the bolts.

***Tightening torque:***
***5 N·m (0.5 kgf-m, 3.7 ft-lb)***



8) Refill CVTF and adjust the level. <Ref. to CVT-36, REPLACEMENT, CVTF.>

## C: INSPECTION

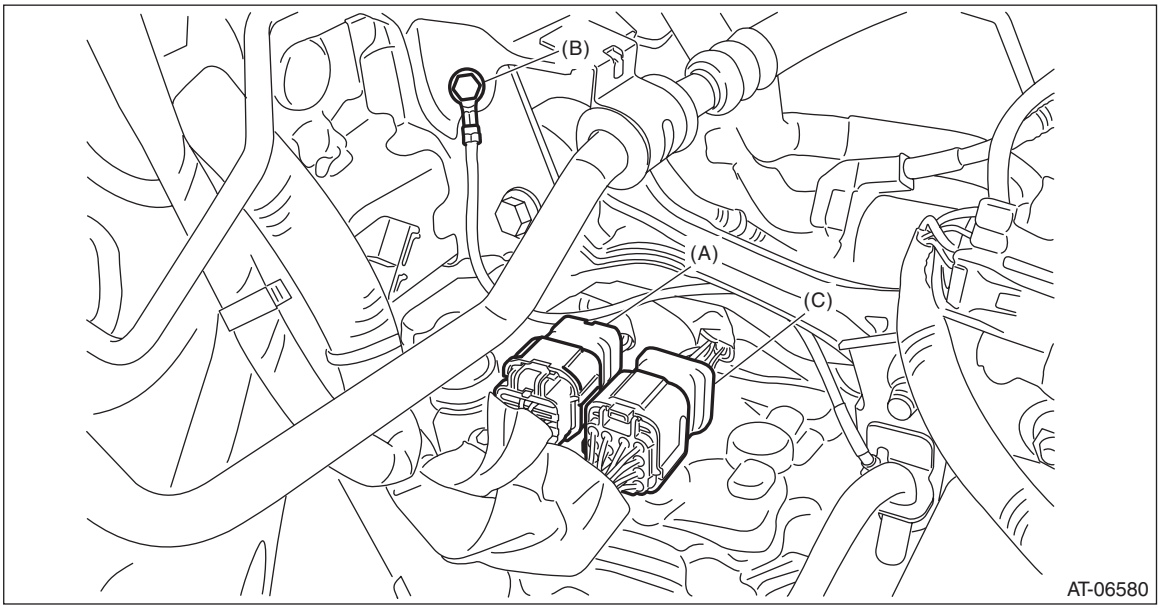
- Check each part for damage or dust.
- Check oil strainer for clogging.

# 20.Control Valve Body

## A: REMOVAL

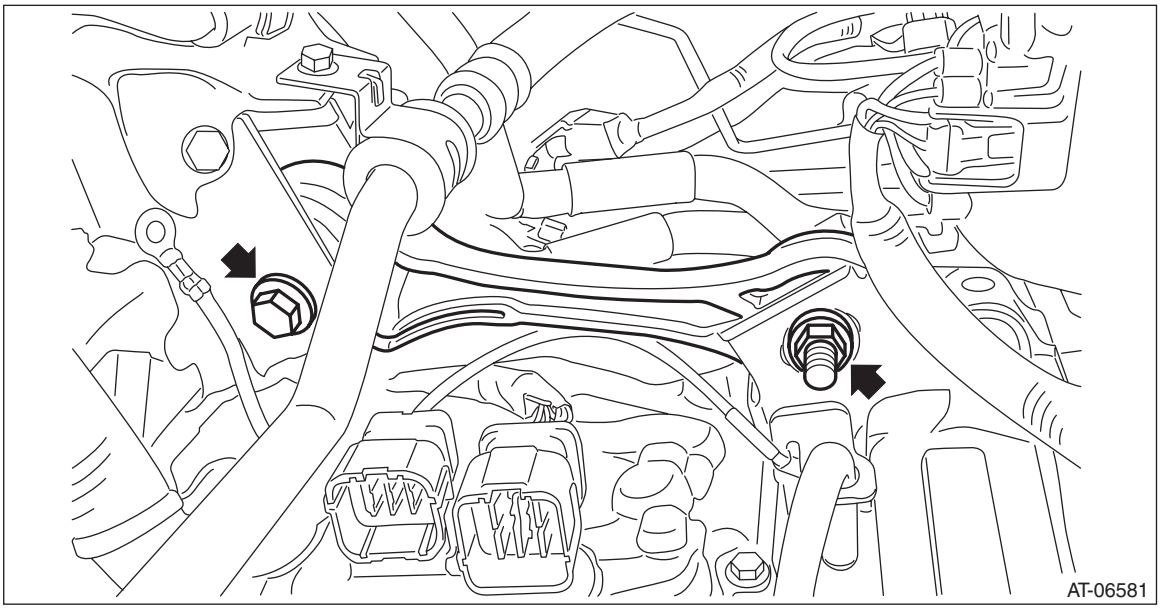
**CAUTION:**
**• Directly after the vehicle has been running or the engine has been idling for a long time, the CVTF is hot. Be careful not to burn yourself.**
**• Be careful not to spill CVTF on the exhaust pipe to prevent it from emitting smoke or causing a fire. If the CVTF adheres, wipe it off completely.**
**• Always clean the engine compartment before removal.**

NOTE:
The control valve body is replaced as an assembly only, because it is a non-disassembly part.
1) Disconnect the ground cable from battery.
2) Remove the air intake boot assembly. <Ref. to IN(H4DO)-12, REMOVAL, Air Intake Boot.>
3) Disconnect the following connectors.
- Transmission harness connectors
- Inhibitor harness connector
- Transmission radio ground terminal

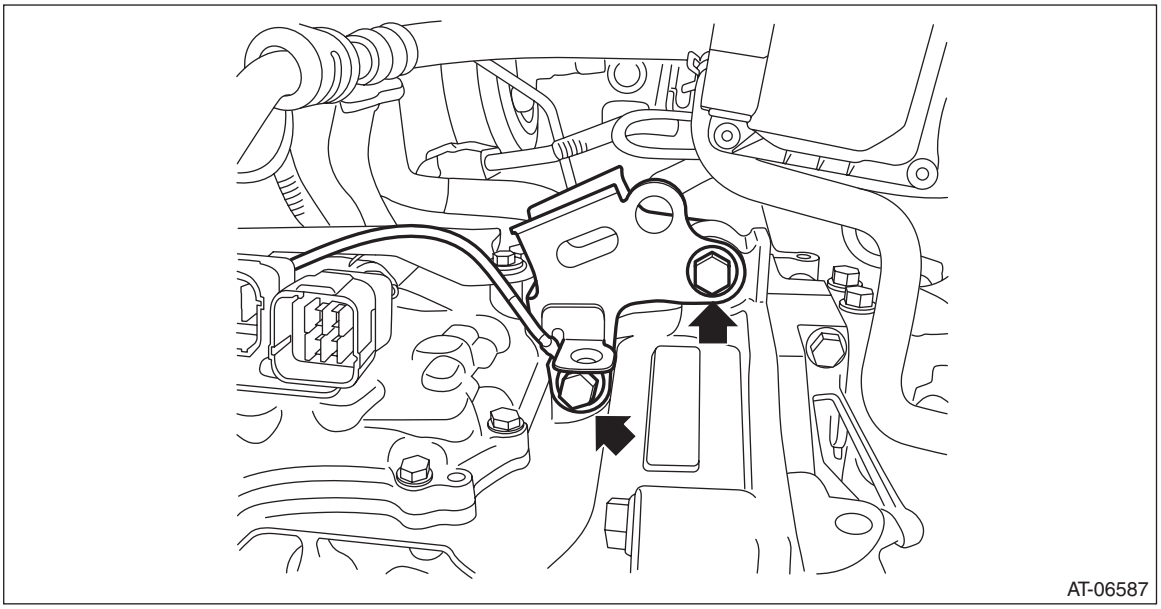


(A) Transmission harness connectors
(B) Transmission radio ground terminal
(C) Inhibitor harness connector

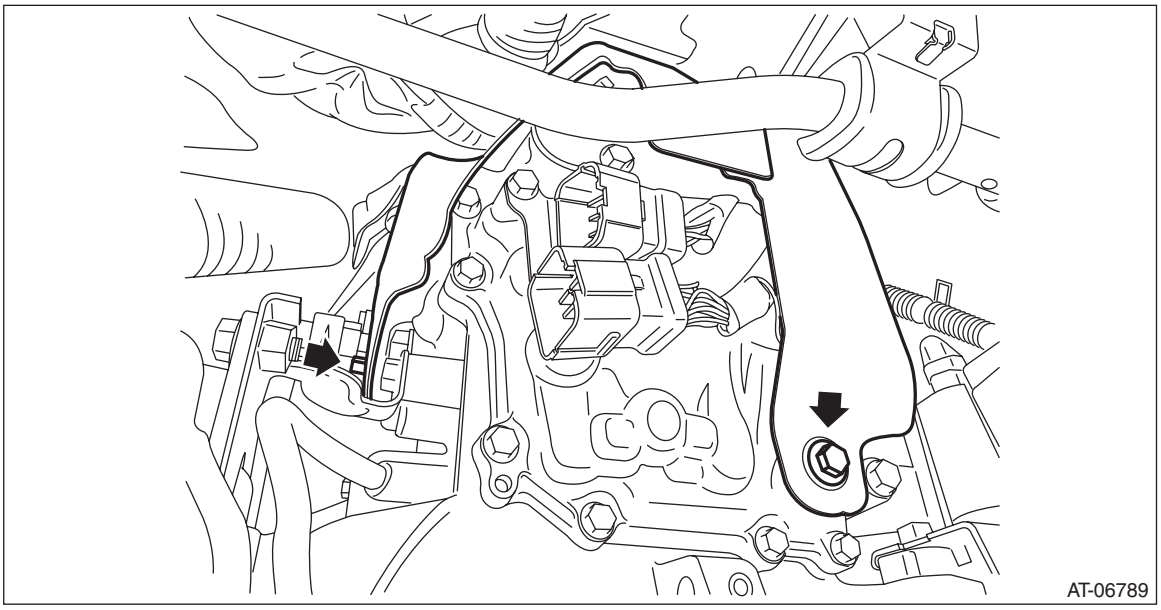
4) Remove the pitching stopper.



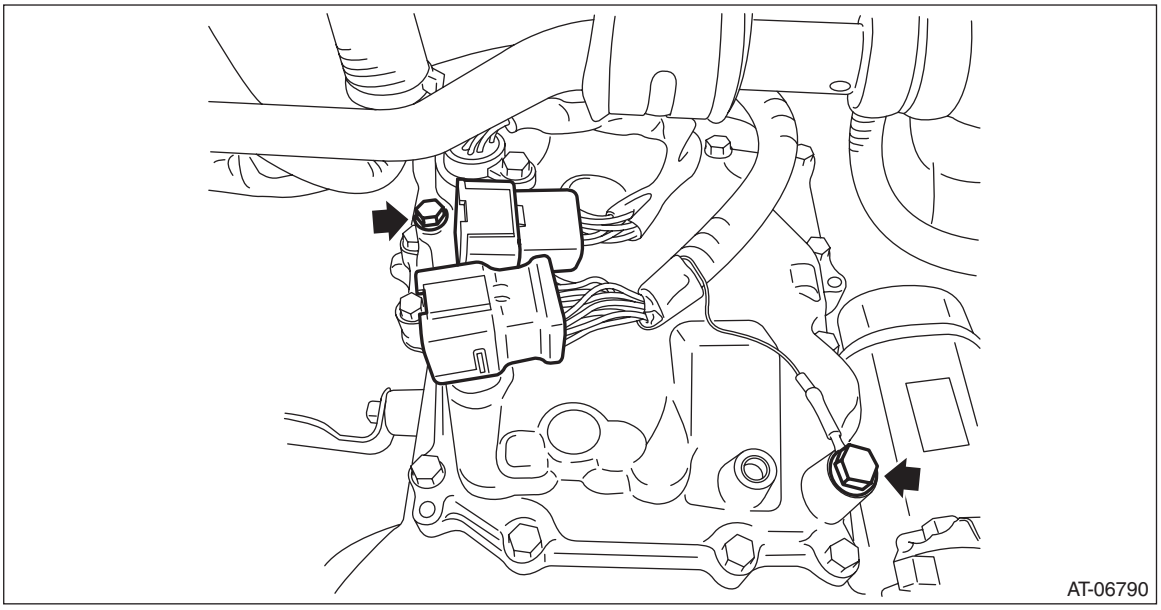
5) Remove the air breather hose from the pitching stopper bracket, and then remove the pitching stopper bracket and transmission radio ground cord.



6) Remove the transmission case cover.



7) Remove the transmission harness stay and ground terminal.

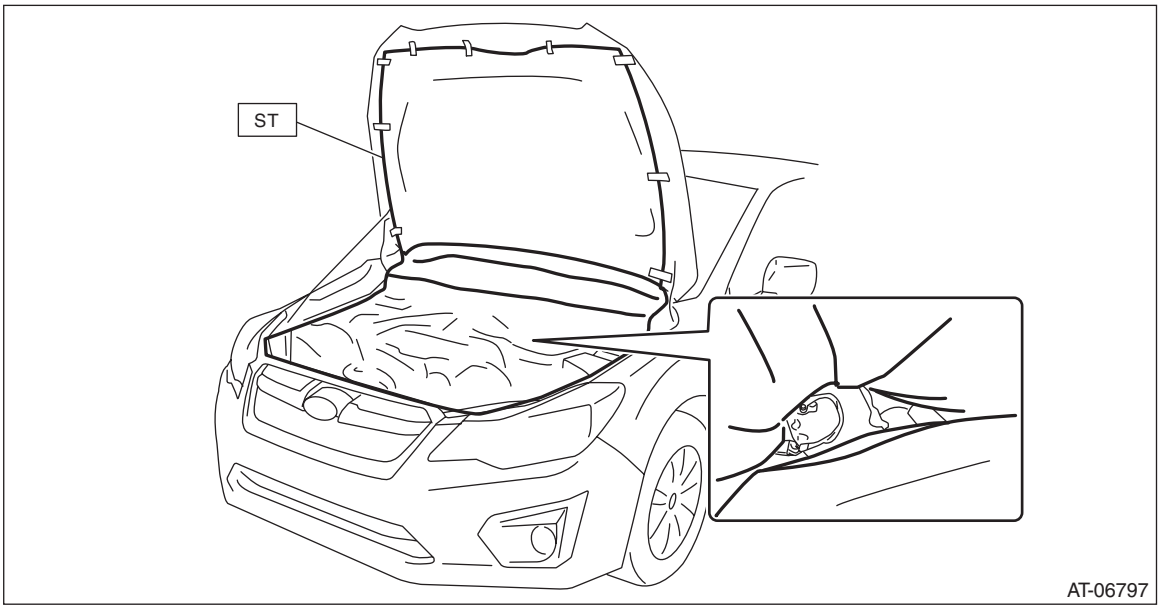


8) Remove the transmission harness connector from the harness stay.
9) Remove the throttle body, and move it aside so that it will not interfere with the removal of the control valve.
<Ref. to FU(H4DO)-18, REMOVAL, Throttle Body.>

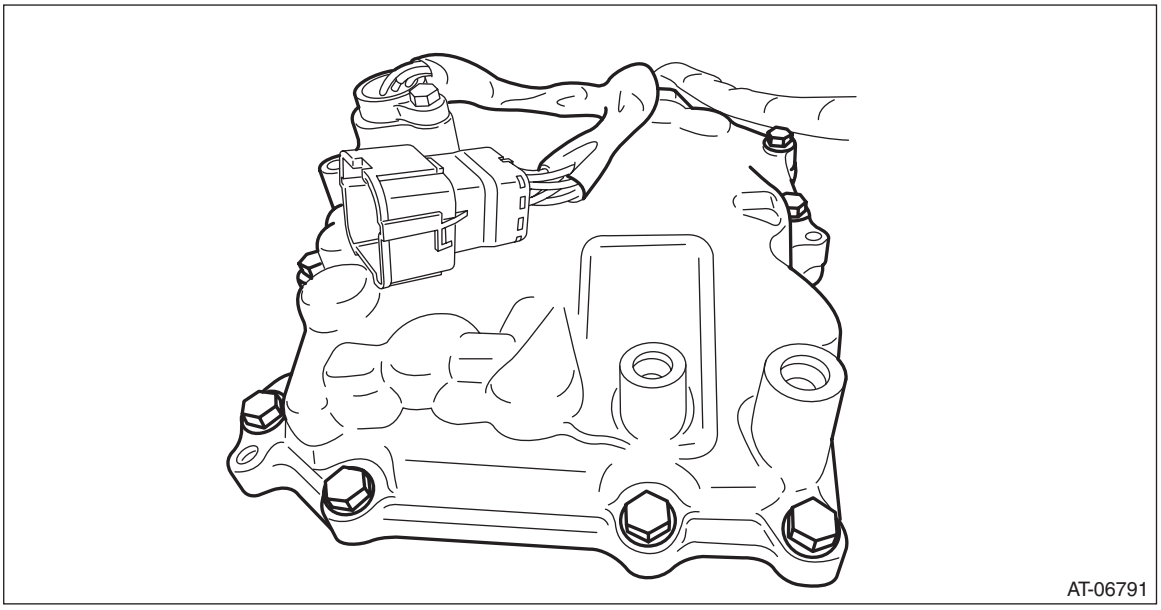
NOTE:
Do not remove the preheater hose.
10) Clean the transmission exterior.

11) Fix the ST with tape, and set the ST to the vehicle.

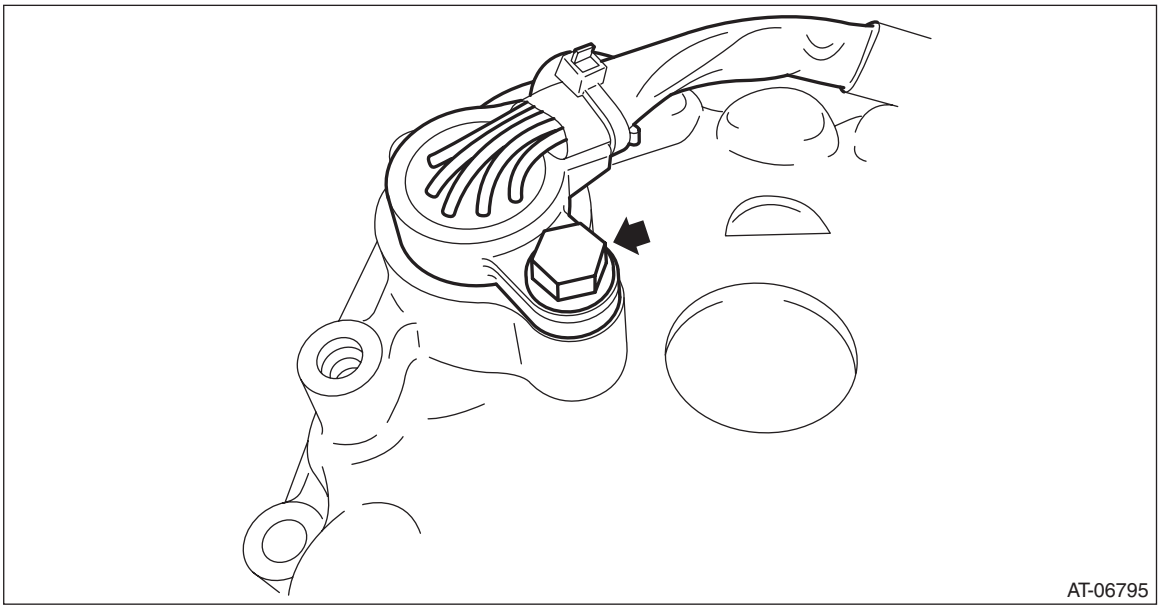
NOTE:
When replacing the control valve body, the sheet is included in the control valve body for repairs.
ST 18761AA010 SHEET SPECIAL TOOL



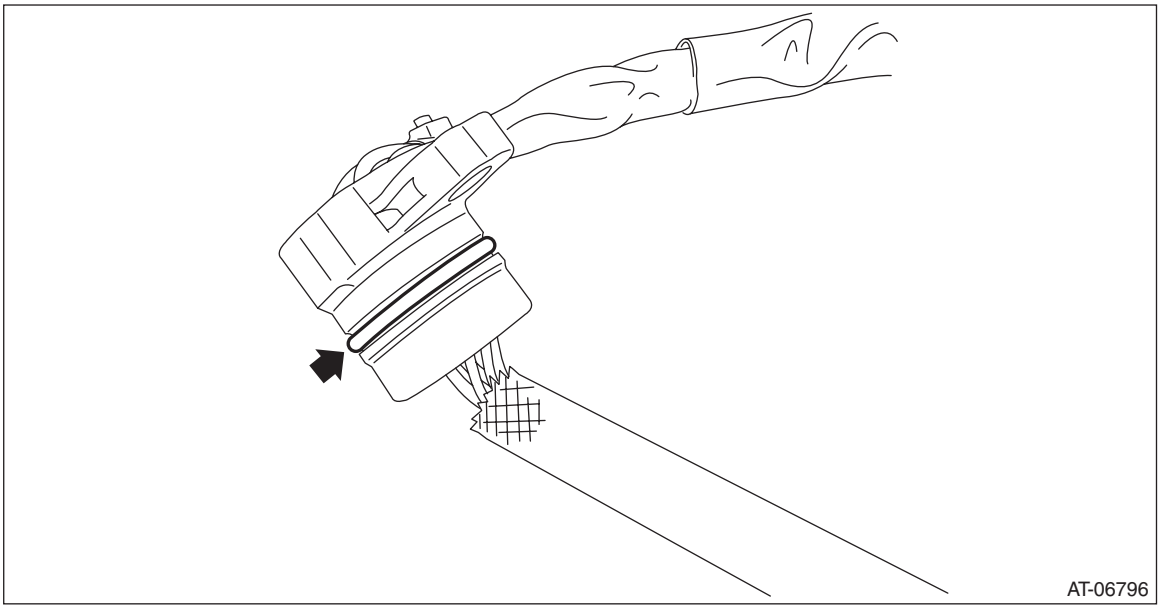
12) Remove the valve cover and gasket.



13) Remove the transmission harness from the valve cover.

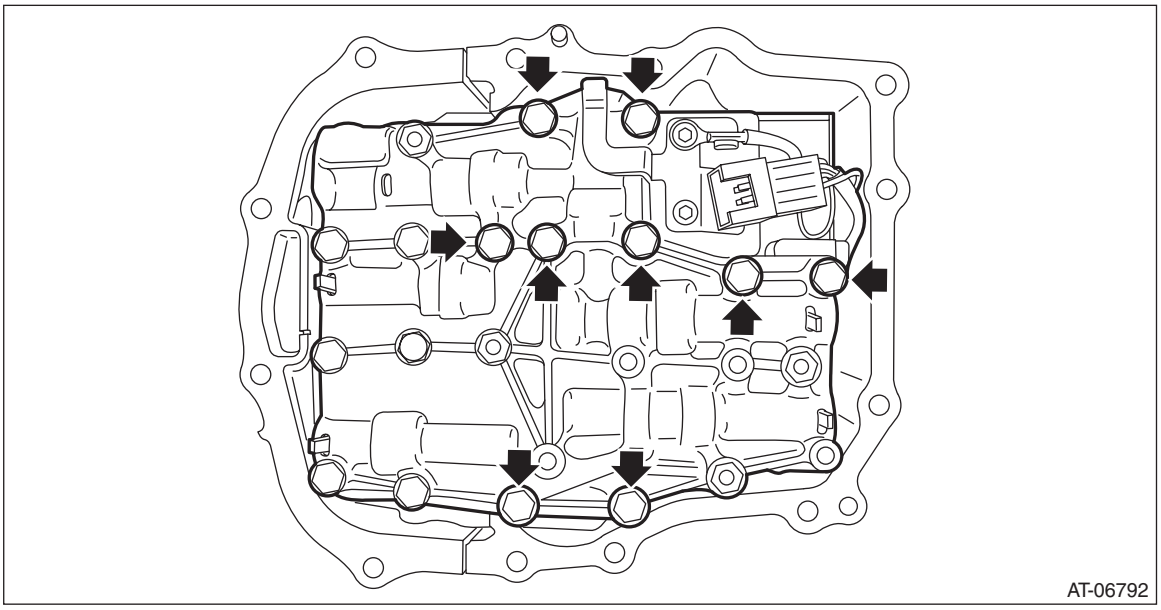


14) Remove the O-ring from the transmission harness.

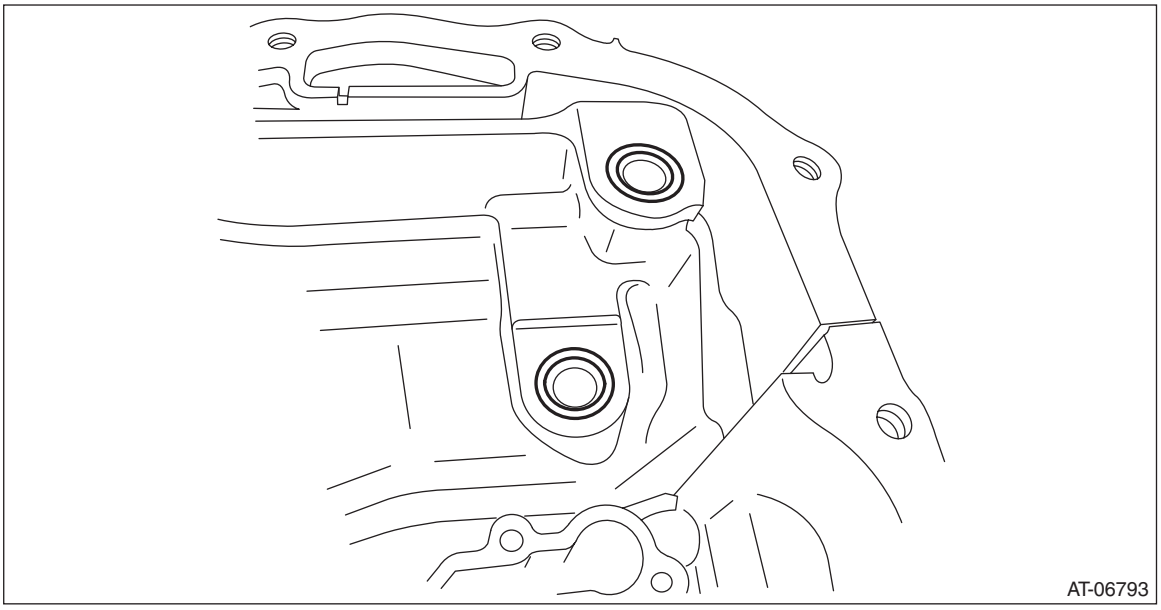


15) Disconnect the harness connector from the control valve body.

16) Remove the control valve body.



17) Remove the O-ring from the transmission.



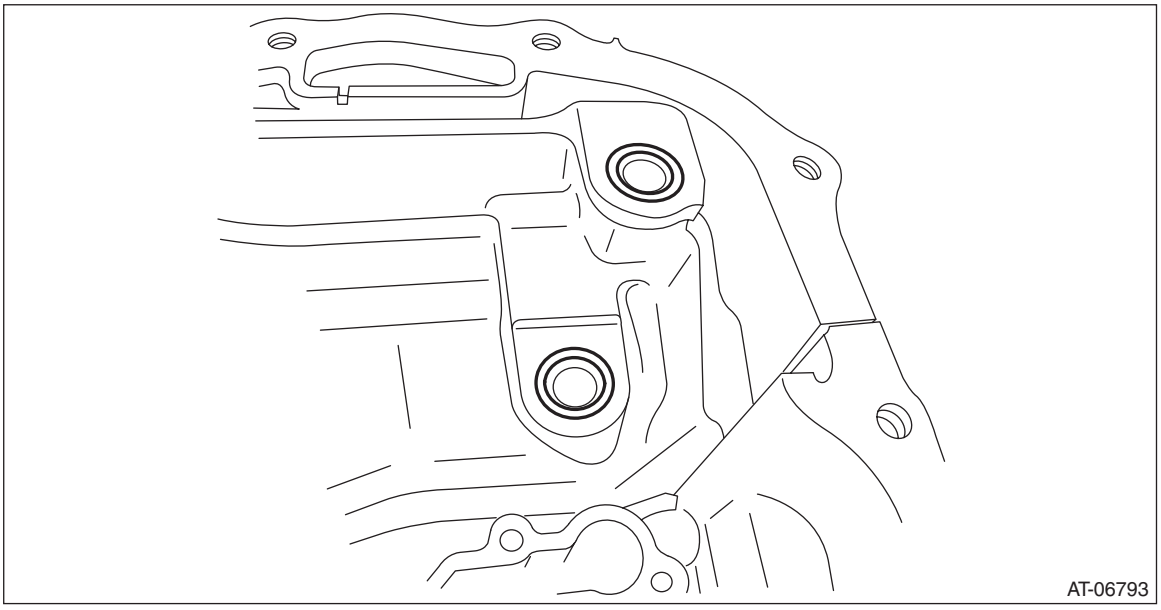
## B: INSTALLATION

1) Clean the mating surface of valve cover and transmission side.

**CAUTION:**
**When cleaning the mating surface of the transmission side, be careful not to allow any dust, foreign matter and used liquid gasket to enter the transmission.**

2) Check the control valve body for dust and other foreign matter.
3) Install the O-ring.

NOTE:
- Use new O-rings.
- Apply CVTF to the O-ring.

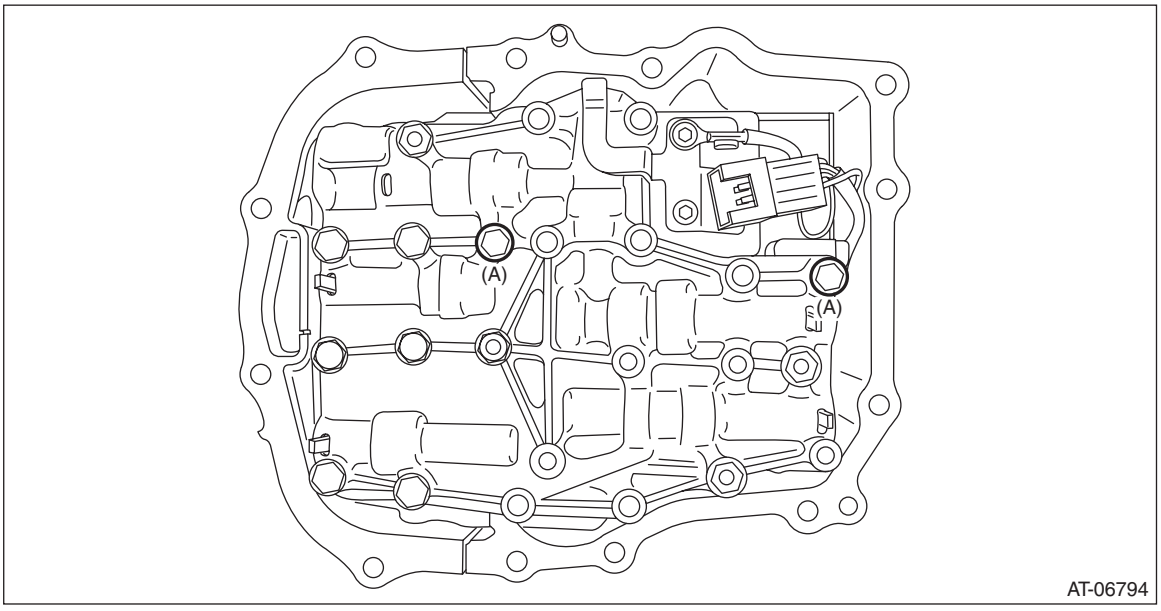


AT-06793

4) Install the control valve body.
   (1) Install the control valve body to the transmission.

**CAUTION:**
- **Do not damage the O-ring.**
- **Perform installation so that the O-ring is not displaced.**

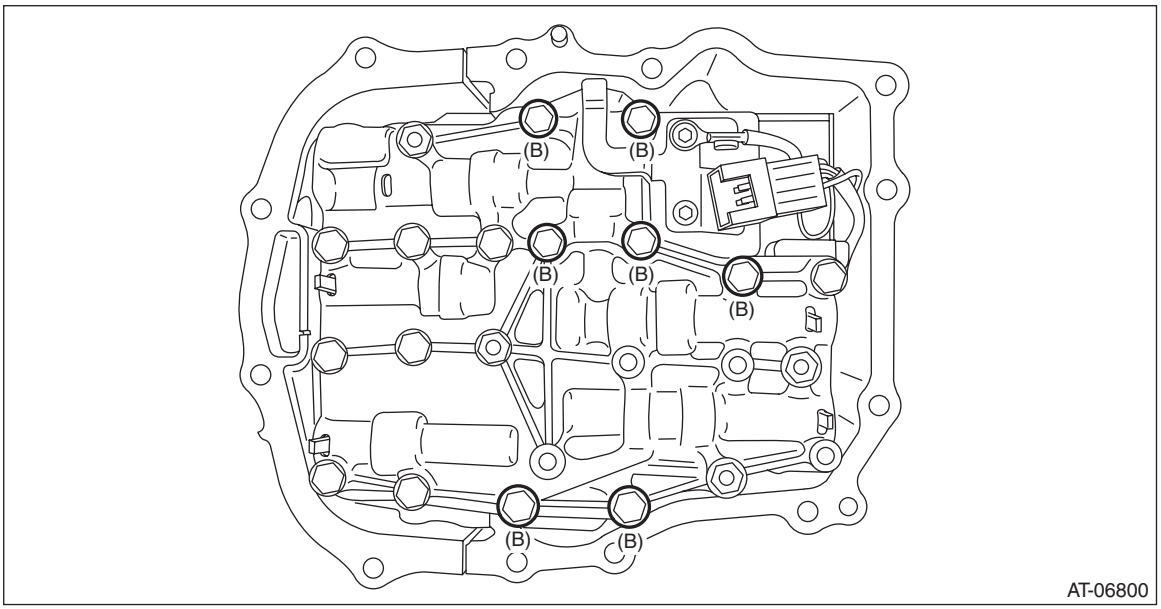
   (2) Temporarily tighten the bolt (A: silver).



AT-06794

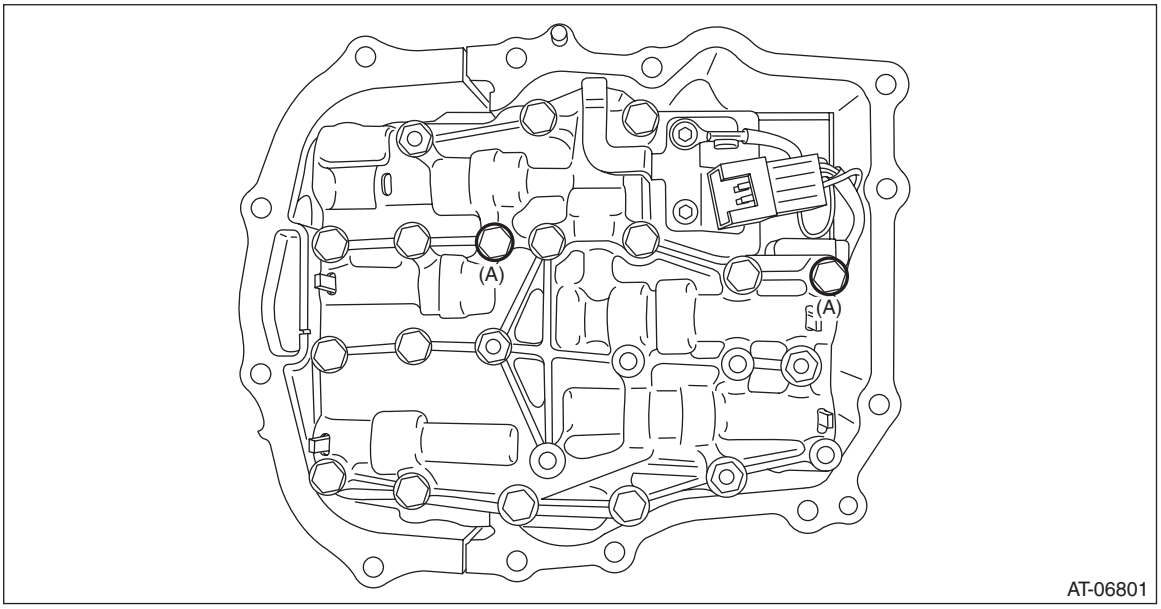
(3) Attach the bolt (B).

***Tightening torque:***
***9 N·m (0.9 kgf-m, 6.6 ft-lb)***



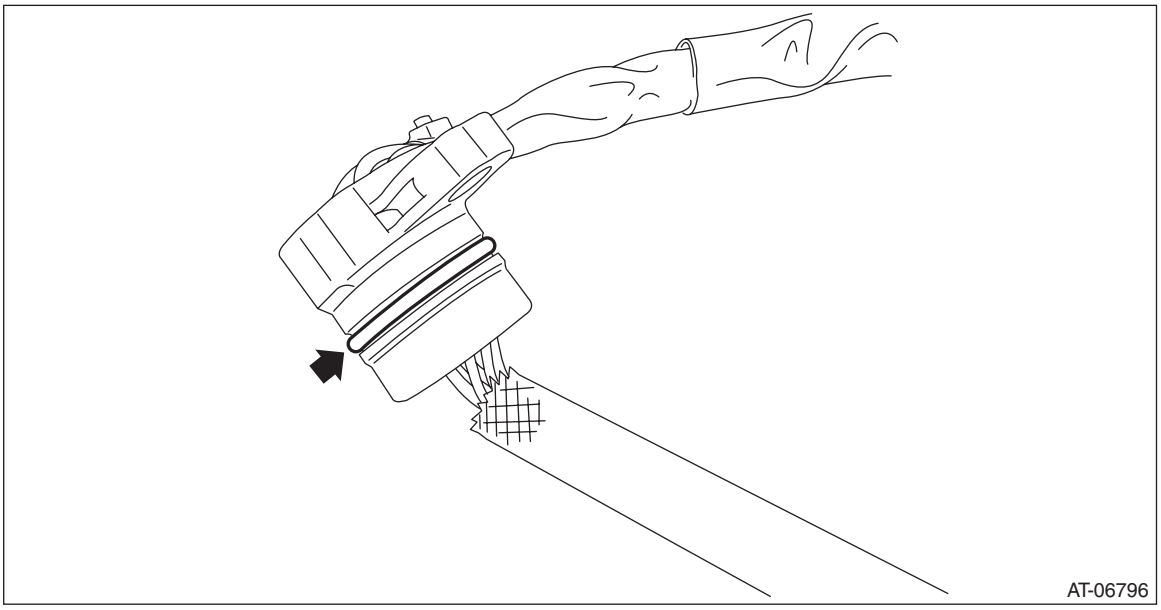
(4) Tighten the bolt (A: silver).

***Tightening torque:***
***9 N·m (0.9 kgf-m, 6.6 ft-lb)***



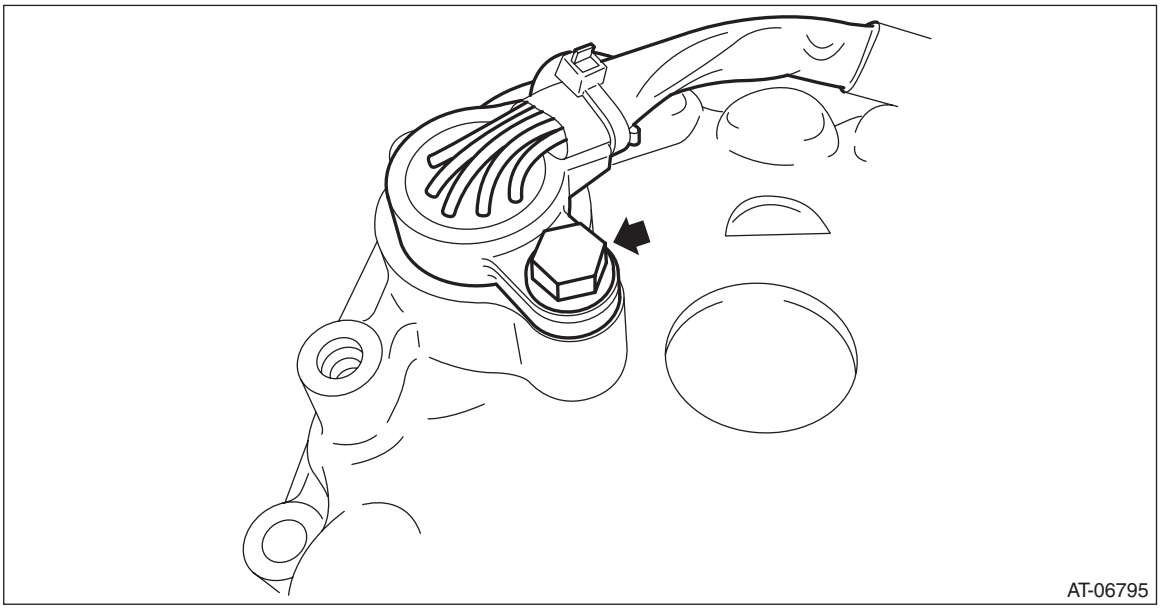
5) Install the O-ring to the transmission harness.

NOTE:
- Use new O-rings.
- Apply CVTF to the O-ring.



6) Install the transmission harness to the valve cover.

***Tightening torque:***
***7 N·m (0.7 kgf-m, 5.2 ft-lb)***

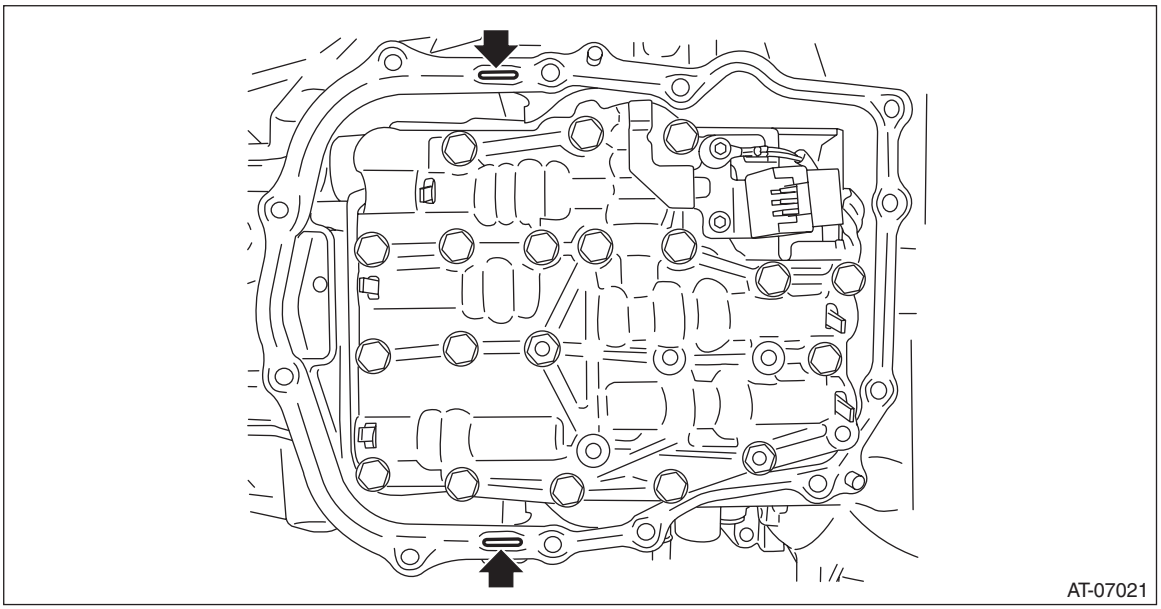


7) Install the gasket to the transmission.

NOTE:
Use a new gasket.

8) Apply liquid gasket to the oval hole of gasket.

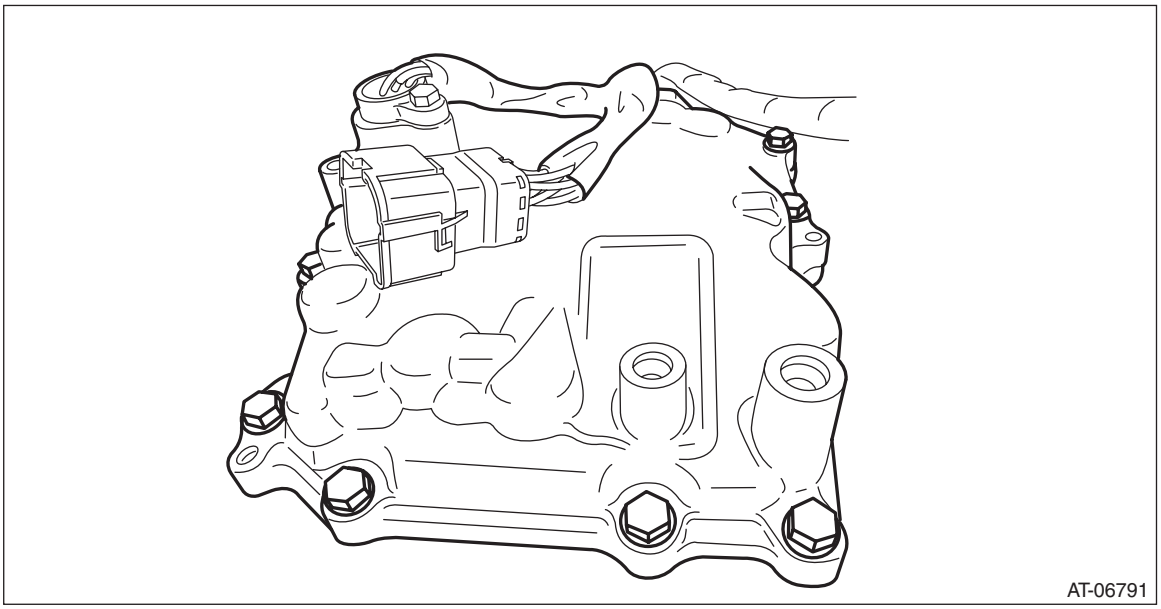
***Liquid gasket:***
***THREE BOND 1215 (Part No. 004403007) or equivalent***



9) Connect the transmission harness connector to the control valve body, and install the valve cover.

**CAUTION:**
**Be careful not to catch the sheet of the ST.**

***Tightening torque:***
***8 N·m (0.8 kgf-m, 5.9 ft-lb)***

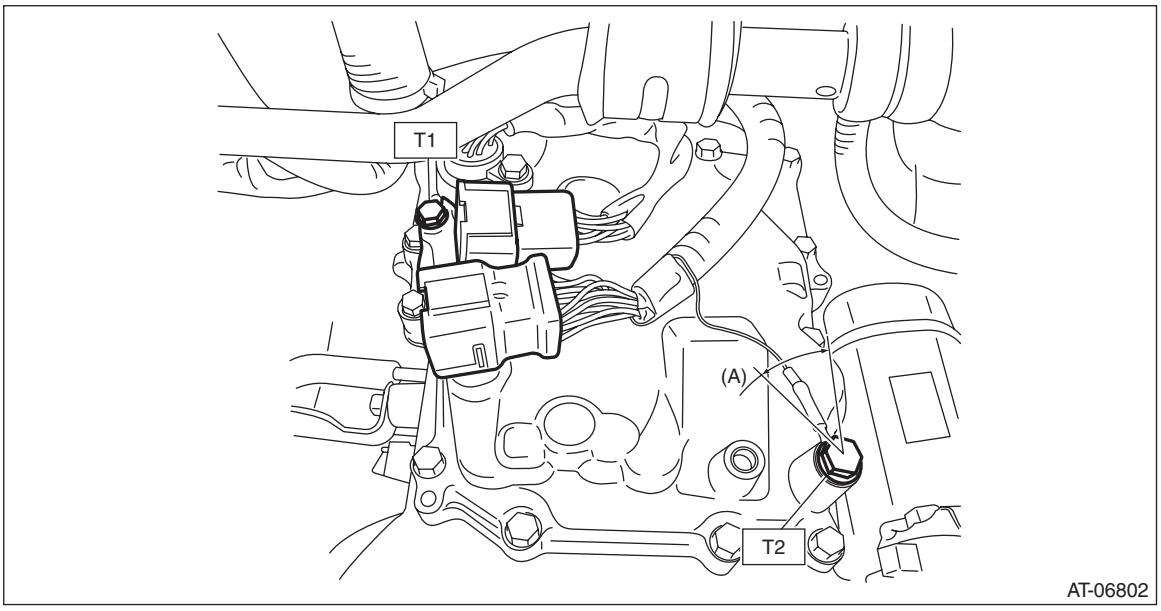


10) Remove the ST (SHEET SPECIAL TOOL).
11) Install the throttle body. <Ref. to FU(H4DO)-20, INSTALLATION, Throttle Body.>
12) Install the transmission harness connector to the harness stay.

13) Install the transmission harness stay and transmission ground terminal.

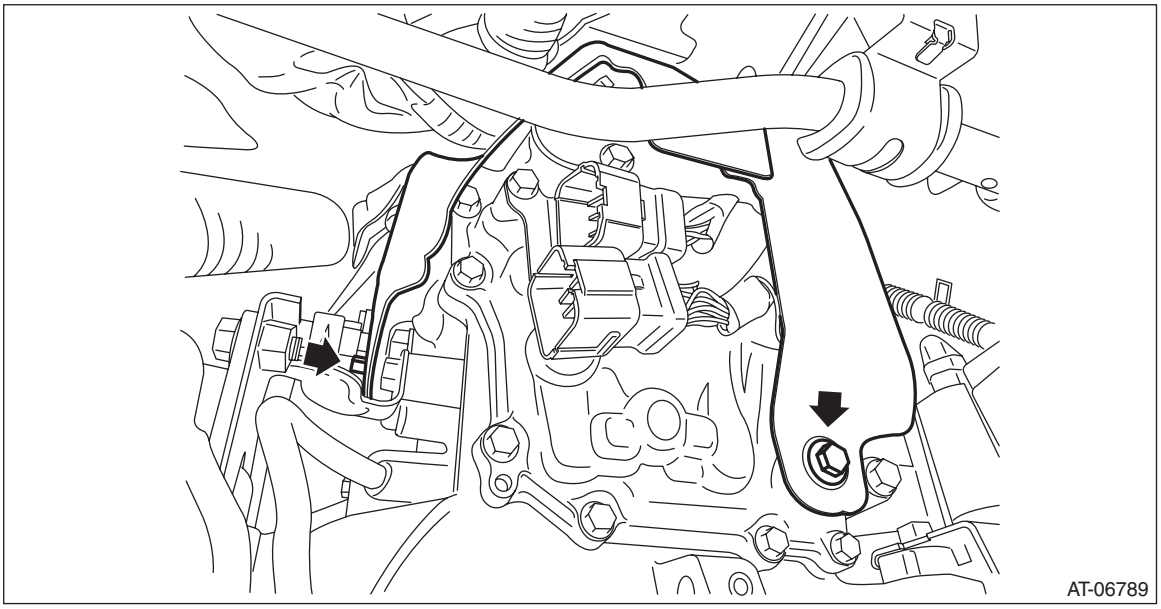
NOTE:
Install the transmission ground terminal in the direction within the range of approx. 30° (A).

***Tightening torque:***
***T1: 7 N·m (0.7 kgf-m, 5.2 ft-lb)***
***T2: 14 N·m (1.4 kgf-m, 10.3 ft-lb)***



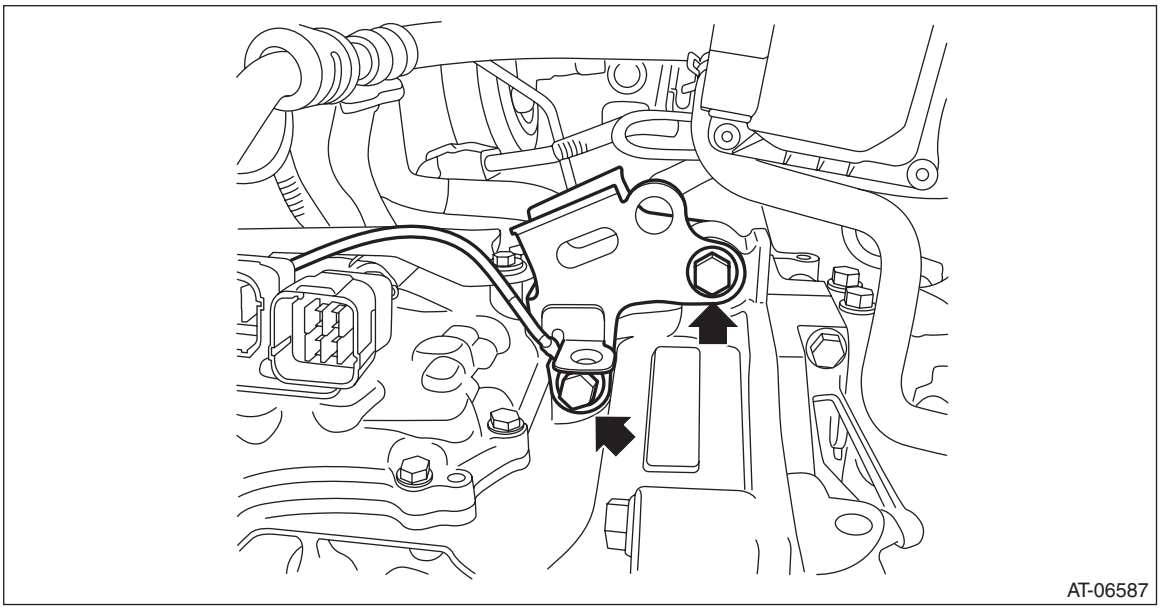
14) Install the transmission case cover.

***Tightening torque:***
***8 N·m (0.8 kgf-m, 5.9 ft-lb)***



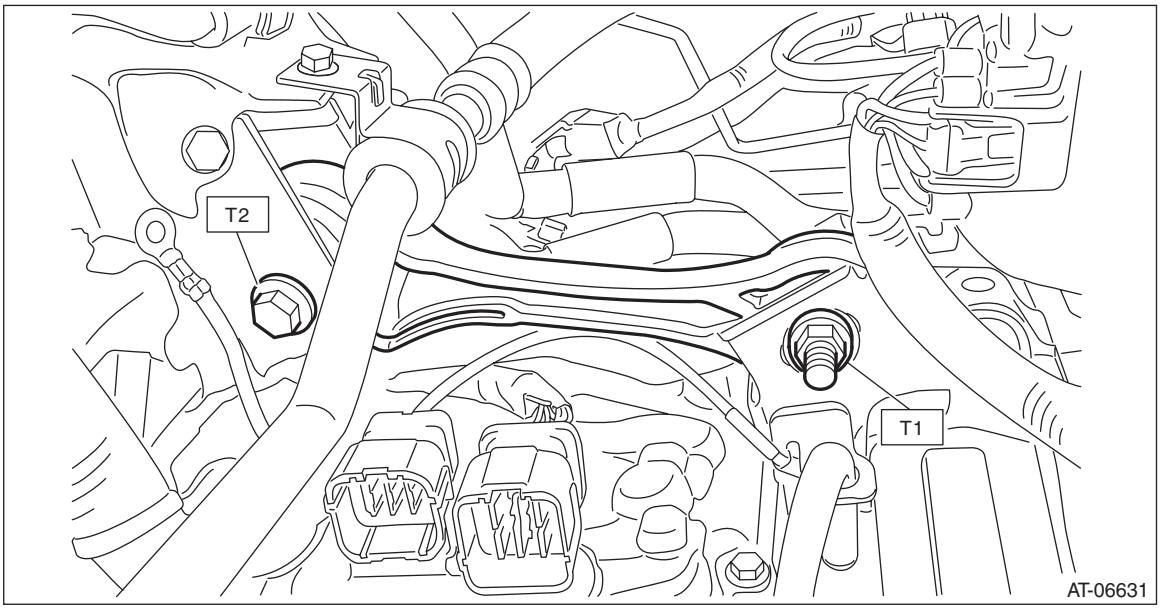
15) Install the pitching stopper bracket and transmission radio ground cord.

***Tightening torque:***
***41 N·m (4.2 kgf-m, 30.2 ft-lb)***



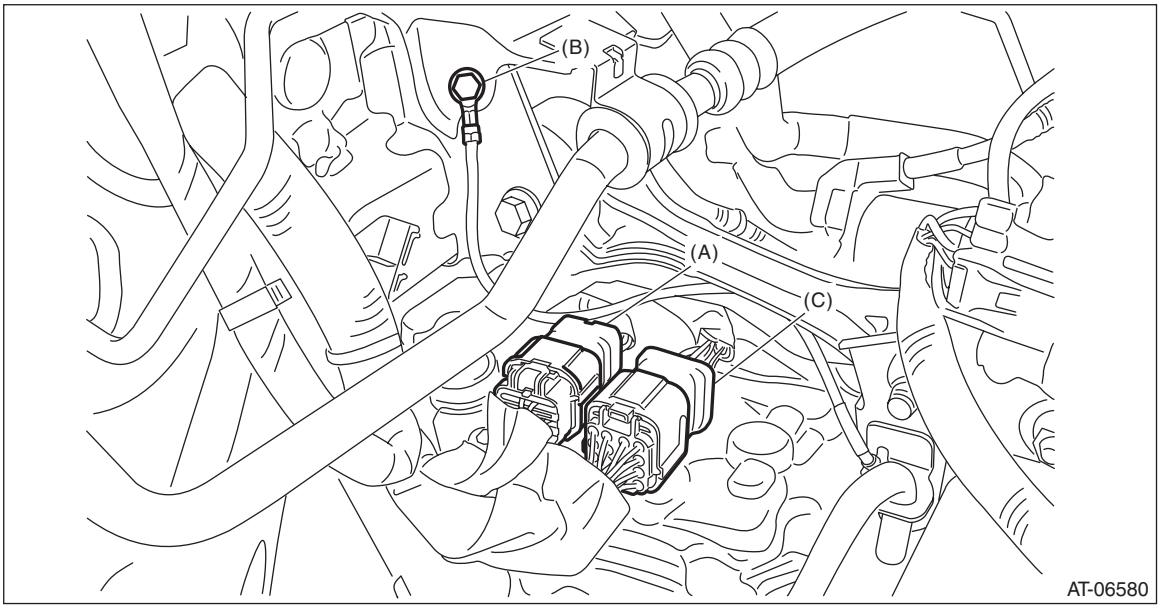
16) Install the air breather hose to the pitching stopper bracket.
17) Install the pitching stopper.

***Tightening torque:***
***T1: 50 N·m (5.1 kgf-m, 36.9 ft-lb)***
***T2: 58 N·m (5.9 kgf-m, 42.8 ft-lb)***



18) Connect the following harness connectors.
- Transmission harness connectors
- Inhibitor harness connector
- Transmission radio ground terminal

***Tightening torque:***
***13 N·m (1.3 kgf-m, 9.6 ft-lb)***



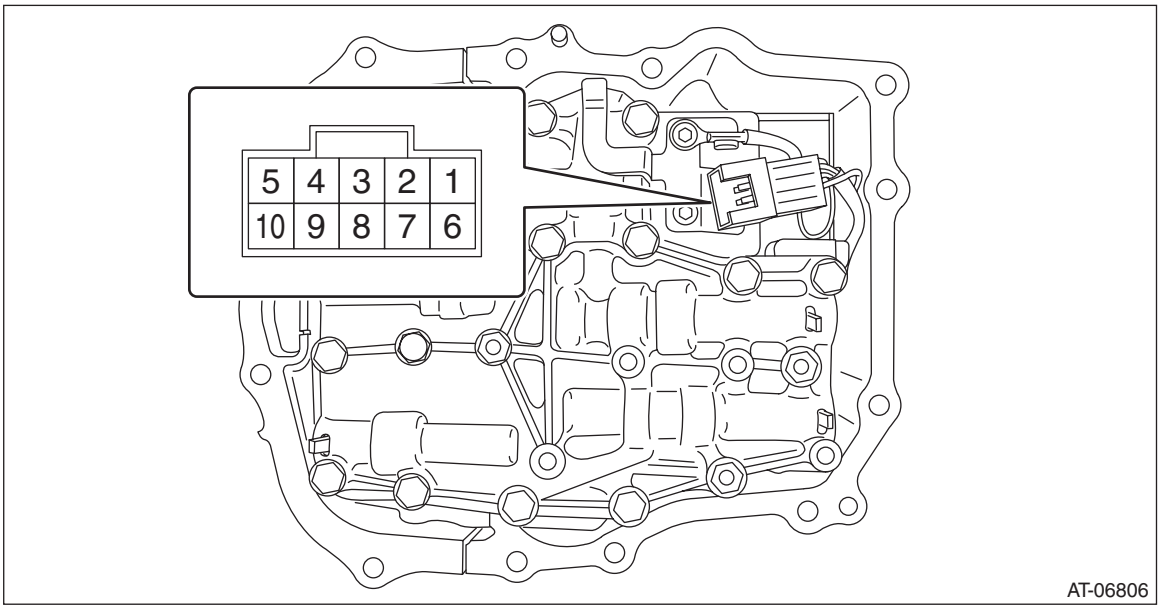
(A) Transmission harness connectors
(B) Transmission radio ground terminal
(C) Inhibitor harness connector

19) Install the air intake boot assembly. <Ref. to IN(H4DO)-12, INSTALLATION, Air Intake Boot.>
20) Adjust the CVTF level. <Ref. to CVT-34, ADJUSTMENT, CVTF.>

## C: INSPECTION

- Check each part for damage or dust.
- Measure the resistance of each solenoid, sensor and ground wire.

NOTE:
Measurement should be performed at a temperature of 20°C (68°F).



- **Solenoid**

| Solenoid | Terminal No. | Standard |
|---|---|---|
| Primary UP solenoid | No. 2 — Control valve body | Approx. 10 — 13.5 Ω |
| Secondary solenoid | No. 3 — Control valve body | Approx. 5 — 7 Ω |
| F&R clutch solenoid | No. 4 — Control valve body | Approx. 4 — 6 Ω |
| Primary DOWN solenoid | No. 7 — Control valve body | Approx. 10 — 13.5 Ω |
| Lock-up duty solenoid | No. 9 — Control valve body | Approx. 10 — 13.5 Ω |
| AWD solenoid | No. 10 — Control valve body | Approx. 2 — 4.5 Ω |

- **Oil temperature sensor**

| Sensor | Terminal No. | Standard (at 20°C (68°F)) |
|---|---|---|
| Oil temperature sensor | No. 1 — No. 6 | Approx. 2.5 kΩ |

- **Transmission ground**

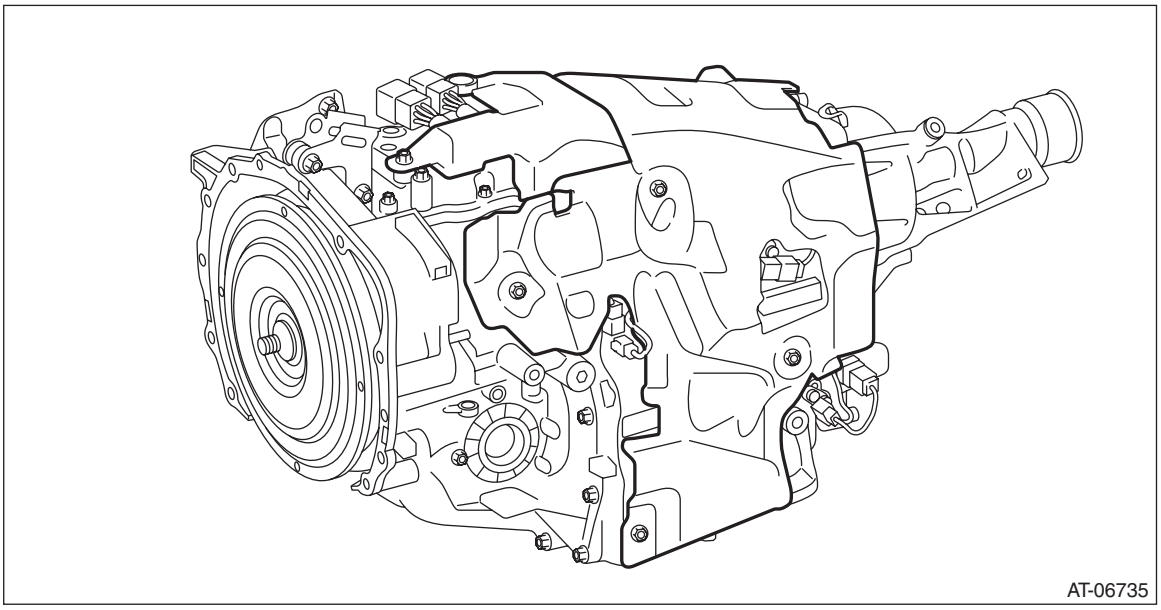
| Terminal No. | Standard |
|---|---|
| No. 8 — Control valve body | Less than 1 Ω |

# 21.Transmission Harness

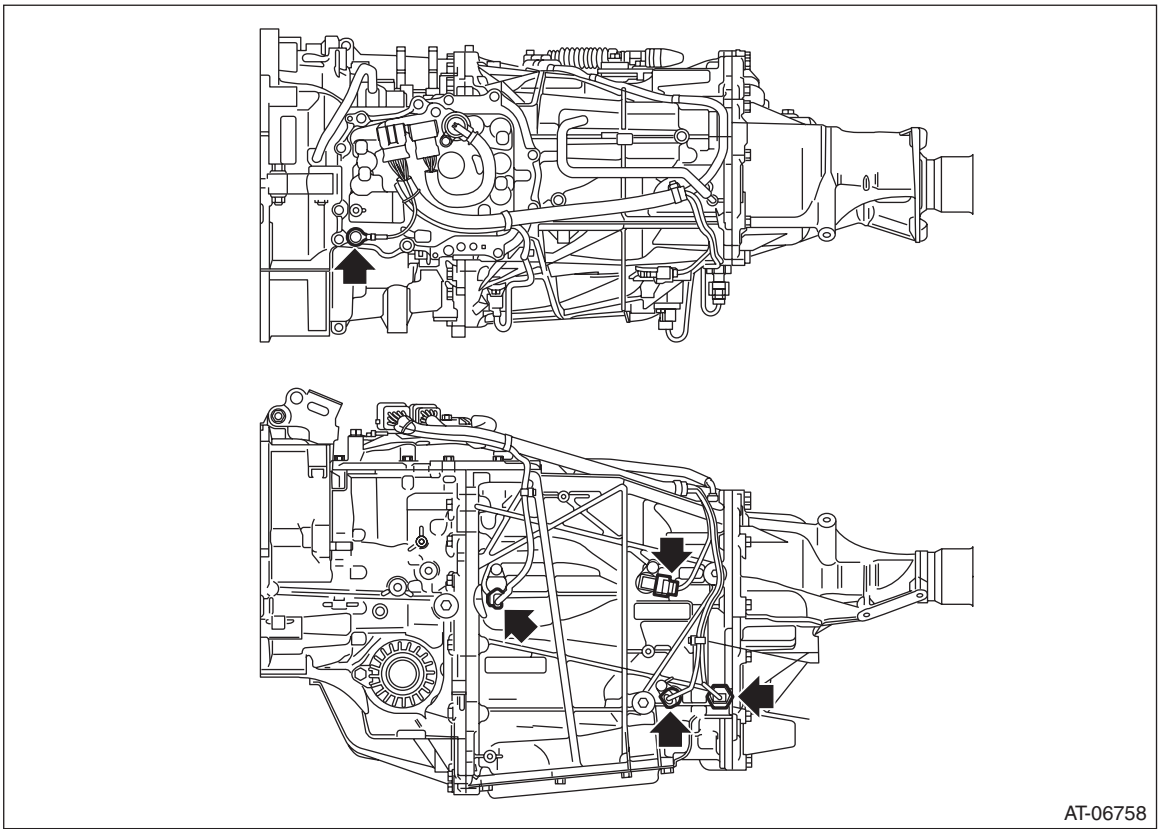
## A: REMOVAL

### 1. INHIBITOR HARNESS

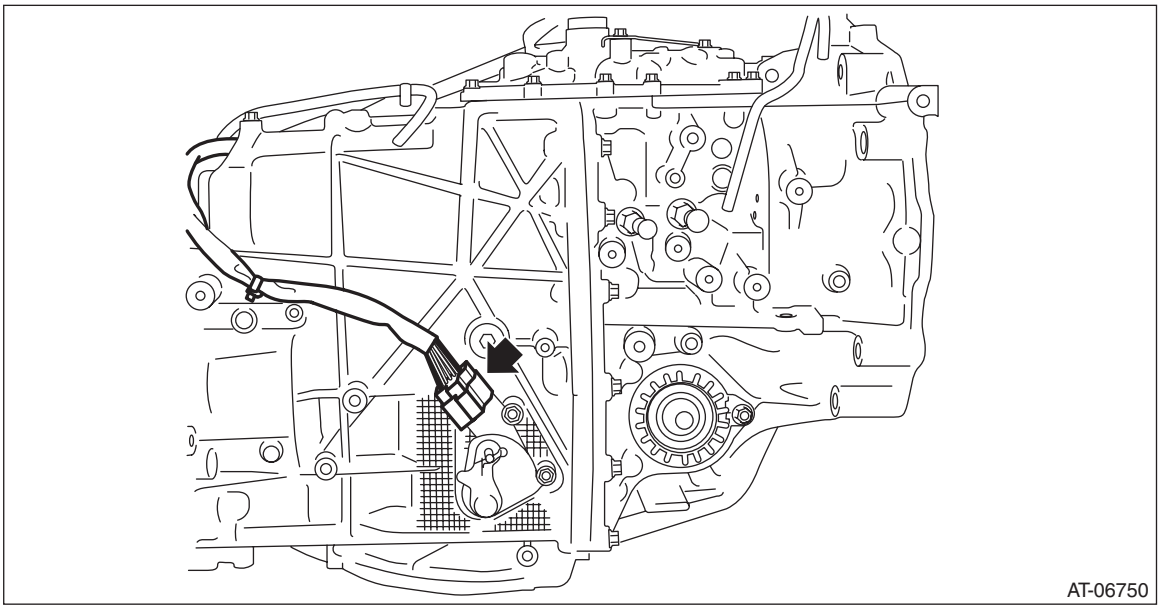
1) Remove the transmission from the vehicle. <Ref. to CVT-56, REMOVAL, Automatic Transmission Assembly.>
2) Remove the transmission case cover.



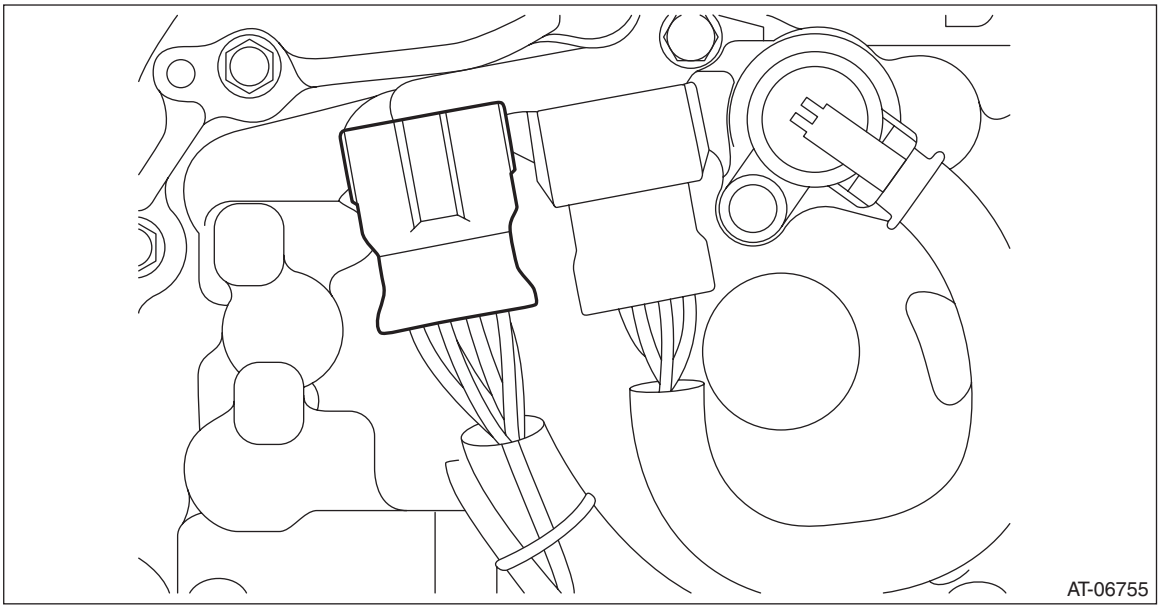
3) Remove the harness connector from the ground terminal, turbine speed sensor, primary speed sensor, secondary speed sensor and secondary pressure sensor.



4) Remove the harness connector from inhibitor switch.



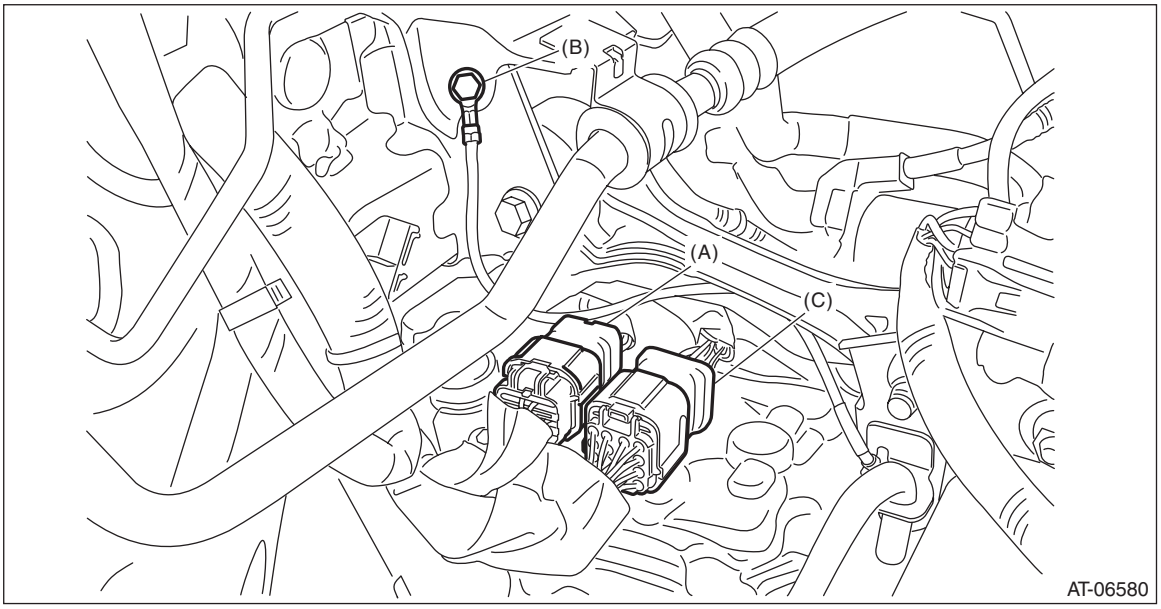
5) Remove the inhibitor harness connector from the transmission harness stay.



6) Remove the harness clip from the transmission, and remove the inhibitor harness.

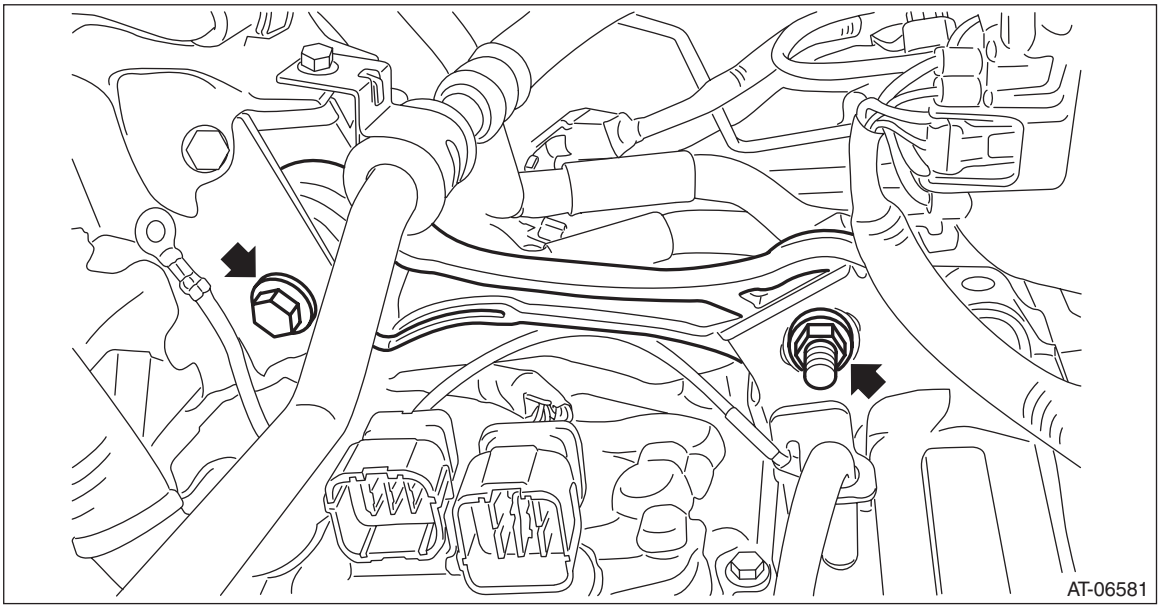
## 2. TRANSMISSION HARNESS

1) Disconnect the ground cable from battery.
2) Remove the air intake boot assembly. <Ref. to IN(H4DO)-12, REMOVAL, Air Intake Boot.>
3) Disconnect the following connectors.
- Transmission harness connectors
- Inhibitor harness connector
- Transmission radio ground terminal

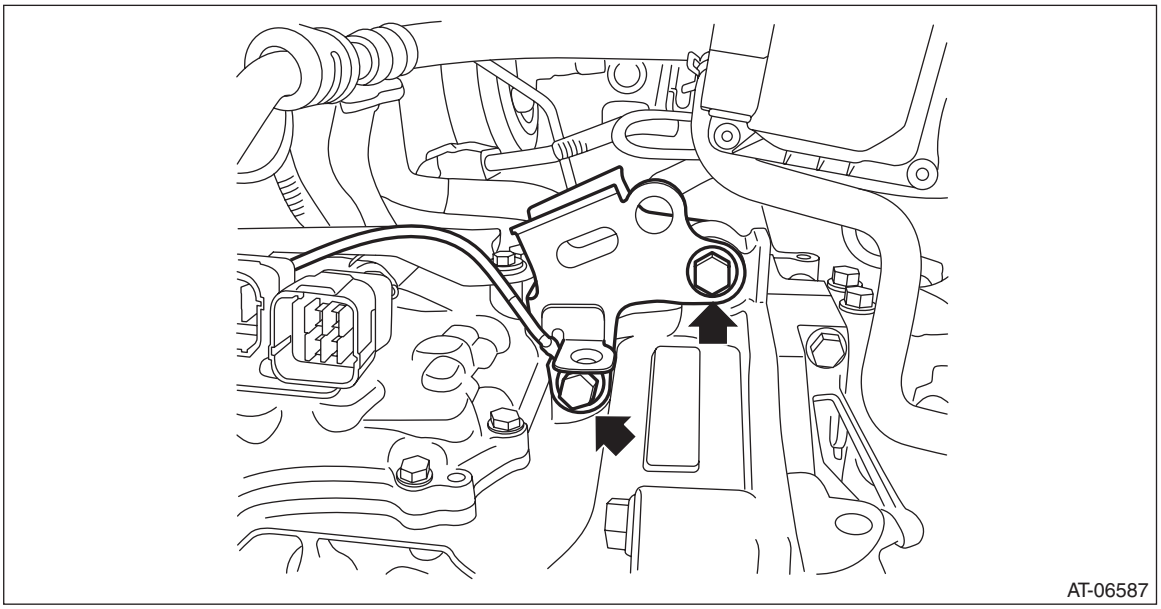


(A) Transmission harness connectors
(B) Transmission radio ground terminal
(C) Inhibitor harness connector

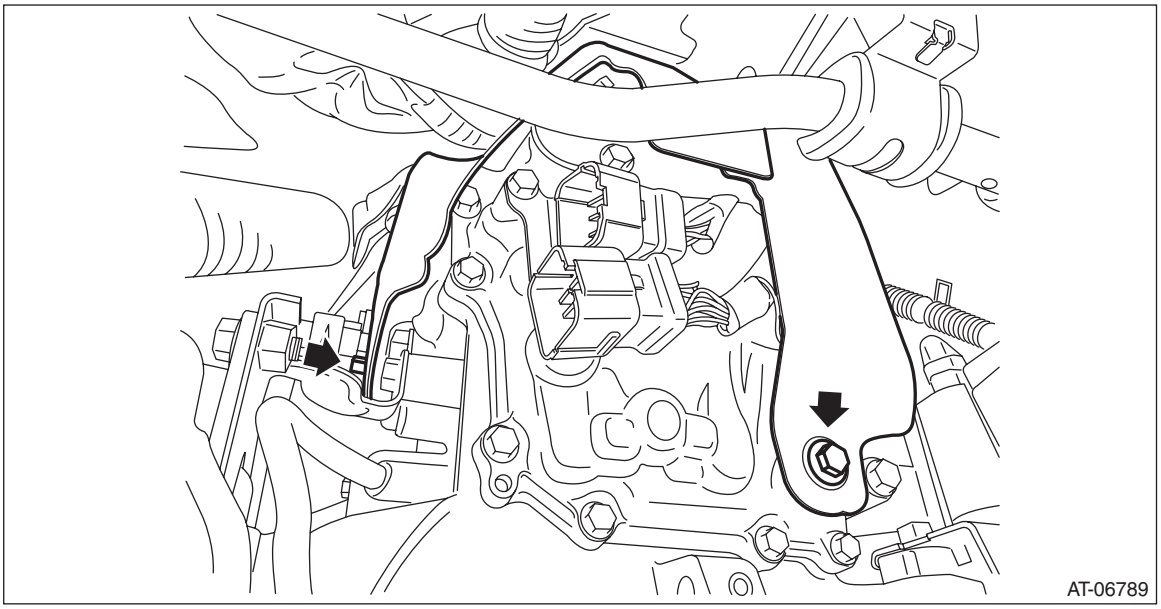
4) Remove the pitching stopper.



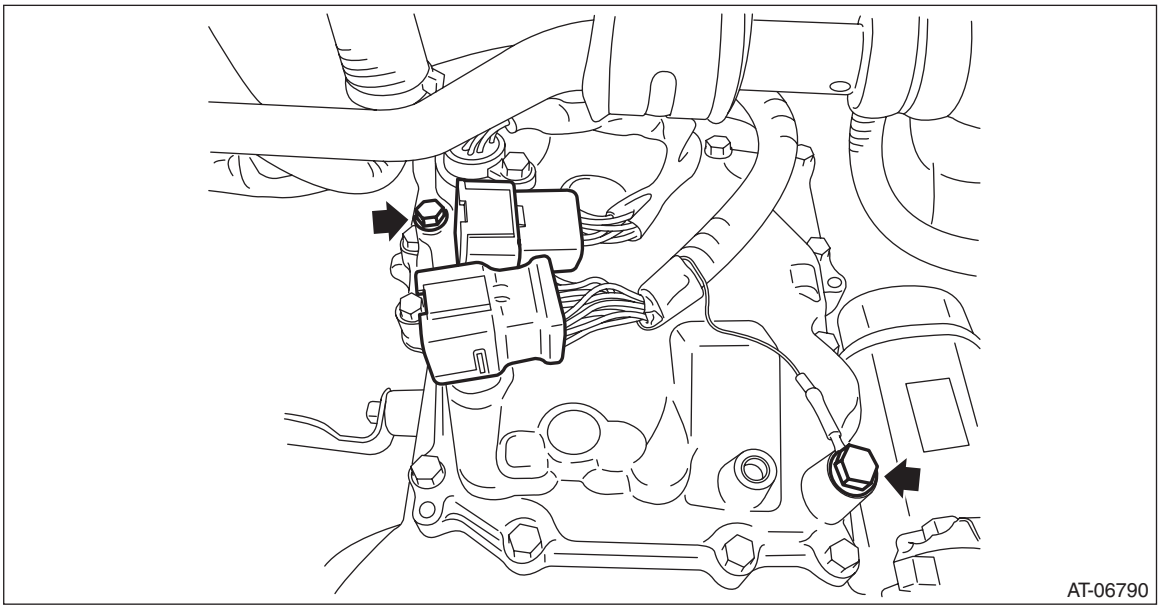
5) Remove the air breather hose from the pitching stopper bracket, and then remove the pitching stopper bracket and transmission radio ground cord.



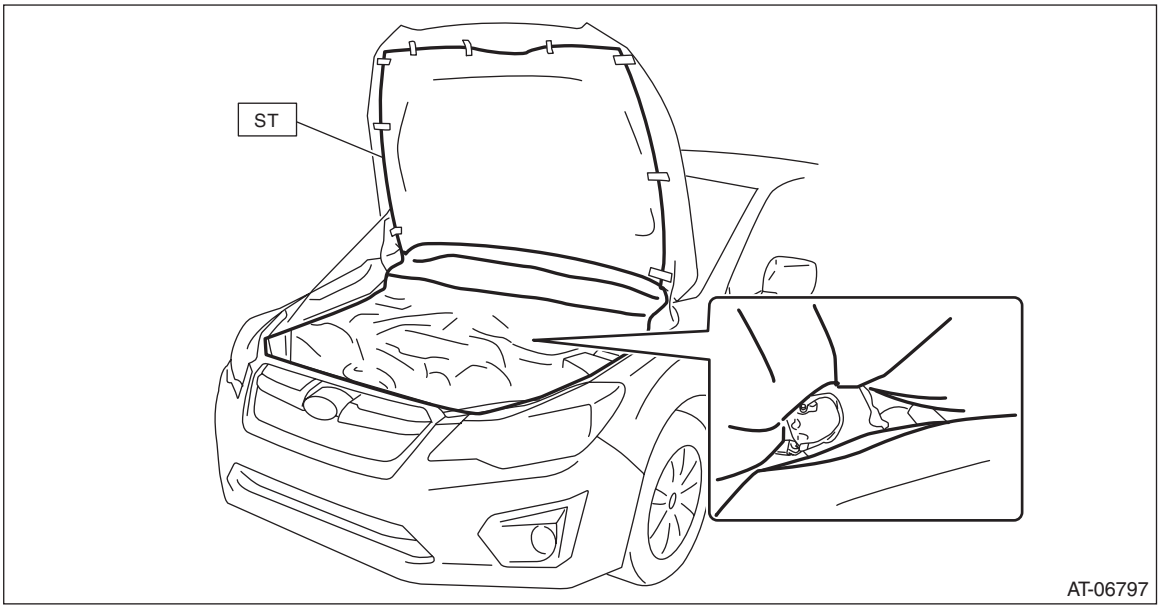
6) Remove the transmission case cover.



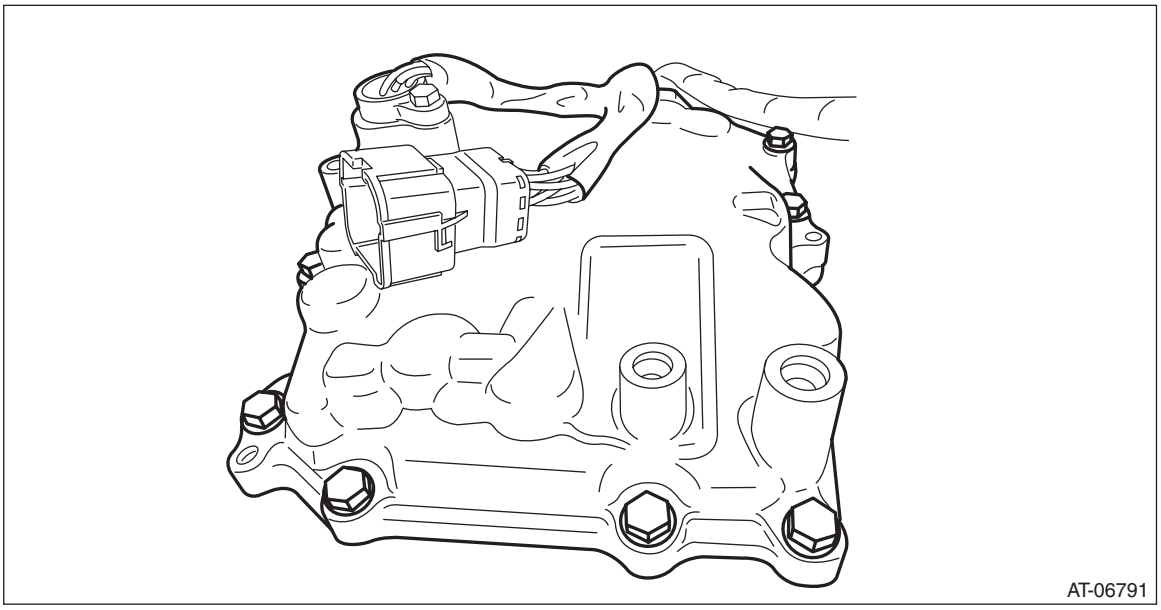
7) Remove the transmission harness stay and ground terminal.



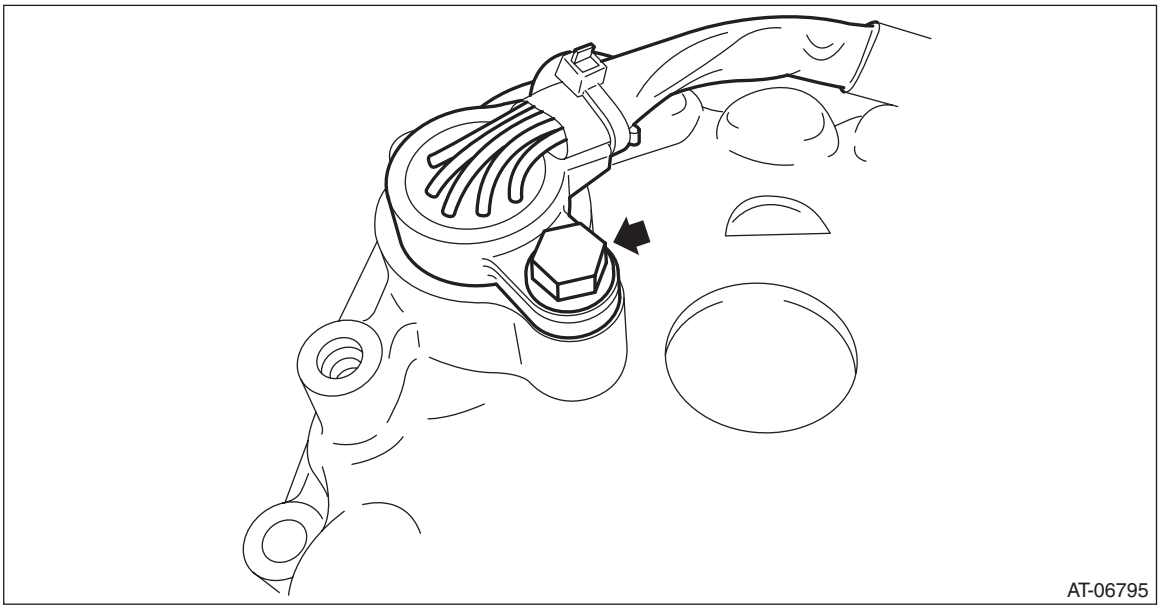
8) Remove the transmission harness connector from the harness stay.
9) Clean the transmission exterior.
10) Set the ST on the vehicle.
ST 18761AA010 SHEET SPECIAL TOOL



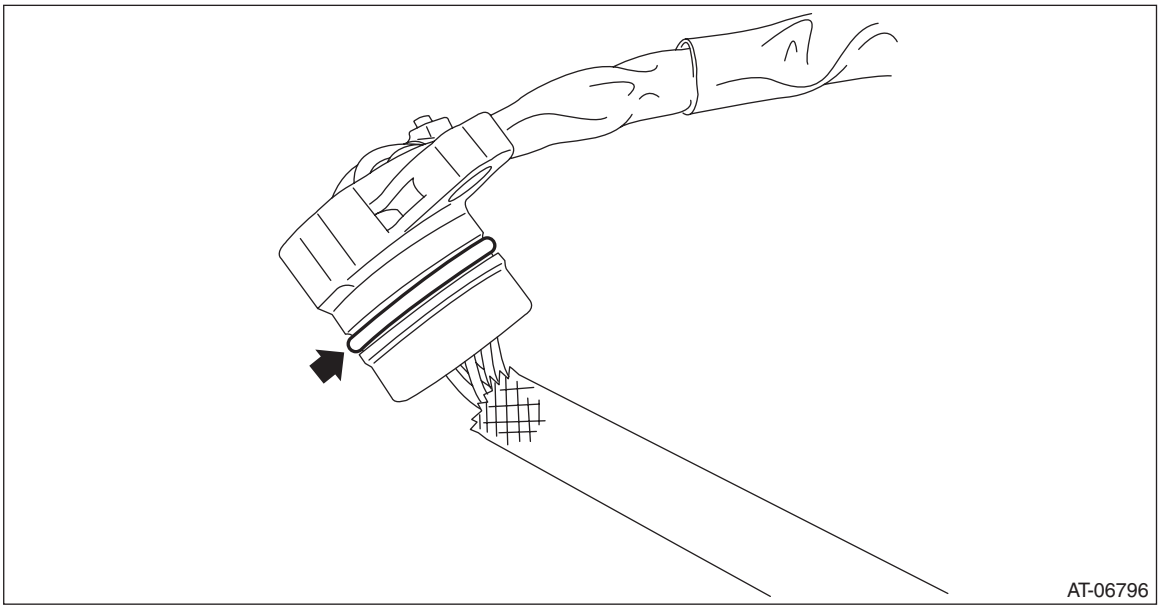
11) Remove the valve cover and gasket.



12) Remove the transmission harness connector from the control valve body.
13) Remove the transmission harness from the valve cover.



14) Remove the O-ring from the transmission harness.



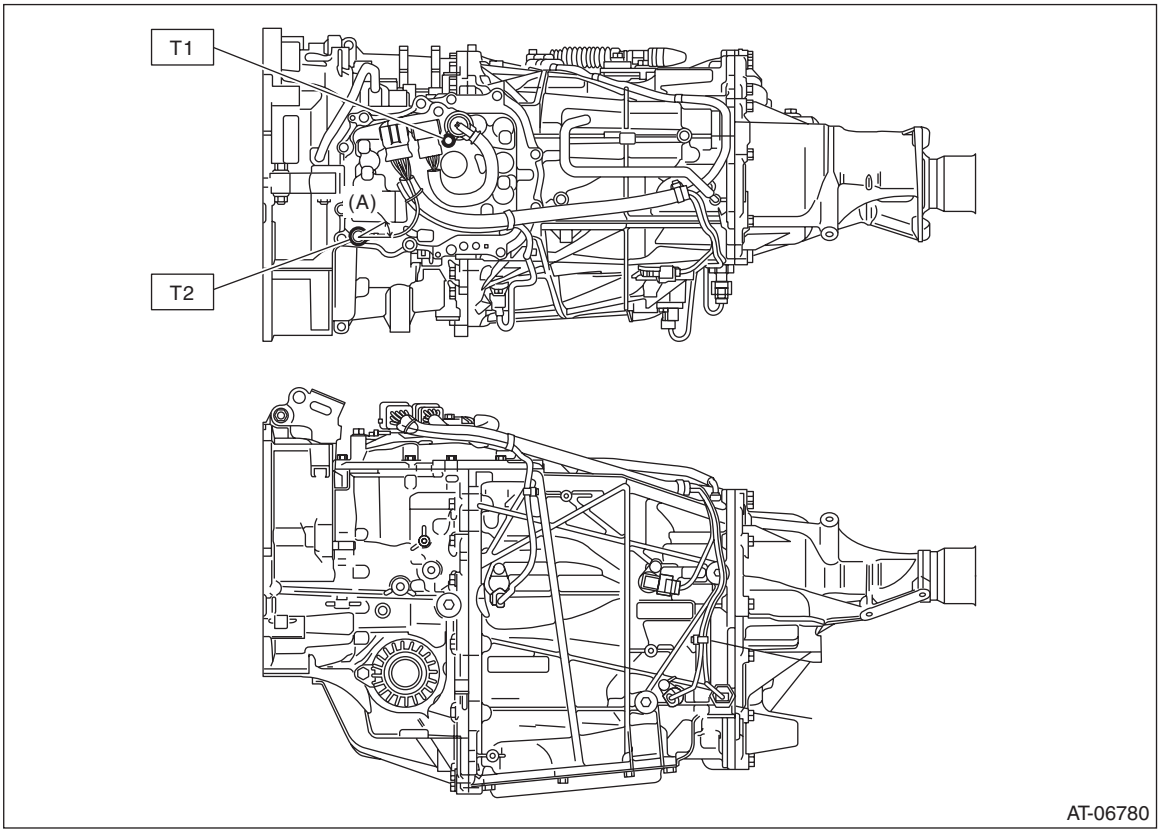
## B: INSTALLATION

### 1. INHIBITOR HARNESS

Install in the reverse order of removal.

NOTE:
Install the transmission ground terminal in the direction within the range of approx. 30° (A).

***Tightening torque:***
***T1: 7 N·m (0.7 kgf-m, 3.7 ft-lb)***
***T2: 14 N·m (1.4 kgf-m, 10.3 ft-lb)***



## 2. TRANSMISSION HARNESS

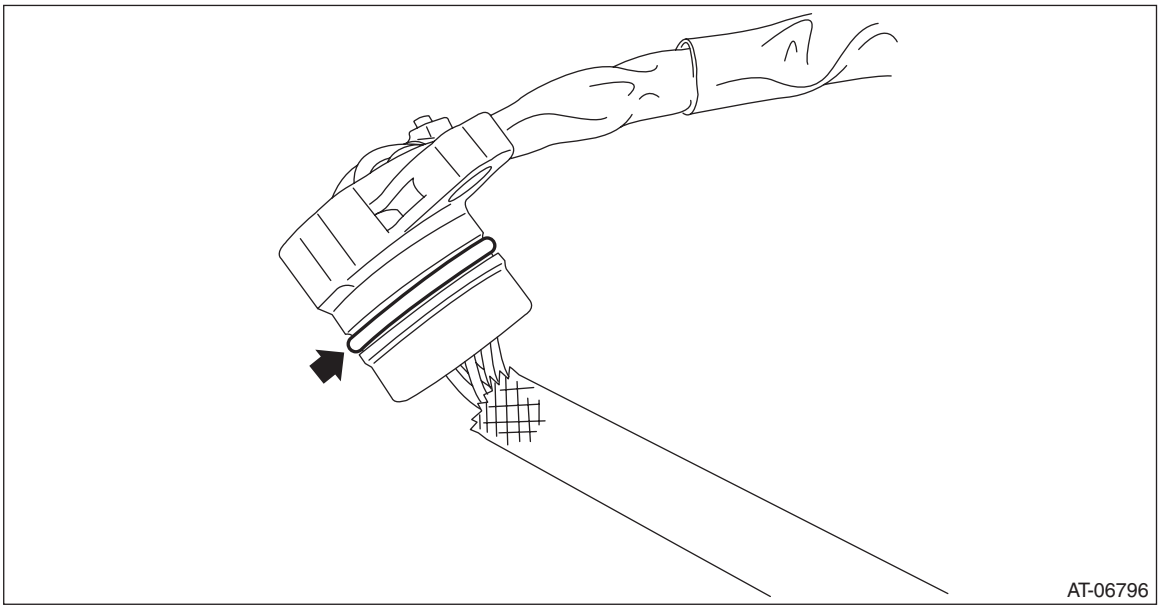
1) Clean the mating surface of valve cover and transmission side.

**CAUTION:**
**When cleaning the mating surface of the transmission side, be careful not to allow any dust, foreign matter and used liquid gasket to enter the transmission.**

2) Check the control valve body for dust and other foreign matter.

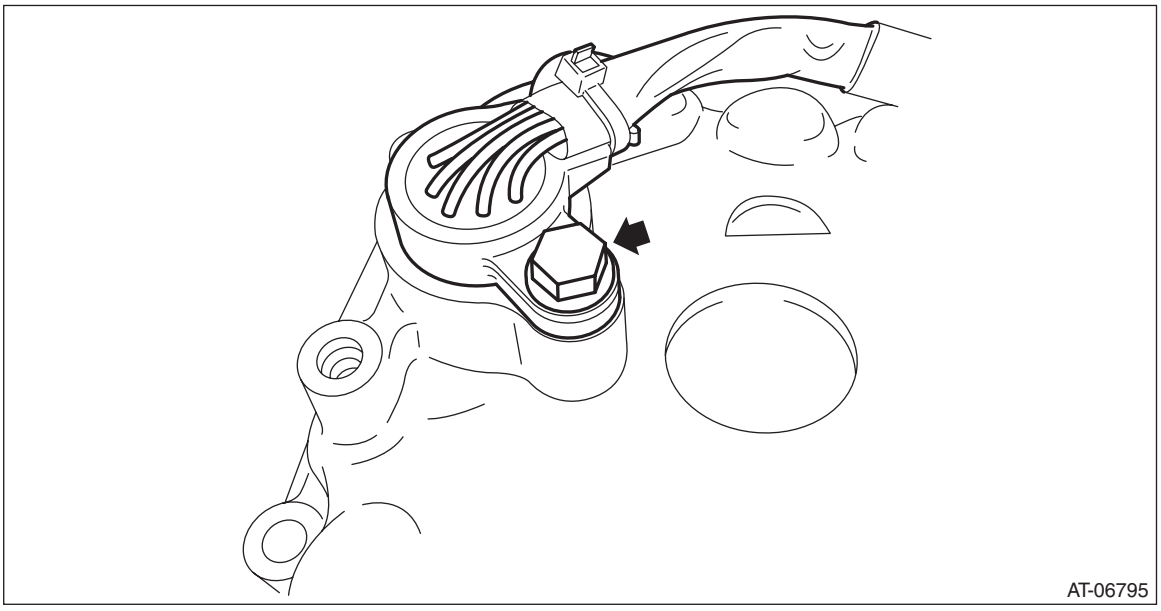
3) Install the O-ring to the transmission harness.

NOTE:
- Use new O-rings.
- Apply CVTF to the O-ring.



4) Install the transmission harness to the valve cover.

***Tightening torque:***
***7 N·m (0.7 kgf-m, 5.2 ft-lb)***

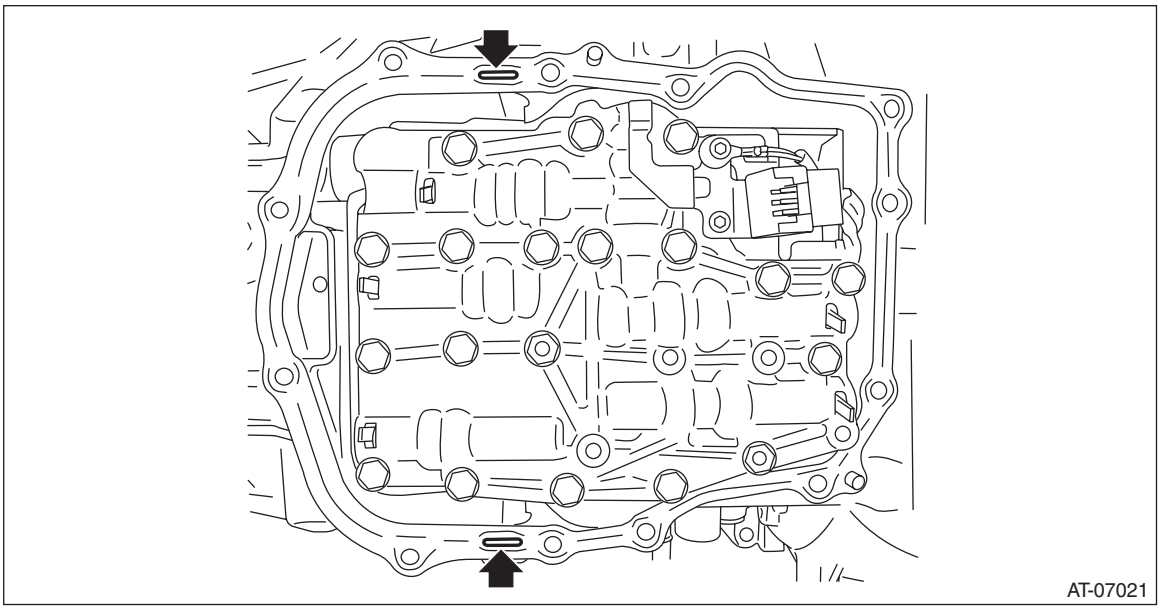


5) Install the gasket to the transmission.

NOTE:
Use a new gasket.

6) Apply liquid gasket to the oval hole of gasket.

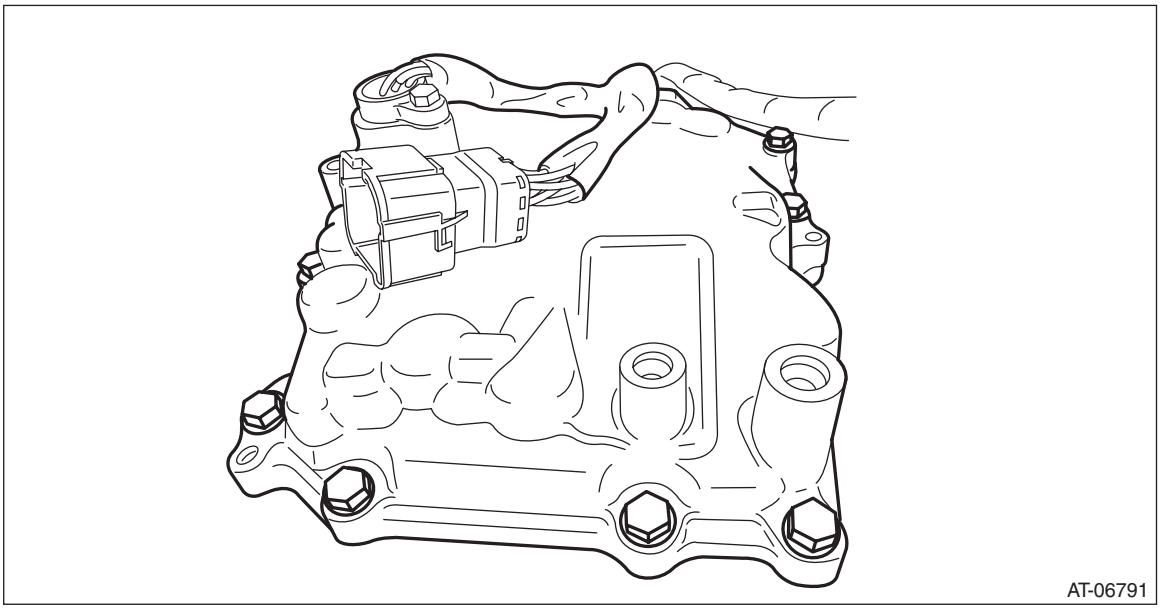
***Liquid gasket:***
***THREE BOND 1215 (Part No. 004403007) or equivalent***



7) Connect the transmission harness connector to the control valve body, and install the valve cover.

**CAUTION:**
**Be careful not to catch the sheet of the ST.**

***Tightening torque:***
***8 N·m (0.8 kgf-m, 5.9 ft-lb)***

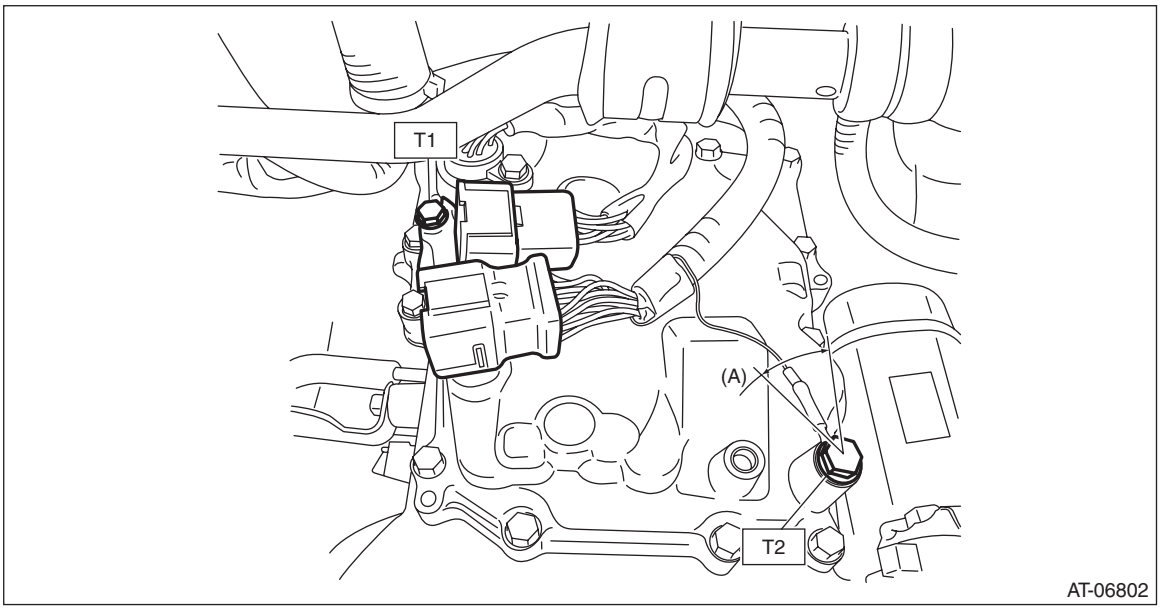


8) Remove the ST (SHEET SPECIAL TOOL).
9) Install the transmission harness connector to the harness stay.

10) Install the transmission harness stay and transmission ground terminal.

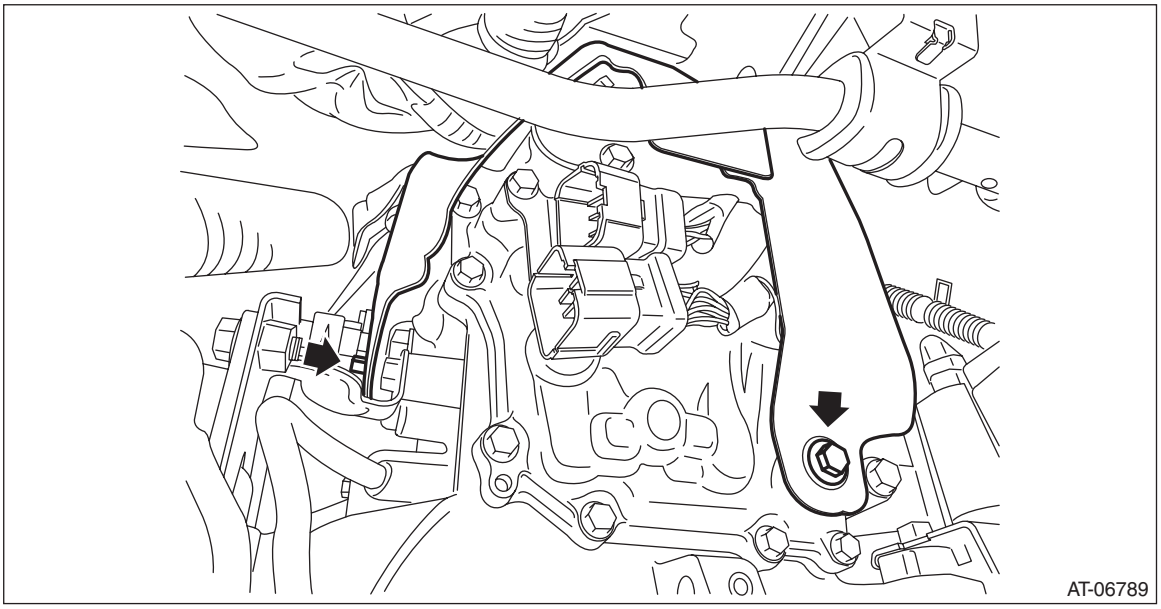
NOTE:
Install the transmission ground terminal in the direction within the range of approx. 30° (A).

***Tightening torque:***
***T1: 7 N·m (0.7 kgf-m, 5.2 ft-lb)***
***T2: 14 N·m (1.4 kgf-m, 10.3 ft-lb)***



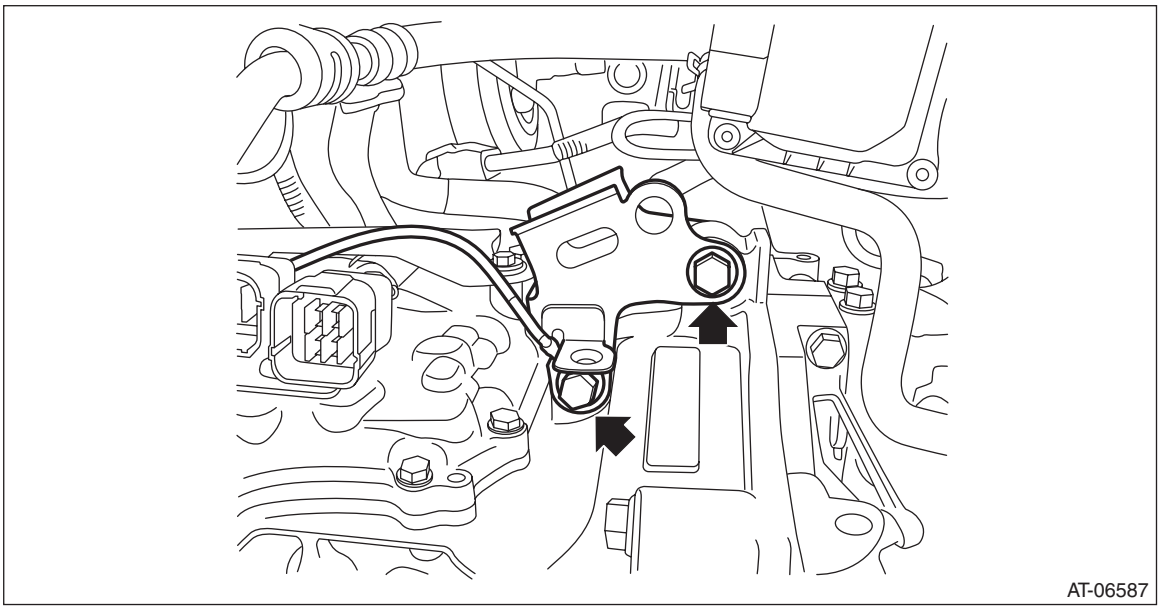
11) Install the transmission case cover.

***Tightening torque:***
***8 N·m (0.8 kgf-m, 5.9 ft-lb)***



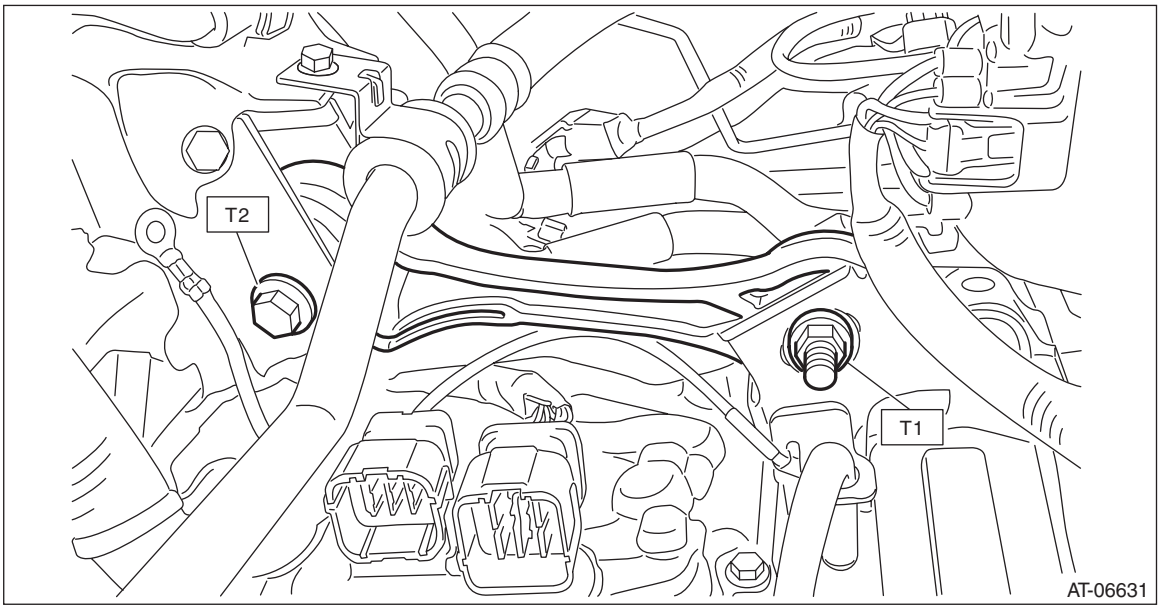
12) Install the pitching stopper bracket and transmission radio ground cord.

***Tightening torque:***
***41 N·m (4.2 kgf-m, 30.2 ft-lb)***



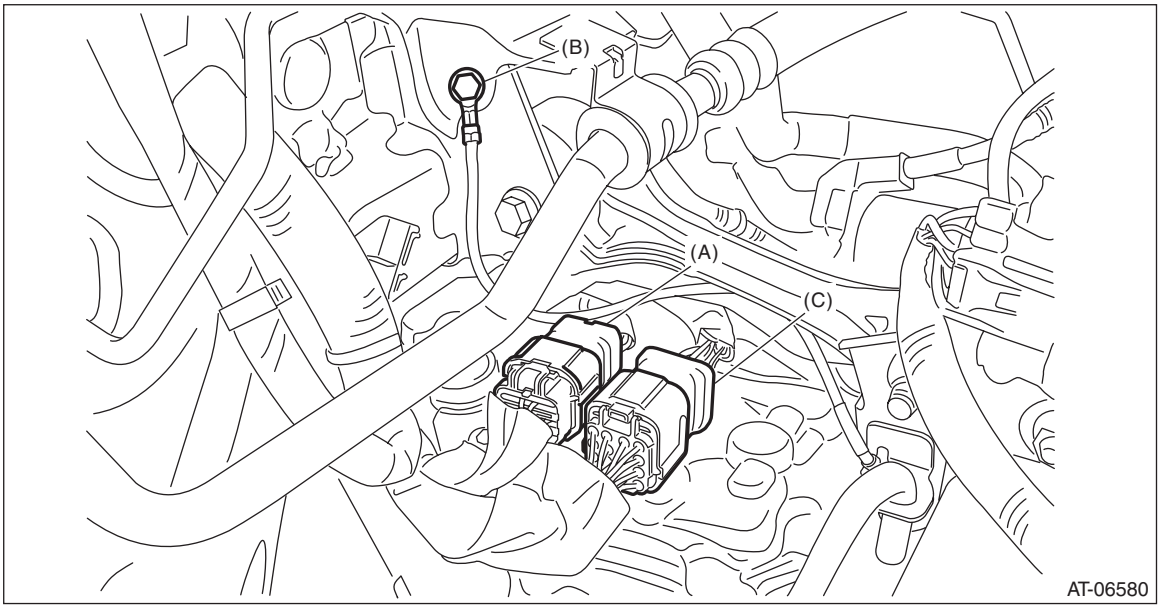
13) Install the air breather hose to the pitching stopper bracket.
14) Install the pitching stopper.

***Tightening torque:***
***T1: 50 N·m (5.1 kgf-m, 36.9 ft-lb)***
***T2: 58 N·m (5.9 kgf-m, 42.8 ft-lb)***



15) Connect the following harness connectors.
- Transmission harness connectors
- Inhibitor harness connector
- Transmission radio ground terminal

***Tightening torque:***
***13 N·m (1.3 kgf-m, 9.6 ft-lb)***



(A) Transmission harness connectors
(B) Transmission radio ground terminal
(C) Inhibitor harness connector

16) Install the air intake boot assembly. <Ref. to IN(H4DO)-12, INSTALLATION, Air Intake Boot.>
17) Adjust the CVTF level. <Ref. to CVT-34, ADJUSTMENT, CVTF.>

## C: INSPECTION

1) Visually check the harness and connector for damage or crack.
2) Check the harness terminal for rust, disconnection or poor contact.
3) Check the continuity between harness terminals.

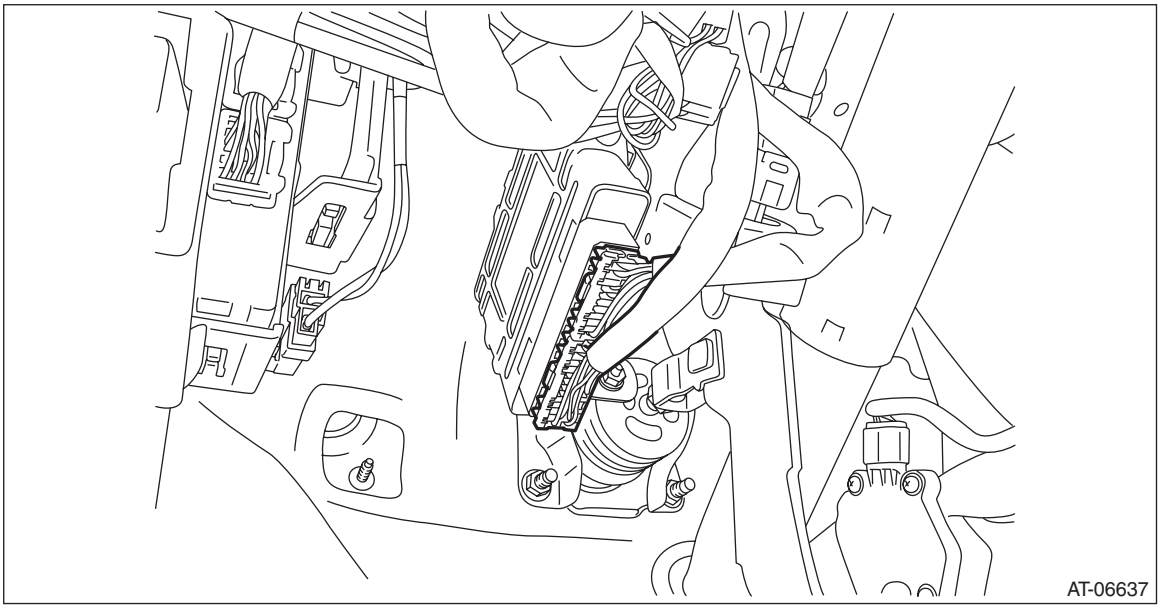
NOTE:
For details of transmission harness circuit, refer to wiring diagram. <Ref. to WI-66, WIRING DIAGRAM, CVT Control System.>

***Harness continuity standard***
***Less than 1 Ω***

# 22.Transmission Control Module (TCM)

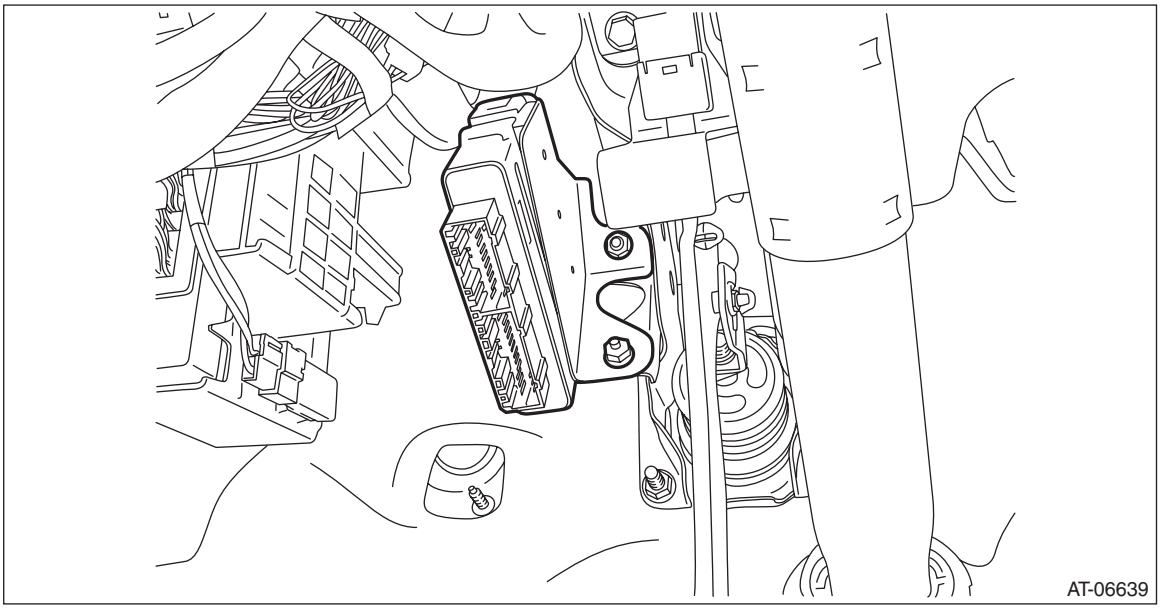
## A: REMOVAL

1) Disconnect the ground cable from battery.
2) Remove the instrument panel lower cover. <Ref. to EI-65, REMOVAL, Instrument Panel Lower Cover.>
3) Remove the bulkhead harness connector from TCM.



4) Remove the TCM.

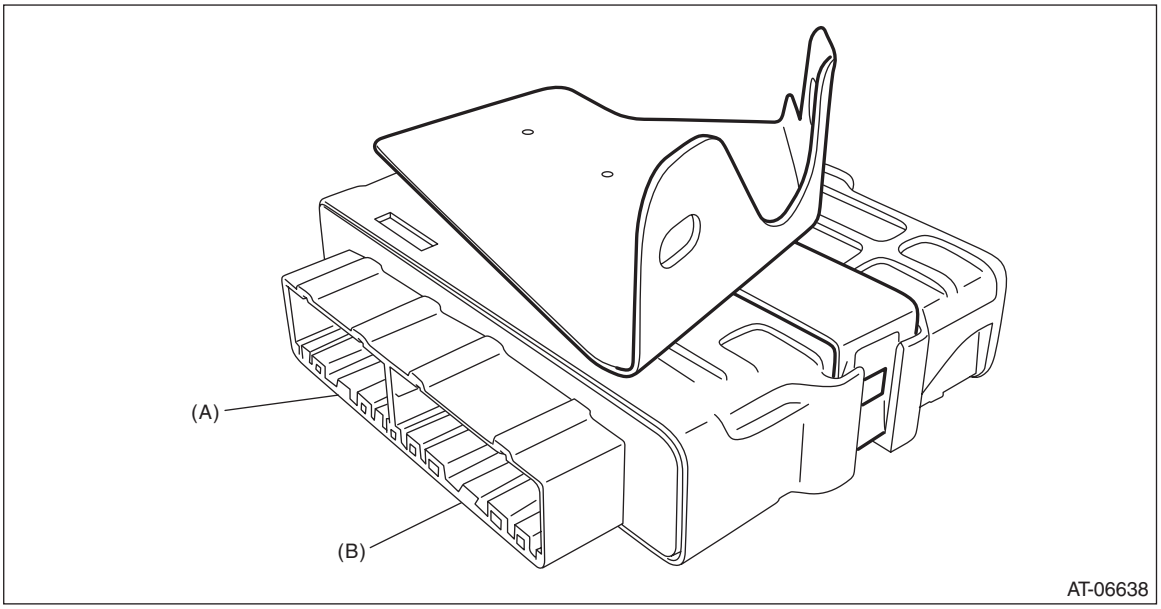
NOTE:
Replace the TCM and bracket as a set.



## B: INSTALLATION

1) Install the TCM to the bracket.

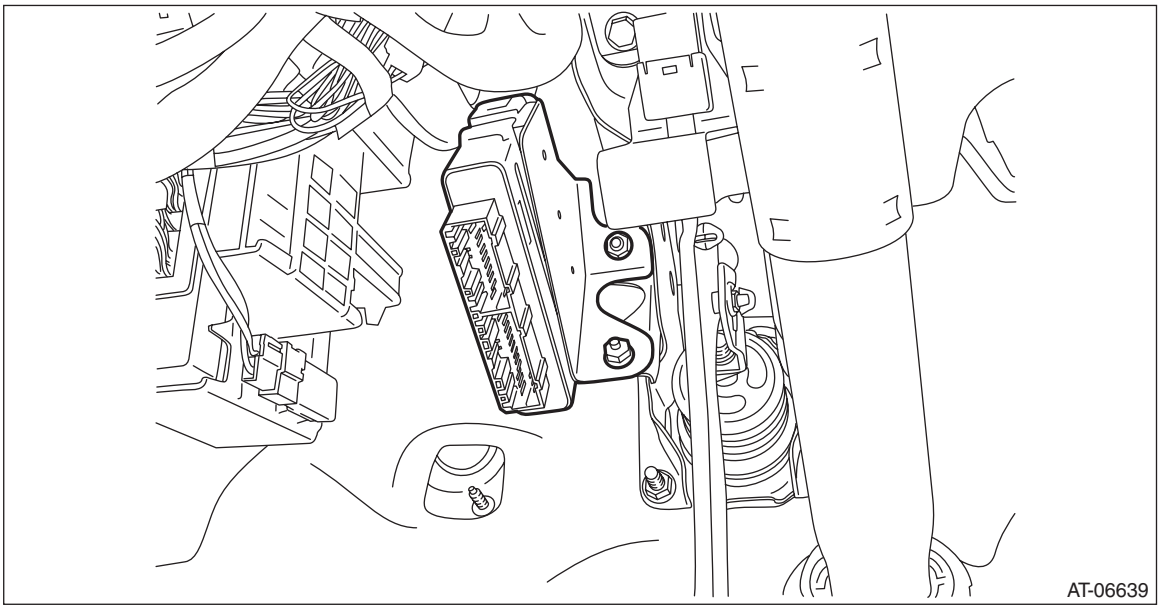
**CAUTION:**
**To avoid the damage to bracket and TCM, do not remove after installing TCM to bracket. If installed by mistake, the part must be replaced with a new part.**



(A) 22-pin connector side
(B) 26-pin connector side

2) Install the TCM.

***Tightening torque:***
***7.5 N·m (0.8 kgf-m, 5.5 ft-lb)***



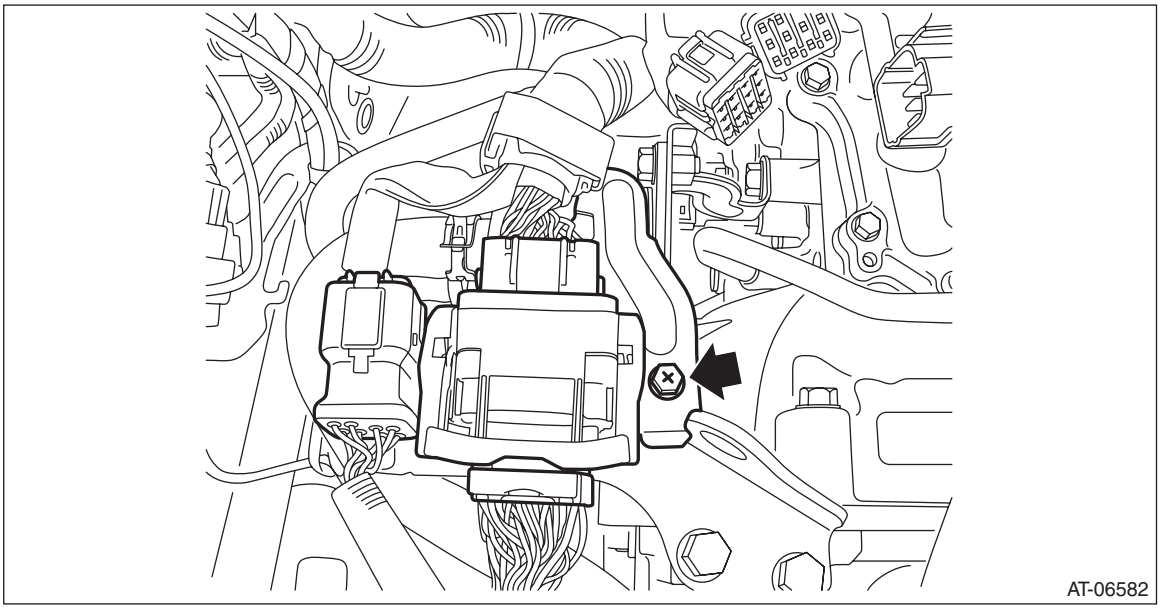
3) Install the harness connector to TCM.
4) Install the instrument panel lower cover. <Ref. to EI-66, INSTALLATION, Instrument Panel Lower Cover.>
5) Perform AT learning mode. <Ref. to CVT(diag)-21, Learning Control.>

# 23.CVTF Cooler (With Warmer Function)

## A: REMOVAL

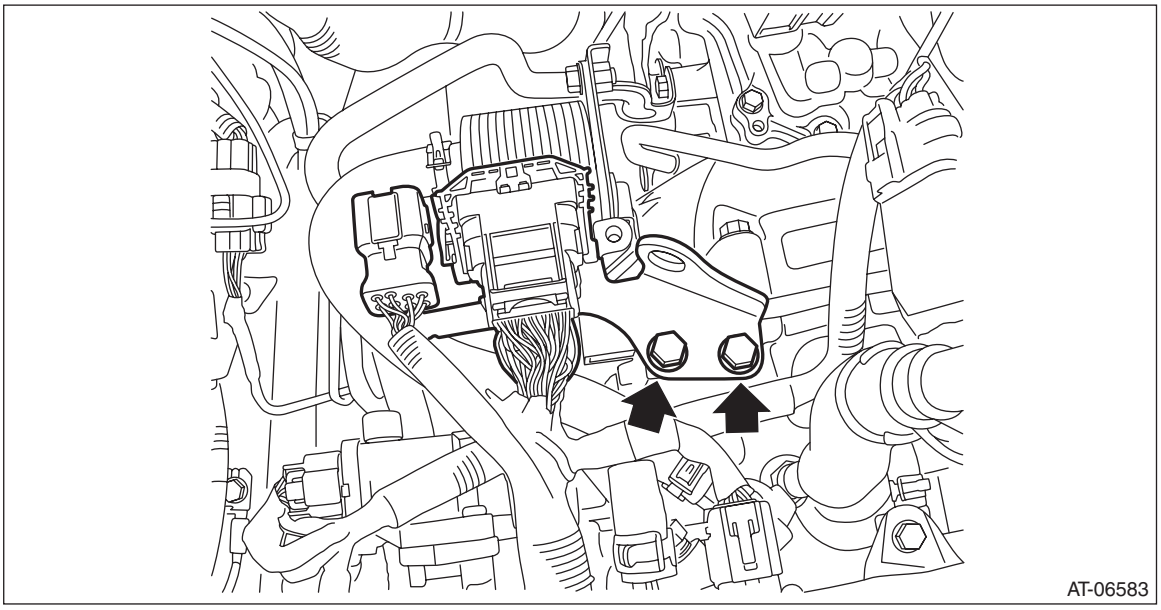
**CAUTION:**
**If the CVTF and engine coolant is spilt over exhaust pipe, wipe it off with cloth to avoid emitting smoke or causing a fire.**

1) Disconnect the ground cable from battery.
2) Drain engine coolant. <Ref. to CO(H4DO)-13, REPLACEMENT, Engine Coolant.>
3) Remove the air intake boot assembly. <Ref. to IN(H4DO)-12, REMOVAL, Air Intake Boot.>
4) Remove the harness bracket, and then remove the engine harness.



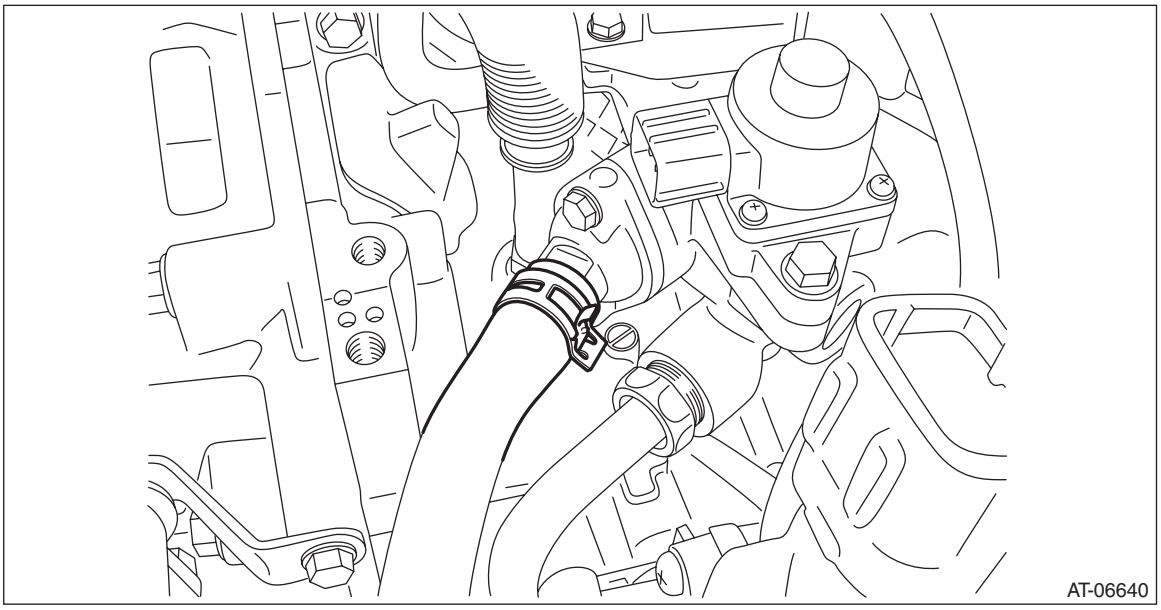
AT-06582

5) Disconnect the EGR control valve harness connector, throttle position sensor harness connector and manifold pressure sensor harness connector.
6) Remove the engine hanger rear.

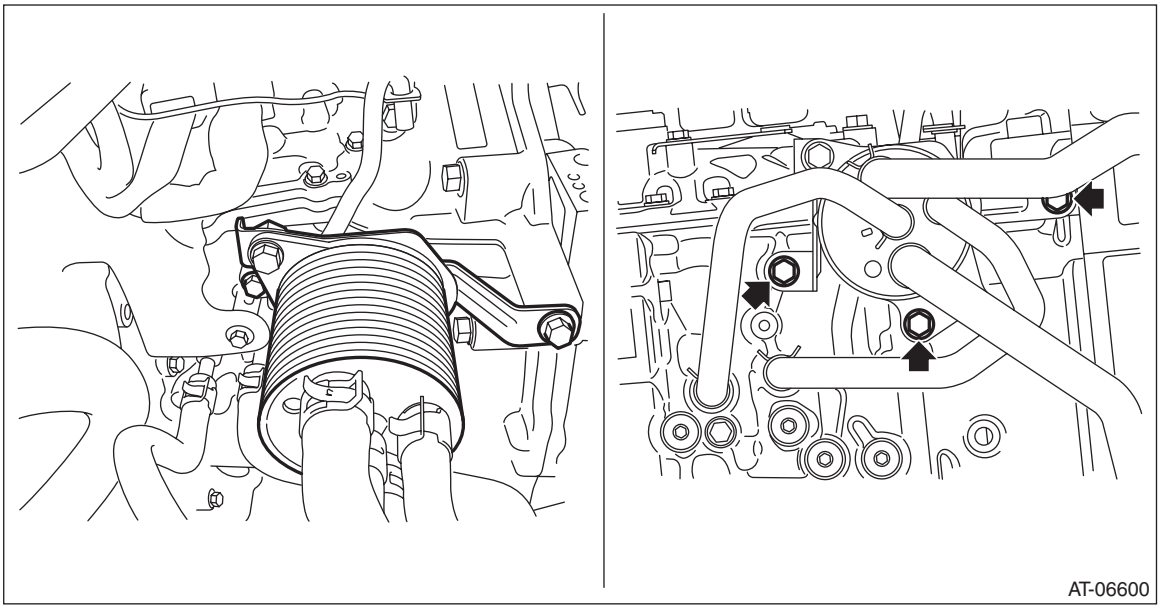


AT-06583

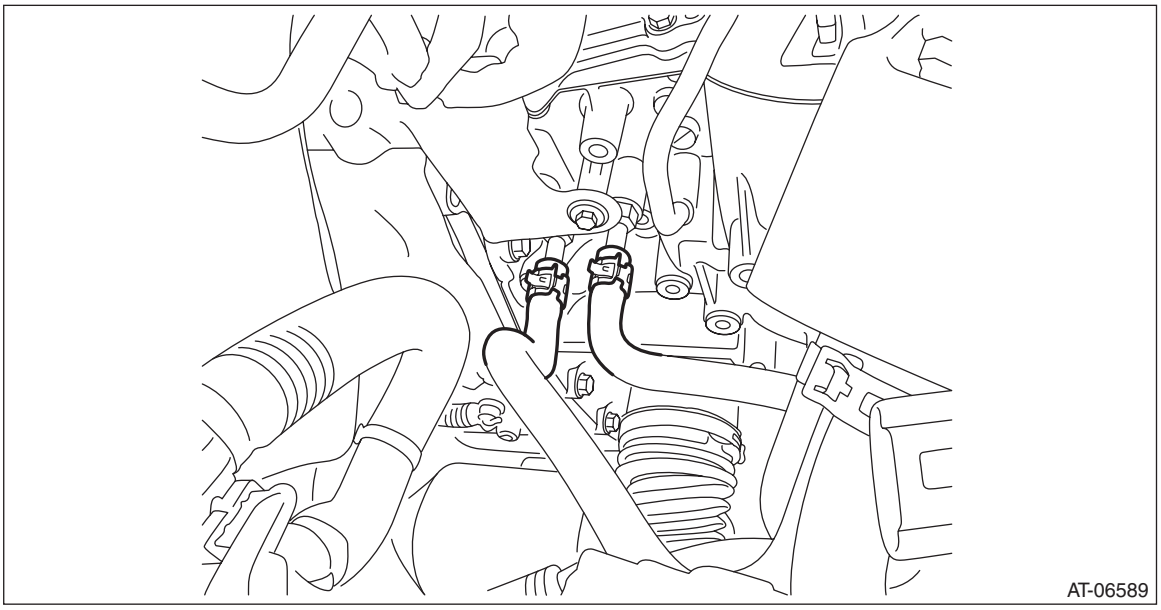
7) Disconnect the engine coolant outlet hose.



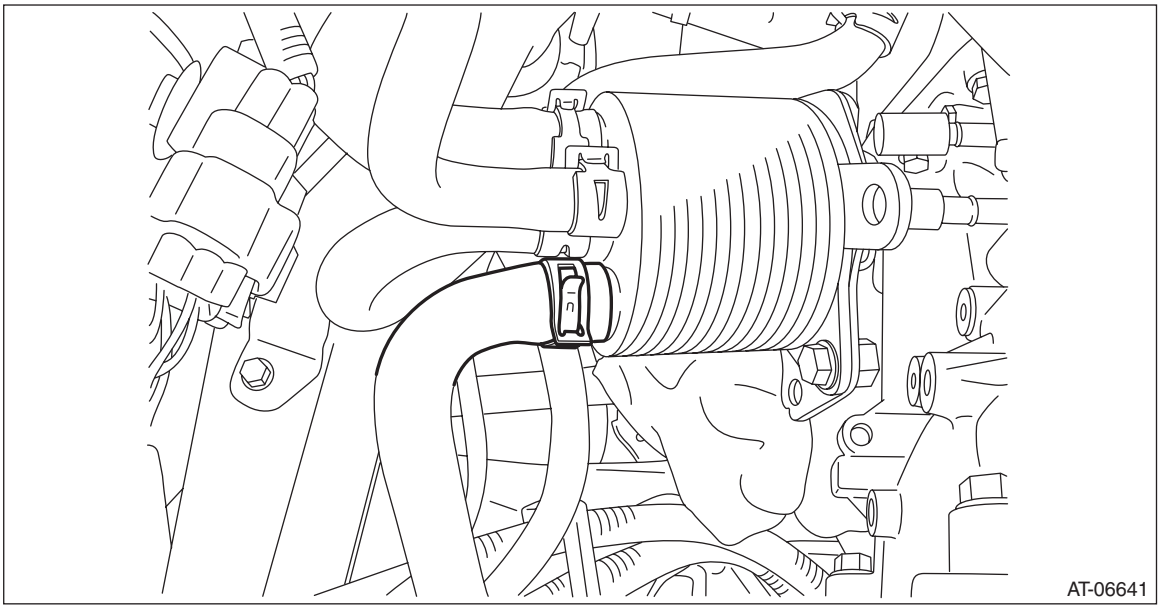
8) Remove the CVTF cooler (with warmer feature) from the transmission.



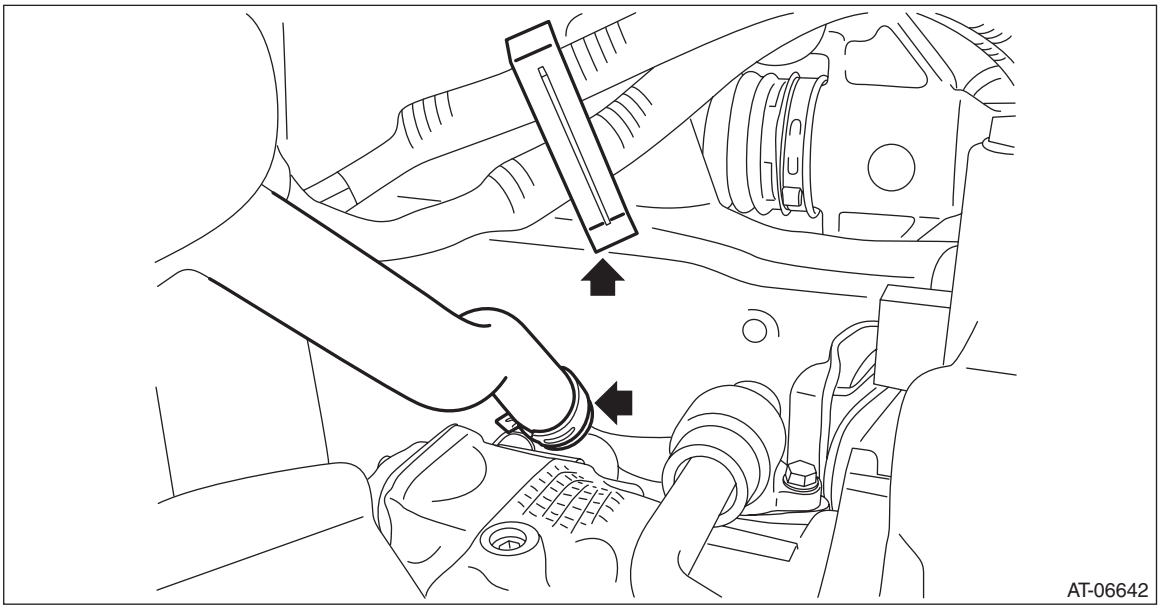
9) Remove the CVTF inlet hose and outlet hose from the pipe on the transmission side.



10) Disconnect the engine coolant inlet hose from the CVTF cooler (with warmer feature) assembly.



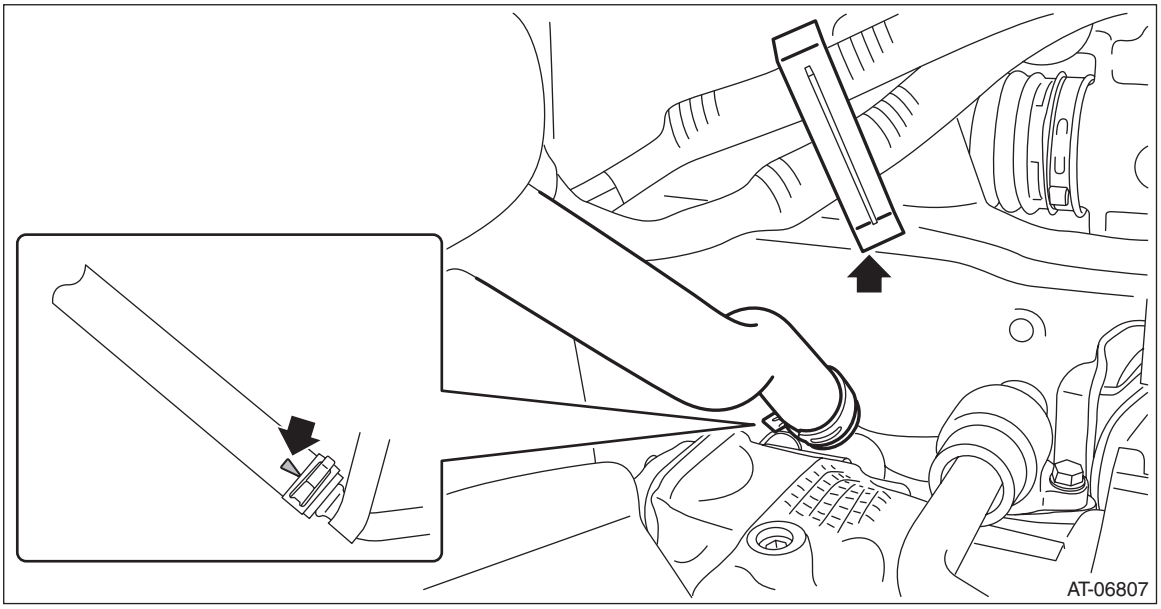
11) Remove the electric power steering harness from the clip, and remove the engine coolant inlet hose from the engine coolant pipe.



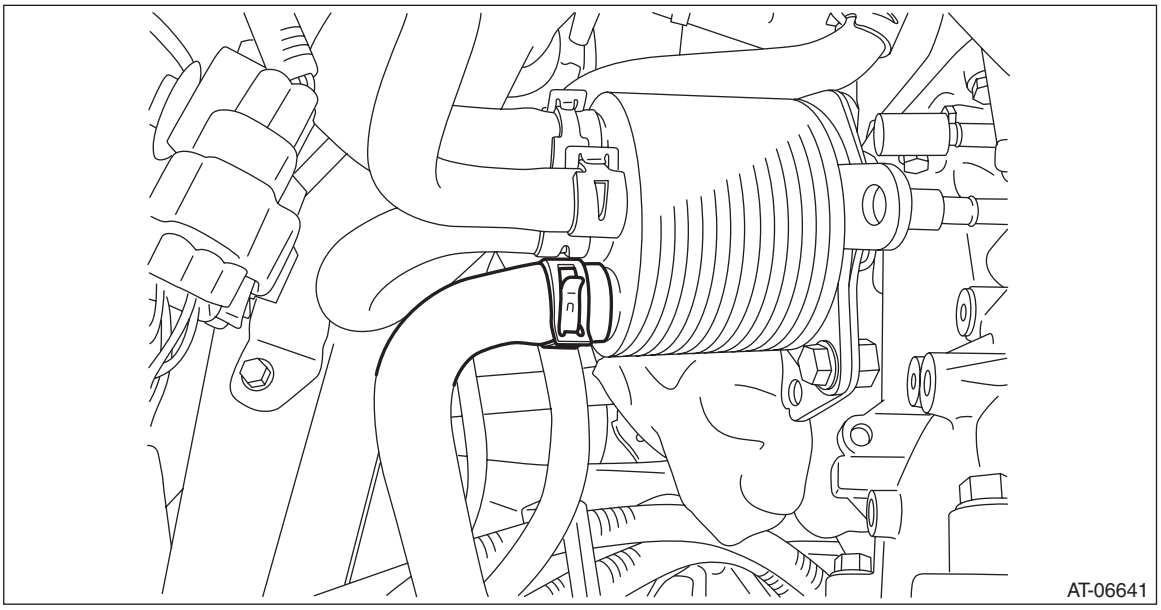
## B: INSTALLATION

1) Install the engine coolant inlet hose to the engine coolant pipe, and secure the electric power steering harness to the clip.

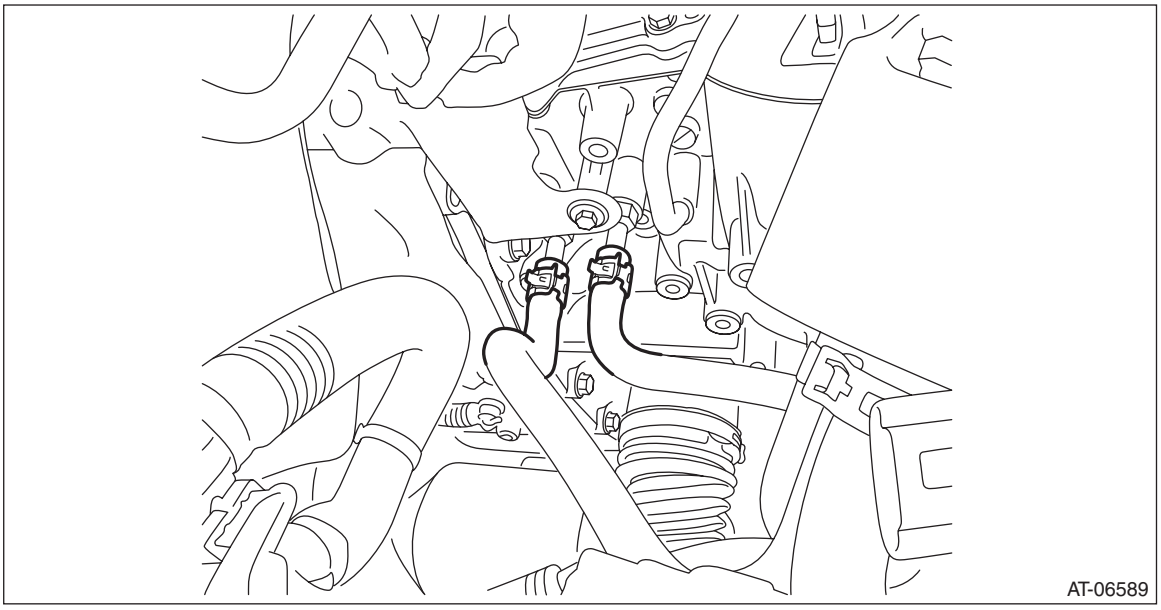
NOTE:
With the triangle mark on the engine coolant inlet hose facing the vehicle outside, install the hose to the engine side pipe.



2) Install the engine coolant inlet hose to the CVTF cooler (with warmer feature) assembly.

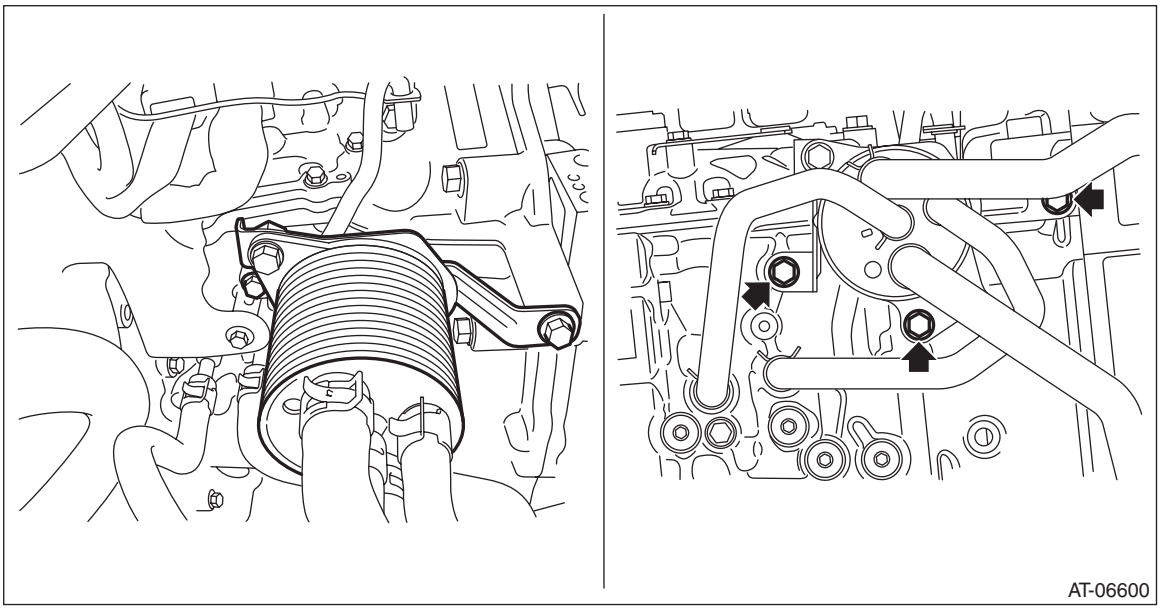


3) Install the CVTF inlet hose and CVTF outlet hose to transmission.

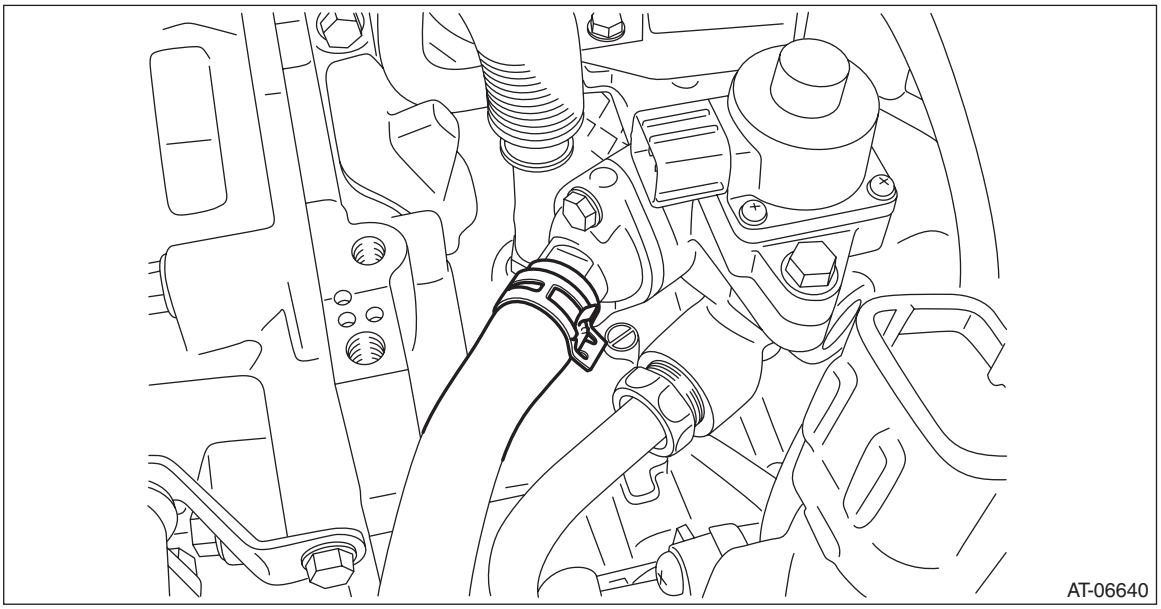


4) Install the CVTF cooler (with warmer feature) to the transmission.

***Tightening torque:***
***23 N·m (2.3 kgf-m, 17.0 ft-lb)***

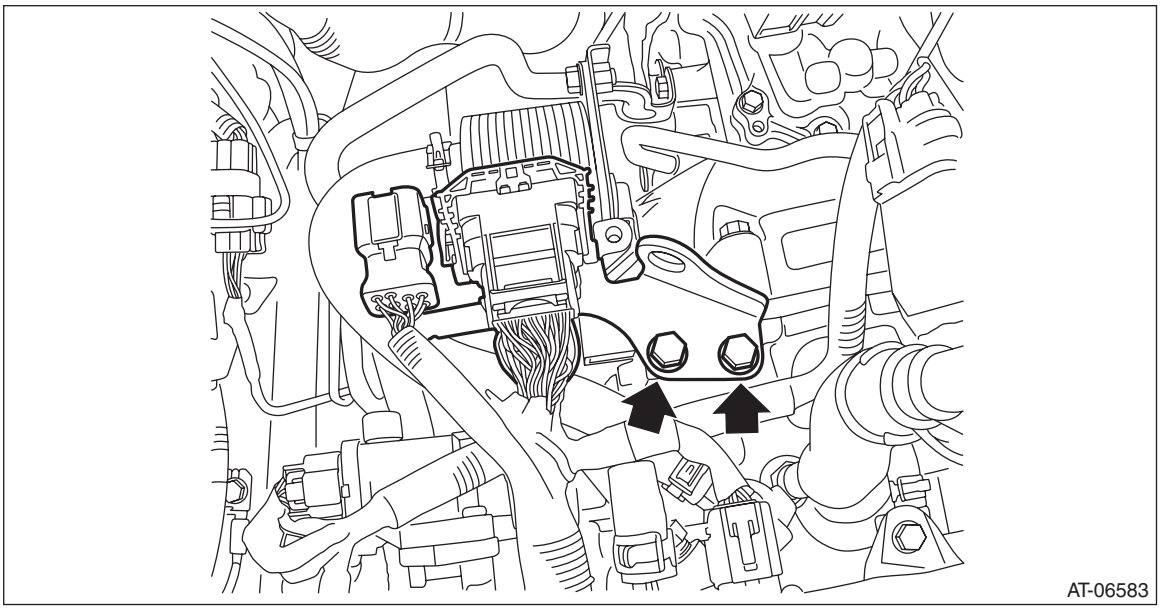


5) Connect the engine coolant outlet hose.



6) Install the engine hanger rear.

***Tightening torque:***
***21 N·m (2.1 kgf-m, 15.5 ft-lb)***



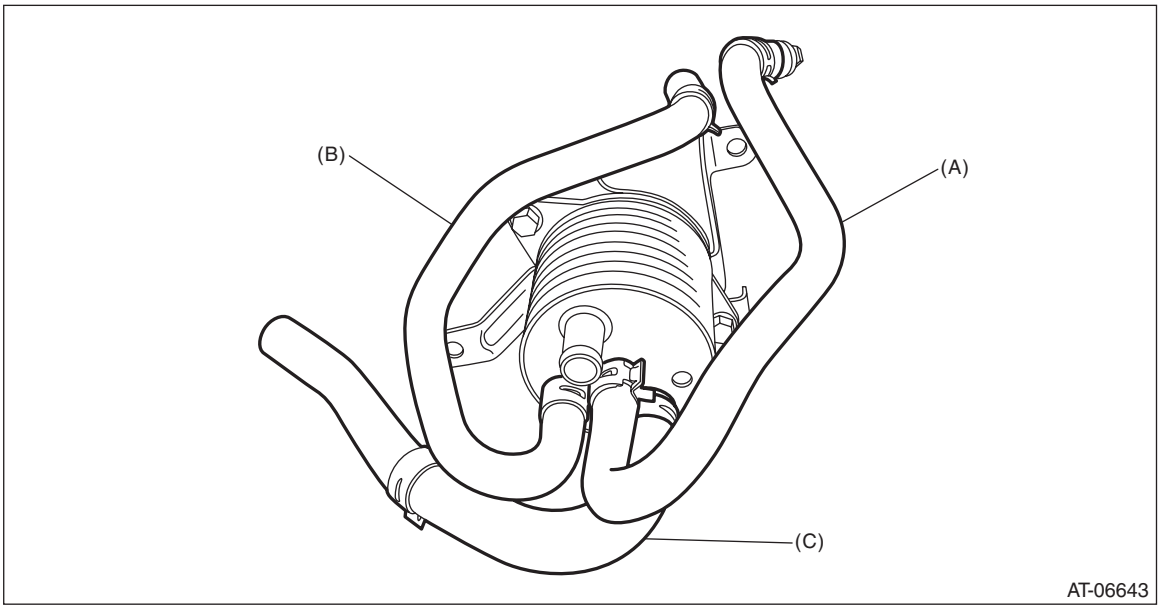
7) Connect the EGR control valve harness connector, throttle position sensor harness connector and manifold pressure sensor harness connector.

***Tightening torque:***
***Bulkhead harness connector bracket***
***7.5 N·m (0.8 kgf-m, 5.5 ft-lb)***

8) Install the air intake boot assembly. <Ref. to IN(H4DO)-12, INSTALLATION, Air Intake Boot.>
9) Connect the battery ground terminal.
10) Fill engine coolant. <Ref. to CO(H4DO)-13, REPLACEMENT, Engine Coolant.>
11) Adjust the CVTF level. <Ref. to CVT-34, ADJUSTMENT, CVTF.>

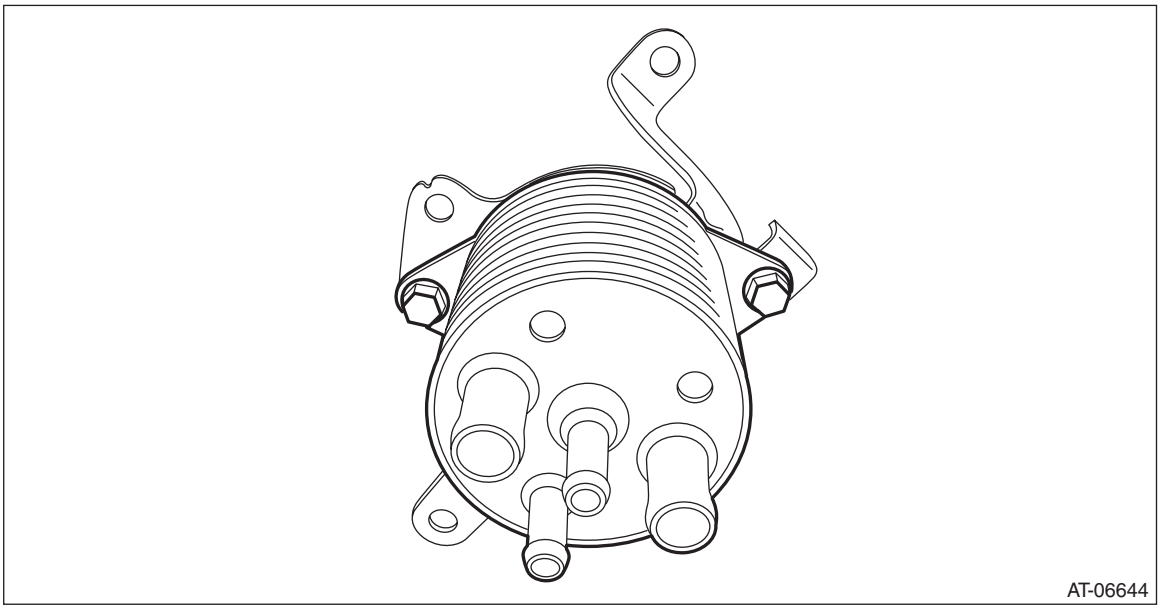
## C: DISASSEMBLY

1) Remove the hoses from the CVTF cooler (with warmer feature).



(A) CVTF cooler inlet hose
(B) CVTF cooler outlet hose
(C) Engine coolant outlet hose

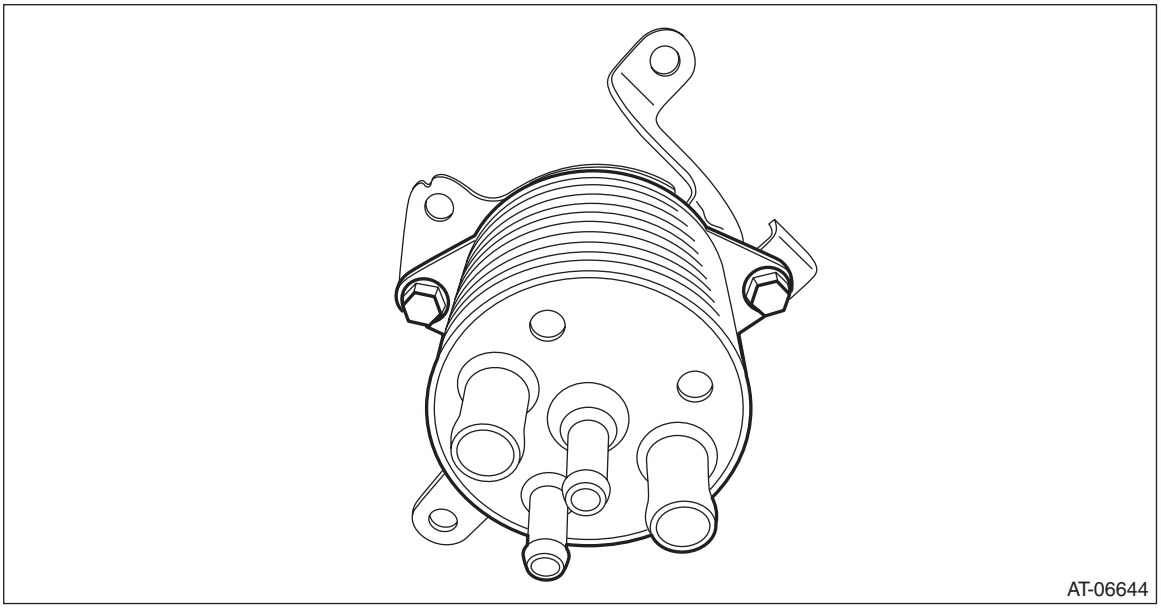
2) Remove the bracket from the CVTF cooler (with warmer feature).



## D: ASSEMBLY

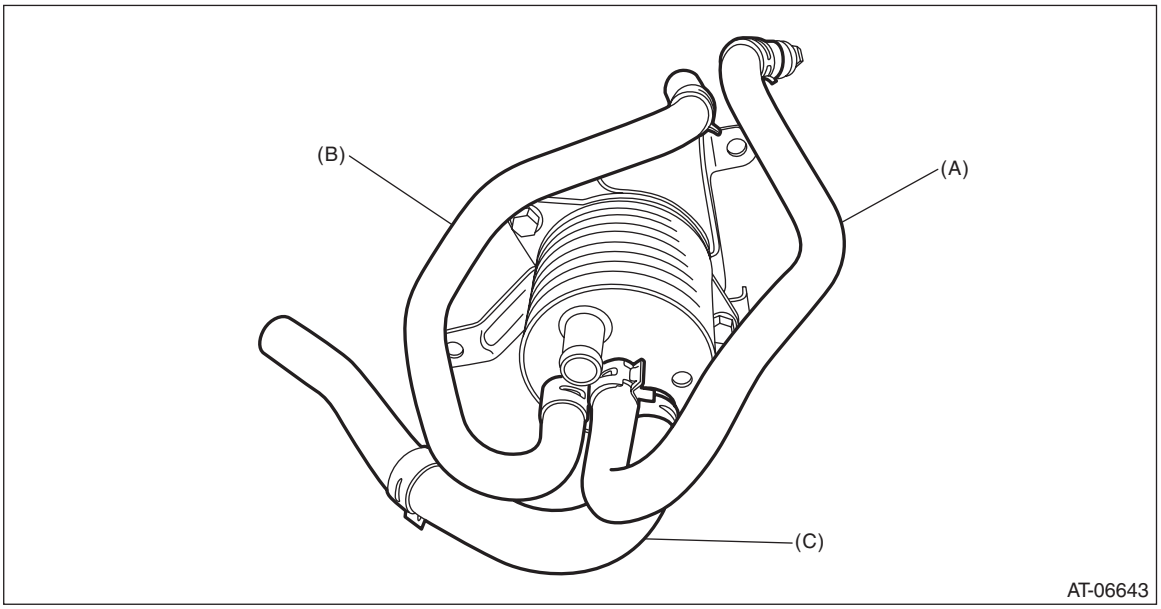
1) Attach the bracket.

***Tightening torque:***
***23 N·m (2.3 kgf-m, 17.0 ft-lb)***



2) Attach hoses to the CVTF cooler (with warmer feature).

NOTE:
- Use a new CVTF cooler hose.
- Align the painting marks on the hose and the CVTF cooler (with warmer feature).



(A) CVTF cooler inlet hose
(B) CVTF cooler outlet hose
(C) Engine coolant outlet hose

## E: INSPECTION

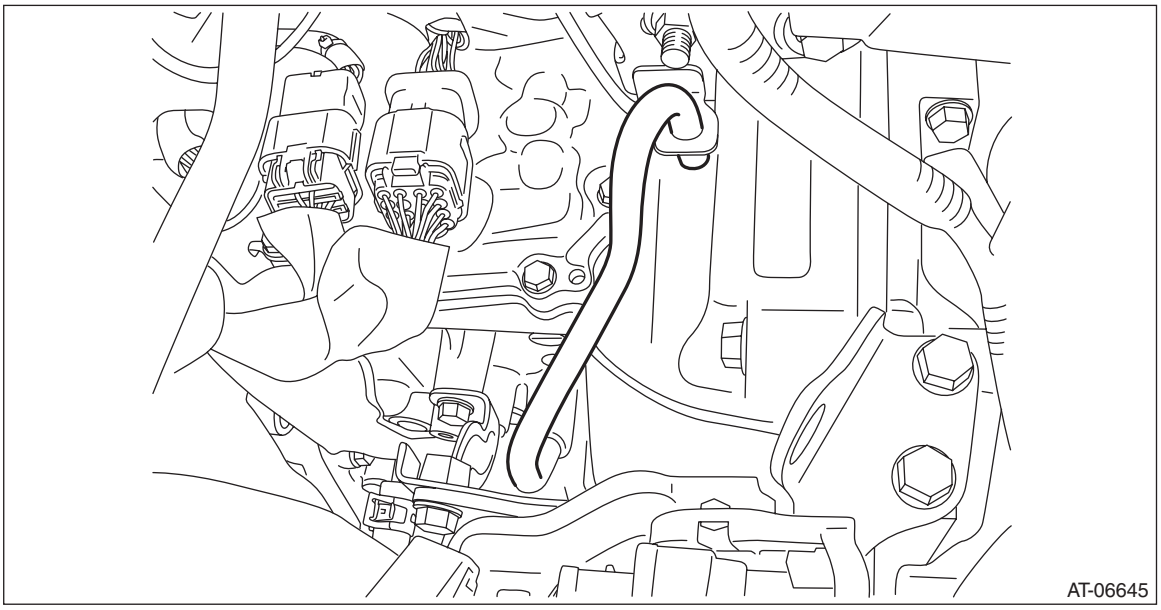
Replace any faulty CVTF cooler hoses, CVTF cooler pipes and clamps found in the inspection below.
1) Check that there are no CVTF or engine coolant leaks from the connections.
2) Check the clamp for deformation.
3) Lightly bend the CVTF cooler hose and check for cracks in the surface or other damages.
4) Pinch the CVTF cooler hose with your fingers and check for poor elasticity. Also check for poor elasticity in the parts where the clamp was installed by pressing with your fingernail.
5) Check for peeling, cracks, and deformation at the tip of the hose.
6) Check the CVTF cooler (with warmer feature) for any damage.

# 24.Air Breather Hose

## A: REMOVAL

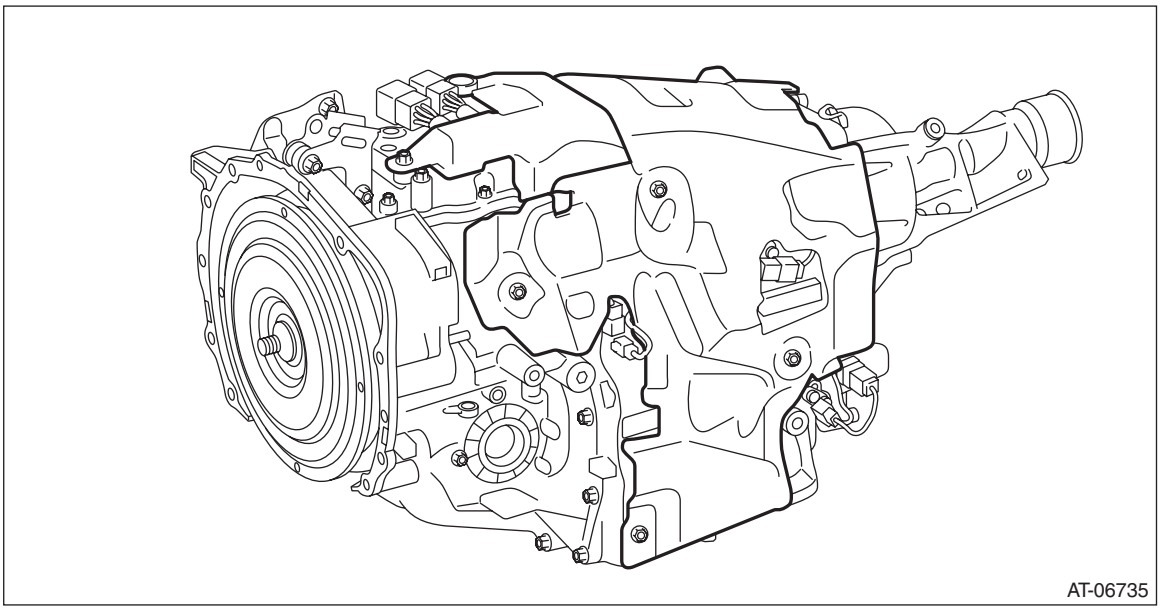
### 1. FRONT DIFFERENTIAL SIDE

1) Remove the air intake boot assembly. <Ref. to IN(H4DO)-12, REMOVAL, Air Intake Boot.>
2) Remove the air breather hose.

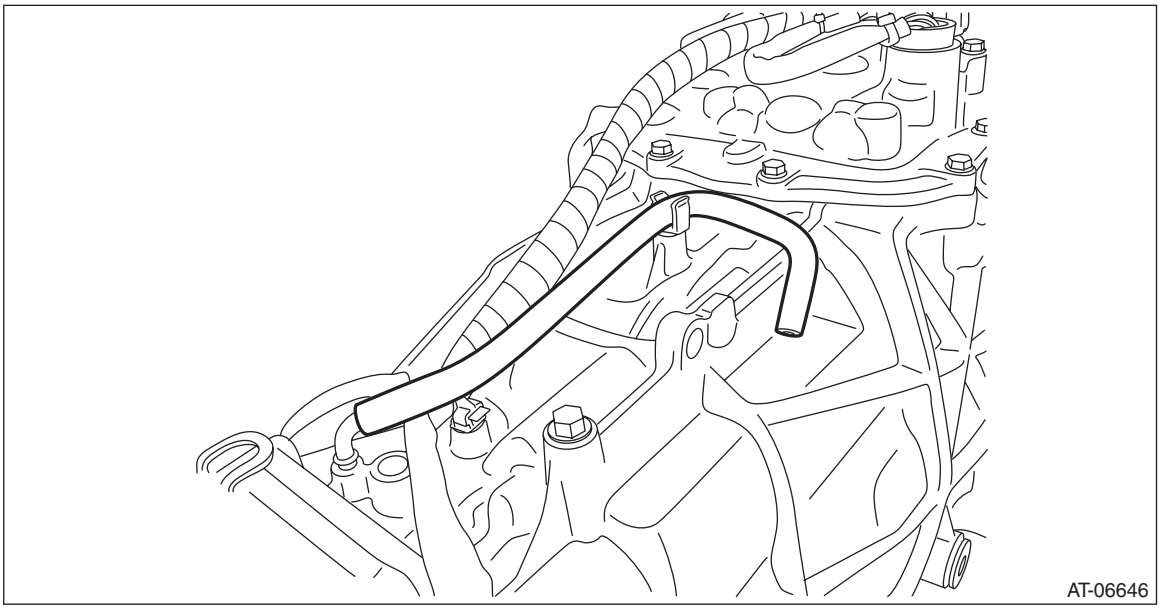


### 2. TRANSMISSION CASE SIDE

1) Remove the transmission assembly. <Ref. to CVT-56, REMOVAL, Automatic Transmission Assembly.>
2) Remove the transmission case cover.



3) Remove the air breather hose.

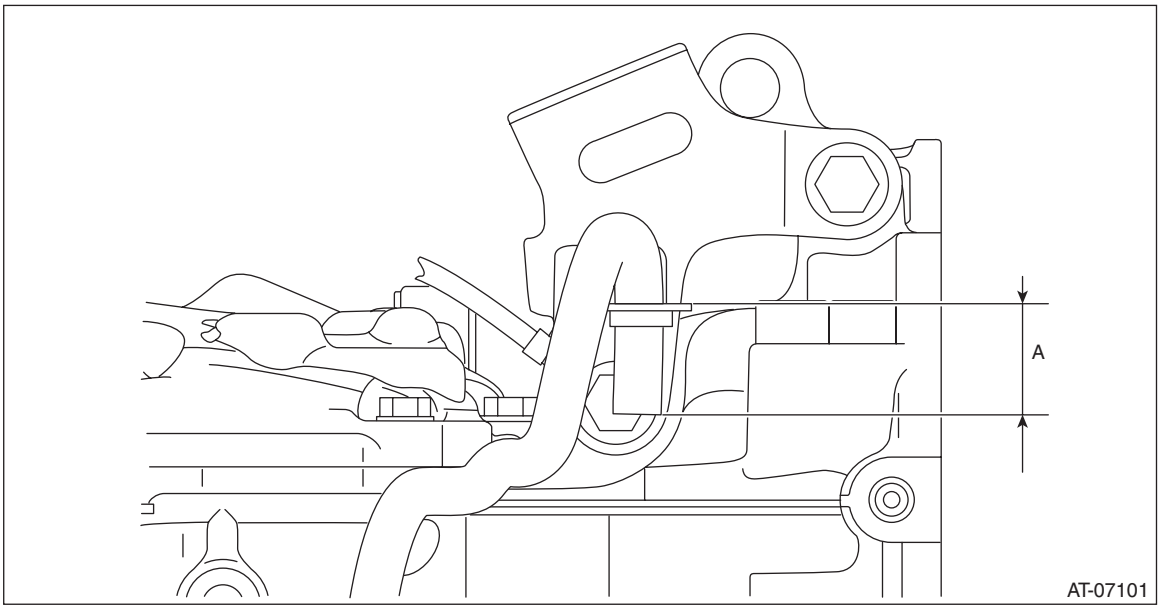


## B: INSTALLATION

### 1. FRONT DIFFERENTIAL SIDE

Install in the reverse order of removal.

***Insertion depth A:***
***16 — 36 mm (0.63 — 1.42 in)***



### 2. TRANSMISSION CASE SIDE

Install in the reverse order of removal.

***Tightening torque:***
***Transmission case cover:***
***8 N·m (0.8 kgf-m, 5.9 ft-lb)***

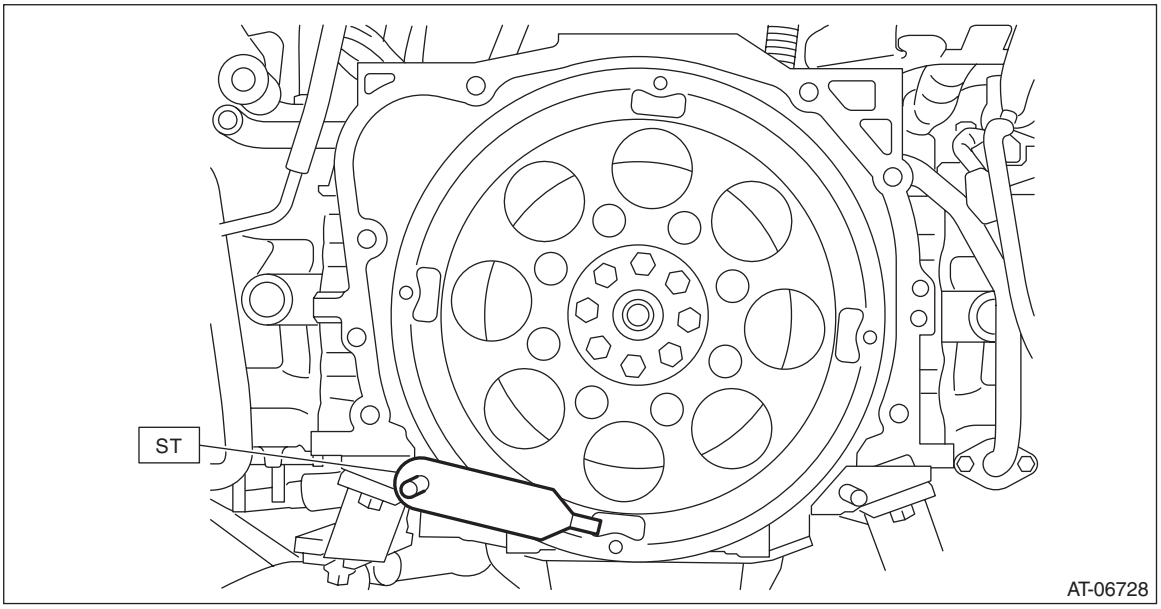
## C: INSPECTION

Check the hose for peeling, crack or clogging.

# 25.Drive Plate

## A: REMOVAL

1) Remove the transmission assembly from the vehicle. <Ref. to CVT-56, REMOVAL, Automatic Transmission Assembly.>
2) Set the ST.
ST 498497300 CRANKSHAFT STOPPER

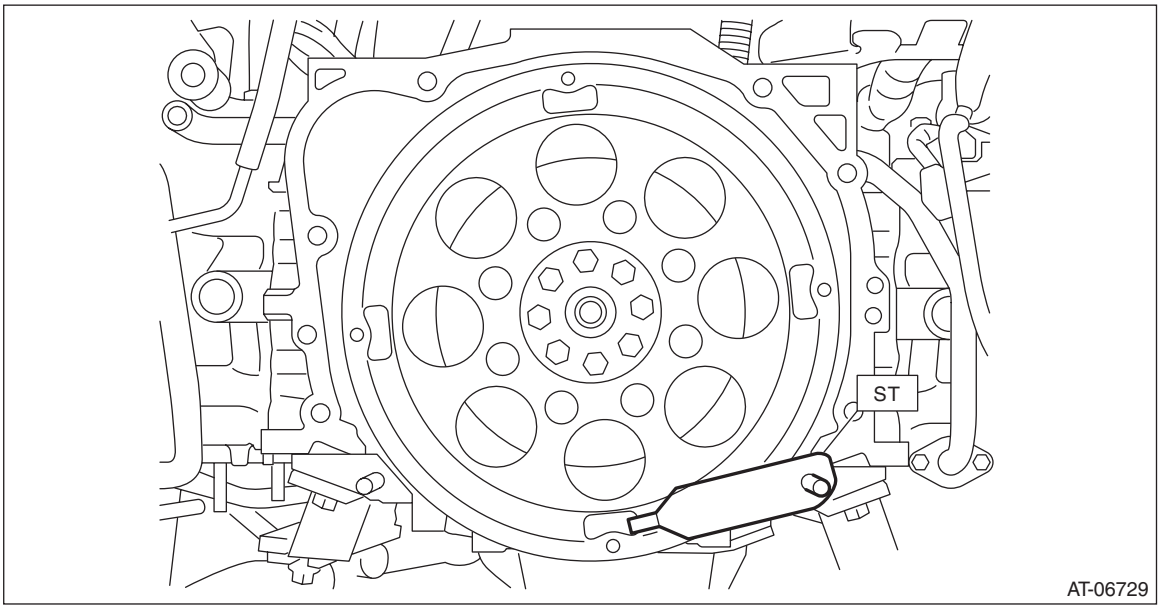


3) Remove the drive plate and reinforcement drive plate.

## B: INSTALLATION

1) Temporarily install the drive plate and reinforcement drive plate.

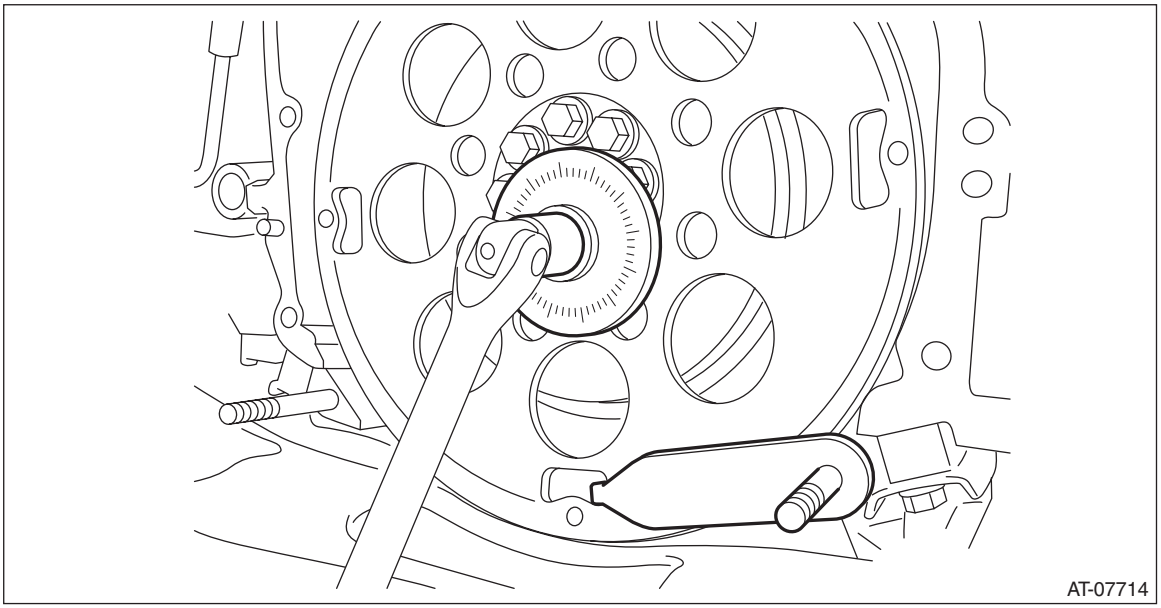
NOTE:
Align the knock pin hole of the crankshaft position sensor plate to the knock pin of the crankshaft to secure the knock pin.
2) Set the ST.
ST 498497300 CRANKSHAFT STOPPER



3) Tighten the drive plate mounting bolt in two stages.
(1) Tighten the drive plate mounting bolt.

***Tightening torque:***
***30 N·m (3.1 kgf-m, 22.1 ft-lb)***
(2) While checking the tightening angle with the angle gauge, tighten the drive plate mounting bolts to the specified angle.

***Tightening angle:***
***30° — 35°***



4) Install the transmission assembly to the vehicle. <Ref. to CVT-67, INSTALLATION, Automatic Transmission Assembly.>

## C: INSPECTION

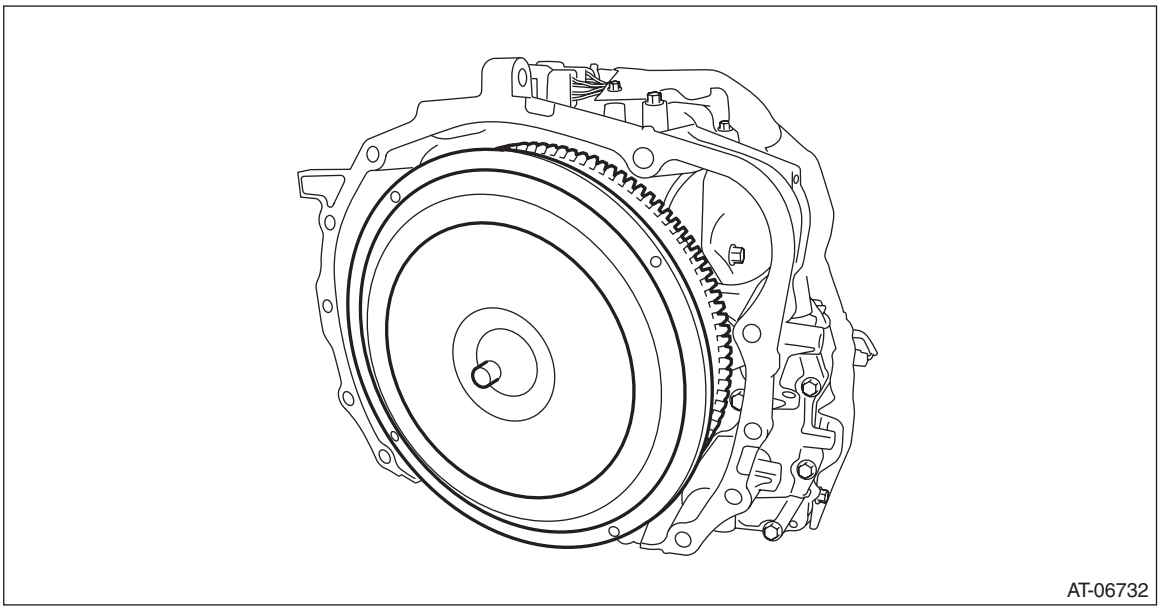
Check the drive cable for damage.

# 26.Torque Converter Assembly

## A: REMOVAL

1) Remove the transmission assembly from the vehicle. <Ref. to CVT-56, REMOVAL, Automatic Transmission Assembly.>
2) Pull out the torque converter assembly horizontally.

**CAUTION:**
**Do not scratch the inside of engaging parts.**



3) Remove the O-ring from the input shaft.

## B: INSTALLATION

1) Install the O-ring to the input shaft.

NOTE:
- Use new O-rings.
- Apply CVTF to the O-ring.

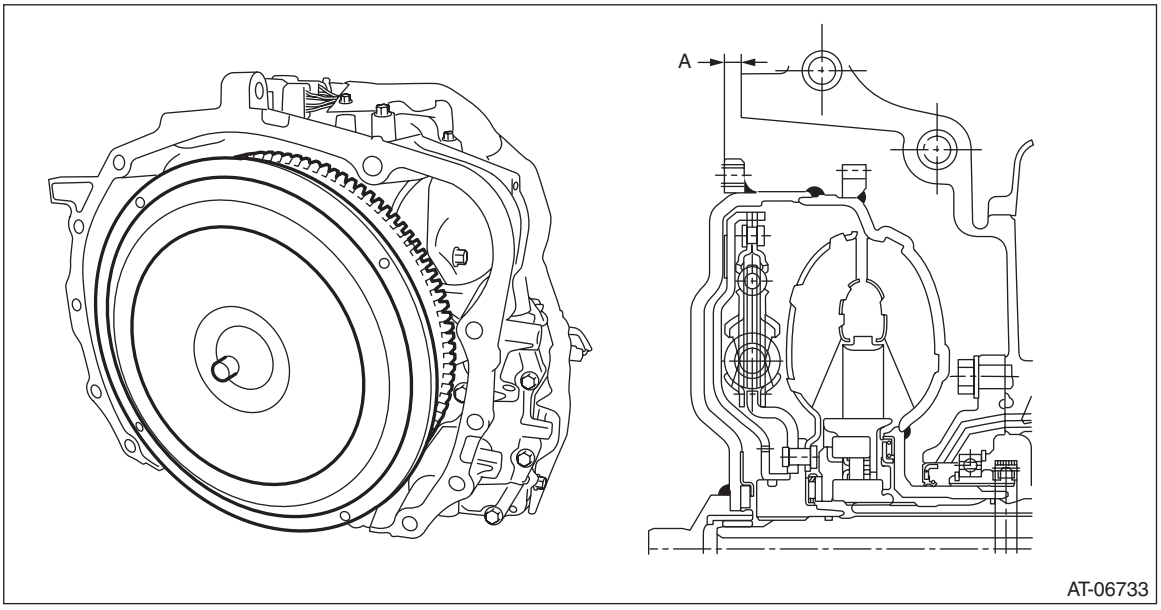
2) While holding the torque converter assembly by hand, carefully install it into the torque converter case.

NOTE:
- Apply CVTF to the oil seal lip.
- Do not damage the oil seal and O-ring.

3) Engage the splines while gently rotating the torque converter assembly by hand, and securely insert the assembly.

4) Measure depth “A”, from converter case end surface to drive plate contacting surface.

***Standard (reference):***
***6.8 mm (0.268 in)***



5) Install the transmission assembly to the vehicle. <Ref. to CVT-67, INSTALLATION, Automatic Transmission Assembly.>

## C: INSPECTION

- Check the protrusion of torque converter center (front boss) is not deformed or damaged.
- Check the ring gear and exterior for break or damage.

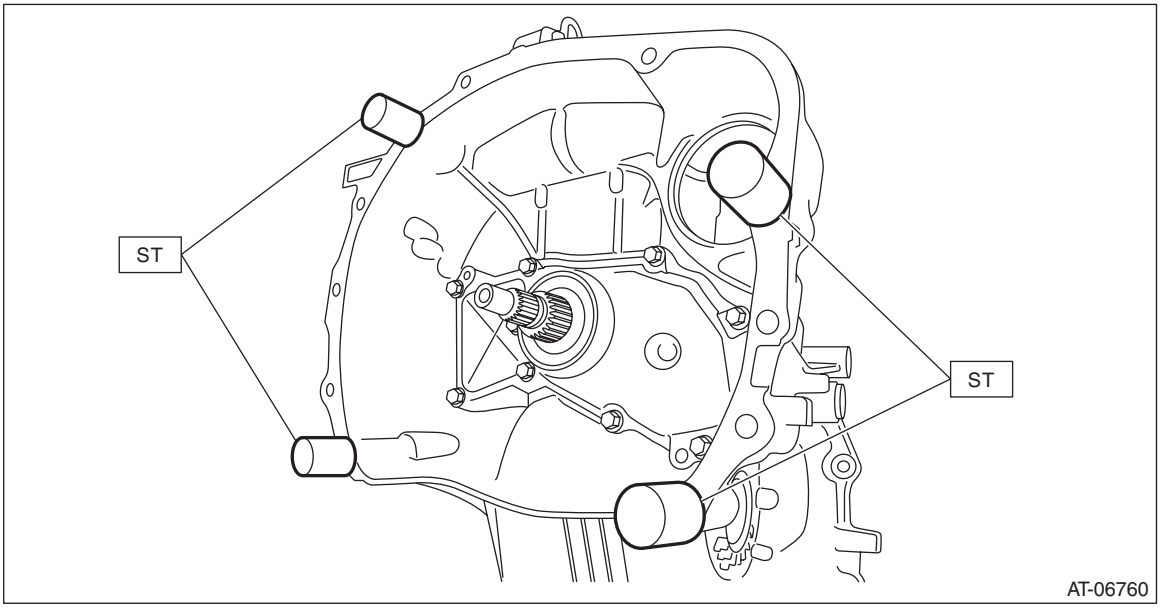
# 27.Preparation for Overhaul

## A: GENERAL DESCRIPTION

Before disassembling and assembling the transmission, follow the following procedures to prepare.

## B: PROCEDURE

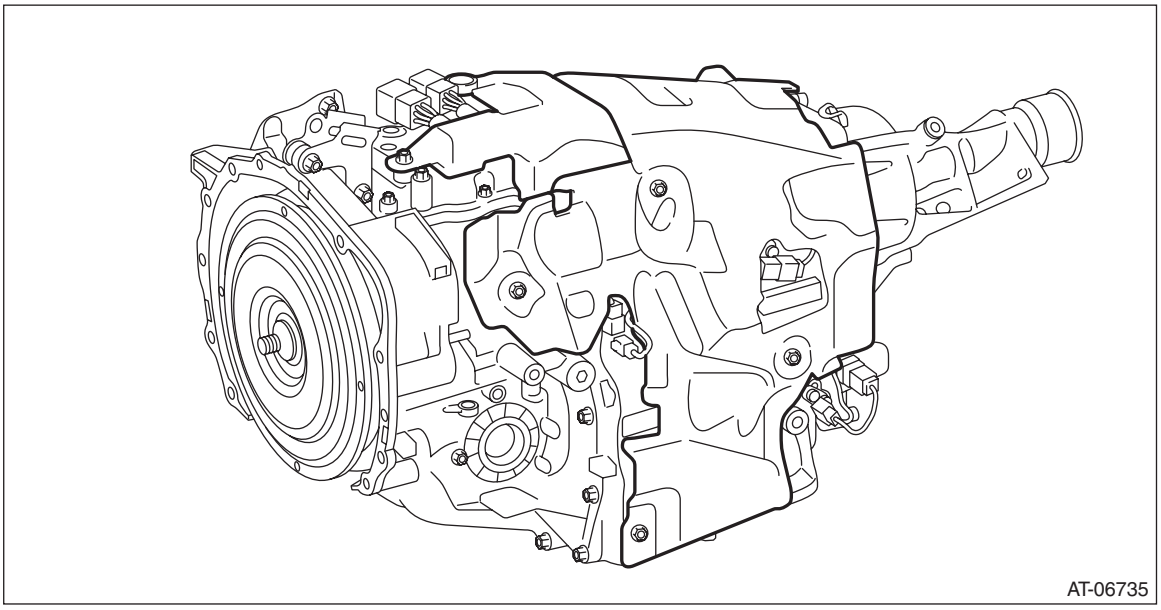
1) Clean the transmission exterior.
2) Remove the torque converter assembly. <Ref. to CVT-152, Torque Converter Assembly.>
3) Attach the ST on the transmission.
ST 18632AA000 STAND ASSY



4) Remove the transmission case cover on the transmission upper side.

NOTE:
Install using the following tightening torque.

***Tightening torque:***
***8 N·m (0.8 kgf-m, 5.9 ft-lb)***

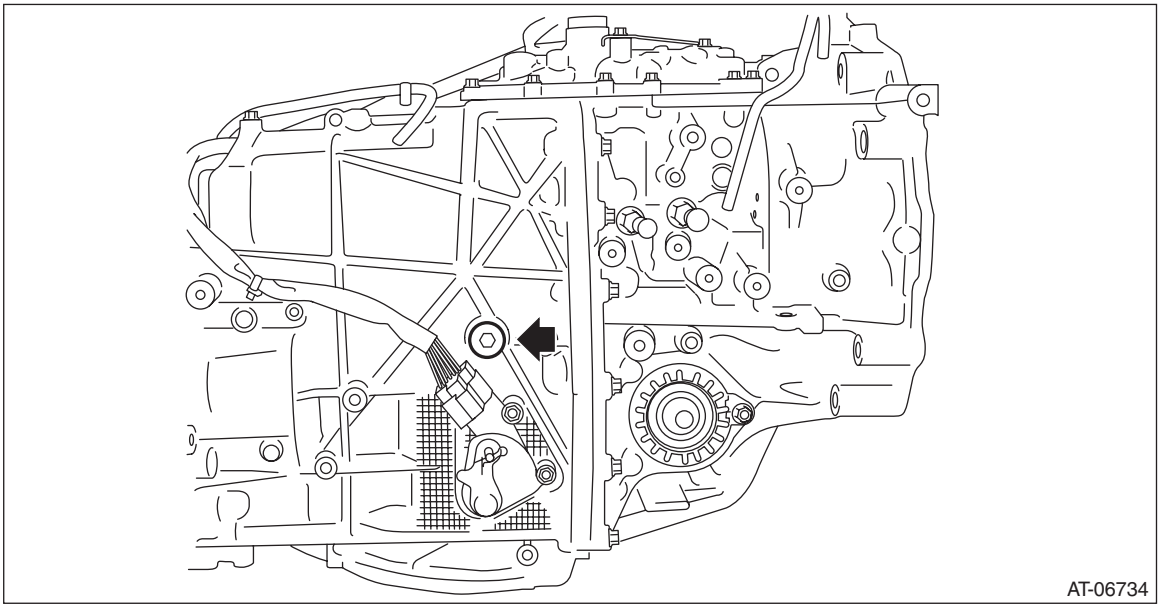


5) Place the transmission assembly on end.
6) When completely overhauling the transmission, refill approx. 10 L (2.6 US qt, 8.8 Imp qt) of CVTF through the transmission right side plug, and install the plug. Finally, install the transmission case cover.

**CAUTION:**
**Always use specified CVTF. Using other fluid will cause malfunction. <Ref. to CVT-3, HYDRAULIC CONTROL AND LUBRICATION, SPECIFICATION, General Description.>**

NOTE:
Use a new gasket.

***Tightening torque:***
***50 N·m (5.1 kgf-m, 36.9 ft-lb)***

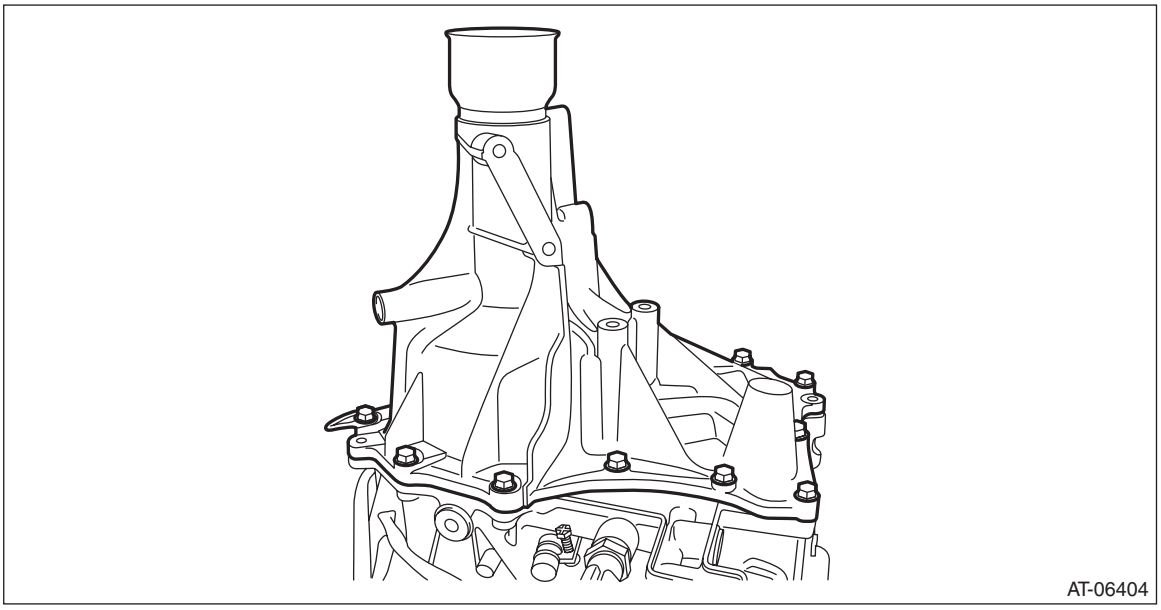


# 28.Extension Case

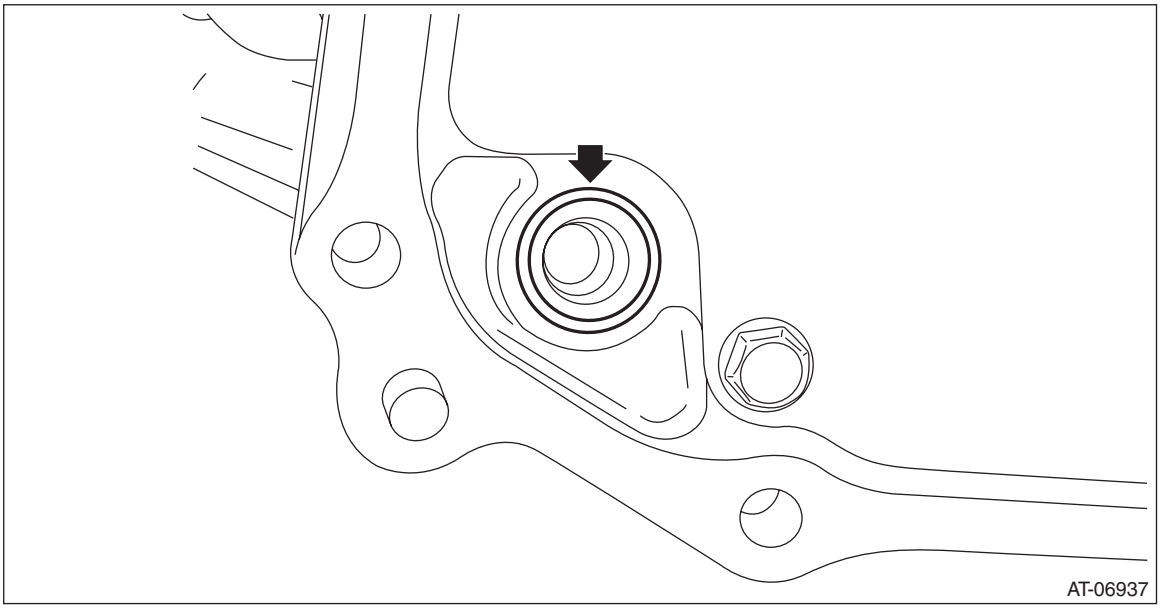
## A: REMOVAL

1) Remove the transmission assembly from the vehicle. <Ref. to CVT-56, REMOVAL, Automatic Transmission Assembly.>
2) Remove the extension case and transmission hanger.

NOTE:
The total number of extension case mounting bolts is 13.



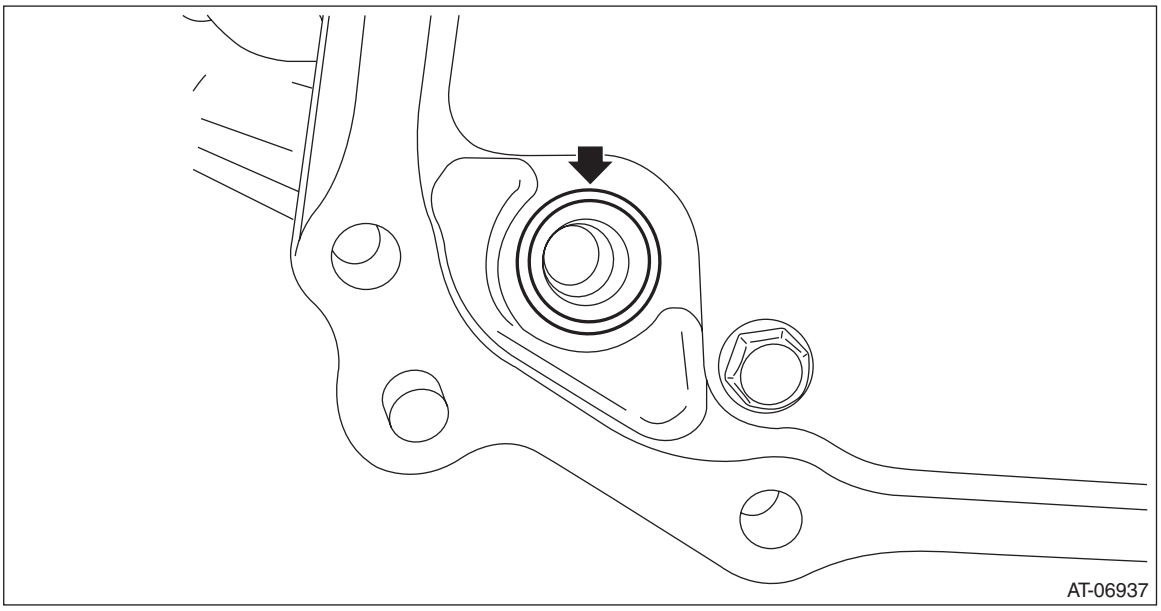
3) Remove the O-ring.



## B: INSTALLATION

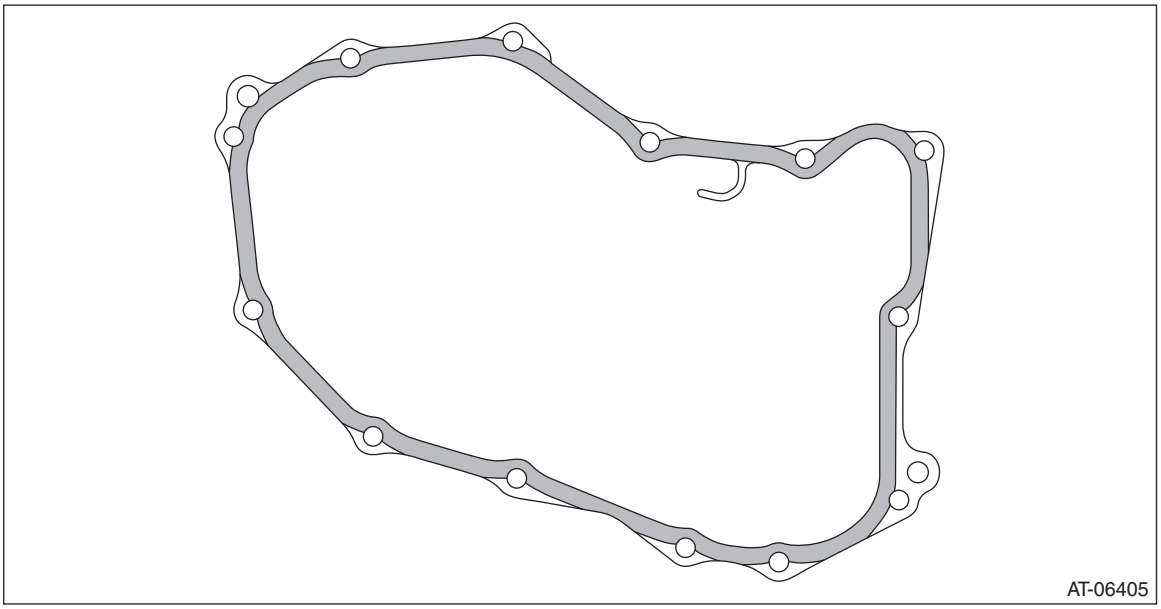
1) Clean the mating surface of extension case and transmission case.
2) Select the transfer drive gear shim. <Ref. to CVT-208, ADJUSTMENT, Reduction Drive Gear.>
3) Select the transfer driven gear shim. <Ref. to CVT-172, ADJUSTMENT, Transfer Clutch.>
4) Attach the selected transfer drive gear shim to extension case with vaseline.
5) Attach the selected transfer driven gear shim to extension case with vaseline.
6) Install the O-ring to the transmission case.

NOTE:
- Use new O-rings.
- Apply CVTF to the O-ring.



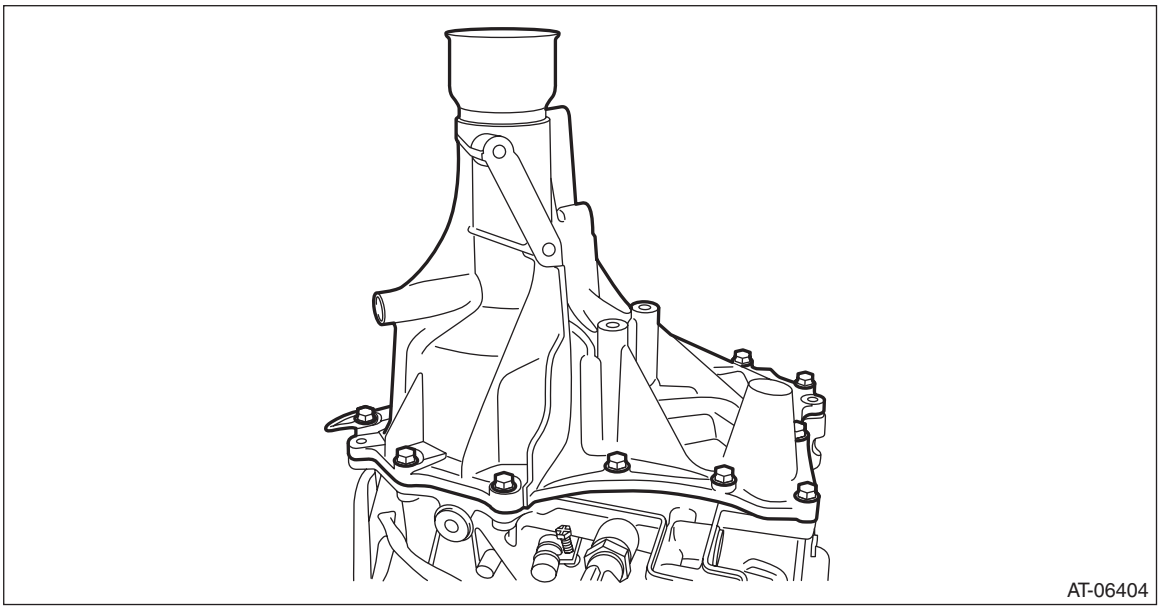
7) Apply liquid gasket to extension case seamlessly.

***Liquid gasket:***
***THREE BOND 1215 (Part No. 004403007) or equivalent***



8) Install the extension case to transmission hanger.

***Tightening torque:***
***25 N·m (2.5 kgf-m, 18.4 ft-lb)***



9) Install the transmission assembly. <Ref. to CVT-67, INSTALLATION, Automatic Transmission Assembly.>

## C: DISASSEMBLY

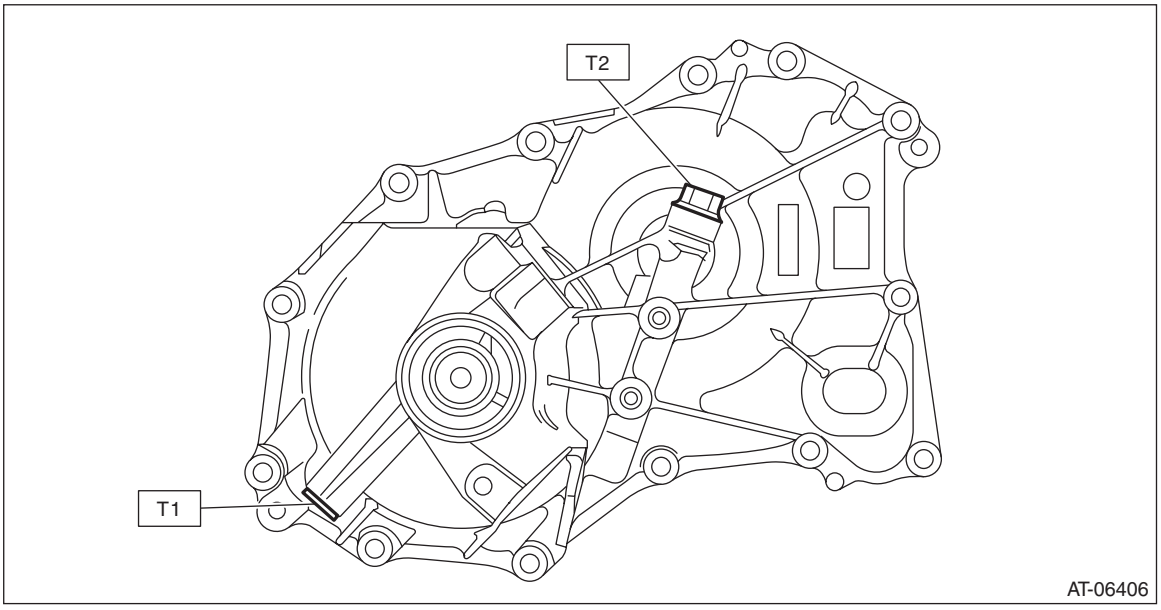
1) Remove the dust cover from extension case.
2) Remove the extension case oil seal from the extension case. <Ref. to CVT-85, REPLACEMENT, Differential Side Retainer Oil Seal.>
3) Remove all plugs.

## D: ASSEMBLY

1) Press-fit the dust cover into extension case.
2) Install the extension case oil seal to extension case. <Ref. to CVT-85, REPLACEMENT, Differential Side Retainer Oil Seal.>
3) Install all plugs.

NOTE:
- Use a new O-ring or a gasket.
- Apply CVTF to the O-ring.

***Tightening torque:***
***T1: 25 N·m (2.5 kgf-m, 18.4 ft-lb)***
***T2: 35 N·m (3.6 kgf-m, 25.8 ft-lb)***



## E: INSPECTION

- Check there is no leak of CVTF from the joint between extension case and transmission case.
- Check there is no damage or cracks on the extension case and other parts.

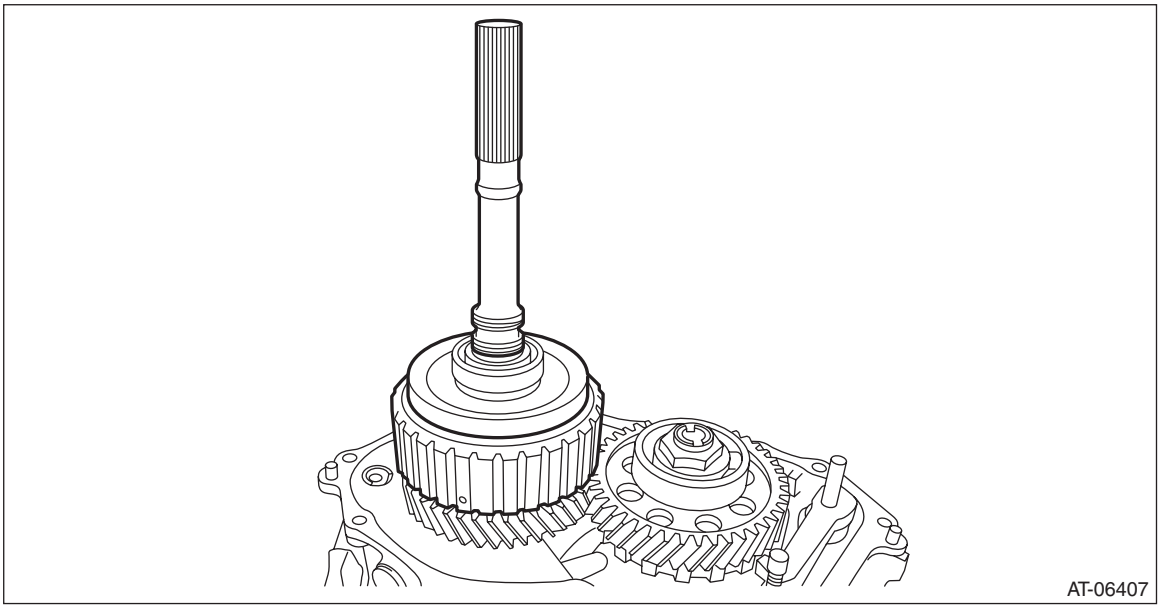
## F: ADJUSTMENT

NOTE:
When replacing the extension case, select the transfer drive gear shim and transfer driven gear shim. <Ref. to CVT-208, ADJUSTMENT, Reduction Drive Gear.> <Ref. to CVT-172, ADJUSTMENT, Transfer Clutch.>

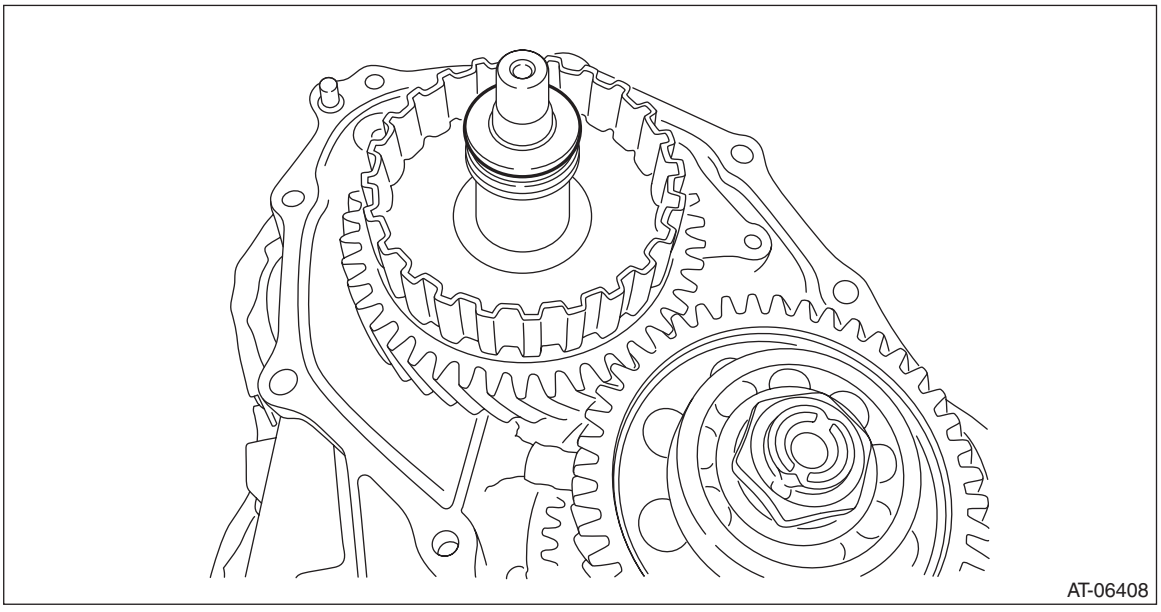
# 29.Transfer Clutch

## A: REMOVAL

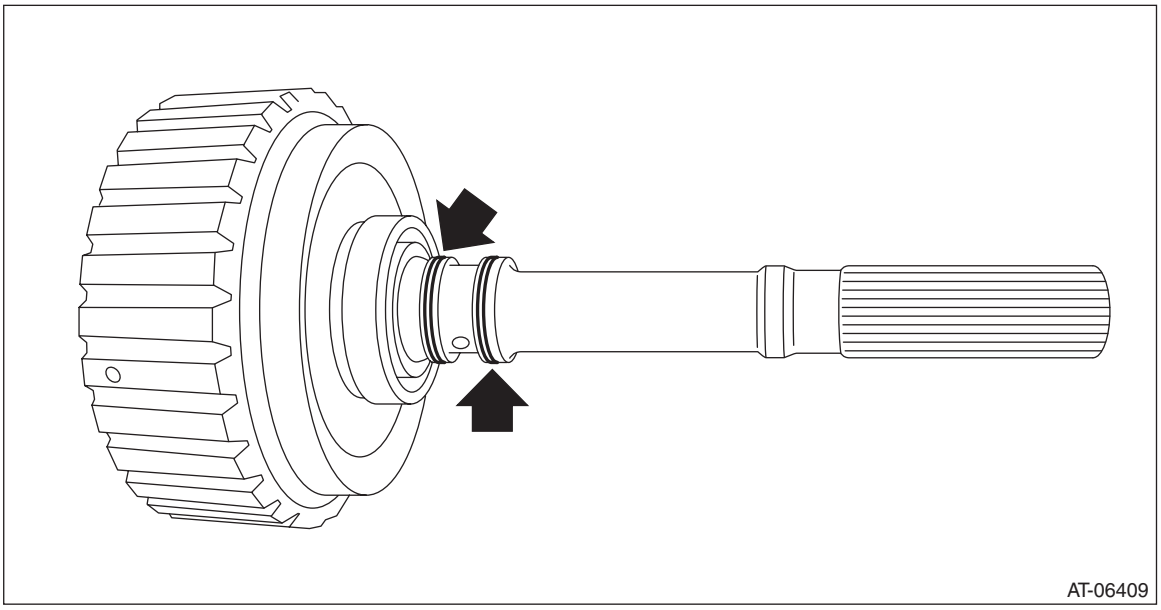
1) Remove the transmission assembly from the vehicle. <Ref. to CVT-56, REMOVAL, Automatic Transmission Assembly.>
2) Remove the extension case. <Ref. to CVT-156, REMOVAL, Extension Case.>
3) Remove the transfer clutch assembly.



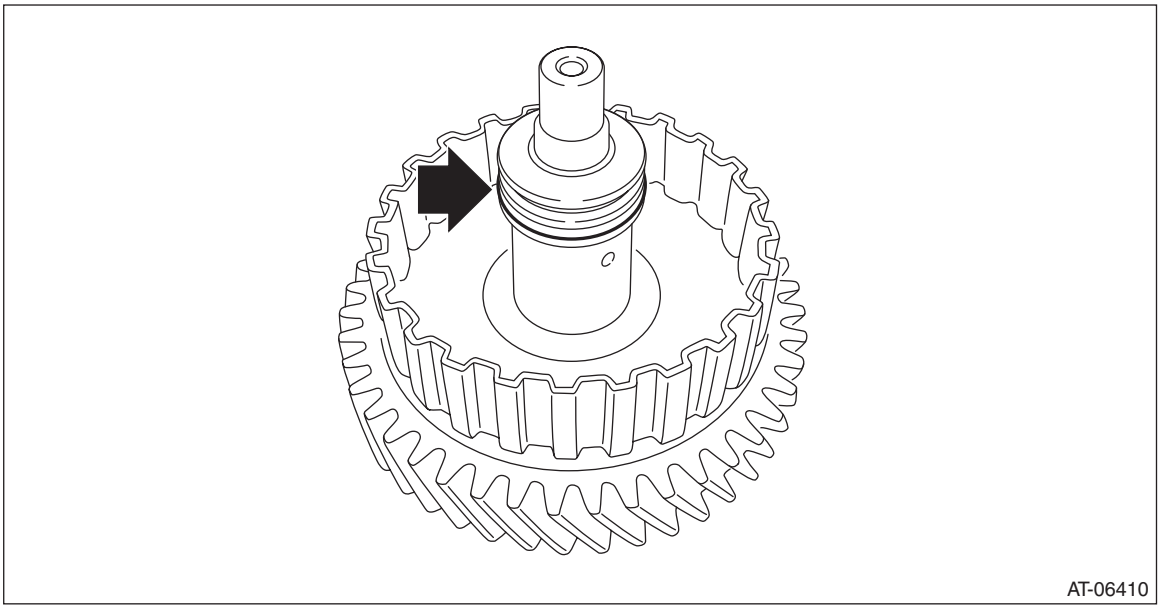
4) Remove the thrust bearing.



5) Remove the seal ring from transfer clutch assembly.



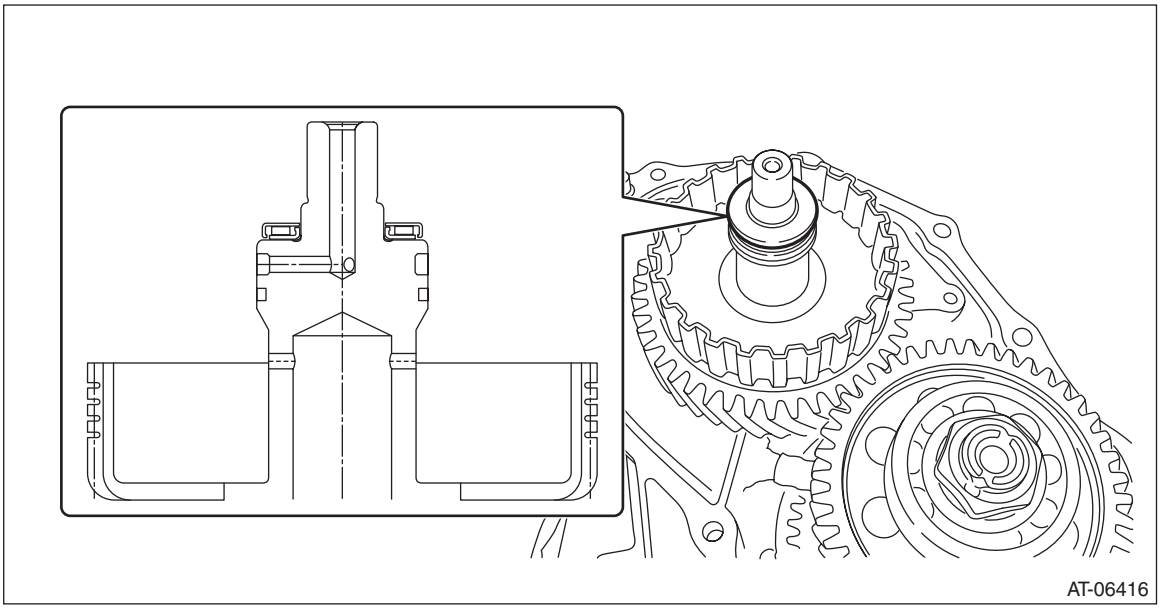
6) Remove the seal ring from the transfer driven gear assembly.



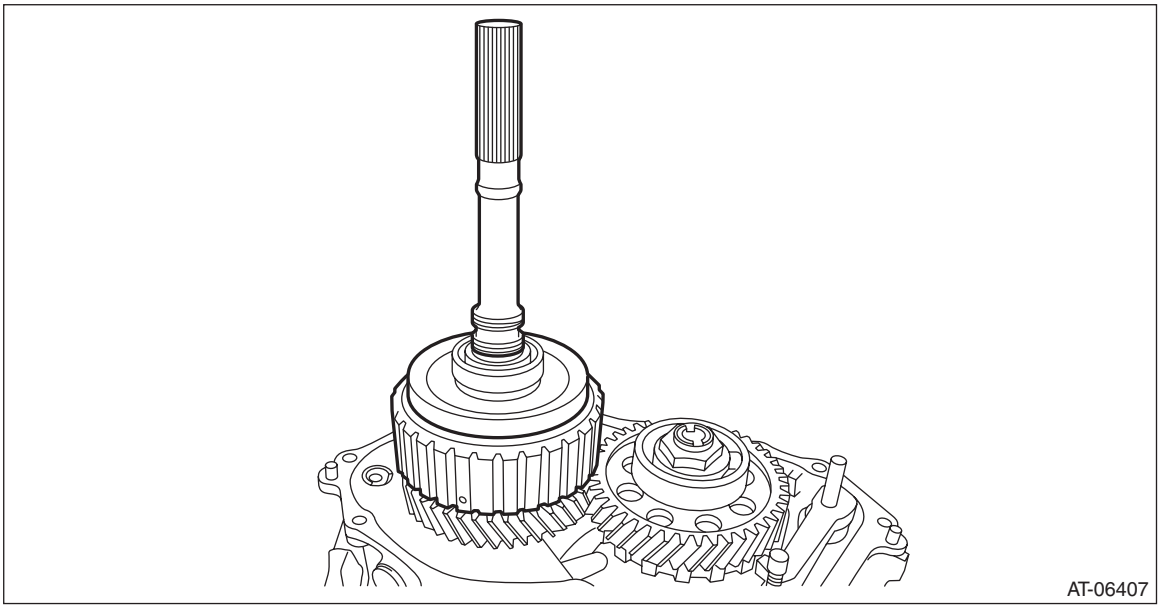
## B: INSTALLATION

1) Install the thrust bearing.

NOTE:
Make sure to install in the right direction.



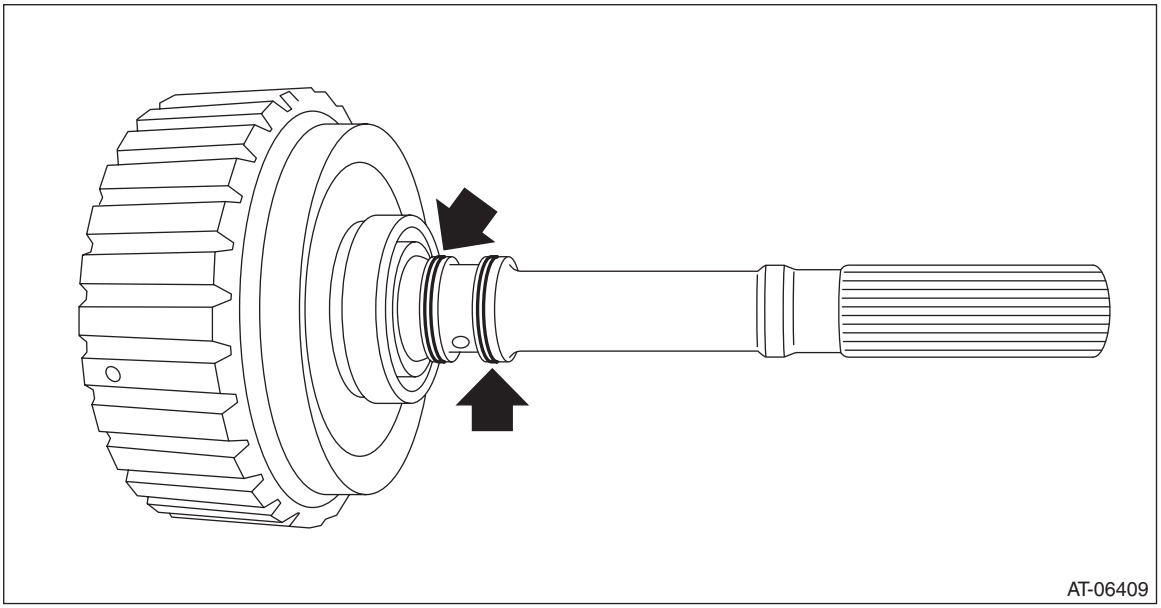
2) Install the transfer clutch assembly.



3) Select the transfer driven gear shim. <Ref. to CVT-172, ADJUSTMENT, Transfer Clutch.>
4) Attach the selected transfer driven gear shim to extension case with vaseline.
5) Remove the transfer clutch assembly.

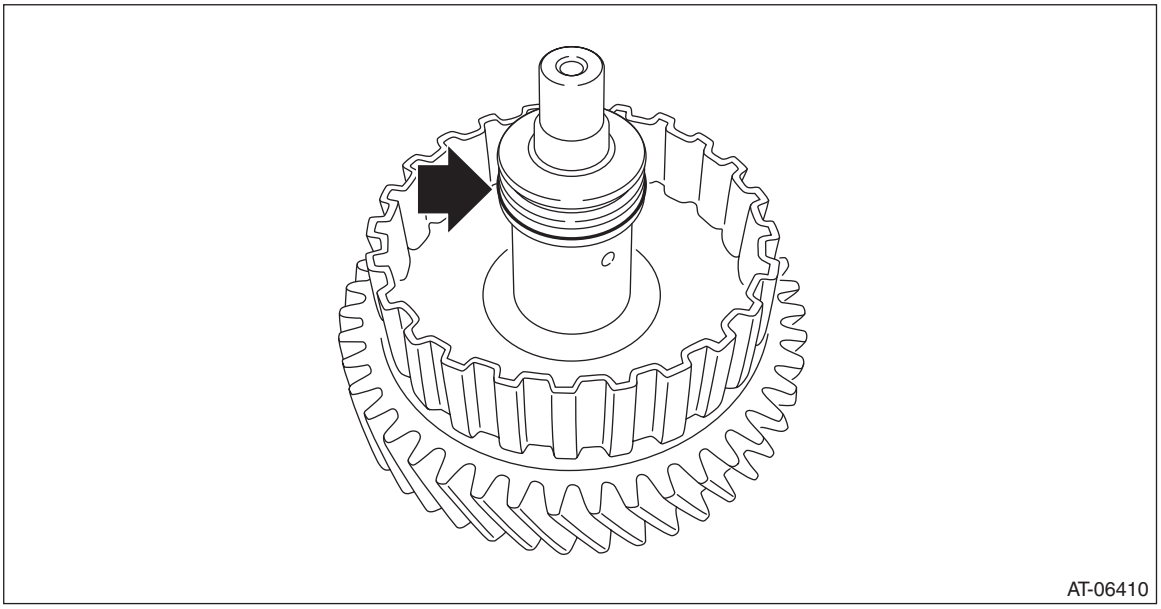
6) Install the seal ring to the transfer clutch assembly.

NOTE:
- Use a new seal ring.
- When installing the seal ring, do not expand the seal ring too much.
- Apply CVTF to the seal rings.



7) Install the seal ring to the transfer driven gear assembly.

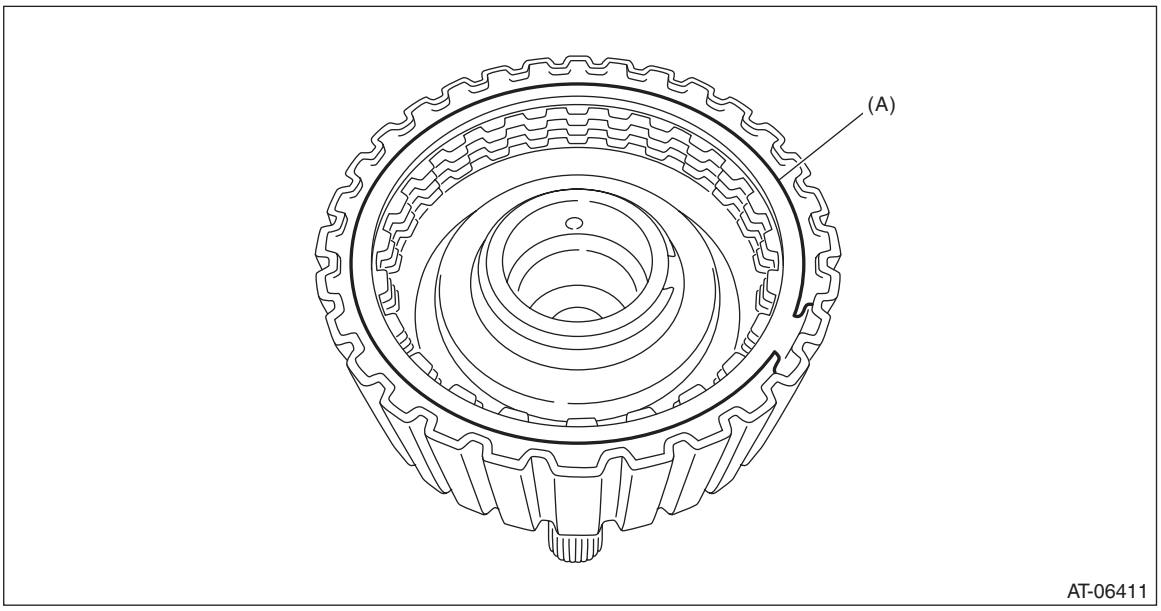
NOTE:
- Use a new seal ring.
- When installing the seal ring, do not expand the seal ring too much.
- Apply CVTF to the seal rings.



8) Install the transfer clutch assembly.
9) Install the extension case. <Ref. to CVT-157, INSTALLATION, Extension Case.>
10) Install the transmission assembly to the vehicle. <Ref. to CVT-67, INSTALLATION, Automatic Transmission Assembly.>

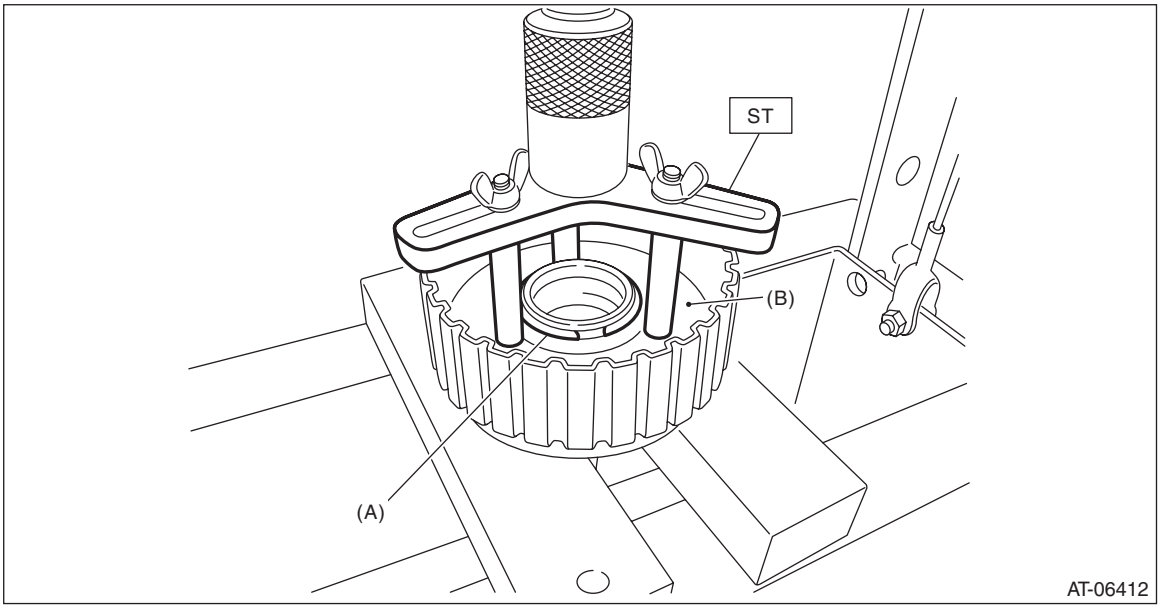
## C: DISASSEMBLY

1) Remove the snap ring, and then remove the retaining plate, drive plate and driven plate.



(A) Snap ring

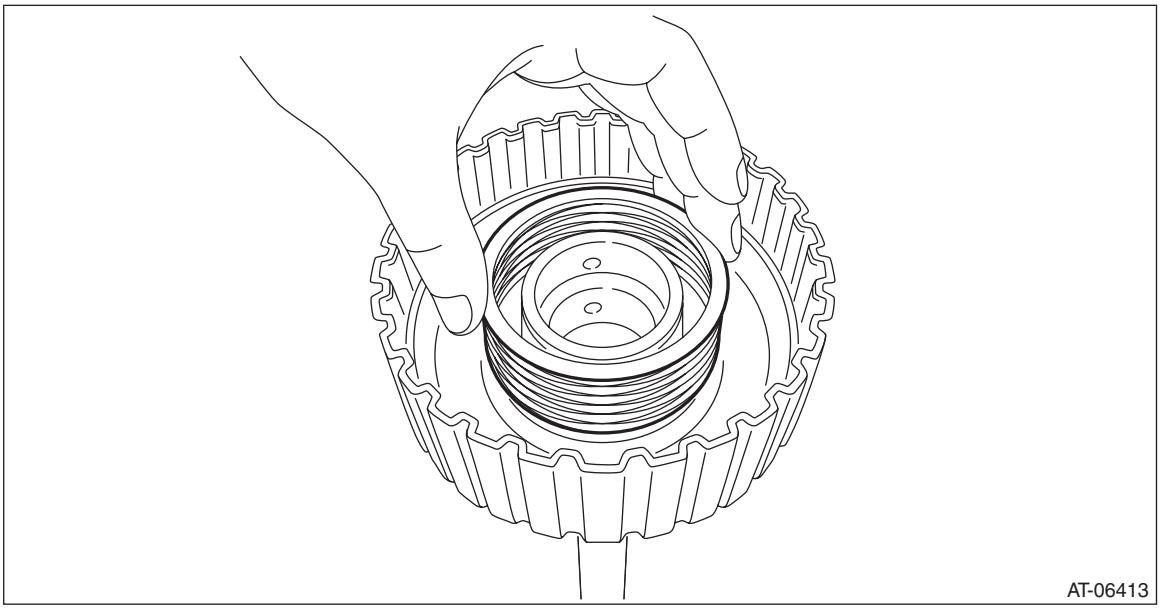
2) Compress the return spring using the ST to remove the snap ring.
ST 18762AA000 COMPRESSOR SPECIAL TOOL



(A) Snap ring
(B) Transfer clutch piston seal

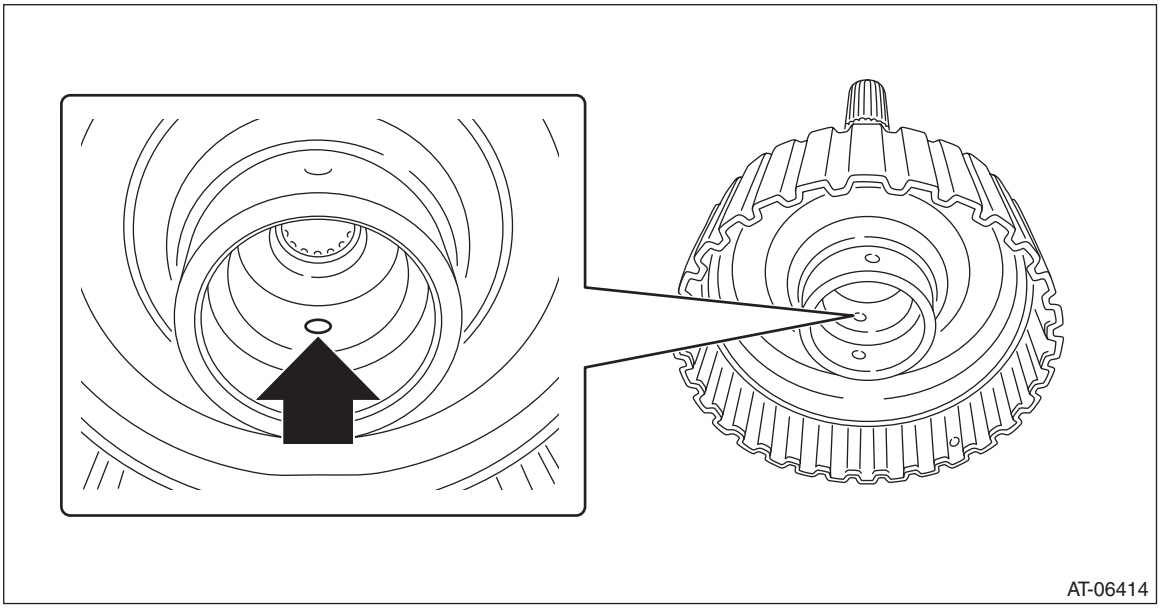
3) Remove the transfer clutch piston seal.

4) Remove the return spring.

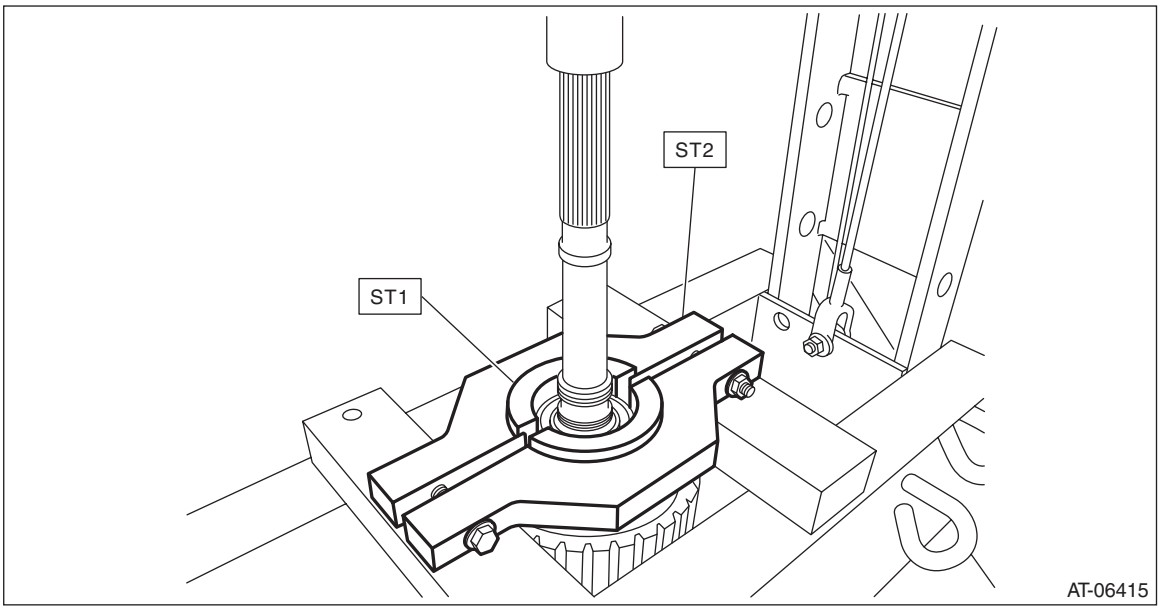


5) Remove the transfer clutch piston by blowing compressed air through transfer clutch assembly hole.

NOTE:
Plug the holes through which the compressed air is not blown.



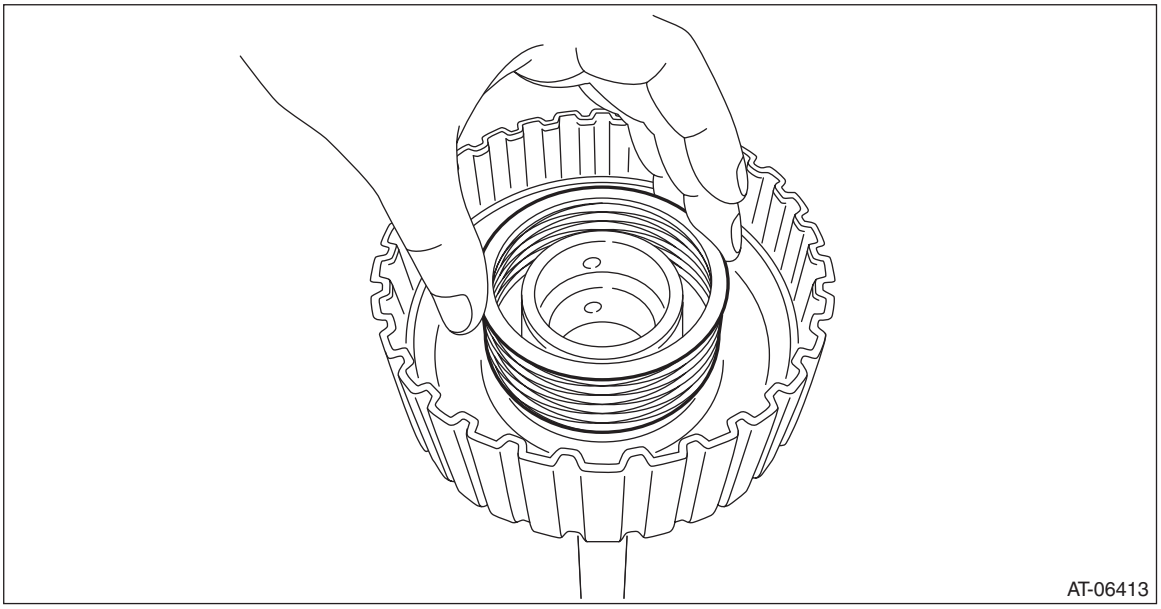
6) Remove the ball bearing using ST.
ST1 18767AA010 BEARING REMOVER
ST2 18723AA000 REMOVER



## D: ASSEMBLY

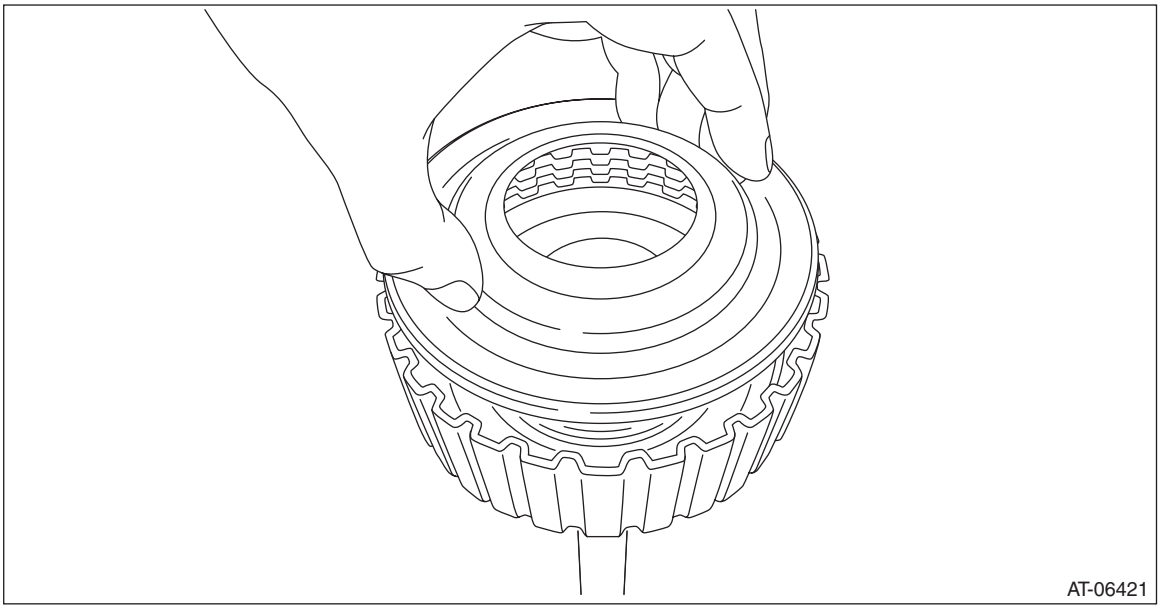
1) Install the transfer clutch piston.

NOTE:
Apply CVTF to the transfer clutch piston lip.
2) Install the return spring.

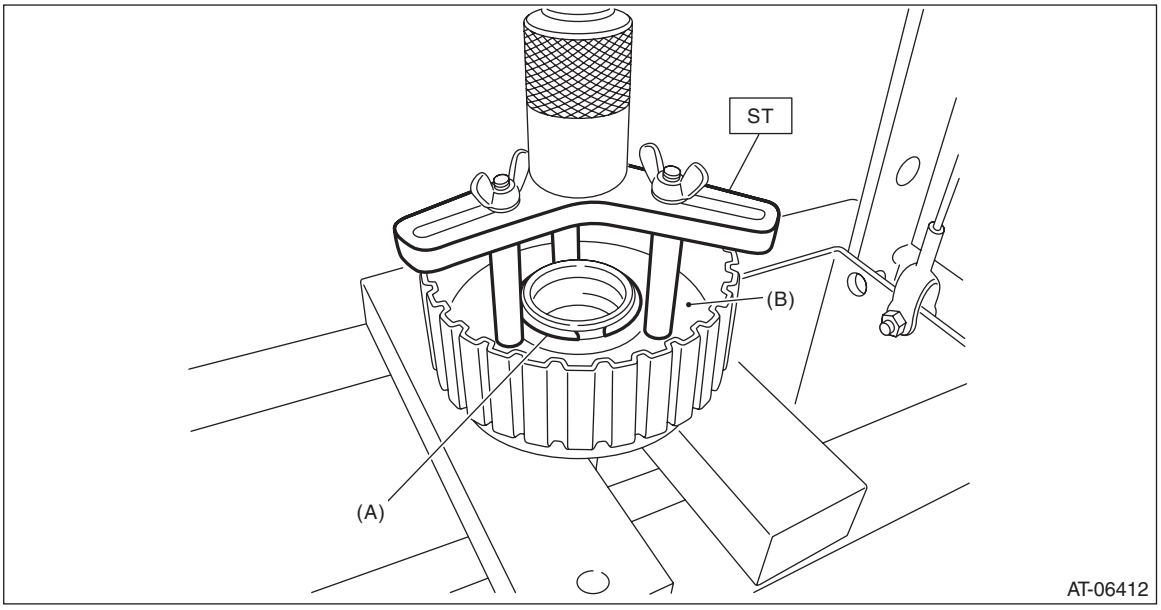


3) Install the transfer clutch piston seal.

NOTE:
Apply CVTF to the lip section of transfer clutch piston seal.

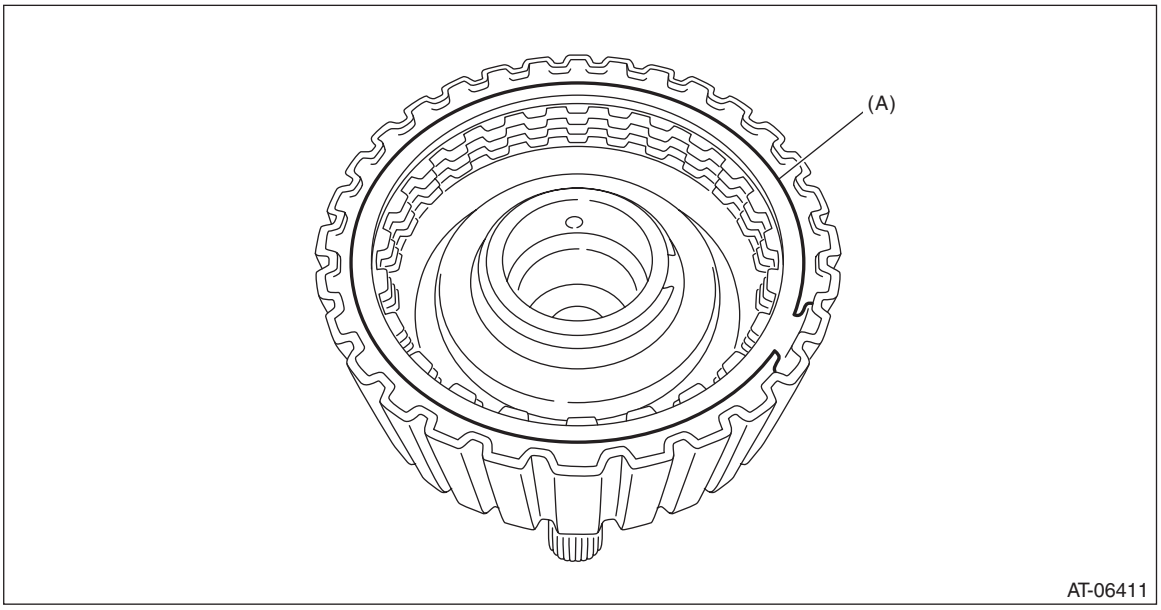


4) Compress the return spring using the ST to install the snap ring.
ST 18762AA000 COMPRESSOR SPECIAL TOOL



(A) Snap ring
(B) Transfer clutch piston seal

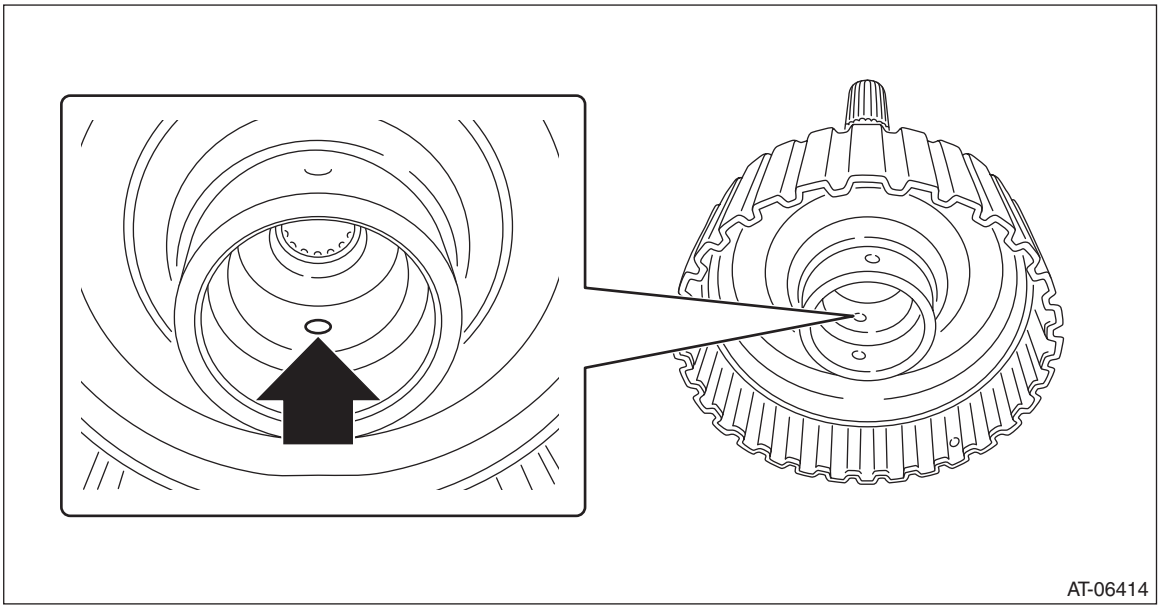
5) Install the pressure plate, driven plate, drive plate and snap ring.



(A) Snap ring

6) Blow compressed air through transfer clutch assembly hole, and check the transfer clutch piston operation.

NOTE:
Plug the holes through which the compressed air is not blown.

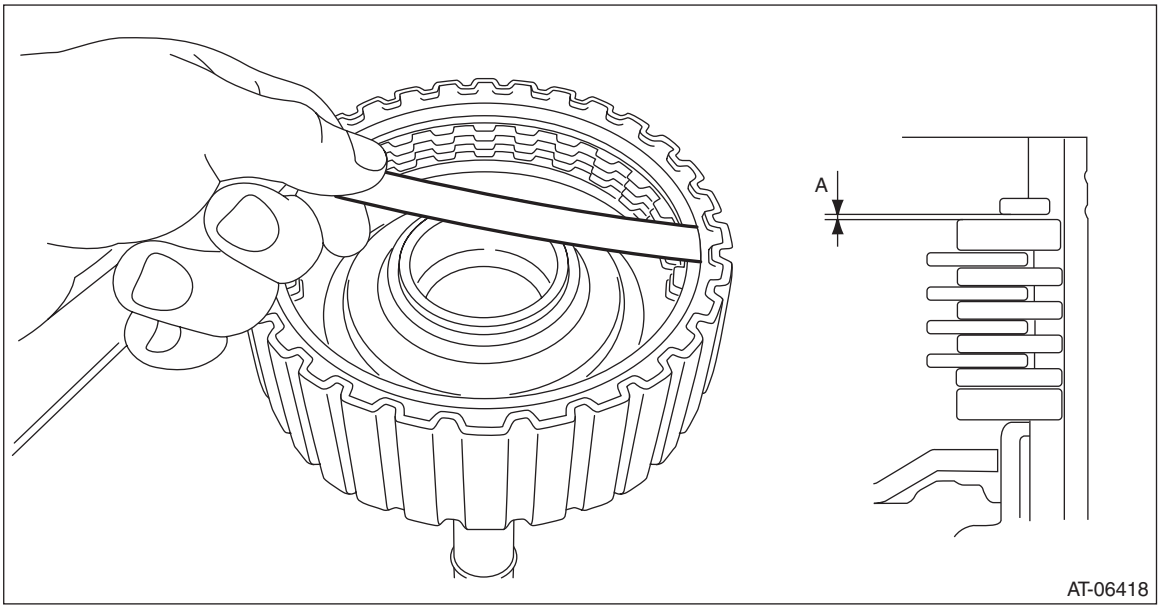


7) Before measuring clearance “A”, place same thickness shims on both sides to prevent the plate from tilting.

8) When clearance “A” exceeds the limit for use, replace the drive plate and driven plate as a set, and select and adjust the pressure plate within the initial specified value.

***Initial standard:***
***0.7 — 1.1 mm (0.028 — 0.043 in)***

***Limit thickness:***
***1.3 mm (0.051 in)***

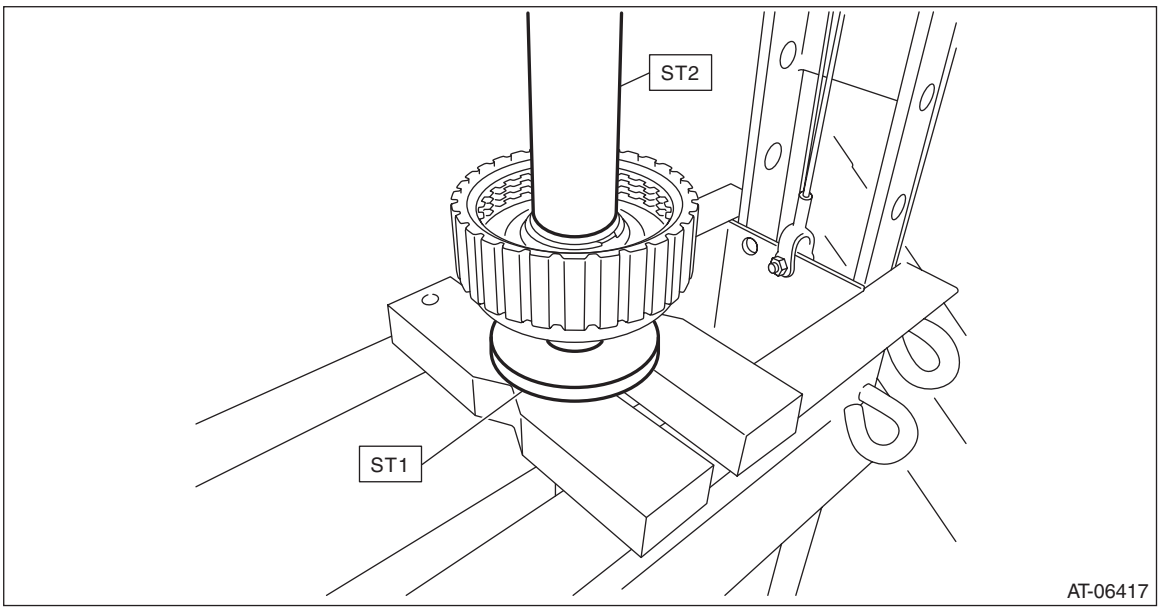


| Pressure plate | |
|---|---|
| Part No. | Thickness mm (in) |
| 31593AA151 | 3.3 (0.130) |
| 31593AA161 | 3.7 (0.146) |

9) Recheck the clearance. <Ref. to CVT-171, INSPECTION, Transfer Clutch.>

10) Using the ST, install the ball bearing.

NOTE:
Use a new ball bearing.
ST1 398177700 INSTALLER
ST2 499277000 INSTALLER



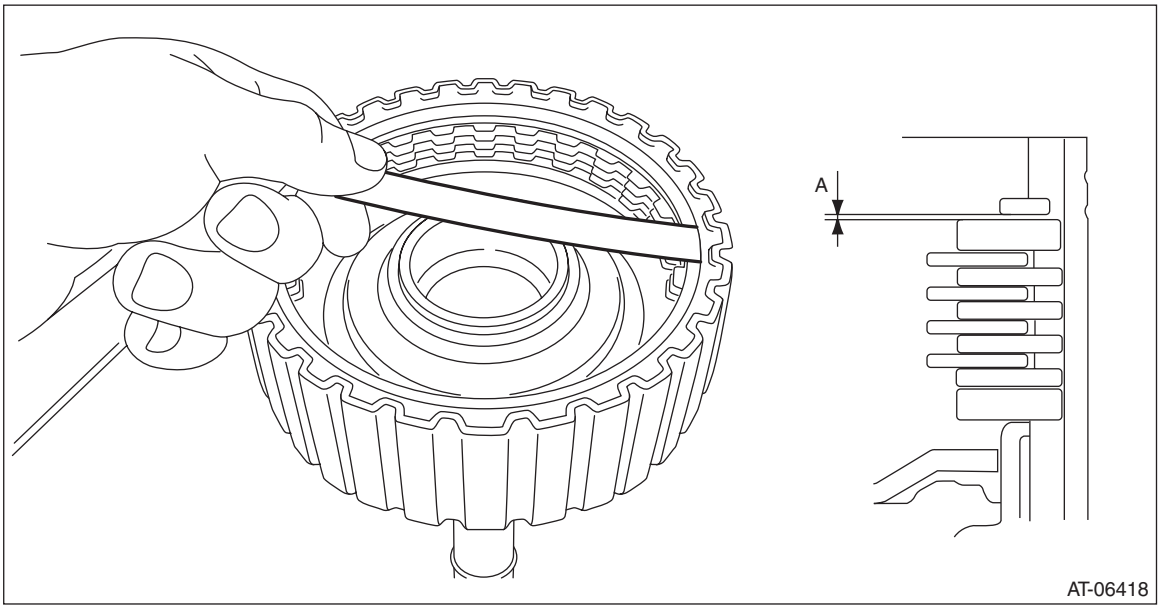
## E: INSPECTION

- Inspect the drive plate facing for wear and damage.
- Driven plate for discoloration (burned color)
- Make sure the snap ring is not worn and the return spring has no permanent distortion, damage, or deformation.
- Check the lip seal for damage.
- Inspect the extension end play, and adjust it to within the standard value. <Ref. to CVT-172, ADJUSTMENT, Transfer Clutch.>

1) Before measuring clearance “A” between snap ring and driven plate, place same thickness shims on both sides to prevent the plate from tilting.
2) When clearance “A” exceeds the limit for use, replace the drive plate and driven plate as a set, and select the pressure plate within the initial specified value.

***Initial standard:***
***0.7 — 1.1 mm (0.028 — 0.043 in)***

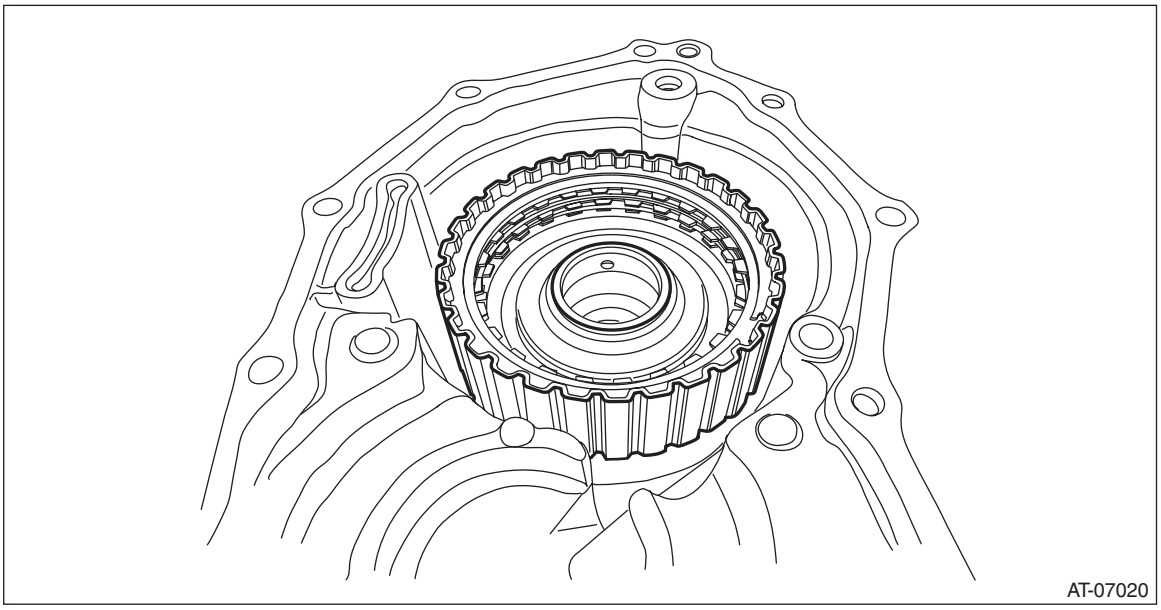
***Limit thickness:***
***1.3 mm (0.051 in)***



3) Check for tight corner braking phenomenon when the vehicle is moved forward with the steering fully turned. If tight corner braking occurs, perform the following procedures.
(1) With the steering wheel held at fully turned position, drive the vehicle in “D” range and with vehicle speed at approx. 5 km/h (3 MPH) in both clockwise and counterclockwise directions for approx. ten times each, while repeating acceleration and braking intermittently.
(2) If the tight corner braking phenomenon still persists, drive the vehicle again in a circle for several laps.

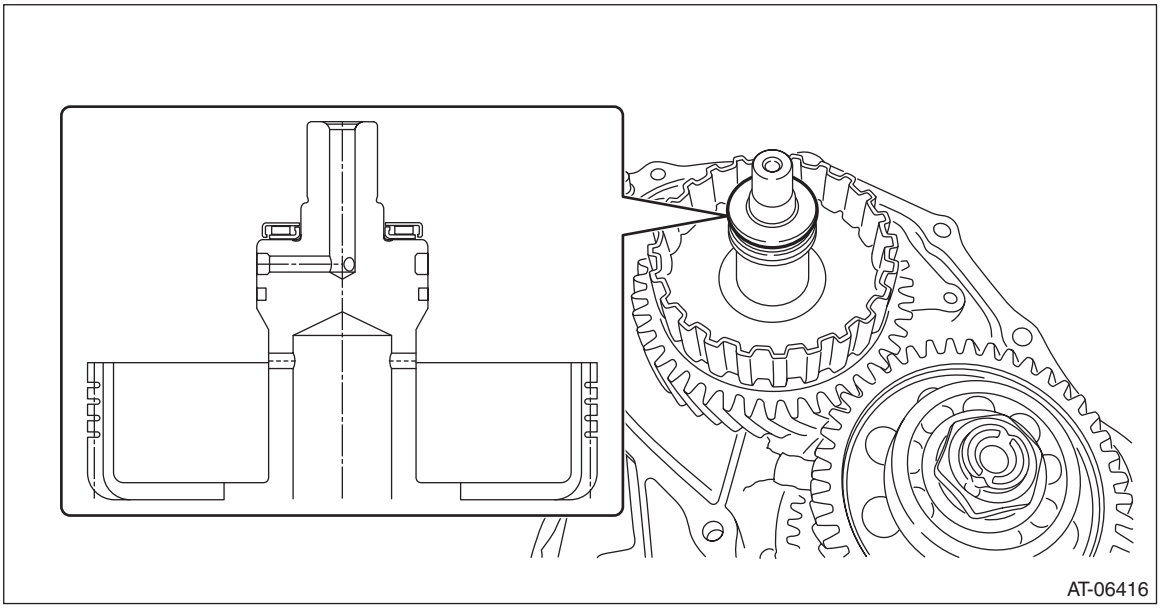
## F: ADJUSTMENT

1) Install the transfer clutch assembly to the extension case with the transfer driven gear shims and thrust bearings removed.

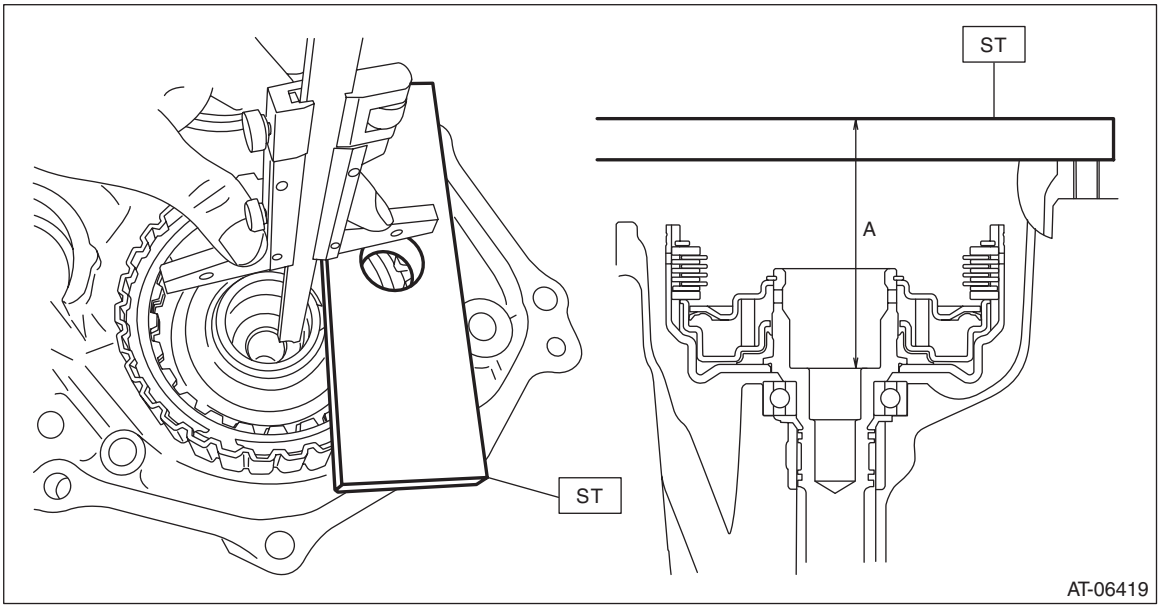


2) Install the thrust bearing to the transfer driven gear.

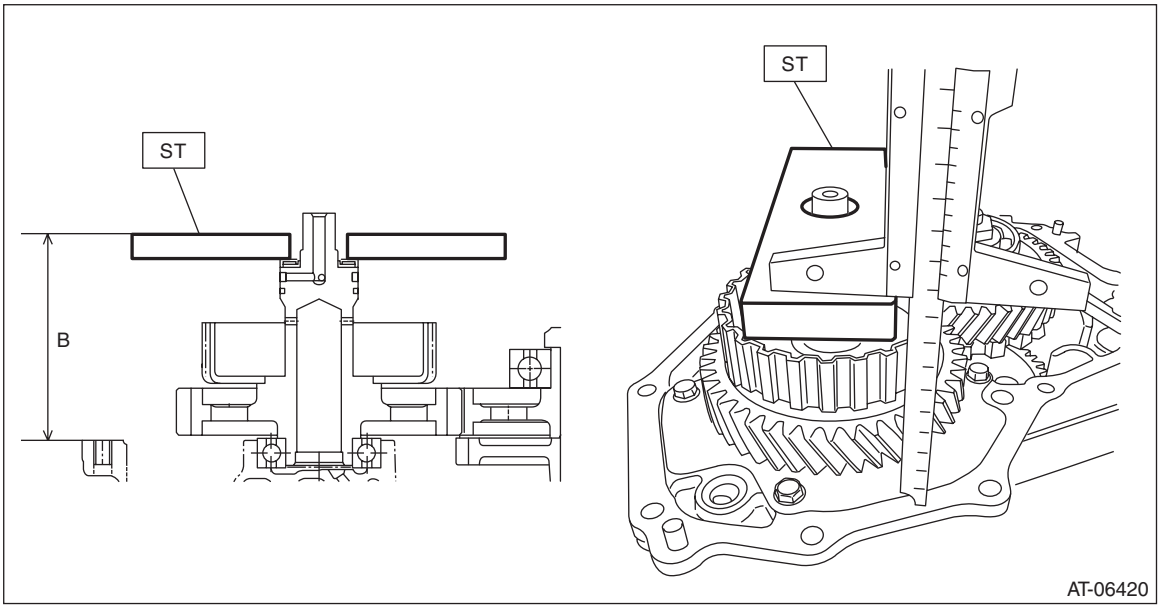
NOTE:
Make sure to install in the right direction.



3) Using the ST, measure the height “A” from the ST end face to the thrust bearing catch surface of the transfer clutch assembly.
ST 499575500 GAUGE



4) Using the ST, measure the height “B” from the transmission case mating surface to the end of ST.
ST 499575500 GAUGE



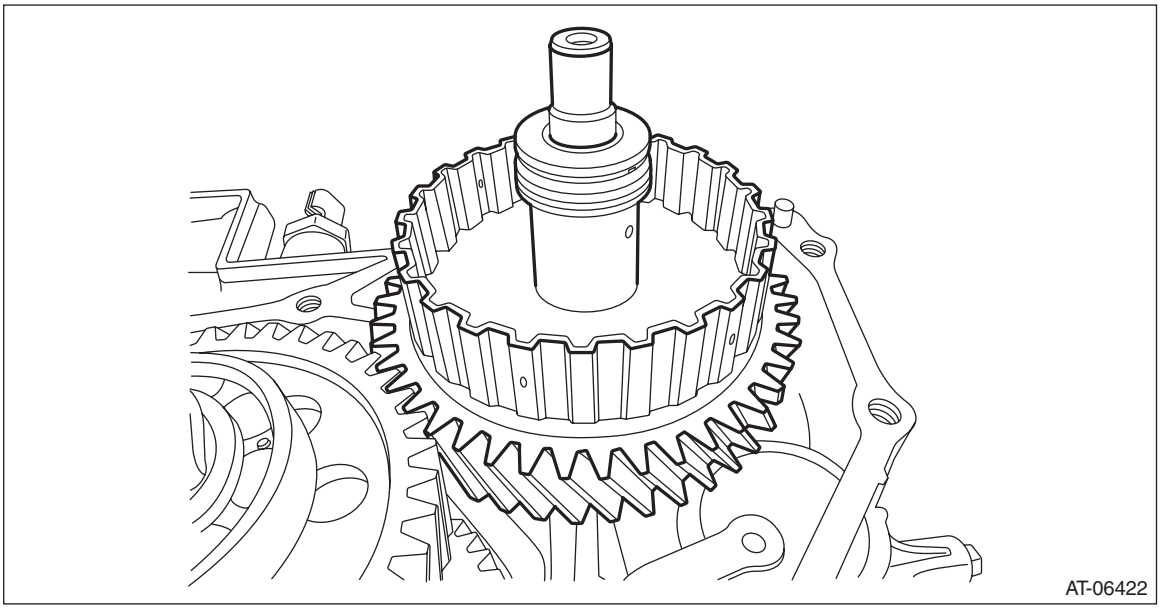
5) Obtain the thickness of transfer driven gear shim using the following formula to select one to three transfer driven gear shims.
T (mm) = A – B – (0.05 — 0.25)
[T (in) = A – B – (0.002 — 0.01)]
T: Transfer driven gear shim thickness
A: Height from the ST end face to the transfer clutch assembly thrust bearing catch surface
B: Height from the mating surface of the transmission case to the end of the ST
0.05 — 0.25 mm (0.002 — 0.01 in): Clearance

| Transfer driven gear shim | |
|---|---|
| Part No. | Thickness mm (in) |
| 33280AA030 | 0.3 (0.012) |
| 33280AA040 | 0.4 (0.016) |
| 33280AA050 | 0.5 (0.020) |

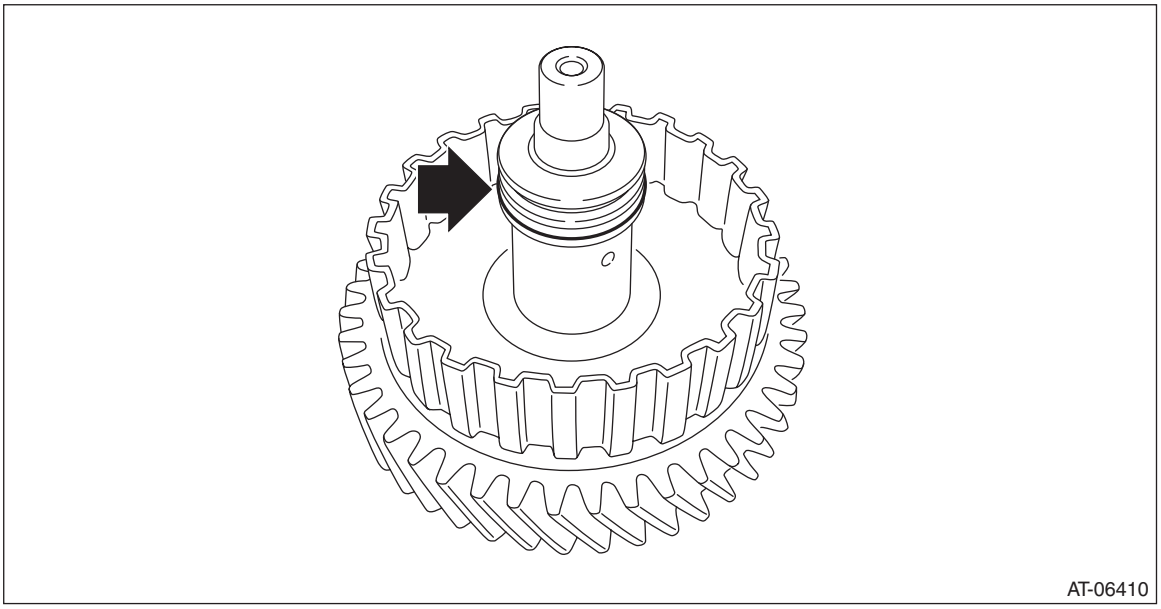
# 30.Transfer Driven Gear

## A: REMOVAL

1) Remove the transmission assembly from the vehicle. <Ref. to CVT-56, REMOVAL, Automatic Transmission Assembly.>
2) Remove the extension case. <Ref. to CVT-156, REMOVAL, Extension Case.>
3) Remove the transfer clutch assembly. <Ref. to CVT-160, REMOVAL, Transfer Clutch.>
4) Remove the transfer driven gear assembly.

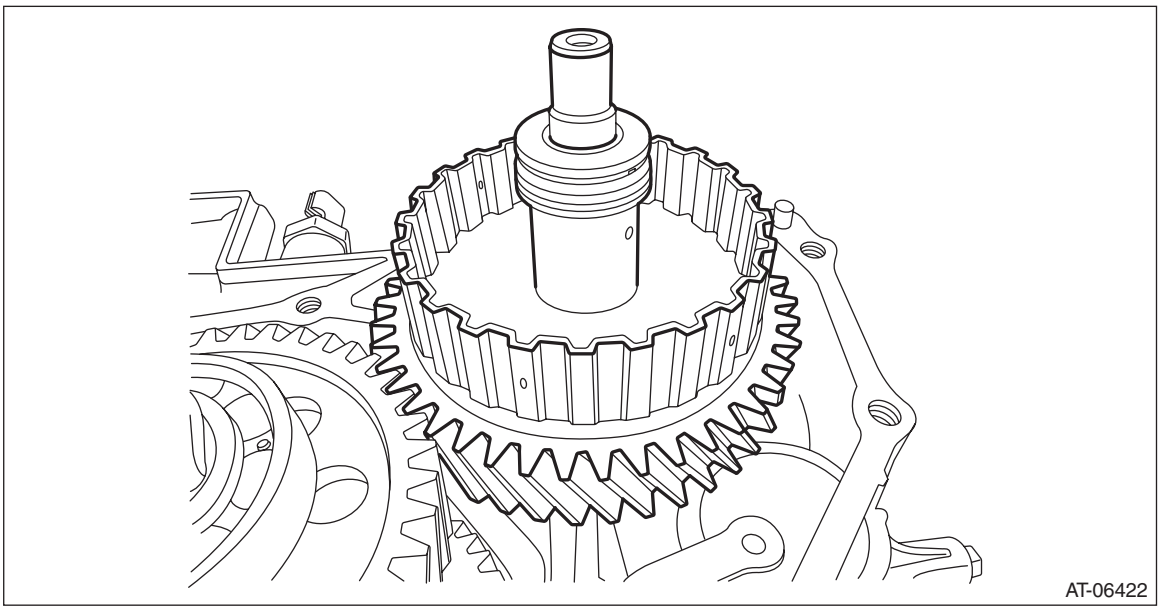


5) Remove the seal ring from the transfer driven gear assembly.



## B: INSTALLATION

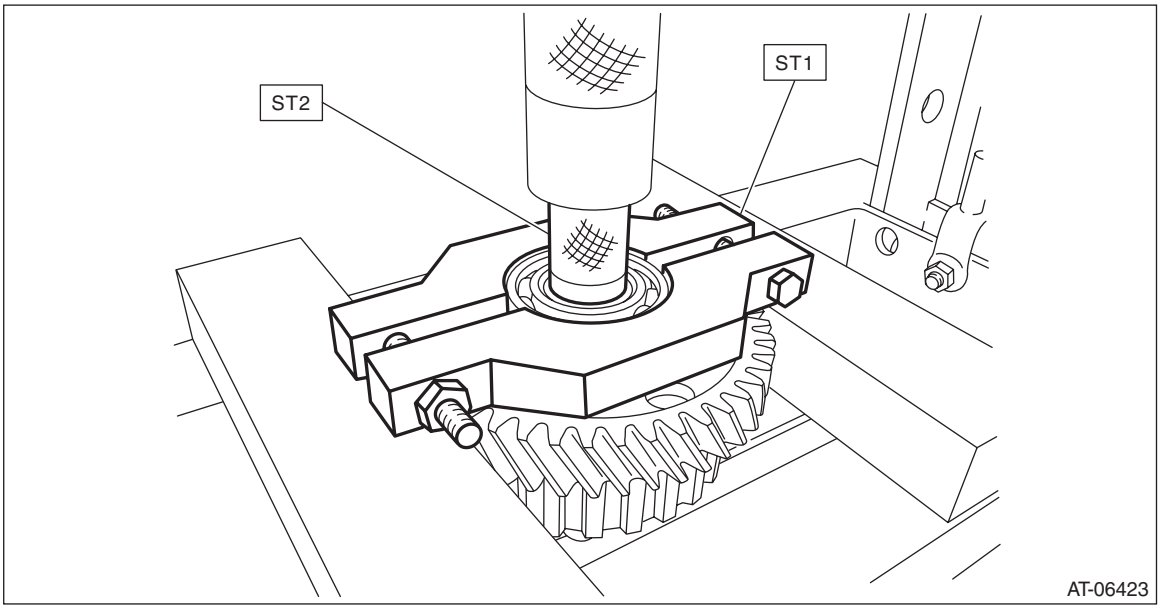
1) Install the transfer driven gear assembly.



2) Install the transfer clutch assembly. <Ref. to CVT-162, INSTALLATION, Transfer Clutch.>
3) Select the transfer driven gear shim. <Ref. to CVT-172, ADJUSTMENT, Transfer Clutch.>
4) Install the extension case. <Ref. to CVT-157, INSTALLATION, Extension Case.>
5) Install the transmission assembly to the vehicle. <Ref. to CVT-67, INSTALLATION, Automatic Transmission Assembly.>

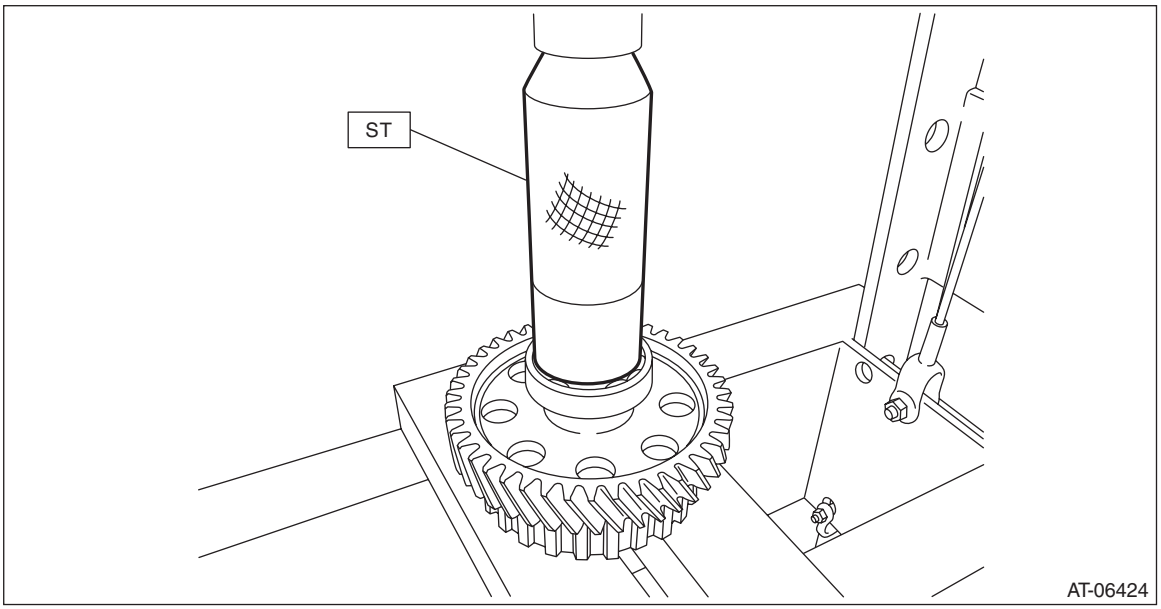
## C: DISASSEMBLY

1) Remove the ball bearing using ST.
ST1 498077400 BEARING REMOVER
ST2 899864100 REMOVER



## D: ASSEMBLY

1) Using the ST, install the ball bearing.
ST 899580100 INSTALLER



## E: INSPECTION

- Check the ball bearing for smooth rotation.
- Check the ball bearing for excessive looseness.
- Check the transfer driven gear for breakage or damage.

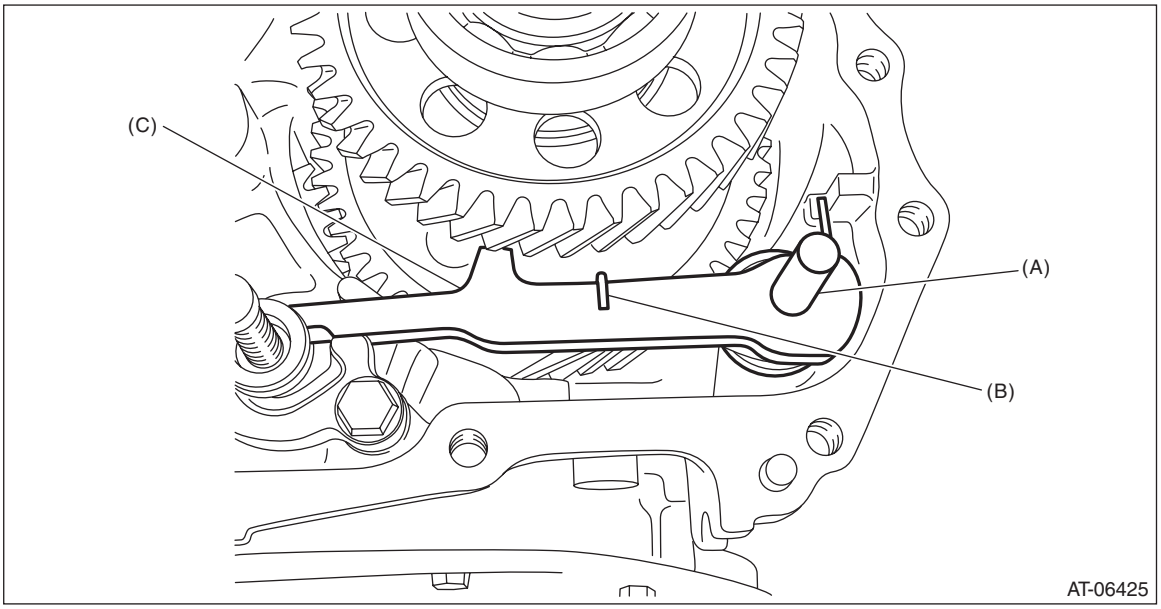
## F: ADJUSTMENT

NOTE:
When the transfer driven gear or bearing is replaced, select the transfer driven gear shim. <Ref. to CVT-172, ADJUSTMENT, Transfer Clutch.>

# 31.Parking Pawl

## A: REMOVAL

1) Remove the transmission assembly from the vehicle. <Ref. to CVT-56, REMOVAL, Automatic Transmission Assembly.>
2) Shift the range select lever to “N” range.
3) Remove the extension case. <Ref. to CVT-156, REMOVAL, Extension Case.>
4) Remove the parking pawl shaft, return spring and parking pawl.

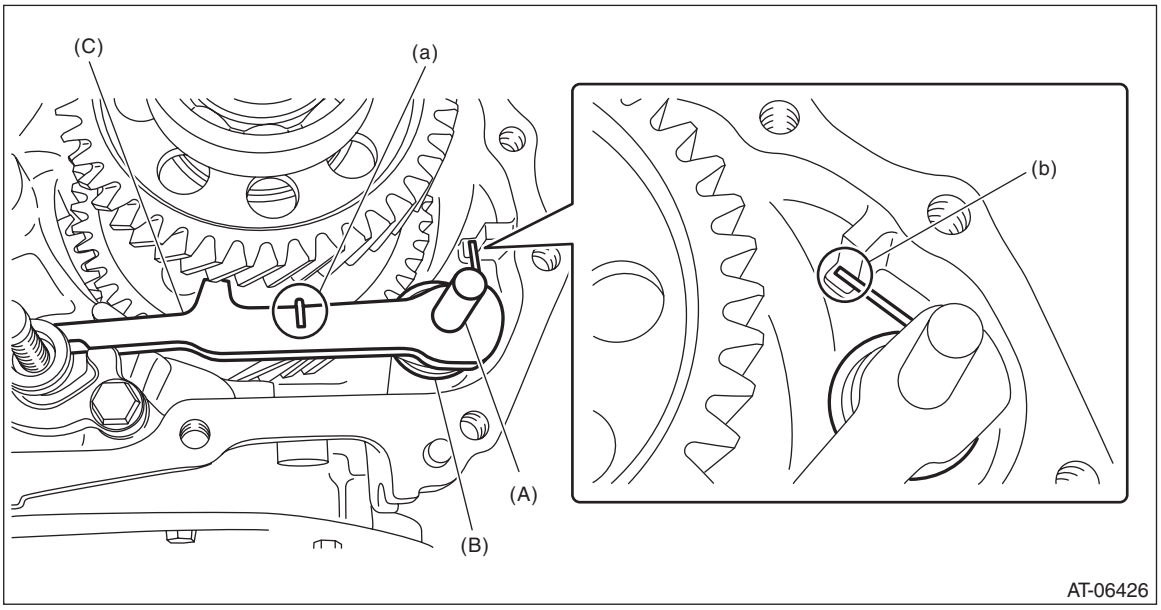


(A) Parking pawl shaft
(B) Return spring
(C) Parking pawl

## B: INSTALLATION

1) Set the range select lever to the “N” range.
2) Install the parking pawl shaft, return spring and parking pawl.

NOTE:
Make sure that the end of return spring sticks out of parking pawl as shown in (a). Make sure that the other end contacts the rib of transmission case as shown in (b).



(A) Parking pawl shaft
(B) Return spring
(C) Parking pawl

3) Install the extension case. <Ref. to CVT-157, INSTALLATION, Extension Case.>
4) Install the transmission assembly to the vehicle. <Ref. to CVT-67, INSTALLATION, Automatic Transmission Assembly.>

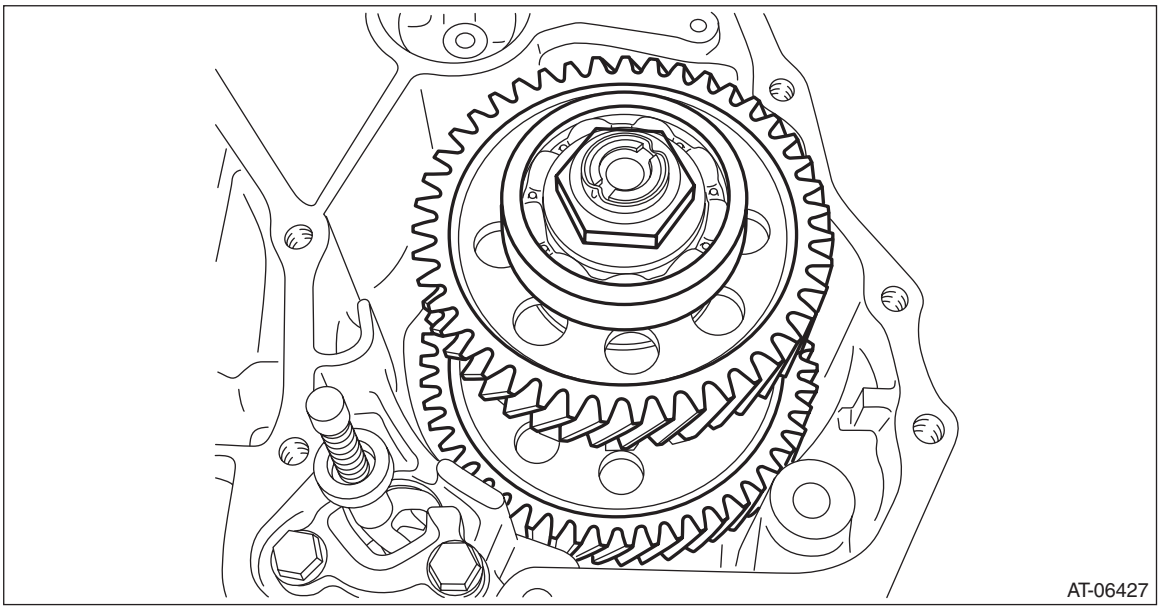
## C: INSPECTION

- Check the parking pawl for breakage or damage.
- Check for worn, broken and/or damaged return spring.

# 32.Reduction Driven Gear

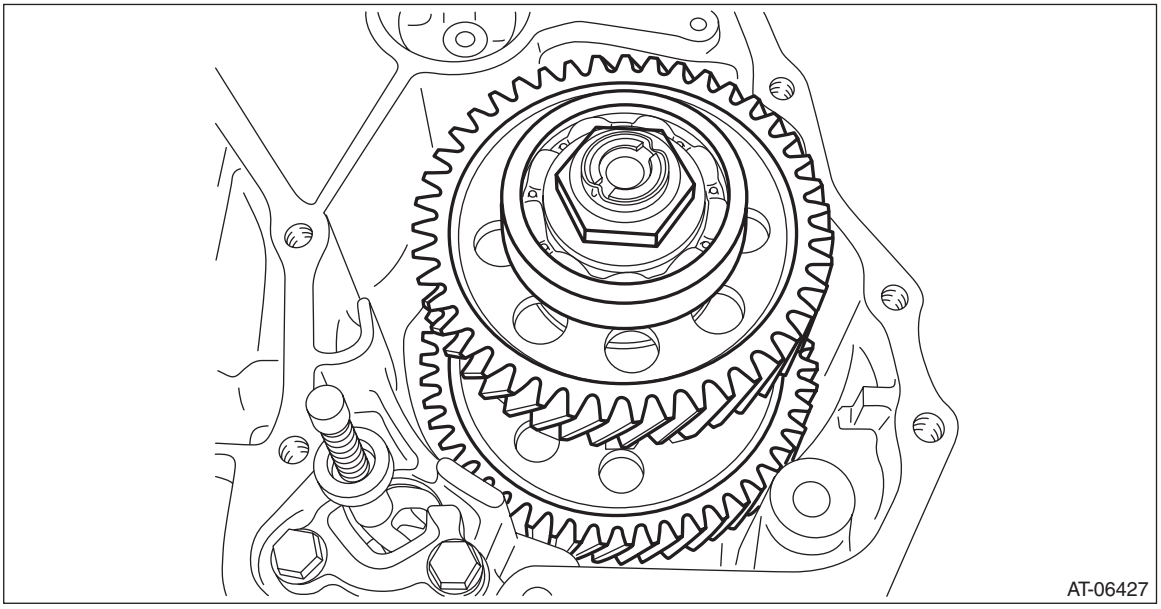
## A: REMOVAL

1) Remove the transmission assembly from the vehicle. <Ref. to CVT-56, REMOVAL, Automatic Transmission Assembly.>
2) Remove the extension case. <Ref. to CVT-156, REMOVAL, Extension Case.>
3) Remove the transfer clutch assembly. <Ref. to CVT-160, REMOVAL, Transfer Clutch.>
4) Remove the transfer driven gear assembly. <Ref. to CVT-174, REMOVAL, Transfer Driven Gear.>
5) Remove the parking pawl. <Ref. to CVT-177, REMOVAL, Parking Pawl.>
6) Remove the reduction driven gear assembly.



## B: INSTALLATION

1) Install the reduction driven gear assembly.

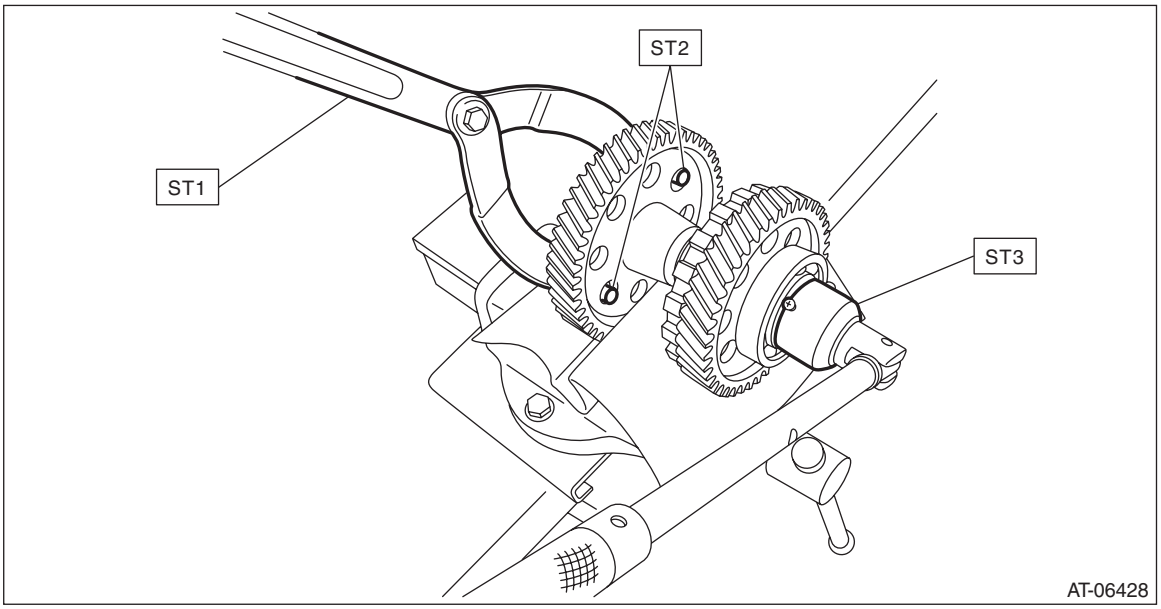


2) Select the transfer drive gear shim. <Ref. to CVT-208, ADJUSTMENT, Reduction Drive Gear.>
3) Install the parking pawl. <Ref. to CVT-178, INSTALLATION, Parking Pawl.>
4) Attach the selected transfer drive gear shim to extension case with vaseline.
5) Install the transfer driven gear assembly. <Ref. to CVT-175, INSTALLATION, Transfer Driven Gear.>
6) Install the transfer clutch assembly. <Ref. to CVT-162, INSTALLATION, Transfer Clutch.>

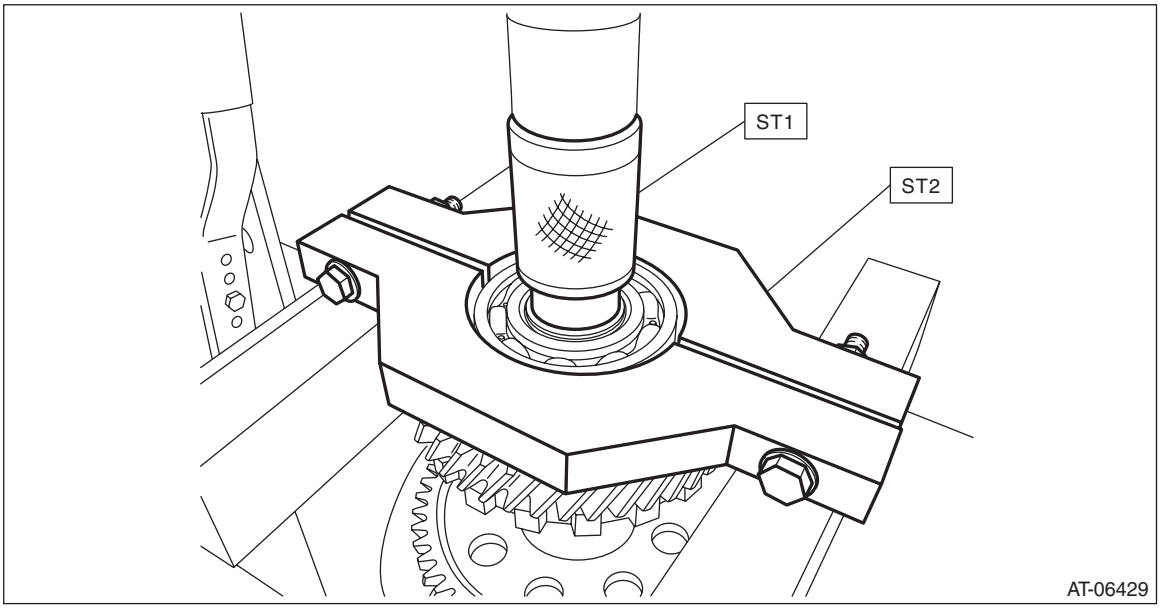
7) Install the extension case. <Ref. to CVT-157, INSTALLATION, Extension Case.>
8) Install the transmission assembly to the vehicle. <Ref. to CVT-67, INSTALLATION, Automatic Transmission Assembly.>

## C: DISASSEMBLY

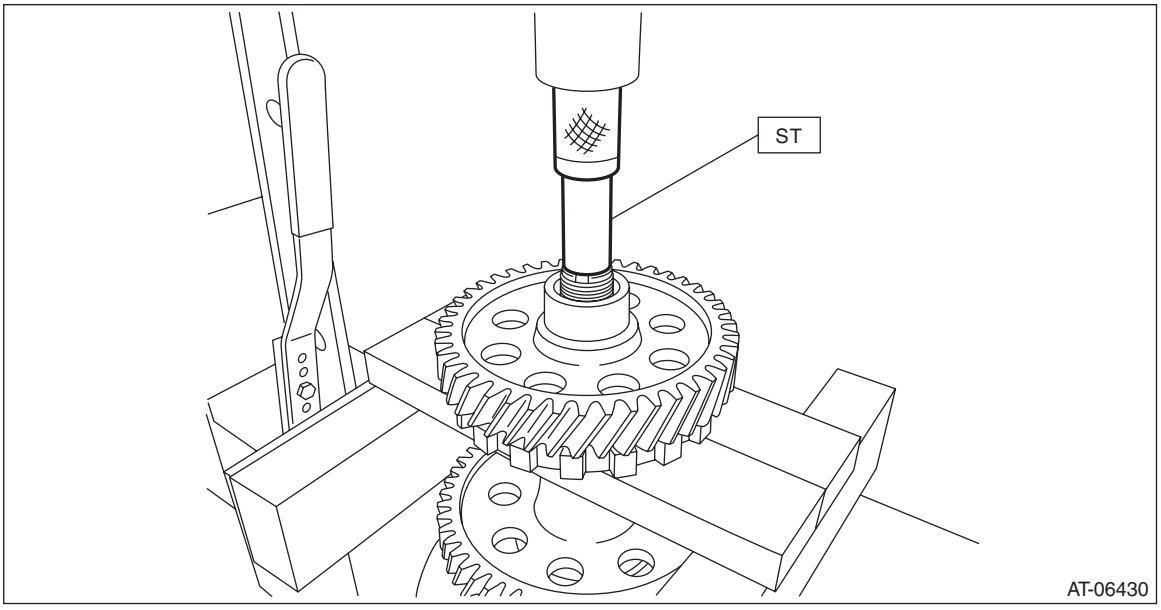
1) Flatten the tab of the lock nut.
2) Using the ST, counter the rotation of the reduction driven gear assembly, and remove the lock nut.
ST1 18355AA000 PULLEY WRENCH
ST2 18334AA000 PIN SET
ST3 499987003 SOCKET WRENCH (35)



3) Remove the ball bearing using ST.
ST1 499757002 INSTALLER
ST2 498077300 REMOVER

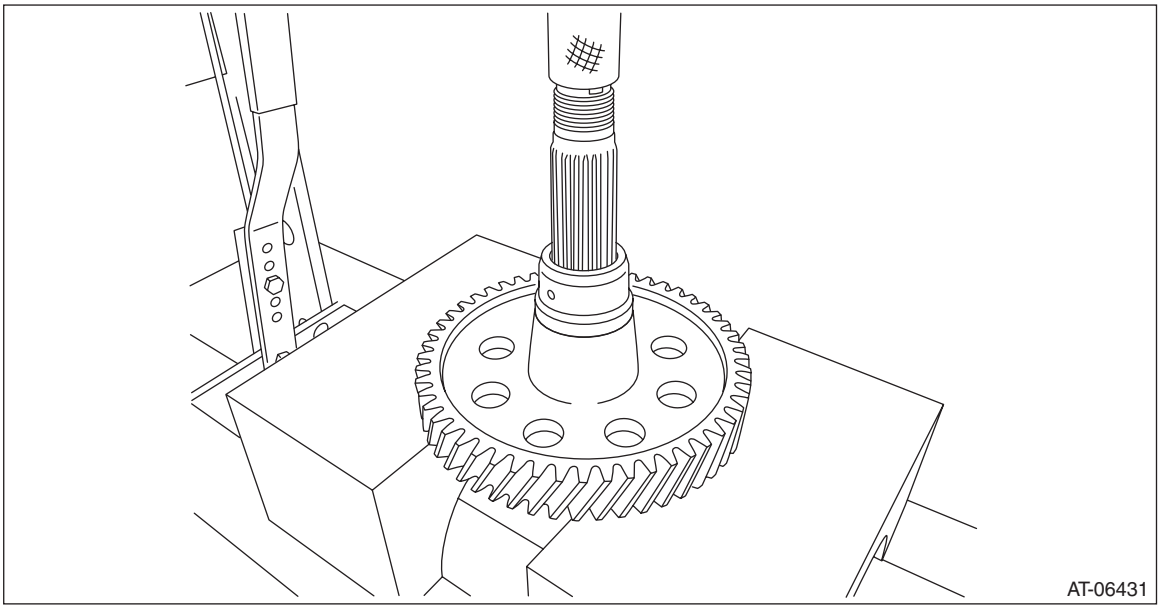


4) Using the ST, remove the parking gear and transfer drive gear.
ST 899864100 REMOVER



5) Remove the collar.

NOTE:
When collar has been removed, do not reuse the reduction driven gear and/or shaft, and replace it with reduction driven gear COMPL.

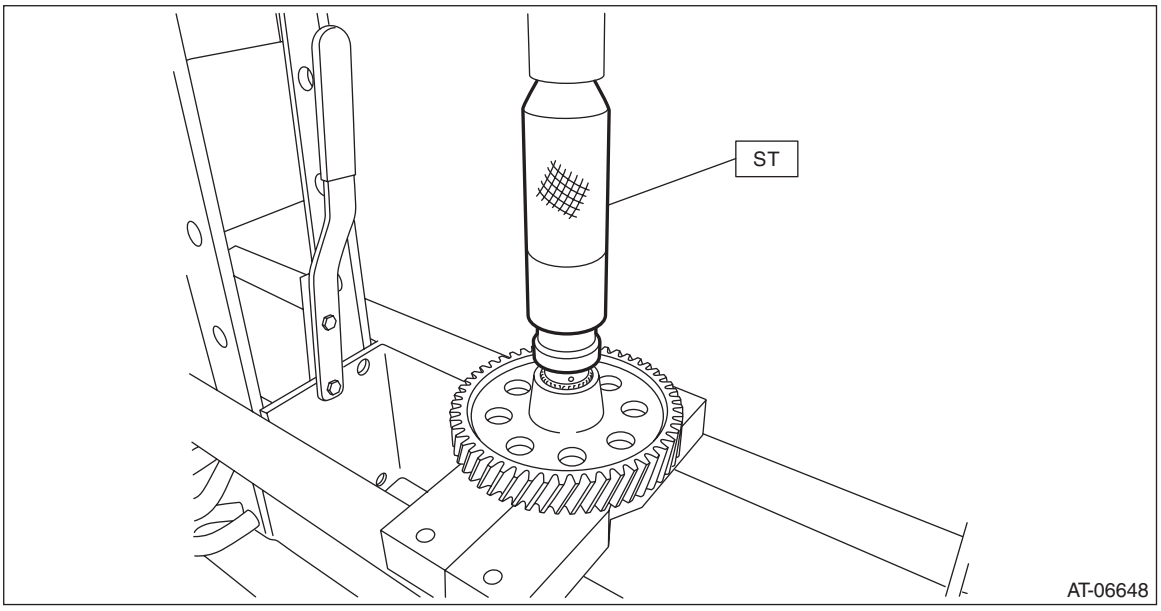


## D: ASSEMBLY

1) Using the ST, attach the collar.

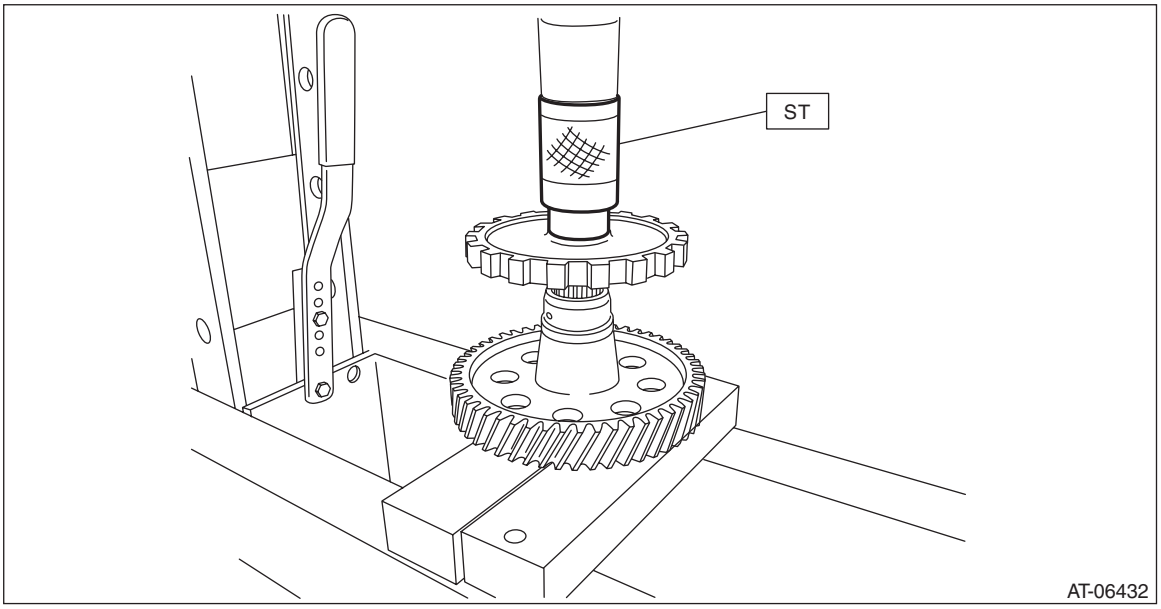
NOTE:
- Attach the collar in the correct direction.
- Use a new reduction driven gear COMPL.

ST 899580100 INSTALLER

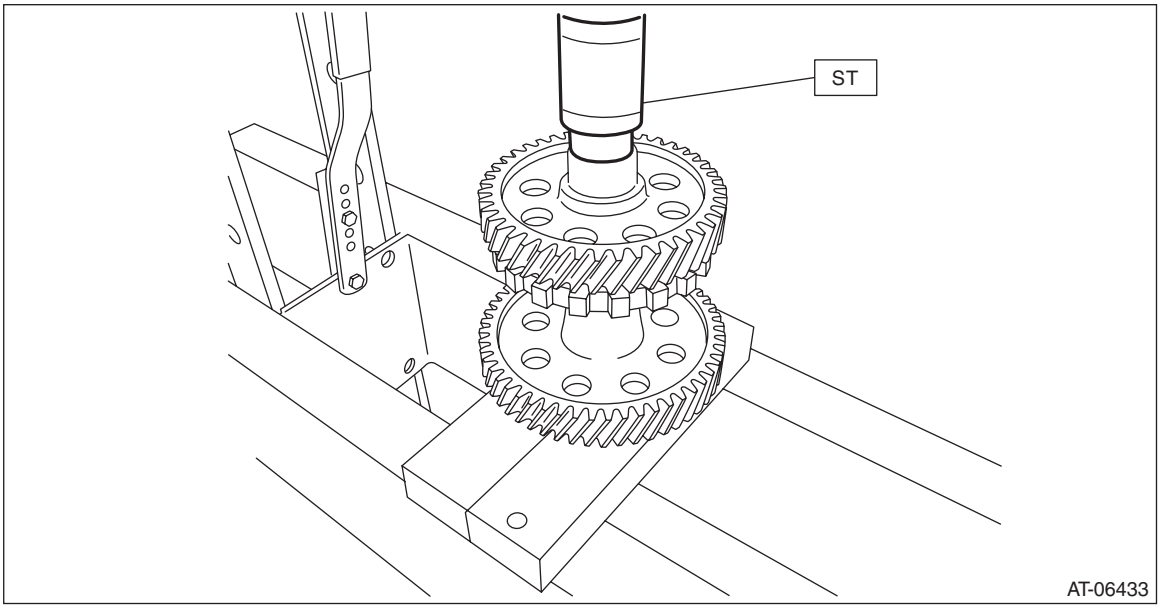


2) Using the ST, install the parking gear.

ST 499757002 INSTALLER

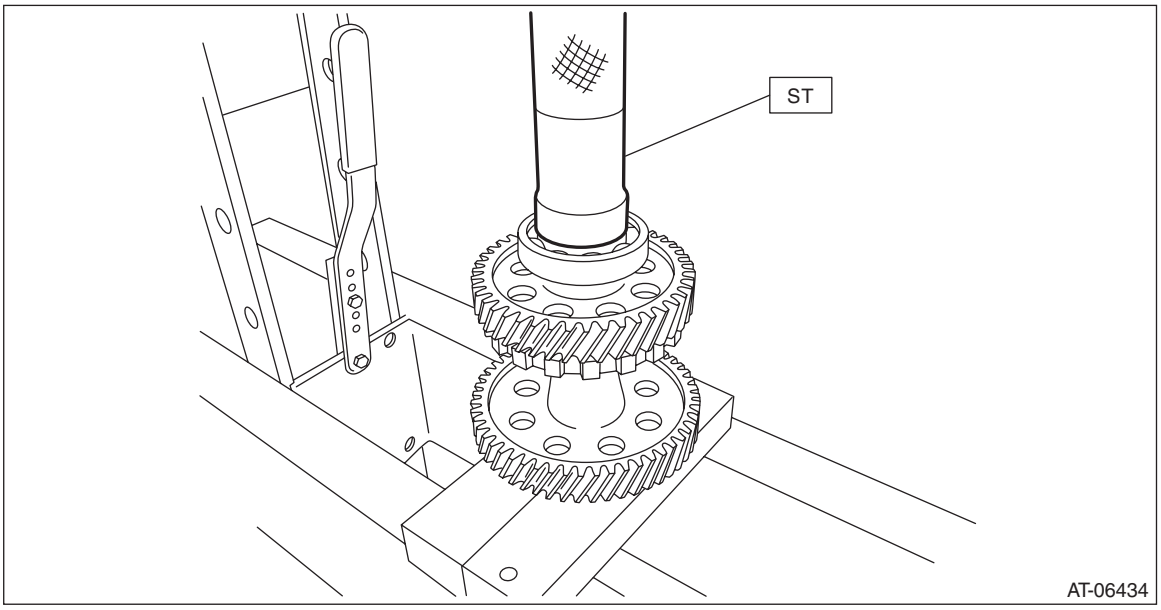


3) Using the ST, install the transfer drive gear.
ST 499757002 INSTALLER



4) Using the ST, install the ball bearing.

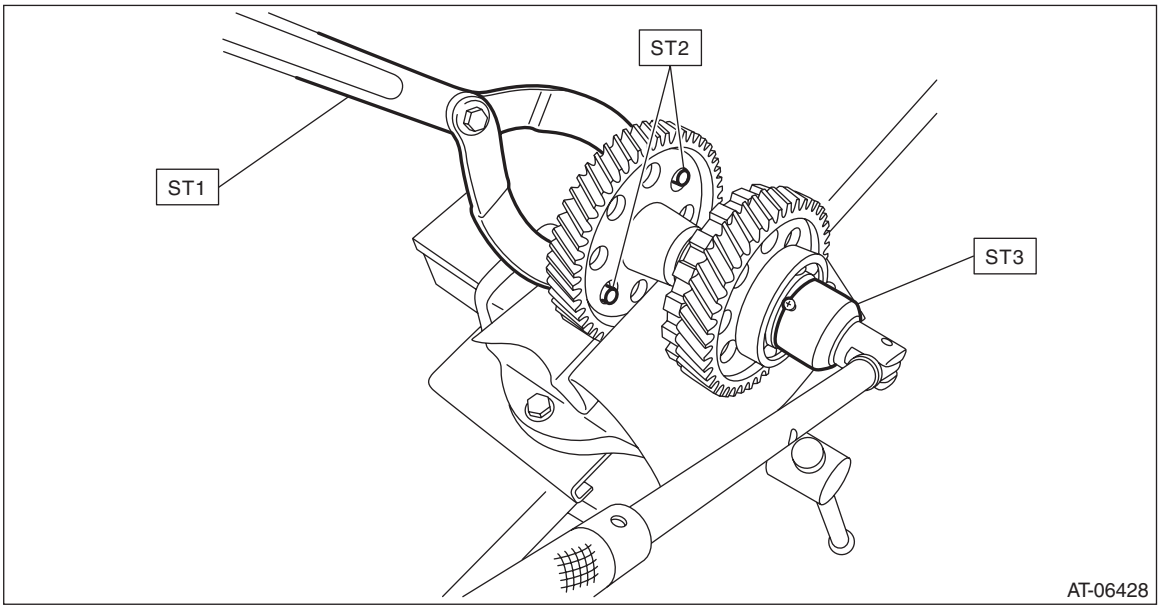
NOTE:
Use a new ball bearing.
ST 499277100 BUSHING 1-2 INSTALLER



5) Using the ST, counter the rotation of the reduction drive gear assembly, and install the lock nut.

NOTE:
Use a new lock nut.
ST1 18355AA000 PULLEY WRENCH
ST2 18334AA000 PIN SET
ST3 499987003 SOCKET WRENCH (35)

***Tightening torque:***
***95 N·m (9.7 kgf-m, 70.1 ft-lb)***



6) Crimp the lock nut in 4 locations.

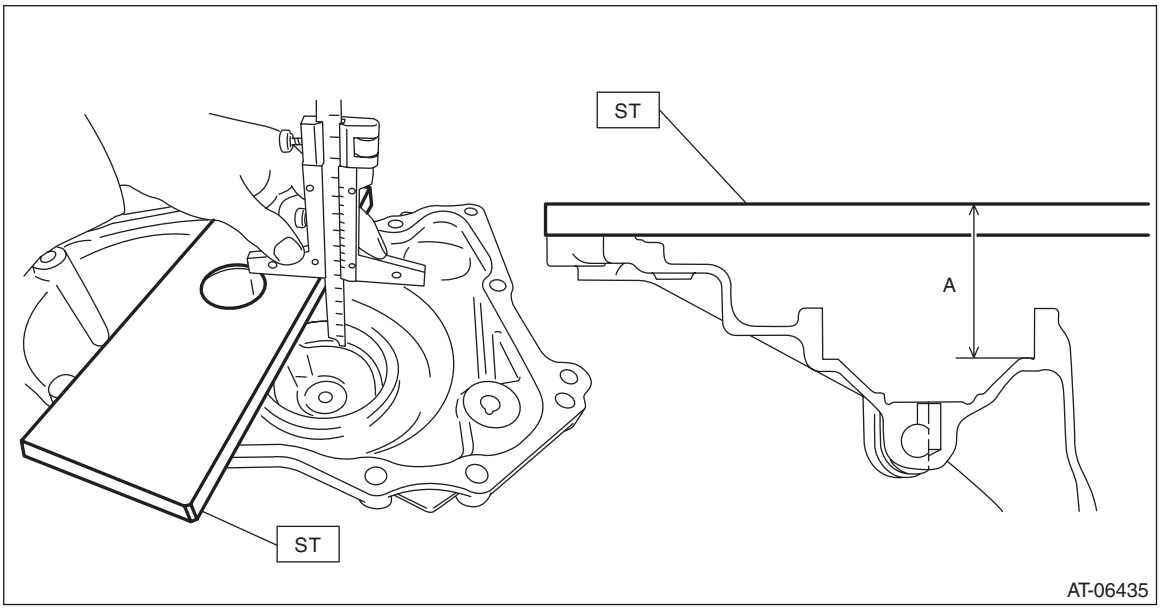
**CAUTION:**
**Do not allow the lock nut to be cracked during crimping operation.**

## E: INSPECTION

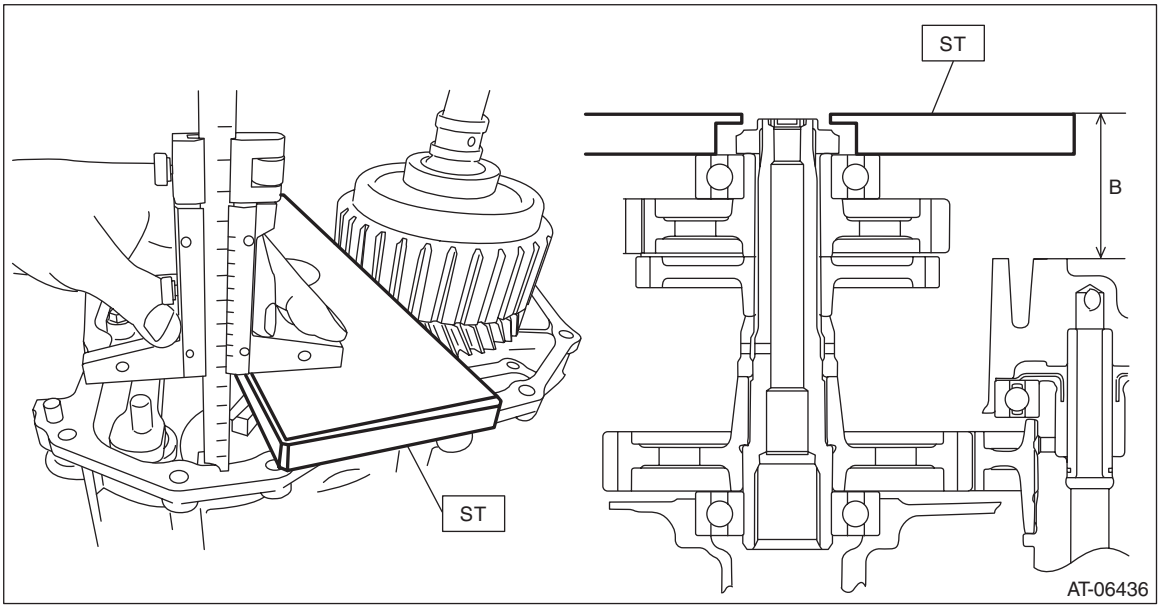
- Check the ball bearing for smooth rotation.
- Check the ball bearing for excessive looseness.
- Make sure each gear is not broken or damaged.

## F: ADJUSTMENT

1) Measure the height “A” from the ST upper face to the ball bearing catch surface.
ST 499575600 GAUGE



2) Measure the height “B” from the ST to the mating surface of the transmission case.
ST 499575600 GAUGE



3) Obtain the thickness of transfer drive gear shim using the following formula to select one to three transfer drive gear shims.
T (mm) = A – B – (0.05 — 0.25)
[T (in) = A – B – (0.002 — 0.01)]
T: Shim thickness
A: Height from the ST upper face to the ball bearing catch surface
B: Height from ST to transmission case mating surface
0.05 — 0.25 mm (0.002 — 0.01 in): Clearance

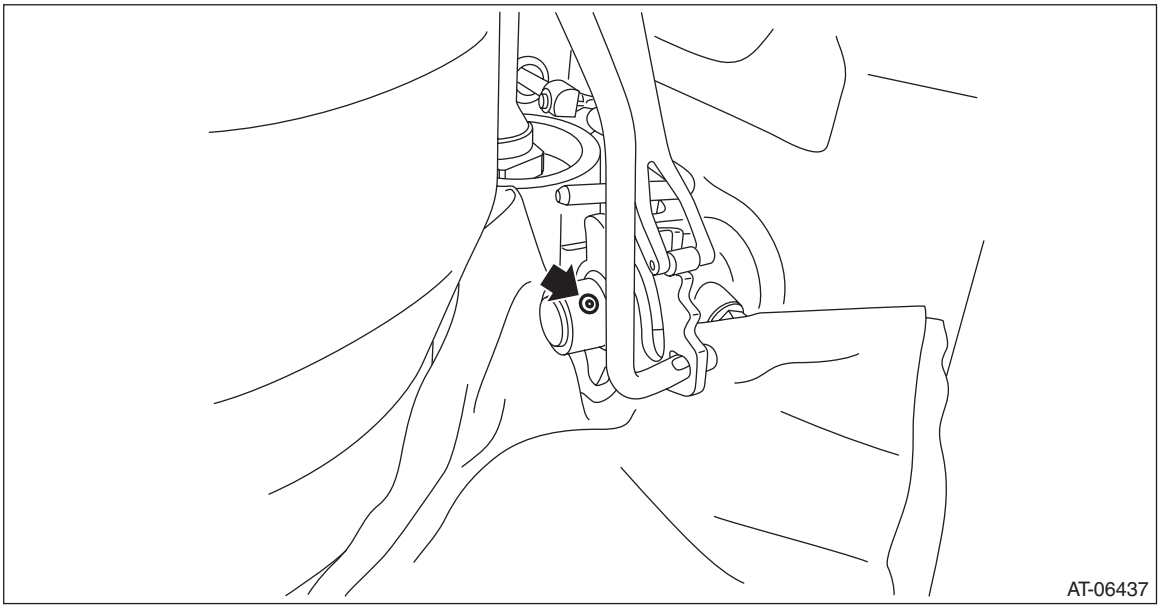
| Transfer drive gear shim | |
|---|---|
| Part No. | Thickness mm (in) |
| 33279AA090 | 0.3 (0.012) |
| 33279AA100 | 0.4 (0.016) |
| 33279AA110 | 0.5 (0.020) |

# 33.Transmission Control Device

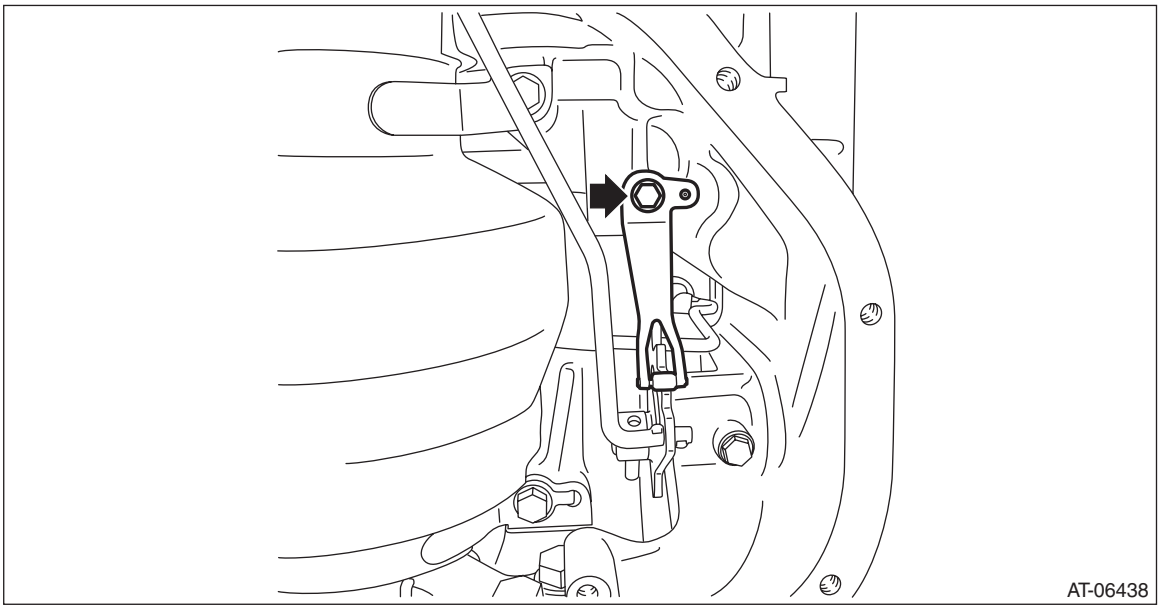
## A: REMOVAL

1) Remove the transmission assembly from the vehicle. <Ref. to CVT-56, REMOVAL, Automatic Transmission Assembly.>
2) Remove the inhibitor switch. <Ref. to CVT-93, REMOVAL, Inhibitor Switch.>
3) Remove the oil pan and oil strainer. <Ref. to CVT-106, REMOVAL, Oil Pan and Strainer.>
4) Shift the manual plate to “N” range, and remove the spring pin.

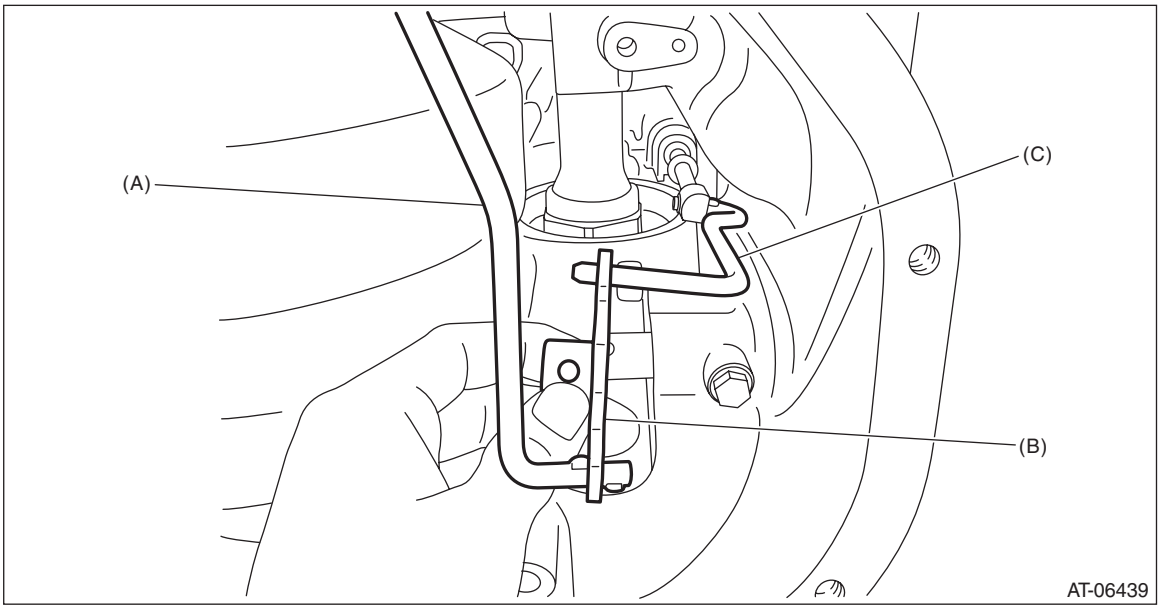
NOTE:
Prevent the spring pin from dropping in the transmission using paper towel etc.



5) Remove the detent spring.



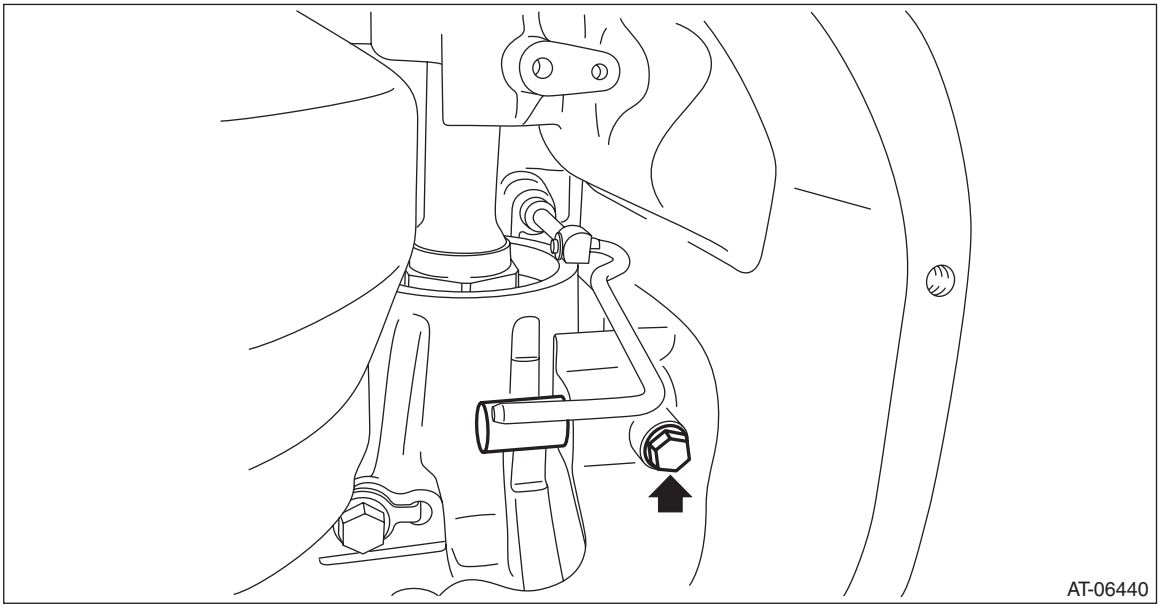
6) Remove the manual plate from the shifter arm shaft, and remove the shift connecting rod of the manual valve.



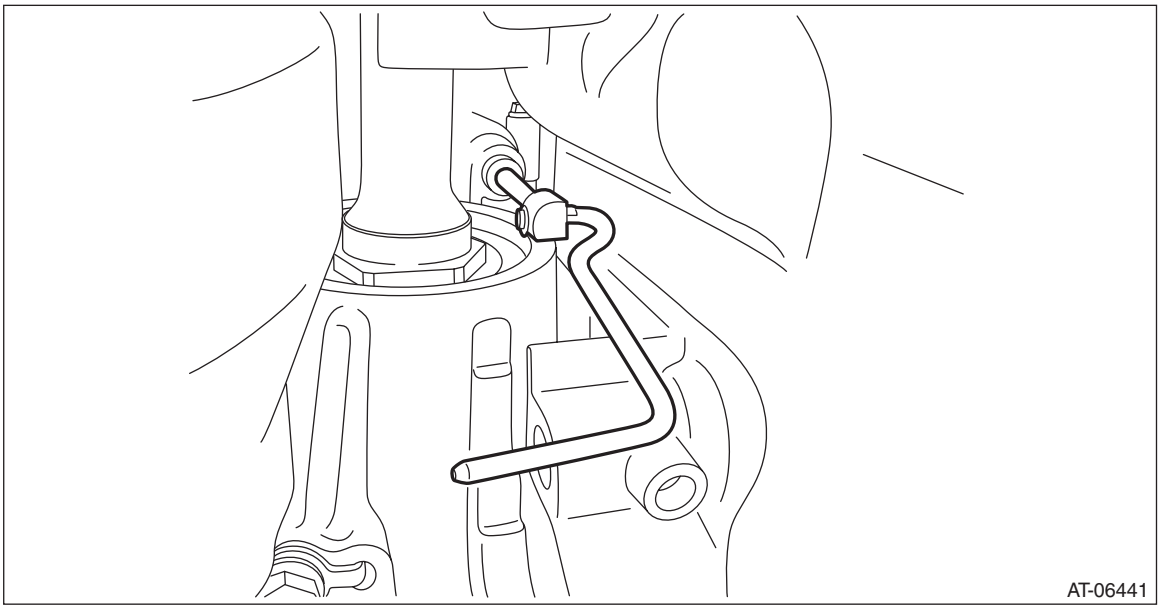
(A) Parking rod
(B) Manual plate
(C) Shift connecting rod

7) Remove the manual plate and parking rod.
8) Remove the bolt, and remove the shifter arm shaft.

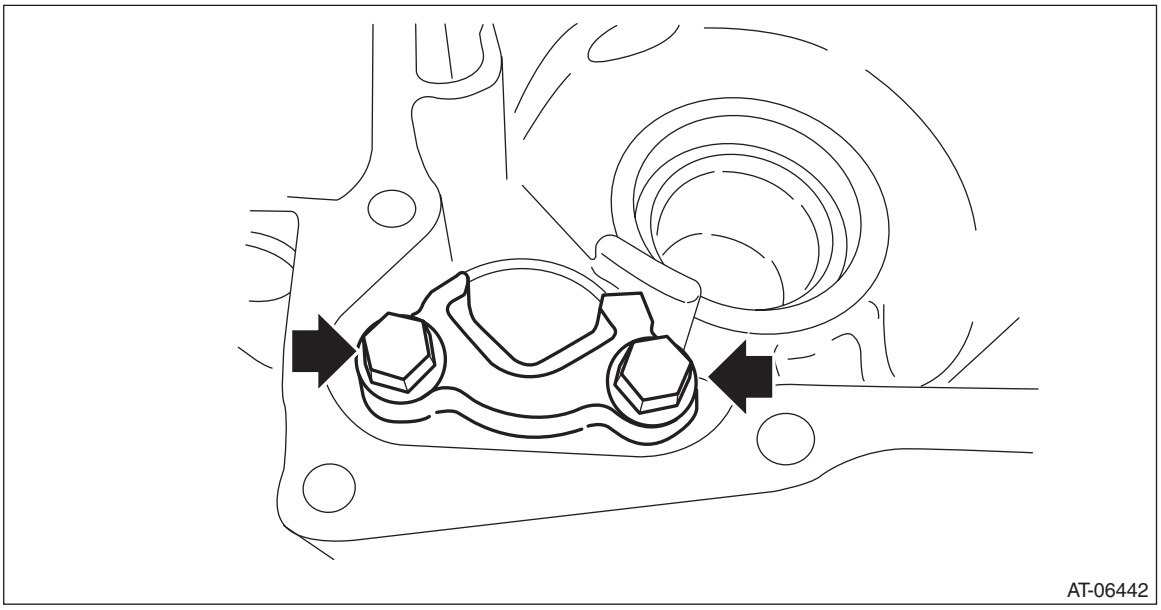
NOTE:
Do not damage the lip of oil seal press-fitted in the case.



9) Remove the manual valve.



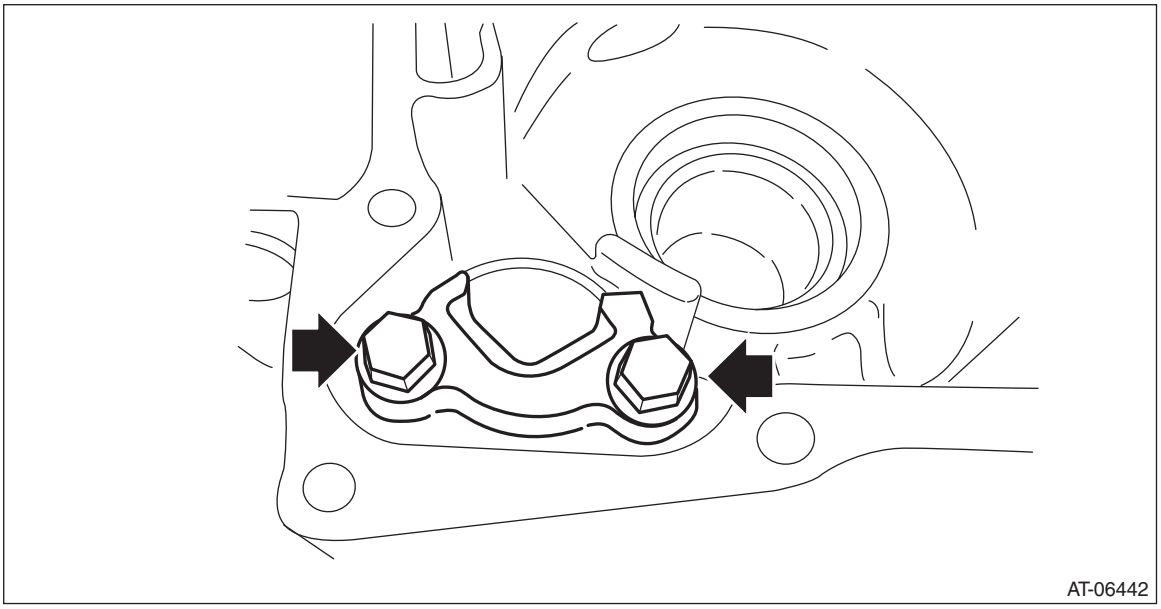
10) Remove the extension case. <Ref. to CVT-156, REMOVAL, Extension Case.>
11) Remove the parking support.



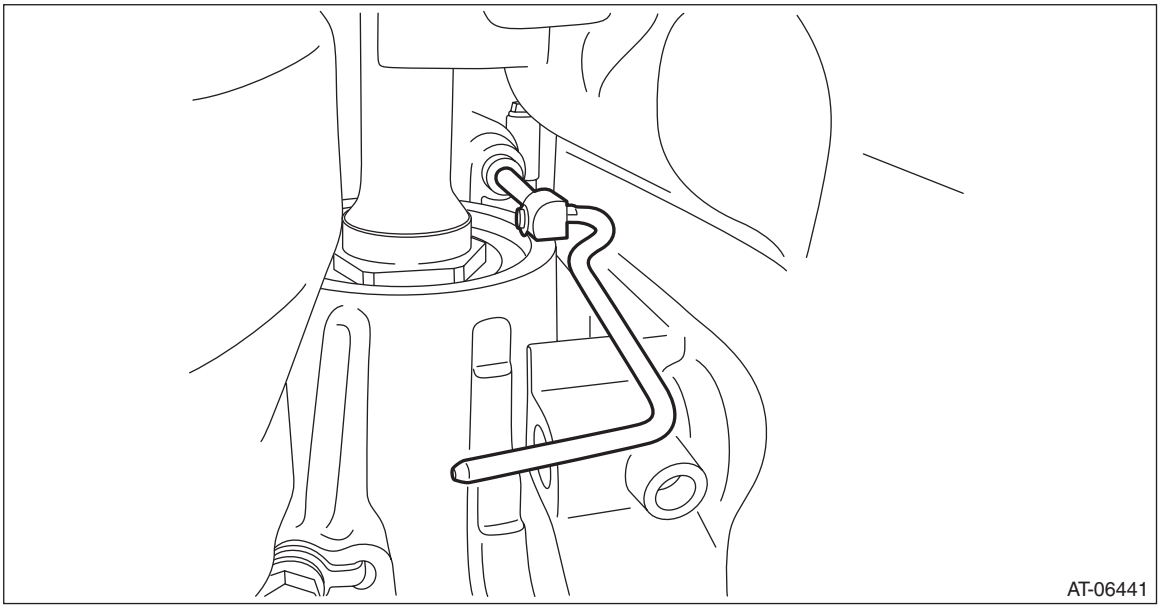
## B: INSTALLATION

1) Install the parking support.

***Tightening torque:***
***25 N·m (2.5 kgf-m, 18.4 ft-lb)***



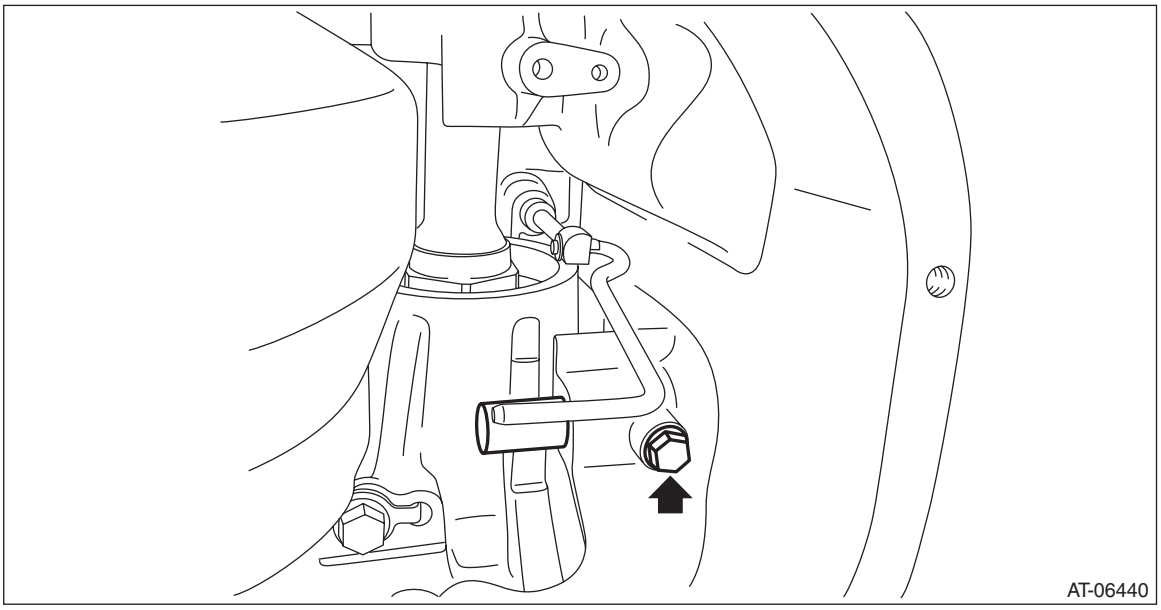
2) Install the extension case. <Ref. to CVT-157, INSTALLATION, Extension Case.>
3) Install the manual valve.



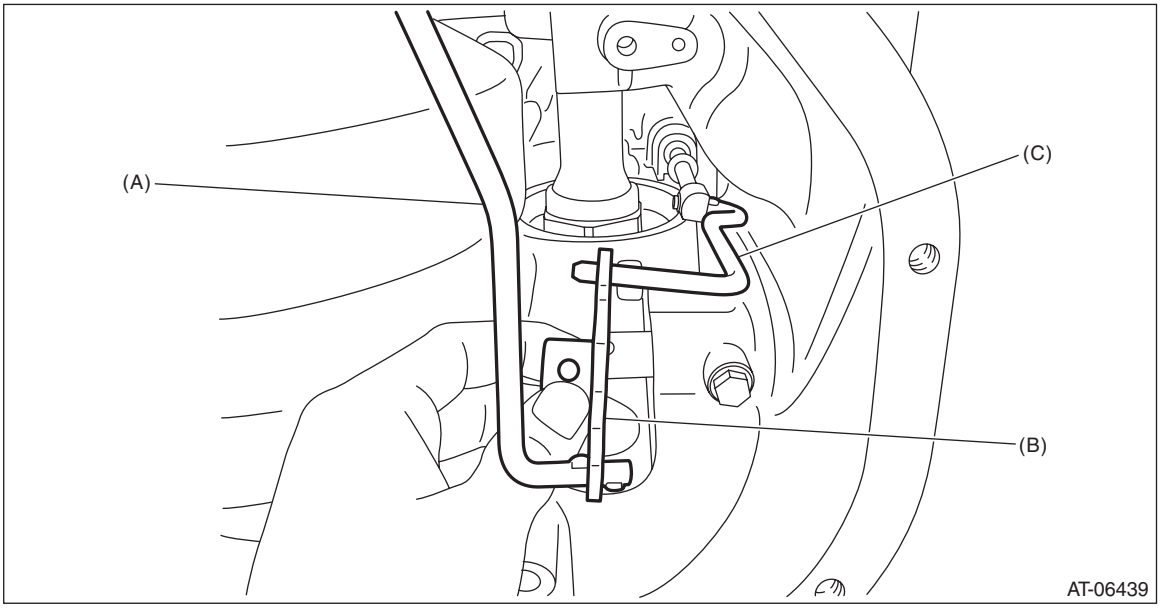
4) Install the shifter arm shaft and bolt.

NOTE:
Do not damage the lip of oil seal press-fitted in the case.

***Tightening torque:***
***7 N·m (0.7 kgf-m, 5.2 ft-lb)***



5) Install the parking rod to the manual plate.
6) Insert the parking rod into the transmission case, and install the shift connecting rod of the manual valve to the manual plate.

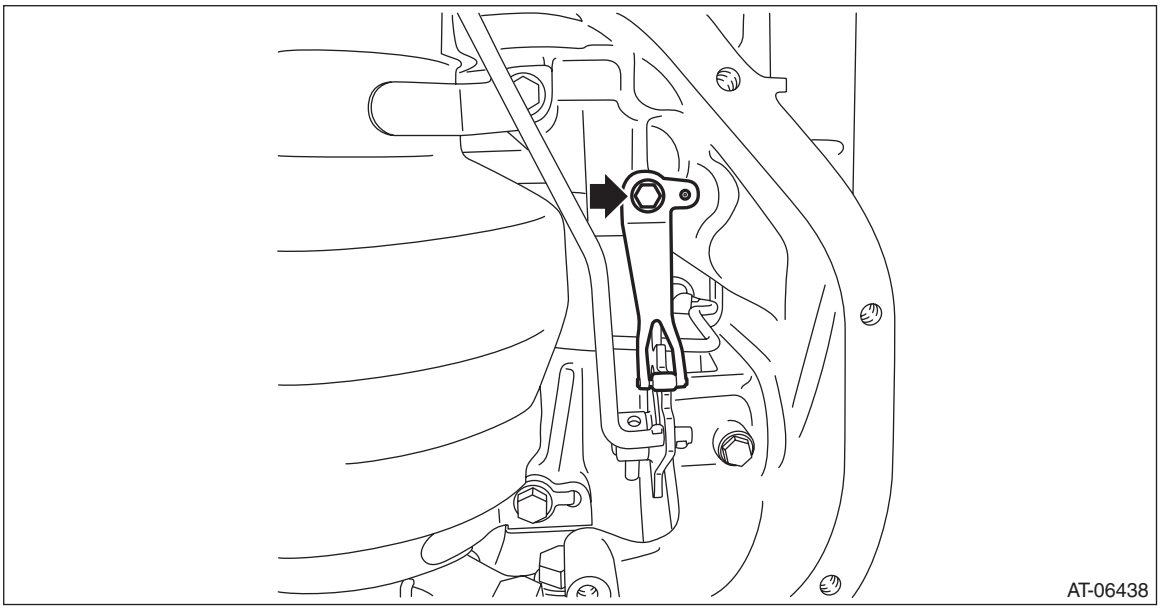


(A) Parking rod
(B) Manual plate
(C) Shift connecting rod

7) Install the manual plate to the shifter arm shaft.

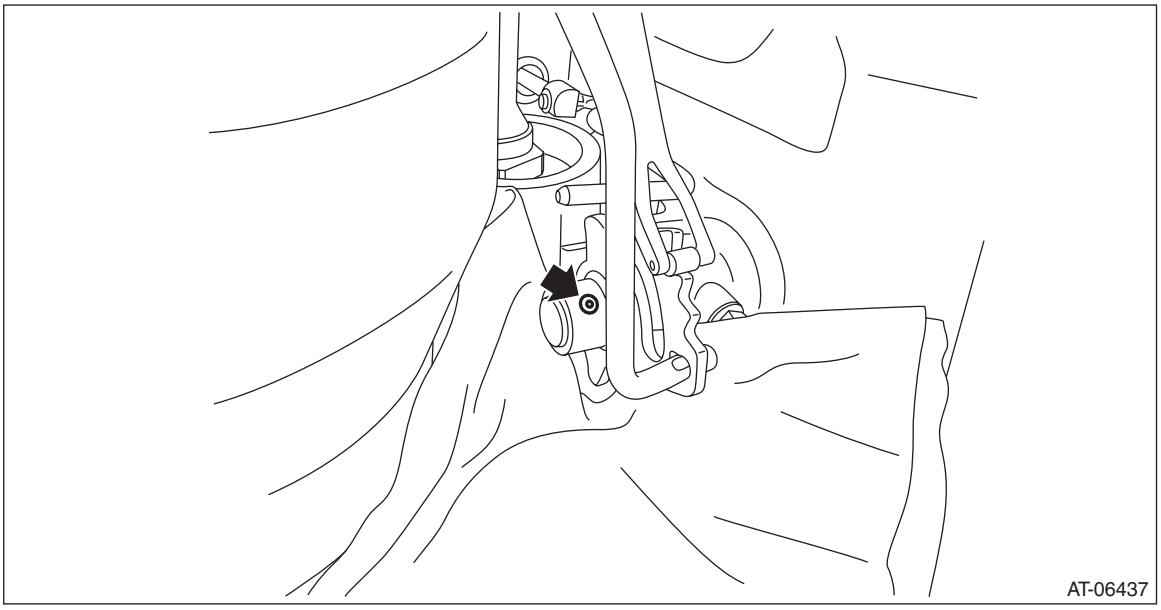
8) Install the detent spring to the transmission case.

***Tightening torque:***
***7 N·m (0.7 kgf-m, 5.2 ft-lb)***



9) Install the spring pin.

NOTE:
Use new spring pin.



10) Install the inhibitor switch. <Ref. to CVT-95, INSTALLATION, Inhibitor Switch.>
11) Adjust the inhibitor switch. <Ref. to CVT-92, ADJUSTMENT, Inhibitor Switch.>
12) Install the oil strainer and oil pan. <Ref. to CVT-107, INSTALLATION, Oil Pan and Strainer.>
13) Install the transmission assembly to the vehicle. <Ref. to CVT-67, INSTALLATION, Automatic Transmission Assembly.>

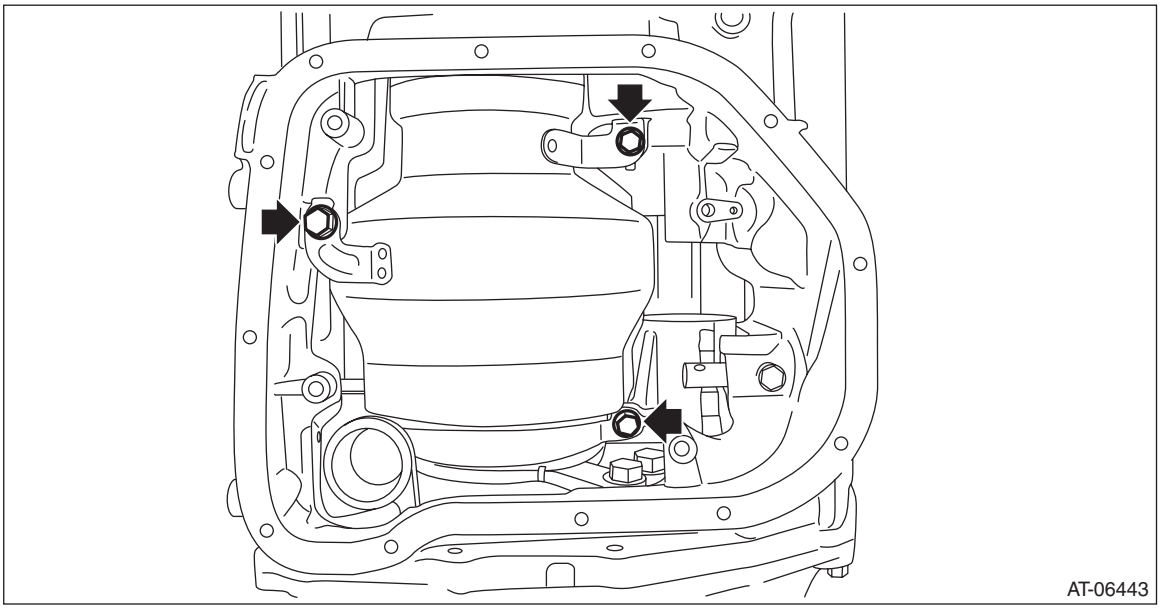
## C: INSPECTION

Make sure that the manual plate and detent spring are not worn or otherwise damaged.

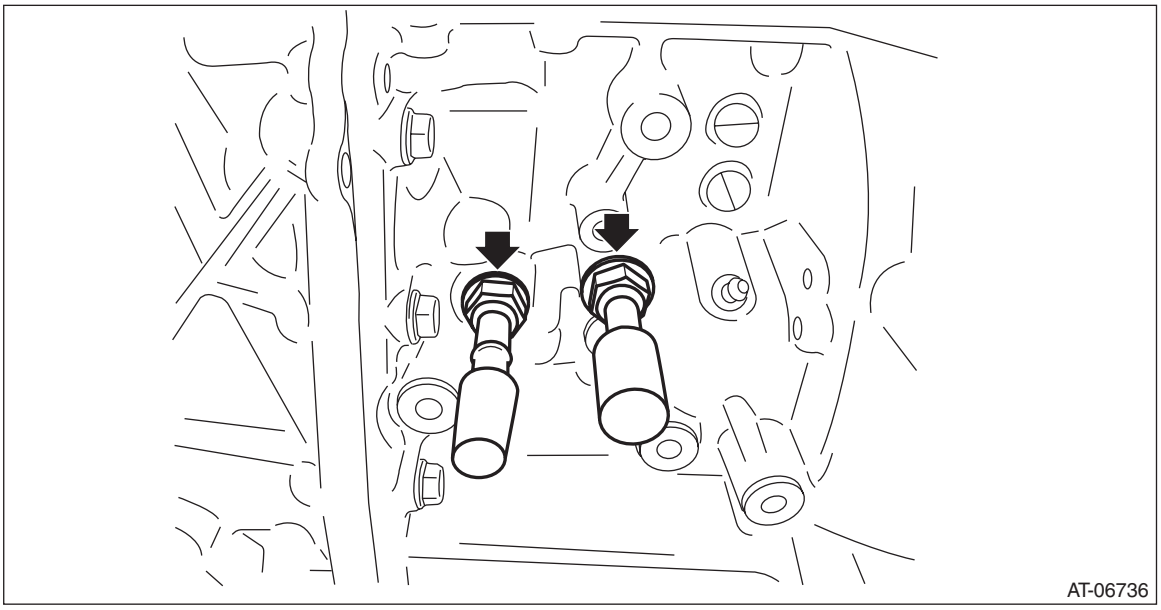
# 34.Transmission Case

## A: REMOVAL

1) Remove the transmission assembly from the vehicle. <Ref. to CVT-56, REMOVAL, Automatic Transmission Assembly.>
2) Remove the air breather hose. <Ref. to CVT-148, REMOVAL, Air Breather Hose.>
3) Remove the control valve body. <Ref. to CVT-110, REMOVAL, Control Valve Body.>
4) Remove the transmission harness. <Ref. to CVT-124, REMOVAL, Transmission Harness.>
5) Remove the turbine speed sensor. <Ref. to CVT-97, REMOVAL, Turbine Speed Sensor.>
6) Remove the secondary speed sensor. <Ref. to CVT-99, REMOVAL, Secondary Speed Sensor.>
7) Remove the primary speed sensor. <Ref. to CVT-101, REMOVAL, Primary Speed Sensor.>
8) Remove the inhibitor switch. <Ref. to CVT-93, REMOVAL, Inhibitor Switch.>
9) Remove the extension case. <Ref. to CVT-156, REMOVAL, Extension Case.>
10) Remove the transfer clutch assembly. <Ref. to CVT-160, REMOVAL, Transfer Clutch.>
11) Remove the transfer driven gear assembly. <Ref. to CVT-174, REMOVAL, Transfer Driven Gear.>
12) Remove the parking pawl. <Ref. to CVT-177, REMOVAL, Parking Pawl.>
13) Remove the reduction driven gear assembly. <Ref. to CVT-179, REMOVAL, Reduction Driven Gear.>
14) Remove the oil pan and oil strainer. <Ref. to CVT-106, REMOVAL, Oil Pan and Strainer.>
15) Remove the transmission control device. <Ref. to CVT-187, REMOVAL, Transmission Control Device.>
16) Remove the oil baffle securing bolt.



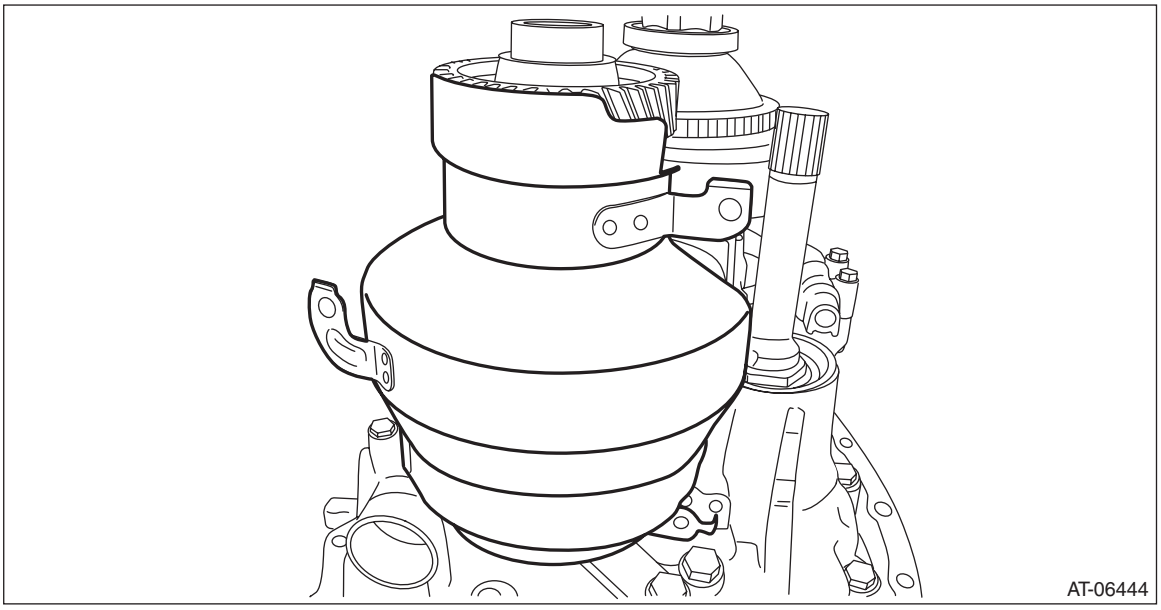
17) Remove the oil cooler pipe.



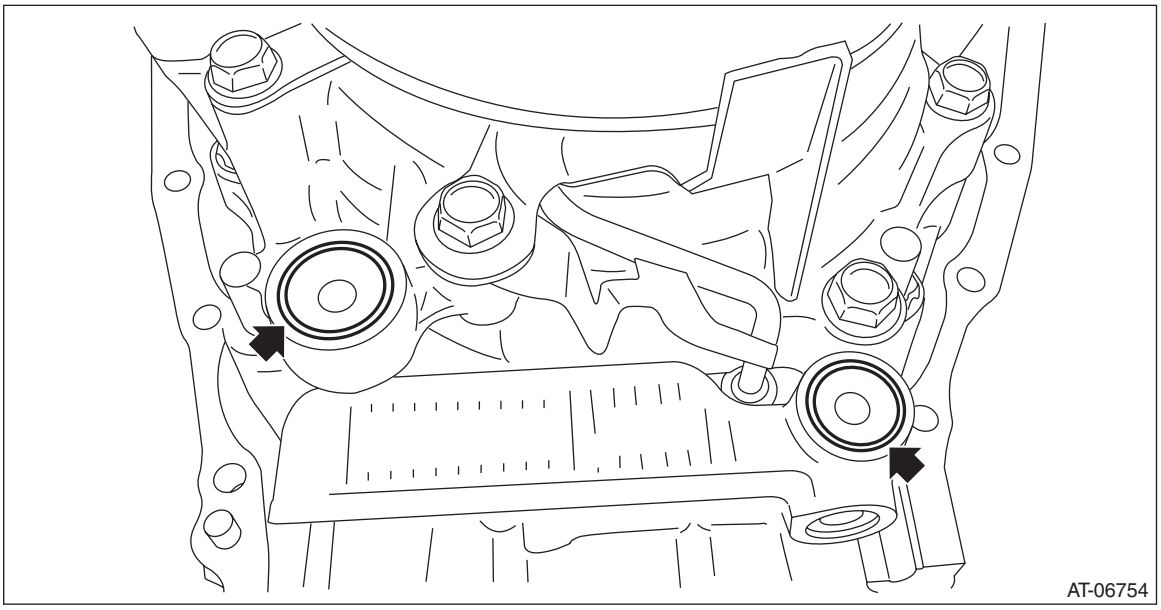
18) Remove the transmission case.

NOTE:
The total number of transmission case mounting bolts is 15.

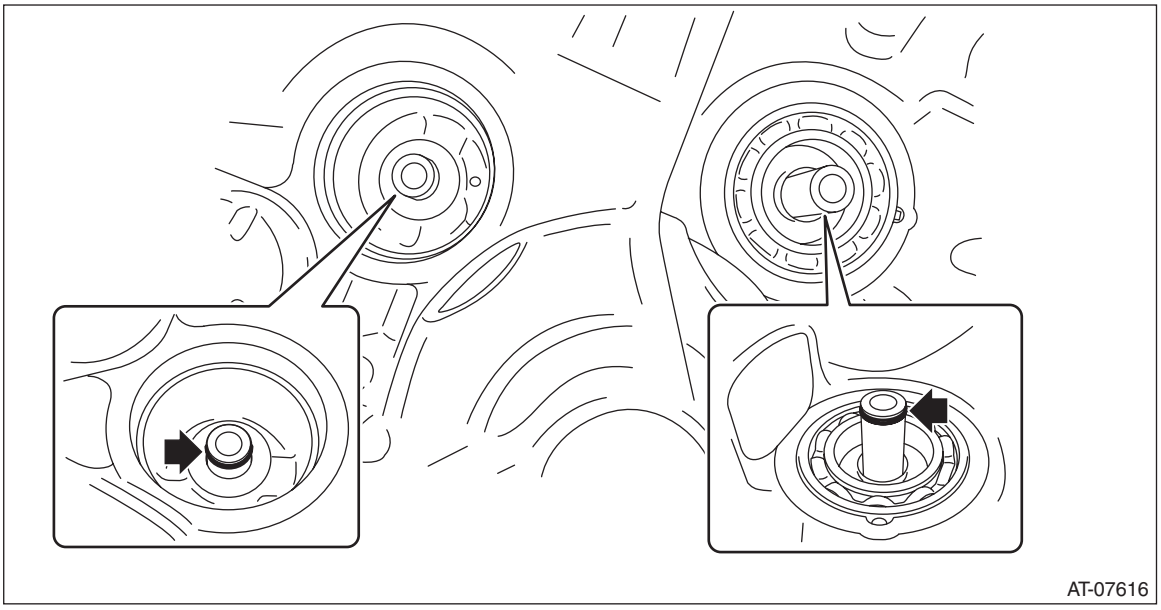
19) Remove the oil baffle.



20) Remove the O-ring.



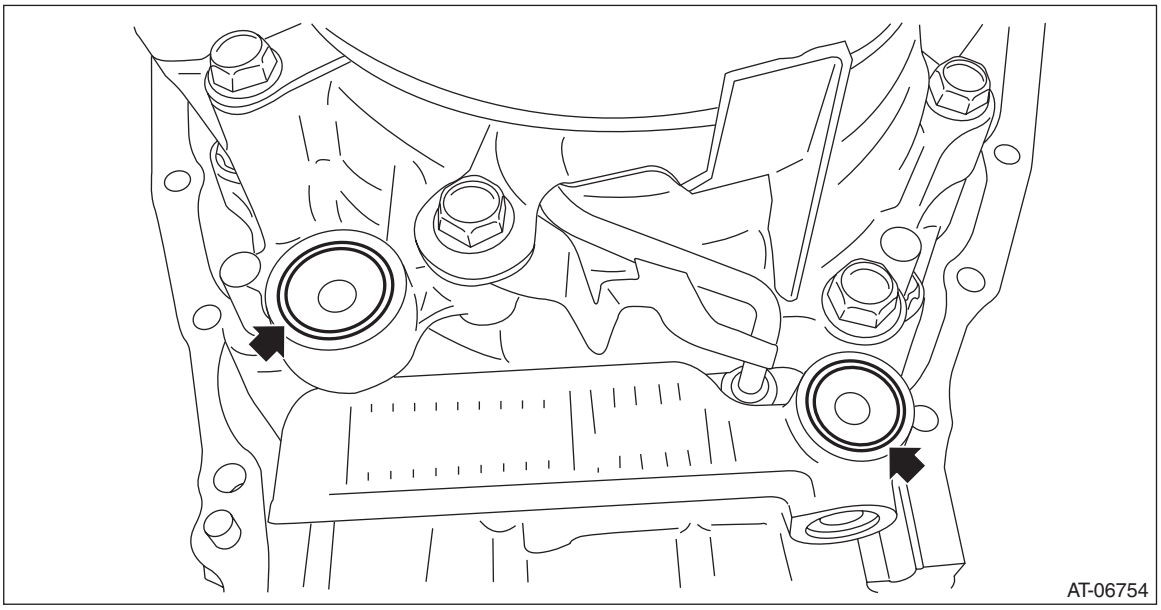
21) Remove the seal ring from the transmission case.



## B: INSTALLATION

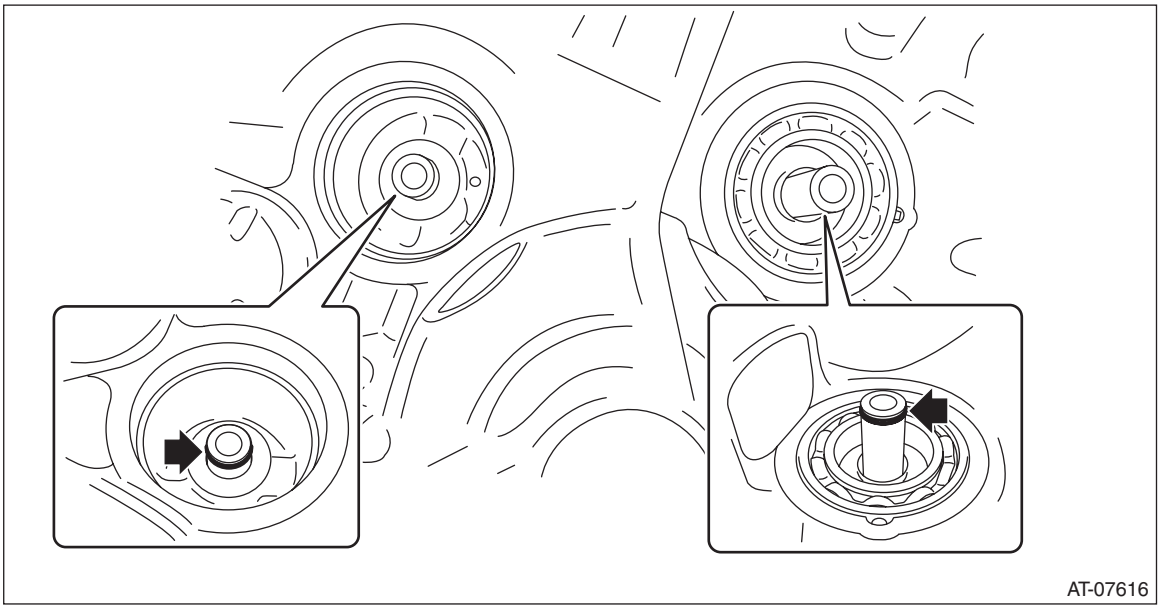
1) Clean the mating surface of transmission case and converter case.
2) Select the reduction gear shim. <Ref. to CVT-208, ADJUSTMENT, Reduction Drive Gear.>
3) Remove the transmission case, and install the selected reduction gear shim to the reduction drive gear.
4) Install the O-rings to the reverse clutch housing and drive pinion retainer.

NOTE:
- Use new O-rings.
- Apply CVTF to the O-ring.

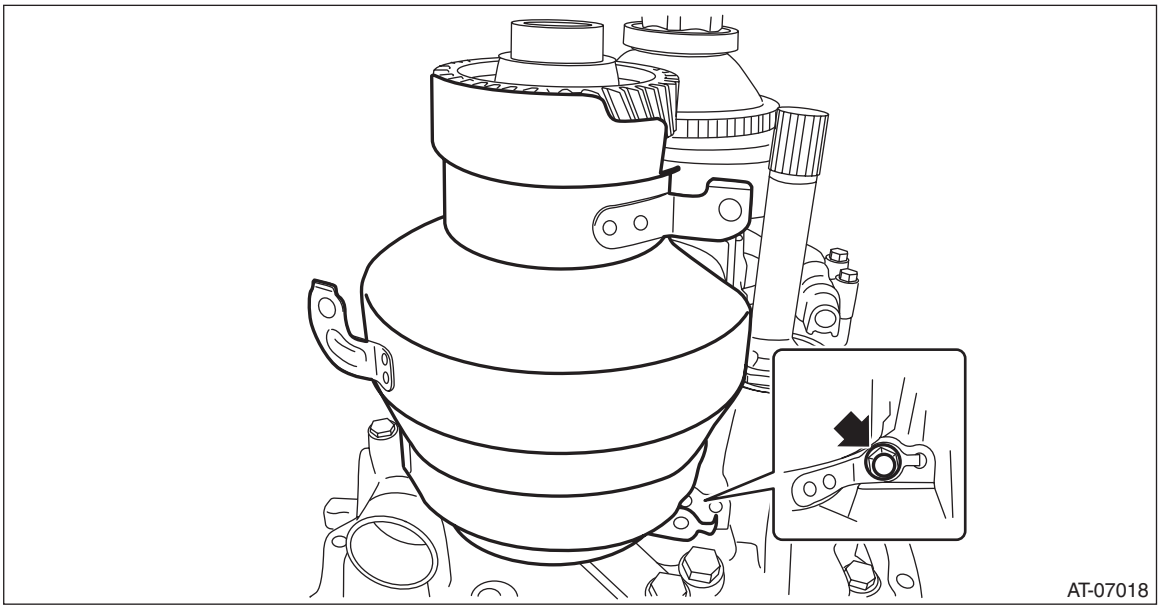


5) Install the seal ring to the transmission case.

NOTE:
- Use a new seal ring.
- Apply CVTF to the seal rings.

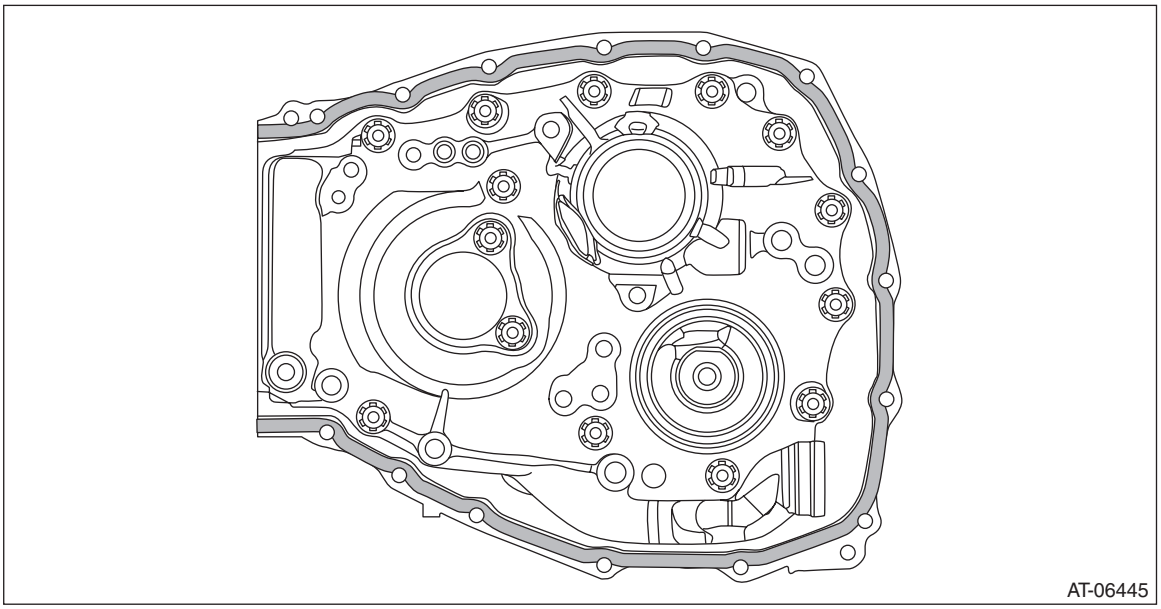


6) Cover the secondary pulley with the oil baffle, and temporarily install it with bolts.



7) Apply liquid gasket seamlessly to the mating surface of transmission case.

***Liquid gasket:***
***THREE BOND 1215 (Part No. 004403007) or equivalent***



8) Install the transmission case.

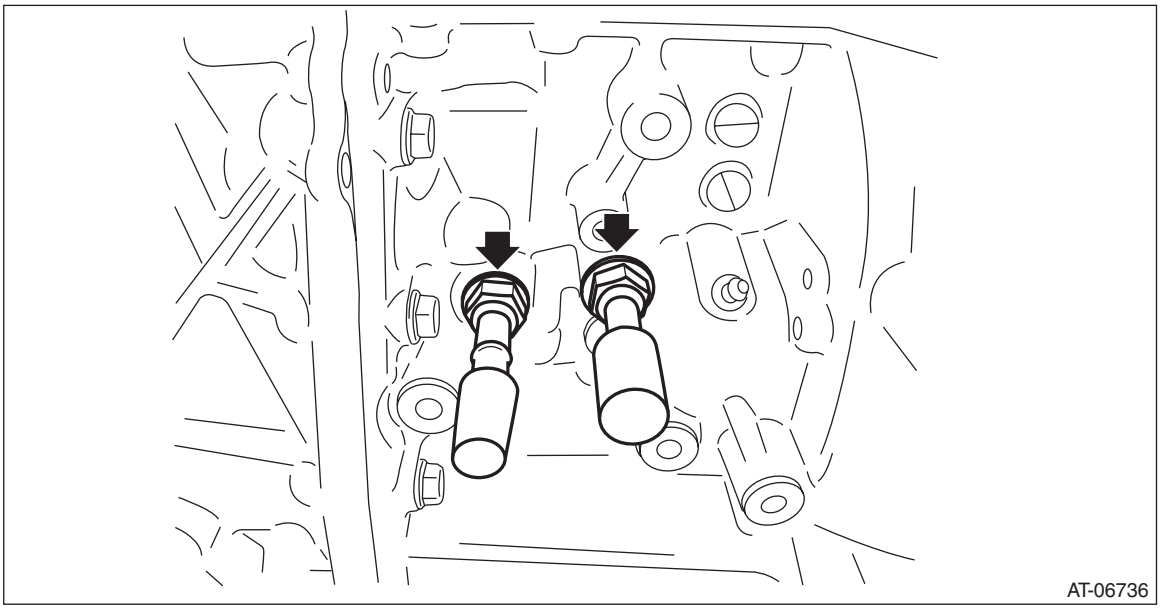
NOTE:
The total number of transmission case mounting bolts is 15.

***Tightening torque:***
***22 N·m (2.2 kgf-m, 16.2 ft-lb)***

9) Install the oil cooler pipe.

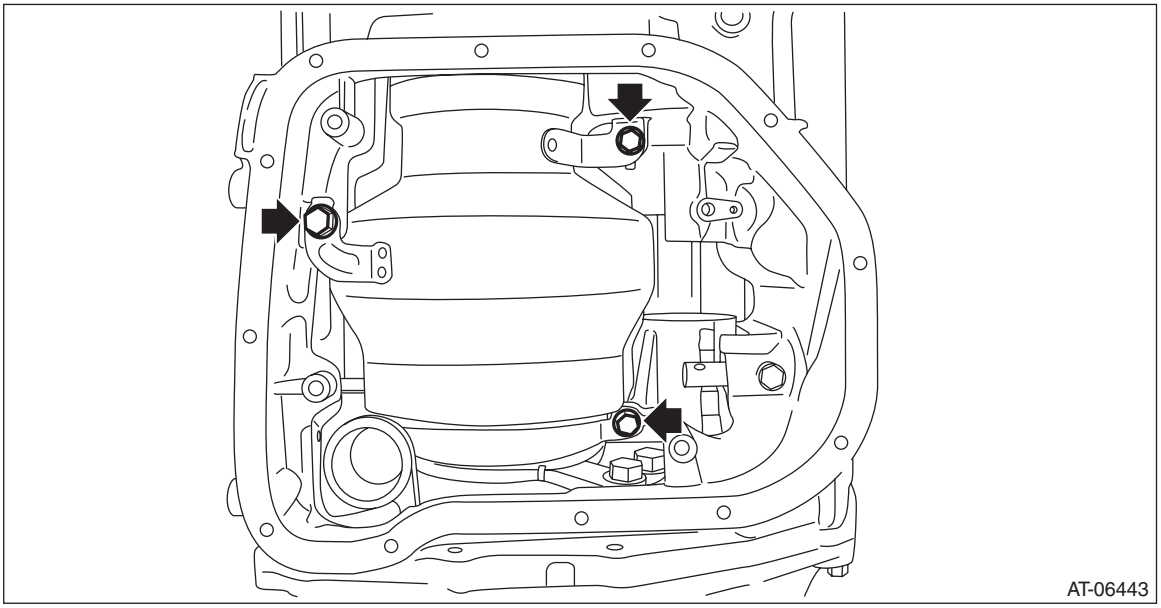
NOTE:
Use new O-rings.

***Tightening torque:***
***25 N·m (2.5 kgf-m, 18.4 ft-lb)***



10) Install the oil baffle securing bolt.

***Tightening torque:***
***16 N·m (1.6 kgf-m, 11.8 ft-lb)***

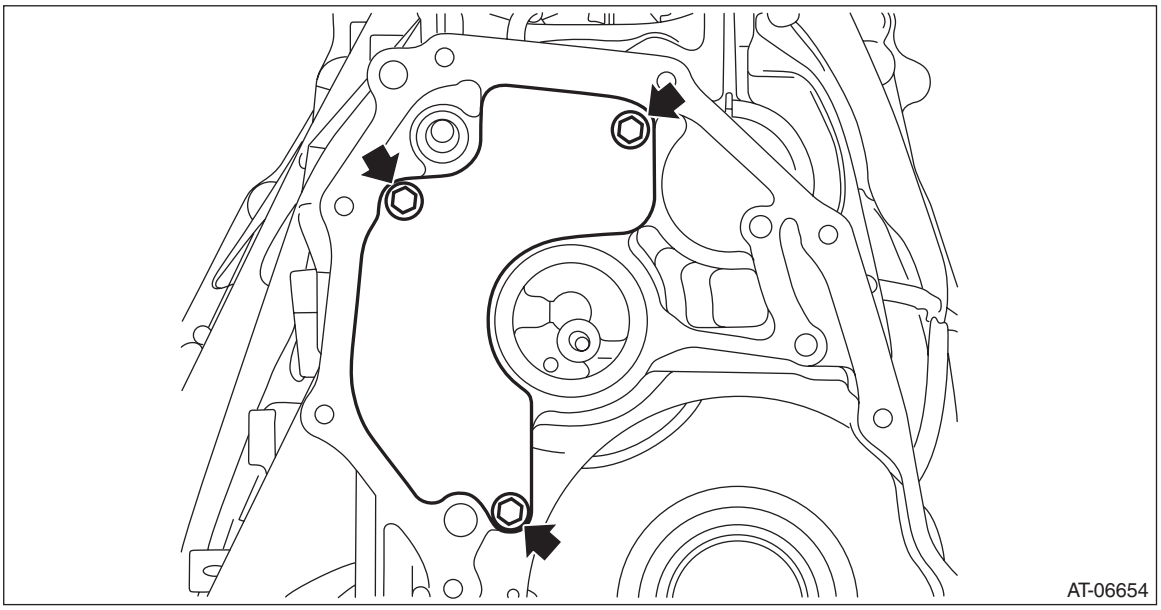


11) Install the transmission control device. <Ref. to CVT-190, INSTALLATION, Transmission Control Device.>
12) Install the oil pan and oil strainer. <Ref. to CVT-107, INSTALLATION, Oil Pan and Strainer.>
13) Install the reduction driven gear assembly. <Ref. to CVT-179, INSTALLATION, Reduction Driven Gear.>
14) Install the parking pawl. <Ref. to CVT-178, INSTALLATION, Parking Pawl.>
15) Install the transfer driven gear assembly. <Ref. to CVT-175, INSTALLATION, Transfer Driven Gear.>

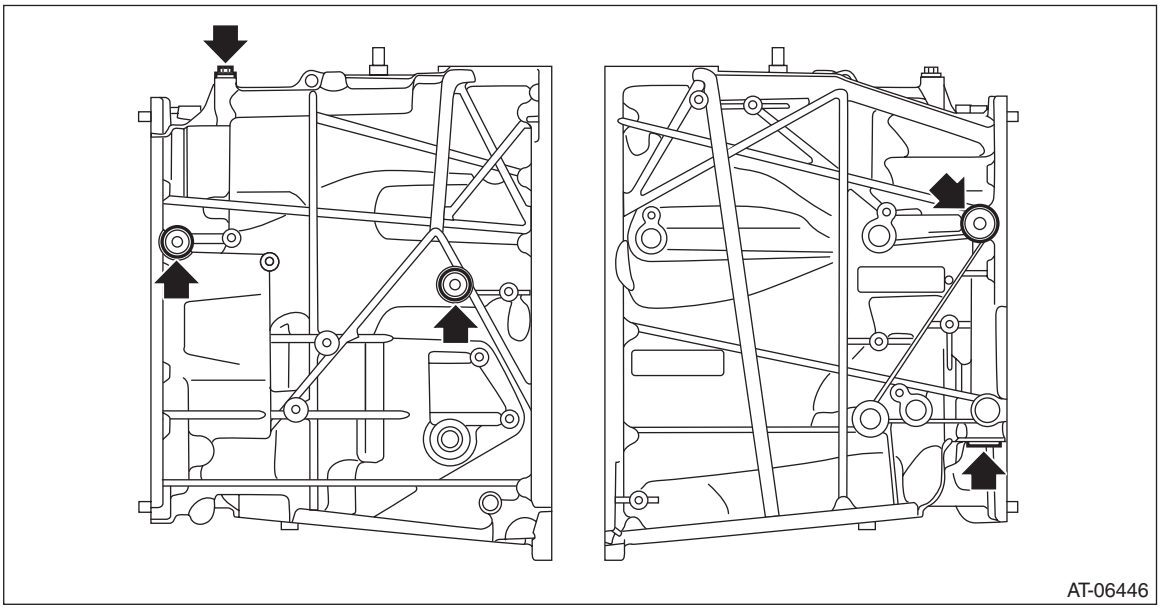
16) Install the transfer clutch assembly. <Ref. to CVT-162, INSTALLATION, Transfer Clutch.>
17) Install the extension case. <Ref. to CVT-157, INSTALLATION, Extension Case.>
18) Install the inhibitor switch. <Ref. to CVT-95, INSTALLATION, Inhibitor Switch.>
19) Install the secondary speed sensor. <Ref. to CVT-99, INSTALLATION, Secondary Speed Sensor.>
20) Install the primary speed sensor. <Ref. to CVT-102, INSTALLATION, Primary Speed Sensor.>
21) Install the turbine speed sensor. <Ref. to CVT-97, INSTALLATION, Turbine Speed Sensor.>
22) Install the transmission harness. <Ref. to CVT-130, INSTALLATION, Transmission Harness.>
23) Install the control valve body. <Ref. to CVT-116, INSTALLATION, Control Valve Body.>
24) Install the air breather hose. <Ref. to CVT-149, INSTALLATION, Air Breather Hose.>
25) Install the transmission assembly to the vehicle. <Ref. to CVT-67, INSTALLATION, Automatic Transmission Assembly.>

## C: DISASSEMBLY

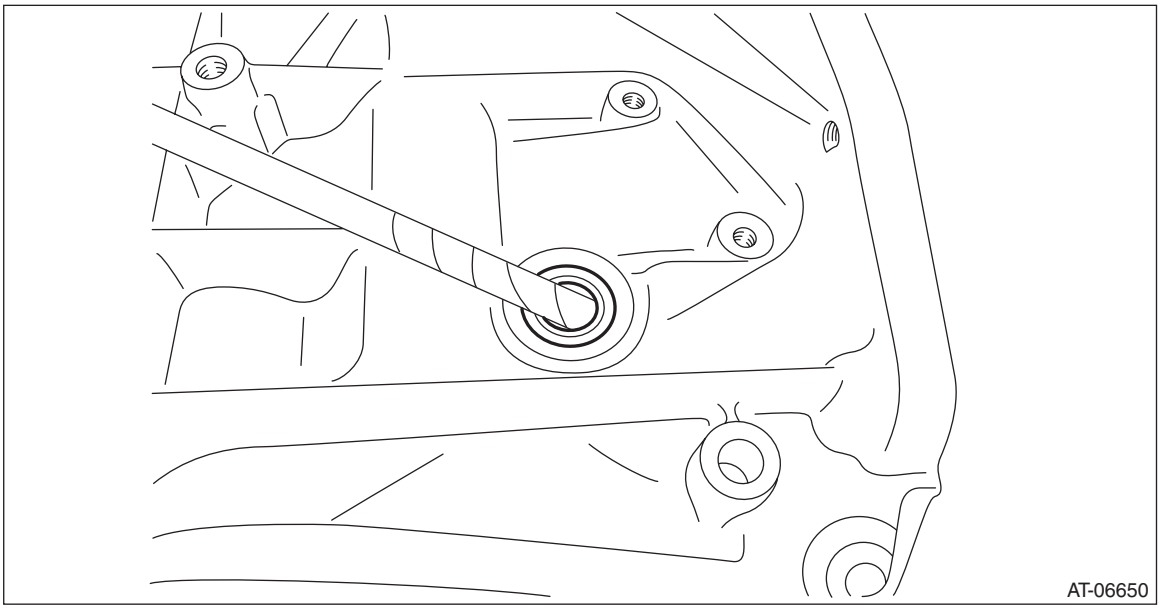
1) Remove the oil stopper plate.



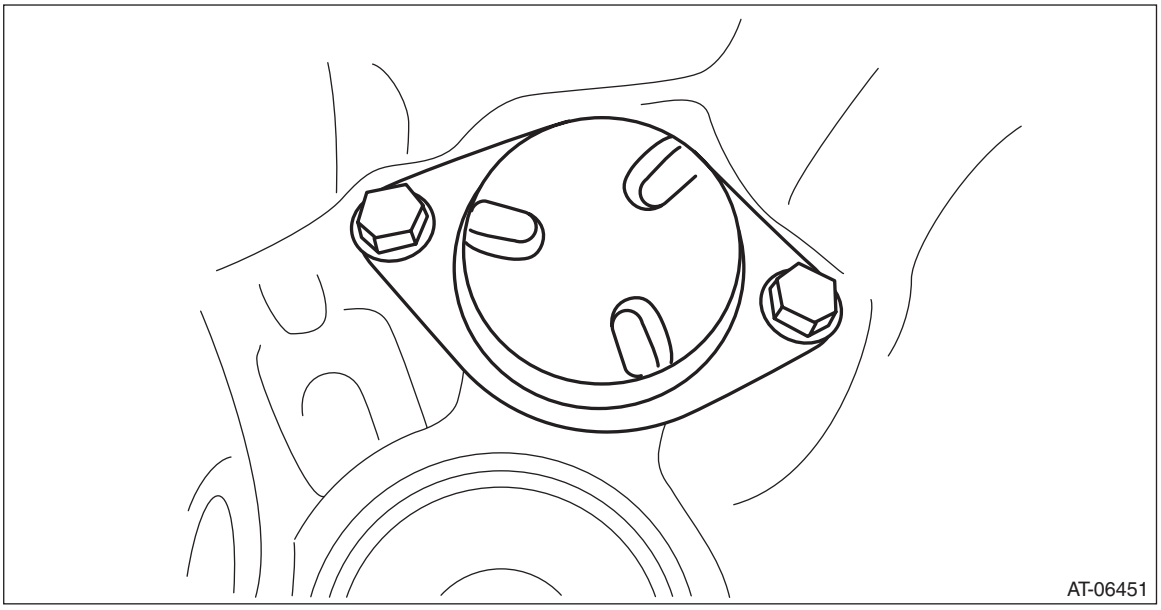
2) Remove all plugs from the transmission case.



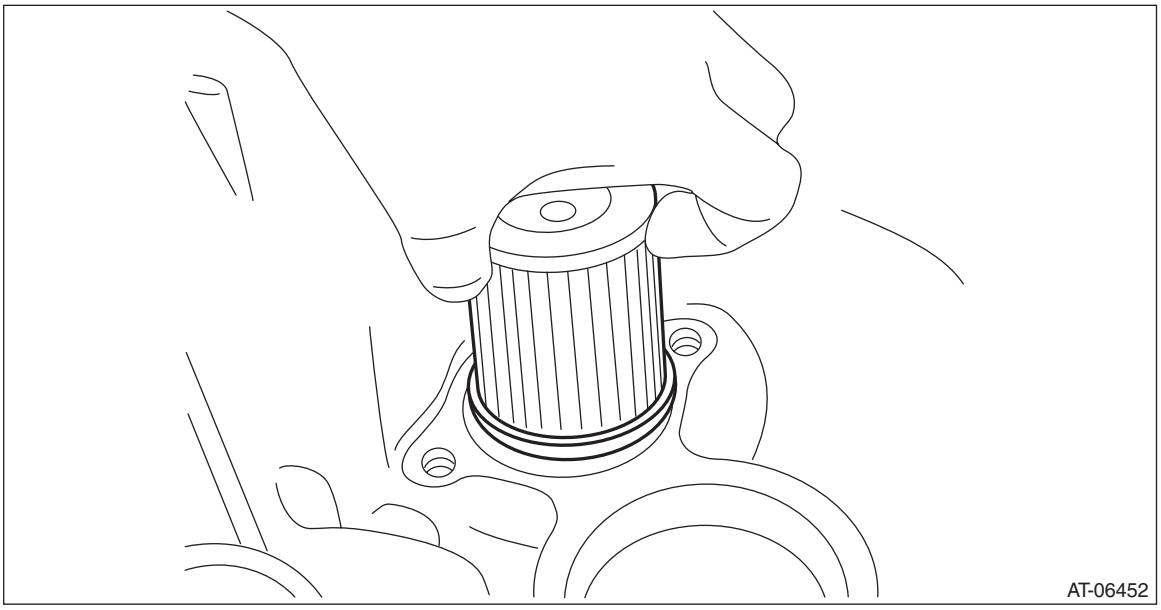
3) Remove the oil seal using a screwdriver wrapped with cloth etc.



4) Remove the CVTF filter cover and gasket.



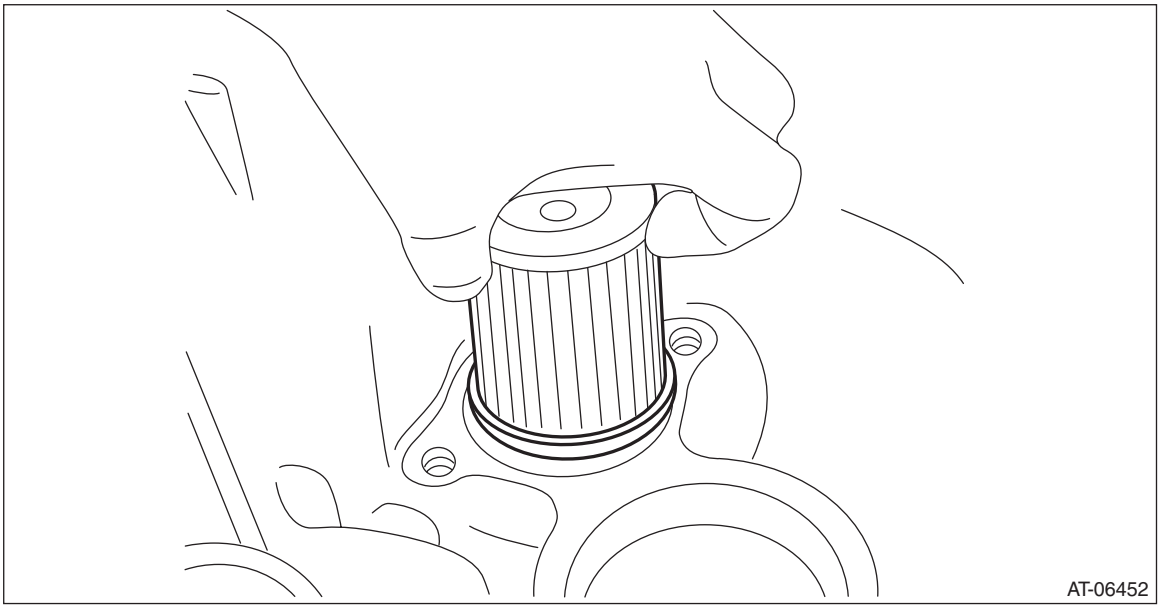
5) Remove the CVTF filter.



## D: ASSEMBLY

1) Face the O-ring side of the CVTF filter to the transmission case side, and install the CVTF filter.

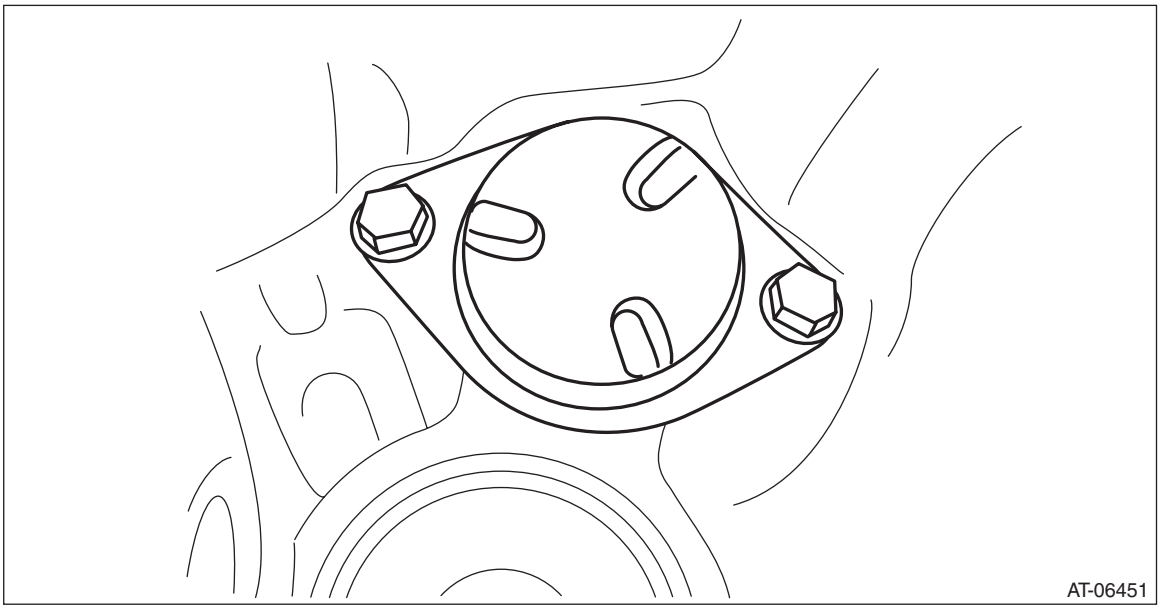
NOTE:
Apply CVTF to the O-ring of CVTF filter.



2) Install the CVTF filter cover and gasket.

NOTE:
Use a new gasket.

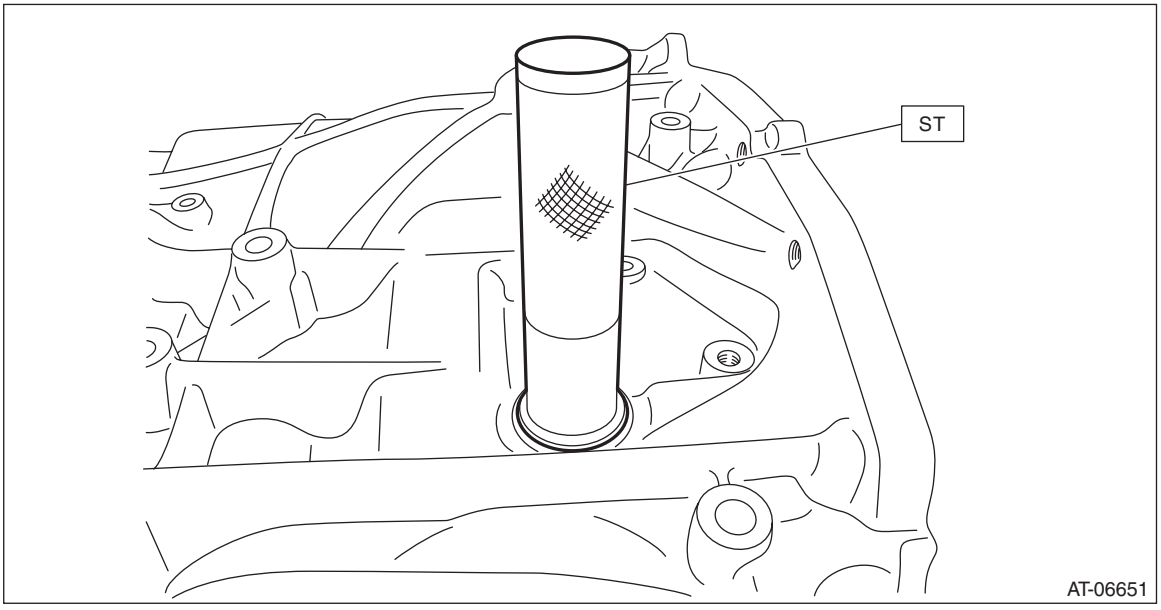
***Tightening torque:***
***17 N·m (1.7 kgf-m, 12.5 ft-lb)***



3) Using the ST, install the oil seal.

NOTE:
- Use a new oil seal.
- Apply CVTF to the oil seal lip and press-fitting surface.

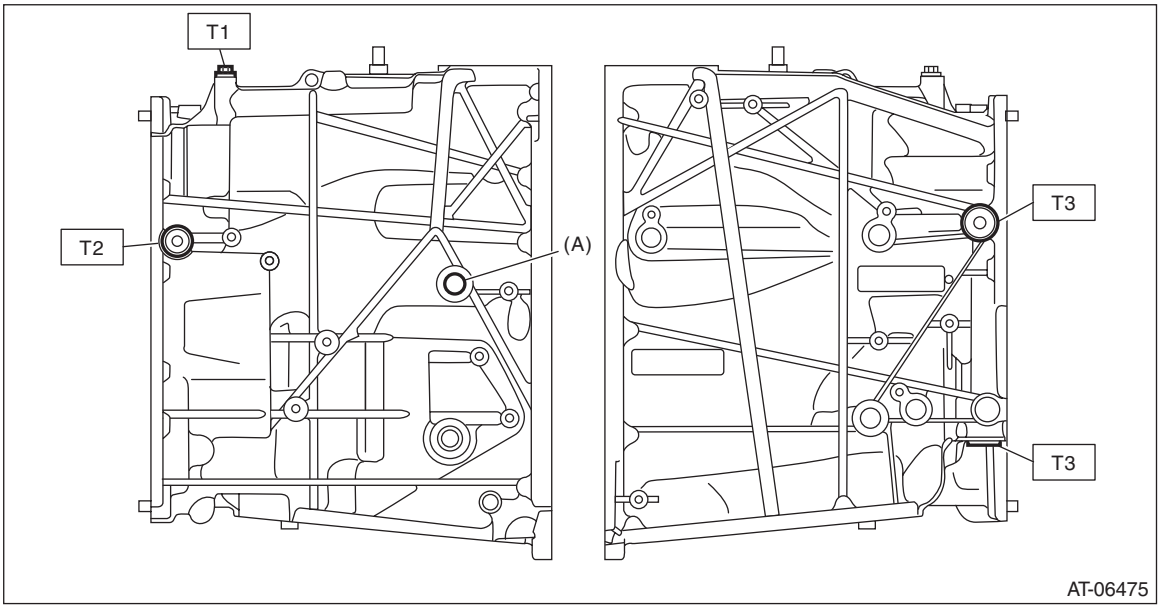
ST 18657AA000 INSTALLER



4) Install all plugs.

NOTE:
- Use new O-rings.
- Apply CVTF to the O-ring.
- For the plug (A), fill the CVTF, and then tighten the plug (A) using a new O-ring.

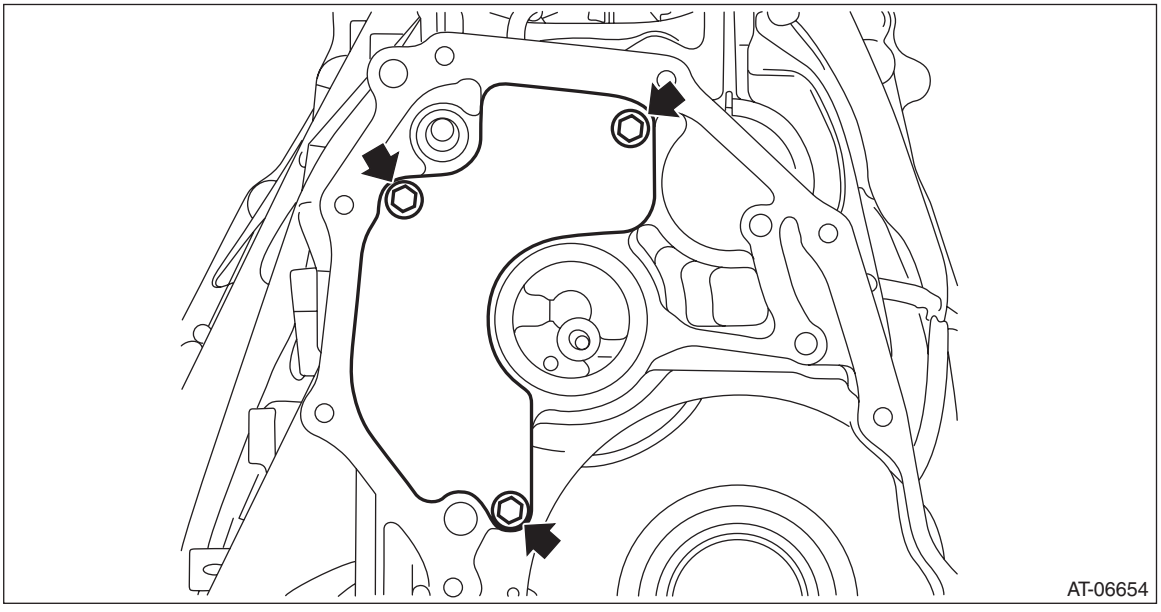
***Tightening torque:***
***T1: 13 N·m (1.3 kgf-m, 9.6 ft-lb)***
***T2: 25 N·m (2.5 kgf-m, 18.4 ft-lb)***
***T3: 50 N·m (5.1 kgf-m, 36.9 ft-lb)***



5) Install the oil stopper plate.

NOTE:
Use a new bolt.

***Tightening torque:***
***9 N·m (0.9 kgf-m, 6.6 ft-lb)***



## E: INSPECTION

- Check the transmission case for damage.
- Check for leakage of CVTF from the connection between converter case and transmission case.
- Check the bearing for smooth operation.
- Check the bearing for seizure or wear.

## F: ADJUSTMENT

NOTE:
When replacing the transmission case with a new part, perform the following check and adjustment for the selection.

- Select the transfer driven gear shim. <Ref. to CVT-172, ADJUSTMENT, Transfer Clutch.>
- Select the transfer drive gear shim. <Ref. to CVT-185, ADJUSTMENT, Reduction Driven Gear.>
- Select the reduction drive gear shim. <Ref. to CVT-208, ADJUSTMENT, Reduction Drive Gear.>

# 35.CVTF Filter

## A: REMOVAL

NOTE:
• Although CVTF filter is a maintenance-free part, replace it if a large quantity of wear debris and metal particles are found in CVTF and CVTF filter.
• For removal of CVTF filter, refer to “Transmission Case”. <Ref. to CVT-193, REMOVAL, Transmission Case.> <Ref. to CVT-199, DISASSEMBLY, Transmission Case.>

## B: INSTALLATION

NOTE:
For installation of CVTF filter, refer to “Transmission Case”. <Ref. to CVT-201, ASSEMBLY, Transmission Case.> <Ref. to CVT-196, INSTALLATION, Transmission Case.>

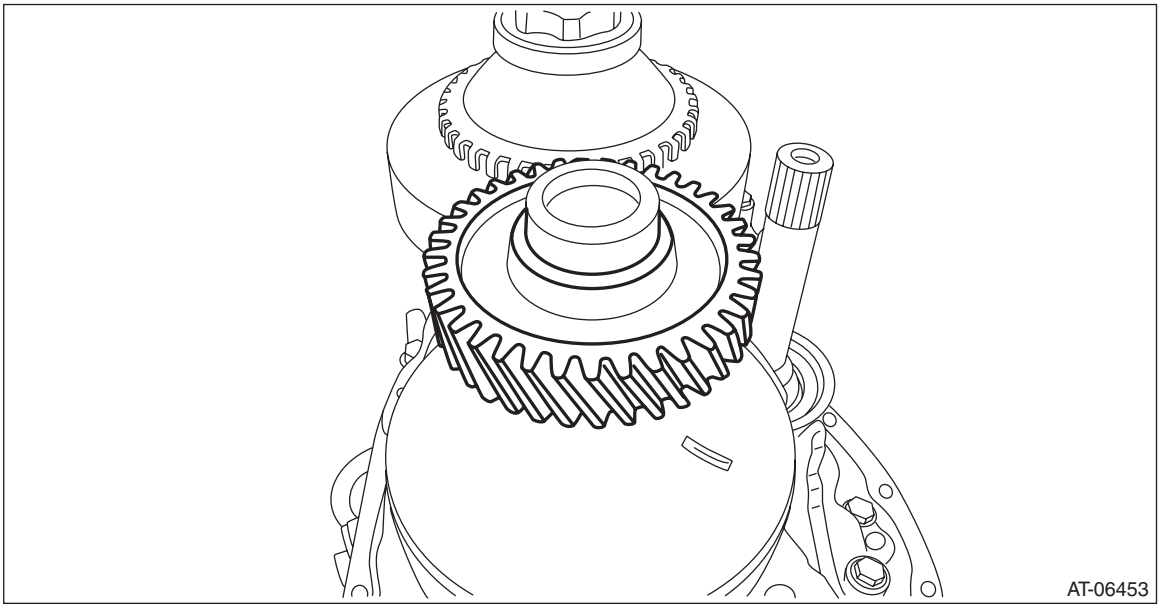
## C: INSPECTION

- Check if a large quantity of wear debris or metal particles are in CVTF and CVTF filter.
- Check for broken part or damaged O-ring.

# 36.Reduction Drive Gear

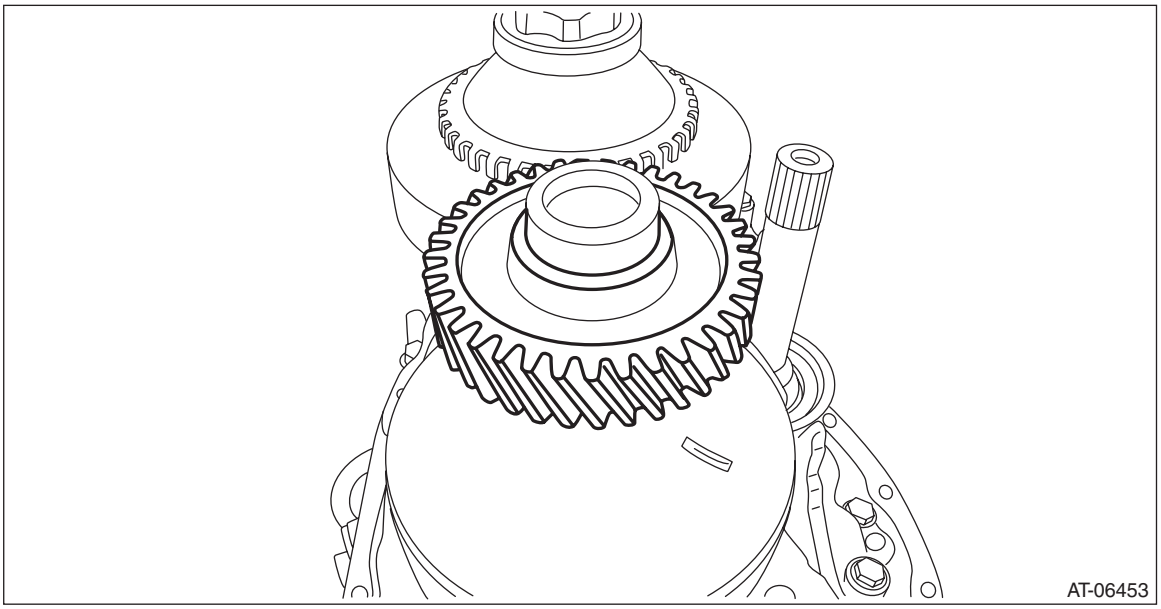
## A: REMOVAL

1) Remove the transmission assembly from the vehicle. <Ref. to CVT-56, REMOVAL, Automatic Transmission Assembly.>
2) Remove the air breather hose. <Ref. to CVT-148, REMOVAL, Air Breather Hose.>
3) Remove the control valve body. <Ref. to CVT-110, REMOVAL, Control Valve Body.>
4) Remove the transmission harness. <Ref. to CVT-124, REMOVAL, Transmission Harness.>
5) Remove the turbine speed sensor. <Ref. to CVT-97, REMOVAL, Turbine Speed Sensor.>
6) Remove the secondary speed sensor. <Ref. to CVT-99, REMOVAL, Secondary Speed Sensor.>
7) Remove the primary speed sensor. <Ref. to CVT-101, REMOVAL, Primary Speed Sensor.>
8) Remove the inhibitor switch. <Ref. to CVT-93, REMOVAL, Inhibitor Switch.>
9) Remove the extension case. <Ref. to CVT-156, REMOVAL, Extension Case.>
10) Remove the transfer clutch assembly. <Ref. to CVT-160, REMOVAL, Transfer Clutch.>
11) Remove the transfer driven gear assembly. <Ref. to CVT-174, REMOVAL, Transfer Driven Gear.>
12) Remove the parking pawl. <Ref. to CVT-177, REMOVAL, Parking Pawl.>
13) Remove the reduction driven gear assembly. <Ref. to CVT-179, REMOVAL, Reduction Driven Gear.>
14) Remove the oil pan and oil strainer. <Ref. to CVT-106, REMOVAL, Oil Pan and Strainer.>
15) Remove the transmission control device. <Ref. to CVT-187, REMOVAL, Transmission Control Device.>
16) Remove the transmission case. <Ref. to CVT-193, REMOVAL, Transmission Case.>
17) Remove the reduction drive gear.



## B: INSTALLATION

1) Install the reduction drive gear to secondary pulley.



2) Select the reduction drive gear shim. <Ref. to CVT-208, ADJUSTMENT, Reduction Drive Gear.>
3) Remove the transmission case, and install the selected shim.
4) Install the transmission case. <Ref. to CVT-196, INSTALLATION, Transmission Case.>
5) Install the transmission control device. <Ref. to CVT-190, INSTALLATION, Transmission Control Device.>
6) Install the oil strainer and oil pan. <Ref. to CVT-107, INSTALLATION, Oil Pan and Strainer.>
7) Install the reduction driven gear assembly. <Ref. to CVT-179, INSTALLATION, Reduction Driven Gear.>
8) Install the parking pawl. <Ref. to CVT-178, INSTALLATION, Parking Pawl.>
9) Install the transfer driven gear assembly. <Ref. to CVT-175, INSTALLATION, Transfer Driven Gear.>
10) Install the transfer clutch assembly. <Ref. to CVT-162, INSTALLATION, Transfer Clutch.>
11) Install the extension case. <Ref. to CVT-157, INSTALLATION, Extension Case.>
12) Install the inhibitor switch. <Ref. to CVT-95, INSTALLATION, Inhibitor Switch.>
13) Install the secondary speed sensor. <Ref. to CVT-99, INSTALLATION, Secondary Speed Sensor.>
14) Install the primary speed sensor. <Ref. to CVT-102, INSTALLATION, Primary Speed Sensor.>
15) Install the turbine speed sensor. <Ref. to CVT-97, INSTALLATION, Turbine Speed Sensor.>
16) Install the transmission harness. <Ref. to CVT-130, INSTALLATION, Transmission Harness.>
17) Install the control valve body. <Ref. to CVT-116, INSTALLATION, Control Valve Body.>
18) Install the air breather hose. <Ref. to CVT-149, INSTALLATION, Air Breather Hose.>
19) Install the transmission assembly to the vehicle. <Ref. to CVT-67, INSTALLATION, Automatic Transmission Assembly.>

## C: INSPECTION

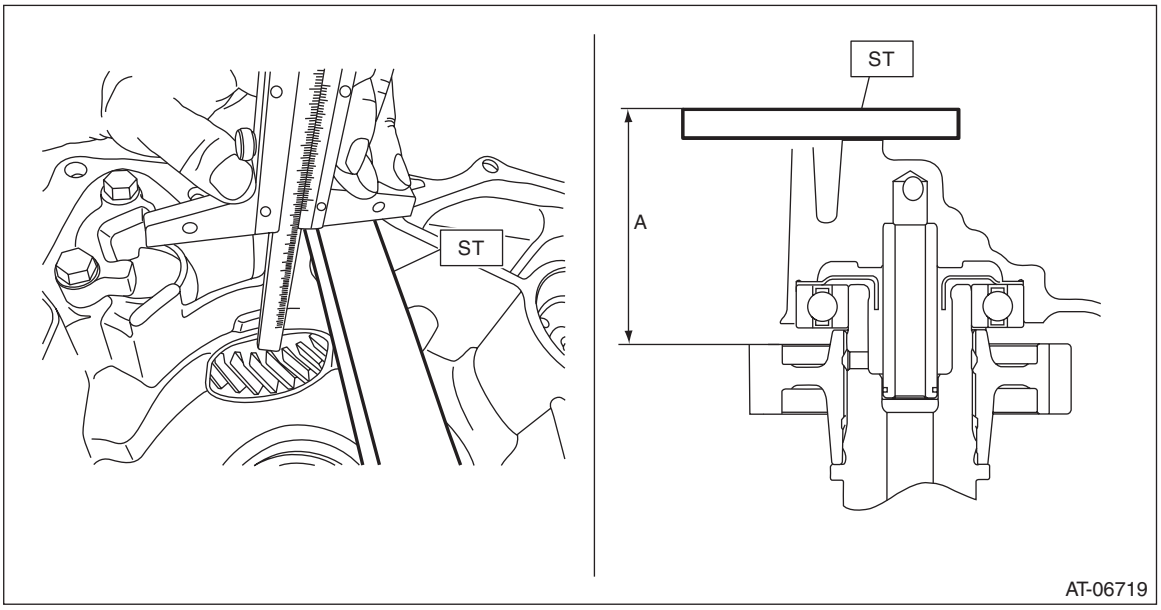
Check the reduction drive gear for breakage or damage.

## D: ADJUSTMENT

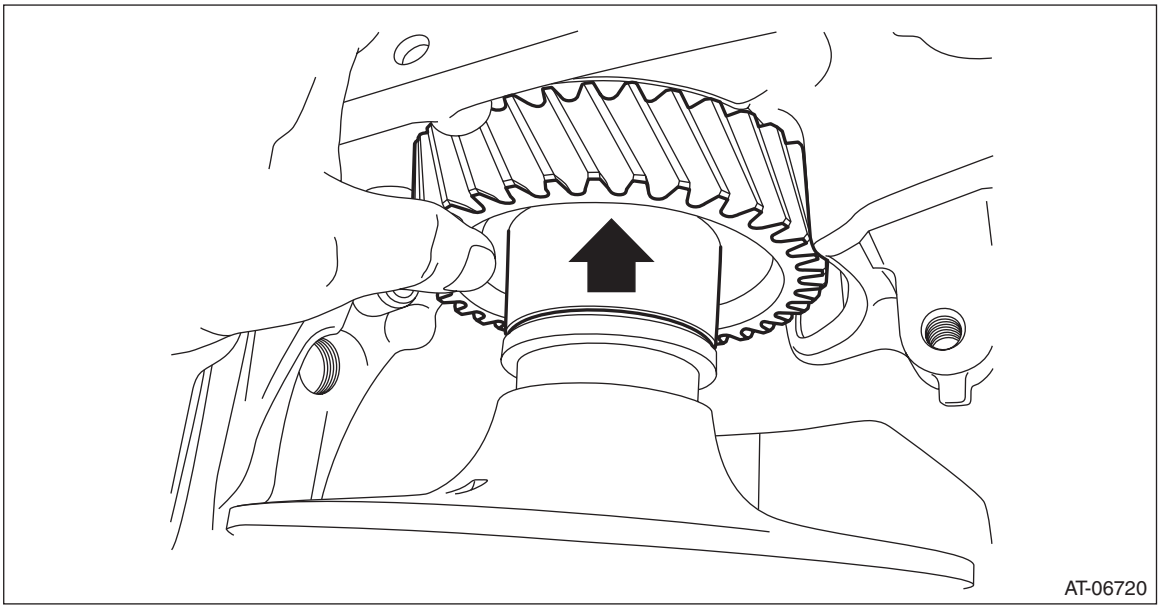
1) Install the transmission case, and secure it with four or five bolts.

***Tightening torque:***
***22 N·m (2.2 kgf-m, 16.2 ft-lb)***

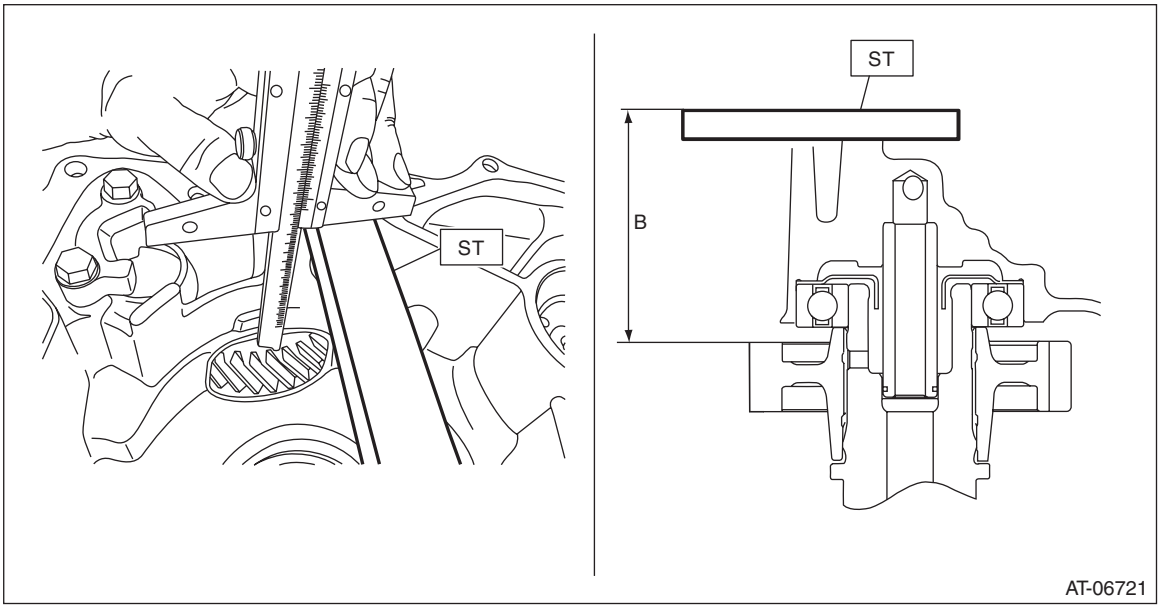
2) Measure depth “A” from the ST upper face to the reduction drive gear end face.
ST 499575400 GAUGE



3) Raise and hold the reduction drive gear.



4) Measure depth “B” from the ST upper face to the reduction drive gear end face.
ST 499575400 GAUGE



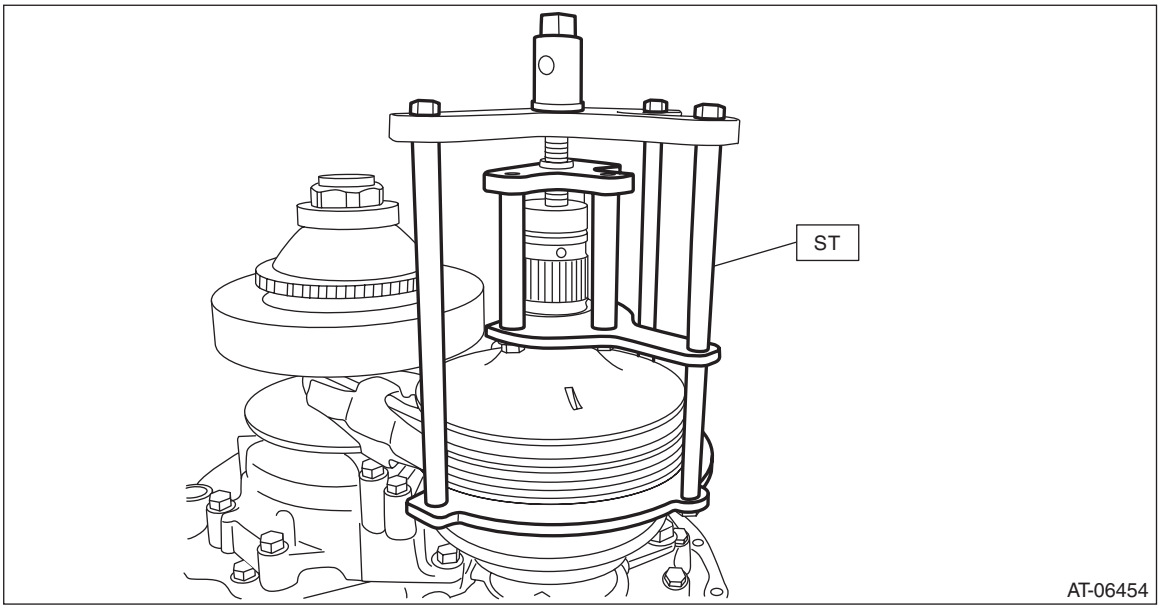
5) Obtain the thickness of reduction drive gear shim using the following formula to select one to three reduction drive gear shims.
T (mm) = A – B – (0.05 — 0.25)
[T (in) = A – B – (0.002 — 0.01)]
T: Reduction drive gear shim thickness
A: Depth from the ST upper face to the reduction drive gear end surface
B: Depth from the ST upper face to the reduction drive gear end surface
0.05 — 0.25 mm (0.002 — 0.01 in): Clearance

| Part No. | Reduction drive gear shim thickness mm (in) |
|---|---|
| 31288AA260 | 0.3 (0.012) |
| 31288AA270 | 0.4 (0.016) |
| 31288AA280 | 0.5 (0.020) |
| 31288AA290 | 0.6 (0.024) |

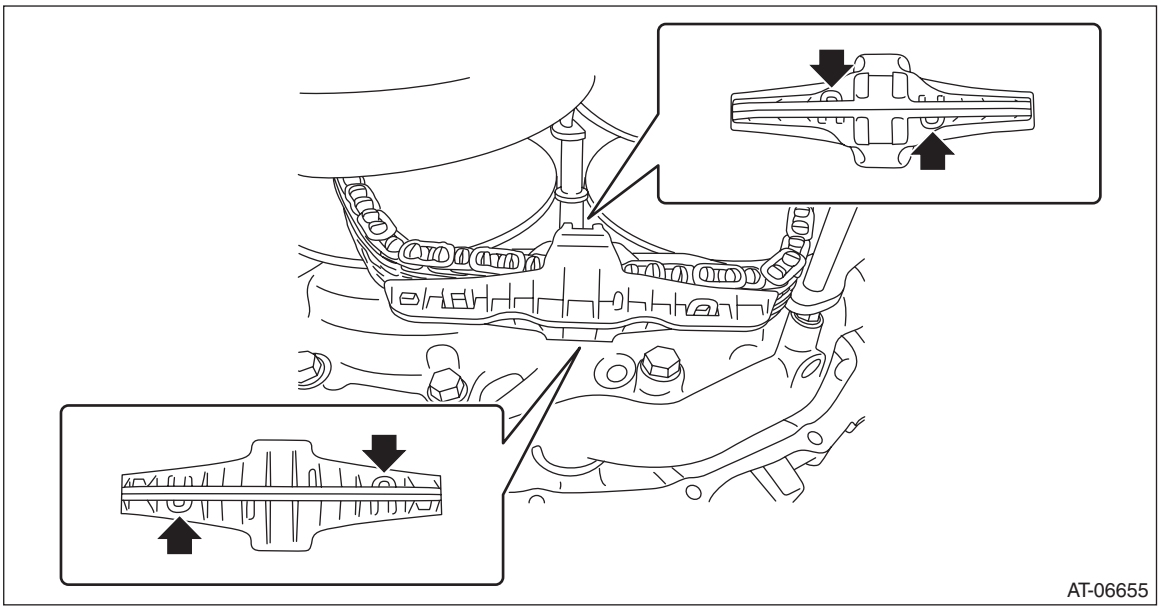
# 37.Primary Pulley and Secondary Pulley

## A: REMOVAL

NOTE:
Always replace primary pulley and secondary pulley as an assembly because they are non-disassembled parts.
1) Remove the transmission assembly from the vehicle. <Ref. to CVT-56, REMOVAL, Automatic Transmission Assembly.>
2) Remove the air breather hose. <Ref. to CVT-148, REMOVAL, Air Breather Hose.>
3) Remove the control valve body. <Ref. to CVT-110, REMOVAL, Control Valve Body.>
4) Remove the transmission harness. <Ref. to CVT-124, REMOVAL, Transmission Harness.>
5) Remove the turbine speed sensor. <Ref. to CVT-97, REMOVAL, Turbine Speed Sensor.>
6) Remove the secondary speed sensor. <Ref. to CVT-99, REMOVAL, Secondary Speed Sensor.>
7) Remove the primary speed sensor. <Ref. to CVT-101, REMOVAL, Primary Speed Sensor.>
8) Remove the inhibitor switch. <Ref. to CVT-93, REMOVAL, Inhibitor Switch.>
9) Remove the extension case. <Ref. to CVT-156, REMOVAL, Extension Case.>
10) Remove the transfer clutch assembly. <Ref. to CVT-160, REMOVAL, Transfer Clutch.>
11) Remove the transfer driven gear assembly. <Ref. to CVT-174, REMOVAL, Transfer Driven Gear.>
12) Remove the parking pawl. <Ref. to CVT-177, REMOVAL, Parking Pawl.>
13) Remove the reduction driven gear assembly. <Ref. to CVT-179, REMOVAL, Reduction Driven Gear.>
14) Remove the oil pan and oil strainer. <Ref. to CVT-106, REMOVAL, Oil Pan and Strainer.>
15) Remove the transmission control device. <Ref. to CVT-187, REMOVAL, Transmission Control Device.>
16) Remove the transmission case. <Ref. to CVT-193, REMOVAL, Transmission Case.>
17) Remove the reduction drive gear. <Ref. to CVT-206, REMOVAL, Reduction Drive Gear.>
18) Set the ST to secondary pulley, expand the V groove of pulley, and then completely loosen the variator chain.
ST 18769AA010 EXPANDER PULLEY

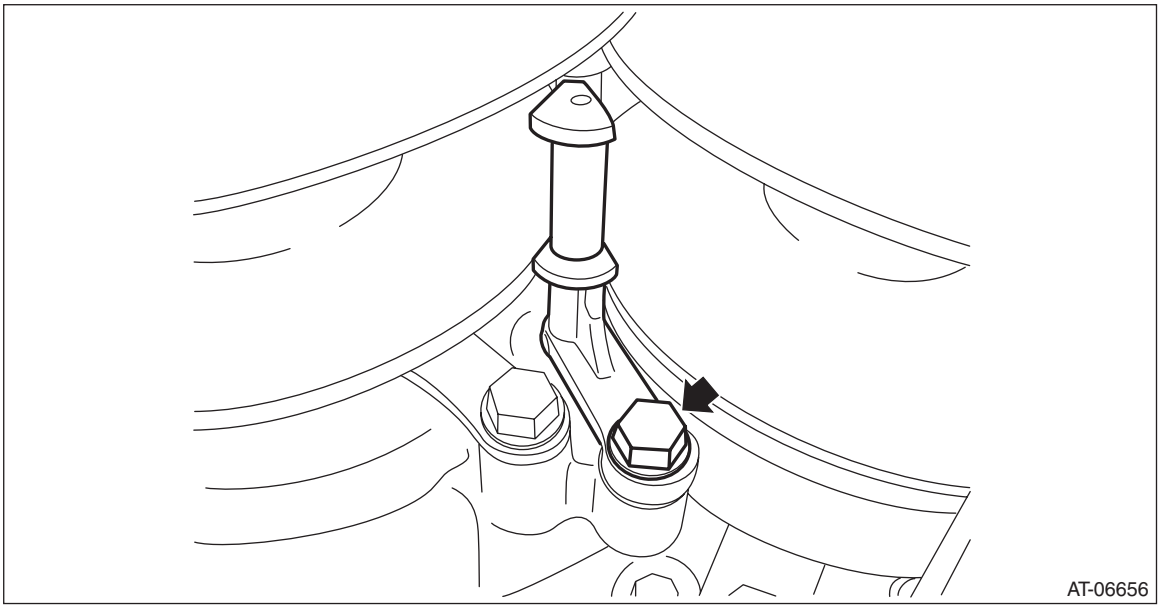


19) Remove the chain guide.
(1) Remove the chain guide from lubrication pipe.
(2) Detach the four claws to remove the chain guide.



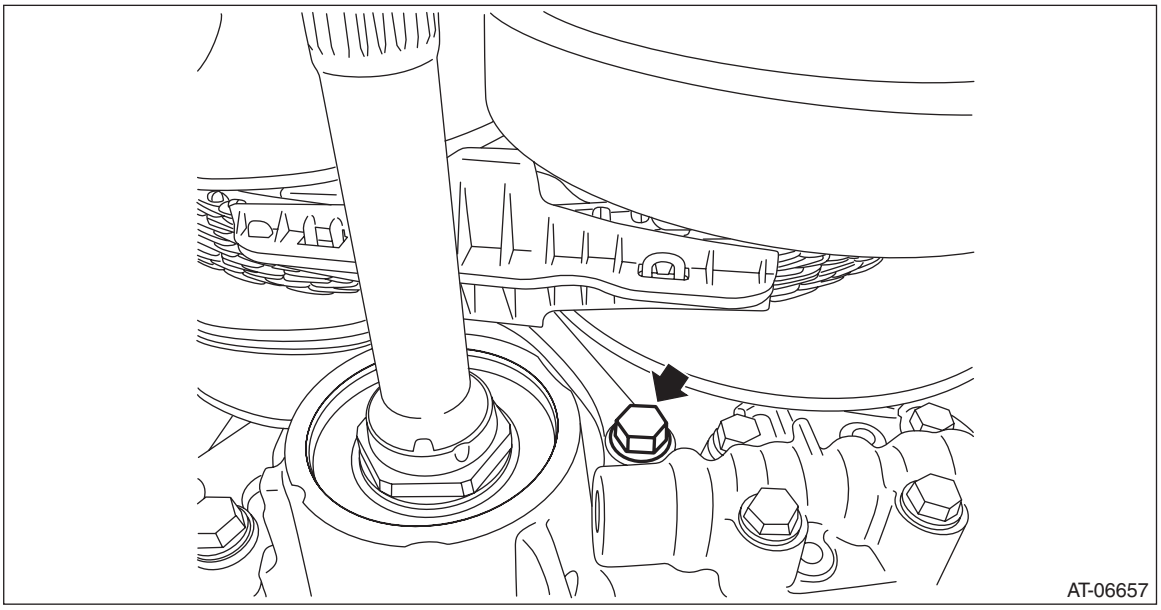
AT-06655

(3) Remove the lubrication pipe.

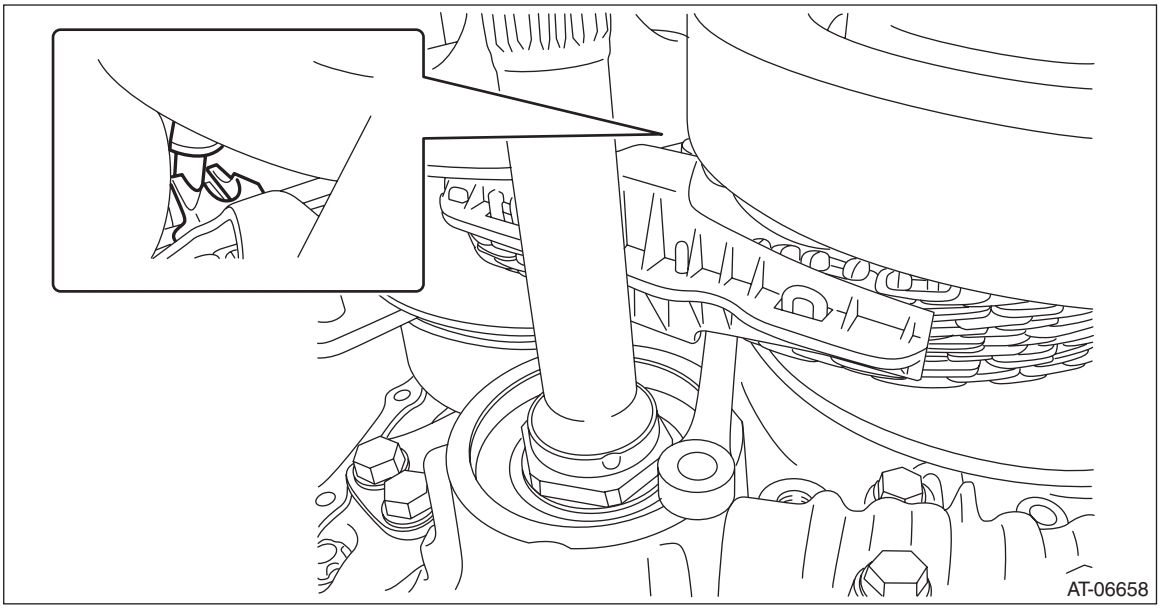


AT-06656

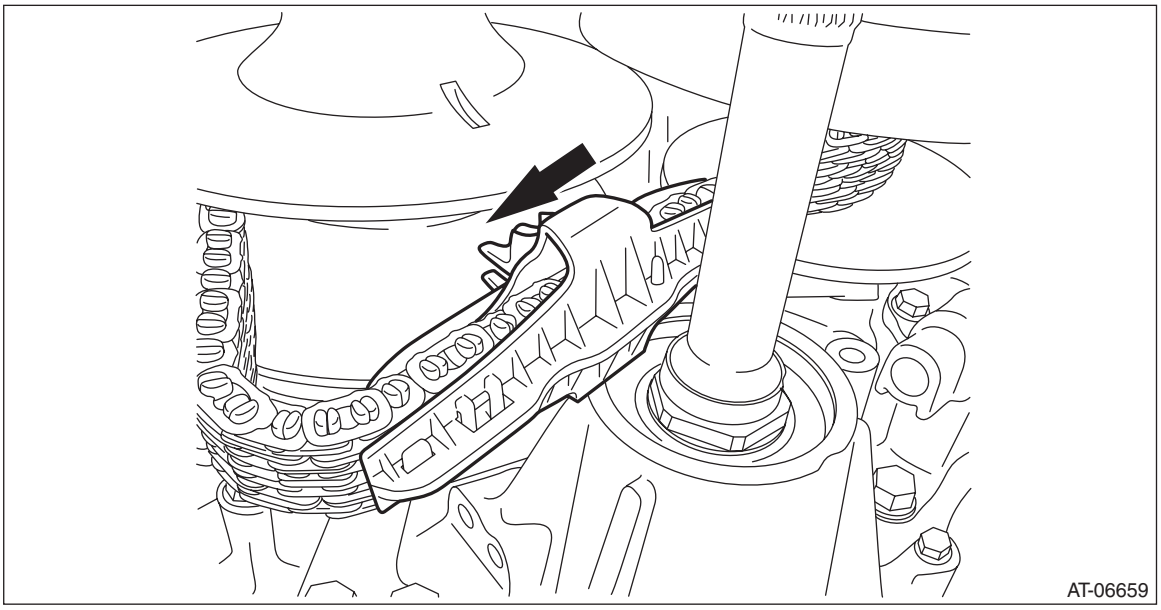
(4) Remove the support rod mounting bolts.



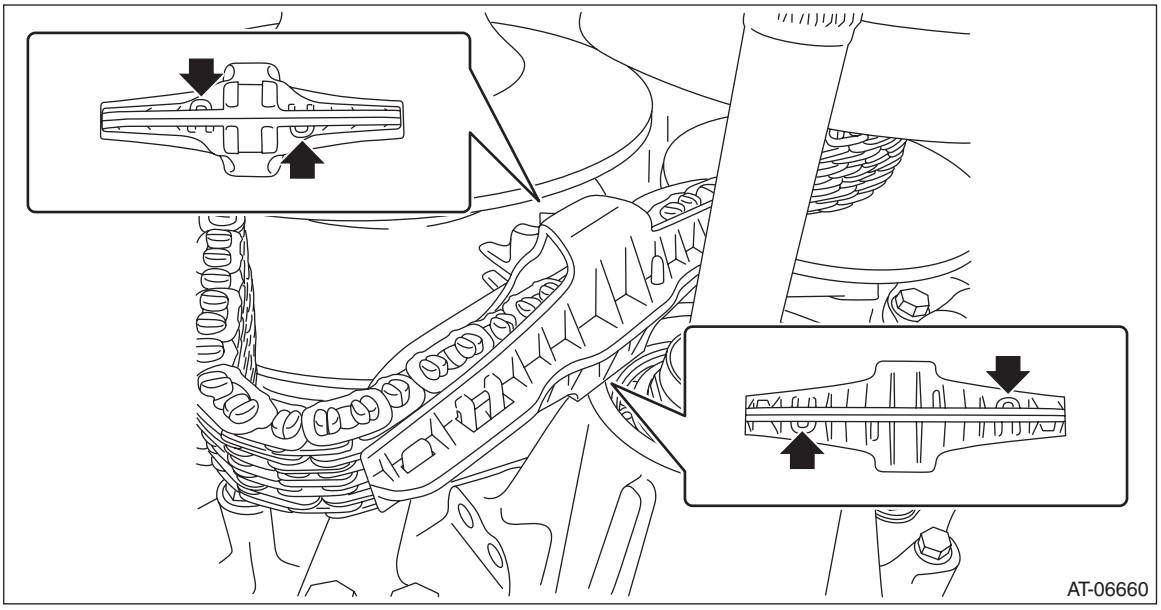
(5) Raise the support rod to remove the chain guide.



(6) Move the chain guide to the secondary pulley side.

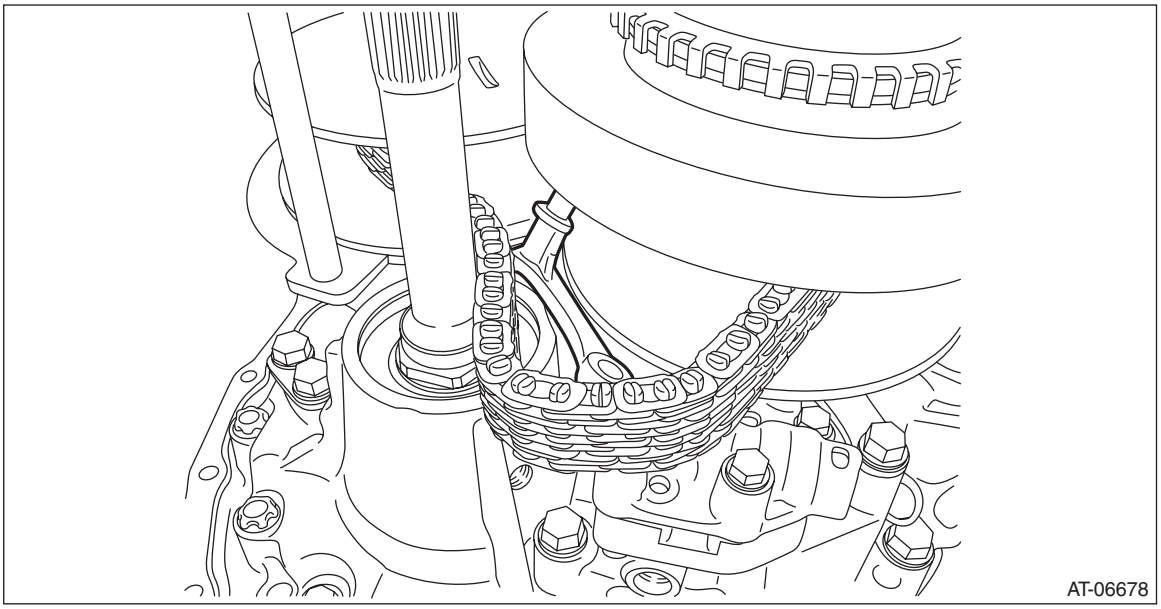


(7) Detach the four claws to remove the chain guide.

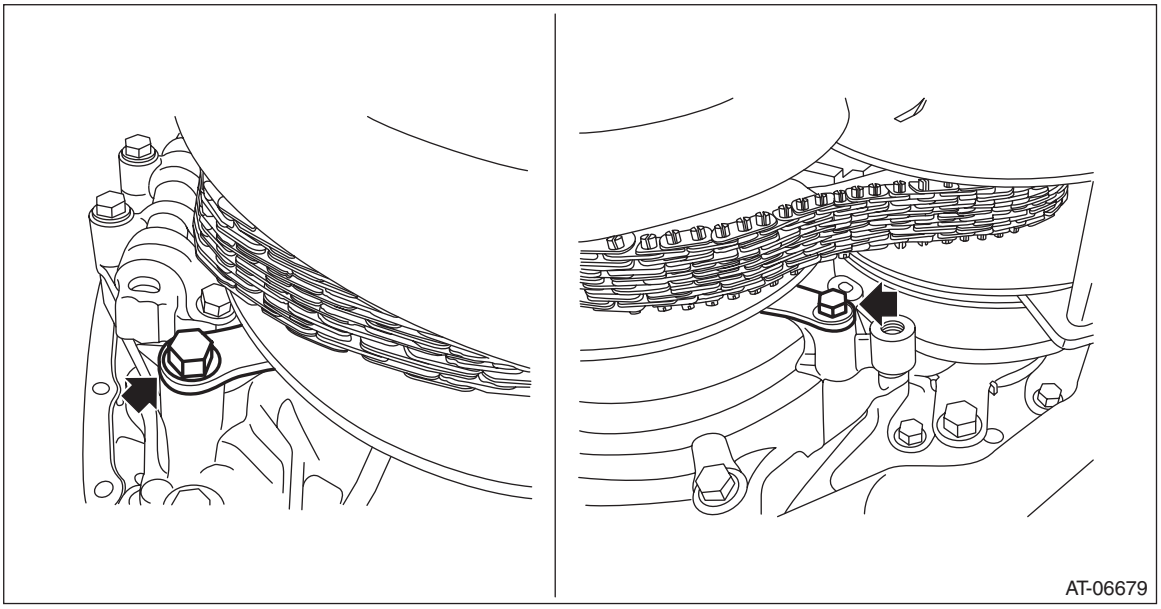


(8) Remove the support rod.

**CAUTION:**
**Protect the both pulleys and variator chain from scratching.**

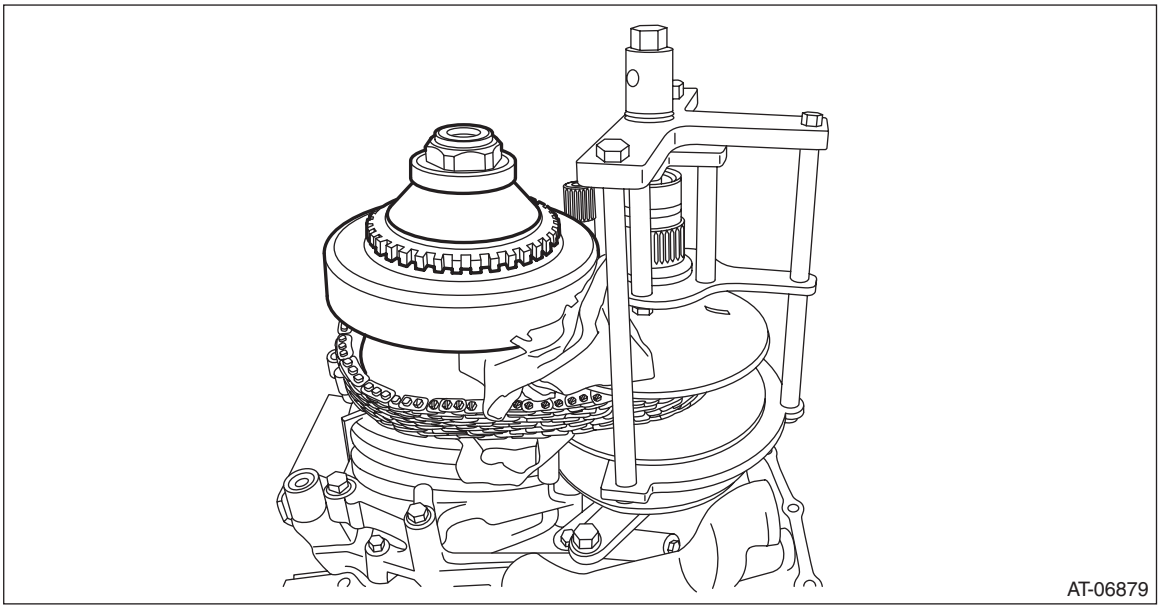


20) Remove the primary pulley mounting bolt.

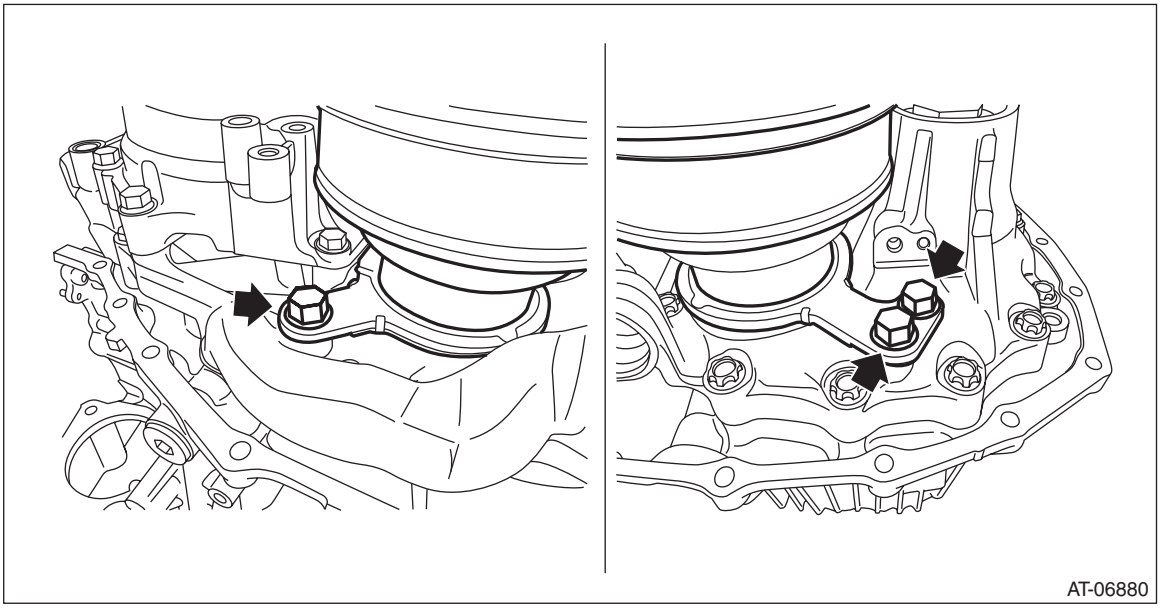


21) Remove the primary pulley from the reverse brake housing and intersect the V groove of secondary pulley and the V groove of primary pulley. Remove the variator chain from primary pulley, and remove the primary pulley.

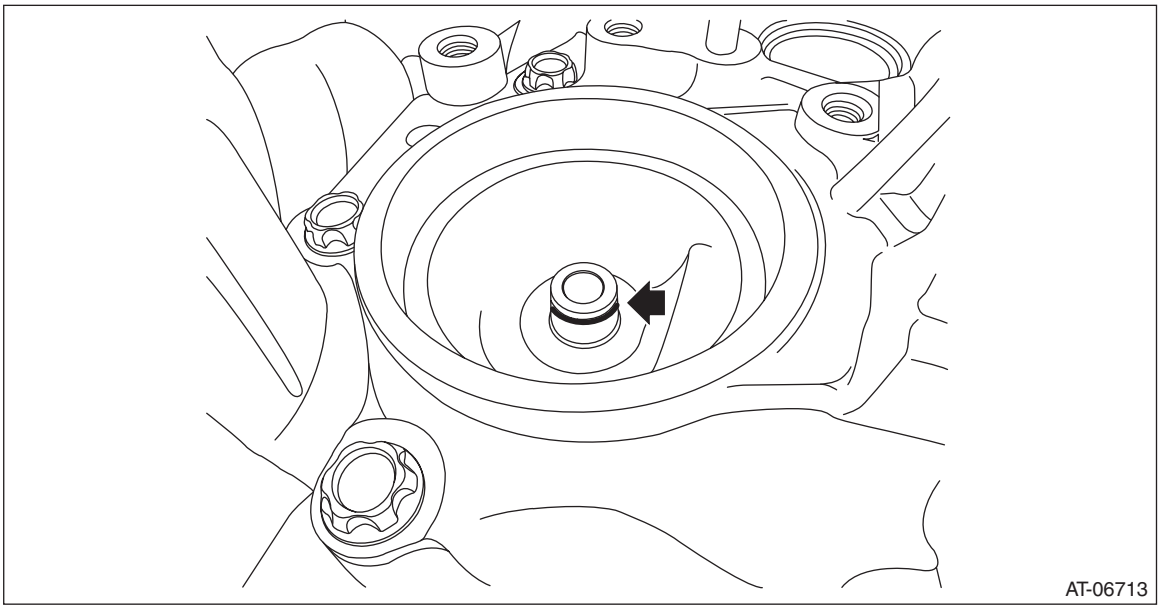
**CAUTION:**
**Cover the V grooves of secondary pulley and primary pulley with cloth to protect the both pulleys and variator chain from scratching.**



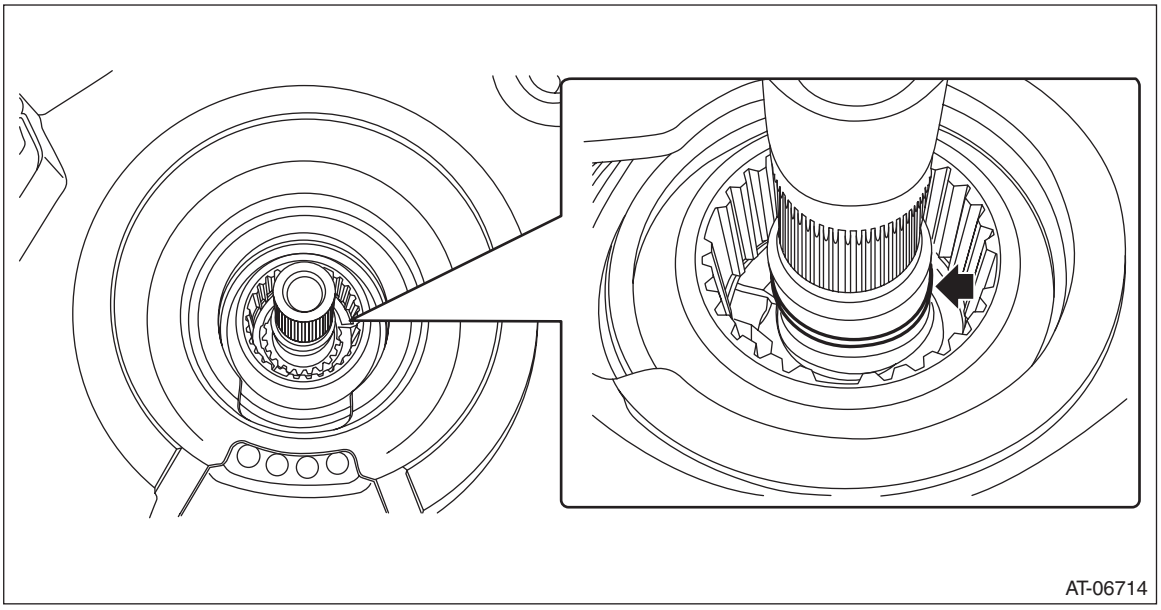
22) Remove the ST (EXPANDER PULLEY) from the secondary pulley.
23) Remove the variator chain from secondary pulley.
24) Remove the secondary pulley mounting bolts, and remove the secondary pulley.



25) Remove the seal ring from drive pinion retainer.



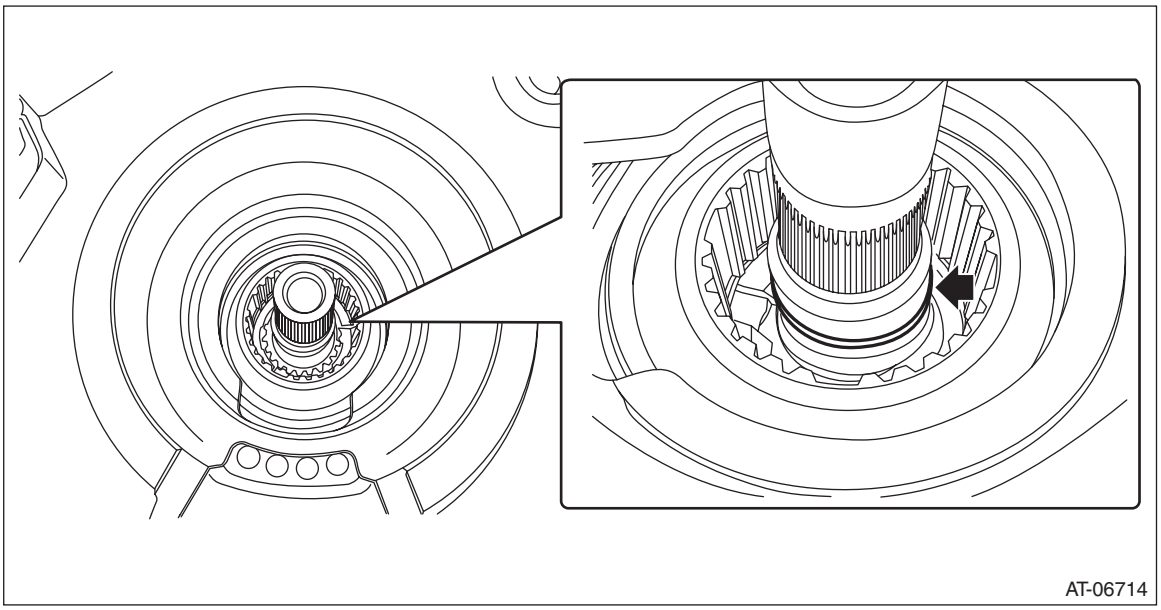
26) Remove the seal ring from the input shaft.



## B: INSTALLATION

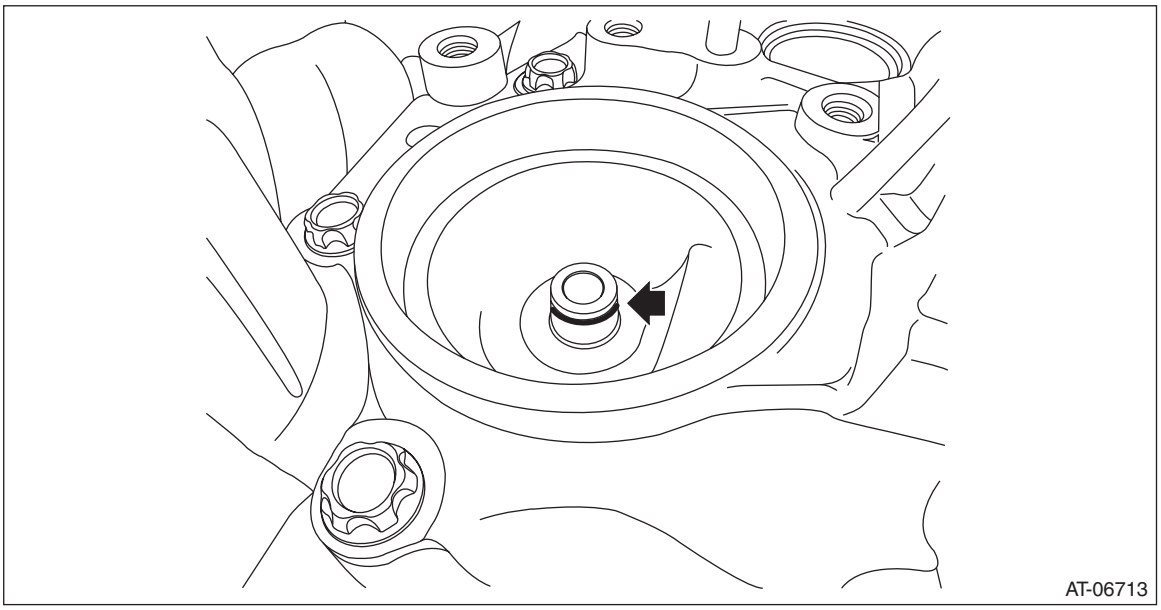
1) Select shims for pulley alignment. <Ref. to CVT-225, ADJUSTMENT, Primary Pulley and Secondary Pulley.>
2) Install the seal ring to the input shaft.

NOTE:
- Use a new seal ring.
- When installing the seal ring, do not expand the seal ring too much.
- Apply CVTF to the seal rings.



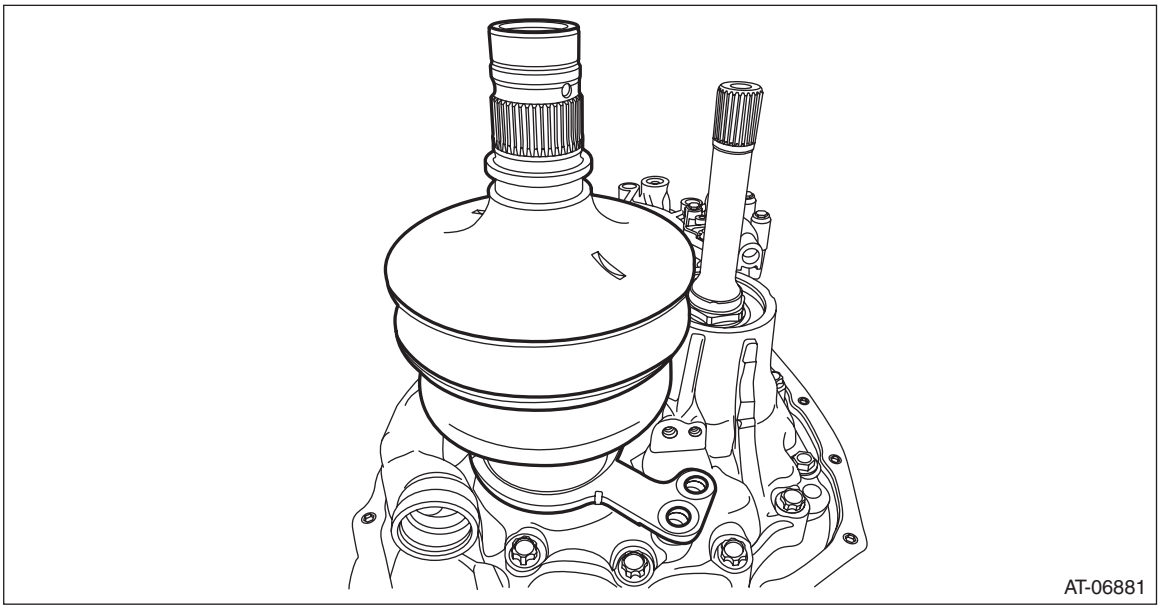
3) Install the seal ring to drive pinion retainer.

NOTE:
- Use a new seal ring.
- Apply CVTF to the seal rings.



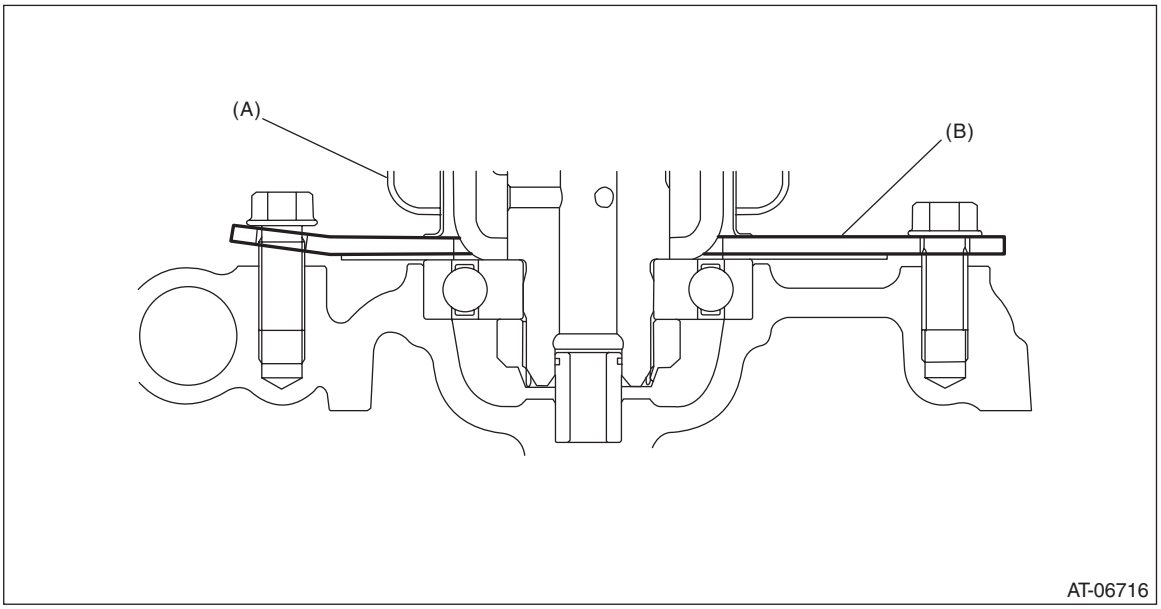
4) Install the selected shims to the primary pulley bearing catch surface.

5) Install the secondary pulley to the drive pinion retainer.



6) Install and tighten the secondary pulley securing bolts.
   (1) Tighten the three bolts until the seating surfaces contact the bearing retainer.

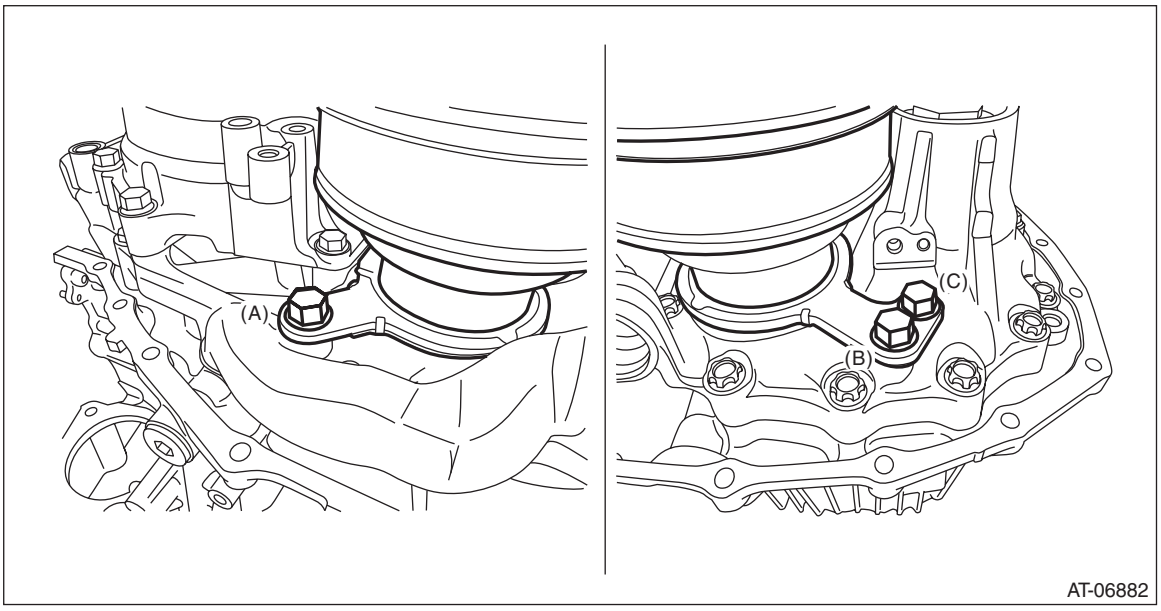
NOTE:
- Be careful not to tilt the bearing retainer of the secondary pulley.
- Apply CVTF to the bolt.



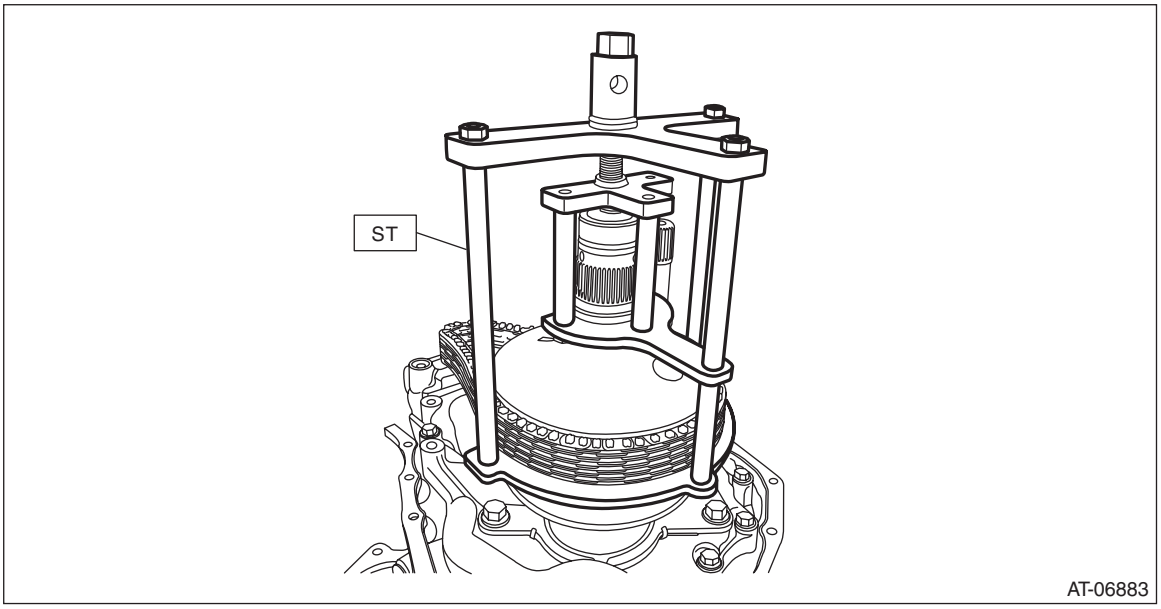
(A) Secondary pulley
(B) Bearing retainer

(2) Tighten the bolts in the order of (A) → (B) → (C) → (B).

***Tightening torque:***
***67.5 N·m (6.9 kgf-m, 49.8 ft-lb)***



7) Place the variator chain on the V groove of the secondary pulley, and set the ST.
ST 18769AA010 EXPANDER PULLEY

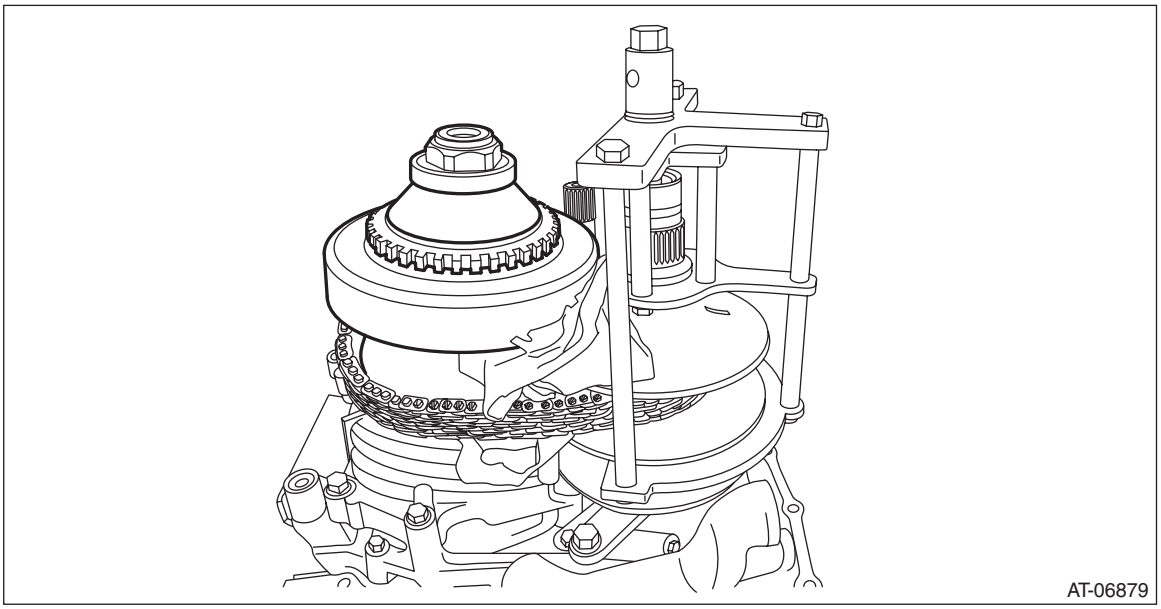


8) Expand the V groove of the secondary pulley.

9) Install the primary pulley to the reverse brake housing together with the variator chain.

**CAUTION:**
**Cover the V grooves of primary pulley and secondary pulley with cloth to protect the both pulleys and variator chain from scratching.**

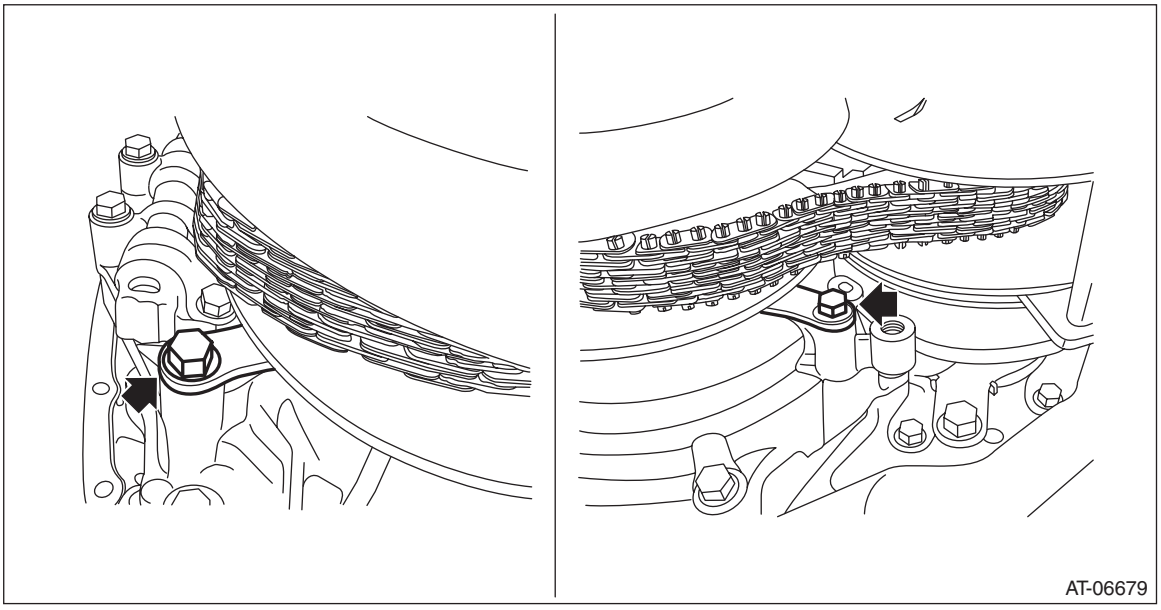
(1) Intersect the V groove of primary pulley and the V groove of secondary pulley and install the secondary pulley while placing the variator chain on secondary pulley.



(2) Install the primary pulley to the reverse brake housing so that the bolt hole of primary bearing retainer and the bolt hole of reverse brake housing are aligned.

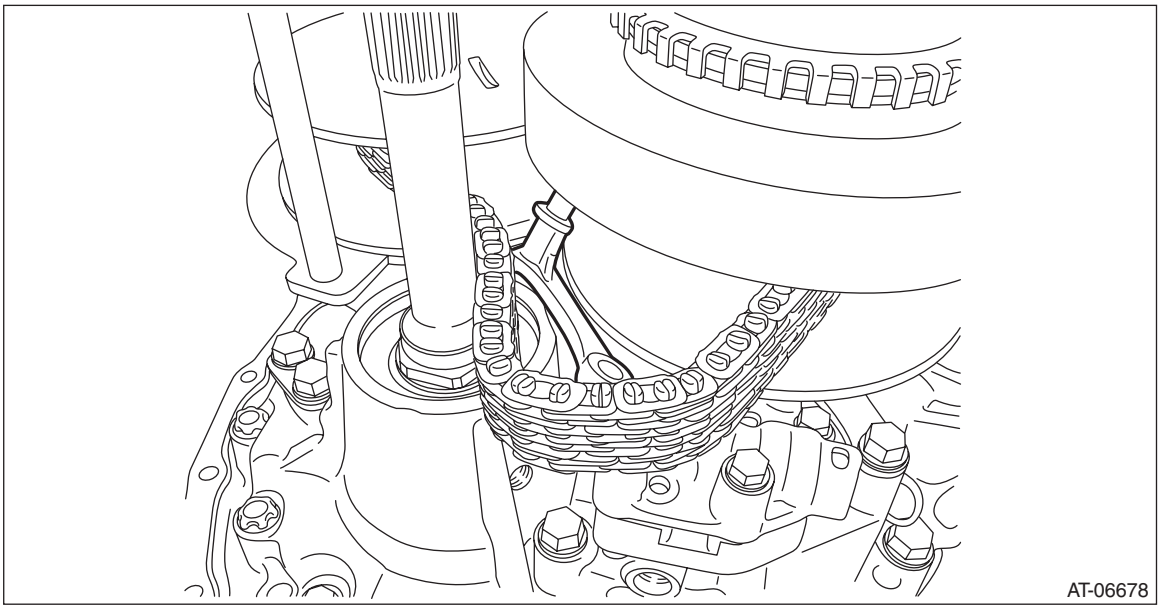
10) Install the primary pulley bolt.

***Tightening torque:***
***21 N·m (2.1 kgf-m, 24.3 ft-lb)***



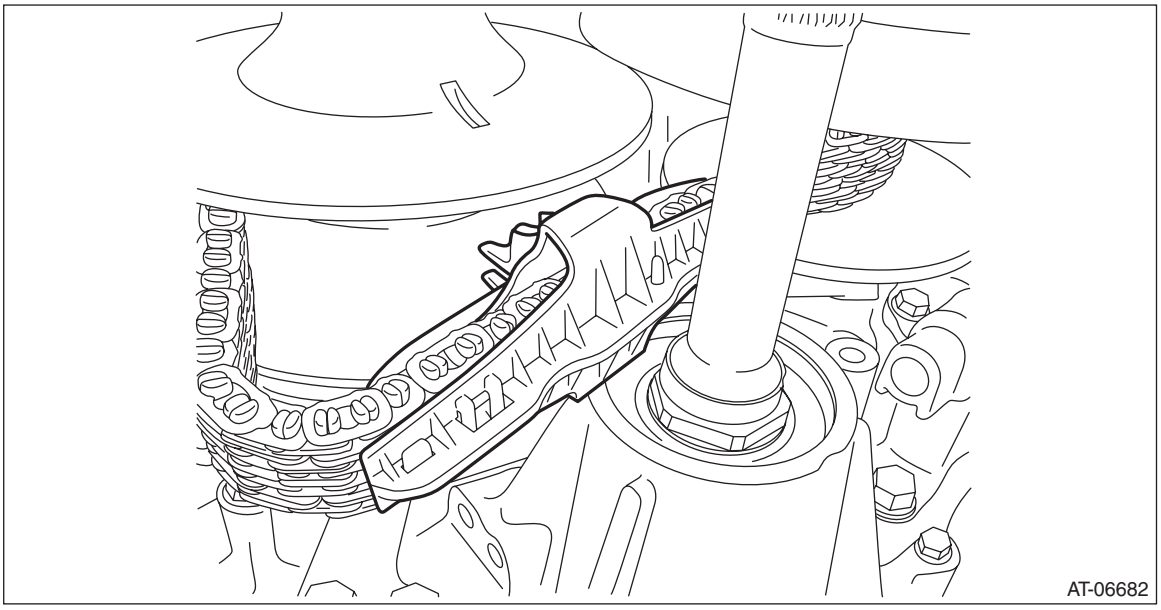
11) Install the chain guide.
(1) Place the support rod inside of the variator chain.

**CAUTION:**
**Protect the both pulleys and variator chain from scratching.**



AT-06678

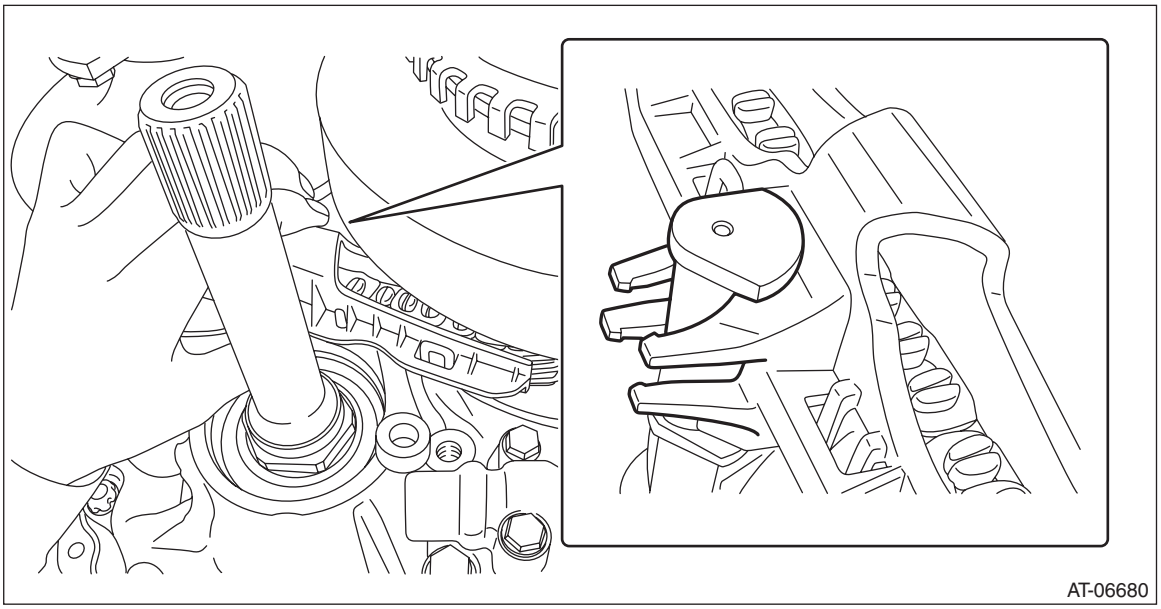
(2) Install the chain guide to the variator chain.



AT-06682

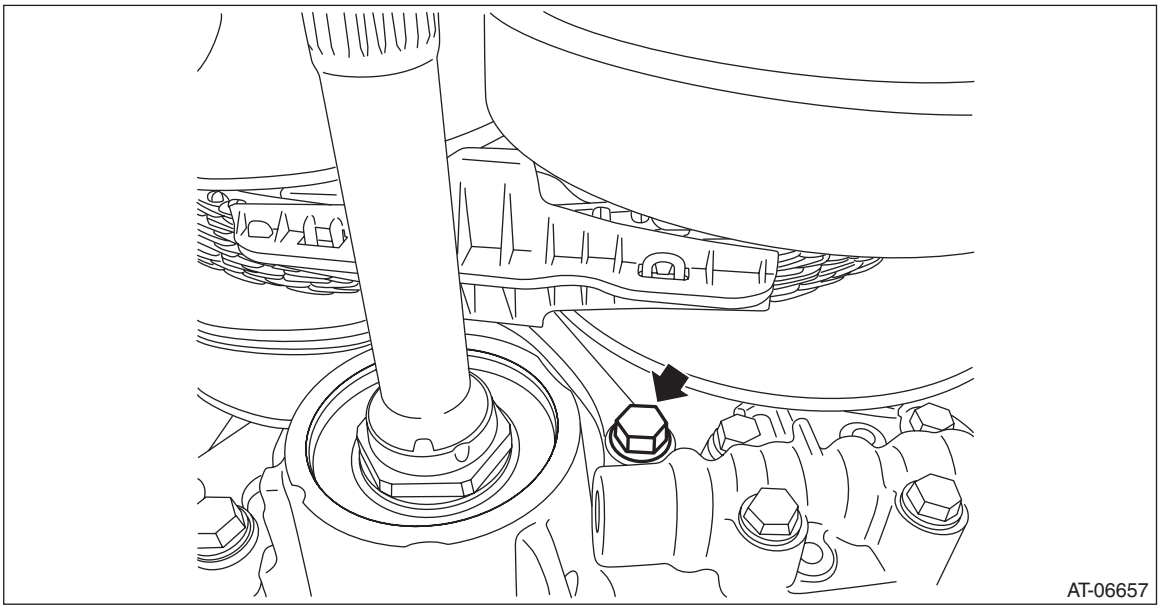
(3) Move the chain guide to the support rod side.

(4) While holding the support rod, press the chain guide so that the support rod runs through between the protrusions of chain guide and install the chain guide to the support rod.



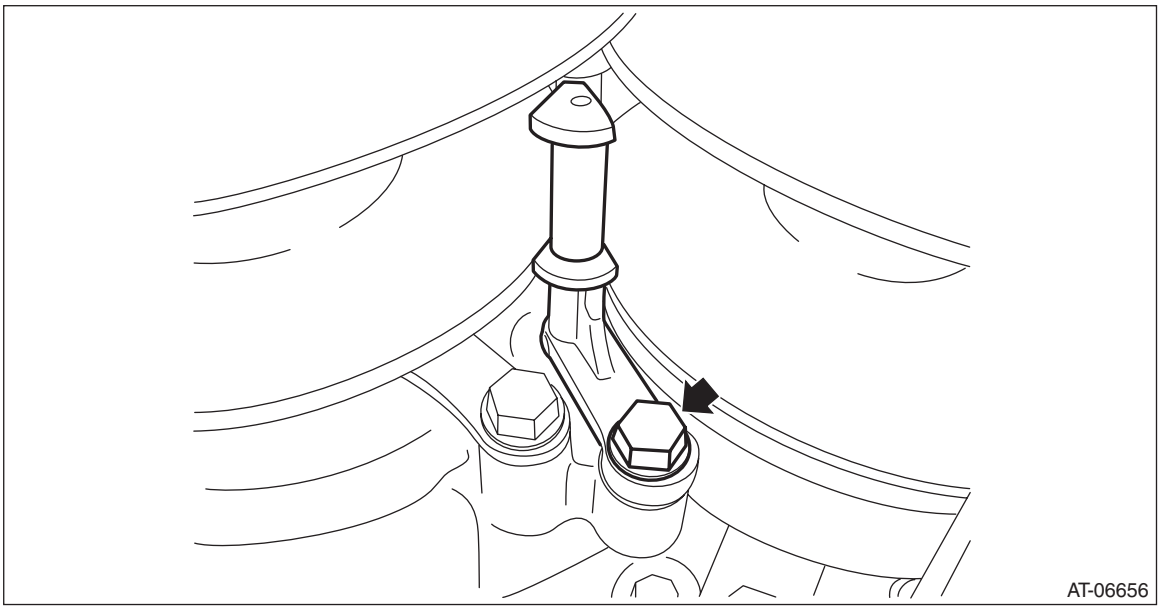
(5) Install the support rod.

***Tightening torque:***
***21 N·m (2.1 kgf-m, 15.5 ft-lb)***

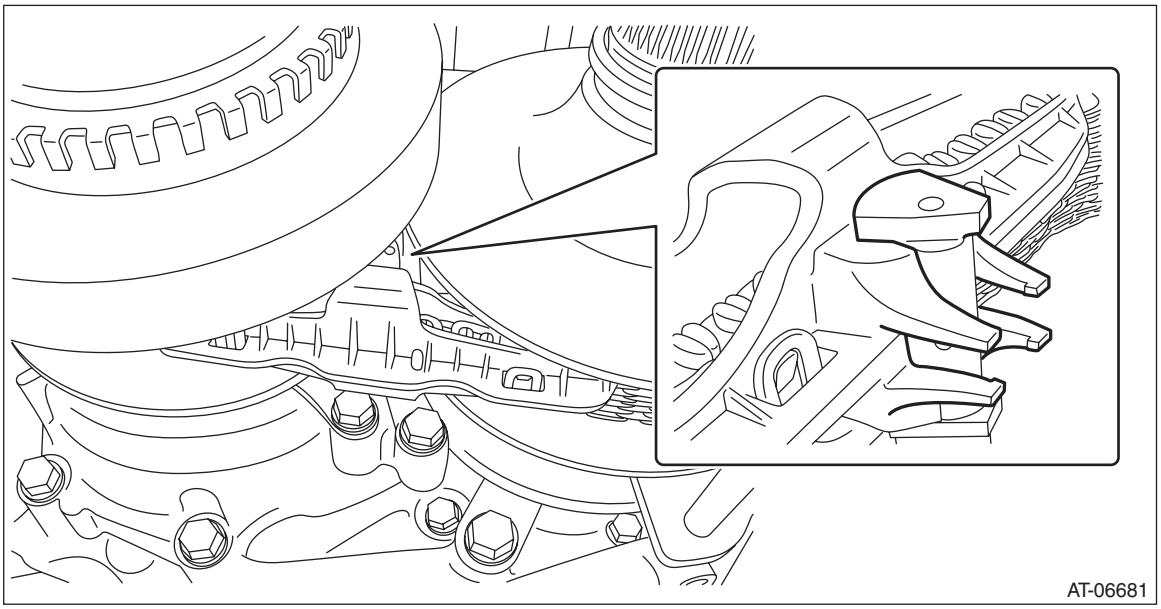


(6) Install the lubrication pipe.

***Tightening torque:***
***21 N·m (2.1 kgf-m, 15.5 ft-lb)***



(7) Install the chain guide so that the lubrication pipe runs through between the protrusions of each chain guide. Then remove the ST (PULLEY EXPANDER).



12) Install the reduction drive gear. <Ref. to CVT-207, INSTALLATION, Reduction Drive Gear.>
13) Select the reduction drive gear shim. <Ref. to CVT-208, ADJUSTMENT, Reduction Drive Gear.>
14) Install the transmission case. <Ref. to CVT-196, INSTALLATION, Transmission Case.>
15) Install the transmission control device. <Ref. to CVT-190, INSTALLATION, Transmission Control Device.>
16) Install the oil strainer and oil pan. <Ref. to CVT-107, INSTALLATION, Oil Pan and Strainer.>
17) Install the reduction driven gear assembly. <Ref. to CVT-179, INSTALLATION, Reduction Driven Gear.>
18) Install the transfer driven gear assembly. <Ref. to CVT-175, INSTALLATION, Transfer Driven Gear.>
19) Install the transfer clutch assembly. <Ref. to CVT-162, INSTALLATION, Transfer Clutch.>
20) Install the parking pawl. <Ref. to CVT-178, INSTALLATION, Parking Pawl.>
21) Install the extension case. <Ref. to CVT-157, INSTALLATION, Extension Case.>
22) Install the inhibitor switch. <Ref. to CVT-95, INSTALLATION, Inhibitor Switch.>
23) Install the secondary speed sensor. <Ref. to CVT-99, INSTALLATION, Secondary Speed Sensor.>
24) Install the primary speed sensor. <Ref. to CVT-102, INSTALLATION, Primary Speed Sensor.>
25) Install the turbine speed sensor. <Ref. to CVT-97, INSTALLATION, Turbine Speed Sensor.>
26) Install the transmission harness. <Ref. to CVT-130, INSTALLATION, Transmission Harness.>
27) Install the control valve body. <Ref. to CVT-116, INSTALLATION, Control Valve Body.>
28) Install the air breather hose. <Ref. to CVT-149, INSTALLATION, Air Breather Hose.>
29) Install the transmission assembly to the vehicle. <Ref. to CVT-67, INSTALLATION, Automatic Transmission Assembly.>

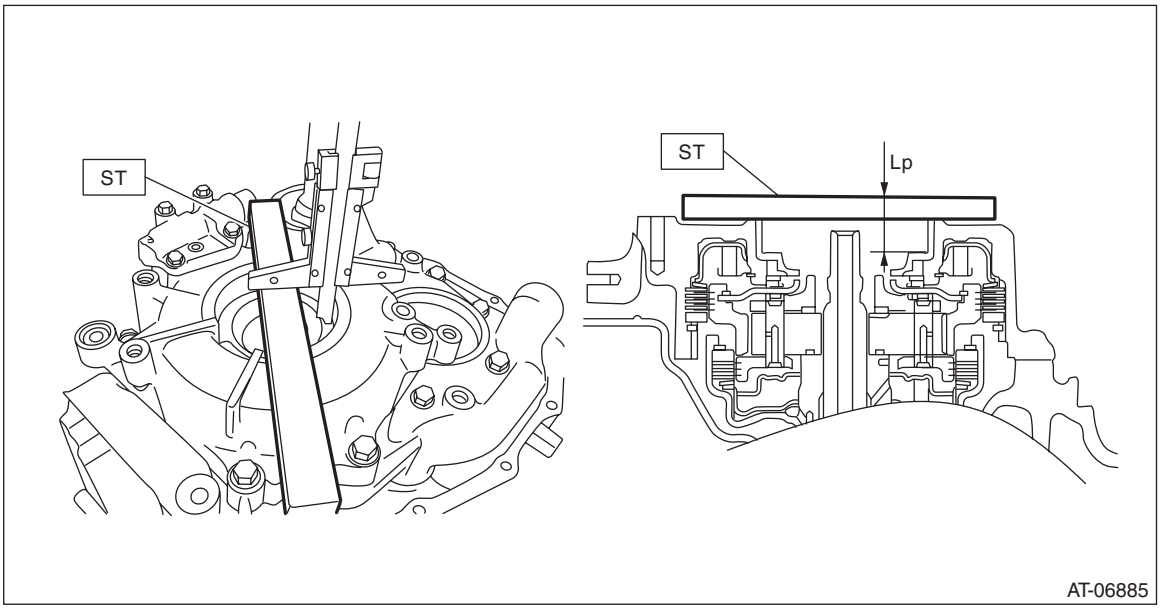
## C: INSPECTION

- Check the surface of primary and secondary pulley cones for damage or wear.
- Check the primary and secondary pulley for damage.
- Check the bearing for seizure or wear.
- Apply CVTF to bearing and rotate the bearing to check for noise or dragging etc.

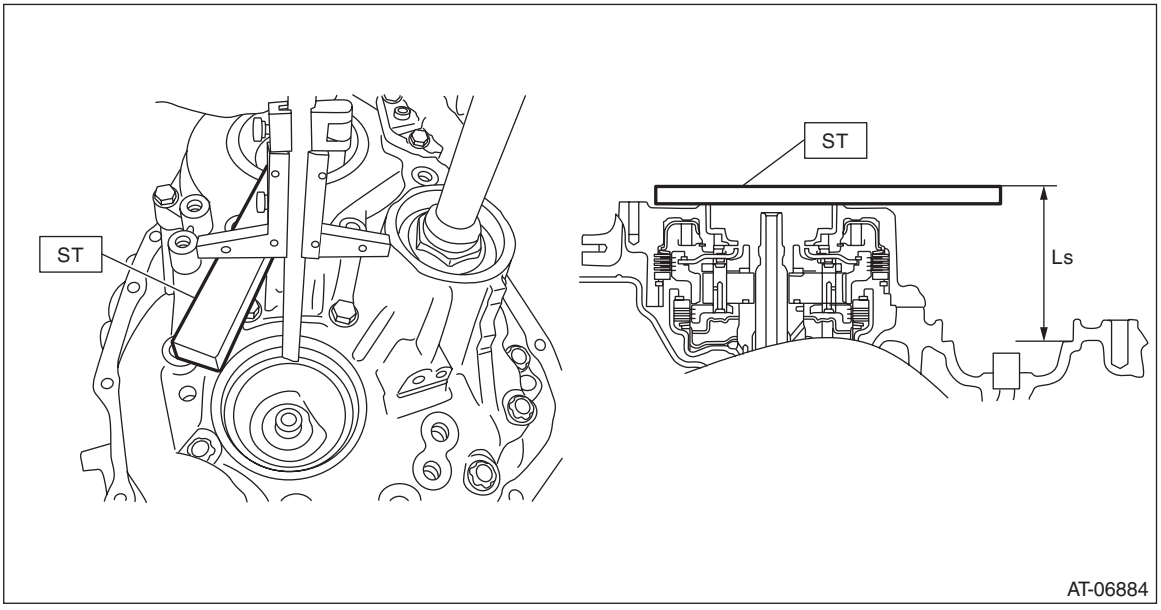
## D: ADJUSTMENT

### 1. PROCEDURE IN REPLACEMENT OF PRIMARY AND SECONDARY PULLEY, OR IN REPLACEMENT OF PRIMARY PULLEY, SECONDARY PULLEY AND VARIATOR CHAIN

1) Measure the depth “Lp” from the ST upper face to the primary pulley bearing catch surface at several points and calculate the average.
ST 499575400 GAUGE



2) Measure the depth “Ls” from the ST upper face to the secondary pulley bearing catch surface at several points and calculate the average.
ST 499575400 GAUGE



3) Calculate the following formula.
Calculation formula:
T (mm) = B – A + Lp – Ls – 28.602
[T (in) = B – A + Lp – Ls – 1.126]
T: Pulley alignment
A: Specified primary pulley dimension
B: Specified secondary pulley dimension
Lp: Depth from the ST upper face to the primary pulley bearing catch surface
Ls: Depth from the ST upper face to the secondary pulley bearing catch surface
28.602 mm (1.126 in): Constant

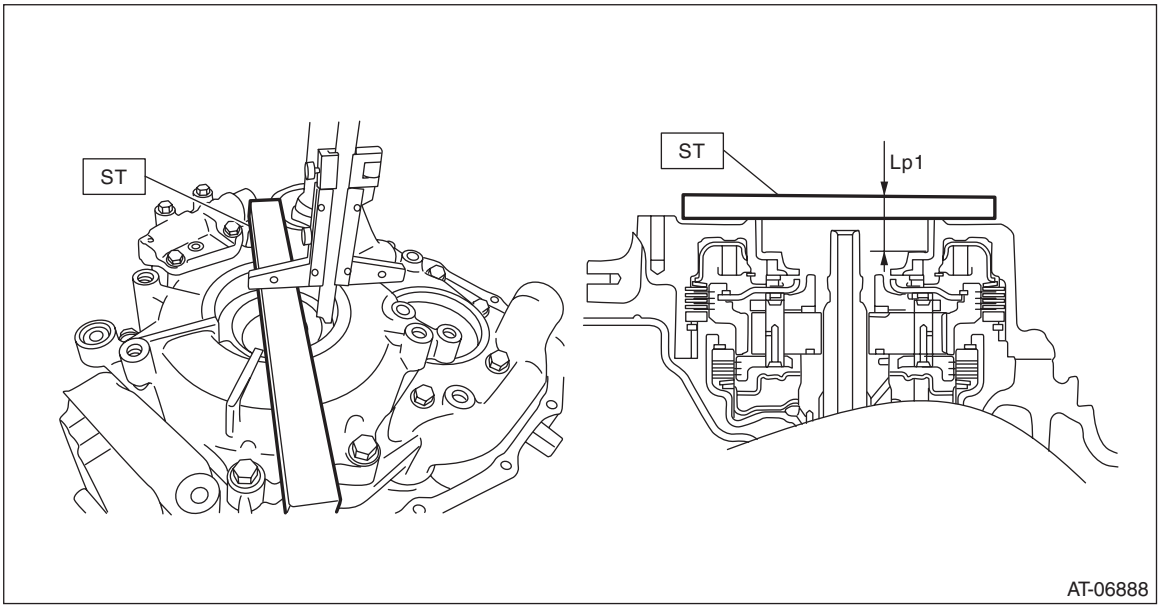
| Pulley alignment<br>T mm (in) | Thickness of shim<br>mm (in) |
|---|---|
| -0.05 — 0.049(-0.002 — 0.002) | No shims |
| 0.050 — 0.149(0.002 — 0.006) | 0.1 (0.004) |
| 0.150 — 0.249(0.006 — 0.010) | 0.2 (0.008) |
| 0.250 — 0.349(0.010 — 0.014) | 0.3 (0.012) |
| 0.350 — 0.449(0.014 — 0.018) | 0.4 (0.016) |
| 0.450 — 0.549(0.018 — 0.022) | 0.5 (0.020) |
| 0.550 — 0.649(0.022 — 0.026) | 0.6 (0.024) |
| 0.650 — 0.749(0.026 — 0.029) | 0.7 (0.028) |
| 0.750 — 0.849(0.029 — 0.033) | 0.8 (0.031) |
| 0.850 — 0.949(0.033 — 0.037) | 0.9 (0.035) |
| 0.950 — 1.049(0.037 — 0.041) | 1.0 (0.039) |
| 1.050 — 1.149(0.041 — 0.045) | 1.1 (0.043) |

4) Select one to two shims so that the total thickness meets the value obtained from step 3).

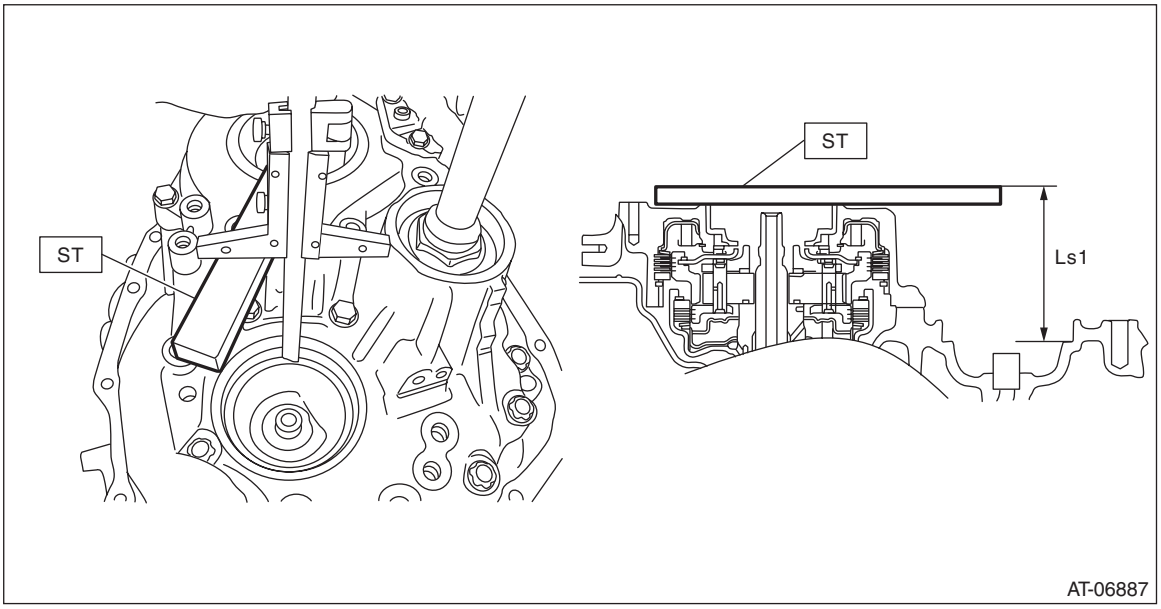
| Part No. | Shim thickness mm (in) |
|---|---|
| 32451AA050 | 0.1 (0.004) |
| 32451AA060 | 0.2 (0.008) |
| 32451AA070 | 0.3 (0.012) |
| 32451AA080 | 0.4 (0.016) |
| 32451AA090 | 0.5 (0.020) |
| 32451AA100 | 0.6 (0.024) |

## 2. PROCEDURE WHEN REPLACING ONLY DRIVE PINION RETAINER OR REVERSE BRAKE HOUSING

1) Clean the mating surface of current drive pinion retainer and converter case.
2) Measure and record the shim thickness that is attached on the current reverse brake housing.
3) Using the current drive pinion retainer, measure the depth “Lp1” from the ST upper face to the primary pulley bearing catch surface at several points and calculate the average.
ST 499575400 GAUGE

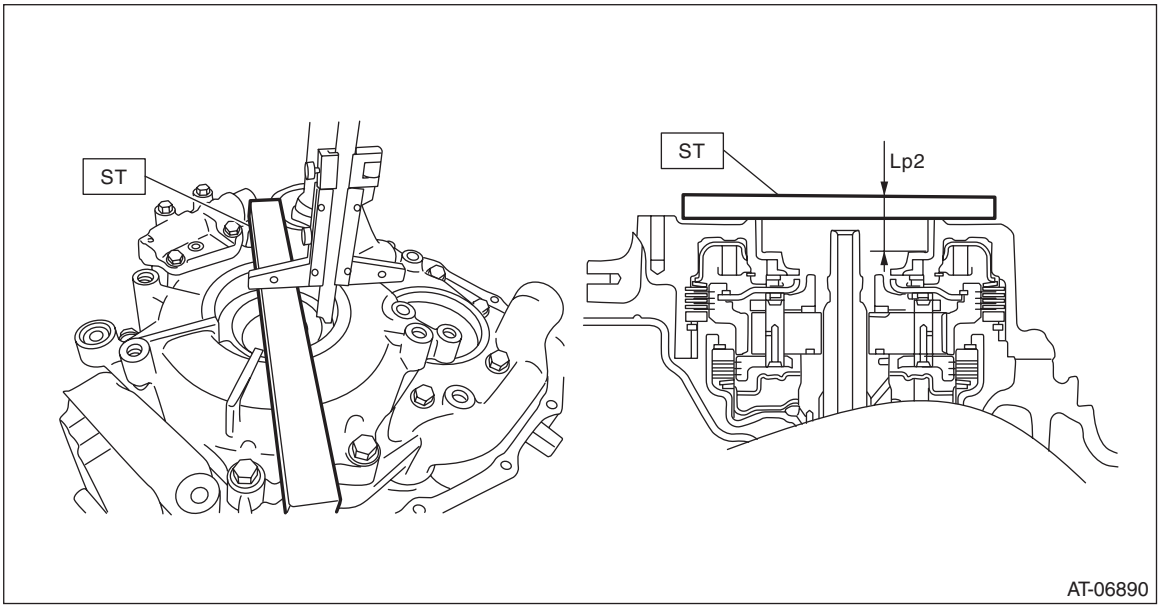


4) Using the current drive pinion retainer or current reverse brake housing, measure the depth “Ls1” from the ST upper face to the secondary pulley bearing catch surface at several points and calculate the average.
ST 499575400 GAUGE

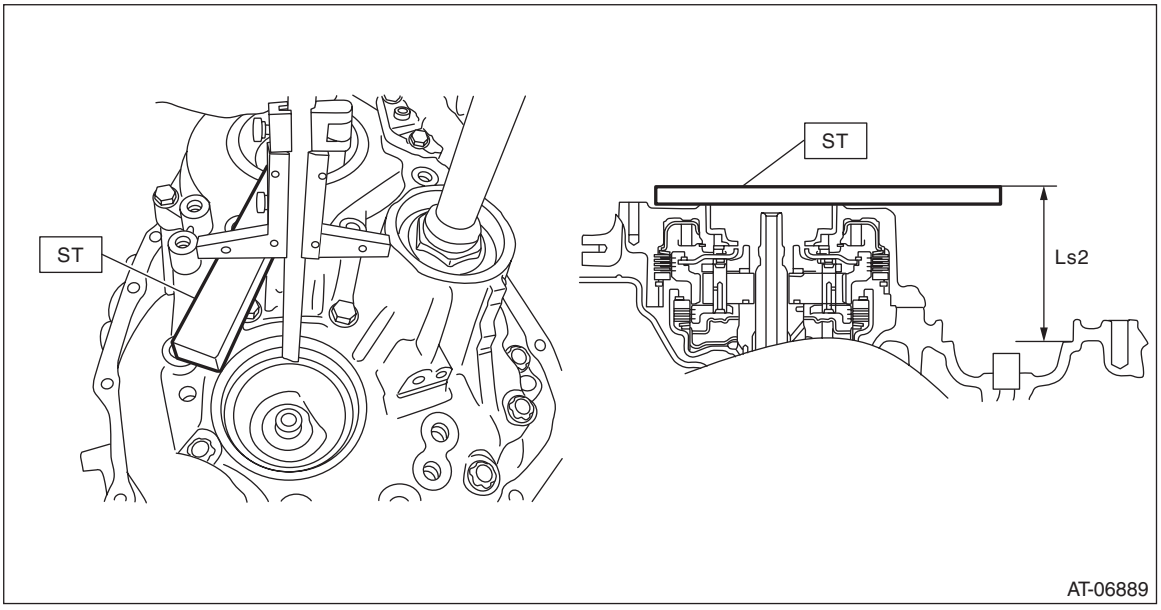


5) Calculate the “LD1” using the following formula and record it.
Calculation formula:
LD1 mm (in) = Ls1 – Lp1
LD1: Height from the primary pulley bearing catch surface to the secondary pulley bearing catch surface
Lp1: Depth from the ST upper face to the primary pulley bearing catch surface
Ls1: Depth from the ST upper face to the secondary pulley bearing catch surface

6) Using the new drive pinion retainer or new reverse brake housing, measure the depth “Lp2” from the ST upper face to the primary pulley bearing catch surface at several points and calculate the average.
ST 499575400 GAUGE



7) Using the new drive pinion retainer or new reverse brake housing, measure the depth “Ls2” from the ST upper face to the secondary pulley bearing catch surface at several points and calculate the average.
ST 499575400 GAUGE



8) Calculate the “LD2” using the following formula and record it.
Calculation formula:
LD2 mm (in) = Ls2 – Lp2
LD2: Height from the primary pulley bearing catch surface to the secondary pulley bearing catch surface
Lp2: Depth from the ST upper face to the primary pulley bearing catch surface
Ls2: Depth from the ST upper face to the secondary pulley bearing catch surface

9) Calculate the recorded values of “LD1” and “LD2” to obtain the positive number to select the shims.
Calculation formula: T1 mm (in) = LD1 – LD2 or T2 mm (in) = LD2 – LD1
T1, T2: Difference between new drive pinion retainer or new reverse brake housing and current drive pinion retainer or current reverse brake housing
LD1: Calculated value of current drive pinion retainer or current reverse brake housing
LD2: Calculated value of new drive pinion retainer or new reverse brake housing

| Difference of the case (T1) mm (in) | Shim selection procedure |
|---|---|
| 0 — 0.050 (0 — 0.00197) | Select a new shim of the same thickness with the shim that is used on the primary pulley side of the current reverse brake housing. |
| 0.051 — 0.150 (0.00201 — 0.00591) | Select a shim which is 0.1 mm (0.004 in) thicker than the shim that is used on the primary pulley side of the current reverse brake housing. |
| 0.151 — 0.250 (0.00594 — 0.00984) | Select a shim which is 0.2 mm (0.008 in) thicker than the shim that is used on the primary pulley side of the current reverse brake housing. |
| 0.251 — 0.350 (0.00988 — 0.01378) | Select a shim which is 0.3 mm (0.012 in) thicker than the shim that is used on the primary pulley side of the current reverse brake housing. |
| 0.351 — 0.450 (0.01382 — 0.01772) | Select a shim which is 0.4 mm (0.016 in) thicker than the shim that is used on the primary pulley side of the current reverse brake housing. |
| 0.451 — 0.550 (0.01776 — 0.02165) | Select a shim which is 0.5 mm (0.020 in) thicker than the shim that is used on the primary pulley side of the current reverse brake housing. |
| 0.551 — 0.600 (0.02169 — 0.02362) | Select a shim which is 0.6 mm (0.024 in) thicker than the shim that is used on the primary pulley side of the current reverse brake housing. |

| Difference of the case (T2) mm (in) | Shim selection procedure |
|---|---|
| 0 — 0.050 (0 — 0.00197) | Select a new shim of the same thickness with the shim that is used on the primary pulley side of the current reverse brake housing. |
| 0.051 — 0.150 (0.00201 — 0.00591) | Select a shim which is 0.1 mm (0.004 in) thinner than the shim that is used on the primary pulley side of the current reverse brake housing. |
| 0.151 — 0.250 (0.00594 — 0.00984) | Select a shim which is 0.2 mm (0.008 in) thinner than the shim that is used on the primary pulley side of the current reverse brake housing. |
| 0.251 — 0.350 (0.00988 — 0.01378) | Select a shim which is 0.3 mm (0.012 in) thinner than the shim that is used on the primary pulley side of the current reverse brake housing. |
| 0.351 — 0.450 (0.01382 — 0.01772) | Select a shim which is 0.4 mm (0.016 in) thinner than the shim that is used on the primary pulley side of the current reverse brake housing. |
| 0.451 — 0.550 (0.01776 — 0.02165) | Select a shim which is 0.5 mm (0.020 in) thinner than the shim that is used on the primary pulley side of the current reverse brake housing. |
| 0.551 — 0.600 (0.02169 — 0.02362) | Select a shim which is 0.6 mm (0.024 in) thinner than the shim that is used on the primary pulley side of the current reverse brake housing. |

# 38.Variator Chain

## A: REMOVAL

For removal of variator chain, refer to “Primary Pulley and Secondary Pulley”. <Ref. to CVT-210, REMOVAL, Primary Pulley and Secondary Pulley.>

## B: INSTALLATION

For installation of variator chain, refer to “Primary Pulley and Secondary Pulley”. <Ref. to CVT-217, INSTALLATION, Primary Pulley and Secondary Pulley.>

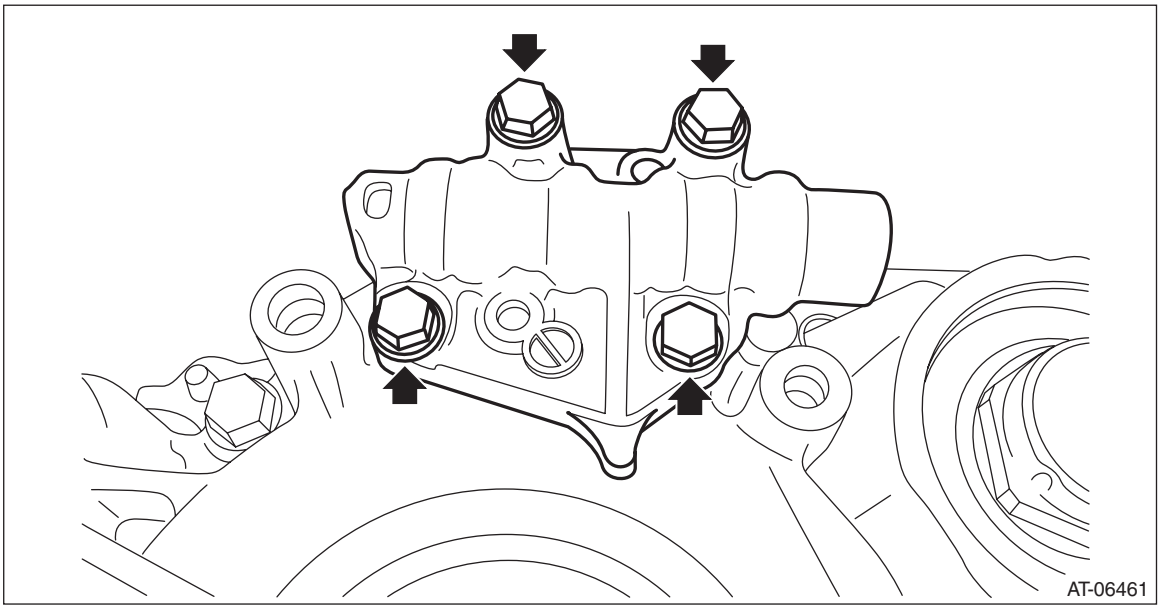
## C: INSPECTION

Check the variator chain for damage and wear.

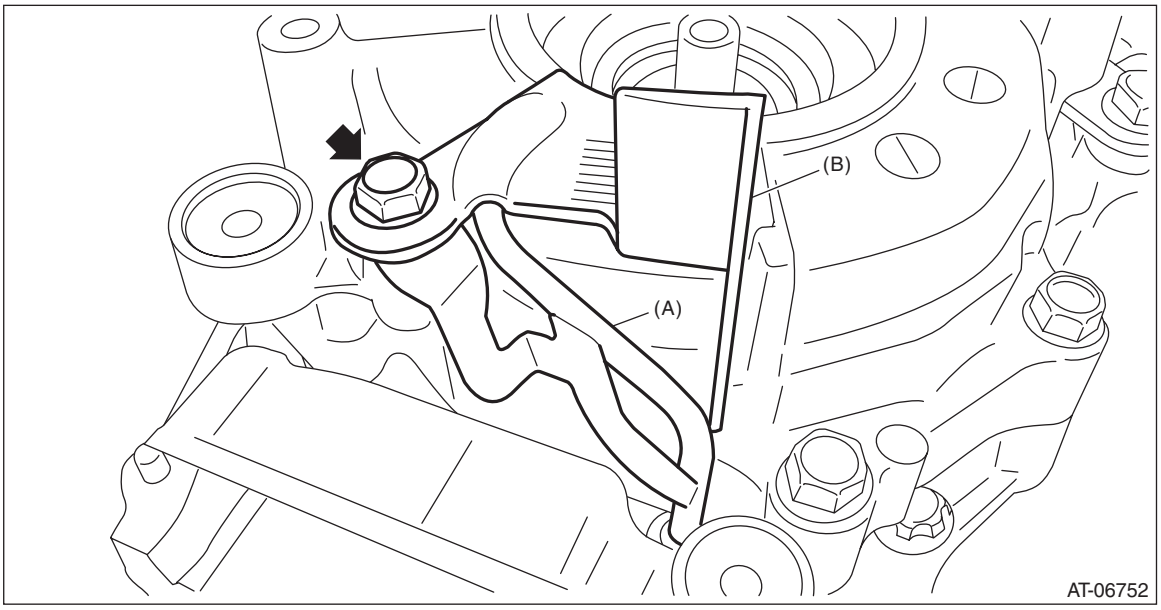
# 39.Reverse Brake Assembly

## A: REMOVAL

1) Remove the transmission assembly from the vehicle. <Ref. to CVT-56, REMOVAL, Automatic Transmission Assembly.>
2) Remove the air breather hose. <Ref. to CVT-148, REMOVAL, Air Breather Hose.>
3) Remove the control valve body. <Ref. to CVT-110, REMOVAL, Control Valve Body.>
4) Remove the transmission harness. <Ref. to CVT-124, REMOVAL, Transmission Harness.>
5) Remove the turbine speed sensor. <Ref. to CVT-97, REMOVAL, Turbine Speed Sensor.>
6) Remove the secondary speed sensor. <Ref. to CVT-99, REMOVAL, Secondary Speed Sensor.>
7) Remove the primary speed sensor. <Ref. to CVT-101, REMOVAL, Primary Speed Sensor.>
8) Remove the inhibitor switch. <Ref. to CVT-93, REMOVAL, Inhibitor Switch.>
9) Remove the extension case. <Ref. to CVT-156, REMOVAL, Extension Case.>
10) Remove the transfer clutch assembly. <Ref. to CVT-160, REMOVAL, Transfer Clutch.>
11) Remove the transfer driven gear assembly. <Ref. to CVT-174, REMOVAL, Transfer Driven Gear.>
12) Remove the parking pawl. <Ref. to CVT-177, REMOVAL, Parking Pawl.>
13) Remove the reduction driven gear assembly. <Ref. to CVT-179, REMOVAL, Reduction Driven Gear.>
14) Remove the oil pan and oil strainer. <Ref. to CVT-106, REMOVAL, Oil Pan and Strainer.>
15) Remove the transmission control device. <Ref. to CVT-187, REMOVAL, Transmission Control Device.>
16) Remove the transmission case. <Ref. to CVT-193, REMOVAL, Transmission Case.>
17) Remove the reduction drive gear. <Ref. to CVT-206, REMOVAL, Reduction Drive Gear.>
18) Remove the primary pulley, secondary pulley and variator chain. <Ref. to CVT-210, REMOVAL, Primary Pulley and Secondary Pulley.>
19) Remove the manual valve assembly.

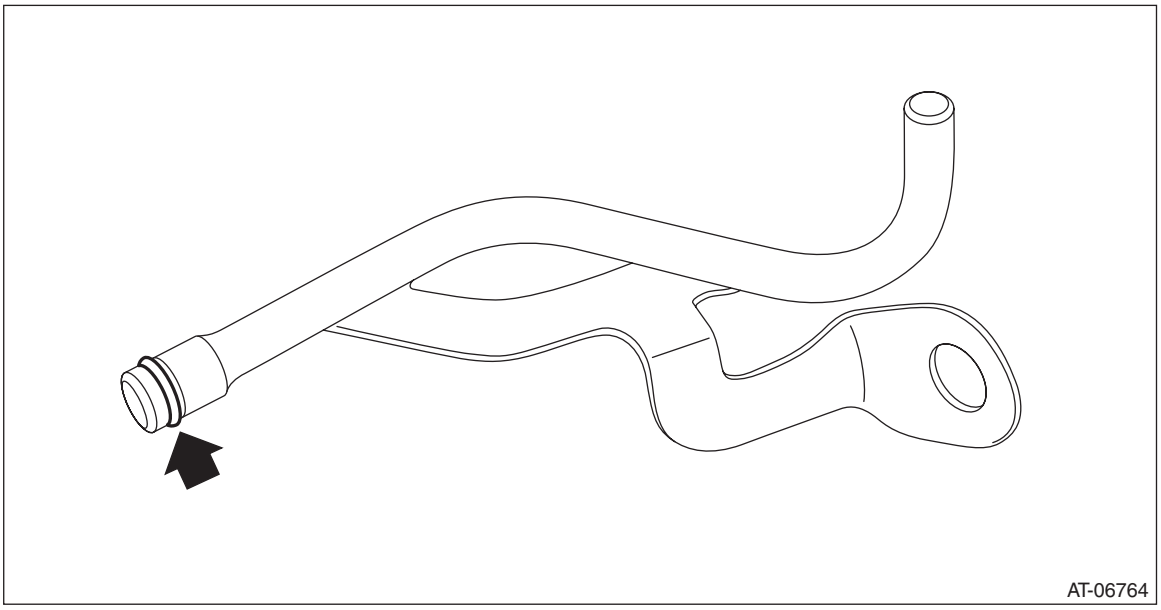


20) Remove the oil guide and lubrication pipe.

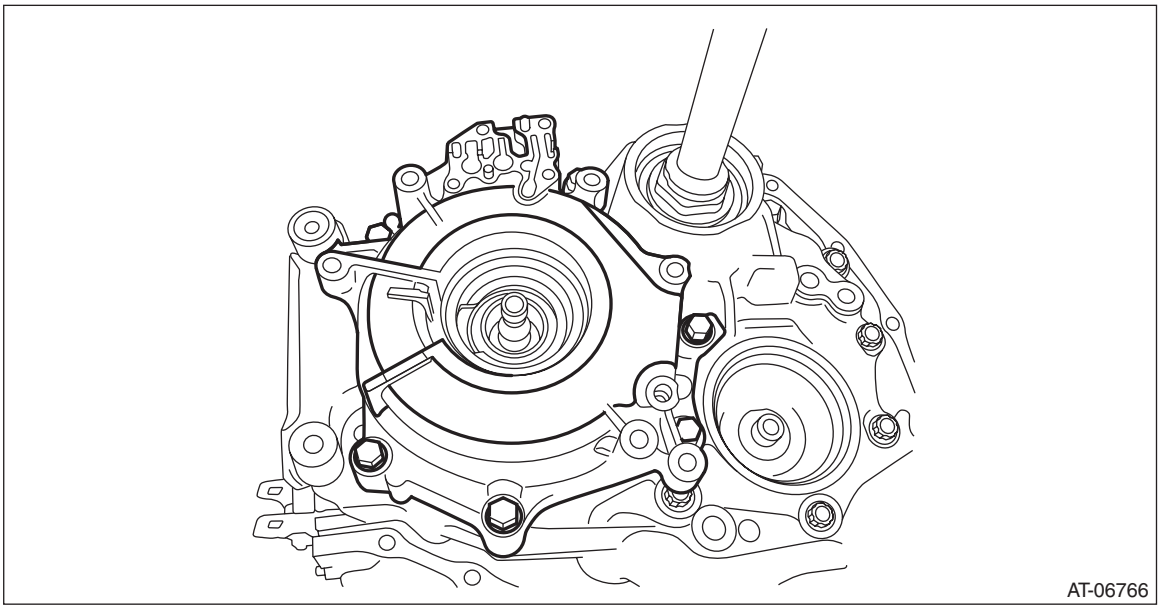


(A) Lubrication pipe
(B) Oil guide

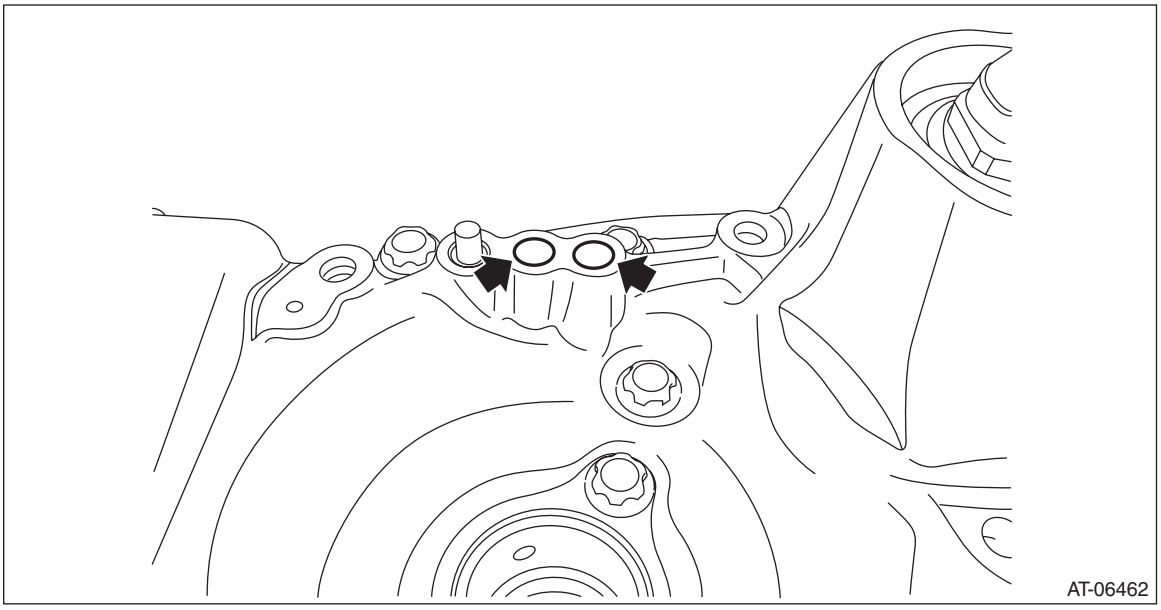
21) Remove the O-ring from lubrication pipe.



22) Remove the reverse brake assembly.

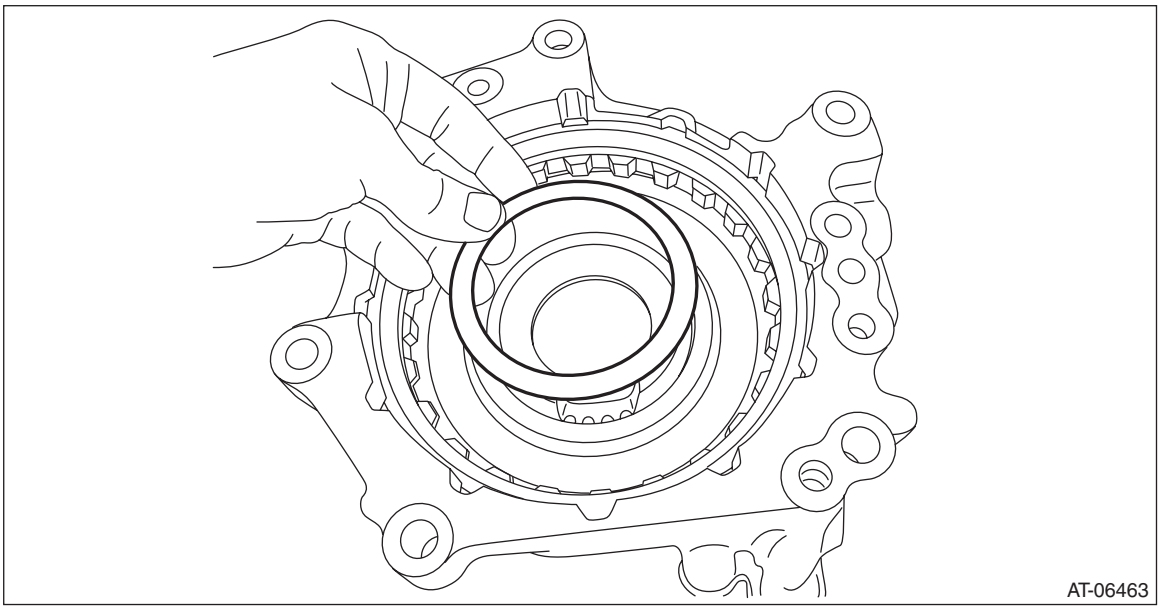


23) Remove the O-ring.



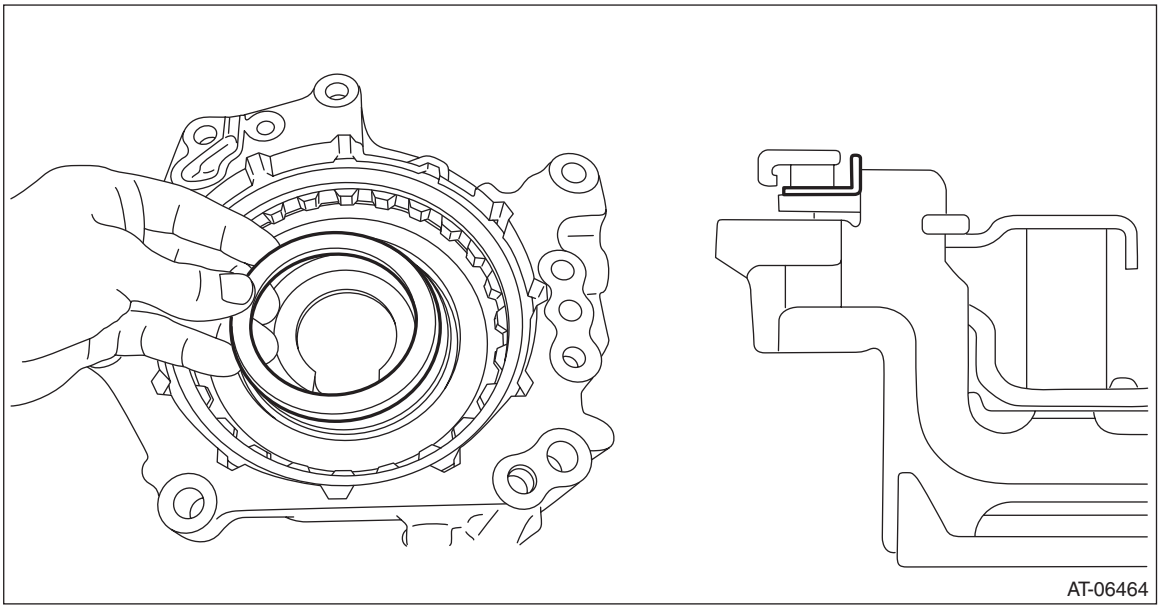
## B: INSTALLATION

1) Select a washer. <Ref. to CVT-263, ADJUSTMENT, Forward Clutch Assembly.>
2) Install the selected washer to the reverse brake housing.

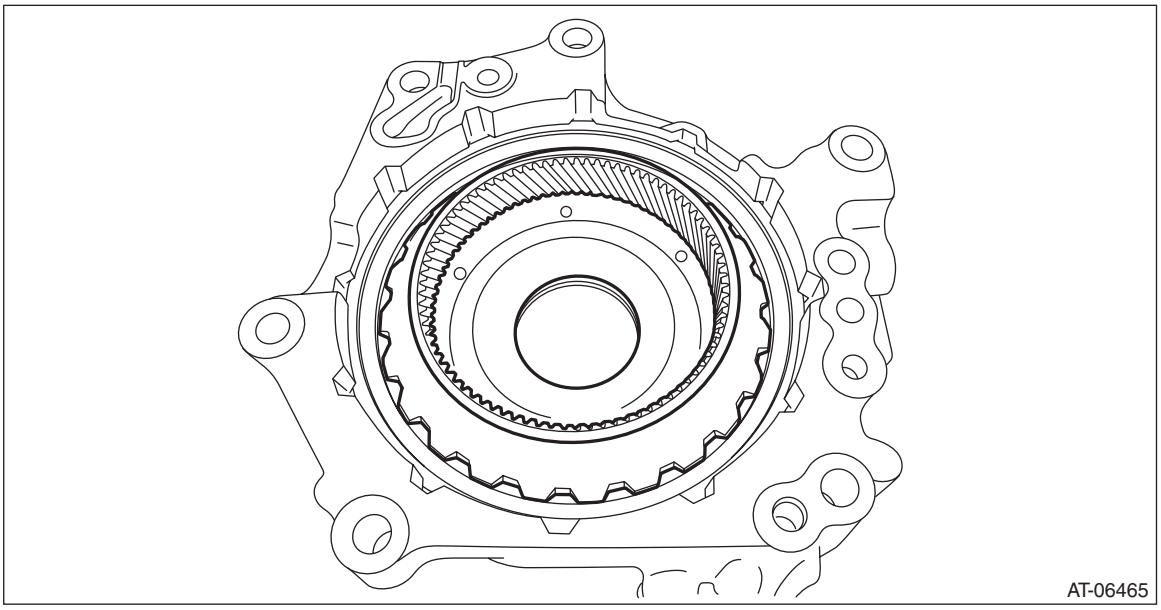


3) Install the thrust bearing to the reverse brake housing.

NOTE:
Face the temper color surface to the reverse brake side.

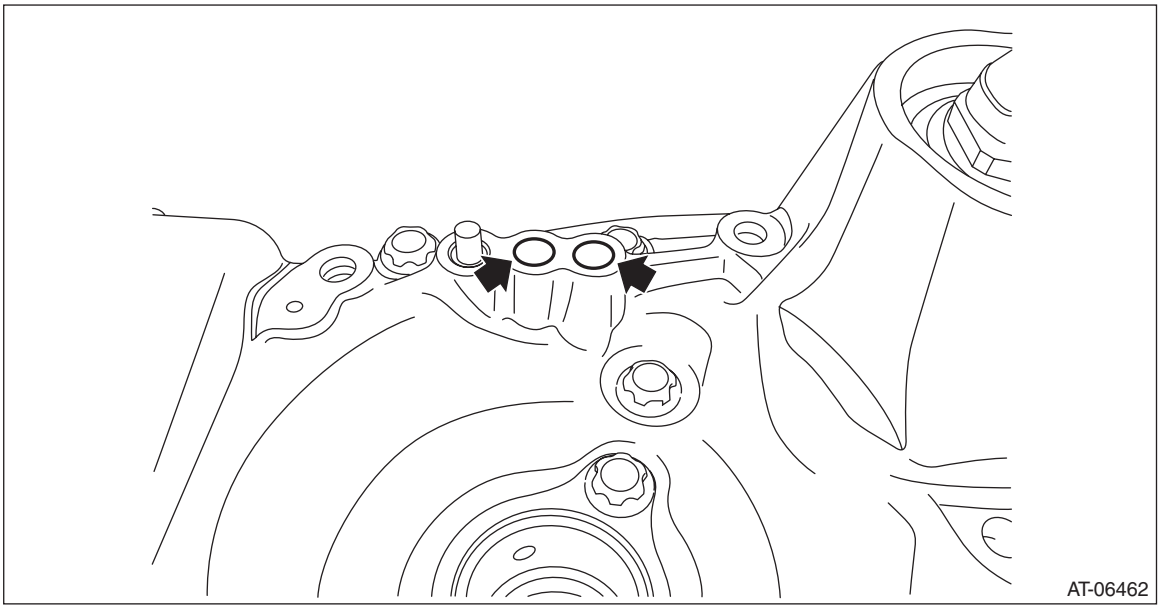


4) Remove the internal gear from the forward clutch assembly, and install it to the reverse brake housing.



5) Install the O-ring.

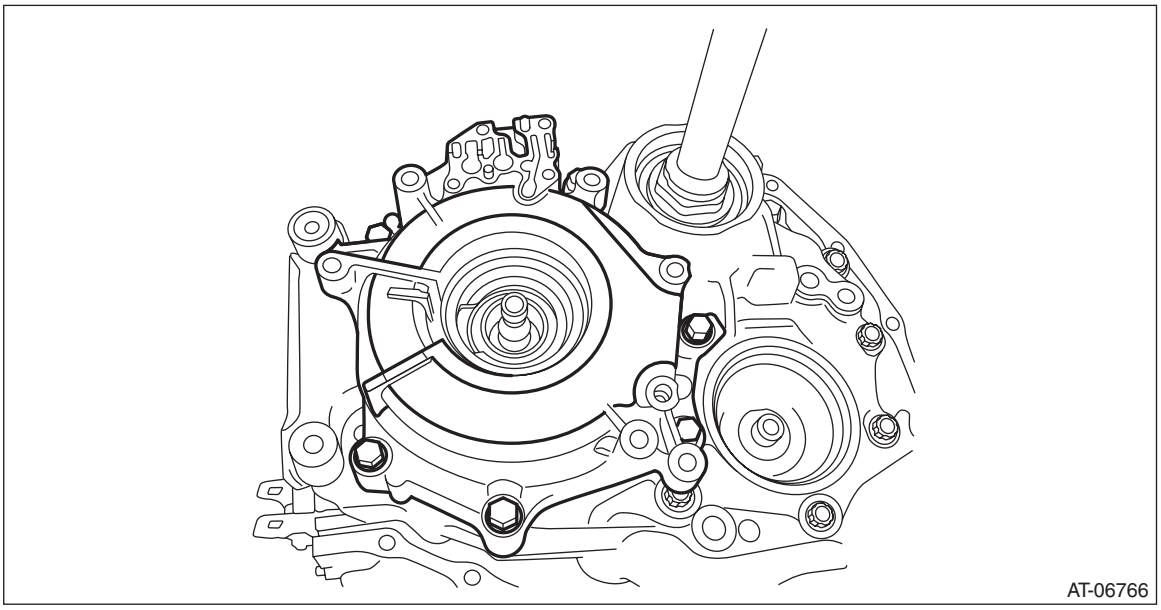
NOTE:
- Install a new O-ring.
- Apply CVTF to the O-ring.



6) Install the reverse brake assembly and internal gear as a unit to the drive pinion retainer.

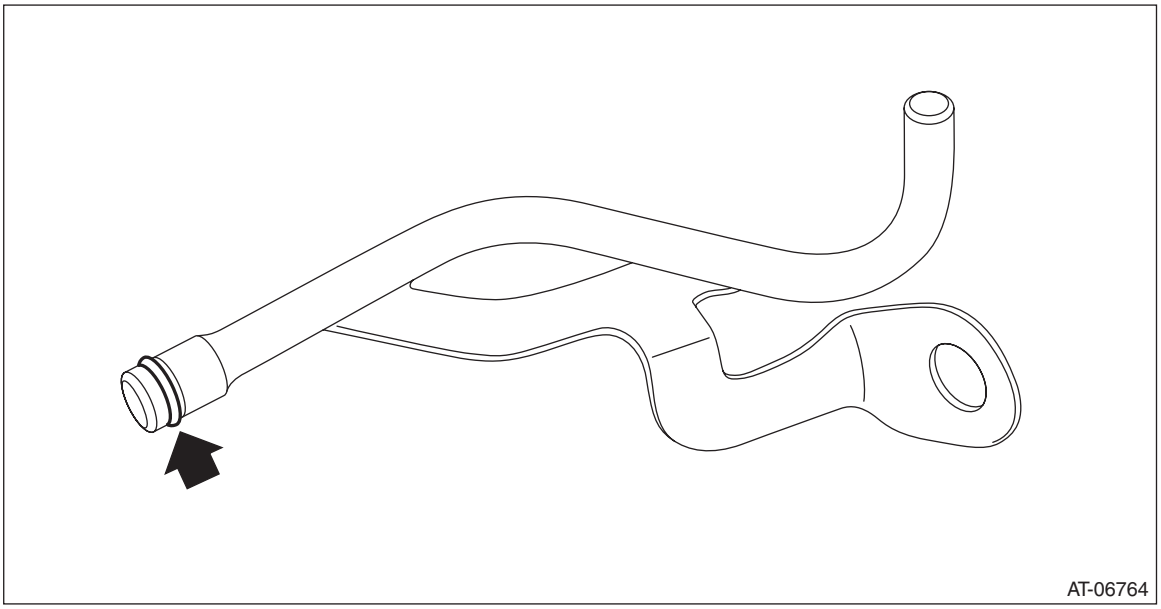
NOTE:
Slowly rotate the input shaft by hand to engage the internal gear and pinion gear of planetary carrier.

***Tightening torque:***
***37 N·m (3.8 kgf-m, 27.3 ft-lb)***



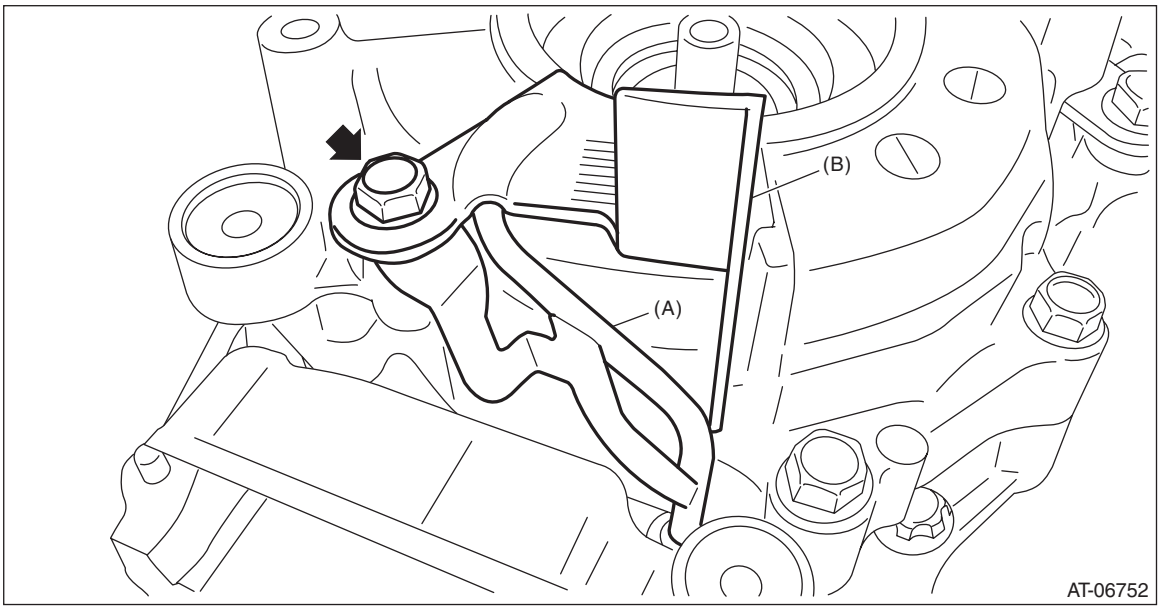
7) Install the O-ring to the lubrication pipe.

NOTE:
- Install a new O-ring.
- Apply CVTF to the O-ring.



8) Install the lubrication pipe and oil guide.

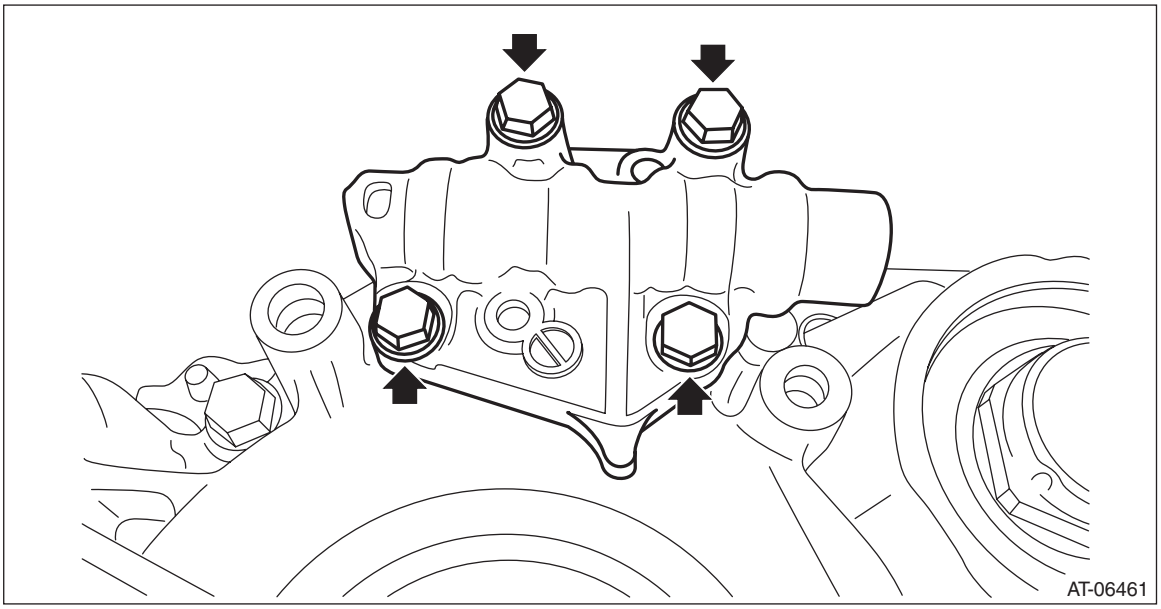
***Tightening torque:***
***16 N·m (1.6 kgf-m, 11.8 ft-lb)***



(A) Lubrication pipe
(B) Oil guide

9) Install the manual valve assembly and separator plate.

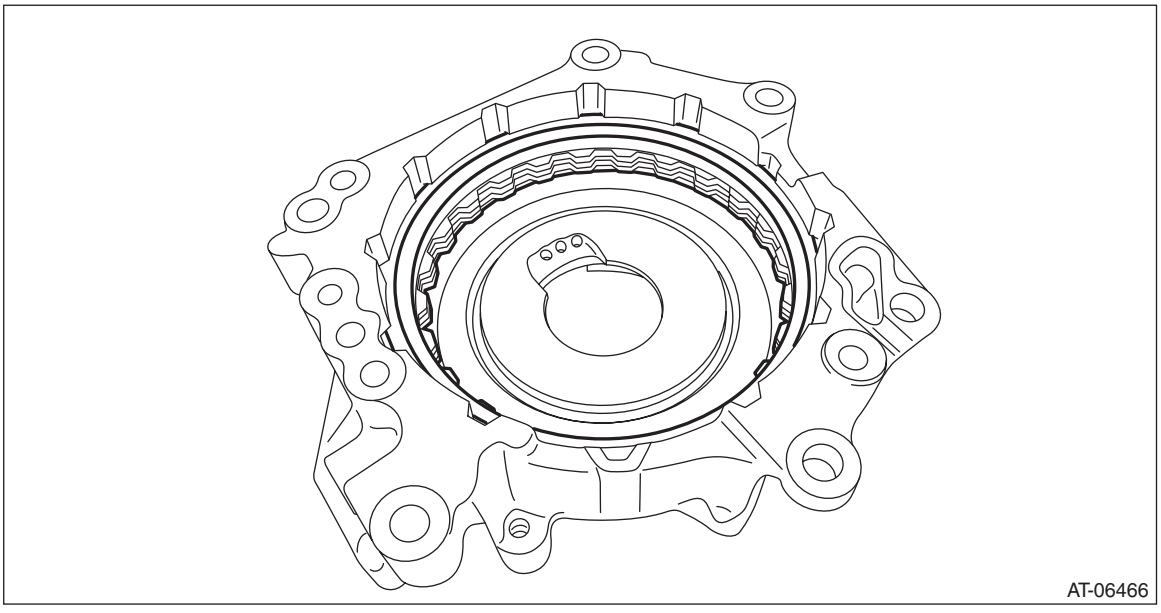
***Tightening torque:***
***9 N·m (0.9 kgf-m, 6.6 ft-lb)***



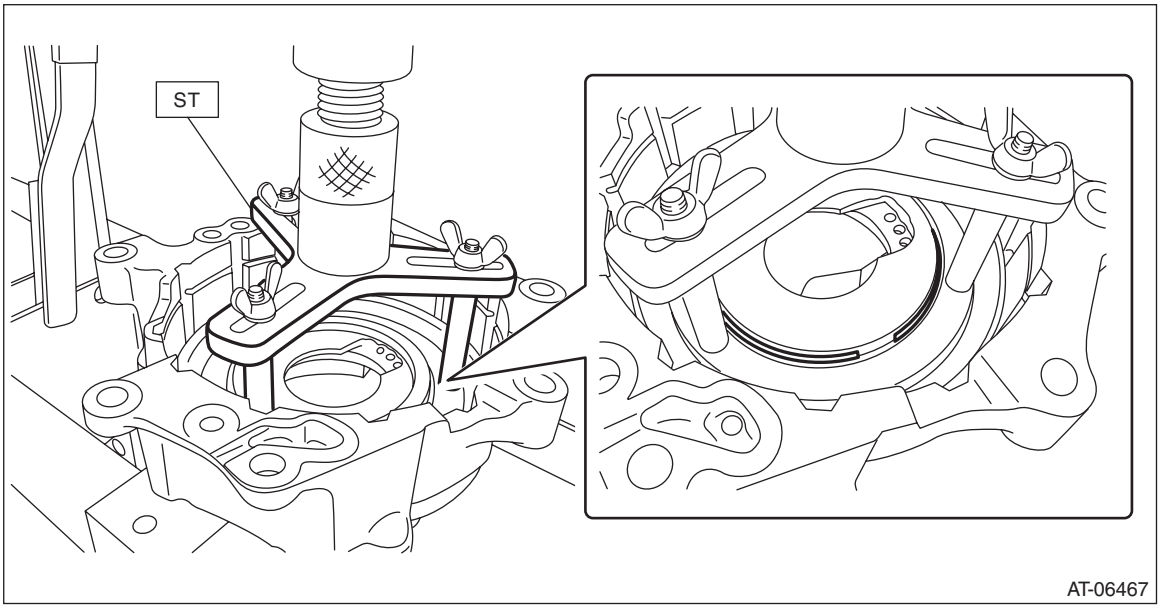
10) Install the primary pulley, secondary pulley and variator chain. <Ref. to CVT-217, INSTALLATION, Primary Pulley and Secondary Pulley.>
11) Select shims for pulley alignment. <Ref. to CVT-225, ADJUSTMENT, Primary Pulley and Secondary Pulley.>
12) Install the reduction drive gear. <Ref. to CVT-207, INSTALLATION, Reduction Drive Gear.>
13) Install the transmission case. <Ref. to CVT-196, INSTALLATION, Transmission Case.>
14) Install the transmission control device. <Ref. to CVT-190, INSTALLATION, Transmission Control Device.>
15) Install the oil strainer and oil pan. <Ref. to CVT-107, INSTALLATION, Oil Pan and Strainer.>
16) Install the reduction driven gear assembly. <Ref. to CVT-179, INSTALLATION, Reduction Driven Gear.>
17) Install the transfer driven gear assembly. <Ref. to CVT-175, INSTALLATION, Transfer Driven Gear.>
18) Install the transfer clutch assembly. <Ref. to CVT-162, INSTALLATION, Transfer Clutch.>
19) Install the parking pawl. <Ref. to CVT-178, INSTALLATION, Parking Pawl.>
20) Install the extension case. <Ref. to CVT-157, INSTALLATION, Extension Case.>
21) Install the inhibitor switch. <Ref. to CVT-95, INSTALLATION, Inhibitor Switch.>
22) Install the secondary speed sensor. <Ref. to CVT-99, INSTALLATION, Secondary Speed Sensor.>
23) Install the primary speed sensor. <Ref. to CVT-102, INSTALLATION, Primary Speed Sensor.>
24) Install the turbine speed sensor. <Ref. to CVT-97, INSTALLATION, Turbine Speed Sensor.>
25) Install the transmission harness. <Ref. to CVT-130, INSTALLATION, Transmission Harness.>
26) Install the control valve body. <Ref. to CVT-116, INSTALLATION, Control Valve Body.>
27) Install the air breather hose. <Ref. to CVT-149, INSTALLATION, Air Breather Hose.>
28) Install the transmission assembly to the vehicle. <Ref. to CVT-67, INSTALLATION, Automatic Transmission Assembly.>

## C: DISASSEMBLY

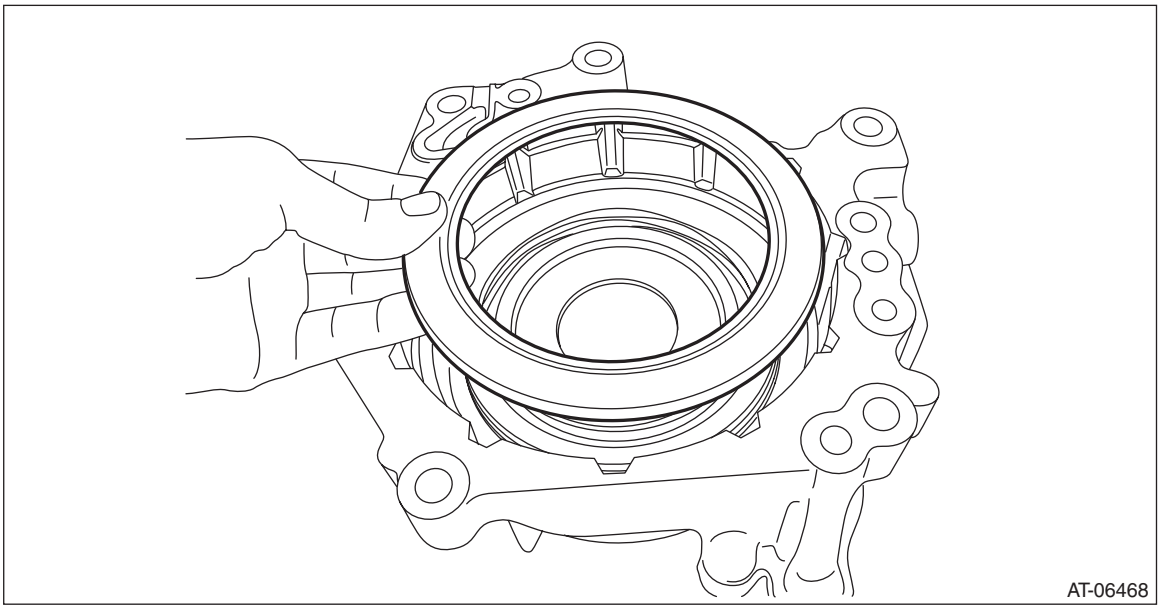
1) Remove the snap ring.
2) Remove the retaining plate, drive plate, driven plate and dish plate.



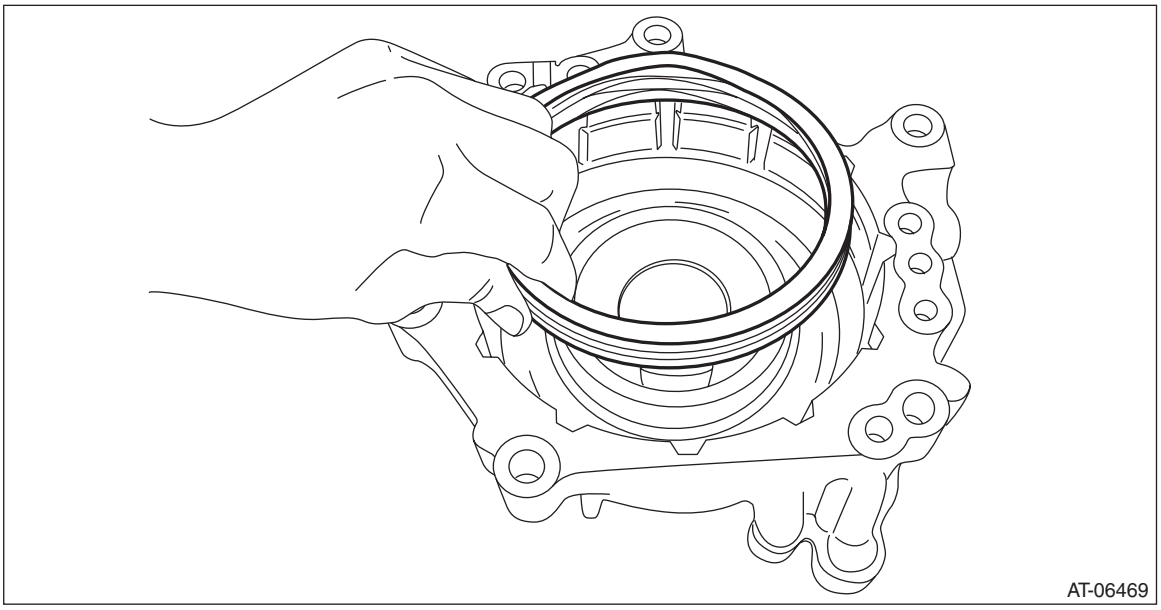
3) Compress the return spring using the ST to remove the snap ring.
ST 18762AA000 COMPRESSOR SPECIAL TOOL



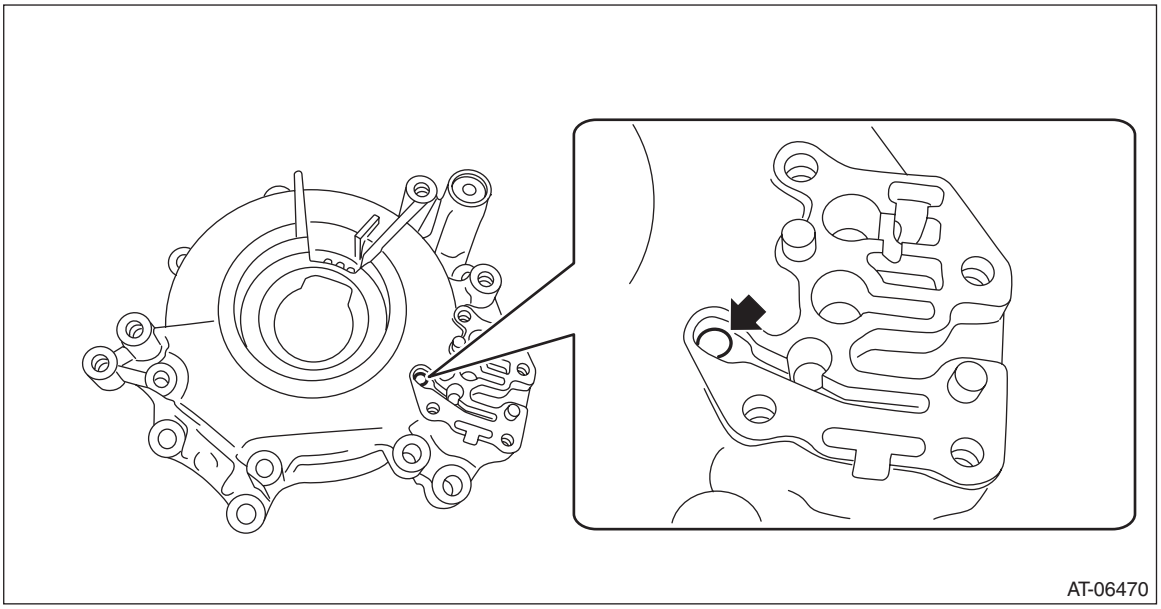
4) Using the ST, remove the snap ring and spring retainer.



5) Remove the return spring.



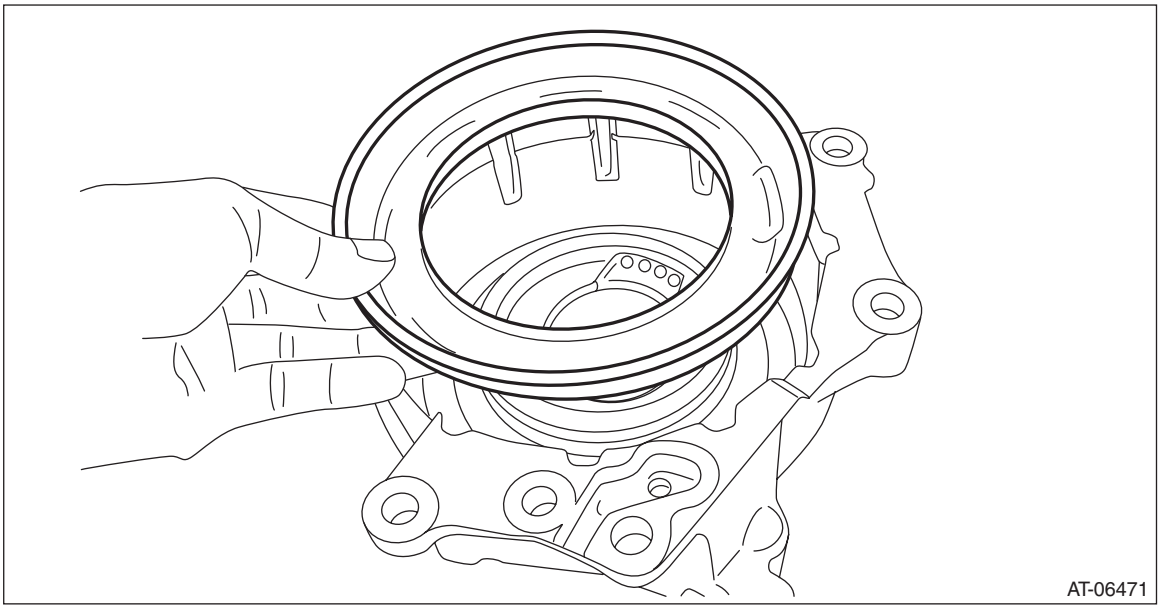
6) Remove the reverse brake piston by blowing compressed air intermittently from reverse brake housing hole.



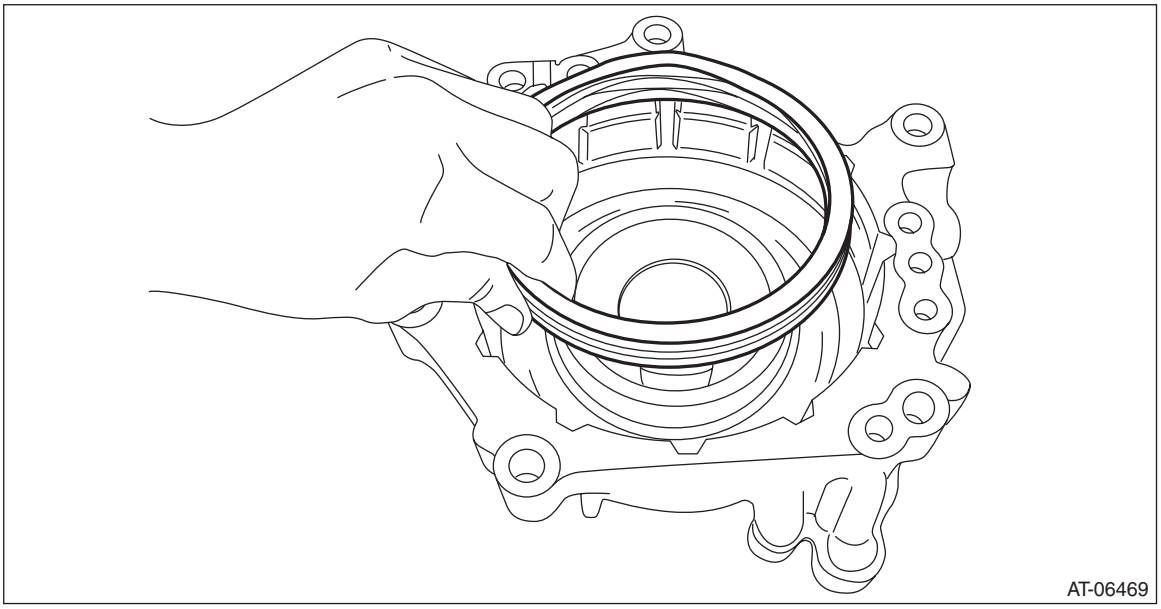
## D: ASSEMBLY

1) Install the reverse brake piston.

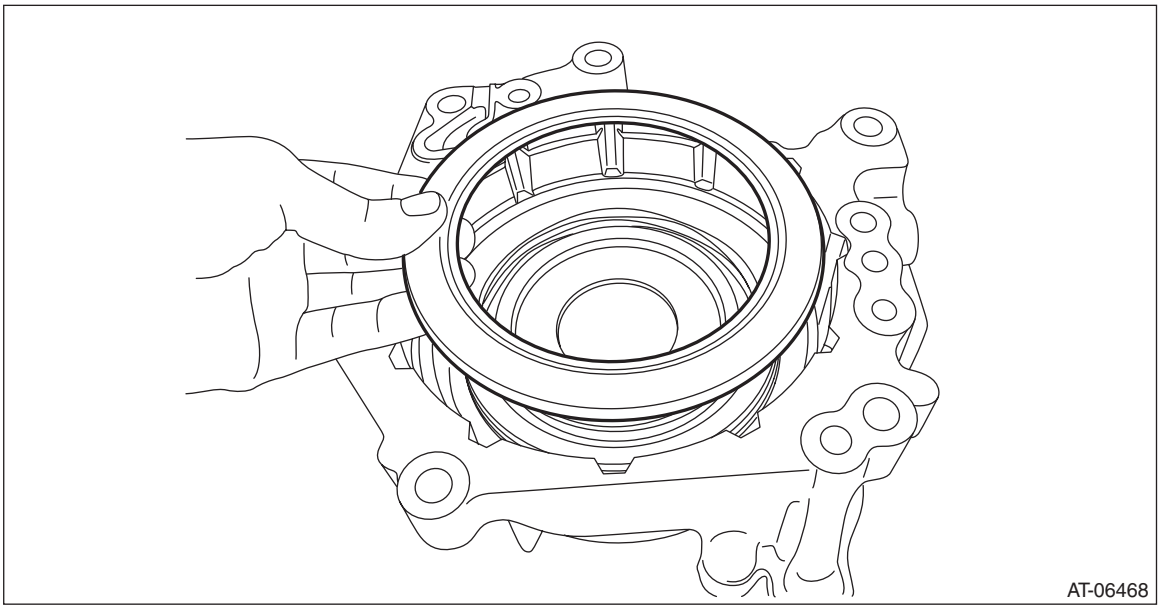
NOTE:
Apply CVTF to the sealing area of reverse brake piston.



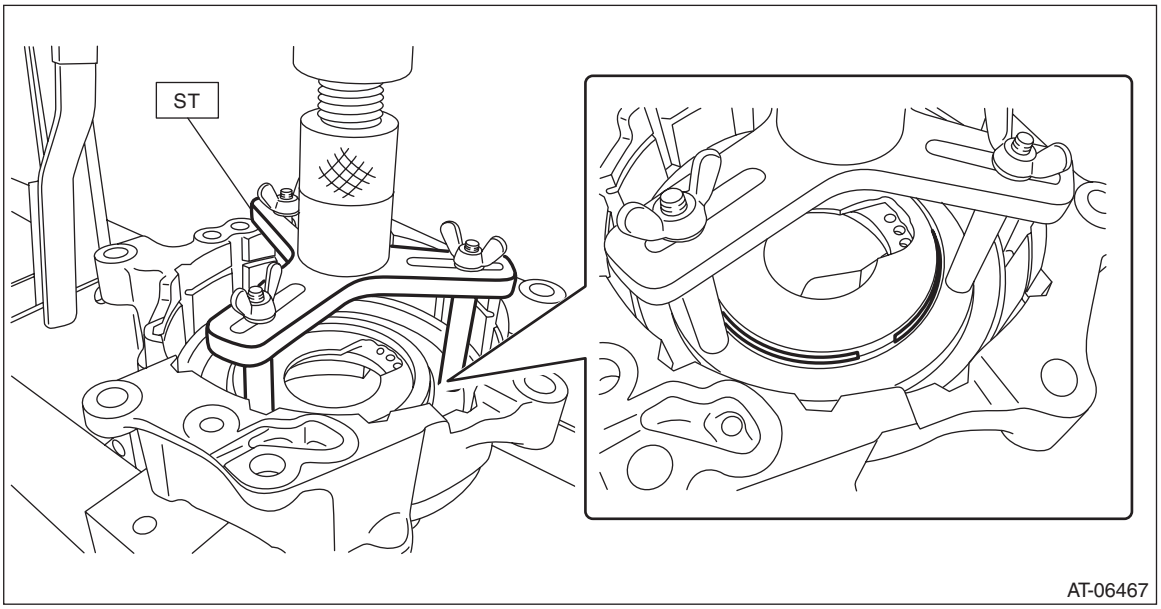
2) Install the return spring.



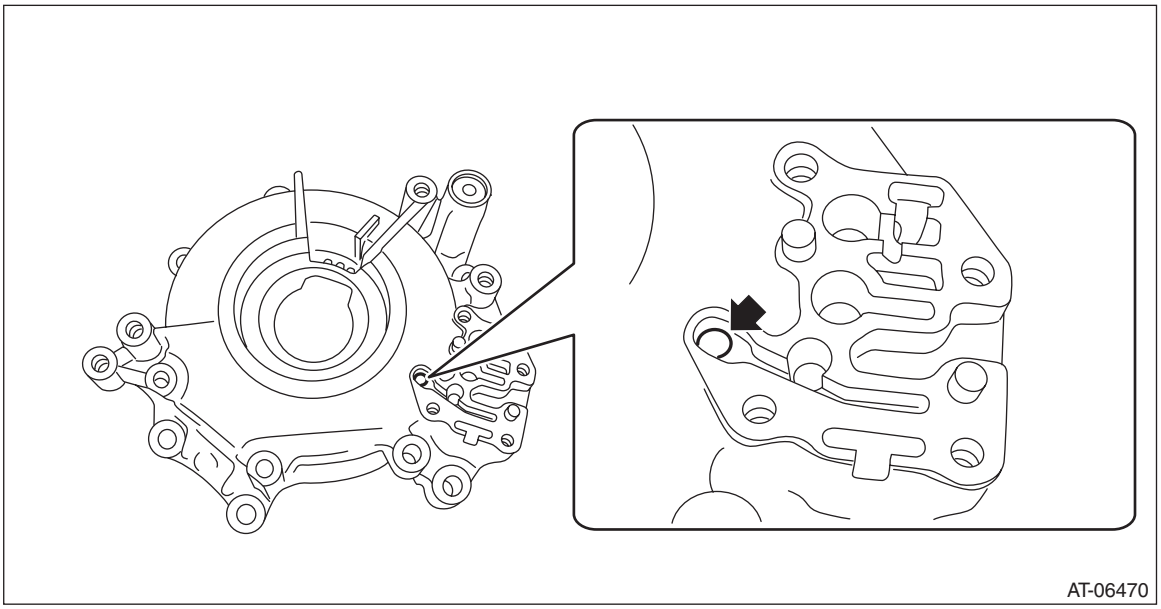
3) Install the spring retainer.



4) Compress the return spring using the ST to install the snap ring.
ST1 18762AA000 COMPRESSOR SPECIAL TOOL



5) Check the operation of reverse brake piston by blowing compressed air intermittently from reverse brake housing hole.



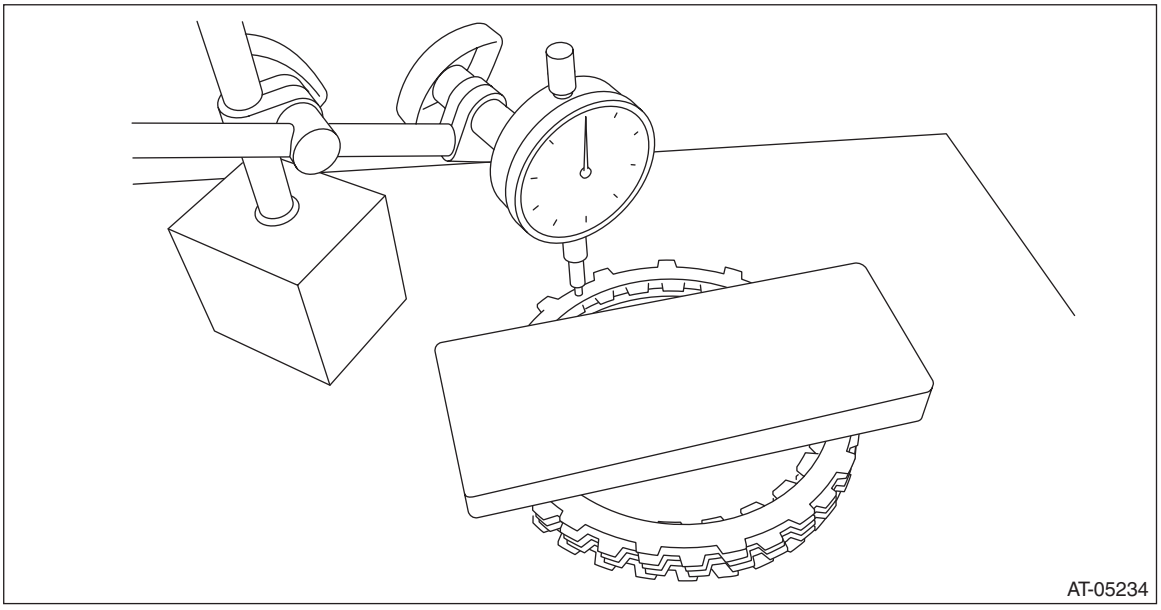
6) Place the driven plate, drive plate and retaining plate neatly in this order on surface table.
7) Set the dial gauge to retaining plate, and read its scale.

NOTE:
The value, which is read in the gauge at this time, is zero point.

8) Scale and record the weight "Z" of a flat board which will be put on retaining plate.

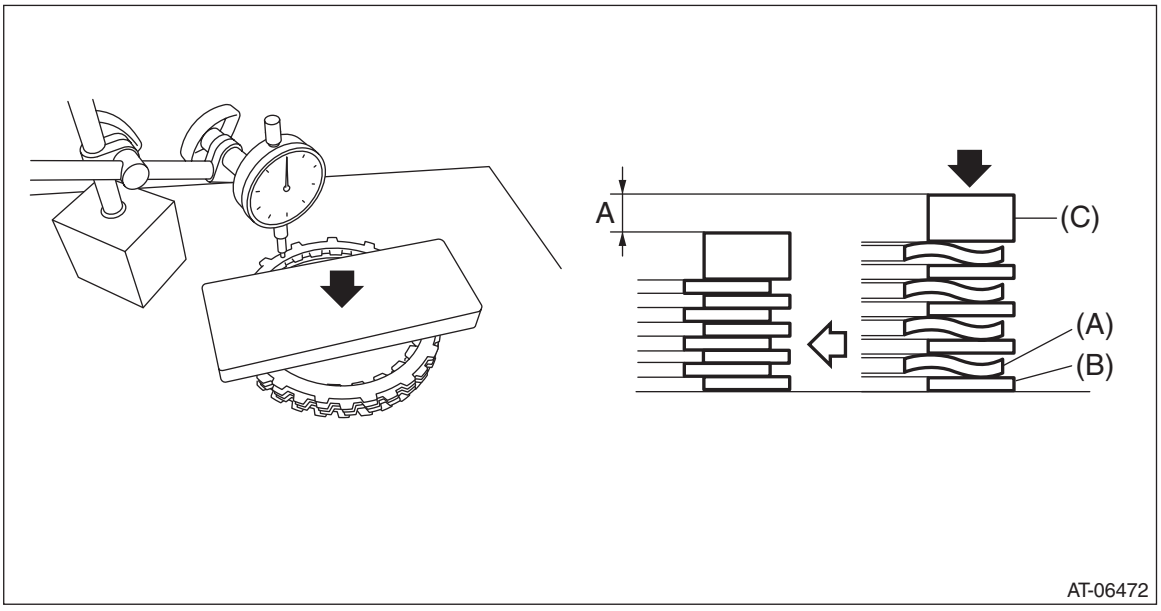
NOTE:
- Use a stiff board which does not bend against load as a flat board to be put on retaining plate.
- Use a flat board weighing less than 29 N (3.0 kgf, 6.5 lb).

9) Put the flat board on retaining plate.



10) Using the following formula, read the push/pull gauge and calculate “N”.
N = 29 N (3.0 kgf, 6.5 lb) – Z
29 N (3.0 kgf, 6.5 lb) : Load applied to clutch plate
Z: Flat board weight
11) Press the center of retaining plate by applying a force of “N” using push/pull gauge, and then measure and record the compression amount “A”.

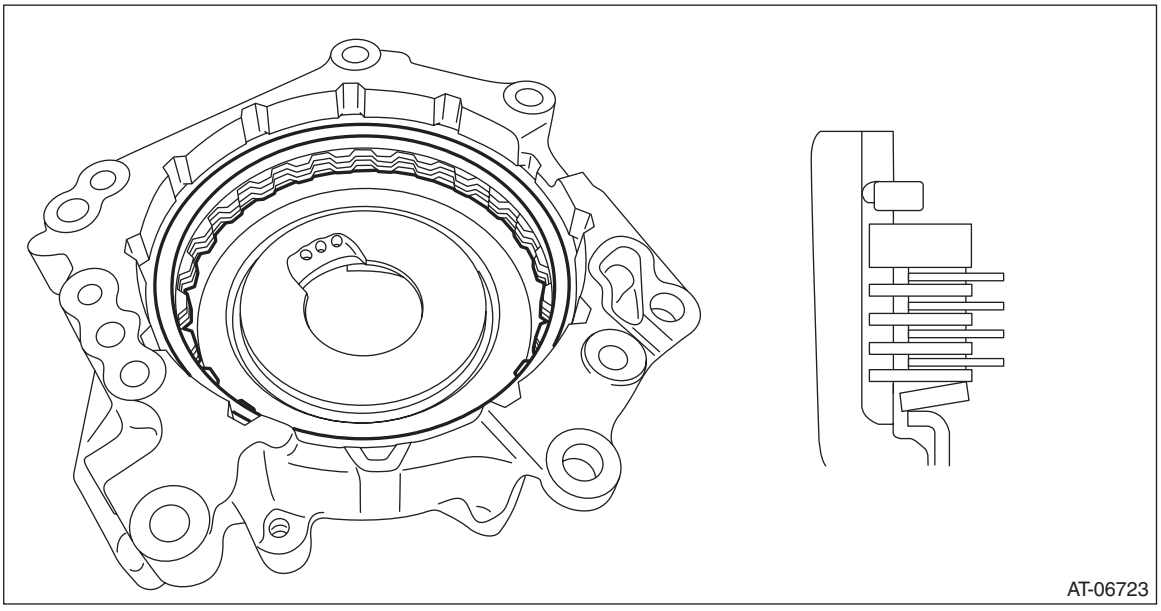
NOTE:
Measure at four points with a 90° interval and calculate the average.



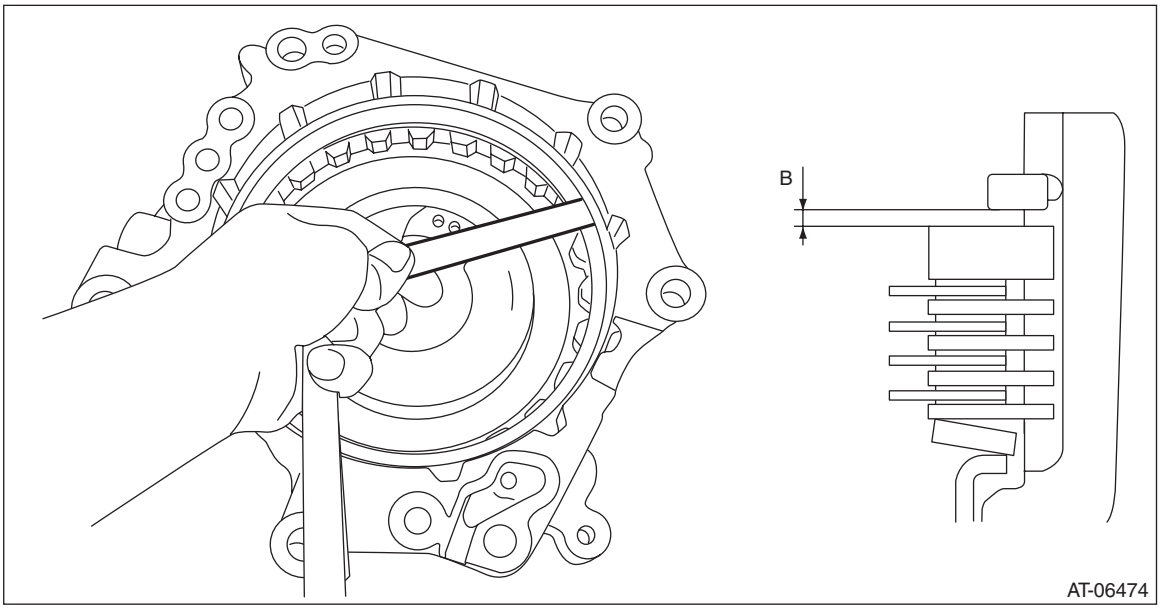
(A) Drive plate
(B) Driven plate
(C) Retaining plate

12) Install the dish plate, drive plate, driven plate, retaining plate and snap ring to the reverse brake housing.

NOTE:
Install the dish plate in the correct direction.



13) Measure and record the clearance “B” between the retaining plate and snap ring.



14) Piston stroke calculation

Calculate with A and B dimensions recorded before. If it exceeds the limit, replace with a new drive plate and adjust within the initial standard value.

S mm (in) = A + B

S: Piston stroke

A: Compression amount of drive plate and dish plate

B: Clearance between retaining plate and snap ring

***Initial standard:***

***2.3 — 2.7 mm (0.091 — 0.106 in)***

***Limit thickness:***

***2.9 mm (0.114 in)***

| Retaining plate | |
|---|---|
| Part No. | Thickness mm (in) |
| 31567AB750 | 4.2 (0.165) |
| 31567AB800 | 4.4 (0.173) |
| 31567AB810 | 4.6 (0.181) |
| 31567AB820 | 4.8 (0.189) |

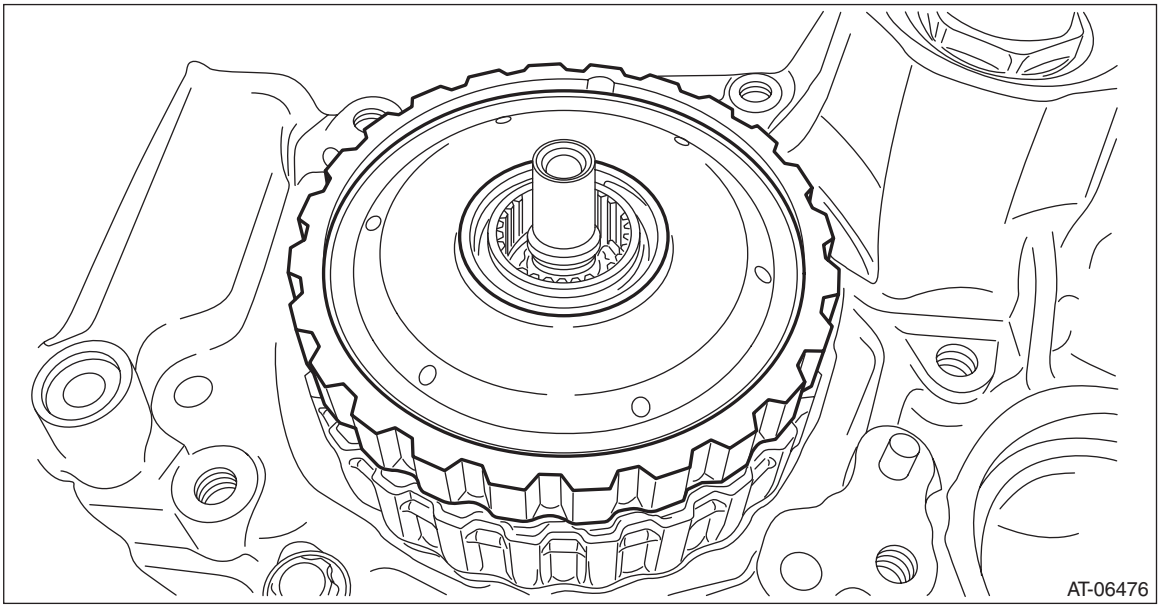
## E: INSPECTION

- Inspect the drive plate facing for wear and damage.
- Check the driven plate for discoloration (burnt color).
- Check for worn snap ring, fatigue or damaged return spring or deformed spring retainer.
- Make sure the clearance between retaining plate and snap ring of reverse brake is within the limit. If it exceeds the limit, replace with a new drive plate and select and adjust the retaining plate within the initial standard value. <Ref. to CVT-241, ASSEMBLY, Reverse Brake Assembly.>

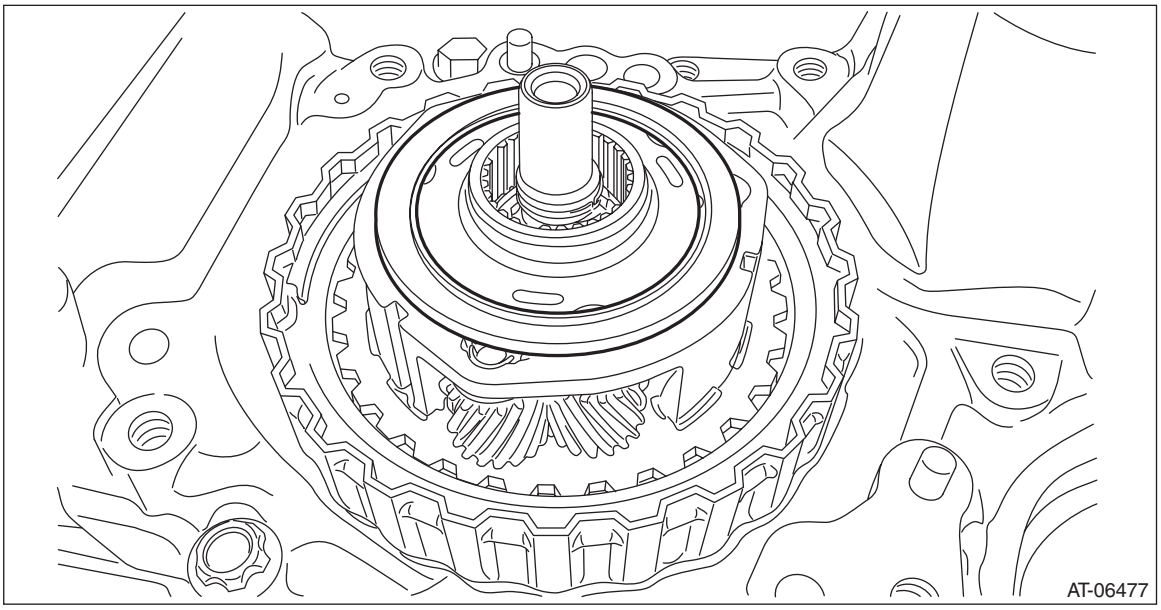
# 40.Forward Clutch Assembly

## A: REMOVAL

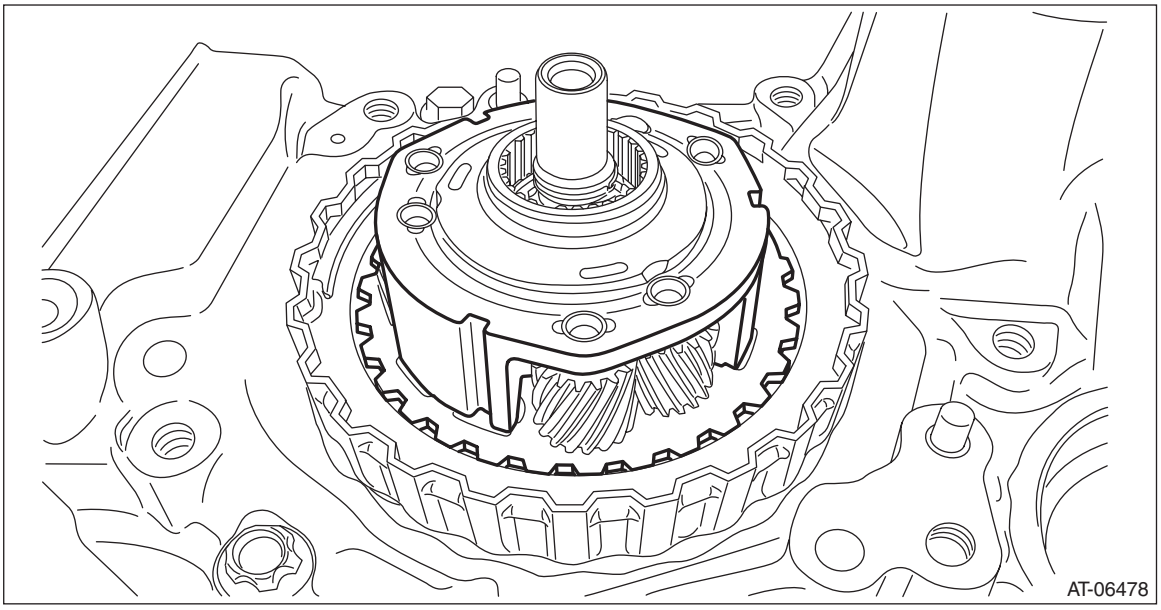
1) Remove the transmission assembly from the vehicle. <Ref. to CVT-56, REMOVAL, Automatic Transmission Assembly.>
2) Remove the air breather hose. <Ref. to CVT-148, REMOVAL, Air Breather Hose.>
3) Remove the control valve body. <Ref. to CVT-110, REMOVAL, Control Valve Body.>
4) Remove the transmission harness. <Ref. to CVT-124, REMOVAL, Transmission Harness.>
5) Remove the turbine speed sensor. <Ref. to CVT-97, REMOVAL, Turbine Speed Sensor.>
6) Remove the secondary speed sensor. <Ref. to CVT-99, REMOVAL, Secondary Speed Sensor.>
7) Remove the primary speed sensor. <Ref. to CVT-101, REMOVAL, Primary Speed Sensor.>
8) Remove the inhibitor switch. <Ref. to CVT-93, REMOVAL, Inhibitor Switch.>
9) Remove the extension case. <Ref. to CVT-156, REMOVAL, Extension Case.>
10) Remove the transfer clutch assembly. <Ref. to CVT-160, REMOVAL, Transfer Clutch.>
11) Remove the transfer driven gear assembly. <Ref. to CVT-174, REMOVAL, Transfer Driven Gear.>
12) Remove the parking pawl. <Ref. to CVT-177, REMOVAL, Parking Pawl.>
13) Remove the reduction driven gear assembly. <Ref. to CVT-179, REMOVAL, Reduction Driven Gear.>
14) Remove the oil pan and oil strainer. <Ref. to CVT-106, REMOVAL, Oil Pan and Strainer.>
15) Remove the transmission control device. <Ref. to CVT-187, REMOVAL, Transmission Control Device.>
16) Remove the transmission case. <Ref. to CVT-193, REMOVAL, Transmission Case.>
17) Remove the reduction drive gear. <Ref. to CVT-206, REMOVAL, Reduction Drive Gear.>
18) Remove the primary pulley, secondary pulley and variator chain. <Ref. to CVT-210, REMOVAL, Primary Pulley and Secondary Pulley.>
19) Remove the reverse brake assembly. <Ref. to CVT-231, REMOVAL, Reverse Brake Assembly.>
20) Remove the internal gear.



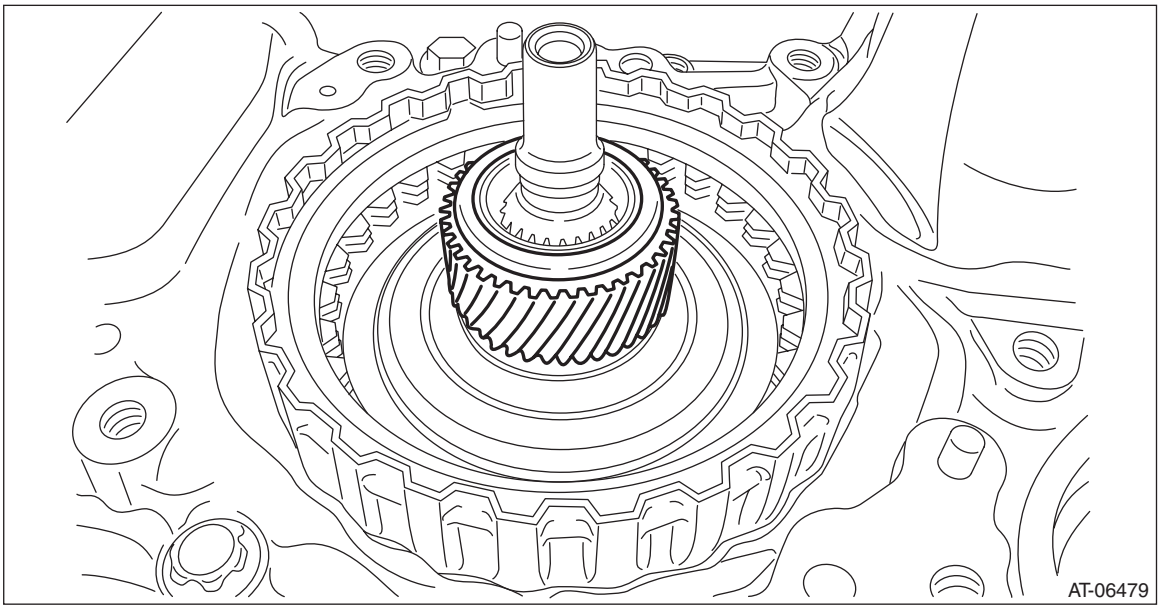
21) Remove the thrust bearing.



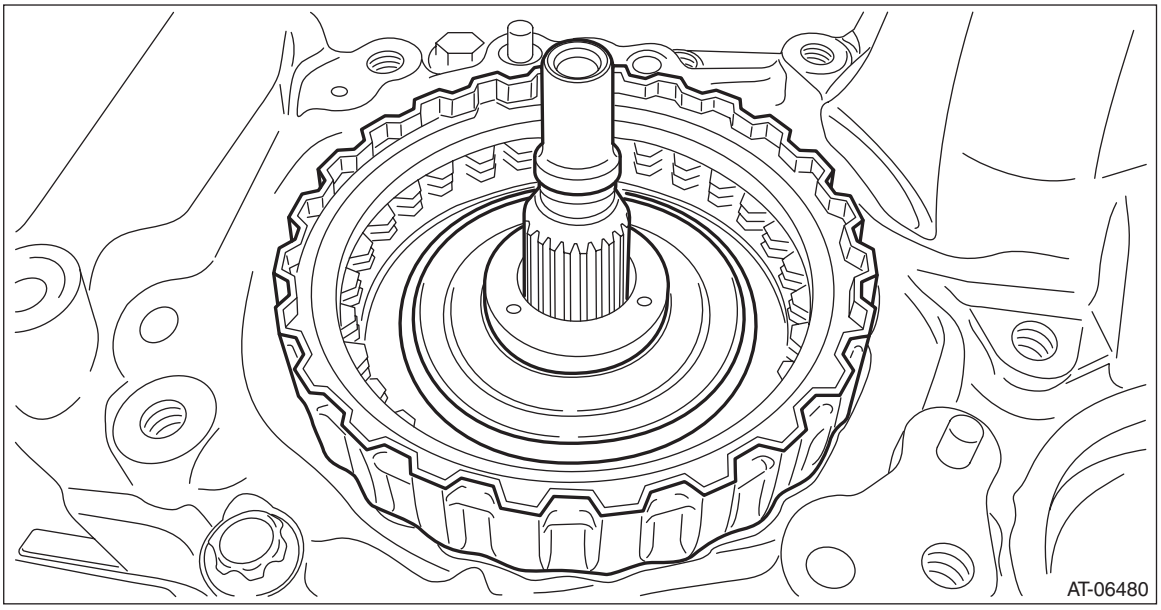
22) Remove the planetary carrier.



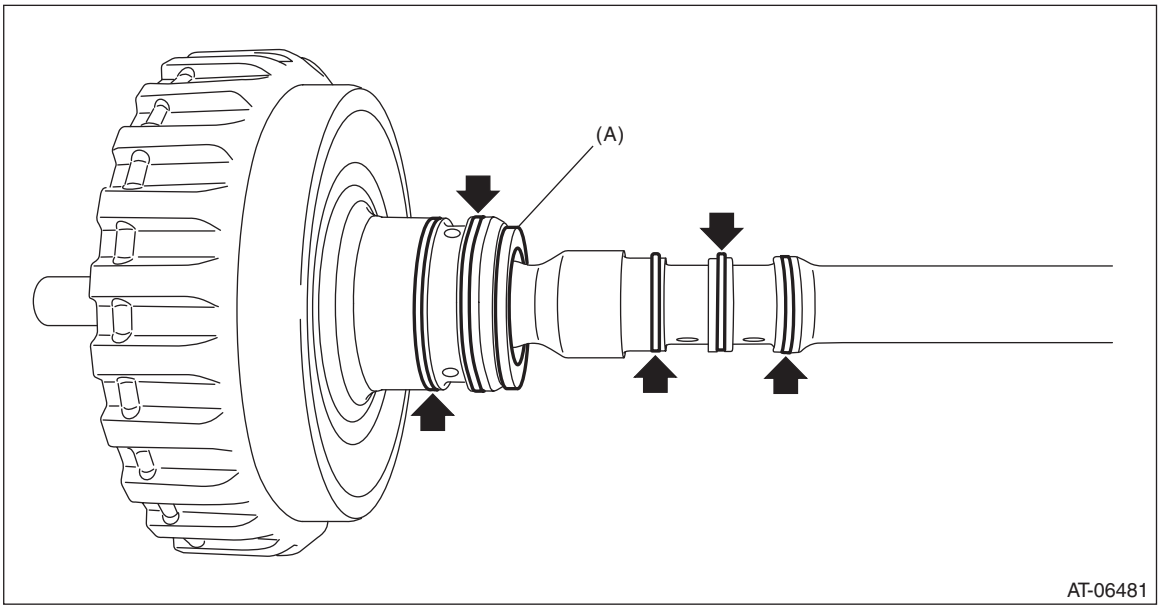
23) Remove the thrust bearing and sun gear.



24) Remove the forward clutch assembly.



25) Remove the thrust bearing and seal ring.

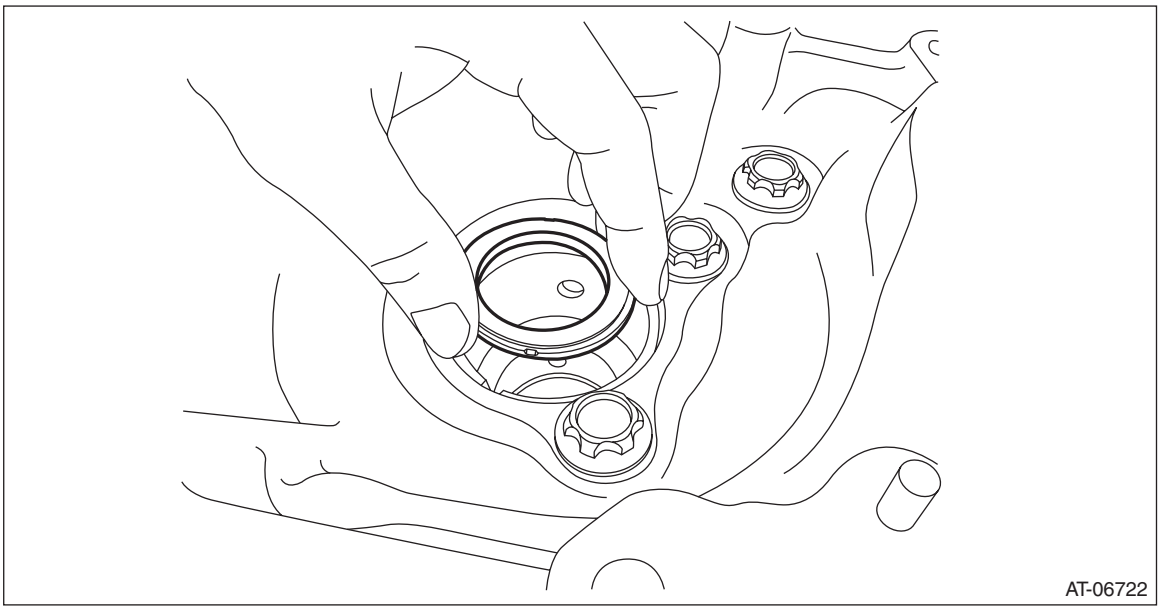


(A) Thrust bearing

## B: INSTALLATION

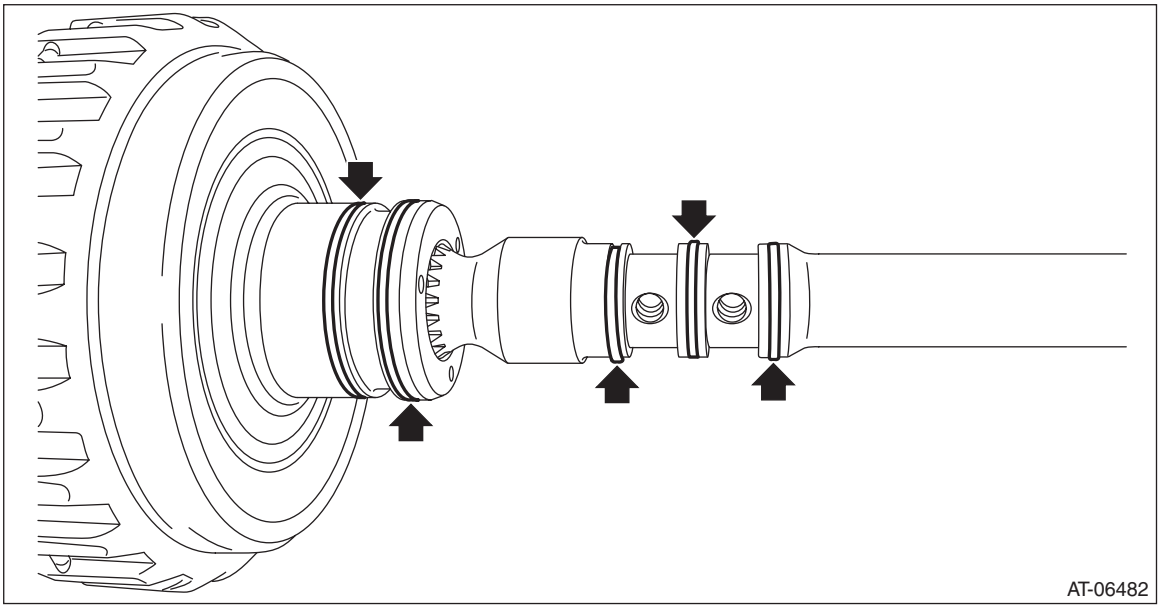
1) Install the thrust bearing to the converter case.

NOTE:
Face the temper color surface to the converter case side.

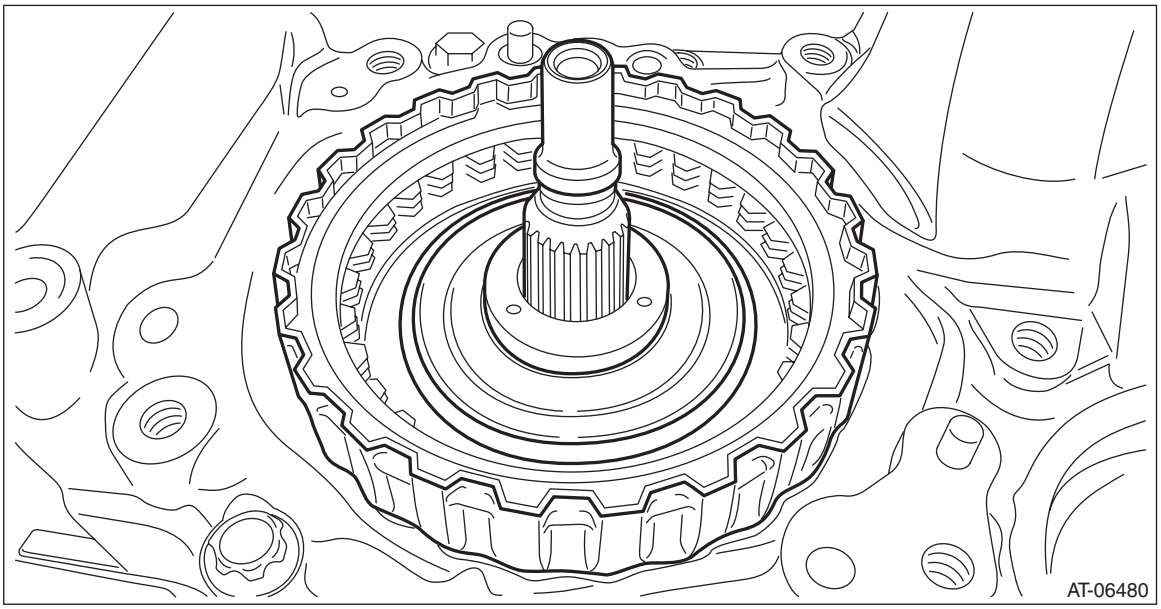


2) Install the seal ring to the input shaft.

NOTE:
- Use a new seal ring.
- When installing the seal ring, do not expand the seal ring too much.
- Apply CVTF to the seal rings.

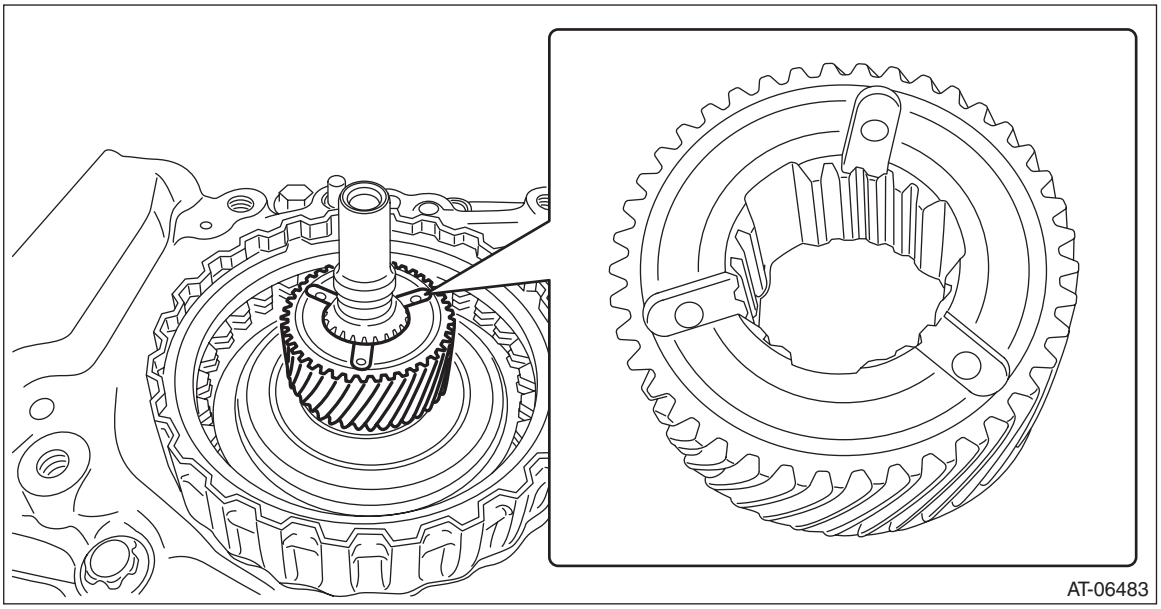


3) Install the forward clutch assembly to the converter case.



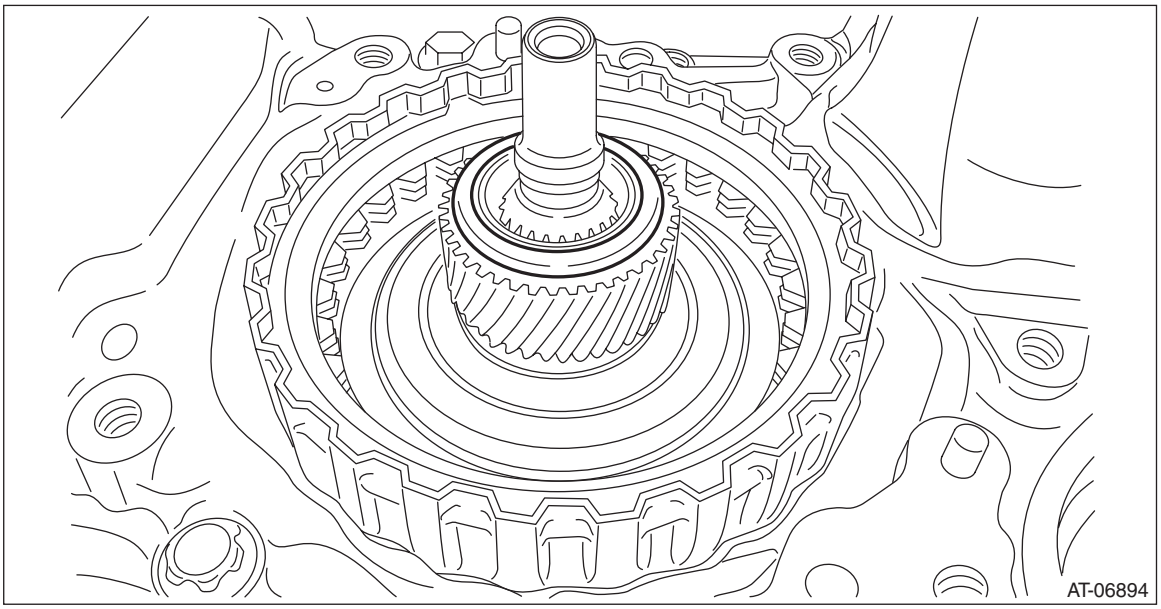
4) Install the sun gear.

NOTE:
Face the end face of the sun gear to the reverse brake side as shown in the figure.

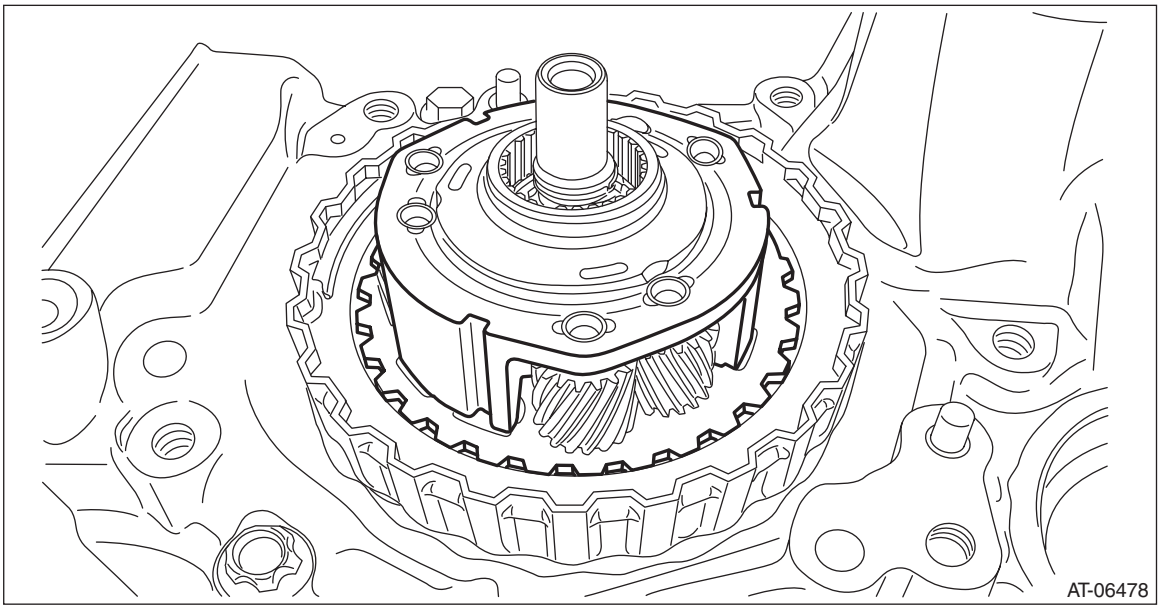


5) Install the thrust bearing to the sun gear.

NOTE:
Face the temper color surface to the reverse brake side.

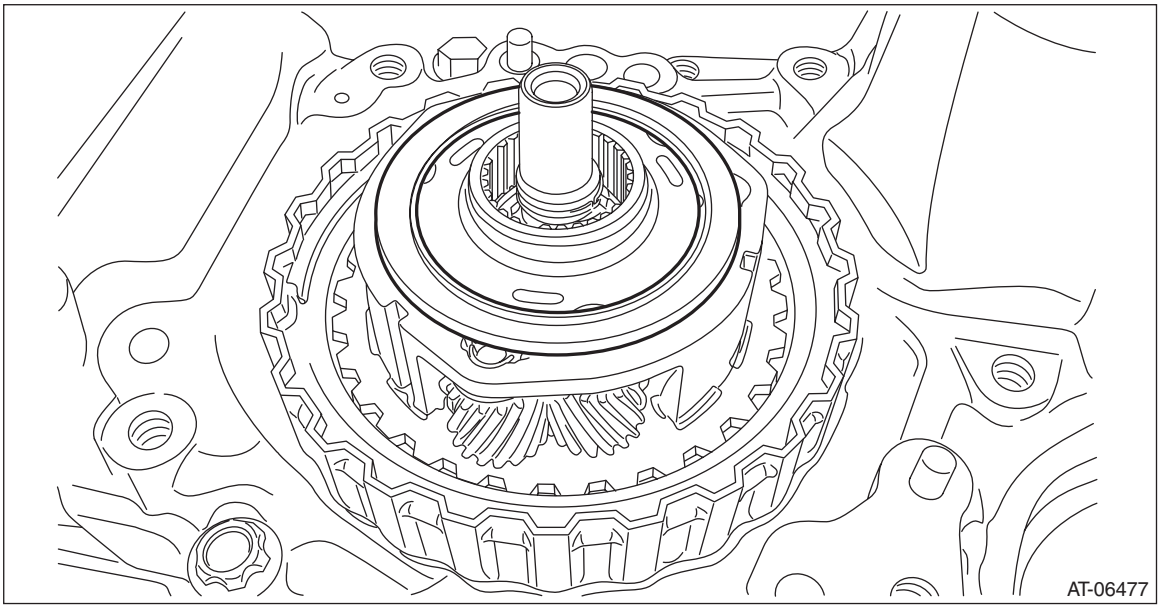


6) Install the planetary carrier.

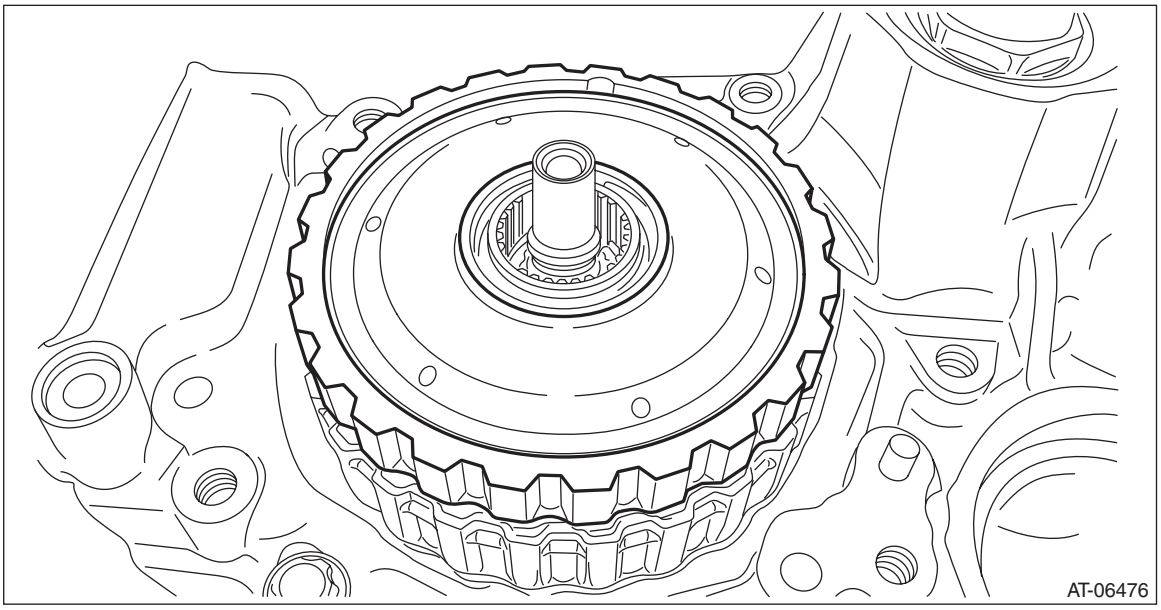


7) Install the thrust bearing.

NOTE:
Face the temper color surface to the reverse brake side.

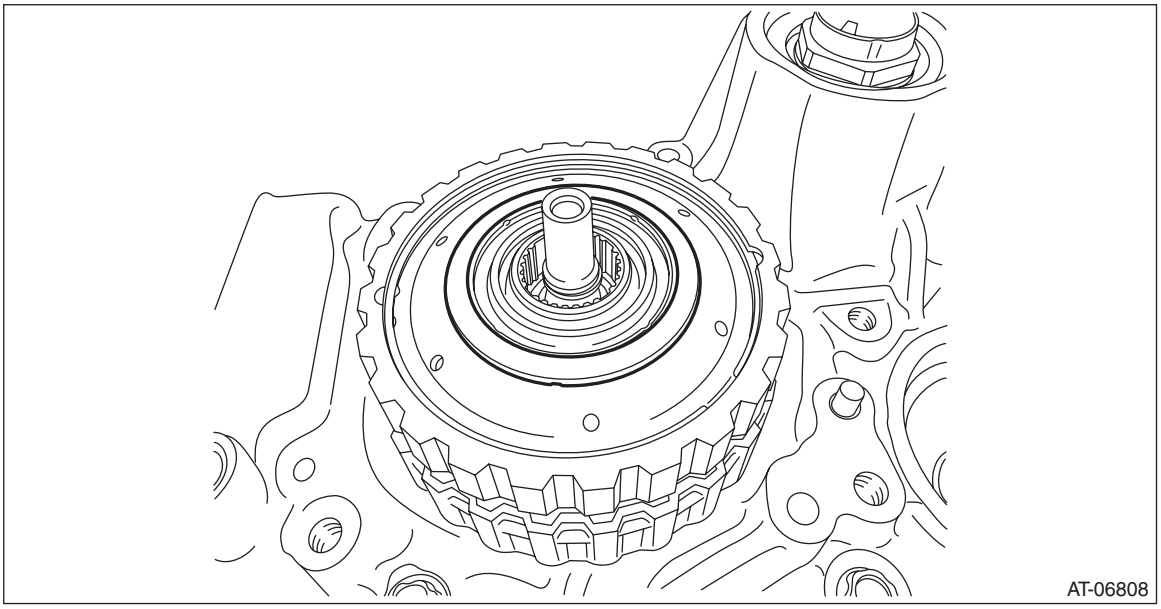


8) Install the internal gear.



9) Install the thrust bearing to the internal gear.

NOTE:
Face the temper color surface to the reverse brake side.



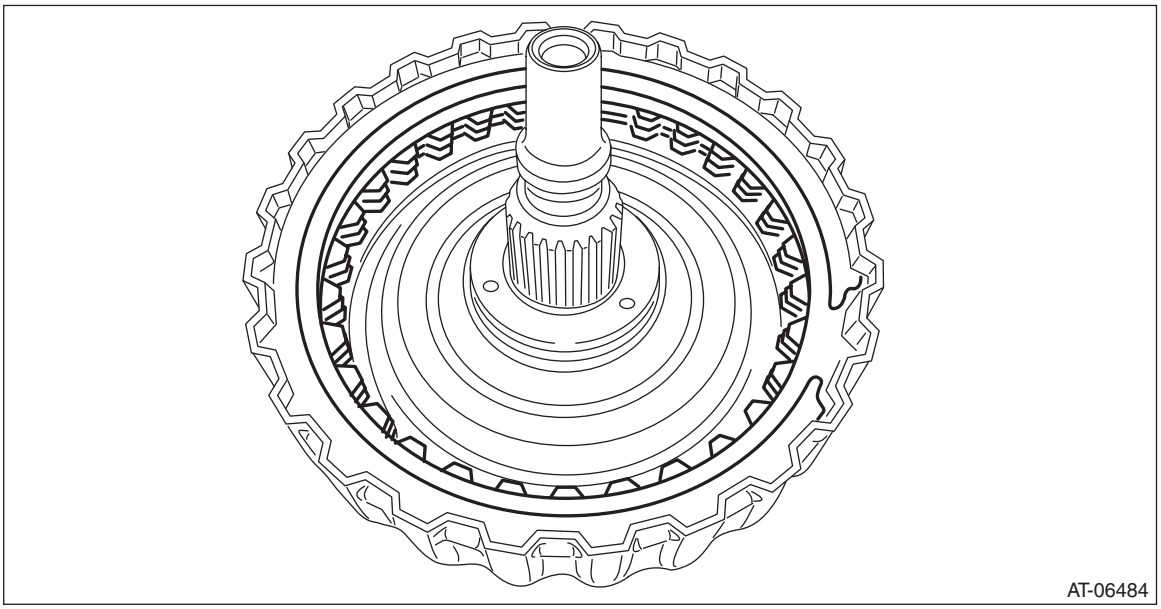
10) Select a washer. <Ref. to CVT-263, ADJUSTMENT, Forward Clutch Assembly.>
11) Install the reverse brake assembly. <Ref. to CVT-234, INSTALLATION, Reverse Brake Assembly.>
12) Install the primary pulley, secondary pulley and variator chain. <Ref. to CVT-217, INSTALLATION, Primary Pulley and Secondary Pulley.>
13) Install the reduction drive gear. <Ref. to CVT-207, INSTALLATION, Reduction Drive Gear.>
14) Install the transmission case. <Ref. to CVT-196, INSTALLATION, Transmission Case.>
15) Install the transmission control device. <Ref. to CVT-190, INSTALLATION, Transmission Control Device.>
16) Install the oil strainer and oil pan. <Ref. to CVT-107, INSTALLATION, Oil Pan and Strainer.>
17) Install the reduction driven gear assembly. <Ref. to CVT-179, INSTALLATION, Reduction Driven Gear.>
18) Install the transfer driven gear assembly. <Ref. to CVT-175, INSTALLATION, Transfer Driven Gear.>
19) Install the transfer clutch assembly. <Ref. to CVT-162, INSTALLATION, Transfer Clutch.>
20) Install the parking pawl. <Ref. to CVT-178, INSTALLATION, Parking Pawl.>
21) Install the extension case. <Ref. to CVT-157, INSTALLATION, Extension Case.>

22) Install the inhibitor switch. <Ref. to CVT-95, INSTALLATION, Inhibitor Switch.>
23) Install the secondary speed sensor. <Ref. to CVT-99, INSTALLATION, Secondary Speed Sensor.>
24) Install the primary speed sensor. <Ref. to CVT-102, INSTALLATION, Primary Speed Sensor.>
25) Install the turbine speed sensor. <Ref. to CVT-97, INSTALLATION, Turbine Speed Sensor.>
26) Install the transmission harness. <Ref. to CVT-130, INSTALLATION, Transmission Harness.>
27) Install the control valve body. <Ref. to CVT-116, INSTALLATION, Control Valve Body.>
28) Install the air breather hose. <Ref. to CVT-149, INSTALLATION, Air Breather Hose.>
29) Install the transmission assembly to the vehicle. <Ref. to CVT-67, INSTALLATION, Automatic Transmission Assembly.>

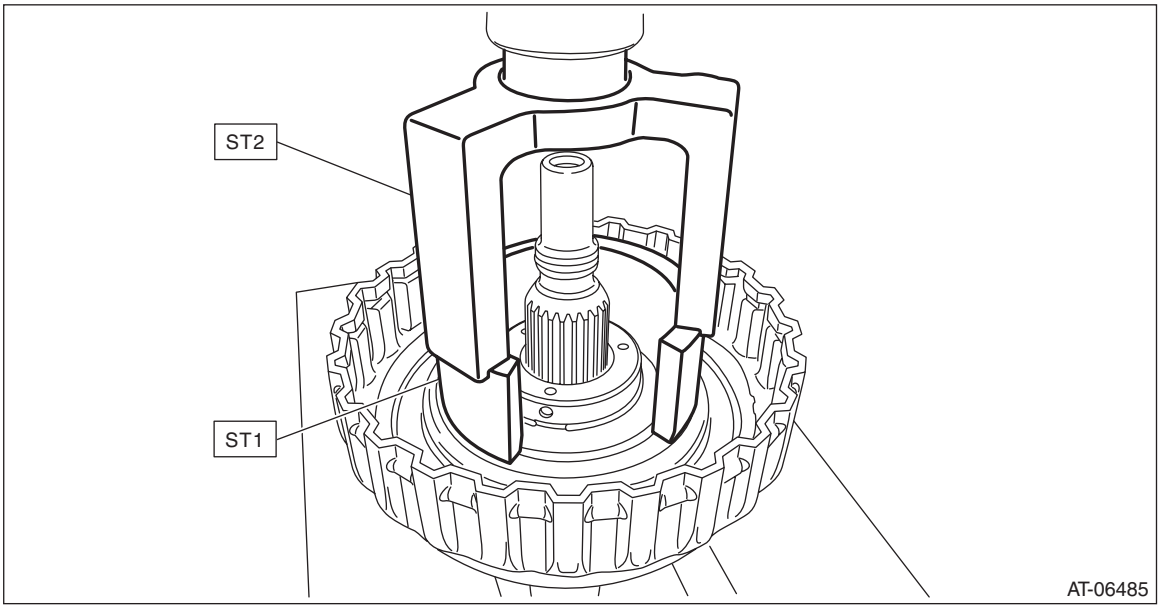
## C: DISASSEMBLY

### 1. FORWARD CLUTCH ASSEMBLY

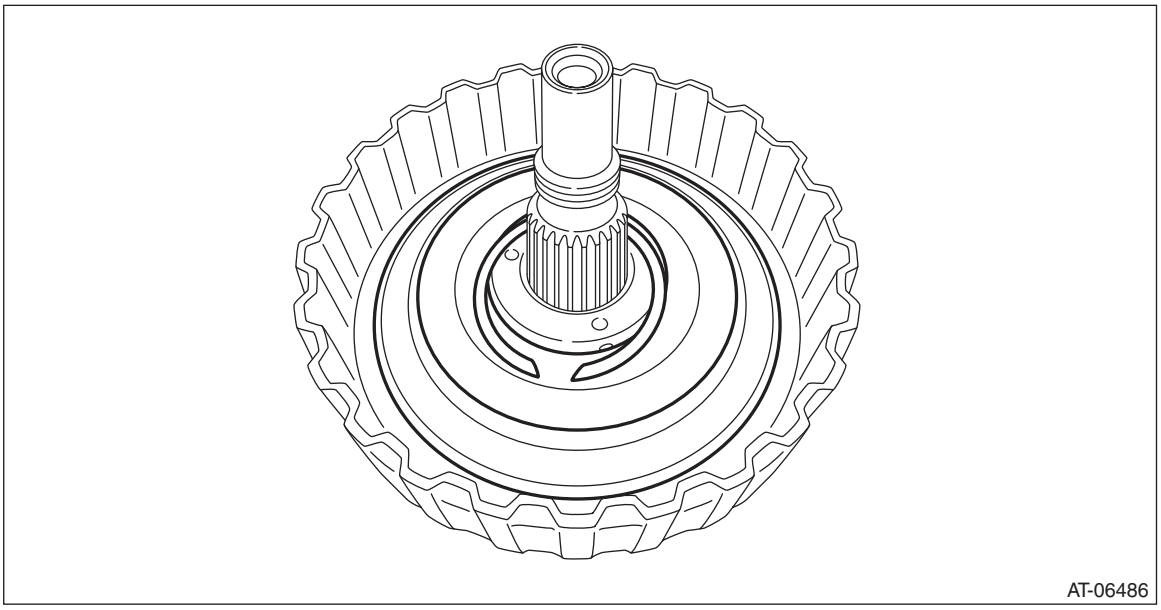
1) Remove the snap ring.
2) Remove the retaining plate, drive plate, driven plate and dish plate.



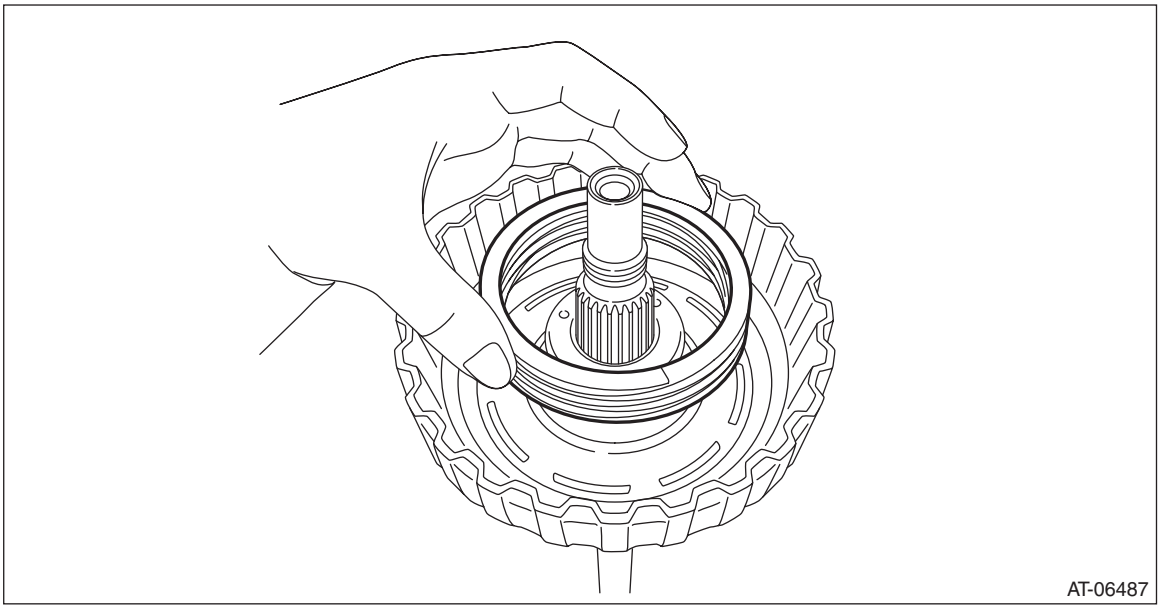
3) Compress the return spring using the ST to remove the snap ring.
ST1 18762AA010 COMPRESSOR SPECIAL TOOL
ST2 398673600 COMPRESSOR



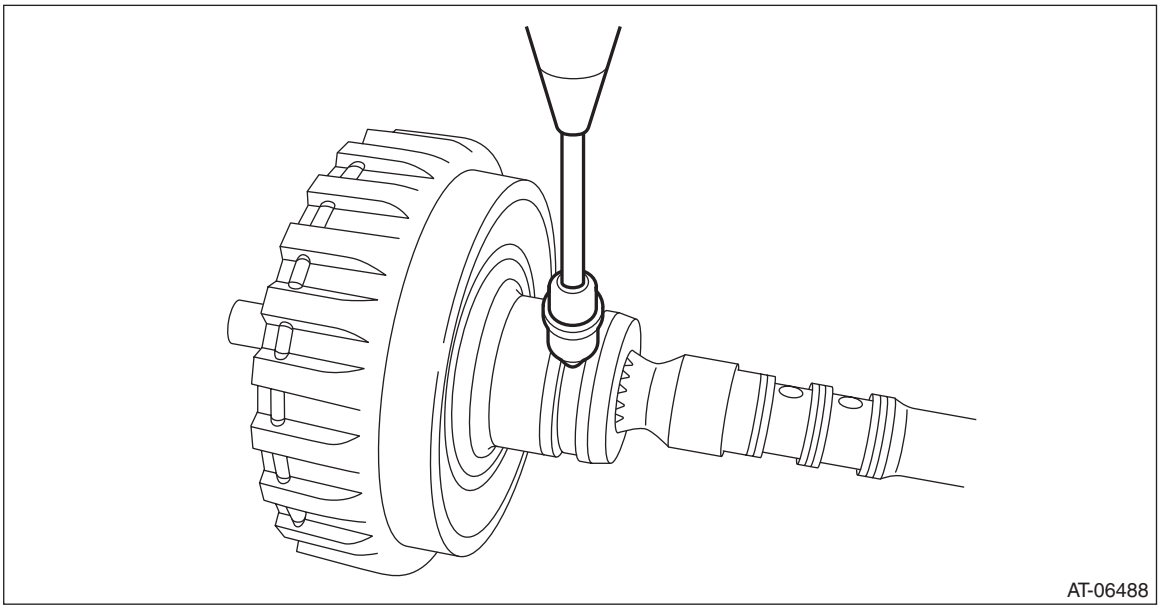
4) Remove the chamber COMPL and snap ring.



5) Remove the return spring.

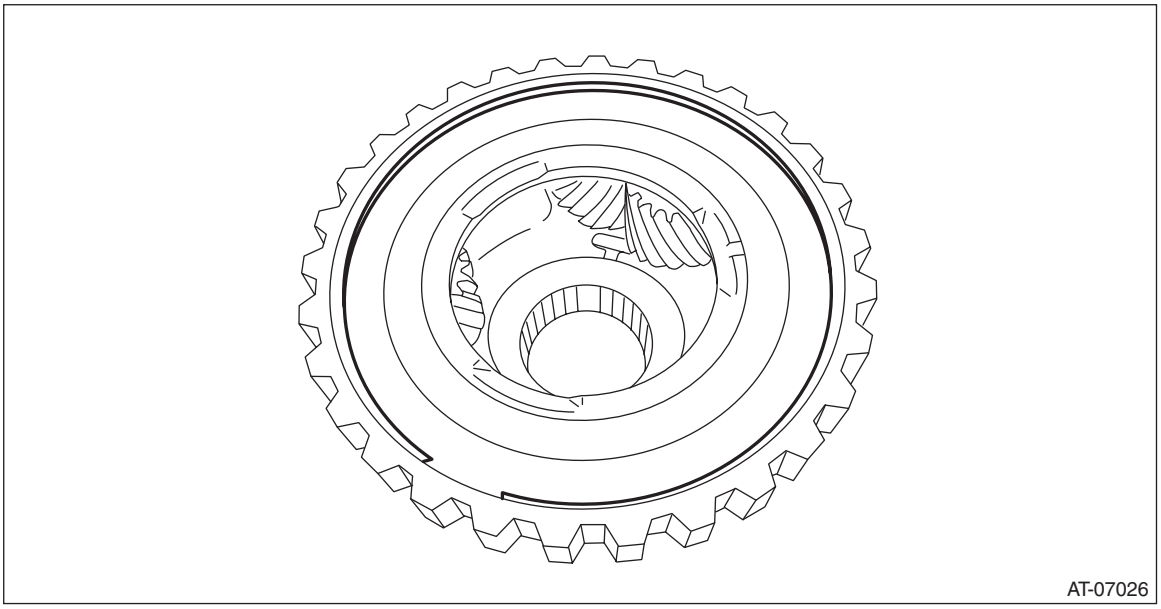


6) Remove the forward clutch piston by blowing compressed air intermittently from the forward clutch carrier hole.



## 2. PLANETARY CARRIER ASSY

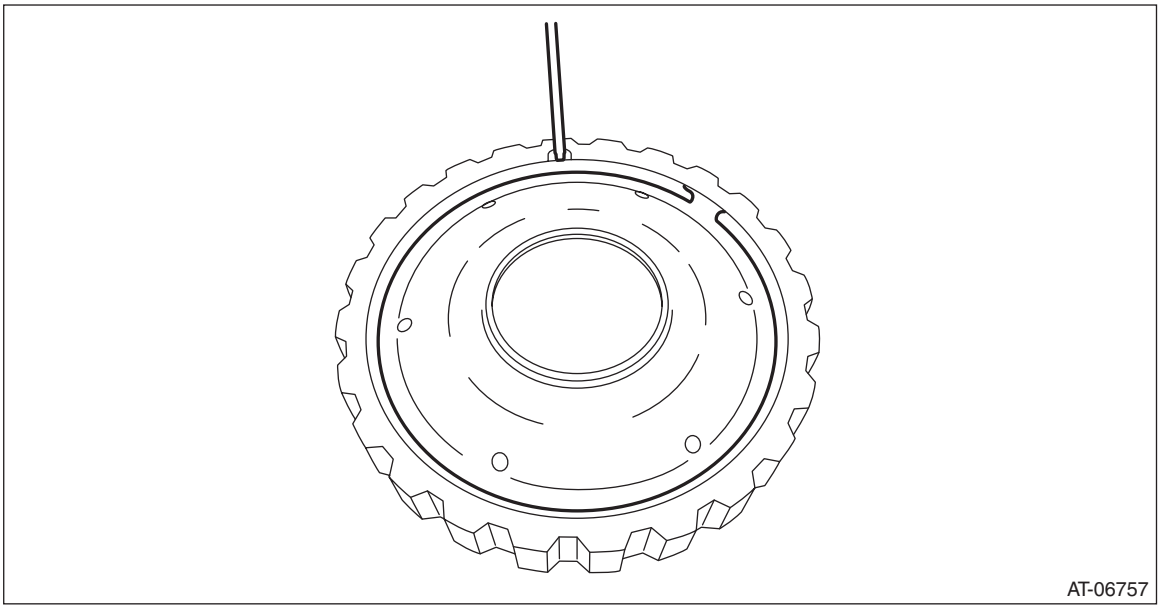
NOTE:
Disassemble the balance oil guide only.
1) Remove the snap ring.



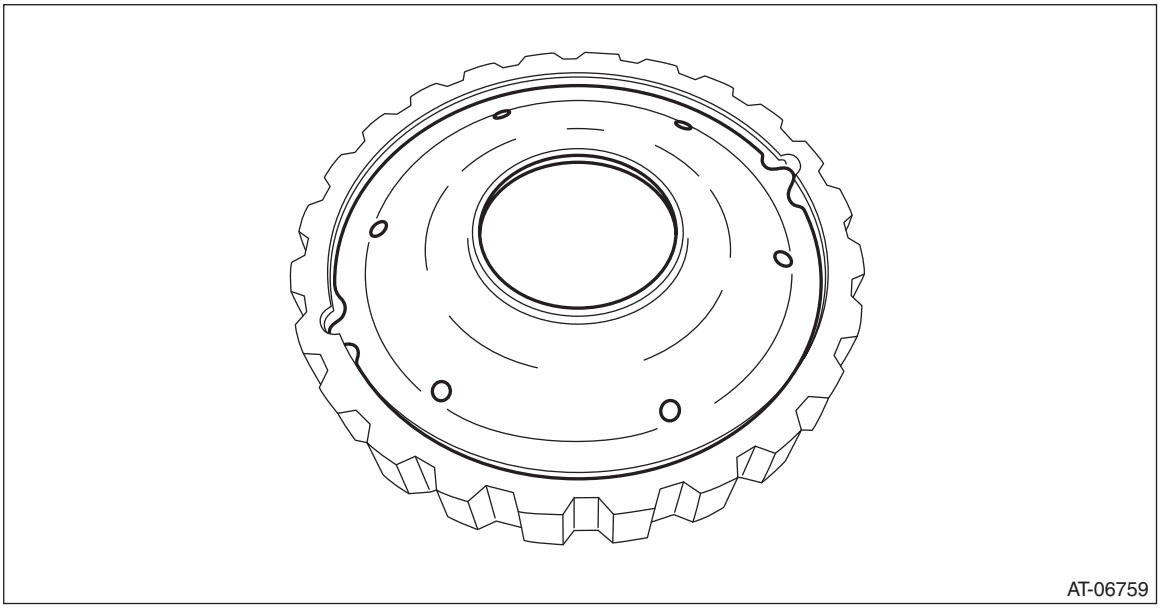
2) Remove the balance oil guide.

### 3. INTERNAL GEAR

1) Remove the snap ring.



2) Remove the thrust gear plate.

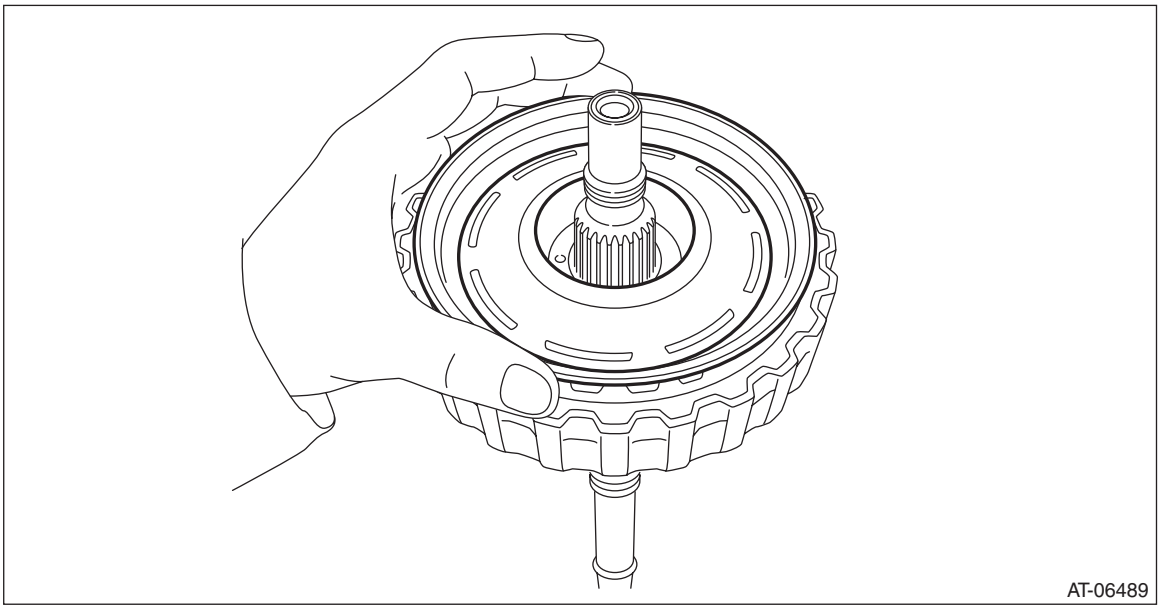


# D: ASSEMBLY

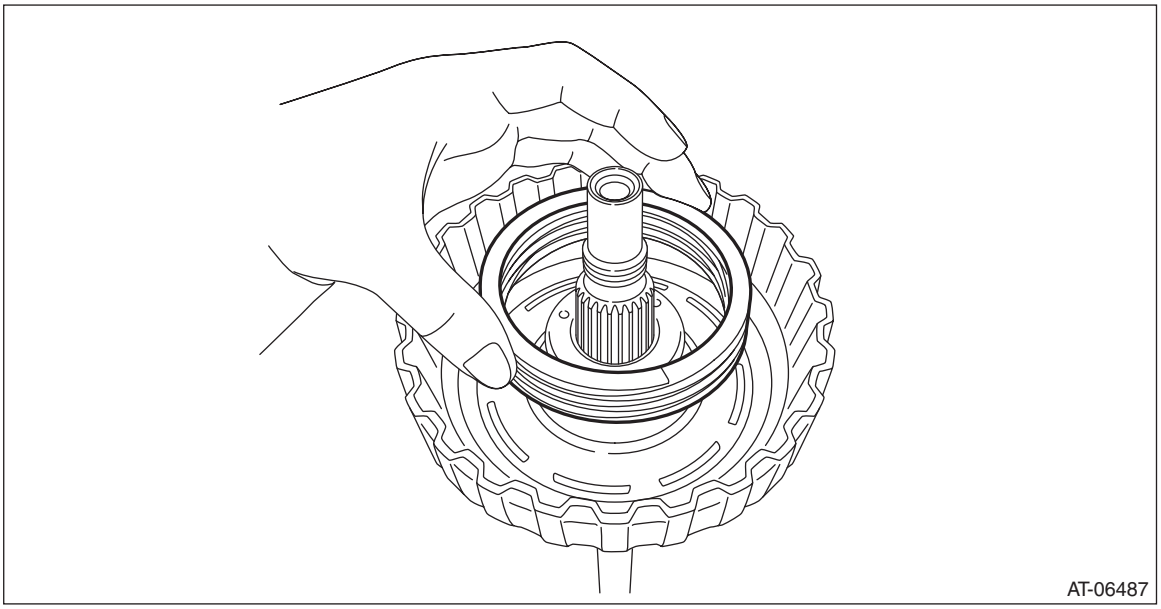
## 1. FORWARD CLUTCH ASSEMBLY

1) Install the forward clutch piston to forward clutch drum.

NOTE:
- Apply CVTF to the seal of forward clutch piston.
- Insert it all the way to the end.

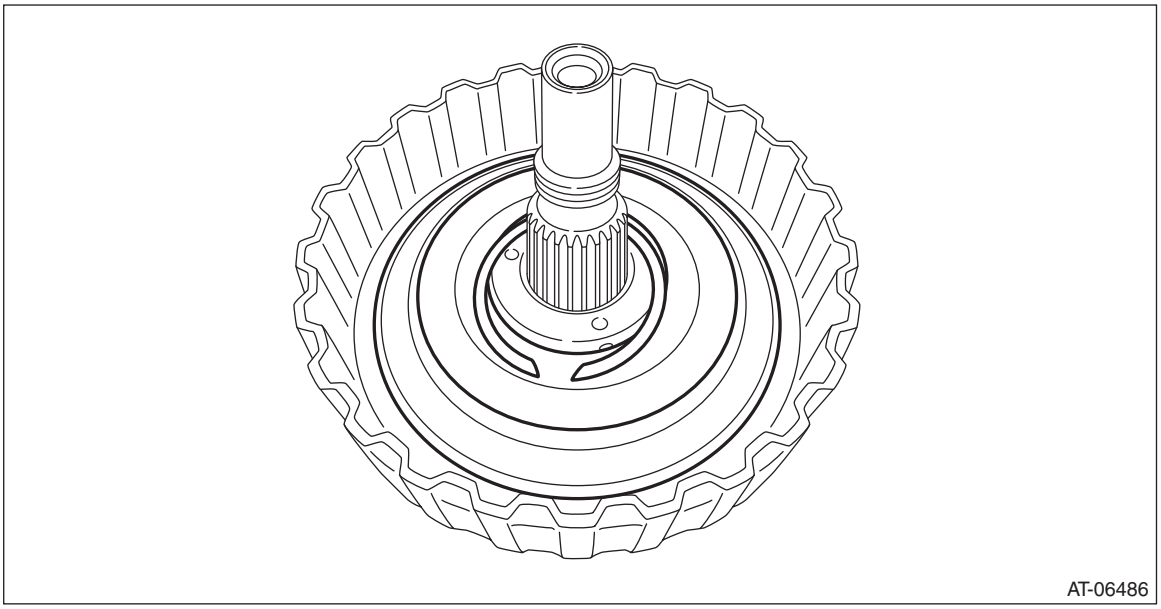


2) Install the return spring.

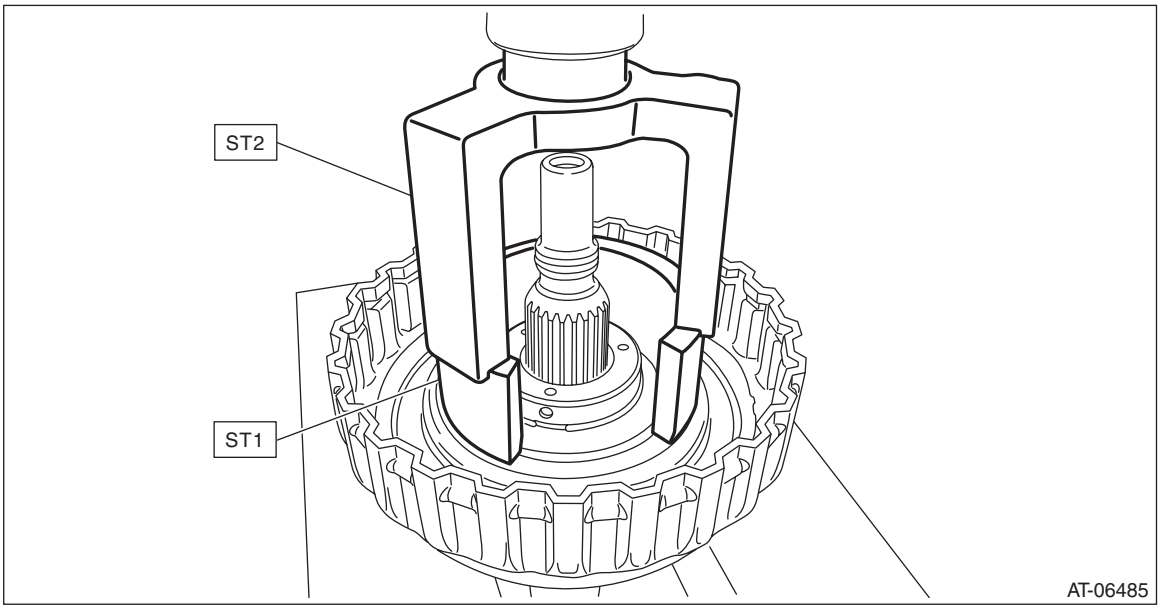


3) Install the chamber COMPL.

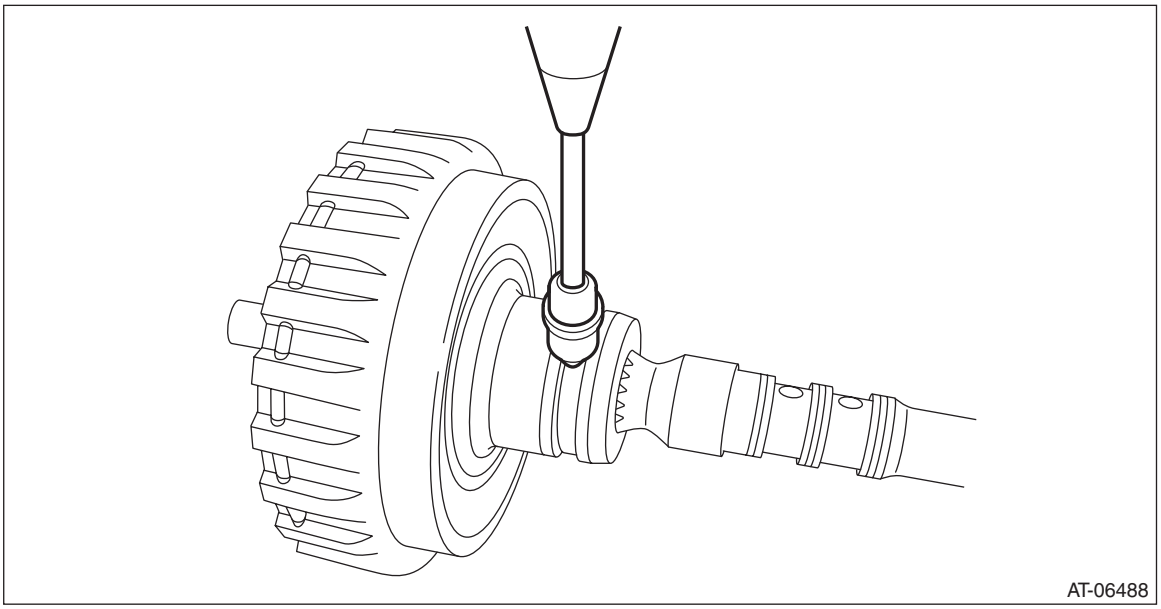
NOTE:
Apply CVTF to the sealing area of chamber COMPL.



4) Compress the return spring using the ST to install the snap ring.
ST1 18762AA010 COMPRESSOR SPECIAL TOOL
ST2 398673600 COMPRESSOR



5) Check the operation of forward clutch piston by blowing compressed air intermittently from forward clutch carrier hole.



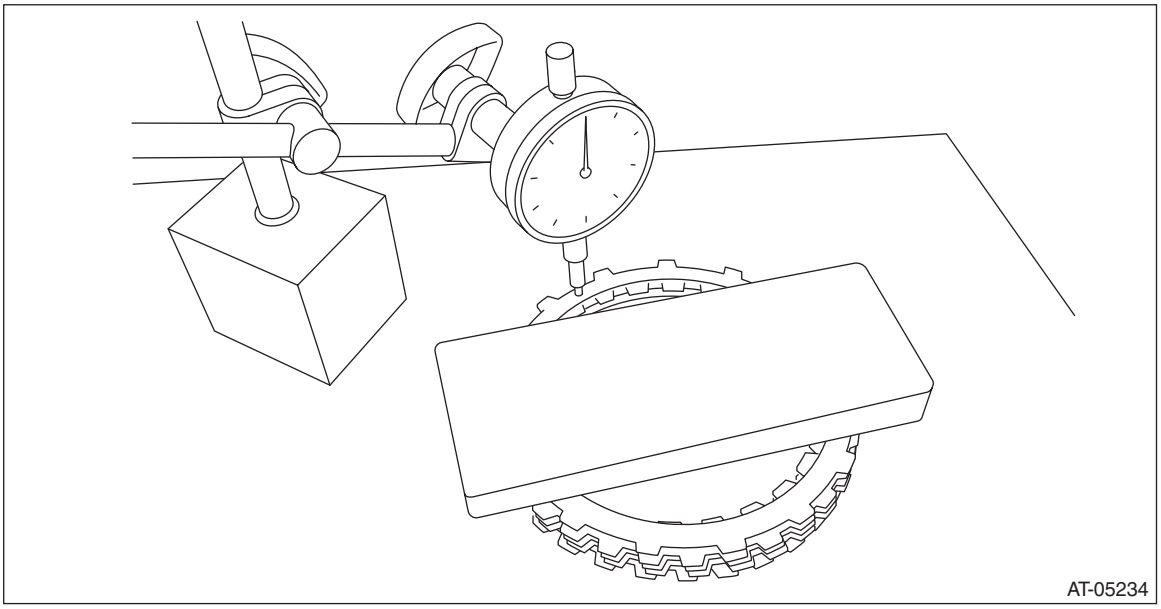
6) Place the driven plate, drive plate and retaining plate neatly in this order on surface table.
7) Set the dial gauge to retaining plate, and read its scale.

NOTE:
The value, which is read in the gauge at this time, is zero point.

8) Scale and record the weight "Z" of a flat board which will be put on retaining plate.

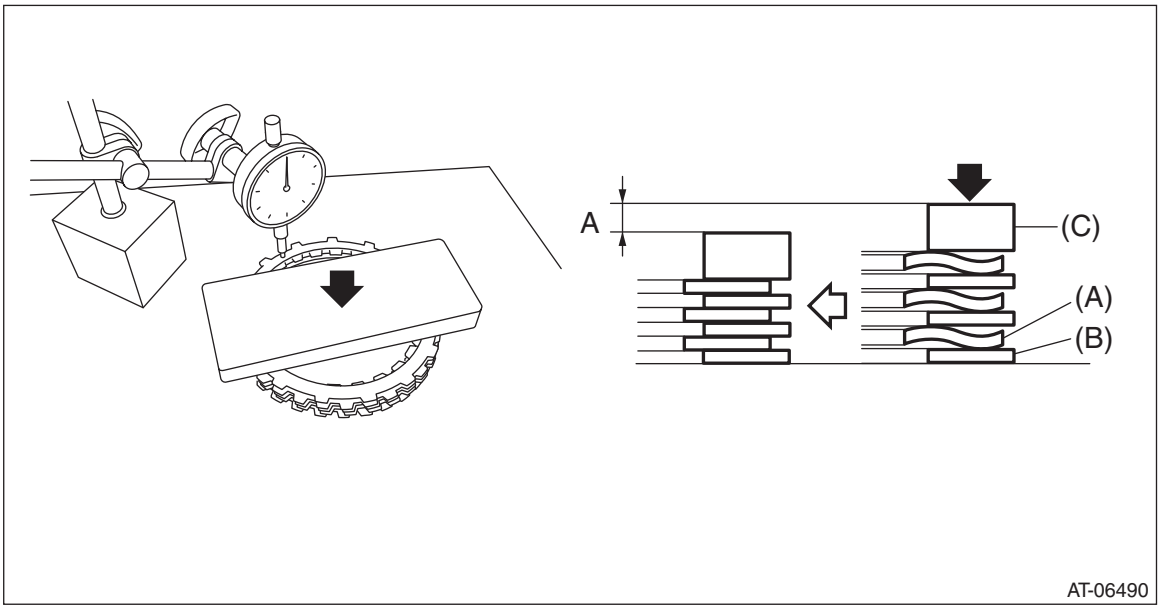
NOTE:
- The value, which is read in the gauge at this time, is zero point.
- Use a flat board weighing less than 52 N (5.3 kgf, 11.7 lb).

9) Put the flat board on retaining plate.



10) Using the following formula, read the push/pull gauge and calculate “N”.
N = 52 N (5.3 kgf, 11.7 lb) – Z
52 N (5.3 kgf, 11.7 lb) : Load applied to clutch plate
Z: Flat board weight
11) Press the center of retaining plate by applying a force of “N” using push/pull gauge, and then measure and record the compression amount “A”.

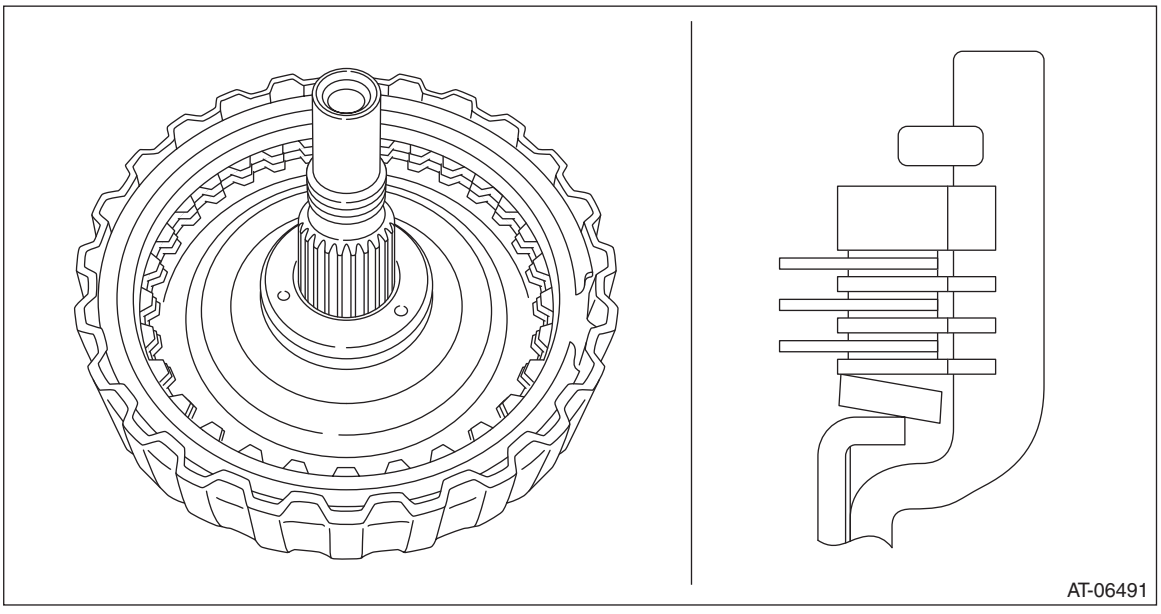
NOTE:
Measure at four points with a 90° interval and calculate the average.



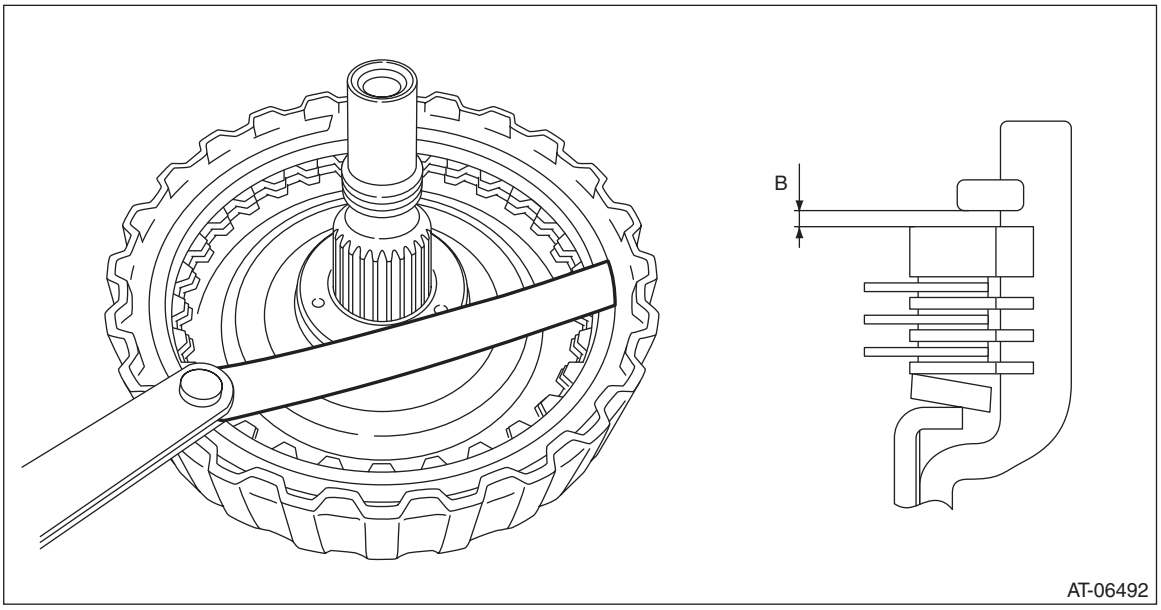
(A) Driven plate
(B) Drive plate
(C) Retaining plate

12) Install the dish plate, drive plate, driven plate, retaining plate and snap ring to the forward clutch carrier.

NOTE:
Install the dish plate in the correct direction.



13) Measure and record the clearance “B” between the retaining plate and snap ring.



14) Piston stroke calculation
Calculate with A and B dimensions recorded before.
If it exceeds the limit, replace with a new drive plate and adjust within the initial standard value.
S mm (in) = A + B
S: Piston stroke
A: Compression amount of drive plate and dish plate
B: Clearance between retaining plate and snap ring

***Initial standard:***
***1.0 — 1.4 mm (0.040 — 0.055 in)***

***Limit thickness:***
***1.6 mm (0.063 in)***

| Retaining plate | |
|---|---|
| Item number | Thickness mm (in) |
| 31567AB760 | 4.2 (0.165) |
| 31567AB770 | 4.4 (0.173) |
| 31567AB780 | 4.6 (0.181) |
| 31567AB790 | 4.8 (0.189) |
| 31567AB830 | 5.0 (0.197) |

## 2. PLANETARY CARRIER ASSY

NOTE:
Assemble in the reverse order of disassembly.

## 3. INTERNAL GEAR

NOTE:
Assemble in the reverse order of disassembly.

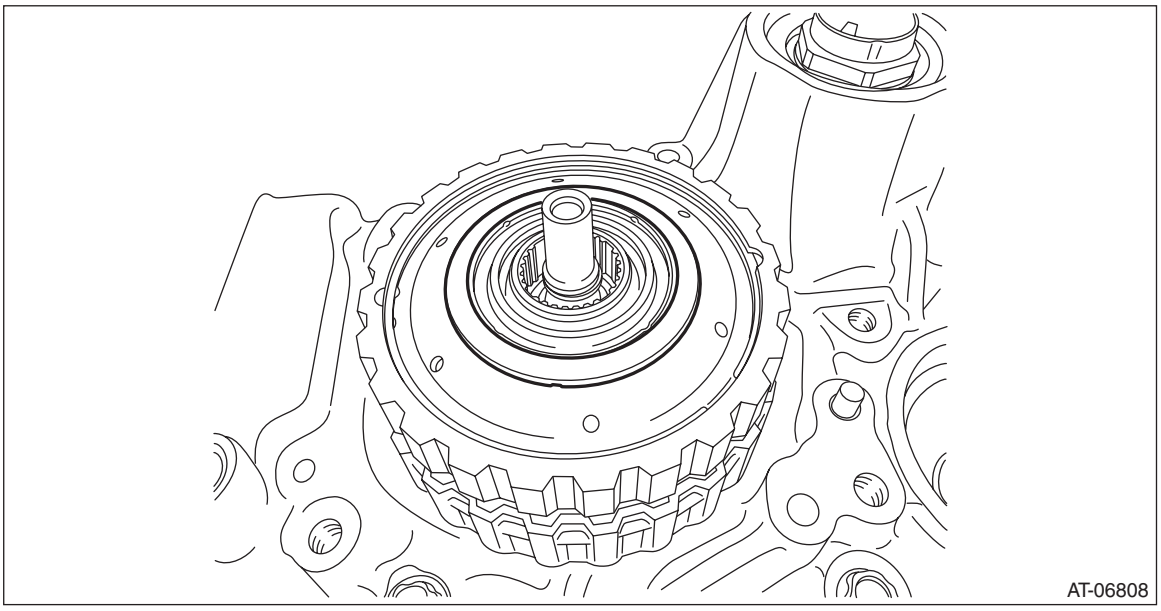
## E: INSPECTION

- Check the forward clutch drum, internal gear, sun gear and forward clutch piston lip for wear or damage.
- Inspect the drive plate facing for wear and damage.
- Check the driven plate for discoloration (burnt color).
- Check for worn snap ring, fatigue or damaged return spring or deformed spring retainer.
- Make sure the clearance between retaining plate and internal gear of forward clutch is within the limit. If it exceeds the standard, replace the forward clutch. <Ref. to CVT-258, ASSEMBLY, Forward Clutch Assembly.>

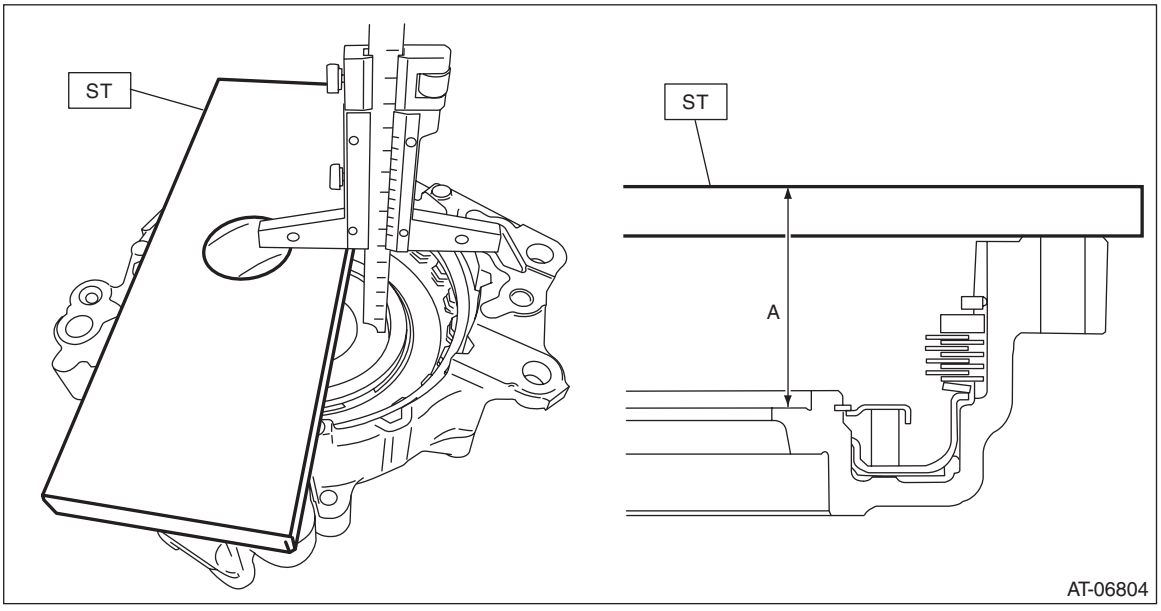
## F: ADJUSTMENT

1) Install the thrust bearing to the internal gear.

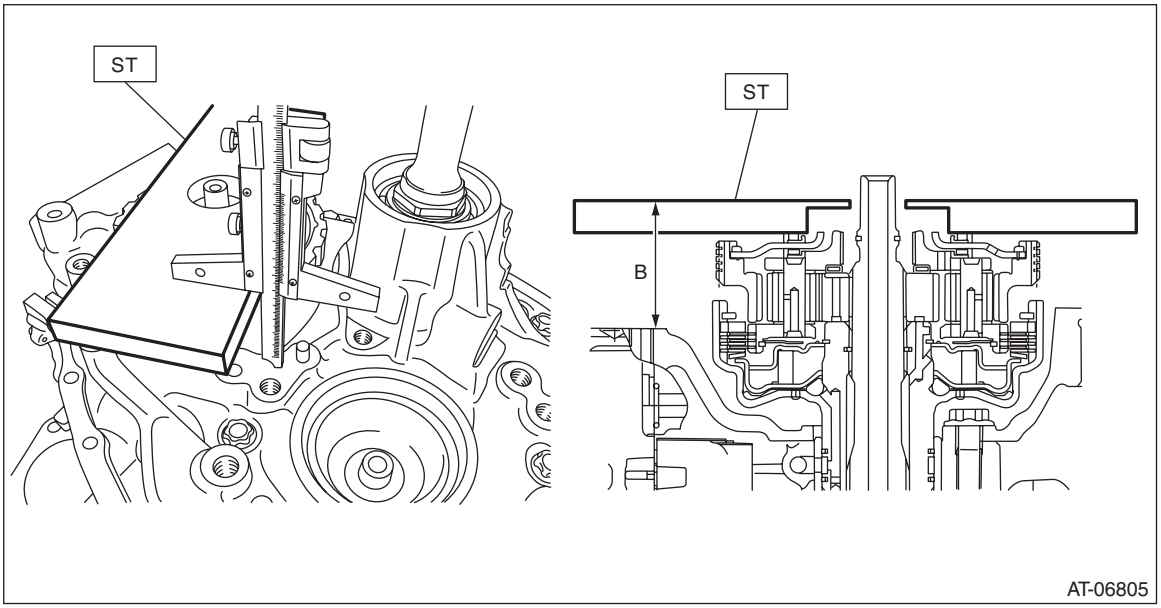
NOTE:
Face the temper color surface to the reverse brake side.



2) Measure depth “A” from the ST upper face to the washer mounting surface.
ST 499575600 GAUGE



3) Measure the height “B” from the ST upper face to the mating surface of the drive pinion retainer.
ST 499575600 GAUGE



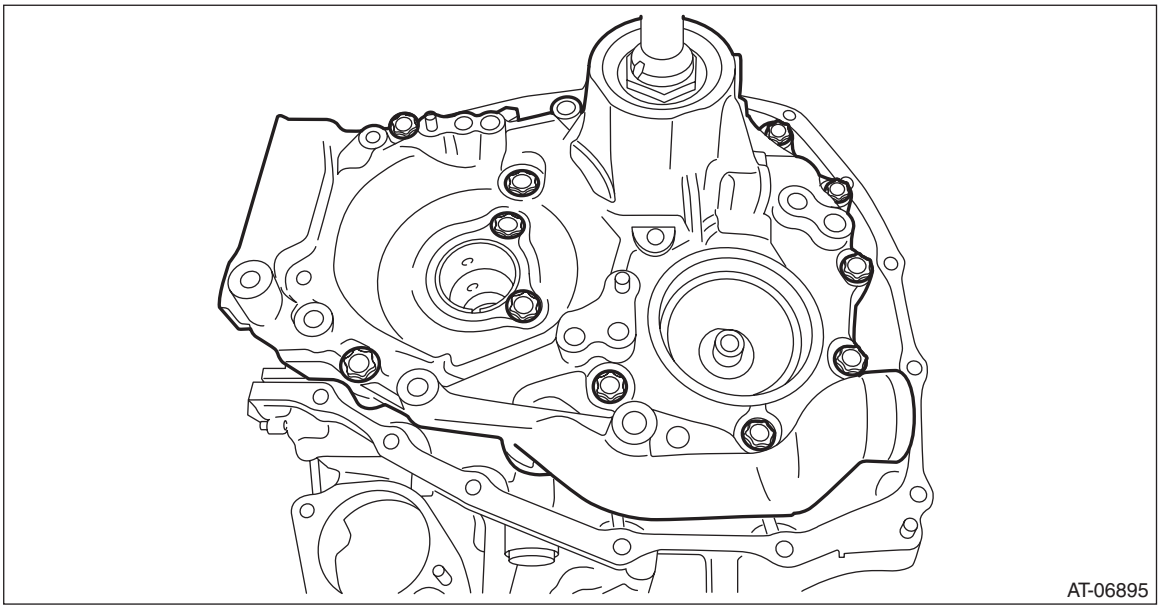
4) Obtain the thickness of washer using the following formula to select the washer.
T (mm) = A – B – (0.35 — 0.70)
[T (in) = A – B – (0.014 — 0.028)]
T: Shim thickness
A: Depth from the ST upper face to the washer mounting surface
B: Height from ST upper face to the drive pinion retainer mating surface
0.35 — 0.70 mm (0.014 — 0.028 in): Clearance

| Washer | |
|---|---|
| Part No. | Thickness mm (in) |
| 803064020 | 1.3 (0.051) |
| 803064021 | 1.55 (0.061) |
| 803064022 | 1.8 (0.071) |
| 803064023 | 2.05 (0.081) |
| 803064024 | 2.3 (0.091) |
| 803064025 | 2.55 (0.100) |

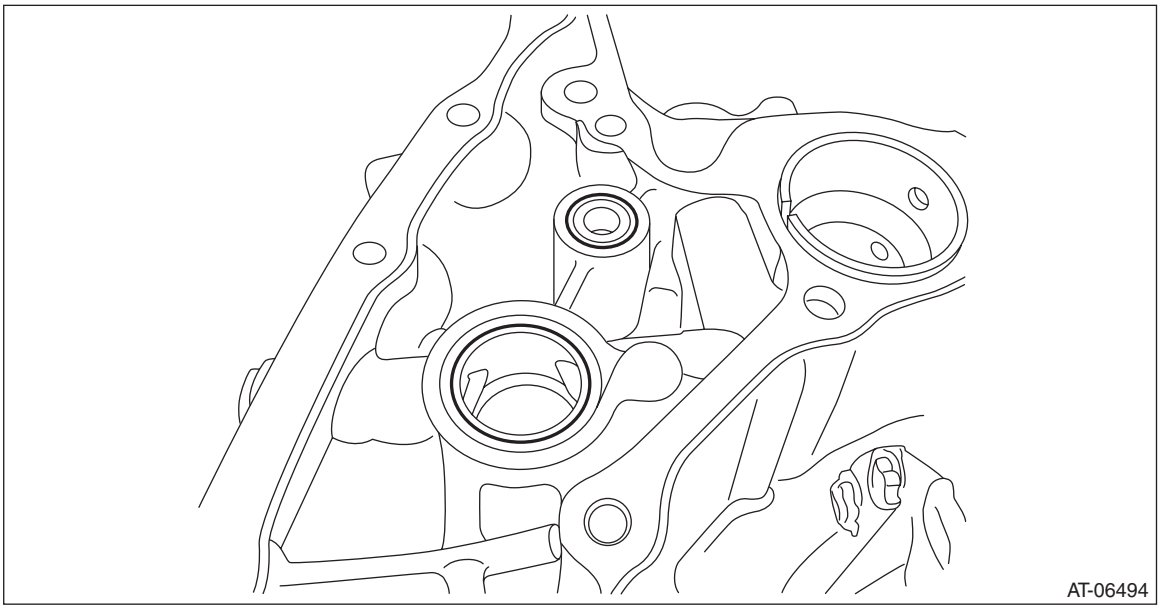
# 41.Drive Pinion Shaft Assembly

## A: REMOVAL

1) Remove the transmission assembly from the vehicle. <Ref. to CVT-56, REMOVAL, Automatic Transmission Assembly.>
2) Remove the air breather hose. <Ref. to CVT-148, REMOVAL, Air Breather Hose.>
3) Remove the control valve body. <Ref. to CVT-110, REMOVAL, Control Valve Body.>
4) Remove the transmission harness. <Ref. to CVT-124, REMOVAL, Transmission Harness.>
5) Remove the turbine speed sensor. <Ref. to CVT-97, REMOVAL, Turbine Speed Sensor.>
6) Remove the secondary speed sensor. <Ref. to CVT-99, REMOVAL, Secondary Speed Sensor.>
7) Remove the primary speed sensor. <Ref. to CVT-101, REMOVAL, Primary Speed Sensor.>
8) Remove the inhibitor switch. <Ref. to CVT-93, REMOVAL, Inhibitor Switch.>
9) Remove the extension case. <Ref. to CVT-156, REMOVAL, Extension Case.>
10) Remove the transfer clutch assembly. <Ref. to CVT-160, REMOVAL, Transfer Clutch.>
11) Remove the transfer driven gear assembly. <Ref. to CVT-174, REMOVAL, Transfer Driven Gear.>
12) Remove the parking pawl. <Ref. to CVT-177, REMOVAL, Parking Pawl.>
13) Remove the reduction driven gear assembly. <Ref. to CVT-179, REMOVAL, Reduction Driven Gear.>
14) Remove the oil pan and oil strainer. <Ref. to CVT-106, REMOVAL, Oil Pan and Strainer.>
15) Remove the transmission control device. <Ref. to CVT-187, REMOVAL, Transmission Control Device.>
16) Remove the transmission case. <Ref. to CVT-193, REMOVAL, Transmission Case.>
17) Remove the reduction drive gear. <Ref. to CVT-206, REMOVAL, Reduction Drive Gear.>
18) Remove the primary pulley, secondary pulley and variator chain. <Ref. to CVT-210, REMOVAL, Primary Pulley and Secondary Pulley.>
19) Remove the reverse brake assembly. <Ref. to CVT-231, REMOVAL, Reverse Brake Assembly.>
20) Remove the forward clutch assembly. <Ref. to CVT-246, REMOVAL, Forward Clutch Assembly.>
21) Using the ST, remove the drive pinion retainer.
ST 18270KA020 SOCKET (E20)



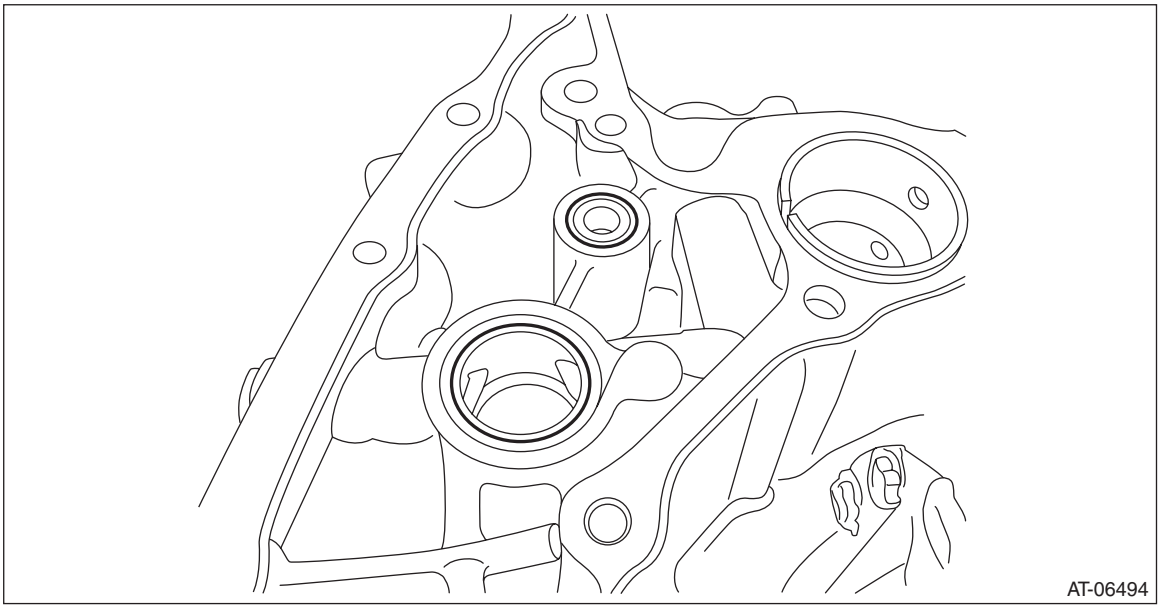
22) Remove the O-ring.



## B: INSTALLATION

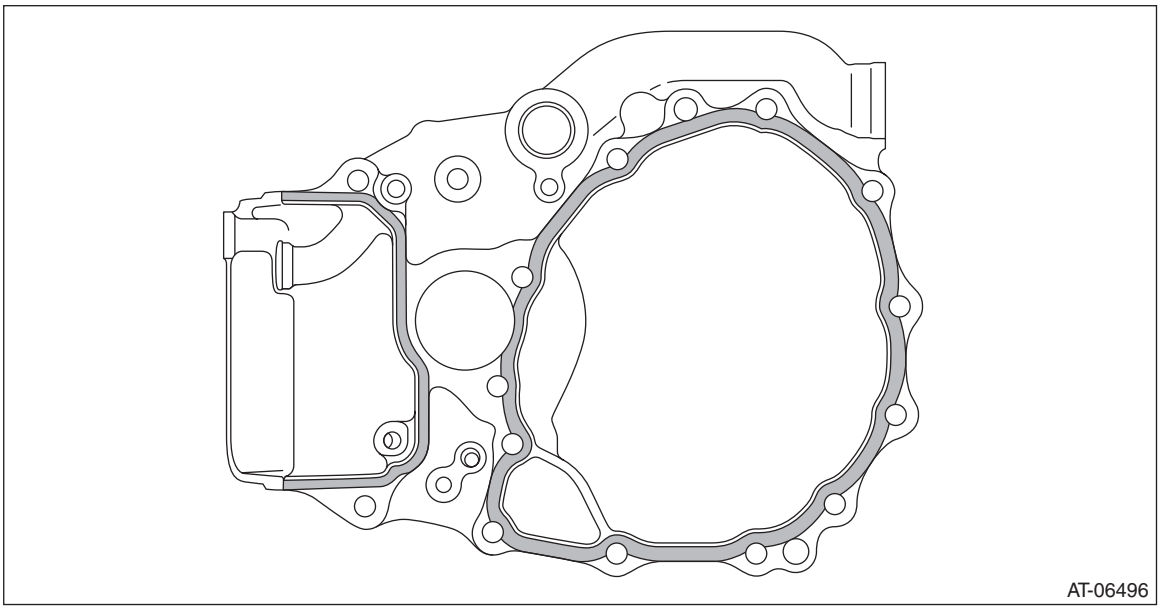
1) Clean the mating surface of drive pinion retainer and converter case.
2) Adjust the backlash and tooth contact between drive pinion shaft assembly and the front differential side gear. <Ref. to CVT-287, ADJUSTMENT, Drive Pinion Shaft Assembly.>
3) Install O-rings in two locations to the converter case.

NOTE:
- Use new O-rings.
- Apply CVTF to the O-ring.



4) Apply liquid gasket seamlessly to the mating surface of drive pinion retainer.

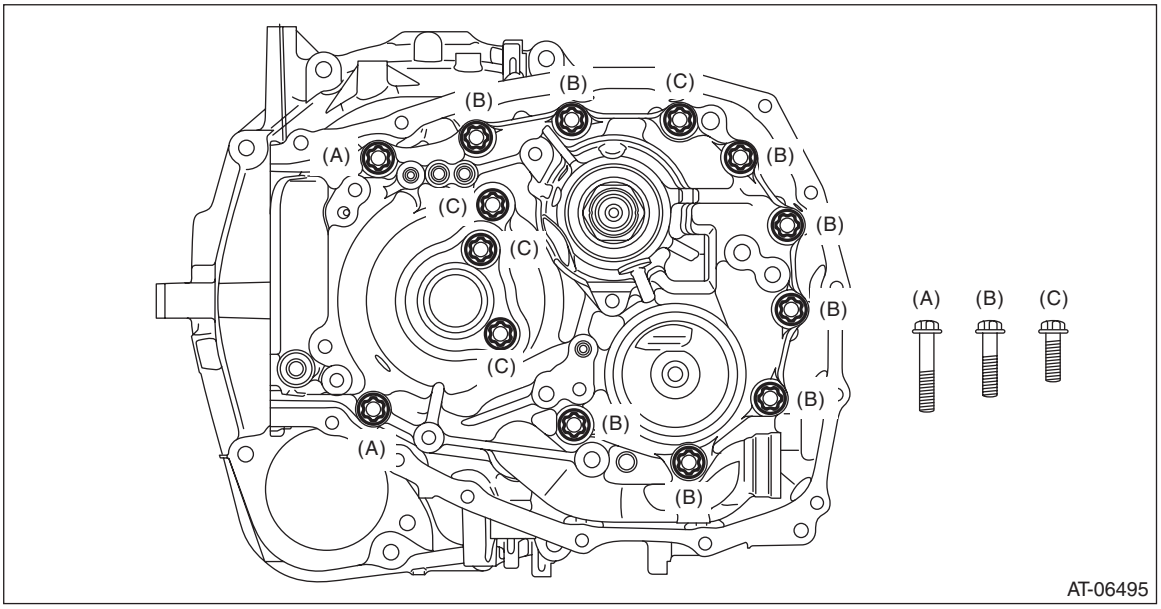
***Liquid gasket:***
***THREE BOND 1215 (Part No. 004403007) or equivalent***



5) Install the drive pinion retainer to converter case, and tighten the bolt using the ST.
ST 18270KA020 SOCKET (E20)

NOTE:
Do not confuse the three different-length bolts when installing.

***Tightening torque:***
***43 N·m (4.4 kgf-m, 31.7 ft-lb)***

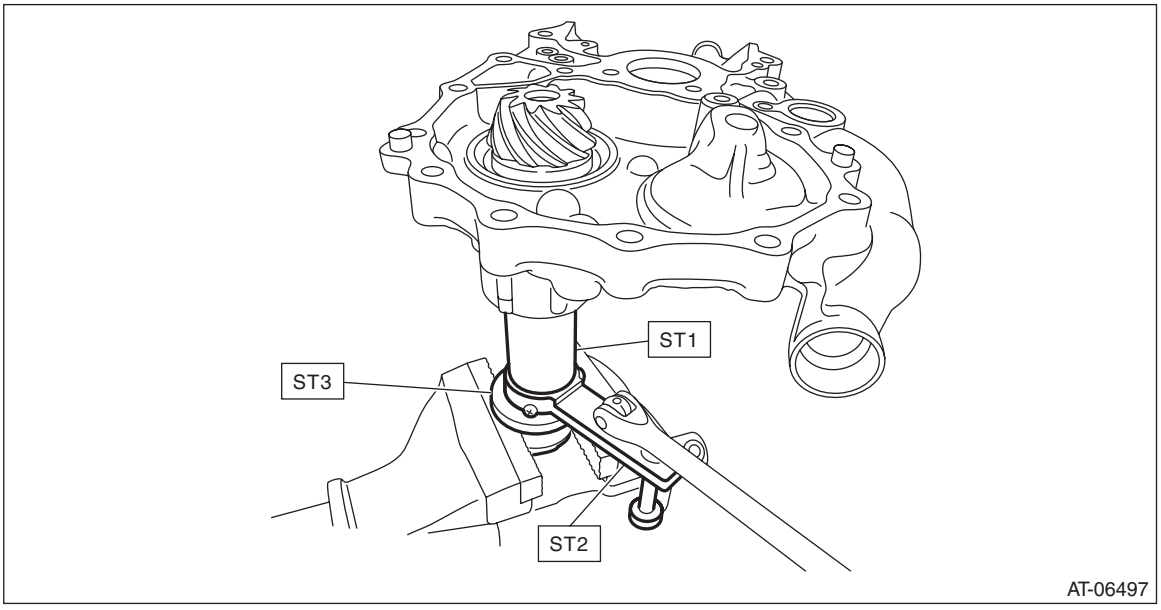


6) Install the forward clutch assembly. <Ref. to CVT-249, INSTALLATION, Forward Clutch Assembly.>
7) Install the reverse brake assembly. <Ref. to CVT-234, INSTALLATION, Reverse Brake Assembly.>
8) Install the primary pulley, secondary pulley and variator chain. <Ref. to CVT-217, INSTALLATION, Primary Pulley and Secondary Pulley.>
9) Install the reduction drive gear. <Ref. to CVT-207, INSTALLATION, Reduction Drive Gear.>
10) Install the transmission case. <Ref. to CVT-196, INSTALLATION, Transmission Case.>
11) Install the transmission control device. <Ref. to CVT-190, INSTALLATION, Transmission Control Device.>
12) Install the oil strainer and oil pan. <Ref. to CVT-107, INSTALLATION, Oil Pan and Strainer.>
13) Install the reduction driven gear assembly. <Ref. to CVT-179, INSTALLATION, Reduction Driven Gear.>
14) Install the transfer driven gear assembly. <Ref. to CVT-175, INSTALLATION, Transfer Driven Gear.>
15) Install the transfer clutch assembly. <Ref. to CVT-162, INSTALLATION, Transfer Clutch.>
16) Install the parking pawl. <Ref. to CVT-178, INSTALLATION, Parking Pawl.>
17) Install the extension case. <Ref. to CVT-157, INSTALLATION, Extension Case.>
18) Install the inhibitor switch. <Ref. to CVT-95, INSTALLATION, Inhibitor Switch.>
19) Install the secondary speed sensor. <Ref. to CVT-99, INSTALLATION, Secondary Speed Sensor.>
20) Install the primary speed sensor. <Ref. to CVT-102, INSTALLATION, Primary Speed Sensor.>
21) Install the turbine speed sensor. <Ref. to CVT-97, INSTALLATION, Turbine Speed Sensor.>
22) Install the transmission harness. <Ref. to CVT-130, INSTALLATION, Transmission Harness.>
23) Install the control valve body. <Ref. to CVT-116, INSTALLATION, Control Valve Body.>
24) Install the air breather hose. <Ref. to CVT-149, INSTALLATION, Air Breather Hose.>
25) Install the transmission assembly to the vehicle. <Ref. to CVT-67, INSTALLATION, Automatic Transmission Assembly.>

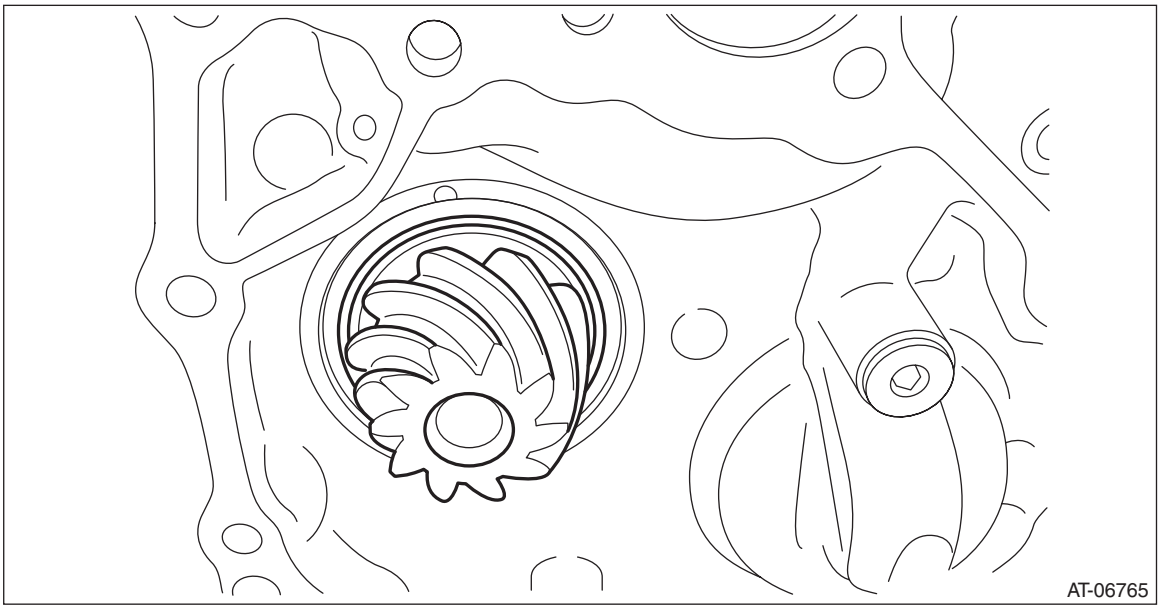
## C: DISASSEMBLY

1) Flatten the tab of the lock nut.
2) Using ST1, ST2 and ST3, fix at the spline portion of drive pinion shaft to remove the lock nut.

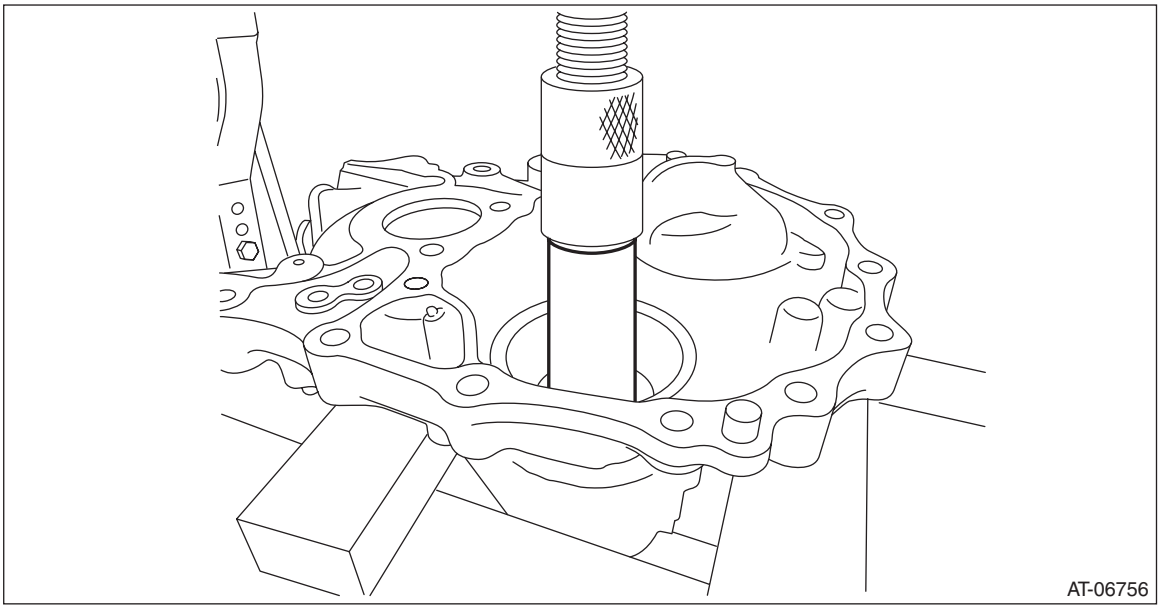
ST1 499787500 ADAPTER
ST2 499787700 WRENCH
ST3 498937110 HOLDER



3) Remove the drive pinion shaft from the drive pinion retainer.

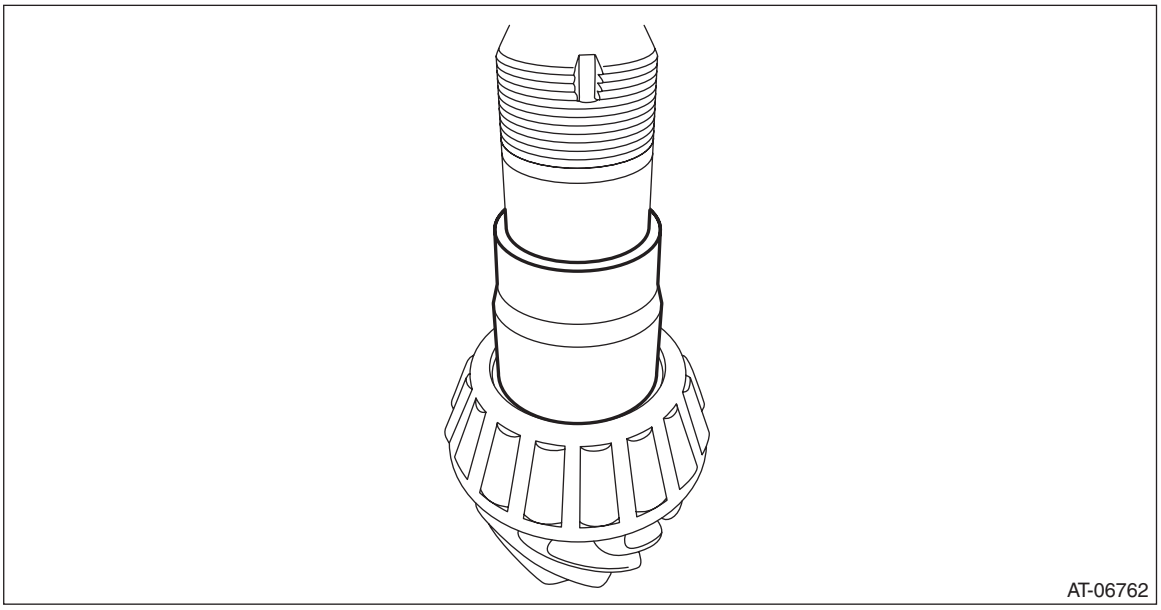


4) Using the round bar with diameter of 36 mm (1.42 in) or 37 mm (1.46 in), remove the bearing inner race and plug.

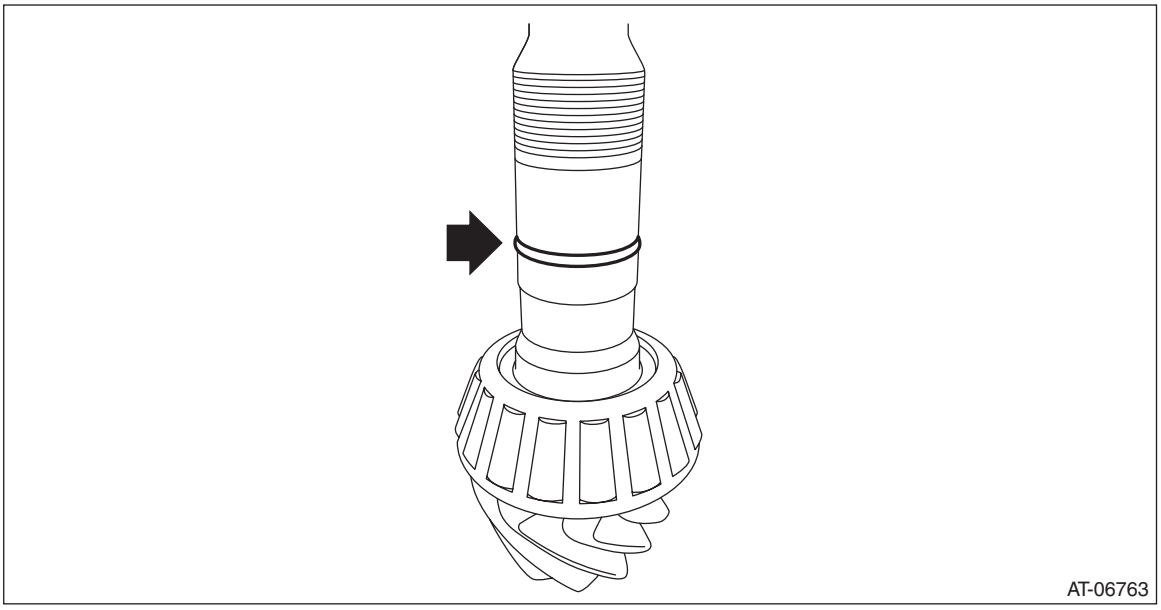


5) Remove the drive pinion washer.

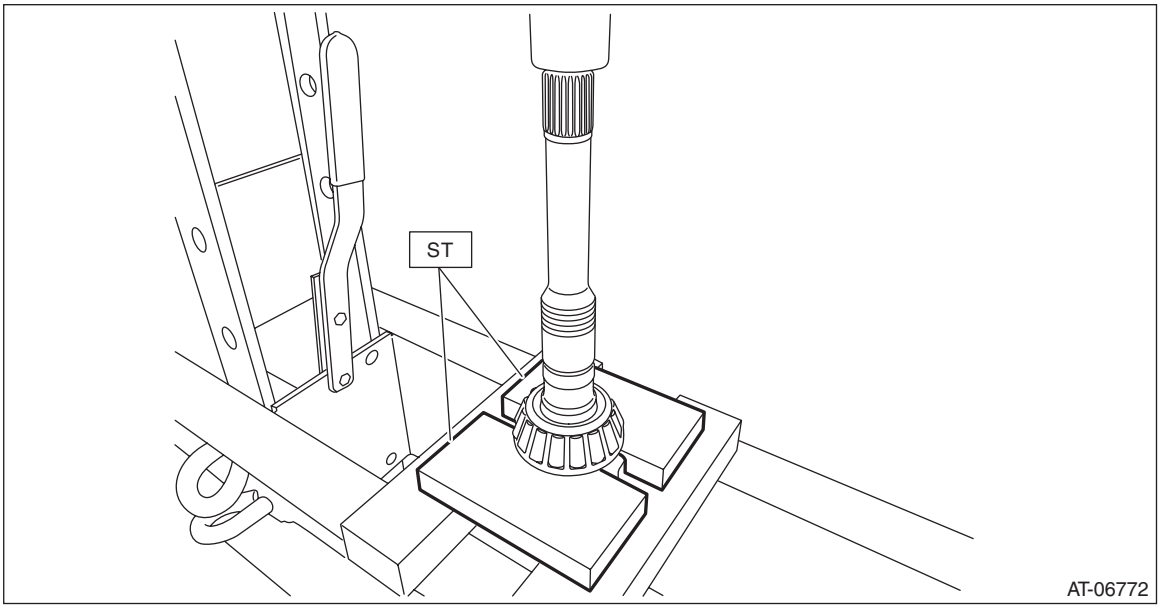
6) Remove the drive pinion spacer.



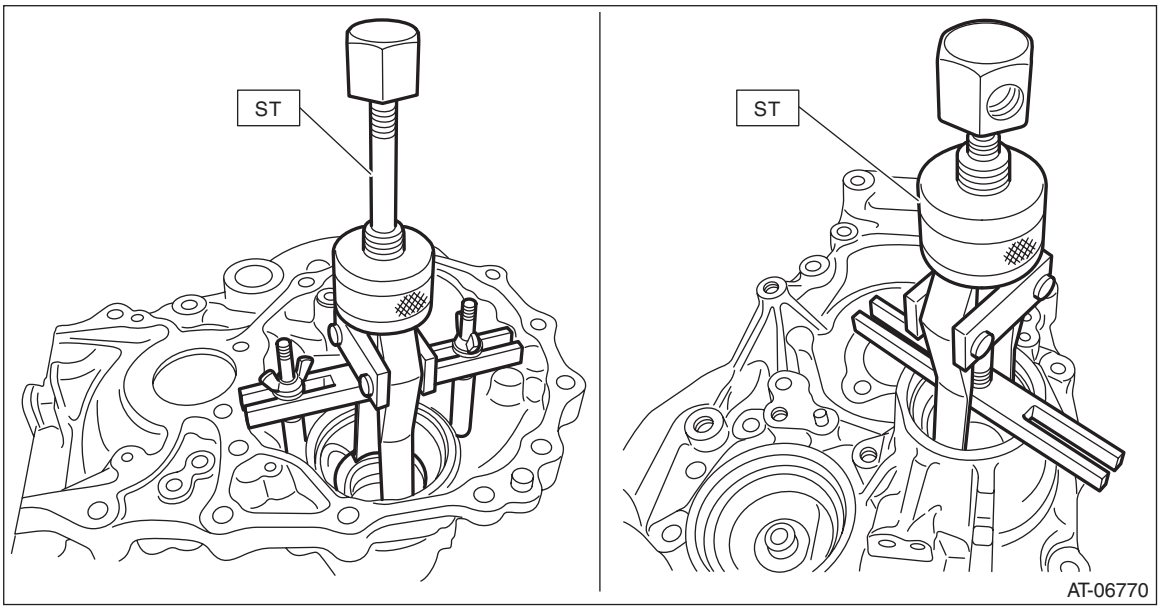
7) Remove the O-ring.



8) Remove the inner race and drive pinion shim from drive pinion shaft using ST.
ST 498515500 REMOVER

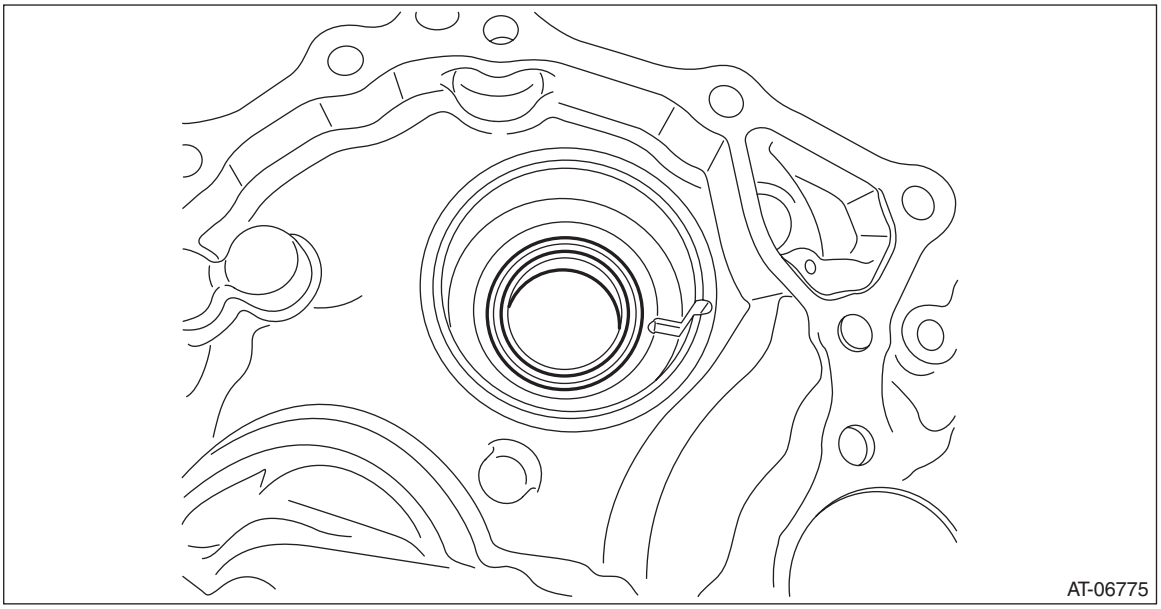


9) Using the ST, remove the outer race.
ST 398527700 PULLER ASSY

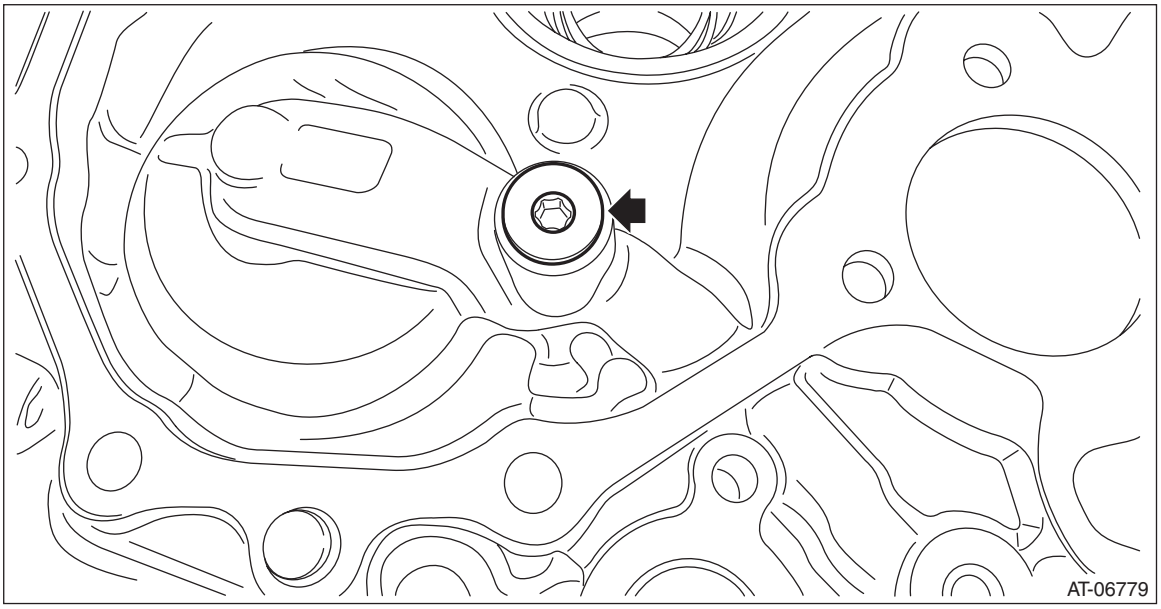


10) Remove the two oil seals using a screwdriver wrapped with cloth etc.

**CAUTION:**
**Do not damage the fitting surface of oil seal.**



11) Remove the plug from drive pinion retainer.

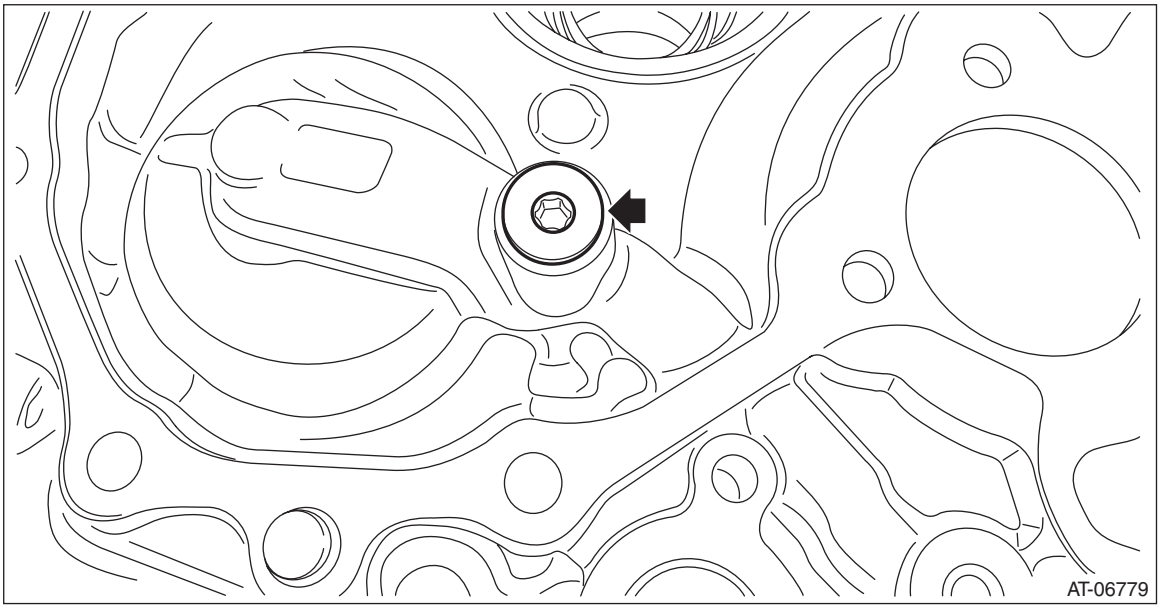


## D: ASSEMBLY

1) Install the plug to drive pinion retainer.

NOTE:
- Use new O-rings.
- Apply CVTF to the O-ring.

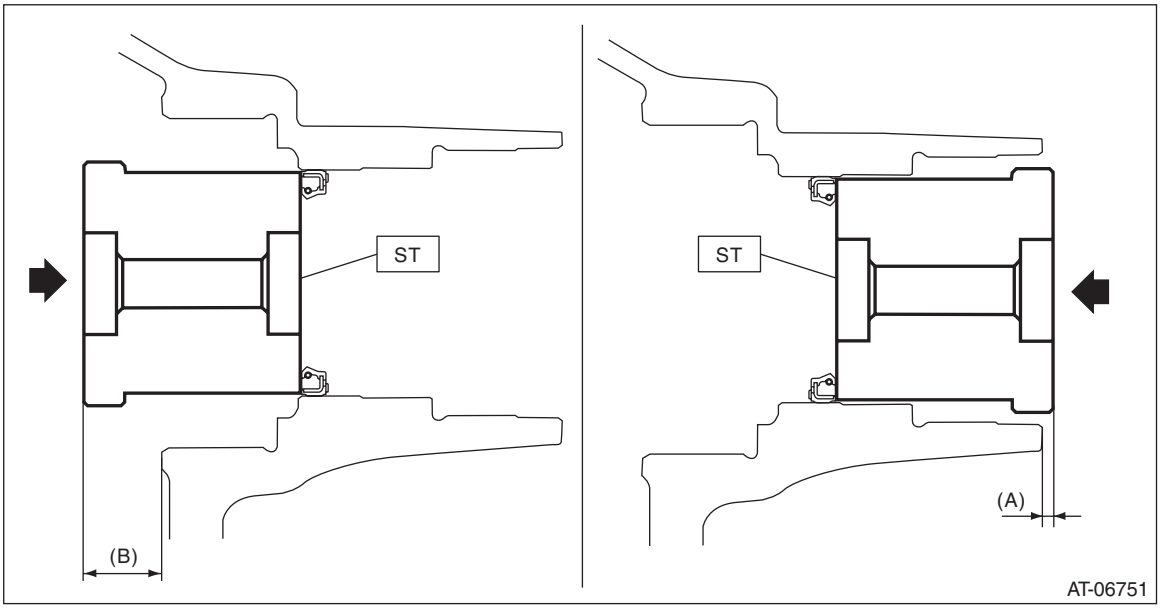
***Tightening torque:***
***25 N·m (2.5 kgf-m, 18.4 ft-lb)***



2) Using the ST, install the oil seal to drive pinion retainer.

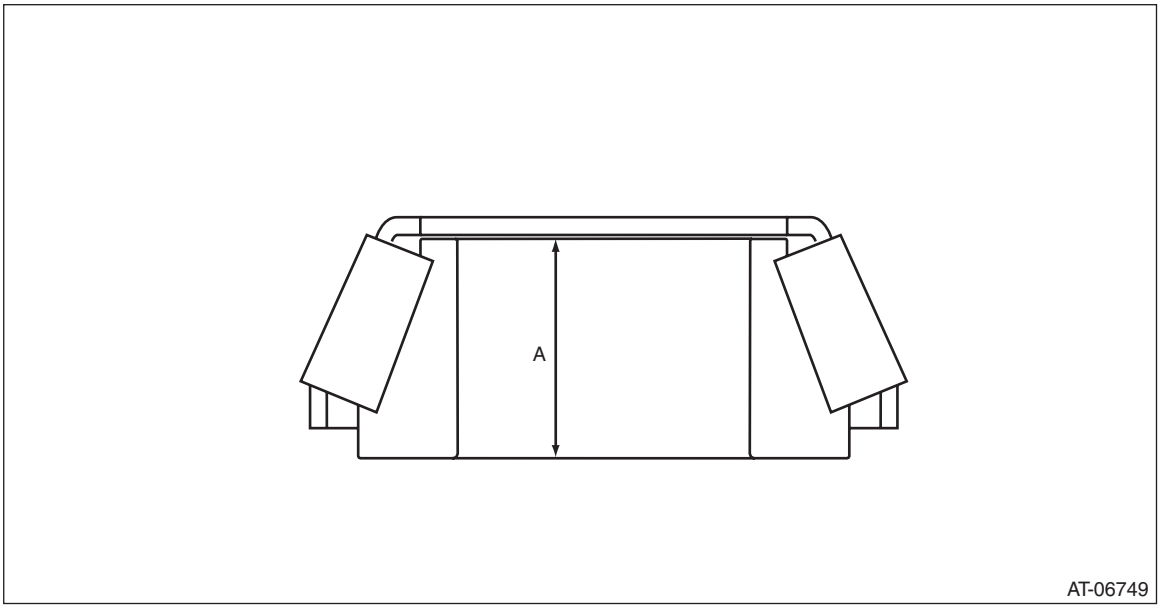
NOTE:
- Apply CVTF to the oil seal press-fitting surface and lip.
- Install the oil seal in the correct direction.

ST 927720000 HOUSING BUSHING INSTALLER AND REMOVER

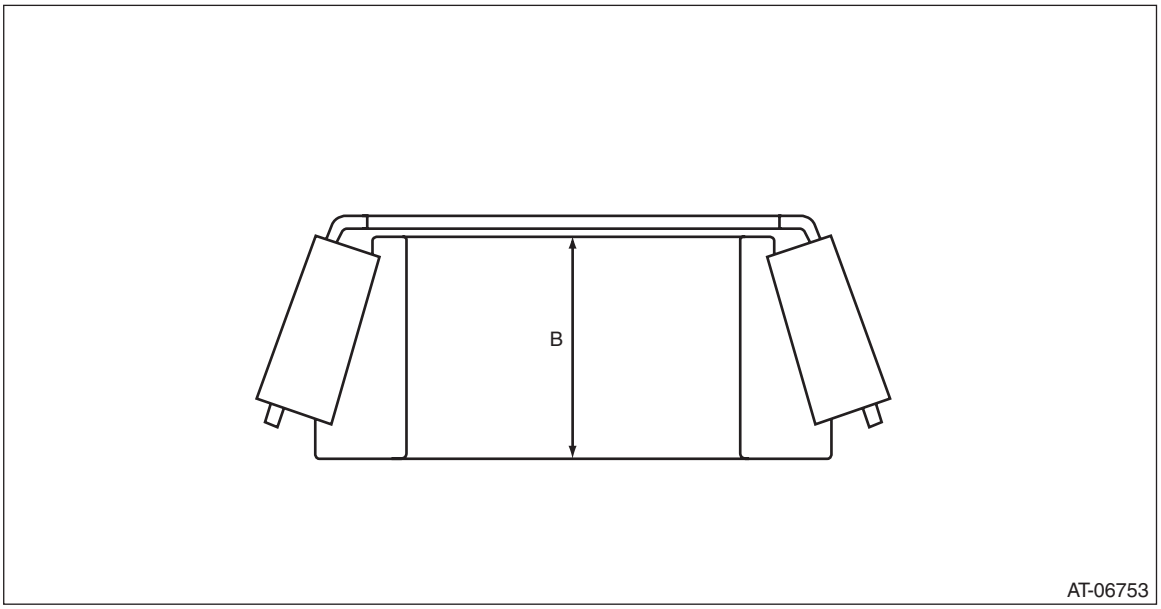


(A) 2.8 mm (0.11 in)
(B) 18.7 mm (0.74 in)

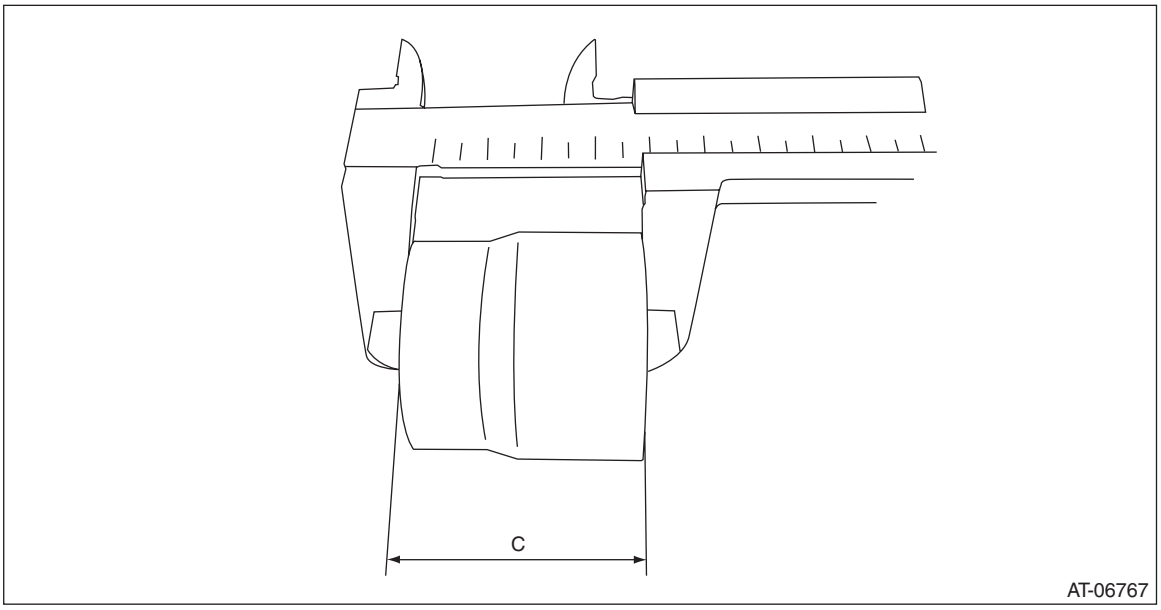
3) Select the drive pinion washer.
(1) Measure the roller bearing inner race width “A” on the front side.



(2) Measure the roller bearing inner race width “B” on the rear side.

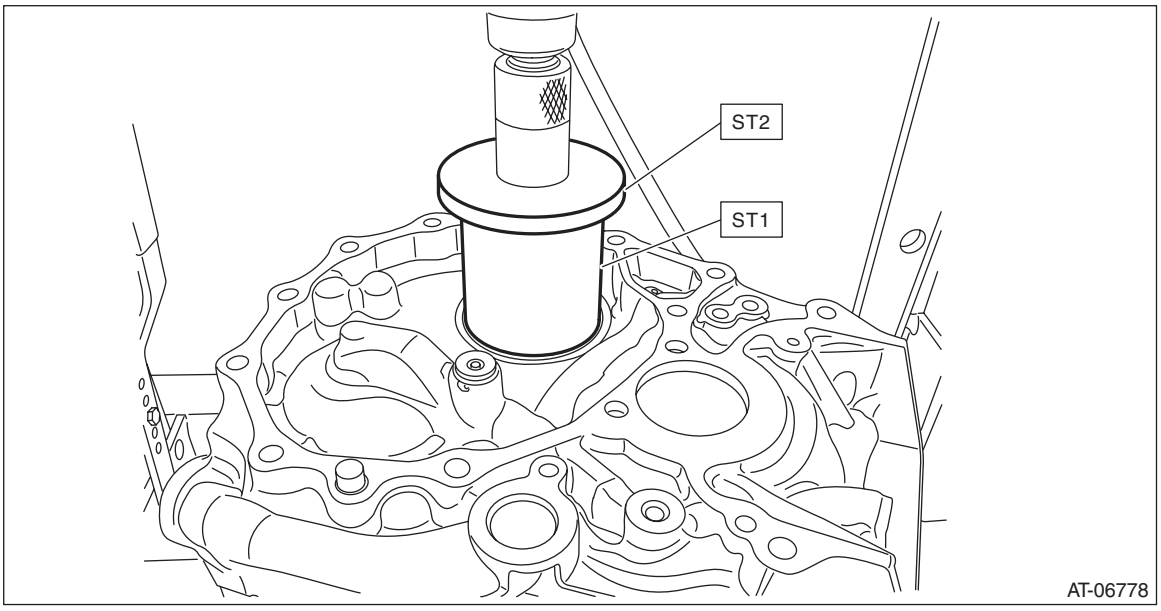


(3) Measure the spacer width “C”.

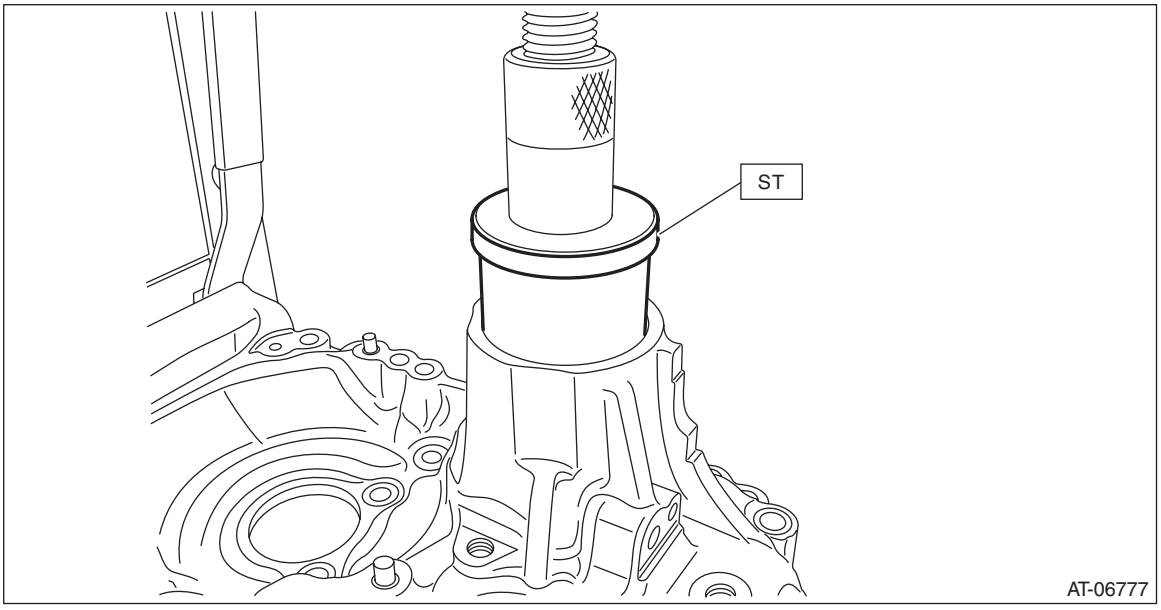


(4) Using the ST, install the front roller bearing outer race to the drive pinion retainer.

ST1 28499TC010 INSTALLER
ST2 398177700 INSTALLER



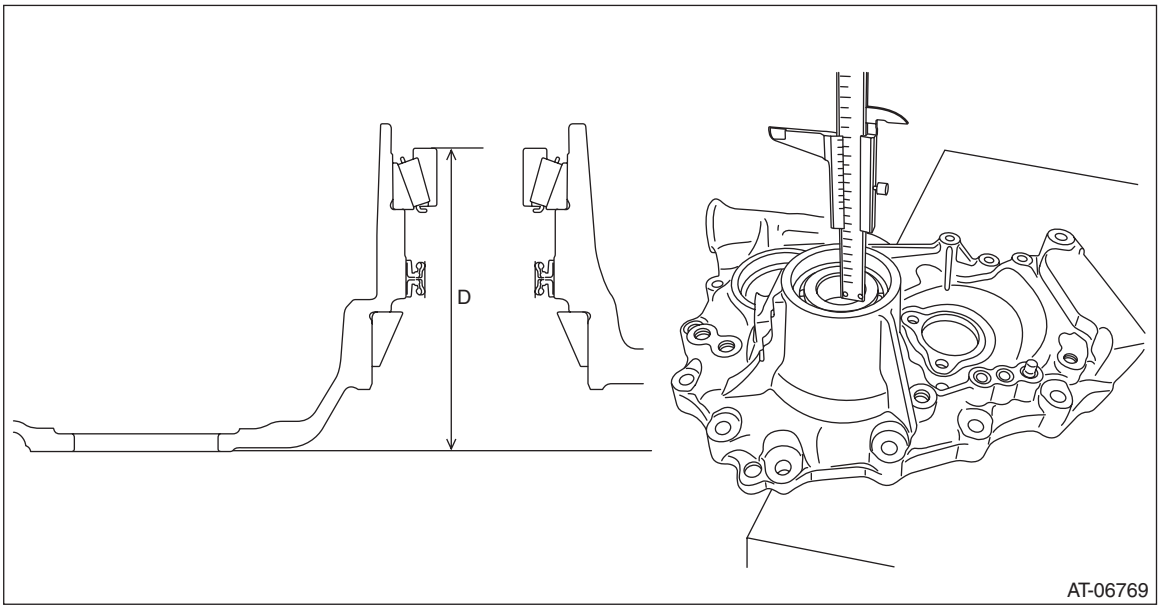
(5) Using the ST, install the rear roller bearing outer race to the drive pinion retainer.
ST 20099AE020 INSTALLER



(6) Place the drive pinion retainer on the surface plate, and install the inner race to the rear roller bearing outer race.

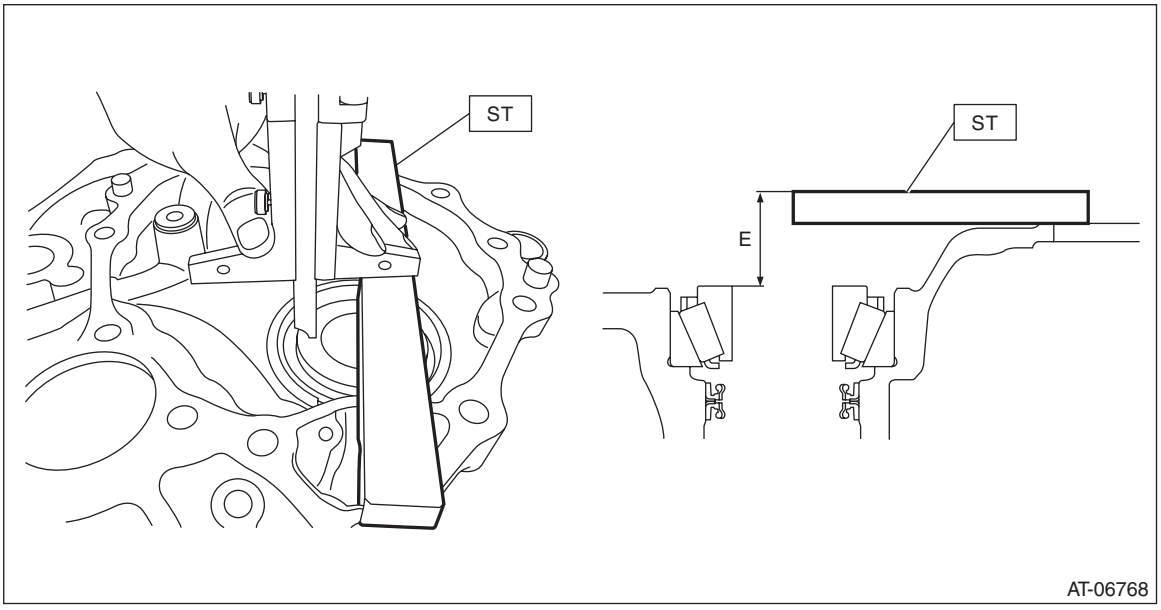
NOTE:
Place the drive pinion retainer so that the mating surface of the drive pinion retainer (mating surface with the converter case) contacts the surface plate.

(7) Measure the height “D” from the end face of the rear roller bearing inner race to the surface plate.



(8) Install the inner race to the front roller bearing outer race.

(9) Measure the depth “E” from the end face of the front roller bearing inner race to the end face of the ST.
ST 499575400 GAUGE

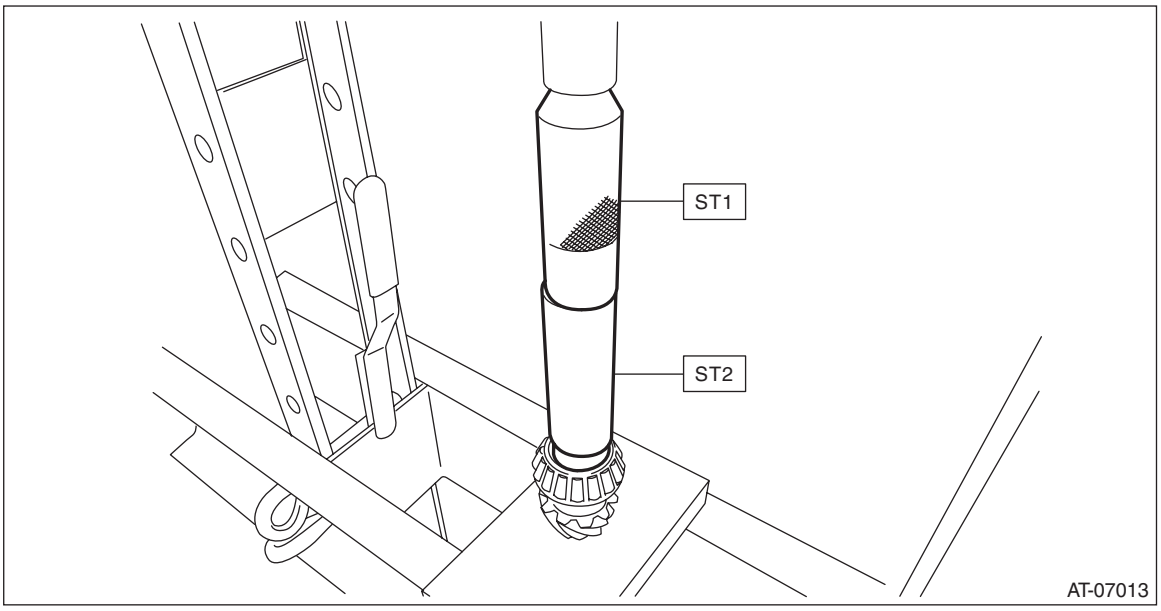


(10) Using following formula, select one to three drive pinion washers.
T (mm) = D – (A + B + C + E – 15) – (0±0.0125)
[T (in) = D – (A + B + C + E – 0.591) – (0±0.0005)]
A: Front roller bearing width
B: Rear roller bearing width
C: Spacer width
D: Height from end face of rear roller bearing inner race to surface plate
E: Depth from end face of front roller bearing inner race to end face of ST
15 mm (0.591 in): Thickness of ST
T: Drive pinion washer thickness
0±0.0125 mm (0±0.0005 in): Clearance

| Drive pinion washer | |
|---|---|
| Part No. | Thickness mm (in) |
| 38336AA750 | 0.150 (0.0059) |
| 38336AA760 | 0.175 (0.0069) |
| 38336AA770 | 0.200 (0.0079) |
| 38336AA780 | 0.225 (0.0089) |
| 38336AA790 | 0.250 (0.0098) |
| 38336AA800 | 0.275 (0.0108) |
| 38336AA810 | 0.300 (0.0118) |
| 38336AA820 | 0.400 (0.0157) |

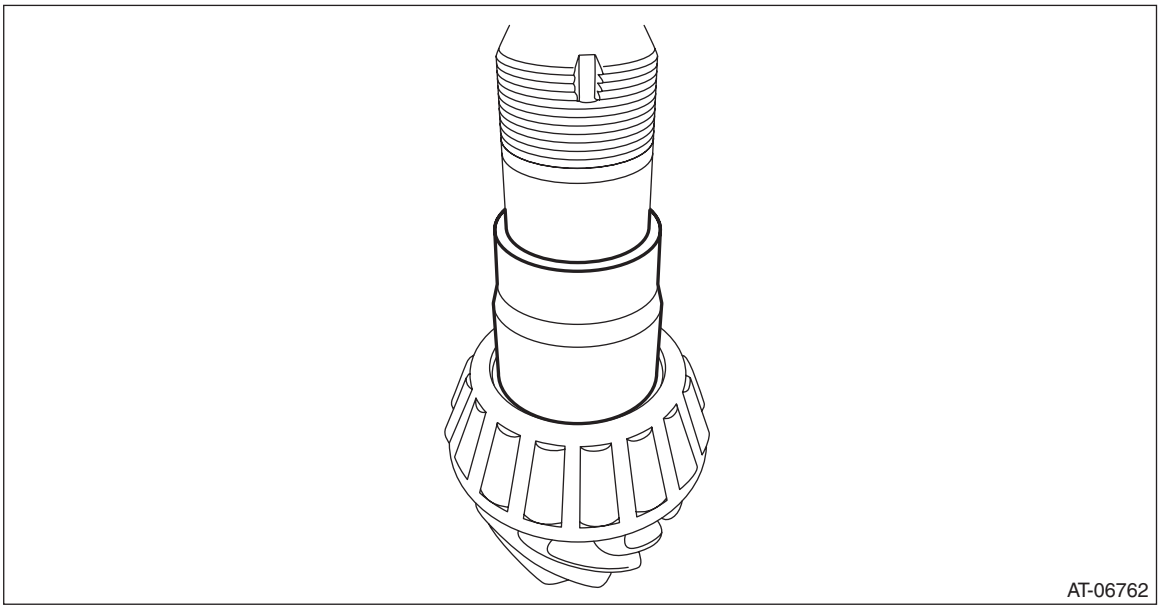
4) Measure and record the drive pinion shim thickness to be reused.
5) Install the drive pinion shim that is reused for the drive pinion shaft.

6) Using the ST1 and ST2, press-fit the inner race to the drive pinion shaft.
ST1 899580100 INSTALLER
ST2 927130000 EXTENSION DRIVE SHAFT

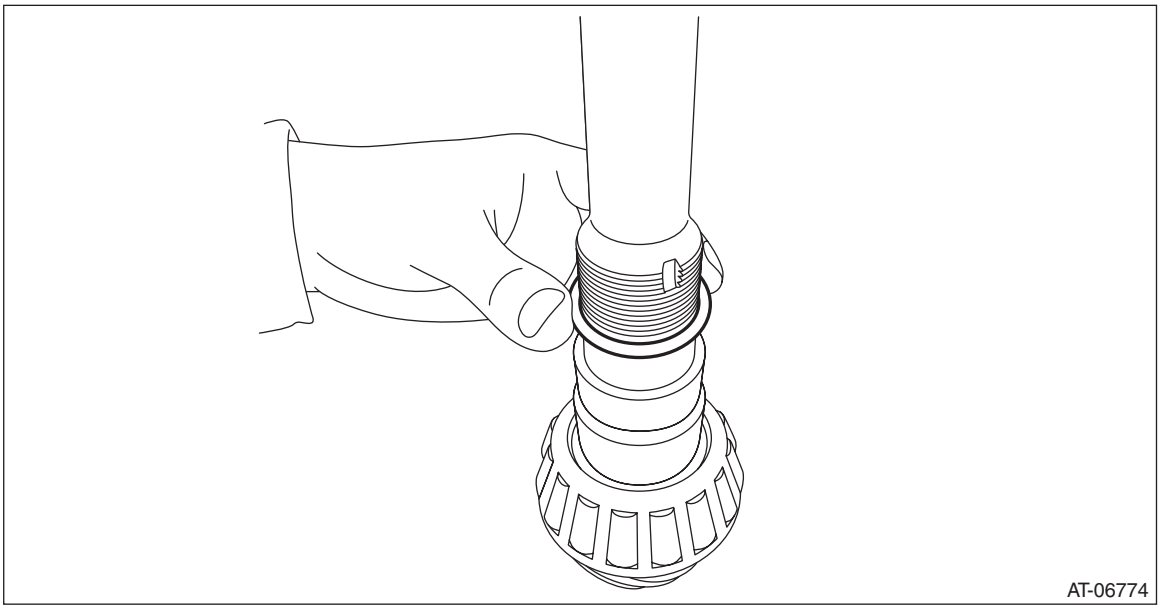


7) Install the drive pinion spacer.

NOTE:
Replace the O-ring with a new part after tooth contact inspection.



8) Install the selected drive pinion washer.

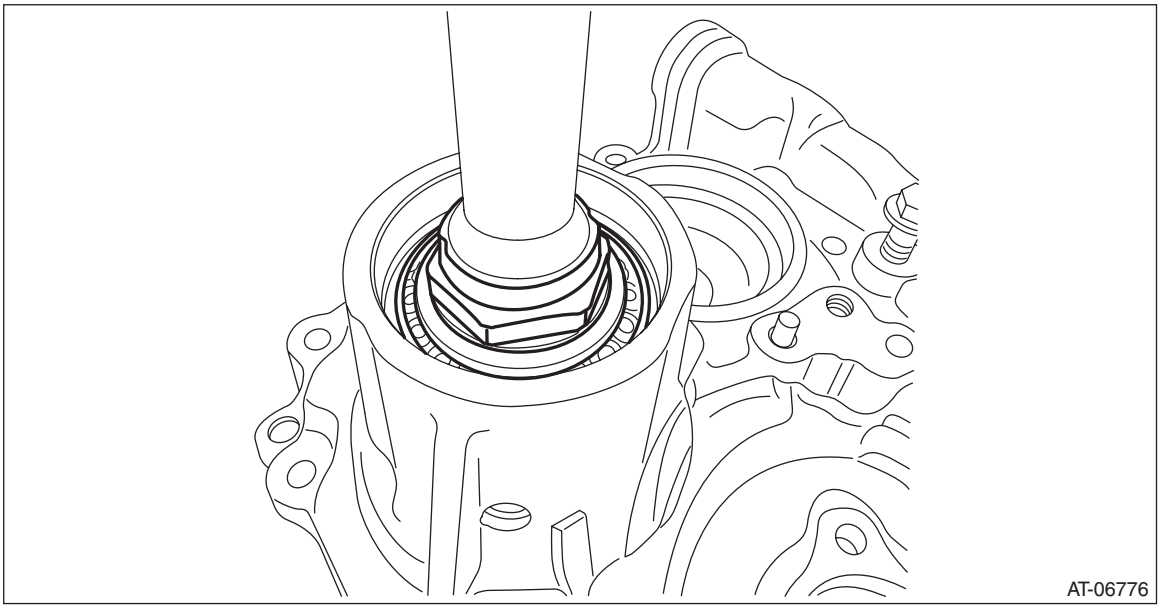


9) Insert the drive pinion shaft into the drive pinion retainer.

**CAUTION:**
**Be careful not to damage the oil seal.**

10) Install the inner bearing and lock nut.

NOTE:
Use a new lock nut.



11) Using the ST, tighten the lock nut to the specified torque so that the starting torque of the drive pinion shaft is within the specified range.

**CAUTION:**
**Before inspecting the starting torque, apply differential gear oil to roller of bearing and rotate the bearing several times.**

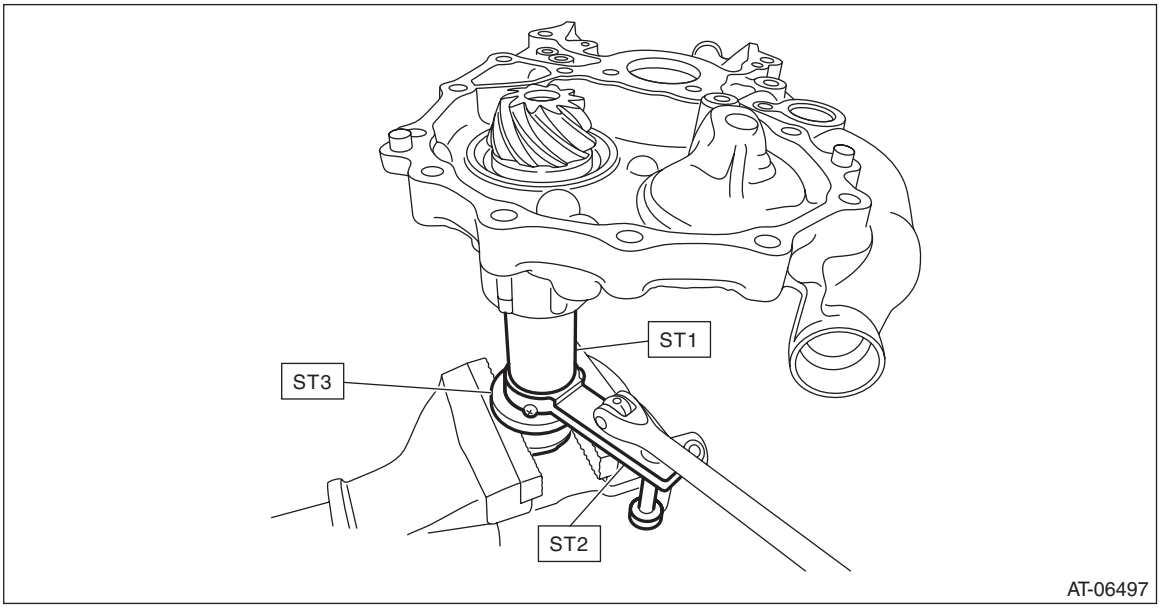
NOTE:
- Tighten the lock nut while directly aligning ST2 and torque wrench.
- If the starting torque is not within the specified range, select the drive pinion washer, and repeat the step until the starting torque is within the specified range.
- When a thicker drive pinion washer is selected, the starting torque decreases. When a thinner drive pinion washer is selected, the starting torque increases.

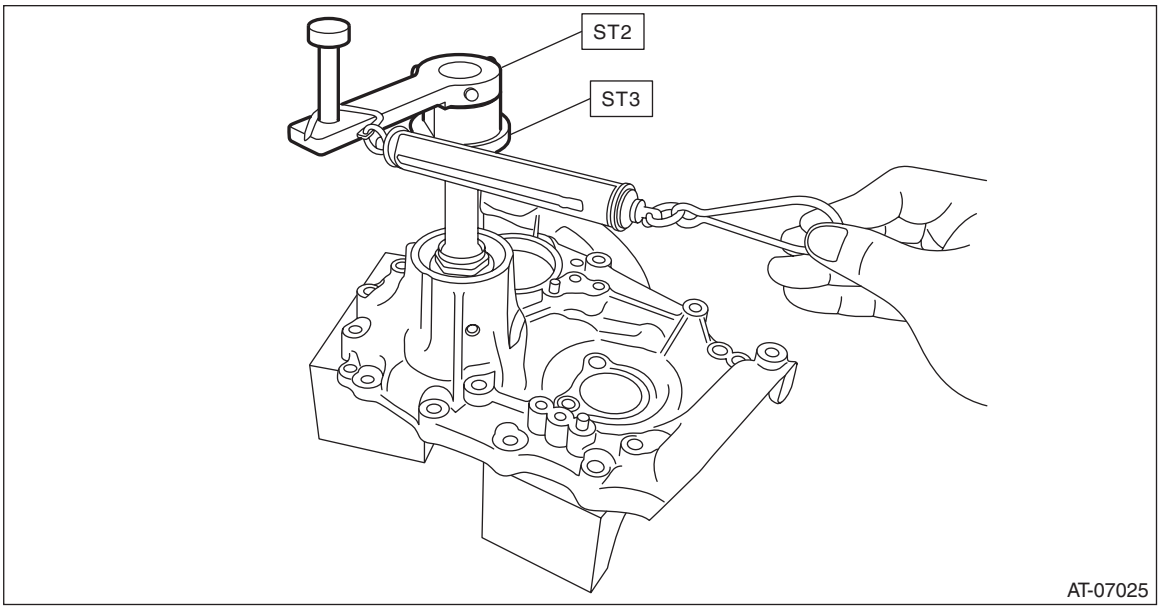
***Starting torque:***
***5.1 — 17.1 N (0.5 — 1.7 kgf, 1.1 — 3.8 lbf)***

ST1 499787500 ADAPTER
ST2 499787700 WRENCH
ST3 498937110 HOLDER

Using the following formula, calculate the tightening torque for a torque wrench.
T2 = L2/(L1 + L2) × T1
T1: 170 — 250 N·m (17.3 — 25.5 kgf-m, 125.4 — 184.4 ft-lb) [Specified tightening torque range]
T2: Tightening torque
L1: ST1 length 0.072 m (2.83 in)
L2: Torque wrench length
Example:

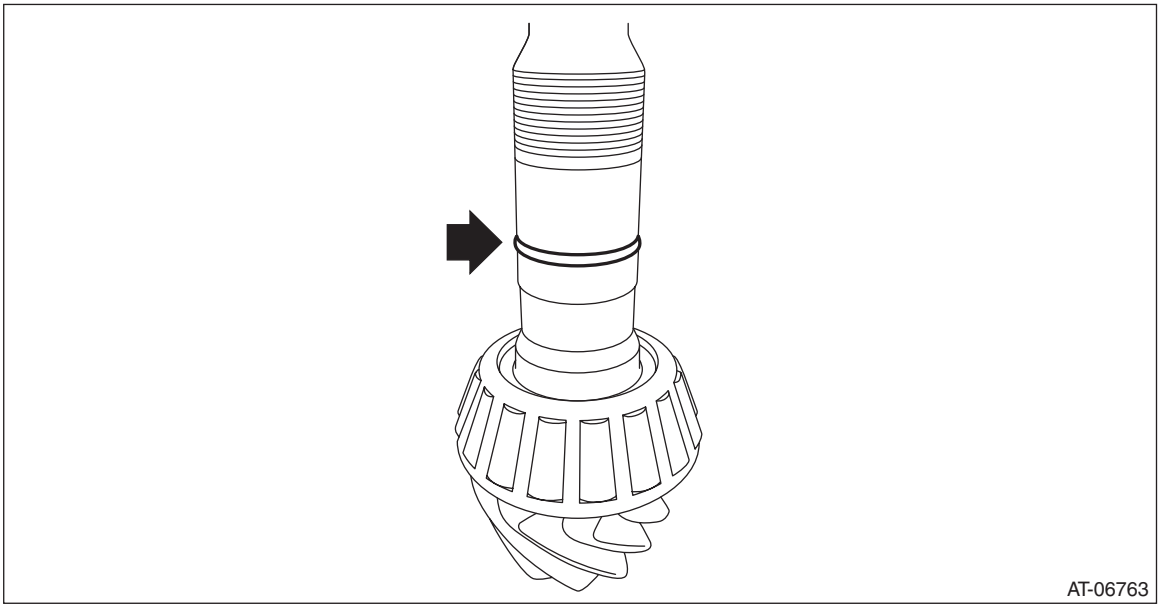
| Torque wrench length<br>m (in) | Tightening torque<br>N·m (kgf-m, ft-lb) |
|---|---|
| 0.4 (15.75) | 144 — 211 (14.7 — 21.5, 106.2 — 155.6) |
| 0.45 (17.72) | 147 — 215 (15.0 — 21.9, 108.4 — 158.6) |
| 0.5 (19.69) | 149 — 218 (15.2 — 22.2, 109.9 — 160.8) |
| 0.55 (21.65) | 150 — 221 (15.3 — 22.5, 110.6 — 163.0) |



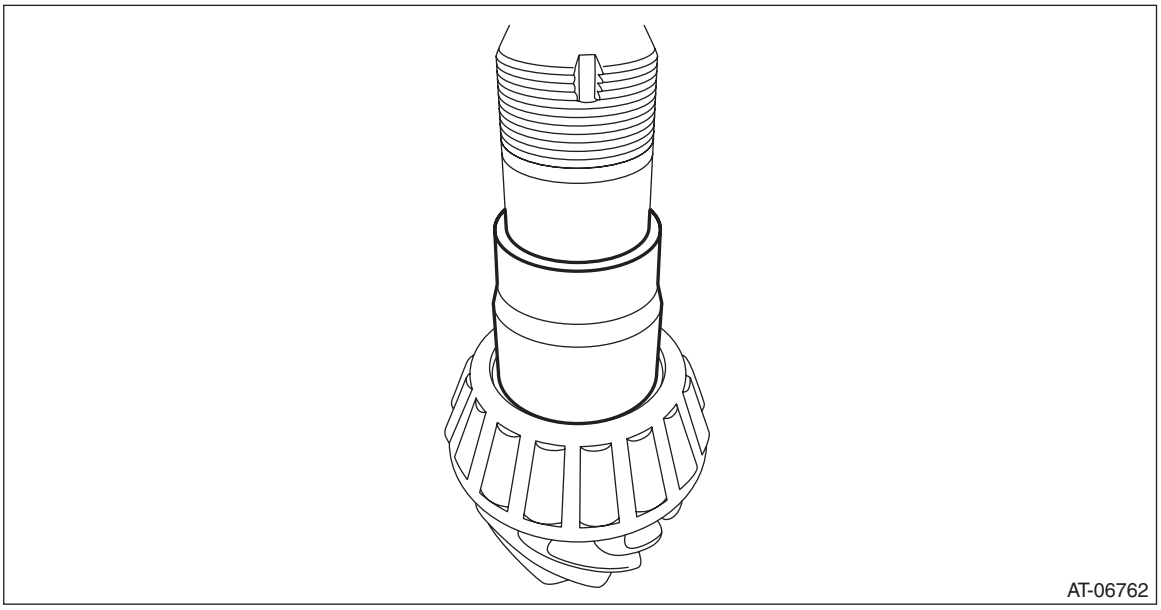


12) Install the drive pinion retainer to the converter case, and check the backlash and tooth contact. <Ref. to CVT-287, ADJUSTMENT, Drive Pinion Shaft Assembly.> <Ref. to CVT-308, ADJUSTMENT, Front Differential Assembly.>
13) Remove the drive pinion retainer from converter case. <Ref. to CVT-265, REMOVAL, Drive Pinion Shaft Assembly.>
14) Remove the drive pinion spacer from the drive pinion shaft. <Ref. to CVT-268, DISASSEMBLY, Drive Pinion Shaft Assembly.>
15) Install the O-ring to the drive pinion shaft.

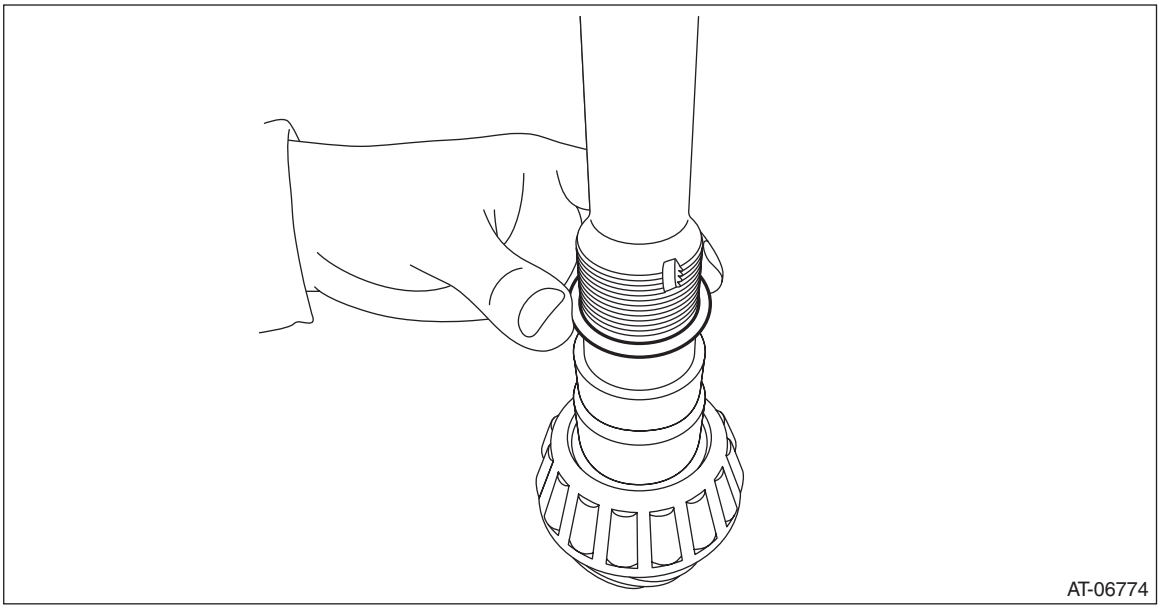
NOTE:
- Use new O-rings.
- Apply CVTF to the O-ring.



16) Install the drive pinion spacer to the drive pinion shaft.

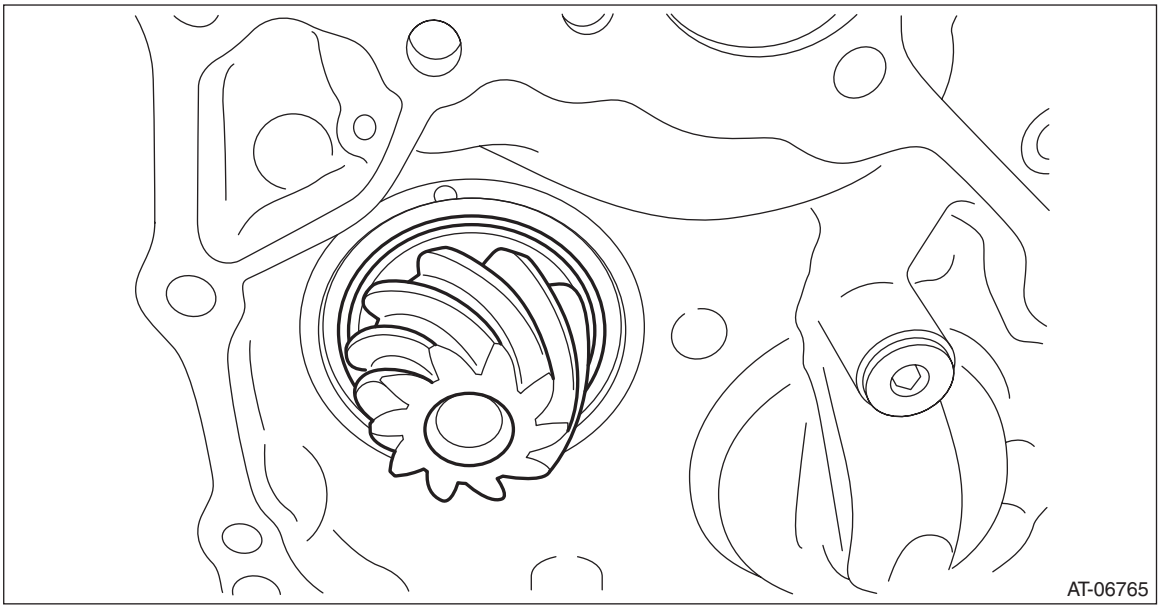


17) Install the drive pinion washer.

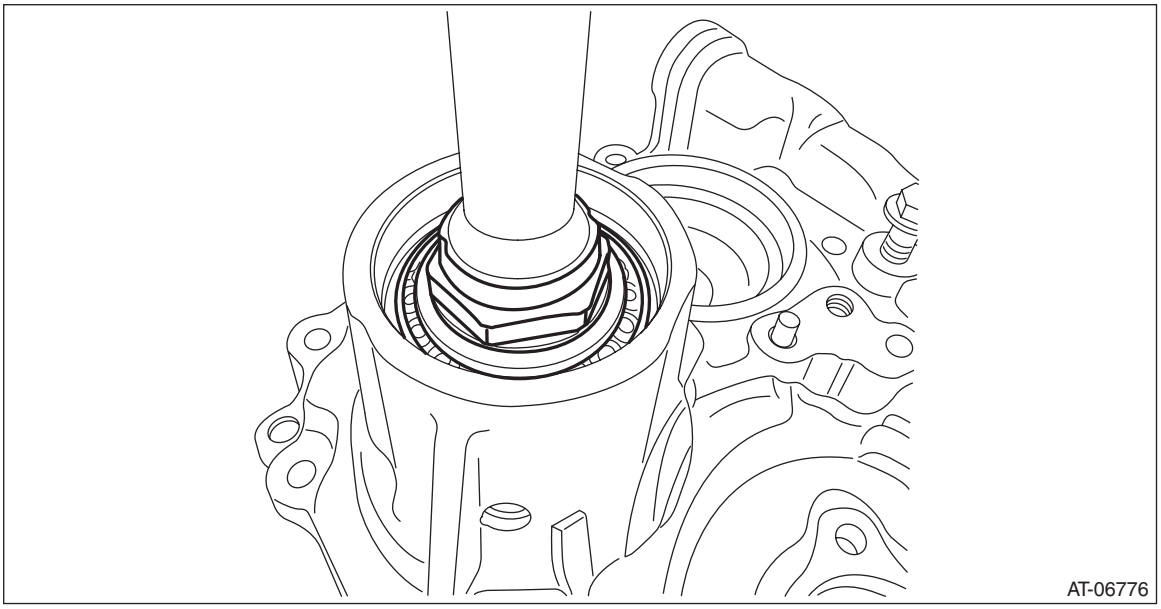


18) Insert the drive pinion shaft into the drive pinion retainer.

**CAUTION:**
**Be careful not to damage the oil seal.**



19) Install the inner bearing and lock nut.



20) Using the ST, tighten the lock nut to the specified torque so that the starting torque of the drive pinion shaft is within the specified range.

**CAUTION:**
**Before inspecting the starting torque, apply differential gear oil to roller of bearing and rotate the bearing several times.**

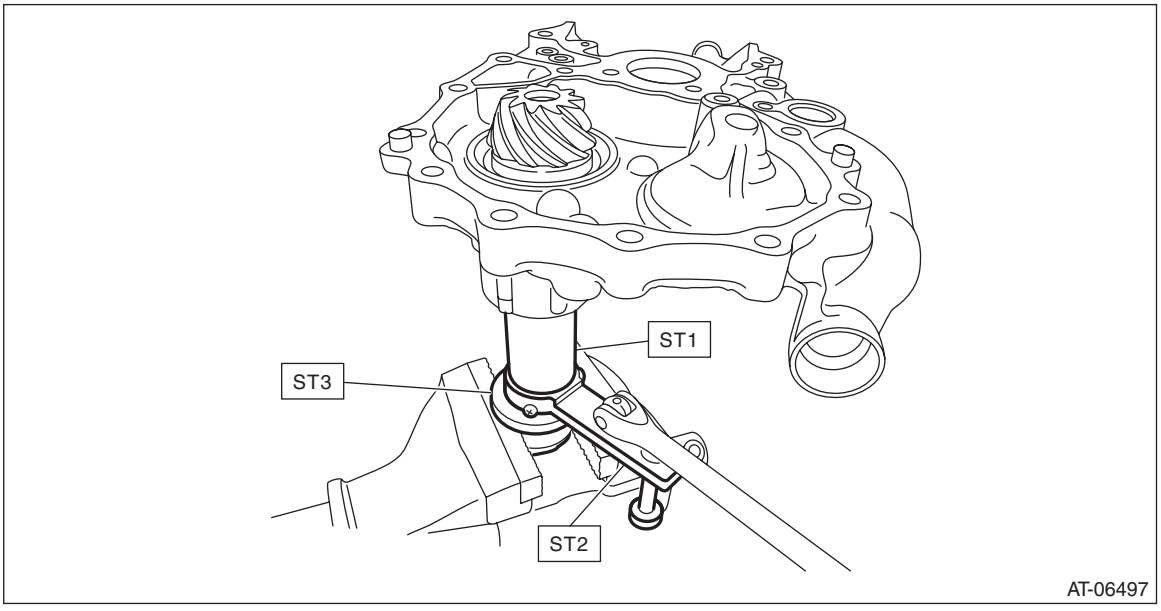
NOTE:
- Tighten the lock nut while directly aligning ST2 and torque wrench.
- If the starting torque is not within the specified range, select the drive pinion washer, and repeat the step until the starting torque is within the specified range.
- When a thicker drive pinion washer is selected, the starting torque decreases. When a thinner drive pinion washer is selected, the starting torque increases.

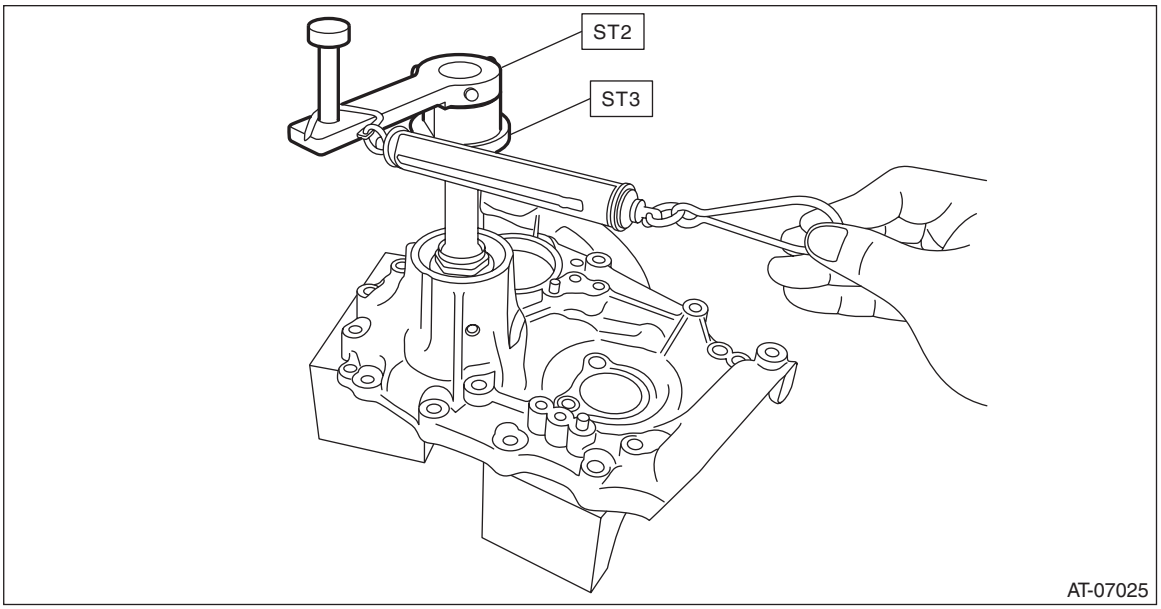
***Starting torque:***
***5.1 — 17.1 N (0.5 — 1.7 kgf, 1.1 — 3.8 lbf)***

ST1 499787500 ADAPTER
ST2 499787700 WRENCH
ST3 498937110 HOLDER

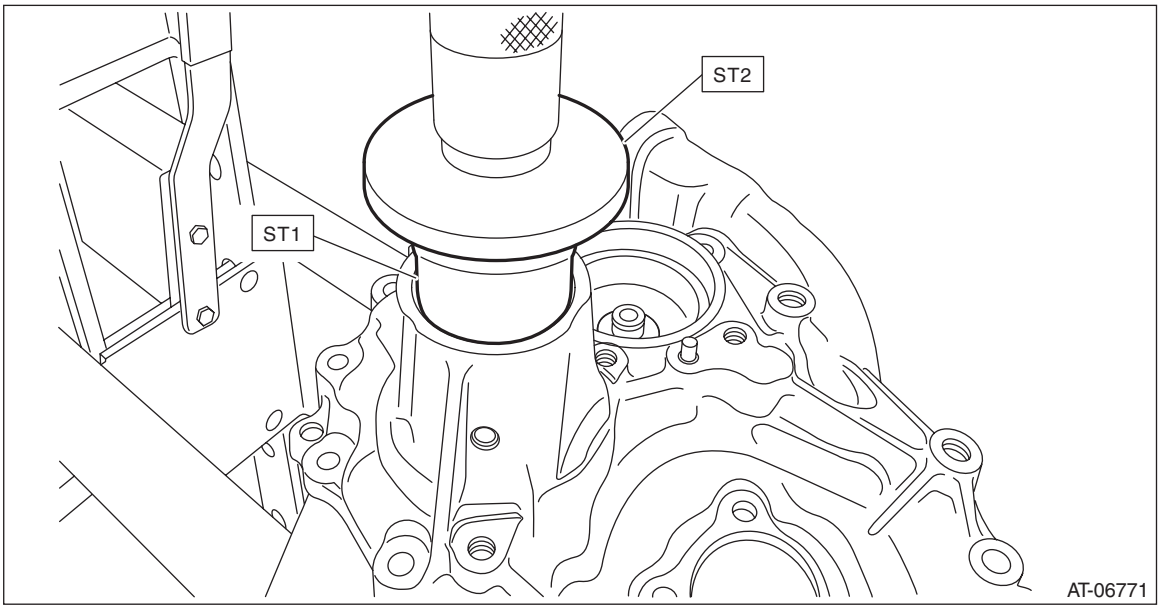
Using the following formula, calculate the tightening torque for a torque wrench.
$T2 = L2/(L1 + L2) \times T1$
T1: 170 — 250 N·m (17.3 — 25.5 kgf-m, 125.4 — 184.4 ft-lb) [Specified tightening torque range]
T2: Tightening torque
L1: ST1 length 0.072 m (2.83 in)
L2: Torque wrench length
Example:

| Torque wrench length<br>m (in) | Tightening torque<br>N·m (kgf-m, ft-lb) |
|---|---|
| 0.4 (15.75) | 144 — 211 (14.7 — 21.5, 106.2 — 155.6) |
| 0.45 (17.72) | 147 — 215 (15.0 — 21.9, 108.4 — 158.6) |
| 0.5 (19.69) | 149 — 218 (15.2 — 22.2, 109.9 — 160.8) |
| 0.55 (21.65) | 150 — 221 (15.3 — 22.5, 110.6 — 163.0) |





21) Crimp the lock nut in 2 locations.
22) Using the ST, install the plug.
ST1 499755602 PRESS SNAP RING
ST2 398177700 INSTALLER

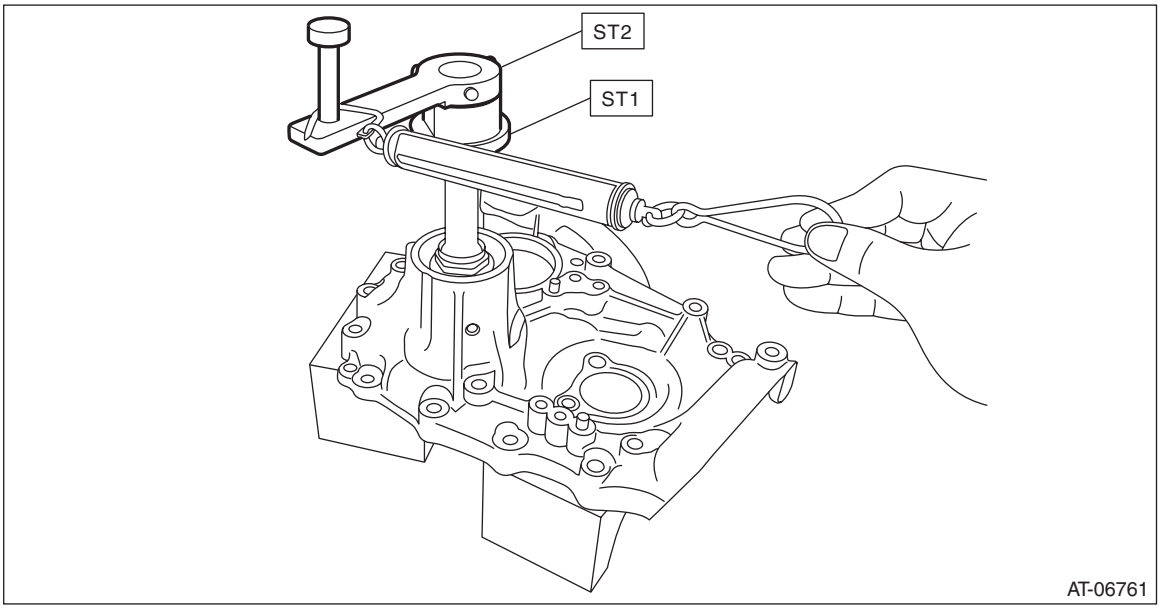


## E: INSPECTION

- Make sure that all component parts are free of scratches, holes and other faults.
- Check the tooth contact. <Ref. to CVT-287, ADJUSTMENT, Drive Pinion Shaft Assembly.>
- Apply CVTF to bearing and rotate the bearing to check for noise or dragging etc.
- Check the starting torque of drive pinion shaft.

**CAUTION:**
**Before measuring, apply differential gear oil to roller of bearing and rotate the bearing several times.**
ST1 498937110 HOLDER
ST2 499787700 WRENCH

***Starting torque:***
***5.1 — 17.1 N (0.5 — 1.7 kgf, 1.1 — 3.8 lbf)***

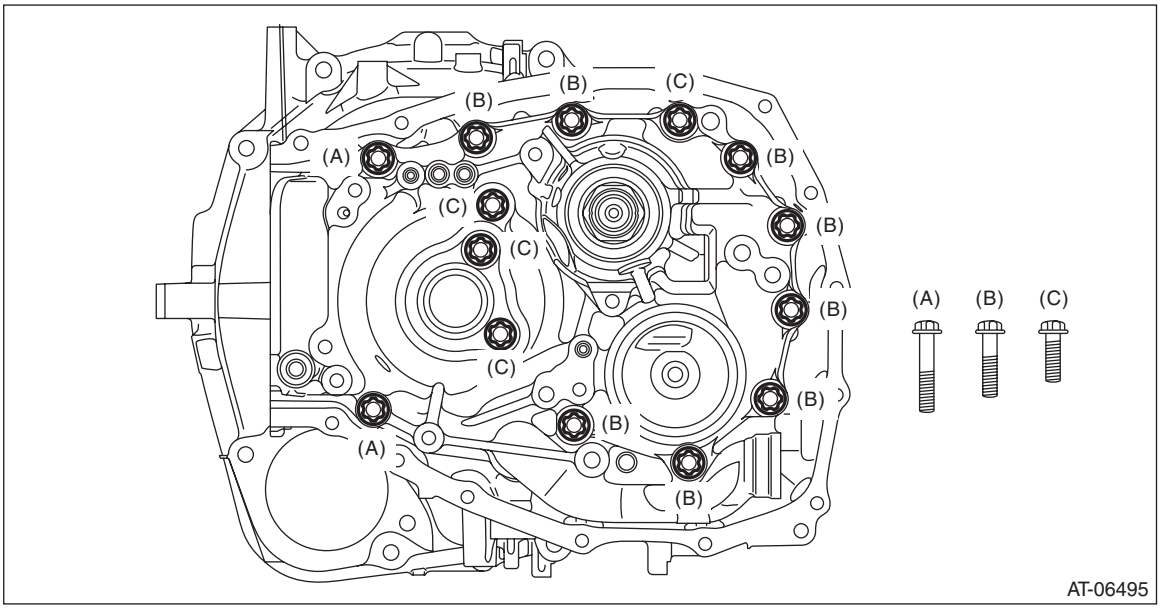


## F: ADJUSTMENT

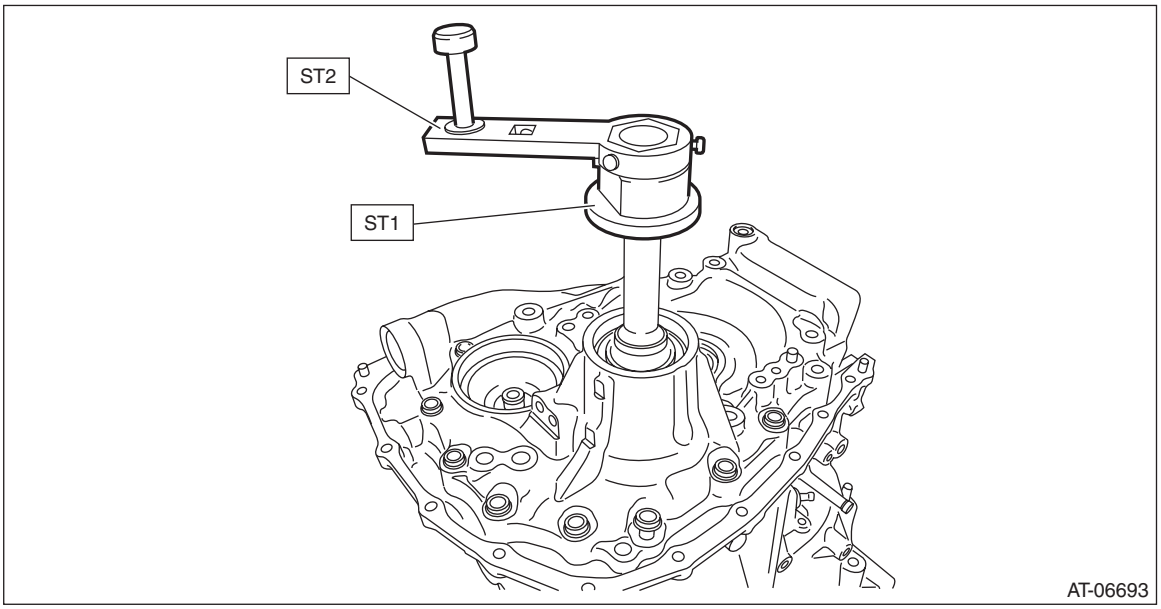
1) Remove the liquid gasket from the mating surface completely.
2) Using the ST, install the drive pinion retainer to converter case.
ST 18270KA020 SOCKET (E20)

NOTE:
Do not confuse the three different-length bolts when installing.

***Tightening torque:***
***43 N·m (4.4 kgf-m, 31.7 ft-lb)***



3) Rotate the drive pinion several times using ST1 and ST2.
ST1 498937110 HOLDER
ST2 499787700 WRENCH



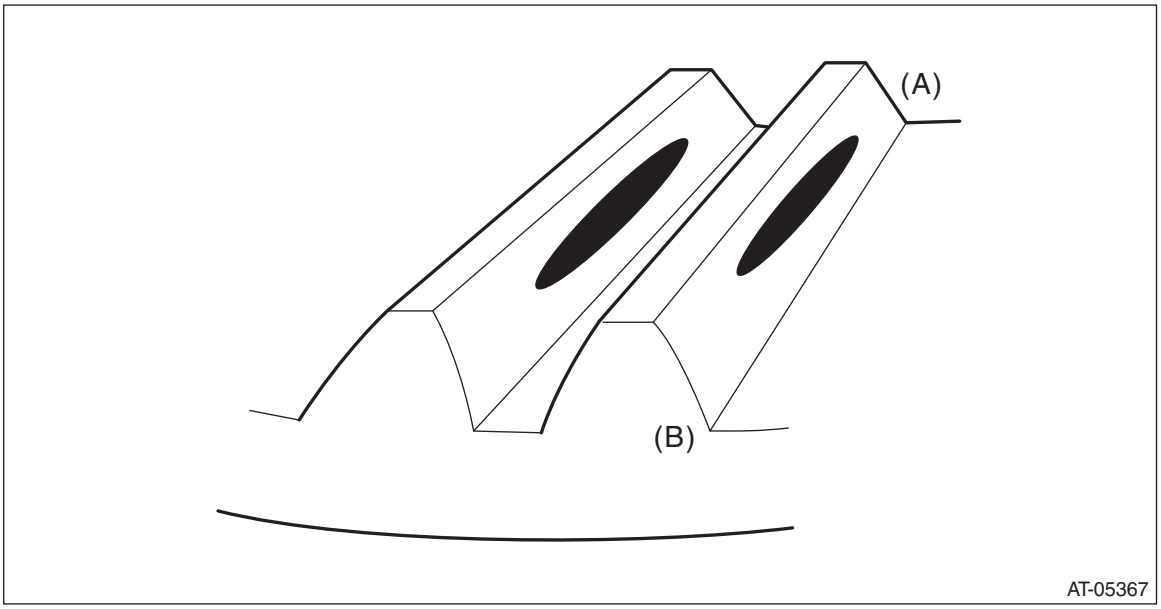
4) Adjust the drive pinion and hypoid driven gear backlash. <Ref. to CVT-308, ADJUSTMENT, Front Differential Assembly.>
5) Using the ST, remove the drive pinion retainer from converter case.
ST 18270KA020 SOCKET (E20)

6) Apply lead-free red dye evenly on the both sides of three to four teeth of the hypoid driven gear. Then install the drive pinion retainer and rotate the drive pinion in both directions several times. Remove the drive pinion retainer and check the tooth contact pattern.
If the teeth contact is inappropriate, adjust the backlash or thickness of the shim. <Ref. to CVT-308, ADJUSTMENT, Front Differential Assembly.>

NOTE:
After correction, wipe off the lead-free red dye.

- Correct tooth contact

**Check item: Tooth contact surface is slightly shifted toward the toe side under a no-load condition. (When driving, it moves towards the heel side.)**

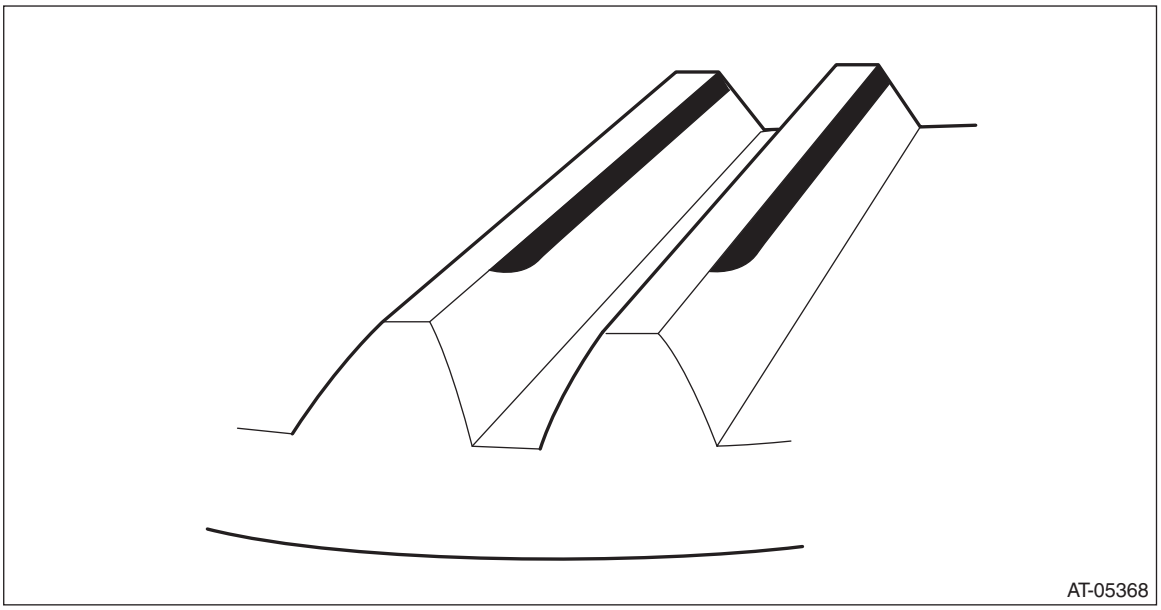


(A) Toe side
(B) Heel side

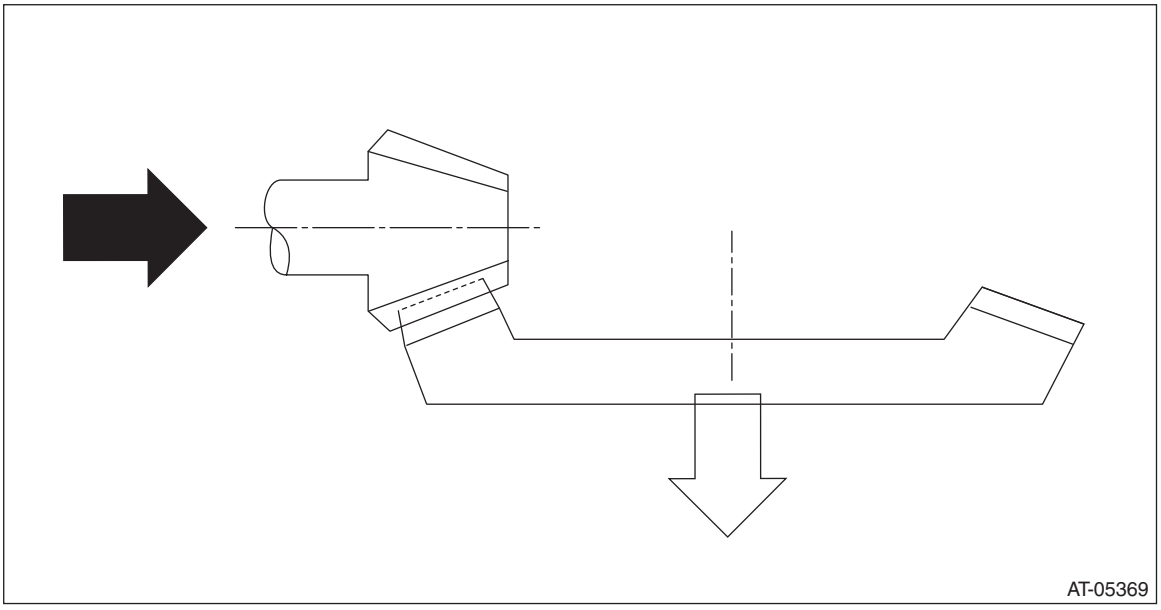
- Face contact

**Check item: Backlash is too large.**

Contact pattern



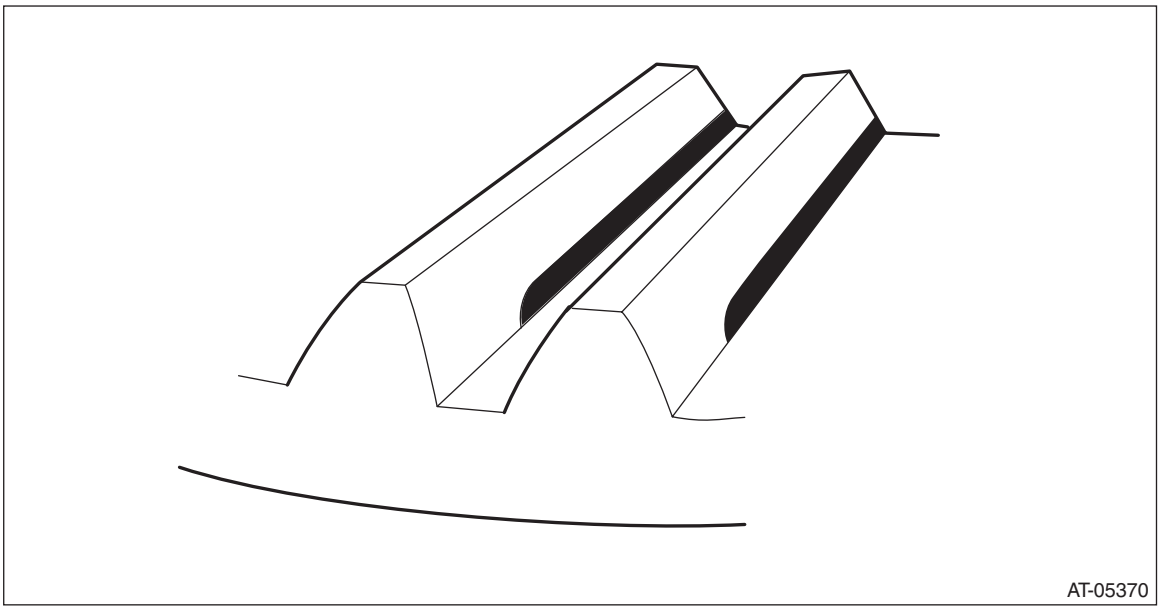
Corrective action: Increase thickness of drive pinion shim according to the procedures for moving the drive pinion close to hypoid driven gear.



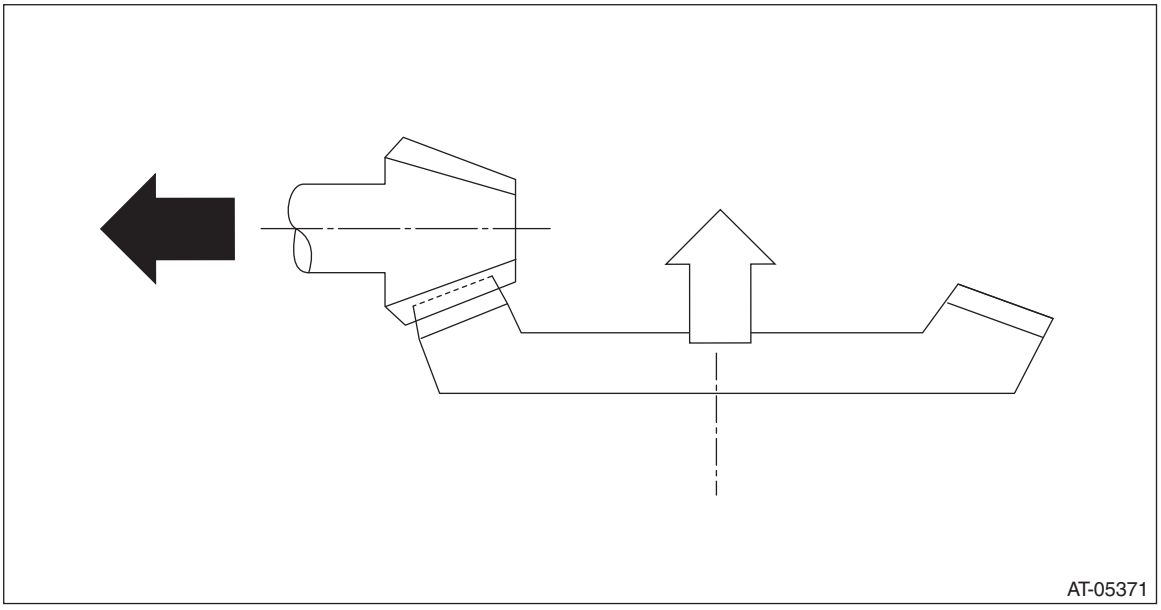
- Flank contact

**Check item: Backlash is too small.**

Contact pattern



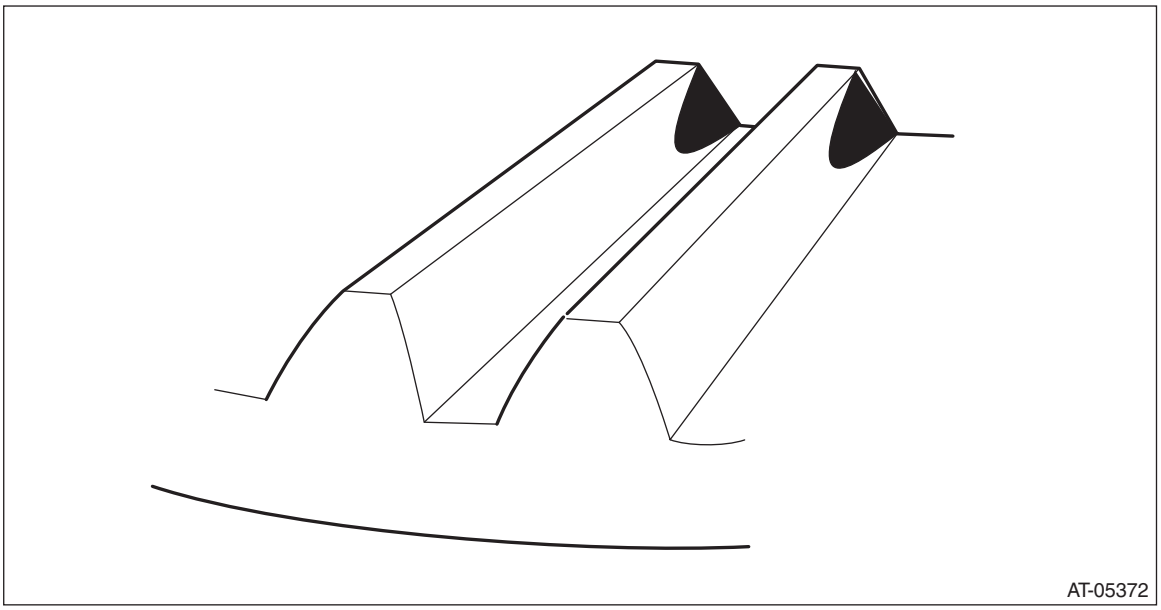
Corrective action: Reduce the thickness of the drive pinion shim according to the procedures for moving the drive pinion away from the hypoid driven gear.



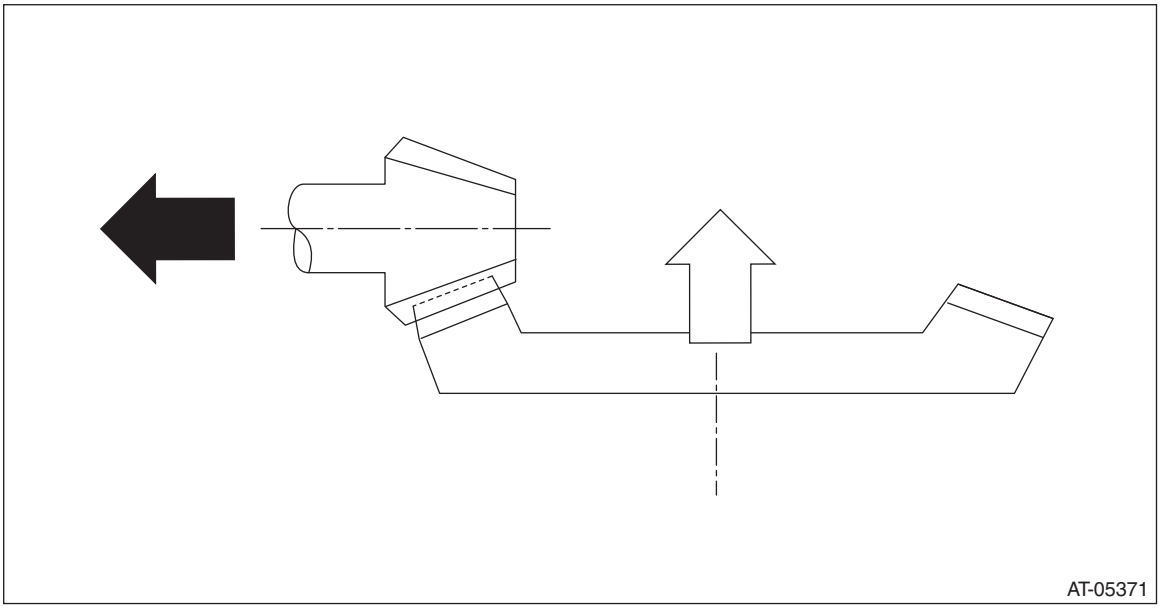
- Toe contact (inside contact)

**Check item: Teeth contact area is too small.**

Contact pattern



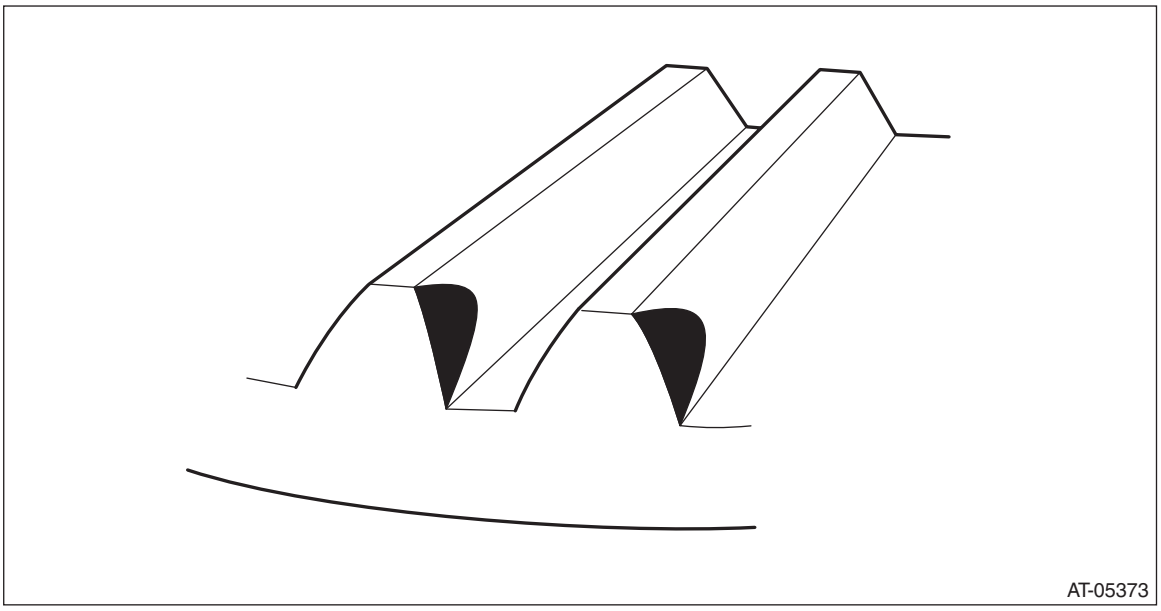
Corrective action: Reduce the thickness of the drive pinion shim according to the procedures for moving the drive pinion away from the hypoid driven gear side.



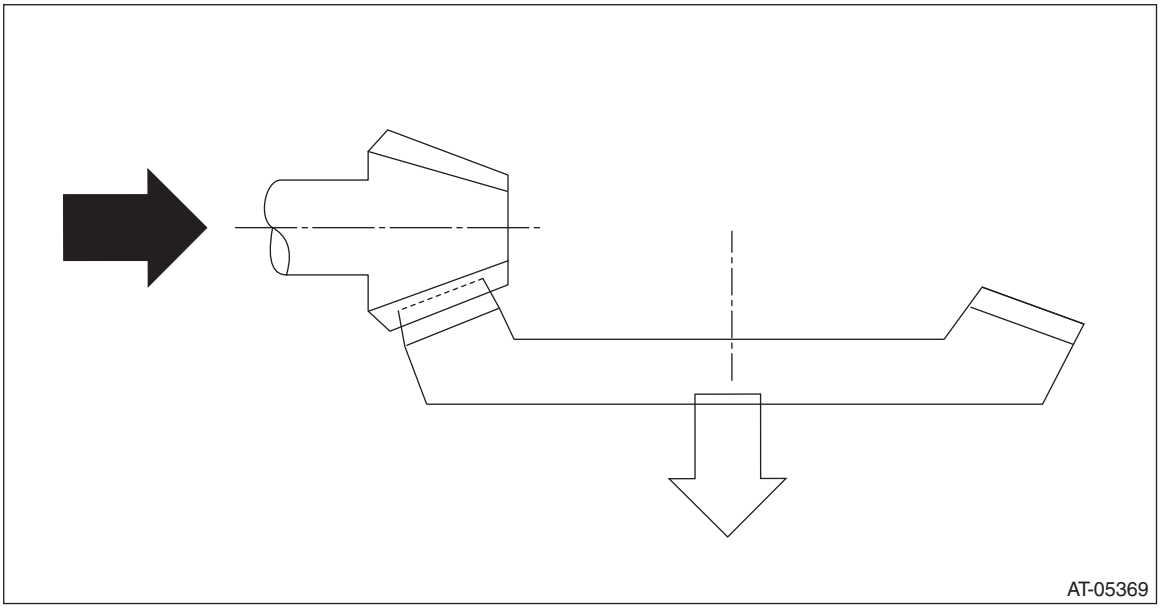
- Heel contact (outside end contact)

**Check item: Teeth contact area is too small.**

Contact pattern



Corrective action: Increase the thickness of the drive pinion shim according to the procedures for moving the drive pinion closer to the hypoid driven gear.



7) Using the ST, loosen the differential side retainer until the mounting groove of the O-ring appears, and then install the O-ring.

NOTE:
- When loosening the differential side retainer, record the number of the turns made.
- Perform this for both left and right differential side retainers.
- Use new O-rings.
- Apply the differential gear oil to O-ring.

ST 18658AA020 WRENCH COMPL RETAINER

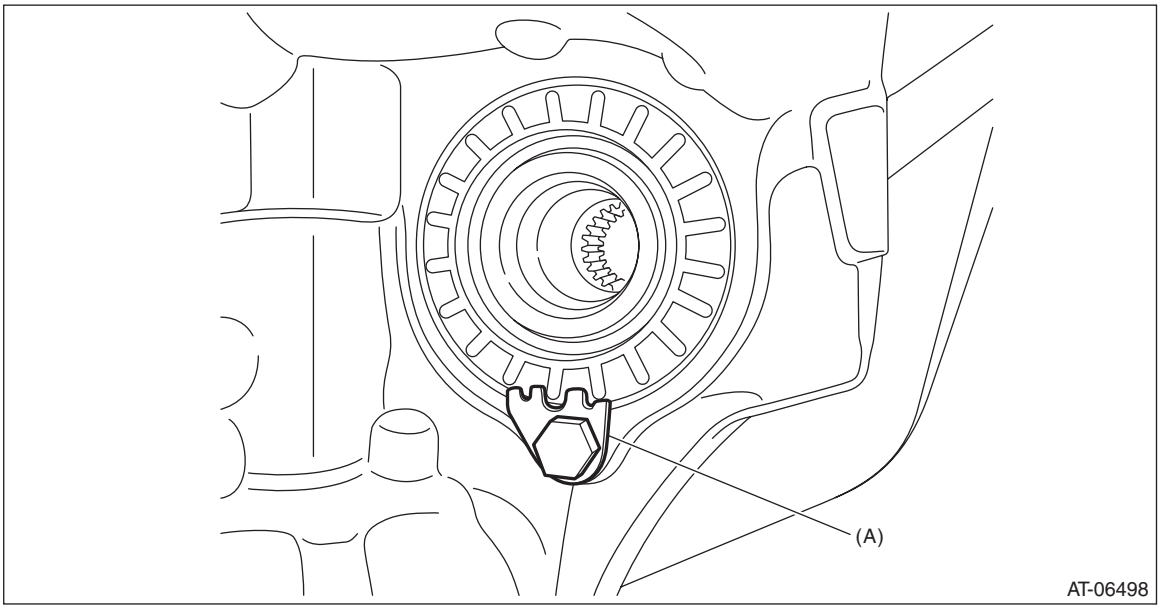
8) Using the ST, tighten the retainer to the position before it is loosened.

ST 18658AA020 WRENCH COMPL RETAINER

9) Replace the differential side retainer oil seal with a new part. <Ref. to CVT-85, Differential Side Retainer Oil Seal.>

10) Install the lock plate.

***Tightening torque:***
***25 N·m (2.5 kgf-m, 18.4 ft-lb)***

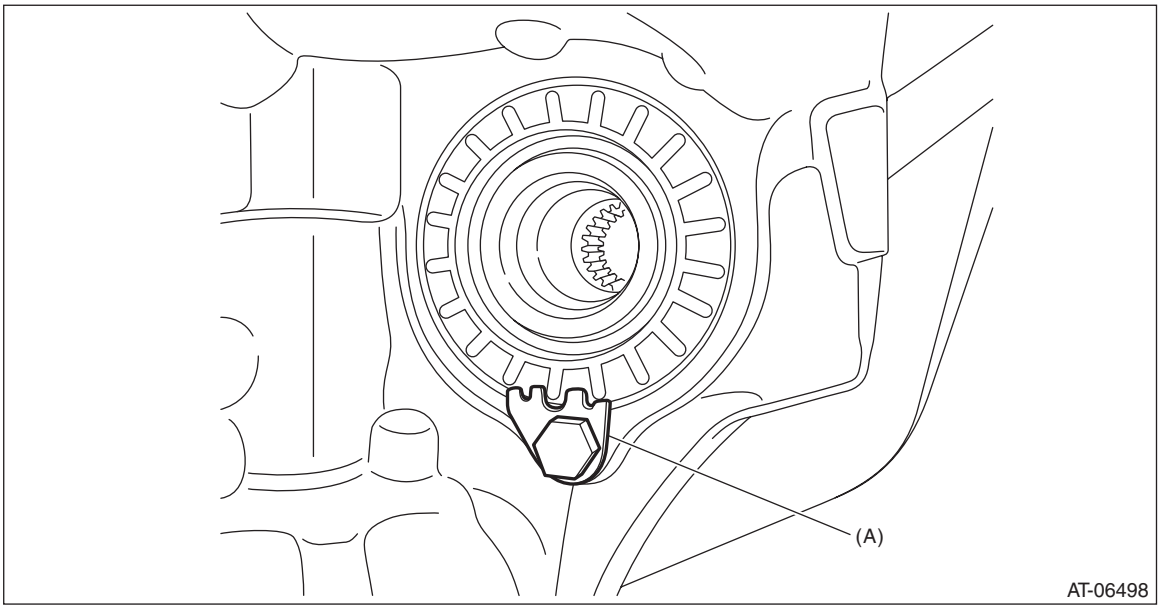


(A) Lock plate

# 42.Front Differential Assembly

## A: REMOVAL

1) Remove the transmission assembly from the vehicle. <Ref. to CVT-56, REMOVAL, Automatic Transmission Assembly.>
2) Remove the air breather hose. <Ref. to CVT-148, REMOVAL, Air Breather Hose.>
3) Remove the control valve body. <Ref. to CVT-110, REMOVAL, Control Valve Body.>
4) Remove the transmission harness. <Ref. to CVT-124, REMOVAL, Transmission Harness.>
5) Remove the turbine speed sensor. <Ref. to CVT-97, REMOVAL, Turbine Speed Sensor.>
6) Remove the secondary speed sensor. <Ref. to CVT-99, REMOVAL, Secondary Speed Sensor.>
7) Remove the primary speed sensor. <Ref. to CVT-101, REMOVAL, Primary Speed Sensor.>
8) Remove the inhibitor switch. <Ref. to CVT-93, REMOVAL, Inhibitor Switch.>
9) Remove the extension case. <Ref. to CVT-156, REMOVAL, Extension Case.>
10) Remove the transfer clutch assembly. <Ref. to CVT-160, REMOVAL, Transfer Clutch.>
11) Remove the transfer driven gear assembly. <Ref. to CVT-174, REMOVAL, Transfer Driven Gear.>
12) Remove the parking pawl. <Ref. to CVT-177, REMOVAL, Parking Pawl.>
13) Remove the reduction driven gear assembly. <Ref. to CVT-179, REMOVAL, Reduction Driven Gear.>
14) Remove the oil pan and oil strainer. <Ref. to CVT-106, REMOVAL, Oil Pan and Strainer.>
15) Remove the transmission control device. <Ref. to CVT-187, REMOVAL, Transmission Control Device.>
16) Remove the transmission case. <Ref. to CVT-193, REMOVAL, Transmission Case.>
17) Remove the reduction drive gear. <Ref. to CVT-206, REMOVAL, Reduction Drive Gear.>
18) Remove the primary pulley, secondary pulley and variator chain. <Ref. to CVT-210, REMOVAL, Primary Pulley and Secondary Pulley.>
19) Remove the reverse brake assembly. <Ref. to CVT-231, REMOVAL, Reverse Brake Assembly.>
20) Remove the forward clutch assembly. <Ref. to CVT-246, REMOVAL, Forward Clutch Assembly.>
21) Remove the drive pinion shaft assembly. <Ref. to CVT-265, REMOVAL, Drive Pinion Shaft Assembly.>
22) Remove the lock plates on both sides.

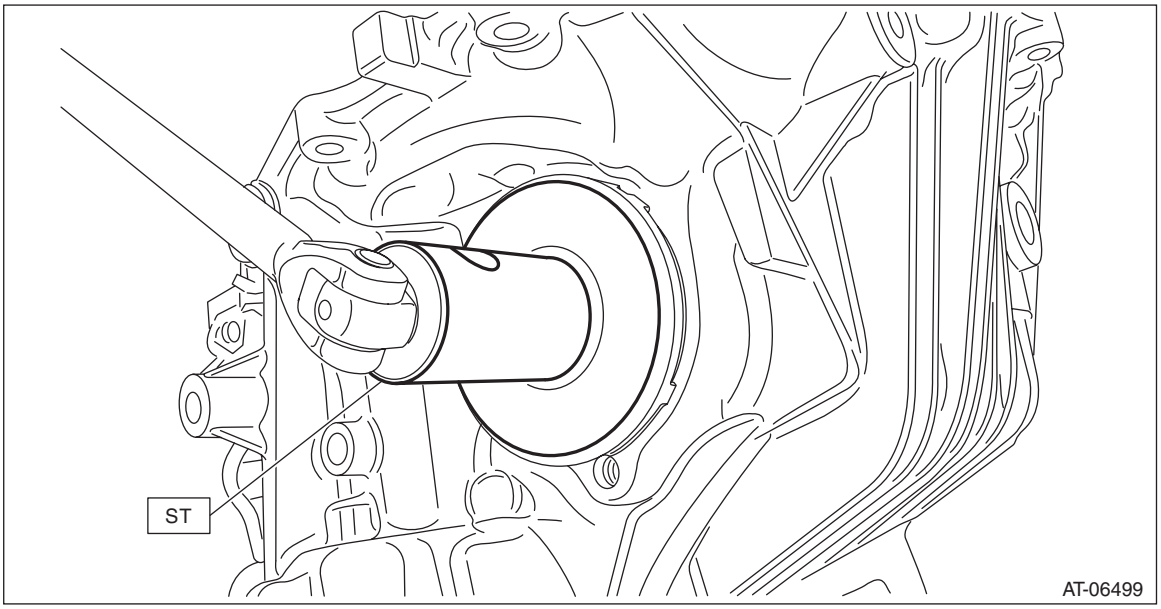


(A) Lock plate

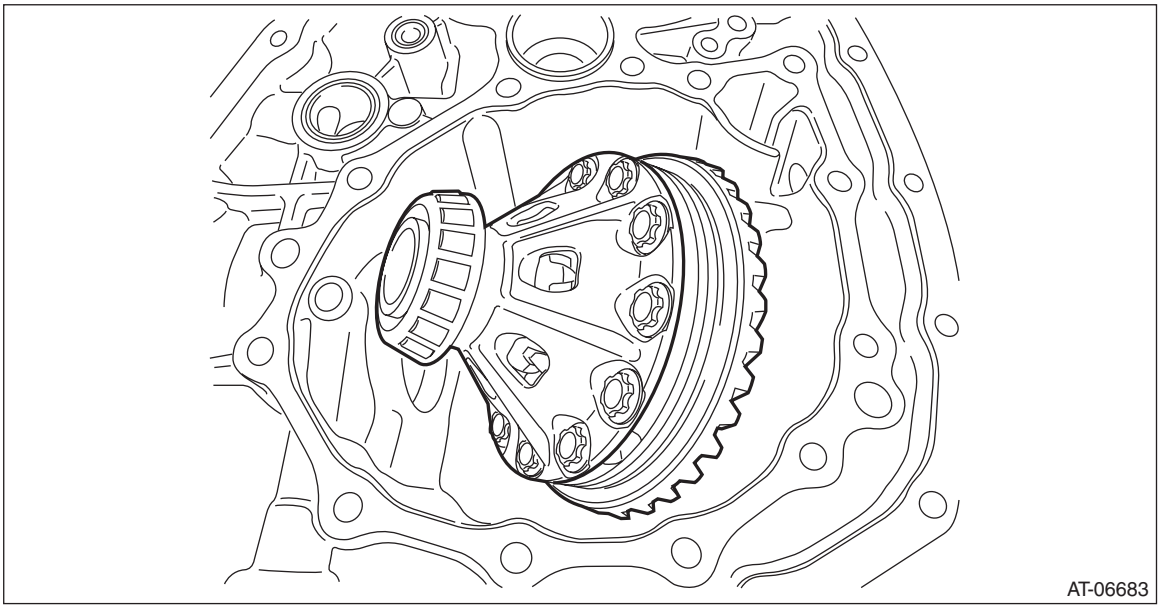
23) Remove the differential side retainers using ST.

NOTE:
• When the wrench COMPL retainer interferes with the converter case, align the cutout portion with the interference part.
• Support the differential case assembly by hand to avoid damaging the retainer mounting hole of the converter case.
• Keep the left and right differential side retainers and left and right bearing outer races by attaching tags or in similar ways to make it possible to identify RH and LH sides.

ST 18658AA020 WRENCH COMPL RETAINER



24) Remove the front differential assembly while being careful not to damage the attachment part of the retainer.

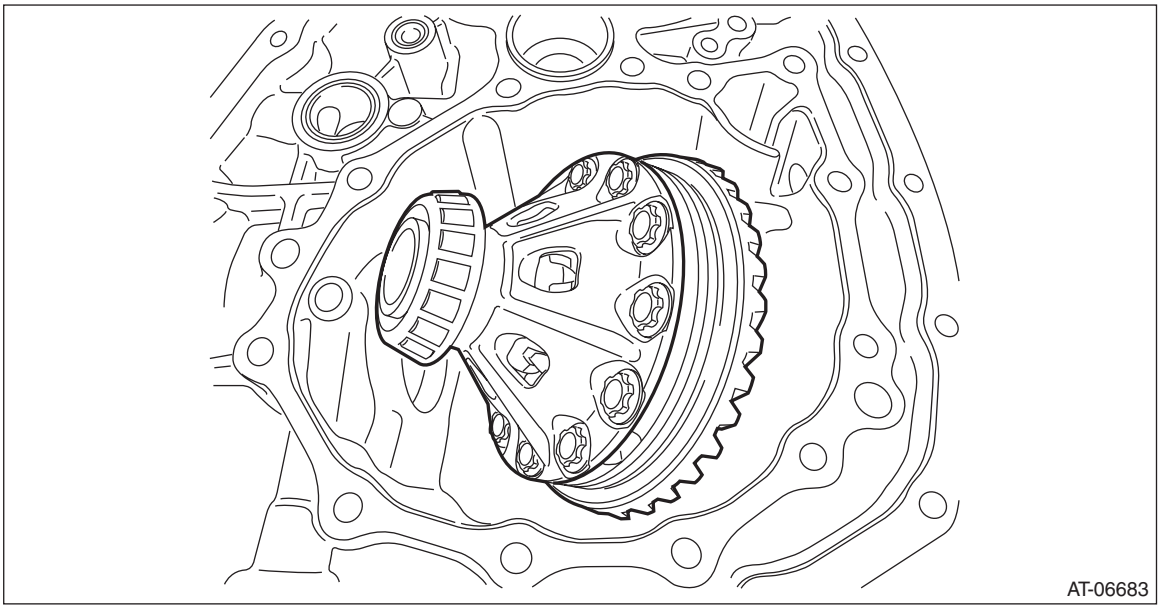


25) Remove the oil seals and O-rings from both differential side retainers. <Ref. to CVT-301, SIDE RETAINER, DISASSEMBLY, Front Differential Assembly.>

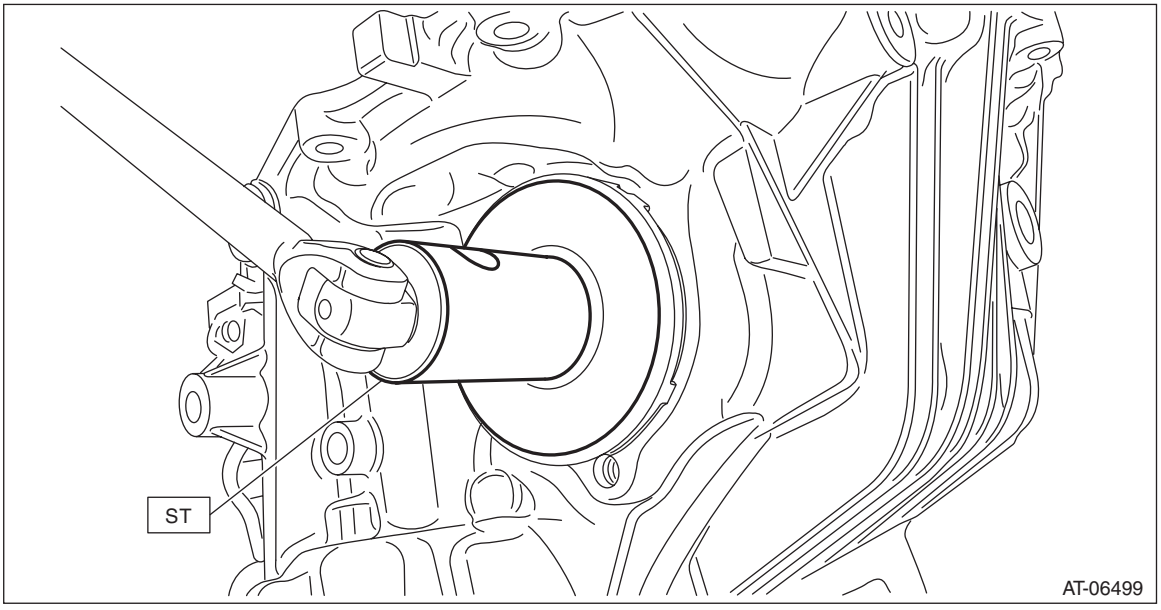
## B: INSTALLATION

1) Install the front differential assembly to the converter case.

NOTE:
Be careful not to damage the inside of the case (especially the mounting surface of the differential side retainers).



2) Install the bearing outer race.
3) Temporarily install the differential side retainers using ST.
ST 18658AA020 WRENCH COMPL RETAINER



4) Adjust the backlash of the front differential. <Ref. to CVT-308, ADJUSTMENT, Front Differential Assembly.>
5) Inspect and adjust the tooth contact. <Ref. to CVT-287, ADJUSTMENT, Drive Pinion Shaft Assembly.>

6) Using the ST, loosen the differential side retainer until the mounting groove of the O-ring appears, and then install the O-ring.

NOTE:
- When loosening the differential side retainer, record the number of the turns made.
- Perform this for both left and right differential side retainers.
- Use new O-rings.
- Apply the differential gear oil to O-ring.

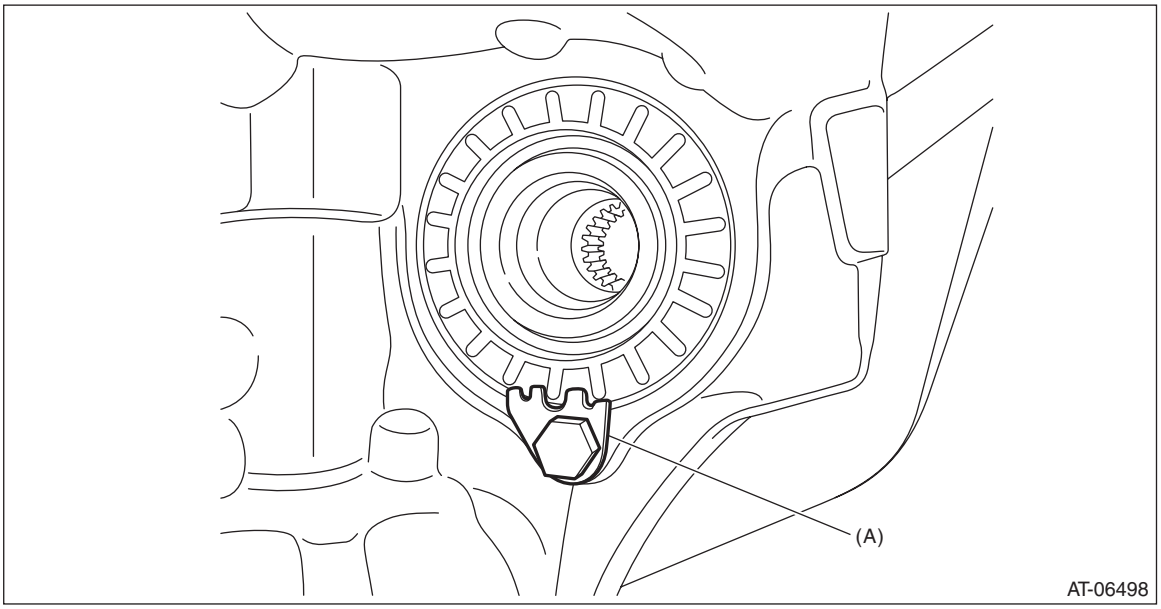
ST 18658AA020 WRENCH COMPL RETAINER

7) Using the ST, tighten the retainer to the position before it is loosened.

ST 18658AA020 WRENCH COMPL RETAINER

8) Install the oil seal to the differential side retainer. <Ref. to CVT-85, Differential Side Retainer Oil Seal.>
9) Install the lock plate.

***Tightening torque:***
***25 N·m (2.5 kgf-m, 18.4 ft-lb)***



(A) Lock plate

10) Install the drive pinion shaft assembly. <Ref. to CVT-266, INSTALLATION, Drive Pinion Shaft Assembly.>
11) Install the forward clutch assembly. <Ref. to CVT-249, INSTALLATION, Forward Clutch Assembly.>
12) Install the reverse brake assembly. <Ref. to CVT-234, INSTALLATION, Reverse Brake Assembly.>
13) Install the primary pulley, secondary pulley and variator chain. <Ref. to CVT-217, INSTALLATION, Primary Pulley and Secondary Pulley.>
14) Install the reduction drive gear. <Ref. to CVT-207, INSTALLATION, Reduction Drive Gear.>
15) Install the transmission case. <Ref. to CVT-196, INSTALLATION, Transmission Case.>
16) Install the oil strainer and oil pan. <Ref. to CVT-107, INSTALLATION, Oil Pan and Strainer.>
17) Install the transmission control device. <Ref. to CVT-190, INSTALLATION, Transmission Control Device.>
18) Install the reduction driven gear assembly. <Ref. to CVT-179, INSTALLATION, Reduction Driven Gear.>
19) Install the transfer driven gear assembly. <Ref. to CVT-175, INSTALLATION, Transfer Driven Gear.>
20) Install the transfer clutch assembly. <Ref. to CVT-162, INSTALLATION, Transfer Clutch.>
21) Install the parking pawl. <Ref. to CVT-178, INSTALLATION, Parking Pawl.>
22) Install the extension case. <Ref. to CVT-157, INSTALLATION, Extension Case.>
23) Install the inhibitor switch. <Ref. to CVT-95, INSTALLATION, Inhibitor Switch.>

24) Install the secondary speed sensor. <Ref. to CVT-99, INSTALLATION, Secondary Speed Sensor.>
25) Install the primary speed sensor. <Ref. to CVT-102, INSTALLATION, Primary Speed Sensor.>
26) Install the turbine speed sensor. <Ref. to CVT-97, INSTALLATION, Turbine Speed Sensor.>

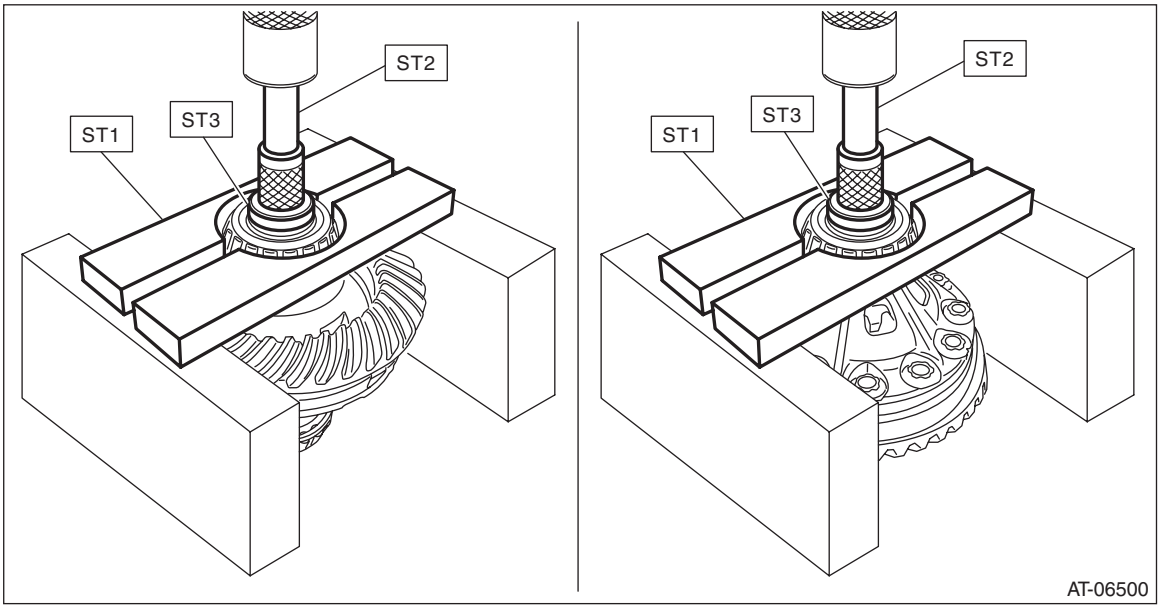
28) Install the control valve body. <Ref. to CVT-116, INSTALLATION, Control Valve Body.>
29) Install the air breather hose. <Ref. to CVT-149, INSTALLATION, Air Breather Hose.>
30) Install the transmission assembly to the vehicle. <Ref. to CVT-67, INSTALLATION, Automatic Transmission Assembly.>

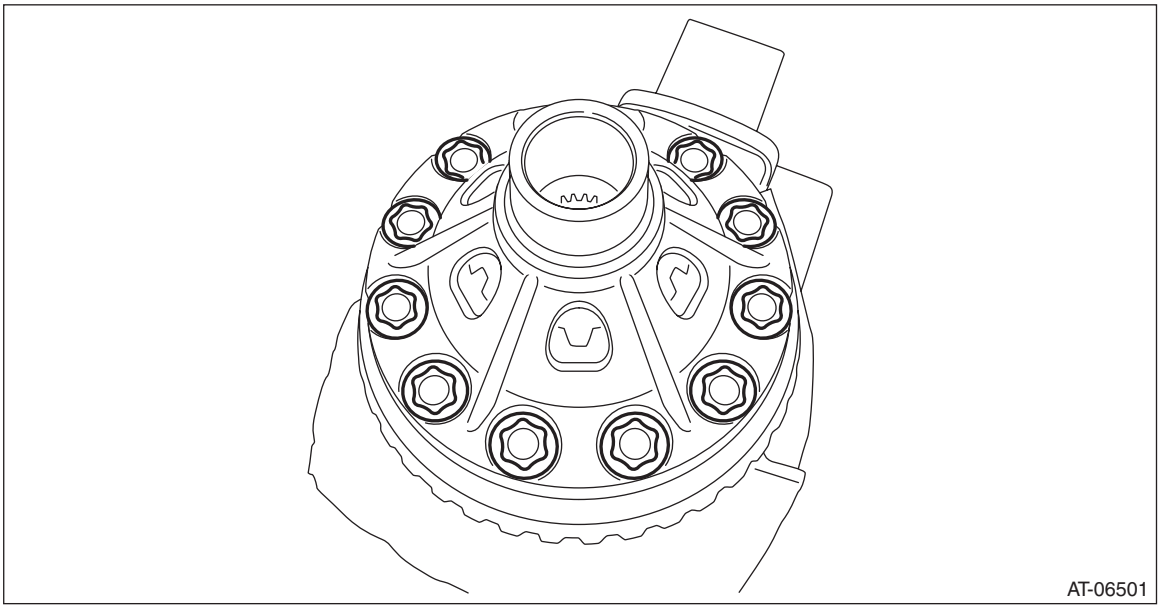
# C: DISASSEMBLY

## 1. DIFFERENTIAL CASE ASSEMBLY

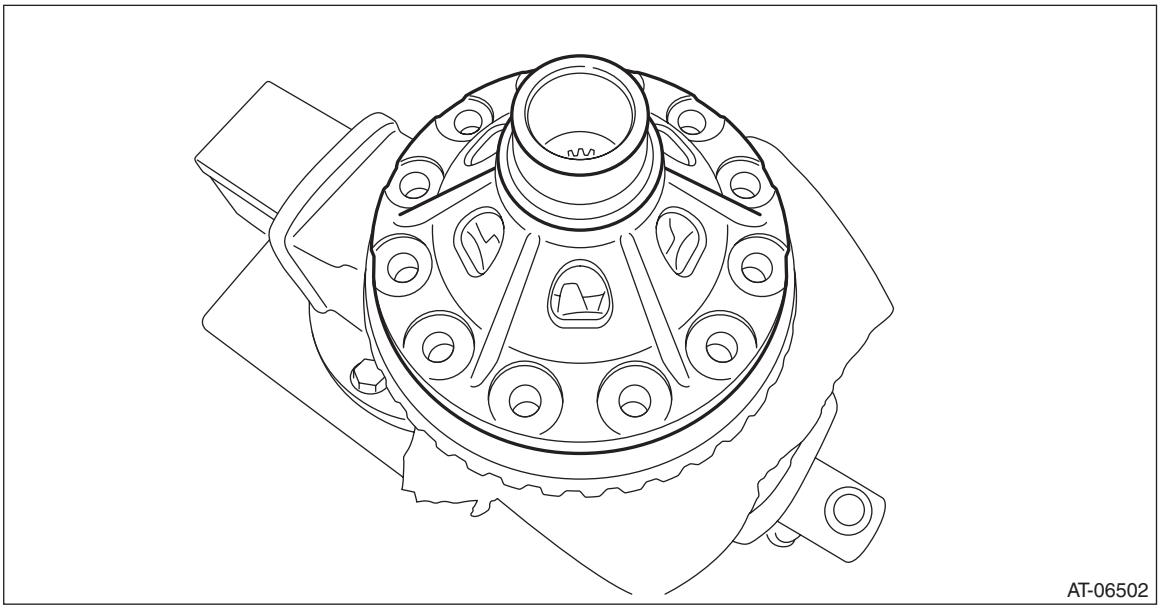
1) Remove the taper roller bearing using the ST.
ST1 498077000 REMOVER
ST2 899864100 REMOVER
ST3 398497701 SEAT



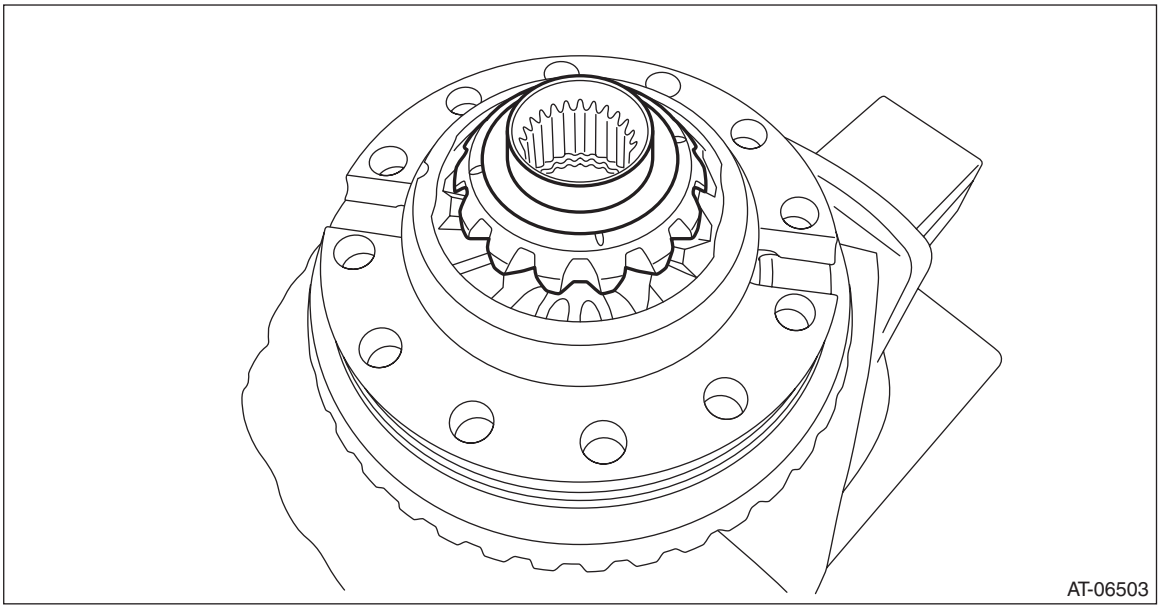
2) Remove the hypoid driven gear mounting bolt using the ST.
ST 18270KA020 SOCKET (E20)



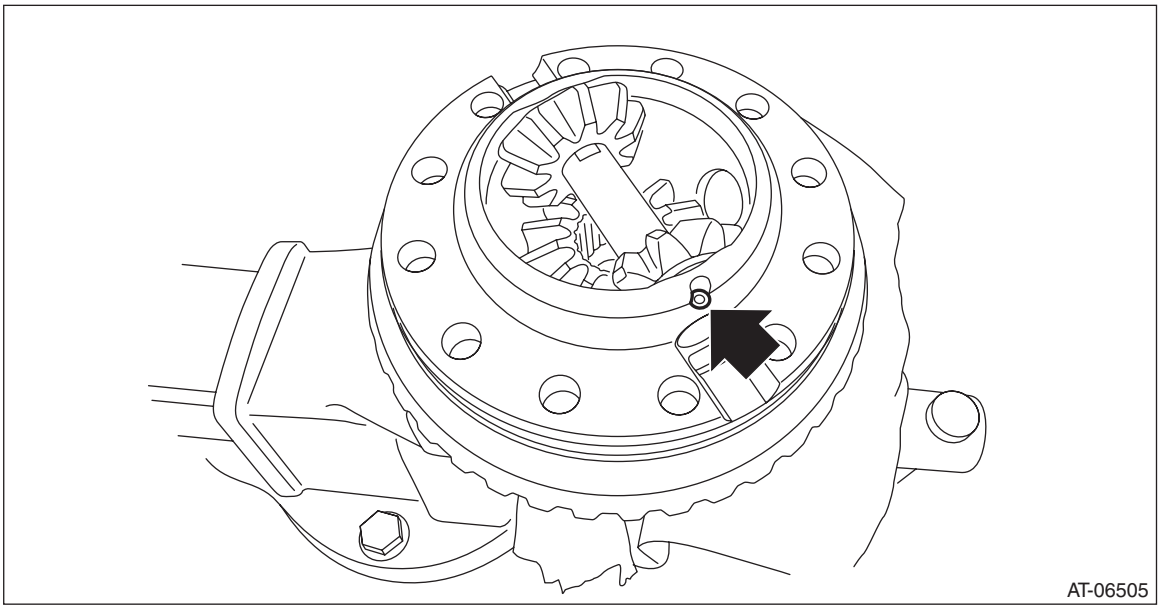
3) Remove the differential case (LH).



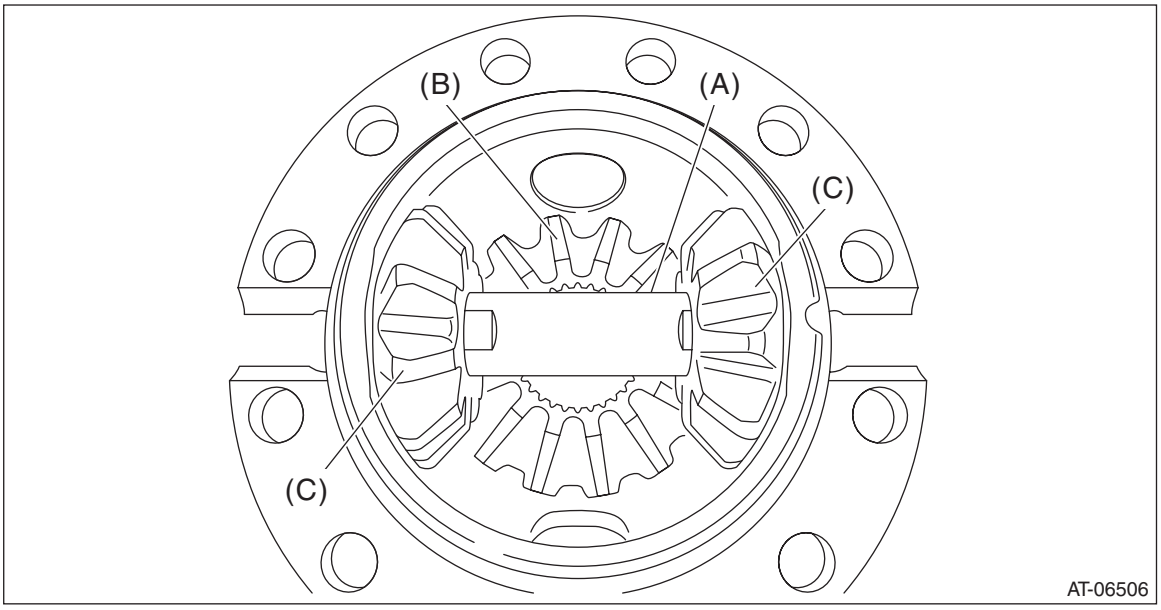
4) Remove the differential bevel gear and washer from differential case.



5) Remove the straight pin.



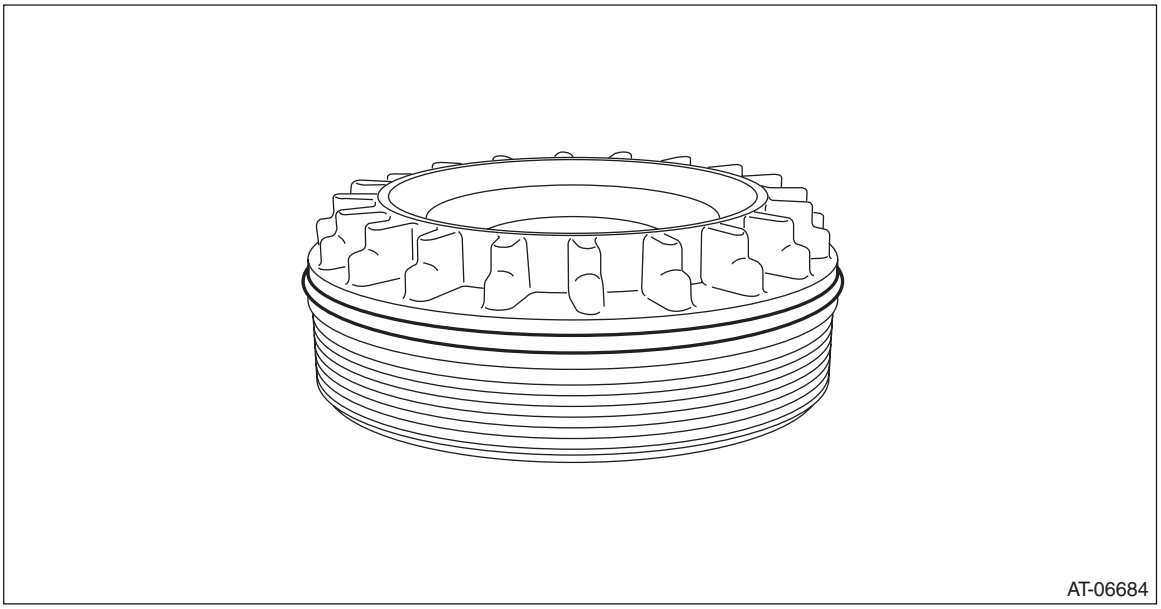
6) Remove the pinion shaft, then remove the differential bevel gear, washer and differential bevel pinion.



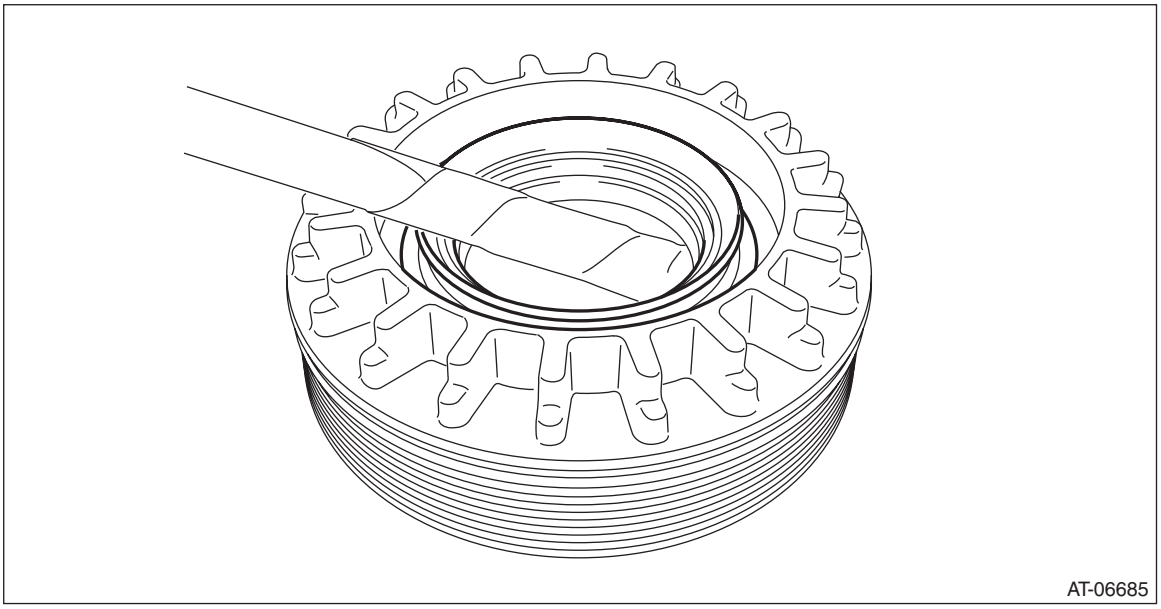
(A) Pinion shaft
(B) Differential bevel gear
(C) Differential bevel pinion

## 2. SIDE RETAINER

NOTE:
After adjusting the drive pinion backlash and tooth contact, replace the oil seal and O-ring with new parts.
1) Remove the O-ring.



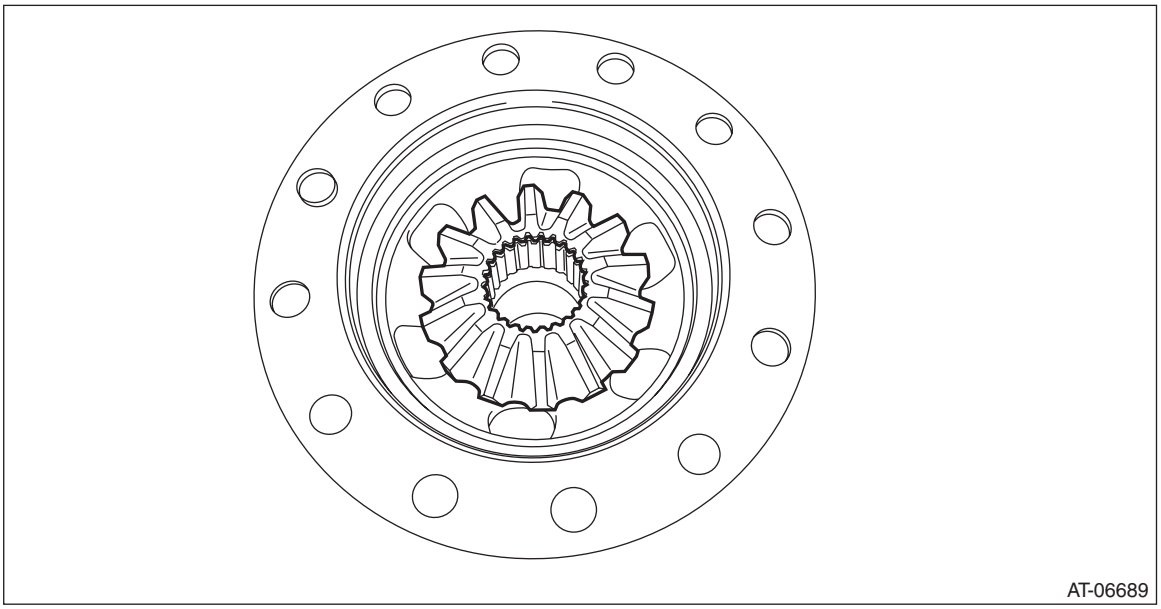
2) Remove the oil seal.



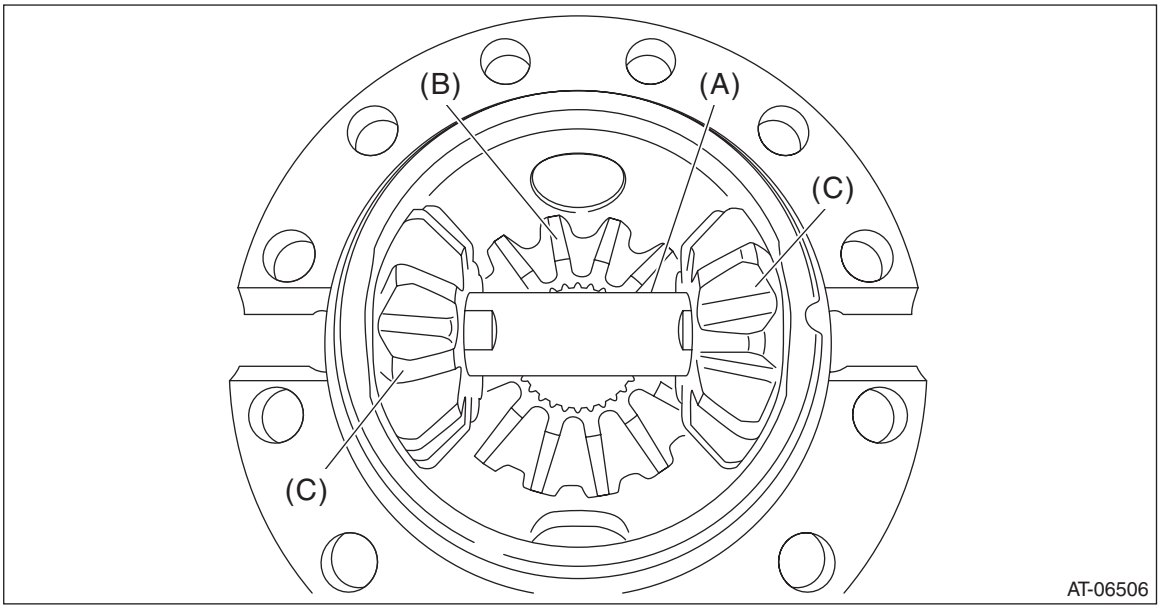
# D: ASSEMBLY

## 1. DIFFERENTIAL CASE ASSY

1) Install the washer and differential bevel gear into the differential case (RH).

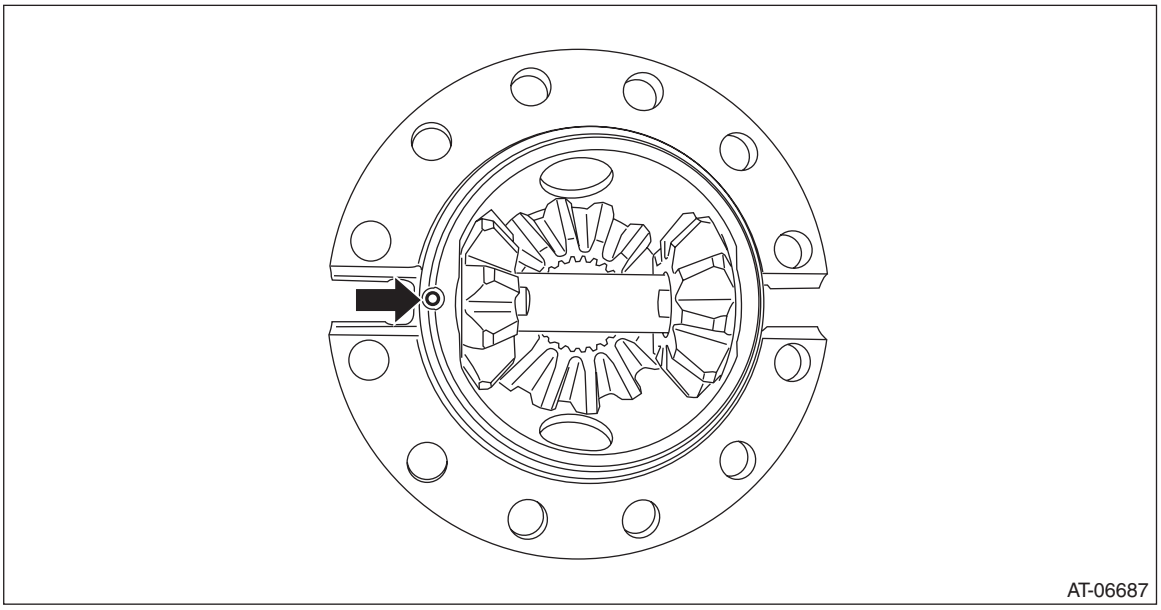


2) Install the differential bevel pinions into differential case (RH) and install the pinion shaft.

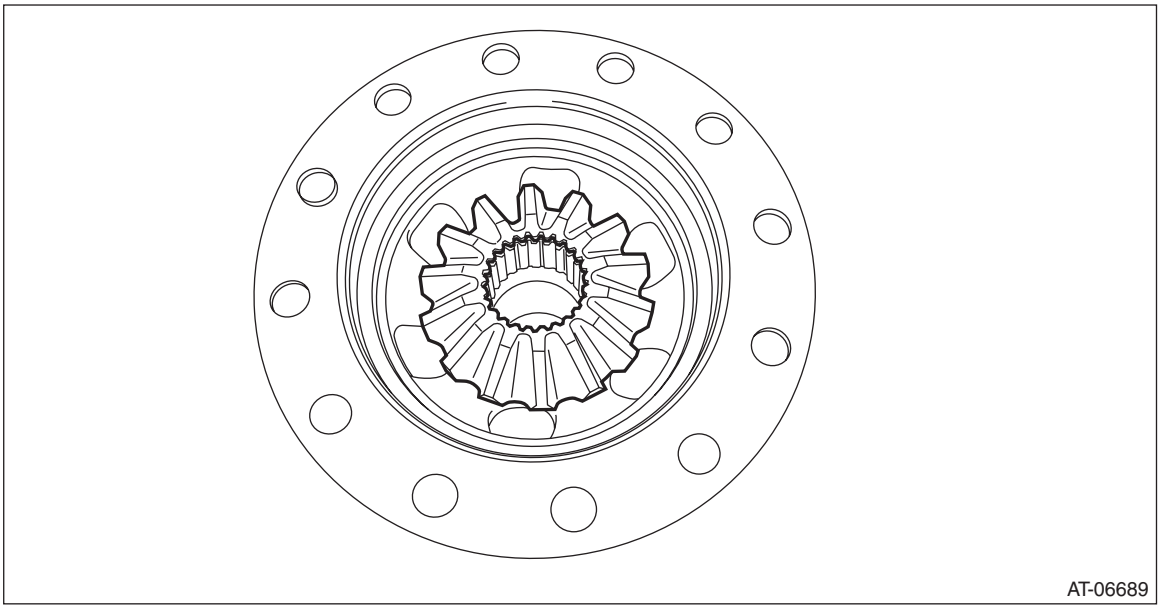


(A) Pinion shaft
(B) Differential bevel gear
(C) Differential bevel pinion

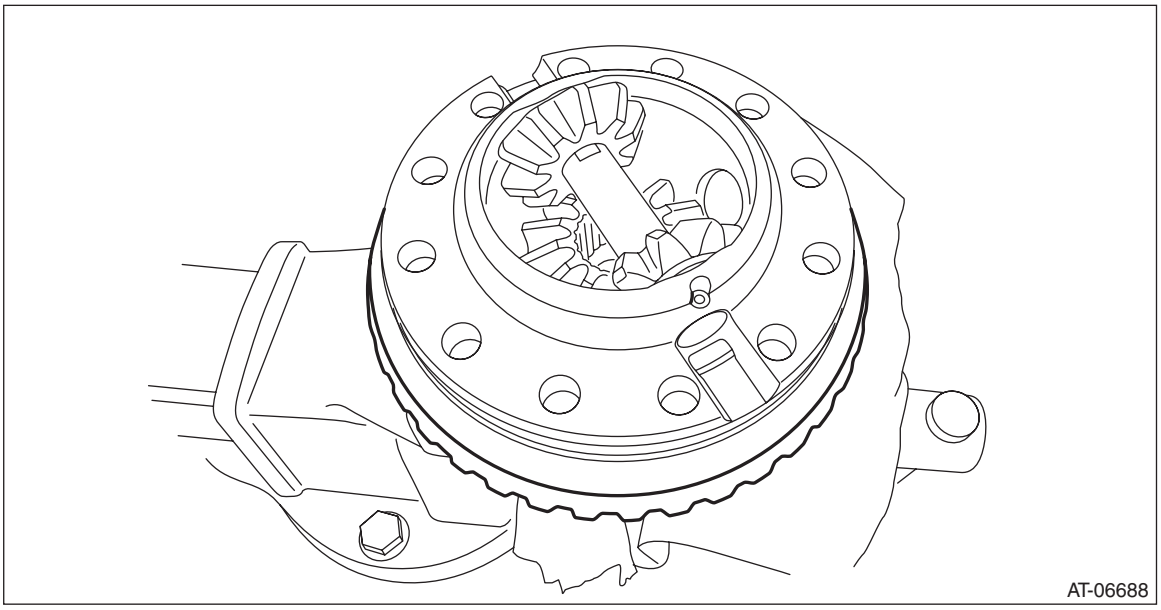
3) Install the straight pin.



4) Install the washer and differential bevel gear to the differential case (LH).

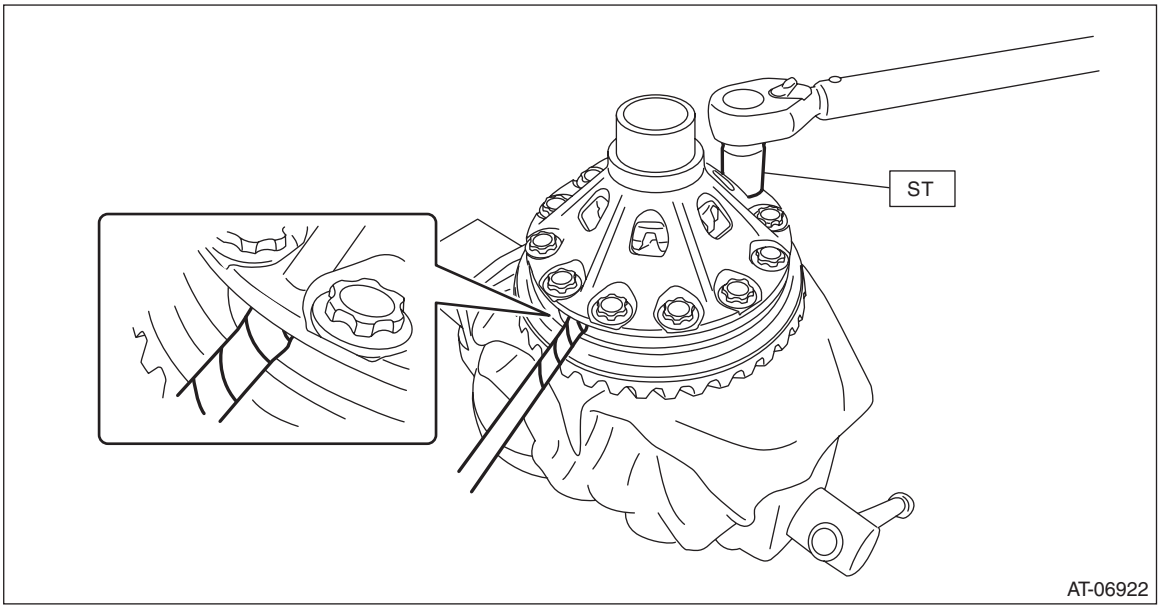


5) Install the differential case (RH) to the hypoid driven gear.



6) Install the differential case (LH) to the differential case (RH).
7) Using the ST, install the hypoid driven gear by tightening the installation bolt.
ST 18270KA020 SOCKET (E20)

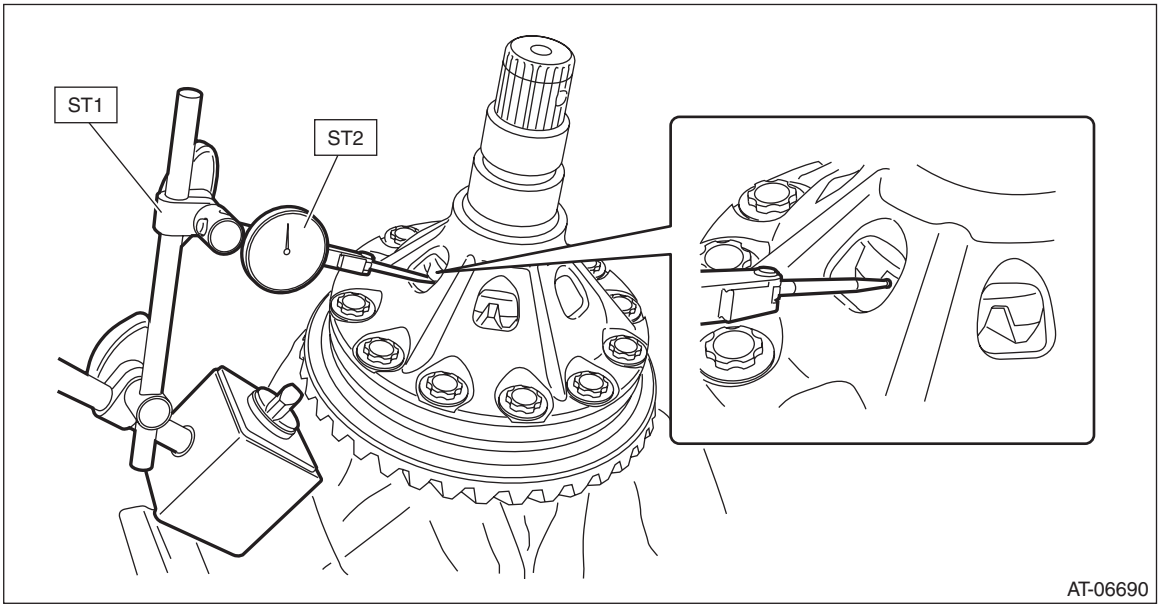
***Tightening torque:***
***64 N·m (6.5 kgf-m, 47.2 ft-lb)***



8) Measure the backlash, and select the washer.
(1) Install the SUBARU genuine axle shaft to differential case.
Part No. 38415AA070 Axle shaft
(2) Using ST1 and ST2, insert the ST2 through the window of differential case. Measure the backlash of the gear.

NOTE:
• Measure the backlash by applying a differential bevel pinion tooth between two differential bevel gear teeth.
• When measuring, fix the differential bevel pinion gear in place with a screwdriver covered with cloth, or a similar tool.
ST1 498247001 MAGNET BASE
ST2 498247100 DIAL GAUGE

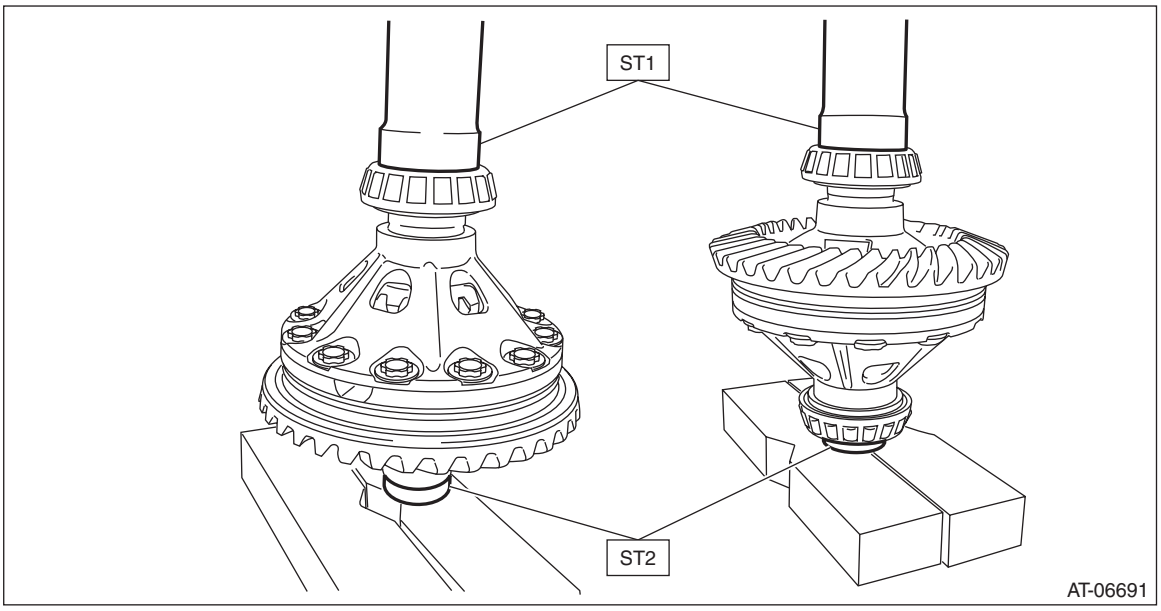
***Specification:***
***0.13 — 0.18 mm (0.0051 — 0.0071 in)***



(3) If the backlash is not within specification, select a washer from the table below and replace.

| Washer | |
|---|---|
| Part No. | Thickness mm (in) |
| 803038021 | 0.95 (0.037) |
| 803038022 | 1.00 (0.039) |
| 803038023 | 1.05 (0.041) |

9) Using the ST, install the left and right taper roller bearings.
ST1 499277100 BUSHING 1-2 INSTALLER
ST2 398497701 SEAT

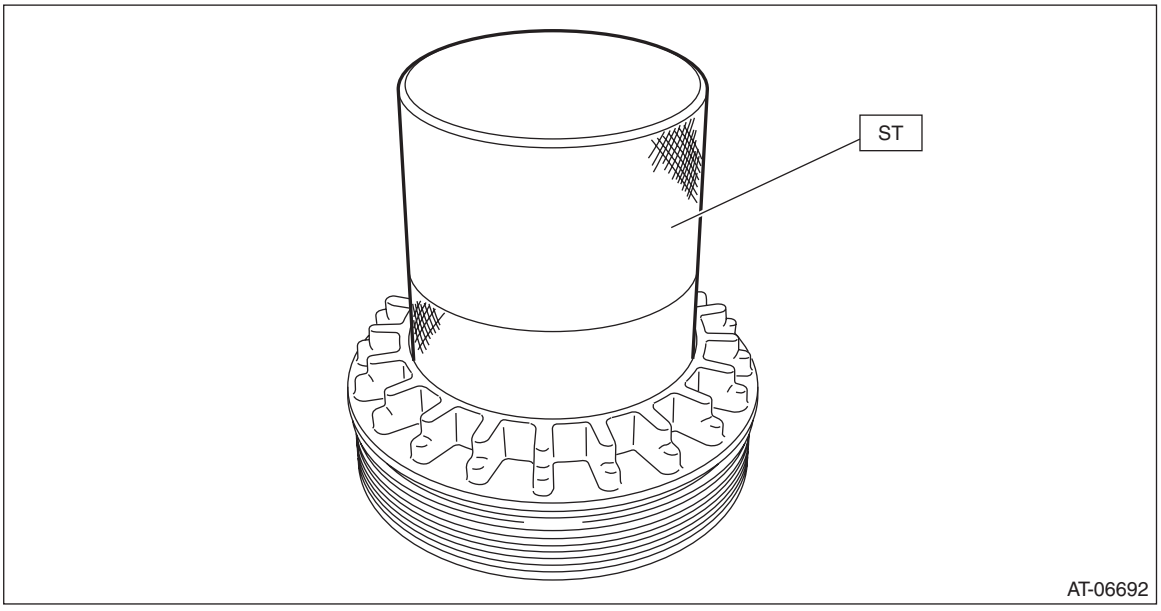


## 2. SIDE RETAINER

NOTE:
After adjusting the backlash and tooth contact, replace the oil seal and O-ring of side retainer with new parts.
1) Using the ST, install the oil seal.

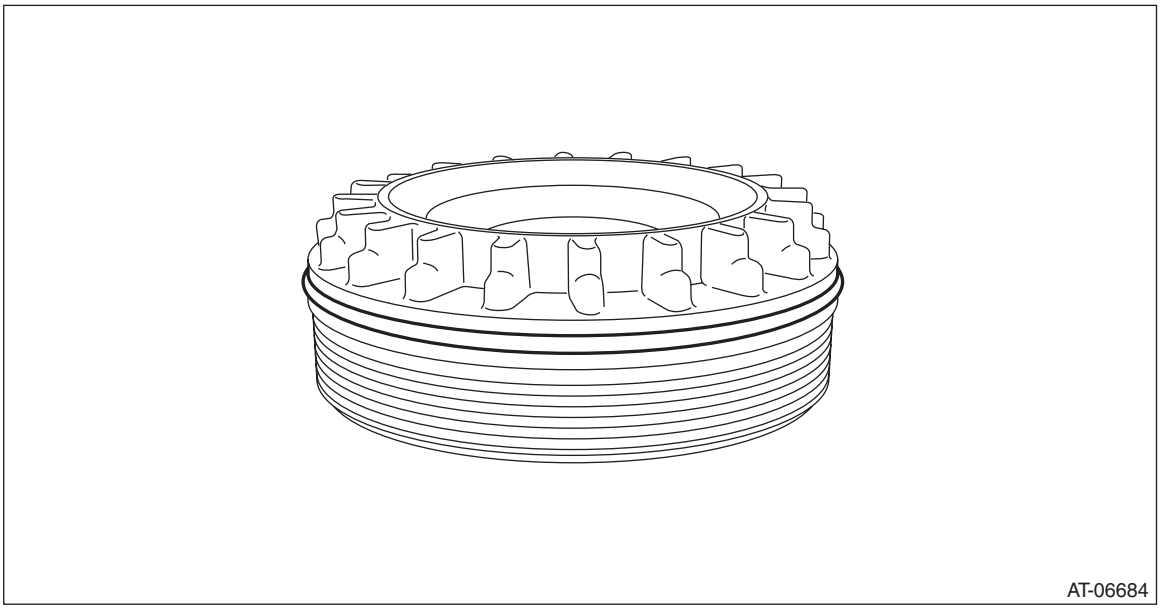
NOTE:
- Use a new oil seal.
- Apply differential gear oil to the oil seal lip and press-fitting surface.
- Oil seal has an identification mark (R, L). When installing oil seals, do not confuse the left and right.

ST 18675AA000 DIFFERENTIAL SIDE OIL SEAL INSTALLER



2) Install the O-ring.

NOTE:
- Use new O-rings.
- Apply the differential gear oil to O-ring.



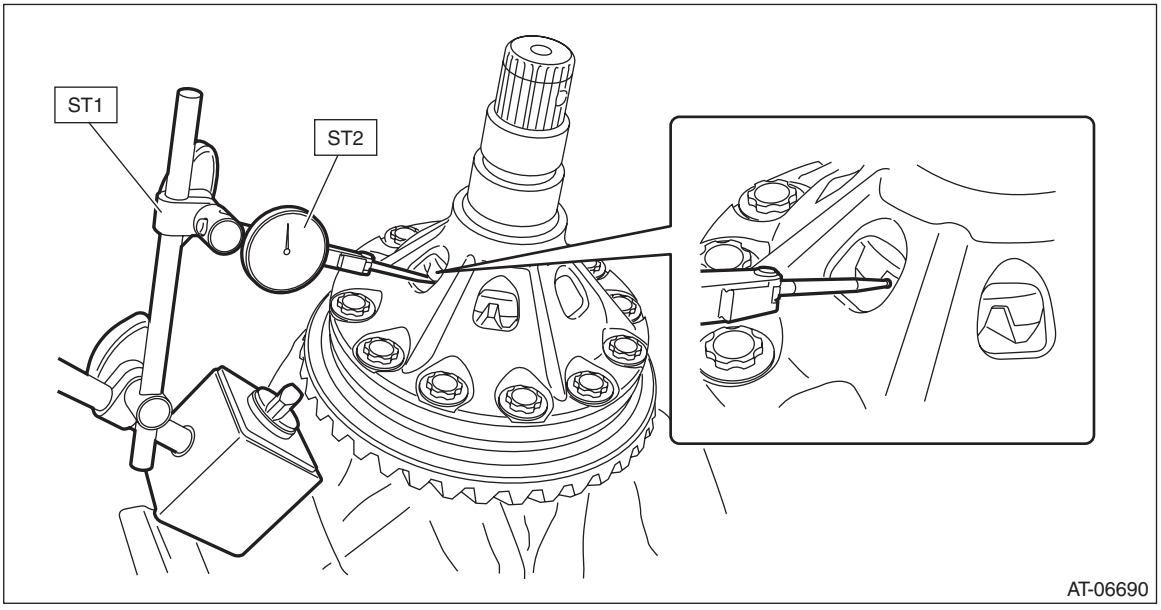
AT-06684

## E: INSPECTION

- Check each component for scratches, damage or other faults.
- Using the ST, check the backlash of pinion gear.

ST1 498247001 MAGNET BASE
ST2 498247100 DIAL GAUGE

***Specification:***
***0.13 — 0.18 mm (0.0051 — 0.0071 in)***



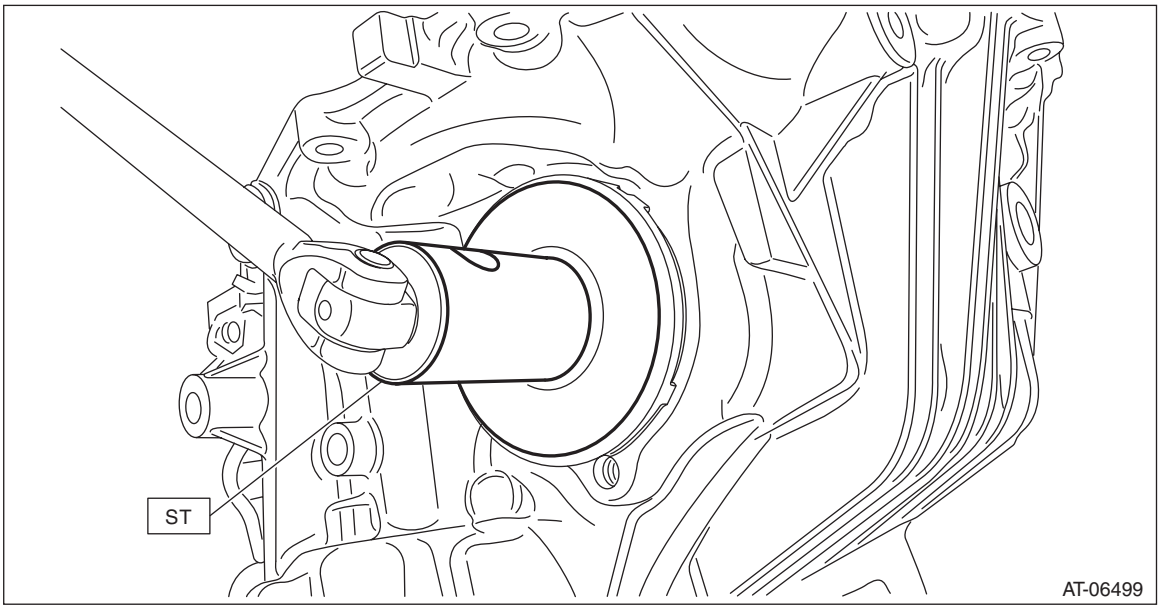
AT-06690

- Measure the hypoid gear backlash, and then adjust it to be within specification. <Ref. to CVT-308, ADJUSTMENT, Front Differential Assembly.>

## F: ADJUSTMENT

1) Using the ST, screw-in the retainer until resistance is felt.

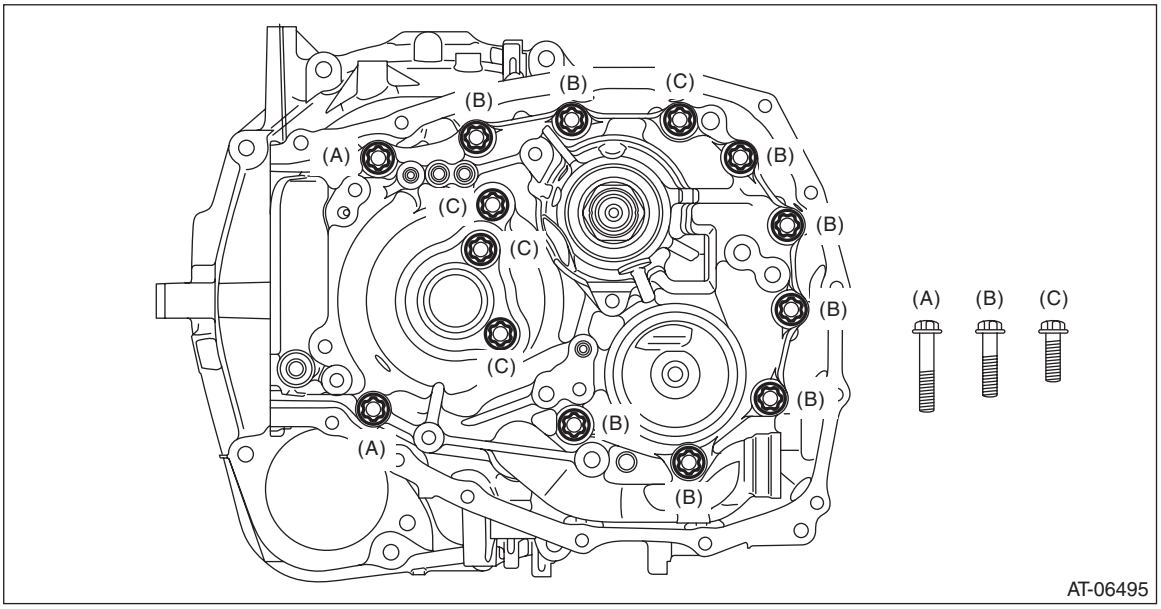
NOTE:
RH side should be screwed-in more than LH side.
ST 18658AA020 WRENCH COMPL RETAINER



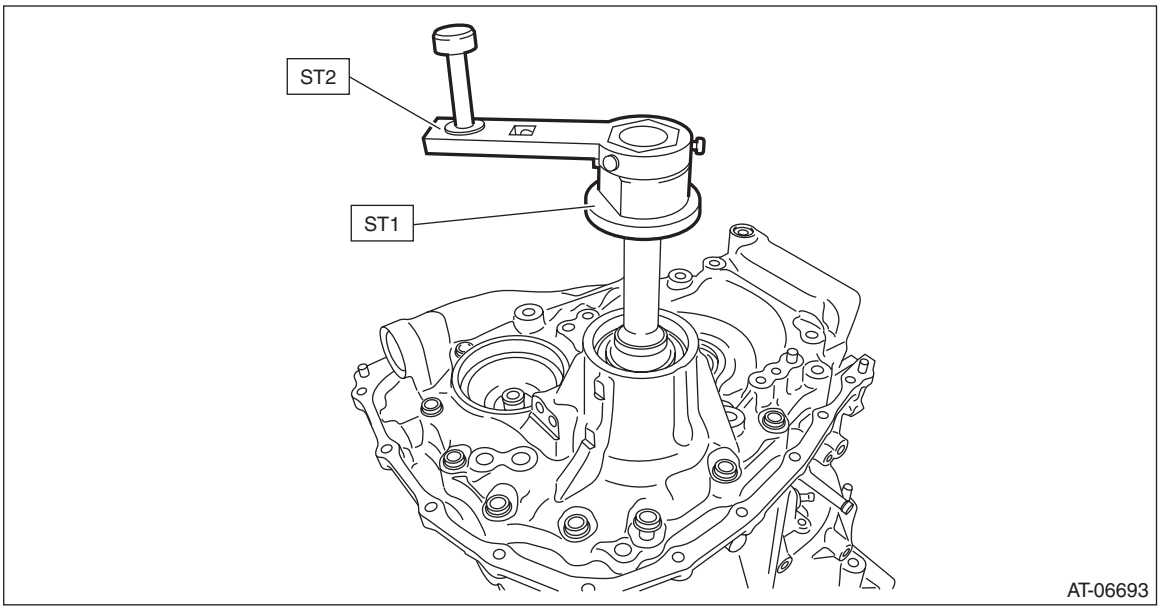
2) Remove the remaining liquid gasket from the mating surface completely.
3) Using the ST, install the drive pinion assembly to converter case.
ST 18270KA020 SOCKET (E20)

NOTE:
Do not confuse the three different-length bolts when installing.

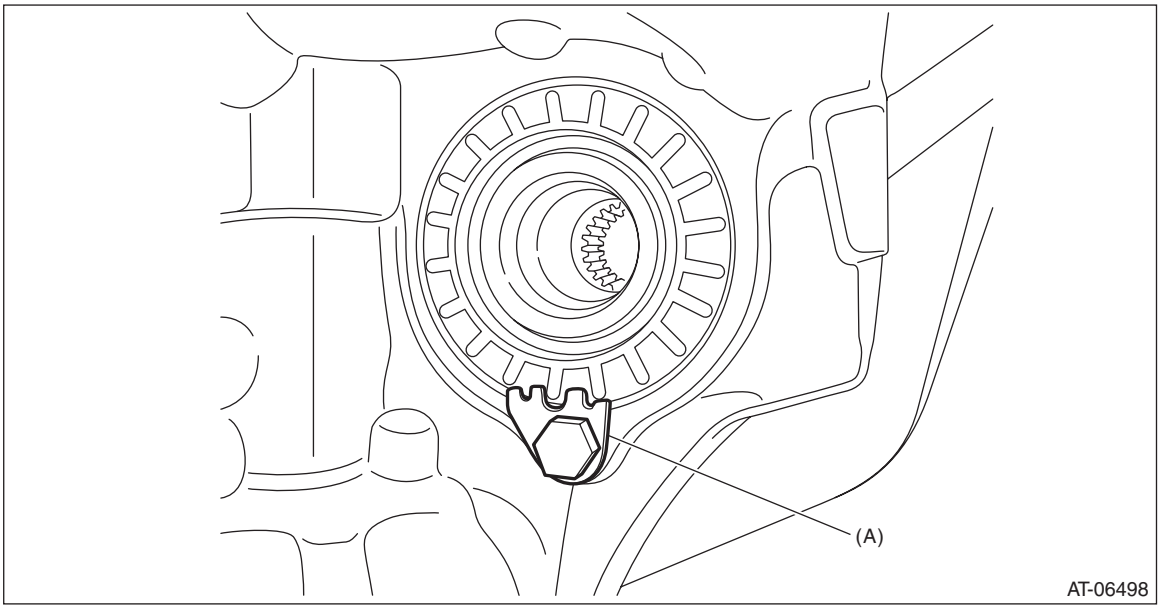
***Tightening torque:***
***43 N·m (4.4 kgf-m, 31.7 ft-lb)***



4) Rotate the drive pinion shaft ten times or more using ST1 and ST2.
ST1 18667AA010 HOLDER
ST2 499787700 WRENCH

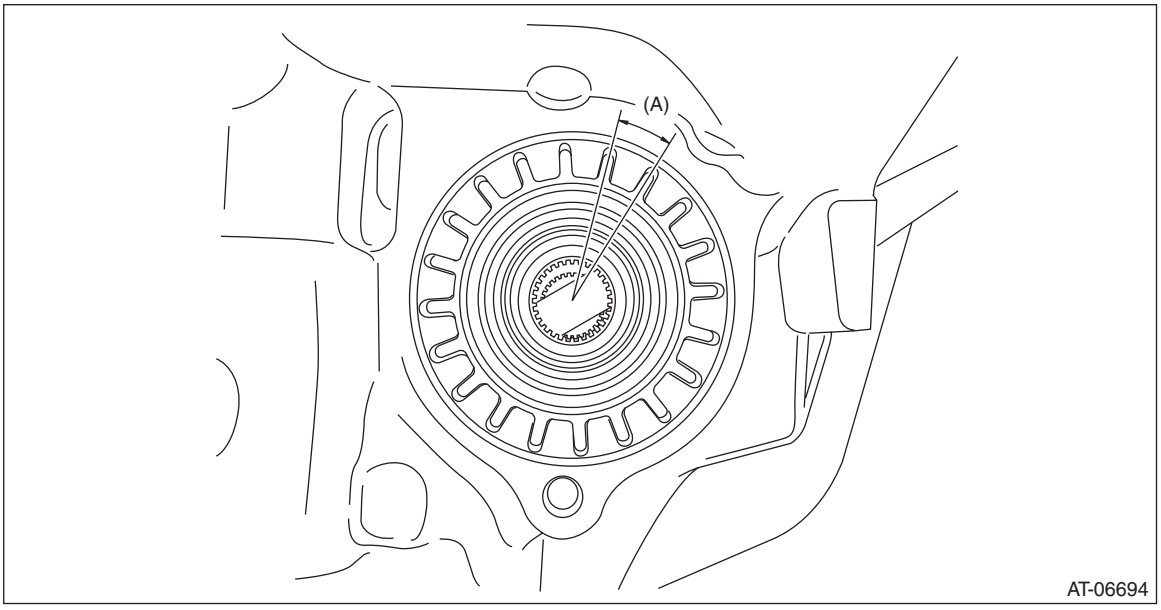


5) While rotating the pinion shaft, tighten the retainer LH and loosen the retainer RH until the shaft can't be turned anymore. The backlash is “zero” when the pinion shaft comes to the point where it doesn't rotate.
6) After the “zero” state is established, loosen the retainer LH by 3 notches and secure it with the lock plate. Retighten the retainer RH until it stops. Rotate the drive pinion 2 or 3 times. Tighten the retainer RH further 1-3/4 notches. This sets the preload. Finally, secure the retainer with its lock plate.



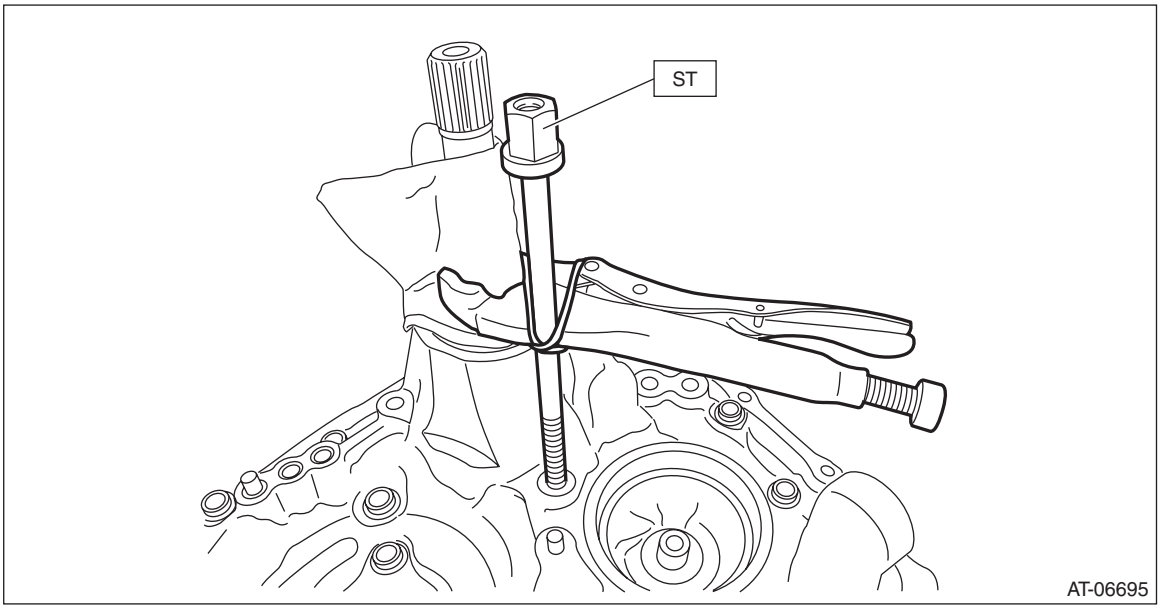
(A) Lock plate

NOTE:
Turning the retainer by every one tooth changes the backlash approx. 0.05 mm (0.0020 in).



(A) 1 tooth

7) Insert the two SUBARU genuine axle shafts into differential case.
Part No. 38415AA070 Axle shaft
8) Install the ST to the drive pinion retainer, and wrap the drive pinion shaft with cloth and pinch with vise pliers. Using a tie-wrap or a wire, fix the vise pliers to the ST.
Make sure the drive pinion shaft does not move.
ST 18763AA000 COMPRESSOR SHAFT



9) Check the backlash is within specification using ST1, ST2 and ST3.
ST1 498255400 PLATE

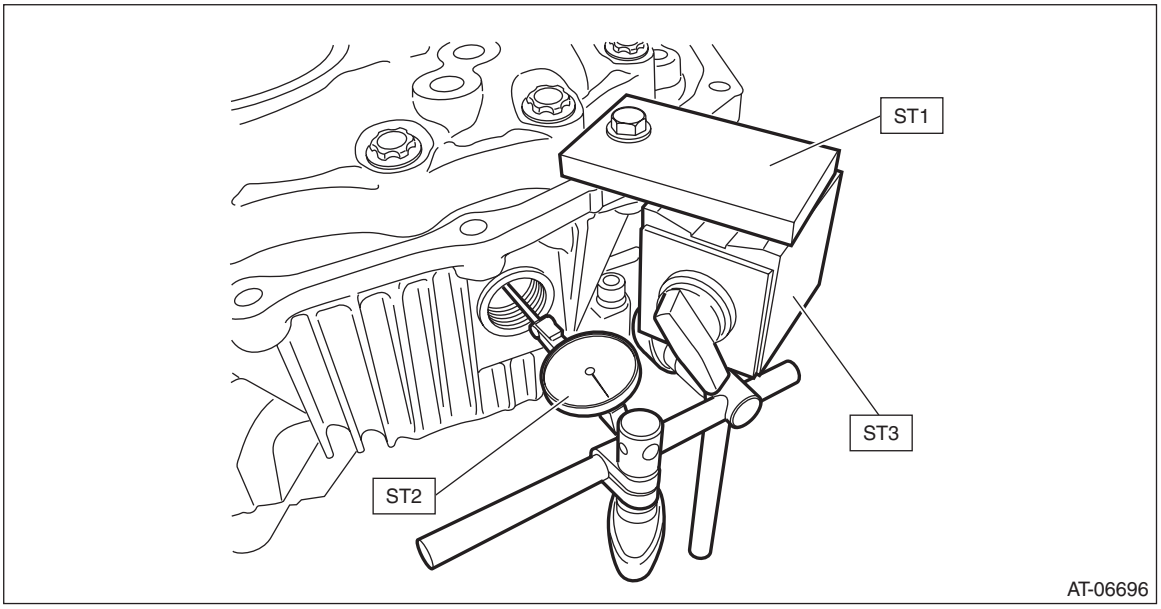
ST3 498247001 MAGNET BASE

***Backlash:***
***0.13 — 0.18 mm (0.005 — 0.007 in)***



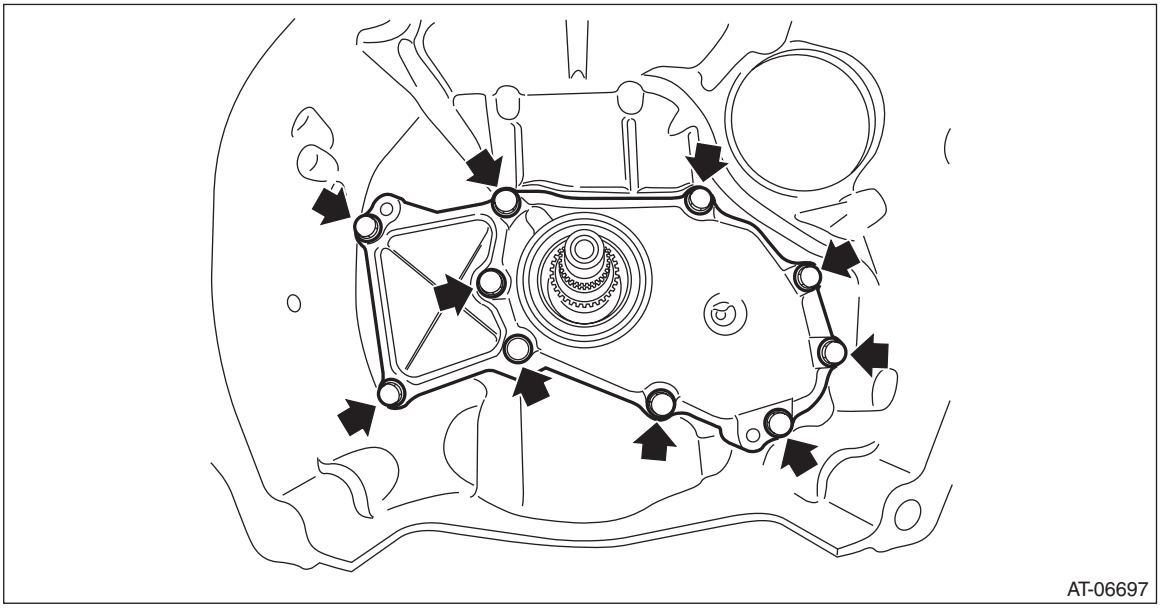
10) Adjust the teeth contact of the front differential and drive shaft. <Ref. to CVT-287, ADJUSTMENT, Drive Pinion Shaft Assembly.>

# 43.Oil Pump Chain

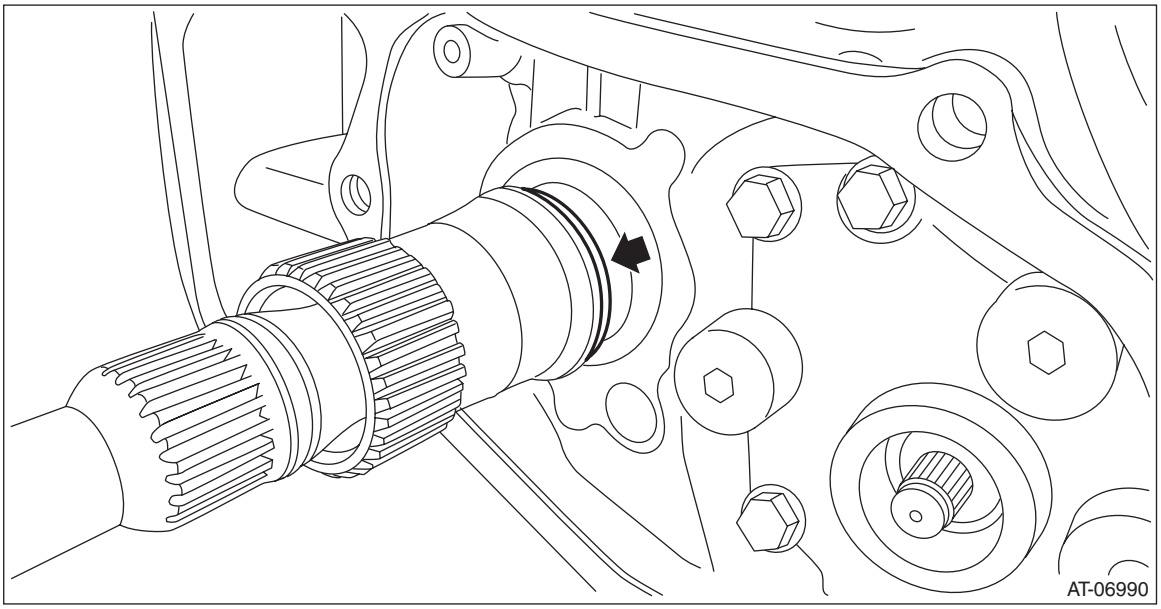
## A: REMOVAL

1) Remove the transmission assembly from the vehicle. <Ref. to CVT-56, REMOVAL, Automatic Transmission Assembly.>
2) Remove the torque converter assembly. <Ref. to CVT-152, REMOVAL, Torque Converter Assembly.>
3) Remove the oil pump chain cover.

NOTE:
Oil pump chain cover may be hard to remove because the driven sprocket is installed to the shaft side of the oil pump. In this case, do not apply excessive force to remove it.

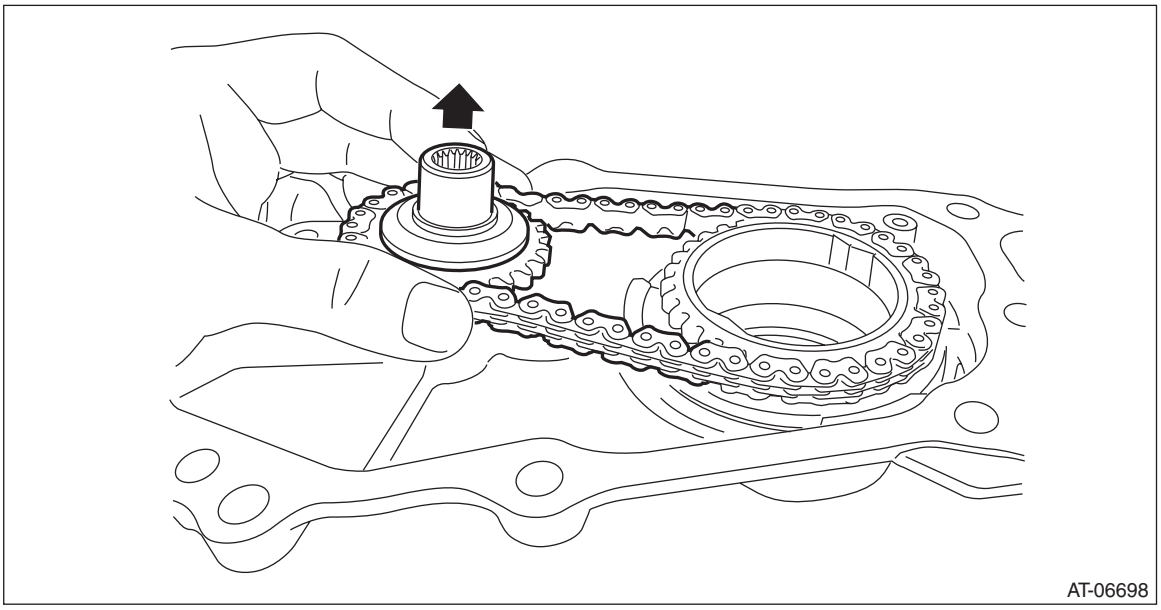


4) Remove the seal ring.

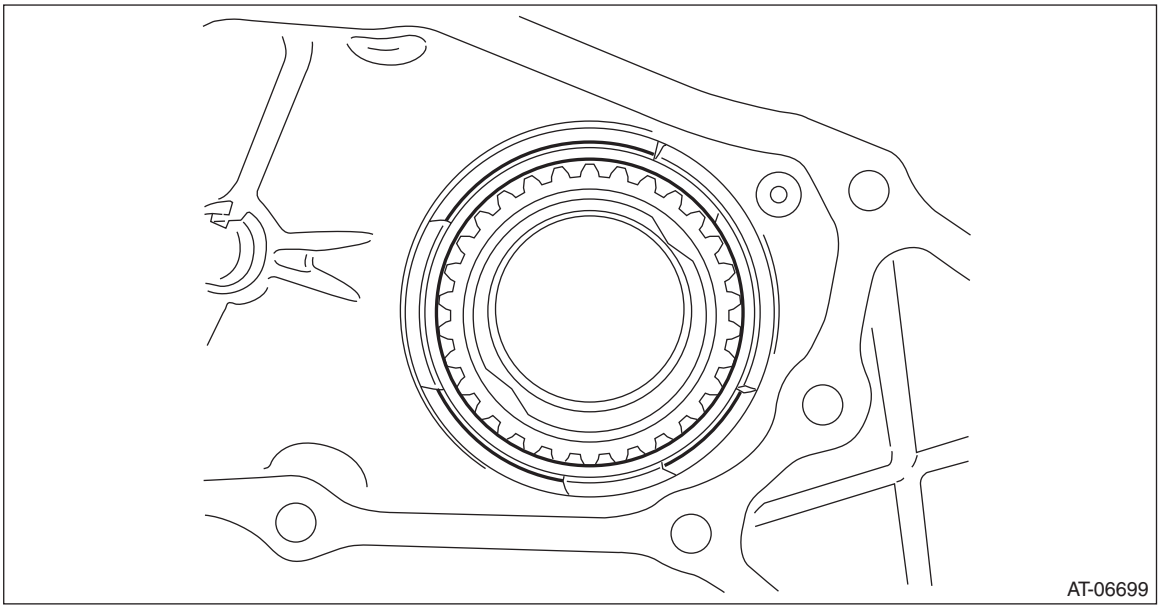


5) Remove the driven sprocket from oil pump chain cover to remove the oil pump chain.

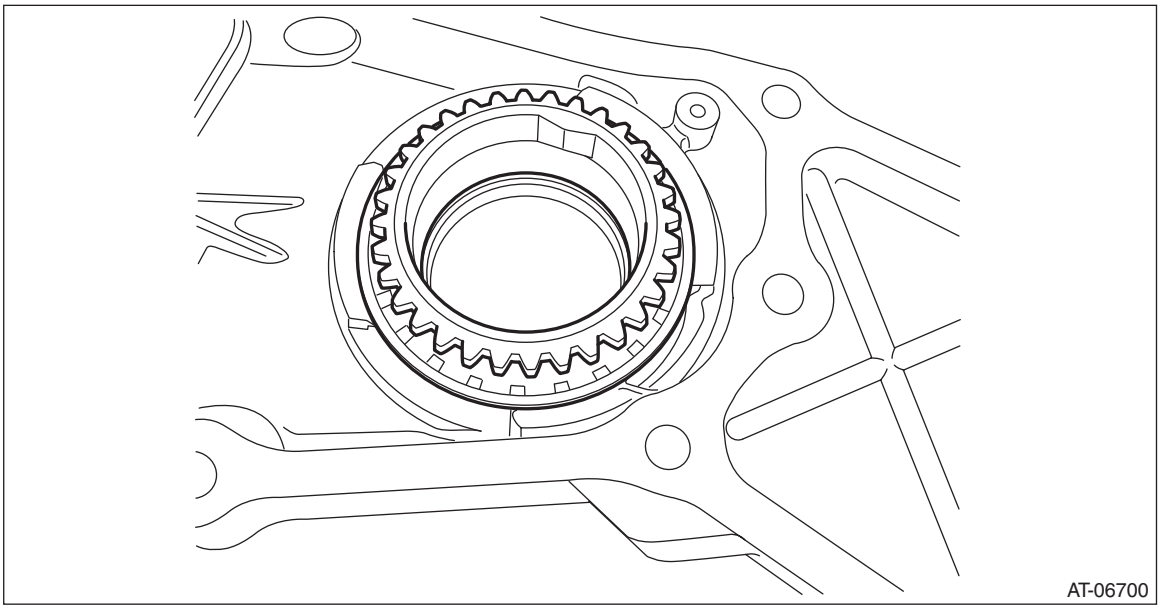
NOTE:
- The driven sprocket is replaced as an assembly only, because it is a non-disassembly part.
- If the ball bearing is removed from the driven sprocket, replace with a new part.



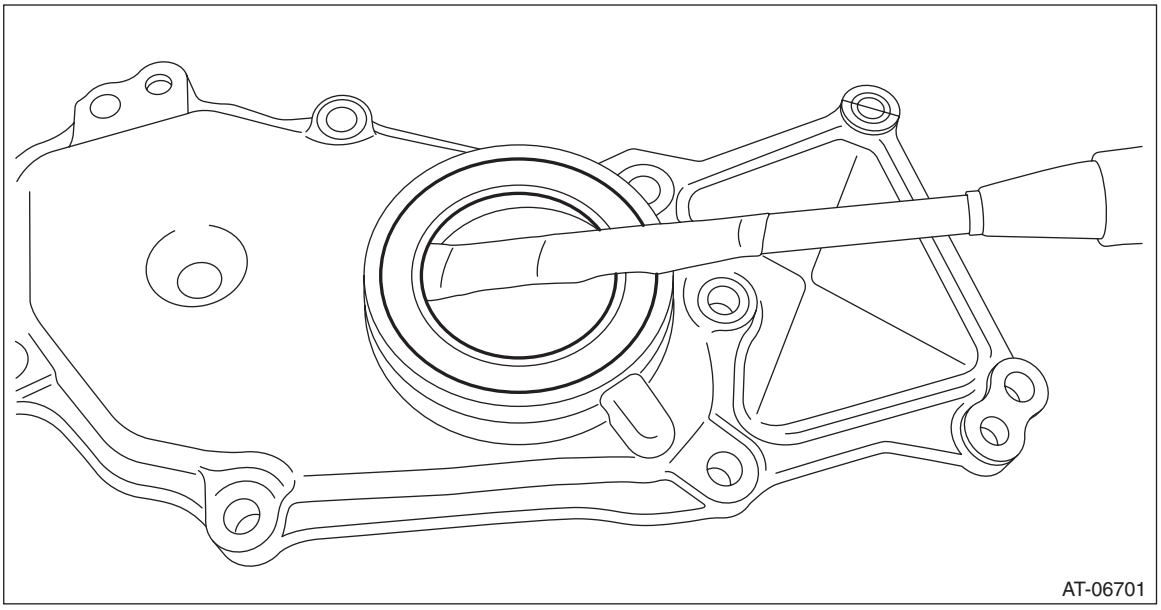
6) Remove the snap ring.



7) Remove the drive sprocket.



8) Remove the oil seal from the oil pump chain cover.

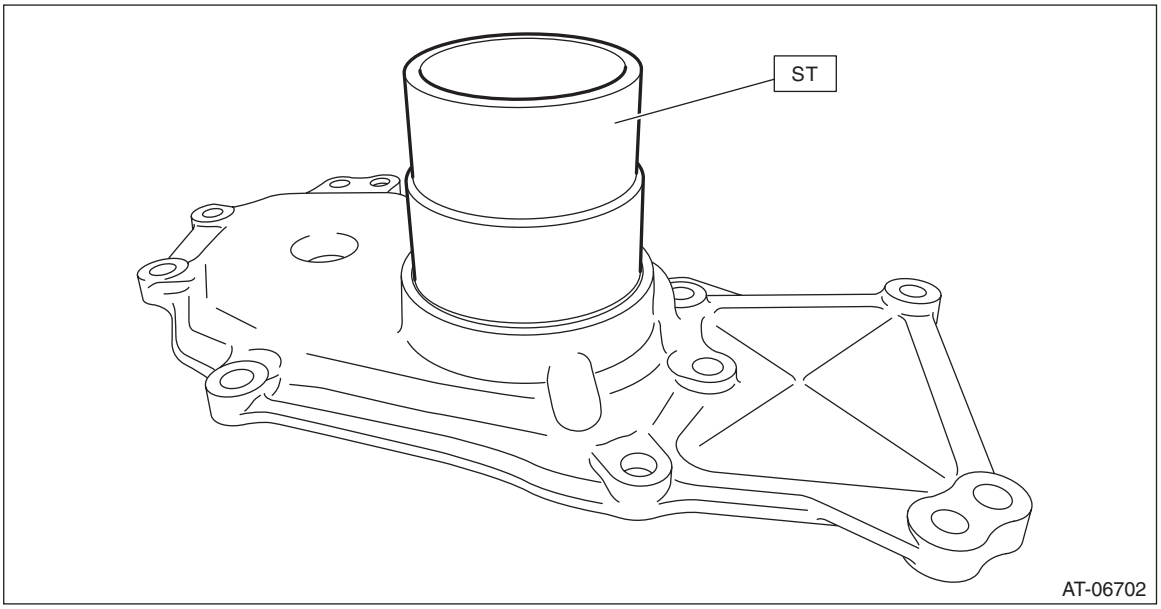


## B: INSTALLATION

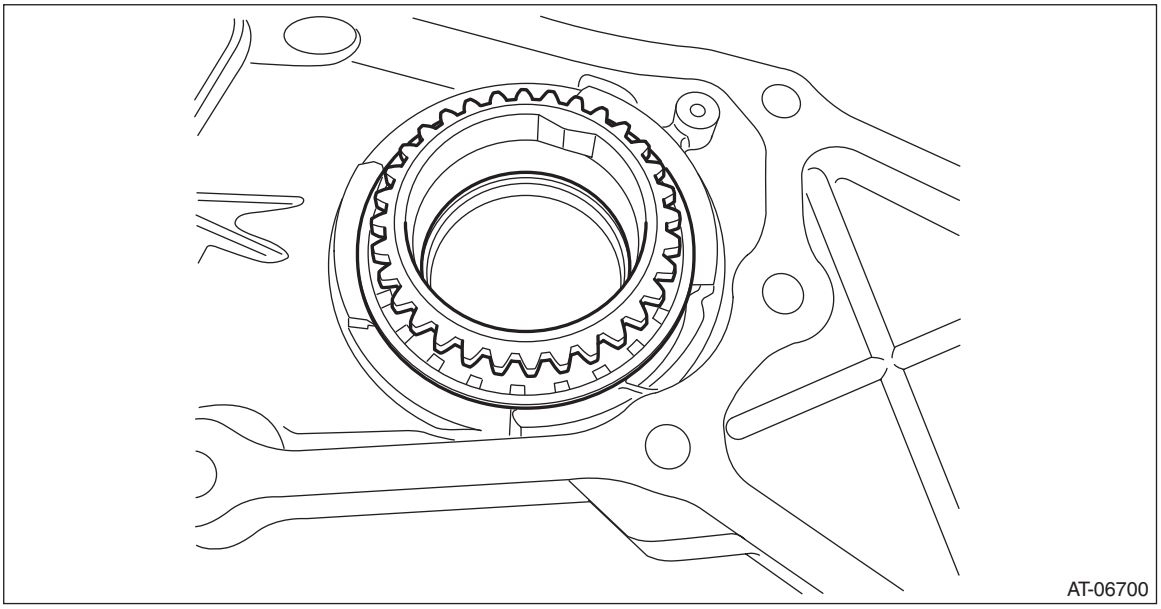
1) Clean the mating surface of oil pump chain cover and converter case.
2) Using the ST, install the oil seal.

NOTE:
- Use a new oil seal.
- Apply CVTF to the oil seal lip and press-fitting surface.

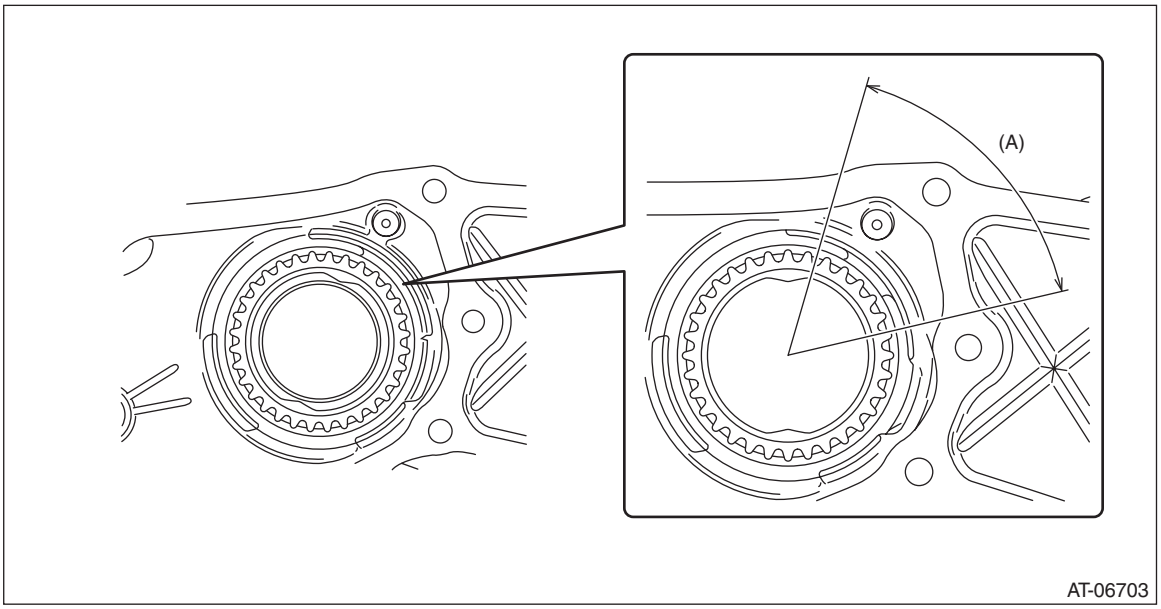
ST 499755602 PRESS SNAP RING



3) Install the drive sprocket.

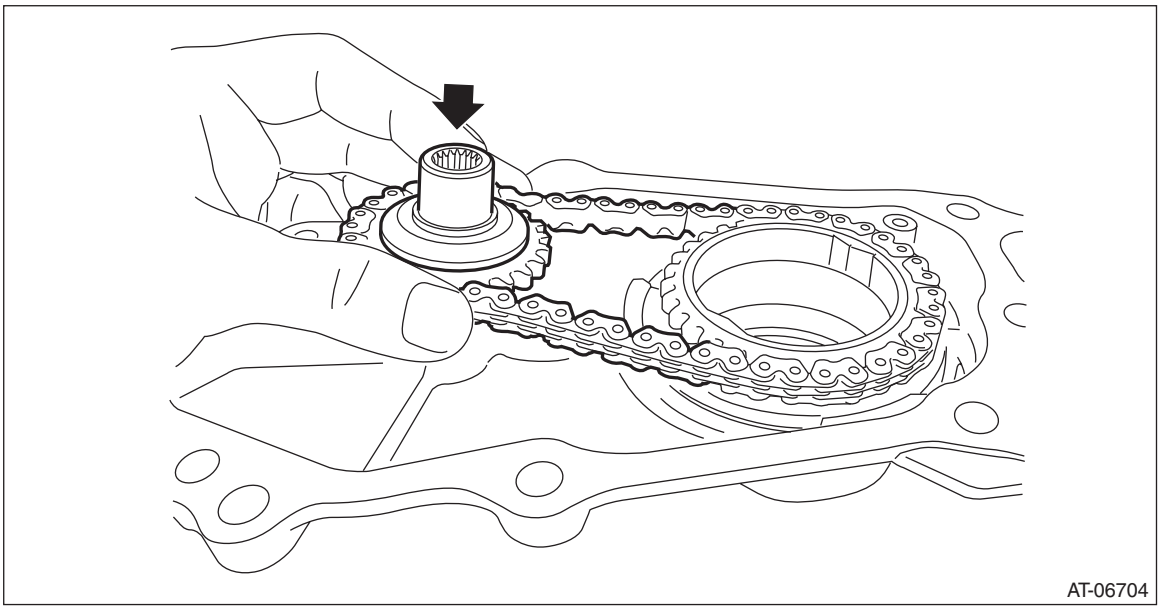


4) Install the snap ring so that its cutout portion is securely fitted into the snap ring groove of the oil pump chain cover.



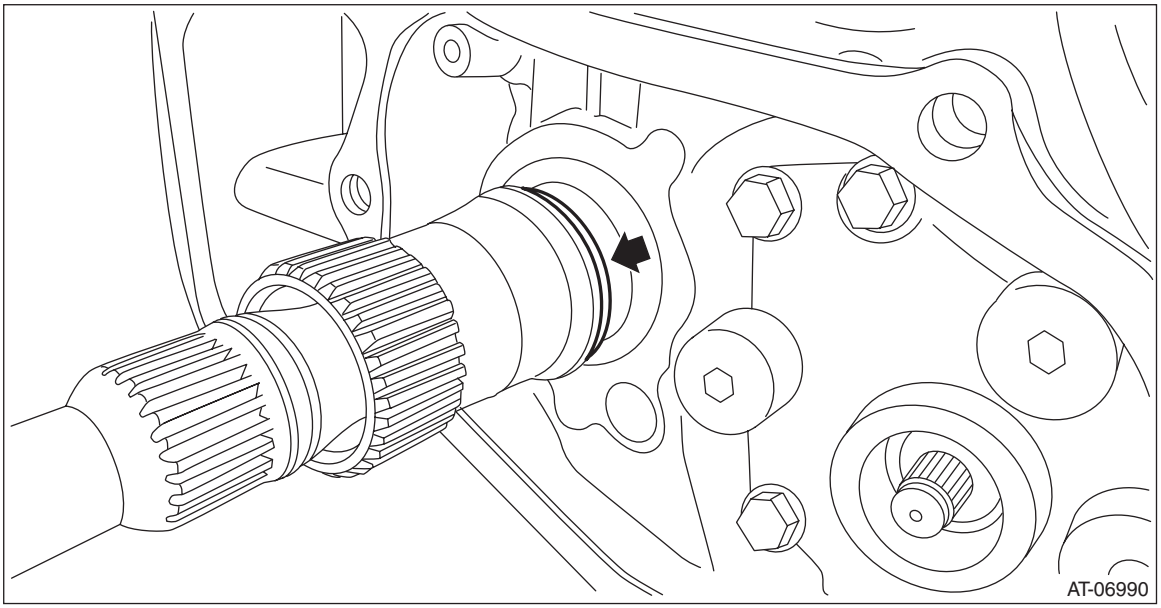
(A) Installation range of cutout portion for snap ring

5) Place the oil pump chain on drive sprocket.
6) Place the oil pump chain on driven sprocket and install the driven sprocket to oil pump chain cover.



7) Install the seal ring.

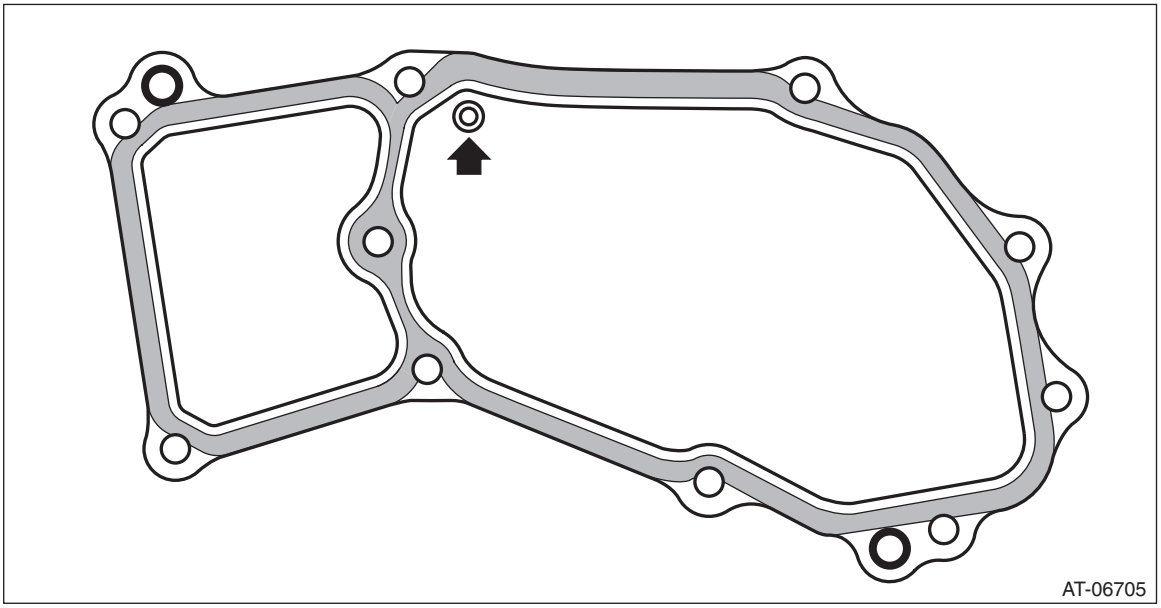
NOTE:
- Use a new seal ring.
- Apply CVTF to the seal rings.
- When installing the seal ring, do not expand the seal ring too much.



8) Apply liquid gasket seamlessly to the mating surface of oil pump chain cover.

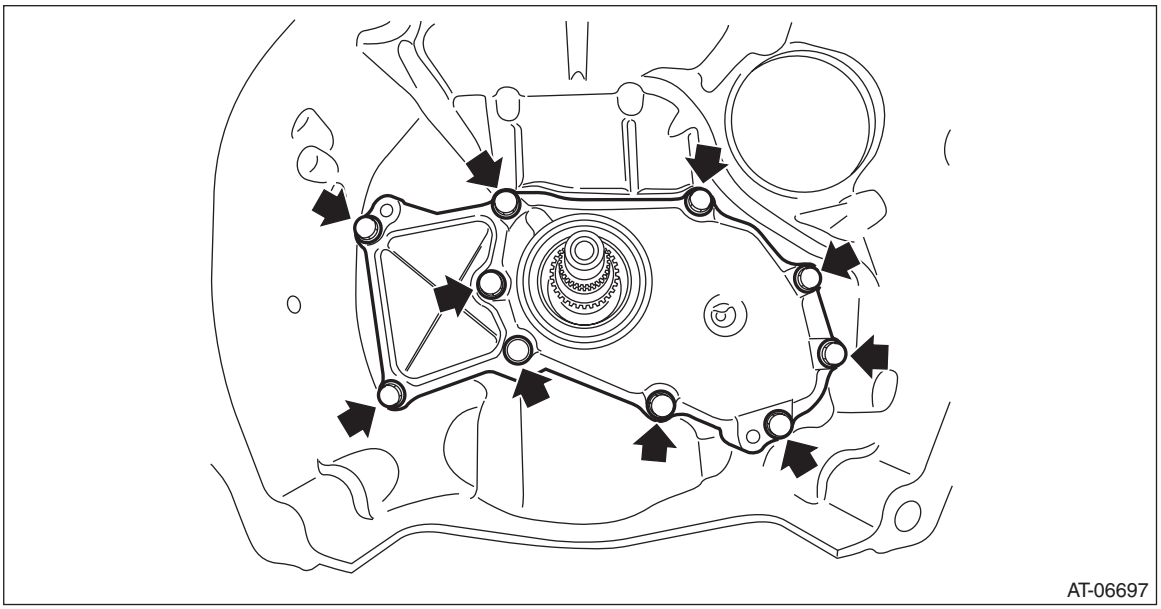
**CAUTION:**
**Do not apply liquid gasket at the arrowed hole.**

***Liquid gasket:***
***THREE BOND 1215 (Part No. 004403007) or equivalent***



9) Install the oil pump chain cover.

***Tightening torque:***
***21 N·m (2.1 kgf-m, 15.5 ft-lb)***

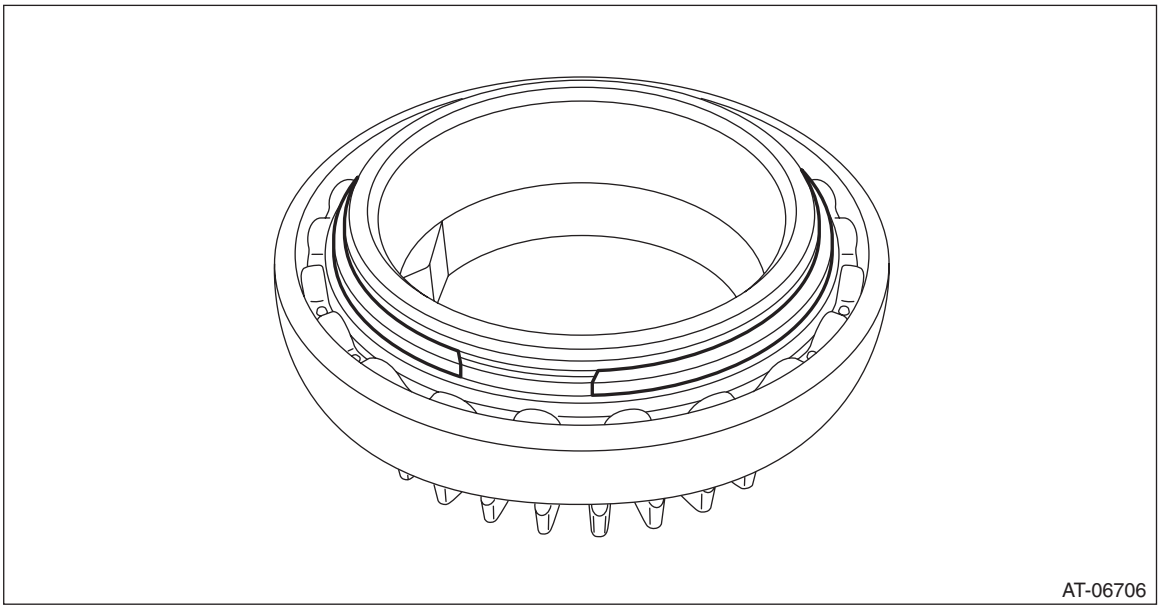


10) Install the torque converter assembly. <Ref. to CVT-153, INSTALLATION, Torque Converter Assembly.>
11) Install the transmission assembly to the vehicle. <Ref. to CVT-67, INSTALLATION, Automatic Transmission Assembly.>

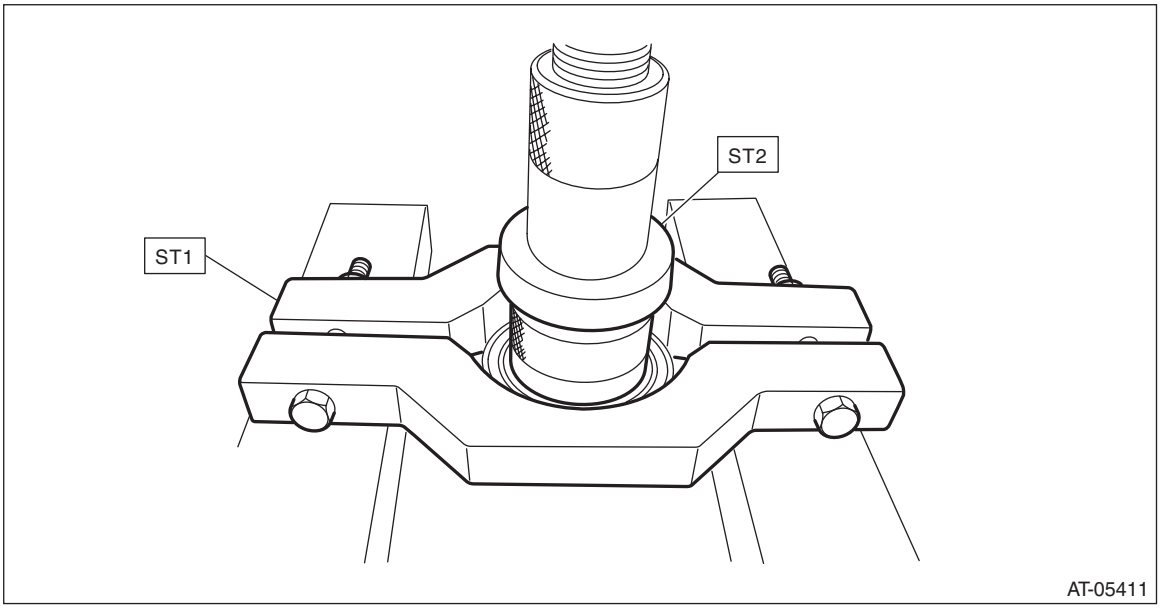
## C: DISASSEMBLY

### 1. DRIVE SPROCKET

1) Remove the snap ring.



2) Remove the ball bearing using ST.
ST1 498077600 REMOVER
ST2 399513600 INSTALLER

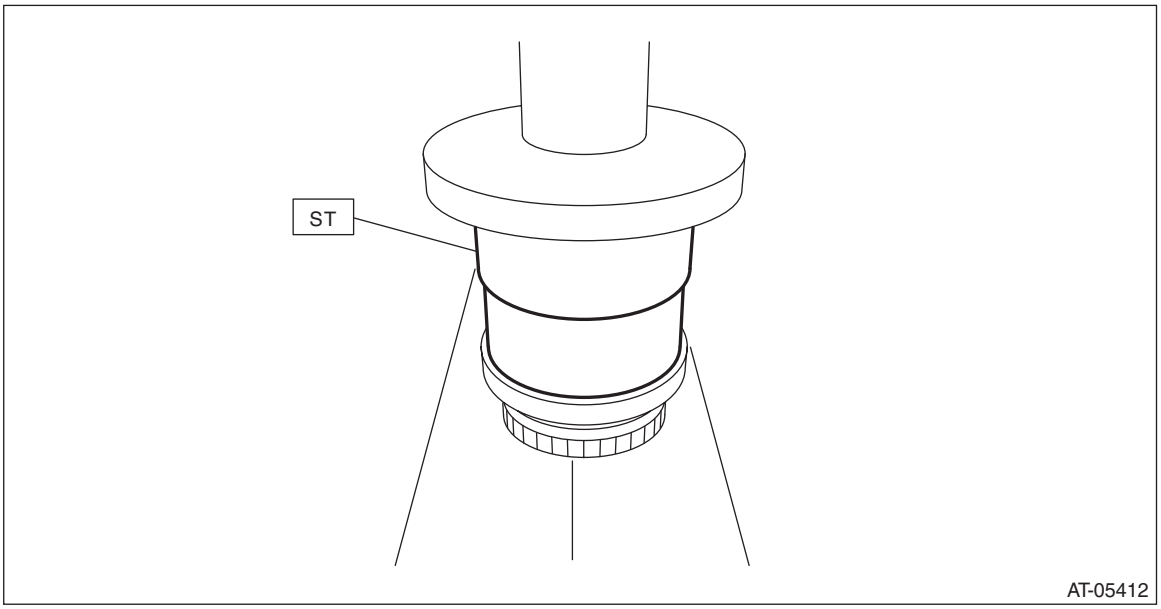


# D: ASSEMBLY

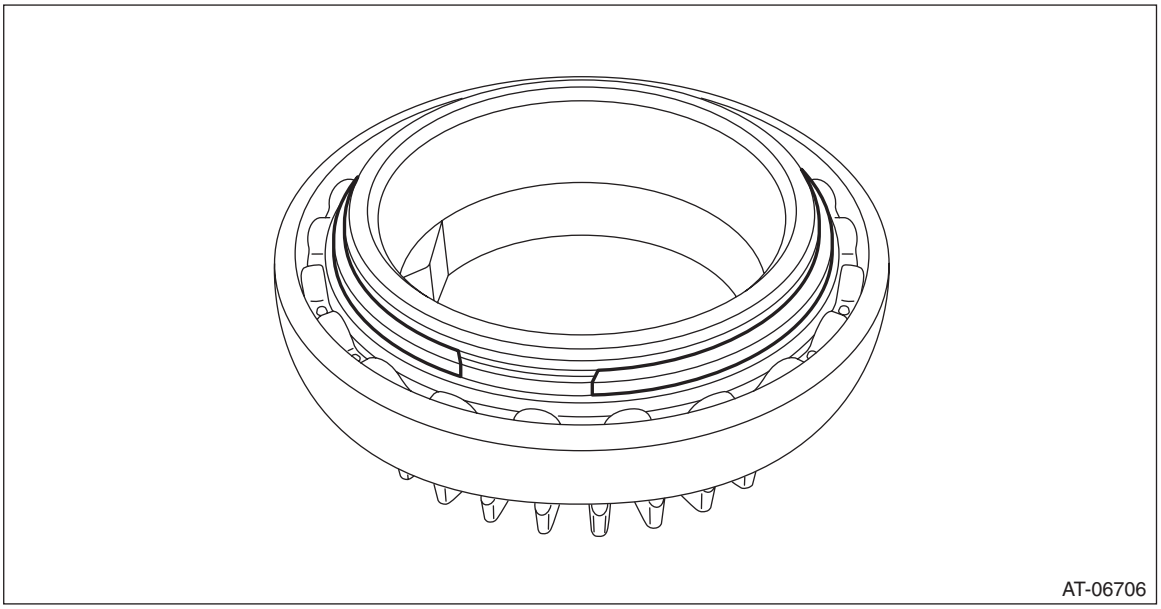
## 1. DRIVE SPROCKET

1) Using the ST, install the ball bearing.

NOTE:
Use a new ball bearing.
ST 499755502 PRESS SNAP RING



2) Install the snap ring.



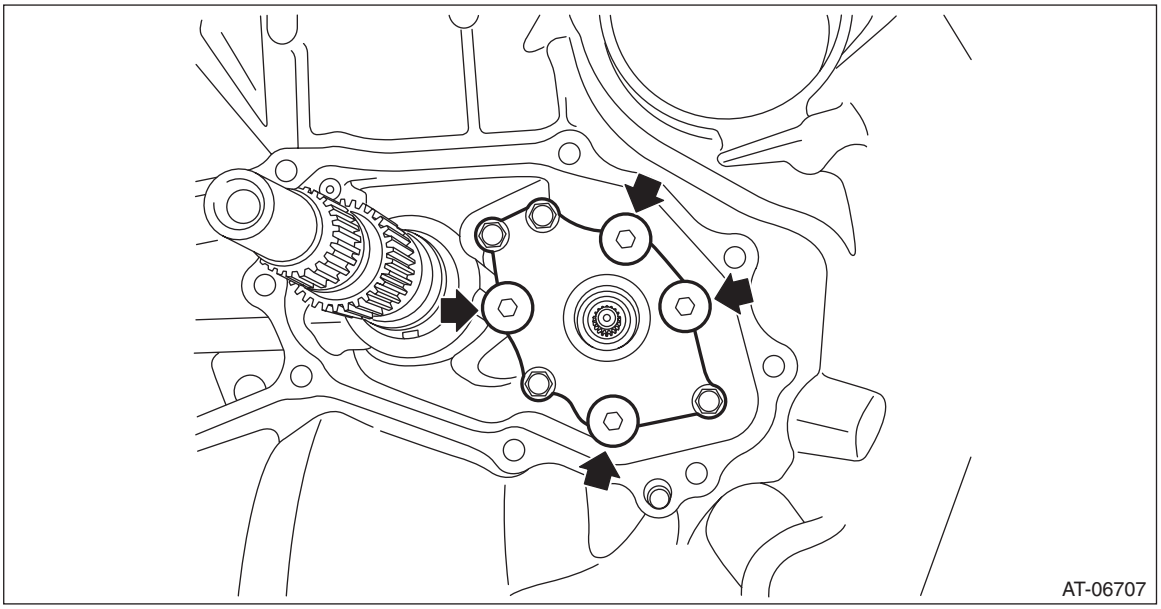
# E: INSPECTION

- Check the oil pump chain for damage.
- Replace if gear teeth are broken, damaged, sharpen or excessively worn.
- Check the bearing for seizure or wear.
- Apply CVTF to bearing and rotate the bearing to check for noise or dragging etc.
- Check the oil pump chain cover for damage.
- Check for leakage of CVTF from the mating surface of oil pump chain cover.
- Check the oil seal for damage.

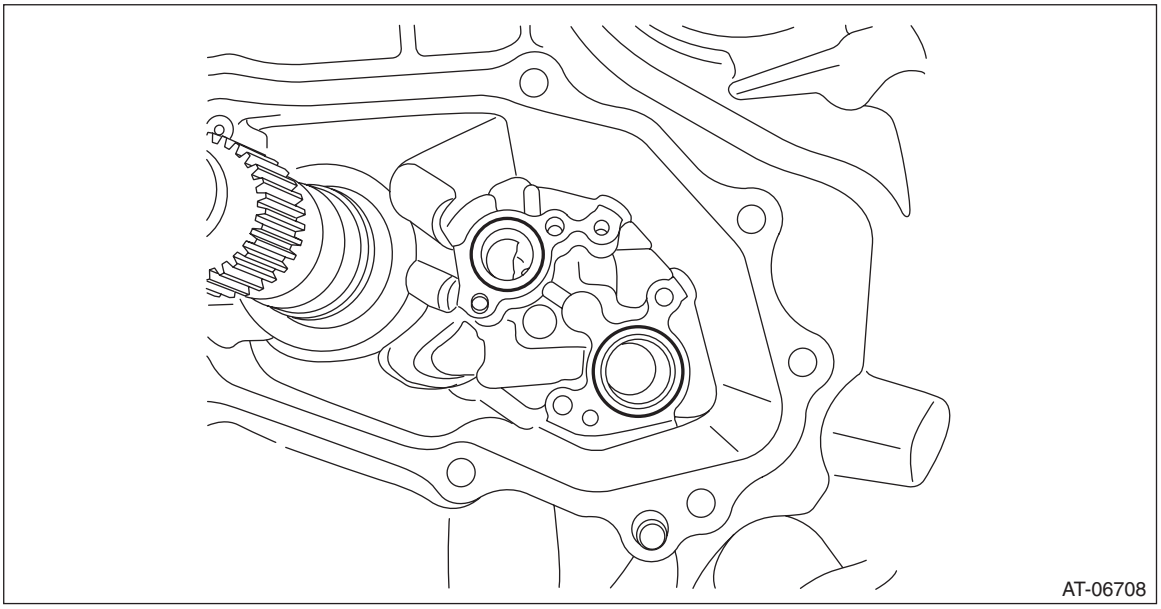
# 44.Oil Pump

## A: REMOVAL

1) Remove the transmission assembly from the vehicle. <Ref. to CVT-56, REMOVAL, Automatic Transmission Assembly.>
2) Remove the torque converter assembly. <Ref. to CVT-152, REMOVAL, Torque Converter Assembly.>
3) Remove the oil pump chain cover. <Ref. to CVT-312, REMOVAL, Oil Pump Chain.>
4) Remove the oil pump and the plate.



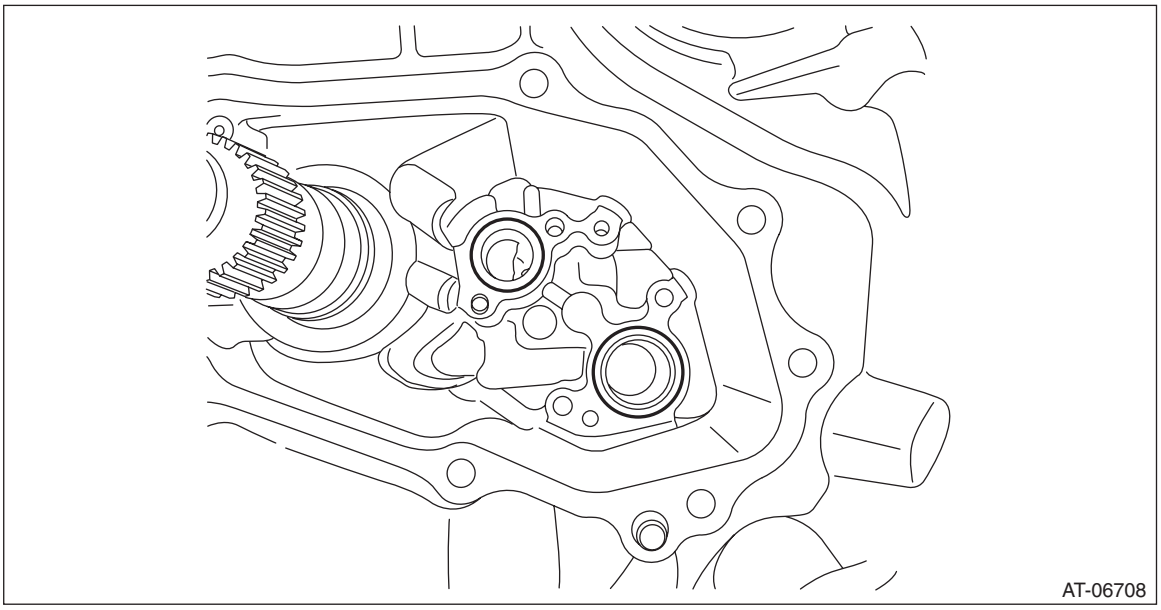
5) Remove the O-ring.



## B: INSTALLATION

1) Install the O-ring.

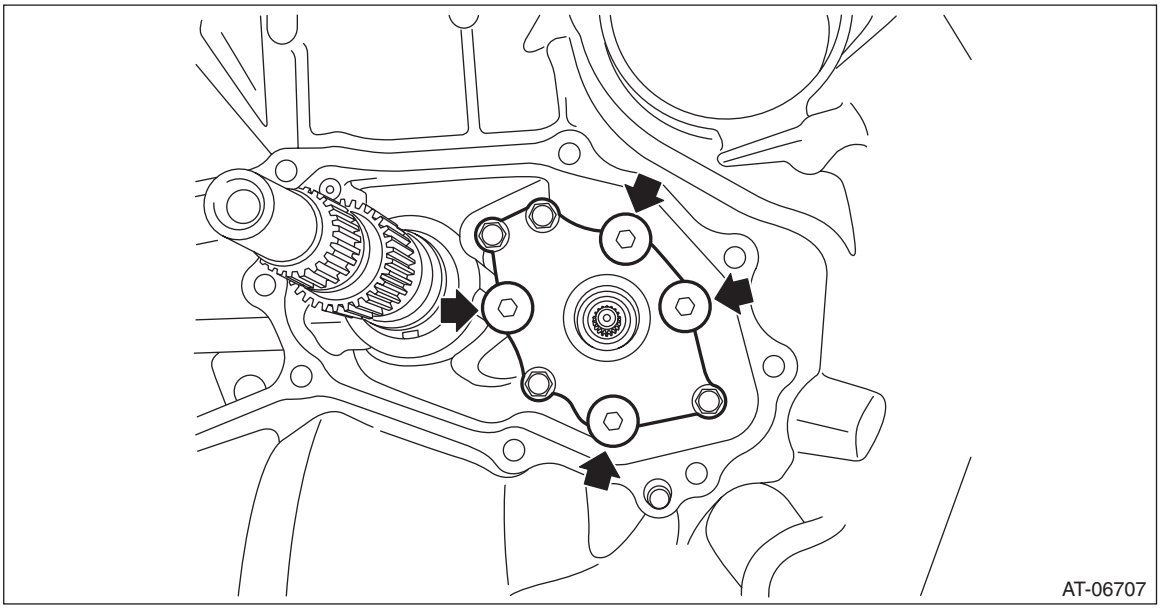
NOTE:
- Use new O-rings.
- Apply CVTF to the O-ring.



2) Install the plate and the oil pump.

NOTE:
Apply CVTF to the bolt.

***Tightening torque:***
***8.5 N·m (0.9 kgf-m, 6.3 ft-lb)***



3) Install the oil pump chain cover. <Ref. to CVT-315, INSTALLATION, Oil Pump Chain.>
4) Install the torque converter assembly. <Ref. to CVT-153, INSTALLATION, Torque Converter Assembly.>
5) Install the transmission assembly to the vehicle. <Ref. to CVT-67, INSTALLATION, Automatic Transmission Assembly.>

## C: INSPECTION

Check the following items.
- Check the oil pump for damage and wear.
- Rotate the oil pump by hand, and check that it rotates smoothly.

1) Measure the secondary pressure. <Ref. to CVT-47, INSPECTION, Secondary Pressure (Line Pressure) Test.>
2) Remove the oil pan and oil strainer. <Ref. to CVT-110, REMOVAL, Control Valve Body.>
3) Check oil strainer for clogging.
When oil strainer has no clogging, replace the oil pump.

# 45.Converter Case

## A: REMOVAL

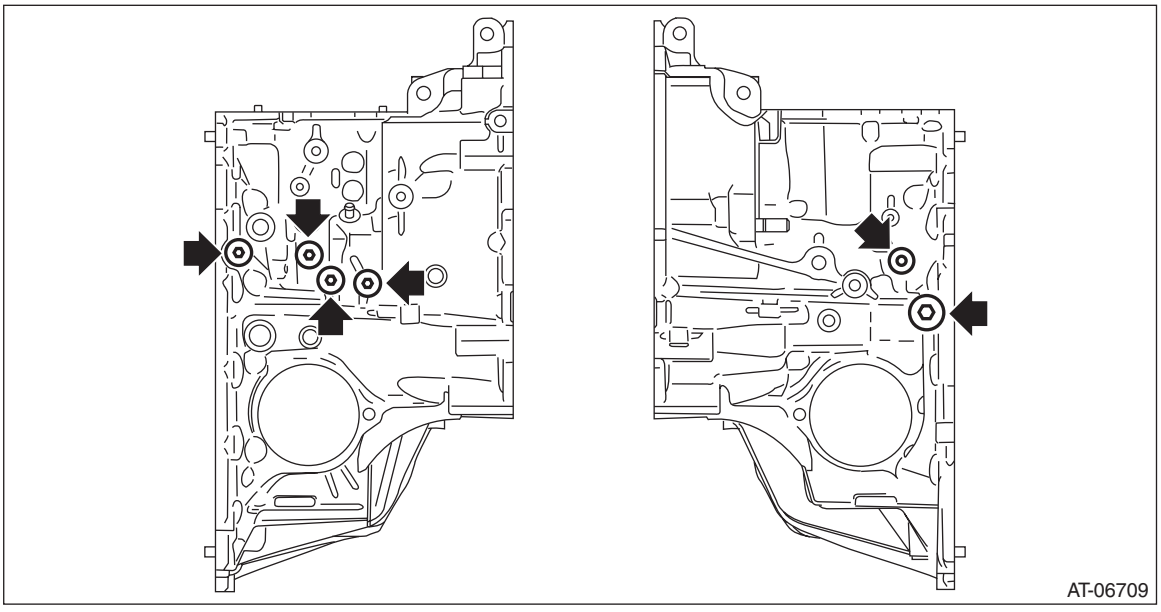
1) Remove the transmission assembly from the vehicle. <Ref. to CVT-56, REMOVAL, Automatic Transmission Assembly.>
2) Remove the air breather hose. <Ref. to CVT-148, REMOVAL, Air Breather Hose.>
3) Remove the control valve body. <Ref. to CVT-110, REMOVAL, Control Valve Body.>
4) Remove the transmission harness. <Ref. to CVT-124, REMOVAL, Transmission Harness.>
5) Remove the turbine speed sensor. <Ref. to CVT-97, REMOVAL, Turbine Speed Sensor.>
6) Remove the secondary speed sensor. <Ref. to CVT-99, REMOVAL, Secondary Speed Sensor.>
7) Remove the primary speed sensor. <Ref. to CVT-101, REMOVAL, Primary Speed Sensor.>
8) Remove the inhibitor switch. <Ref. to CVT-93, REMOVAL, Inhibitor Switch.>
9) Remove the extension case. <Ref. to CVT-156, REMOVAL, Extension Case.>
10) Remove the transfer clutch assembly. <Ref. to CVT-160, REMOVAL, Transfer Clutch.>
11) Remove the transfer driven gear assembly. <Ref. to CVT-174, REMOVAL, Transfer Driven Gear.>
12) Remove the parking pawl. <Ref. to CVT-177, REMOVAL, Parking Pawl.>
13) Remove the reduction driven gear assembly. <Ref. to CVT-179, REMOVAL, Reduction Driven Gear.>
14) Remove the oil pan and oil strainer. <Ref. to CVT-106, REMOVAL, Oil Pan and Strainer.>
15) Remove the transmission control device. <Ref. to CVT-187, REMOVAL, Transmission Control Device.>
16) Remove the transmission case. <Ref. to CVT-193, REMOVAL, Transmission Case.>
17) Remove the reduction drive gear. <Ref. to CVT-206, REMOVAL, Reduction Drive Gear.>
18) Remove the primary pulley, secondary pulley and variator chain. <Ref. to CVT-210, REMOVAL, Primary Pulley and Secondary Pulley.>
19) Remove the reverse brake assembly. <Ref. to CVT-231, REMOVAL, Reverse Brake Assembly.>
20) Remove the forward clutch assembly. <Ref. to CVT-246, REMOVAL, Forward Clutch Assembly.>
21) Remove the drive pinion shaft assembly. <Ref. to CVT-265, REMOVAL, Drive Pinion Shaft Assembly.>
22) Remove the front differential assembly. <Ref. to CVT-294, REMOVAL, Front Differential Assembly.>
23) Remove the oil pump chain cover. <Ref. to CVT-312, REMOVAL, Oil Pump Chain.>
24) Remove the oil pump. <Ref. to CVT-321, REMOVAL, Oil Pump.>

## B: INSTALLATION

1) Install the oil pump. <Ref. to CVT-322, INSTALLATION, Oil Pump.>
2) Install the oil pump chain cover. <Ref. to CVT-315, INSTALLATION, Oil Pump Chain.>
3) Install the front differential assembly. <Ref. to CVT-296, INSTALLATION, Front Differential Assembly.>
4) Install the drive pinion shaft assembly. <Ref. to CVT-266, INSTALLATION, Drive Pinion Shaft Assembly.>
5) Install the forward clutch assembly. <Ref. to CVT-249, INSTALLATION, Forward Clutch Assembly.>
6) Install the reverse brake assembly. <Ref. to CVT-234, INSTALLATION, Reverse Brake Assembly.>
7) Install the primary pulley, secondary pulley and variator chain. <Ref. to CVT-217, INSTALLATION, Primary Pulley and Secondary Pulley.>
8) Install the reduction drive gear. <Ref. to CVT-207, INSTALLATION, Reduction Drive Gear.>
9) Install the transmission case. <Ref. to CVT-196, INSTALLATION, Transmission Case.>
10) Install the transmission control device. <Ref. to CVT-190, INSTALLATION, Transmission Control Device.>
11) Install the oil strainer and oil pan. <Ref. to CVT-107, INSTALLATION, Oil Pan and Strainer.>
12) Install the reduction driven gear assembly. <Ref. to CVT-179, INSTALLATION, Reduction Driven Gear.>
13) Install the transfer driven gear assembly. <Ref. to CVT-175, INSTALLATION, Transfer Driven Gear.>
14) Install the transfer clutch assembly. <Ref. to CVT-162, INSTALLATION, Transfer Clutch.>
15) Install the parking pawl. <Ref. to CVT-178, INSTALLATION, Parking Pawl.>
16) Install the extension case. <Ref. to CVT-157, INSTALLATION, Extension Case.>
17) Install the inhibitor switch. <Ref. to CVT-95, INSTALLATION, Inhibitor Switch.>
18) Install the secondary speed sensor. <Ref. to CVT-99, INSTALLATION, Secondary Speed Sensor.>
19) Install the primary speed sensor. <Ref. to CVT-102, INSTALLATION, Primary Speed Sensor.>
20) Install the turbine speed sensor. <Ref. to CVT-97, INSTALLATION, Turbine Speed Sensor.>
21) Install the transmission harness. <Ref. to CVT-130, INSTALLATION, Transmission Harness.>
22) Install the control valve body. <Ref. to CVT-116, INSTALLATION, Control Valve Body.>
23) Install the air breather hose. <Ref. to CVT-149, INSTALLATION, Air Breather Hose.>
24) Install the transmission assembly to the vehicle. <Ref. to CVT-67, INSTALLATION, Automatic Transmission Assembly.>

## C: DISASSEMBLY

1) Remove the pitching stopper bracket and transmission radio ground cord, if mounted.
2) Remove the filler plug, oil drain plug and overflow drain plug. <Ref. to CVT-41, REPLACEMENT, Differential Gear Oil.>
3) Remove all plugs.



## D: ASSEMBLY

1) Install the oil drain plug.

***Tightening torque:***
***70 N·m (7.1 kgf-m, 51.6 ft-lb)***

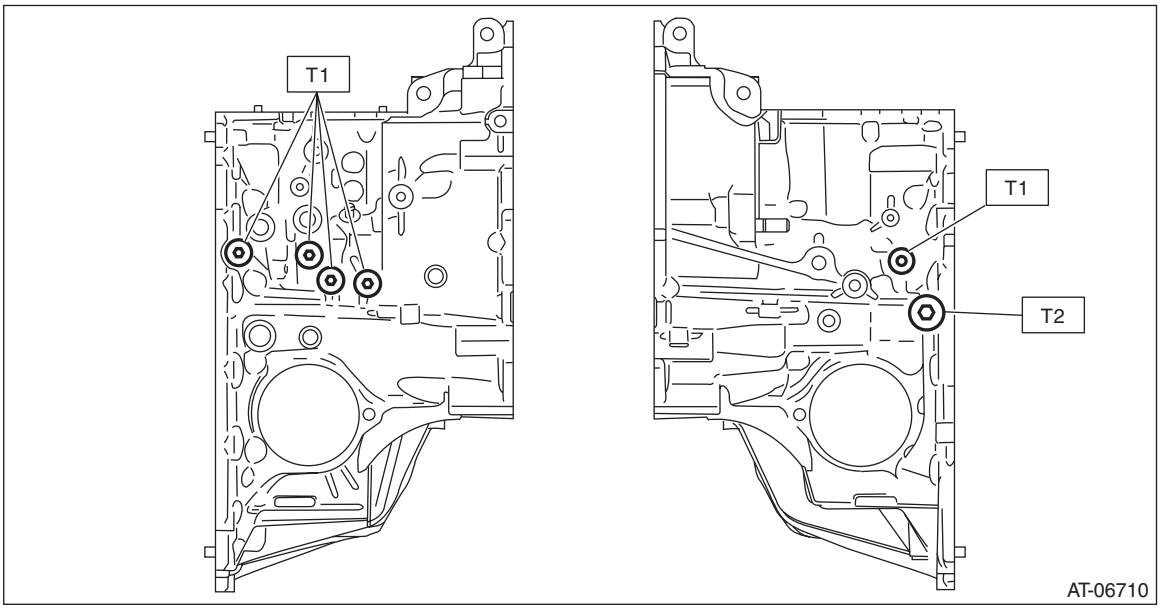
2) Install the overflow drain plug.

NOTE:
Overflow plug of differential gear oil is temporarily attached.

3) Install all plugs.

NOTE:
Use new O-rings.

***Tightening torque:***
***T1: 25 N·m (2.5 kgf-m, 18.4 ft-lb)***
***T2: 25.5 N·m (2.6 kgf-m, 18.8 ft-lb)***



4) Install the pitching stopper bracket and transmission radio ground cord.

***Tightening torque:***
***41 N·m (4.2 kgf-m, 30.2 ft-lb)***

## E: INSPECTION

- Check for leakage of CVTF from the connection between converter case and transmission case.
- Check there is no damage or cracks on the converter case.

# 46.Diagnostics with Phenomenon

## A: INSPECTION

| Symptoms | Faulty parts |
|---|---|
| Stall speed is low after warming-up, with select lever in “D” or “R” range. | Engine control system |
| Vehicle does not move despite engine speed rising up, with select lever in “D” or “R” range. | • Engine control system<br>• Select cable<br>• CVTF<br>• Secondary pressure circuit<br>• Pulley, gear and variator chain<br>• Forward/reverse changeover section<br>• TCM<br>• Control valve body<br>• Inhibitor switch |
| Vehicle does not move by engine stall, with select lever in “D” or “R” range. | • Parking mechanism<br>• Select cable<br>• Bearing<br>• Forward/reverse changeover section |
| Excessive shock occurs at starting, with select lever in “D” or “R” range. | • Secondary pressure circuit<br>• Pulley, gear and variator chain |
| Acceleration speed from standstill is insufficient, with select lever in “D” or “R” range. | • Control valve body<br>• Forward/reverse changeover section |
| Engine speed suddenly rises up during driving, with select lever in “D” or “R” range. | • Control valve body<br>• Secondary pressure circuit<br>• Primary pressure circuit |
| Vibration occurs during driving, with select lever in “D” or “R” range. | • Secondary pressure circuit<br>• Primary pressure circuit<br>• Forward/reverse changeover section<br>• Pulley and variator chain<br>• Torque converter ASSY<br>• Hydraulic pressure circuit to torque converter<br>• Control valve body |
| Sudden braking occurs during driving, with select lever in “D” or “R” range. | • Secondary pressure circuit<br>• Primary pressure circuit<br>• Control valve body |
| During deceleration, lockup clutch does not disengage until just before halting, with select lever in “D” or “R” range. | • Control valve body<br>• Torque converter ASSY |
| Engine stalls with vehicle at a standstill, with select lever in “D” or “R” range. | • Engine control system<br>• Control valve body |
| Excessive lockup shock occurs during driving, with select lever in “D” range. | Control valve body |
| Slipping occurs at lockup, or lockup does not occur during driving, with select lever in “D” range. | • Control valve body<br>• Lockup hydraulic line<br>• Torque converter ASSY |
| Excessive shift shock occurs when shifting the select lever from “N” range to “D” range, or from “N” range to “R” range. | • Inhibitor switch<br>• Control valve body<br>• Forward/reverse changeover section |
| Vehicle does not keep at standstill with select lever in “P” range, or parking cannot be released when shifting from “P” range to another range. | • Select cable<br>• Parking mechanism |
| Select lever does not shift smoothly. | • Select cable<br>• Inhibitor switch<br>• Detent spring<br>• Manual plate |

# 1. Basic Diagnostic Procedure

## A: PROCEDURE

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK PRE-INSPECTION.**<br>1) Ask the customer when and how the trouble occurred using the interview check list. <Ref. to CVT(diag)-4, Check List for Interview.><br>2) Before performing diagnostics, check the following items which might affect CVT problems.<br>• General inspection <Ref. to CVT(diag)-5, INSPECTION, General Description.><br>• Disconnection of harness connector<br>• Visual check for harness damage<br>• Oil leakage<br>• Stall speed test <Ref. to CVT-45, Stall Test.><br>• Secondary pressure test <Ref. to CVT-47, Secondary Pressure (Line Pressure) Test.><br>• Transfer clutch pressure test <Ref. to CVT-50, Transfer Clutch Pressure Test.><br>• Time lag test <Ref. to CVT-46, Time Lag Test.><br>• Road test <Ref. to CVT-44, Road Test.><br>• Inhibitor switch <Ref. to CVT-90, Inhibitor Switch.> | Is the item that is thought to influence the CVT problem working properly? | Go to step **2**. | Repair the items which may be affecting the CVT trouble. |
| 2 | **CHECK AT OIL TEMP LIGHT.**<br>Turn the ignition switch to ON and wait for at least 2 seconds. | Does the AT OIL TEMP light illuminate? | Go to step **3**. | Check the AT OIL TEMP light. |
| 3 | **CHECK AT OIL TEMP LIGHT.**<br>Start the engine and wait for 2 seconds or more. | Does the AT OIL TEMP light blink? | Go to step **4**. | Go to step **6**. |
| 4 | **CHECK FOR ANY OTHER DTC ON DISPLAY.**<br>Read the DTC.<br>NOTE:<br>If the communication function of Subaru Select Monitor cannot be executed normally, check the communication circuit. <Ref. to CVT(diag)-27, COMMUNICATION FOR INITIALIZING IMPOSSIBLE, Diagnostic Procedure for Subaru Select Monitor Communication.> | Is DTC displayed on Subaru Select Monitor? | Record all DTC.<br>Go to step **5**. | Go to step **6**. |
| 5 | **CHECK FREEZE FRAME DATA.**<br>Using the Subaru Select Monitor, check the Freeze Frame Data. | Are freeze frame data recorded? | Record the freeze frame data.<br>Go to step **7**. | Go to step **7**. |
| 6 | **PERFORM GENERAL DIAGNOSTICS.**<br>1) Inspect using “Diagnostic Procedure without Diagnostic Trouble Code (DTC)”. <Ref. to CVT(diag)-84, Diagnostic Procedure without Diagnostic Trouble Code (DTC).><br>2) Inspect using “Diagnostics with Phenomenon”. <Ref. to CVT(diag)-85, Diagnostics with Phenomenon.><br>3) Perform the Inspection Mode. <Ref. to CVT(diag)-20, Inspection Mode.><br>4) Read the DTC. | Is DTC displayed on Subaru Select Monitor? | Go to step **7**. | Finish the diagnosis. |

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 7 | **PERFORM DIAGNOSIS.**<br>1) Inspect by referring to “Diagnostic Procedure with Diagnostic Trouble Code (DTC)”. <Ref. to CVT(diag)-32, Diagnostic Procedure with Diagnostic Trouble Code (DTC).><br>NOTE:<br>For the DTC table, refer to “List of Diagnostic Trouble Code (DTC)”. <Ref. to CVT(diag)-29, List of Diagnostic Trouble Code (DTC).><br>2) Repair the trouble cause.<br>3) Perform the Clear Memory Mode.<br>4) Perform the Inspection Mode. <Ref. to CVT(diag)-20, Inspection Mode.><br>5) Read the DTC. | Is DTC displayed on Subaru Select Monitor? | Inspect by referring to “Diagnostic Procedure with Diagnostic Trouble Code (DTC)”. <Ref. to CVT(diag)-32, Diagnostic Procedure with Diagnostic Trouble Code (DTC).> | Finish the diagnosis. |

# 2. Check List for Interview

## A: CHECK

Check the following items when a problem has occurred.

NOTE:
Use copies of this page for interviewing customers.

| | | | |
|---|---|---|---|
| Customer's name | | | |
| Date of purchase | | | |
| Date of repair | | | |
| Transmission model | Transmission | V.I.N. | |
| Odometer reading | km (miles) | | |
| Frequency | ❑ Continuous ❑ Intermittent ( times/day) | | |
| Weather | ❑ Fine ❑ Cloudy ❑ Rainy ❑ Snowy<br>❑ Other<br>( ) | | |
| Place | ❑ Highland ❑ Suburbs ❑ Inner city ❑ Uphill ❑ Downhill ❑ Rough road<br>❑ Other<br>( ) | | |
| Ambient air temperature | ❑ Hot ❑ Warm ❑ Cool ❑ Cold | | |
| Vehicle speed | km/h (MPH) | | |
| AT OIL TEMP light | ❑ Blinks continuously | ❑ Does not blink | |
| Select lever position | ❑ P ❑ R ❑ N ❑ D ❑ Manual mode ❑ L | | |
| Driving condition | ❑ Not affected<br>❑ At racing<br>❑ While decelerating | ❑ At starting<br>❑ While accelerating<br>❑ While turning (❑ RH/❑ LH) | ❑ While idling<br>❑ When cruising<br>(Vehicle speed km/h)<br>❑ Immediately after starting the engine |
| Manual mode | ❑ ON ❑ OFF | | |
| Symptoms | ❑ Vehicle does not move (❑ Any position ❑ Particular position) | | |
| | ❑ Vehicle does not move (no load racing condition as in N range) | | |
| | ❑ Vehicle does not move (engine speed does not increase, felt as stall condition) | | |
| | ❑ Noise or vibration<br>(Describe concretely: ) | | |
| | ❑ Shock felt at N → D selection ( seconds after shifting, when engine cold or after warm-up) | | |
| | ❑ Shock felt at N → R selection ( seconds after shifting, when engine cold or after warm-up) | | |
| | ❑ Shifting is wrong<br>(Describe concretely: ) | | |
| | ❑ Shock or judder during driving | | |
| | ❑ Fails to accelerate. | | |
| | ❑ Engine speed increases abruptly during driving | | |
| | ❑ Shock or judder during standing start | | |
| | ❑ Select lever does not move | | |
| | ❑ Other<br>( ) | | |

# 3. General Description

## A: CAUTION

### 1. SUPPLEMENTAL RESTRAINT SYSTEM "AIRBAG"

The airbag system wiring harness is routed near the TCM.

**CAUTION:**
**• All the airbag system wiring harnesses and connectors are colored yellow. Do not use an electric test equipment to check these circuits.**
**• Be careful not to damage the airbag system wiring harness when performing diagnostics or servicing the TCM.**

### 2. MEASUREMENT

When measuring the voltage and resistance of the ECM, TCM or each sensor, use a tapered pin with a diameter of less than 0.64 mm (0.025 in) in order to avoid poor contact. Do not insert a pin of more than 0.65 mm (0.026 in) diameter.

## B: INSPECTION

### 1. BATTERY

Measure the battery voltage and specific gravity of the electrolyte.

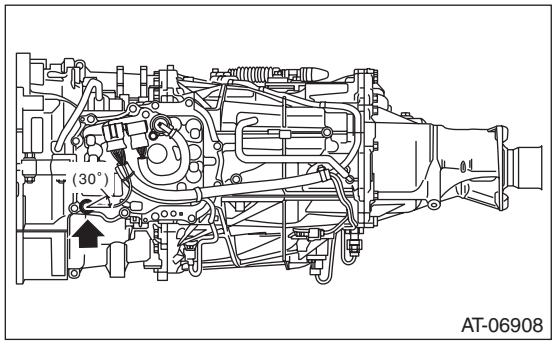
***Standard voltage: 12 V or more***

***Specific gravity: 1.260 or more***

### 2. TRANSMISSION GROUND

Make sure that the ground terminal bolt is tightened securely.

***Tightening torque:***
***14 N·m (1.4 kgf-m, 10.3 ft-lb)***



### 3. OPERATION OF SHIFT SELECT LEVER

Make sure there is no noise, dragging or contact pattern in each select lever range.

**WARNING:**
**Stop the engine while checking operation of the select lever.**

# C: PREPARATION TOOL

## 1. SPECIAL TOOL

| ILLUSTRATION | TOOL NUMBER | DESCRIPTION | REMARKS |
|---|---|---|---|
|  ST1B022XU0 | 1B022XU0 | SUBARU SELECT MONITOR III KIT | Used for troubleshooting the electrical system. |

## 2. GENERAL TOOL

| TOOL NAME | REMARKS |
|---|---|
| Circuit tester | Used for measuring resistance, voltage and current. |
| Oscilloscope | Used for measuring the sensor. |

| ATF temperature sensor voltage | ATF Temp sensor voltage. | V |

# 7. Read Diagnostic Trouble Code (DTC)

## A: OPERATION

- For details concerning the work procedure, refer to the “PC application help for Subaru Select Monitor”.
- For details concerning DTC, refer to List of Diagnostic Trouble Code (DTC). <Ref. to CVT(diag)-29, List of Diagnostic Trouble Code (DTC).>

# 8. Clear Memory Mode

## A: OPERATION

For details concerning the work procedure, refer to the “PC application help for Subaru Select Monitor”.

**CAUTION:**
**• If the AT learning value is cleared, learned control memory is cleared.**
**• If the AT learning value is cleared, perform learning. <Ref. to CVT(diag)-21, Learning Control.>**

# 9. Inspection Mode

## A: PROCEDURE

<Ref. to CVT-44, Road Test.>

# 10.Learning Control

## A: GENERAL DESCRIPTION

- Follow the messages displayed on the Subaru Select Monitor when working.
- When the following work is performed, perform learning work for the transmission.

Replacement of TCM/Replacement or disassembly of transmission assembly/Replacement of control valve body/Clearing AT leaning value is executed.

## B: PROCEDURE

### 1. PREPARATION FOR LEARNING

1) Warm up or cool down until the ATF temperature displayed on the Subaru Select Monitor is 40 — 65°C (104 — 149°F).
2) After stopping the vehicle, shift the select lever to “P” range.
3) Fully apply the parking brake.
4) Lift up the vehicle.

**CAUTION:**
**While working, be sure to keep the lower edge of the tires 30 cm or more above the ground as vehicle will vibrate.**
5) Connect the Subaru Select Monitor to data link connector.
6) Turn the ignition switch to ON.
7) Turn off all switches causing an electrical load, such as headlights, A/C, seat heater and rear defogger, etc.

### 2. SIMPLE LEARNING

NOTE:
Simple learning is performed with the vehicle lifted, without actually running the vehicle.

**CAUTION:**
**Do not turn the power of the Subaru Select Monitor OFF during work, and do not disconnect the data link connector.**
1) Select {Work Support} in the «Transmission Diagnosis» display screen of the Subaru Select Monitor.
2) Select {Compulsory learning mode} in the «Work Support» display screen of the Subaru Select Monitor.
3) Follow the messages displayed on the Subaru Select Monitor screen when working.

NOTE:
During AT learning in progress, AT OIL TEMP light in the combination meter starts flashing at 2 Hz and the learning operation starts. The following message is displayed on the screen when the AT OIL TEMP light which was flashing at 2 Hz turns off.

4) When «AT learning normally ended.» is displayed, simple AT learning is completed.

NOTE:
• If communication error occurs during learning, retry the “AT learning mode” from the beginning.
• If the message «Execute AT learning again after fixing troubles of the vehicle» appears during learning, select [OK] and display the DTC list. After repairing the locations indicated by the DTC, start the “AT learning mode” over from the beginning.
• When communication error occurs during learning, select lever does not shift occasionally. If select lever does not shift, turn the ignition switch to OFF before operating the select lever.
• If the message «AT learning ended abnormally.» is displayed, start the “AT learning mode” over from the beginning.

| Message | Main causes for abnormal termination |
|---|---|
| «AT learning ended abnormally.» | • Fault is detected during AT learning.<br>• The accelerator pedal is depressed during AT learning.<br>• An unspecified operation was performed during AT learning<br>• ATF temperature becomes out of specification during AT learning.<br>• Battery voltage is low.<br>• Malfunction indicator light illuminates.<br>• Parking brake not applied strongly enough.<br>• Brake pedal is not fully depressed.<br>• Abnormal idle speed increase, etc. |

• For detailed operation procedures, refer to “PC application help for Subaru Select Monitor”.

# 11.AT OIL TEMP Warning Light Display

## A: OPERATION

The AT OIL TEMP light illuminates or blinks, when the ATF temperature is high and malfunction occurs in CVT.

- When normal

AT OIL TEMP light always illuminates when the ignition switch is ON (engine OFF). Light goes off after two seconds from engine ON.

- When ATF temperature is high

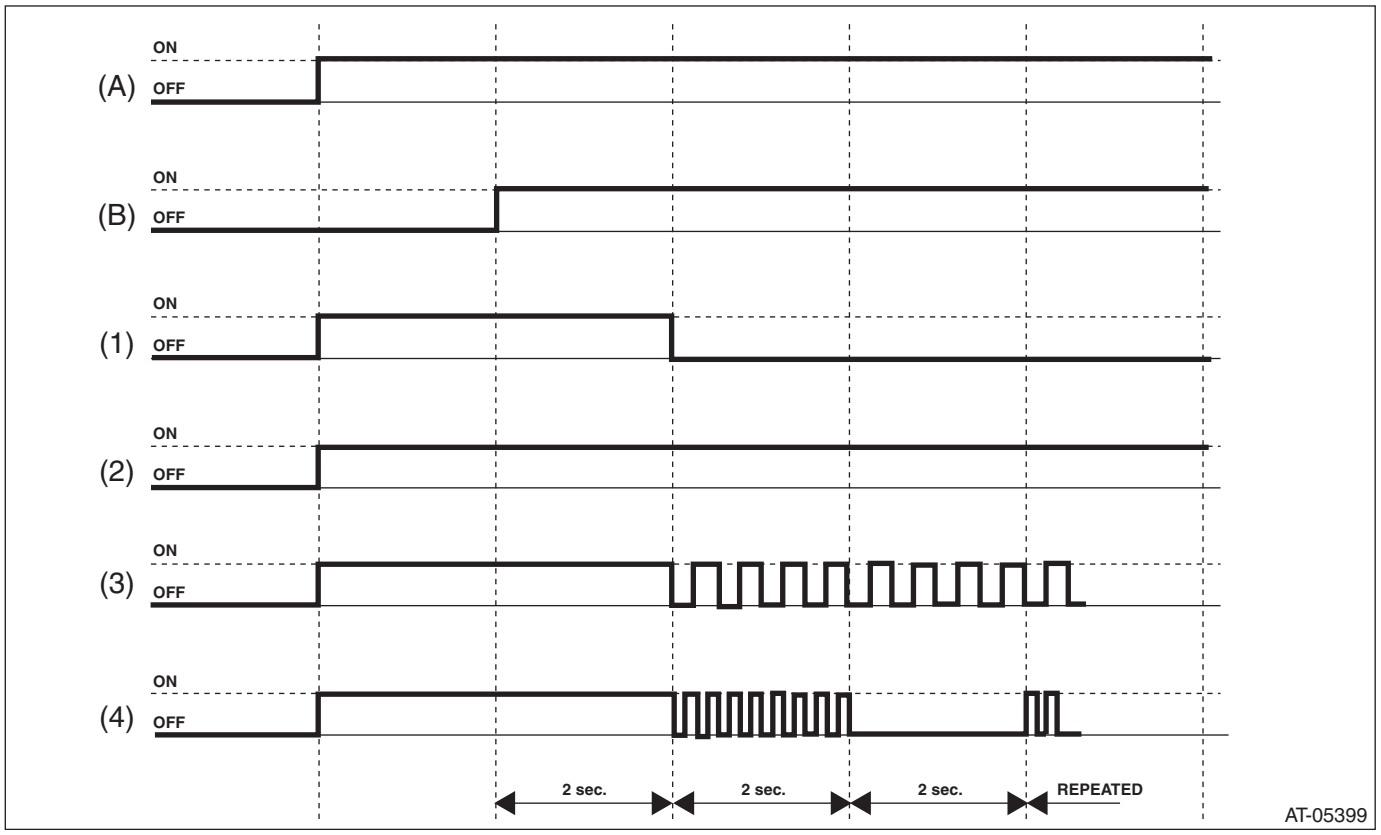
AT OIL TEMP light illuminates when the ATF temperature is abnormally high with engine ON.

- When malfunction is detected

AT OIL TEMP light blinks at 2 Hz when the TCM detects the malfunction of CVT with engine ON. In this case, inspect using “Diagnostic Procedure with Diagnostic Trouble Code (DTC)”. <Ref. to CVT(diag)-32, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>

- When AT learning is not finished

AT OIL TEMP light repeats “Blinking at 4 Hz → Turning OFF” every two seconds, when the AT learning is not finished with engine ON. In this case, perform the “Learning”. (During AT learning, the light blinks at 2 Hz or illuminates.) <Ref. to CVT(diag)-21, Learning Control.>



(A) Ignition switch condition
(B) Engine condition
(1) When normal
(2) When ATF temperature is high
(3) When malfunction is detected
(4) When AT learning is not finished

IF the AT OIL TEMP light does not illuminate, or illumination patterns are not as above, check the AT OIL TEMP light circuit. <Ref. to CVT(diag)-24, INSPECTION, AT OIL TEMP Warning Light Display.>

## B: INSPECTION

**DIAGNOSIS:**
- AT OIL TEMP light circuit is open or shorted.
- Combination meter malfunction
- TCM is in special control mode.
- AT learning is not finished.

**TROUBLE SYMPTOM:**
- When the ignition switch is turned to ON, the AT OIL TEMP light does not illuminate.
- AT OIL TEMP light remains lit after engine start.

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK AT OIL TEMP LIGHT.**<br>Turn the ignition switch to ON. | Does the AT OIL TEMP light illuminate? | Go to step **2**. | Perform the self-diagnosis of combination meter. <Ref. to IDI-7, SELF-DIAGNOSIS DISPLAY MODE, OPERATION, Combination Meter System.> |
| 2 | **CHECK AT OIL TEMP LIGHT.**<br>Start the engine. | Does AT OIL TEMP light go off after two seconds from engine start? | Current condition is normal. Go back to Basic Diagnostic Procedure. <Ref. to CVT(diag)-2, Basic Diagnostic Procedure.> | Go to step **3**. |
| 3 | **CHECK DTC.**<br>Read the DTC relating the TCM using the Subaru Select Monitor. | Is DTC displayed? | Perform the diagnosis according to DTC. | Go to step **4**. |
| 4 | **CHECK TCM.**<br>Read the data of «ATF Temperature Lamp» using the Subaru Select Monitor. | Is “ON” displayed? | Go to step **5**. | Perform the self-diagnosis of combination meter. <Ref. to IDI-7, SELF-DIAGNOSIS DISPLAY MODE, OPERATION, Combination Meter System.> |
| 5 | **CHECK TCM.**<br>Read the data of «ATF Temp.» using the Subaru Select Monitor. | Is the display 125°C or more? | Go to step **6**. | Check the TCM. |
| 6 | **CHECK ATF TEMPERATURE.**<br>Check the real fluid temperature from the transmission case surface temperature. | Does it clearly differ from the «ATF Temp.» displayed on Subaru Select Monitor? | Perform the diagnosis according to DTC P0712 procedure. If there is no problems, perform the diagnosis according to DTC P0713 procedure. | When ATF temperature can be judged as actually high, perform the diagnosis again after the ATF temperature lowers. |

# 12.AWD Warning Light Display

## A: OPERATION

AWD light illuminates or blinks, when the AWD is in special control condition and AWD has malfunction.

- When normal

AWD light always illuminates when the ignition switch is ON (engine OFF). Light goes off after two seconds from engine ON.

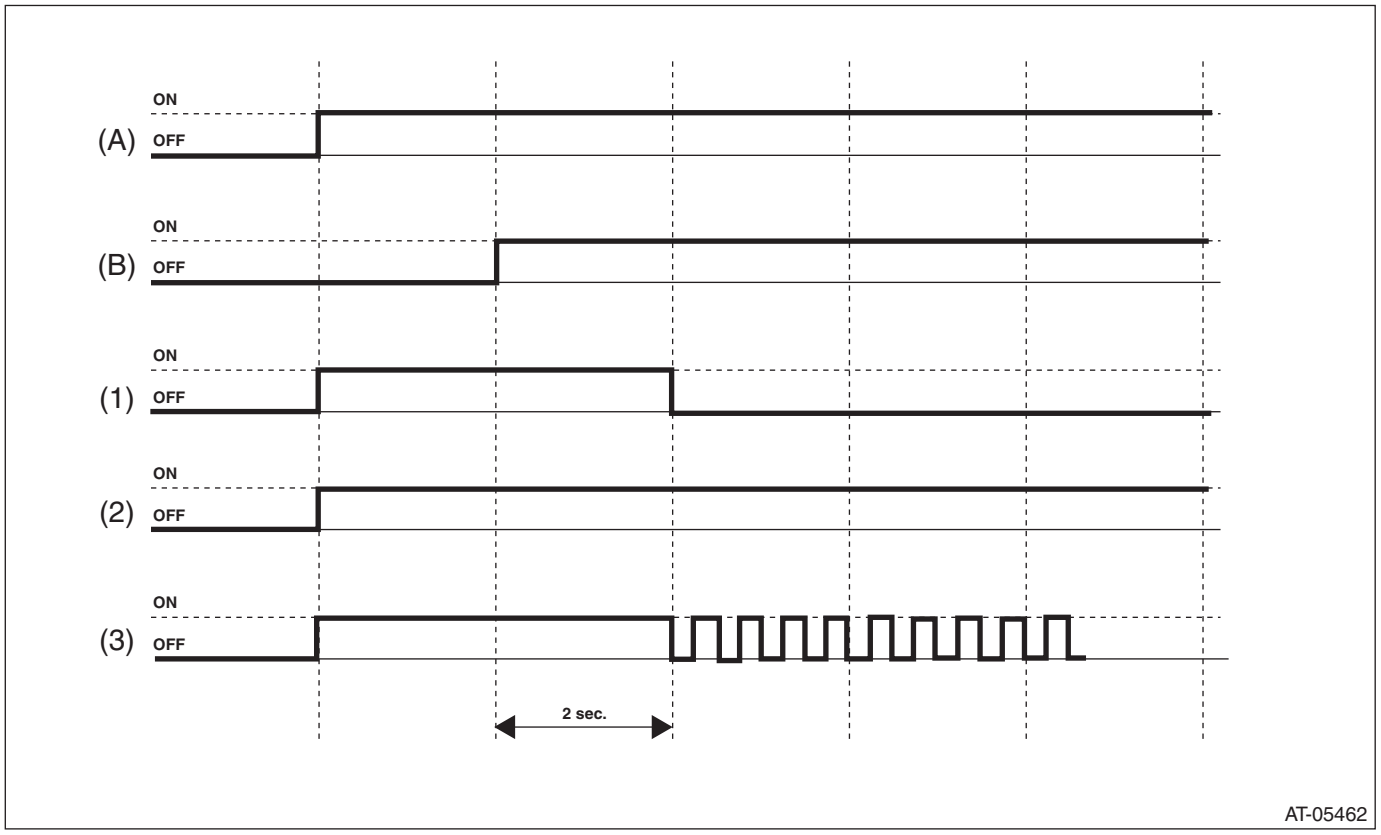
- When FF mode is selected

AWD light illuminates, when the AWD ON/OFF switching function is “FF mode” with engine ON.

- When malfunction is detected

AWD light blinks at 2 Hz when any of following malfunctions are detected with engine ON.

1. When tire with different diameter is installed, or air pressure of any of four wheels is excessively low
2. When “Rear differential inspection mode” is judged as NG <Ref. to DI-64, Rear Differential Inspection Mode.>



(A) Ignition switch condition (B) Engine condition

(1) When normal (2) When FF mode is selected (3) When malfunction is detected

If the AWD light does not illuminate, or illumination patterns are not as above, check the AWD light circuit. <Ref. to CVT(diag)-26, INSPECTION, AWD Warning Light Display.>

## B: INSPECTION

**DIAGNOSIS:**
- AWD light circuit is open or shorted.
- Combination meter malfunction
- TCM is in AWD special control mode.

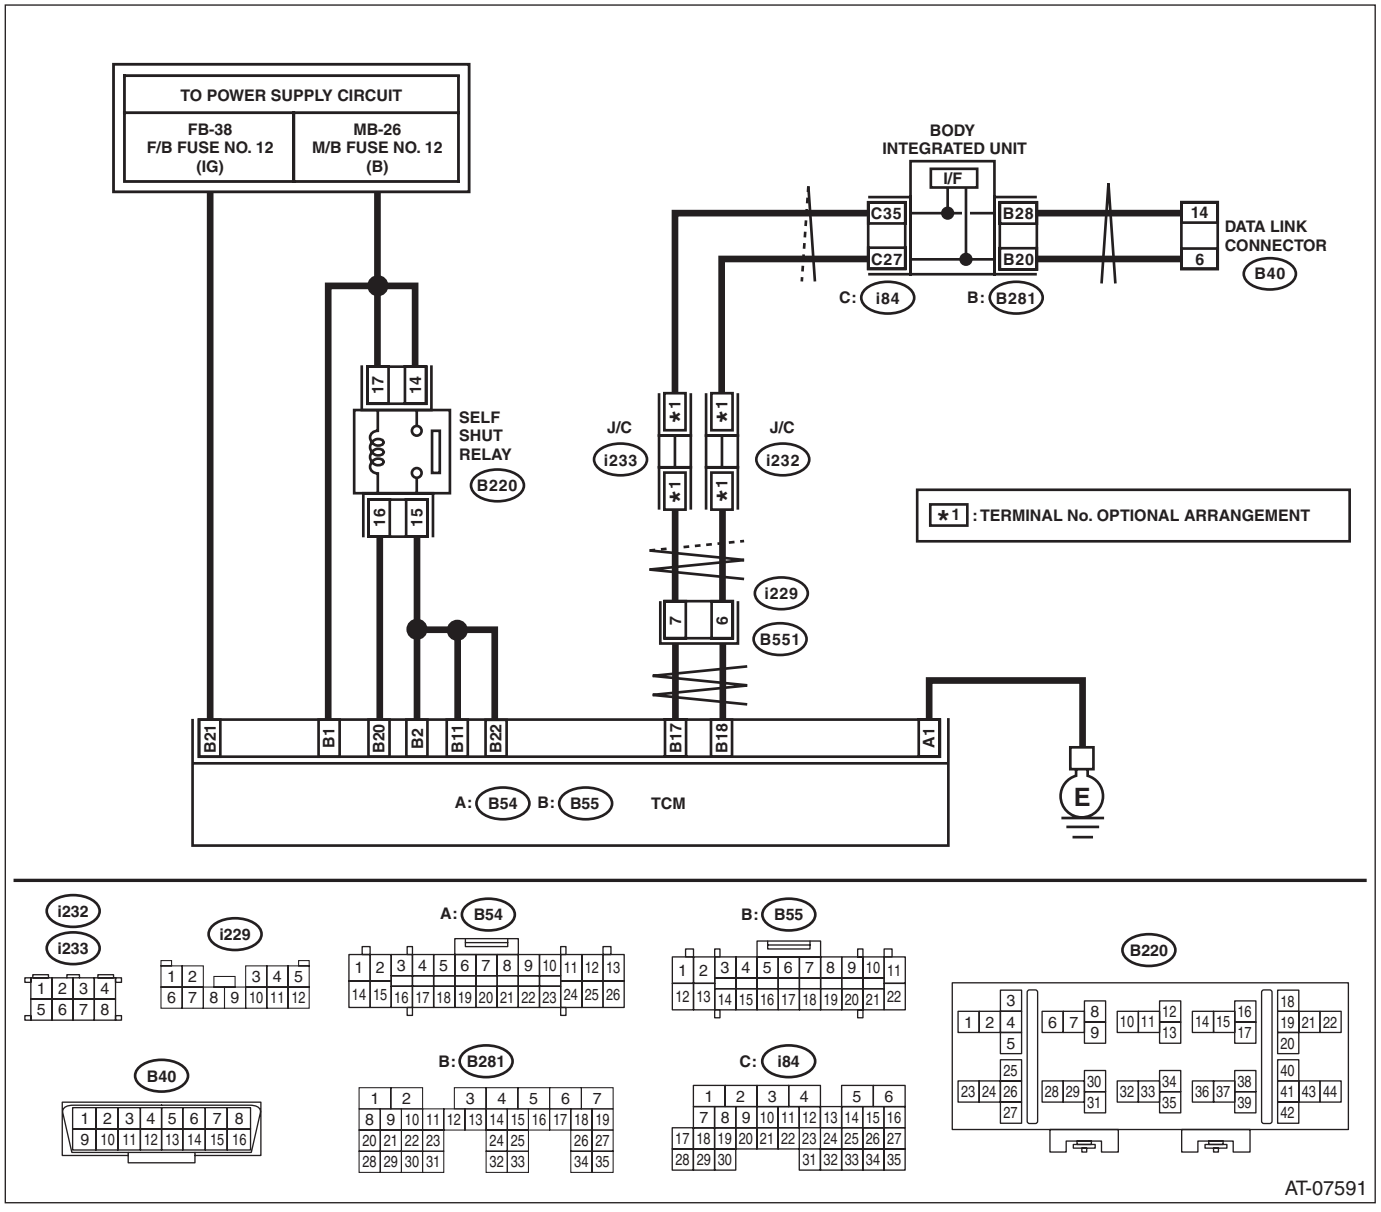
**TROUBLE SYMPTOM:**
- When the ignition switch is turned to ON, the AWD light does not illuminate.
- AWD light remains lit after engine start.
- AWD light is blinking immediately after engine start.

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK AWD LIGHT.**<br>Turn the ignition switch to ON. | Does the AWD light illuminate? | Go to step **2**. | Perform the self-diagnosis of combination meter. <Ref. to IDI-7, SELF-DIAGNOSIS DISPLAY MODE, OPERATION, Combination Meter System.> |
| 2 | **CHECK AWD LIGHT.**<br>Start the engine. | Does AWD light go off after two seconds from engine start? | Current condition is normal. Go back to Basic Diagnostic Procedure. <Ref. to CVT(diag)-2, Basic Diagnostic Procedure.> | Go to step **3**. |
| 3 | **CHECK DTC.**<br>Read the DTC relating the TCM using the Subaru Select Monitor. | Is DTC displayed? | Perform the diagnosis according to DTC. | Go to step **4**. |
| 4 | **CHECK AWD LIGHT.**<br>Check the display of AWD light after engine start. | Is AWD light illuminating? | Go to step **6**. | Go to step **5**. |
| 5 | **CHECK AWD LIGHT.**<br>Check the display of AWD light after engine start. | Is AWD light blinking at 2 Hz? | Go to step **7**. | Go to step **8**. |
| 6 | **CHECK AWD ON/OFF SWITCHING FUNCTION.**<br>Using the Subaru Select Monitor, select the {AWD ON/OFF switching mode} in {Maintenance mode} from «Work Support», and check the current mode. <Ref. to CVT-43, AWD ON/OFF Switching Mode.> | Is the message «At present, the vehicle is in AWD. Switch to FF?» displayed? | Go to step **8**. | If the message «At present, the vehicle is in FF. Switch to AWD?» is displayed, select “OK”, and switch to AWD mode. |
| 7 | **CHECK REAR DIFFERENTIAL.**<br>Using the Subaru Select Monitor, select {Rear differential inspection mode} in {Maintenance mode} from «Work Support», and check. <Ref. to DI-64, Rear Differential Inspection Mode.> | Does AWD light go off after inspection is finished normally? | Current condition is normal. Go back to Basic Diagnostic Procedure. <Ref. to CVT(diag)-2, Basic Diagnostic Procedure.> | Go to step **8**. |
| 8 | **CHECK COMBINATION METER.**<br>Perform the self-diagnosis of combination meter. <Ref. to IDI-7, SELF-DIAGNOSIS DISPLAY MODE, OPERATION, Combination Meter System.> | Is there any trouble with the combination meter? | Repair the combination meter. | Check the TCM. |

# 13.Diagnostic Procedure for Subaru Select Monitor Communication

## A: COMMUNICATION FOR INITIALIZING IMPOSSIBLE

**DIAGNOSIS:**
Defective harness connector
**TROUBLE SYMPTOM:**
Subaru Select Monitor communication failure
**WIRING DIAGRAM:**
CVT Control System <Ref. to WI-66, CVT Control System.>



| | Step | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK IGNITION SWITCH.** | Is the ignition switch ON? | Go to step **2**. | Turn the ignition switch to ON, and select the transmission mode using the Subaru Select Monitor. |
| 2 | **CHECK BATTERY.**<br>1) Turn the ignition switch to OFF.<br>2) Measure the battery voltage. | Is the voltage 11 V or more? | Go to step **3**. | Charge or replace the battery. |
| 3 | **CHECK BATTERY TERMINAL.** | Is there poor contact at battery terminal? | Repair or tighten the battery terminal. | Go to step **4**. |
| 4 | **CHECK INSTALLATION OF TCM CONNECTOR.**<br>Turn the ignition switch to OFF. | Is the TCM connector inserted into the TCM until the clamp locks? | Go to step **5**. | Insert the TCM connector to TCM. |
| 5 | **CHECK LAN SYSTEM.**<br>Perform the diagnosis for LAN system. <Ref. to LAN(diag)-2, Basic Diagnostic Procedure.> | Is there any fault in LAN system? | Perform the diagnosis according to DTC for LAN system. <Ref. to LAN(diag)-50, List of Diagnostic Trouble Code (DTC).> | Go to step **6**. |
| 6 | **CHECK SUBARU SELECT MONITOR COMMUNICATION.**<br>1) Turn the ignition switch to ON.<br>2) Check whether communication to transmission system can be executed normally. | Is the system name displayed on Subaru Select Monitor? | Check DTC of TCM. <Ref. to CVT(diag)-18, Read Diagnostic Trouble Code (DTC).> | Go to step **7**. |
| 7 | **CHECK POWER SUPPLY CIRCUIT.**<br>1) Turn the ignition switch to ON. (engine OFF)<br>2) Measure the ignition power supply voltage between TCM connector and chassis ground.<br>***Connector & terminal***<br>***(B55) No. 1 (+) — Chassis ground (–):***<br>***(B55) No. 2 (+) — Chassis ground (–):***<br>***(B55) No. 11 (+) — Chassis ground (–):***<br>***(B55) No. 21 (+) — Chassis ground (–):***<br>***(B55) No. 22 (+) — Chassis ground (–):*** | Is the voltage 10 — 13 V? | Go to step **8**. | Repair the open circuit of harness between TCM and battery. |
| 8 | **CHECK HARNESS CONNECTOR BETWEEN TCM AND CHASSIS GROUND.**<br>1) Turn the ignition switch to OFF.<br>2) Disconnect the connector from TCM.<br>3) Measure the resistance of harness between TCM connector and chassis ground.<br>***Connector & terminal***<br>***(B54) No. 1 — Chassis ground:*** | Is the resistance less than 10 Ω? | Go to step **9**. | Repair the open circuit of the TCM ground circuit and poor contact of connector. |
| 9 | **CHECK POOR CONTACT OF CONNECTOR.** | Is there poor contact of control module power supply, ground circuit and data link connector? | Repair the connector. | Check the TCM. |

# 14.List of Diagnostic Trouble Code (DTC)

## A: LIST

| DTC | Item | Content of diagnosis | Reference |
|---|---|---|---|
| P0705 | Transmission Range Sensor Circuit (PRNDL Input) | Inhibitor switch malfunction or short circuit | <Ref. to CVT(diag)-32, DTC P0705 TRANSMISSION RANGE SENSOR CIRCUIT (PRNDL INPUT), Diagnostic Procedure with Diagnostic Trouble Code (DTC).> |
| P0708 | AT Range Switch Not Inputted | Inhibitor switch malfunction or open circuit | <Ref. to CVT(diag)-34, DTC P0708 AT RANGE SWITCH NOT INPUTTED, Diagnostic Procedure with Diagnostic Trouble Code (DTC).> |
| P0712 | Transmission Fluid Temperature Sensor Circuit Low Input | ATF temperature sensor is faulty or input signal circuit is shorted. | <Ref. to CVT(diag)-36, DTC P0712 TRANSMISSION FLUID TEMPERATURE SENSOR CIRCUIT LOW INPUT, Diagnostic Procedure with Diagnostic Trouble Code (DTC).> |
| P0713 | Transmission Fluid Temperature Sensor Circuit High Input | ATF temperature sensor is faulty or input signal circuit is open or shorted. | <Ref. to CVT(diag)-37, DTC P0713 TRANSMISSION FLUID TEMPERATURE SENSOR CIRCUIT HIGH INPUT, Diagnostic Procedure with Diagnostic Trouble Code (DTC).> |
| P0716 | Torque Converter Turbine Speed | Turbine speed sensor is faulty or input signal circuit is open or shorted. | <Ref. to CVT(diag)-39, DTC P0716 TORQUE CONVERTER TURBINE SPEED, Diagnostic Procedure with Diagnostic Trouble Code (DTC).> |
| P0719 | Brake Switch Circuit Low | Brake switch is faulty or input signal circuit is open or shorted. | <Ref. to CVT(diag)-41, DTC P0719 BRAKE SWITCH CIRCUIT LOW, Diagnostic Procedure with Diagnostic Trouble Code (DTC).> |
| P0724 | Brake Switch Circuit High | Brake switch is faulty or input signal circuit is shorted. | <Ref. to CVT(diag)-43, DTC P0724 BRAKE SWITCH CIRCUIT HIGH, Diagnostic Procedure with Diagnostic Trouble Code (DTC).> |
| P0730 | Gearshift Control Performance Abnormal | Primary speed sensor, secondary speed sensor, control valve, or chain is faulty. | <Ref. to CVT(diag)-44, DTC P0730 GEARSHIFT CONTROL PERFORMANCE ABNORMAL, Diagnostic Procedure with Diagnostic Trouble Code (DTC).> |
| P0801 | Reverse Inhibit Control Circuit | Shift lock solenoid is faulty or output signal circuit is open or shorted. | <Ref. to CVT(diag)-45, DTC P0801 REVERSE INHIBIT CONTROL CIRCUIT, Diagnostic Procedure with Diagnostic Trouble Code (DTC).> |
| P0841 | Secondary Oil Pressure Sensor Performance | Secondary pressure sensor or control valve is faulty | <Ref. to CVT(diag)-46, DTC P0841 SECONDARY OIL PRESSURE SENSOR PERFORMANCE, Diagnostic Procedure with Diagnostic Trouble Code (DTC).> |
| P0842 | Secondary Oil Pressure Sensor Circuit (Low) | Secondary pressure sensor is faulty or input signal circuit is open or shorted. | <Ref. to CVT(diag)-48, DTC P0842 SECONDARY OIL PRESSURE SENSOR CIRCUIT (LOW), Diagnostic Procedure with Diagnostic Trouble Code (DTC).> |
| P0843 | Secondary Oil Pressure Sensor Circuit (High) | Secondary pressure sensor is faulty or input signal circuit is shorted. | <Ref. to CVT(diag)-50, DTC P0843 SECONDARY OIL PRESSURE SENSOR CIRCUIT (HIGH), Diagnostic Procedure with Diagnostic Trouble Code (DTC).> |
| P0890 | AT Self-Shut Relay Diagnosis (Low) | Self-shut relay is faulty or input signal circuit is open or shorted. | <Ref. to CVT(diag)-52, DTC P0890 AT SELF-SHUT RELAY DIAGNOSIS (LOW), Diagnostic Procedure with Diagnostic Trouble Code (DTC).> |
| P0951 | Manual Switch | Manual mode switch is faulty or input signal circuit is open or shorted. | <Ref. to CVT(diag)-54, DTC P0951 MANUAL SWITCH, Diagnostic Procedure with Diagnostic Trouble Code (DTC).> |

| DTC | Item | Content of diagnosis | Reference |
|---|---|---|---|
| P0962 | Secondary Solenoid Circuit (Low) | Secondary solenoid is faulty or output signal circuit is shorted. | <Ref. to CVT(diag)-56, DTC P0962 SECONDARY SOLENOID CIRCUIT (LOW), Diagnostic Procedure with Diagnostic Trouble Code (DTC).> |
| P0963 | Secondary Solenoid Circuit (High) | Secondary solenoid is faulty or output signal circuit is open or shorted. | <Ref. to CVT(diag)-58, DTC P0963 SECONDARY SOLENOID CIRCUIT (HIGH), Diagnostic Procedure with Diagnostic Trouble Code (DTC).> |
| P0965 | Forward & Reverse Solenoid Function | F&R solenoid, forward clutch or control valve is faulty. | <Ref. to CVT(diag)-60, DTC P0965 FORWARD & REVERSE SOLENOID FUNCTION, Diagnostic Procedure with Diagnostic Trouble Code (DTC).> |
| P0966 | Forward & Reverse Solenoid Circuit (Low) | F&R solenoid is faulty or output signal circuit is shorted. | <Ref. to CVT(diag)-61, DTC P0966 FORWARD & REVERSE SOLENOID CIRCUIT (LOW), Diagnostic Procedure with Diagnostic Trouble Code (DTC).> |
| P0967 | Forward & Reverse Linear Solenoid Circuit (High) | F&R solenoid is faulty or output signal circuit is open or shorted. | <Ref. to CVT(diag)-63, DTC P0967 FORWARD & REVERSE LINEAR SOLENOID CIRCUIT (HIGH), Diagnostic Procedure with Diagnostic Trouble Code (DTC).> |
| P0970 | Transfer Solenoid Circuit (Low) | AWD solenoid is faulty or output signal circuit is shorted. | <Ref. to CVT(diag)-65, DTC P0970 TRANSFER SOLENOID CIRCUIT (LOW), Diagnostic Procedure with Diagnostic Trouble Code (DTC).> |
| P0971 | Transfer Solenoid Circuit (High) | AWD solenoid is faulty or output signal circuit is open or shorted. | <Ref. to CVT(diag)-66, DTC P0971 TRANSFER SOLENOID CIRCUIT (HIGH), Diagnostic Procedure with Diagnostic Trouble Code (DTC).> |

# 15.Diagnostic Procedure with Diagnostic Trouble Code (DTC)

## A: DTC P0705 TRANSMISSION RANGE SENSOR CIRCUIT (PRNDL INPUT)

**DTC DETECTING CONDITION:**

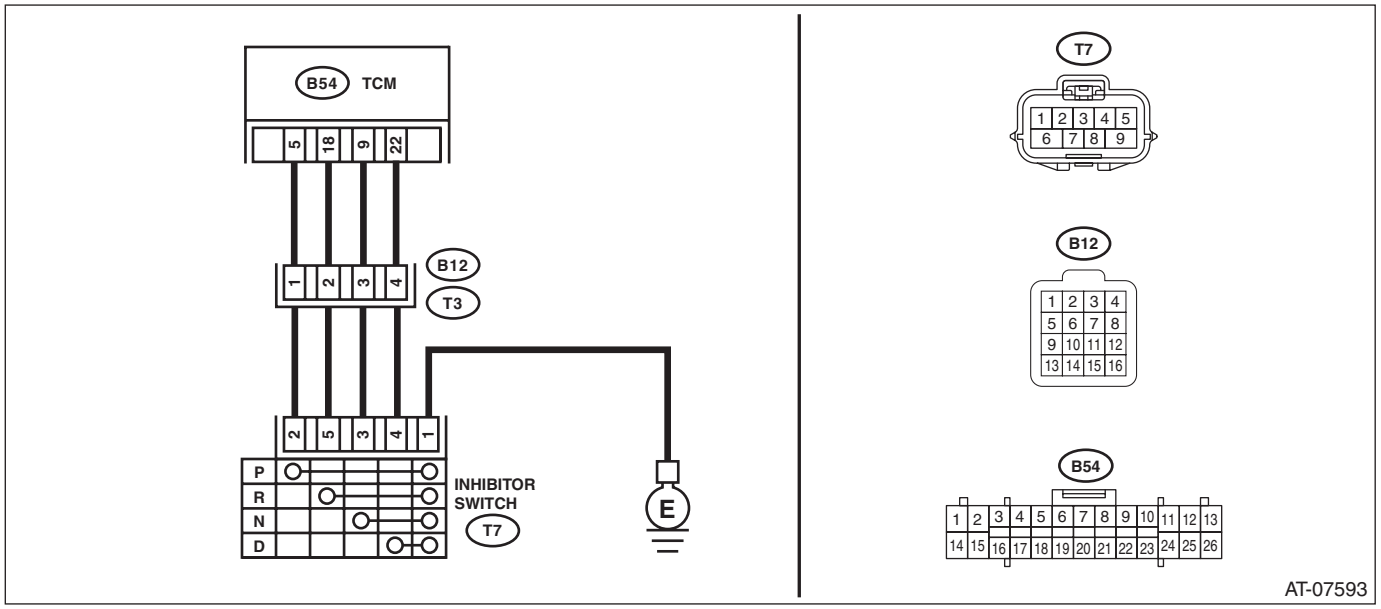
- Inhibitor switch is faulty.
- At least 2 range signal is input.

**TROUBLE SYMPTOM:**

- Shift characteristics are erroneous.
- The range position of the select lever and the position of shift indicator display do not match.

**WIRING DIAGRAM:**

CVT Control System <Ref. to WI-66, CVT Control System.>



| | Step | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK INPUT SIGNAL FOR TCM.**<br>1) Turn the ignition switch to ON.<br>2) Move the select lever to each range, and read the data of «P range», «R Range Signal», «N range» and «D Range Signal» using the Subaru Select Monitor. | Is display “OFF” for the range other than corresponding range? | Go to step **5**. | Go to step **2**. |
| 2 | **CHECK HARNESS.**<br>1) Turn the ignition switch to OFF.<br>2) Disconnect the TCM and transmission connectors.<br>3) Measure the resistance between TCM connector and chassis ground.<br>***Connector & terminal***<br>***(B54) No. 5 — Chassis ground:***<br>***(B54) No. 18 — Chassis ground:***<br>***(B54) No. 9 — Chassis ground:***<br>***(B54) No. 22 — Chassis ground:*** | Is each resistance 1 MΩ or more? | Go to step **3**. | Repair the short circuit of body harness. |
| 3 | **CHECK HARNESS.**<br>1) Disconnect the inhibitor switch connector.<br>2) Measure the resistance between transmission connector and chassis ground.<br>***Connector & terminal***<br>***(T3) No. 1 — Chassis ground:***<br>***(T3) No. 2 — Chassis ground:***<br>***(T3) No. 3 — Chassis ground:***<br>***(T3) No. 4 — Chassis ground:*** | Is each resistance 1 MΩ or more? | Go to step **4**. | Repair the short circuit of transmission harness. |

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 4 | **CHECK INHIBITOR SWITCH.**<br>Move the select lever to each range, and measure the resistance between inhibitor switch connector terminals.<br>***Connector & terminal***<br>***(T7) No. 2 — (T7) No. 1:***<br>***(T7) No. 5 — (T7) No. 1:***<br>***(T7) No. 3 — (T7) No. 1:***<br>***(T7) No. 4 — (T7) No. 1:*** | Is the resistance other than corresponding range 1 MΩ or more? | Go to step **5**. | Replace the inhibitor switch. <Ref. to CVT-90, Inhibitor Switch.> |
| 5 | **CHECK FOR POOR CONTACT.** | Is there poor contact between TCM, inhibitor switch, transmission ground? | Repair the poor contact. | Check the TCM. |

## B: DTC P0708 AT RANGE SWITCH NOT INPUTTED

**DTC DETECTING CONDITION:**

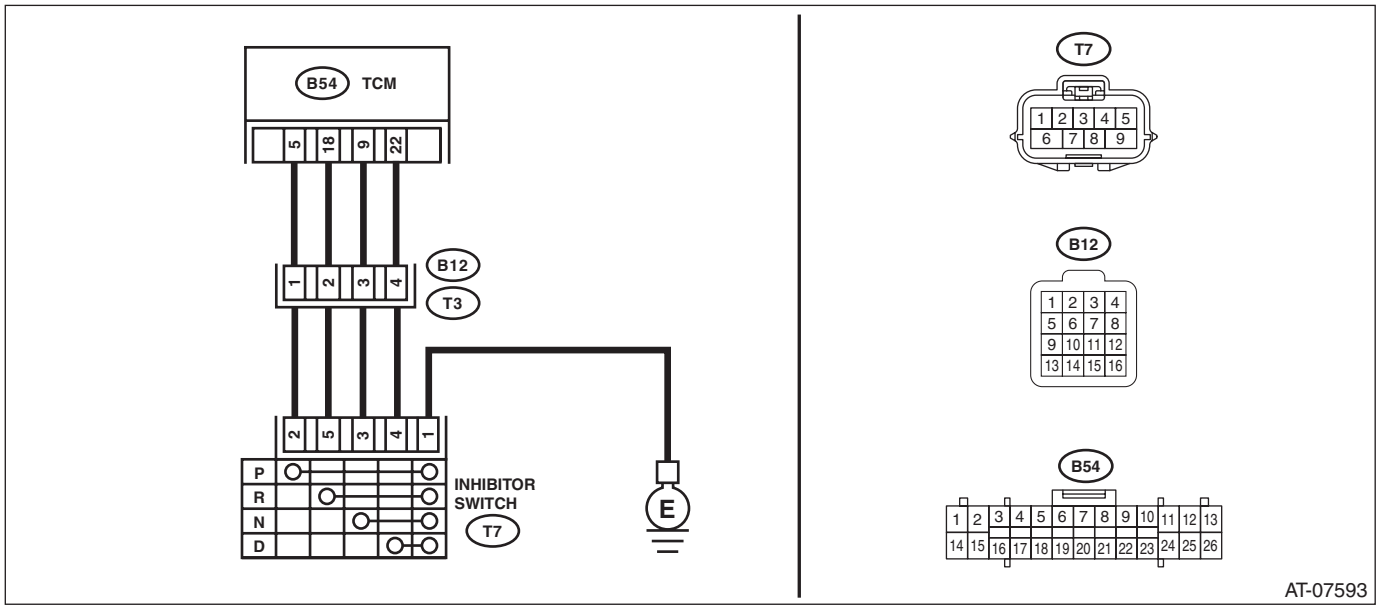
- Inhibitor switch is faulty.
- No range signal is input.

**TROUBLE SYMPTOM:**

- Shift characteristics are erroneous.
- The range position of the select lever and the position of shift indicator display do not match.

**WIRING DIAGRAM:**

CVT Control System <Ref. to WI-66, CVT Control System.>



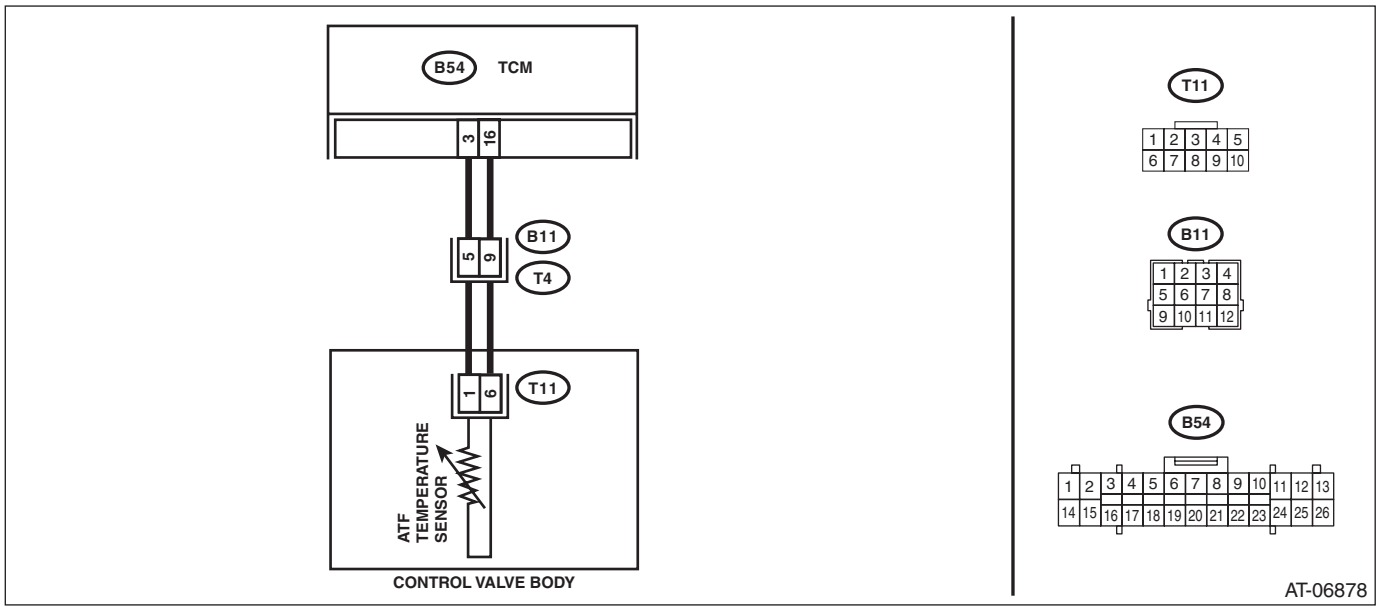
| | Step | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK INPUT SIGNAL FOR TCM.**<br>1) Turn the ignition switch to ON.<br>2) Move the select lever to each range, and read the data of «P range», «R Range Signal», «N range» and «D Range Signal» using the Subaru Select Monitor. | Is the display of the corresponding range “ON”? | Go to step **7**. | Go to step **2**. |
| 2 | **CHECK HARNESS.**<br>1) Turn the ignition switch to OFF.<br>2) Disconnect the TCM and transmission connectors.<br>3) Measure the resistance of harness between TCM connector and transmission connector.<br>***Connector & terminal***<br>***(B54) No. 5 — (B12) No. 1:***<br>***(B54) No. 18 — (B12) No. 2:***<br>***(B54) No. 9 — (B12) No. 3:***<br>***(B54) No. 22 — (B12) No. 4:*** | Is each resistance less than 1 Ω? | Go to step **3**. | Repair the open circuit of body harness. |
| 3 | **CHECK HARNESS.**<br>Measure the resistance of harness between inhibitor switch connector and transmission ground.<br>***Connector & terminal***<br>***(T7) No. 1 — Transmission ground:*** | Is the resistance less than 1 Ω? | Go to step **4**. | Repair the open circuit of harness. |

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 4 | **CHECK HARNESS.**<br>1) Disconnect the inhibitor switch connector.<br>2) Measure the resistance between transmission connector and inhibitor switch connector.<br>***Connector & terminal***<br>***(T3) No. 1 — (T7) No. 2:***<br>***(T3) No. 2 — (T7) No. 5:***<br>***(T3) No. 3 — (T7) No. 3:***<br>***(T3) No. 4 — (T7) No. 4:*** | Is each resistance less than 1 Ω? | Go to step **5**. | Repair the open circuit of transmission harness. |
| 5 | **CHECK INHIBITOR SWITCH.**<br>Move the select lever to each range, and measure the resistance between inhibitor switch connector terminals.<br>***Connector & terminal***<br>***(T7) No. 2 — (T7) No. 1:***<br>***(T7) No. 5 — (T7) No. 1:***<br>***(T7) No. 3 — (T7) No. 1:***<br>***(T7) No. 4 — (T7) No. 1:*** | Is the resistance of the corresponding range less than 1 MΩ? | Go to step **6**. | Replace the inhibitor switch. <Ref. to CVT-90, Inhibitor Switch.> |
| 6 | **CHECK HARNESS.**<br>1) Turn the ignition switch to ON.<br>2) Measure the voltage between each connector and chassis ground.<br>***Connector & terminal***<br>***Transmission connector (B12 side)***<br>***(B12) No. 1 (+) — Chassis ground (–):***<br>***(B12) No. 2 (+) — Chassis ground (–):***<br>***(B12) No. 3 (+) — Chassis ground (–):***<br>***(B12) No. 4 (+) — Chassis ground (–):***<br>***Transmission connector (T7 side)***<br>***(T7) No. 2 (+) — Chassis ground (–):***<br>***(T7) No. 5 (+) — Chassis ground (–):***<br>***(T7) No. 3 (+) — Chassis ground (–):***<br>***(T7) No. 4 (+) — Chassis ground (–):*** | Is each voltage less than 1 V? | Go to step **7**. | Repair the harness which outputs 1 V or more. |
| 7 | **CHECK FOR POOR CONTACT.** | Is there poor contact between TCM, inhibitor switch, transmission ground? | Repair the poor contact. | Check the TCM. |

## C: DTC P0712 TRANSMISSION FLUID TEMPERATURE SENSOR CIRCUIT LOW INPUT

**DTC DETECTING CONDITION:**
Input signal circuit of ATF temperature sensor is shorted.
**TROUBLE SYMPTOM:**
- Excessive shift shock
- Shift characteristics malfunction

**WIRING DIAGRAM:**
CVT Control System <Ref. to WI-66, CVT Control System.>



| | Step | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK HARNESS.**<br>1) Turn the ignition switch to OFF.<br>2) Disconnect the TCM and transmission connectors.<br>3) Measure the resistance of harness between TCM connector and chassis ground.<br>***Connector & terminal***<br>***(B54) No. 3 — Chassis ground:***<br>***(B54) No. 16 — Chassis ground:*** | Is the resistance 1 MΩ or more? | Go to step **2**. | Repair the short circuit of harness. |
| 2 | **CHECK HARNESS.**<br>Measure the resistance between transmission connector and transmission body.<br>***Connector & terminal***<br>***(T4) No. 5 — Transmission body:***<br>***(T4) No. 9 — Transmission body:*** | Is the resistance 1 MΩ or more? | Go to step **3**. | Repair the short circuit of harness. |
| 3 | **CHECK HARNESS INSIDE TRANSMISSION.**<br>**CAUTION:**<br>**Start work after ATF cools down.**<br>1) Remove the transmission valve cover.<br>2) Check for the harness pinch, damage. | Is the harness normal? | Go to step **4**. | Replace the transmission harness. |
| 4 | **CHECK ATF TEMPERATURE SENSOR.**<br>Measure the resistance between transmission connector terminals.<br>***Connector & terminal***<br>***(T11) No. 1 — No. 6:*** | Is resistance as follows?<br>Fluid temperature 0°C → Approx. 6.0 kΩ<br>Fluid temperature 20°C → Approx. 2.5 kΩ<br>Fluid temperature 80°C → Approx. 330 Ω | Check the TCM. | Replace the transmission harness. |

# D: DTC P0713 TRANSMISSION FLUID TEMPERATURE SENSOR CIRCUIT HIGH INPUT

**DTC DETECTING CONDITION:**

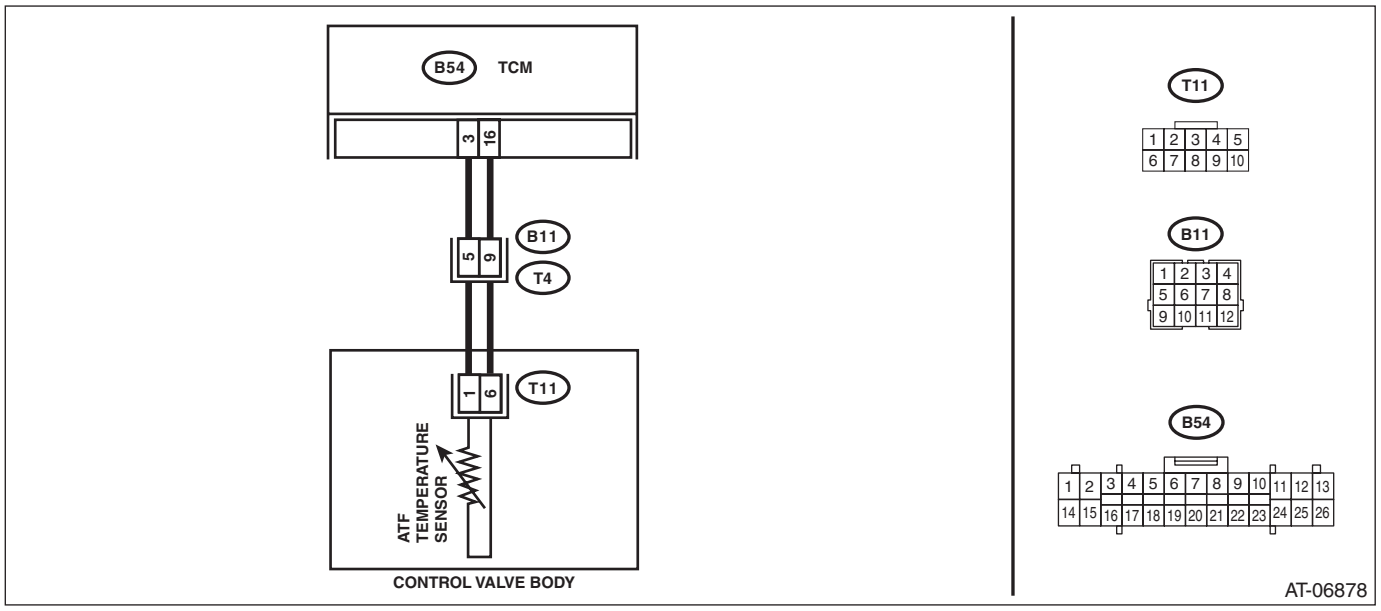
Input signal circuit of ATF temperature sensor is open or shorted.

**TROUBLE SYMPTOM:**

- Excessive shift shock
- Shift characteristics malfunction

**WIRING DIAGRAM:**

CVT Control System <Ref. to WI-66, CVT Control System.>



| Step | | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK HARNESS.**<br>1) Turn the ignition switch to ON.<br>2) Measure the voltage between TCM connectors.<br>***Connector & terminal***<br>***(B54) No. 3 (+) — (B54) No. 16 (–):*** | Is the voltage 5 V or more? | Repair the short circuit of harness. | Go to step **2**. |
| 2 | **CHECK HARNESS.**<br>1) Turn the ignition switch to OFF.<br>2) Disconnect the TCM and transmission connectors.<br>3) Measure the resistance between TCM connector and transmission connectors.<br>***Connector & terminal***<br>***(B54) No. 3 — (B11) No. 5:***<br>***(B54) No. 16 — (B11) No. 9:*** | Is the resistance less than 1 Ω? | Go to step **3**. | Repair the open circuit of body harness. |
| 3 | **CHECK ATF TEMPERATURE SENSOR.**<br>1) Turn the ignition switch to OFF.<br>2) Disconnect the transmission connector.<br>3) Measure the resistance between transmission connector terminals.<br>***Connector & terminal***<br>***(T4) No. 5 — No. 9:*** | Is the resistance 1 MΩ or more? | Repair the open circuit of transmission harness. | Go to step **4**. |

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 4 | **CHECK ATF TEMPERATURE SENSOR.**<br>1) Turn the ignition switch to OFF.<br>2) Connect the connectors to TCM and transmission.<br>3) Start the engine.<br>4) Warm up until the ATF temperature exceeds 50°C (122°F).<br>5) Turn the ignition switch to OFF.<br>6) Disconnect the transmission connector.<br>7) Measure the resistance between transmission connector terminals.<br>***Connector & terminal***<br>***(T4) No. 5 — No. 9:*** | Is the resistance 650 — 990 Ω? | Go to step **5**. | Go to step **7**. |
| 5 | **CHECK ATF TEMPERATURE SENSOR.**<br>Measure the resistance between transmission connector terminals.<br>***Connector & terminal***<br>***(T4) No. 5 — No. 9:*** | Does the resistance value increase gradually while the ATF temperature decreases? | Go to step **6**. | Replace the transmission harness. |
| 6 | **CHECK INPUT SIGNAL FOR TCM.**<br>1) Connect the connector to transmission.<br>2) Turn the ignition switch to ON. (Do not start engine.)<br>3) Read the data of «ATF Temp.» using the Subaru Select Monitor. | Does the ATF temperature gradually decrease? | Check for poor contact of the ATF temperature sensor and transmission connector harness, and repair the defective part. | Go to step **7**. |
| 7 | **CHECK FOR POOR CONTACT.** | Is there poor contact of ATF temperature sensor circuit? | Repair the poor contact. | Check the TCM. |

# E: DTC P0716 TORQUE CONVERTER TURBINE SPEED

**DTC DETECTING CONDITION:**

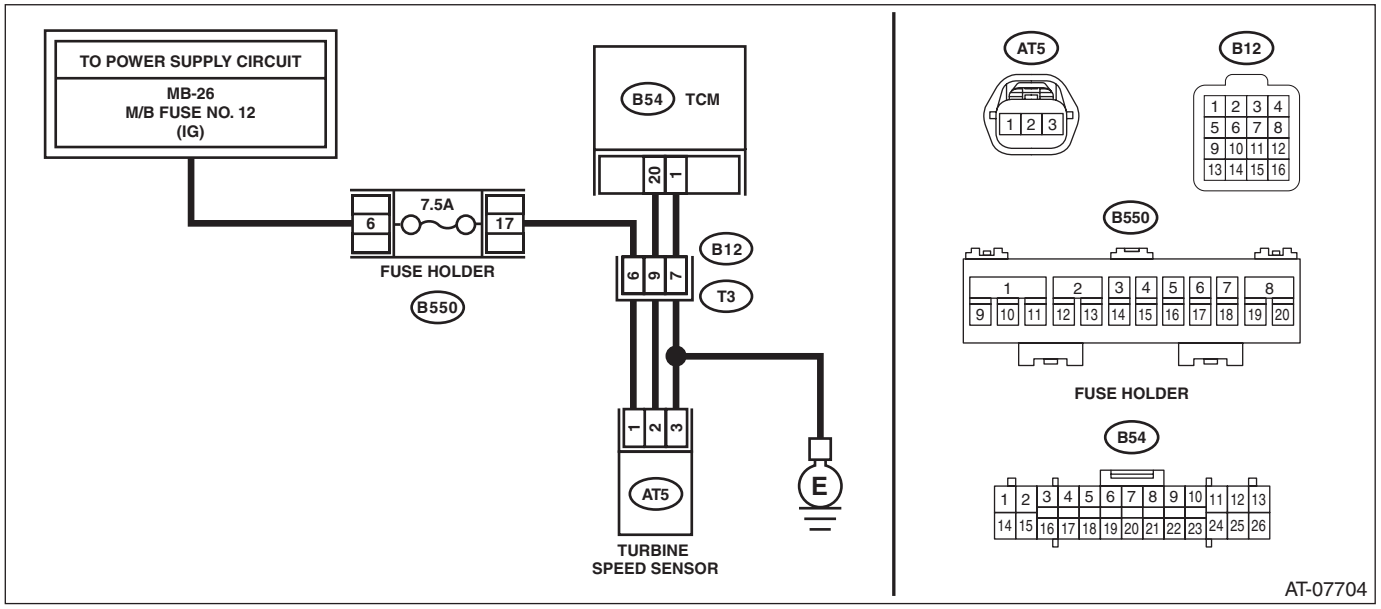
- Input signal circuit of TCM is open or shorted.
- Turbine speed sensor is faulty.

**TROUBLE SYMPTOM:**

- Standing start problems
- Shock occurs when engaging the lockup clutch.
- Shock occurs when selecting shift position.

**WIRING DIAGRAM:**

CVT Control System <Ref. to WI-66, CVT Control System.>

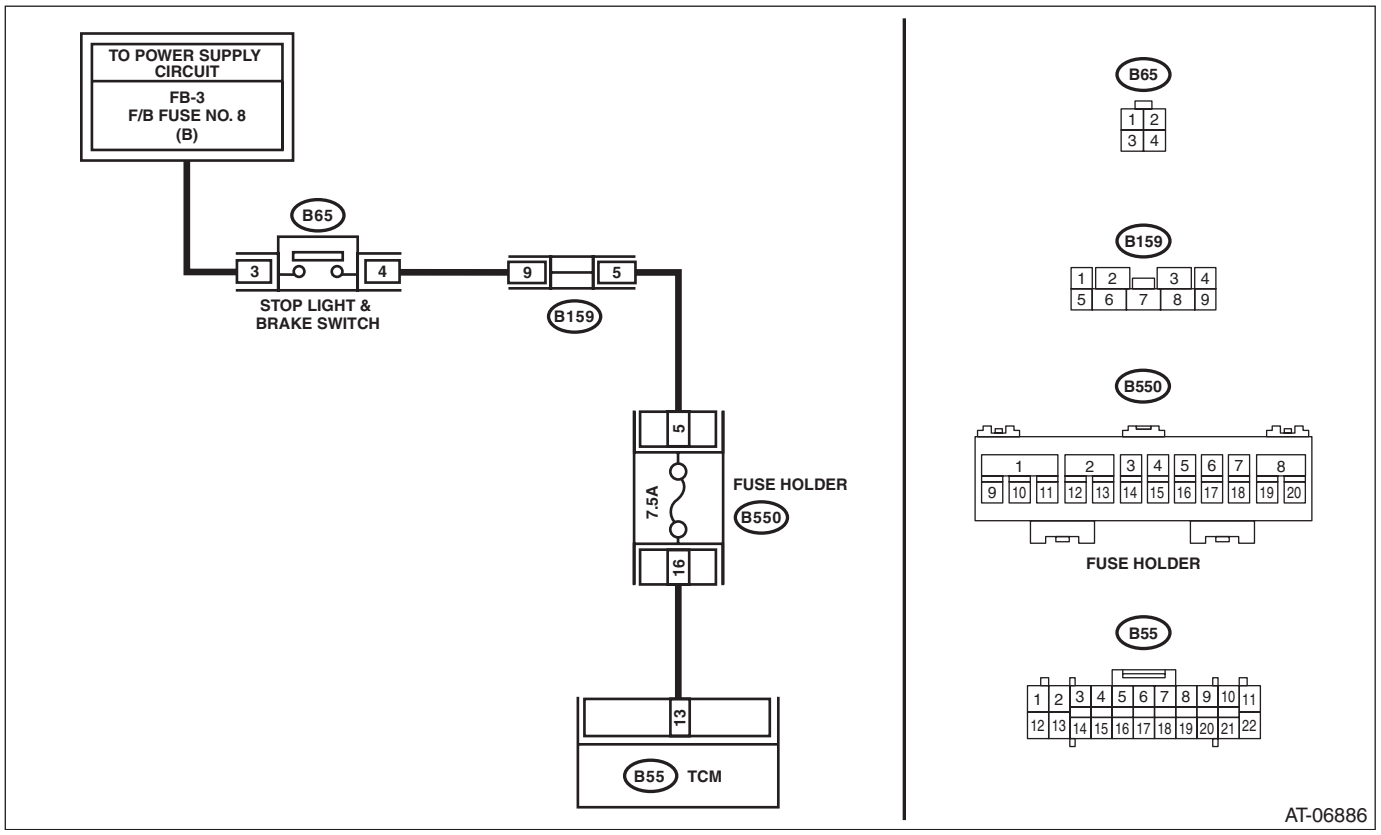


| | Step | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK FUSE.**<br>1) Turn the ignition switch to OFF.<br>2) Remove the fuse (7.5 A) from the fuse holder. | Is the fuse OK? | Go to step **2**. | Replace the fuse. If the fuse blows out easily, repair the short circuit of harness. |
| 2 | **CHECK HARNESS.**<br>1) Turn the ignition switch to OFF.<br>2) Disconnect the TCM and transmission connectors.<br>3) Measure the resistance between TCM connector and transmission connectors.<br>***Connector & terminal***<br>***(B54) No. 1 — (B12) No. 7:***<br>***(B54) No. 20 — (B12) No. 9:***<br>***(B550) No. 17 — (B12) No. 6:*** | Is the resistance less than 1 Ω? | Go to step **3**. | Repair the open circuit of harness. |
| 3 | **CHECK HARNESS.**<br>Measure the resistance between TCM connector and chassis ground.<br>***Connector & terminal***<br>***(B54) No. 20 — Chassis ground:*** | Is the resistance 1 MΩ or more? | Go to step **4**. | Repair the short circuit of harness. |
| 4 | **CHECK TRANSMISSION HARNESS.**<br>1) Connect the TCM connector.<br>2) Turn the ignition switch to ON.<br>3) Measure the voltage between transmission connector terminals.<br>***Connector & terminal***<br>***(B12) No. 6 (+) — (B12) No. 7 (–):*** | Is the voltage 10 — 13 V? | Go to step **5**. | Repair the open circuit of harness or poor contact of connector. |

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 5 | **CHECK INPUT SIGNAL FOR TCM.**<br>1) Turn the ignition switch to OFF.<br>2) Connect the transmission connector.<br>3) Start the engine.<br>4) Read the data of «Turbine Revolution Speed» using the Subaru Select Monitor. | Does the value of «Turbine Revolution Speed» change according to the engine speed? | Current condition is normal. Repair the poor contacts of harnesses of turbine speed sensor and transmission connector. | Go to step **6**. |
| 6 | **CHECK TRANSMISSION HARNESS.**<br>1) Turn the ignition switch to OFF.<br>2) Disconnect the transmission connector.<br>3) Lift up the vehicle.<br>4) Disconnect the turbine speed sensor connector.<br>5) Measure the resistance between transmission connector and turbine speed sensor connector.<br>***Connector & terminal***<br>***(T3) No. 6 — (AT5) No. 1:***<br>***(T3) No. 7 — (AT5) No. 3:***<br>***(T3) No. 9 — (AT5) No. 2:*** | Is the resistance less than 1 Ω? | Replace the turbine speed sensor. <Ref. to CVT-97, Turbine Speed Sensor.> | Replace the transmission harness. |

## F: DTC P0719 BRAKE SWITCH CIRCUIT LOW

**DTC DETECTING CONDITION:**
Brake switch malfunction or input signal circuit of brake switch is open or shorted.
**TROUBLE SYMPTOM:**
Gear is not shifted down when climbing a hill or driving down a hill.
**WIRING DIAGRAM:**
Stop light system <Ref. to WI-145, Stop Light System.>

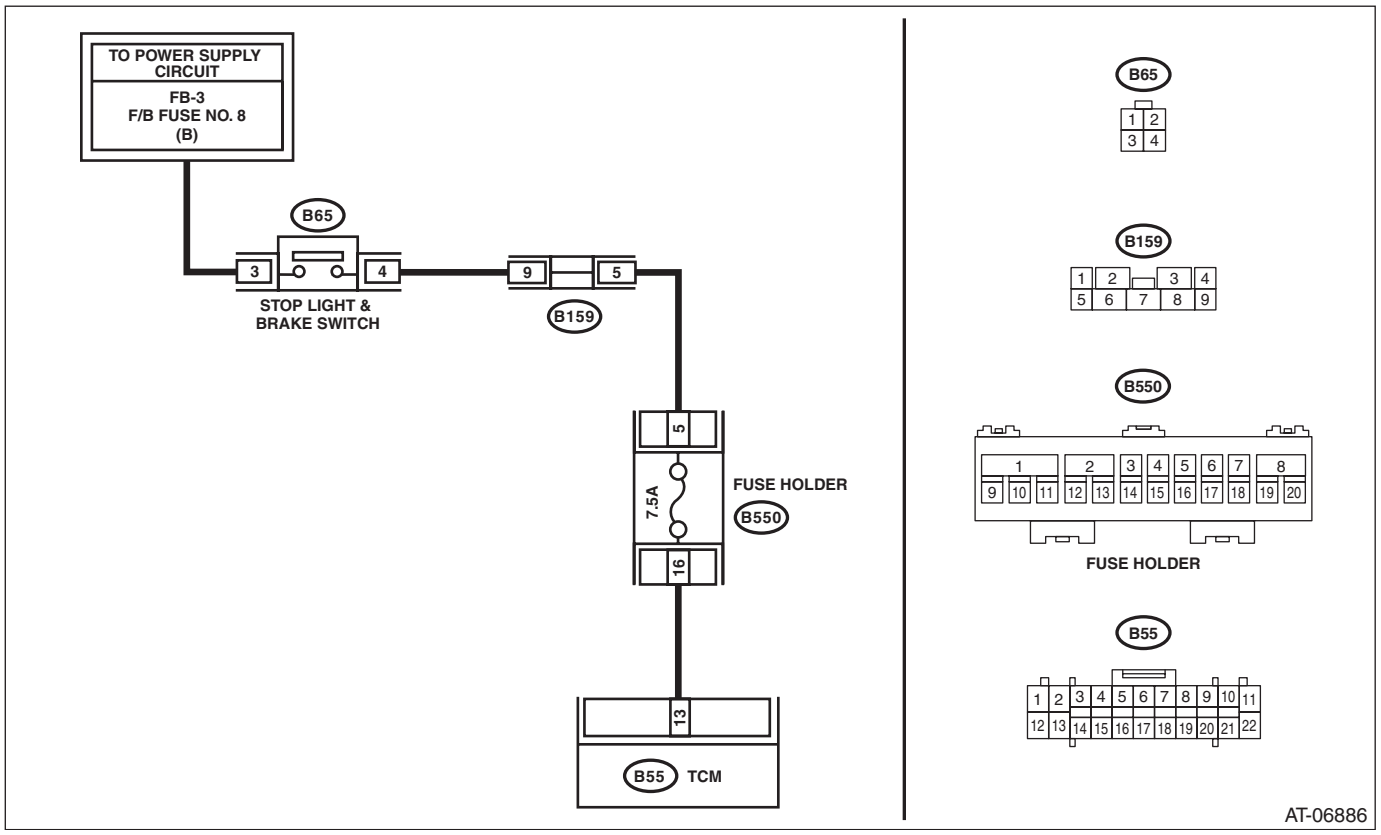


| | Step | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK FUSE (NO. 8).**<br>1) Turn the ignition switch to OFF.<br>2) Remove the fuse (No. 8). | Is the fuse (No. 8) blown out? | Replace the fuse (No. 8). If the new fuse (No. 8) has blown out easily, repair the short circuit of harness between fuse (No. 8) and stop light switch. | Go to step **2**. |
| 2 | **CHECK FUSE.**<br>Remove the fuse (7.5 A) from the fuse holder. | Is the fuse (7.5 A) blown out? | Replace the fuse (7.5 A). If the replaced fuse (7.5 A) blows out easily, repair the short circuit of harness between fuse (7.5 A) and TCM. | Go to step **3**. |

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 3 | **CHECK HARNESS.**<br>1) Turn the ignition switch to OFF.<br>2) Disconnect the TCM and stop light switch connector.<br>3) Measure the resistance between TCM connector and stop light switch connector.<br>***Connector & terminal***<br>***(B55) No. 13 — (B65) No. 4:*** | Is the resistance less than 1 Ω? | Go to step **4**. | Repair the open circuit of harness. |
| 4 | **CHECK HARNESS.**<br>Measure the resistance between TCM connector and fuse (No. 8).<br>***Connector & terminal***<br>***(B65) No. 3 — fuse (No. 8):*** | Is the resistance less than 1 Ω? | Go to step **5**. | Repair the open circuit of harness. |
| 5 | **CHECK INPUT SIGNAL FOR TCM.**<br>1) Install the fuse (No. 8).<br>2) Connect the TCM and stop light switch connector.<br>3) Depress the brake pedal.<br>4) Measure the voltage between TCM connector and chassis ground.<br>***Connector & terminal***<br>***(B55) No. 13 (+) — Chassis ground (–):*** | Is the voltage 10 V or more? | Go to step **6**. | Replace the stop light switch. <Ref. to BR-71, Stop Light Switch.> |
| 6 | **CHECK INPUT SIGNAL FOR TCM.**<br>With brake pedal depressed, read the data of «Stop Light Switch» using Subaru Select Monitor. | Is “ON” displayed? | Current condition is normal. Check for poor contact in connectors or harnesses, and repair the defective part. | Go to step **7**. |
| 7 | **CHECK FOR POOR CONTACT.** | Is there poor contact of input signal of stop light switch? | Repair the poor contact. | Check the TCM. |

## G: DTC P0724 BRAKE SWITCH CIRCUIT HIGH

**DTC DETECTING CONDITION:**
Brake switch malfunction or input signal circuit of brake switch is shorted.
**TROUBLE SYMPTOM:**
Gear is not shifted down when climbing a hill or driving down a hill.
**WIRING DIAGRAM:**
Stop light system <Ref. to WI-145, Stop Light System.>



| Step | | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK STOP LIGHT SWITCH.**<br>1) Turn the ignition switch to OFF.<br>2) Disconnect the stop light switch connector.<br>3) Measure the resistance of harness between stop light switch connectors.<br>***Connector & terminal***<br>***(B65) No. 3 — No. 4:*** | Is the resistance 1 MΩ or more? | Go to step **2**. | Replace the stop light switch. <Ref. to BR-71, Stop Light Switch.> |
| 2 | **CHECK HARNESS.**<br>1) Disconnect the TCM connector.<br>2) Turn the ignition switch to ON.<br>3) Measure the voltage between TCM connector and chassis ground.<br>***Connector & terminal***<br>***(B55) No. 13 (+) — Chassis ground (–):*** | Is the voltage 10 V or more? | Repair the short circuit of harness. | Go to step **3**. |
| 3 | **CHECK INPUT SIGNAL FOR TCM.**<br>1) Connect the TCM and stop light switch connector.<br>2) Turn the ignition switch to ON.<br>3) Read the data of «Stop Light Switch» using Subaru Select Monitor. | Is "OFF" displayed? | Current condition is normal. Check for poor contact in connectors or harnesses, and repair the defective part. | Go to step **4**. |
| 4 | **CHECK FOR POOR CONTACT.** | Is there poor contact of input signal of stop light switch? | Repair the poor contact. | Check the TCM. |

## H: DTC P0730 GEARSHIFT CONTROL PERFORMANCE ABNORMAL

**DTC DETECTING CONDITION:**

- Control valve hydraulic circuit malfunction
- Primary UP solenoid, primary Down solenoid characteristics malfunction
- CVT chain slippage

**TROUBLE SYMPTOM:**

- Acceleration is poor during standing start.
- Shift control malfunction
- Engine speed increases abruptly.

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK TRANSMISSION FLUID.**<br>Check the condition of ATF. <Ref. to CVT-38, CONDITION CHECK, CVTF.> | Is the ATF OK? | Go to step **2**. | Check according to the "corrective action" of ATF (CVTF) "CONDITION CHECK". <Ref. to CVT-38, CONDITION CHECK, CVTF.> |
| 2 | **CHECK TRANSMISSION FLUID.**<br>Check the amount of ATF. <Ref. to CVT-34, ADJUSTMENT, CVTF.> | Is the ATF amount correct? | Go to step **3**. | Adjust the amount of ATF. <Ref. to CVT-34, ADJUSTMENT, CVTF.> |
| 3 | **CHECK INPUT SIGNAL FOR TCM.**<br>1) Lift up the vehicle.<br>2) Start the engine.<br>3) Warm up until the ATF temperature reaches to 40 — 70°C (104 — 158°F).<br>4) Shift the select lever to "P" range.<br>5) Stabilize the engine speed at idle.<br>6) Read the data of «Actual secondary pressure» using Subaru Select Monitor. | Is the «Actual secondary pressure» 0.5 — 1.5 MPa? | Go to step **4**. | Perform the diagnosis according to DTC P0841 procedure. |
| 4 | **CHECK INPUT SIGNAL FOR TCM.**<br>1) Set the select lever to "D" range.<br>2) Release the brake pedal to stabilize the engine speed and front wheel speed.<br>3) Read the data of «Actual Gear Ratio» using Subaru Select Monitor. | Is the «Actual Gear Ratio» 1.5 — 2.6? | Go to step **5**. | Go to step **6**. |
| 5 | **CHECK INPUT SIGNAL FOR TCM.**<br>1) Set the select lever to "D" range.<br>2) Slowly increase the speed to 40 km/h (24 MPH) and keep the constant speed.<br>3) Read the data of «Actual Gear Ratio» using Subaru Select Monitor. | Is the «Actual Gear Ratio» 0.5 — 0.9? | Go to step **6**. | Replace the transmission assembly. <Ref. to CVT-56, Automatic Transmission Assembly.> |
| 6 | **DRIVING CHECK BY INSPECTION MODE.**<br>1) Turn the ignition switch to OFF.<br>2) Perform a drive check based on the "Inspection Mode". <Ref. to CVT(diag)-20, Inspection Mode.> | Does the AT OIL TEMP light blink and is DTC P0730 displayed? | Replace the transmission assembly. <Ref. to CVT-56, Automatic Transmission Assembly.> | If there is shift problems, abrupt increase of engine speed, standing start problems, replace the transmission assembly. <Ref. to CVT-56, Automatic Transmission Assembly.> If it is normal, temporary poor contact occurs. |

## I: DTC P0801 REVERSE INHIBIT CONTROL CIRCUIT

NOTE:
For diagnostic procedures, refer to “BODY CONTROL SYSTEM (DIAGNOSTICS)”. <Ref. to BC(diag)-32, DTC B1106 SHIFT LOCK CIRCUIT FAILURE, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>

## J: DTC P0841 SECONDARY OIL PRESSURE SENSOR PERFORMANCE

**DTC DETECTING CONDITION:**

- Control valve hydraulic circuit malfunction
- Secondary pressure sensor fault or characteristics malfunction

**TROUBLE SYMPTOM:**

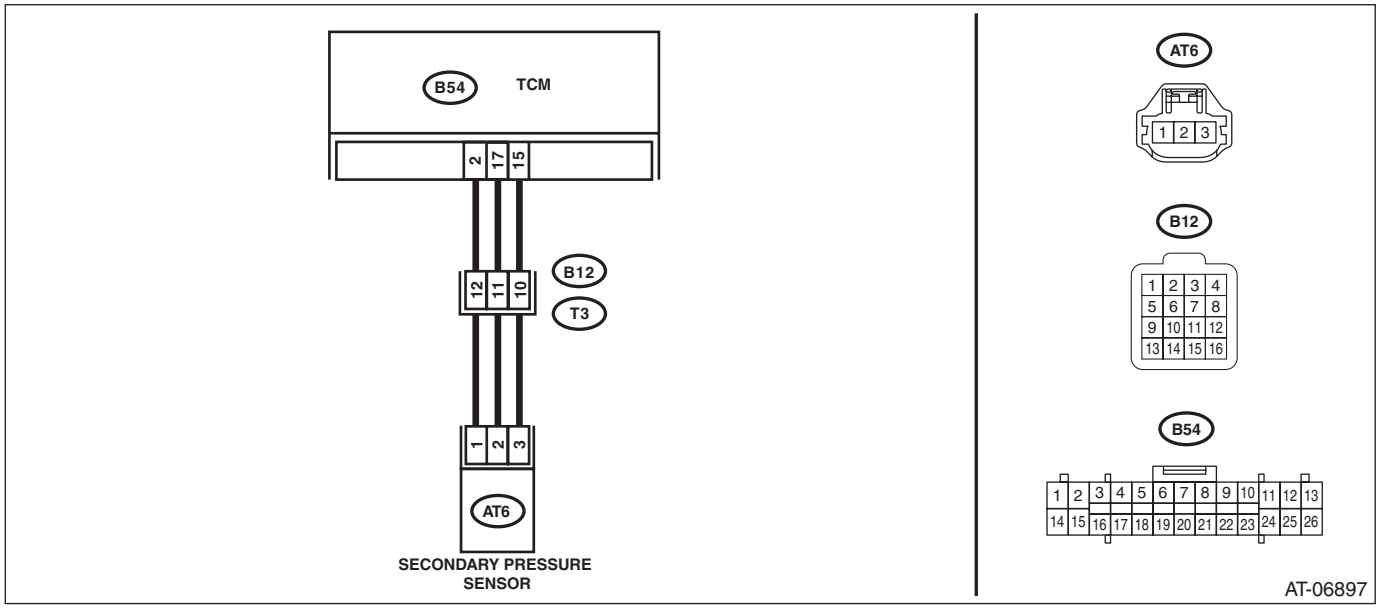
- Acceleration is poor during standing start.
- Shift control malfunction
- Engine speed increases abruptly.

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK TRANSMISSION FLUID.**<br>Check the condition of ATF. <Ref. to CVT-38, CONDITION CHECK, CVTF.> | Is the ATF OK? | Go to step **2**. | Check according to the "corrective action" of ATF (CVTF) "CONDITION CHECK". <Ref. to CVT-38, CONDITION CHECK, CVTF.> |
| 2 | **CHECK TRANSMISSION FLUID.**<br>Check the amount of ATF. <Ref. to CVT-34, ADJUSTMENT, CVTF.> | Is the ATF amount correct? | Go to step **3**. | Adjust the amount of ATF. <Ref. to CVT-34, ADJUSTMENT, CVTF.> |
| 3 | **CHECK INPUT SIGNAL FOR TCM.**<br>1) Lift up the vehicle.<br>2) Start the engine.<br>3) Warm up until the ATF temperature reaches to 40 — 70°C (104 — 158°F).<br>4) Shift the select lever to "P" range.<br>5) Stabilize the engine speed at idle.<br>6) Read the data of «Actual secondary pressure» using Subaru Select Monitor. | Is the «Actual secondary pressure» 0.5 — 1.5 MPa? | Go to step **4**. | Go to step **6**. |
| 4 | **CHECK INPUT SIGNAL FOR TCM.**<br>1) Keep the engine speed at 3000 rpm.<br>2) Read the data of «Actual secondary pressure» using Subaru Select Monitor. | Is the «Actual secondary pressure» higher than the value in Step 3? Does the value change according to the engine speed, within the range of 1.5 — 2.5 MPa? | Go to step **5**. | Go to step **6**. |
| 5 | **CHECK TCM INPUT SIGNAL (STALL TEST).**<br>1) Apply the parking brake.<br>2) Set the select lever to "D" range.<br>3) Depress the brake pedal firmly.<br>4) Slowly open the accelerator fully, and stabilize the engine speed.<br>5) Read the data of «Actual secondary pressure» using Subaru Select Monitor. | Is the «Actual secondary pressure» higher than the value in Step 4? Does the value change according to the engine speed, within the range of 4.5 — 6.0 MPa? | Go to step **7**. | Go to step **6**. |
| 6 | **CHECK SECONDARY PRESSURE SENSOR.** | Is the secondary pressure sensor damaged from the standpoint of appearance? | Replace the secondary pressure sensor. <Ref. to CVT-104, Secondary Pressure Sensor.> | Perform the diagnosis according to DTC P0842, P0843 procedure. |

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 7 | **DRIVING CHECK BY INSPECTION MODE.**<br>1) Turn the ignition switch to OFF.<br>2) Perform a drive check based on the “Inspection Mode”. <Ref. to CVT(diag)-20, Inspection Mode.> | Does the AT OIL TEMP light blink and is DTC P0841 displayed? | Perform the secondary pressure test. <Ref. to CVT-47, Secondary Pressure (Line Pressure) Test.> | If there is shift problems, abrupt increase of engine speed, standing start problems, replace the transmission assembly. <Ref. to CVT-56, Automatic Transmission Assembly.> If it is normal, temporary poor contact occurs. |

## K: DTC P0842 SECONDARY OIL PRESSURE SENSOR CIRCUIT (LOW)

**DTC DETECTING CONDITION:**
Input signal circuit of secondary pressure sensor is open or shorted.
**TROUBLE SYMPTOM:**
Shift characteristics malfunction
**WIRING DIAGRAM:**
CVT Control System <Ref. to WI-66, CVT Control System.>

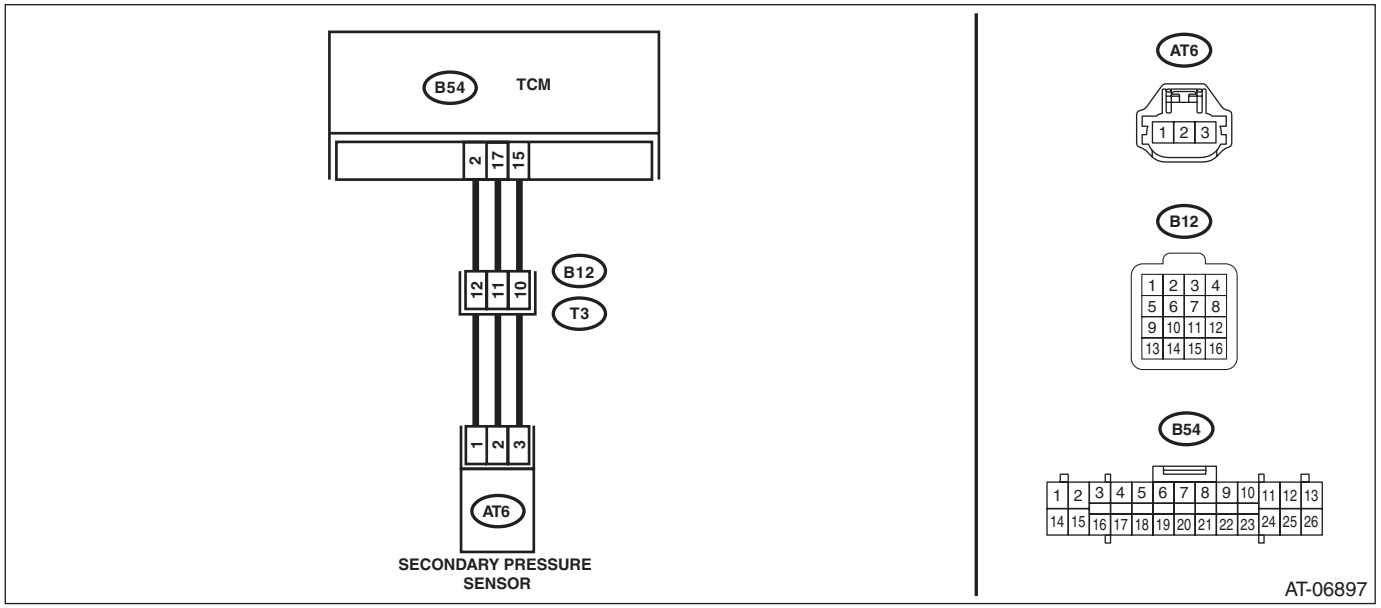


| Step | | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK INPUT SIGNAL FOR TCM.**<br>1) Start the engine.<br>2) Warm up until the ATF temperature reaches to 40 — 70°C (104 — 158°F).<br>3) Shift the select lever to “P” range.<br>4) Stabilize the engine speed at idle.<br>5) Read the data of «Actual secondary pressure» using Subaru Select Monitor. | Is the «Actual secondary pressure» 0.5 — 1.5 MPa? | Check for poor contact of connector. | Go to step **2**. |
| 2 | **CHECK HARNESS.**<br>1) Turn the ignition switch to OFF.<br>2) Disconnect the TCM and transmission connectors.<br>3) Measure the resistance between TCM connector and transmission connectors.<br>***Connector & terminal***<br>***(B54) No. 2 — (B12) No. 12:***<br>***(B54) No. 15 — (B12) No. 10:***<br>***(B54) No. 17 — (B12) No. 11:*** | Is the resistance less than 1 Ω? | Go to step **3**. | Repair the open circuit of harness. |
| 3 | **CHECK HARNESS.**<br>Measure the resistance between TCM connector and chassis ground.<br>***Connector & terminal***<br>***(B54) No. 2 — Chassis ground:***<br>***(B54) No. 17 — Chassis ground:*** | Is the resistance 1 MΩ or more? | Go to step **4**. | Repair the short circuit of harness. |

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 4 | **CHECK TRANSMISSION HARNESS.**<br>1) Disconnect the secondary pressure sensor connector.<br>2) Measure the resistance between transmission connector and secondary pressure sensor connector.<br>***Connector & terminal***<br>***(T3) No. 10 — (AT6) No. 3:***<br>***(T3) No. 11 — (AT6) No. 2:***<br>***(T3) No. 12 — (AT6) No. 1:*** | Is the resistance less than 1 Ω? | Go to step **5**. | Repair the open circuit of harness. |
| 5 | **CHECK TRANSMISSION HARNESS.**<br>Measure the resistance between transmission connector and chassis ground.<br>***Connector & terminal***<br>***(T3) No. 11 — Chassis ground:***<br>***(T3) No. 12 — Chassis ground:*** | Is the resistance 1 MΩ or more? | Go to step **6**. | Repair the short circuit of harness. |
| 6 | **CHECK SENSOR POWER SUPPLY.**<br>1) Connect the connectors of TCM and transmission.<br>2) Turn the ignition switch to ON.<br>3) Measure the voltage between secondary pressure sensor connector terminals.<br>***Connector & terminal***<br>***(AT6) No. 1 (+) — (AT6) No. 3 (–):*** | Is the voltage 4.5 V or more? | Replace the secondary pressure sensor. <Ref. to CVT-104, Secondary Pressure Sensor.> | Check for poor contact of the connector, and repair the defective part. |

# L: DTC P0843 SECONDARY OIL PRESSURE SENSOR CIRCUIT (HIGH)

**DTC DETECTING CONDITION:**
Input signal circuit of secondary pressure sensor is shorted.
**TROUBLE SYMPTOM:**
Shift characteristics malfunction
**WIRING DIAGRAM:**
CVT Control System <Ref. to WI-66, CVT Control System.>



| Step | | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK INPUT SIGNAL FOR TCM.**<br>1) Start the engine.<br>2) Warm up until the ATF temperature reaches to 40 — 70°C (104 — 158°F).<br>3) Shift the select lever to “P” range.<br>4) Stabilize the engine speed at idle.<br>5) Read the data of «Actual secondary pressure» using Subaru Select Monitor. | Is the «Actual secondary pressure» 0.5 — 1.5 MPa? | Check for poor contact of connector. | Go to step **2**. |
| 2 | **CHECK HARNESS.**<br>1) Turn the ignition switch to OFF.<br>2) Disconnect the TCM and transmission connectors.<br>3) Turn the ignition switch to ON.<br>4) Measure the voltage between TCM connector and chassis ground.<br>***Connector & terminal***<br>***(B54) No. 2 (+) — Chassis ground (–):***<br>***(B54) No. 17 (+) — Chassis ground (–):*** | Is the voltage approx. 0 V? | Go to step **3**. | Repair the short circuit of harness. |
| 3 | **CHECK HARNESS.**<br>1) Turn the ignition switch to OFF.<br>2) Measure the resistance between TCM connector terminals.<br>***Connector & terminal***<br>***(B54) No. 2 — (B54) No. 17:*** | Is the resistance less than 1 Ω? | Repair the short circuit of harness. | Go to step **4**. |

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 4 | **CHECK TRANSMISSION HARNESS.**<br>1) Disconnect the secondary pressure sensor connector.<br>2) Turn the ignition switch to ON.<br>3) Measure the voltage between transmission connector and chassis ground.<br>***Connector & terminal***<br>***(T3) No. 11 (+) — Chassis ground (–):***<br>***(T3) No. 12 (+) — Chassis ground (–):*** | Is the voltage approx. 0 V? | Go to step **5**. | Repair the short circuit of harness. |
| 5 | **CHECK TRANSMISSION HARNESS.**<br>1) Turn the ignition switch to OFF.<br>2) Measure the resistance between transmission connector terminals.<br>***Connector & terminal***<br>***(T3) No. 11 — (T3) No. 12:*** | Is the resistance less than 1 Ω? | Repair the short circuit of harness. | Go to step **6**. |
| 6 | **CHECK SENSOR POWER SUPPLY.**<br>1) Connect the connectors of TCM and transmission.<br>2) Turn the ignition switch to ON.<br>3) Measure the voltage between secondary pressure sensor connector terminals.<br>***Connector & terminal***<br>***(AT6) No. 1 (+) — (AT6) No. 3 (–):*** | Is the voltage 4.5 V or more? | Replace the secondary pressure sensor. <Ref. to CVT-104, Secondary Pressure Sensor.> | Check for poor contact of the connector, and repair the defective part. |

## M: DTC P0890 AT SELF-SHUT RELAY DIAGNOSIS (LOW)

**DTC DETECTING CONDITION:**

- Power supply circuit of TCM is open or shorted.
- Self shut relay malfunction

**TROUBLE SYMPTOM:**

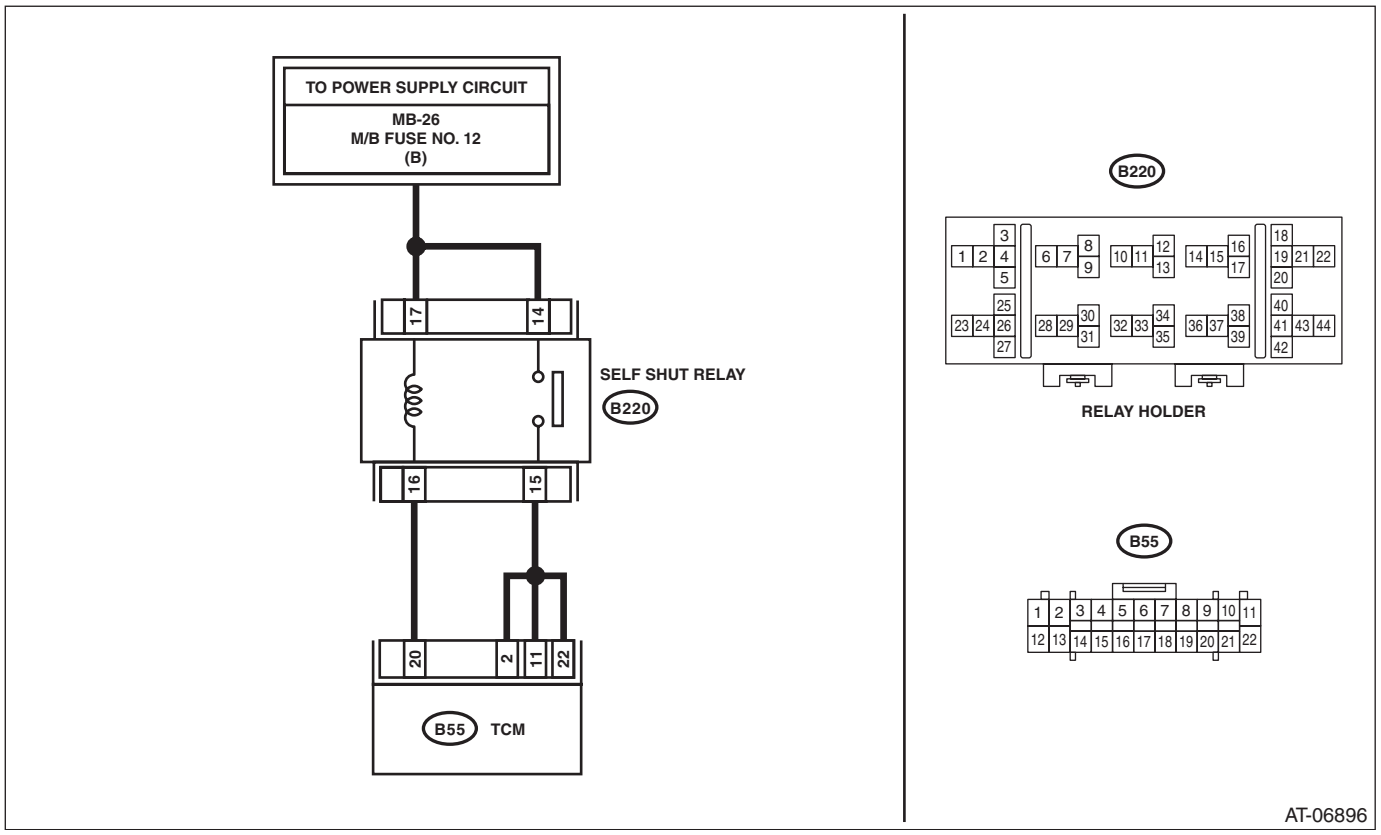
Gear is not changed.

**CAUTION:**

**After diagnosis, perform Clear Memory Mode for ECM. <Ref. to EN(H4DO)(diag)-57, Clear Memory Mode.>**

**WIRING DIAGRAM:**

CVT Control System <Ref. to WI-66, CVT Control System.>

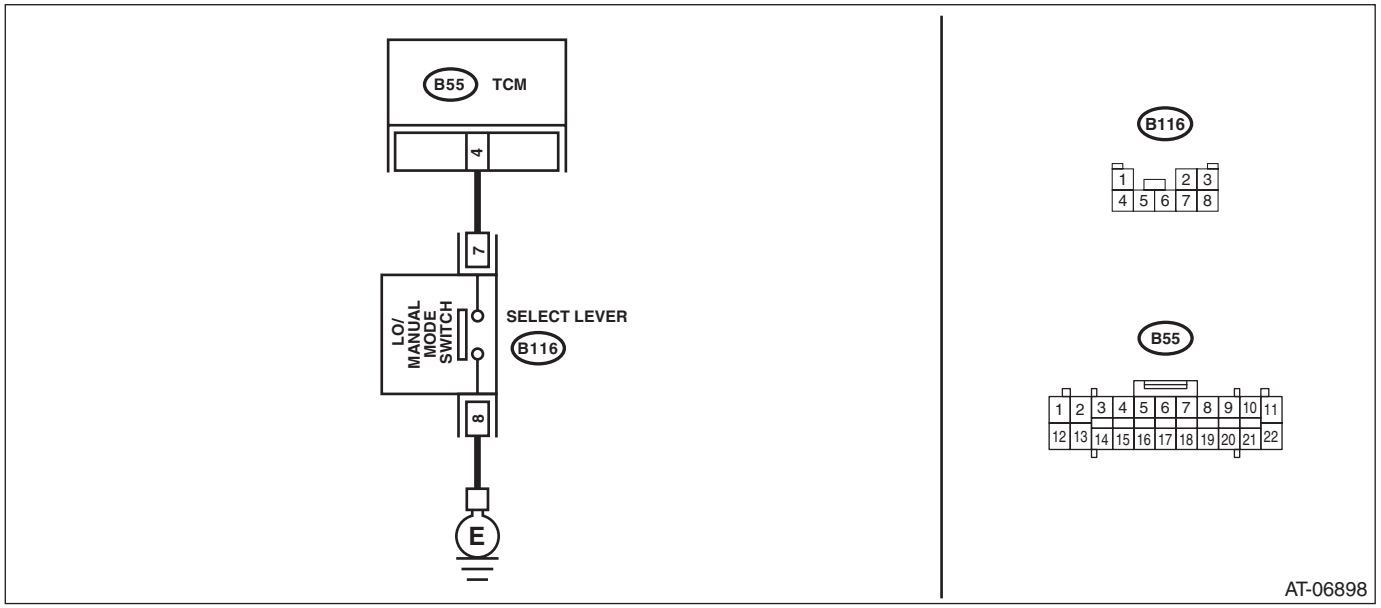


| | Step | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK HARNESS.**<br>1) Disconnect the TCM and self shut relay connectors.<br>2) Measure the resistance between TCM connector and self shut relay connector.<br>***Connector & terminal***<br>***(B55) No. 20 — (B220) No. 16:***<br>***(B55) No. 2 — (B220) No. 15:***<br>***(B55) No. 11 — (B220) No. 15:***<br>***(B55) No. 22 — (B220) No. 15:*** | Is the resistance less than 1 Ω? | Go to step **2**. | Repair the open circuit of harness. |
| 2 | **CHECK HARNESS.**<br>Measure the resistance between TCM connector and chassis ground.<br>***Connector & terminal***<br>***(B55) No. 20 — Chassis ground:***<br>***(B55) No. 2 — Chassis ground:***<br>***(B55) No. 11 — Chassis ground:***<br>***(B55) No. 22 — Chassis ground:*** | Is the resistance 1 MΩ or more? | Go to step **3**. | Repair the short circuit of harness. |

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 3 | **CHECK RELAY POWER SUPPLY.**<br>Measure the voltage between self shut relay connector and chassis ground.<br>***Connector & terminal***<br>***(B220) No. 14 (+) — Chassis ground (–):***<br>***(B220) No. 17 (+) — Chassis ground (–):*** | Is the voltage 10 V or more? | Go to step **4**. | Repair the open or short circuit of harness. |
| 4 | **CHECK SELF SHUT RELAY.**<br>Measure the resistance between self shut relay terminals.<br>***Connector & terminal***<br>***(B220) No. 16 — (B220) No. 17:*** | Is the resistance 110 — 140 Ω? | Go to step **5**. | Replace the self shut relay. |
| 5 | **CHECK SELF SHUT RELAY.**<br>Measure the resistance between self shut relay terminals.<br>***Connector & terminal***<br>***(B220) No. 14 — (B220) No. 15:*** | Is the resistance 1 MΩ or more? | Go to step **6**. | Replace the self shut relay. |
| 6 | **CHECK INPUT SIGNAL FOR TCM.**<br>1) Connect the connectors of TCM and self shut relay.<br>2) Read the data of «Control module voltage» using Subaru Select Monitor. | Is the «Control module voltage» 10 V or more? | Current condition is normal. Check for poor contact in connectors or harnesses, and repair the defective part. | Go to step **7**. |
| 7 | **CHECK FOR POOR CONTACT.** | Is there poor contact of the self shut relay circuit? | Repair the poor contact. | Check the TCM. |

## N: DTC P0951 MANUAL SWITCH

**DTC DETECTING CONDITION:**
Input signal circuit of manual mode switch is open or shorted.
**TROUBLE SYMPTOM:**
Manual mode can not be set.
**WIRING DIAGRAM**:
CVT Control System <Ref. to WI-66, CVT Control System.>



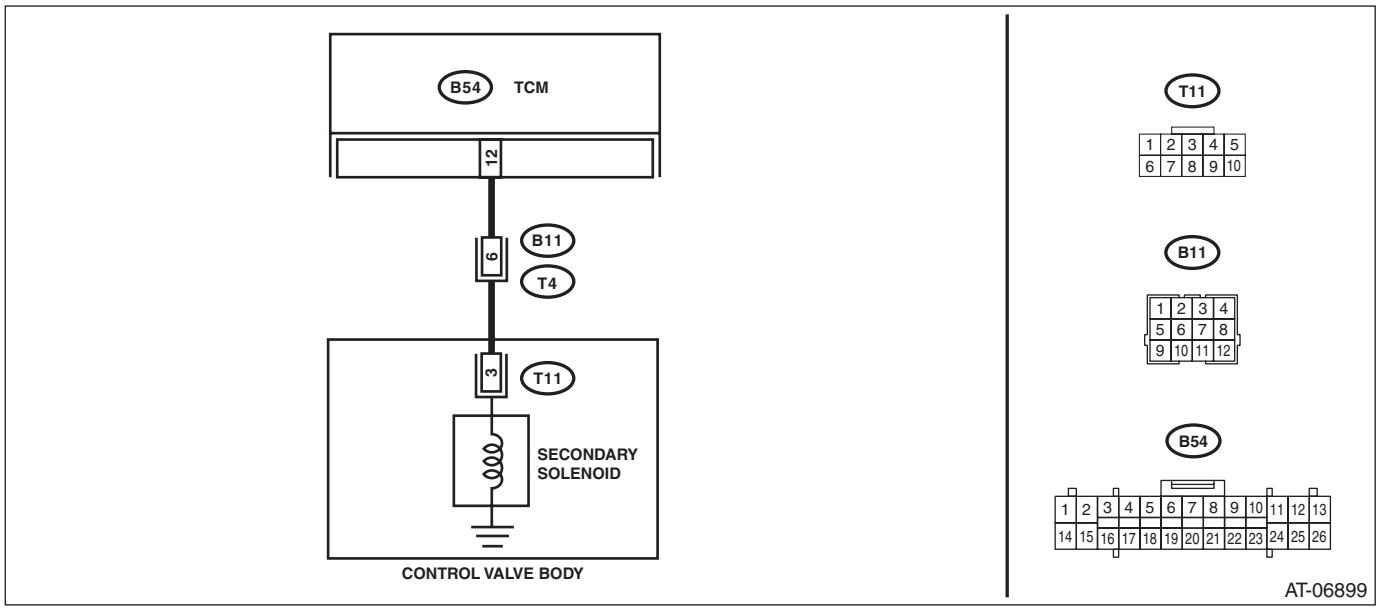
| Step | | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK HARNESS.**<br>1) Turn the ignition switch to OFF.<br>2) Disconnect the manual mode switch connector.<br>3) Measure the resistance between manual mode switch connector and chassis ground.<br>***Connector & terminal***<br>***(B116) No. 8 — Chassis ground:*** | Is the resistance less than 1 Ω? | Go to step **2**. | Repair the open circuit of harness. |
| 2 | **CHECK MANUAL MODE SWITCH.**<br>Measure the resistance between manual mode switch terminals.<br>***Connector & terminal***<br>***(B116) No. 7 — No. 8:*** | Is the resistance 1 MΩ or more? | Go to step **3**. | Replace the select lever assembly. <Ref. to CS-20, Select Lever.> |
| 3 | **CHECK MANUAL MODE SWITCH.**<br>1) Shift the select lever to manual mode.<br>2) Measure the resistance between manual mode switch terminals.<br>***Connector & terminal***<br>***(B116) No. 7 — No. 8:*** | Is the resistance less than 1 Ω? | Go to step **4**. | Replace the select lever assembly. <Ref. to CS-20, Select Lever.> |
| 4 | **CHECK HARNESS.**<br>1) Disconnect the TCM connector.<br>2) Measure the resistance between TCM connector and manual mode switch connector.<br>***Connector & terminal***<br>***(B55) No. 4 — (B116) No. 7:*** | Is the resistance less than 1 Ω? | Go to step **5**. | Repair the open circuit of harness or poor contact of connector. |
| 5 | **CHECK HARNESS.**<br>Measure the resistance between manual mode switch connector and chassis ground.<br>***Connector & terminal***<br>***(B116) No. 7 — Chassis ground:*** | Is the resistance 1 MΩ or more? | Go to step **6**. | Repair the short circuit of harness. |

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 6 | **CHECK INPUT SIGNAL FOR TCM.**<br>1) Connect the TCM and manual mode switch connector.<br>2) Turn the ignition switch to ON.<br>3) Set the select lever to “D” range.<br>4) Read the data of «Tiptronic Mode Switch» using Subaru Select Monitor. | Does the value of «Tiptronic Mode Switch» change to “ON” with select lever in manual mode, and “OFF” with select lever in other than manual mode? | Current condition is normal. | Go to step **7**. |
| 7 | **CHECK FOR POOR CONTACT.** | Is there poor contact of the manual mode switch circuit? | Repair the poor contact. | Check the TCM. |

# O: DTC P0962 SECONDARY SOLENOID CIRCUIT (LOW)

**DTC DETECTING CONDITION:**
Output signal circuit of secondary solenoid is shorted.
**TROUBLE SYMPTOM:**
- Engine speed increases abruptly, and can not start.
- Engine speed increases abruptly during driving.

**WIRING DIAGRAM:**
CVT Control System <Ref. to WI-66, CVT Control System.>



| | Step | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK INPUT SIGNAL FOR TCM.**<br>1) After driving with warm up condition, park the vehicle while depressing the brake pedal at "N" range.<br>2) Read the data of «Sec. Sol. Set Current» and «Sec. Sol. Actual Current» using Subaru Select Monitor. | Does the value of «Sec. Sol. Set Current» and «Sec. Sol. Actual Current» almost correspond? | Check for poor contact of connector. | Go to step **2**. |
| 2 | **CHECK HARNESS.**<br>1) Turn the ignition switch to OFF.<br>2) Disconnect the TCM and transmission connectors.<br>3) Measure the resistance between TCM connector and chassis ground.<br>***Connector & terminal***<br>***(B54) No. 12 — Chassis ground:*** | Is the resistance 1 MΩ or more? | Go to step **3**. | Repair the short circuit of harness. |
| 3 | **CHECK SECONDARY SOLENOID.**<br>Measure the resistance between transmission connector and transmission body.<br>***Connector & terminal***<br>***(T4) No. 6 — Transmission body:*** | Is the resistance approx. 7 Ω? (when engine cold) | Check for poor contact of the connector, and repair the defective part. | Go to step **4**. |
| 4 | **CHECK HARNESS INSIDE TRANSMISSION.**<br>**CAUTION:**<br>**Start work after ATF cools down.**<br>1) Remove the transmission valve cover.<br>2) Check for the harness pinch, damage. | Is the harness normal? | Go to step **5**. | Replace the transmission harness. |

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 5 | **CHECK HARNESS INSIDE TRANSMISSION.**<br>1) Disconnect the control valve body connector.<br>2) Measure the resistance between transmission connector and transmission body.<br>***Connector & terminal***<br>***(T4) No. 6 — Transmission body:*** | Is the resistance 1 MΩ or more? | Replace the control valve body. <Ref. to CVT-110, Control Valve Body.> | Replace the transmission harness. |

# P: DTC P0963 SECONDARY SOLENOID CIRCUIT (HIGH)

**DTC DETECTING CONDITION:**

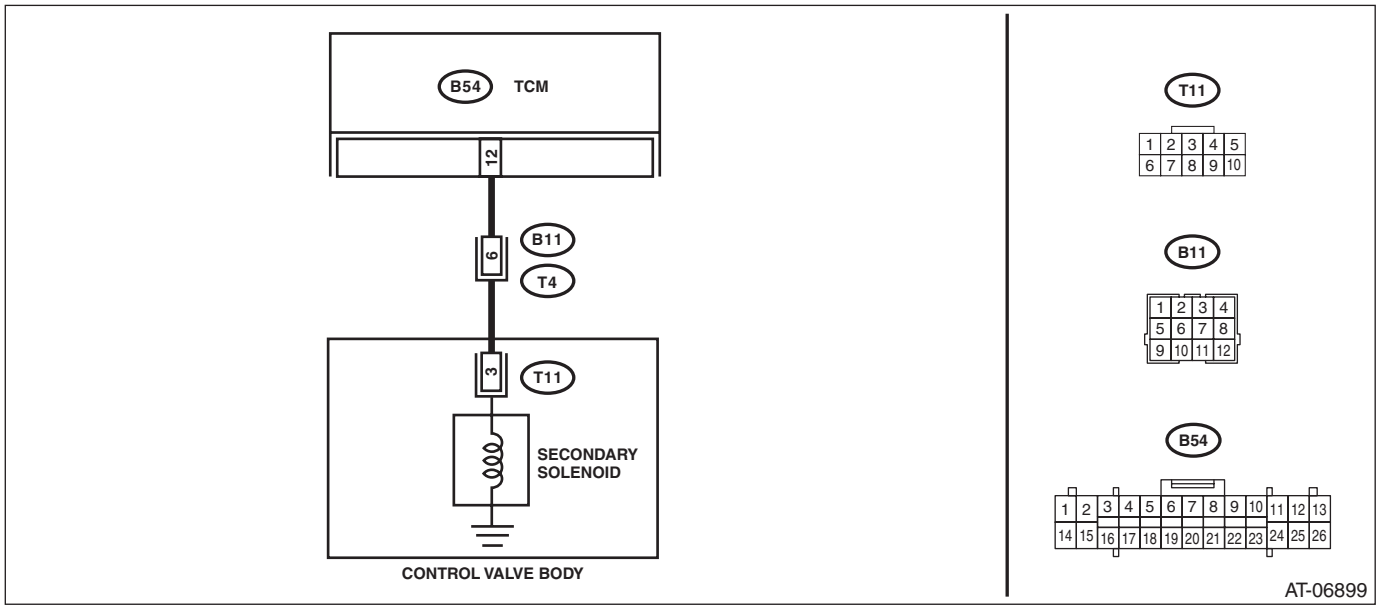
- Output signal circuit of secondary solenoid is open or shorted.
- Secondary solenoid has open circuit inside.

**TROUBLE SYMPTOM:**

- Engine speed increases abruptly, and can not start.
- Engine speed increases abruptly during driving.

**WIRING DIAGRAM:**

CVT Control System <Ref. to WI-66, CVT Control System.>



| | Step | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK INPUT SIGNAL FOR TCM.**<br>1) After driving with warm up condition, park the vehicle while depressing the brake pedal at "N" range.<br>2) Read the data of «Sec. Sol. Set Current» and «Sec. Sol. Actual Current» using Subaru Select Monitor. | Does the value of «Sec. Sol. Set Current» and «Sec. Sol. Actual Current» almost correspond? | Check for poor contact of connector. | Go to step **2**. |
| 2 | **CHECK HARNESS.**<br>1) Turn the ignition switch to OFF.<br>2) Disconnect the TCM and transmission connectors.<br>3) Measure the resistance between TCM connector and transmission connectors.<br>***Connector & terminal***<br>***(B54) No. 12 — (B11) No. 6:*** | Is the resistance less than 1 Ω? | Go to step **3**. | Repair the open circuit of harness. |
| 3 | **CHECK HARNESS.**<br>1) Turn the ignition switch to ON.<br>2) Measure the voltage between TCM connector and chassis ground.<br>***Connector & terminal***<br>***(B54) No. 12 (+) — Chassis ground (–):*** | Is the voltage approx. 0 V? | Go to step **4**. | Repair the short circuit of harness. |
| 4 | **CHECK SECONDARY SOLENOID.**<br>Measure the resistance between transmission connector and transmission body.<br>***Connector & terminal***<br>***(T4) No. 6 — Transmission body:*** | Is the resistance approx. 7 Ω? (when engine cold) | Check for poor contact of the connector, and repair the defective part. | Go to step **5**. |

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 5 | **CHECK HARNESS INSIDE TRANSMISSION.**<br>**CAUTION:**<br>**Start work after ATF cools down.**<br>1) Remove the transmission valve cover.<br>2) Check for the harness pinch, damage. | Is the harness normal? | Go to step **6**. | Replace the transmission harness. |
| 6 | **CHECK HARNESS INSIDE TRANSMISSION.**<br>1) Disconnect the control valve body connector.<br>2) Turn the ignition switch to ON.<br>3) Measure the voltage between transmission connector and transmission body.<br>***Connector & terminal***<br>***(T4) No. 6 (+) — Transmission body (–):*** | Is the voltage approx. 0 V? | Replace the control valve body. <Ref. to CVT-110, Control Valve Body.> | Replace the transmission harness. |

## Q: DTC P0965 FORWARD & REVERSE SOLENOID FUNCTION

**DTC DETECTING CONDITION:**

- Control valve hydraulic circuit malfunction
- F&R solenoid characteristics malfunction
- Clutch slippage caused by forward clutch facing deterioration
- Clutch slippage caused by hydraulic pressure leaks

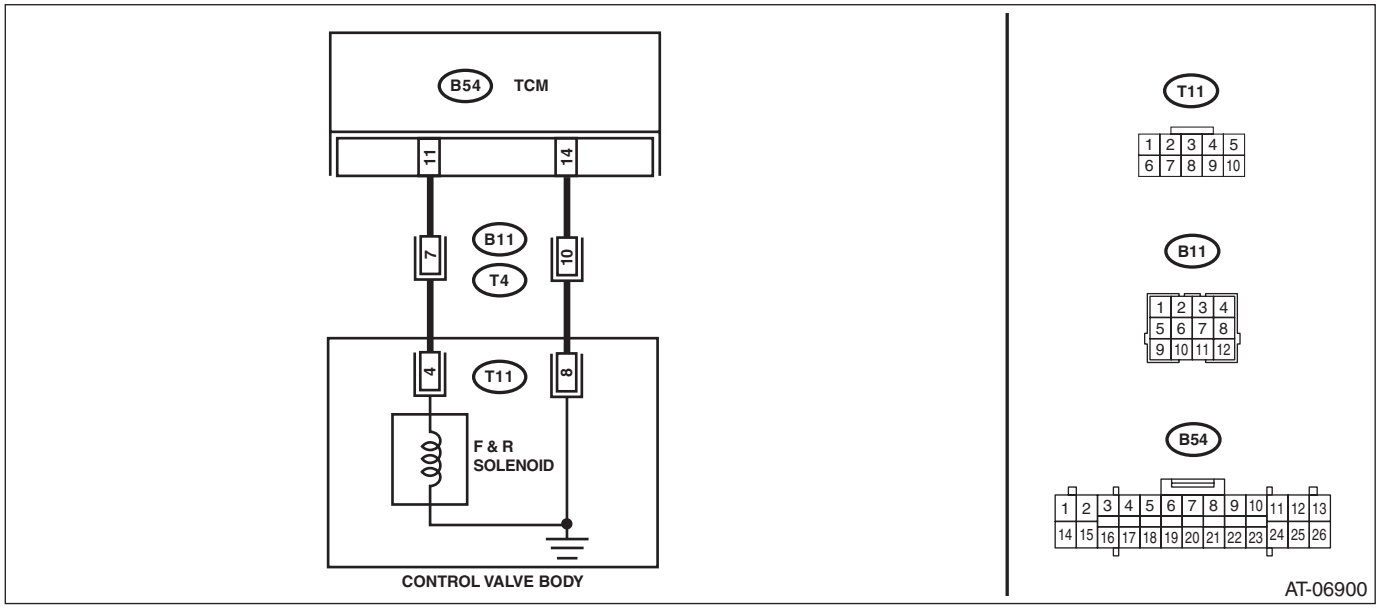
**TROUBLE SYMPTOM:**

- Engine speed increases abruptly, and can not accelerate.
- Excessive slippage is felt.

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK TRANSMISSION FLUID.**<br>Check the condition of ATF. <Ref. to CVT-38, CONDITION CHECK, CVTF.> | Is the ATF OK? | Go to step **2**. | Check according to the "corrective action" of ATF (CVTF) "CONDITION CHECK". <Ref. to CVT-38, CONDITION CHECK, CVTF.> |
| 2 | **CHECK TRANSMISSION FLUID.**<br>Check the amount of ATF. <Ref. to CVT-34, ADJUSTMENT, CVTF.> | Is the ATF amount correct? | Go to step **3**. | Adjust the amount of ATF. <Ref. to CVT-34, ADJUSTMENT, CVTF.> |
| 3 | **CHECK INPUT SIGNAL FOR TCM.**<br>1) Start the engine.<br>2) Warm up until the ATF temperature reaches to 40 — 70°C (104 — 158°F).<br>3) Shift the select lever to "P" range.<br>4) Stabilize the engine speed at idle.<br>5) Read the data of «Actual secondary pressure» using Subaru Select Monitor. | Is the «Actual secondary pressure» 0.5 — 1.5 MPa? | Go to step **4**. | Perform the diagnosis according to DTC P0841 procedure. |
| 4 | **STALL TEST.**<br>Perform the stall test. <Ref. to CVT-45, Stall Test.> | Is the stall test normal? | Go to step **5**. | If the engine speed increases abruptly, replace the transmission assembly. <Ref. to CVT-56, Automatic Transmission Assembly.> |
| 5 | **DRIVING CHECK BY INSPECTION MODE.**<br>1) Turn the ignition switch to OFF.<br>2) Perform a drive check based on the "Inspection Mode". <Ref. to CVT(diag)-20, Inspection Mode.> | Does the AT OIL TEMP light blink and is DTC P0965 displayed? | Replace the transmission assembly. <Ref. to CVT-56, Automatic Transmission Assembly.> | If there is abrupt increase of engine speed, standing start problems, replace the transmission assembly. <Ref. to CVT-56, Automatic Transmission Assembly.> If it is normal, temporary poor contact occurs. |

# R: DTC P0966 FORWARD & REVERSE SOLENOID CIRCUIT (LOW)

**DTC DETECTING CONDITION:**
Output signal circuit of F&R solenoid is shorted.
**TROUBLE SYMPTOM:**
Excessive shift shock
**WIRING DIAGRAM:**
CVT Control System <Ref. to WI-66, CVT Control System.>



| | Step | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK INPUT SIGNAL FOR TCM.**<br>1) After driving with warm up condition, park the vehicle while depressing the brake pedal at "D" range.<br>2) Read the data of «F&R Linear Solenoid Set Current» and «F&R Linear Solenoid Actual Current» using Subaru Select Monitor. | Does the value of «F&R Linear Solenoid Set Current» and «F&R Linear Solenoid Actual Current» almost correspond? | Check for poor contact of connector. | Go to step **2**. |
| 2 | **CHECK HARNESS.**<br>1) Turn the ignition switch to OFF.<br>2) Disconnect the TCM and transmission connectors.<br>3) Measure the resistance between TCM connector and chassis ground.<br>***Connector & terminal***<br>***(B54) No. 11 — Chassis ground:*** | Is the resistance 1 MΩ or more? | Go to step **3**. | Repair the short circuit of harness. |
| 3 | **CHECK F&R SOLENOID.**<br>Measure the resistance between transmission connector and transmission body.<br>***Connector & terminal***<br>***(T4) No. 7 — Transmission body:*** | Is the resistance approx. 6 Ω? (when engine cold) | Check for poor contact of the connector, and repair the defective part. | Go to step **4**. |
| 4 | **CHECK HARNESS INSIDE TRANSMISSION.**<br>**CAUTION:**<br>**Start work after ATF cools down.**<br>1) Remove the transmission valve cover.<br>2) Check for the harness pinch, damage. | Is the harness normal? | Go to step **5**. | Replace the transmission harness. |

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 5 | **CHECK HARNESS INSIDE TRANSMISSION.**<br>1) Disconnect the control valve body connector.<br>2) Measure the resistance between transmission connector and transmission body.<br>***Connector & terminal***<br>***(T4) No. 7 — Transmission body:*** | Is the resistance 1 MΩ or more? | Replace the control valve body. <Ref. to CVT-110, Control Valve Body.> | Replace the transmission harness. |

# S: DTC P0967 FORWARD & REVERSE LINEAR SOLENOID CIRCUIT (HIGH)

**DTC DETECTING CONDITION:**

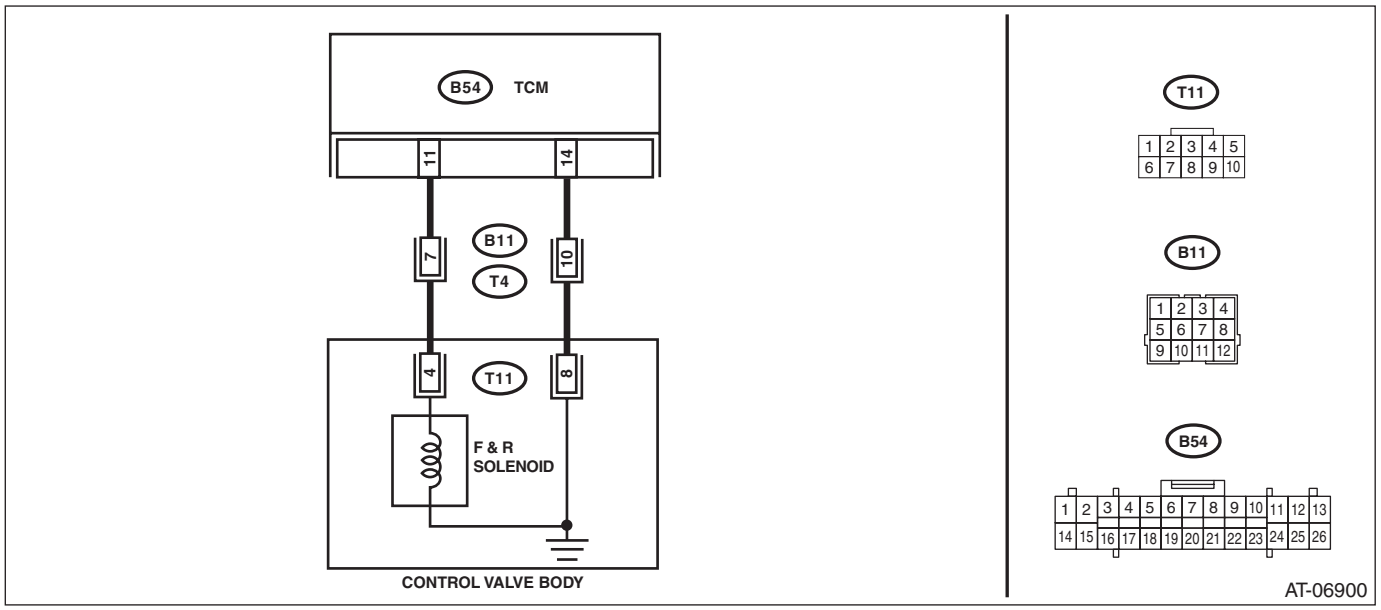
- Output signal circuit of F&R solenoid is open or shorted.
- F&R solenoid has open circuit inside.

**TROUBLE SYMPTOM:**

Engine speed increases abruptly, and can not start.

**WIRING DIAGRAM:**

CVT Control System <Ref. to WI-66, CVT Control System.>

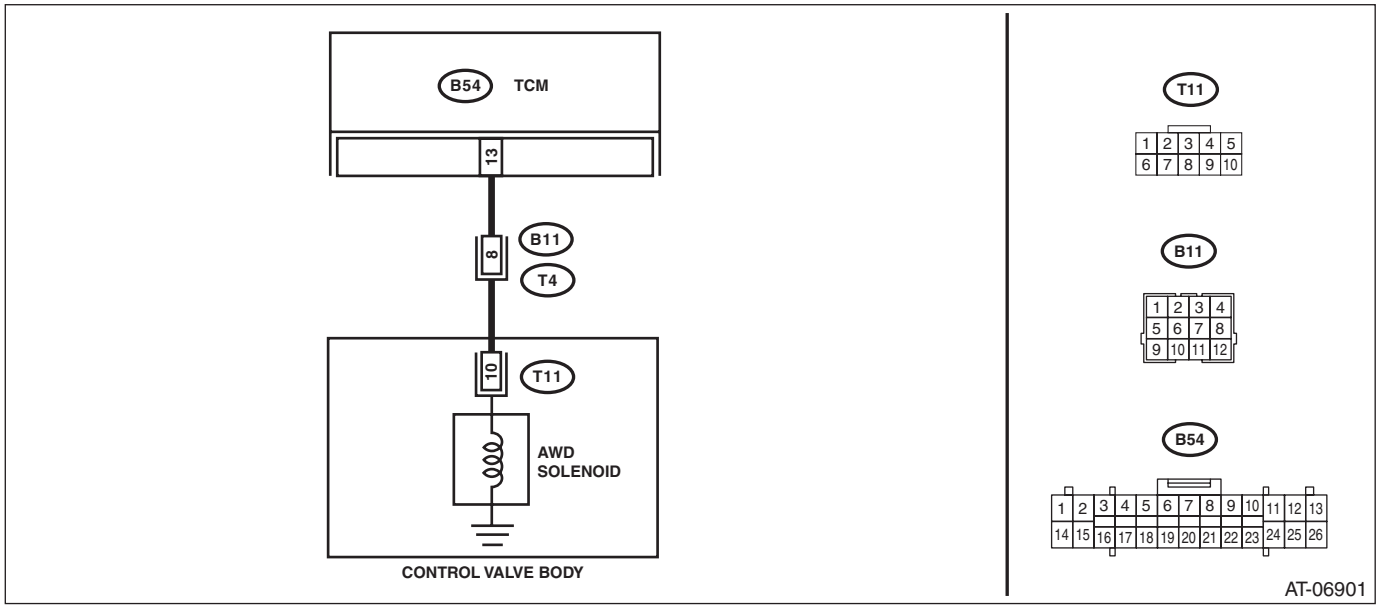


| | Step | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK INPUT SIGNAL FOR TCM.**<br>1) After driving with warm up condition, park the vehicle while depressing the brake pedal at "D" range.<br>2) Read the data of «F&R Linear Solenoid Set Current» and «F&R Linear Solenoid Actual Current» using Subaru Select Monitor. | Does the value of «F&R Linear Solenoid Set Current» and «F&R Linear Solenoid Actual Current» almost correspond? | Check for poor contact of connector. | Go to step **2**. |
| 2 | **CHECK HARNESS.**<br>1) Turn the ignition switch to OFF.<br>2) Disconnect the TCM and transmission connectors.<br>3) Measure the resistance between TCM connector and transmission connectors.<br>***Connector & terminal***<br>***(B54) No. 11 — (B11) No. 7:*** | Is the resistance less than 1 Ω? | Go to step **3**. | Repair the open circuit of harness. |
| 3 | **CHECK HARNESS.**<br>1) Turn the ignition switch to ON.<br>2) Measure the voltage between TCM connector and chassis ground.<br>***Connector & terminal***<br>***(B54) No. 11 (+) — Chassis ground (–):*** | Is the voltage approx. 0 V? | Go to step **4**. | Repair the short circuit of harness. |
| 4 | **CHECK F&R SOLENOID.**<br>Measure the resistance between transmission connector and transmission body.<br>***Connector & terminal***<br>***(T4) No. 7 — Transmission body:*** | Is the resistance approx. 6 Ω? (when engine cold) | Check for poor contact of the connector, and repair the defective part. | Go to step **5**. |

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 5 | **CHECK HARNESS INSIDE TRANSMISSION.**<br>**CAUTION:**<br>**Start work after ATF cools down.**<br>1) Remove the transmission valve cover.<br>2) Check for the harness pinch, damage. | Is the harness normal? | Go to step **6**. | Replace the transmission harness. |
| 6 | **CHECK HARNESS INSIDE TRANSMISSION.**<br>1) Disconnect the control valve body connector.<br>2) Turn the ignition switch to ON.<br>3) Measure the voltage between transmission connector and transmission body.<br>***Connector & terminal***<br>***(T4) No. 7 (+) — Transmission body (–):*** | Is the voltage approx. 0 V? | Replace the control valve body. <Ref. to CVT-110, Control Valve Body.> | Replace the transmission harness. |

# T: DTC P0970 TRANSFER SOLENOID CIRCUIT (LOW)

**DTC DETECTING CONDITION:**
Output signal circuit of AWD solenoid is shorted.
**TROUBLE SYMPTOM:**
Drivability getting worse.
**WIRING DIAGRAM:**
CVT Control System <Ref. to WI-66, CVT Control System.>



| Step | | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK HARNESS.**<br>1) Turn the ignition switch to OFF.<br>2) Disconnect the TCM and transmission connectors.<br>3) Measure the resistance between TCM connector and chassis ground.<br>***Connector & terminal***<br>***(B54) No. 13 — Chassis ground:*** | Is the resistance 1 MΩ or more? | Go to step **2**. | Repair the short circuit of harness. |
| 2 | **CHECK AWD SOLENOID.**<br>Measure the resistance between transmission connector and transmission body.<br>***Connector & terminal***<br>***(T4) No. 8 — Transmission body:*** | Is the resistance approx. 4 Ω? (when engine cold) | Check for poor contact of the connector, and repair the defective part. | Go to step **3**. |
| 3 | **CHECK HARNESS INSIDE TRANSMISSION.**<br>**CAUTION:**<br>**Start work after ATF cools down.**<br>1) Remove the transmission valve cover.<br>2) Check for the harness pinch, damage. | Is the harness normal? | Go to step **4**. | Replace the transmission harness. |
| 4 | **CHECK HARNESS INSIDE TRANSMISSION.**<br>1) Disconnect the control valve body connector.<br>2) Measure the resistance between transmission connector and transmission body.<br>***Connector & terminal***<br>***(T4) No. 8 — Transmission body:*** | Is the resistance 1 MΩ or more? | Replace the control valve body. <Ref. to CVT-110, Control Valve Body.> | Replace the transmission harness. |

# U: DTC P0971 TRANSFER SOLENOID CIRCUIT (HIGH)

**DTC DETECTING CONDITION:**

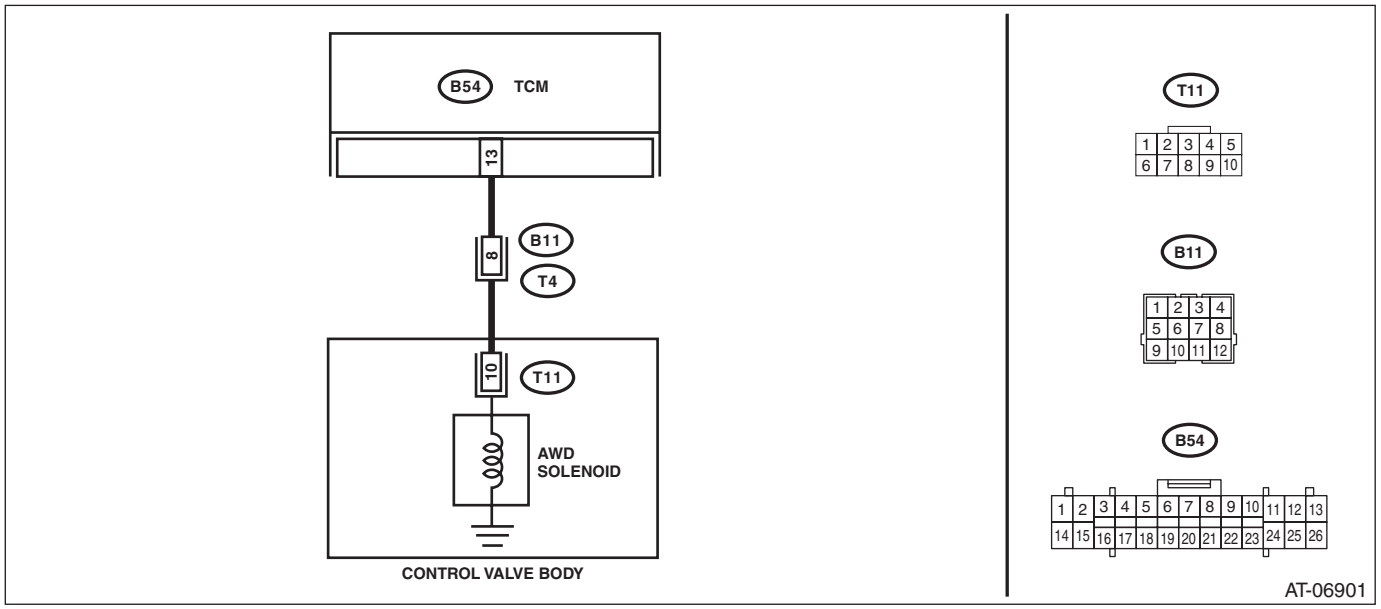
- Output signal circuit of AWD solenoid is open or shorted.
- AWD solenoid has open circuit inside.

**TROUBLE SYMPTOM:**

- Tight corner braking phenomenon occurs.
- Drivability getting worse.

**WIRING DIAGRAM:**

CVT Control System <Ref. to WI-66, CVT Control System.>

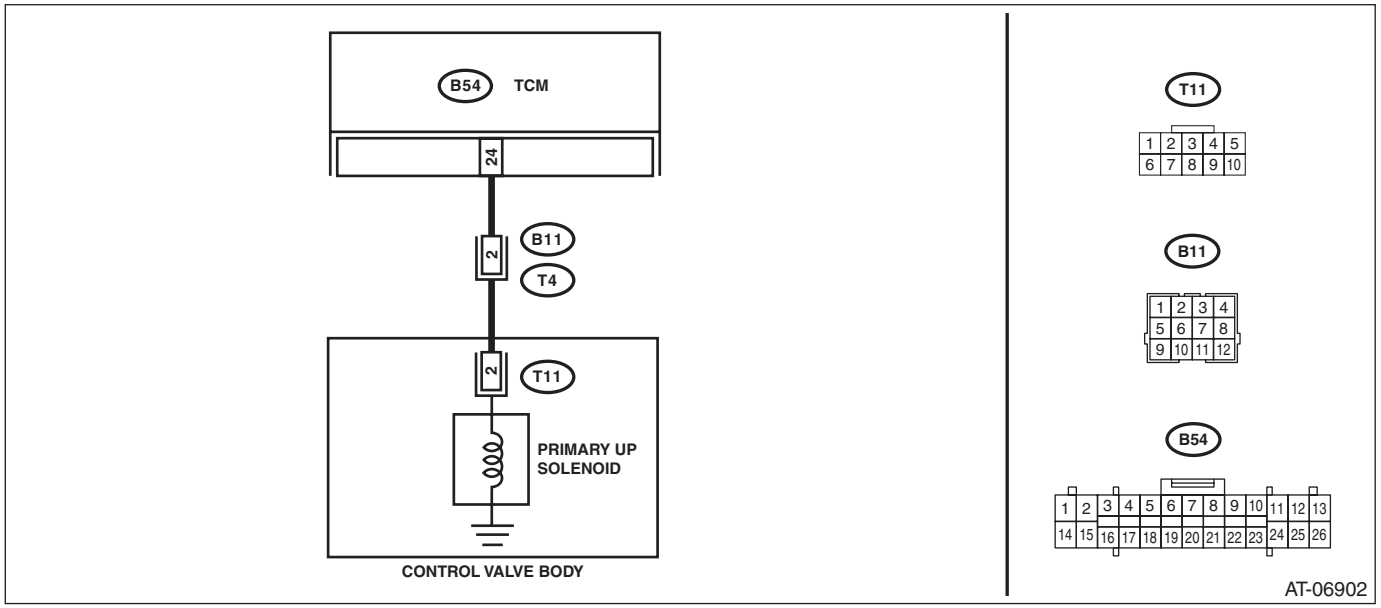


| | Step | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK HARNESS.**<br>1) Turn the ignition switch to OFF.<br>2) Disconnect the TCM and transmission connectors.<br>3) Measure the resistance between TCM connector and transmission connectors.<br>***Connector & terminal***<br>***(B54) No. 13 — (B11) No. 8:*** | Is the resistance less than 1 Ω? | Go to step **2**. | Repair the open circuit of harness. |
| 2 | **CHECK HARNESS.**<br>1) Turn the ignition switch to ON.<br>2) Measure the voltage between TCM connector and chassis ground.<br>***Connector & terminal***<br>***(B54) No. 13 (+) — Chassis ground (–):*** | Is the voltage approx. 0 V? | Go to step **3**. | Repair the short circuit of harness. |
| 3 | **CHECK AWD SOLENOID.**<br>Measure the resistance between transmission connector and transmission body.<br>***Connector & terminal***<br>***(T4) No. 8 — Transmission body:*** | Is the resistance approx. 4 Ω? (when engine cold) | Check for poor contact of the connector, and repair the defective part. | Go to step **4**. |
| 4 | **CHECK HARNESS INSIDE TRANSMISSION.**<br>**CAUTION:**<br>**Start work after ATF cools down.**<br>1) Remove the transmission valve cover.<br>2) Check for the harness pinch, damage. | Is the harness normal? | Go to step **5**. | Replace the transmission harness. |

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 5 | **CHECK HARNESS INSIDE TRANSMISSION.**<br>1) Disconnect the control valve body connector.<br>2) Turn the ignition switch to ON.<br>3) Measure the voltage between transmission connector and transmission body.<br>***Connector & terminal***<br>***(T4) No. 8 (+) — Transmission body (–):*** | Is the voltage approx. 0 V? | Replace the control valve body. <Ref. to CVT-110, Control Valve Body.> | Replace the transmission harness. |

# V: DTC P0973 PRIMARY SOLENOID SYSTEM A CIRCUIT (LOW)

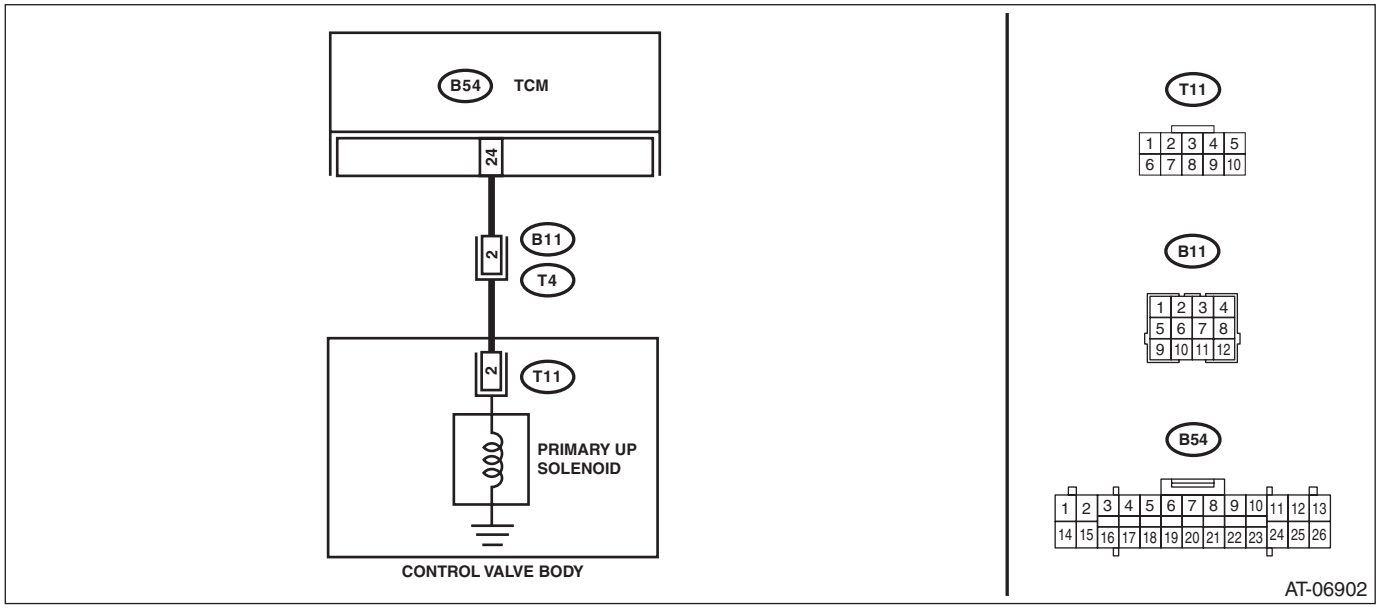
**DTC DETECTING CONDITION:**
Output signal circuit of primary UP solenoid is shorted.
**TROUBLE SYMPTOM:**
Gear is not changed. (No up-shift)
**WIRING DIAGRAM:**
CVT Control System <Ref. to WI-66, CVT Control System.>



| Step | | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK HARNESS.**<br>1) Turn the ignition switch to OFF.<br>2) Disconnect the TCM and transmission connectors.<br>3) Measure the resistance between TCM connector and chassis ground.<br>***Connector & terminal***<br>***(B54) No. 24 — Chassis ground:*** | Is the resistance 1 MΩ or more? | Go to step **2**. | Repair the short circuit of harness. |
| 2 | **CHECK PRIMARY UP SOLENOID.**<br>Measure the resistance between transmission connector and transmission body.<br>***Connector & terminal***<br>***(T4) No. 2 — Transmission body:*** | Is the resistance approx. 13 Ω? (when engine cold) | Check for poor contact of the connector, and repair the defective part. | Go to step **3**. |
| 3 | **CHECK HARNESS INSIDE TRANSMISSION.**<br>**CAUTION:**<br>**Start work after ATF cools down.**<br>1) Remove the transmission valve cover.<br>2) Check for the harness pinch, damage. | Is the harness normal? | Go to step **4**. | Replace the transmission harness. |
| 4 | **CHECK HARNESS INSIDE TRANSMISSION.**<br>1) Disconnect the control valve body connector.<br>2) Measure the resistance between transmission connector and transmission body.<br>***Connector & terminal***<br>***(T4) No. 2 — Transmission body:*** | Is the resistance 1 MΩ or more? | Replace the control valve body. <Ref. to CVT-110, Control Valve Body.> | Replace the transmission harness. |

# W: DTC P0974 PRIMARY SOLENOID SYSTEM A CIRCUIT (HIGH)

**DTC DETECTING CONDITION:**
Output signal circuit of primary UP solenoid is open or shorted.
**TROUBLE SYMPTOM:**
Gear is not changed. (No up-shift)
**WIRING DIAGRAM:**
CVT Control System <Ref. to WI-66, CVT Control System.>

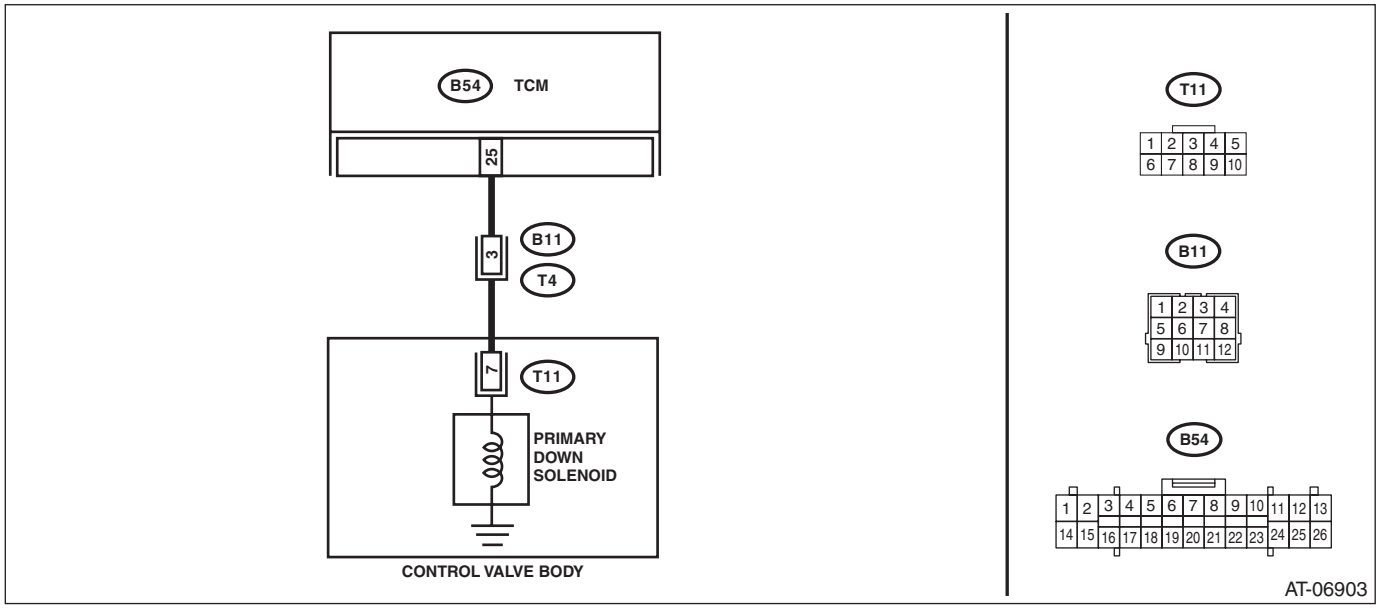


| Step | | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK HARNESS.**<br>1) Turn the ignition switch to OFF.<br>2) Disconnect the TCM and transmission connectors.<br>3) Measure the resistance between TCM connector and transmission connectors.<br>***Connector & terminal***<br>***(B54) No. 24 — (B11) No. 2:*** | Is the resistance less than 1 Ω? | Go to step **2**. | Repair the open circuit of harness. |
| 2 | **CHECK HARNESS.**<br>1) Turn the ignition switch to ON.<br>2) Measure the voltage between TCM connector and chassis ground.<br>***Connector & terminal***<br>***(B54) No. 24 (+) — Chassis ground (–):*** | Is the voltage approx. 0 V? | Go to step **3**. | Repair the short circuit of harness. |
| 3 | **CHECK PRIMARY UP SOLENOID.**<br>Measure the resistance between transmission connector and transmission body.<br>***Connector & terminal***<br>***(T4) No. 2 — Transmission body:*** | Is the resistance approx. 13 Ω? (when engine cold) | Check for poor contact of the connector, and repair the defective part. | Go to step **4**. |
| 4 | **CHECK HARNESS INSIDE TRANSMISSION.**<br>**CAUTION:**<br>**Start work after ATF cools down.**<br>1) Remove the transmission valve cover.<br>2) Check for the harness pinch, damage. | Is the harness normal? | Go to step **5**. | Replace the transmission harness. |

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 5 | **CHECK HARNESS INSIDE TRANSMISSION.**<br>1) Disconnect the control valve body connector.<br>2) Turn the ignition switch to ON.<br>3) Measure the voltage between transmission connector and transmission body.<br>***Connector & terminal***<br>***(T4) No. 2 (+) — Transmission body (–):*** | Is the voltage approx. 0 V? | Replace the control valve body. <Ref. to CVT-110, Control Valve Body.> | Replace the transmission harness. |

# X: DTC P0976 PRIMARY SOLENOID SYSTEM B CIRCUIT (LOW)

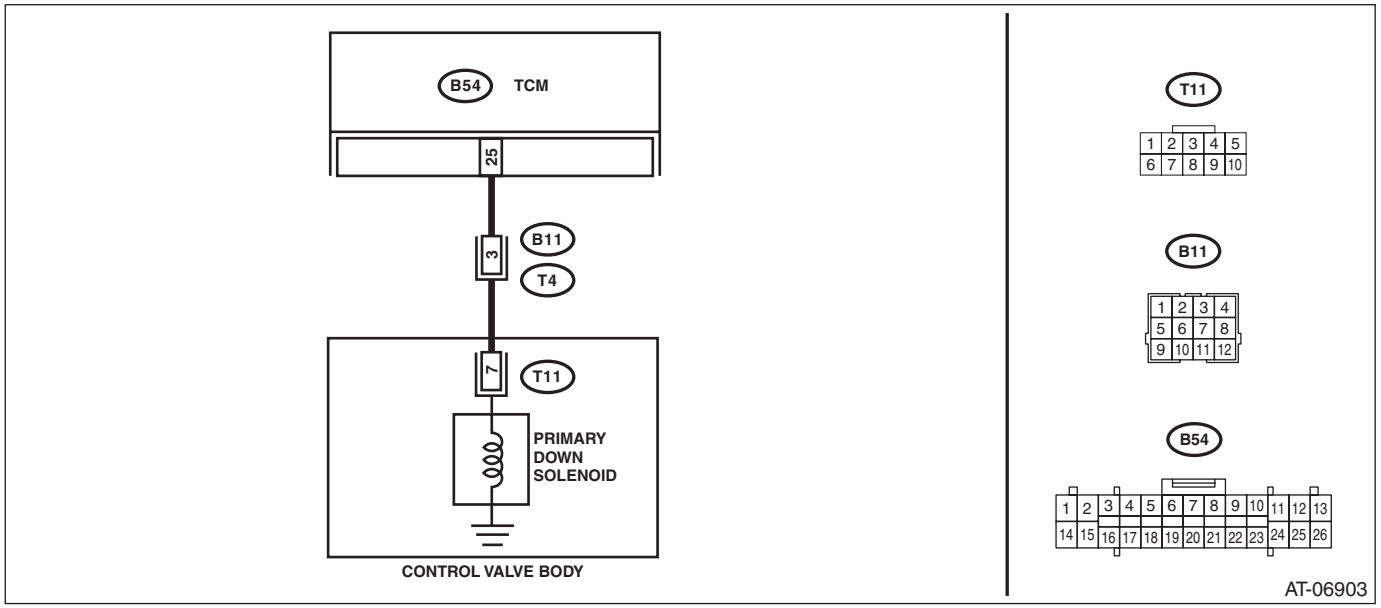
**DTC DETECTING CONDITION:**
Output signal circuit of primary DOWN solenoid is shorted.
**TROUBLE SYMPTOM:**
Gear is not changed. (No down-shift)
**WIRING DIAGRAM:**
CVT Control System <Ref. to WI-66, CVT Control System.>



| Step | | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK HARNESS.**<br>1) Turn the ignition switch to OFF.<br>2) Disconnect the TCM and transmission connectors.<br>3) Measure the resistance between TCM connector and chassis ground.<br>***Connector & terminal***<br>***(B54) No. 25 — Chassis ground:*** | Is the resistance 1 MΩ or more? | Go to step **2**. | Repair the short circuit of harness. |
| 2 | **CHECK PRIMARY DOWN SOLENOID.**<br>Measure the resistance between transmission connector and transmission body.<br>***Connector & terminal***<br>***(T4) No. 3 — Transmission body:*** | Is the resistance approx. 13 Ω? (when engine cold) | Check for poor contact of the connector, and repair the defective part. | Go to step **3**. |
| 3 | **CHECK HARNESS INSIDE TRANSMISSION.**<br>**CAUTION:**<br>**Start work after ATF cools down.**<br>1) Remove the transmission valve cover.<br>2) Check for the harness pinch, damage. | Is the harness normal? | Go to step **4**. | Replace the transmission harness. |
| 4 | **CHECK HARNESS INSIDE TRANSMISSION.**<br>1) Disconnect the control valve body connector.<br>2) Measure the resistance between transmission connector and transmission body.<br>***Connector & terminal***<br>***(T4) No. 3 — Transmission body:*** | Is the resistance 1 MΩ or more? | Replace the control valve body. <Ref. to CVT-110, Control Valve Body.> | Replace the transmission harness. |

# Y: DTC P0977 PRIMARY SOLENOID SYSTEM B CIRCUIT (HIGH)

**DTC DETECTING CONDITION:**
Output signal circuit of primary DOWN solenoid is open or shorted.
**TROUBLE SYMPTOM:**
Gear is not changed. (No down-shift)
**WIRING DIAGRAM:**
CVT Control System <Ref. to WI-66, CVT Control System.>



| Step | | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK HARNESS.**<br>1) Turn the ignition switch to OFF.<br>2) Disconnect the TCM and transmission connectors.<br>3) Measure the resistance between TCM connector and transmission connectors.<br>***Connector & terminal***<br>***(B54) No. 25 — (B11) No. 3:*** | Is the resistance less than 1 Ω? | Go to step **2**. | Repair the open circuit of harness. |
| 2 | **CHECK HARNESS.**<br>1) Turn the ignition switch to ON.<br>2) Measure the voltage between TCM connector and chassis ground.<br>***Connector & terminal***<br>***(B54) No. 25 (+) — Chassis ground (–):*** | Is the voltage approx. 0 V? | Go to step **3**. | Repair the short circuit of harness. |
| 3 | **CHECK PRIMARY DOWN SOLENOID.**<br>Measure the resistance between transmission connector and transmission body.<br>***Connector & terminal***<br>***(T4) No. 3 — Transmission body:*** | Is the resistance approx. 13 Ω? (when engine cold) | Check for poor contact of the connector, and repair the defective part. | Go to step **4**. |
| 4 | **CHECK HARNESS INSIDE TRANSMISSION.**<br>**CAUTION:**<br>**Start work after ATF cools down.**<br>1) Remove the transmission valve cover.<br>2) Check for the harness pinch, damage. | Is the harness normal? | Go to step **5**. | Replace the transmission harness. |

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 5 | **CHECK HARNESS INSIDE TRANSMISSION.**<br>1) Disconnect the control valve body connector.<br>2) Turn the ignition switch to ON.<br>3) Measure the voltage between transmission connector and transmission body.<br>***Connector & terminal***<br>***(T4) No. 3 (+) — Transmission body (–):*** | Is the voltage approx. 0 V? | Replace the control valve body. <Ref. to CVT-110, Control Valve Body.> | Replace the transmission harness. |

## Z: DTC P170A L-RANGE SW SYSTEM

NOTE:
Refer to “DTC P0951 MANUAL SWITCH” for diagnostic procedure. <Ref. to CVT(diag)-54, DTC P0951 MANUAL SWITCH, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>

## AA:DTC P1724 AT EEPROM ERROR

**DTC DETECTING CONDITION:**

- TCM EEPROM malfunction
- EEPROM writing error during self shut control

**TROUBLE SYMPTOM:**

- AT learning is not finished.
- Shock occurs when selecting N → D, N → R.

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK TCM CONNECTOR.** | Is the connection of TCM connector correct? | Go to step **2**. | Connect the TCM connector. |
| 2 | **CHECK SELF SHUT RELAY.**<br>Turn the ignition switch to ON. | Does the relay operates simultaneously? | Go to step **3**. | Perform the diagnosis according to DTC P0890. |
| 3 | **CHECK SELF SHUT RELAY.**<br>Turn the ignition switch to OFF. | Does the relay operate after two or three seconds delay? | Go to step **4**. | Perform the diagnosis according to DTC P0890. |
| 4 | **PERFORM AT LEARNING.**<br>1) Perform {Clear AT learning value}.<br>2) Perform the AT learning. <Ref. to CVT(diag)-21, Learning Control.><br>3) Start the engine. | Does the AT OIL TEMP light blink after AT learning is finished correctly? | Check the TCM. | Go to step **5**. |
| 5 | **CHECK FOR ANY OTHER DTC ON DISPLAY.**<br>1) Perform the {Clear Memory}.<br>2) Turn the ignition switch to OFF.<br>3) Start the engine after 10 seconds.<br>4) Repeat steps 2) and 3). | Does the AT OIL TEMP light blink and is DTC P1724 displayed? | Check the TCM. | Current condition is normal. Check for poor contact of TCM connector or harness. |

# AB:DTC P2746 PRIMARY PULLEY REVOLUTION SPEED SENSOR CIRCUIT

**DTC DETECTING CONDITION:**

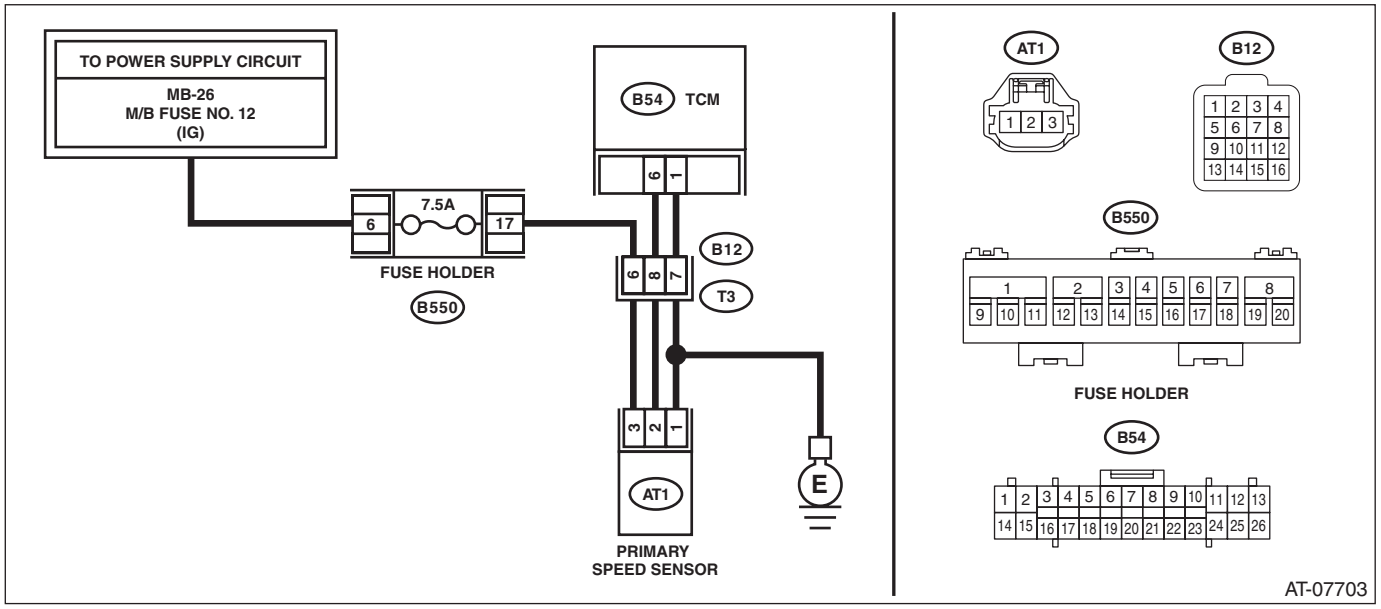
- Output signal circuit of primary speed sensor is open or shorted.
- Primary speed sensor malfunction

**TROUBLE SYMPTOM:**

- Standing start problems
- Shock occurs when engaging the lockup clutch.
- Shock occurs when selecting shift position.

**WIRING DIAGRAM:**

CVT Control System <Ref. to WI-66, CVT Control System.>



| Step | | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK FUSE.**<br>1) Turn the ignition switch to OFF.<br>2) Remove the fuse (7.5 A) from the fuse holder. | Is the fuse OK? | Go to step **2**. | Replace the fuse. If the fuse blows out easily, repair the short circuit of harness. |
| 2 | **CHECK HARNESS.**<br>1) Turn the ignition switch to OFF.<br>2) Disconnect the TCM and transmission connectors.<br>3) Measure the resistance between TCM connector and transmission connectors.<br>***Connector & terminal***<br>***(B54) No. 1 — (B12) No. 7:***<br>***(B54) No. 6 — (B12) No. 8:***<br>***(B550) No. 17 — (B12) No. 6:*** | Is the resistance less than 1 Ω? | Go to step **3**. | Repair the open circuit of harness. |
| 3 | **CHECK HARNESS.**<br>Measure the resistance between TCM connector and chassis ground.<br>***Connector & terminal***<br>***(B54) No. 6 — Chassis ground:*** | Is the resistance 1 MΩ or more? | Go to step **4**. | Repair the short circuit of harness. |
| 4 | **CHECK TRANSMISSION HARNESS.**<br>1) Connect the TCM connector.<br>2) Turn the ignition switch to ON.<br>3) Measure the voltage between transmission connector terminals.<br>***Connector & terminal***<br>***(B12) No. 6 (+) — (B12) No. 7 (–):*** | Is the voltage 10 — 13 V? | Go to step **5**. | Repair the open circuit of harness or poor contact of connector. |

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 5 | **CHECK INPUT SIGNAL FOR TCM.**<br>1) Turn the ignition switch to OFF.<br>2) Connect the transmission connector.<br>3) Lift up the vehicle.<br>4) Start the engine.<br>5) Set the select lever to “D” range.<br>6) Read the data of «Primary Pulley Speed» using Subaru Select Monitor. | Does the value of «Primary Pulley Speed» change according to those of «Turbine Revolution Speed»? | Current condition is normal. Repair the poor contacts of harnesses of primary speed sensor and transmission connector. | Go to step **6**. |
| 6 | **CHECK TRANSMISSION HARNESS.**<br>1) Turn the ignition switch to OFF.<br>2) Disconnect the transmission connector.<br>3) Disconnect the primary speed sensor connector.<br>4) Measure the resistance between transmission connector and primary speed sensor connector.<br>***Connector & terminal***<br>***(T3) No. 6 — (AT1) No. 3:***<br>***(T3) No. 7 — (AT1) No. 1:***<br>***(T3) No. 8 — (AT1) No. 2:*** | Is the resistance less than 1 Ω? | Replace the primary speed sensor. <Ref. to CVT-101, Primary Speed Sensor.> | Replace the transmission harness. |

# AC:DTC P2750 SEC. PULLEY REVOLUTION SPEED SENSOR CIRCUIT

**DTC DETECTING CONDITION:**

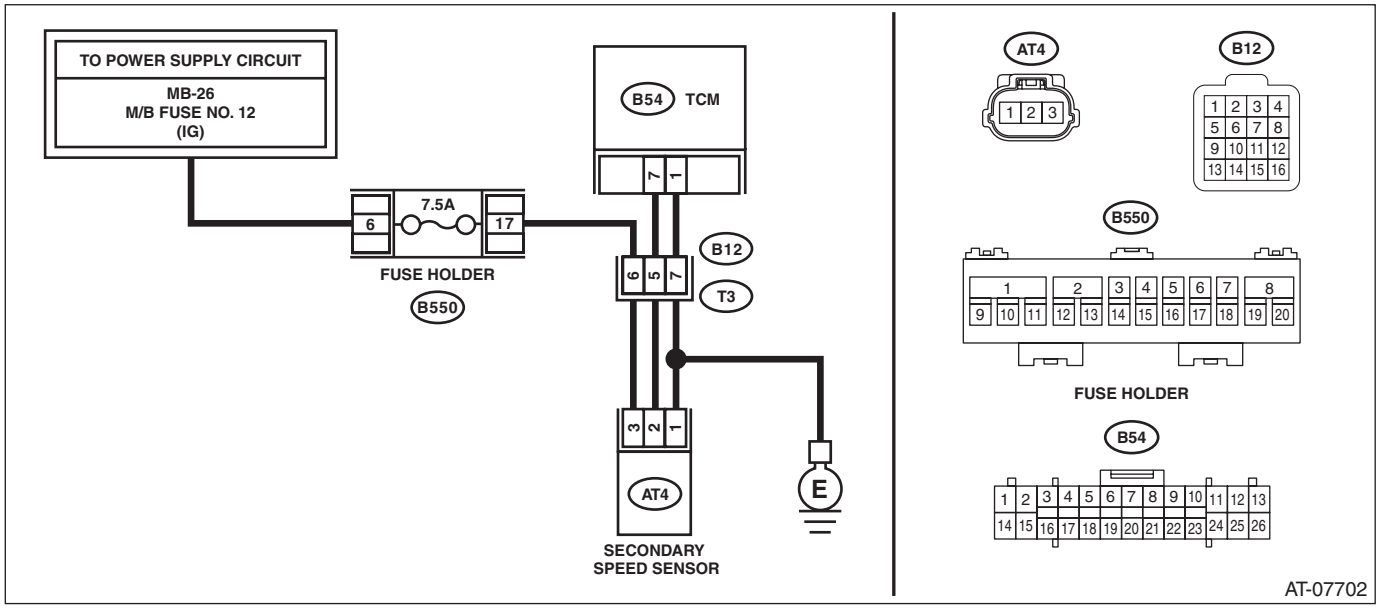
- Output signal circuit of secondary speed sensor is open or shorted.
- Secondary speed sensor malfunction

**TROUBLE SYMPTOM:**

- Shifting shock is felt.
- Acceleration is poor during standing start.
- Shift control malfunction

**WIRING DIAGRAM:**

CVT Control System <Ref. to WI-66, CVT Control System.>



| Step | | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK FUSE.**<br>1) Turn the ignition switch to OFF.<br>2) Remove the fuse (7.5 A) from the fuse holder. | Is the fuse OK? | Go to step **2**. | Replace the fuse. If the fuse blows out easily, repair the short circuit of harness. |
| 2 | **CHECK HARNESS.**<br>1) Turn the ignition switch to OFF.<br>2) Disconnect the TCM and transmission connectors.<br>3) Measure the resistance between TCM connector and transmission connectors.<br>***Connector & terminal***<br>***(B54) No. 1 — (B12) No. 7:***<br>***(B54) No. 7 — (B12) No. 5:***<br>***(B550) No. 17 — (B12) No. 6:*** | Is the resistance less than 1 Ω? | Go to step **3**. | Repair the open circuit of harness. |
| 3 | **CHECK HARNESS.**<br>Measure the resistance between TCM connector and chassis ground.<br>***Connector & terminal***<br>***(B54) No. 7 — Chassis ground:*** | Is the resistance 1 MΩ or more? | Go to step **4**. | Repair the short circuit of harness. |
| 4 | **CHECK TRANSMISSION HARNESS.**<br>1) Connect the TCM connector.<br>2) Turn the ignition switch to ON.<br>3) Measure the voltage between transmission connector terminals.<br>***Connector & terminal***<br>***(B12) No. 6 (+) — (B12) No. 7 (–):*** | Is the voltage 10 — 13 V? | Go to step **5**. | Repair the open circuit of harness or poor contact of connector. |

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 5 | **CHECK INPUT SIGNAL FOR TCM.**<br>1) Turn the ignition switch to OFF.<br>2) Connect the transmission connector.<br>3) Lift up the vehicle.<br>4) Start the engine.<br>5) Set the select lever to “D” range.<br>6) Read the data of «Secondary Pulley Speed» using Subaru Select Monitor. | Does the value of «Secondary Pulley Speed» change according to those of «Front Wheel Speed»? | Current condition is normal. Repair the poor contacts of harnesses of secondary speed sensor and transmission connector. | Go to step **6**. |
| 6 | **CHECK TRANSMISSION HARNESS.**<br>1) Turn the ignition switch to OFF.<br>2) Disconnect the transmission connector.<br>3) Disconnect the secondary speed sensor connector.<br>4) Measure the resistance between transmission connector and secondary speed sensor connector.<br>***Connector & terminal***<br>***(T3) No. 5 — (AT4) No. 2:***<br>***(T3) No. 6 — (AT4) No. 3:***<br>***(T3) No. 7 — (AT4) No. 1:*** | Is the resistance less than 1 Ω? | Replace the secondary speed sensor. <Ref. to CVT-99, Secondary Speed Sensor.> | Replace the transmission harness. |

## AD:DTC P2762 LOCK-UP DUTY SOLENOID MALFUNCTION

**DTC DETECTING CONDITION:**

- Lock up clutch malfunction
- Hydraulic leaks or hydraulic valve stick of lock up system

**TROUBLE SYMPTOM:**

- No lock-up occurs.
- Engine speed increases abruptly during driving.

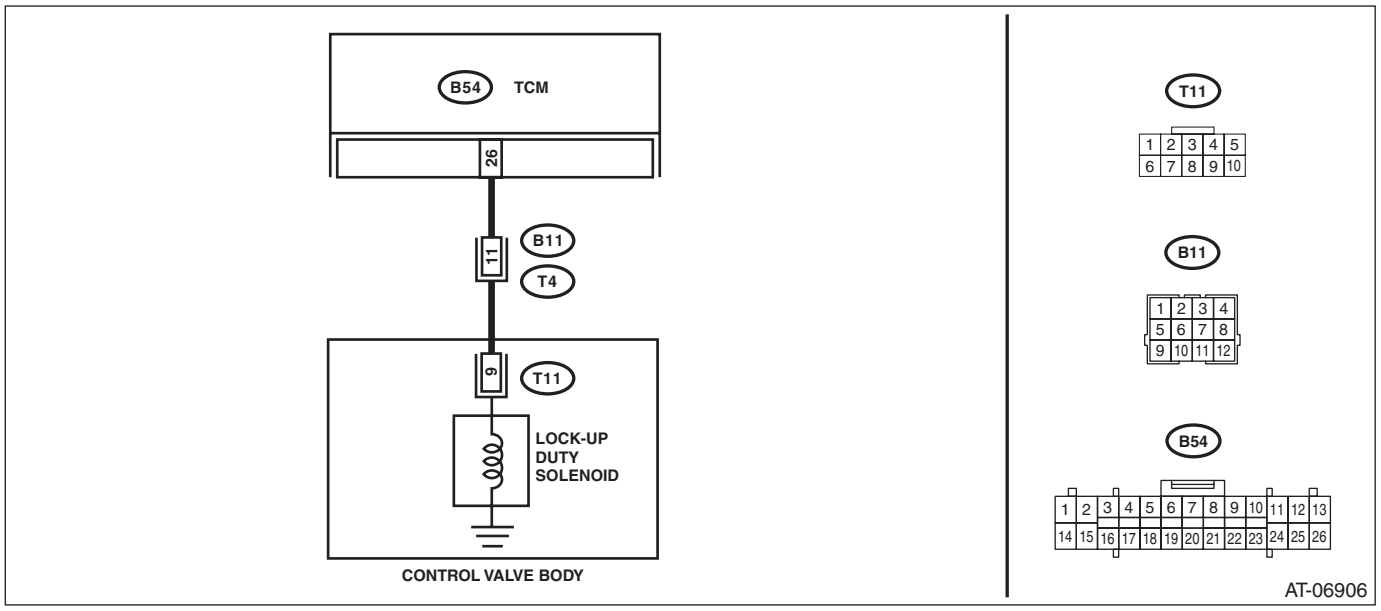
| | Step | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK DTC.**<br>Read the DTC relating the ECM using the Subaru Select Monitor. | Is DTC displayed? | Perform the diagnosis according to DTC. | Go to step **2**. |
| 2 | **CHECK DTC.**<br>Read the DTC relating the TCM using the Subaru Select Monitor. | Are DTC P0841, P0842, P0843 displayed? | Perform the diagnosis according to DTC. | Go to step **3**. |
| 3 | **CHECK TRANSMISSION FLUID.**<br>Check the condition of ATF. <Ref. to CVT-38, CONDITION CHECK, CVTF.> | Is the ATF OK? | Go to step **4**. | Check according to the "corrective action" of ATF (CVTF) "CONDITION CHECK". <Ref. to CVT-38, CONDITION CHECK, CVTF.> |
| 4 | **CHECK TRANSMISSION FLUID.**<br>Check the amount of ATF. <Ref. to CVT-34, ADJUSTMENT, CVTF.> | Is the ATF amount correct? | Go to step **5**. | Adjust the amount of ATF. <Ref. to CVT-34, ADJUSTMENT, CVTF.> |
| 5 | **CHECK INPUT SIGNAL FOR TCM.**<br>1) Lift up the vehicle.<br>2) Start the engine.<br>3) Warm up until the ATF temperature reaches to 40 — 70°C (104 — 158°F).<br>4) Shift the select lever to "P" range.<br>5) Stabilize the engine speed at idle.<br>6) Read the data of «Actual secondary pressure» using Subaru Select Monitor. | Is the «Actual secondary pressure» 0.5 — 1.5 MPa? | Go to step **6**. | Perform the diagnosis according to DTC P0841 procedure. |
| 6 | **DRIVING CHECK FOR LOCK-UP CONDITION.**<br>1) Perform the "Clear Memory Mode". <Ref. to CVT(diag)-19, Clear Memory Mode.><br>2) Turn the ignition switch to OFF.<br>3) Start the engine.<br>4) Warm up until the ATF temperature exceeds 50°C.<br>5) Drive the vehicle for one minute or more while keeping the constant speed so that the display shown in the Subaru Select Monitor is as follows: «Lock Up Duty Ratio» is 70 % or more, and «Front Wheel Speed» is 40 km/h or more.<br>6) Turn the ignition switch to OFF.<br>7) Start the engine.<br>8) Perform the procedure in step 5) again.<br>9) Read the DTC using Subaru Select Monitor. | Does the AT OIL TEMP light blink and is DTC P2762 displayed? | Perform the secondary pressure test. <Ref. to CVT-47, Secondary Pressure (Line Pressure) Test.> When DTC other than P2762 is displayed, perform the diagnosis corresponding to the DTC. | Current condition is normal. Temporary oil pressure malfunction. |

# AE:DTC P2763 LOCK-UP DUTY SOLENOID CIRCUIT (HIGH)

**DTC DETECTING CONDITION:**
Output signal circuit of lock-up duty solenoid is open or shorted.

**TROUBLE SYMPTOM:**
- No lock-up occurs.
- Engine stalls.

**WIRING DIAGRAM:**
CVT Control System <Ref. to WI-66, CVT Control System.>

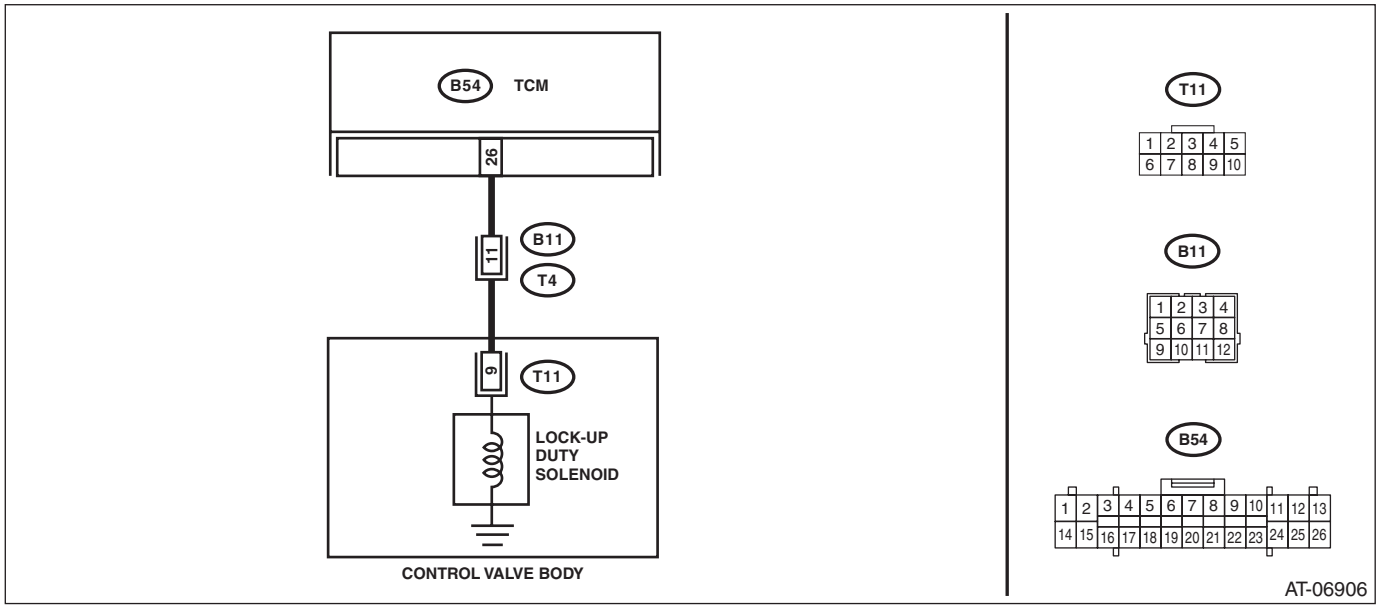


| | Step | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK HARNESS.**<br>1) Turn the ignition switch to OFF.<br>2) Disconnect the TCM and transmission connectors.<br>3) Measure the resistance between TCM connector and transmission connectors.<br>***Connector & terminal***<br>***(B54) No. 26 — (B11) No. 11:*** | Is the resistance less than 1 Ω? | Go to step **2**. | Repair the open circuit of harness. |
| 2 | **CHECK HARNESS.**<br>1) Turn the ignition switch to ON.<br>2) Measure the voltage between TCM connector and chassis ground.<br>***Connector & terminal***<br>***(B54) No. 26 (+) — Chassis ground (–):*** | Is the voltage approx. 0 V? | Go to step **3**. | Repair the short circuit of harness. |
| 3 | **CHECK LOCK-UP DUTY SOLENOID.**<br>Measure the resistance between transmission connector and transmission body.<br>***Connector & terminal***<br>***(T4) No. 11 — Transmission body:*** | Is the resistance approx. 13 Ω? (when engine cold) | Check for poor contact of the connector, and repair the defective part. | Go to step **4**. |
| 4 | **CHECK HARNESS INSIDE TRANSMISSION.**<br>**CAUTION:**<br>**Start work after ATF cools down.**<br>1) Remove the transmission valve cover.<br>2) Check for the harness pinch, damage. | Is the harness normal? | Go to step **5**. | Replace the transmission harness. |

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 5 | **CHECK HARNESS INSIDE TRANSMISSION.**<br>1) Disconnect the control valve body connector.<br>2) Turn the ignition switch to ON.<br>3) Measure the voltage between transmission connector and transmission body.<br>***Connector & terminal***<br>***(T4) No. 11 (+) — Transmission body (–):*** | Is the voltage approx. 0 V? | Replace the control valve body. <Ref. to CVT-110, Control Valve Body.> | Replace the transmission harness. |

# AF:DTC P2764 LOCK-UP DUTY SOLENOID CIRCUIT (LOW)

**DTC DETECTING CONDITION:**
Output signal circuit of lock up duty solenoid is shorted.
**TROUBLE SYMPTOM:**
No lock-up occurs.
**WIRING DIAGRAM:**
CVT Control System <Ref. to WI-66, CVT Control System.>



| Step | | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK HARNESS.**<br>1) Turn the ignition switch to OFF.<br>2) Disconnect the TCM and transmission connectors.<br>3) Measure the resistance between TCM connector and chassis ground.<br>***Connector & terminal***<br>***(B54) No. 26 — Chassis ground:*** | Is the resistance 1 MΩ or more? | Go to step **2**. | Repair the short circuit of harness. |
| 2 | **CHECK LOCK-UP DUTY SOLENOID.**<br>Measure the resistance between transmission connector and transmission body.<br>***Connector & terminal***<br>***(T4) No. 11 — Transmission body:*** | Is the resistance approx. 13 Ω? (when engine cold) | Check for poor contact of the connector, and repair the defective part. | Go to step **3**. |
| 3 | **CHECK HARNESS INSIDE TRANSMISSION.**<br>**CAUTION:**<br>**Start work after ATF cools down.**<br>1) Remove the transmission valve cover.<br>2) Check for the harness pinch, damage. | Is the harness normal? | Go to step **4**. | Replace the transmission harness. |
| 4 | **CHECK HARNESS INSIDE TRANSMISSION.**<br>1) Disconnect the control valve body connector.<br>2) Measure the resistance between transmission connector and transmission body.<br>***Connector & terminal***<br>***(T4) No. 11 — Transmission body:*** | Is the resistance 1 MΩ or more? | Replace the control valve body. <Ref. to CVT-110, Control Valve Body.> | Replace the transmission harness. |

# 16.Diagnostic Procedure without Diagnostic Trouble Code (DTC)

## A: CHECK SHIFT INDICATOR

**DIAGNOSIS:**

- Output signal circuit of shift indicator is open or shorted.
- Combination meter malfunction

**TROUBLE SYMPTOM:**

- Shift indicator does not display or remains displayed.
- Shift indicator display does not change.

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK TCM.**<br>Check the DTC relating the TCM using the Subaru Select Monitor. | Is DTC U0155 or U0423 displayed? | Perform the self-diagnosis of combination meter. | Go to step **2**. |
| 2 | **CHECK TCM.**<br>Check the DTC relating the TCM using the Subaru Select Monitor. | Are DTCs other than U0155 and U0423 displayed? | Perform the diagnosis according to DTC. | Go to step **3**. |
| 3 | **CHECK COMBINATION METER.**<br>Check the DTC of combination meter. | Is DTC displayed? | Perform the diagnosis according to DTC. | Go to step **4**. |
| 4 | **CHECK TCM.**<br>1) Operate the + side of the paddle shift switch.<br>2) Read the data of «Up Switch» using the Subaru Select Monitor. | Does it change between ON and OFF according to the operation? | Go to step **5**. | Check for poor contact between TCM and paddle shift UP switch, and repair the defective part. |
| 5 | **CHECK TCM.**<br>1) Operate the – side of the paddle shift switch.<br>2) Read the data of «Down Switch» using the Subaru Select Monitor. | Does it change between ON and OFF according to the operation? | Go to step **6**. | Check for poor contact between TCM and paddle shift DOWN switch, and repair the defective part. |
| 6 | **CHECK TCM.**<br>1) Turn the ignition switch OFF, then turn it ON again.<br>2) Shift the select lever to manual mode.<br>3) Read the data of «Shift Step in Manual Mode» using the Subaru Select Monitor. | Is “1” displayed? | Go to step **7**. | Perform the diagnosis according to DTC P0951. |
| 7 | **CHECK TCM.**<br>1) Shift up the select lever.<br>2) Read the data of «Shift Step in Manual Mode» using the Subaru Select Monitor. | Is “2” displayed? | Currently, shift indicator is normal. | Check the TCM. |

# 17.Diagnostics with Phenomenon

## A: INSPECTION

| Symptoms | Faulty parts |
|---|---|
| Engine stalls when driving in “D” or “R” range, or selecting “N” → “D”, “N” → “R”. | • Control valve<br>• Engine control system |
| While driving in “D” range, vibration occurs immediately before the stop or engine stalls. | • Control valve<br>• Torque converter |
| Vehicle cannot shift while driving in “D” range. | • Control valve<br>• TCM<br>• Shift mechanism<br>• Power supply system |
| Excessive shock when selecting “N” → “D”, and “N” → “R”. | • Control valve<br>• TCM<br>• F&R clutch pack<br>• ATF deterioration or lack |
| Excessive shock at standing start in “D” range. | • Control valve<br>• TCM<br>• F&R clutch pack<br>• ATF deterioration or lack |
| Engine speed increases abruptly during driving in “D” or “R” range. | • Control valve<br>• Secondary pressure sensor<br>• F&R clutch pack<br>• ATF deterioration or lack |
| Vehicle can not start when depressing the accelerator pedal in “D” or “R” range, or acceleration is very poor. (without abrupt engine increase) | • Control valve<br>• F&R clutch pack<br>• Shift mechanism<br>• Parking mechanism<br>• Engine control system<br>• Power supply system |
| Shift indicator in combination meter displays the position which differs from select lever position. | • Inhibitor switch<br>• Select cable related<br>• Combination meter |
| Manual mode enters even though the select lever and paddle shift switch is not operated. | • Manual mode switch<br>• Paddle shift switch<br>• Select lever<br>• TCM |
| Engine speed increases abruptly in “D” or “R” range, vehicle can not start. | • F&R clutch pack<br>• Select cable related |
| Manual mode can not be set | • Select lever<br>• TCM |

# 1. General Description

## A: SPECIFICATION

### 1. MANUAL TRANSMISSION AND DIFFERENTIAL

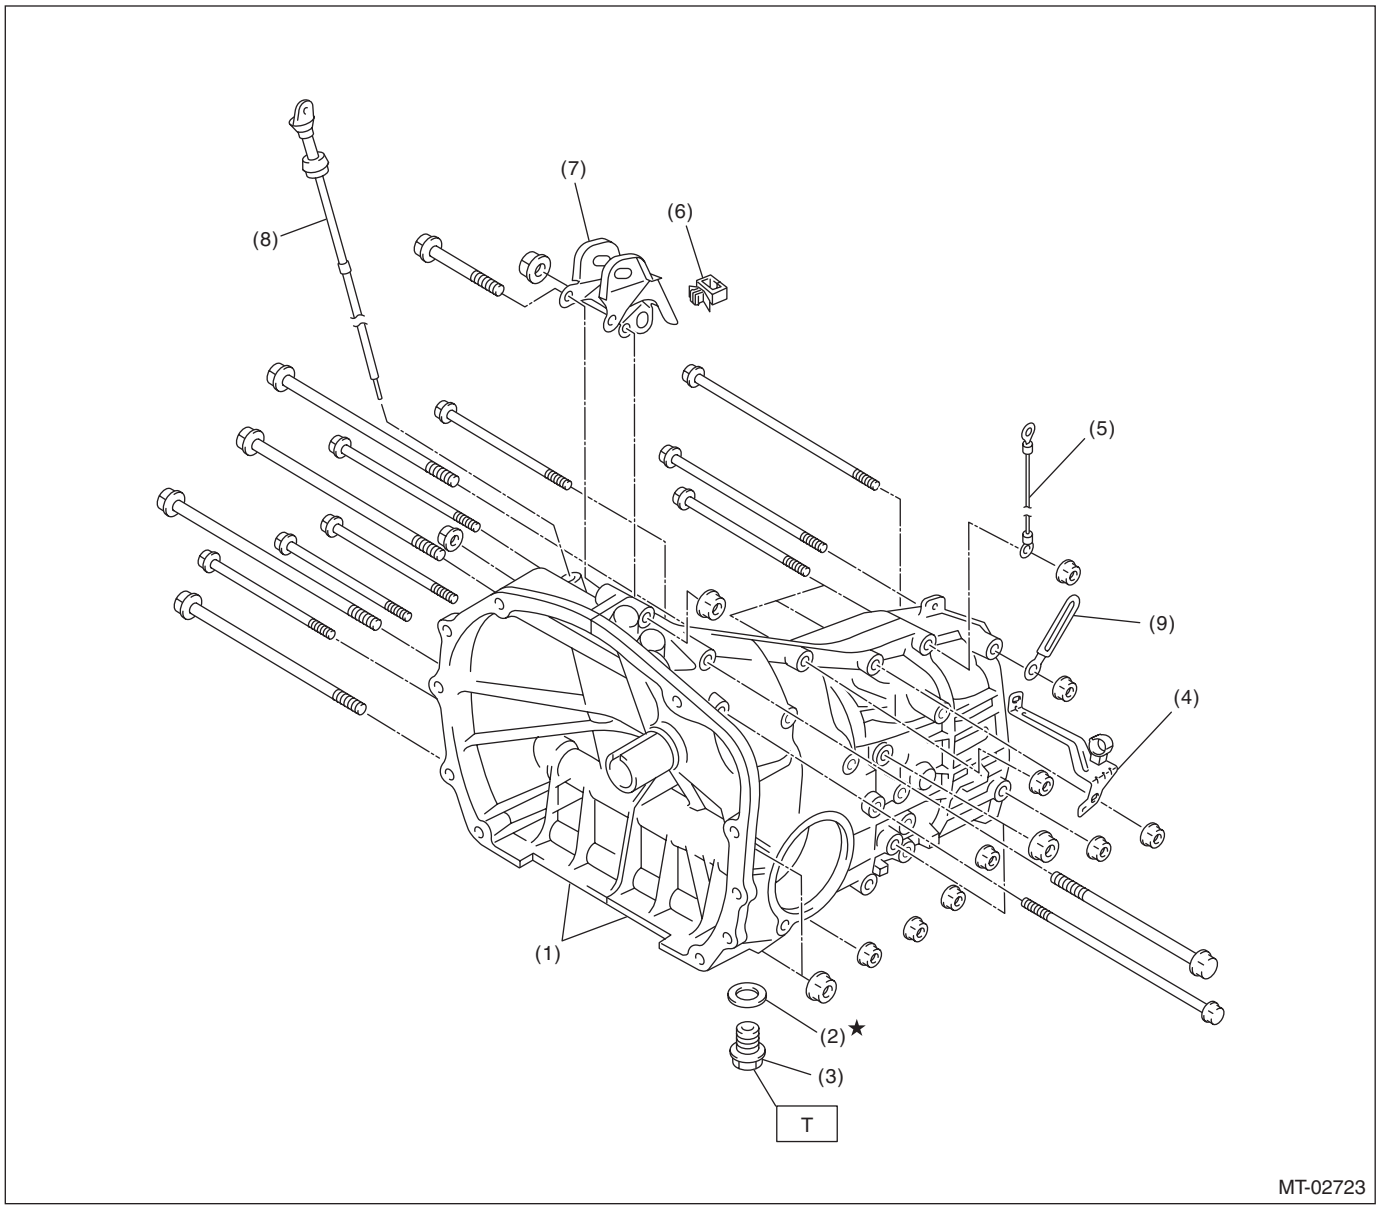
| Model | | | Except for XV model | XV model |
|---|---|---|---|---|
| Type | | | 5-forward speeds and 1-reverse (all stage with synchromesh) | |
| Transmission gear ratio | | 1st | 3.454 | 3.545 |
| | | 2nd | 1.888 | |
| | | 3rd | 1.296 | |
| | | 4th | 0.972 | |
| | | 5th | 0.738 | 0.780 |
| | | Rev. | 3.333 | |
| Front reduction gear | Final | Type of gear | Hypoid | |
| | | Gear ratio | 4.111 | 4.444 |
| Rear reduction gear | Transfer | Type of gear | Helical | |
| | | Gear ratio | 1.000 | |
| | Final | Type of gear | Hypoid | |
| | | Gear ratio | 4.111 | 4.444 |
| Front differential | Type and number of gear | | Straight bevel gear (bevel pinion: 2, bevel gear: 2) | |
| Center differential | Type and number of gear | | Straight bevel gear (bevel pinion: 2, bevel gear: 2 and viscous coupling) | |
| Transmission gear oil | | | GL-5 | |
| Transmission gear oil capacity | | | 3.5 L (3.7 US qt, 3.1 Imp qt) | |

### 2. TRANSMISSION GEAR OIL

***Recommended oil:***
***GL-5 (75W-90) or equivalent***

# B: COMPONENT

## 1. TRANSMISSION CASE



| | | | |
|---|---|---|---|
| (1) | Transmission case ASSY | (6) | Clamp |
| (2) | Gasket | (7) | Pitching stopper bracket |
| (3) | Drain plug | (8) | Oil level gauge |
| (4) | Harness bracket | (9) | Harness clip |
| (5) | Transmission radio ground cord | | |

***Tightening torque: N·m (kgf-m, ft-lb)***

***T: 44 (4.5, 32.5) (Aluminum gasket, silver)***
***70 (7.1, 51.6) (Copper gasket, brown)***

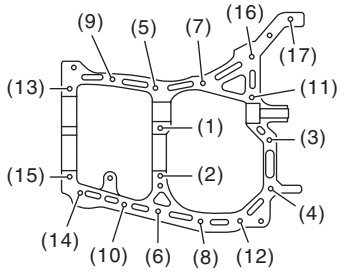
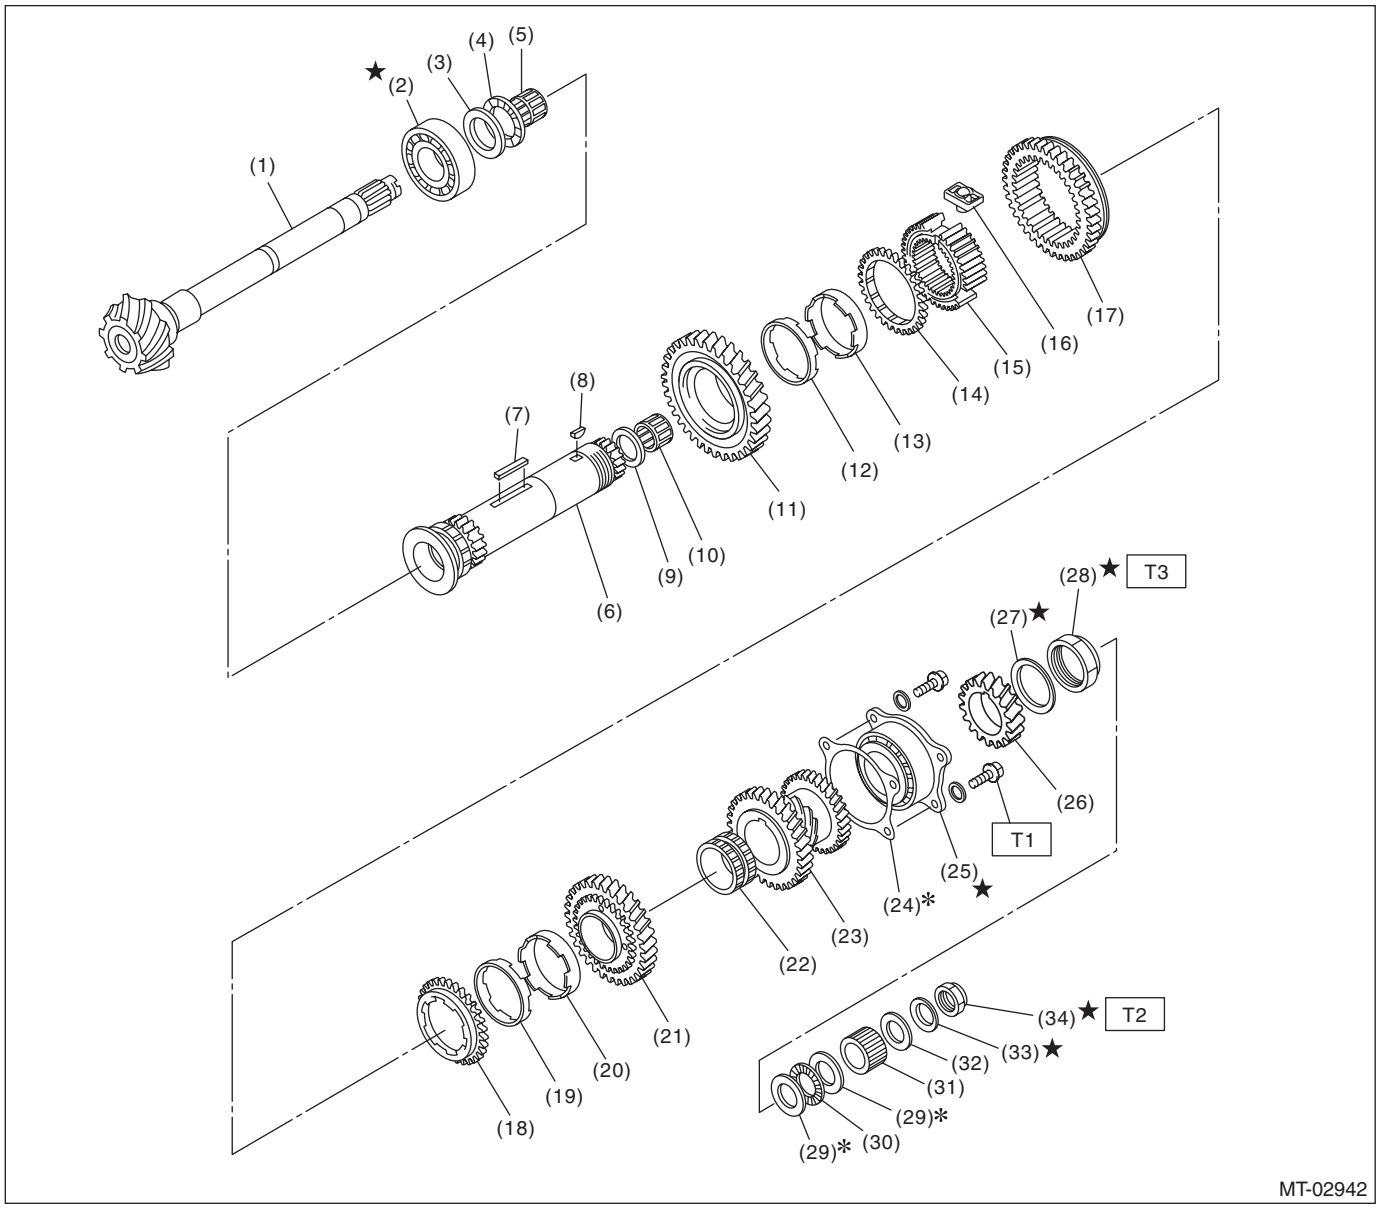
### Transmission case tightening torque



MT-00003

| Bolt No. | Bolt size mm | Tightening torque: N·m (kgf-m, ft-lb) |
|---|---|---|
| (5) — (15) | 8 | 25 (2.5, 18.4) |
| (1) — (4)<br>(16), (17) | 10 | 39 (4.0, 28.8) |

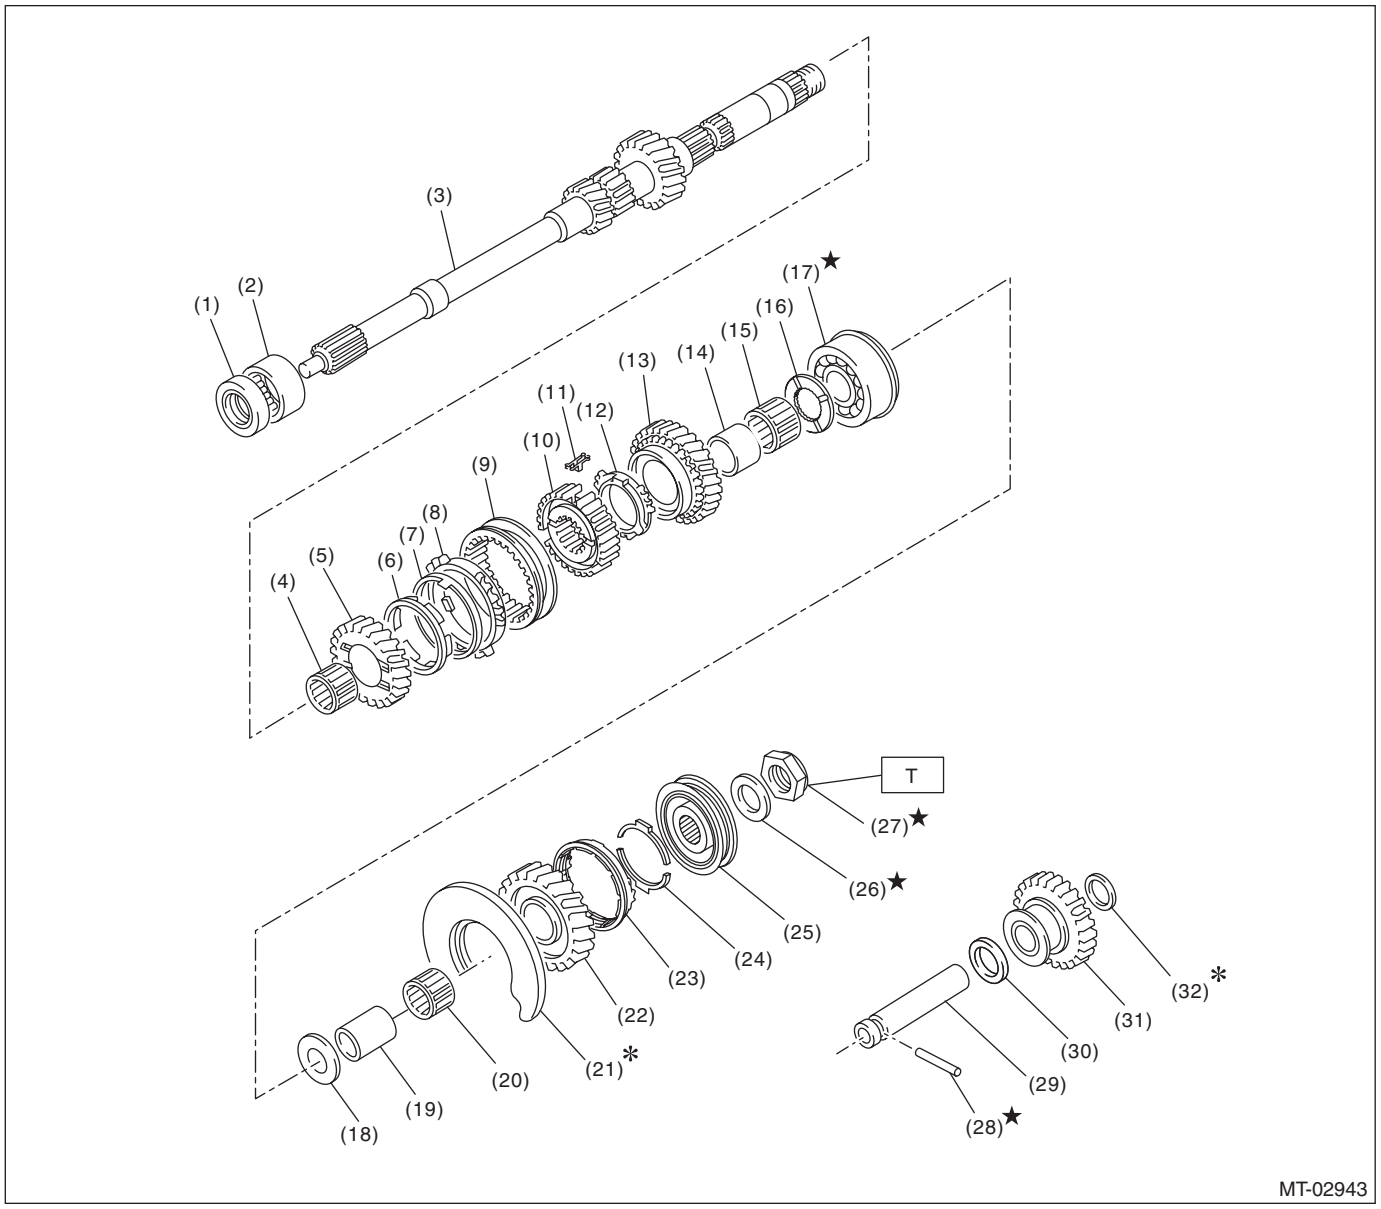
## 2. DRIVE PINION ASSEMBLY



(1) Drive pinion shaft
(2) Roller bearing
(3) Washer
(4) Thrust bearing
(5) Needle bearing
(6) Driven shaft
(7) Key
(8) Woodruff key
(9) Drive pinion collar
(10) Needle bearing
(11) 1st driven gear
(12) Inner baulk ring
(13) Synchro cone
(14) Outer baulk ring
(15) 1st-2nd synchronizer hub
(16) Ball detent
(17) Reverse driven gear
(18) Outer baulk ring
(19) Synchro cone
(20) Inner baulk ring
(21) 2nd driven gear
(22) 2nd driven gear bushing
(23) 3rd-4th driven gear
(24) Drive pinion shim
(25) Double taper roller bearing
(26) 5th driven gear
(27) Lock washer
(28) Lock nut
(29) Adjusting washer
(30) Thrust bearing
(31) Differential bevel gear sleeve
(32) Washer
(33) Lock washer
(34) Lock nut

***Tightening torque: N·m (kgf-m, ft-lb)***
***T1: 30 (3.1, 22.1)***
***T2: 120 (12.2, 88.5)***
***T3: 260 (26.5, 191.8)***

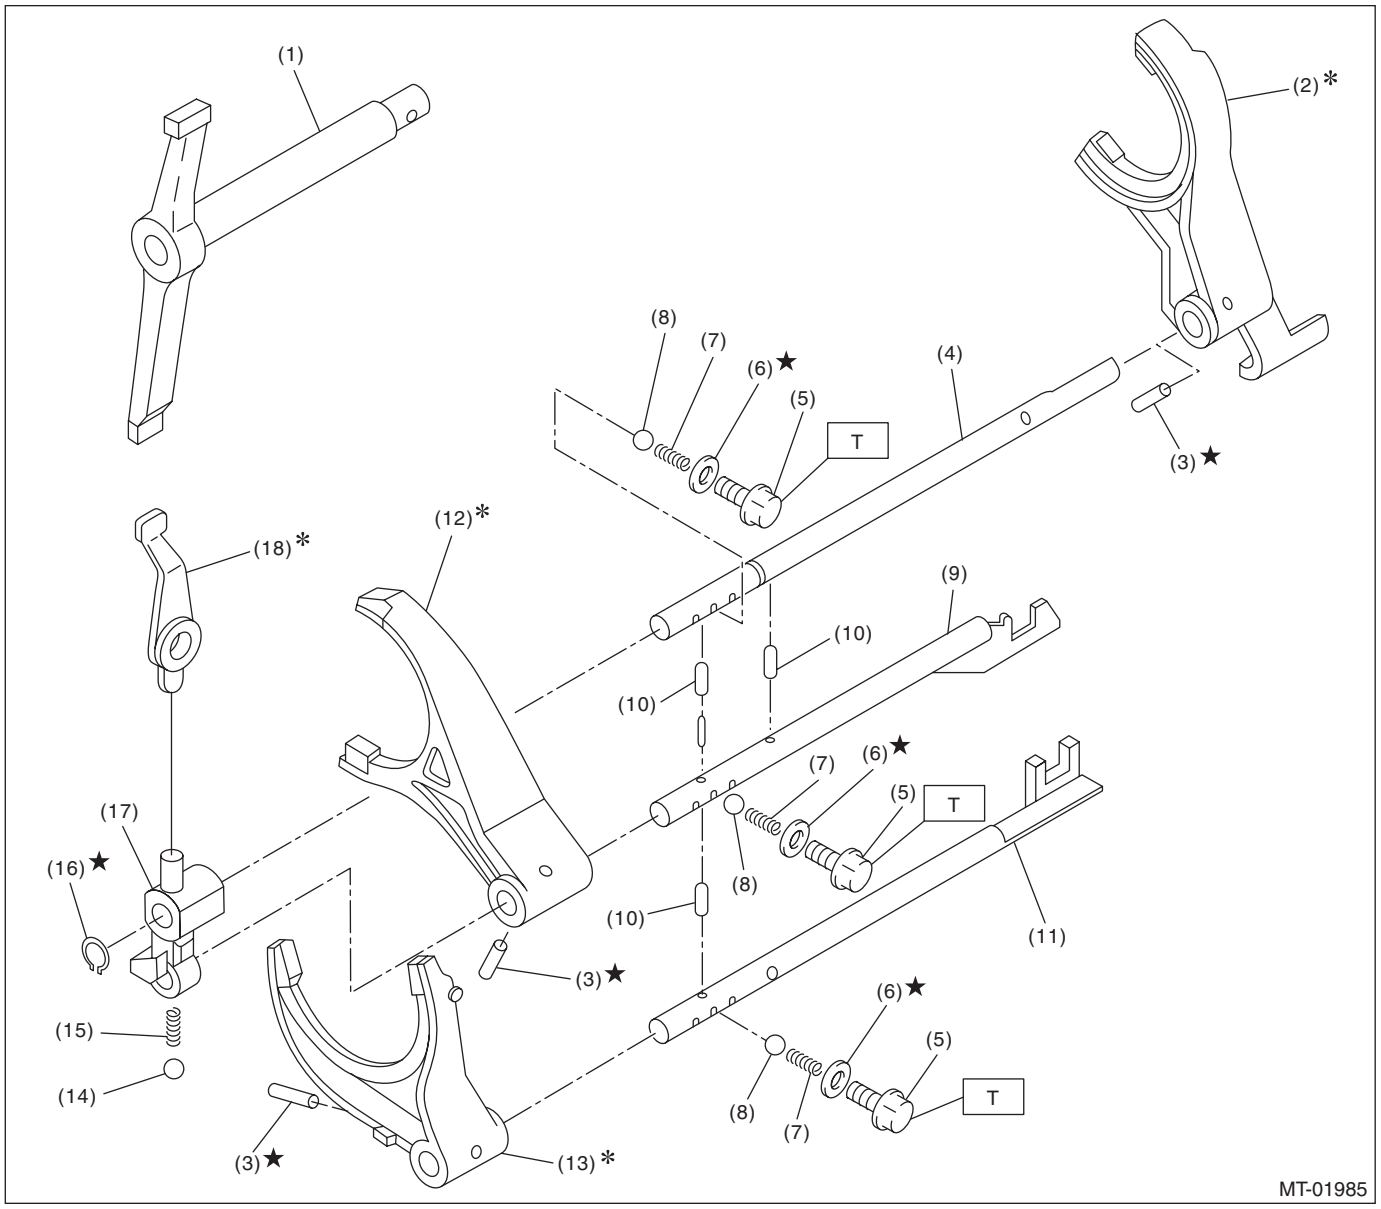
## 3. MAIN SHAFT FOR SINGLE-RANGE



(1) Oil seal
(2) Needle bearing
(3) Main shaft
(4) Needle bearing
(5) 3rd drive gear
(6) Inner baulk ring
(7) 3rd synchro cone
(8) Outer baulk ring
(9) 3rd-4th coupling sleeve
(10) 3rd-4th synchronizer hub
(11) 3rd-4th shifting insert key
(12) 4th baulk ring
(13) 4th drive gear
(14) 4th needle bearing race
(15) Needle bearing
(16) 4th gear thrust washer
(17) Double ball bearing
(18) 5th gear thrust washer
(19) 5th needle bearing race
(20) Needle bearing
(21) Main shaft rear plate
(22) 5th drive gear
(23) 5th baulk ring
(24) Baulk lever
(25) 5th hub & sleeve No. 2
(26) Lock washer
(27) Lock nut
(28) Straight pin
(29) Reverse idler gear shaft
(30) Washer
(31) Reverse idler gear
(32) Washer

***Tightening torque: N·m (kgf-m, ft-lb)***
***T: 120 (12.2, 88.5)***

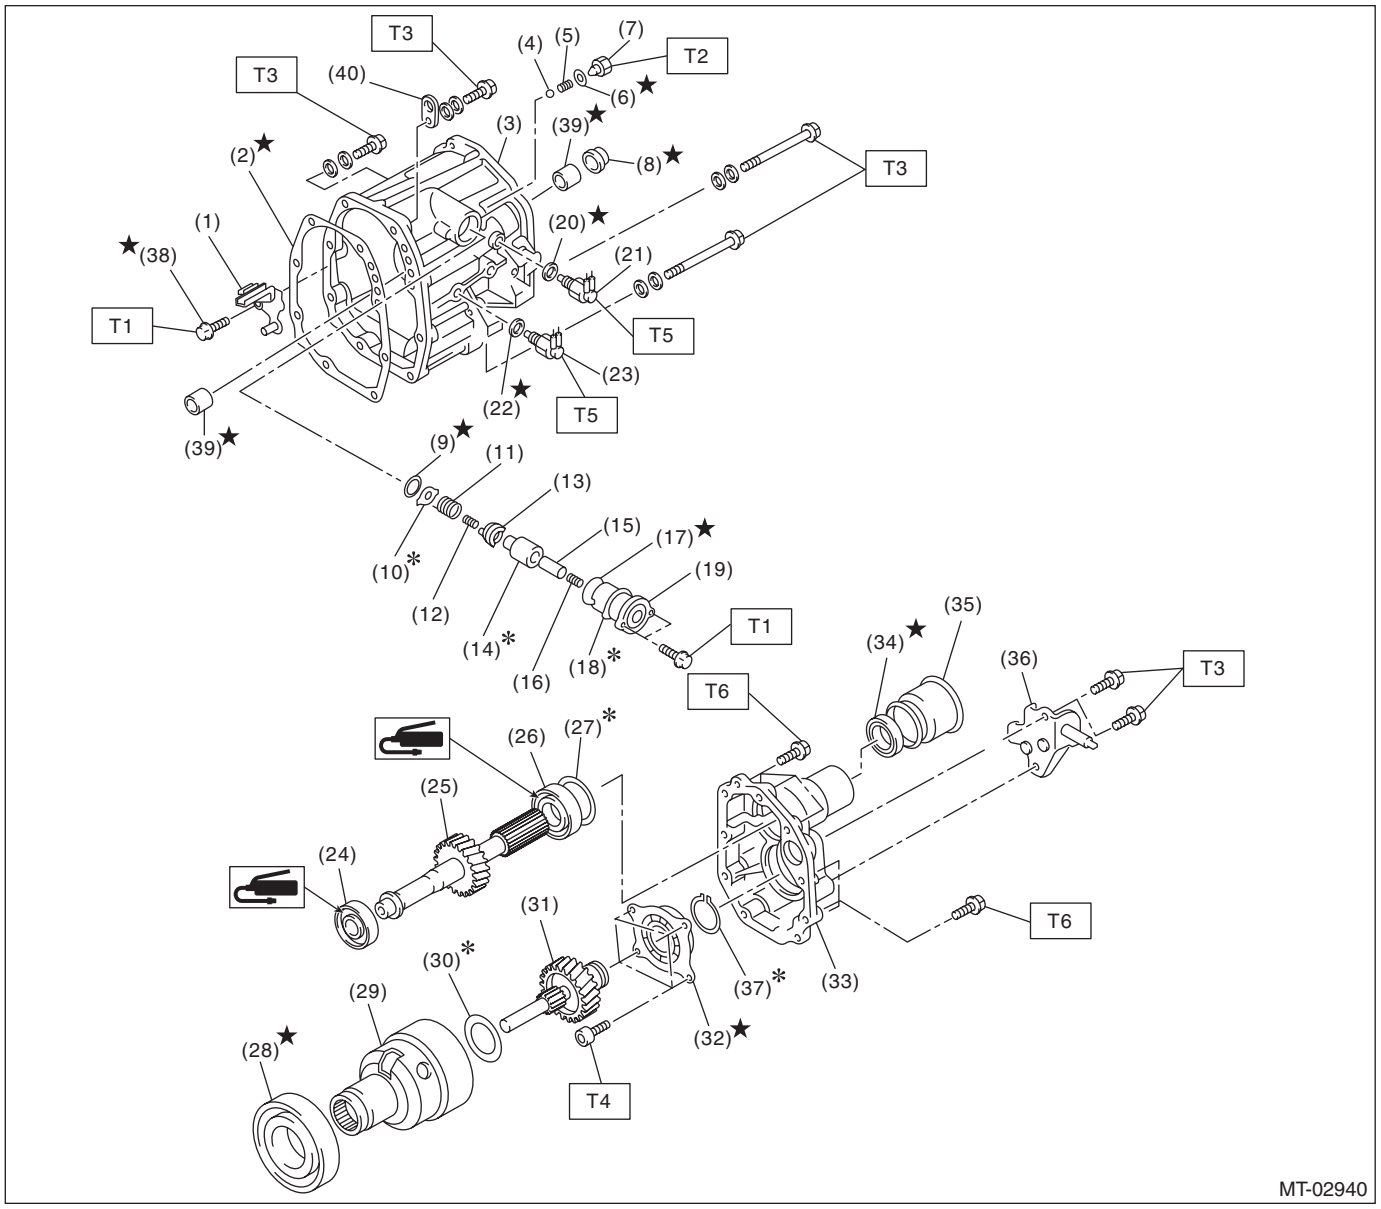
## 4. SHIFTER FORK AND SHIFTER ROD



(1) Shifter arm
(2) 5th shifter fork
(3) Straight pin
(4) Reverse fork rod
(5) Checking ball plug
(6) Gasket
(7) Checking ball spring
(8) Ball
(9) 3rd-4th fork rod
(10) Interlock plunger
(11) 1st-2nd fork rod
(12) 3rd-4th shifter fork
(13) 1st-2nd shifter fork
(14) Ball
(15) Spring
(16) Snap ring (outer)
(17) Reverse fork rod arm
(18) Reverse shifter lever

***Tightening torque: N·m (kgf-m, ft-lb)***
***T: 20 (2.0, 14.8)***

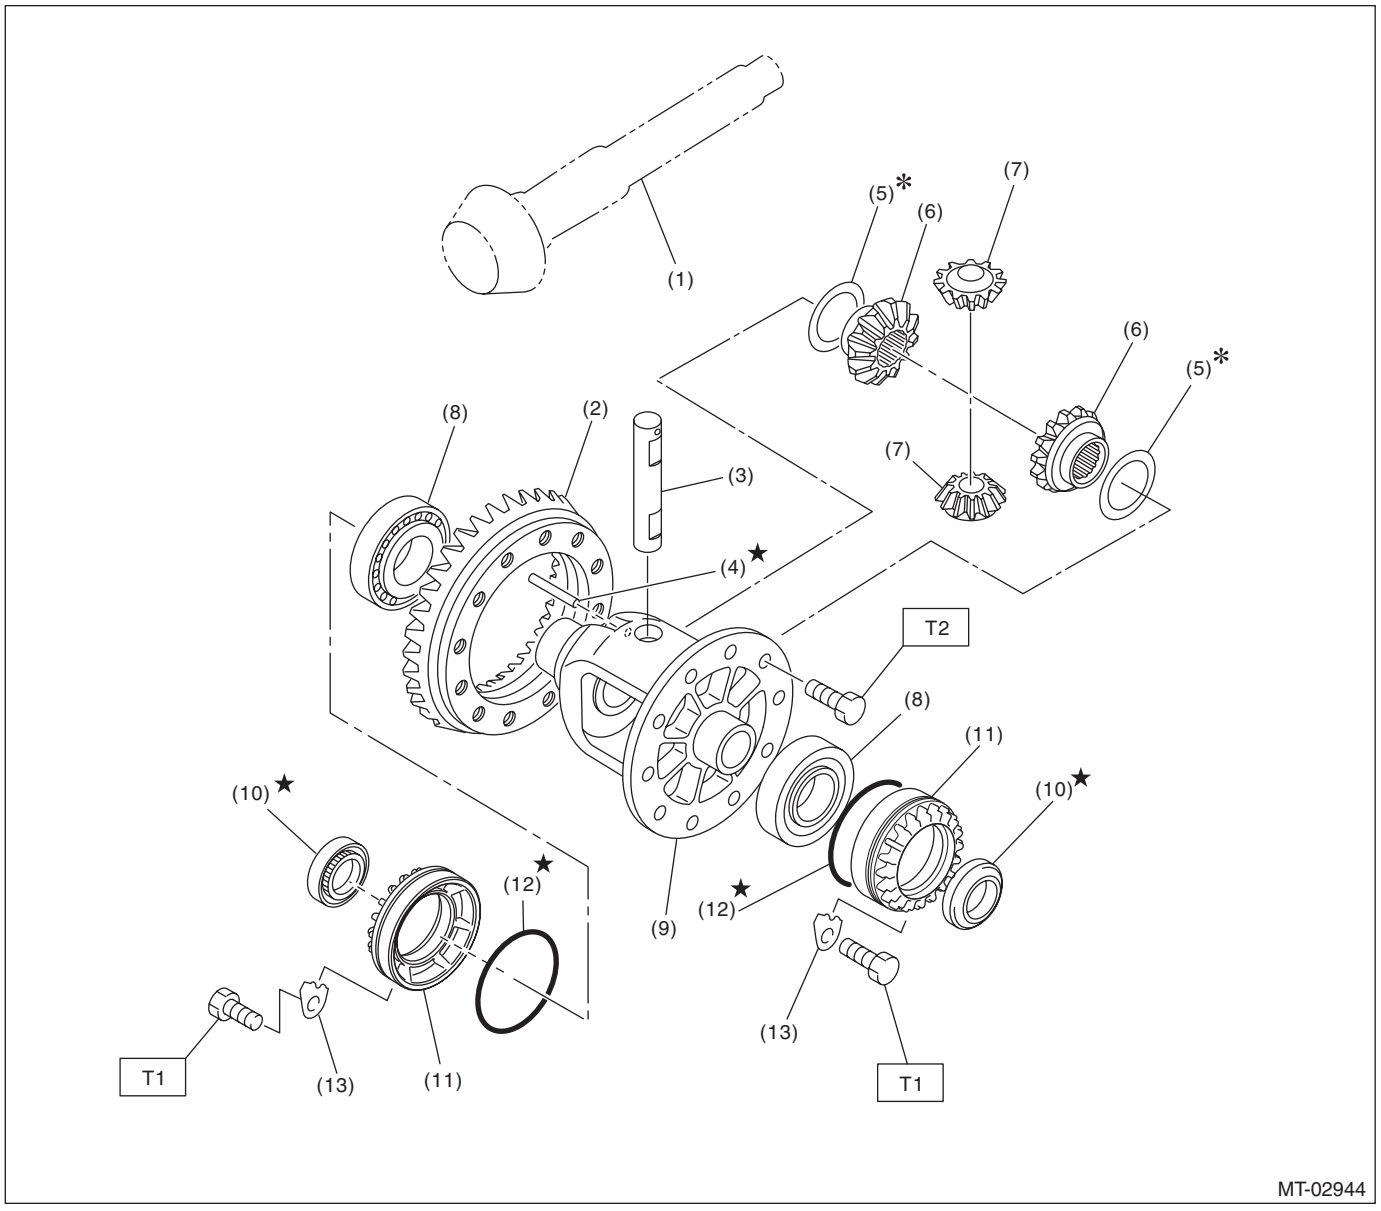
## 5. TRANSFER CASE AND EXTENSION



(1) Oil guide
(2) Gasket
(3) Transfer case
(4) Ball
(5) Reverse accent spring
(6) Gasket
(7) Plug
(8) Oil seal
(9) Snap ring (inner)
(10) Reverse check plate
(11) Reverse check spring
(12) Reverse return spring
(13) Reverse check cam
(14) Reverse accent shaft
(15) Return spring cap
(16) Return spring
(17) O-ring
(18) Adjusting select shim
(19) Reverse check sleeve
(20) Gasket
(21) Neutral position switch
(22) Gasket
(23) Back-up light switch
(24) Roller bearing
(25) Transfer driven gear
(26) Roller bearing
(27) Thrust washer
(28) Ball bearing
(29) Center differential
(30) Thrust washer
(31) Transfer drive gear
(32) Ball bearing
(33) Extension case
(34) Oil seal
(35) Dust cover
(36) Shift bracket
(37) Snap ring
(38) Precoat bolt
(39) Roller bearing
(40) Transmission hanger

***Tightening torque: N·m (kgf-m, ft-lb)***
***T1: 6.4 (0.7, 4.7)***
***T2: 9.75 (1.0, 7.2)***
***T3: 24.5 (2.5, 18.1)***
***T4: 26 (2.7, 19.2)***
***T5: 32.3 (3.3, 23.8)***
***T6: 40 (4.1, 29.5)***

## 6. FRONT DIFFERENTIAL



(1) Drive pinion shaft
(2) Hypoid driven gear
(3) Pinion shaft
(4) Straight pin
(5) Washer
(6) Differential bevel gear
(7) Differential bevel pinion
(8) Roller bearing
(9) Differential case
(10) Oil seal
(11) Differential side retainer
(12) O-ring
(13) Retainer lock plate

***Tightening torque: N·m (kgf-m, ft-lb)***

## C: CAUTION

• Wear appropriate work clothing, including a cap, protective goggles and protective shoes when performing any work.
• Remove contamination including dirt and corrosion before removal, installation or disassembly.
• Keep the disassembled parts in order and protect them from dust and dirt.
• Before removal, installation or disassembly, be sure to clarify the failure. Avoid unnecessary removal, installation, disassembly and replacement.
• When disassembling the case and other light alloy parts, use a plastic hammer to force it apart. Do not pry apart with screwdrivers or other tools.
• Vehicle components are extremely hot after driving. Be wary of receiving burns from heated parts.
• Use SUBARU genuine gear oil, grease or equivalent. Do not mix gear oil, grease, etc. of different grades or manufacturers.
• Be sure to tighten fasteners including bolts and nuts to the specified torque.
• Place shop jacks or rigid racks at the specified points.
• Apply gear oil onto sliding or revolving surfaces before installation.
• Replace deformed or damaged snap rings with new parts.
• Before installing O-rings or oil seals, apply sufficient amount of gear oil to avoid damage and deformation.
• Be careful not to incorrectly install or fail to install O-rings, snap rings and other such parts.
• Before securing a part on a vise, place cushioning material such as wood blocks, aluminum plate, or cloth between the part and the vise.
• Avoid damaging the mating surface of the case.
• Before applying liquid gasket, completely remove the old liquid gasket.

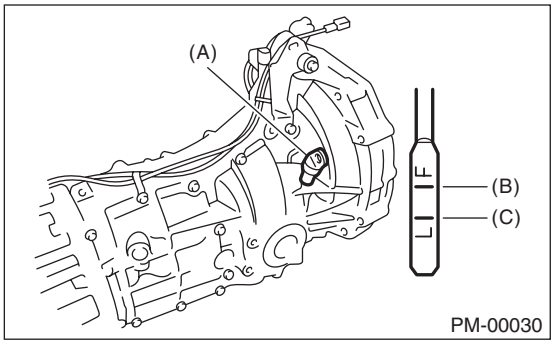
## 2. GENERAL TOOL

| TOOL NAME | REMARKS |
|---|---|
| Circuit tester | Used for measuring resistance, voltage and current. |
| TORX® bit T70 | Used for removing and installing the drain plug. |

# 2. Transmission Gear Oil

## A: INSPECTION

1) Park the vehicle on a level surface.
2) Turn the ignition switch to OFF, and wait until the engine cools.
3) Remove the oil level gauge and wipe it clean.
4) Reinsert the oil level gauge all the way. Be sure that the oil level gauge is correctly inserted in the proper direction.
5) Pull out the oil level gauge again, and check the oil level. If it is below the lower level, add oil through the oil level gauge hole to bring the level up to the upper level.



(A) Oil level gauge
(B) Upper level
(C) Lower level

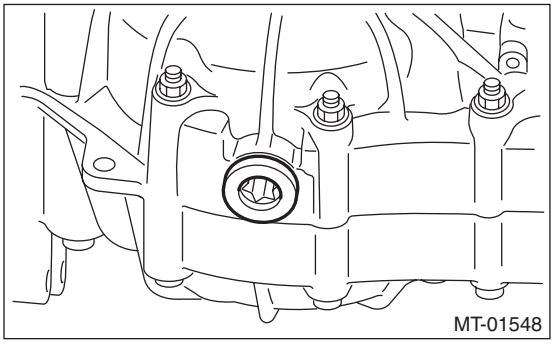
## B: REPLACEMENT

1) Pull out the oil level gauge.
2) Lift up the vehicle.
3) Using the TORX® bit T70, remove the drain plug, and drain the transmission gear oil completely.

**CAUTION:**
**• Immediately after driving the vehicle or after idling for a long time, the transmission gear oil will be hot. Be careful not to receive burns.**
**• Be careful not to spill the transmission gear oil on the exhaust pipe, to prevent emission of smoke or causing a fire. If gear oil is spilled, wipe it off completely.**
4) Tighten the drain plug using TORX® bit T70.

NOTE:
• Tighten the drain plug after draining the transmission gear oil.
• Use a new gasket.

***Tightening torque:***
***44 N·m (4.5 kgf-m, 32.5 ft-lb) (Aluminum gasket silver)***
***70 N·m (7.1 kgf-m, 51.6 ft-lb) (Copper gasket, brown)***
***70 N·m (7.1 kgf-m, 51.6 ft-lb) (Metal gasket, black)***



5) Lower the vehicle.
6) Pour gear oil through the oil level gauge hole.

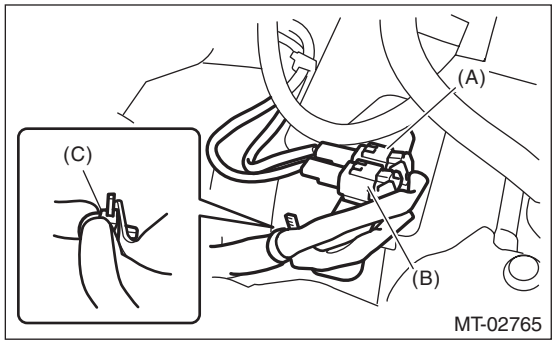
***Recommended gear oil:***
***GL-5 (75W-90) or equivalent***

***Gear oil capacity:***
***3.5 L (3.7 US qt, 3.1 Imp qt)***
7) Measure the transmission gear oil amount, and check that it is within the specification.

# 3. Manual Transmission Assembly

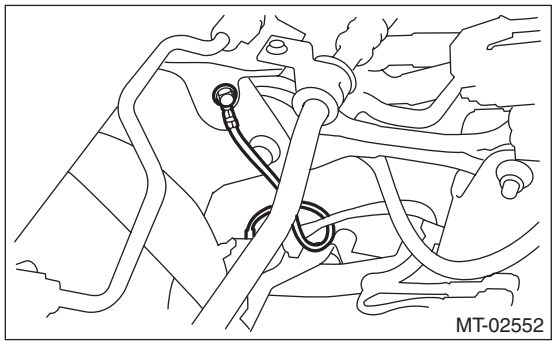
## A: REMOVAL

1) Disconnect the ground cable from battery.
2) Drain transmission gear oil completely. <Ref. to 5MT-22, REPLACEMENT, Transmission Gear Oil.>
3) Remove the air intake boot. <Ref. to IN(H4DO)-12, REMOVAL, Air Intake Boot.>
4) Disconnect the following connectors and remove the clip from the bracket.

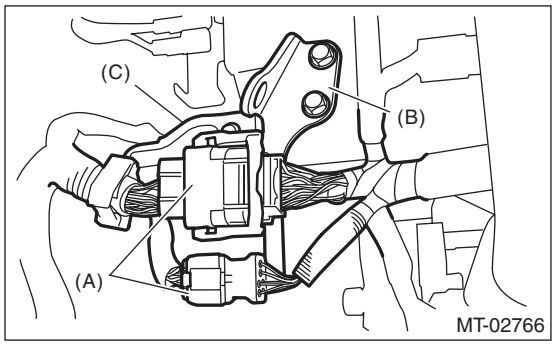


(A) Neutral position switch connector (brown)
(B) Back-up light switch connector (gray)
(C) Clip

5) Disconnect the transmission radio ground cord terminal.

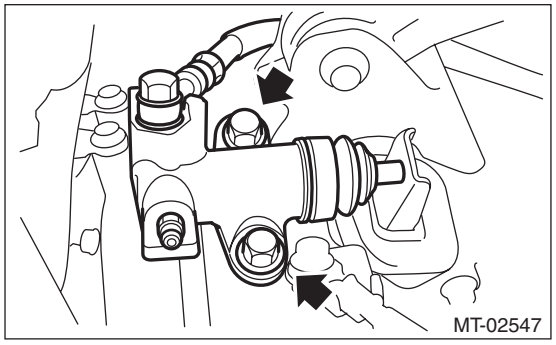


6) Remove the harness bracket and disconnect the engine harness connectors, and then remove the engine hanger rear.

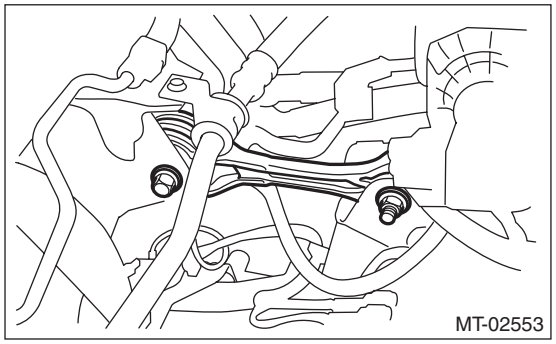


(A) Engine harness connectors
(B) Engine hanger rear
(C) Harness bracket

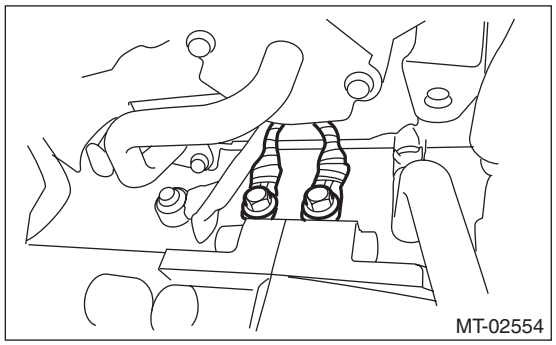
7) Remove the starter. <Ref. to SC(H4DO)-9, REMOVAL, Starter.>
8) Remove the operating cylinder from the transmission, and suspend on a wire.



9) Remove the pitching stopper.

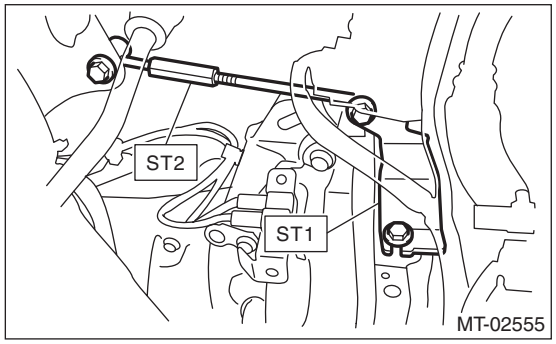


10) Disconnect two ground cables from rear end of the engine.

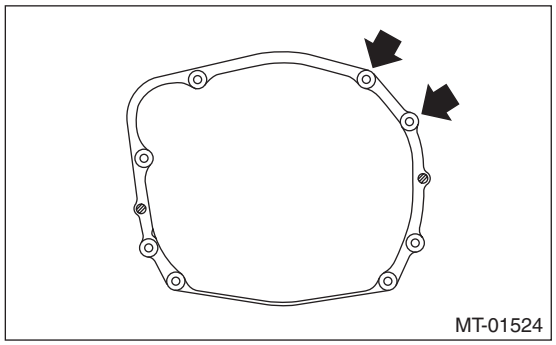


11) Set the ST.

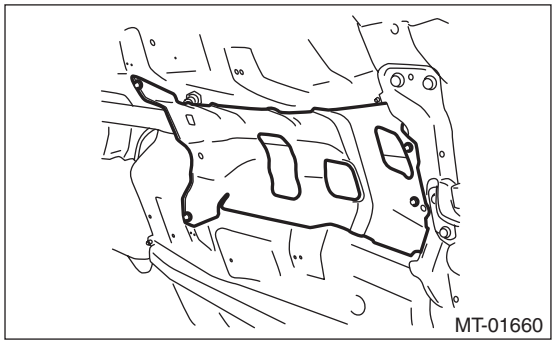
| | | |
|---|---|---|
| ST1 | 41099AA010 | ENGINE SUPPORT BRACKET |
| ST2 | 41099AA020 | ENGINE SUPPORT |



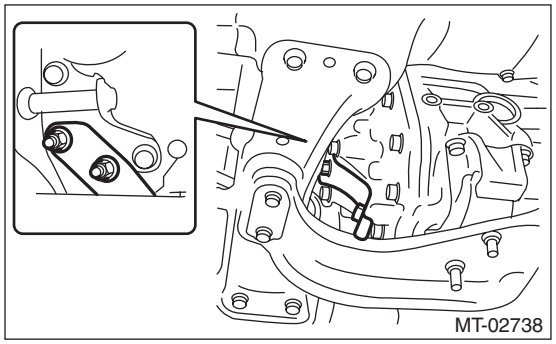
12) Lift up the vehicle.
13) Remove the under cover. <Ref. to EI-27, REMOVAL, Front Under Cover.>
14) Remove the center exhaust pipe. <Ref. to EX(H4DO)-14, REMOVAL, Center Exhaust Pipe.>
15) Remove the bolts which hold upper side of transmission to engine.



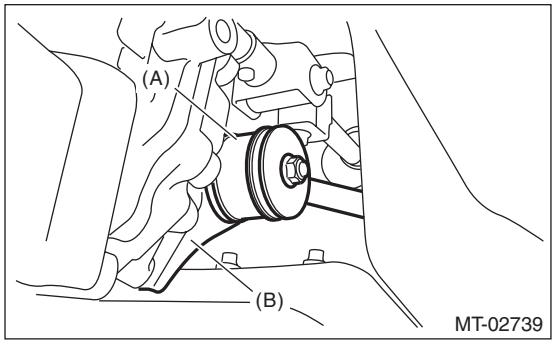
16) Remove the center exhaust cover.



17) Remove the hangar bracket from the transmission.

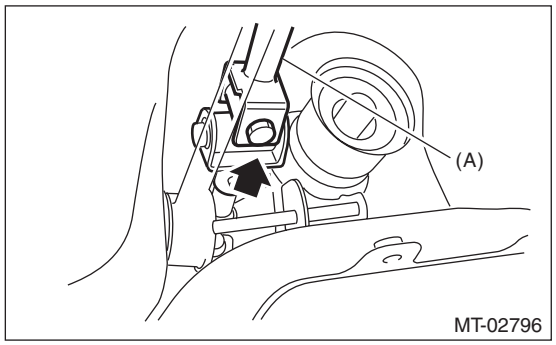


18) Remove the propeller shaft. <Ref. to DS-12, REMOVAL, Propeller Shaft.>
19) Remove the gear shift rod and the stay from the transmission.
(1) Remove the stay from the shift bracket.



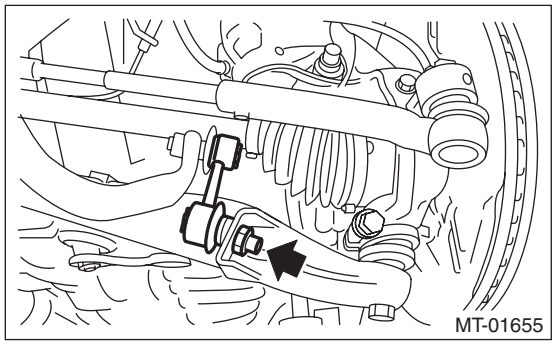
(A) Stay
(B) Shift bracket

(2) Remove the gear shift rod from the transmission.

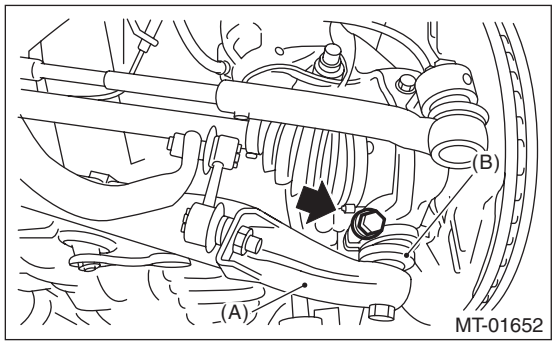


(A) Gear shift rod

20) Disconnect the stabilizer link from the front arm.

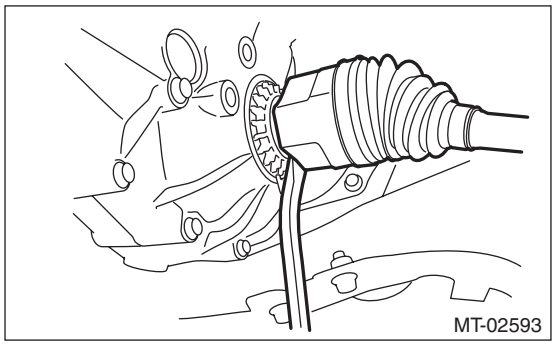


21) Remove the bolt securing the ball joint of the front arm to the housing, then separate the front arms and the housing.

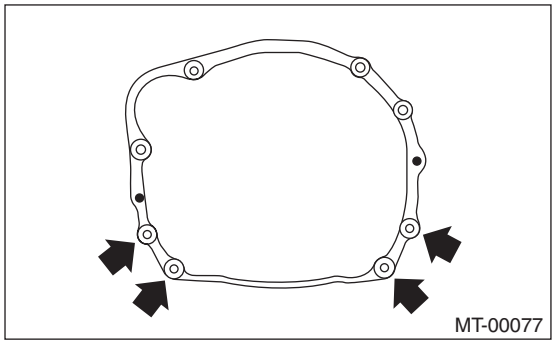


(A) Front arm
(B) Ball joint

22) Using a crowbar, remove the left and right front drive shaft from the transmission.

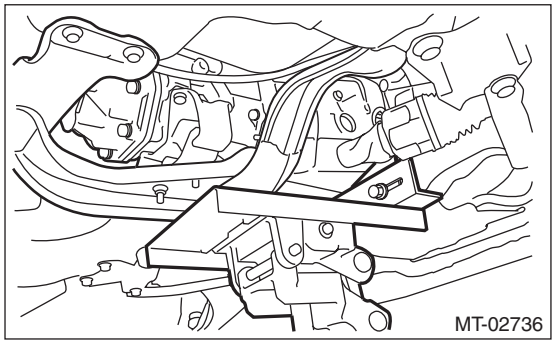


23) Remove the bolts and nuts which hold lower side of transmission to engine.

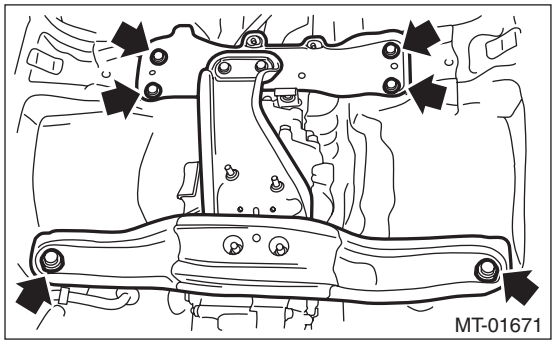


24) Place the transmission jack under the transmission.

**CAUTION:**
**Always support the transmission case with a transmission jack.**



25) Remove the front crossmember and rear crossmember from the vehicle.



26) While lowering the transmission jack, tighten the turnbuckle of the ST, and incline the engine unit rearward.
27) Remove the transmission.

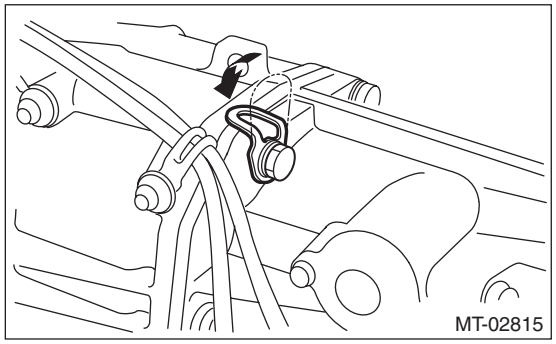
NOTE:
Move the transmission jack towards the rear until the main shaft is withdrawn from the clutch disc.
28) Separate the transmission assembly from the transmission cushion rubber.

## B: INSTALLATION

1) Replace the differential side retainer oil seal. <Ref. to 5MT-34, REPLACEMENT, Differential Side Retainer Oil Seal.>

NOTE:
• Be sure to replace the differential side retainer oil seal after removing the front drive shaft.
• When a new differential side retainer oil seal has been installed, replacement is not required.
2) Strike and bend the transmission hanger of transmission rear with a rubber hammer etc. so that it gets in contact with the transmission case.

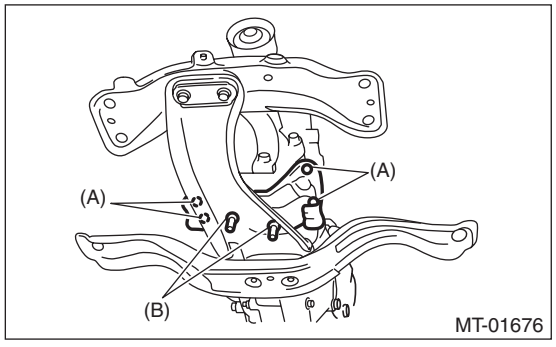
**CAUTION:**
**Do not apply excessive load or impact to the transmission case.**



MT-02815

3) Install the transmission cushion rubber to the transmission, and tighten the bolt (A).
4) Install the transmission cushion rubber to the center crossmember, and temporarily tighten the nut (B).

***Tightening torque:***
***Bolt (A)***
***35 N·m (3.6 kgf-m, 25.8 ft-lb)***

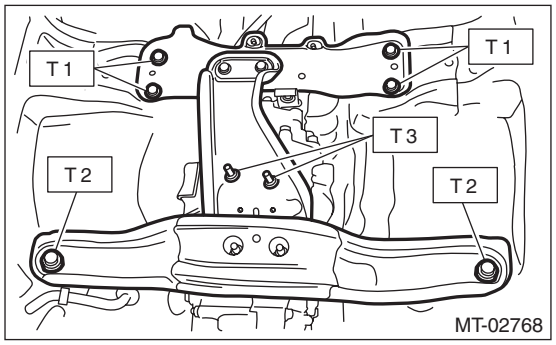


MT-01676

5) Install the transmission onto the engine.
(1) Lift up the transmission gradually using a transmission jack.
(2) Engage at the spline section.

NOTE:
Be careful not to hit the main shaft against the clutch cover.
6) While raising the transmission jack, loosen the turnbuckle of the ST, and set the engine unit to the original position.
7) Install the front crossmember and rear crossmember.
8) Tighten the transmission cushion rubber mounting nut.

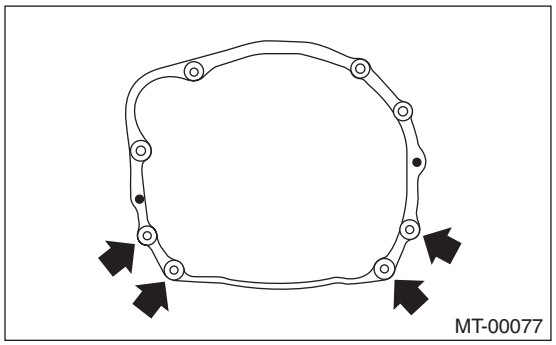
***Tightening torque:***
***T1: 70 N·m (7.1 kgf-m, 51.6 ft-lb)***
***T2: 140 N·m (14.3 kgf-m, 103.3 ft-lb)***
***T3: 35 N·m (3.6 kgf-m, 25.8 ft-lb)***



MT-02768

9) Take out the transmission jack.
10) Tighten the bolts and nuts which hold the lower side of transmission to the engine.

***Tightening torque:***
***50 N·m (5.1 kgf-m, 36.9 ft-lb)***

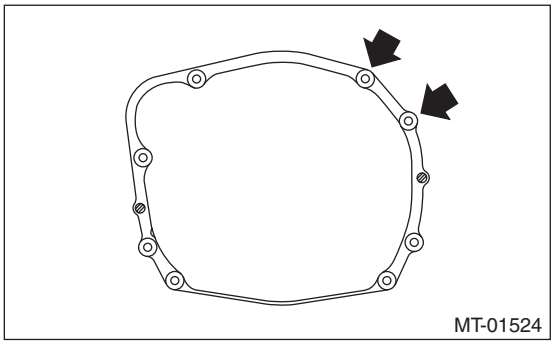


MT-00077

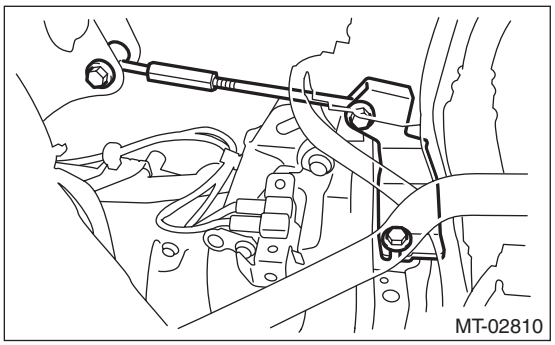
11) Lower the vehicle.
12) Install the starter. <Ref. to SC(H4DO)-12, INSTALLATION, Starter.>

13) Tighten the bolts which hold the upper side of the transmission to the engine.

***Tightening torque:***
***50 N·m (5.1 kgf-m, 36.9 ft-lb)***

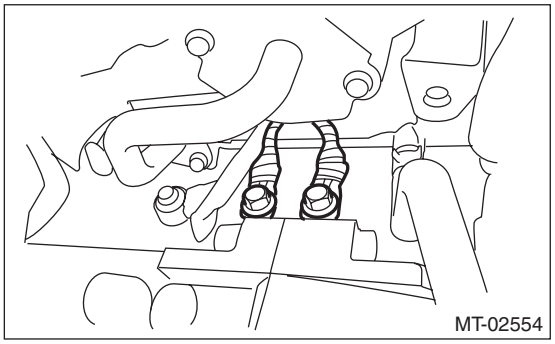


14) Remove the ST.



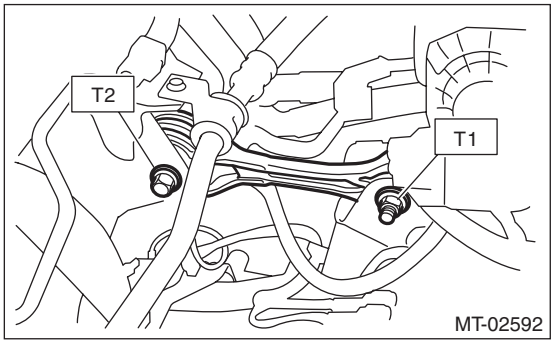
15) Install the ground cable.

***Tightening torque:***
***19 N·m (1.9 kgf-m, 14.0 ft-lb)***

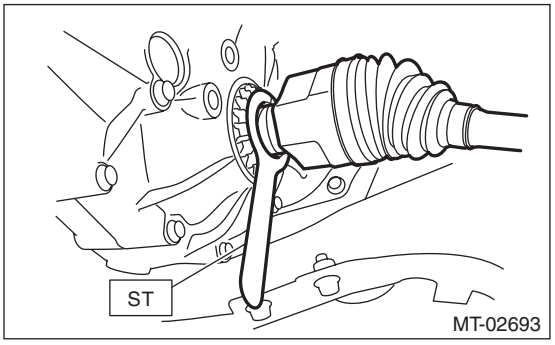


16) Install the pitching stopper.

***Tightening torque:***
***T1: 50 N·m (5.1 kgf-m, 36.9 ft-lb)***
***T2: 58 N·m (5.9 kgf-m, 42.8 ft-lb)***

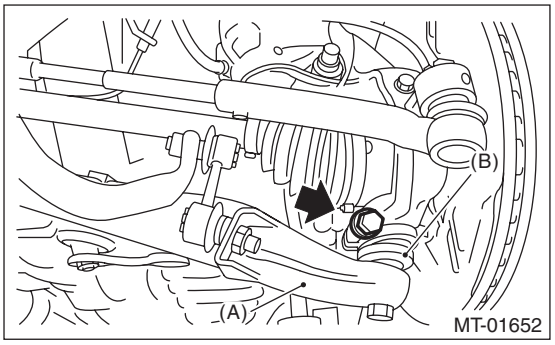


17) Lift up the vehicle.
18) Install the front drive shaft into the transmission.
ST 28399SA010 OIL SEAL PROTECTOR



19) Insert the front arm ball joint into the housing lower part, and tighten the mounting bolt.

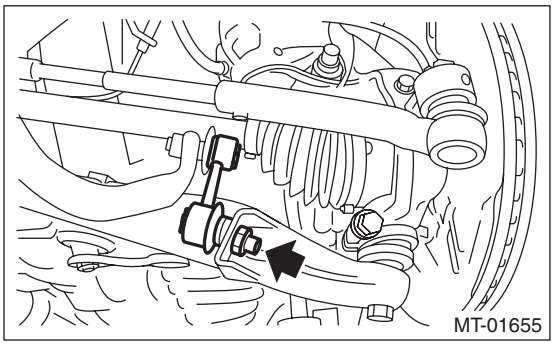
***Tightening torque:***
***50 N·m (5.1 kgf-m, 36.9 ft-lb)***



(A) Front arm
(B) Ball joint

20) Attach the stabilizer link to the front arm.

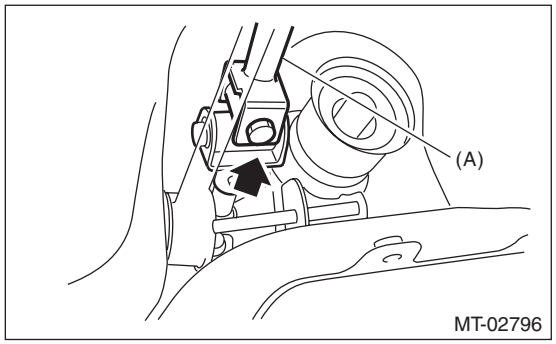
***Tightening torque:***
***30 N·m (3.1 kgf-m, 22.1 ft-lb)***



21) Attach the gear shift rod and stay.
(1) Attach the gear shift rod to the transmission.

NOTE:
Use a new self-locking nut.

***Tightening torque:***
***12 N·m (1.2 kgf-m, 8.9 ft-lb)***

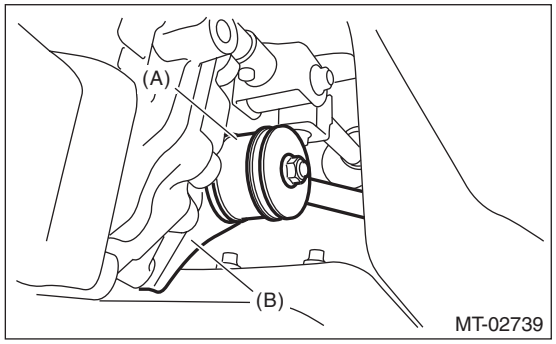


(A) Gear shift rod

(2) Install the stay to the shift bracket.

NOTE:
Use a new self-locking nut.

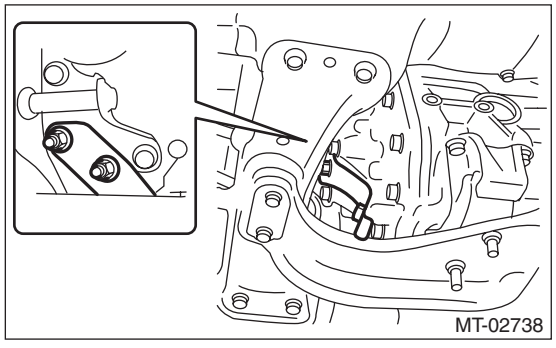
***Tightening torque:***
***18 N·m (1.8 kgf-m, 13.3 ft-lb)***



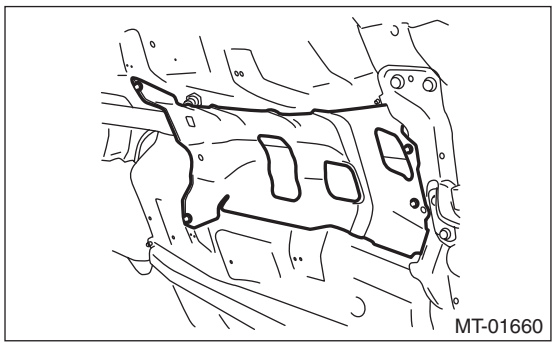
(A) Stay
(B) Shift bracket

22) Install the propeller shaft. <Ref. to DS-13, INSTALLATION, Propeller Shaft.>
23) Install the hanger bracket to the transmission.

***Tightening torque:***
***23 N·m (2.3 kgf-m, 17.0 ft-lb)***

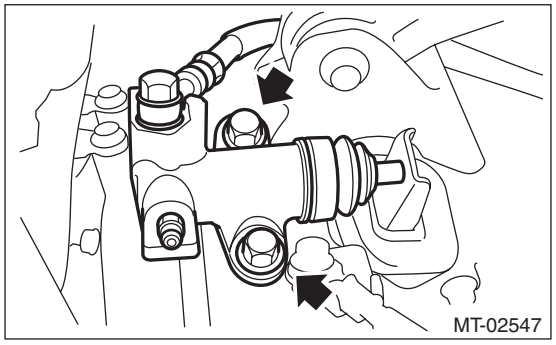


24) Install the center exhaust cover.
***Tightening torque:***
***18 N·m (1.8 kgf-m, 13.3 ft-lb)***



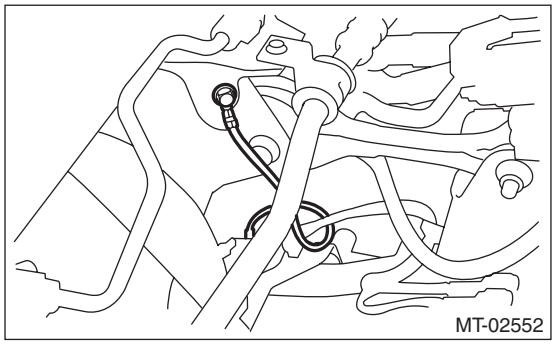
25) Install the center exhaust pipe. <Ref. to EX(H4DO)-14, INSTALLATION, Center Exhaust Pipe.>
26) Install the under cover. <Ref. to EI-27, INSTALLATION, Front Under Cover.>
27) Install the operating cylinder.

***Tightening torque:***
***37 N·m (3.8 kgf-m, 27.3 ft-lb)***



28) Install the transmission radio ground cord terminal.

***Tightening torque:***
***13 N·m (1.3 kgf-m, 9.6 ft-lb)***

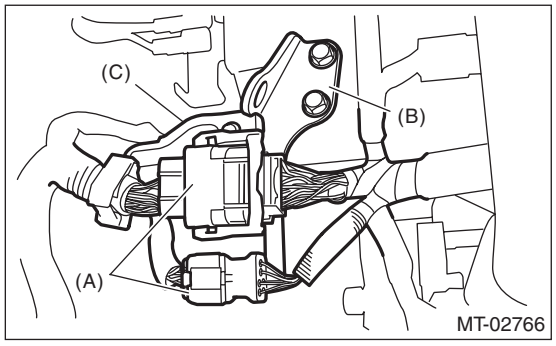


29) Install the engine hanger rear.

***Tightening torque:***
***21 N·m (2.1 kgf-m, 15.5 ft-lb)***

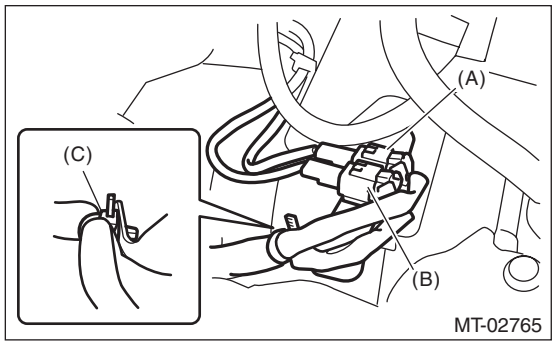
30) Connect the engine harness connector, then attach the harness bracket.

***Tightening torque:***
***7.5 N·m (0.8 kgf-m, 5.5 ft-lb)***



(A) Engine harness connectors
(B) Engine hanger rear
(C) Harness bracket

31) Connect the following connectors and secure the clip on the bracket.



(A) Neutral position switch connector (brown)
(B) Back-up light switch connector (gray)
(C) Clip

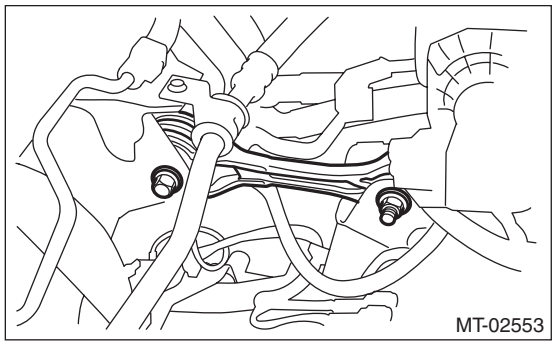
32) Install the air intake boot. <Ref. to IN(H4DO)-12, INSTALLATION, Air Intake Boot.>
33) Connect the battery ground terminal.
34) Remove the lift arm from vehicle.

# 4. Transmission Mounting System

## A: REMOVAL

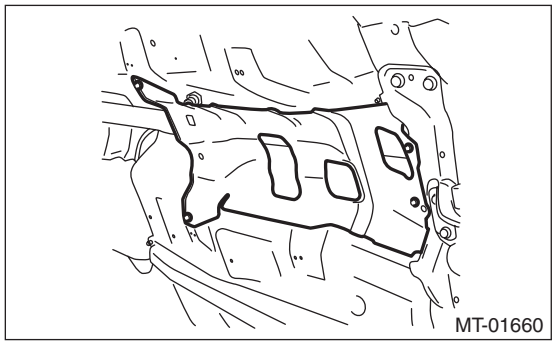
### 1. PITCHING STOPPER

1) Disconnect the ground cable from battery.
2) Remove the air intake boot. <Ref. to IN(H4DO)-12, REMOVAL, Air Intake Boot.>
3) Remove the pitching stopper.



### 2. CROSSMEMBER AND CUSHION RUBBER

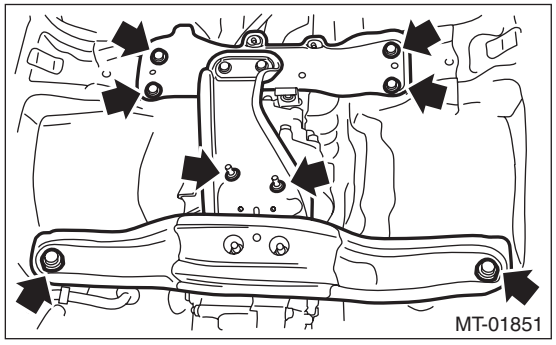
1) Disconnect the ground cable from battery.
2) Lift up the vehicle.
3) Remove the center exhaust pipe. <Ref. to EX(H4DO)-14, REMOVAL, Center Exhaust Pipe.>
4) Remove the center exhaust cover.



5) Set the transmission jack under the transmission body.

**CAUTION:**
**Always support the transmission case with a transmission jack.**

6) Remove the front crossmember and the rear crossmember.



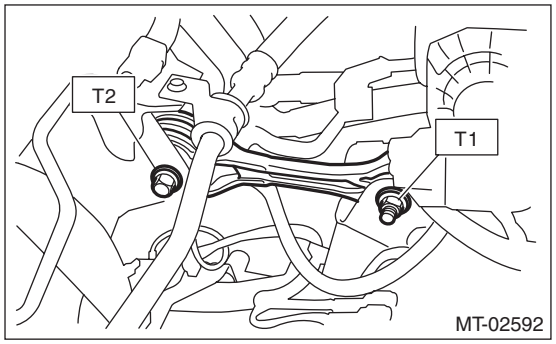
7) Remove the transmission cushion rubber.

## B: INSTALLATION

### 1. PITCHING STOPPER

1) Install the pitching stopper.

***Tightening torque:***
***T1: 50 N·m (5.1 kgf-m, 36.9 ft-lb)***
***T2: 58 N·m (5.9 kgf-m, 42.8 ft-lb)***

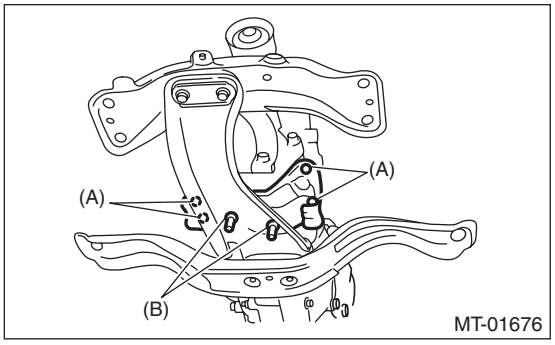


2) Install the air intake boot. <Ref. to IN(H4DO)-12, INSTALLATION, Air Intake Boot.>
3) Connect the battery ground terminal.

### 2. CROSSMEMBER AND CUSHION RUBBER

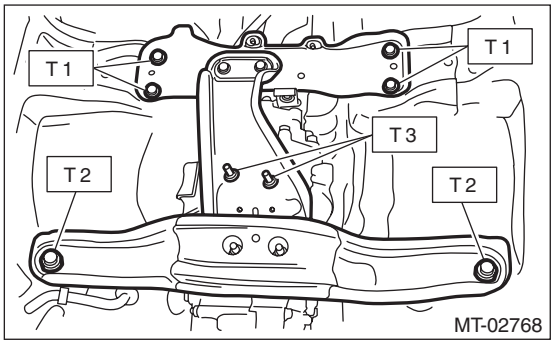
1) Install the transmission cushion rubber to the transmission, and tighten the bolt (A).
2) Install the transmission cushion rubber to the center crossmember, and temporarily tighten the nut (B).

***Tightening torque:***
***Bolt (A)***
***35 N·m (3.6 kgf-m, 25.8 ft-lb)***



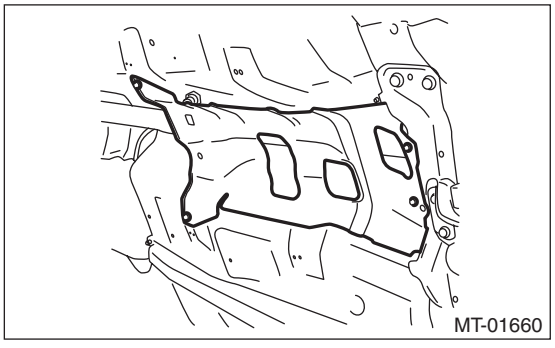
3) Install the front crossmember and rear crossmember.
4) Tighten the transmission cushion rubber mounting nut.

***Tightening torque:***
***T1: 70 N·m (7.1 kgf-m, 51.6 ft-lb)***
***T2: 140 N·m (14.3 kgf-m, 103.3 ft-lb)***
***T3: 35 N·m (3.6 kgf-m, 25.8 ft-lb)***



5) Remove the transmission jack.
6) Install the center exhaust cover.

***Tightening torque:***
***18 N·m (1.8 kgf-m, 13.3 ft-lb)***



7) Install the center exhaust pipe. <Ref. to EX(H4DO)-14, INSTALLATION, Center Exhaust Pipe.>
8) Lower the vehicle.
9) Connect the battery ground terminal.

## C: INSPECTION

Check the following; repair or replace the faulty parts.

### 1. PITCHING STOPPER

Check the pitching stopper for bends or damage. Check that the rubber is not stiff, cracked or otherwise damaged.

### 2. CROSSMEMBER AND CUSHION RUBBER

Check the crossmember for bending or damage. Check that the cushion rubber does not have hardening, cracks or other damages.

# 5. Oil Seal

## A: INSPECTION

Check for leakage of transmission gear oil from the oil seal. If there is oil leakage, replace the oil seal with the new part and check the propeller shaft.

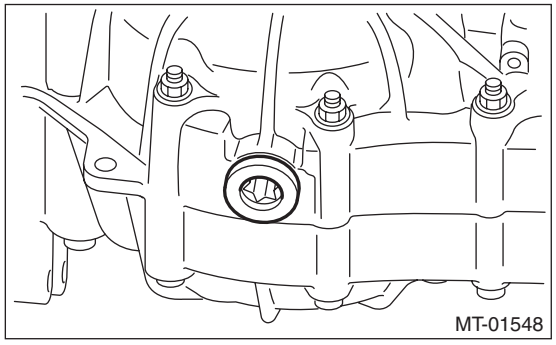
## B: REPLACEMENT

1) Disconnect the ground cable from battery.
2) Lift up the vehicle.
3) Clean the transmission exterior.
4) Using the TORX® bit T70, remove the drain plug, and drain the transmission gear oil completely.

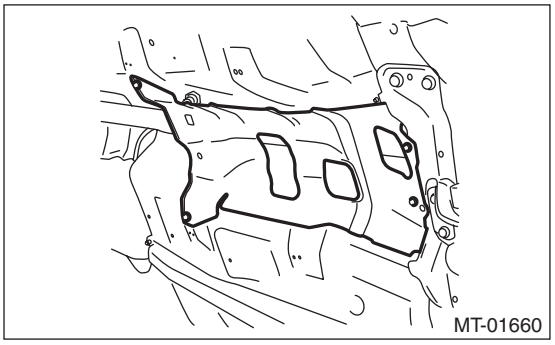
**CAUTION:**
**• Immediately after the vehicle has been running or after idling for a long time, the transmission gear oil will be hot. Be careful not to receive burns.**
**• Be careful not to spill the transmission gear oil on the exhaust pipe, to prevent emission of smoke or causing a fire. If gear oil is spilled, wipe it off completely.**
5) Tighten the drain plug using TORX® bit T70.

NOTE:
Use a new gasket.

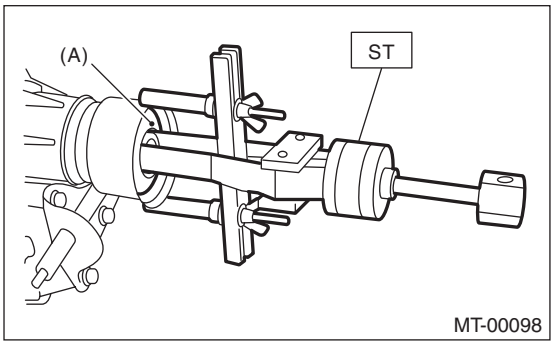
***Tightening torque:***
***44 N·m (4.5 kgf-m, 32.5 ft-lb) (Aluminum gasket silver)***
***70 N·m (7.1 kgf-m, 51.6 ft-lb) (Copper gasket brown)***
***70 N·m (7.1 kgf-m, 51.6 ft-lb) (Metal gasket black)***



6) Remove the rear exhaust pipe. <Ref. to EX(H4DO)-15, REMOVAL, Rear Exhaust Pipe.>
7) Remove the center exhaust cover.



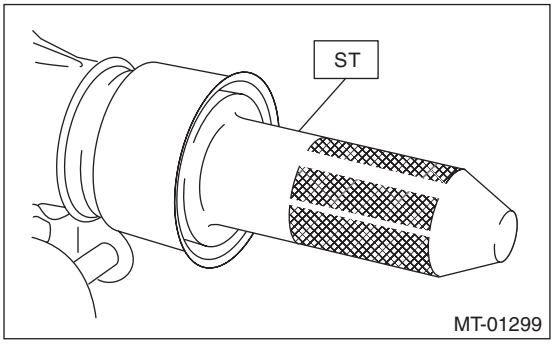
8) Remove the propeller shaft. <Ref. to DS-12, REMOVAL, Propeller Shaft.>
9) Using the ST, remove the oil seal.
ST 398527700 PULLER ASSY



(A) Oil seal

10) Using the ST, install the oil seal.

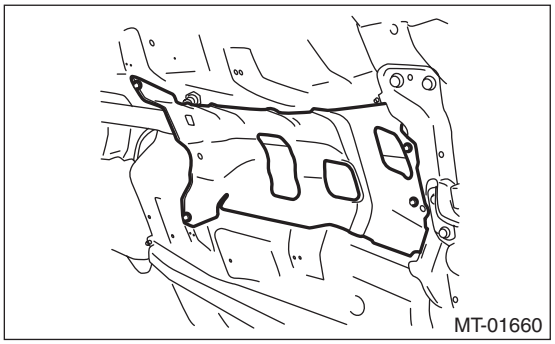
NOTE:
• When grease is not applied to the oil seal lips, apply the transmission gear oil to the oil seal lips.
• Use a new oil seal.
ST 498057300 INSTALLER



11) Install the propeller shaft. <Ref. to DS-13, INSTALLATION, Propeller Shaft.>

12) Install the center exhaust cover.

***Tightening torque:***
***18 N·m (1.8 kgf-m, 13.3 ft-lb)***



13) Install the rear exhaust pipe. <Ref. to EX(H4DO)-17, INSTALLATION, Rear Exhaust Pipe.>
14) Pour in transmission gear oil and check the oil level. <Ref. to 5MT-22, Transmission Gear Oil.>
15) Connect the battery ground terminal.

# 6. Differential Side Retainer Oil Seal

## A: INSPECTION

Check for leakage of gear oil from differential side retainer oil seal part. If there is oil leakage, replace the oil seal with the new part and check the drive shaft.

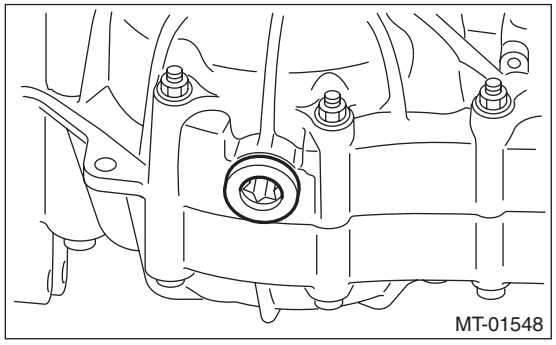
## B: REPLACEMENT

1) Disconnect the ground cable from battery.
2) Lift up the vehicle.
3) Using the TORX® bit T70, remove the drain plug, and drain the transmission gear oil completely.

**CAUTION:**
**• Immediately after the vehicle has been running or after idling for a long time, the transmission gear oil will be hot. Be careful not to receive burns.**
**• Be careful not to spill the transmission gear oil on the exhaust pipe, to prevent emission of smoke or causing a fire. If gear oil is spilled, wipe it off completely.**
4) Tighten the drain plug using TORX® bit T70.

NOTE:
Use a new gasket.

***Tightening torque:***
***44 N·m (4.5 kgf-m, 32.5 ft-lb) (Aluminum gasket silver)***
***70 N·m (7.1 kgf-m, 51.6 ft-lb) (Copper gasket brown)***
***70 N·m (7.1 kgf-m, 51.6 ft-lb) (Metal gasket black)***

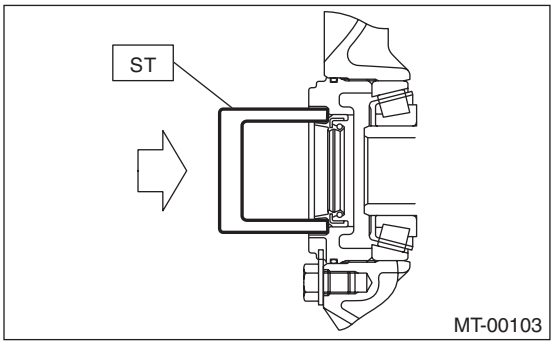


5) Remove the center exhaust pipe. <Ref. to EX(H4DO)-14, REMOVAL, Center Exhaust Pipe.>
6) Separate the front drive shaft from the transmission. <Ref. to DS-57, REMOVAL, Front Drive Shaft.>
7) Remove the differential side retainer oil seal.

NOTE:
• Be sure to replace the differential side retainer oil seal whenever the front drive shaft is removed from the transmission.
• Use the ST 398527700 PULLER ASSY to remove the oil seal. If removing the oil seal with a flat tip screwdriver, be careful not to scratch the differential side retainer.
8) Using the ST, install the differential side retainer oil seal by lightly tapping with a plastic hammer.

**CAUTION:**
**• Apply transmission gear oil to the oil seal lips, and install the oil seal while being careful not to deform the lip.**
**• Check the identification marks (R, L) during the installation so as not to mix up the oil seal RH and LH.**

NOTE:
Use a new oil seal.
ST 18675AA000 DIFFERENTIAL SIDE OIL SEAL INSTALLER



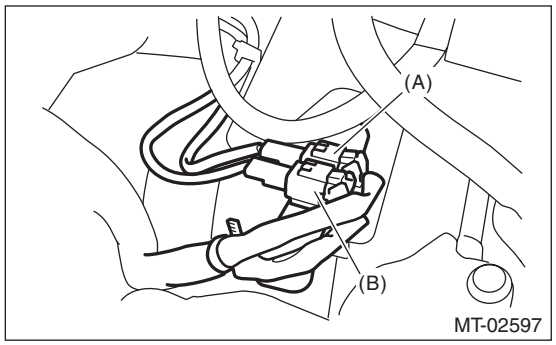
9) Install the front drive shaft. <Ref. to DS-59, INSTALLATION, Front Drive Shaft.>
ST 28399SA010 OIL SEAL PROTECTOR
10) Install the center exhaust pipe. <Ref. to EX(H4DO)-14, INSTALLATION, Center Exhaust Pipe.>
11) Lower the vehicle.
12) Pour in transmission gear oil and check the oil level. <Ref. to 5MT-22, REPLACEMENT, Transmission Gear Oil.>
13) Connect the battery ground terminal.

# 7. Switches and Harness

## A: REMOVAL

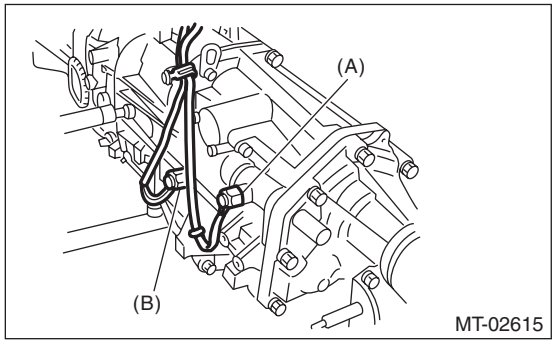
### 1. BACK-UP LIGHT AND NEUTRAL POSITION SWITCH

1) Disconnect the ground cable from battery.
2) Remove the air intake boot. <Ref. to IN(H4DO)-12, REMOVAL, Air Intake Boot.>
3) Disconnect the connector back-up light switch & neutral position switch.



(A) Neutral position switch connector (brown)
(B) Back-up light switch connector (gray)

4) Remove the harness connector from bracket.
5) Lift up the vehicle.
6) Remove the harness from each clip.
7) Remove the back-up light switch & neutral position switch with the harness.



(A) Neutral position switch
(B) Back-up light switch

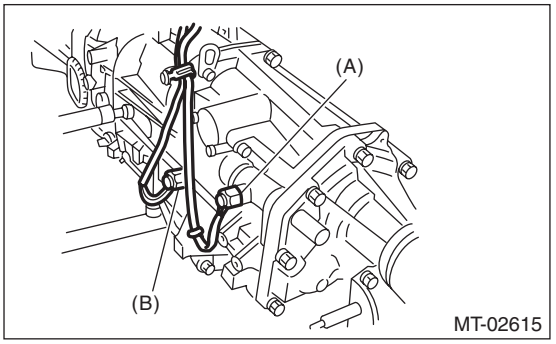
## B: INSTALLATION

### 1. BACK-UP LIGHT AND NEUTRAL POSITION SWITCH

1) Install the back-up light switch & neutral position switch with the harness.

NOTE:
Use a new gasket.

***Tightening torque:***
***32.3 N·m (3.3 kgf-m, 23.8 ft-lb)***



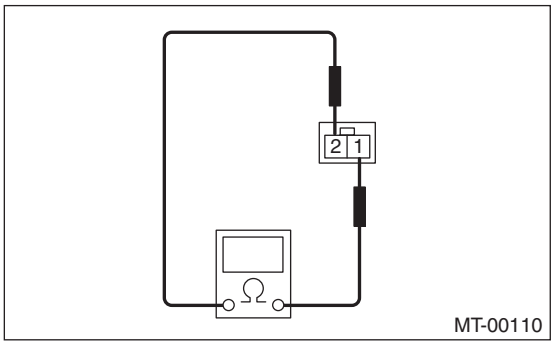
(A) Neutral position switch
(B) Back-up light switch

2) Secure the switch harness on each clip.
3) Lower the vehicle.
4) Connect the connectors for back-up light switch and neutral position switch, and secure the connector to the bracket.
5) Install the air intake boot. <Ref. to IN(H4DO)-12, INSTALLATION, Air Intake Boot.>
6) Connect the battery ground terminal.

# C: INSPECTION

## 1. BACK-UP LIGHT SWITCH

1) Turn the ignition switch to OFF.
2) Disconnect the back light switch connector.
3) Measure the resistance between the back-up light switch terminals.

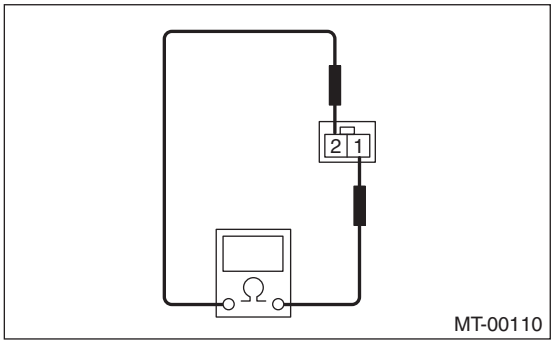


| Gear shift position | Terminal No. | Specified resistance |
|---|---|---|
| Reverse position | 1 and 2 | Less than 1 Ω |
| Other positions | | 1 MΩ or more |

4) Replace faulty parts.

## 2. NEUTRAL POSITION SWITCH

1) Turn the ignition switch to OFF.
2) Disconnect the connector of neutral position switch.
3) Measure the resistance between neutral position switch terminals.



| Gear shift position | Terminal No. | Specified resistance |
|---|---|---|
| Neutral position | 1 and 2 | Less than 1 Ω |
| Other positions | | 1 MΩ or more |

4) Replace faulty parts.

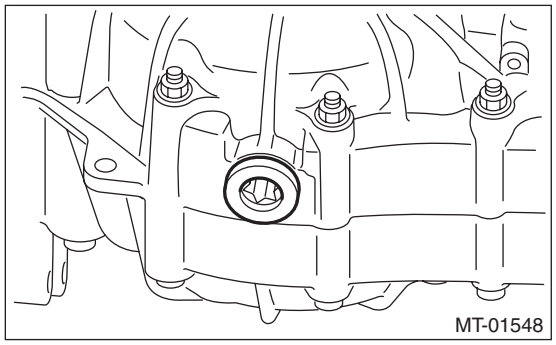
# 8. Preparation for Overhaul

## A: PROCEDURE

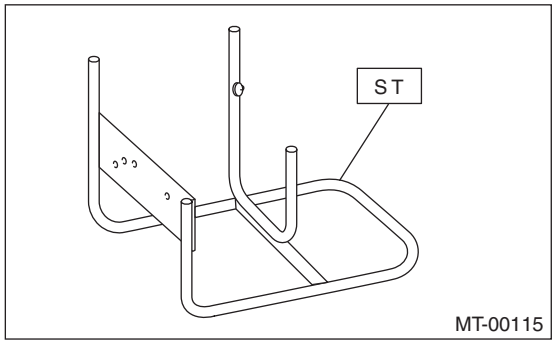
1) Clean oil, grease, dirt and dust from the transmission.
2) When gear oil remains in the transmission, use the TORX® bit T70 to remove the drain plug, and drain the transmission gear oil completely.
3) Tighten the drain plug using TORX® bit T70.

NOTE:
Use a new gasket.

***Tightening torque:***
***44 N·m (4.5 kgf-m, 32.5 ft-lb) (Aluminum gasket silver)***
***70 N·m (7.1 kgf-m, 51.6 ft-lb) (Copper gasket brown)***
***70 N·m (7.1 kgf-m, 51.6 ft-lb) (Metal gasket black)***



4) Attach the transmission to the ST.
ST 499937100 TRANSMISSION STAND

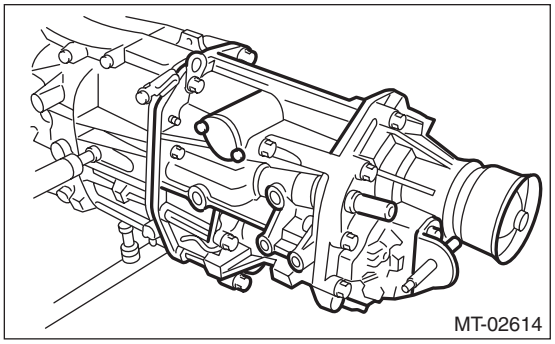


5) Apply oil to rotating parts before assembly.
6) All disassembled parts, if to be reused, should be reinstalled in the original positions and directions.
7) Gaskets, lock washers and lock nuts must be replaced with new ones.
8) Apply liquid gasket to the specified areas to prevent leakage.

# 9. Transfer Case and Extension Case Assembly

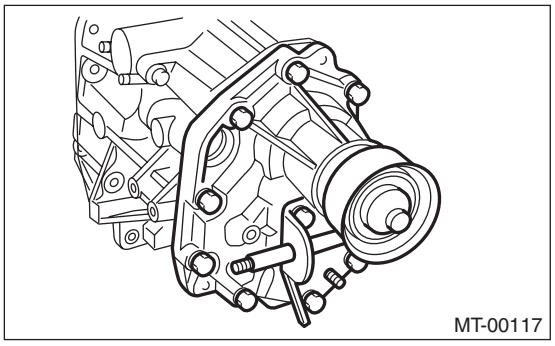
## A: REMOVAL

1) Remove the manual transmission assembly from the vehicle. <Ref. to 5MT-23, REMOVAL, Manual Transmission Assembly.>
2) Remove the back-up light switch and the neutral position switch. <Ref. to 5MT-35, REMOVAL, Switches and Harness.>
3) Remove the transfer case together with the extension case assembly.



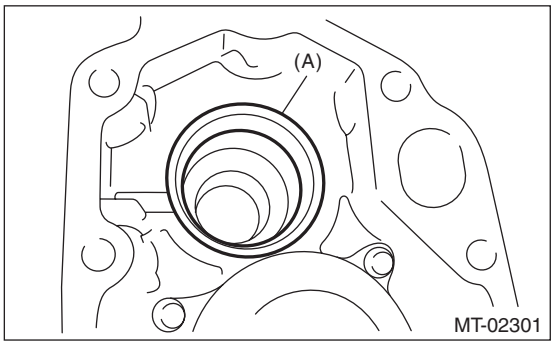
MT-02614

4) Remove the gasket.
5) Remove the shifter arm.
6) Remove the extension case assembly.



MT-00117

7) Remove the transfer driven gear.
8) Remove the bearing outer race and thrust washer from the extension case.



MT-02301

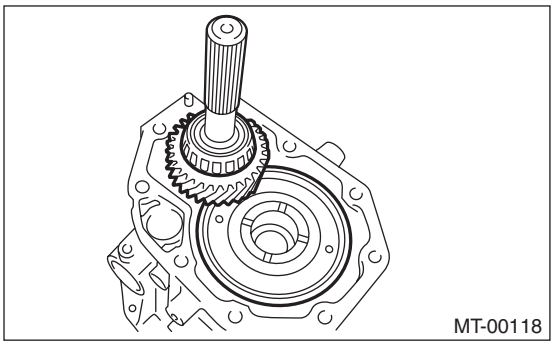
(A) Bearing outer race

## B: INSTALLATION

1) Clean the mating surfaces of the transmission case, transfer case and extension case.
2) Apply a coat of grease to the front roller bearing and rear roller bearing of the transfer driven gear.

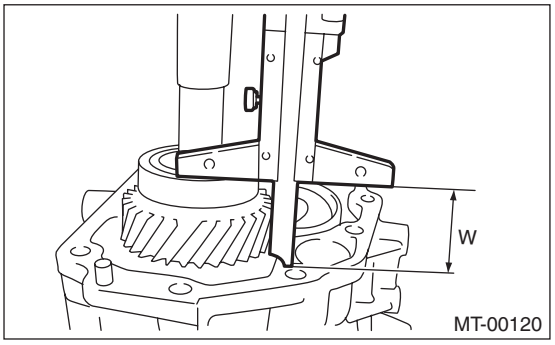
***Grease:***
***NICHIMOLY N-130 or equivalent***

3) Install the center differential and transfer driven gear into the transfer case.



MT-00118

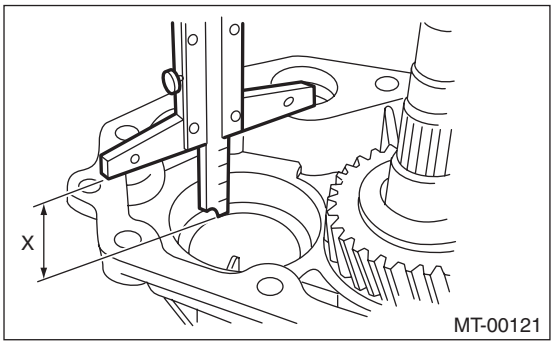
4) Install the bearing outer race to transfer driven gear.
5) While pressing the bearing outer race horizontally, rotate the driven shaft for ten turns.
6) Measure the height “W” between transfer case and taper roller bearing on the transfer driven gear.



MT-00120

7) Measure depth “X” of bearing insertion part of the extension case.

NOTE:
Measure with bearing outer race and thrust washer removed.



MT-00121

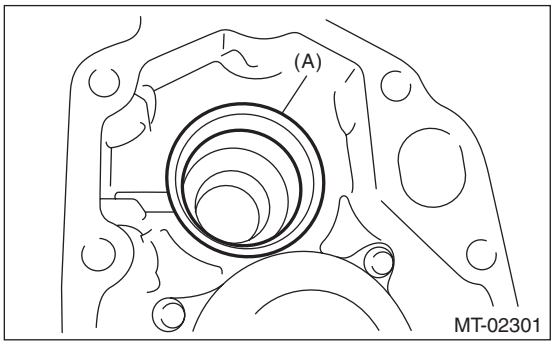
8) Calculate the thrust washer thickness "t" using the following calculation.
t = X – W + (0.15 — 0.20 mm (0.006 — 0.008 in))
X: Depth of bearing insertion part of the extension case
W: Height between transfer case and taper roller bearing on the transfer driven gear.
0.15 — 0.20 mm (0.006 — 0.008 in): Amount of standard protrusion
9) Select the washer with the nearest value in the following table.

NOTE:
Be sure that it is always within the preload.

***Preload of the taper roller bearing (amount of standard protrusion):***
***0.15 — 0.20 mm (0.006 — 0.008 in)***

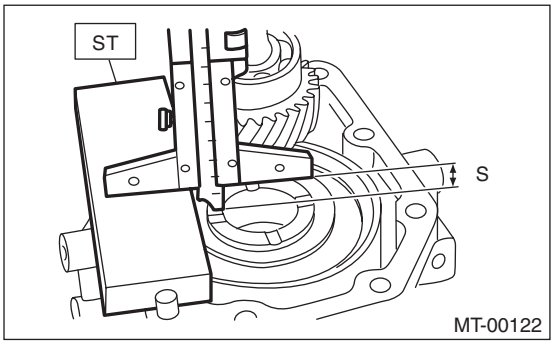
| Thrust washer (61 × 50 × t) | |
|---|---|
| Part No. | Thickness mm (in) |
| 803050060 | 0.50 (0.0197) |
| 803050061 | 0.55 (0.0217) |
| 803050062 | 0.60 (0.0236) |
| 803050063 | 0.65 (0.0256) |
| 803050064 | 0.70 (0.0276) |
| 803050065 | 0.75 (0.0295) |
| 803050066 | 0.80 (0.0315) |
| 803050067 | 0.85 (0.0335) |
| 803050068 | 0.90 (0.0354) |
| 803050069 | 0.95 (0.0374) |
| 803050070 | 1.00 (0.0394) |
| 803050071 | 1.05 (0.0413) |
| 803050072 | 1.10 (0.0433) |
| 803050073 | 1.15 (0.0453) |
| 803050074 | 1.20 (0.0472) |
| 803050075 | 1.25 (0.0492) |
| 803050076 | 1.30 (0.0512) |
| 803050077 | 1.35 (0.0531) |
| 803050078 | 1.40 (0.0551) |
| 803050079 | 1.45 (0.0571) |

10) Install the selected thrust washer and bearing outer race into the extension case.

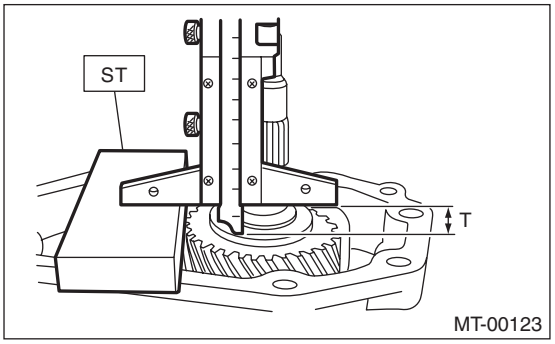


(A) Bearing outer race

11) Measure the depth "S" between transfer case and center differential.
ST 398643600 GAUGE



12) Measure the height "T" between the extension case and transfer drive gear.
ST 398643600 GAUGE



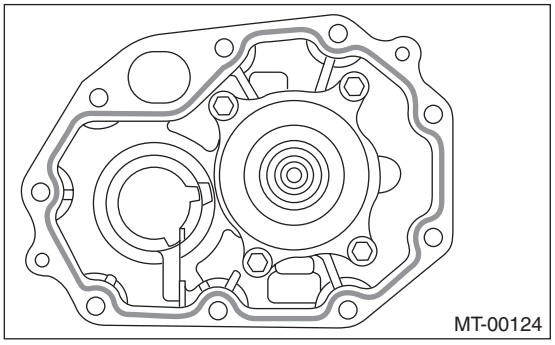
13) Calculate the thrust washer thickness "U" using the following calculation.
U = S + T – 30 mm (1.18 in) – (0.15 — 0.35 mm (0.0059 — 0.0138 in))
S: Depth between transfer case and center differential
T: Height between the extension case and transfer gear
30 mm (1.18 in): Thickness of ST
0.15 — 0.35 mm (0.0059 — 0.0138 in): Clearance
14) Select a suitable washer in the following table.

***Clearance:***
***0.15 — 0.35 mm (0.0059 — 0.0138 in)***

| Thrust washer | |
|---|---|
| Part No. | Thickness mm (in) |
| 803036050 | 0.9 (0.035) |
| 803036054 | 1.0 (0.039) |
| 803036051 | 1.1 (0.043) |
| 803036055 | 1.2 (0.047) |
| 803036052 | 1.3 (0.051) |
| 803036056 | 1.4 (0.055) |
| 803036053 | 1.5 (0.059) |
| 803036057 | 1.6 (0.063) |
| 803036058 | 1.7 (0.067) |
| 803036080 | 1.8 (0.071) |
| 803036081 | 1.9 (0.075) |

15) Install the selected thrust washer to center differential.
16) Apply a proper amount of liquid gasket to the transfer case mating surface.

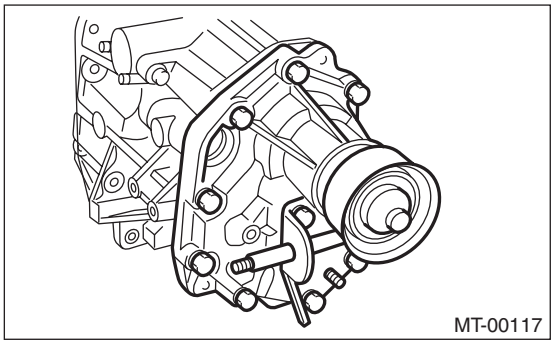
***Liquid gasket:***
***THREE BOND 1215 (Part No. 004403007) or equivalent***



MT-00124

17) Install the extension case assembly to the transfer case.

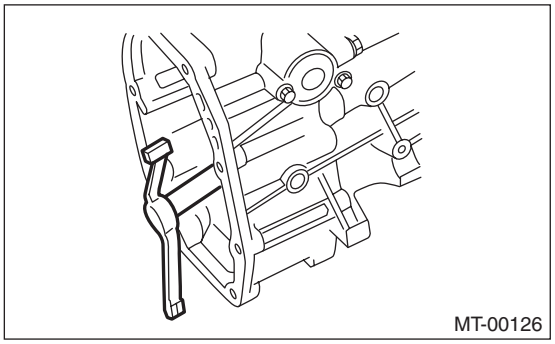
***Tightening torque:***
***40 N·m (4.1 kgf-m, 29.5 ft-lb)***



MT-00117

18) Attach the shifter arm to transfer case.

NOTE:
Apply gear oil to the oil seal lips.

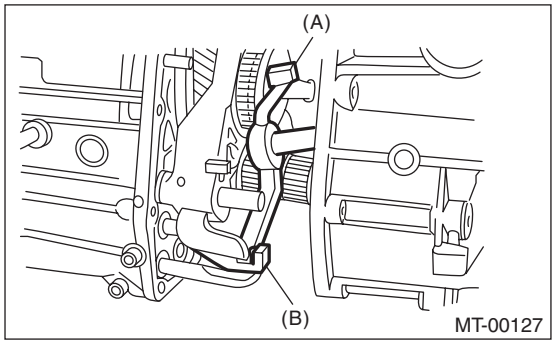


MT-00126

19) Attach the gasket.

NOTE:
Use a new gasket.

20) Hang the shifter arm on 3rd-4th fork rod.

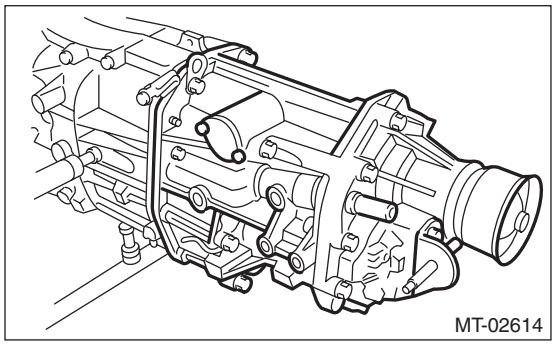


MT-00127

(A) Shifter arm
(B) 3rd-4th fork rod

21) Install the extension case assembly along with the transfer case to the transmission case.

***Tightening torque:***
***24.5 N·m (2.5 kgf-m, 18.1 ft-lb)***



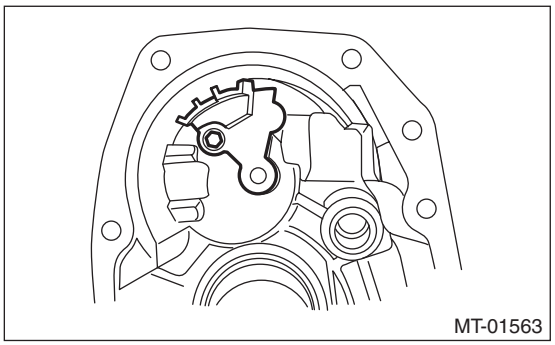
MT-02614

22) Install the back-up light switch and the neutral position switch. <Ref. to 5MT-35, INSTALLATION, Switches and Harness.>
23) Install the manual transmission assembly to the vehicle. <Ref. to 5MT-26, INSTALLATION, Manual Transmission Assembly.>

## C: DISASSEMBLY

### 1. TRANSFER CASE

1) Remove the reverse check sleeve assembly. <Ref. to 5MT-49, REMOVAL, Reverse Check Sleeve.>
2) Remove the oil guide.

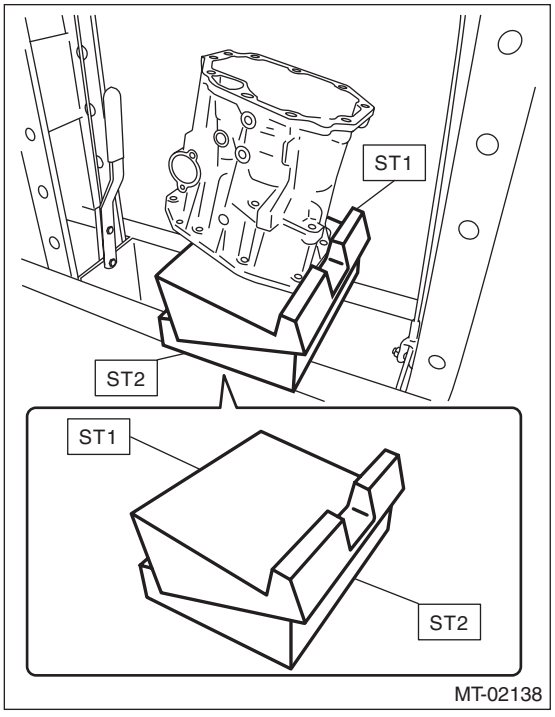


MT-01563

3) Remove the oil seal.
4) Set ST1, ST2 and transfer case to a press.

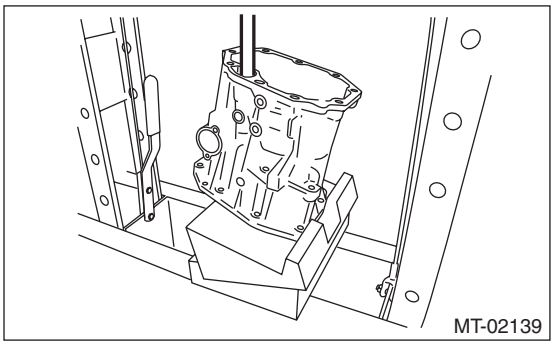
NOTE:
• Set the ST2 under ST1.
• Set the transfer case so that the hole for shifter arm is positioned vertically.

ST1 498267300 CYLINDER HEAD TABLE
ST2 498267200 CYLINDER HEAD TABLE



MT-02138

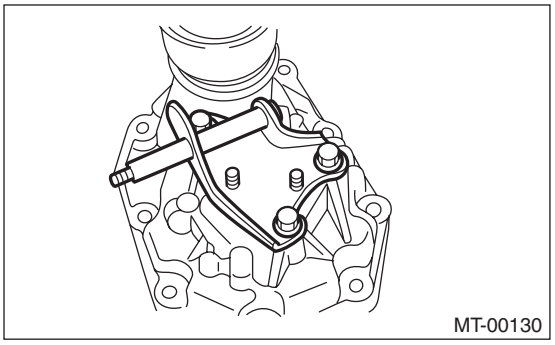
5) Using the round bar with diameter of 22 mm (0.87 in) or 23 mm (0.91 in), remove the roller bearing.



MT-02139

### 2. EXTENSION CASE

1) Remove the transfer drive gear assembly. <Ref. to 5MT-44, REMOVAL, Transfer Drive Gear.>
2) Remove the shift bracket.



MT-00130

3) Remove the oil seal from the extension case. <Ref. to 5MT-32, Oil Seal.>

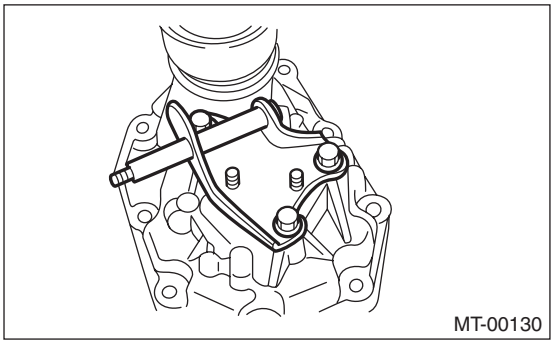
## D: ASSEMBLY

### 1. EXTENSION CASE

1) Using the ST, install the oil seal to the extension case. <Ref. to 5MT-32, Oil Seal.>

NOTE:
Use a new oil seal.
2) Install the shift bracket to extension case.

***Tightening torque:***
***24.5 N·m (2.5 kgf-m, 18.1 ft-lb)***



MT-00130

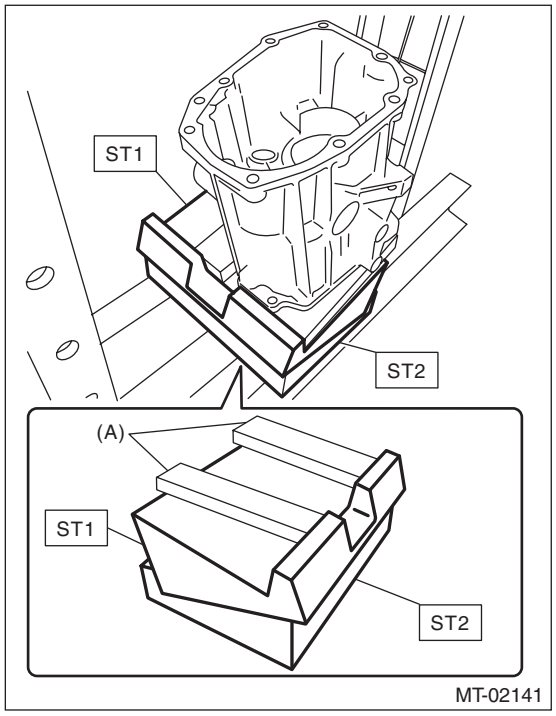
3) Install the transfer drive gear to the extension case. <Ref. to 5MT-44, INSTALLATION, Transfer Drive Gear.>

## 2. TRANSFER CASE

1) Set the ST1, ST2, iron plate and the transfer case to the press.

NOTE:
- Set the ST2 under ST1.
- Set the transfer case so that the hole for shifter arm is positioned vertically.
- Insert the iron plate which is thicker than the exposed length of the transfer case knock pin between the ST and transfer case.
- Set the iron plate so that the transfer case knock pin does not ride on the iron plate.

ST1 498267300 CYLINDER HEAD TABLE
ST2 498267200 CYLINDER HEAD TABLE

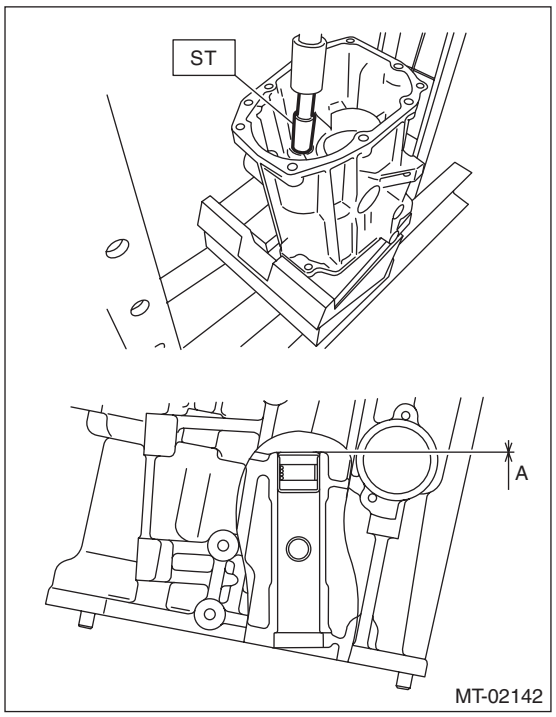


(A) Iron plate

2) Press-fit the roller bearing using the ST.

***Press-fit depth of roller bearing:***
***A: 0±0.2 mm (0±0.01 in) from the end of transfer case***

ST 899864100 REMOVER



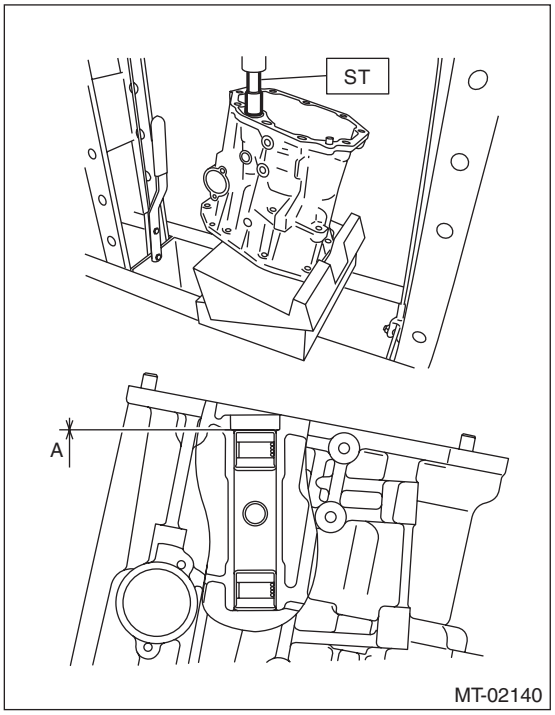
3) Remove the iron plate, and turn over the transfer case.

NOTE:
Set the transfer case so that the hole for shifter arm is positioned vertically.

4) Press-fit the roller bearing using the ST.

***Press-fit depth of roller bearing:***
***A: 0±0.2 mm (0±0.01 in) from the end of transfer case***

ST 899864100 REMOVER

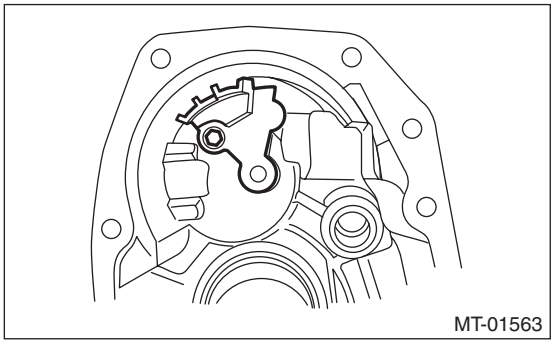


5) Install the shifter arm to the transfer case, and make sure that the shift arm moves smoothly.

6) Install the oil guide to the transfer case.

NOTE:
Use a new installing bolt.

***Tightening torque:***
***6.4 N·m (0.7 kgf-m, 4.7 ft-lb)***

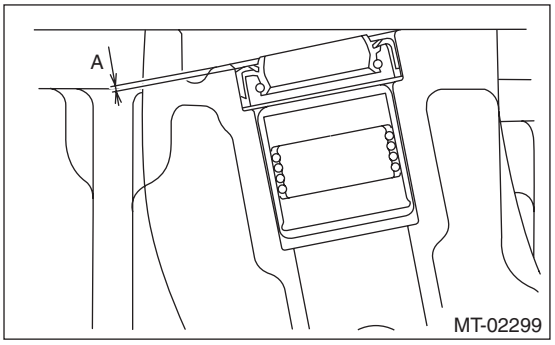


7) Install the reverse check sleeve assembly to the transfer case. <Ref. to 5MT-49, INSTALLATION, Reverse Check Sleeve.>

8) Install the oil seal.

NOTE:
Use a new oil seal.

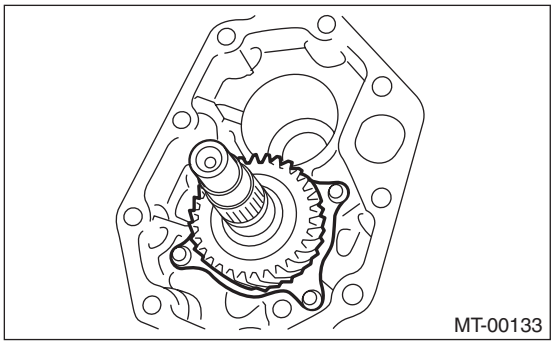
***Press-fit depth of oil seal:***
***A: 1±0.2 mm (0.04±0.01 in) from the end of transfer case***



# 10.Transfer Drive Gear

## A: REMOVAL

1) Remove the manual transmission assembly from the vehicle. <Ref. to 5MT-23, REMOVAL, Manual Transmission Assembly.>
2) Remove the back-up light switch and the neutral position switch. <Ref. to 5MT-35, REMOVAL, Switches and Harness.>
3) Remove the transfer case together with the extension case assembly. <Ref. to 5MT-38, REMOVAL, Transfer Case and Extension Case Assembly.>
4) Remove the extension case assembly.
5) Remove the transfer driven gear.
6) Remove the transfer drive gear.

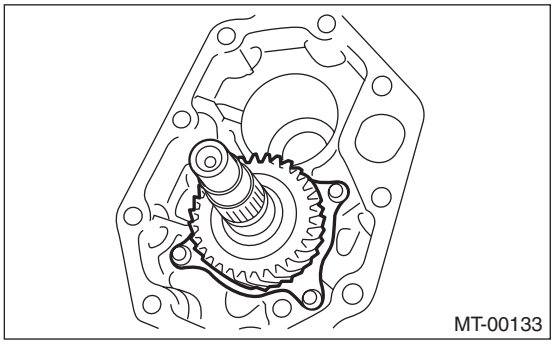


MT-00133

## B: INSTALLATION

1) Install the transfer drive gear.

***Tightening torque:***
***26 N·m (2.7 kgf-m, 19.2 ft-lb)***

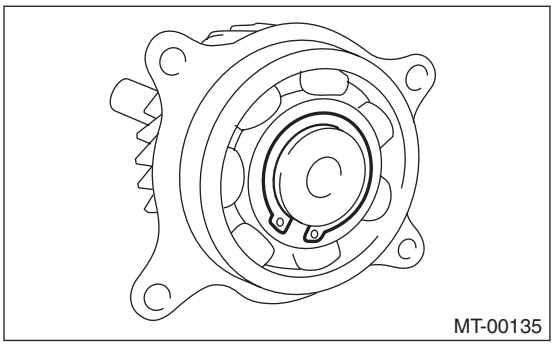


MT-00133

2) Select a thrust washer. <Ref. to 5MT-38, INSTALLATION, Transfer Case and Extension Case Assembly.>
3) Install the transfer driven gear.
4) Install the extension case assembly. <Ref. to 5MT-38, INSTALLATION, Transfer Case and Extension Case Assembly.>
5) Install the transfer case and the extension case assembly. <Ref. to 5MT-38, INSTALLATION, Transfer Case and Extension Case Assembly.>
6) Install the back-up light switch and the neutral position switch. <Ref. to 5MT-35, INSTALLATION, Switches and Harness.>
7) Install the manual transmission assembly to the vehicle. <Ref. to 5MT-26, INSTALLATION, Manual Transmission Assembly.>

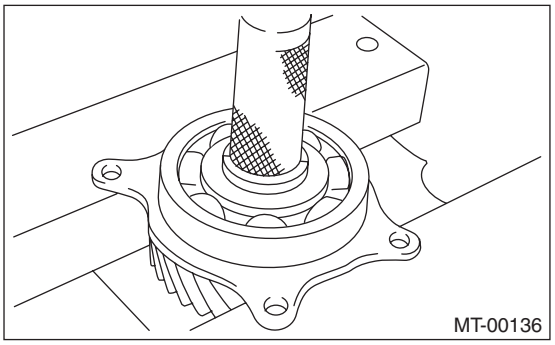
## C: DISASSEMBLY

1) Remove the snap ring.



MT-00135

2) Remove the ball bearing.



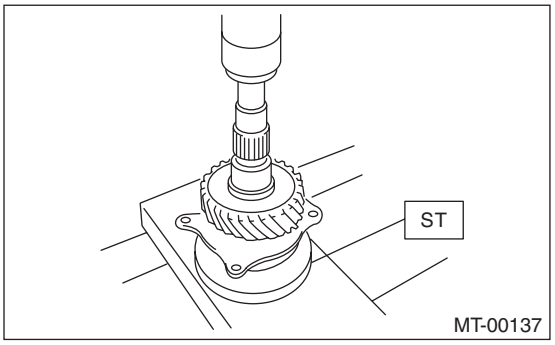
MT-00136

## D: ASSEMBLY

1) Set the ST against the inner race of the bearing, and install the drive shaft.

**CAUTION:**
**Do not apply a load in excess of 10 kN (1 ton, 1.1 US ton, 1.0 Imp ton).**

NOTE:
Use a new ball bearing.
ST 398177700 INSTALLER



MT-00137

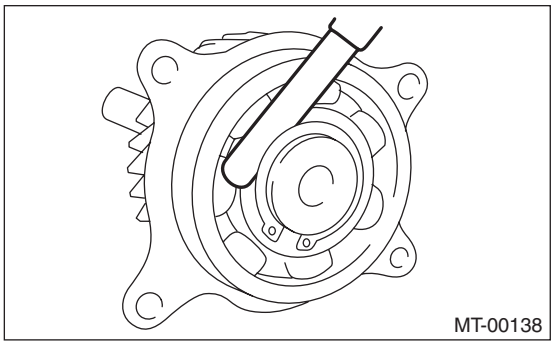
2) Install the snap ring on the transfer drive shaft.
3) Inspect the clearance between the snap ring and the ball bearing. <Ref. to 5MT-45, INSPECTION, Transfer Drive Gear.>

## E: INSPECTION

1) Bearing
Replace the bearings in the following cases.
- In case of broken or rusty bearings
- In case of worn or damaged bearings
- When the bearings fail to turn smoothly or emit noise in rotation after gear oil lubrication.

2) Drive gear
If the drive gear tooth surface and shaft are excessively broken or damaged, replace the drive gear.
3) Measure the clearance between snap ring and inner race of ball bearing with a thickness gauge.

***Clearance:***
***0.01 — 0.15 mm (0.0004 — 0.0059 in)***



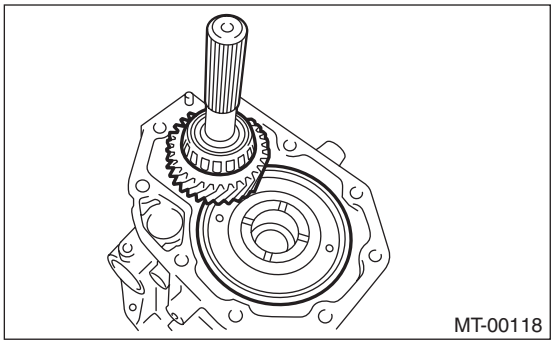
If the measurement is not within specification, select a suitable snap ring and replace it.

| Snap ring (outer-30) | |
|---|---|
| Part No. | Thickness mm (in) |
| 805030041 | 1.53 (0.0602) |
| 805030042 | 1.65 (0.0650) |
| 805030043 | 1.77 (0.0697) |

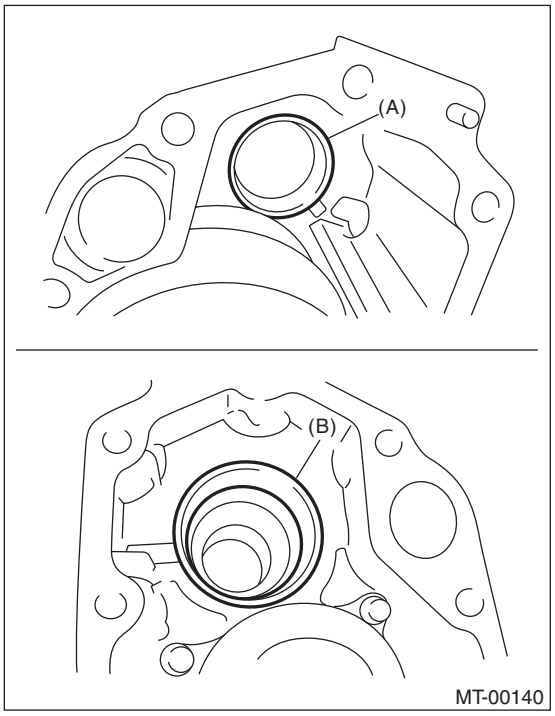
# 11.Transfer Driven Gear

## A: REMOVAL

1) Remove the manual transmission assembly from the vehicle. <Ref. to 5MT-23, REMOVAL, Manual Transmission Assembly.>
2) Remove the back-up light switch and the neutral position switch. <Ref. to 5MT-35, REMOVAL, Switches and Harness.>
3) Remove the transfer case together with the extension case assembly. <Ref. to 5MT-38, REMOVAL, Transfer Case and Extension Case Assembly.>
4) Remove the extension case assembly.
5) Remove the transfer driven gear.



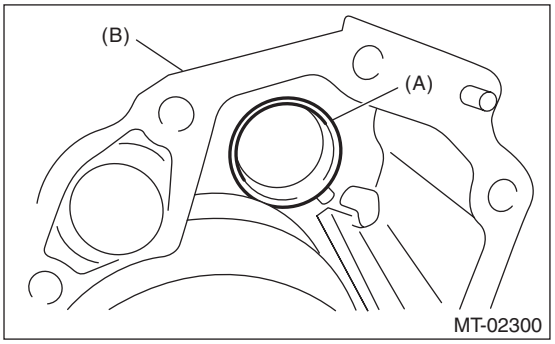
6) Remove bearing outer races from the extension case and transfer case.



(A) Bearing outer race (Transfer case side)
(B) Bearing outer race (Extension case side)

## B: INSTALLATION

1) Install the bearing outer race to transfer case.

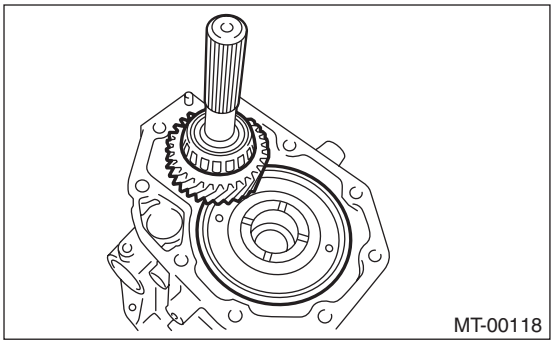


(A) Bearing outer race
(B) Transfer case

2) Apply a coat of grease to the front roller bearing and rear roller bearing of the transfer driven gear.

***Grease:***
***NICHIMOLY N-130 or equivalent***

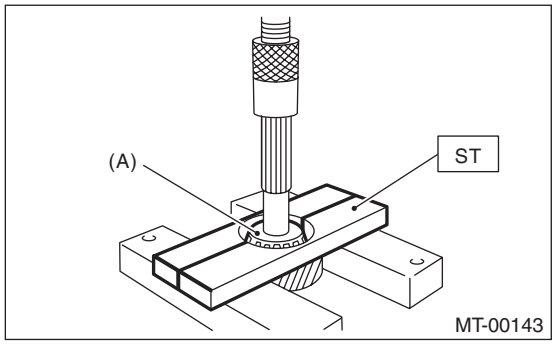
3) Install the transfer driven gear.



4) Select a thrust washer. <Ref. to 5MT-38, INSTALLATION, Transfer Case and Extension Case Assembly.>
5) Install the transfer case and the extension case assembly. <Ref. to 5MT-38, INSTALLATION, Transfer Case and Extension Case Assembly.>
6) Install the back-up light switch and the neutral position switch. <Ref. to 5MT-35, INSTALLATION, Switches and Harness.>
7) Install the manual transmission assembly to the vehicle. <Ref. to 5MT-26, INSTALLATION, Manual Transmission Assembly.>

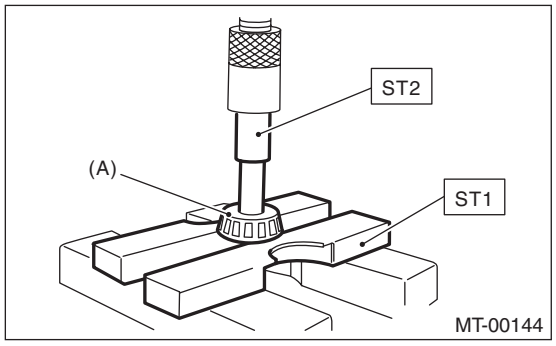
## C: DISASSEMBLY

1) Using the ST, remove the roller bearing (extension case side).
ST 498077000 REMOVER



(A) Roller bearing

2) Using ST1 and ST2, remove the roller bearing (transfer case side).
ST1 498077000 REMOVER
ST2 899864100 REMOVER

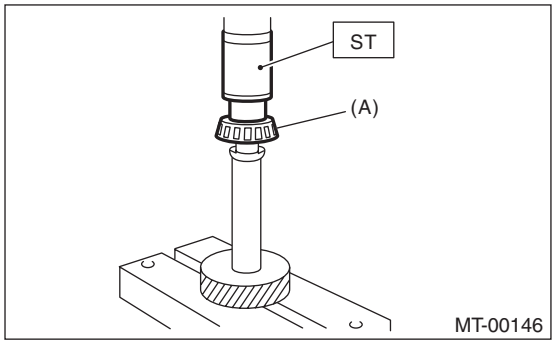


(A) Roller bearing

## D: ASSEMBLY

1) Using ST, install the roller bearing (transfer case side).
ST 927640000 INSTALLER

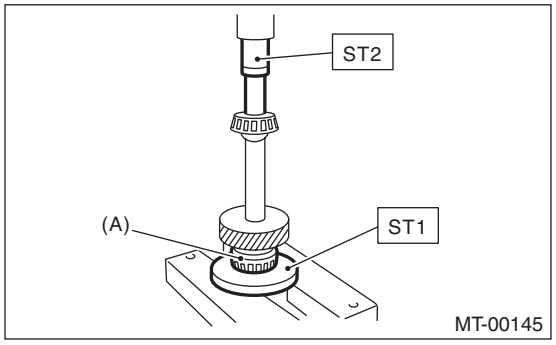
**CAUTION:**
**Do not apply a load in excess of 10 kN (1 ton, 1.1 US ton, 1.0 Imp ton).**



(A) Roller bearing

2) Using the ST, install the roller bearing (extension case side).

**CAUTION:**
**Do not apply a load in excess of 10 kN (1 ton, 1.1 US ton, 1.0 Imp ton).**
ST1 498175500 INSTALLER
ST2 899864100 REMOVER



(A) Roller bearing

## E: INSPECTION

1) Bearing
Replace the bearings in the following cases.
- In case of broken or rusty bearings
- In case of worn or damaged bearings
- When the bearings fail to turn smoothly or emit noise in rotation after gear oil lubrication.

2) Driven gear
If the tooth face of driven gear and the shaft are excessively broken or damaged, replace the driven gear.

# 12.Center Differential

## A: REMOVAL

1) Remove the manual transmission assembly from the vehicle. <Ref. to 5MT-23, REMOVAL, Manual Transmission Assembly.>
2) Remove the back-up light switch and the neutral position switch. <Ref. to 5MT-35, REMOVAL, Switches and Harness.>
3) Remove the transfer case together with the extension case assembly. <Ref. to 5MT-38, REMOVAL, Transfer Case and Extension Case Assembly.>
4) Remove the extension case assembly. <Ref. to 5MT-38, REMOVAL, Transfer Case and Extension Case Assembly.>
5) Remove the transfer driven gear. <Ref. to 5MT-46, REMOVAL, Transfer Driven Gear.>
6) Remove the center differential.

## B: INSTALLATION

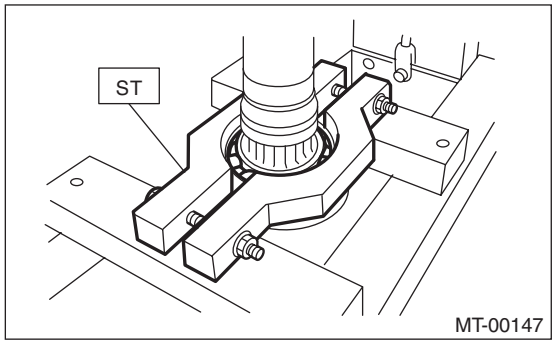
1) Attach the center differential to transfer case.
2) Install the transfer driven gear. <Ref. to 5MT-46, INSTALLATION, Transfer Driven Gear.>
3) Install the extension case assembly. <Ref. to 5MT-38, INSTALLATION, Transfer Case and Extension Case Assembly.>
4) Install the transfer case together with the extension case assembly. <Ref. to 5MT-38, INSTALLATION, Transfer Case and Extension Case Assembly.>
5) Install the back-up light switch and the neutral position switch. <Ref. to 5MT-35, INSTALLATION, Switches and Harness.>
6) Install the manual transmission assembly to the vehicle. <Ref. to 5MT-26, INSTALLATION, Manual Transmission Assembly.>

## C: DISASSEMBLY

Remove the ball bearing using ST.

NOTE:
Center differential is a non-disassembled part which should not be disassembled.

ST 498077300 CENTER DIFFERENTIAL BEARING REMOVER

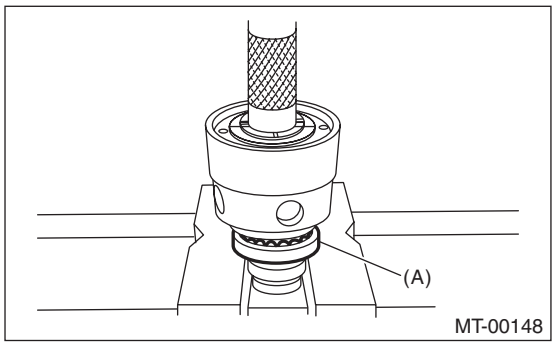


## D: ASSEMBLY

Install the ball bearing to the center differential assembly.

**CAUTION:**
**Do not apply a load in excess of 10 kN (1 ton, 1.1 US ton, 1.0 Imp ton).**

NOTE:
Use a new ball bearing.



(A) Ball bearing

## E: INSPECTION

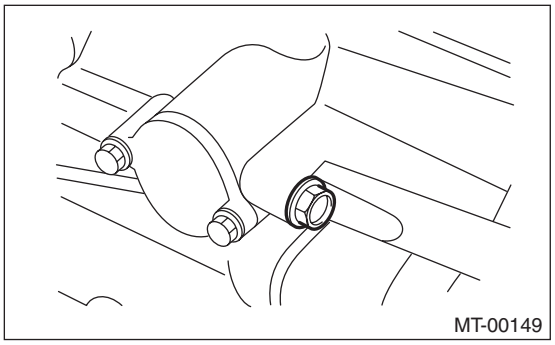
1) Bearing
Replace the bearings in the following cases.
- In case of broken or rusty bearings
- In case of worn or damaged bearings
- When the bearings fail to turn smoothly or emit noise in rotation after gear oil lubrication.
- When bearing has other defects.

2) Center differential
If there is wear or damage, replace the center differential case assembly.

# 13.Reverse Check Sleeve

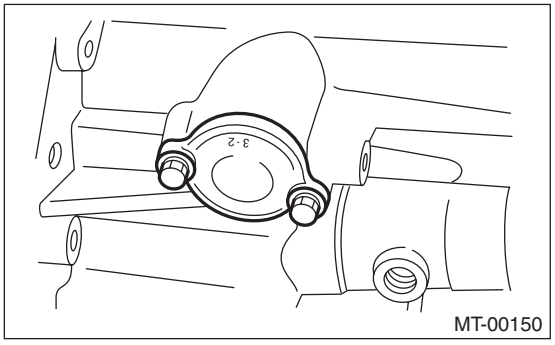
## A: REMOVAL

1) Remove the manual transmission assembly from the vehicle. <Ref. to 5MT-23, REMOVAL, Manual Transmission Assembly.>
2) Remove the transfer case together with the extension case assembly. <Ref. to 5MT-38, REMOVAL, Transfer Case and Extension Case Assembly.>
3) Remove the plug, gasket, reverse accent spring, and reverse check ball.



MT-00149

4) Remove the reverse check sleeve.

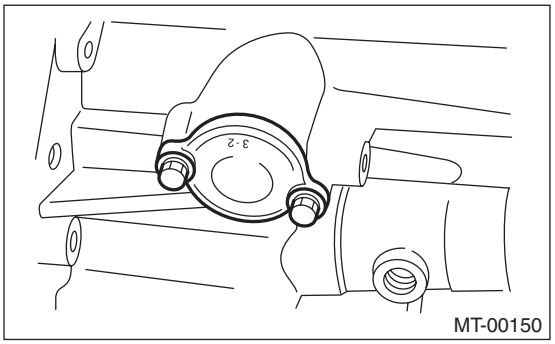


MT-00150

## B: INSTALLATION

1) Install the reverse check sleeve.

***Tightening torque:***
***6.4 N·m (0.7 kgf-m, 4.7 ft-lb)***

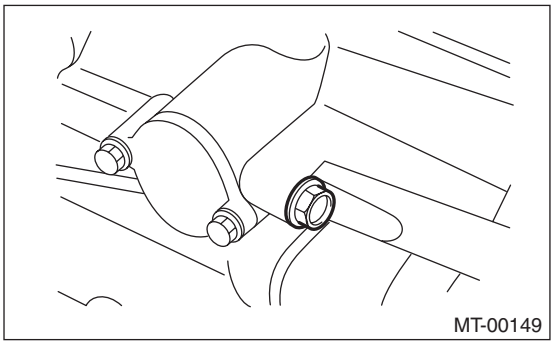


MT-00150

2) Install the reverse check ball, reverse accent spring, gasket, and plug to the transfer case.

NOTE:
Use a new gasket.

***Tightening torque:***
***9.75 N·m (1.0 kgf-m, 7.2 ft-lb)***



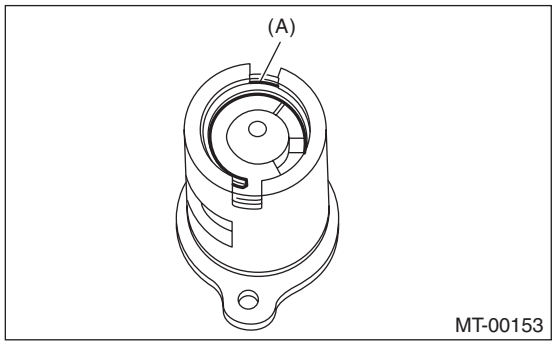
MT-00149

3) Install the transfer case together with the extension case assembly. <Ref. to 5MT-38, INSTALLATION, Transfer Case and Extension Case Assembly.>
4) Install the manual transmission assembly to the vehicle. <Ref. to 5MT-26, INSTALLATION, Manual Transmission Assembly.>

## C: DISASSEMBLY

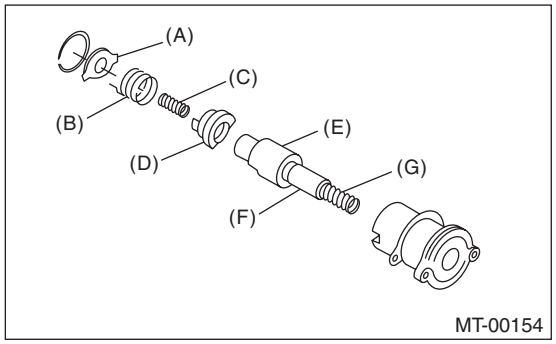
1) Cover the reverse check sleeve with cloth, and remove the snap ring by using screwdriver.

NOTE:
If the snap ring is deformed or the spring repulsive force is not enough, replace with a new snap ring.



(A) Snap ring

2) Remove the reverse check plate, reverse check spring, reverse check cam, return spring (5th-Reverse), reverse accent shaft, return spring cap, and return spring (1st-2nd).



(A) Reverse check plate
(B) Reverse check spring
(C) Return spring (5th-Reverse)
(D) Reverse check cam
(E) Reverse accent shaft
(F) Return spring cap
(G) Return spring (1st-2nd)

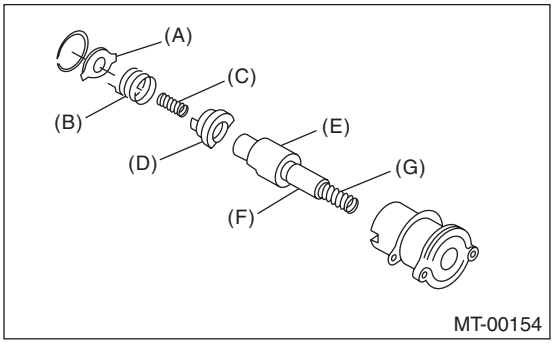
3) Remove the O-ring.

NOTE:
Be careful not to damage the adjusting shim between reverse check sleeve assembly and case.

## D: ASSEMBLY

1) Install the return spring (1st-2nd), return spring cap, reverse accent shaft, reverse check cam, return spring (5th-Reverse) and reverse check spring to the reverse check sleeve.

NOTE:
Be sure to insert the curved part of reverse check spring into the check cam groove.



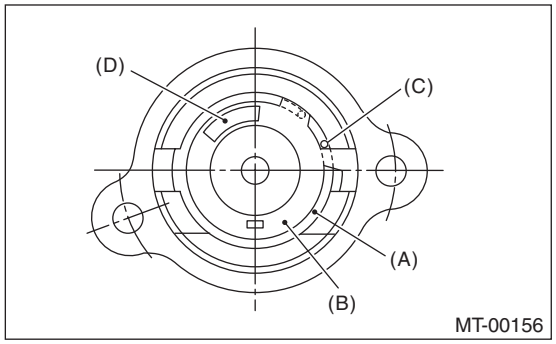
(A) Reverse check plate
(B) Reverse check spring
(C) Return spring (5th-Reverse)
(D) Reverse check cam
(E) Reverse accent shaft
(F) Return spring cap
(G) Return spring (1st-2nd)

2) Hook the curved part of reverse check spring onto the reverse check plate.
3) Rotate the cam so that the protrusion on the reverse check cam is located at the plate opening.
4) While fixing the cam to that position, attach the reverse check plate to the reverse check sleeve, and secure with snap ring.
5) Insert the O-ring into the sleeve groove.

NOTE:
Use new O-rings.

## E: INSPECTION

• Make sure the cutout of the reverse accent shaft is aligned with the opening in the reverse check sleeve.
• Turn the cam by hand to check for smooth rotation.
• Move the cam and shaft all the way toward the plate, and make sure it releases.
If the cam does not return properly, replace the reverse check spring. If the shaft does not return, check for scratches on the inner surface of sleeve. If the sleeve is in good order, replace the spring.



(A) Snap ring
(B) Reverse check plate
(C) Reverse check spring
(D) Reverse check cam

• Select a suitable reverse accent shaft and reverse check plate. <Ref. to 5MT-51, ADJUSTMENT, Reverse Check Sleeve.>

## F: ADJUSTMENT

### 1. NEUTRAL POSITION ADJUSTMENT

1) Shift the gear into 3rd gear position.
2) Because of the return spring, until the arm contacts the stopper the shifter arm will feel lighter moving towards 1st/2nd gear and heavier towards the reverse gear.
3) Make adjustment so that the heavy stroke (reverse side) is a little heavier than the lighter stroke (1st/2nd side).
4) To adjust, remove the bolts holding the reverse check sleeve assembly to the case, and move the sleeve assembly outward, then place an adjustment shim between the sleeve assembly and the case to adjust the clearance.

**CAUTION:**
**Be careful not to damage the O-ring when placing shims.**

NOTE:
• When the shim is removed, the neutral position will move closer to reverse; when the shim is added, the neutral position will move closer to 1st gear.
• If it is not possible to adjust the clearance with only shims, replace the reverse accent shaft and re-adjust.

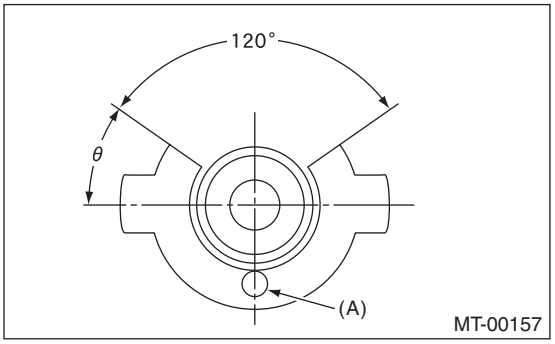
| Adjusting shim | |
|---|---|
| Part No. | Thickness mm (in) |
| 32190AA000 | 0.15 (0.0059) |
| 32190AA010 | 0.30 (0.0118) |

| Reverse accent shaft | | |
|---|---|---|
| Part No. | Mark | Remarks |
| 32188AA130 | S | Neutral position is closer to 1st gear. |
| 32188AA140 | T | Standard |
| 32188AA150 | U | Neutral position is closer to reverse gear. |

### 2. REVERSE CHECK PLATE ADJUSTMENT

1) Shift the shifter arm to “5th” and then to reverse to see if the reverse check mechanism operates properly.
2) Also check to see if the arm returns to neutral when released from the reverse position. If the arm does not return properly, replace the reverse check plate.

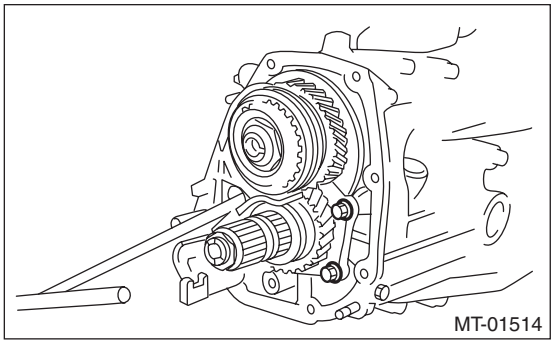
| Reverse check plate | | | |
|---|---|---|---|
| Part No. | (A): No. | Angle$\theta$ | Content |
| 32189AA001 | 0 | 28° | Arm stops closer to 5th gear. |
| 32189AA011 | 1 | 31° | Arm stops closer to 5th gear. |
| 32189AA021 | 2 | 34° | Arm stops in the center. |
| 32189AA031 | 3 | 37° | Arm stops closer to reverse gear. |
| 32189AA041 | 4 | 40° | Arm stops closer to reverse gear. |



# 14.Transmission Case

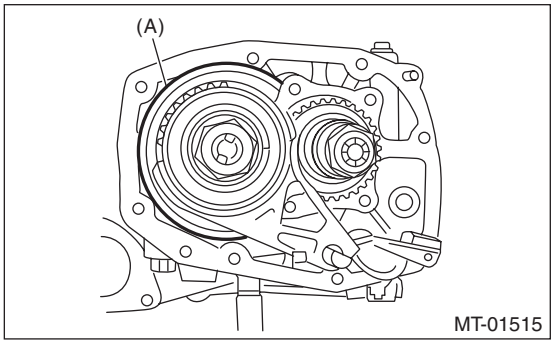
## A: REMOVAL

1) Remove the manual transmission assembly from the vehicle. <Ref. to 5MT-23, REMOVAL, Manual Transmission Assembly.>
2) Remove the clutch release lever. <Ref. to CL-13, REMOVAL, Release Bearing and Lever.>
3) Remove the transfer case together with the extension case assembly. <Ref. to 5MT-38, REMOVAL, Transfer Case and Extension Case Assembly.>
4) Remove the bearing mounting bolt.



MT-01514

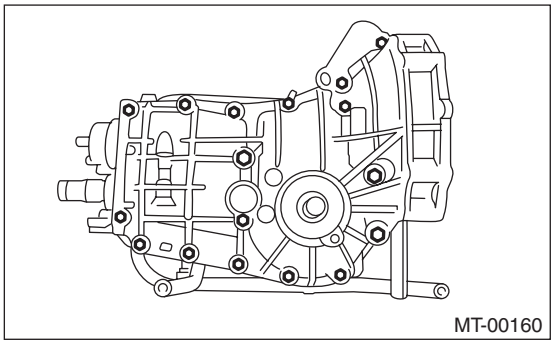
5) Remove the main shaft rear plate.



MT-01515

(A) Main shaft rear plate

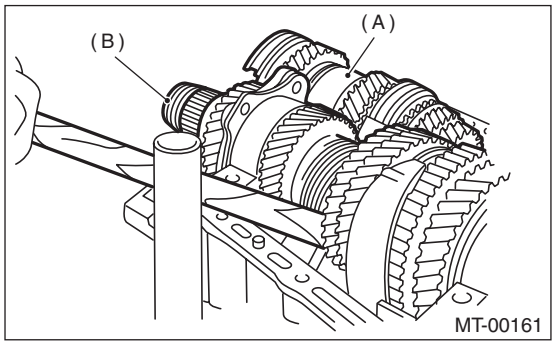
6) Remove the bolts and nuts, and separate the transmission case into the right and left case.



MT-00160

7) Remove the drive pinion shaft assembly.

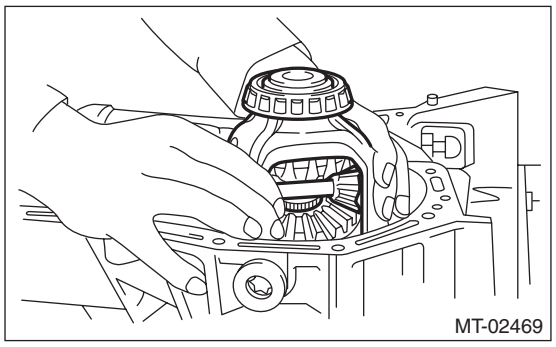
NOTE:
Use a hammer handle, etc. to remove if too tight.



MT-00161

(A) Main shaft ASSY
(B) Drive pinion shaft ASSY

8) Remove the main shaft assembly.
9) Remove the front differential assembly.



MT-02469

10) Remove the differential side retainers and bearing outer races on the left and right side. <Ref. to 5MT-71, REMOVAL, Front Differential Assembly.>

NOTE:
Do not confuse the right and left roller bearing outer races.

11) Remove the reverse idler gear. <Ref. to 5MT-81, REMOVAL, Shifter Fork and Rod.>
12) Remove the shifter fork and rod. <Ref. to 5MT-81, REMOVAL, Shifter Fork and Rod.>

## B: INSTALLATION

1) Wipe off grease, oil and dust on the mating surfaces of transmission cases with cleaning solvent.
2) Install the reverse idler gear. <Ref. to 5MT-79, INSTALLATION, Reverse Idler Gear.>
3) Install the shifter fork and rod. <Ref. to 5MT-81, INSTALLATION, Shifter Fork and Rod.>
4) Select the drive pinion shim. <Ref. to 5MT-61, INSTALLATION, Drive Pinion Shaft Assembly.>
5) Install the bearing outer race to the transmission case LH side, and install the differential side retainer with the O-ring removed.
6) Install the front differential assembly.

7) Install the main shaft assembly.

NOTE:
Align the needle bearing knock pin hole to the transmission case knock pin.

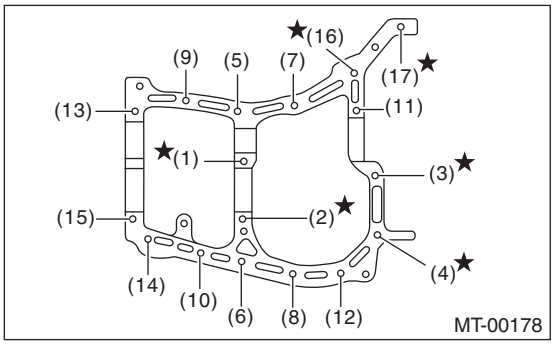
8) Install the selected drive pinion shims and drive pinion shaft assembly.

NOTE:
Align the roller bearing knock pin hole to the transmission case knock pin.

9) Align the left and right side of the transmission case, and tighten it with 17 mounting bolts.

NOTE:
• Insert bolts (11) and (16) from the LH side of the transmission case.
• Match the cases together so that the drive pinion shims are not caught between the cases.

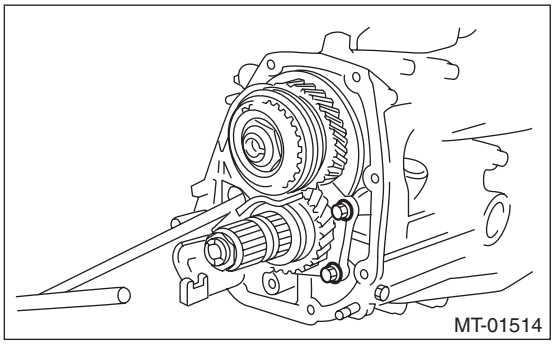
***Tightening torque:***
***8 mm bolt***
***25 N·m (2.5 kgf-m, 18.4 ft-lb)***
★ ***10 mm bolt***
***39 N·m (4.0 kgf-m, 28.8 ft-lb)***



10) Install the bearing outer race to the RH side of the transmission case.

11) Tighten the bearing mounting bolts.

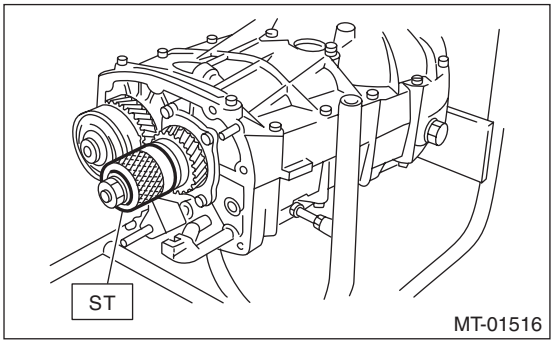
***Tightening torque:***
***30 N·m (3.1 kgf-m, 22.1 ft-lb)***



12) Adjust the backlash of the hypoid gear and the preload of the roller bearing.

(1) Attach the ST on drive pinion assembly.

ST 498427100 STOPPER

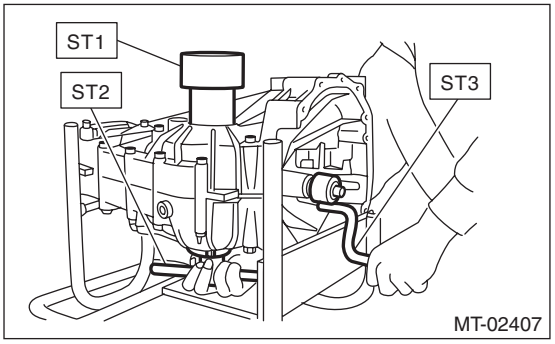


(2) Place the transmission with the LH side of case facing downward, and put ST1 on the bearing outer race.

(3) Screw the retainer assembly from the bottom into left case using ST2. Fit the ST3 on the main shaft. Shift the gear into 4th or 5th, and turn the shaft several times. Screw in the retainer while rotating the ST3 until a slight resistance is felt on ST2.

This is the contact point of the hypoid gear and the drive pinion shaft. Repeat the above sequence several times to ensure the contact point.

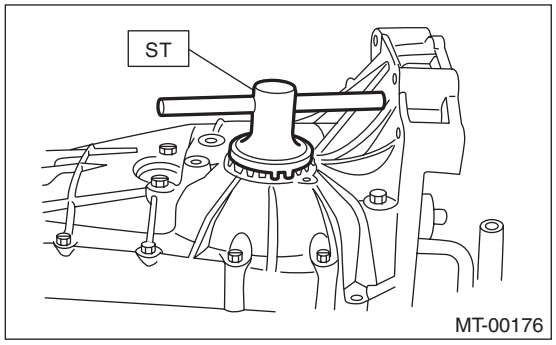
| | | |
|---|---|---|
| ST1 | 399780104 | WEIGHT |
| ST2 | 18630AA010 | WRENCH COMPL RETAINER |
| ST3 | 499927100 | HANDLE |



(4) Remove the WEIGHT, and screw in the side retainer without the O-ring into the RH side of the transmission case, and stop at the point where a slight resistance is felt.

NOTE:
In this condition, the backlash between hypoid gear and drive pinion shaft is zero.

ST 18630AA010 WRENCH COMPL RETAINER



(5) Loosen the side retainer on the LH side of the transmission case by 3 notches, and turn the side retainer on the RH side of the transmission case by the same notches in order to apply backlash.

(6) Screw in the side retainer of the RH side of the transmission case additionally by 1 notch in order to apply preload on taper roller bearing.

(7) Tighten temporarily both the lock plates LH and RH, and put marks on both the side retainer and lock plate for later readjustment.

NOTE:
If it is hard to install the lock plates, reverse the sides and install them.

(8) Turn the main shaft several times while tapping around the retainer lightly with plastic hammer.

13) Inspect and adjust backlash and tooth contact of the hypoid gear. <Ref. to 5MT-75, INSPECTION, Front Differential Assembly.>

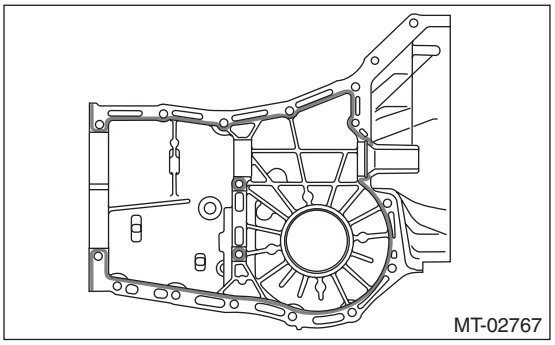
14) Separate the transmission case into left and right parts. <Ref. to 5MT-52, REMOVAL, Transmission Case.>

15) Check each shifter fork. <Ref. to 5MT-82, INSPECTION, Shifter Fork and Rod.>

16) Select a main shaft rear plate. <Ref. to 5MT-60, ADJUSTMENT, Main Shaft Assembly for Single-Range.>

17) Apply liquid gasket, then join the right side and left side of the case together.

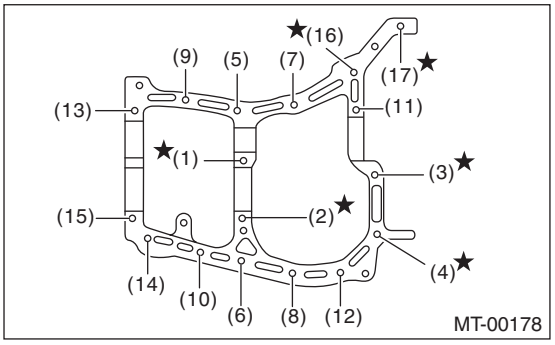
***Liquid gasket:***
***THREE BOND 1215 (Part No. 004403007) or equivalent***



18) With brackets and clips as shown in the figure, tighten the seventeen bolts.

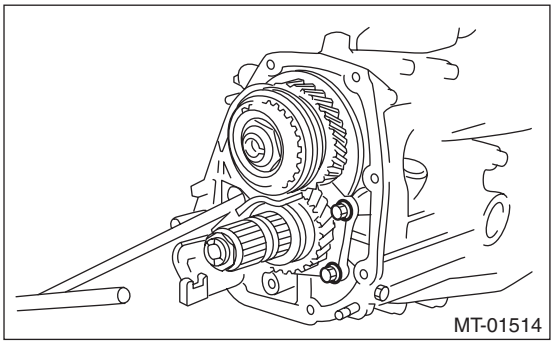
NOTE:
- Insert bolts (11) and (16) from the LH side of the transmission case.
- Match the cases together so that the drive pinion shims are not caught between the cases.

***Tightening torque:***
***8 mm bolt***
***25 N·m (2.5 kgf-m, 18.4 ft-lb)***
★ ***10 mm bolt***
***39 N·m (4.0 kgf-m, 28.8 ft-lb)***



19) Tighten the bearing mounting bolts.

***Tightening torque:***
***30 N·m (3.1 kgf-m, 22.1 ft-lb)***

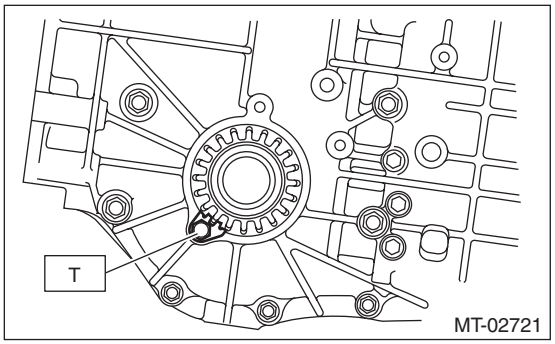


20) Remove the lock plate, and loosen the side retainer until the groove of the O-ring appears. Fit the O-ring into the groove and tighten the side retainer into the position where it was not loosened.

NOTE:
• When loosening the side retainer, record the number of the turns made.
• Perform this for both left and right side retainers.
• Use new O-rings.
• Apply gear oil to O-ring.

21) Install the lock plate.

***Tightening torque:***
***T: 25 N·m (2.5 kgf-m, 18.4 ft-lb)***



22) Install the transfer case together with the extension case assembly. <Ref. to 5MT-38, INSTALLATION, Transfer Case and Extension Case Assembly.>

23) Install the clutch release lever and bearing. <Ref. to CL-13, INSTALLATION, Release Bearing and Lever.>

24) Install the manual transmission assembly to the vehicle. <Ref. to 5MT-26, INSTALLATION, Manual Transmission Assembly.>

## C: INSPECTION

Check the transmission case for cracks, damage, or oil leaks.

# 15.Main Shaft Assembly for Single-Range

## A: REMOVAL

1) Remove the manual transmission assembly from the vehicle. <Ref. to 5MT-23, REMOVAL, Manual Transmission Assembly.>
2) Remove the transfer case together with the extension case assembly. <Ref. to 5MT-38, REMOVAL, Transfer Case and Extension Case Assembly.>
3) Remove the transmission case. <Ref. to 5MT-52, REMOVAL, Transmission Case.>
4) Remove the drive pinion shaft assembly. <Ref. to 5MT-61, REMOVAL, Drive Pinion Shaft Assembly.>
5) Remove the main shaft assembly.

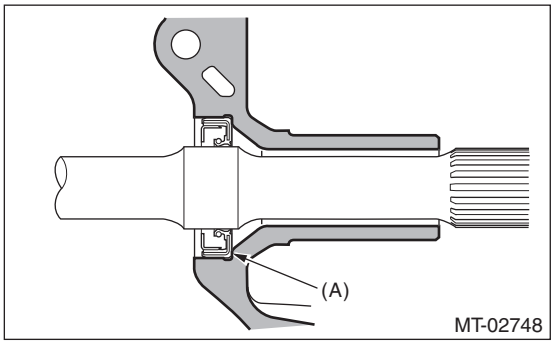
## B: INSTALLATION

1) Attach the needle bearing and oil seal to the main shaft assembly.

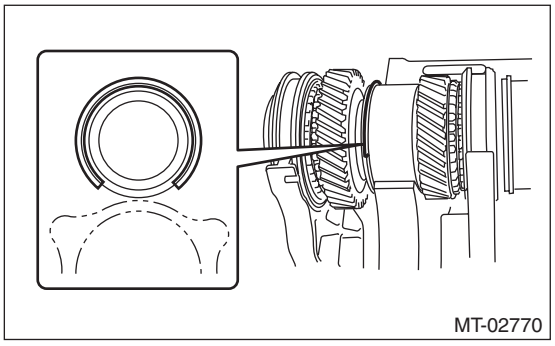
NOTE:
• Wrap the clutch splined section with vinyl tape to prevent damage to the oil seal.
• Apply NICHIMOLY N-130 (or equivalent) to the sealing lip of the oil seal.
• Use a new oil seal.

2) Fit the knock pin hole of the needle bearing outer race to the transmission case knock pin, and install the main shaft assembly.

NOTE:
• Align the end face of the seal with surface (A) when installing the oil seal.



• Face the cutout portion of the snap ring for the ball bearing to the drive pinion shaft assembly.



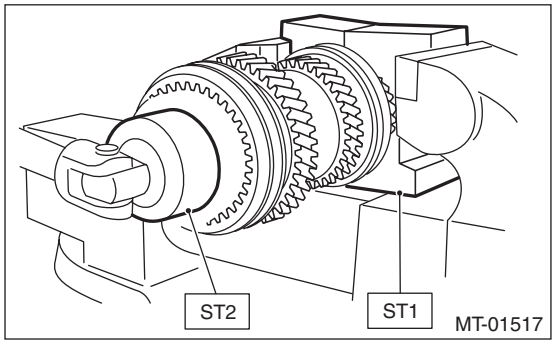
3) Install the drive pinion shaft assembly. <Ref. to 5MT-61, INSTALLATION, Drive Pinion Shaft Assembly.>
4) Check each shifter fork. <Ref. to 5MT-82, INSPECTION, Shifter Fork and Rod.>
5) Select a main shaft rear plate. <Ref. to 5MT-60, ADJUSTMENT, Main Shaft Assembly for Single-Range.>
6) Install the transmission case. <Ref. to 5MT-52, INSTALLATION, Transmission Case.>
7) Install the transfer case together with the extension case assembly. <Ref. to 5MT-38, INSTALLATION, Transfer Case and Extension Case Assembly.>
8) Install the manual transmission assembly to the vehicle. <Ref. to 5MT-26, INSTALLATION, Manual Transmission Assembly.>

## C: DISASSEMBLY

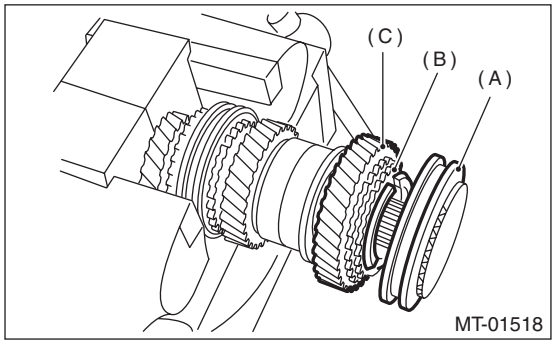
1) Put vinyl tape around main shaft spline to protect the oil seal from damage. Then pull out the oil seal and needle bearing by hand.
2) Remove the lock nut and lock washer from the main shaft assembly.

NOTE:
Flatten the lock nut tab before removing the lock nut.

ST1 498937000 TRANSMISSION HOLDER
ST2 499987003 SOCKET WRENCH (35)



3) Remove the 5th hub & sleeve No. 2, baulk lever, baulk ring, and 5th drive gear & needle bearing.

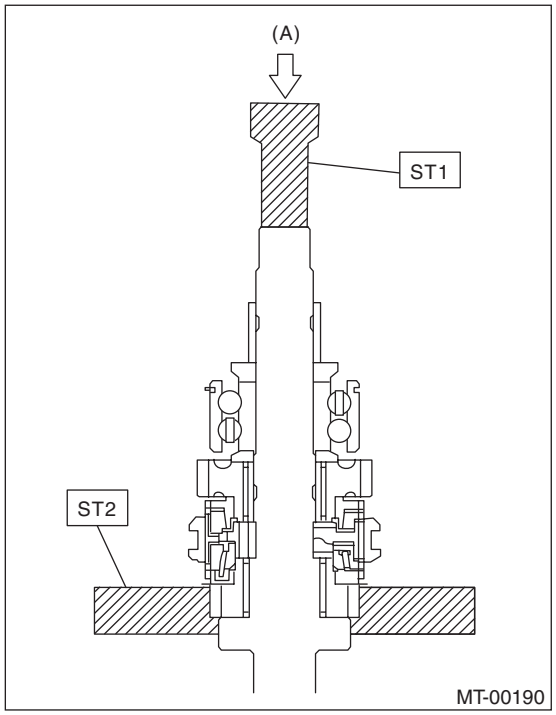


(A) 5th hub & sleeve No. 2
(B) Baulk ring
(C) 5th drive gear

4) Using ST1 and ST2, remove the rest of the parts.

NOTE:
• When replacing the sleeve & hub, replace them as a set.
• Do not disassemble the sleeve & hub; the engaging point is pre-determined.
• If it is necessary to disassemble, mark the engaging points on the splines beforehand.

ST1 899864100 REMOVER
ST2 899714110 REMOVER

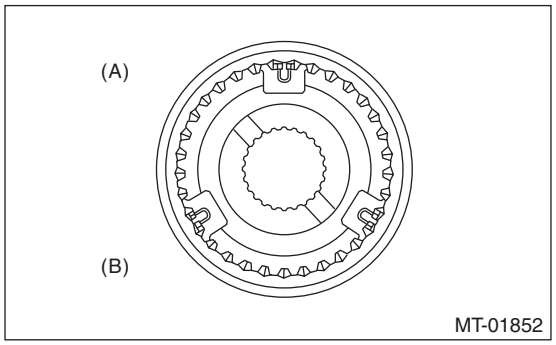


(A) Press

## D: ASSEMBLY

1) When the sleeve & hub assemblies have been disassembled, reassemble by aligning the alignment marks.

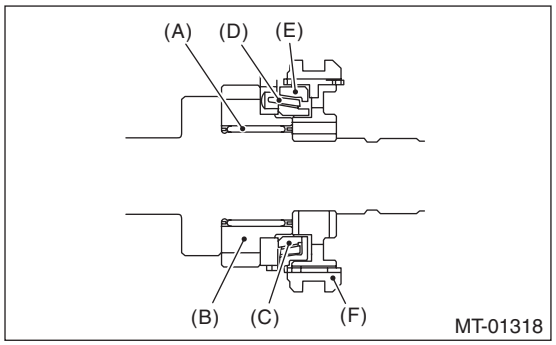
NOTE:
Position the open ends of the spring 120° apart.



(A) 3rd-4th coupling sleeve & synchronizer hub ASSY
(B) 3rd gear side

2) Install the 3rd drive gear, outer baulk ring, synchro cone, inner baulk ring, 3rd needle bearing and sleeve & hub assembly on the main shaft.

NOTE:
Align the groove in baulk ring with the shifting insert.



(A) 3rd needle bearing
(B) 3rd drive gear
(C) Inner baulk ring
(D) Synchro cone
(E) Outer baulk ring
(F) Sleeve & hub ASSY

3) Install the 4th needle bearing race onto the main shaft using ST1, ST2 and press.

**CAUTION:**
**Do not apply a load in excess of 10 kN (1 ton, 1.1 US ton, 1.0 Imp ton).**

ST1 899714110 REMOVER

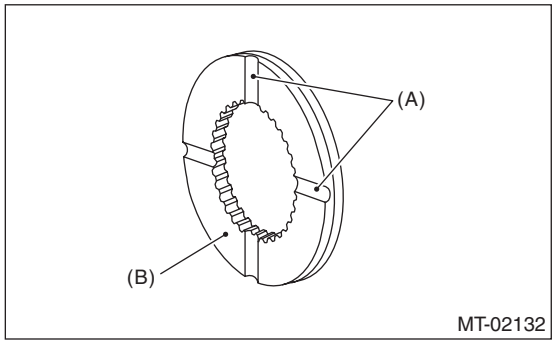
(A) 4th needle bearing race

4) Install the baulk ring, needle bearing, 4th drive gear and 4th gear thrust washer to the main shaft.

NOTE:
• Align the baulk ring and hub & sleeve assembly with the key groove.
• Make sure the thrust washer is facing the correct direction.



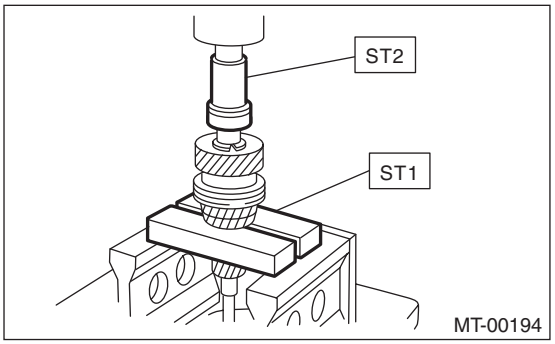
(A) Groove
(B) Face this surface to the 4th gear side.

5) Press-fit the double ball bearing into the rear section of the main shaft using ST1, ST2 and a press.

**CAUTION:**
**Do not apply a load in excess of 10 kN (1 ton, 1.1 US ton, 1.0 Imp ton).**

NOTE:
• Install the snap ring side of the double ball bearing facing the 5th drive gear side.
• Use a new double ball bearing.

ST1 899714110 REMOVER
ST2 499877000 RACE 4-5 INSTALLER

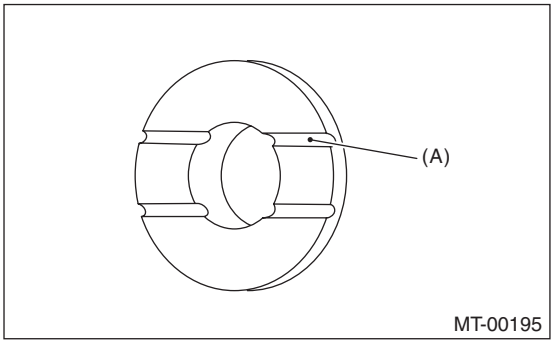


6) Using the ST1 and ST2, install the 5th gear thrust washer and 5th needle bearing race onto the rear section of the main shaft.

**CAUTION:**
**Do not apply a load in excess of 10 kN (1 ton, 1.1 US ton, 1.0 Imp ton).**

NOTE:
Make sure the thrust washer is facing the correct direction.

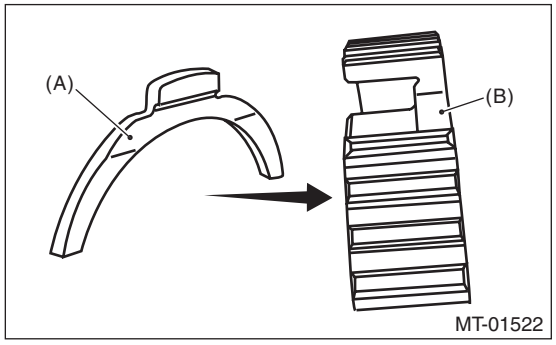
ST1 899714110 REMOVER
ST2 499877000 RACE 4-5 INSTALLER



(A) Face this surface to the 5th gear side.

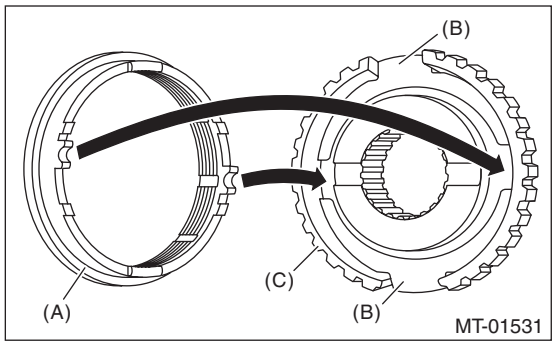
7) Install the rest of the parts to the rear section of the main shaft.

**CAUTION:**
**• Install the baulk lever so that the concave side faces toward the 5th hub.**



(A) Baulk lever
(B) 5th hub

**• Align the protruded section of baulk ring between the baulk levers.**



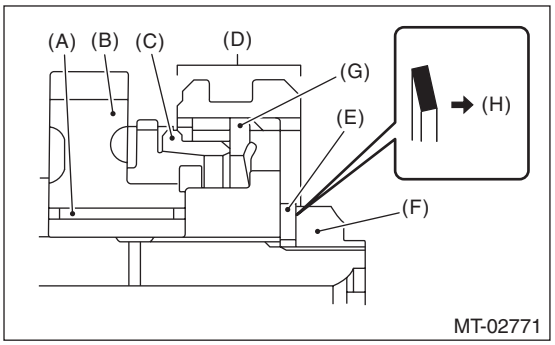
(A) Baulk ring
(B) Baulk lever
(C) 5th hub

8) Tighten the lock nuts to the specified torque using ST1 and ST2.

NOTE:
• Use new lock nuts and lock washers.
• Make sure the lock washer is installed in the proper direction.

ST1 499987003 SOCKET WRENCH (35)
ST2 498937000 TRANSMISSION HOLDER

***Tightening torque:***
***120 N·m (12.2 kgf-m, 88.5 ft-lb)***



(A) Needle bearing

(C) Baulk ring
(D) 5th hub & sleeve No. 2
(E) Lock washer
(F) Lock nut
(G) Baulk lever
(H) Nut side

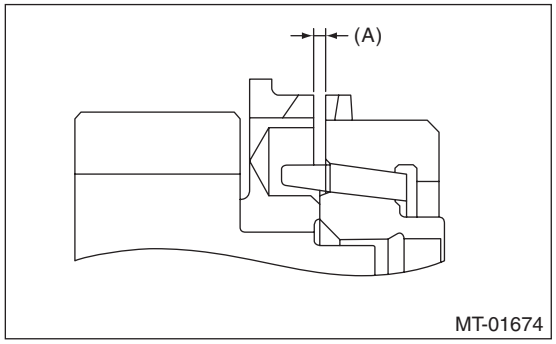
9) Crimp lock nuts in two locations after tightening.

**CAUTION:**
**When crimping the lock nut, be careful not to crack it.**

## E: INSPECTION

Disassembled parts should be washed with cleaning solvent first, then inspected carefully.
1) Bearing
Replace the bearings in the following cases.
• When the bearing balls, outer races and inner races are broken or rusty.
• When the bearing is worn.
• When the bearings fail to turn smoothly or emit noise in rotation after gear oil lubrication.
• When bearing has other defects.
2) Bushing (each gear)
Replace the bushing in following cases.
• When the sliding surface is damaged or abnormally worn.
• When the inner wall is abnormally worn.
3) Gear
Replace gears in the following cases.
• Replace the gear with new part if its tooth surfaces are broken, damaged or excessively worn.
• Correct or replace if the contact surface between the cone and baulk ring is rough or damaged.
• Correct or replace if the inner surface or end face is damaged.
4) Baulk ring, synchro cone
Replace the baulk ring and synchro cone in the following cases.
• When the inner surface and end face are damaged.
• When the baulk ring inner surface is abnormally or partially worn down.
• When the contact surface of the baulk ring insert section is cracked or abnormally worn.
• If the gap between the end faces of the baulk ring and the gear splined part is excessively small, check the clearance (A) while pressing the ring against the cone.

***Clearance (A):***
***0.5 mm (0.020 in) or more***



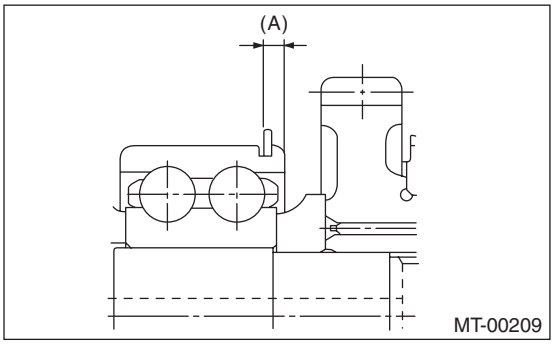
• Apply gear oil to the cone of the gear and while press-fitting the baulk ring, check there is no rotation in the circumferential direction.
5) Shifting insert key
Replace the insert key if deformed, excessively worn or defective in any way.
6) Coupling sleeve and synchronizer hub
• Check the slipping condition of the coupling sleeve.
• Check the splines on the coupling sleeve and synchronizer hub for wear.
7) Oil seal
Replace the oil seal if the lip is deformed, hardened, worn or defective in any way.
8) Gearshift mechanism
Repair or replace the gearshift mechanism if excessively worn, bent or defective in any way.

## F: ADJUSTMENT

Selection of main shaft rear plate:
Measure the protrusion amount (A) of ball bearing from transmission main case surface, and select a suitable plate in the following table.

NOTE:
Before measuring, tap the end of main shaft with a plastic hammer lightly in order to make the clearance zero between the main case surface and moving flange of bearing.

| Dimension (A) mm (in) | Part No. | Mark |
|---|---|---|
| 4.00 — 4.13 (0.1575 — 0.1626) | 32294AA041 | 1 |
| 3.87 — 4.00 (0.1524 — 0.1575) | 32294AA051 | 2 |

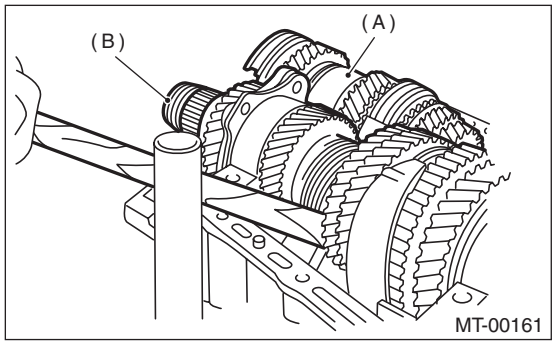


# 16.Drive Pinion Shaft Assembly

## A: REMOVAL

1) Remove the manual transmission assembly from the vehicle. <Ref. to 5MT-23, REMOVAL, Manual Transmission Assembly.>
2) Remove the transfer case together with the extension case assembly. <Ref. to 5MT-38, REMOVAL, Transfer Case and Extension Case Assembly.>
3) Remove the transmission case. <Ref. to 5MT-52, REMOVAL, Transmission Case.>
4) Remove the drive pinion shaft assembly.

NOTE:
Use a hammer handle, etc. to remove if too tight.

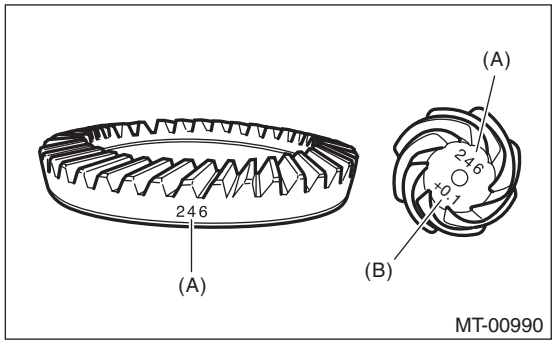


(A) Main shaft ASSY
(B) Drive pinion shaft ASSY

5) Remove the main shaft assembly. <Ref. to 5MT-56, REMOVAL, Main Shaft Assembly for Single-Range.>

## B: INSTALLATION

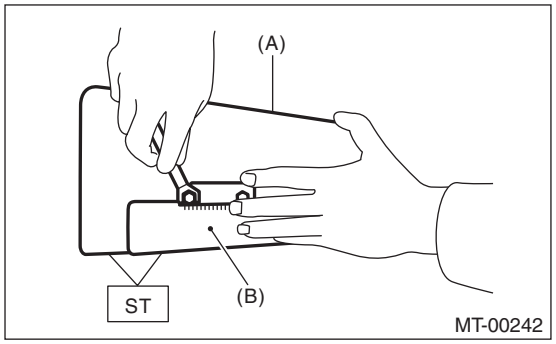
1) Remove the front differential assembly.
2) Hypoid gear set match mark/No.: The number (A) on top of the drive pinion, and the number on the hypoid driven gear are set numbers for the two gears. Use a pair having the same numbers.
The figure (B) below shows a number for shim adjustment. If no number is shown, the value is zero.



(A) Set number
(B) Number for shim adjustment

3) Place the drive pinion shaft assembly on transmission main case RH without shim and tighten the bearing mounting bolts.
4) Perform the adjustment of ST.
(1) Loosen the two bolts and adjust so that the scale indicates 0.5 correctly when the plate end and the scale end are on the same level.

ST 499917500 DRIVE PINION GAUGE ASSY



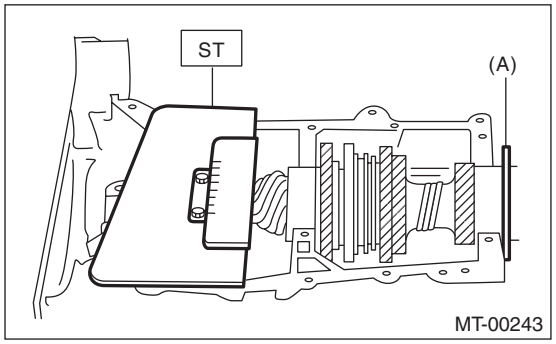
(A) Plate
(B) Scale

(2) Tighten the two bolts.
5) Position the ST by inserting the knock pin of ST into the knock hole of transmission case.

ST 499917500 DRIVE PINION GAUGE ASSY

6) Slide the drive pinion gauge scale with finger tip and read the value at the point where it matches with the end face of drive pinion.

ST 499917500 DRIVE PINION GAUGE ASSY



(A) Adjust the clearance to zero without shim.

7) The thickness of shim shall be determined by adding the value indicated on drive pinion to the value indicated on the ST. (Add if the number on drive pinion is prefixed by +, and subtract if the number is prefixed by –.)

ST 499917500 DRIVE PINION GAUGE ASSY

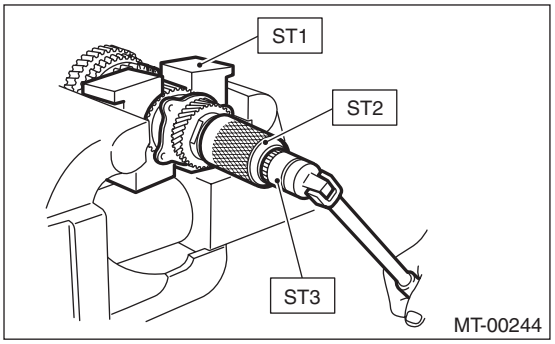
8) Select one to three shims in the following table for the value determined as described above, and take the shim(s) which thickness is closest to the said value.

| Drive pinion shim | |
|---|---|
| Part No. | Thickness mm (in) |
| 32295AA031 | 0.150 (0.0059) |
| 32295AA041 | 0.175 (0.0069) |
| 32295AA051 | 0.200 (0.0079) |
| 32295AA061 | 0.225 (0.0089) |
| 32295AA071 | 0.250 (0.0098) |
| 32295AA081 | 0.275 (0.0108) |
| 32295AA091 | 0.300 (0.0118) |
| 32295AA101 | 0.500 (0.0197) |

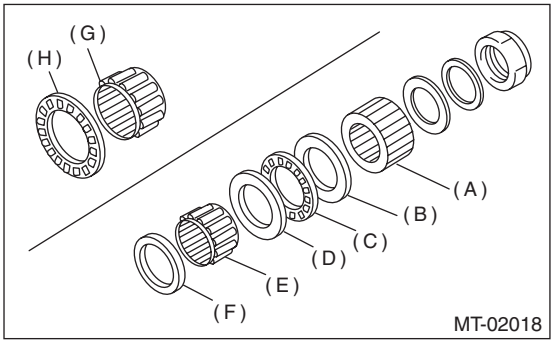
9) Install the front differential assembly. <Ref. to 5MT-71, INSTALLATION, Front Differential Assembly.>
10) Fit the transmission case knock pin to the knock pin hole of the roller bearing and install the drive pinion shaft assembly.
11) Install the main shaft assembly. <Ref. to 5MT-56, INSTALLATION, Main Shaft Assembly for Single-Range.>
12) Check each shifter fork. <Ref. to 5MT-82, INSPECTION, Shifter Fork and Rod.>
13) Install the transmission case. <Ref. to 5MT-52, INSTALLATION, Transmission Case.>
14) Install the transfer case together with the extension case assembly. <Ref. to 5MT-38, INSTALLATION, Transfer Case and Extension Case Assembly.>
15) Install the manual transmission assembly to the vehicle. <Ref. to 5MT-26, INSTALLATION, Manual Transmission Assembly.>

## C: DISASSEMBLY

NOTE:
Attach a cloth to the end of driven shaft (on the frictional side of the thrust needle bearing) to prevent damage during disassembly or reassembly.
1) Flatten the tab of the lock nut. Remove the lock nut with ST1, ST2 and ST3.
ST1 899884100 HOLDER
ST2 498427100 STOPPER
ST3 899988608 SOCKET WRENCH (27)

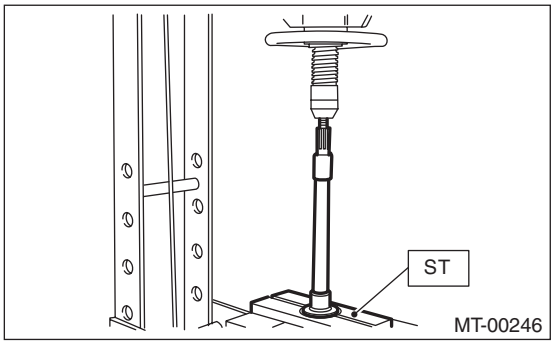


2) Draw out the drive pinion shaft from driven shaft. Remove the differential bevel gear sleeve, adjusting washer No. 1, adjusting washer No. 2, thrust bearing, needle bearing and drive pinion collar.

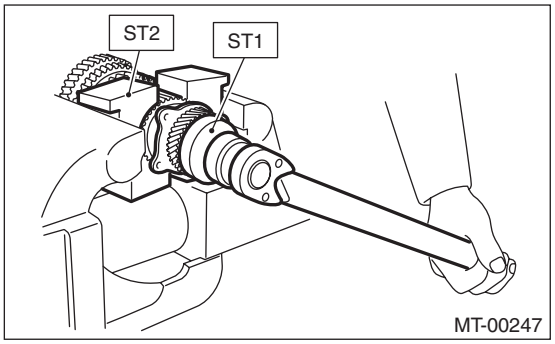


(A) Differential bevel gear sleeve
(B) Adjusting washer No. 1 (25 × 37.5 × t)
(C) Thrust bearing (25 × 37.5 × 3)
(D) Adjusting washer No. 2 (25 × 37.5 × t)
(E) Needle bearing (25 × 30 × 20)
(F) Drive pinion collar
(G) Needle bearing (30 × 37 × 23)
(H) Thrust bearing (33 × 50 × 3)

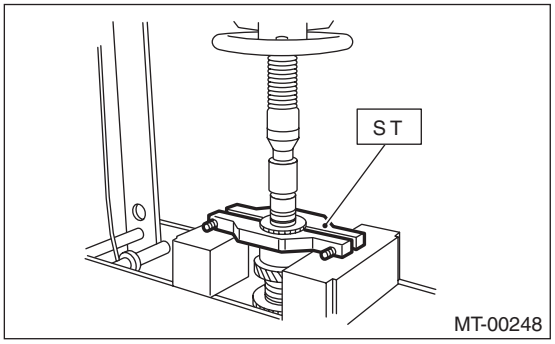
3) Remove the roller bearing and washer using ST and a press.
ST 498077000 REMOVER



4) Flatten the tab of the lock nut. Remove the lock nut and lock washer using ST1 and ST2.
ST1 499987300 SOCKET WRENCH (50)
ST2 899884100 HOLDER

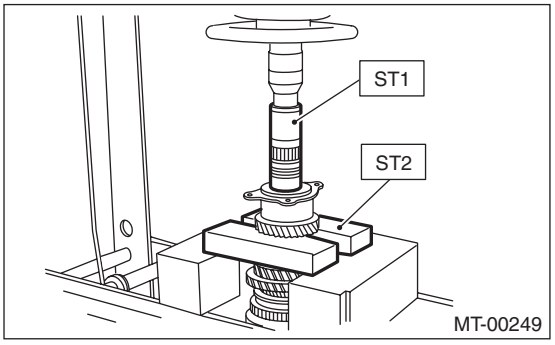


5) Remove the 5th driven gear using ST.
ST 499857000 5TH DRIVEN GEAR REMOVER

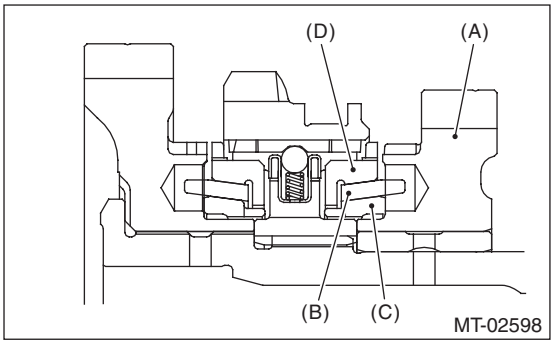


6) Remove the woodruff key.

7) Remove the double taper roller bearing and 3rd-4th driven gear using ST1 and ST2.
ST1 499757002 INSTALLER
ST2 899714110 REMOVER

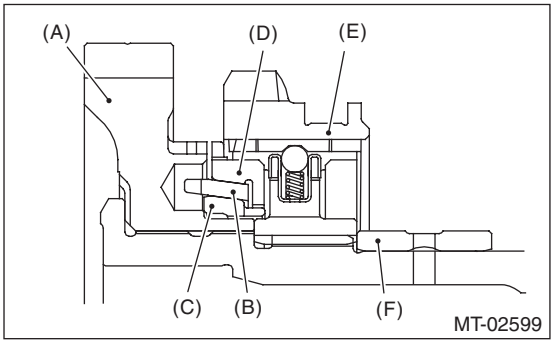


8) Remove the key.
9) Remove the 2nd driven gear, inner baulk ring, synchro cone and outer baulk ring.



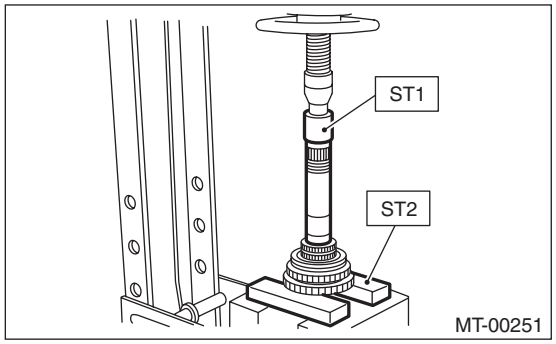
(A) 2nd driven gear
(B) Synchro cone
(C) Inner baulk ring
(D) Outer baulk ring

10) Remove the 1st driven gear, inner baulk ring, synchro cone, outer baulk ring, 2nd gear bushing and gear & hub assembly using ST1 and ST2.



(A) 1st driven gear
(B) Synchro cone
(C) Inner baulk ring
(D) Outer baulk ring
(E) Gear & hub
(F) 2nd gear bushing

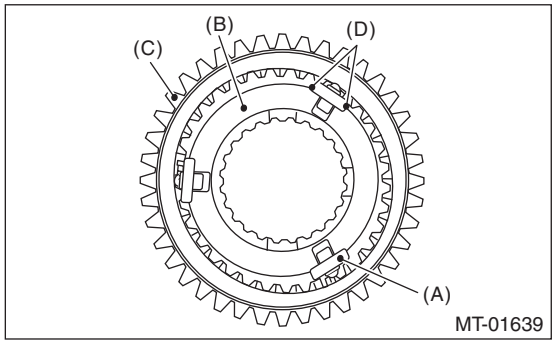
NOTE:
If necessary, use a new gear and hub assembly as a set, when replacing the gear or hub. Because these must engage at the specified point, avoid disassembly as much as possible. If it must be disassembled, mark the engaging point on the spline beforehand.
ST1 499757002 INSTALLER
ST2 899714110 REMOVER



## D: ASSEMBLY

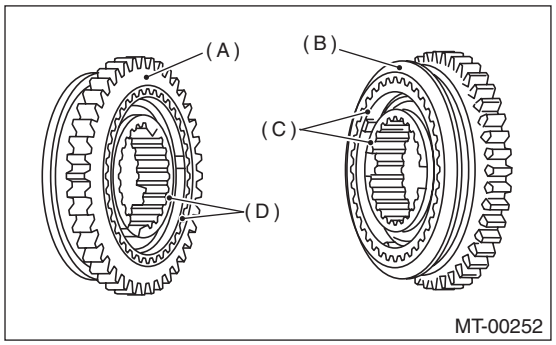
1) Install the sleeve and the gear and hub assembly by matching the alignment marks.

NOTE:
• Make sure that there is no large clearance at both sides of ball detent after assembly.



(A) Ball detent
(B) 1st-2nd synchronizer hub
(C) Reverse driven gear
(D) There is no large clearance at this part.

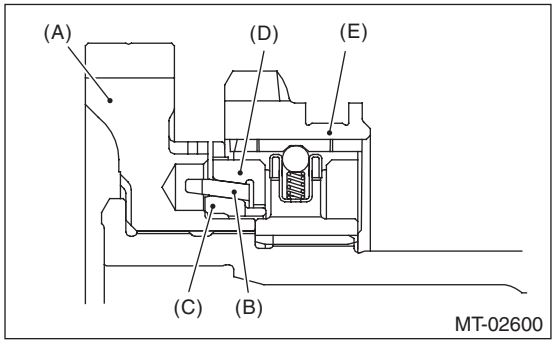
• Use the new gear & hub assembly, if replacing the gear or hub.



(A) 1st gear side
(B) 2nd gear side
(C) Flush surface
(D) Stepped surface

2) Install the 1st driven gear, inner baulk ring, synchro cone, outer baulk ring, and gear & hub assembly onto driven shaft.

NOTE:
• Install the gear & hub assembly in the proper position while paying attention to the installing direction.
• Align the baulk ring and gear & hub assembly with the key groove.

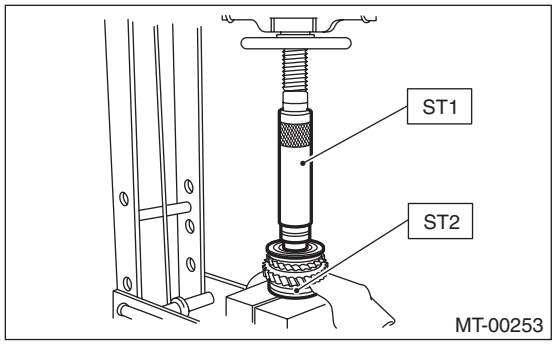


(A) 1st driven gear
(B) Synchro cone
(C) Inner baulk ring
(D) Outer baulk ring
(E) Gear & hub

3) Install the 2nd driven gear bushing onto driven shaft using ST1, ST2 and a press.

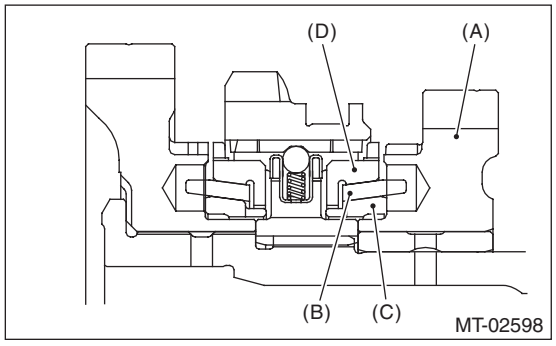
**CAUTION:**
**Do not apply a load in excess of 10 kN (1 ton, 1.1 US ton, 1.0 Imp ton).**

NOTE:
• Attach a cloth to the end of the driven shaft to prevent damage.
• When press fitting, align the oil holes of the shaft and bushing.
ST1 499277200 INSTALLER
ST2 499587000 INSTALLER



4) Install the 2nd driven gear, inner baulk ring, synchro cone and outer baulk ring, and insert them onto driven shaft.

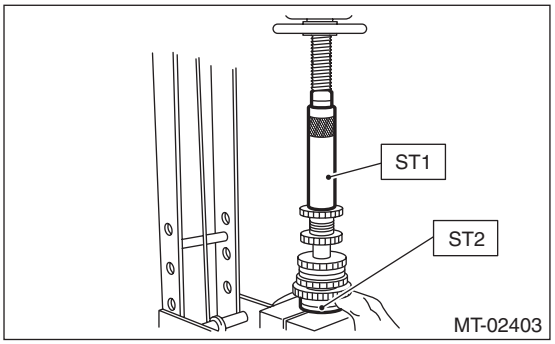
NOTE:
Align the groove in baulk ring with the insert.



(A) 2nd driven gear
(B) Synchro cone
(C) Inner baulk ring
(D) Outer baulk ring

5) After installing key onto the driven shaft, install the 3rd-4th driven gear using ST1, ST2 and a press.

**CAUTION:**
**Do not apply a load in excess of 10 kN (1 ton, 1.1 US ton, 1.0 Imp ton).**
ST1 499277200 INSTALLER
ST2 499587000 INSTALLER



6) Install a set of double taper roller bearings onto the driven shaft using ST1, ST2 and a press.

**CAUTION:**
**Do not apply a load in excess of 10 kN (1 ton, 1.1 US ton, 1.0 Imp ton).**

NOTE:
Use a new double taper roller bearing.
ST1 499277200 INSTALLER

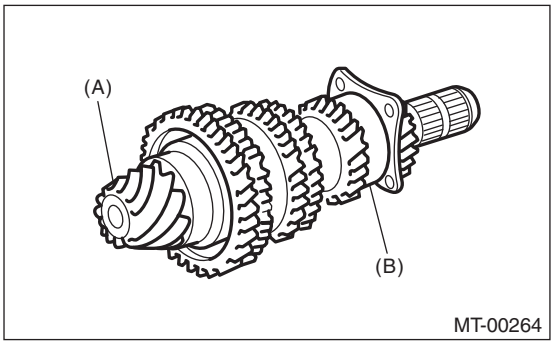
15) Adjust the thrust bearing preload. <Ref. to 5MT-68, THRUST BEARING PRELOAD, ADJUSTMENT, Drive Pinion Shaft Assembly.>

## E: INSPECTION

Disassembled parts should be washed with cleaning solvent first, then inspected carefully.
1) Bearing
Replace the bearings in the following cases.
• When the bearing balls, outer races and inner races are broken or rusty.
• When the bearing is worn.
• When the bearings fail to turn smoothly or emit noise in rotation after gear oil lubrication.
• The ball bearing on the rear side of the drive pinion shaft should be checked for smooth rotation before the drive pinion shaft assembly is disassembled. In this case, because a preload is working on the bearing, its rotation feels like it is slightly dragging unlike other bearings.

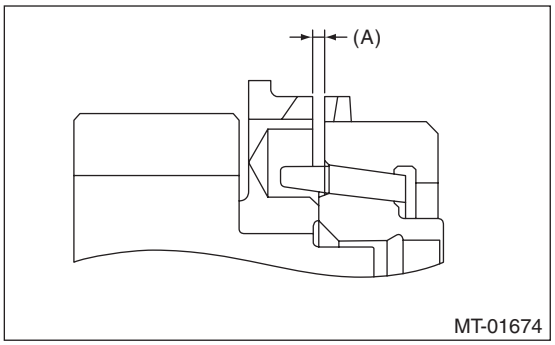


(A) Drive pinion shaft
(B) Ball bearing

• When bearing has other defects.
2) Bushing (each gear)
Replace the bushing in following cases.
• When the sliding surface is damaged or abnormally worn.
• When the inner wall is abnormally worn.
3) Gear
Replace gears in the following cases.
• Replace the gear with new part if its tooth surfaces are broken, damaged or excessively worn.
• Correct or replace if the contact surface between the cone and baulk ring is rough or damaged.
• Correct or replace if the inner surface or end face is damaged.

4) Baulk ring, synchro cone
Replace the baulk ring and synchro cone in the following cases.
• When the inner surface and end face are damaged.
• When the baulk ring inner surface is abnormally or partially worn down.
• When the contact surface of the baulk ring insert section is cracked or abnormally worn.
• If the gap between the end faces of the baulk ring and the gear splined part is excessively small, check the clearance (A) while pressing the ring against the cone.

***Clearance (A):***
***0.5 mm (0.020 in) or more***

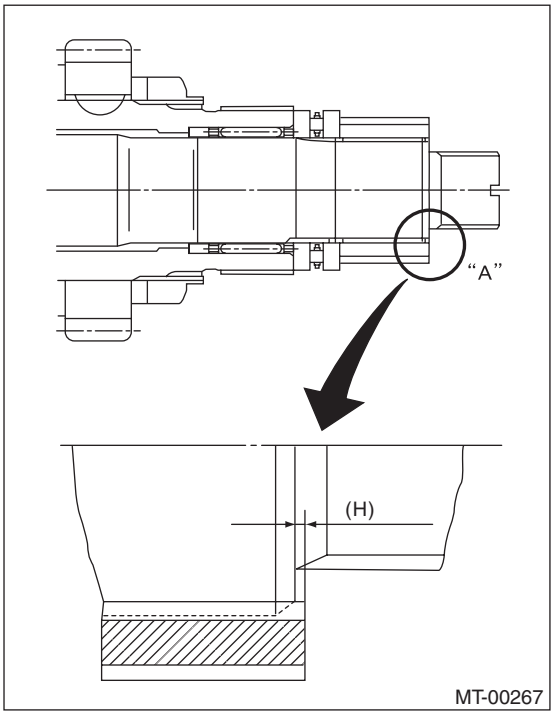


• Apply gear oil to the cone of the gear and while press-fitting the baulk ring, check there is no rotation in the circumferential direction.
5) Coupling sleeve and synchronizer hub
• Check the slipping condition of the coupling sleeve.
• Check the splines on the coupling sleeve and synchronizer hub for wear.
6) Ball detent
Replace the ball detent if deformed, excessively worn or defective in any way.

# F: ADJUSTMENT

## 1. THRUST BEARING PRELOAD

1) Select a suitable adjusting washer No. 1 so that dimension (H) will be zero in a visual check. Position the washer (18.3 × 30 × t) and lock washer (18 × 30 × 2) and attach the lock nut.

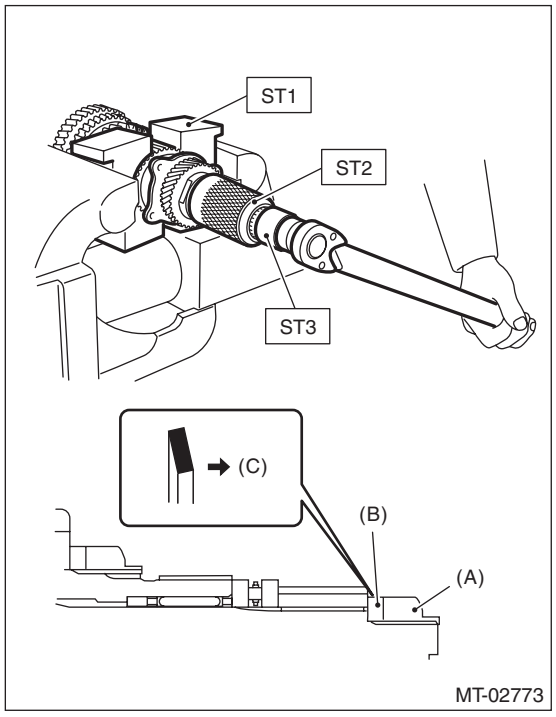


2) Using the ST1, ST2 and ST3, tighten the new lock nut to the specified torque.

NOTE:
- Use new lock nuts and lock washers.
- Make sure the lock washer is installed in the proper direction.

ST1 899884100 HOLDER
ST2 498427100 STOPPER
ST3 899988608 SOCKET WRENCH (27)

***Tightening torque:***
***120 N·m (12.2 kgf-m, 88.5 ft-lb)***

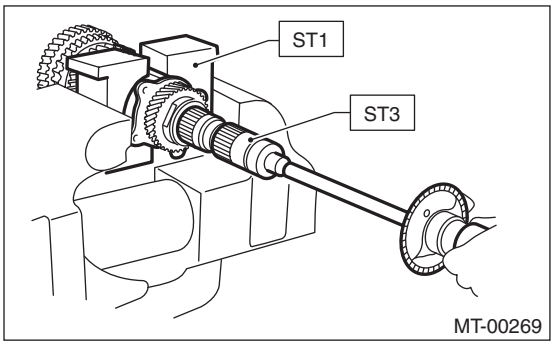


(A) Lock nut
(B) Lock washer
(C) Nut side

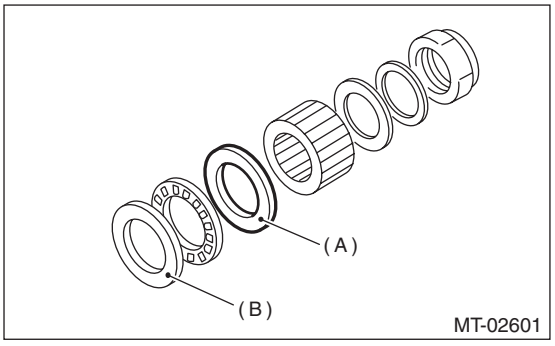
3) After removing the ST2, measure the starting torque using torque driver.

ST1 899884100 HOLDER
ST3 899988608 SOCKET WRENCH (27)

***Starting torque:***
***0.3 — 0.8 N·m (0.03 — 0.08 kgf-m, 0.22 — 0.59 ft-lb)***



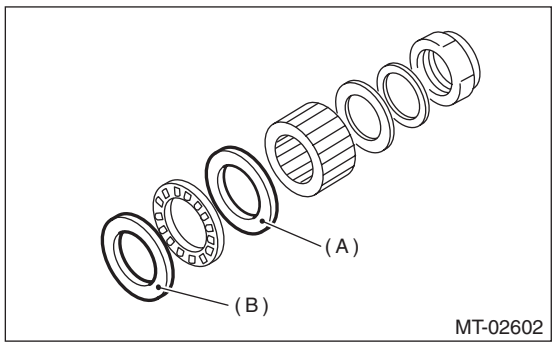
4) If the starting torque is not within the specified limit, select new adjusting washer No. 1 and re-check starting torque.



(A) Adjusting washer No. 1
(B) Adjusting washer No. 2

| Adjusting washer No. 1 | |
|---|---|
| Part No. | Thickness mm (in) |
| 803025051 | 3.925 (0.1545) |
| 803025052 | 3.950 (0.1555) |
| 803025053 | 3.975 (0.1565) |
| 803025054 | 4.000 (0.1575) |
| 803025055 | 4.025 (0.1585) |
| 803025056 | 4.050 (0.1594) |
| 803025057 | 4.075 (0.1604) |

5) If the specified starting torque cannot be obtained by the selection of adjusting washer No. 1, select adjusting washer No. 2 from the list below. Repeat steps 1) through 4) to adjust starting torque.



(A) Adjusting washer No. 1
(B) Adjusting washer No. 2

| Starting torque | Dimension H | Adjusting washer No. 2 |
|---|---|---|
| Low | Small | Select thicker one. |
| High | Large | Select thinner one. |

| Adjusting washer No. 2 | |
|---|---|
| Part No. | Thickness mm (in) |
| 803025059 | 3.850 (0.1516) |
| 803025054 | 4.000 (0.1575) |
| 803025058 | 4.150 (0.1634) |

6) Recheck that the starting torque is within the specified range, then crimp the lock nut at four positions.

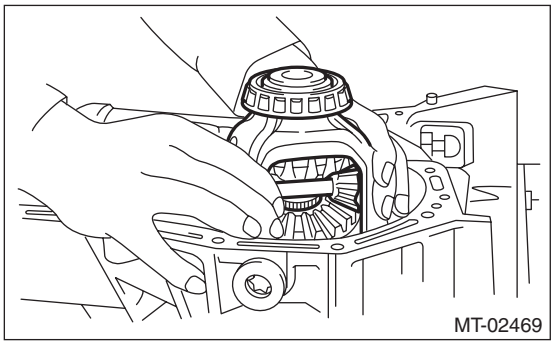
**CAUTION:**
**Do not allow the lock nut to be cracked during crimping operation.**

# 17.Front Differential Assembly

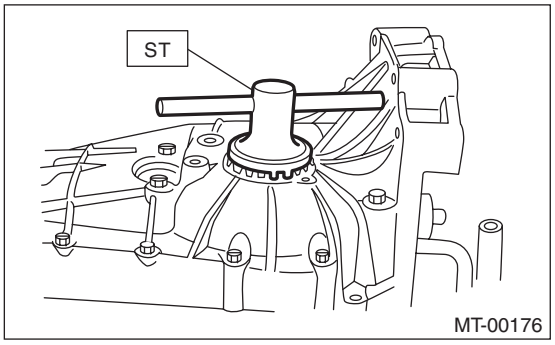
## A: REMOVAL

1) Remove the manual transmission assembly from the vehicle. <Ref. to 5MT-23, REMOVAL, Manual Transmission Assembly.>
2) Remove the transfer case together with the extension case assembly. <Ref. to 5MT-38, REMOVAL, Transfer Case and Extension Case Assembly.>
3) Remove the transmission case. <Ref. to 5MT-52, REMOVAL, Transmission Case.>
4) Remove the drive pinion shaft assembly. <Ref. to 5MT-61, REMOVAL, Drive Pinion Shaft Assembly.>
5) Remove the main shaft assembly. <Ref. to 5MT-56, REMOVAL, Main Shaft Assembly for Single-Range.>
6) Remove the front differential assembly.

NOTE:
• Do not confuse the right and left roller bearing outer races.
• Be careful not to damage the oil seal of retainer.



7) Remove the differential side retainers using ST.
ST 18630AA010 WRENCH COMPL RETAINER

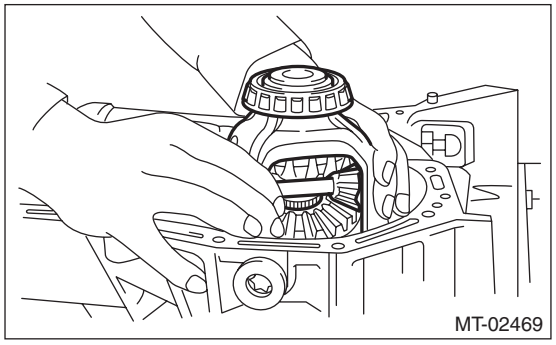


8) Remove the bearing outer race from the transmission case.
ST 398527700 PULLER ASSY

## B: INSTALLATION

1) Install the differential side retainers using ST.
ST 18630AA010 WRENCH COMPL RETAINER
2) Install the bearing outer race to the transmission case.
3) Install the front differential assembly.

NOTE:
Be careful not to bend the seal lips of oil seal.

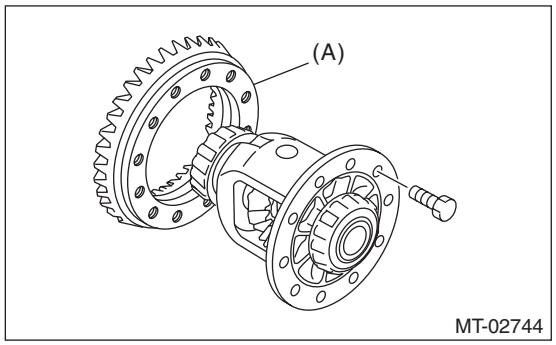


4) Install the main shaft assembly. <Ref. to 5MT-56, INSTALLATION, Main Shaft Assembly for Single-Range.>
5) Install the drive pinion shaft assembly. <Ref. to 5MT-61, INSTALLATION, Drive Pinion Shaft Assembly.>
6) Install the transmission case. <Ref. to 5MT-52, INSTALLATION, Transmission Case.>
7) Install the transfer case together with the extension case assembly. <Ref. to 5MT-38, INSTALLATION, Transfer Case and Extension Case Assembly.>
8) Install the manual transmission assembly to the vehicle. <Ref. to 5MT-26, INSTALLATION, Manual Transmission Assembly.>

# C: DISASSEMBLY

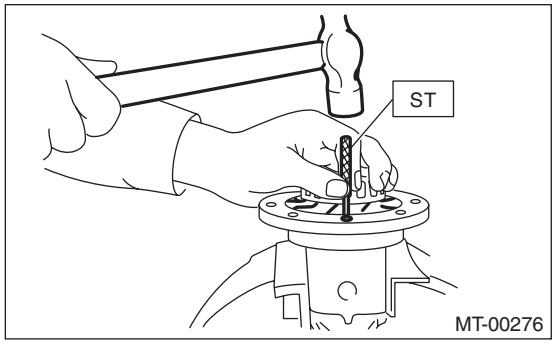
## 1. DIFFERENTIAL CASE ASSEMBLY

1) Remove the twelve bolts and remove hypoid driven gear.

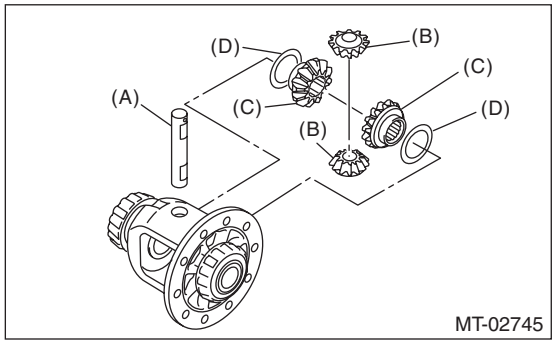


(A) Hypoid driven gear

2) Drive out the straight pin from differential assembly toward hypoid driven gear side.
ST 899904100 STRAIGHT PIN REMOVER

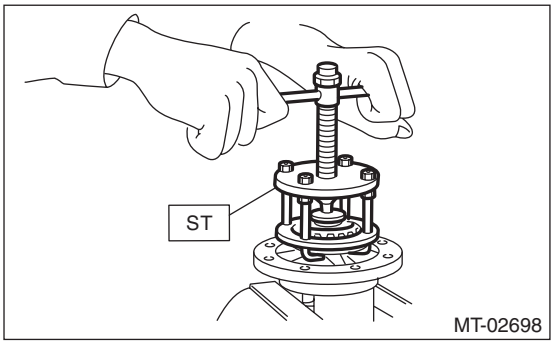


3) Pull out the pinion shaft, and remove the differential bevel pinion, differential bevel gear and washer.



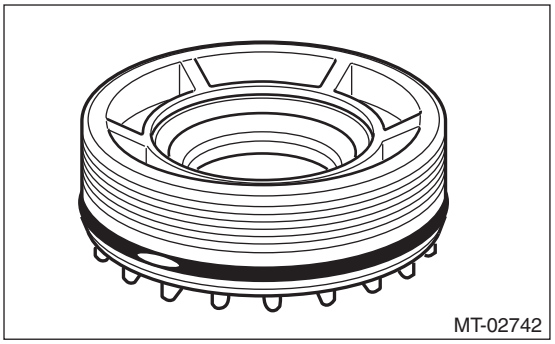
(A) Pinion shaft
(B) Differential bevel pinion
(C) Differential bevel gear
(D) Washer

4) Using the ST, remove the roller bearing.
ST 899524100 PULLER SET



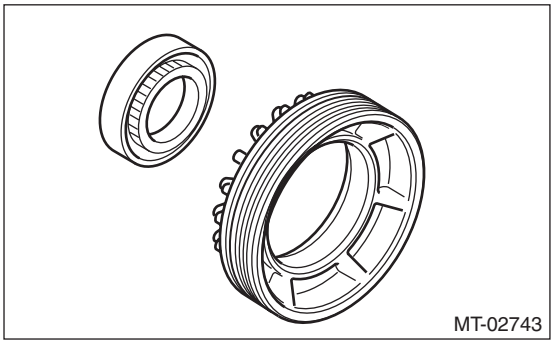
## 2. SIDE RETAINER

1) Remove the O-ring.



2) Remove the oil seal.

NOTE:
Remove it using a flat tip screwdriver wrapped with cloth or tape, etc.

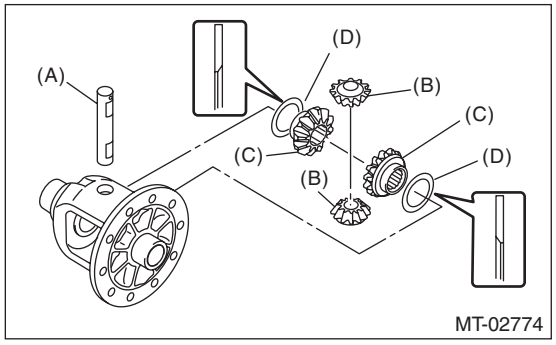


# D: ASSEMBLY

## 1. DIFFERENTIAL CASE ASSEMBLY

1) Install the differential bevel gear and differential bevel pinion together with washer, and insert the pinion shaft.

NOTE:
Face the chamfered side of washer toward gear.

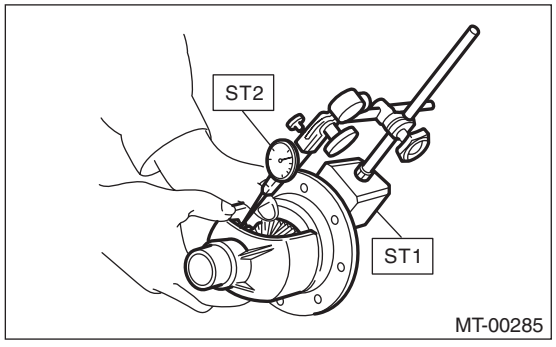


(A) Pinion shaft
(B) Differential bevel pinion
(C) Differential bevel gear
(D) Washer

2) Measure the backlash between differential bevel gear and differential pinion. If the backlash is out of the specified range, install a suitable washer to adjust. <Ref. to 5MT-76, BEVEL PINION GEAR BACKLASH, ADJUSTMENT, Front Differential Assembly.>

NOTE:
Be sure the pinion gear teeth contacts adjacent gear teeth during measurement.
ST1 498247001 MAGNET BASE
ST2 498247100 DIAL GAUGE

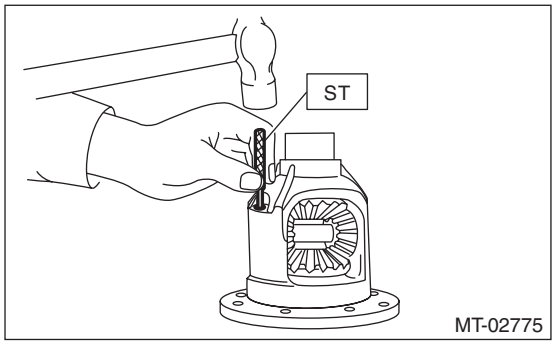
***Standard backlash***
***0.13 — 0.18 mm (0.0051 — 0.0071 in)***



3) Align the pinion shaft and differential case with each hole, and drive the straight pin into the holes from the hypoid driven gear side using the ST.

NOTE:
- Use a new straight pin.
- Lock the straight pin after installing.

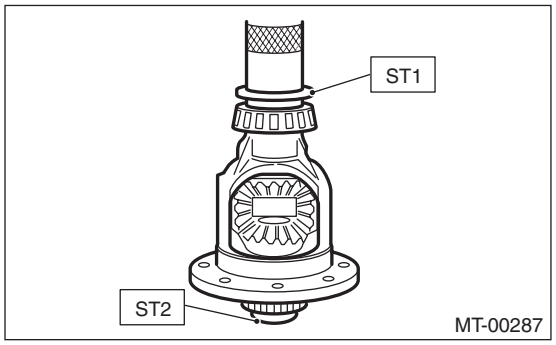
ST 899904100 STRAIGHT PIN REMOVER



4) Install the roller bearing to differential case.

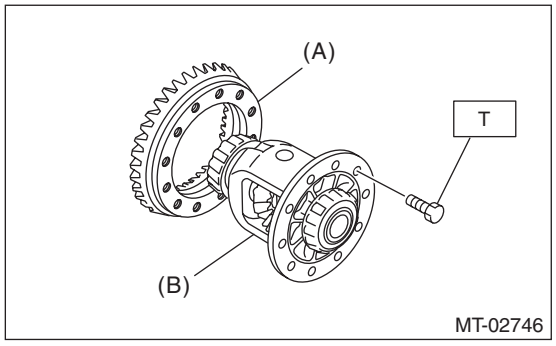
**CAUTION:**
**Do not apply a load in excess of 10 kN (1 ton, 1.1 US ton, 1.0 Imp ton).**

NOTE:
Be careful because the roller bearing outer races are used as a set.
ST1 499277100 BUSHING 1-2 INSTALLER
ST2 398497701 ADAPTER



5) Install the hypoid driven gear to the differential case using twelve bolts.

***Tightening torque:***
***T: 62 N·m (6.3 kgf-m, 45.7 ft-lb)***



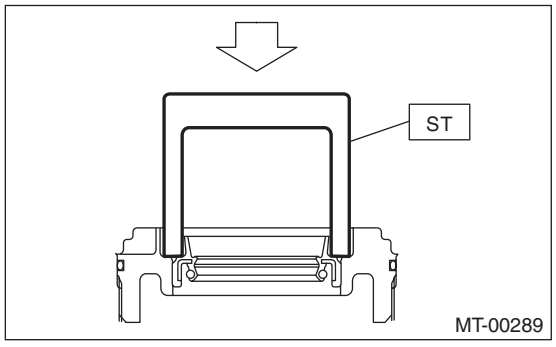
(A) Hypoid driven gear
(B) Differential case

## 2. SIDE RETAINER

1) Using the ST, install the oil seal by lightly tapping with a plastic hammer.

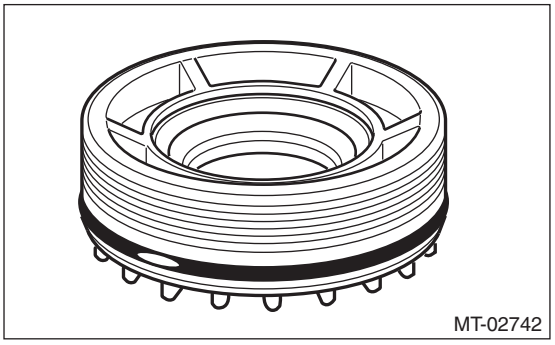
NOTE:
• Use a new oil seal.
• Apply transmission gear oil to the oil seal lips, and install the oil seal while being careful not to deform the lip.
• Check the identification marks (R, L), and attach the oil seal RH and LH.

ST 18675AA000 DIFFERENTIAL SIDE OIL SEAL INSTALLER



2) Install the O-ring.

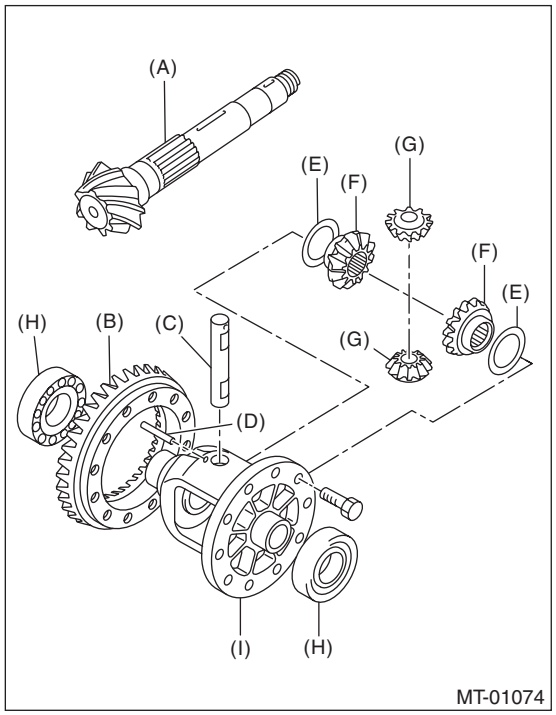
NOTE:
• Use new O-rings.
• Apply gear oil to O-ring.
• Do not stretch or damage the O-ring.
• Install the O-ring after adjusting the backlash of the hypoid gear and the preload of the roller bearing.



## E: INSPECTION

Repair or replace the differential gear in the following cases:

- When the hypoid drive gear and drive pinion shaft tooth surfaces are damaged, excessively worn, or seized.
- When the roller bearing on the drive pinion shaft has a worn or damaged roller path.
- When there is damage, wear or seizure of the differential bevel pinion, differential bevel gear, washer, pinion shaft or straight pin.
- When the differential case sliding surfaces are worn or damaged.



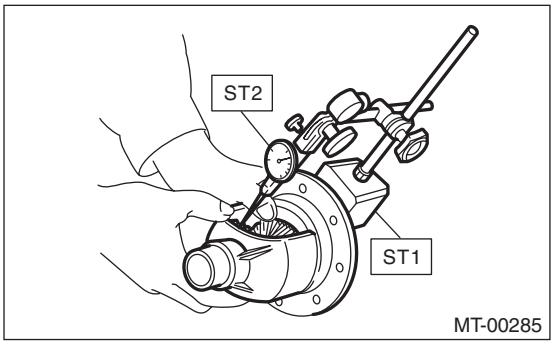
(A) Drive pinion shaft
(B) Hypoid driven gear
(C) Pinion shaft
(D) Straight pin
(E) Washer
(F) Differential bevel gear
(G) Differential bevel pinion
(H) Roller bearing
(I) Differential case

### 1. BEVEL PINION GEAR BACKLASH

Measure the backlash between the differential bevel gear and differential bevel pinion. If the backlash is out of the specified range, install a suitable washer to adjust. <Ref. to 5MT-76, ADJUSTMENT, Front Differential Assembly.>

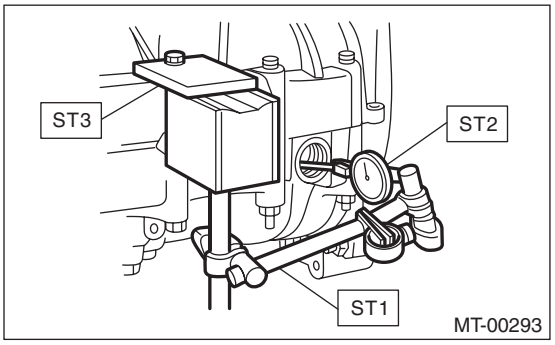
NOTE:
Be sure the pinion gear teeth contacts adjacent gear teeth during measurement.
ST1 498247001 MAGNET BASE
ST2 498247100 DIAL GAUGE

***Standard backlash***
***0.13 — 0.18 mm (0.0051 — 0.0071 in)***



### 2. HYPOID GEAR BACKLASH

1) Set the ST1, ST2 and ST3. Insert the needle through drain plug hole so that the needle comes in contact with the tooth surface on the right corner, and check the backlash.
ST1 498247001 MAGNET BASE
ST2 498247100 DIAL GAUGE
ST3 498255400 PLATE



2) Install SUBARU genuine axle shafts to both sides, rotate in the inversion direction so that the gauge contacts the tooth surface, and read the DIAL GAUGE.

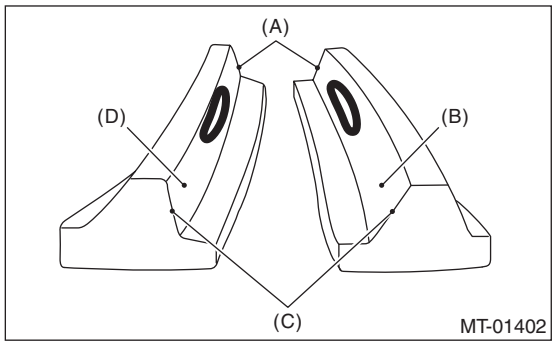
NOTE:
If the backlash is outside the specified range, adjust it by turning the side retainer in the right side case.
Part No. 38415AA100 Axle shaft

***Backlash***
***0.13 — 0.18 mm (0.0051 — 0.0071 in)***

### 3. TOOTH CONTACT OF HYPOID GEAR

Check tooth contact of hypoid gear as follows: Apply a thin uniform coat of red lead on both teeth surfaces on 3 or 4 teeth of the hypoid gear. Move the hypoid gear back and forth by turning the main shaft until a definite contact pattern is developed on the hypoid gear, and judge whether face contact is correct. When the contact pattern is not correct, adjust. <Ref. to 5MT-76, ADJUSTMENT, Front Differential Assembly.>

- Tooth contact is correct.



(A) Toe
(B) Coast side
(C) Heel
(D) Drive side

## F: ADJUSTMENT

### 1. BEVEL PINION GEAR BACKLASH

1) Disassemble the front differential assembly. <Ref. to 5MT-72, DISASSEMBLY, Front Differential Assembly.>
2) Select a differential bevel gear washer from the table and install.

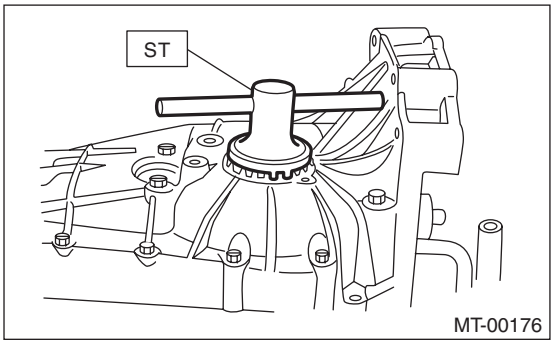
| Washer | |
|---|---|
| Part No. | Thickness mm (in) |
| 803038021 | 0.925 — 0.950 (0.0364 — 0.0374) |
| 803038022 | 0.975 — 1.000 (0.0384 — 0.0394) |
| 803038023 | 1.025 — 1.050 (0.0404 — 0.0413) |

3) Adjust until the standard value is obtained.

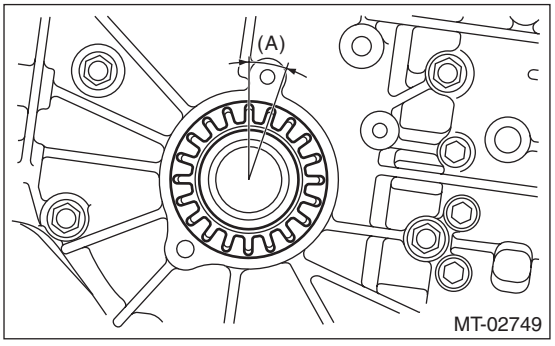
***Backlash:***
***Standard***
***0.13 — 0.18 mm (0.0051 — 0.0071 in)***

### 2. HYPOID GEAR BACKLASH

Adjust the backlash by rotating the side retainer in the RH side case.
ST 18630AA010 WRENCH COMPL RETAINER



NOTE:
Each time the side retainer rotates by one notch (A), the backlash changes by 0.05 mm (0.020 in).

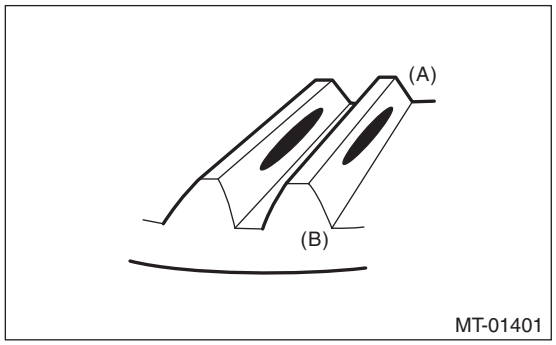


### 3. TOOTH CONTACT OF HYPOID GEAR

1) Adjust until correct teeth contact is obtained.
2) Check tooth contact, and perform the adjustment as follows.

- Correct tooth contact

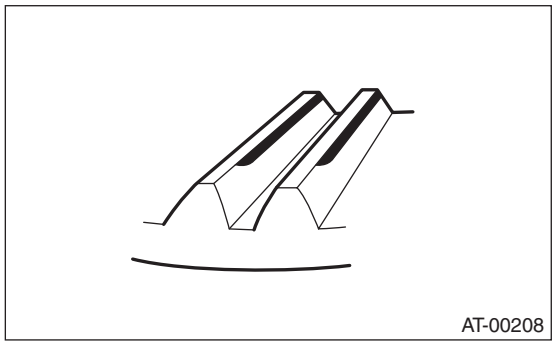
**Check item: Tooth contact surface is slightly shifted toward the toe side under a no-load condition. (When driving, it moves towards the heel side.)**



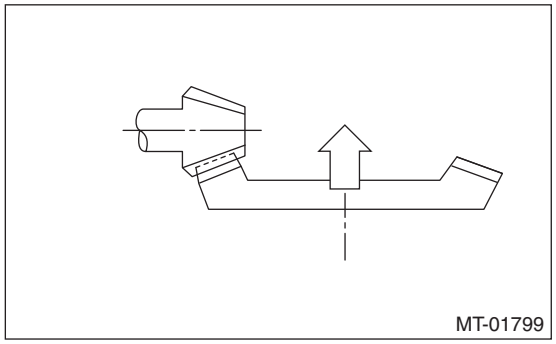
(A) Toe side
(B) Heel side

- Face contact

**Check item: Backlash is too large.**
Contact pattern

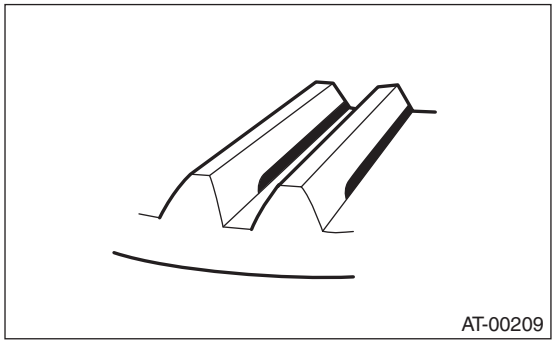


Corrective action: Tighten the side retainer to move the driven gear closer to the drive pinion shaft.

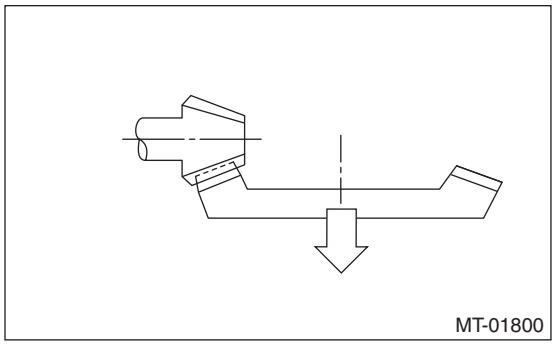


- Flank contact

**Check item: Backlash is too small.**
Contact pattern

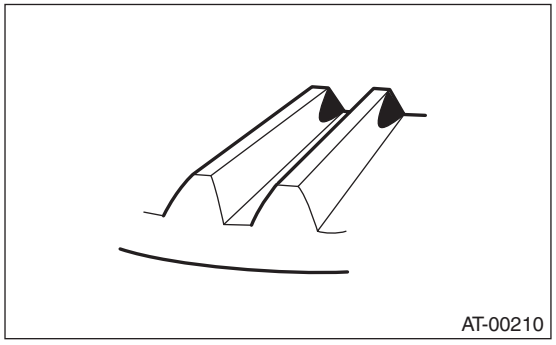


Corrective action: Loosen the side retainer to move the driven gear away from the drive pinion shaft.

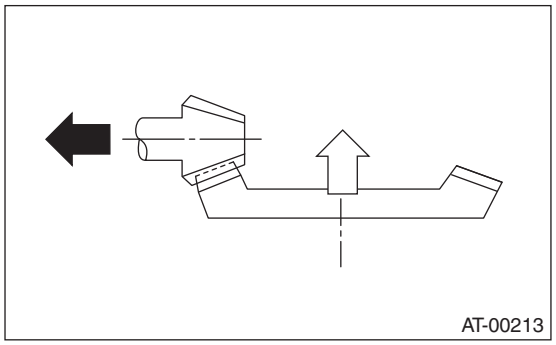


- Toe contact (inside contact)

**Check item: Teeth contact area is too small.**
Contact pattern



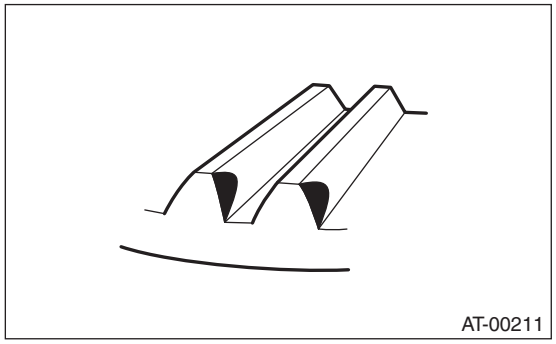
Corrective action: Increase the thickness of drive pinion shim and tighten the side retainer to move the driven gear closer to the drive pinion shaft according to the procedure for bringing drive pinion shaft away from driven gear.



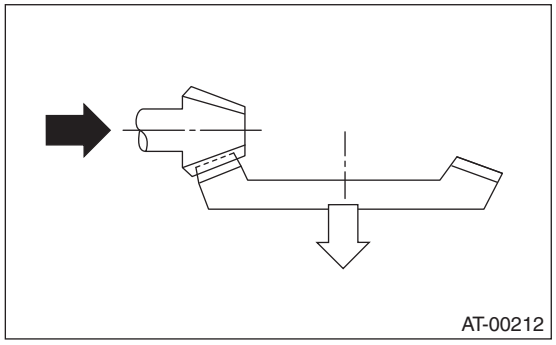
- Heel contact (outside end contact)

**Check item: Teeth contact area is too small.**

Contact pattern



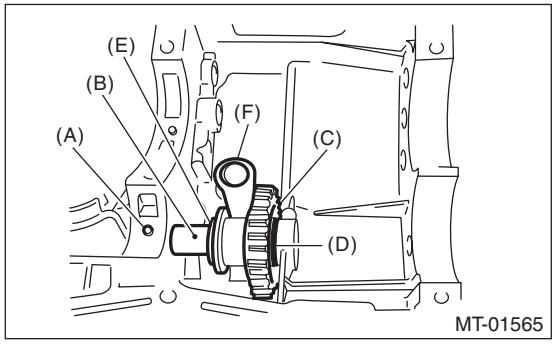
Corrective action: Reduce the thickness of drive pinion shim and loosen the side retainer to move the driven gear away from the drive pinion according to the procedure for moving drive pinion shaft closer to the driven gear.



# 18.Reverse Idler Gear

## A: REMOVAL

1) Remove the manual transmission assembly from the vehicle. <Ref. to 5MT-23, REMOVAL, Manual Transmission Assembly.>
2) Remove the back-up light switch and the neutral position switch. <Ref. to 5MT-35, REMOVAL, Switches and Harness.>
3) Remove the transfer case together with the extension case assembly. <Ref. to 5MT-38, REMOVAL, Transfer Case and Extension Case Assembly.>
4) Remove the transmission case. <Ref. to 5MT-52, REMOVAL, Transmission Case.>
5) Remove the drive pinion shaft assembly. <Ref. to 5MT-61, REMOVAL, Drive Pinion Shaft Assembly.>
6) Remove the main shaft assembly. <Ref. to 5MT-56, REMOVAL, Main Shaft Assembly for Single-Range.>
7) Remove the front differential assembly. <Ref. to 5MT-71, REMOVAL, Front Differential Assembly.>
8) Remove the shifter forks and rods. <Ref. to 5MT-81, REMOVAL, Shifter Fork and Rod.>
9) Pull out the straight pin, and remove the reverse idler gear shaft, washer, reverse idler gear and washer.



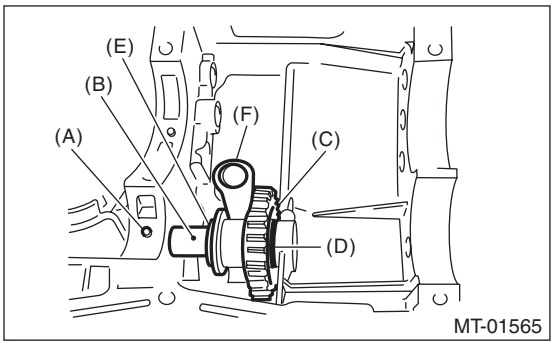
(A) Straight pin
(B) Reverse idler gear shaft
(C) Reverse idler gear
(D) Washer
(E) Washer
(F) Reverse shifter lever

10) Remove the reverse shifter lever.

## B: INSTALLATION

1) Install the reverse shifter lever, washer, reverse idler gear, washer and reverse idler gear shaft, and secure them with the straight pin.

NOTE:
- Be sure to install the reverse idler gear shaft from rear side.
- Use a new straight pin.



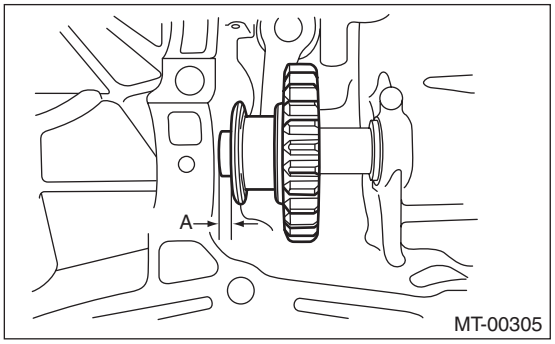
(A) Straight pin
(B) Reverse idler gear shaft
(C) Reverse idler gear
(D) Washer
(E) Washer
(F) Reverse shifter lever

2) Check and adjust clearance between the reverse idler gear and the timing case wall surface. <Ref. to 5MT-79, INSTALLATION, Reverse Idler Gear.> <Ref. to 5MT-80, ADJUSTMENT, Reverse Idler Gear.>
3) Install the shifter forks and rods. <Ref. to 5MT-81, INSTALLATION, Shifter Fork and Rod.>
4) Install the front differential assembly. <Ref. to 5MT-71, INSTALLATION, Front Differential Assembly.>
5) Install the main shaft assembly. <Ref. to 5MT-56, INSTALLATION, Main Shaft Assembly for Single-Range.>
6) Install the drive pinion shaft assembly. <Ref. to 5MT-61, INSTALLATION, Drive Pinion Shaft Assembly.>
7) Install the transmission case. <Ref. to 5MT-52, INSTALLATION, Transmission Case.>
8) Install the transfer case together with the extension case assembly. <Ref. to 5MT-38, INSTALLATION, Transfer Case and Extension Case Assembly.>
9) Install the back-up light switch and the neutral position switch. <Ref. to 5MT-35, INSTALLATION, Switches and Harness.>
10) Install the manual transmission assembly to the vehicle. <Ref. to 5MT-26, INSTALLATION, Manual Transmission Assembly.>

## C: INSPECTION

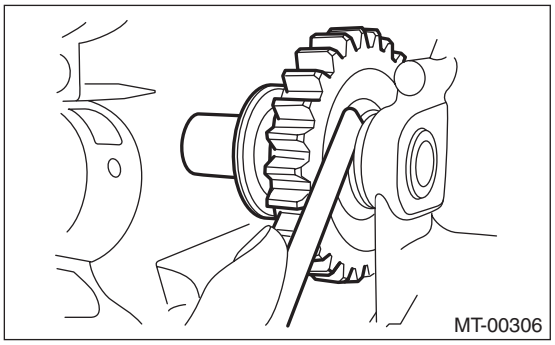
1) Move the reverse shifter rod toward the reverse side. Check the clearance between the reverse idler gear and the transmission case wall surface.
If out of specification, select the appropriate reverse shifter lever and adjust.

***Clearance A:***
***6.0 — 7.5 mm (0.236 — 0.295 in)***



2) After installing a suitable reverse shifter lever, shift into neutral. Check the clearance between the reverse idler gear and the transmission case wall surfaces.
If out of specification, select the appropriate washer and adjust.

***Clearance:***
***0 — 0.5 mm (0 — 0.020 in)***

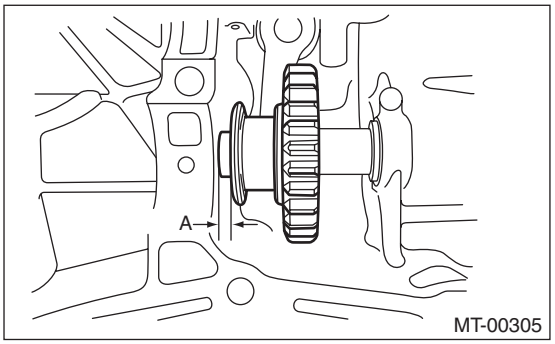


3) Check the reverse idler gear and shaft for damage. Replace if it is damaged.

## D: ADJUSTMENT

1) Select the appropriate reverse shifter lever from the table below, and adjust until the clearance between the reverse idler gear and transmission case wall is within specification.

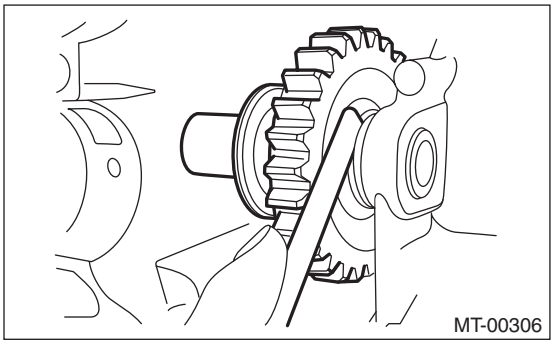
***Clearance A:***
***6.0 — 7.5 mm (0.236 — 0.295 in)***



| Reverse shifter lever | | |
|---|---|---|
| Part No. | Mark | Remarks |
| 32820AA070 | 7 | Far from case wall |
| 32820AA080 | 8 | Standard |
| 32820AA090 | 9 | Closer to case wall |

2) Select the appropriate washer from the table below, and adjust until the clearance between the reverse idler gear and transmission case wall is within specification.

***Clearance:***
***0 — 0.5 mm (0 — 0.020 in)***

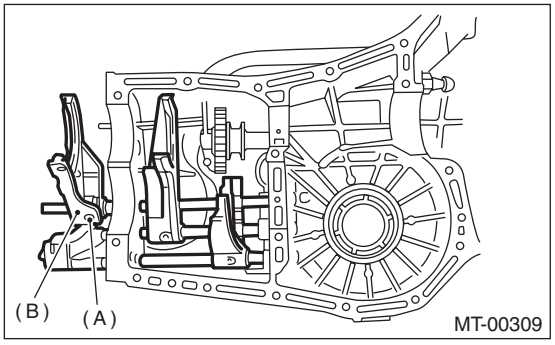


| Washer | |
|---|---|
| Part No. | Thickness mm (in) |
| 803020151 | 0.4 (0.016) |
| 803020152 | 1.1 (0.043) |
| 803020153 | 1.5 (0.059) |
| 803020154 | 1.9 (0.075) |
| 803020155 | 2.3 (0.091) |

# 19.Shifter Fork and Rod

## A: REMOVAL

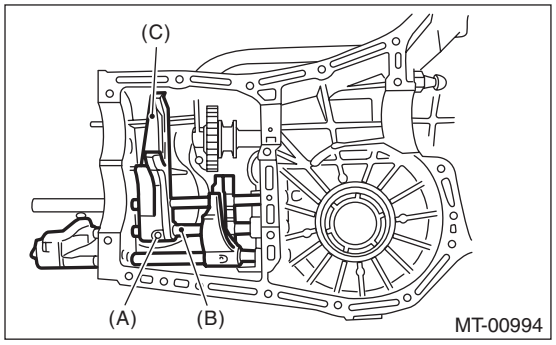
1) Remove the manual transmission assembly from the vehicle. <Ref. to 5MT-23, REMOVAL, Manual Transmission Assembly.>
2) Remove the back-up light switch and the neutral position switch. <Ref. to 5MT-35, REMOVAL, Switches and Harness.>
3) Remove the transfer case together with the extension case assembly. <Ref. to 5MT-38, REMOVAL, Transfer Case and Extension Case Assembly.>
4) Remove the transmission case. <Ref. to 5MT-52, REMOVAL, Transmission Case.>
5) Remove the drive pinion shaft assembly. <Ref. to 5MT-61, REMOVAL, Drive Pinion Shaft Assembly.>
6) Remove the main shaft assembly. <Ref. to 5MT-56, REMOVAL, Main Shaft Assembly for Single-Range.>
7) Remove the front differential assembly. <Ref. to 5MT-71, REMOVAL, Front Differential Assembly.>
8) Drive out the straight pin by tapping it with the ST, and remove the 5th shifter fork.
ST 398791700 STRAIGHT PIN REMOVER 2



(A) Straight pin
(B) 5th shifter fork

9) Remove the plugs, springs and check balls.
10) Drive out the straight pin by tapping it with the ST, and remove the 3rd – 4th fork rod and shifter fork.

NOTE:
When removing the rod, keep other rods in neutral. When driving out the straight pin, remove it toward the inside of case so that it does not hit against the case.
ST 398791700 STRAIGHT PIN REMOVER 2



(A) Straight pin
(B) 3rd-4th fork rod
(C) Shifter fork

11) Drive out the straight pin by tapping with the ST, and pull out the 1st – 2nd fork rod and shifter fork.
ST 398791700 STRAIGHT PIN REMOVER 2
12) Remove the snap ring (outer), and pull out the reverse fork rod from the reverse fork rod arm. Then take out the ball, spring and interlock plunger from the reverse fork rod arm. And then remove the rod.

NOTE:
When pulling out the reverse fork rod arm, be careful not to let the ball pop out of arm.
13) Remove the reverse shifter lever.

## B: INSTALLATION

1) Install the spring and ball to the reverse fork rod arm, and press in the ST.
ST 399411700 ACCENT BALL INSTALLER
2) Install the reverse fork rod through the hole on the rear of the transmission case. Press out the ST using the reverse fork rod, and fix with outer snap ring.
3) Install the interlock plunger to reverse fork rod arm.

NOTE:
Apply grease to plunger to prevent it from falling.

4) Position the ball, spring and gasket in the reverse fork rod hole on the left side of transmission case, and tighten the checking ball plug.

NOTE:
Use a new gasket.

***Tightening torque:***
***20 N·m (2.0 kgf-m, 14.8 ft-lb)***

5) Install the 1st-2nd fork rod into 1st-2nd shifter fork through the hole on the rear of transmission case.

NOTE:
- Set the reverse fork rod to neutral.
- Check that the positions of interlock plunger is correct.

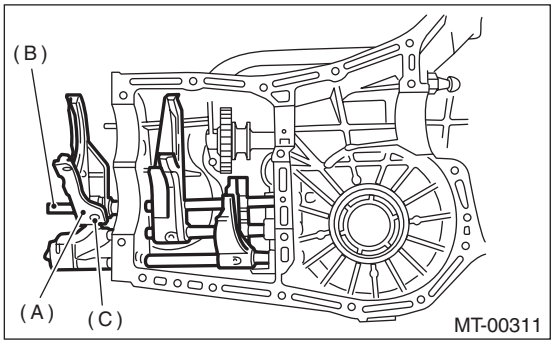
6) Align the holes in the rod and the fork, and drive the new straight pin into these holes using the ST.
ST 398791700 STRAIGHT PIN REMOVER 2
7) Install the interlock plunger (thin) onto the 3rd–4th fork rod.

NOTE:
Apply grease to plunger to prevent it from falling.

8) Attach the 3rd – 4th fork rod into 3rd – 4th shifter fork and reverse fork rod arm through the hole on the rear of the transmission case.
9) Align the holes in the rod and the fork, and drive the new straight pin into these holes.

NOTE:
- Set the reverse fork rod and the 1st – 2nd fork rod to neutral.
- Check that the positions of interlock plunger is correct.

ST 398791700 STRAIGHT PIN REMOVER 2
10) Install the 5th shifter fork onto the rear of reverse fork rod. Align the holes in the two parts and drive new straight pin into the specified place.
ST 398791700 STRAIGHT PIN REMOVER 2

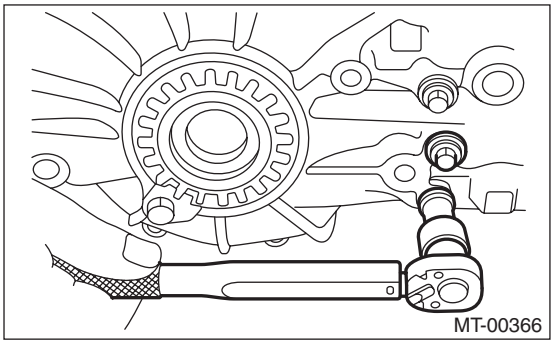


(A) 5th shifter fork
(B) Reverse fork rod
(C) Straight pin

11) Position the balls, checking ball springs and gaskets to the 3rd – 4th fork rod and 1st – 2nd fork rod holes, and install plugs.

NOTE:
Use a new gasket.

***Tightening torque:***
***20 N·m (2.0 kgf-m, 14.8 ft-lb)***

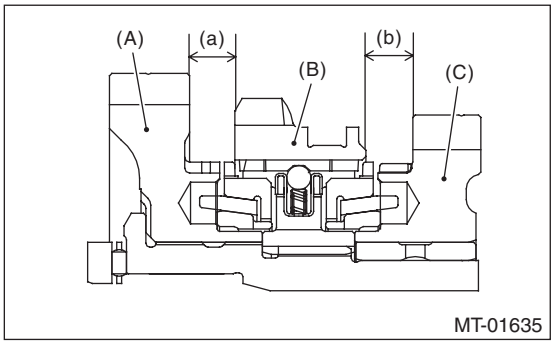


12) Install the front differential assembly. <Ref. to 5MT-71, INSTALLATION, Front Differential Assembly.>
13) Install the main shaft assembly. <Ref. to 5MT-56, INSTALLATION, Main Shaft Assembly for Single-Range.>
14) Install the drive pinion shaft assembly. <Ref. to 5MT-61, INSTALLATION, Drive Pinion Shaft Assembly.>
15) Install the transmission case. <Ref. to 5MT-52, INSTALLATION, Transmission Case.>
16) Install the transfer case together with the extension case assembly. <Ref. to 5MT-38, INSTALLATION, Transfer Case and Extension Case Assembly.>
17) Install the back-up light switch and the neutral position switch. <Ref. to 5MT-35, INSTALLATION, Switches and Harness.>
18) Install the manual transmission assembly to the vehicle. <Ref. to 5MT-26, INSTALLATION, Manual Transmission Assembly.>

## C: INSPECTION

1) Check the fork and rod for damage. Replace if it is damaged.
2) Gearshift mechanism
Repair or replace the gearshift mechanism if excessively worn, bent or defective in any way.
3) Inspect the clearance between 1st, 2nd driven gear and reverse driven gear. If any clearance is not within specifications, replace the shifter fork as required.

***Clearance (a) and (b):***
***9.5 mm (0.374 in)***

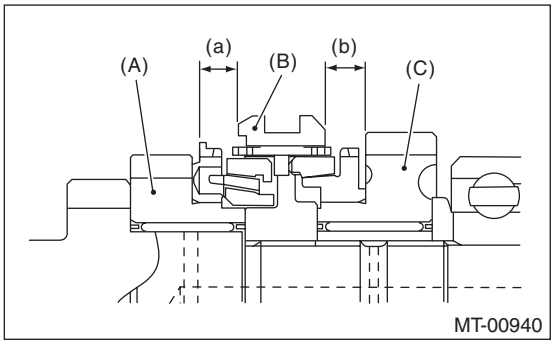


(A) 1st driven gear
(B) Reverse driven gear
(C) 2nd driven gear

| 1st-2nd shifter fork | | |
|---|---|---|
| Part No. | Mark | Remarks |
| 32804AA060 | 1 | Approaches 1st gear by 0.2 mm (0.008 in) |
| 32804AA070 | No mark | Standard |
| 32804AA080 | 3 | Approaches 2nd gear by 0.2 mm (0.008 in) |

4) Inspect the clearance between the 3rd, 4th drive gear and the coupling sleeve. If any clearance is not within specifications, replace the shifter fork as required.

***Clearance (a) and (b):***
***9.3 mm (0.366 in)***

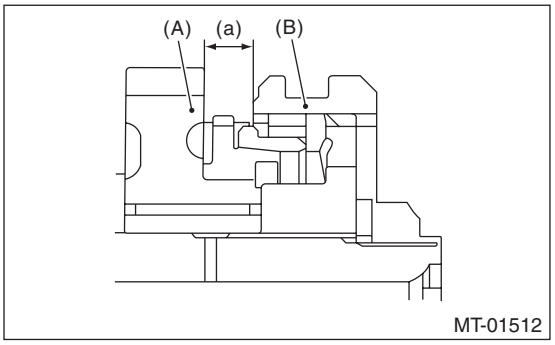


(A) 3rd drive gear
(B) Coupling sleeve
(C) 4th drive gear

| 3rd-4th shifter fork | | |
|---|---|---|
| Part No. | Mark | Remarks |
| 32810AA061 | 1 | Approaches 4th gear by 0.2 mm (0.008 in) |
| 32810AA071 | No mark | Standard |
| 32810AA101 | 3 | Approaches 3rd gear by 0.2 mm (0.008 in) |

5) Inspect the clearance between 5th drive gear and coupling sleeve. If any clearance is not within specifications, replace the shifter fork as required.

***Clearance (a):***
***9.3 mm (0.366 in)***



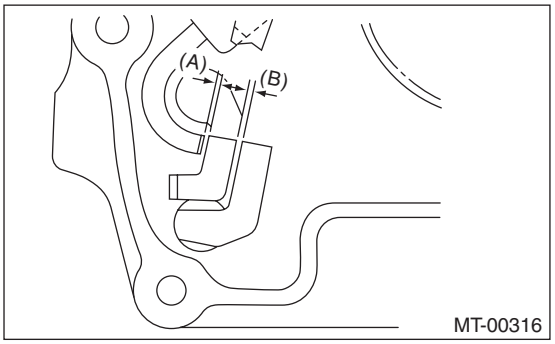
(A) 5th drive gear
(B) Coupling sleeve

| 5th shifter fork | | |
|---|---|---|
| Part No. | Mark | Remarks |
| 32812AA201 | 7 | Approaches 5th gear by 0.2 mm (0.008 in) |
| 32812AA211 | No mark | Standard |
| 32812AA221 | 9 | Moves away from 5th gear by 0.2 mm (0.008 in) |

6) Inspect the rod end clearances (A) and (B). If any clearance is not within specifications, replace the rod or fork as required.

***Clearance (A):***
***3rd-4th — 5th***
***0.5 — 1.3 mm (0.020 — 0.051 in)***

***Clearance (B):***
***1st-2nd — 3rd-4th***
***0.4 — 1.4 mm (0.016 — 0.055 in)***



# 20.General Diagnostic Table

## A: INSPECTION

### 1. MANUAL TRANSMISSION

| Symptoms | Possible cause | Corrective action |
|---|---|---|
| 1. Gears are difficult to intermesh.<br>NOTE:<br>The cause for difficulty in shifting gears can be classified into two types: One is a defective gear shift system and the other is defective transmission. However, if the operation is heavy and engagement of the gears is difficult, a defective clutch disengagement may also be responsible. Check whether the clutch is correctly functioning, before checking the gear shift system and transmission. | (a) Worn, damaged or burred chamfer at internal spline of the sleeve and reverse driven gear | Replace. |
| | (b) Worn, damaged or burred chamfer of gear spline | Replace. |
| | (c) Worn or scratched bushings | Replace. |
| | (d) Incorrect contact or wear between baulk ring and gear cone | Repair or replace. |
| 2. Gear slip-out<br>• Gear slips out when coasting on rough road.<br>• Gear slips out during acceleration. | (a) Defective pitching stopper adjustment | Replace. |
| | (b) Loose engine mounting bolts | Tighten. |
| | (c) Worn shifter fork or broken shifter check ball spring | Replace. |
| | (d) Worn or damaged ball bearing | Replace. |
| | (e) Excessive clearance between splines of synchronizer hub and synchronizer sleeve | Replace. |
| | (f) Synchronizer hub tooth step wear | Replace. |
| | (g) Worn 1st driven gear and driven shaft | Replace. |
| | (h) Worn 2nd driven gear and bushing | Replace. |
| | (i) Worn 3rd drive gear and needle bearing | Replace. |
| | (j) Worn 4th drive gear and needle bearing | Replace. |
| | (k) Worn 5th drive gear and needle bearing | Replace. |
| | (l) Worn reverse idler gear and bushing | Replace. |
| 3. Noise emitted from transmission<br>NOTE:<br>If a noise is heard when the vehicle is parked with its engine idling and if a noise ceases when the clutch is disengaged, it may be considered that the noise is coming from the transmission. | (a) Insufficient or improper lubrication | Lubricate with specified oil or replace. |
| | (b) Worn or damaged gears and bearings<br>NOTE:<br>If the trouble is only wear of the gear teeth surfaces, only a high whirring noise will occur at high speeds, but if any part is broken, rhythmical clicking sounds will be heard even at low speeds. | Replace. |

## 2. DIFFERENTIAL

| Symptoms | Possible cause | Corrective action |
|---|---|---|
| 1. Broken differential (case, gear, bearing, etc.)<br>NOTE:<br>Noise will occur, and eventually the differential will not be able to operate due to broken pieces obstructing the gear revolution. | (a) Insufficient or improper oil | Disassemble the differential and replace broken components. At the same time check other components for any trouble, and replace if necessary. |
| | (b) Use of vehicle under severe conditions such as excessive load and improper use of the clutch | Readjust the preload and backlash of the bearing, and the contact surface of gear. |
| | (c) Improper adjustment of taper roller bearing | Adjust. |
| | (d) Improper adjustment of the drive pinion and the hypoid driven gear | Adjust. |
| | (e) Excessive backlash of a vehicle under severe operating conditions due to worn differential side gear, washer or differential pinion. | Add recommended oil to the specified level. Do not use vehicle under severe operating conditions. |
| | (f) Loose hypoid driven gear clamping bolts | Tighten. |
| 2. Differential and hypoid gear noises<br>Troubles of the differential and hypoid gear always appear as noise problems. Therefore noise is the first indication of trouble. However, noises from the engine, muffler, tire, exhaust gas, bearing, body, etc. are easily mistaken for the differential noise. Pay special attention to the hypoid gear noise because it is easily confused with other gear noises. There are the following four kinds of noises.<br>• Gear noise when driving:<br>If noise increases as the vehicle speed increases, it may be due to insufficient gear oil, incorrect gear engagement, damaged gears, etc.<br>• Gear noise when coasting:<br>Damaged gears due to misadjusted bearings and incorrect shim adjustment.<br>• Bearing noise when driving or coasting:<br>Cracked, broken or damaged bearings<br>• Noise mainly when turning:<br>Noise from differential side gear, differential pinion or differential pinion shaft, etc. | (a) Insufficient oil | Replenish or replace with the specified amount of recommended oil. |
| | (b) Improper adjustment of hypoid driven gear and drive pinion | Check the tooth contact. |
| | (c) Worn teeth of hypoid driven gear and drive pinion | Replace as a set.<br>Readjust the bearing preload. |
| | (d) Loose roller bearing | Readjust the backlash of the hypoid driven gear to drive pinion, and check the tooth contact. |
| | (e) Distorted hypoid driven gear or differential case | Replace. |
| | (f) Worn washer and differential pinion shaft | Replace. |

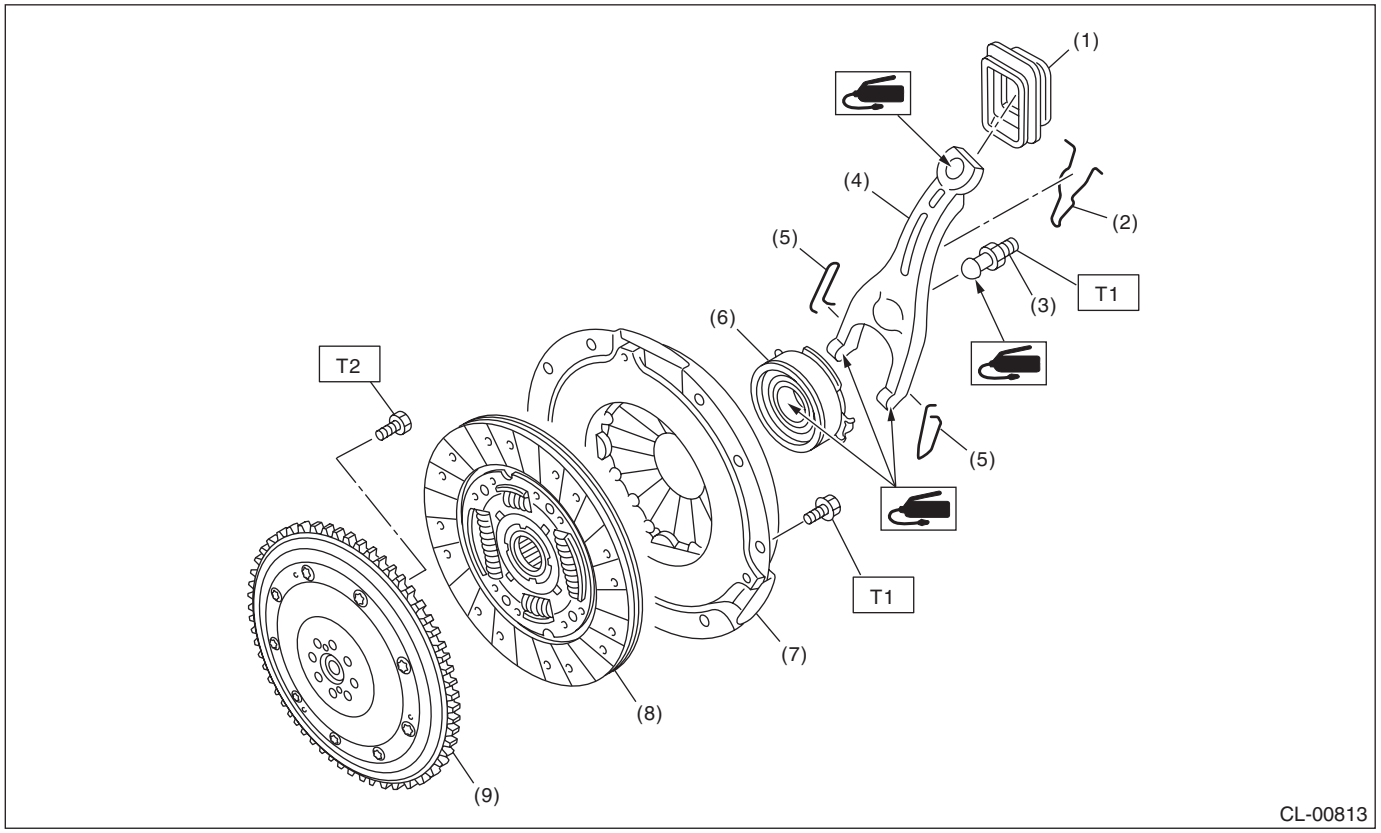
# 1. General Description

## A: SPECIFICATION

| | | | |
|---|---|---|---|
| Model | | | 2.0 L |
| Transmission type | | | 5MT |
| Clutch cover | Type | | Push type |
| | Diaphragm set load | N (kgf, lbf) | 5,688 (580, 1,279) |
| Clutch disc | Facing material | | Woven (Non-asbestos) |
| | O.D. × I.D. × thickness mm (in) | Flywheel side | 225 × 150 × 3.2 (8.86 × 5.9 × 0.126) |
| | | Clutch cover side | 225 × 150 × 3.5 (8.86 × 5.9 × 0.138) |
| | Spline outer diameter | mm (in) | 25.2 (0.992), (Number of teeth: 24) |
| | Depth of rivet head mm (in) | Flywheel side | 1.35 — 1.95 (0.053 — 0.077) |
| | | Clutch cover side | 1.65 — 2.25 (0.065 — 0.089) |
| | | Limit of sinking | 0.8 (0.031) |
| | Deflection limit | mm (in) | 0.7 (0.028) at R = 110 (4.33) |
| Clutch release lever ratio | | | 1.6 |
| Release bearing | | | Grease-packed self-aligning |
| Clutch pedal | Full stroke | mm (in) | 130 — 135 (5.12 — 5.31) |
| | Free play | mm (in) | 4 — 10 (0.16 — 0.39) |
| Flywheel | Type | | Flexible |

# B: COMPONENT

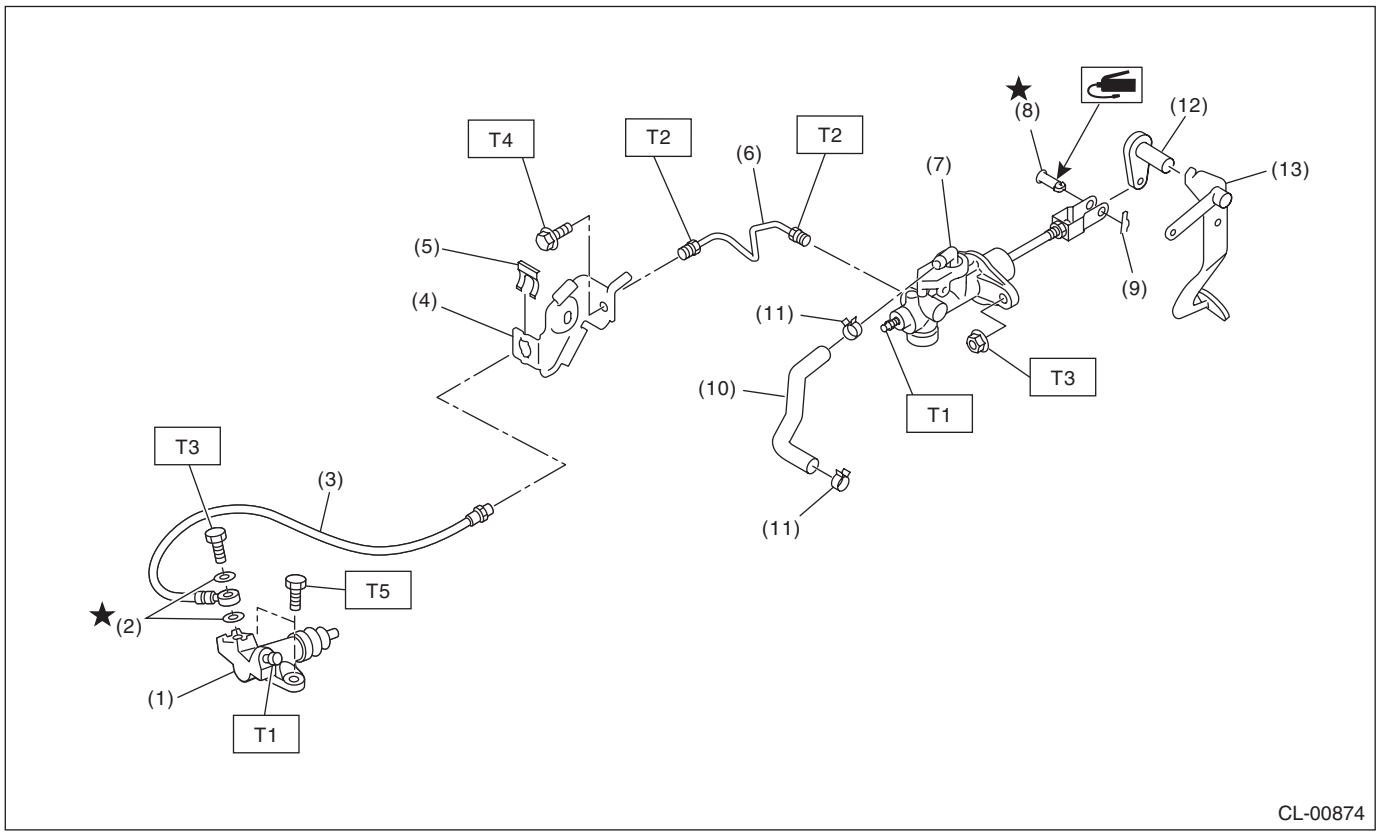
## 1. CLUTCH ASSEMBLY



(1) Dust cover
(2) Lever spring
(3) Pivot
(4) Release lever
(5) Clip
(6) Release bearing
(7) Clutch cover
(8) Clutch disc
(9) Flywheel

***Tightening torque: N·m (kgf-m, ft-lb)***
***T1: 16 (1.6, 11.8)***
***T2: <Ref. to CL-12, INSTALLATION, Flywheel.>***

## 2. CLUTCH PIPE AND HOSE

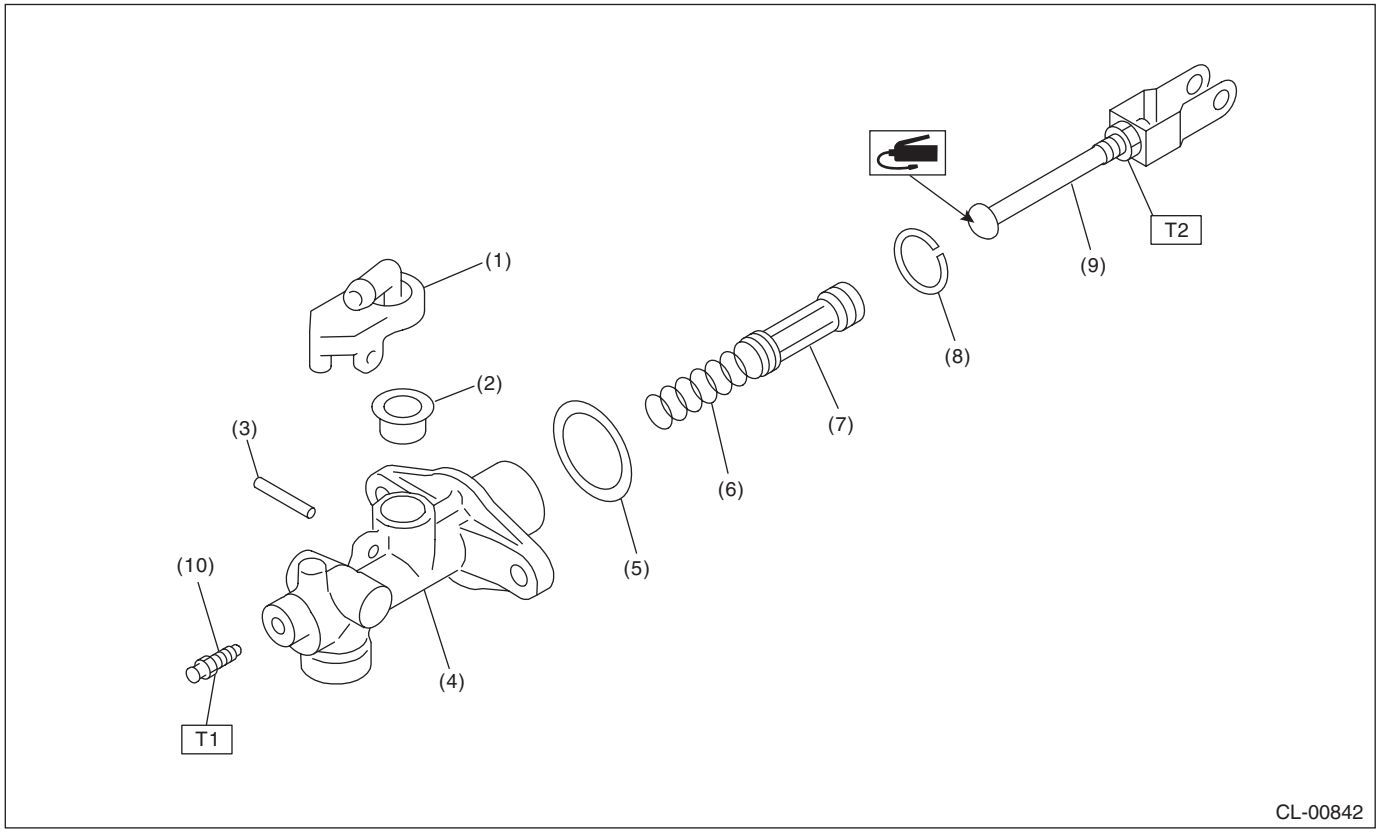


| | | | |
|---|---|---|---|
| (1) | Operating cylinder | (8) | Clevis pin |
| (2) | Gasket | (9) | Snap pin |
| (3) | Clutch hose | (10) | Tank hose |
| (4) | Bracket | (11) | Clamp |
| (5) | Clamp | (12) | Lever |
| (6) | Clutch pipe | (13) | Pedal |
| (7) | Master cylinder ASSY | | |

***Tightening torque: N·m (kgf-m, ft-lb)***

***T1: 7.8 (0.8, 5.8)***
***T2: 15 (1.5, 11.1)***
***T3: 18 (1.8, 13.3)***
***T4: 25 (2.5, 18.4)***
***T5: 37 (3.8, 27.3)***

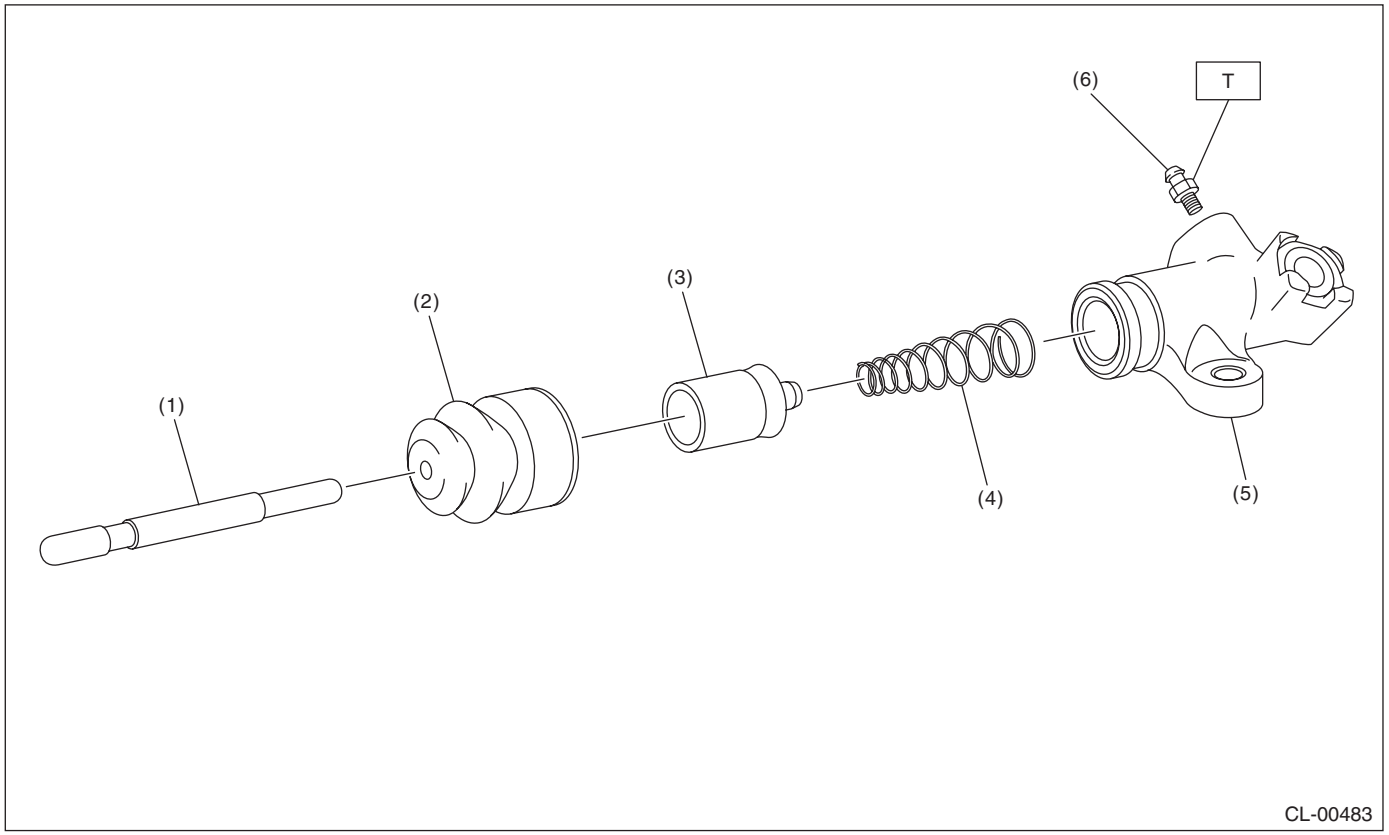
## 3. MASTER CYLINDER



| | | | |
|---|---|---|---|
| (1) | Nipple | (6) | Return spring |
| (2) | Oil seal | (7) | Piston |
| (3) | Straight pin | (8) | Piston stop ring |
| (4) | Master cylinder | (9) | Push rod ASSY |
| (5) | Seat | (10) | Breather screw |

***Tightening torque: N·m (kgf-m, ft-lb)***
***T1: 7.8 (0.8, 5.8)***
***T2: 10 (1.0, 7.4)***

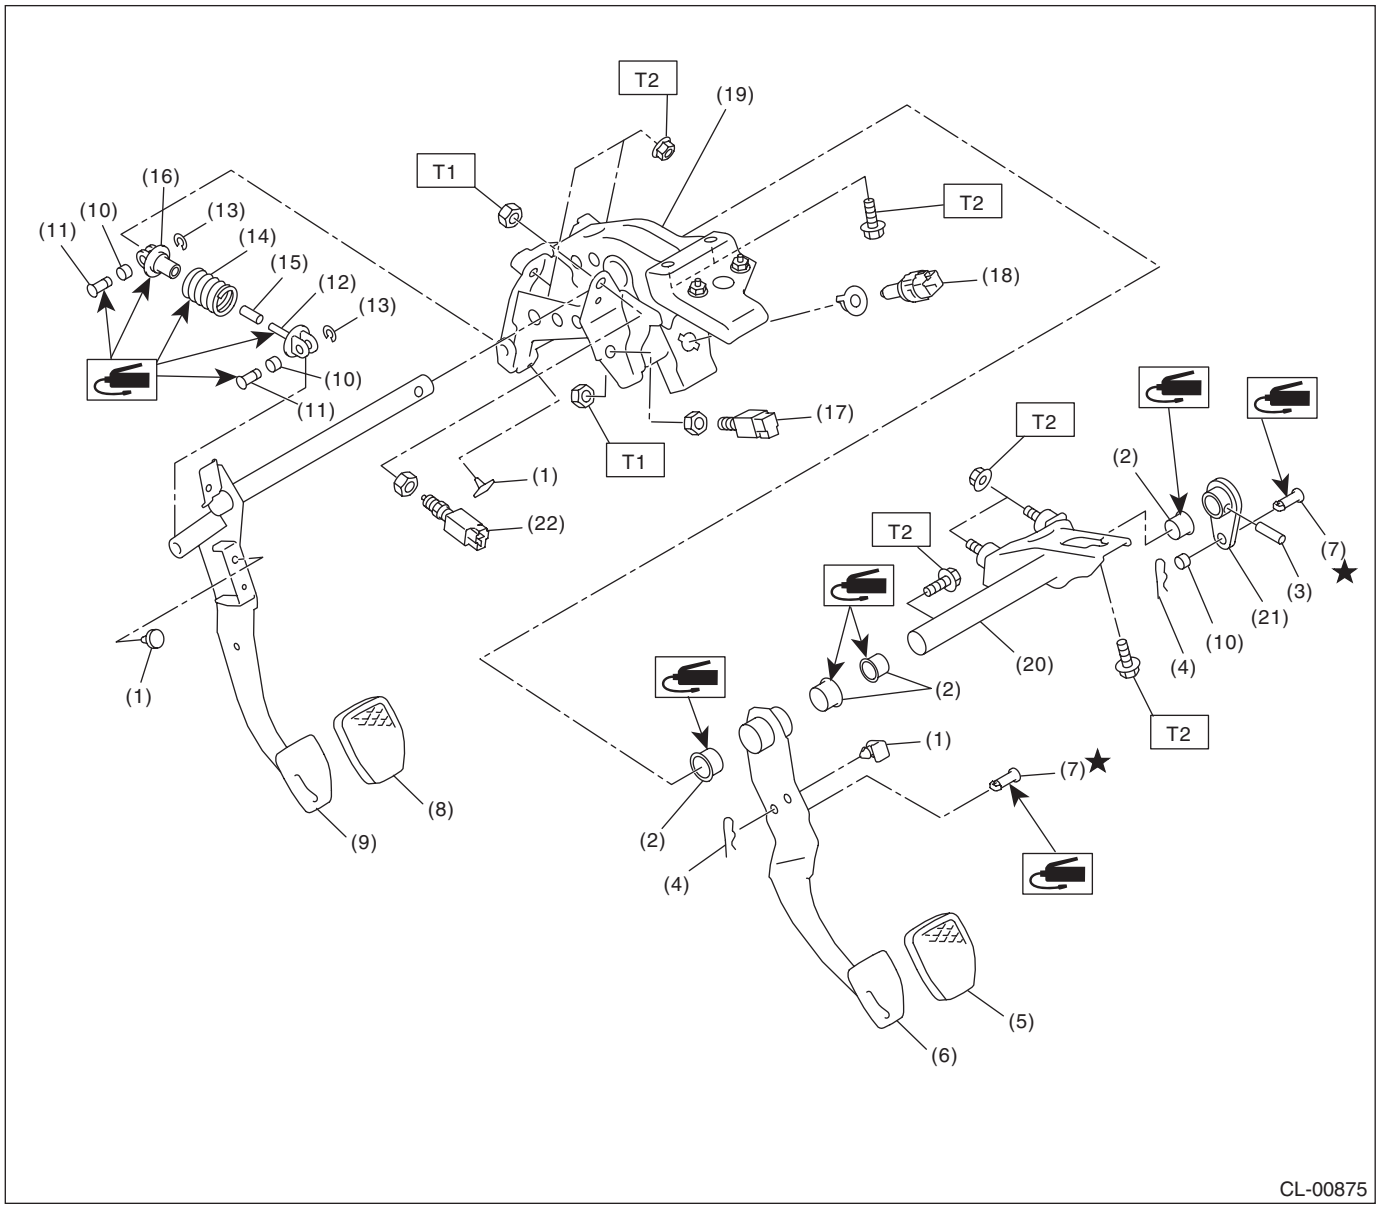
## 4. OPERATING CYLINDER



(1) Push rod
(2) Boot
(3) Piston
(4) Piston spring
(5) Operating cylinder
(6) Breather screw

***Tightening torque: N·m (kgf-m, ft-lb)***
***T: 7.8 (0.8, 5.8)***

## 5. CLUTCH PEDAL



(1) Stopper
(2) Bushing
(3) Spring pin
(4) Snap pin
(5) Brake pedal pad
(6) Brake pedal
(7) Clevis pin
(8) Clutch pedal pad
(9) Clutch pedal
(10) Bushing C
(11) Clutch clevis pin
(12) Assist rod A
(13) Clip
(14) Assist spring
(15) Assist bushing
(16) Assist rod B
(17) Clutch switch
(18) Stop light switch
(19) Pedal bracket
(20) Clutch master cylinder bracket
(21) Lever
(22) Clutch start switch

***Tightening torque: N·m (kgf-m, ft-lb)***
***T1: 8 (0.8, 5.9)***
***T2: 18 (1.8, 13.3)***

## C: CAUTION

- Wear appropriate work clothing, including a cap, protective goggles and protective shoes when performing any work.
- Remove contamination including dirt and corrosion before removal, installation or disassembly.
- Keep the disassembled parts in order and protect them from dust and dirt.
- Before removal, installation or disassembly, be sure to clarify the failure. Avoid unnecessary removal, installation, disassembly and replacement.
- Vehicle components are extremely hot after driving. Be wary of receiving burns from heated parts.
- Use SUBARU genuine fluid, grease etc. or equivalent. Do not mix fluid, grease, etc. of different grades or manufacturers.
- Be sure to tighten fasteners including bolts and nuts to the specified torque.
- Place shop jacks or rigid racks at the specified points.
- Apply grease onto sliding or revolving surfaces before installation.
- Before installing O-rings or snap rings, apply sufficient amount of fluid to avoid damage and deformation.
- Before securing a part in a vise, place cushioning material such as wood blocks, aluminum plate or cloth between the part and the vise.
- Keep fluid away from the vehicle body. If any fluid contacts the vehicle body, immediately flush the area with water.

## D: PREPARATION TOOL

### 1. SPECIAL TOOL

| ILLUSTRATION | TOOL NUMBER | DESCRIPTION | REMARKS |
|---|---|---|---|
|  ST-498497100 | 498497100 | CRANKSHAFT STOPPER | Used for stopping rotation of the flywheel when loosening/tightening bolts, etc. |
|  ST-499747100 | 499747100 | CLUTCH DISC GUIDE | Used for installing the clutch disc to the flywheel. |

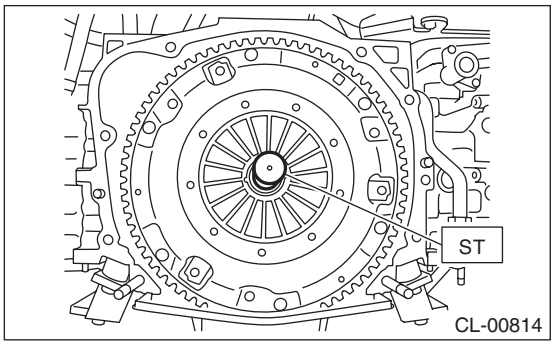
### 2. GENERAL TOOL

| TOOL NAME | REMARKS |
|---|---|
| Circuit tester | Used for measuring resistance, voltage and current. |
| Dial gauge | Used for measuring clutch disc run-out. |
| Depth gauge | Used for measuring clutch disc wear. |
| Angle gauge | Used for tightening the flywheel. |

# 2. Clutch Disc and Cover

## A: REMOVAL

1) Remove the transmission assembly from the vehicle.
<Ref. to 5MT-23, REMOVAL, Manual Transmission Assembly.>
2) Attach the ST on the flywheel.
ST 499747100 CLUTCH DISC GUIDE



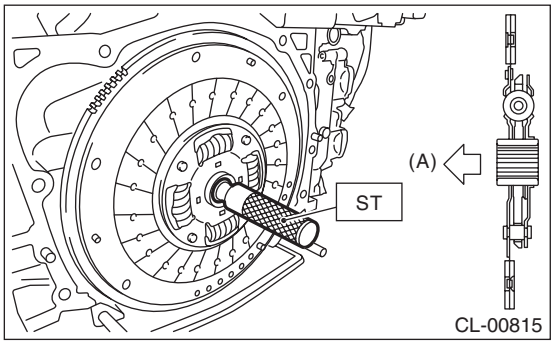
3) Remove the clutch cover and clutch disc.

NOTE:
• Take care not to allow oil to touch the clutch disc face.
• Do not disassemble the clutch cover or clutch disc.

## B: INSTALLATION

1) Insert the ST into the clutch disc and attach to the flywheel by inserting the ST end into pilot bearing.

NOTE:
When installing the clutch disc, be careful to attach in the correct direction.
ST 499747100 CLUTCH DISC GUIDE

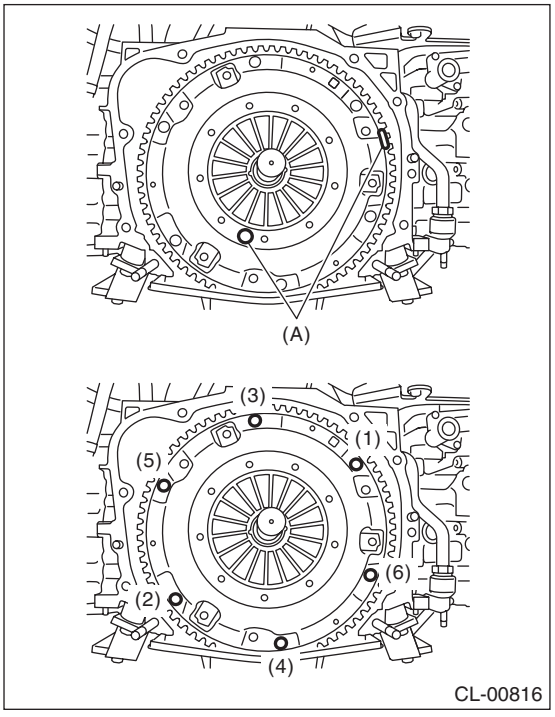


(A) Flywheel side

2) Install the clutch cover to the flywheel and tighten the bolts to the specified torque.

NOTE:
• When installing a clutch cover to the flywheel, position the clutch cover so that the spacing between the unbalance marks (paint mark) on the flywheel and clutch cover is 120° or more apart. (The unbalance mark indicates the direction of residual unbalance.)
• Temporarily tighten the bolts by hand. Each bolt should be tightened to the specified torque in a crisscross order.

***Tightening torque:***
***16 N·m (1.6 kgf-m, 11.8 ft-lb)***



(A) Unbalance mark (paint)

3) Remove the ST.
ST 499747100 CLUTCH DISC GUIDE
4) Install the transmission assembly. <Ref. to 5MT-26, INSTALLATION, Manual Transmission Assembly.>

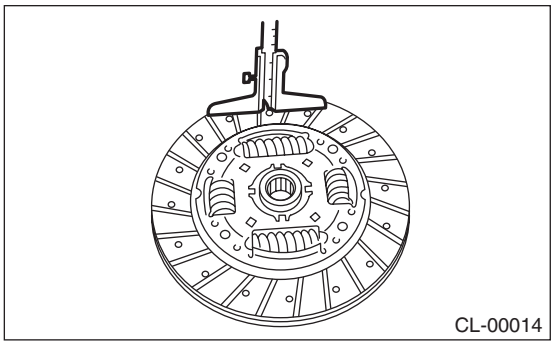
# C: INSPECTION

## 1. CLUTCH DISC

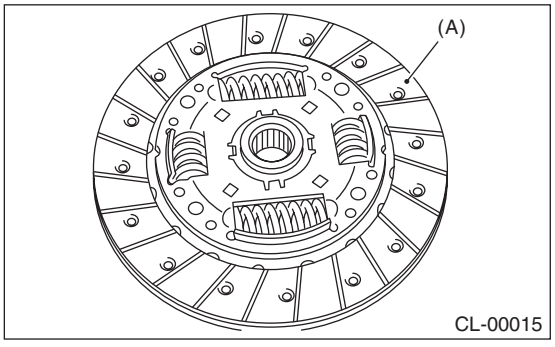
1) Facing wear
Measure the depth from the facing surface to the rivet head. Replace if the face is worn locally or worn down to less than the specified value.

***Depth to rivet head:***
***Limit of sinking***
***0.8 mm (0.031 in)***

NOTE:
Do not wash the clutch disc with any type of cleaning fluid.



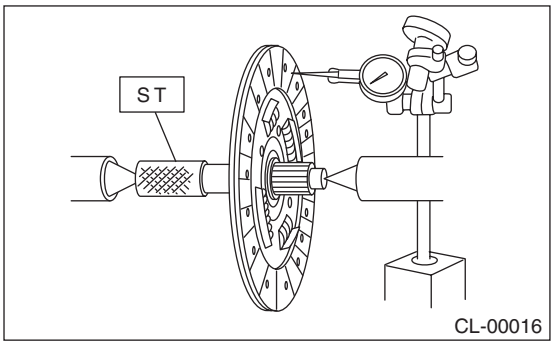
2) Hardened facing
Replace the clutch disc.
3) Oil soakage on facing
Replace the clutch disc and inspect the transmission front oil seal, transmission case mating surface, engine rear oil seal and other locations for oil leakage.



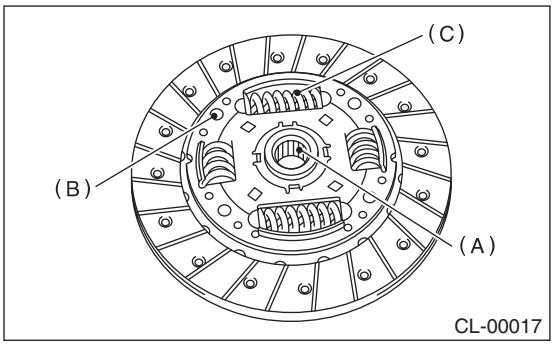
(A) Clutch facing

4) Deflection on facing
If deflection exceeds the specified value at the outer circumference of the facing, replace the clutch disc.
ST 499747100 CLUTCH DISC GUIDE

***Limit for deflection:***
***0.7 mm (0.028 in) at R = 110 mm (4.33 in)***



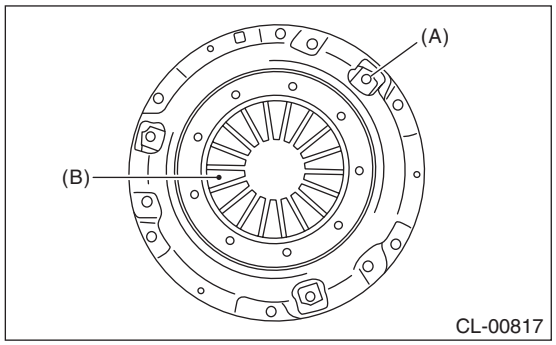
5) If there is spline wear, loose rivets, failed damper springs, etc., replace the clutch disc.



(A) Spline
(B) Rivet
(C) Damper spring

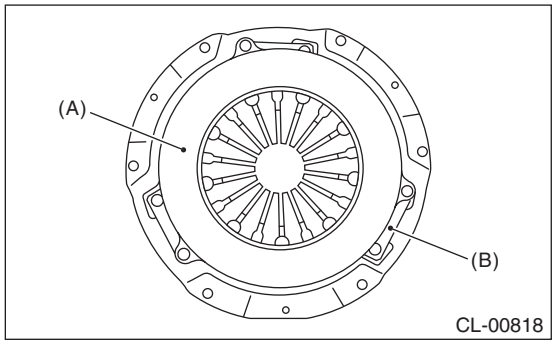
## 2. CLUTCH COVER

NOTE:
Visually check the following items without disassembling, and replace or repair if defective.
1) Loose thrust rivet
2) Damaged or worn bearing contact area at the center of diaphragm spring



(A) Thrust rivet
(B) Diaphragm spring

3) Damaged or worn disc contact surface of the pressure plate
4) Loose strap plate installation area
5) Worn diaphragm sliding area

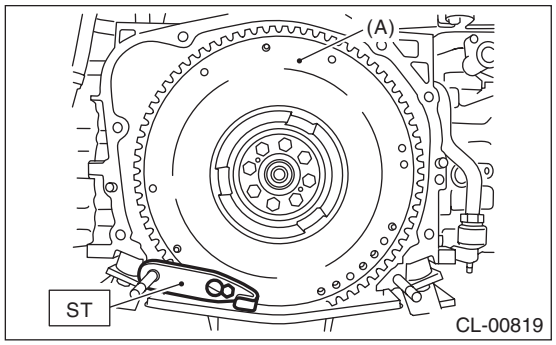


(A) Pressure plate
(B) Strap plate

# 3. Flywheel

## A: REMOVAL

1) Remove the transmission assembly. <Ref. to 5MT-23, REMOVAL, Manual Transmission Assembly.>
2) Remove the clutch cover and clutch disc. <Ref. to CL-9, REMOVAL, Clutch Disc and Cover.>
3) Attach the ST.
ST 498497100 CRANKSHAFT STOPPER



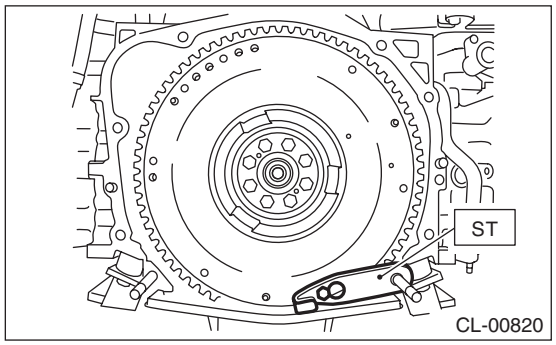
(A) Flywheel

4) Remove the flywheel and crankshaft position sensor plate.

## B: INSTALLATION

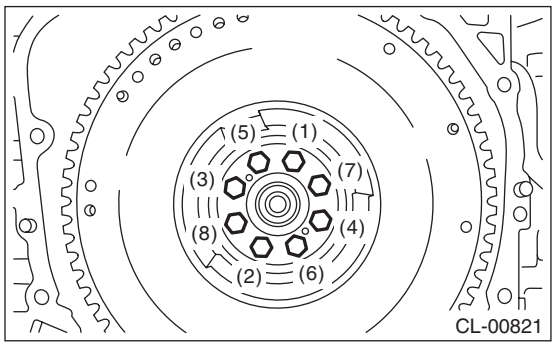
1) Temporarily tighten the crankshaft position sensor plate and flywheel.

NOTE:
Align the knock pin hole of the crankshaft position sensor plate to the knock pin of the crankshaft to secure the knock pin.
2) Attach the ST.
ST 498497100 CRANKSHAFT STOPPER



3) Tighten the flywheel mounting bolts in two stages.
(1) Tighten the flywheel attachment bolts.

***Tightening torque:***
***30 N·m (3.1 kgf-m, 22.1 ft-lb)***



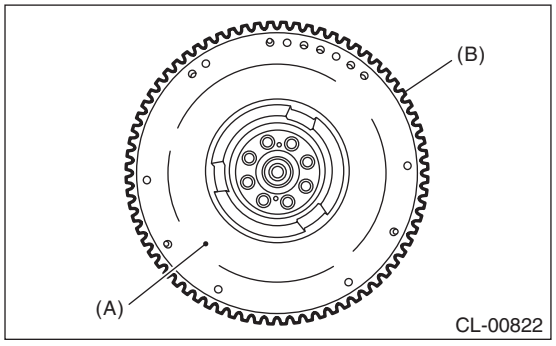
(2) While checking the tightening angle with the angle gauge, further tighten the flywheel mounting bolts.

***Tightening angle:***
***30° — 35°***

4) Install the clutch disc and cover. <Ref. to CL-9, INSTALLATION, Clutch Disc and Cover.>
5) Install the transmission assembly. <Ref. to 5MT-26, INSTALLATION, Manual Transmission Assembly.>

## C: INSPECTION

**CAUTION:**
**Because the center bearing is grease-sealed and is a non-lubrication type, do not wash with gasoline or solvents.**
1) If there is damage or defectiveness in the facing sliding surface or ring gear, replace the flywheel.



(A) Flywheel
(B) Ring gear

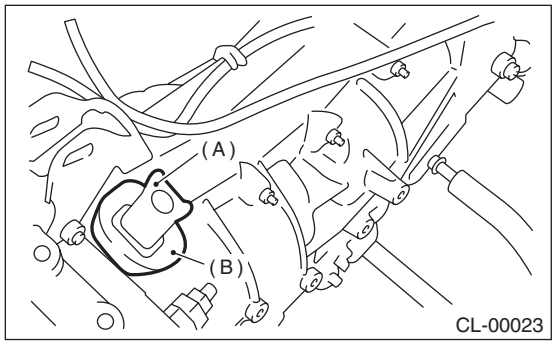
2) Smoothness of rotation
Rotate the ball bearing while applying pressure in the thrust direction.
3) If noise or excessive play is noted, replace the flywheel.

# 4. Release Bearing and Lever

## A: REMOVAL

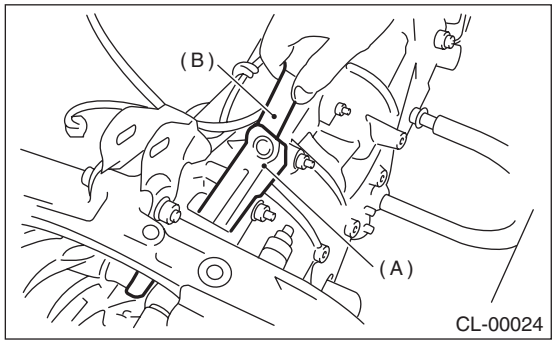
1) Remove the transmission assembly from the vehicle.
<Ref. to 5MT-23, REMOVAL, Manual Transmission Assembly.>
2) Remove the two clips from the release lever and remove the release bearing.

**CAUTION:**
**Be careful not to deform the clips.**
3) Remove the dust cover.



(A) Release lever
(B) Dust cover

4) Remove the lever spring from the pivot with a screwdriver by accessing it through the clutch housing release lever hole. Then remove the release lever.



(A) Release lever
(B) Screwdriver

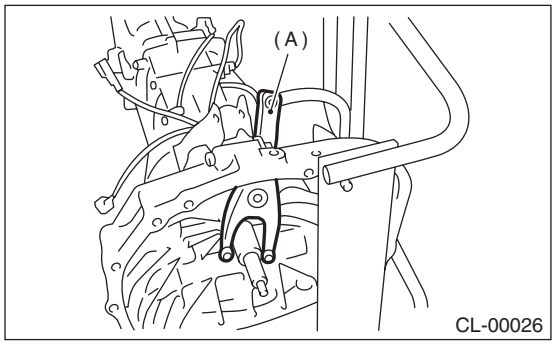
## B: INSTALLATION

NOTE:
Apply the specified grease to lubricate to the following points before installation.
- Contact surface of lever and pivot
- Contact surface of lever and bearing
- Transmission main shaft spline
- Contact surface of release bearing and transmission case

***Grease***
***NICHIMOLY N-130 or equivalent***

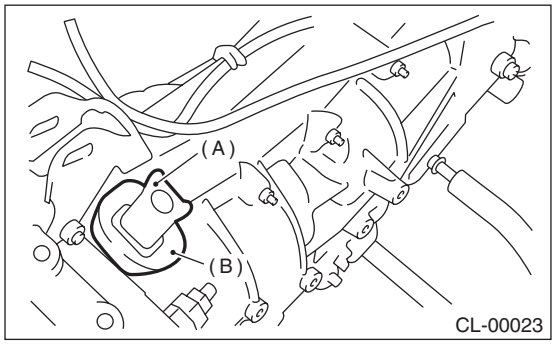
1) While pushing the release lever to the pivot and twisting it to both sides, fit the lever spring onto the raised portion of the pivot.

NOTE:
Observing from the main case hole, check that the lever spring is installed securely.



(A) Release lever

2) Install the release bearing and fasten it with two clips.
3) Install the dust cover.



(A) Release lever
(B) Dust cover

4) Check the bearing for smooth movement by operating the release lever.
5) Apply grease to the contact point of the release lever and operating cylinder.

***Grease***
***NICHIMOLY N-130 or equivalent***

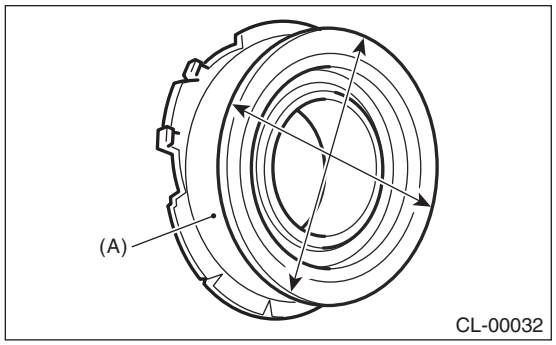
6) Install the transmission assembly. <Ref. to 5MT-26, INSTALLATION, Manual Transmission Assembly.>

# C: INSPECTION

## 1. RELEASE BEARING

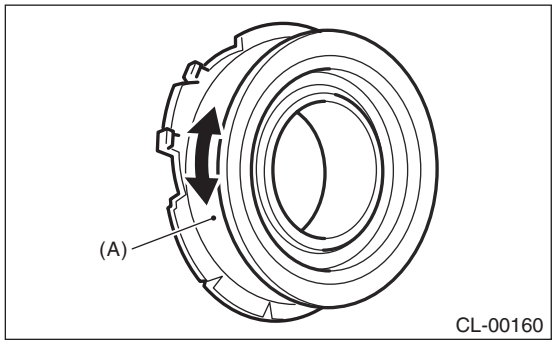
**CAUTION:**
**Since this bearing is grease-sealed and is a non-lubrication type, do not wash with gasoline or any other solvent when servicing the clutch.**
1) Check the bearing for smooth movement by applying force to the bearing in the radial direction.

***Radial direction stroke:***
***1.6 mm (0.063 in)***



(A) Bearing case

2) While applying force to the bearing in the rotational direction, check the bearing for smooth rotation.

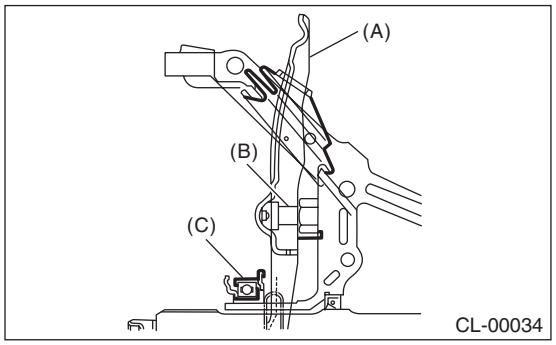


(A) Bearing case

3) Check for wear and damage at the bearing case surface in contact with the lever.

## 2. RELEASE LEVER

Check the pivot portion of the lever and the contact area with the release bearing case for wear.



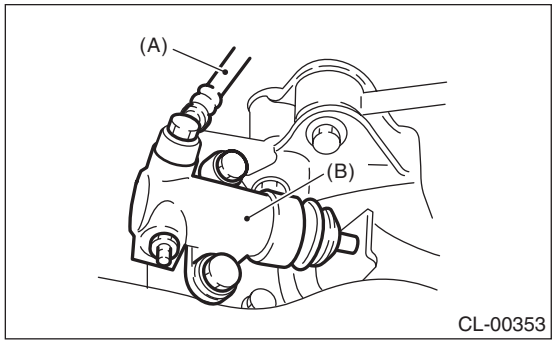
(A) Release lever
(B) Pivot
(C) Release bearing

# 5. Operating Cylinder

## A: REMOVAL

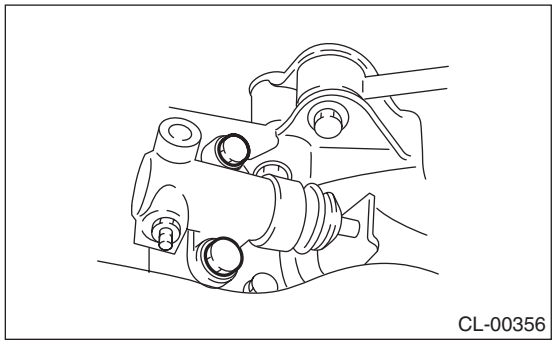
1) Remove the air intake boot assembly. <Ref. to IN(H4DO)-12, REMOVAL, Air Intake Boot.>
2) Disconnect the clutch hose from the operating cylinder.

**CAUTION:**
**Cover the hose joint to prevent the clutch fluid from flowing out.**



(A) Clutch hose
(B) Operating cylinder

3) Remove the operating cylinder from the transmission.



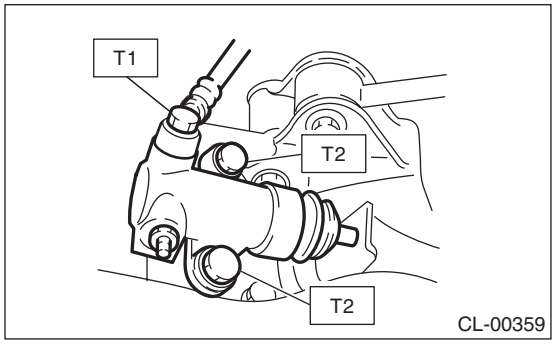
## B: INSTALLATION

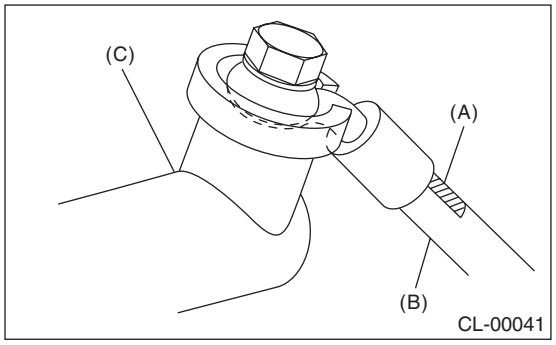
1) Install in the reverse order of removal.

NOTE:
• Before installing the operating cylinder, apply grease to the contact point of the release lever and operating cylinder.

***Grease:***
***NICHIMOLY N-130 or equivalent***
• Be sure to install the clutch hose with the mark side facing upward.
• Be careful not to twist the clutch hose during installation.
• Use a new gasket.

***Tightening torque:***
***T1: 18 N·m (1.8 kgf-m, 13.3 ft-lb)***
***T2: 37 N·m (3.8 kgf-m, 27.3 ft-lb)***



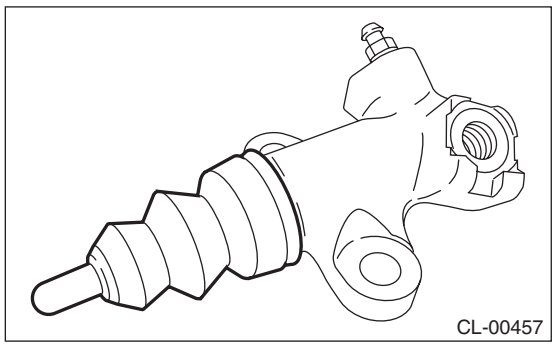


(A) Mark
(B) Clutch hose
(C) Operating cylinder

2) After bleeding air from the operating cylinder, ensure that the clutch operates properly. <Ref. to CL-21, Clutch Fluid Air Bleeding.>

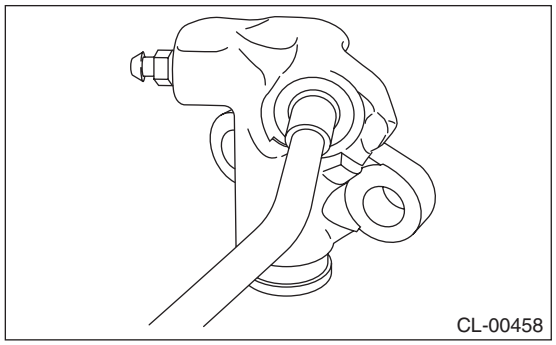
## C: DISASSEMBLY

1) Remove the boot and push rod.

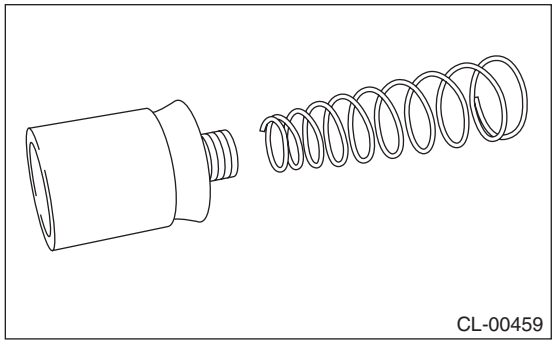


2) Apply compressed air through clutch hose attachment hole.

NOTE:
Face the piston hole down and place a piece of wood underneath to prevent the piston from popping out.



3) Separate the piston and piston spring.

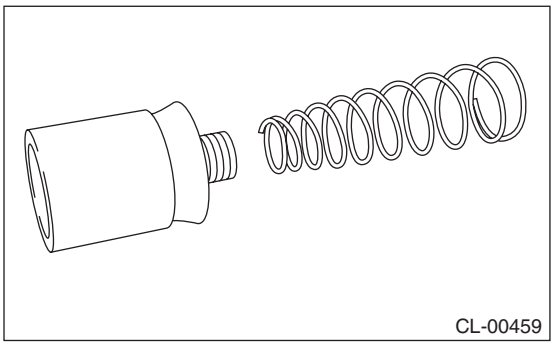


## D: ASSEMBLY

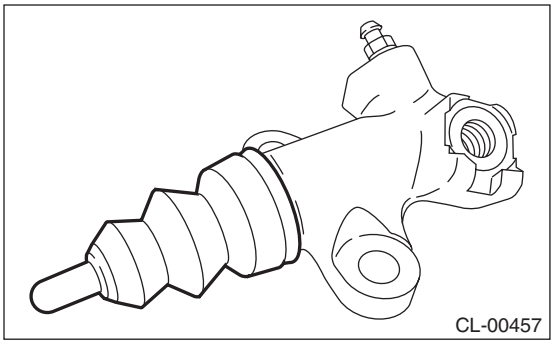
NOTE:
During assembly, apply hydraulic oil to all parts.

***Recommended clutch fluid:***
***New FMVSS No. 116 DOT3 or DOT4***

1) Install the piston spring onto the piston.



2) Insert piston into the operating cylinder.
3) Install push rod to the boot.
4) Install boot and push rod to the operating cylinder.



## E: INSPECTION

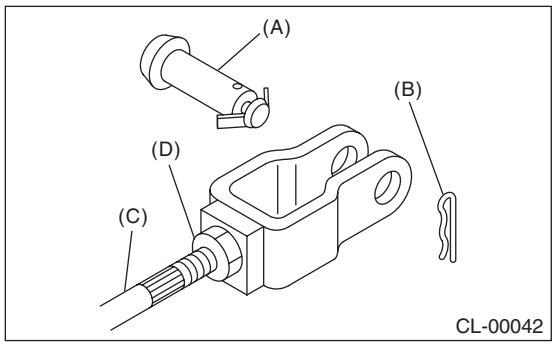
1) Check that the operating cylinder is not damaged. Replace the operating cylinder if it is damaged.
2) Check the clutch fluid leakage on the operating cylinder or the boot for damage. Replace the operating cylinder if clutch fluid leaks or boot damages are noted.

# 6. Master Cylinder

## A: REMOVAL

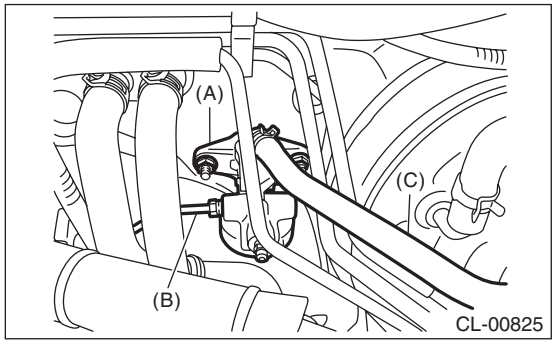
**CAUTION:**
**Be careful not to spill the brake fluid. Brake fluid spilled on the vehicle body will harm the paint surface; wash it off with water and wipe clean quickly if spilled.**

1) Drain the clutch fluid. <Ref. to CL-20, Clutch Fluid.>
2) Remove the cover assembly - instrument panel LWR driver. <Ref. to EI-65, REMOVAL, Instrument Panel Lower Cover.>
3) Remove the snap pin and clevis pin, and then separate the push rod of the master cylinder from clutch pedal.



(A) Clevis pin
(B) Snap pin
(C) Push rod
(D) Lock nut

4) Remove the air intake boot assembly. <Ref. to IN(H4DO)-12, REMOVAL, Air Intake Boot.>
5) Disconnect the clutch pipe and tank hose from the master cylinder.
6) Remove the master cylinder.

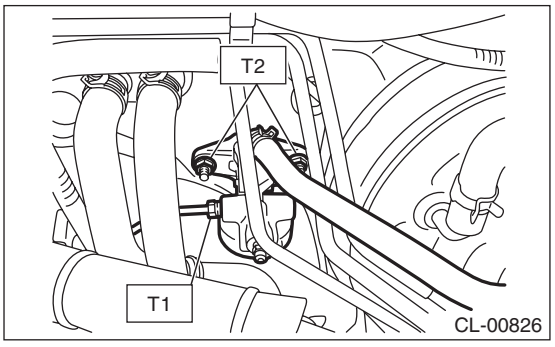


(A) Master cylinder
(B) Clutch pipe
(C) Tank hose

## B: INSTALLATION

1) Install the master cylinder to the vehicle body, and connect the clutch pipe and tank hose to the master cylinder.

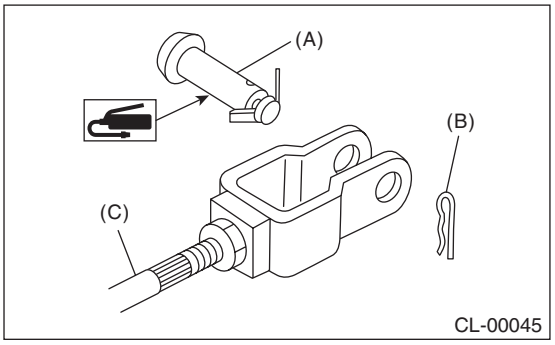
***Tightening torque:***
***T1: 15 N·m (1.5 kgf-m, 11.1 ft-lb)***
***T2: 18 N·m (1.8 kgf-m, 13.3 ft-lb)***



2) Connect the push rod of the master cylinder to the clutch pedal, and install the clevis pin and snap pin.

**CAUTION:**
**Always use a new clevis pin.**

NOTE:
Apply grease to the clevis pin.

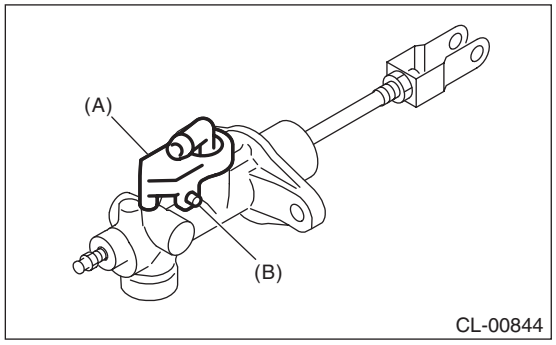


(A) Clevis pin
(B) Snap pin
(C) Push rod

3) Install the cover assembly - instrument panel LWR driver. <Ref. to EI-66, INSTALLATION, Instrument Panel Lower Cover.>
4) After bleeding air from the clutch system, ensure that the clutch operates properly. <Ref. to CL-21, Clutch Fluid Air Bleeding.>
5) Install the air intake boot assembly. <Ref. to IN(H4DO)-12, INSTALLATION, Air Intake Boot.>

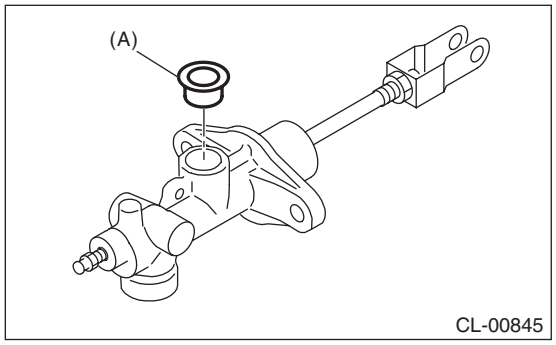
## C: DISASSEMBLY

1) Remove the straight pin and nipple.



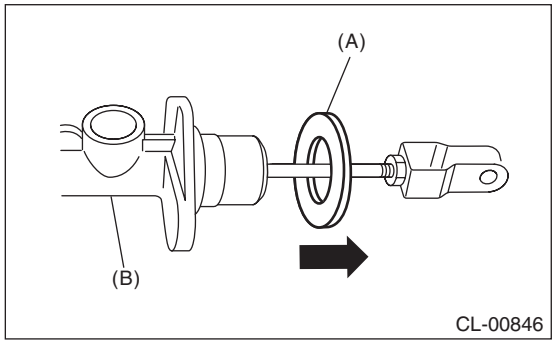
(A) Nipple
(B) Straight pin

2) Remove the oil seal.



(A) Oil seal

3) Move the seat towards the rear.



(A) Seat
(B) Master cylinder

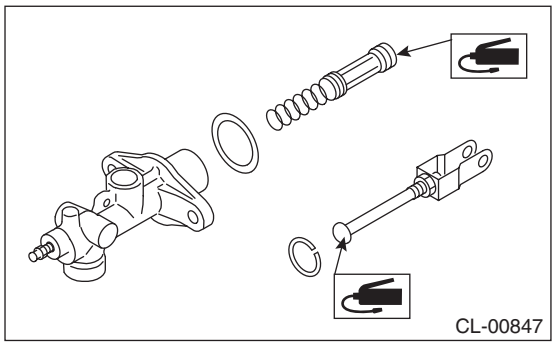
4) Remove the piston stop ring.

**CAUTION:**
**When removing the piston stop ring, be careful to prevent the rod, washer, piston and return spring from popping out.**

## D: ASSEMBLY

1) Apply a coat of grease to the contact surfaces of the push rod and piston before installation.

***Grease:***
***SILICONE GREASE G-40M or equivalent***

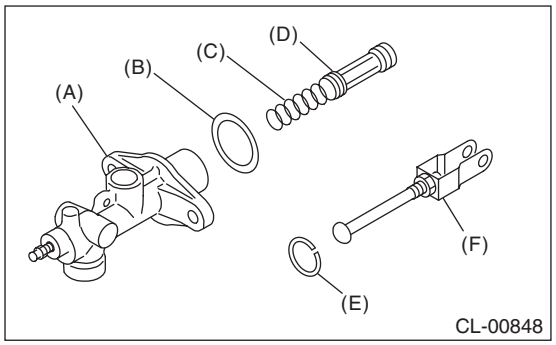


2) Assemble in the reverse order of disassembly.

***Tightening torque:***
***10 N·m (1.0 kgf-m, 7.4 ft-lb)***

## E: INSPECTION

If any damage, deformation, wear, swelling, rust or other faults are found on the cylinder, piston, push rod, nipple, return spring, breather screw, seat or hose, replace the faulty part.

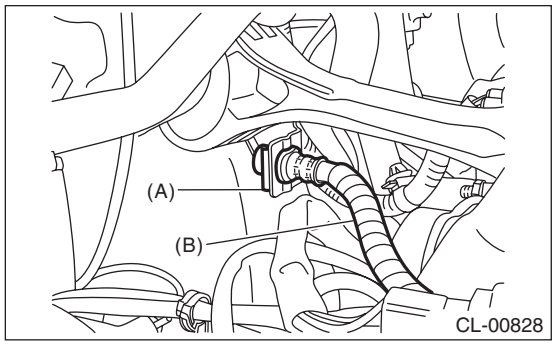


(A) Master cylinder body
(B) Seat
(C) Return spring
(D) Piston
(E) Piston stop ring
(F) Push rod ASSY

# 7. Clutch Pipe and Hose

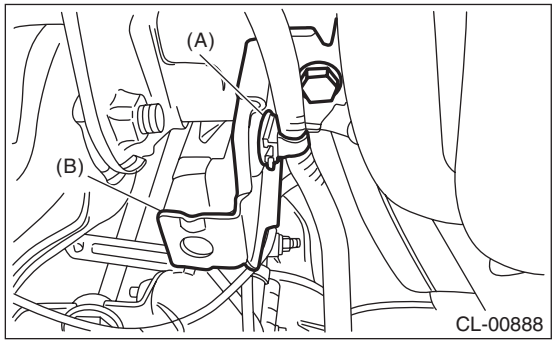
## A: REMOVAL

1) Remove the air intake boot assembly. <Ref. to IN(H4DO)-12, REMOVAL, Air Intake Boot.>
2) Drain the clutch fluid. <Ref. to CL-20, Clutch Fluid.>
3) Disconnect the clutch pipe from the clutch hose and master cylinder.
4) Pull out the clamp, then disconnect the clutch hose from the bracket.



(A) Clamp
(B) Clutch hose

5) Remove the clutch hose from operating cylinder.
6) Remove the harness clip from the bracket.



(A) Harness clip
(B) Bracket

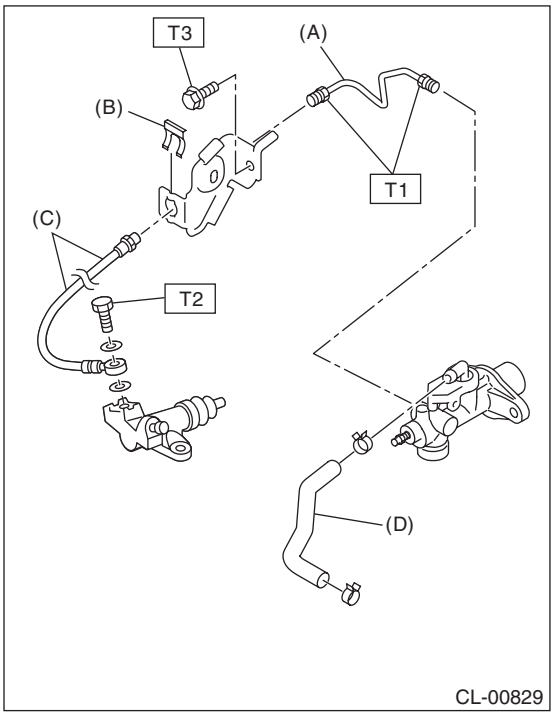
7) Remove the bracket.

## B: INSTALLATION

Install in the reverse order of removal.

NOTE:
Bleed air from the clutch fluid. <Ref. to CL-21, Clutch Fluid Air Bleeding.>

***Tightening torque:***
***T1: 15 N·m (1.5 kgf-m, 11.1 ft-lb)***
***T2: 18 N·m (1.8 kgf-m, 13.3 ft-lb)***
***T3: 25 N·m (2.5 kgf-m, 18.4 ft-lb)***



(A) Clutch pipe
(B) Clamp
(C) Clutch hose
(D) Tank hose

## C: INSPECTION

Check the pipes and hoses for breaks and damage. Check joints for fluid leakage. If crack, breakage or damage is found, repair or replace the faulty pipe or hose.

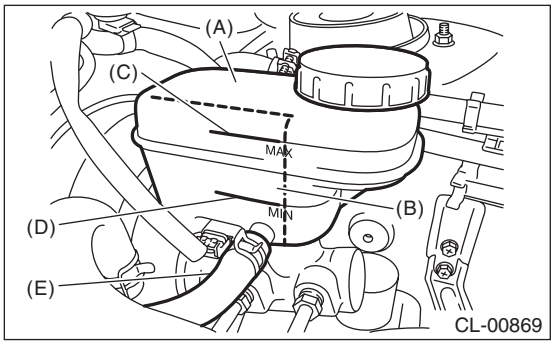
# 8. Clutch Fluid

## A: INSPECTION

**CAUTION:**
**Be careful not to spill the brake fluid. Brake fluid spilled on the vehicle body will harm the paint surface; wash it off with water and wipe clean quickly if spilled.**

1) Park the vehicle on a level surface.
2) Inspect the fluid level using the scale on the outside of the reservoir tank. If the level is below “MIN”, add fluid to bring it up to “MAX”, and also inspect for leakage.

***Recommended brake fluid:***
***New FMVSS No. 116 DOT3 or DOT4***



(A) Reservoir tank
(B) Clutch fluid chamber
(C) MAX. level
(D) MIN. level
(E) Tank hose

**CAUTION:**
**This reservoir tank has the brake fluid chamber and the clutch fluid chamber. When checking the fluid level, always check the fluid from the clutch fluid chamber side where the tank hose is connected.**

## B: REPLACEMENT

**CAUTION:**
**• Be careful not to spill the brake fluid. Brake fluid spilled on the vehicle body will harm the paint surface; wash it off with water and wipe clean quickly if spilled.**
**• Use new FMVSS No. 116 DOT3 or DOT4.**
**• Cover the air breather with cloth to prevent brake fluid from being splashed on surrounding parts when loosening the breather.**
**• Avoid mixing brake fluid of different brands to prevent fluid performance from degrading.**
**• Be careful not to allow dirt or dust to enter the reservoir tank.**

NOTE:
• During the bleeding operation, keep the reservoir tank filled with brake fluid to prevent entry of air.
• Clutch pedal must be operated very slowly.
• Bleed air from the oil line with help of a co-worker.
• The required amount of brake fluid is approximately 150 mL (5.1 US fl oz, 5.3 Imp fl oz) for total clutch system.

1) Remove the air intake boot assembly. <Ref. to IN(H4DO)-12, REMOVAL, Air Intake Boot.>
2) Drain the brake fluid from the air breather of the operating cylinder.
3) Refill the reservoir tank with recommended brake fluid.

***Recommended brake fluid:***
***New FMVSS No. 116 DOT3 or DOT4***

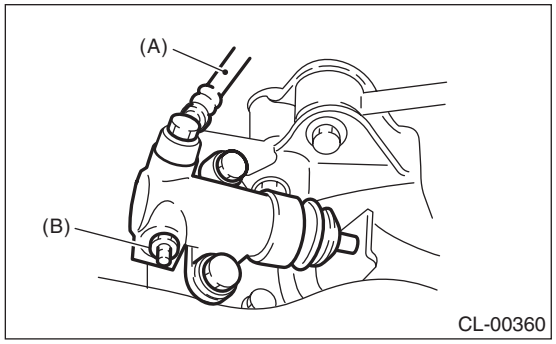
4) If necessary, bleed air from the clutch fluid. <Ref. to CL-21, Clutch Fluid Air Bleeding.>
5) Install the air intake boot assembly. <Ref. to IN(H4DO)-12, INSTALLATION, Air Intake Boot.>

# 9. Clutch Fluid Air Bleeding

## A: PROCEDURE

**CAUTION:**
**Be careful not to spill the brake fluid. Brake fluid spilled on the vehicle body will harm the paint surface; wash it off with water and wipe clean quickly if spilled.**

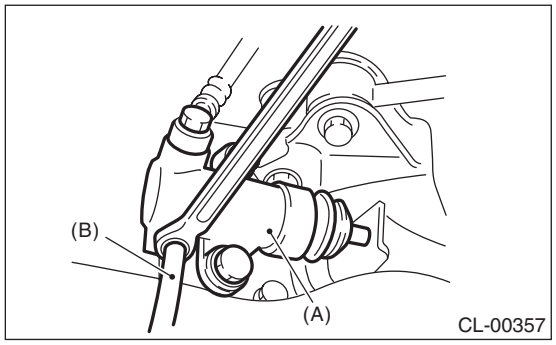
NOTE:
Bleed air from the oil line with help of a co-worker.
1) Remove the air intake boot assembly. <Ref. to IN(H4DO)-12, REMOVAL, Air Intake Boot.>
2) Fit one end of a vinyl tube into the air breather of the operating cylinder, and put the other end into a container.



(A) Clutch hose
(B) Air breather

3) Slowly depress the clutch pedal and keep it depressed. Then open the air breather to discharge air together with the fluid.
Release the air breather for 1 or 2 seconds. Next, with the breather closed, slowly release the clutch pedal.

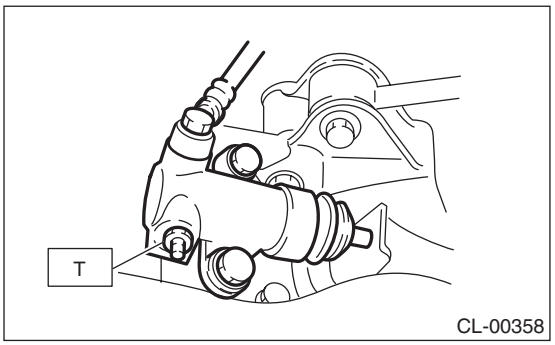
**CAUTION:**
**Cover the breather with cloth to prevent brake fluid from being splashed on surrounding parts when loosening the breather.**



(A) Operating cylinder
(B) Vinyl tube

4) Repeat procedure 3), until there are no more air bubbles appearing from the air breather.
5) Tighten the air breather.

***Tightening torque:***
***T: 7.8 N·m (0.8 kgf-m, 5.8 ft-lb)***

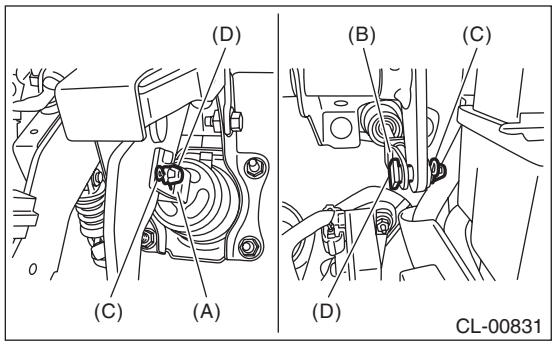


6) After stepping on the clutch pedal, make sure that there are no leaks evident in the entire clutch system.
7) After bleeding the air from clutch system, ensure that the clutch operates properly.
8) Install the air intake boot assembly. <Ref. to IN(H4DO)-12, INSTALLATION, Air Intake Boot.>

# 10.Clutch Pedal

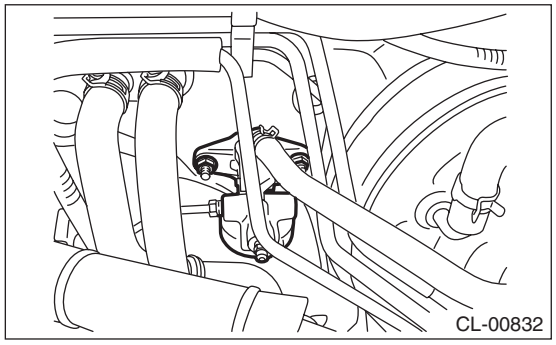
## A: REMOVAL

1) Disconnect the ground cable from battery.
2) Remove the steering column. <Ref. to PS-18, REMOVAL, Steering Column.>
3) Disconnect the connector from the stop light switch and clutch switch.
4) Remove the snap pins from clevis pins which secure the lever to the push rod and operating rod.
5) Pull out the clevis pins which secures the lever to the push rod and operating rod.



(A) Operating rod
(B) Push rod
(C) Snap pin
(D) Clevis pin

6) Remove the air intake boot assembly. <Ref. to IN(H4DO)-12, REMOVAL, Air Intake Boot.>
7) Remove the nut which secures the clutch master cylinder.



8) Remove the bolts and nuts which secure the brake pedal and clutch pedal, and remove the pedal assembly.

NOTE:
Hold the clutch master cylinder with a wire or a string to avoid the clutch pipe from bending.

## B: INSTALLATION

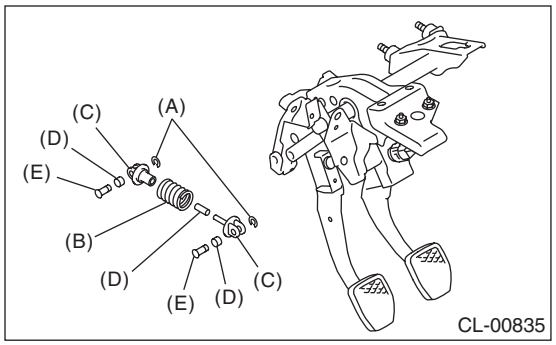
1) Install in the reverse order of removal.

***Tightening torque:***
***18 N·m (1.8 kgf-m, 13.3 ft-lb)***

**CAUTION:**
**Always use a new clevis pin.**
2) Adjust the clutch pedal after installation. <Ref. to CL-23, ADJUSTMENT, Clutch Pedal.>

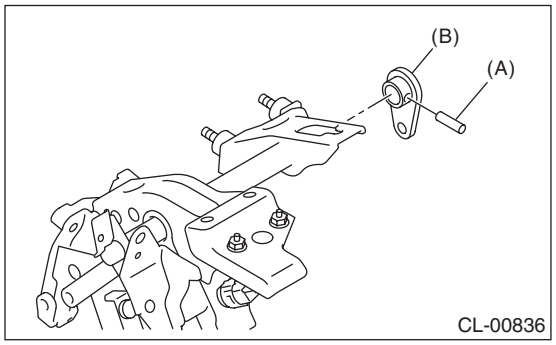
## C: DISASSEMBLY

1) Remove the clutch switches.
2) Remove the clip, assist spring, rod and bushing.



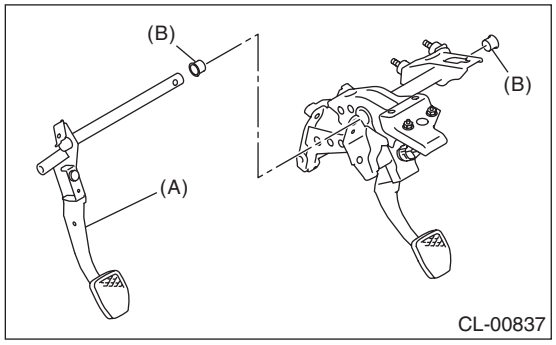
(A) Clip
(B) Assist spring
(C) Assist rod
(D) Bushing
(E) Clevis pin

3) Remove the spring pin and lever.



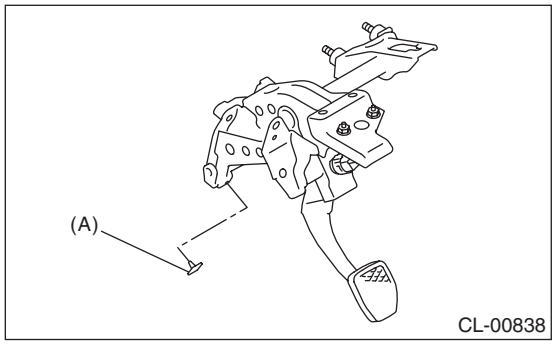
(A) Spring pin
(B) Lever

4) Remove the clutch pedal and bushings.



(A) Clutch pedal
(B) Bushing

5) Remove the stopper from the pedal bracket.



(A) Stopper

6) Remove the clutch pedal pad.

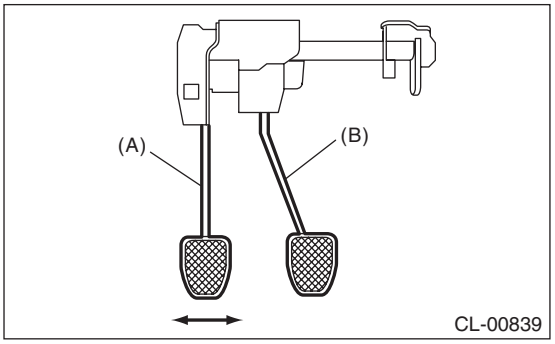
## D: ASSEMBLY

1) Install the stopper and pedal pad to the clutch pedal.
2) Install the clutch switch to the pedal bracket.
3) Clean the pedal bushing holes of the clutch pedal and the brake pedal, apply grease, and install the pedal bushings.
4) Install the clutch pedal, brake pedal and lever to the pedal bracket, and fix with a spring pin.
5) Install the assist rod A, assist rod B, assist bushing and assist spring to the clutch pedal and pedal bracket.

## E: INSPECTION

Move the clutch pedal pads in the lateral direction with a force of approximately 10 N (1 kgf, 2 lbf) to check that the clutch pedal deflection is within the service limit. If it exceeds the service limit, replace with new bushings.

***Deflection of the clutch pedal:***
***Service limit***
***4.0 mm (0.157 in) or less***



(A) Clutch pedal
(B) Brake pedal

## F: ADJUSTMENT

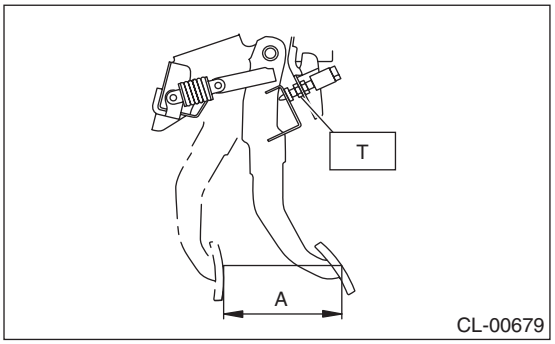
1) Turn the lock nut until the full stroke of clutch pedal becomes within the specification.

**CAUTION:**
**When adjusting the full stroke of clutch pedal, do not turn the clutch switch.**

NOTE:
If the lock nut cannot adjust the full stroke of clutch pedal to the specified value, adjust it by turning the master cylinder push rod.

***Clutch pedal full stroke A:***
***130 — 135 mm (5.12 — 5.31 in)***

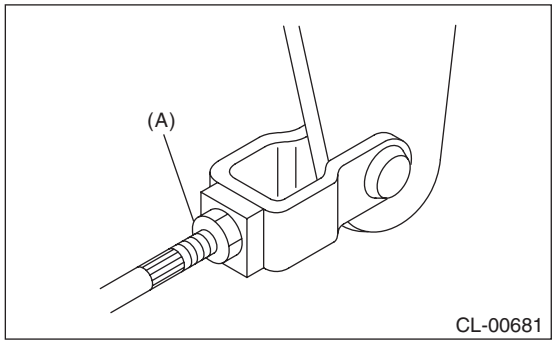
***Tightening torque (Clutch switch lock nut):***
***T: 8 N·m (0.8 kgf-m, 5.9 ft-lb)***



2) If the full stroke is not within the specified value, loosen the clutch switch lock nut to adjust.

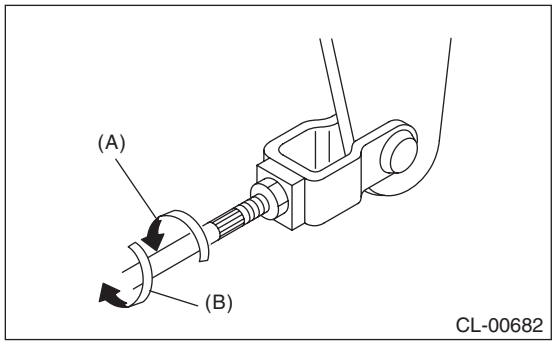
***Tightening torque:***
***8 N·m (0.8 kgf-m, 5.9 ft-lb)***

3) Loosen the push rod lock nuts.



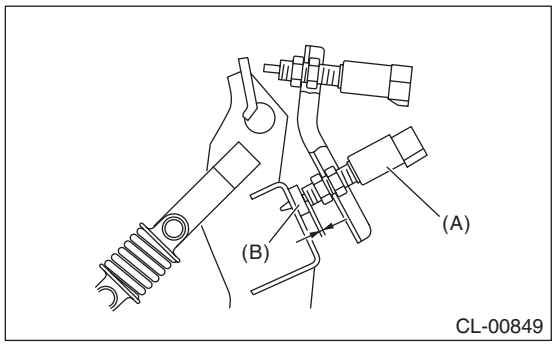
(A) Push rod lock nut

4) Make sure that the clutch pedal contacts the clutch pedal bracket stopper when the clutch pedal is at the maximum stroke position.



(A) In the longer direction
(B) In the shorter direction

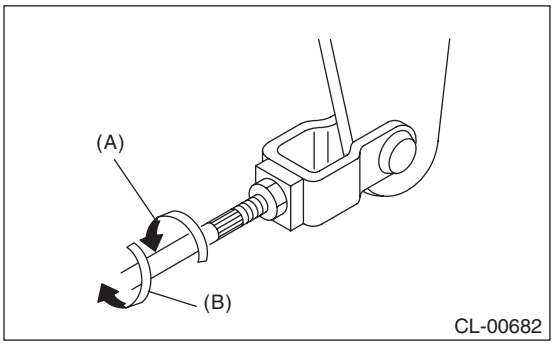
5) Make sure that the clutch pedal contacts the clutch switch side when the pedal is released.
6) Turn the push rod to shorten until a clearance is gained on the clutch switch side.



(A) Clutch switch
(B) Stopper

7) Turn the push rod to lengthen until clutch pedal contacts the clutch switch.

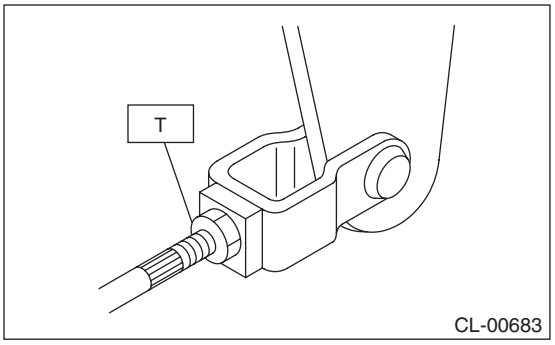
8) Turn further in the direction that will shorten the push rod by 270°.



(A) In the longer direction
(B) In the shorter direction

9) Check that the clevis pin moves smoothly by moving it in the left and right directions.
10) Tighten the push rod lock nut.

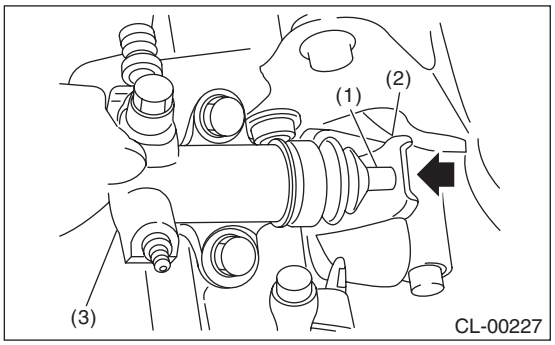
***Tightening torque (Push rod lock nut):***
***T: 10 N·m (1.0 kgf-m, 7.4 ft-lb)***



11) Depress and release the clutch pedal two or three times to ensure that the clutch pedal and release lever operate smoothly. If the clutch pedal and release lever do not operate smoothly, bleed air from the clutch hydraulic system. <Ref. to CL-21, Clutch Fluid Air Bleeding.>
12) Measure the clutch pedal full stroke length again to ensure that it is within specifications. If it is not within specifications, repeat adjustment procedures again from the beginning.

***Clutch pedal full stroke:***
***130 — 135 mm (5.12 — 5.31 in)***

13) Push the release lever until the operating cylinder push rod retracts. Check that the clutch fluid level in the reservoir tank increases.



(1) Push rod
(2) Release lever
(3) Operating cylinder

14) If the clutch fluid level increases, hydraulic clutch play is correct.
15) If the clutch fluid level does not increase or push rod does not retract, readjust the clutch pedal.
16) Check the fluid level using the scale on the reservoir tank. <Ref. to CL-20, INSPECTION, Clutch Fluid.>

# 11.Clutch Switch

## A: REMOVAL

1) Disconnect the ground cable from battery.
2) Remove the cover assembly - instrument panel LWR driver. <Ref. to EI-65, REMOVAL, Instrument Panel Lower Cover.>
3) Disconnect the connector of clutch switch.
4) Remove the clutch switches.

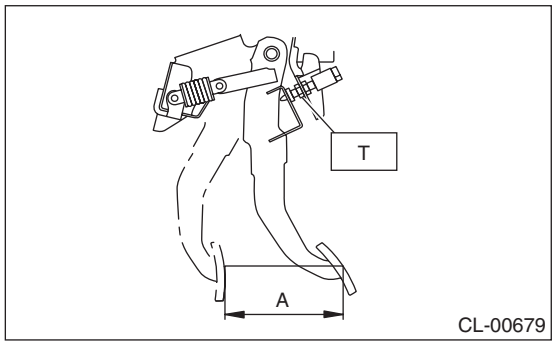
## B: INSTALLATION

### 1. CLUTCH SWITCH

1) Move the clevis pin of push rod to left and right, retain it at the position where it moves smoothly, and measure the clutch pedal stroke.

***Clutch pedal full stroke A:***
***130 — 135 mm (5.12 — 5.31 in)***

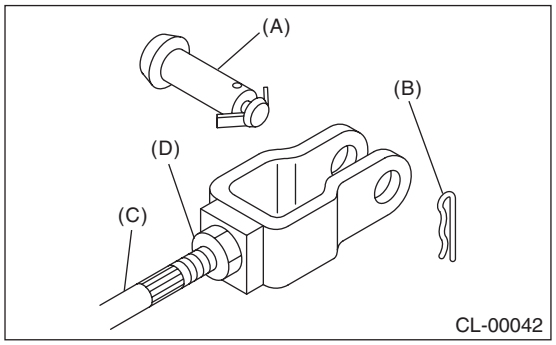
***Tightening torque:***
***T: 8 N·m (0.8 kgf-m, 5.9 ft-lb)***



2) If the clutch pedal stroke is out of specification, adjust the stroke. <Ref. to CL-23, ADJUSTMENT, Clutch Pedal.>
3) Connect the clutch switch connector.

### 2. CLUTCH START SWITCH

1) Remove the snap pin and clevis pin connecting the clutch pedal and operating rod.

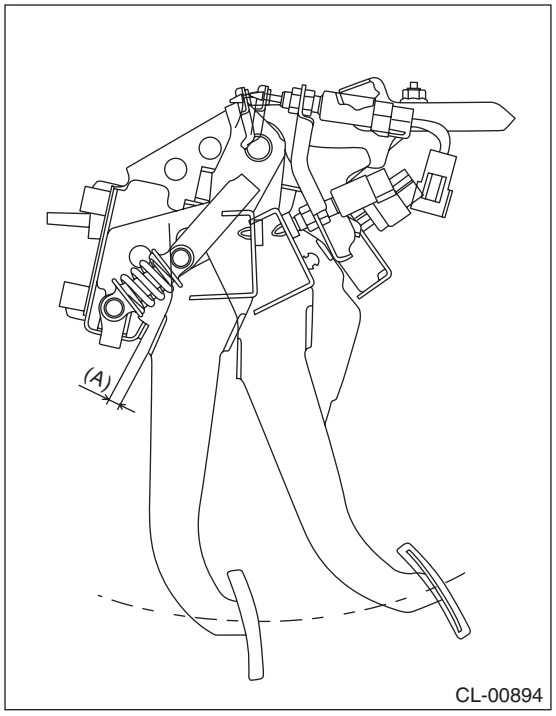


(A) Clevis pin
(B) Snap pin
(C) Push rod
(D) Lock nut

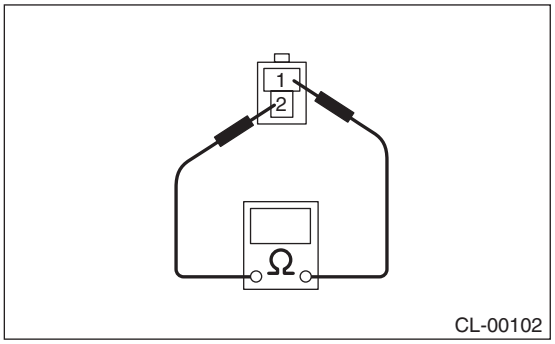
2) Install the clutch start switch so that the clutch switch turns on when the clearance between clutch pedal stopper and clutch pedal is within the specification described below.

***Clearance A:***
***6.3 — 8.6 mm (0.25 — 0.34 in)***

***Tightening torque:***
***8 N·m (0.8 kgf-m, 5.9 ft-lb)***

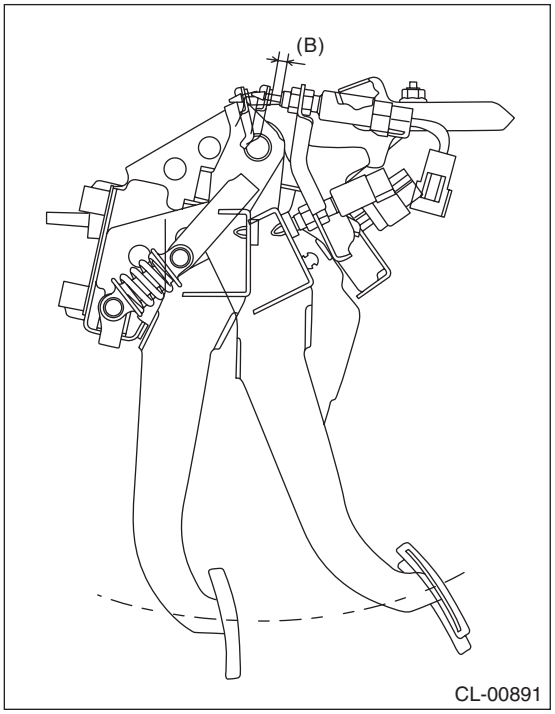


NOTE:
• Using a plate of the same thickness for the clearance facilitates the adjustment operation.
• Using the Subaru Select Monitor or a tester, check the position where the switch turns on.
Check the following figure for the terminal layout of the harness connector.



• When performing adjustment by the clearance between clutch start switch and clutch pedal plate, perform installation according to the following gap.

***Clearance B:***
***8.6 — 9.0 mm (0.34 — 0.35 in)***



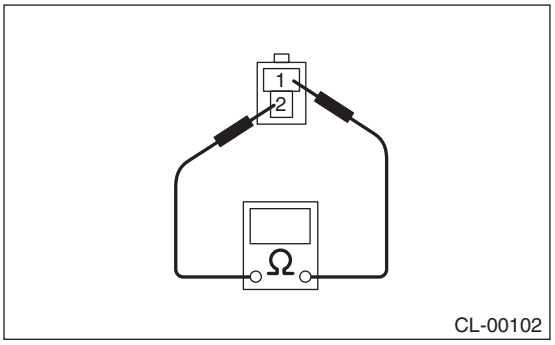
3) Connect the clutch start switch connector.
4) Make sure that engine does not start with clutch pedal not depressed.
5) Make sure that engine starts with clutch pedal depressed.

# C: INSPECTION

## 1. CLUTCH START SWITCH

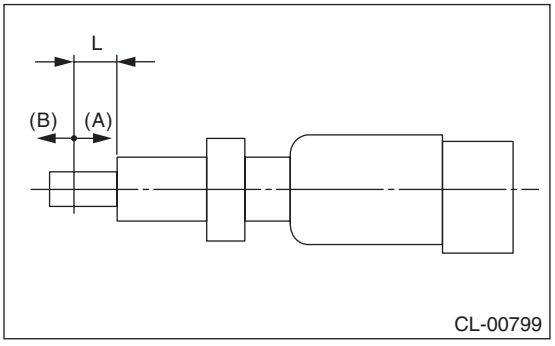
1) Perform the following inspections. If the clutch start switch does not operate normally, adjust the switch, and check it again. <Ref. to CL-28, ADJUSTMENT, Clutch Switch.>
• Make sure that engine does not start with clutch pedal not depressed.
• Make sure that engine starts with clutch pedal fully depressed.
2) When the clutch start switch does not operate normally even if it is adjusted, check the clutch start switch for continuity.
(1) Remove the clutch start switch. <Ref. to CL-26, REMOVAL, Clutch Switch.>
(2) Measure the resistance between terminal 1 and 2 of the switch. If the resistance is not at the standard value, replace the switch.

| Condition | Terminal No. | Specified resistance |
|---|---|---|
| ON | No. 1 — No. 2 | Less than 1 Ω |
| OFF | No. 1 — No. 2 | 1 MΩ or more |



(3) Check that the switch is turned on and off in Dimension L.

***Dimension L:***
***9 — 10 mm (0.35 — 0.39 in)***

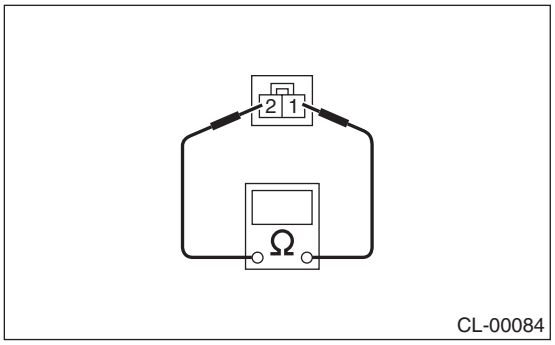


(A) ON
(B) OFF

## 2. CLUTCH SWITCH

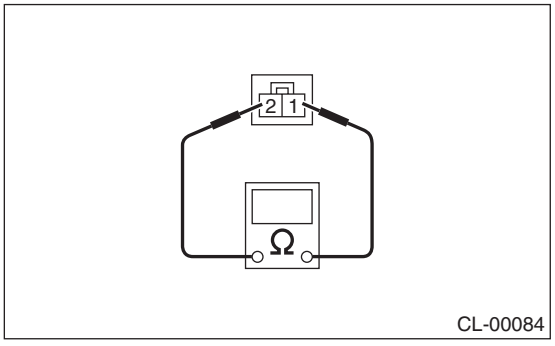
1) Check the clutch switch for continuity.
(1) Disconnect the connector of clutch switch.
(2) Measure the resistance between terminal 1 and 2 of the switch. If the resistance is not within the specification, inspect the clutch stroke and its installing condition, and check again.

| Condition | Terminal No. | Specified resistance |
|---|---|---|
| When clutch pedal is depressed | No. 1 — No. 2 | 1 MΩ or more |
| When the clutch pedal is not depressed | No. 1 — No. 2 | Less than 1 Ω |



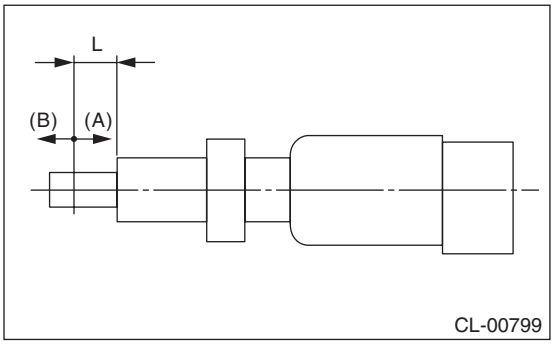
2) If the operation is not normal even when the clutch stroke and its installing condition is normal, check the continuity of the clutch switch.
(1) Remove the clutch switches. <Ref. to CL-26, REMOVAL, Clutch Switch.>
(2) Measure the resistance between terminal 1 and 2 of the switch. If the resistance is not at the standard value, replace the switch.

| Condition | Terminal No. | Specified resistance |
|---|---|---|
| ON | No. 1 — No. 2 | Less than 1 Ω |
| OFF | No. 1 — No. 2 | 1 MΩ or more |



(3) Check that the switch changes between ON/OFF within L dimension.

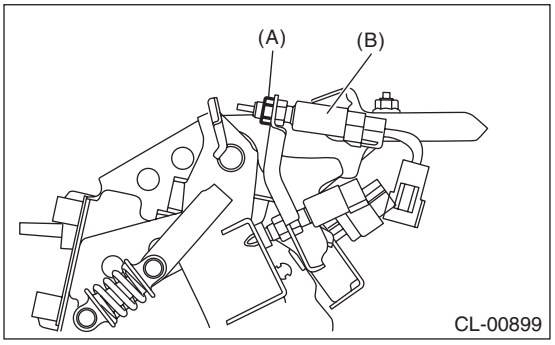
***L dimension:***
***5 — 6.5 mm (0.2 — 0.26 in)***



(A) ON
(B) OFF

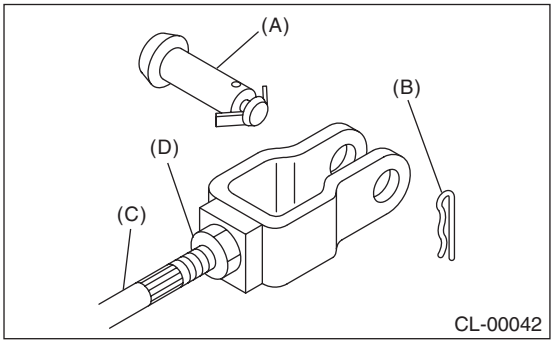
## D: ADJUSTMENT

1) Loosen the lock nut of the clutch start switch.



(A) Lock nut
(B) Clutch start switch

2) Disconnect the harness connector of the clutch start switch.
3) Remove the snap pin and clevis pin connecting the clutch pedal and operating rod.

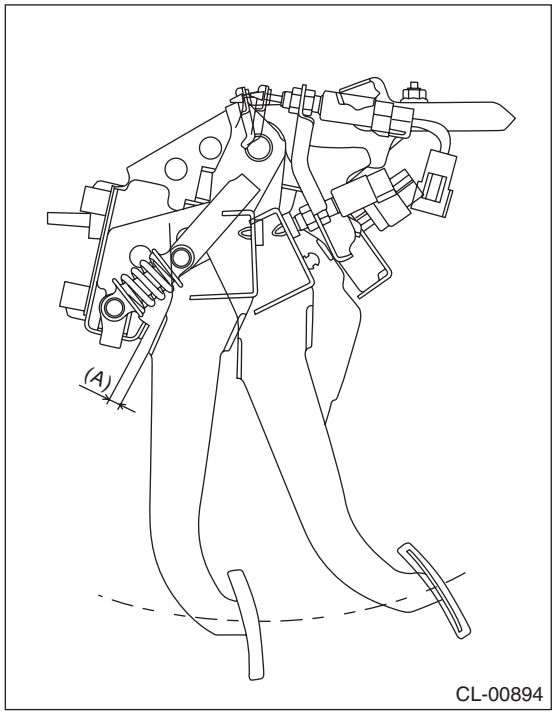


(A) Clevis pin
(B) Snap pin
(C) Push rod
(D) Lock nut

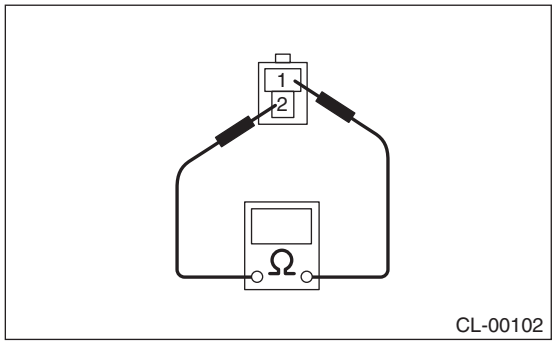
4) Adjust the clutch start switch so that the switch turns on when the clearance between clutch pedal stopper and clutch pedal is within the specification described below, and then tighten the lock nut.

***Clearance A:***
***6.3 — 8.6 mm (0.25 — 0.34 in)***

***Tightening torque:***
***8 N·m (0.8 kgf-m, 5.9 ft-lb)***

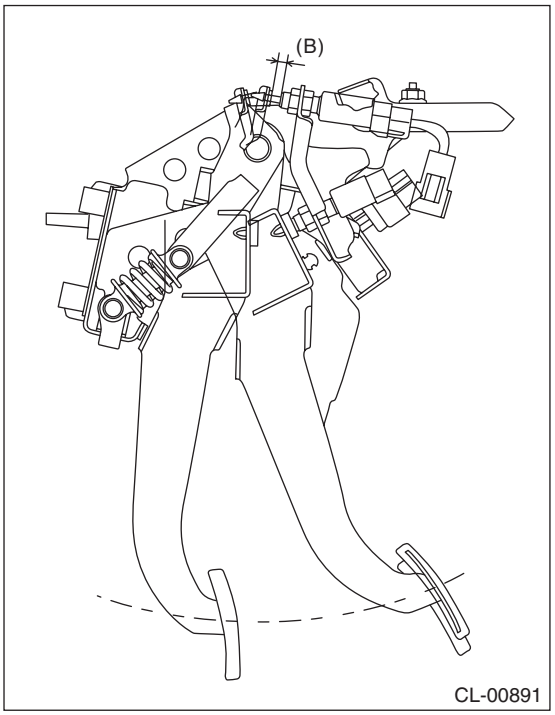


NOTE:
• Using a plate of the same thickness for the clearance facilitates the adjustment operation.
• Using the Subaru Select Monitor or a tester, check the position where the switch turns on.
Check the following figure for the terminal layout of the harness connector.



• When performing adjustment by the clearance between clutch start switch and clutch pedal plate, perform installation according to the following gap.

***Clearance B:***
***8.6 — 9.0 mm (0.34 — 0.35 in)***



5) Connect the clutch start switch connector.

# 12.General Diagnostic Table

## A: INSPECTION

### 1. CLUTCH

| Symptoms | Possible cause | Corrective action |
|---|---|---|
| 1. Clutch slippage.<br>It is hard to perceive clutch slippage in the early stage, but pay attention to the following symptoms.<br>• Engine speeds up when shifting.<br>• High-speed driving is not possible; especially rapid acceleration is not possible and vehicle speed does not increase in proportion to the increase in engine speed.<br>• Power drops particularly when ascending a slope, and there is a burning smell of the clutch plate.<br>• Method of testing: Park the vehicle and fully apply the parking brake. Disengage the clutch and shift the transmission gear into the 1st. Gradually increase the engine speed while gradually allowing the clutch to engage. The clutch function is satisfactory if the engine stalls. However, the clutch is slipping if the vehicle does not move forward and the engine does not stall. | (a) Oil on the clutch face | Replace. |
| | (b) Worn clutch face | Replace. |
| | (c) Deteriorated diaphragm spring | Replace. |
| | (d) Warped pressure plate or flywheel | Repair or replace. |
| | (e) Defective release bearing holder | Repair or replace. |
| 2. Clutch drags.<br>As a symptom of this trouble, a harsh scratching noise occurs and control becomes difficult when shifting gears. The symptom becomes more apparent when shifting into the 1st gear. However, because most trouble of this sort is due to a defective synchronization mechanism, perform the following tests.<br>• Method of testing: <Ref. to CL-31, DIAGNOSTIC DIAGRAM OF CLUTCH DRAG, INSPECTION, General Diagnostic Table.><br>The problem is caused by insufficient disengagement of the clutch if an abnormal noise occurs during this test. | (a) Worn or rusty clutch disc hub spline | Replace the clutch disc. |
| | (b) Excessive deflection of clutch disc face | Repair or replace. |
| | (c) Crankshaft pilot needle bearing sticking | Replace. |
| | (d) Cracked clutch disc face | Replace. |
| | (e) Stuck clutch disc (smeared by oil or water) | Replace. |
| 3. Clutch chatters.<br>Clutch chattering is an unpleasant vibration to the whole vehicle when the vehicle is just started with clutch partially engaged. | (a) Adhesion of oil on the clutch face | Replace the clutch disc. |
| | (b) Weak or broken damper spring | Replace the clutch disc. |
| | (c) Poor contact of the disc surface or excessively worn disc | Replace the faulty clutch disc. |
| | (d) Warped pressure plate or flywheel | Repair or replace. |
| | (e) Loose disc rivets | Replace the clutch disc. |
| | (f) Loose engine mounting | Retighten or replace mounting. |
| | (g) Loose pitching stopper | Retighten the pitching stopper. Or replace it. |

| Symptoms | Possible cause | Corrective action |
|---|---|---|
| 4. Noisy clutch<br>Noise occurs when the clutch is disengaged, engaged, or partially engaged. | (a) Broken, worn or insufficiently lubricated release bearing | Replace the release bearing. |
| | (b) Insufficient lubrication of the pilot bearing | Replace the pilot bearing. |
| | (c) Loose clutch disc hub | Replace the clutch disc. |
| | (d) Loose damper spring retainer | Replace the clutch disc. |
| | (e) Deteriorated or broken damper spring | Replace the clutch disc. |
| 5. Clutch grabs suddenly.<br>When starting the vehicle with the clutch partially engaged, the clutch engages suddenly and the vehicle jumps instead of making a smooth start. | (a) Grease or oil on facing | Replace the clutch disc. |
| | (b) Deteriorated cushioning spring | Replace the clutch disc. |
| | (c) Worn or rusted spline of clutch disc or main shaft | Take off rust, apply grease or replace clutch disc or main shaft. |
| | (d) Deteriorated or broken damper spring | Replace the clutch disc. |
| | (e) Loose engine mounting | Retighten or replace mounting. |
| | (f) Deteriorated diaphragm spring | Replace. |

## 2. CLUTCH PEDAL

| Symptoms | Corrective action |
|---|---|
| Insufficient clutch pedal free play | Adjust the free play of the pedal. |
| Excessively worn and damaged pedal shaft and/or bushing | Replace the bushing or shaft with a new part. |

## 3. DIAGNOSTIC DIAGRAM OF CLUTCH DRAG

| Step | | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK GEAR NOISE.**<br>1) Start the engine.<br>2) Disengage the clutch and shift quickly from neutral to reverse in idling condition. | Is there any abnormal noise from the transmission gear? | Go to step **2**. | Clutch is normal. |
| 2 | **CHECK GEAR NOISE.**<br>Disengage the clutch at idle and shift from neutral to reverse within 0.5 — 1.0 seconds. | Is there any abnormal noise from the transmission gear? | Go to step **3**. | Inspect defective transmission or excessive clutch drag torque, pilot bearing, clutch disc, transmission and clutch disc hub spline. |
| 3 | **CHECK GEAR NOISE.**<br>1) Disengage the clutch at idle and shift from neutral to reverse within 0.5 — 1.0 seconds.<br>2) With the clutch disengaged, shift from neutral to reverse, reverse to neutral several times. | Is there any abnormal noise from the transmission gear? | Inadequate clutch disengage. Inspect the clutch disc, clutch cover, clutch release, and clutch pedal free play. | Clutch and flywheel seizure. Inspect the clutch disc and the spline of the clutch disc hub. |

# CHASSIS SECTION

This service manual has been prepared to provide SUBARU service personnel with the necessary information and data for the correct maintenance and repair of SUBARU vehicles.
This manual includes the procedures for maintenance, disassembling, reassembling, inspection and adjustment of components and diagnostics for guidance of experienced mechanics.
Please peruse and utilize this manual fully to ensure complete repair work for satisfying our customers by keeping their vehicle in optimum condition. When replacement of parts during repair work is needed, be sure to use SUBARU genuine parts.

All information, illustration and specifications contained in this manual are based on the latest product information available at the time of publication approval.

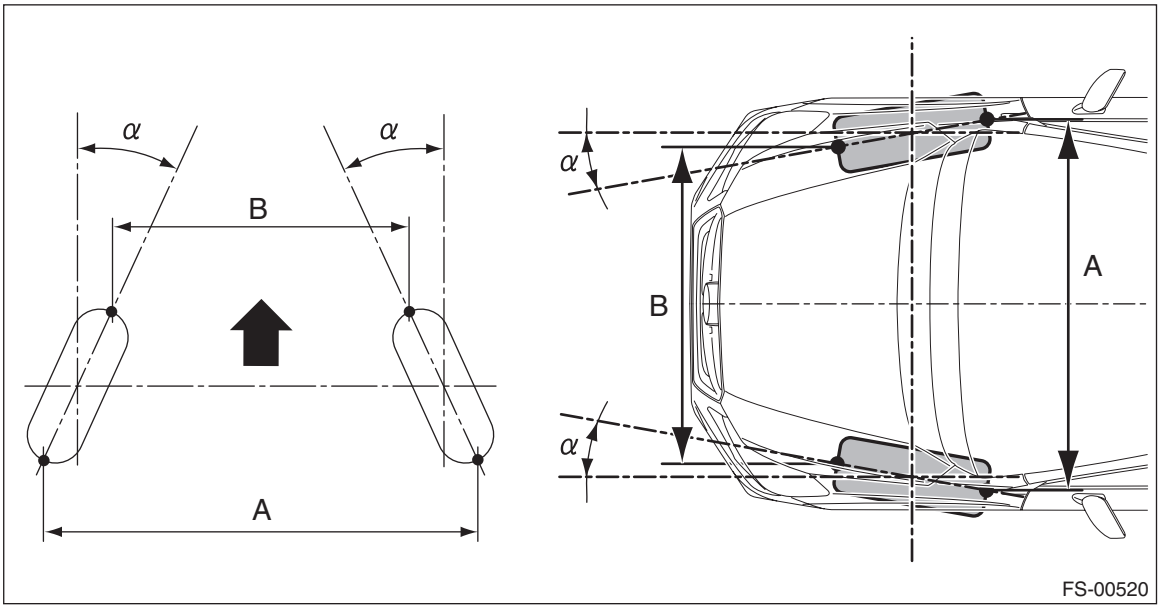
| | Toe-in mm (in) | | IN 3±3 (IN 0.12±0.12) Toe angle (sum of both wheels): IN 0°12′±12′ | | IN 3±3 (IN 0.12±0.12) Toe angle (sum of both wheels): IN 0°10′±10′ |
| | Thrust angle (Tolerance: 0°00′±30′) | | 0°00′ | | |

NOTE:
• Front toe-in, rear toe-in and front camber can be adjusted. Adjust if the value of toe-in or camber exceeds the tolerance range of the specification chart.
• Other items except for front toe-in, rear toe-in and front camber that are described in the specification chart cannot be adjusted. If other items exceed the tolerance range of the specification chart, check the suspension parts and connections for deformation. If defective, replace with new parts.



***A – B = Positive: Toe-in, Negative: Toe-out***

***α = Individual toe angles***

***T2: 55 (5.61, 40.6)***

## C: CAUTION

• Wear appropriate work clothing, including a helmet, protective goggles and protective shoes when performing any work.
• Before removal, installation or disassembly, be sure to clarify the failure. Avoid unnecessary removal, installation, disassembly and replacement.
• Use SUBARU genuine grease etc. or equivalent. Do not mix grease etc. of different grades or manufacturers.
• Before securing a part on a vise, place cushioning material such as wood blocks, aluminum plate, or cloth between the part and the vise.
• Be sure to tighten fasteners including bolts and nuts to the specified torque.
• Place shop jacks or rigid racks at the specified points.
• When the suspension-related components have been replaced, perform “VDC sensor midpoint setting mode” of the VDC. <Ref. to VDC-19, VDC SENSOR MIDPOINT SETTING MODE, ADJUSTMENT, VDC Control Module and Hydraulic Control Unit (VDCCM&H/U).>

## 2. GENERAL TOOL

| TOOL NAME | REMARKS |
|---|---|
| Alignment gauge | Used for measuring wheel alignment. |
| Alignment gauge adapter | Used for measuring wheel alignment. |
| Turning radius gauge | Used for measuring wheel alignment. |
| Toe-in gauge | Used for toe-in measurement. |
| Tie-rod ball joint puller | Used for disconnecting tie-rod end. |
| Dial gauge | Used for damper strut measurement. |
| Coil spring compressor | Used for strut assembly/disassembly. |

# 2. Wheel Alignment

## A: INSPECTION

Check the following items before performing the wheel alignment measurement.

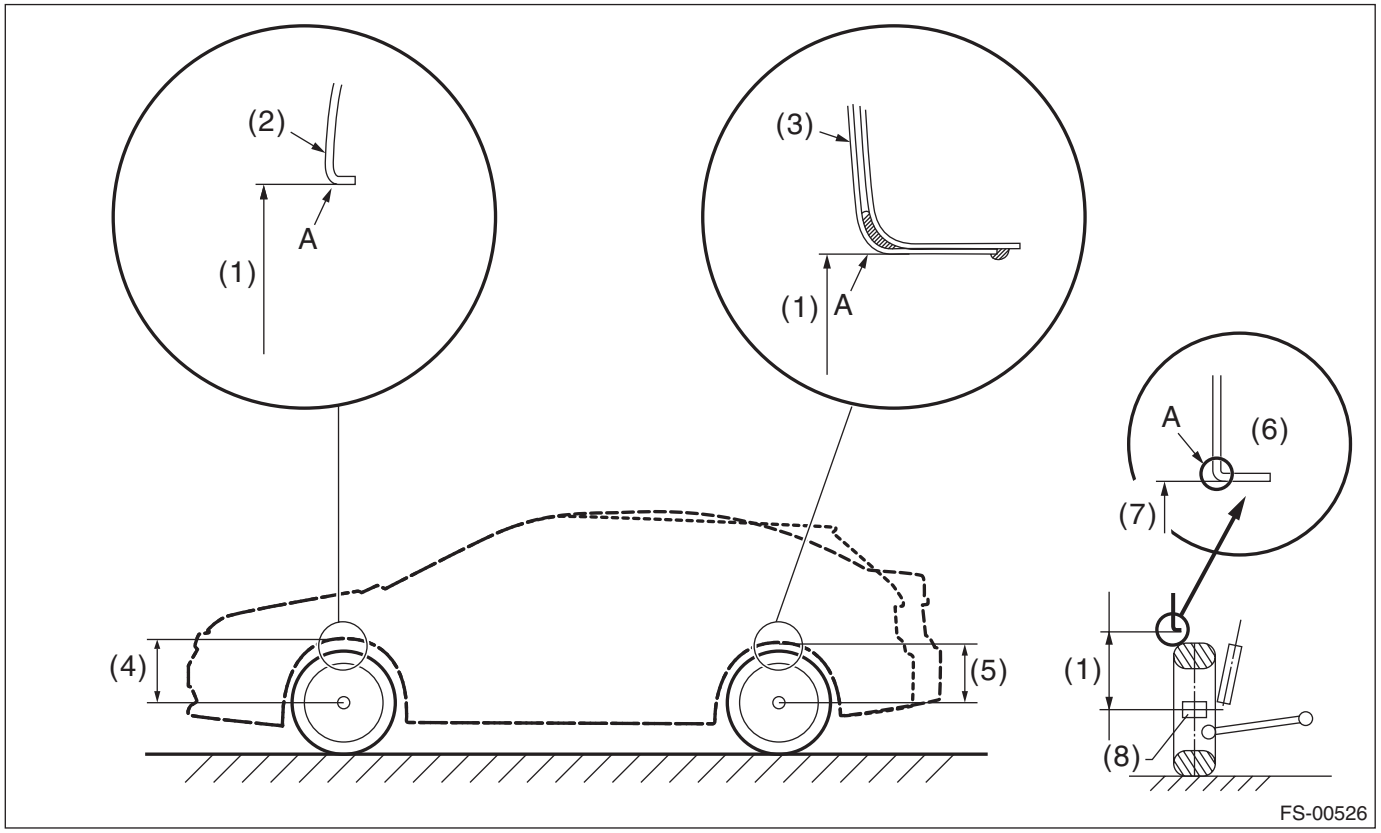
- Tire inflation pressure
- Uneven wear of RH and LH tires, or difference of sizes
- Tire runout
- Excessive play and wear of ball joint
- Excessive play and wear of tie-rod end
- Excessive play of wheel bearing
- Right and left wheel base imbalance
- Deformation and excessive play of steering link
- Deformation and excessive play of suspension parts

Check, adjust and measure the wheel alignment in accordance with the following procedures.

| | | |
|---|---|---|
| 1 | Wheel arch height (front and rear wheels) | Inspection: <Ref. to FS-11, REAR WHEEL TOE-IN, INSPECTION, Wheel Alignment.> |
| ↓ | | |
| 2 | Camber (front and rear wheels) | Inspection: <Ref. to FS-9, CAMBER, INSPECTION, Wheel Alignment.><br>Adjustment: <Ref. to FS-12, FRONT CAMBER, ADJUSTMENT, Wheel Alignment.> |
| ↓ | | |
| 3 | Caster (front wheel) | Inspection: <Ref. to FS-10, CASTER, INSPECTION, Wheel Alignment.> |
| ↓ | | |
| 4 | Steering angle | Inspection: <Ref. to FS-11, FRONT WHEEL TOE-IN, INSPECTION, Wheel Alignment.><br>Adjustment: <Ref. to FS-14, STEERING ANGLE, ADJUSTMENT, Wheel Alignment.> |
| ↓ | | |
| 5 | Front wheel toe-in | Inspection: <Ref. to FS-10, STEERING ANGLE, INSPECTION, Wheel Alignment.><br>Adjustment: <Ref. to FS-15, FRONT WHEEL TOE-IN, ADJUSTMENT, Wheel Alignment.> |
| ↓ | | |
| 6 | Rear wheel toe-in | Inspection: <Ref. to FS-8, WHEEL ARCH HEIGHT, INSPECTION, Wheel Alignment.><br>Adjustment: <Ref. to FS-16, REAR WHEEL TOE-IN, ADJUSTMENT, Wheel Alignment.> |
| ↓ | | |
| 7 | Thrust angle | Inspection: <Ref. to FS-12, THRUST ANGLE, INSPECTION, Wheel Alignment.><br>Adjustment: <Ref. to FS-18, THRUST ANGLE, ADJUSTMENT, Wheel Alignment.> |

## 1. WHEEL ARCH HEIGHT

1) Park the vehicle on a level surface.
2) Empty the vehicle so that it is at “curb weight”. (Empty the luggage compartment, load the spare tire, jack and service tools, and fill up the fuel tank.)
3) Set the steering wheel in a straight-ahead position, and stabilize the suspension by moving the vehicle in a straight line for 5 m (16 ft) or more.
4) Suspend a thread from the wheel arch (point “A” in the figure below) and affix at a position directly above the center of wheel.
5) Measure the distance between the point “A” and the center of wheel.



(1) Wheel arch height
(2) Front fender
(3) Rear quarter
(4) Front wheel arch height
(5) Rear wheel arch height
(6) Flange bend line
(7) Point of measurement
(8) End of spindle

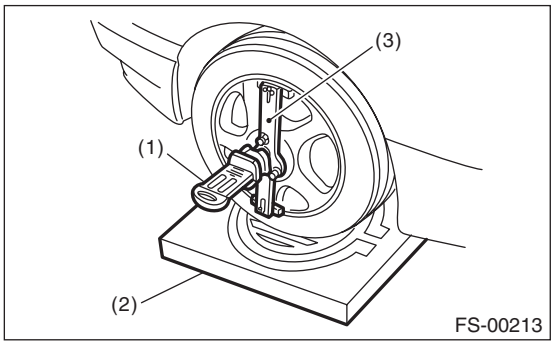
| Wheel arch height specification mm (in) (Tolerance: $^{+12\ mm}_{-24\ mm}$ ($^{+0.47\ in}_{-0.94\ in}$)) | | | |
|---|---|---|---|
| Tire size | Standard vehicle height model | SPORT model | XV model |
| | P195/65R15<br>P205/55R16<br>P205/50R17 | P205/50R17 | P225/55R17 |
| Front | 387 (15.24) | 392 (15.43) | 452 (17.8) |
| Rear | 368 (14.49) | 371 (14.61) | 450 (17.72) |

## 2. CAMBER

1) Place the front wheel on the turning radius gauge.

NOTE:
Make sure the ground contact surfaces of the front and rear wheels are at the same height.

2) Set the adapter into the center of wheel, and then set the wheel alignment gauge.



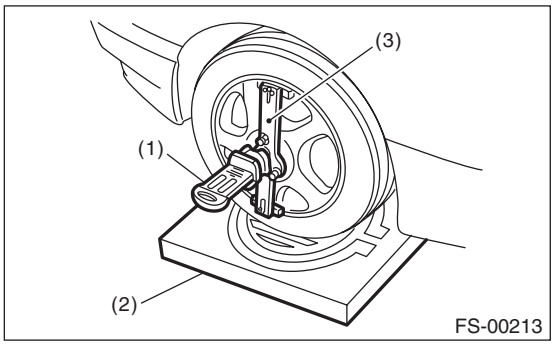
(1) Alignment gauge
(2) Turning radius gauge
(3) Adapter

3) Measure the camber angle in accordance with the operation manual for wheel alignment gauge.

| Tire size | | Camber (Difference between RH and LH 45′ or less) |
|---|---|---|
| Standard vehicle height model | P195/65R15<br>P205/55R16<br>P205/50R17 | –0°20′±0°45′ |
| SPORT model | P205/50R17 | –0°15′±0°45′ |
| XV model | P225/55R17 | 0°10′ |

## 3. CASTER

1) Place the front wheel on the turning radius gauge. Make sure the ground contact surfaces of the front and rear wheels are at the same height.
2) Set the adapter into the center of wheel, and then set the wheel alignment gauge.



(1) Alignment gauge
(2) Turning radius gauge
(3) Adapter

3) Measure the caster angle in accordance with the operation manual for wheel alignment gauge.

| Tire size | Caster |
|---|---|
| P195/65R15<br>P205/55R16<br>P205/50R17*1 | 6°00′ |
| P205/50R17*2<br>P225/55R17 | 5°58′ |

*1: Except for SPORT model
*2: SPORT model

## 4. STEERING ANGLE

1) Place the vehicle on turning radius gauge.
2) While depressing the brake pedal, turn the steering wheel fully to the left and right.
3) With the steering wheel held at each fully turned position, measure both the inner and outer wheel steering angles.

| Tire size | Inner wheel | Outer wheel |
|---|---|---|
| P195/65R15<br>P205/55R16<br>P205/50R17 | 38.3°±1.5° | 33.7°±1.5° |
| P225/55R17 | 38.5°±1.5° | 34.0°±1.5° |

## 5. FRONT WHEEL TOE-IN

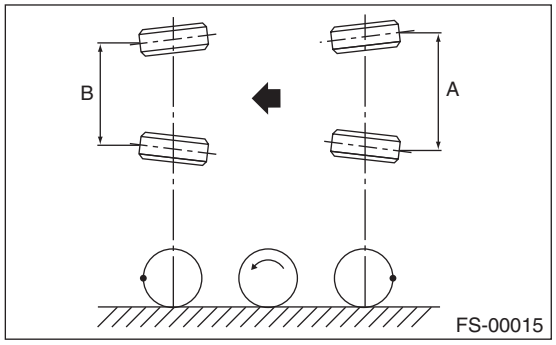
***Toe-in: Inspection value***
***0±3 mm (0±0.12 in)***

1) Set the toe-in gauge in the position at wheel axis center height behind the right and left front tires.
2) Place a mark at the center of both left and right tires, and measure distance “A” between the marks.
3) Move the vehicle forward to rotate the tires 180°.

NOTE:
Be sure to rotate the tires in the forward direction.

4) Measure the distance “B” between the left and right marks. Find toe-in using the following calculation:

***A – B = Toe-in***



## 6. REAR WHEEL TOE-IN

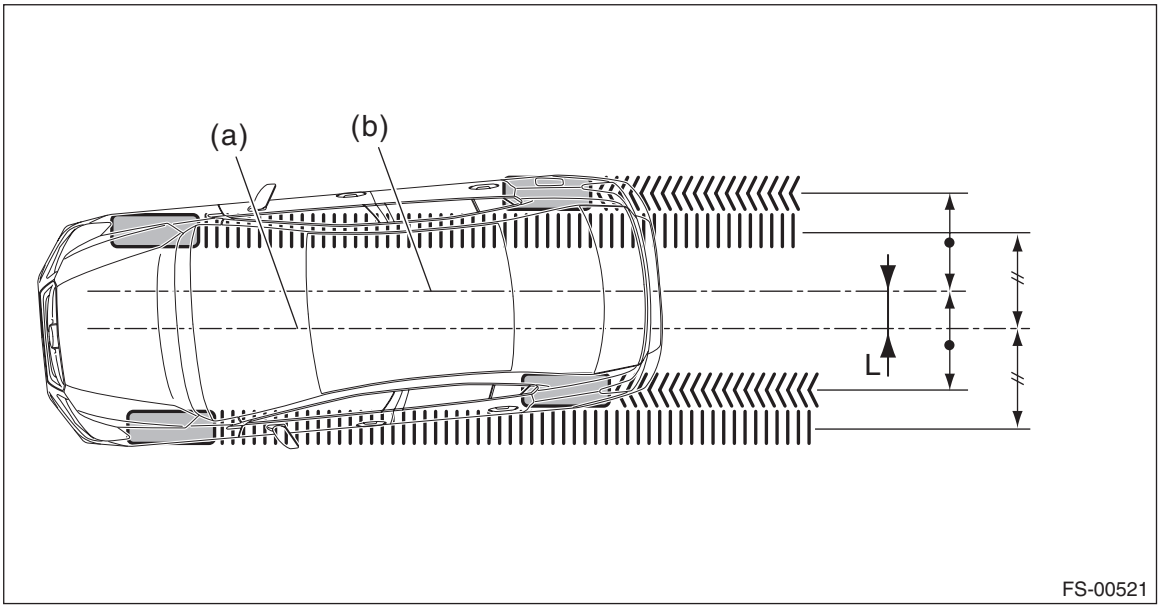
Refer to the FRONT WHEEL TOE-IN for rear toe-in inspection procedures. <Ref. to FS-11, FRONT WHEEL TOE-IN, INSPECTION, Wheel Alignment.>

***Toe-in: Inspection value***
***3±3 mm (0.12±0.12 in)***

### 7. THRUST ANGLE

1) Park the vehicle on a level surface.
2) Move the vehicle 3 to 4 meters (10 to 13 feet) straight forward.
3) Draw the center of loci for both the front and rear axles.
4) Measure distance “L” between the center lines of the axle loci.

***Thrust angle: Inspection value***
***0°±30′***
***Less than 30′ when “L” is 23 mm (0.9 in) or less***



(a) Center line of loci (front axle) (b) Center line of loci (rear axle)

## B: ADJUSTMENT

**CAUTION:**
**When the wheel alignment has been adjusted, perform “VDC sensor midpoint setting mode” of the VDC. <Ref. to VDC-19, VDC SENSOR MIDPOINT SETTING MODE, ADJUSTMENT, VDC Control Module and Hydraulic Control Unit (VDCCM&H/U).>**

### 1. FRONT CAMBER

1) Adjust the camber angle to the following value.

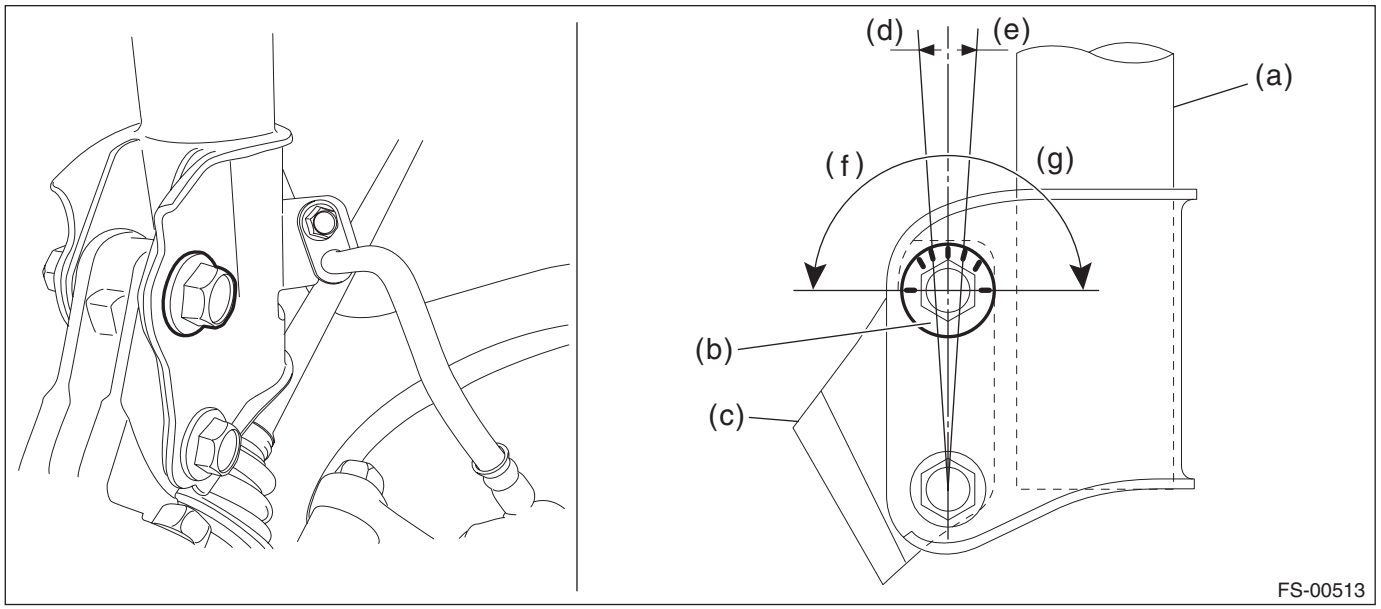
| Tire size | | Camber (Difference between RH and LH 45′ or less) |
|---|---|---|
| Standard vehicle height model | P195/65R15<br>P205/55R16<br>P205/50R17 | –0°20′±0°30′ |
| SPORT model | P205/50R17 | –0°15′±0°30′ |
| XV model | P225/55R17 | 0°10′±0°30′ |

2) Loosen the two flange nuts located at the front lower section of the strut.

NOTE:
When the adjusting bolt needs to be loosened or tightened, hold its head with a wrench and turn the flange nut.

3) Turn the camber adjusting bolt so that the camber is set at specification.

NOTE:
Moving the adjusting bolt by one scale changes the camber by approximately 0°15′.



(a) Strut ASSY
(b) Adjusting bolt
(c) Housing ASSY - front axle
(d) Outer direction
(e) Inner direction
(f) Camber is increased.
(g) Camber is decreased.

| To increase camber. | |
|---|---|
| Rotate the left side counterclockwise. | Rotate the right side clockwise. |
|  FS-00352 |  FS-00353 |

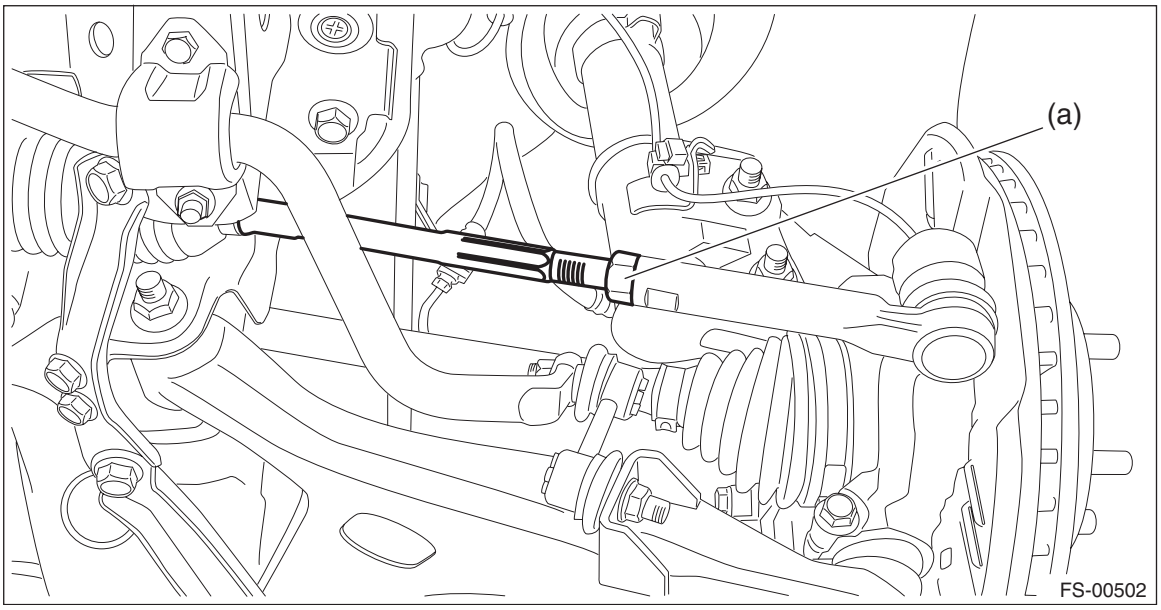
| To decrease camber. | |
|---|---|
| Rotate the left side clockwise. | Rotate the right side counterclockwise. |
|  FS-00353 |  FS-00352 |

4) Tighten two new flange nuts.

***Tightening torque:***
***155 N·m (15.81 kgf-m, 114.3 ft-lb)***

## 2. STEERING ANGLE

1) Adjust the steering angle of both inner and outer wheels.
(1) Loosen the steering tie-rod lock nut (a), and rotate the tie-rod.



(2) Turn the tie-rod to adjust the steering angle of both inner and outer wheels.
(3) Tighten the steering tie-rod lock nut (a).

***Tightening torque:***
***85 N·m (8.67 kgf-m, 62.7 ft-lb)***

NOTE:
Check and correct the tie-rod boot if twisted.
2) Check the toe-in. <Ref. to FS-10, STEERING ANGLE, INSPECTION, Wheel Alignment.>

## 3. FRONT WHEEL TOE-IN

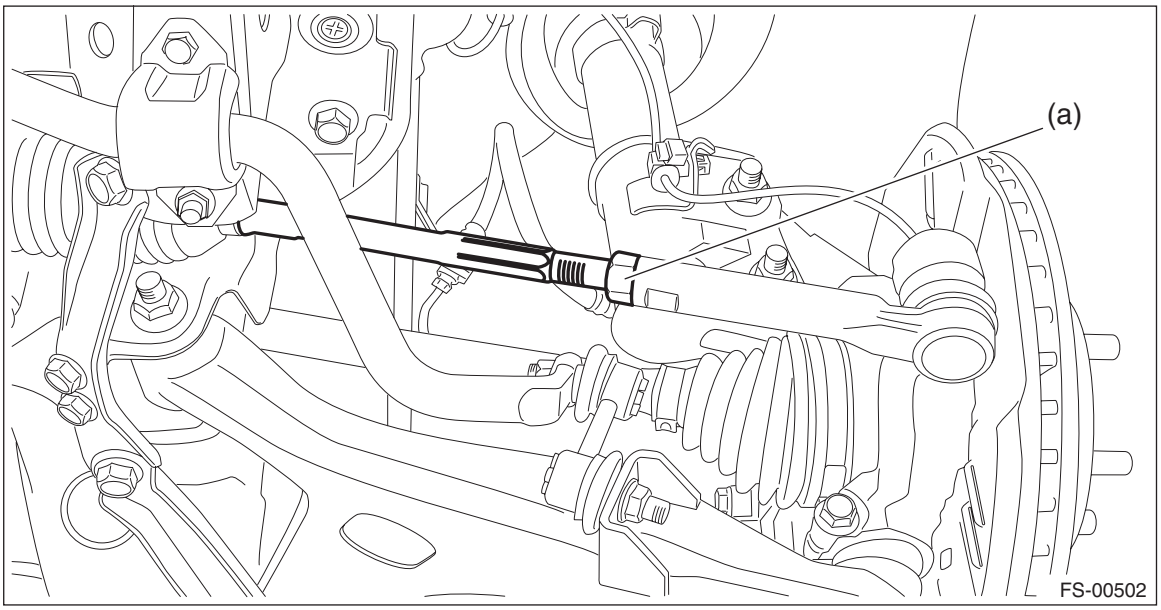
When adjusting the toe-in, adjust it to the following value. <Ref. to FS-14, STEERING ANGLE, ADJUSTMENT, Wheel Alignment.>

***Toe-in: Adjustment value***
***0±2 mm (0±0.08 in)***

1) Check that the left and right wheel steering angles are within specification.
2) Loosen the left and right side steering tie-rod lock nuts (a).
3) Turn the left and right tie-rods by equal amounts until the toe-in is at the specification.

NOTE:
Both the left and right tie-rods are right-hand threaded. To increase toe-in, turn both tie-rods clockwise by equal amount (viewing from the inside of vehicle).

4) Tighten the tie-rod lock nut (a).



***Tightening torque:***
***85 N·m (8.67 kgf-m, 62.7 ft-lb)***

5) Check and correct the tie-rod boot if twisted.

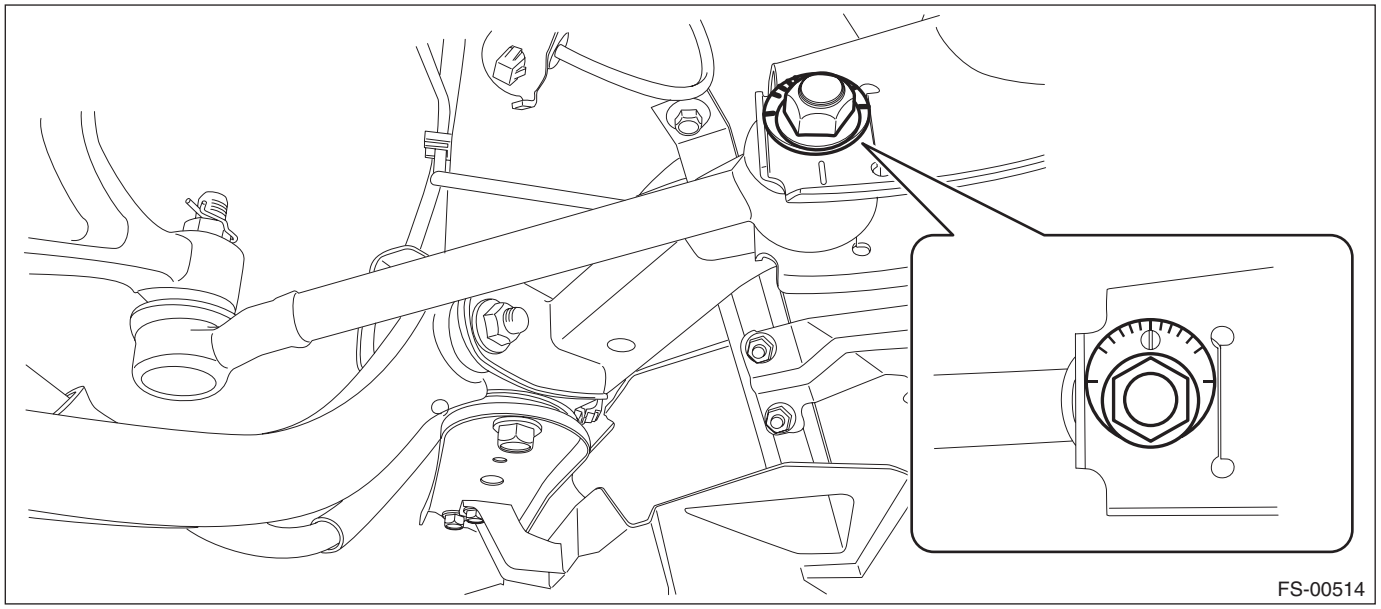
## 4. REAR WHEEL TOE-IN

When adjusting, adjust it to the following value.

***Toe-in: Adjustment value***
***3±2 mm (0.12±0.08 in)***

1) Loosen the self-locking nut for the lateral link assembly - front.

NOTE:
When loosening or tightening the adjusting bolt, hold the bolt head and turn the self-locking nut.



2) Turn the adjusting bolt until toe-in is within the specification.

NOTE:
When the left and right wheels are adjusted for toe-in at the same time, the movement of one scale graduation changes toe-in by approx. 1.3 mm (0.05 in).

| To increase toe-in. | |
|---|---|
| Rotate the left side clockwise. | Rotate the right side counterclockwise. |
|  FS-00018 |  FS-00019 |

| To decrease toe-in. | |
|---|---|
| Rotate the left side counterclockwise. | Rotate the right side clockwise. |
|  FS-00019 |  FS-00018 |

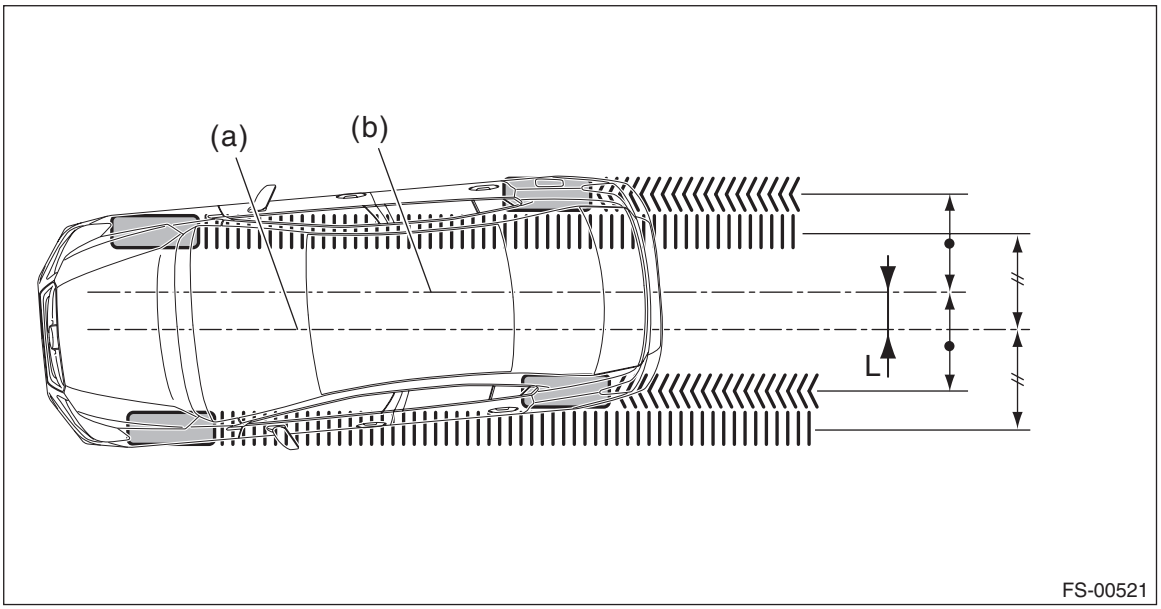
3) Attach and tighten a new self-locking nut.

***Tightening torque:***
***120 N·m (12.24 kgf-m, 88.5 ft-lb)***

## 5. THRUST ANGLE

When adjusting, adjust it to the following value.

***Thrust angle: Adjustment value***
***0°±20′***
***Less than 20′ when "L" is 15 mm (0.6 in) or less***

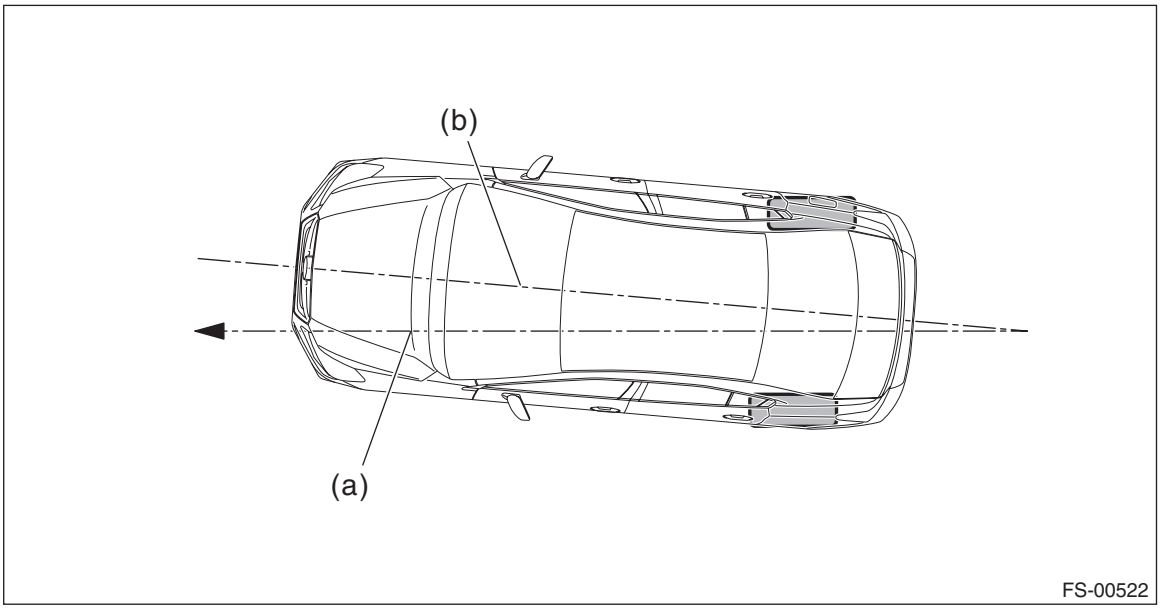


(a) Center line of loci (front axle) (b) Center line of loci (rear axle)

1) Make thrust angle adjustments by turning the toe-in adjusting bolts of the rear suspension equally in the same direction.
2) When one rear wheel is adjusted in a toe-in direction, adjust the other rear wheel equally in toe-out direction, in order to make the thrust angle adjustment.

3) When the left and right adjusting bolts are turned by one graduation, the thrust angle will change approx. 15′. (“L” is approx. 11 mm (0.43 in)).

NOTE:
Thrust angle is a mean value of left and right wheel toe angles in relation to the vehicle body center line. Vehicle is driven straight in the thrust angle direction while slanting in the oblique direction depending on the degree of the mean thrust angle.

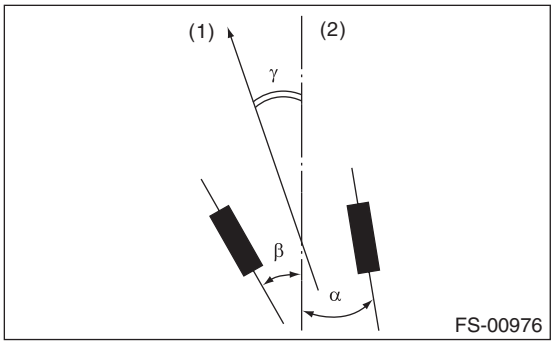


(a) Thrust angle (b) Body center line

***Thrust angle:***

$\gamma = (\alpha - \beta)/2$

$\alpha$: Rear RH wheel toe-in angle
$\beta$: Rear LH wheel toe-in angle
Substitute only the positive toe-in values from each wheel into $\alpha$ and $\beta$ in the calculation.

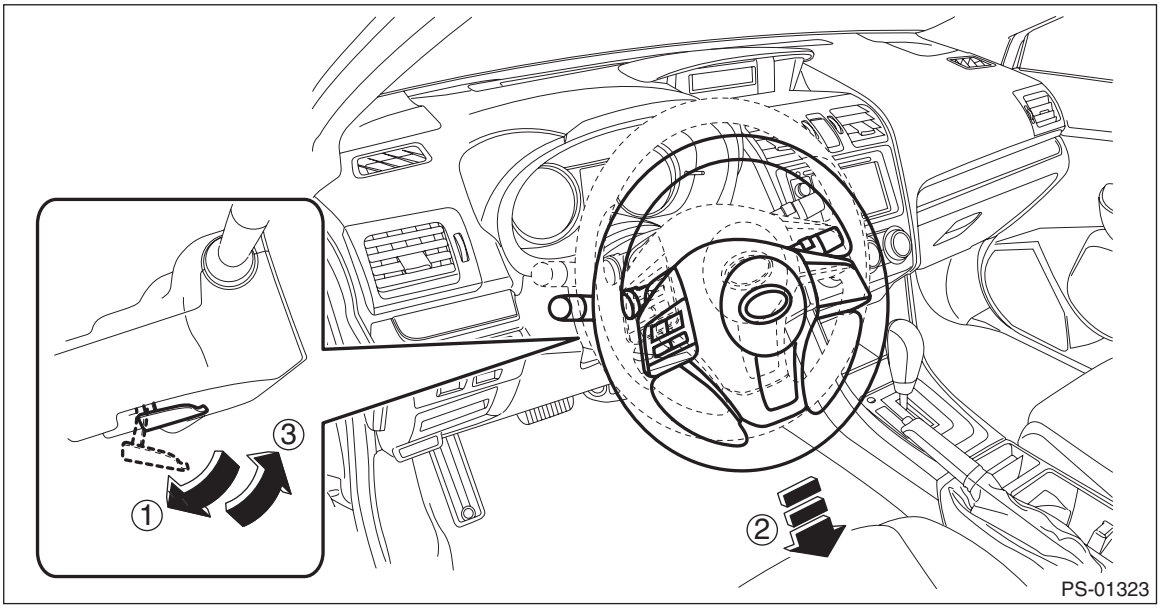


(1) Front
(2) Body center line

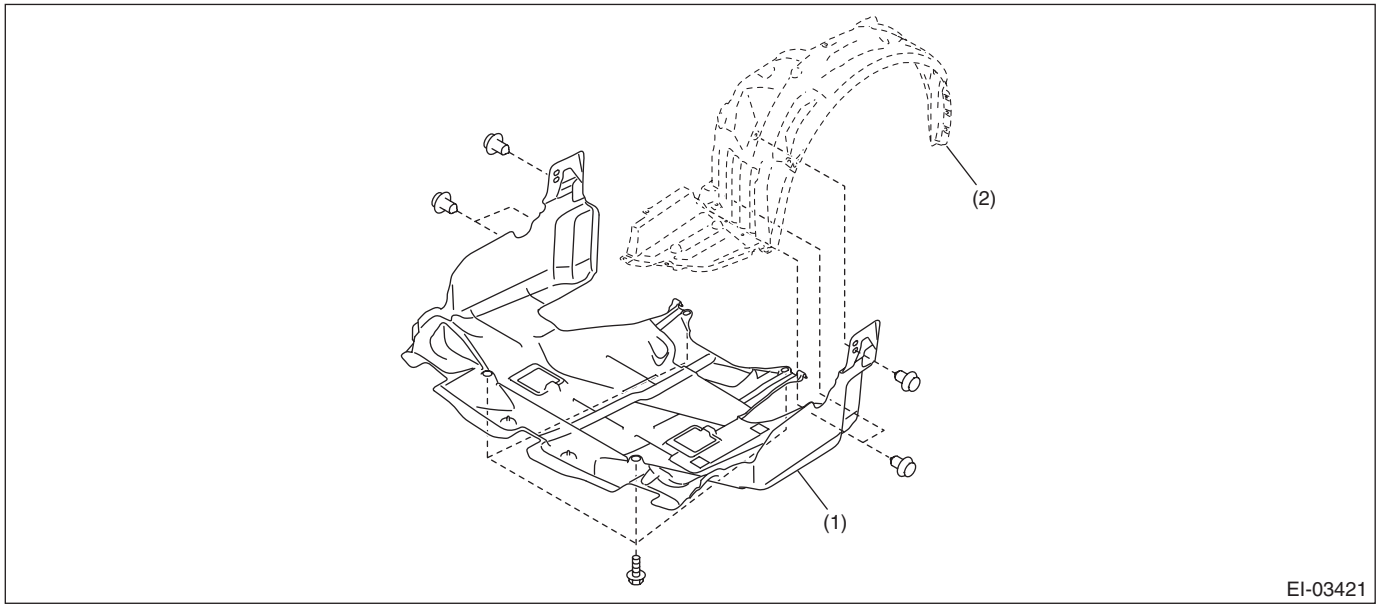
# 3. Front Crossmember

## A: REMOVAL

**CAUTION:**
**• The power steering control module continues to operate after the engine stops and calculate the temperature in the control module. Therefore, before starting service of the power steering system which requires disconnection of the connector, stop the engine and allow approx. 30 minutes until the control module becomes cold.**
**• Before removal or installation, be sure to remove any foreign matter (dust, moisture, oil, etc.) from the power steering control module connector.**
1) Disconnect the ground cable from battery.
2) Adjust the tilt position of the steering column to the lowest position and lock the tilt lever.



3) Lift up the vehicle, and then remove the front wheels.
4) Remove the bolts and clips, and remove the under cover - front.

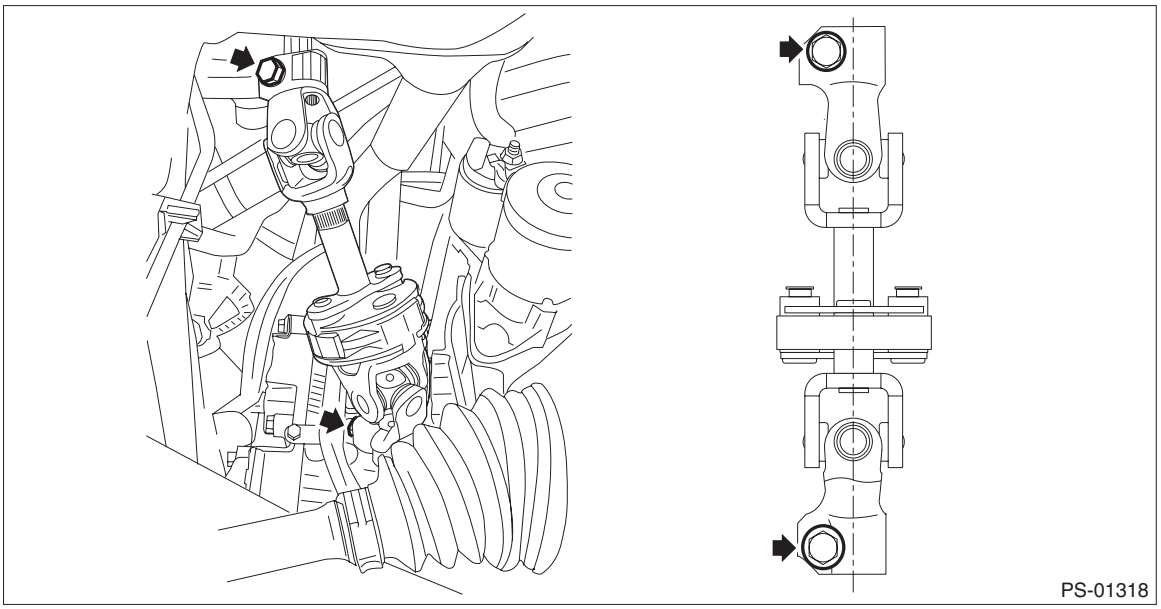


(1) Under cover - front
(2) Mud guard - front

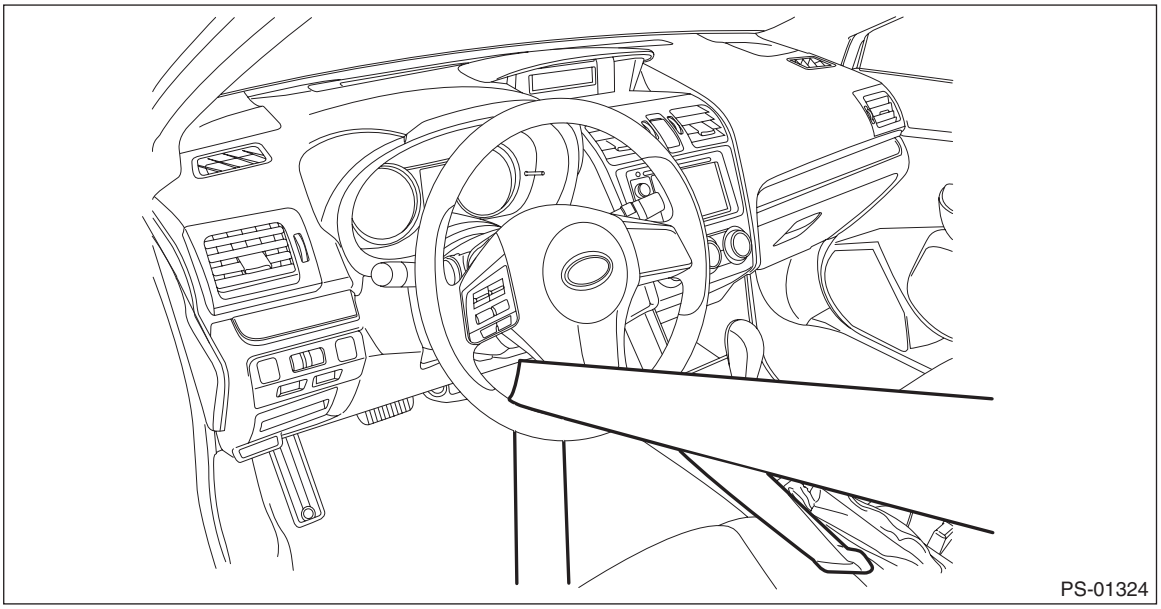
5) Remove the universal joint assembly - steering.
(1) Place alignment marks on the universal joint assembly - steering.

NOTE:
Place alignment marks on the following positions.
- Between the column assembly - steering and the universal joint assembly - steering
- Between the steering gearbox assembly and the universal joint assembly - steering

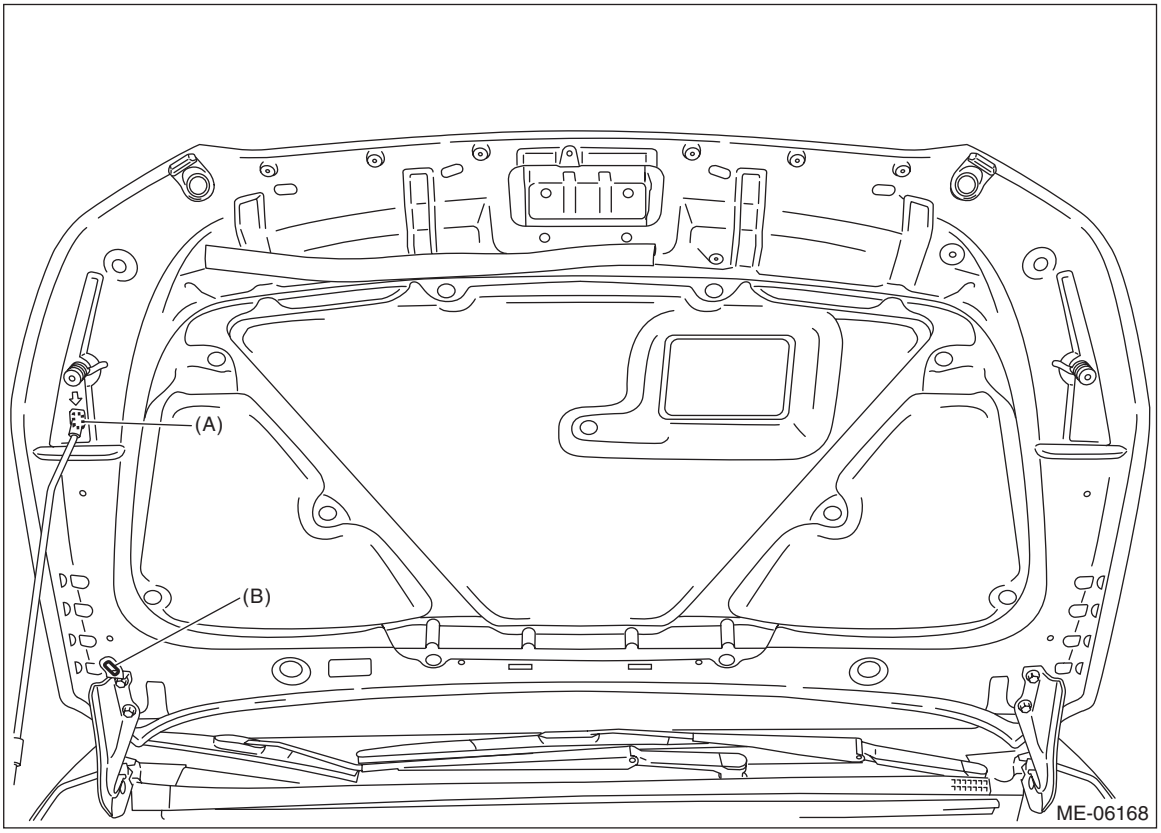
(2) Remove the bolt, and remove the universal joint assembly - steering.



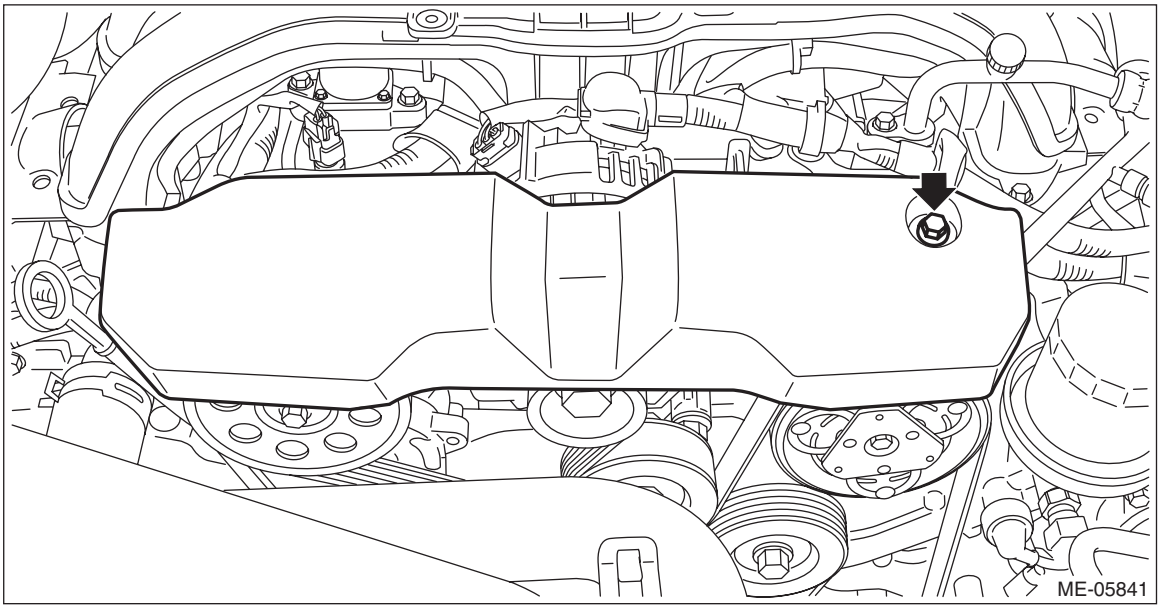
6) Prevent the steering wheel from turning using the seat belt.



7) Change the front hood stay position from (A) to (B), and completely open the front hood.



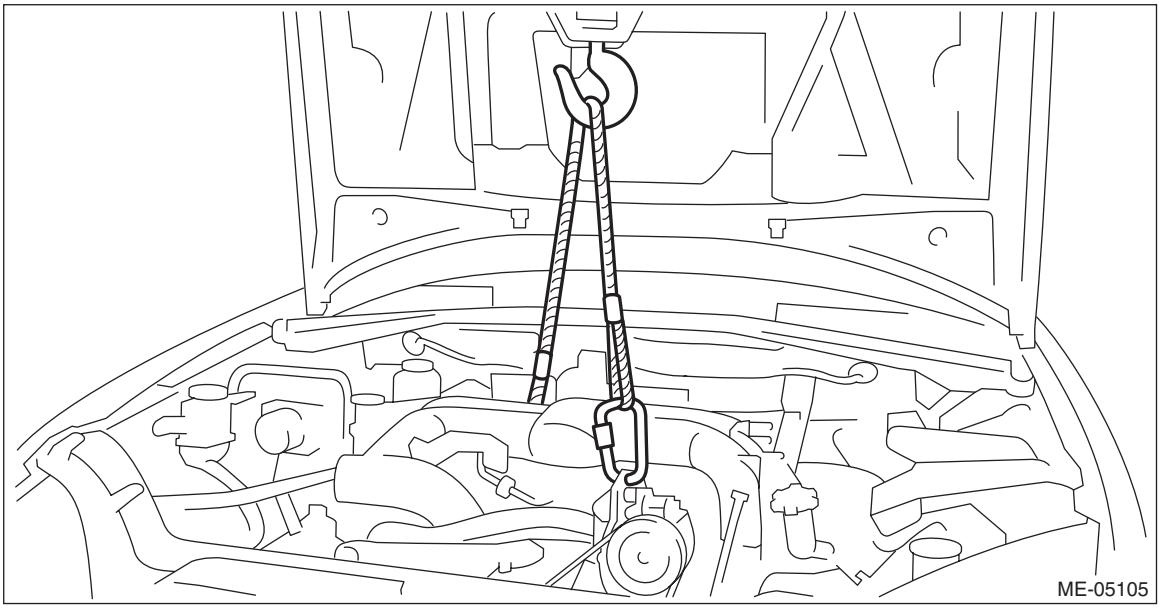
8) Remove the V-belt covers.



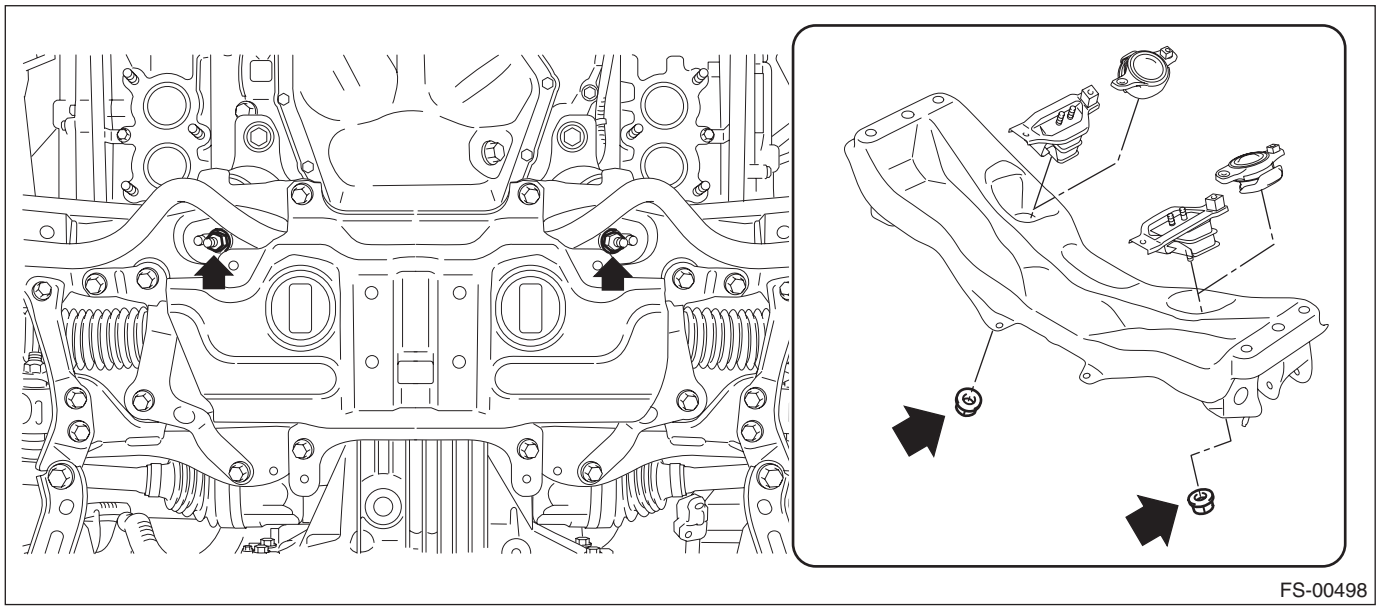
9) Disconnect the connector and harness clamp from power steering control module.

10) Support the engine with a lifting device and wire ropes.
(1) Support the engine with a lifting device and wire ropes.
(2) While lifting up the vehicle, also raise up the lifting device.

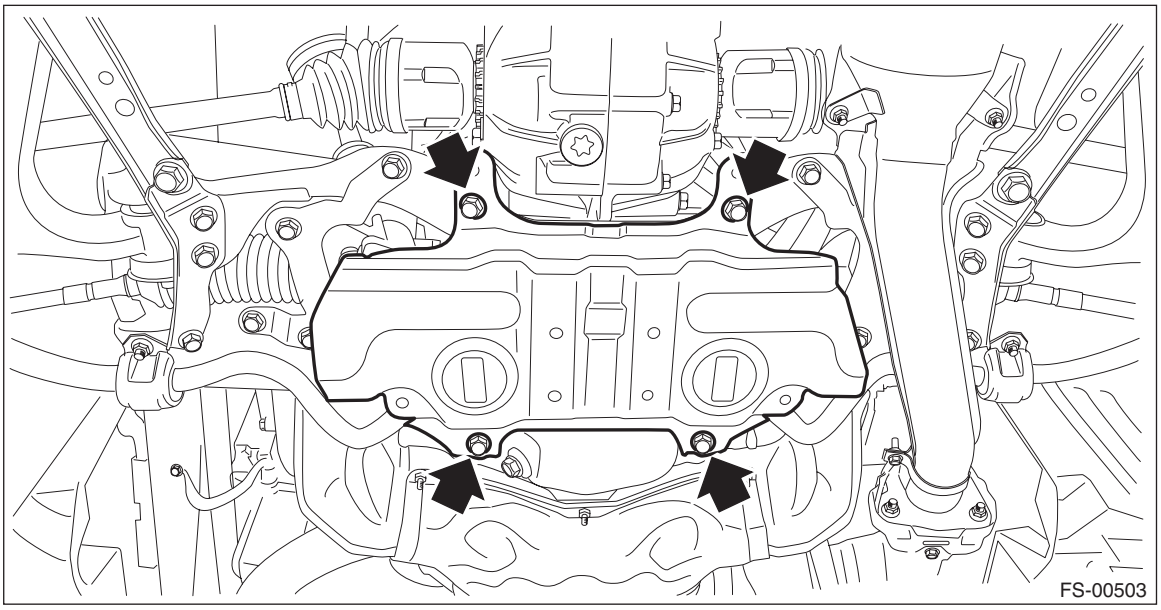
**CAUTION:**
**When lifting up the vehicle, raise up wire ropes at the same time.**



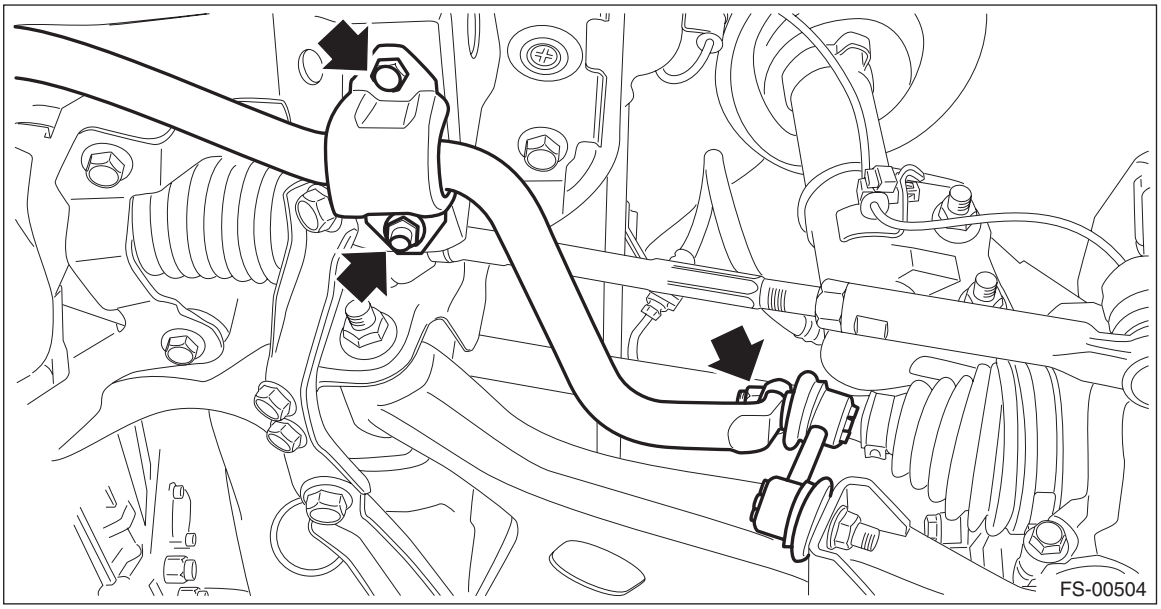
11) Remove the nuts which secure the engine mounting.
(1) Raise up the lifting device, and lift the engine by approx. 10 mm (0.39 in).
(2) Remove the nuts which secure the engine mounting to the front crossmember assembly.



12) Remove the bolt, and remove the front crossmember support.

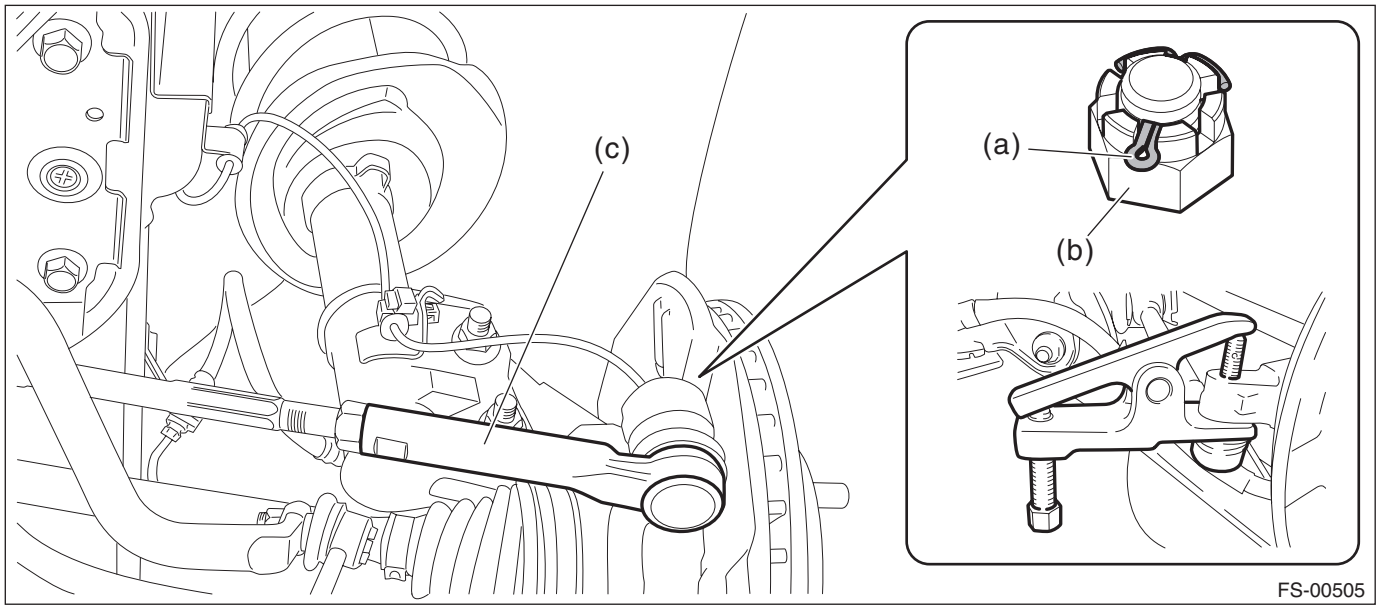


13) Remove the front exhaust pipe. <Ref. to EX(H4DO)-7, REMOVAL, Front Exhaust Pipe.>
14) Remove the front stabilizer.
    (1) Remove the left and right stabilizer links.
    (2) Remove the clamp - stabilizer bushing on the left and right sides.

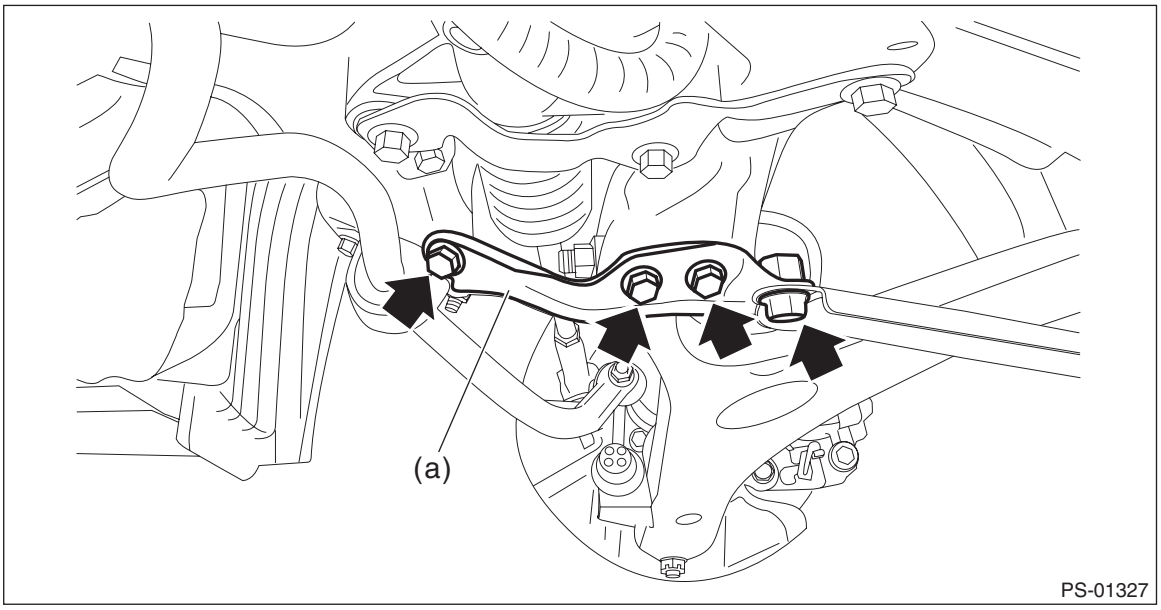


15) Disconnect the tie-rod end.
(1) Pull out the cotter pin (a).
(2) Remove the castle nut (b).
(3) Using a tie-rod ball joint puller, remove the tie-rod end (c).

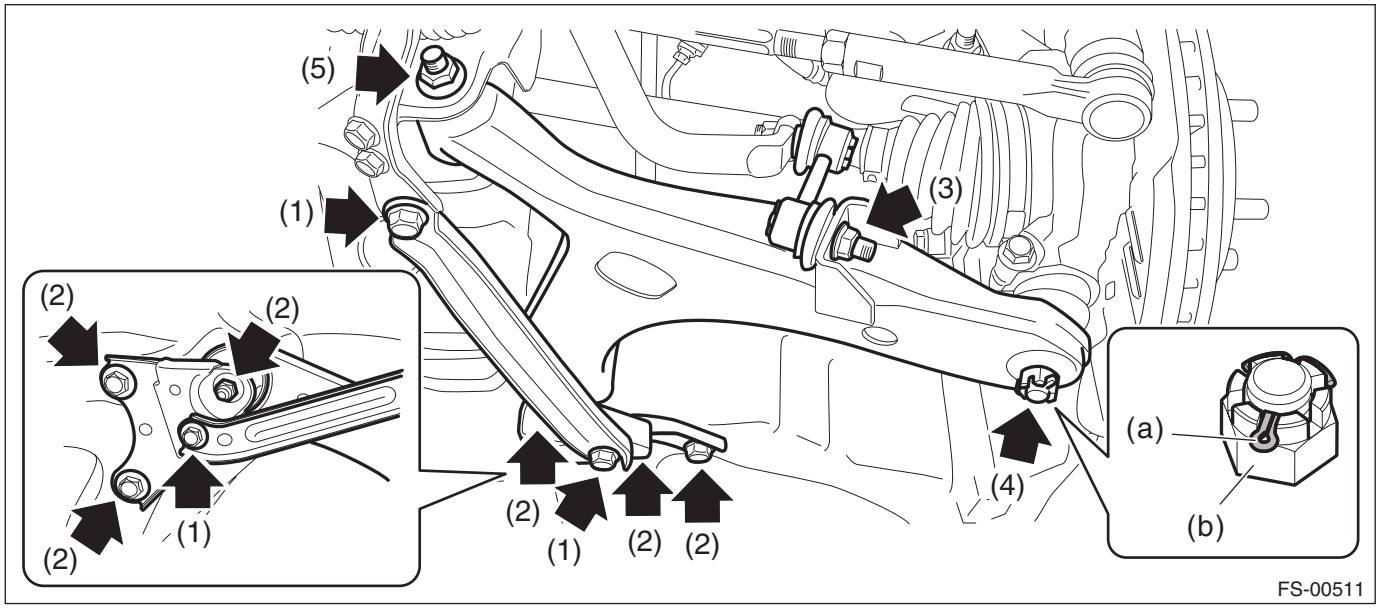
***Preparation tool:***
***Tie-rod ball joint puller***



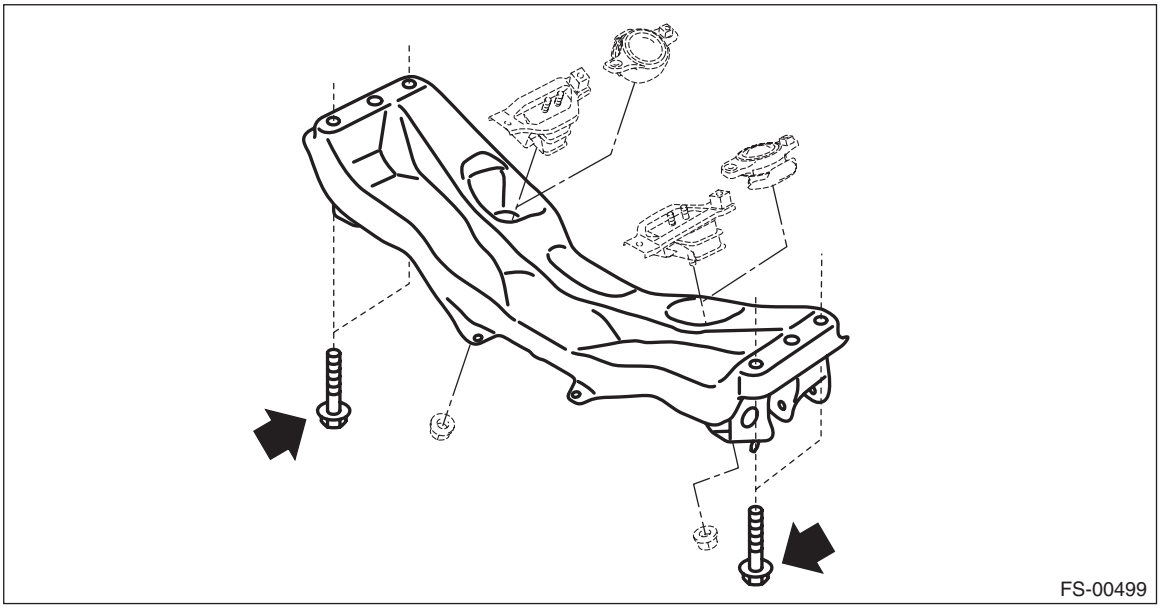
16) Remove the support plate - front crossmember (a).



17) Remove the front arm assembly.
(1) Remove the bolt, and then detach the front support.
(2) Remove the bolts and nuts, and then remove the front arm rear plate.
(3) Remove the nut and disconnect the stabilizer link assembly.
(4) Pull out the cotter pin (a), remove the castle nut (b), and remove the ball joint from front arm assembly.
(5) Remove the nuts, pull out the flange bolt, and remove the front arm assembly.



18) Support the front crossmember assembly using a jack, and remove the bolts which hold the crossmember on the body.



19) Slowly lower the front crossmember assembly with the steering gearbox assembly as a single unit.

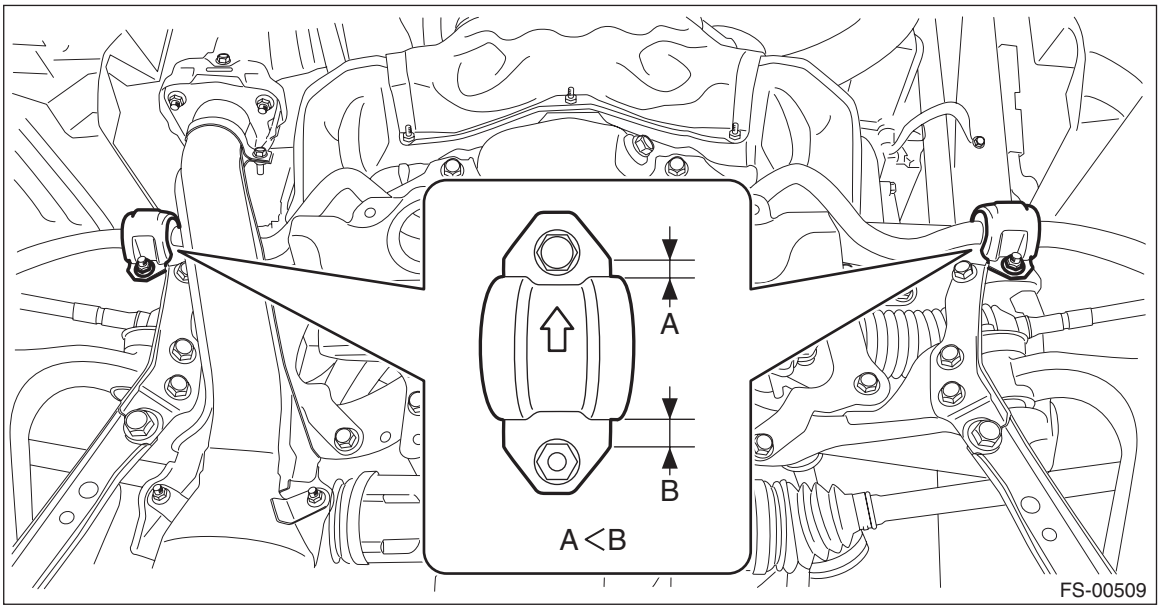
**CAUTION:**
**When removing the crossmember, make sure that the tie-rod end does not interfere with the drive shaft boot.**

20) Remove the steering gearbox assembly from the front crossmember assembly.

## B: INSTALLATION

1) Check the crossmember for damage or cracks, and correct or replace if defective.
2) Install the universal joint assembly - steering. <Ref. to PS-14, INSTALLATION, Universal Joint.>
3) Install each part in the reverse order of removal.

**CAUTION:**
**• Use a new bolt and self-locking nut. For parts which are not reusable, refer to "COMPONENT". <Ref. to FS-3, COMPONENT, General Description.>**
**• Always tighten the bushing in the state where the vehicle is at curb weight and the wheels are in full contact with the ground.**
**• Install the clamp - stabilizer bushing with the arrow mark facing the front of the vehicle.**



***Tightening torque:***
***Engine mount — front crossmember assembly: 45 N·m (4.59 kgf-m, 33.2 ft-lb)***
***Universal joint assembly - steering: 24 N·m (2.45 kgf-m, 17.7 ft-lb)***
***V-belt cover: 7.5 N·m (0.76 kgf-m, 5.5 ft-lb)***
***Under cover - front: 17.5 N·m (1.78 kgf-m, 12.9 ft-lb)***
***Front suspension parts: <Ref. to FS-3, FRONT SUSPENSION, COMPONENT, General Description.>***
When tightening the castle nut, tighten the castle nut to the specified torque first, then tighten it further but within 60° until the hole in the ball stud is aligned with a slot in castle nut.
4) Install the front wheels.

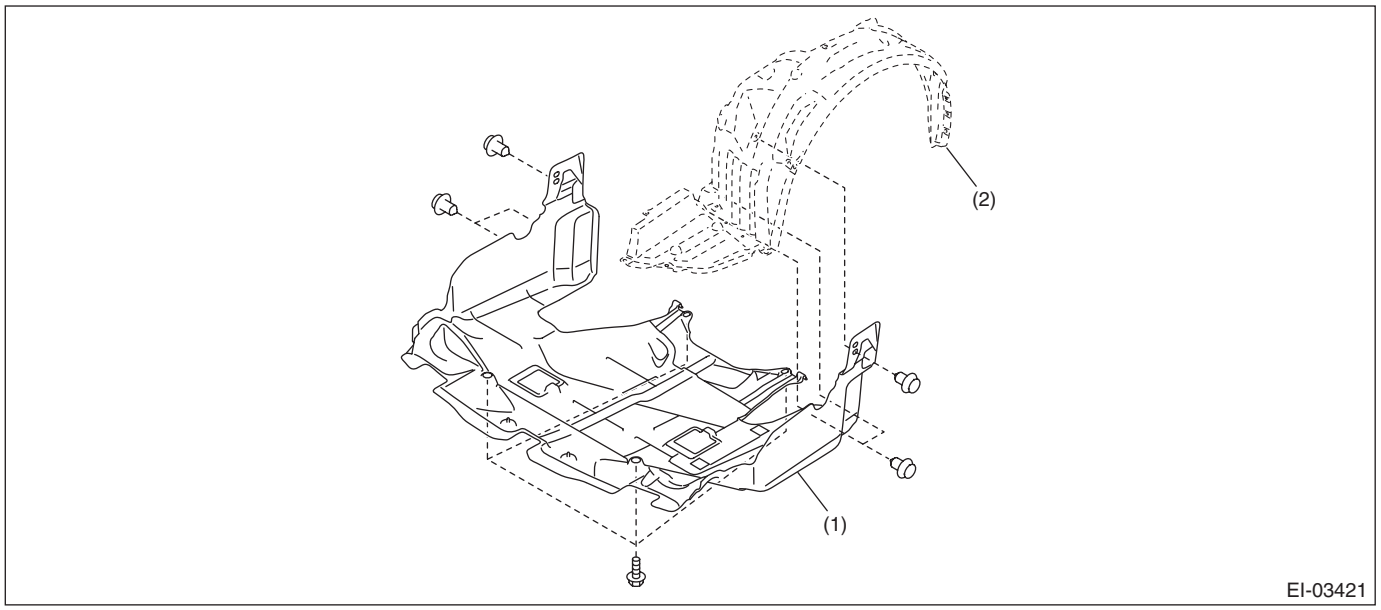
***Tightening torque:***
***120 N·m (12.24 kgf-m, 88.5 ft-lb)***
5) Inspect the wheel alignment and adjust if necessary.
• Inspection: <Ref. to FS-7, INSPECTION, Wheel Alignment.>
• Adjustment: <Ref. to FS-12, ADJUSTMENT, Wheel Alignment.>

**CAUTION:**
**When the wheel alignment has been adjusted, perform "VDC sensor midpoint setting mode" of the VDC.**
6) Perform reinitialization of the auto headlight beam leveler system. (Model with auto headlight beam leveler) <Ref. to LI-17, PROCEDURE, Auto Headlight Beam Leveler System.>

# 4. Front Crossmember Support Plate

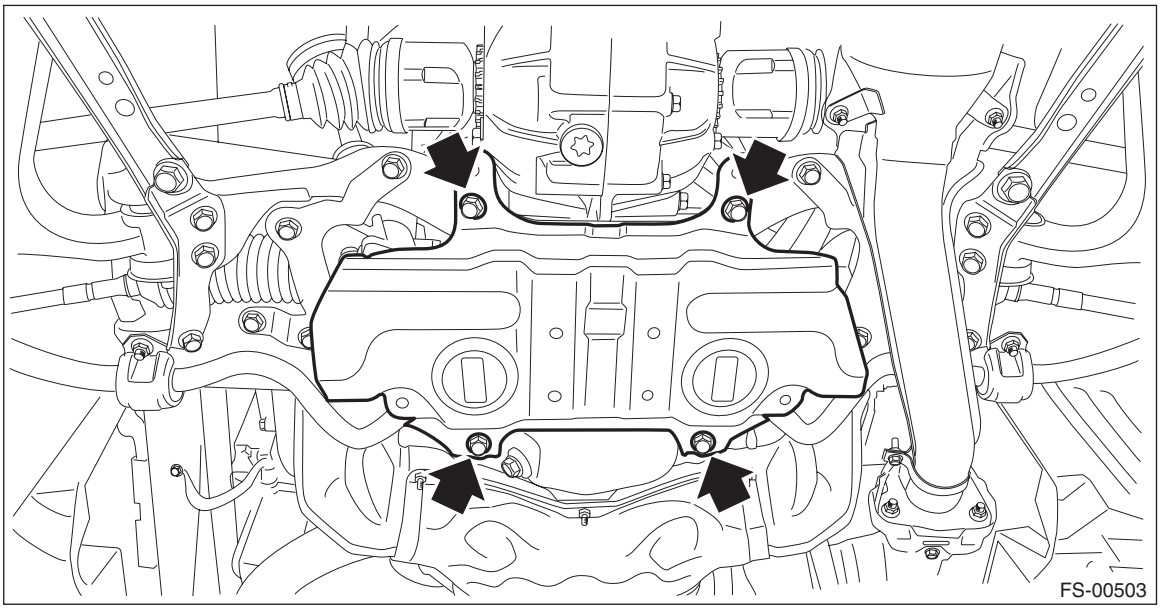
## A: REMOVAL

1) Lift up the vehicle.
2) Remove the bolts and clips, and remove the under cover - front.



(1) Under cover - front (2) Mud guard - front

3) Remove the bolt, and remove the front crossmember support.



## B: INSTALLATION

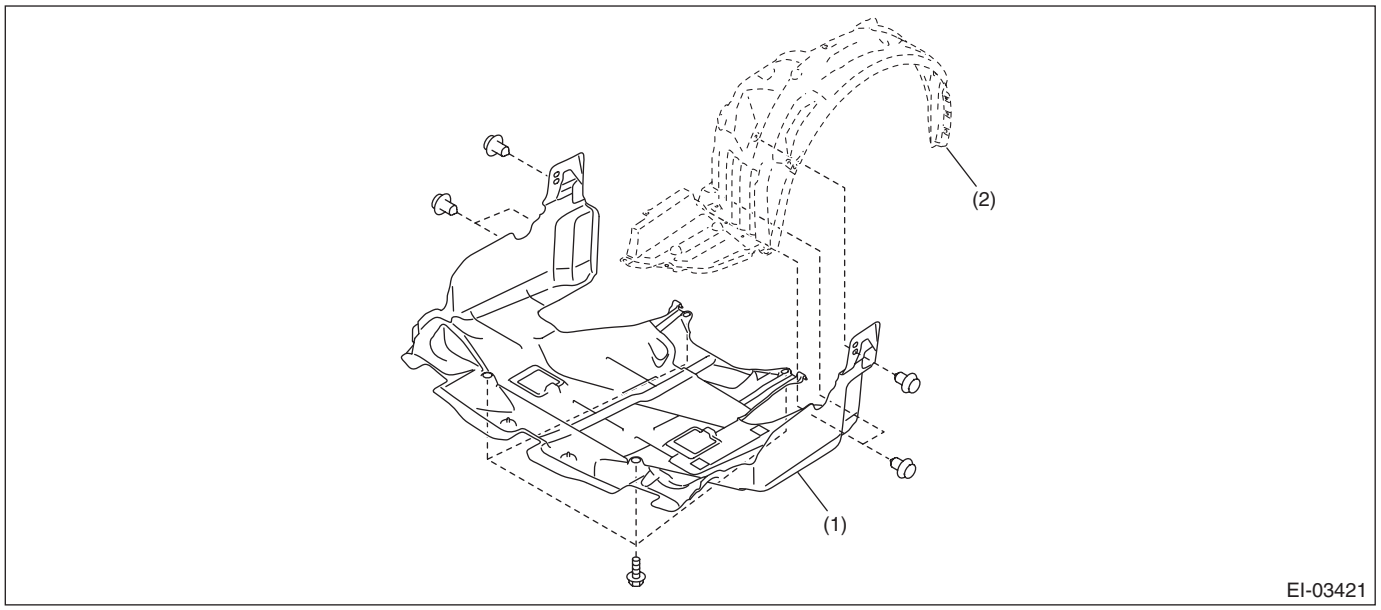
Install each part in the reverse order of removal.

***Tightening torque:***
***Front crossmember support — front crossmember assembly: 60 N·m (6.12 kgf-m, 44.3 ft-lb)***
***Under cover - front: 17.5 N·m (1.78 kgf-m, 12.9 ft-lb)***

# 5. Front Stabilizer

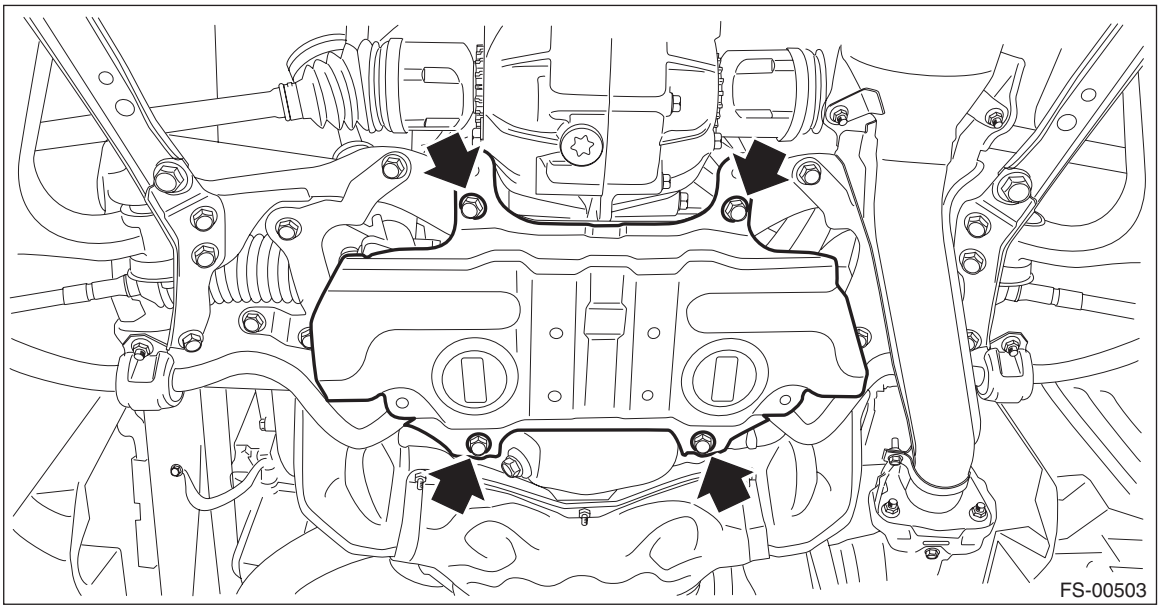
## A: REMOVAL

1) Lift up the vehicle, and then remove the left and right front wheels.
2) Remove the bolts and clips, and remove the under cover - front.

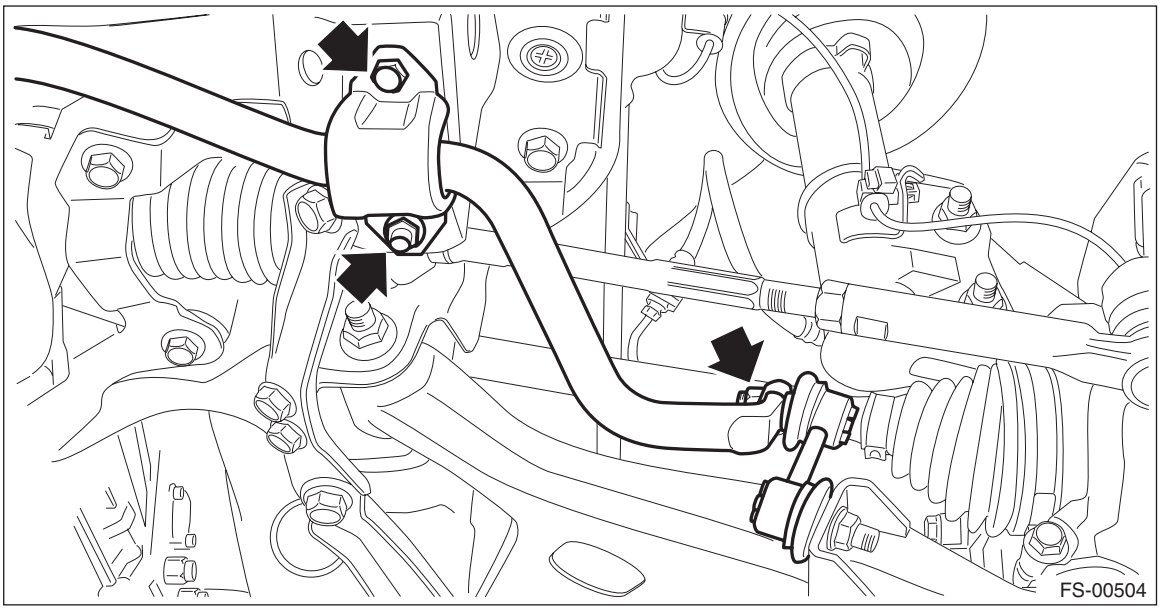


(1) Under cover - front (2) Mud guard - front

3) Remove the bolt, and remove the front crossmember support.



4) Remove the front stabilizer.
   (1) Remove the left and right stabilizer links.
   (2) Remove the clamp - stabilizer bushing on the left and right sides.

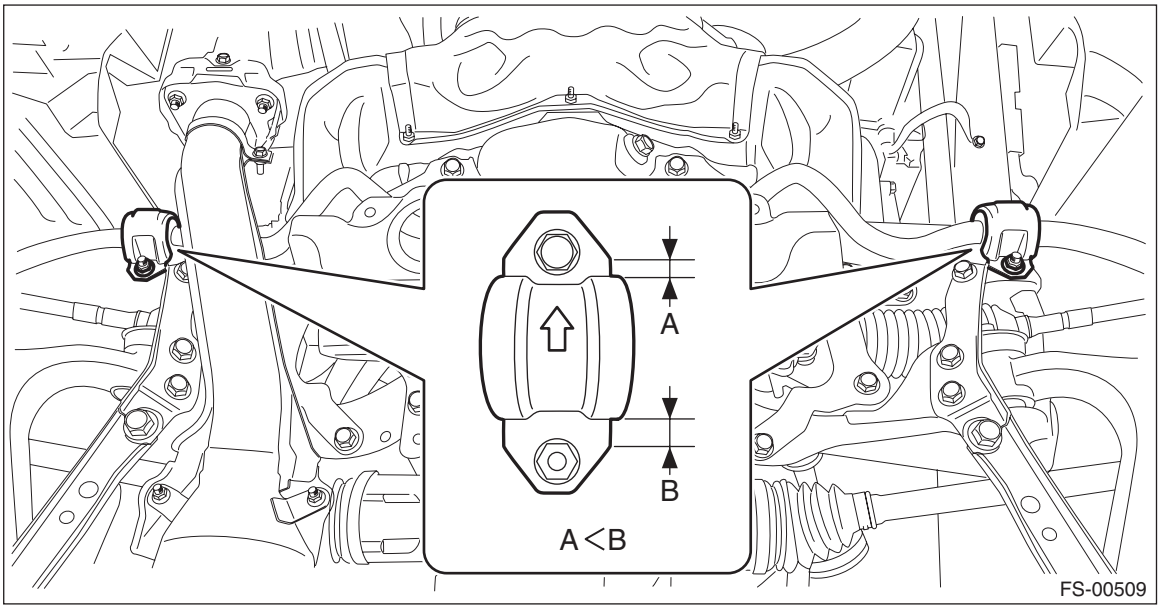


## B: INSTALLATION

1) Before installation, inspect the following items and replace any faulty part with a new one.
- Check the bushing - stabilizer for abnormal cracks, fatigue or damage.
- Check the stabilizer link assembly for damage.

2) Install each part in the reverse order of removal.

**CAUTION:**
**Install the clamp - stabilizer bushing with the arrow mark facing the front of the vehicle.**



***Tightening torque:***
***Clamp - stabilizer bushing: 25 N·m (2.55 kgf-m, 18.4 ft-lb)***
***Stabilizer link assembly: 38 N·m (3.87 kgf-m, 28.0 ft-lb)***
***Support plate - front crossmember: 60 N·m (6.12 kgf-m, 44.3 ft-lb)***
***Under cover - front: 17.5 N·m (1.78 kgf-m, 12.9 ft-lb)***

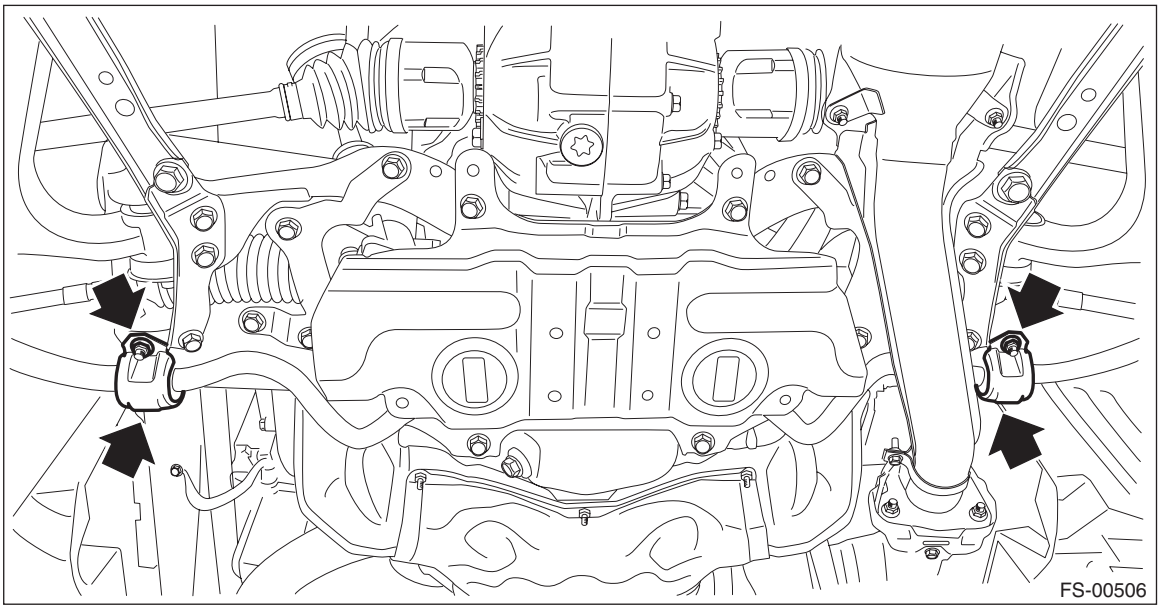
3) Install the front wheels.

***Tightening torque:***
***120 N·m (12.24 kgf-m, 88.5 ft-lb)***

# 6. Front Ball Joint

## A: REMOVAL

1) Lift up the vehicle, and then remove the front wheels.
2) Remove the clamp - stabilizer bushing on the left and right sides.



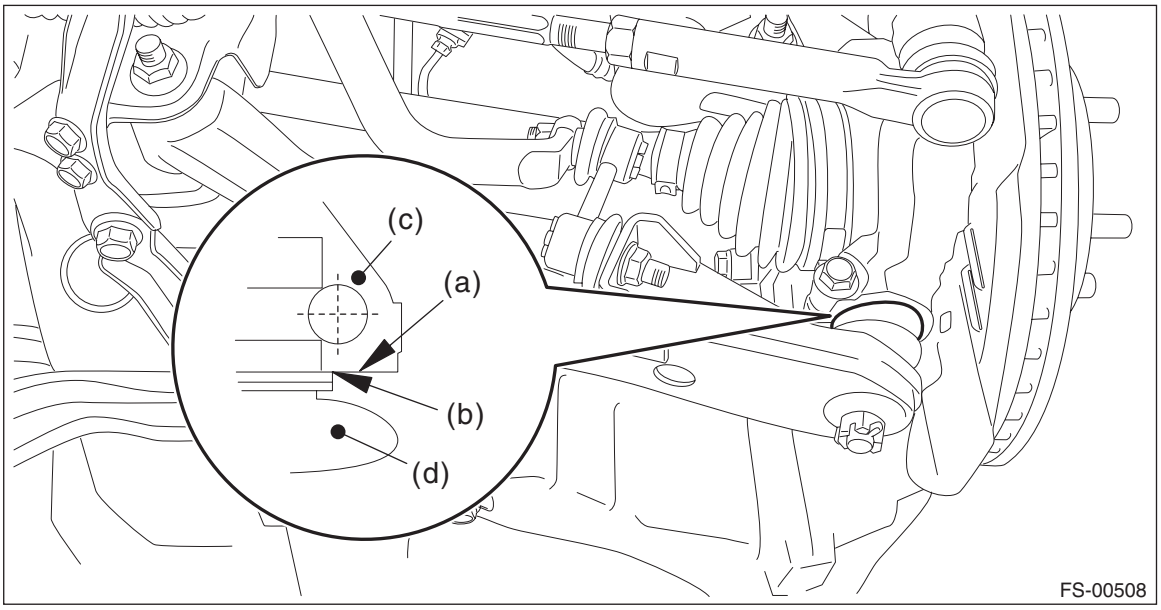
3) Remove the ball joint assembly.
   (1) Pull out the cotter pin (a), and remove the castle nut (b).
   (2) Lower the front arm assembly, and remove the ball stud.
   (3) Remove the bolt from the housing assembly - front axle.

   (4) Extract the ball joint assembly from the housing assembly - front axle.

## B: INSTALLATION

1) Install the ball joint assembly to the housing assembly - front axle.

**CAUTION:**
- **Do not apply grease to the tapered portion of ball stud.**
- **Before tightening, make sure the bottom surface of the housing assembly - front axle and the stepped section of ball joint are in contact.**



(a) Bottom surface of housing ASSY - front axle
(b) Raised section of ball joint
(c) Housing ASSY - front axle
(d) Ball joint ASSY

***Tightening torque:***
***50 N·m (5.10 kgf-m, 36.9 ft-lb)***

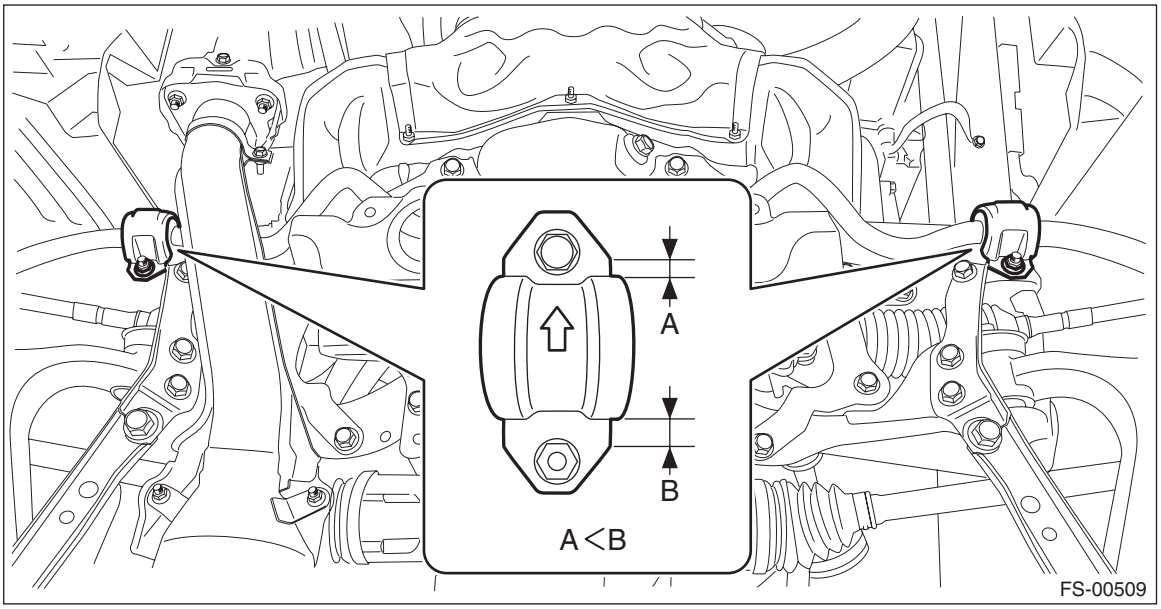
2) Install the ball joint assembly to the front arm assembly.
(1) Connect the ball joint assembly to the front arm assembly.

***Tightening torque:***
***39 N·m (3.98 kgf-m, 28.8 ft-lb)***

(2) Retighten the castle nut further up to 60° until the hole in the ball stud is aligned with a slot in castle nut.
(3) Insert a new cotter pin and bend it around the castle nut.

3) Install the clamp - stabilizer bushing.

**CAUTION:**
**Install the clamp - stabilizer bushing with the arrow mark facing the front of the vehicle.**



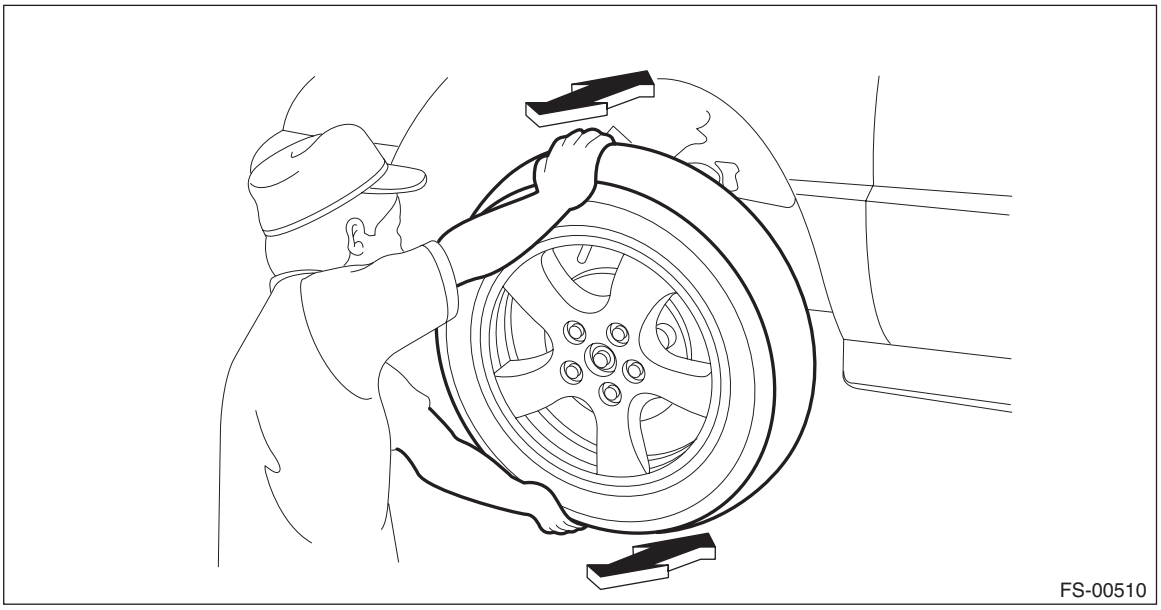
***Tightening torque:***
***25 N·m (2.55 kgf-m, 18.4 ft-lb)***

4) Install the front wheels.

***Tightening torque:***
***120 N·m (12.24 kgf-m, 88.5 ft-lb)***

## C: INSPECTION

1) Check that there is no play by moving the upper and lower portions of front tire in an axial direction with the brake pedal depressed.



- **Play exists.** → Replace the ball joint assembly. <Ref. to FS-32, REMOVAL, Front Ball Joint.>

2) Check that there is no play by moving the upper and lower portions of front tire in an axial direction with the brake pedal released.

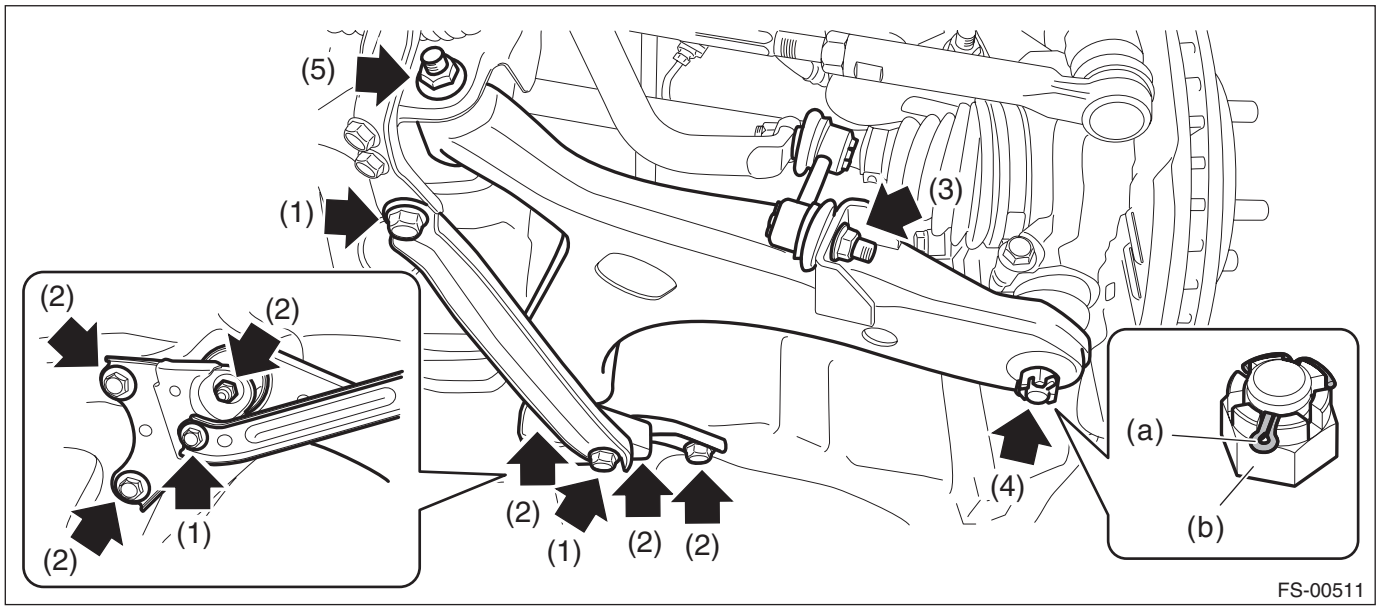
- **Play exists.** → Check the hub unit COMPL - front axle. <Ref. to DS-34, INSPECTION, Front Hub Unit Bearing.>

3) Replace the ball joint assembly if the dust cover is damaged when visually inspecting the dust cover.

# 7. Front Arm

## A: REMOVAL

1) Lift up the vehicle, and then remove the front wheels.
2) Remove the front arm assembly.
   (1) Remove the bolt, and then detach the front support.
   (2) Remove the bolts and nuts, and then remove the front arm rear plate.
   (3) Remove the nut and disconnect the stabilizer link assembly.
   (4) Pull out the cotter pin (a), remove the castle nut (b), and remove the ball joint assembly from front arm assembly.
   (5) Remove the nuts, pull out the flange bolt, and remove the front arm assembly.

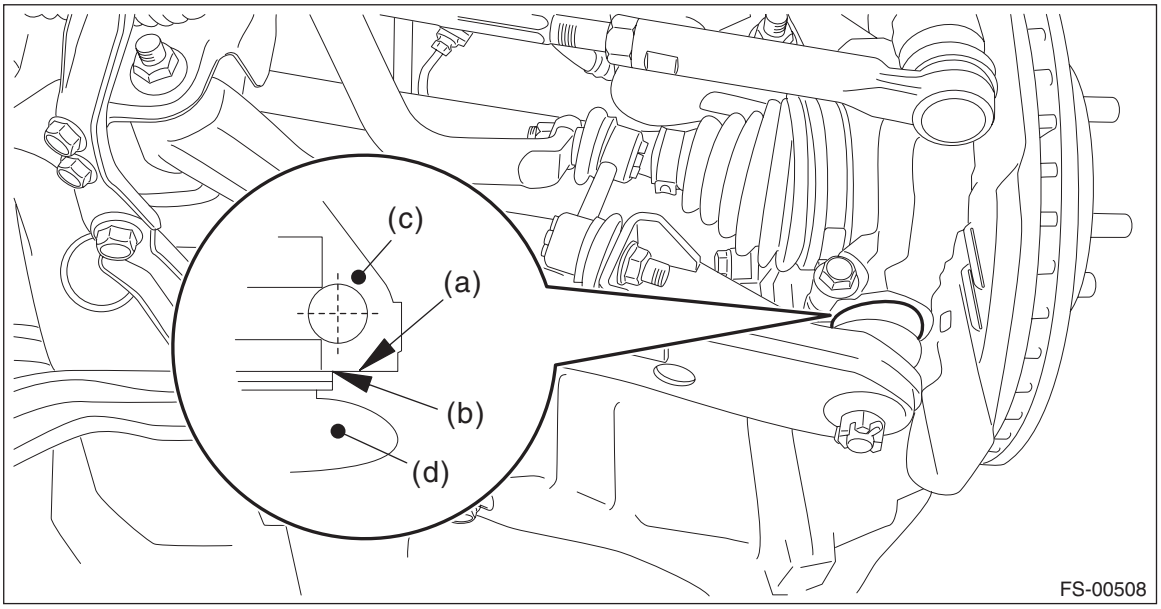


## B: INSTALLATION

1) Before installation, inspect the following items and replace any faulty part with a new one.
- Check the front arm assembly for damage or cracks, and replace if defective.
- Visually check the bushing for abnormal cracks, fatigue or damage.
- Visually check the dust cover on the ball joint assembly for damage.

2) Using new self-locking nuts and flange bolts, temporarily tighten the front arm assembly to the front crossmember assembly.
3) Install the ball joint assembly to the housing assembly - front axle.

**CAUTION:**
**Before tightening, make sure the bottom surface of the housing assembly - front axle and the stepped section of ball joint are in contact.**



(a) Bottom surface of housing ASSY - front axle
(c) Housing ASSY - front axle
(d) Ball joint ASSY
(b) Raised section of ball joint

***Tightening torque:***
***50 N·m (5.10 kgf-m, 36.9 ft-lb)***

4) Install the stabilizer link assembly.

***Tightening torque:***
***Except for XV model: 38 N·m (3.87 kgf-m, 28.0 ft-lb)***
***XV model: 60 N·m (6.12 kgf-m, 44.3 ft-lb)***

5) Install the front wheels.

***Tightening torque:***
***120 N·m (12.24 kgf-m, 88.5 ft-lb)***

6) Unload the vehicle from the lift, and tighten the bolt which secures the front arm assembly to the front crossmember assembly while the wheels are in full contact with the ground and the vehicle is at curb weight.

***Tightening torque:***
***Busing front - front arm: 95 N·m (9.7 kgf-m, 70.1 ft-lb)***
***Busing rear - front arm: 110 N·m (11.22 kgf-m, 81.1 ft-lb)***

7) Inspect the wheel alignment and adjust if necessary.
- Inspection: <Ref. to FS-7, INSPECTION, Wheel Alignment.>
- Adjustment: <Ref. to FS-12, ADJUSTMENT, Wheel Alignment.>

**CAUTION:**
**When the wheel alignment has been adjusted, perform "VDC sensor midpoint setting mode" of the VDC.**

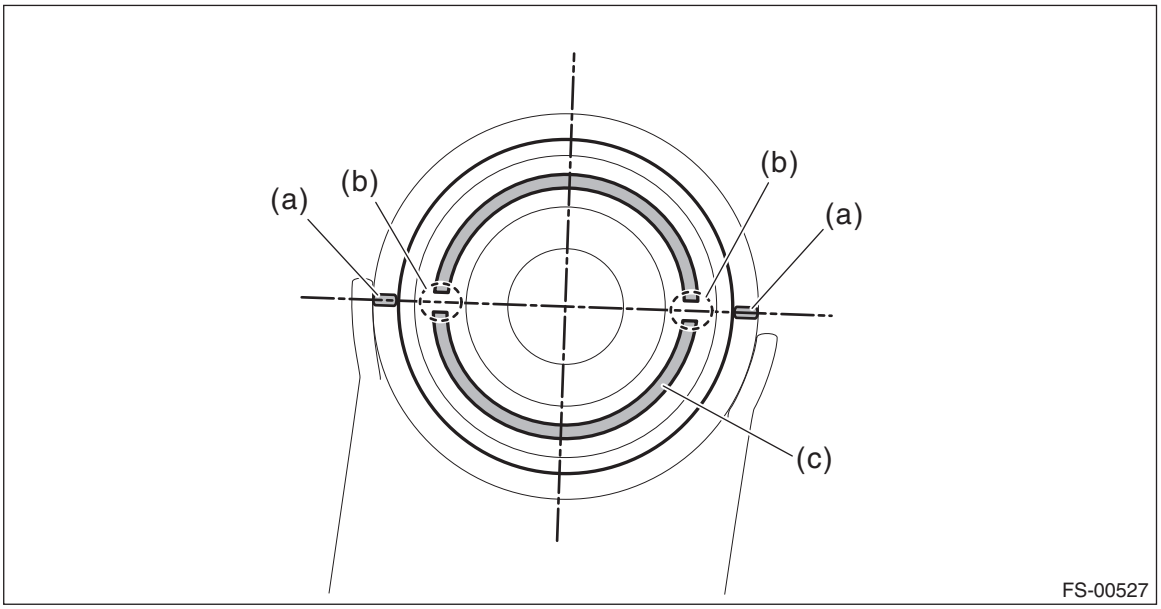
8) Perform reinitialization of the auto headlight beam leveler system. (Model with auto headlight beam leveler) <Ref. to LI-17, PROCEDURE, Auto Headlight Beam Leveler System.>

## C: DISASSEMBLY

### 1. BUSHING FRONT - FRONT ARM

1) Put an alignment mark on the front arm assembly based on the split portion of the bushing intermediate plate of the busing front - front arm.

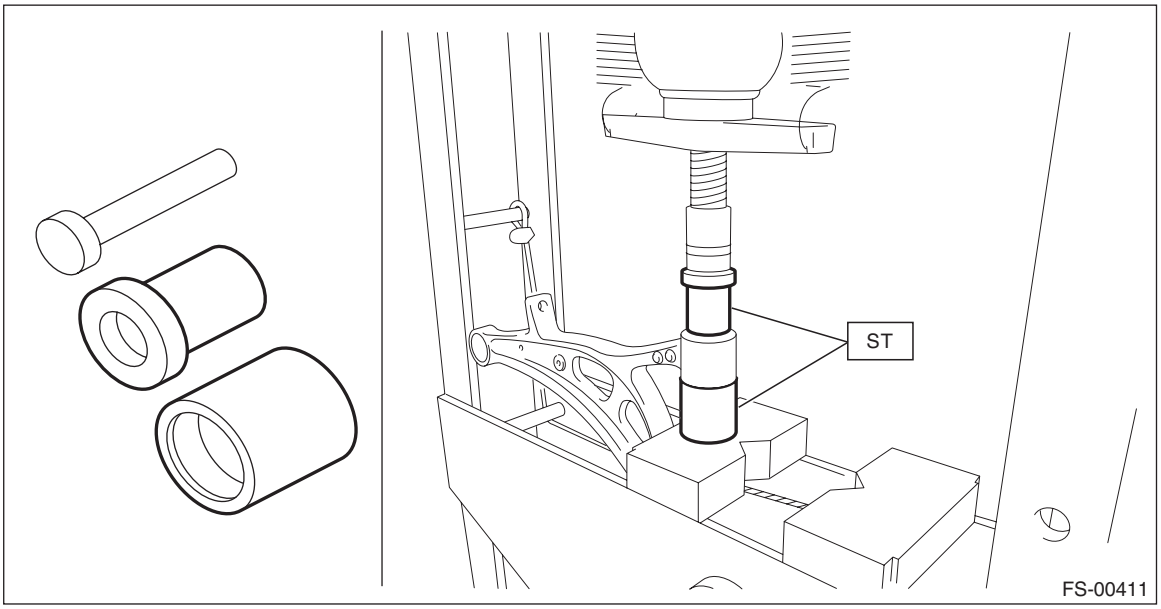
**CAUTION:**
**Always put an alignment mark for aligning the position on bushing installation.**



(a) Put an alignment mark.
(b) Split portion of bushing intermediate plate
(c) Bushing intermediate plate

2) Using the ST and a press, remove the busing front - front arm.

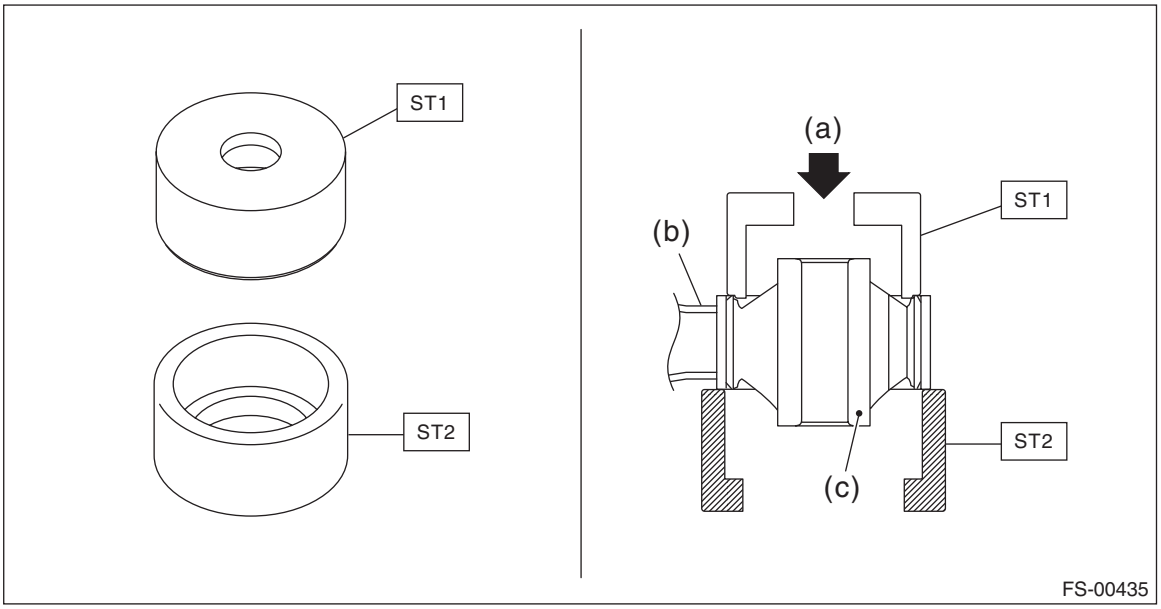
***PREPARATION TOOL:***
***ST: INSTALLER & REMOVER SET (927680000)***



## 2. BUSHING REAR - FRONT ARM

1) Put an alignment mark on the front arm assembly based on the center of recess portion of the busing rear - front arm.
2) Using the ST and a press, remove the busing rear - front arm.

***PREPARATION TOOL:***
***ST1: REMOVER (20299AG000)***
***ST2: BASE (20299AG010)***



(a) Press (b) Front arm ASSY (c) Bushing rear - front arm

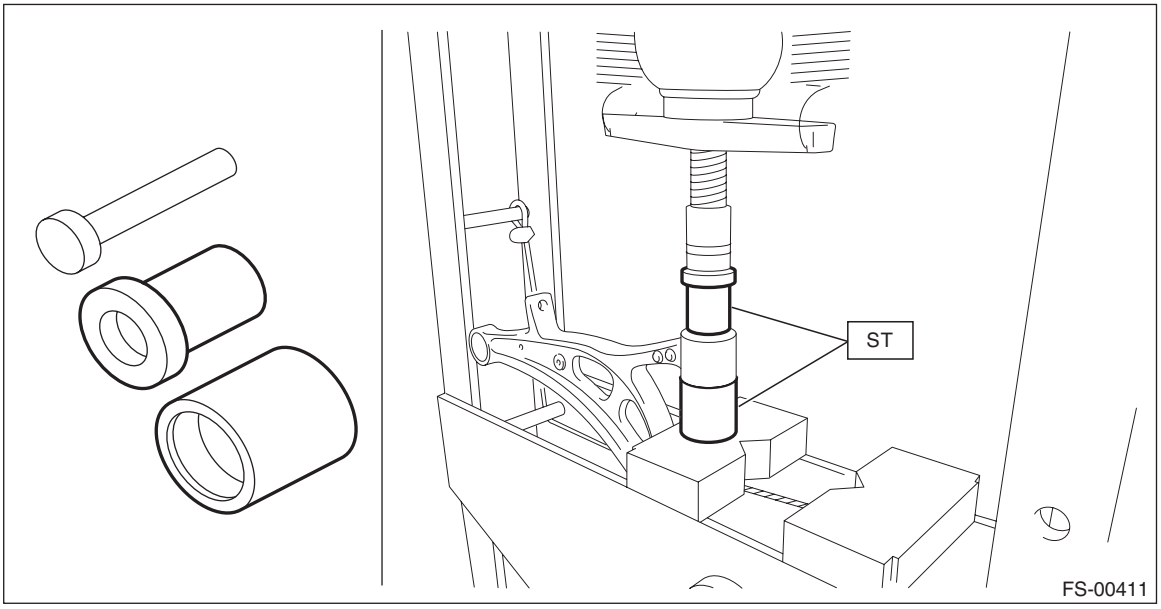
# D: ASSEMBLY

## 1. BUSHING FRONT - FRONT ARM

1) Before assembly, inspect the following items and replace any faulty part with a new one.
- Check the front arm assembly for damage or cracks, and replace if defective.
- Visually check the bushing for abnormal cracks, fatigue or damage.
- Visually check the dust cover on the ball joint assembly for damage.

2) Align the alignment mark on the front arm assembly to the split portion of the bushing intermediate plate of the busing front - front arm.
3) Using the ST and a press, assemble the busing front - front arm.

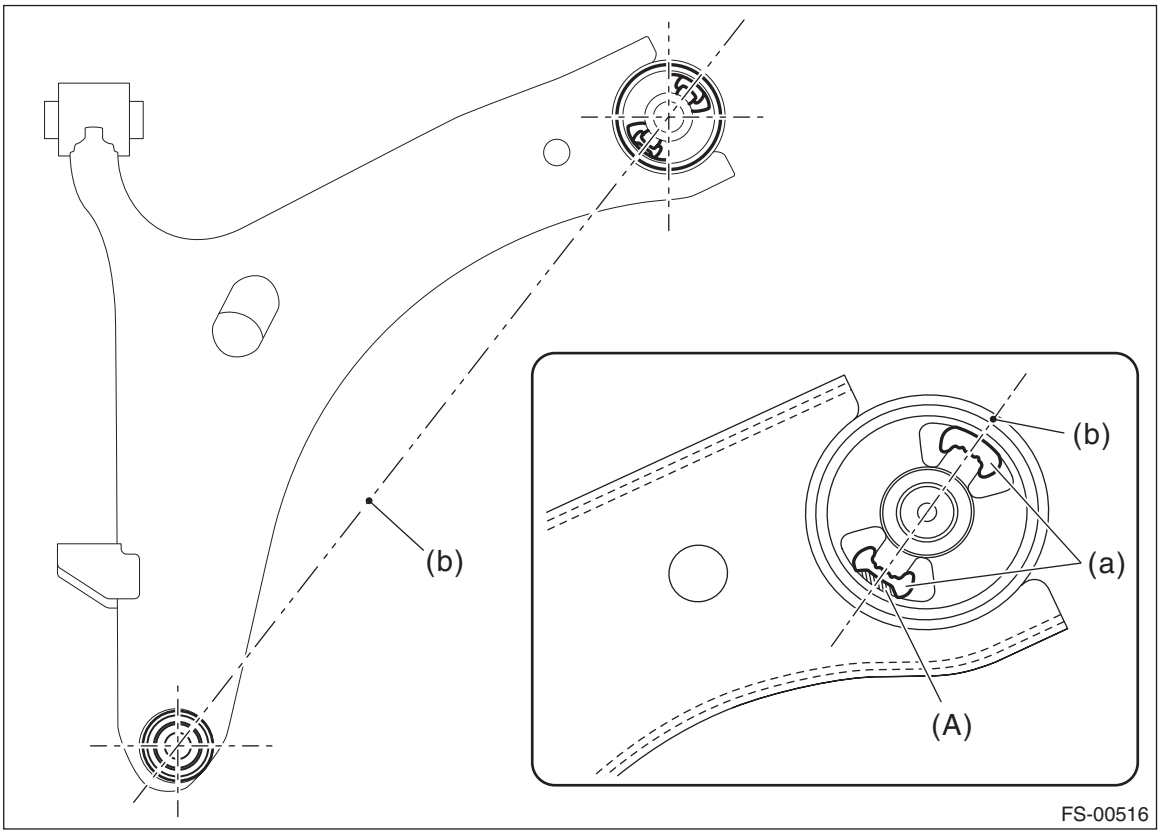
***PREPARATION TOOL:***
***ST: INSTALLER & REMOVER SET (927680000)***



## 2. BUSHING REAR - FRONT ARM

1) Before installation, inspect the following items and replace any faulty part with a new one.
- Check the front arm assembly for damage or cracks, and replace if defective.
- Visually check the bushing for abnormal cracks, fatigue or damage.
- Visually check the dust cover on the ball joint assembly for damage.

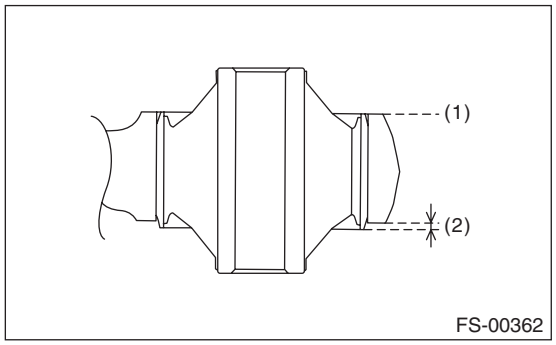
2) Align a line extending from the center of recess portion with the ball joint after placing the protrusion (A) of recess portion to the ball joint side of the front arm assembly.



(a) Recess section
(b) Center line of recess section

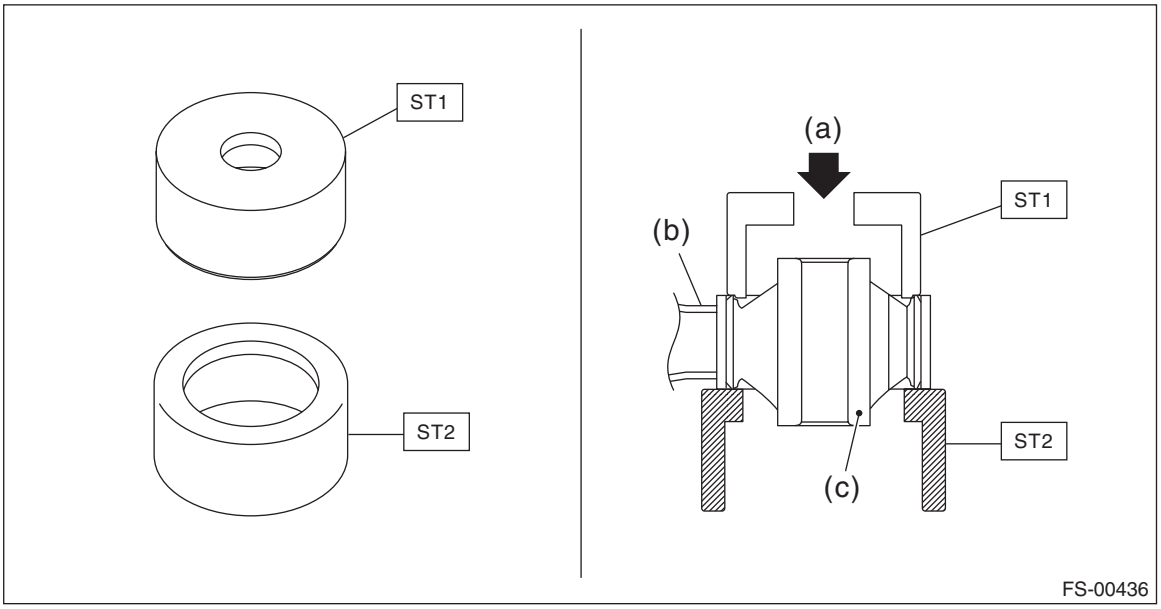
3) Using the ST and a press, install the busing rear - front arm.

**CAUTION:**
**Align the upper face of front arm assembly and the end of bushing during installation.**



(1) Aligned
(2) Not aligned

***PREPARATION TOOL:***
***ST1: REMOVER (20299AG000)***
***ST2: BASE (20299AG010)***



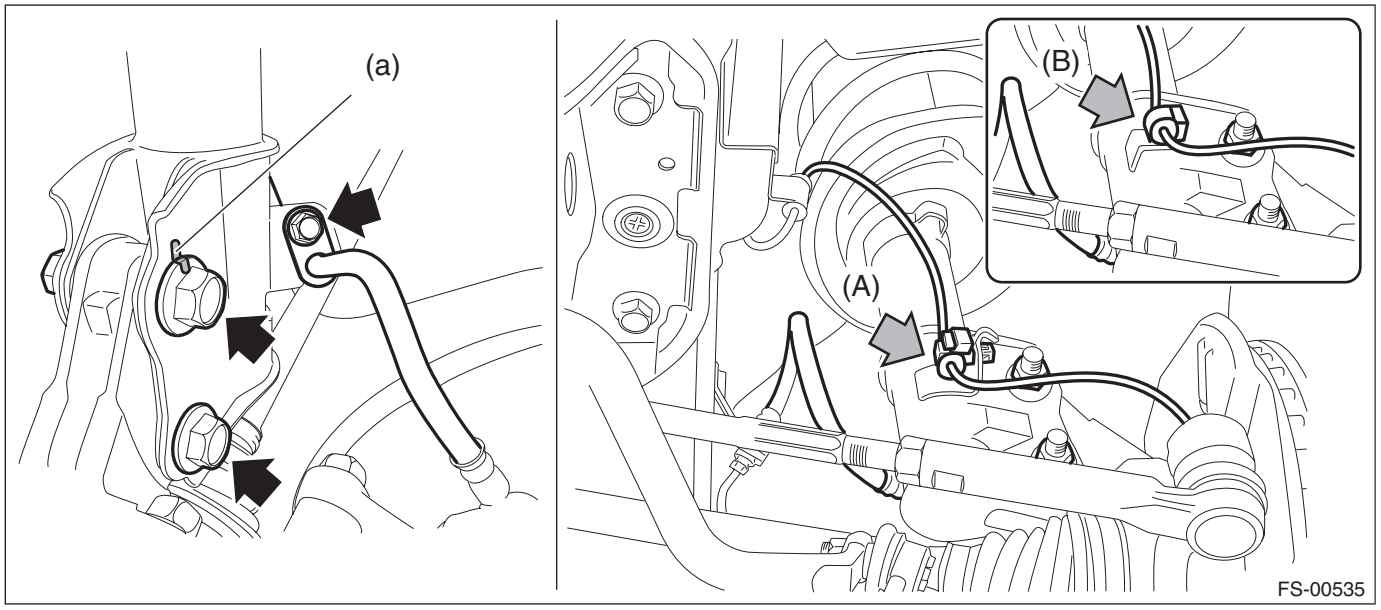
(a) Press (b) Front arm ASSY (c) Bushing rear - front arm

# 8. Front Strut

## A: REMOVAL

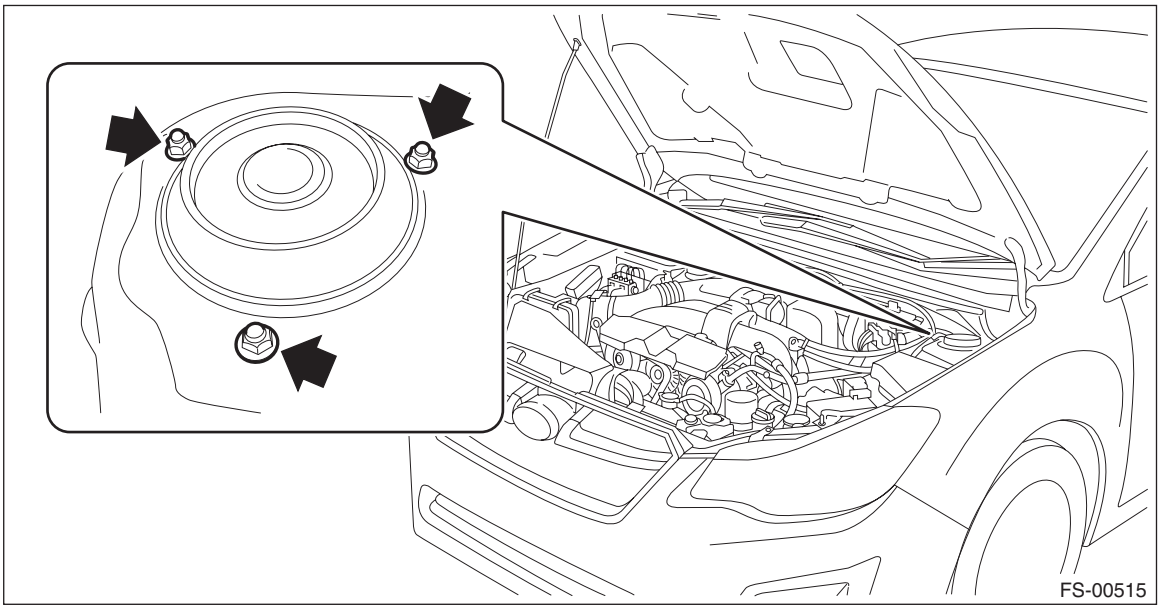
1) Lift up the vehicle, and then remove the front wheels.
2) Remove the front strut assembly.
   (1) Place an alignment mark (a) on the adjusting bolt and the strut.
   (2) Remove the brake hose bracket.
   (3) Remove the clamp of ABS wheel speed sensor harness.
   (4) Remove the adjusting bolts and flange bolts for the strut assembly.

**CAUTION:**
**While holding the head of the adjusting bolt, loosen the flange nut.**



(A) Except for XV model (B) XV model

(5) Remove the three nuts securing strut mount to body.



## B: INSTALLATION

1) Install the strut mount - front at the upper side of the strut to the body, and tighten it with new self-locking nuts.

***Tightening torque:***
***20 N·m (2.04 kgf-m, 14.8 ft-lb)***

2) Align alignment marks on the camber adjusting bolt and strut.
Using new self-locking nuts, install the strut to the housing assembly - front axle.

NOTE:
While holding the head of adjusting bolt, tighten the nut.

***Tightening torque:***
***155 N·m (15.81 kgf-m, 114.3 ft-lb)***

3) Secure the ABS wheel speed sensor harness bracket to the strut.

**CAUTION:**
**During the installation, make sure that the marking of ABS wheel speed sensor harness does not twist.**

4) Install the brake hose bracket.

***Tightening torque:***
***33 N·m (3.36 kgf-m, 24.3 ft-lb)***

5) Install the front wheels.

***Tightening torque:***
***120 N·m (12.24 kgf-m, 88.5 ft-lb)***

6) Inspect the wheel alignment and adjust if necessary.
- Inspection: <Ref. to FS-7, INSPECTION, Wheel Alignment.>
- Adjustment: <Ref. to FS-12, ADJUSTMENT, Wheel Alignment.>

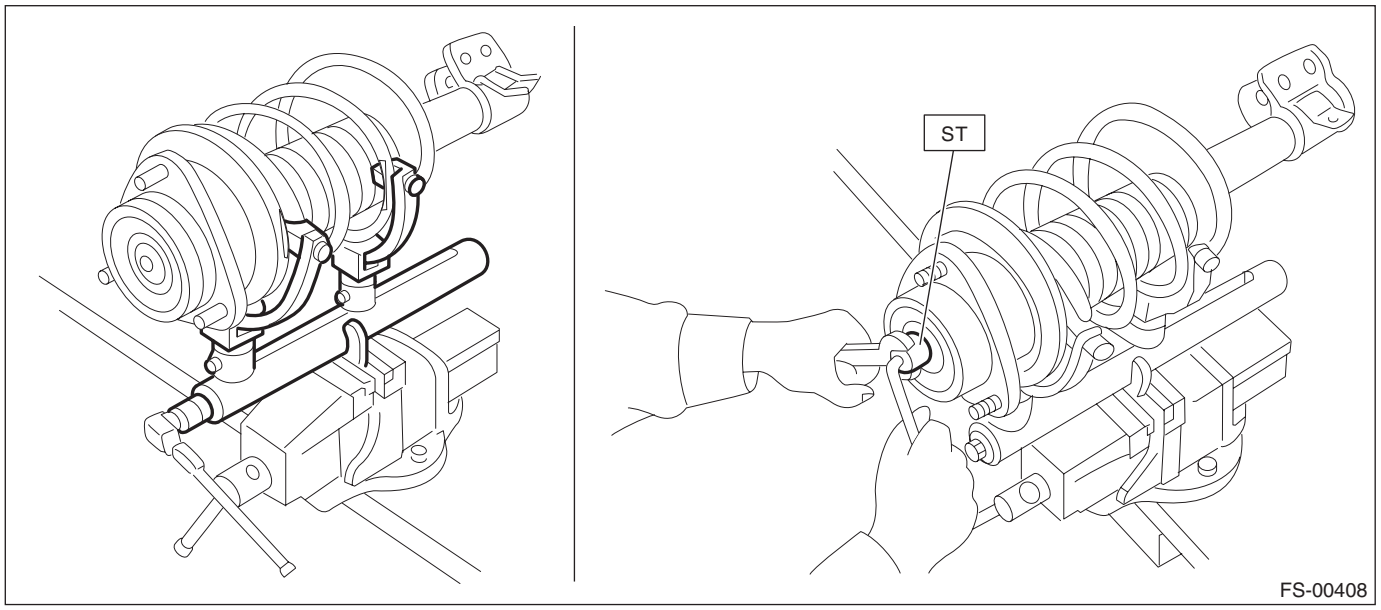
**CAUTION:**
**When the wheel alignment has been adjusted, perform "VDC sensor midpoint setting mode" of the VDC.**

7) Perform reinitialization of the auto headlight beam leveler system. (Model with auto headlight beam leveler) <Ref. to LI-17, PROCEDURE, Auto Headlight Beam Leveler System.>

## C: DISASSEMBLY

1) Using a coil spring compressor, compress the coil spring - front.
2) Using the ST, remove the self-locking nut.

***PREPARATION TOOL:***
***ST: STRUT MOUNT SOCKET (20399AG000)***

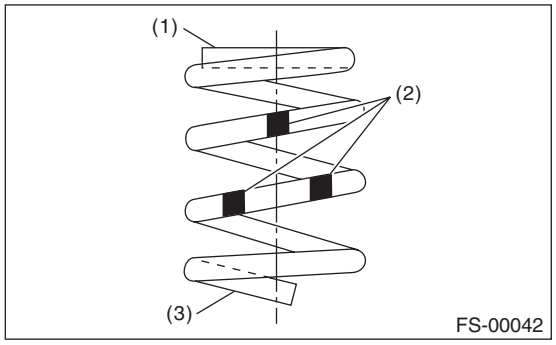


3) Remove the strut mount - front, spacer - front strut and spring seat - front strut UPR from the strut.
4) Gradually decrease the compression pressure of compressor, and remove the coil spring - front.
5) Remove the dust cover - inner and the helper - front strut.

## D: ASSEMBLY

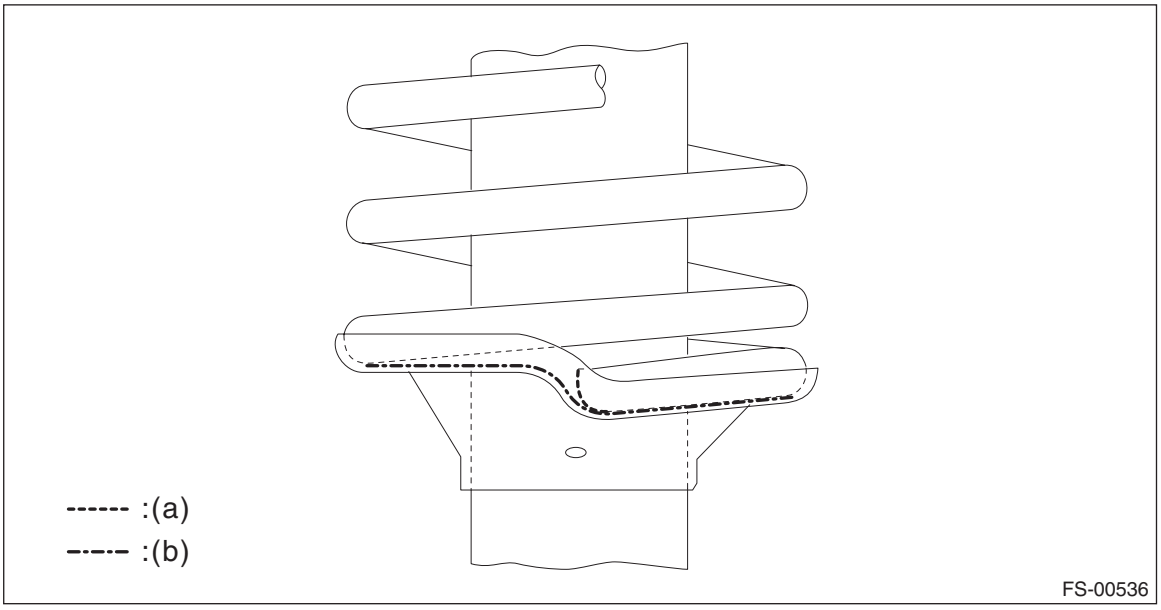
1) Before assembly, check each part. <Ref. to FS-48, INSPECTION, Front Strut.>
2) Using a coil spring compressor, compress the coil spring - front.

NOTE:
Make sure that the vertical installation direction of the coil spring - front is as shown in the figure.



(1) Diameter is small (Upper part)
(2) Identification paint
(3) Diameter is large (Bottom part)

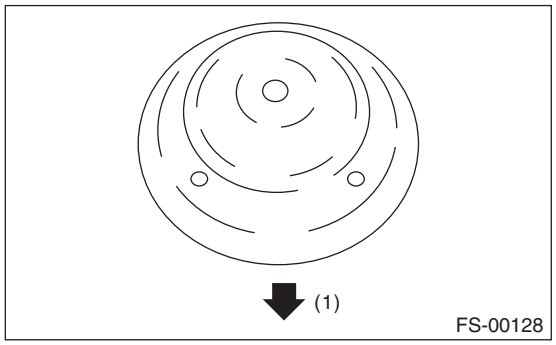
3) Set the coil spring - front correctly so that its end face (a) contacts the vertical surface (b) of the spring seat - front strut UPR as shown in the figure.



4) Install the dust cover - inner and the helper - front strut to the piston rod.

5) Pull the piston rod fully upward, and install the spring seat.

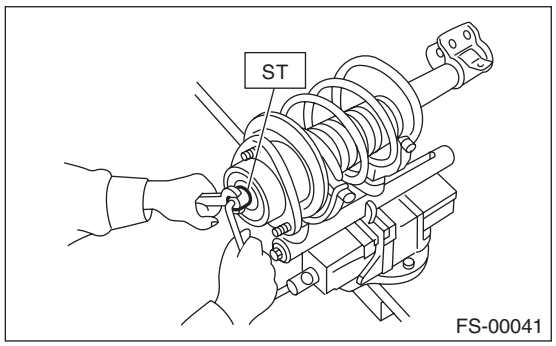
NOTE:
Position the spring seat - front strut UPR as shown in the figure.



(1) Outside of body

6) Install the spacer - front strut and the strut mount - front to the piston rod, and temporarily tighten a new self-locking nut.
7) Using a hexagon wrench to prevent strut rod from turning, tighten the new self-locking nut with ST.

***PREPARATION TOOL:***
***ST: STRUT MOUNT SOCKET (20399AG000)***



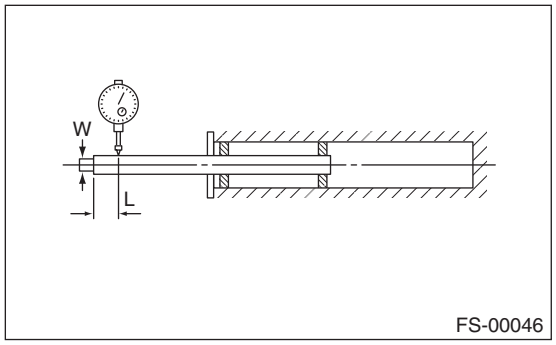
***Tightening torque:***
***55 N·m (5.61 kgf-m, 40.6 ft-lb)***
8) Loosen the coil spring compressor carefully.

## E: INSPECTION

Check the removed part for wear, damage and cracks, and then repair or replace it if defective.

### 1. STRUT

1) Check for oil leaks.
2) Move the piston rod up and down to check that it operates smoothly without any hitch.
3) Check the piston rod for play.
   (1) Fix the outer shell in place and fully extend the rod.
   (2) Set the dial gauge on the end of the rod L [10 mm (0.39 in)].
   (3) While applying a force of W [20 N (2 kgf, 4 lbf)] to the threaded part, read the dial gauge indication $P_1$.
   (4) Apply a force of 20 N (2 kgf, 4 lbf) from the opposite direction of "W", and then read the dial gauge indication $P_2$.



***Play limit ($P_1$ + $P_2$): 0.8 mm (0.031 in)***

4) Replace the strut if faulty is found in the inspection or limit value is exceeded.

### 2. STRUT MOUNT - FRONT

Check the rubber part for deformation, cracks or deterioration, and then replace it with a new part if defective.

### 3. DUST COVER - INNER

If cracks or damage are found, replace it with a new part.

### 4. COIL SPRING - FRONT

If a permanent strain is found, replace it with a new part.

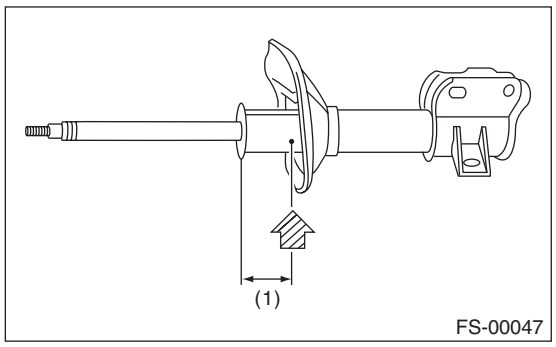
### 5. HELPER - FRONT STRUT

If major cracks or damage are found, replace it with a new part.

## F: DISPOSAL

**CAUTION:**
- **Before handling struts, be sure to wear goggles to protect eyes from gas, oil and cutting powder.**
- **Do not disassemble the strut damper or throw into flames.**
- **When discarding gas filled struts, drill holes in them to purge the gas.**

1) Place the strut on a level surface with the piston rod fully expanded.
2) Using a 2 — 3 mm (0.08 — 0.12 in) dia. drill, make holes in areas shown in the figure.



(1) 40 mm (1.57 in)

# 9. General Diagnostic Table

## A: INSPECTION

### 1. IMPROPER VEHICLE POSTURE OR IMPROPER WHEEL ARCH HEIGHT

| Possible cause | Corrective action |
|---|---|
| (1) Permanent distortion or damage of the coil spring | Replace. |
| (2) Rough operation of strut or shock absorber | Replace. |
| (3) Improper installation of strut or shock absorber | Replace with appropriate parts. |
| (4) Installation of the wrong coil spring | Replace with appropriate parts. |

### 2. POOR RIDE COMFORT

1) Large rebound shock
2) Rocking of the vehicle continues too long after running over bump and hump.
3) Excessive shock in bumping

| Possible cause | Corrective action |
|---|---|
| (1) Damaged coil spring | Replace. |
| (2) Overinflation of tires | Adjust. |
| (3) Improper wheel arch height | Replace the coil springs with new parts. |
| (4) Fault in operation of strut or shock absorber | Replace. |
| (5) Damage or deformation of strut mount or shock absorber mount | Replace. |
| (6) Unsuitable length (maximum or minimum) of strut or shock absorber | Replace with appropriate parts. |
| (7) Abnormal deformation or loss of bushing | Replace. |
| (8) Deformation or damage of helper in strut assembly or shock absorber | Replace. |
| (9) Oil leakage from the strut or shock absorber | Replace. |

### 3. NOISE

| Possible cause | Corrective action |
|---|---|
| (1) Wear or damage of strut or shock absorber component parts | Replace. |
| (2) Loosening of the suspension link installing bolt | Tighten to the specified torque. |
| (3) Abnormal deformation or loss of bushing | Replace. |
| (4) Unsuitable length (maximum or minimum) of strut or shock absorber | Replace with appropriate parts. |
| (5) Damaged coil spring | Replace. |
| (6) Wear or damage of the ball joint | Replace. |
| (7) Deformation of the clamp - stabilizer bushing | Replace. |

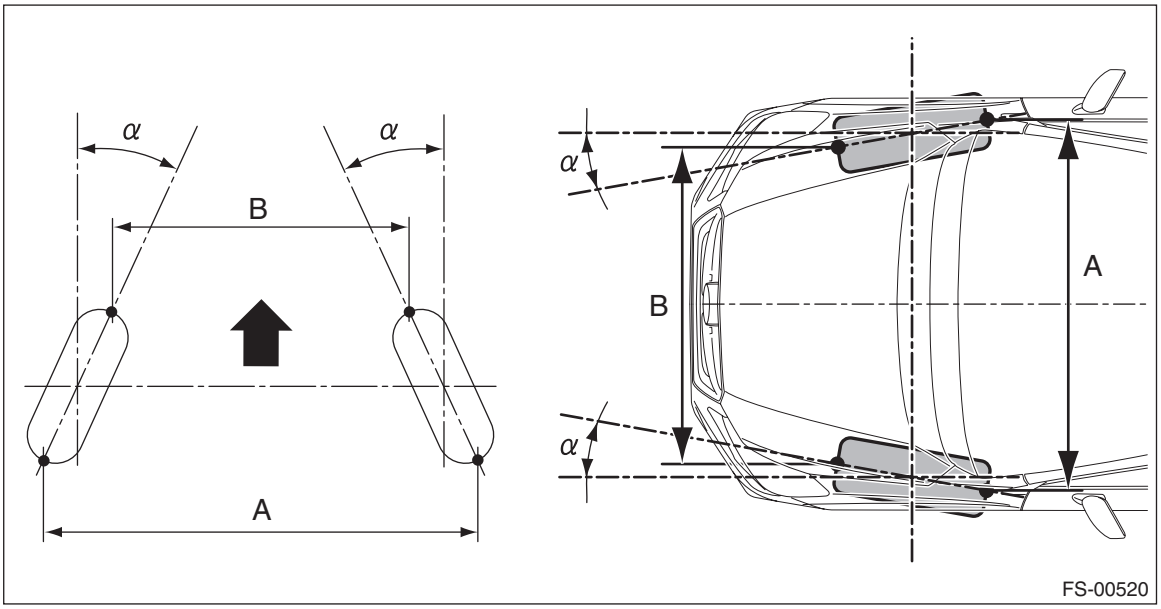
# 1. General Description

## A: SPECIFICATION

Refer to “SPECIFICATIONS” in “FRONT SUSPENSION” section for rear suspension specifications. <Ref. to FS-2, SPECIFICATION, General Description.>

NOTE:
• Front toe-in, rear toe-in and front camber can be adjusted. Adjust if the value of toe-in or camber exceeds the tolerance range of the specification chart.
• Other items except for front toe-in, rear toe-in and front camber that are described in the specification chart cannot be adjusted. If other items exceed the tolerance range of the specification chart, check the suspension parts and connections for deformation. If defective, replace with new parts.

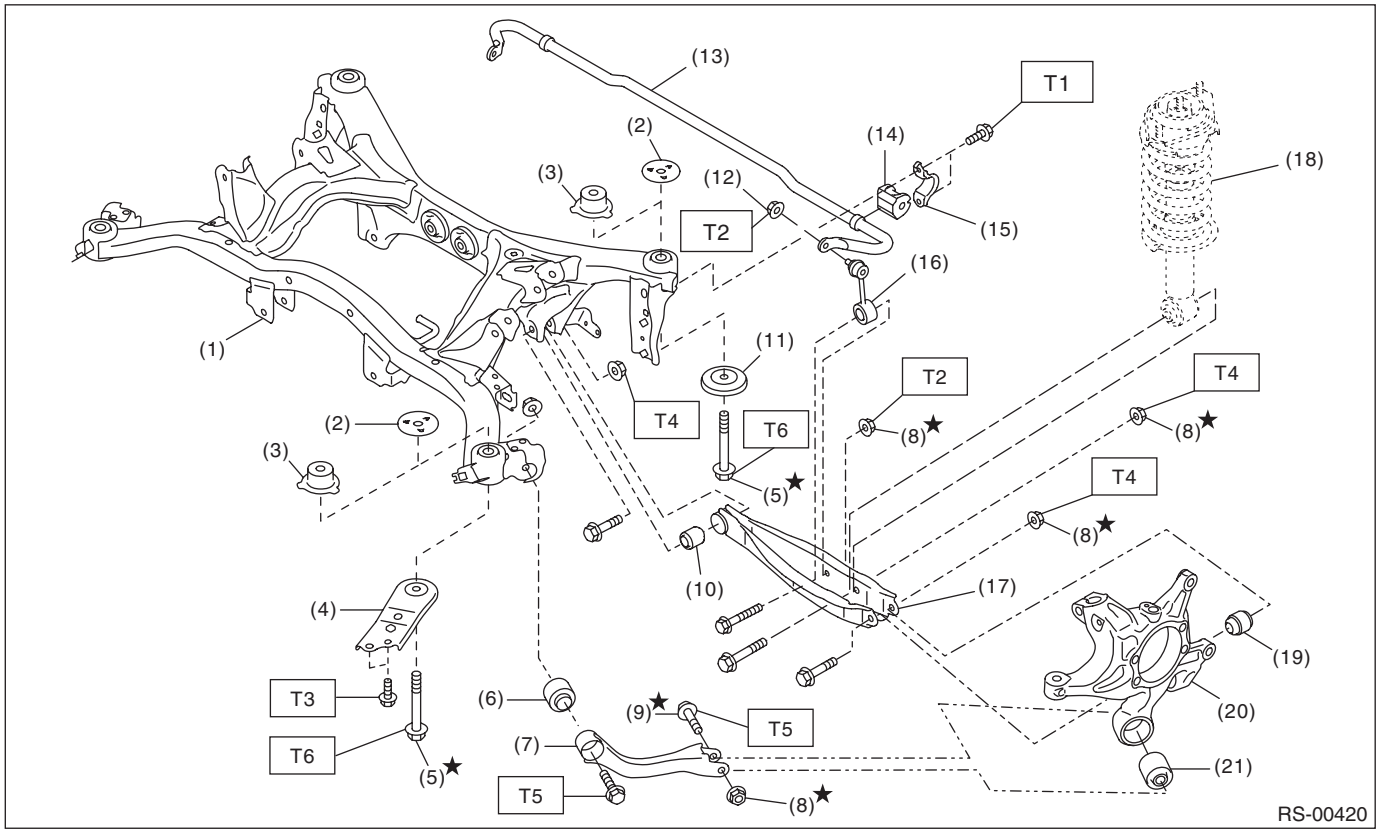


***A – B = Positive: Toe-in, Negative: Toe-out***

***$\alpha$ = Individual toe angles***

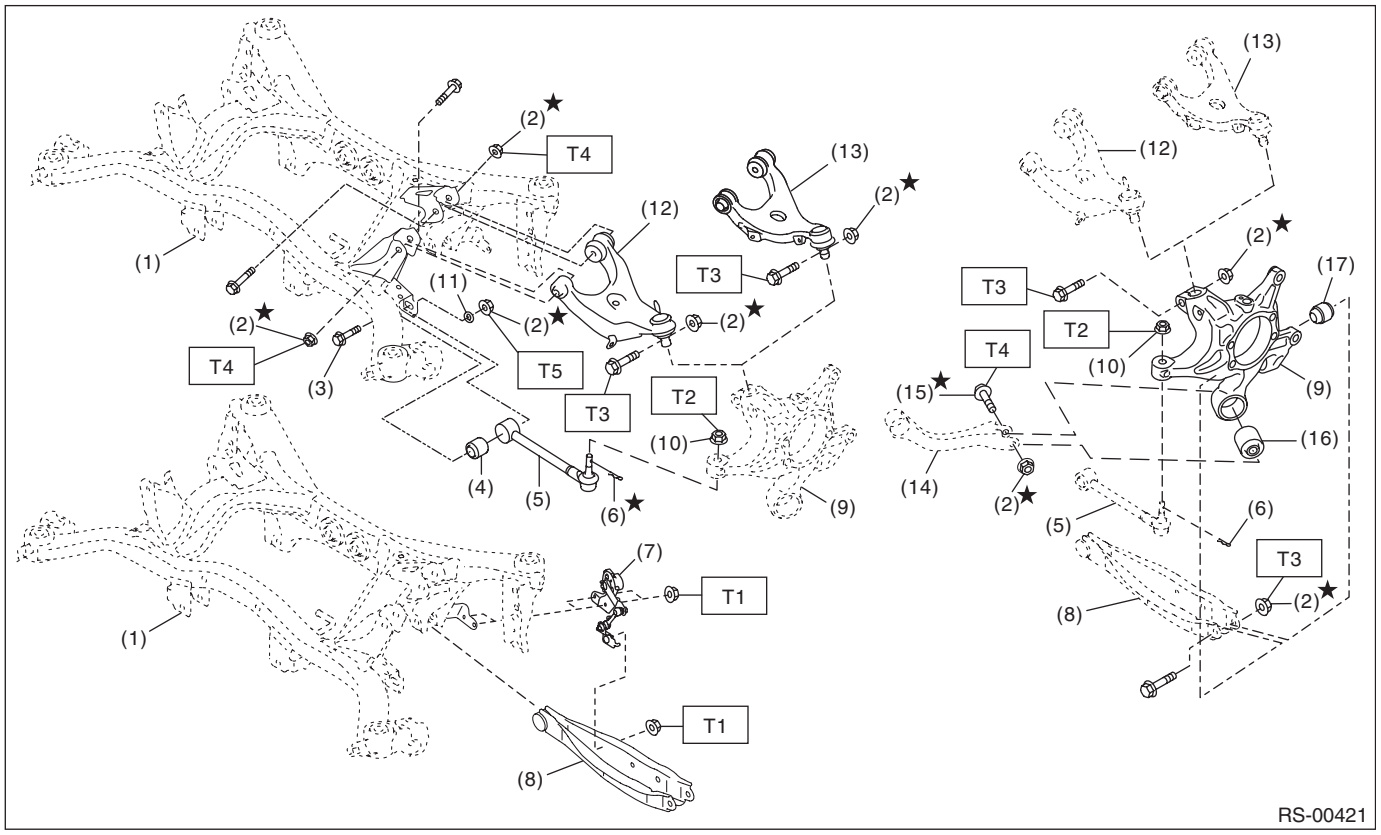
# B: COMPONENT

## 1. REAR SUSPENSION



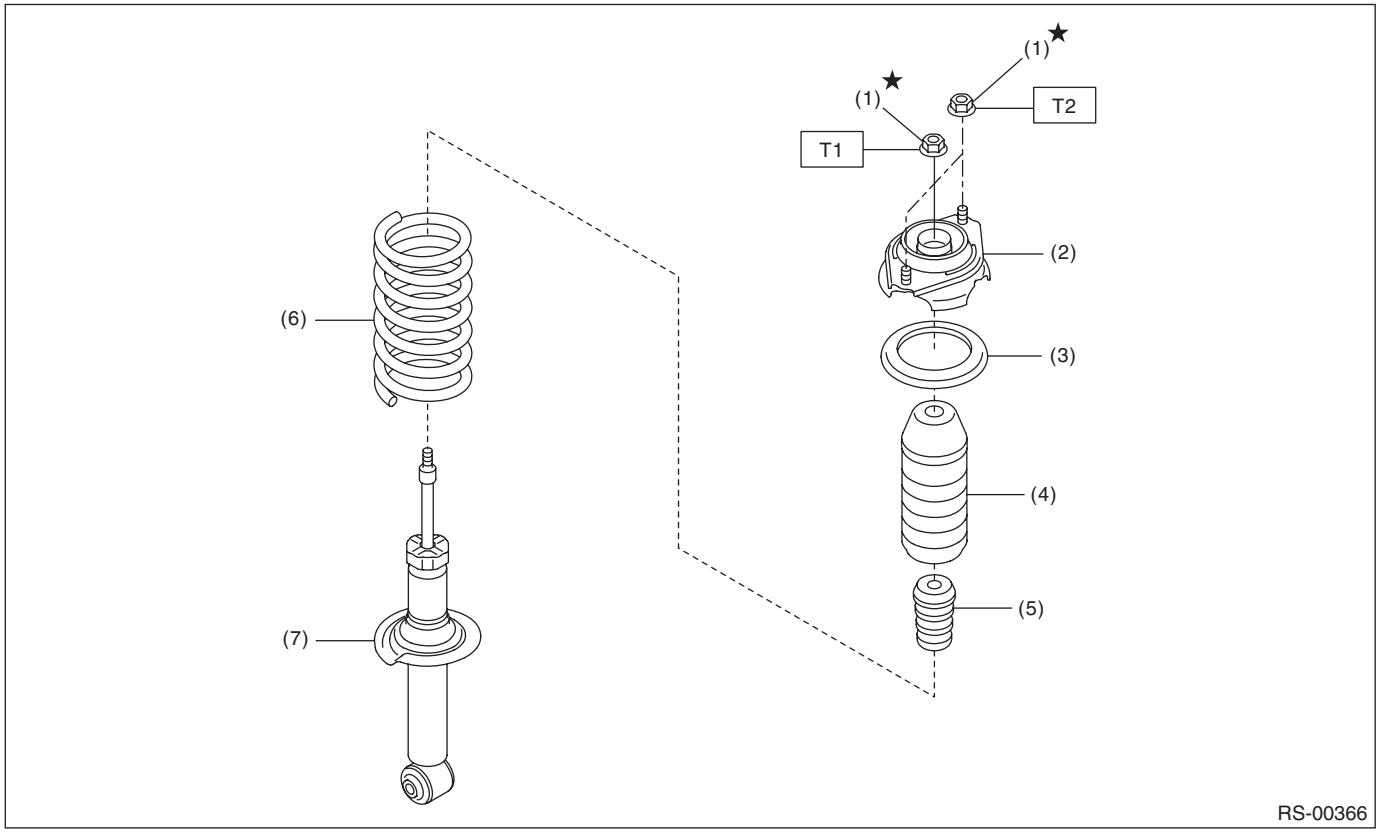
(1) Rear sub frame ASSY
(2) Stopper UPR
(3) Stopper UPR (XV model)
(4) Sub frame support
(5) Flange bolt A
(6) Bushing A - trailing link
(7) Trailing link
(8) Self-locking nut
(9) Flange bolt B
(10) Bushing C - lateral link rear
(11) Stopper LWR
(12) Flange nut
(13) Rear stabilizer
(14) Bushing - stabilizer
(15) Clamp - stabilizer bushing
(16) Stabilizer link ASSY
(17) Rear lateral link ASSY
(18) Rear strut ASSY
(19) Bushing - rear axle housing
(20) Housing ASSY - rear axle
(21) Bushing - trailing link

***Tightening torque: N·m (kgf-m, ft-lb)***
***T1: 30 (3.06, 22.1)***
***T2: 38 (3.87, 28.0)***
***T3: 70 (7.14, 51.6)***
***T4: 80 (8.16, 59.0)***
***T5: 90 (9.18, 66.4)***
***T6: 145 (14.79, 106.9)***



| | | | | | |
|---|---|---|---|---|---|
| (1) | Rear sub frame ASSY | (9) | Housing ASSY - rear axle | (17) | Bushing - rear axle housing |
| (2) | Self-locking nut | (10) | Flange nut | | |
| (3) | Adjusting bolt | (11) | Adjusting washer | ***Tightening torque: N·m (kgf-m, ft-lb)*** | |
| (4) | Bushing B - lateral link | (12) | Rear upper arm ASSY | ***T1: 7.5 (0.76, 5.5)*** | |
| (5) | Lateral link ASSY - front | (13) | Rear upper arm ASSY (XV model) | ***T2: 60 (6.12, 44.3)*** | |
| (6) | Snap pin | (14) | Trailing link | ***T3: 80 (8.16, 59)*** | |
| (7) | Sensor ASSY - headlight beam leveler (models with auto headlight beam leveler only) | (15) | Flange bolt | ***T4: 90 (9.18, 66.4)*** | |
| (8) | Lateral link ASSY - rear | (16) | Bushing - trailing link | ***T5: 100 (10.20, 73.8)*** | |

## 2. REAR STRUT



(1) Self-locking nut
(2) Strut mount - rear
(3) Rubber seat - strut UPR
(4) Dust cover - rear strut
(5) Helper - rear
(6) Coil spring - rear
(7) Shock absorber ASSY - rear

***Tightening torque: N·m (kgf-m, ft-lb)***
***T1: 25 (2.55, 18.4)***
***T2: 30 (3.06, 22.1)***

## C: CAUTION

Please clearly understand and adhere to the following general precautions. They must be strictly followed to avoid minor or serious injury to the person doing the work or people in the area.

### 1. EACH PROCEDURE

• Wear appropriate work clothing, including a helmet, protective goggles and protective shoes when performing any work.
• Before disposing of shock absorbers, be sure to bleed the gas out completely. Also, do not expose to flames or fire.
• Before removal, installation or disassembly, be sure to clarify the failure. Avoid unnecessary removal, installation, disassembly and replacement.
• Use SUBARU genuine grease etc. or equivalent. Do not mix grease etc. of different grades or manufacturers.
• Before securing a part on a vise, place cushioning material such as wood blocks, aluminum plate, or cloth between the part and the vise.
• Be sure to tighten fasteners including bolts and nuts to the specified torque.
• Place shop jacks or rigid racks at the specified points.
• When the suspension-related components have been replaced, perform “VDC sensor midpoint setting mode” of the VDC. <Ref. to VDC-19, VDC SENSOR MIDPOINT SETTING MODE, ADJUSTMENT, VDC Control Module and Hydraulic Control Unit (VDCCM&H/U).>

### 2. OIL

When handling oil, adhere to the following to prevent unexpected accident.
• Prepare container and waste cloths when performing work which oil could possibly spill. If oil spills, wipe it off immediately to prevent from penetrating into floor or flowing outside, for environmental protection.
• Follow all government regulations concerning disposal of refuse when disposing.

## D: PREPARATION TOOL

### 1. SPECIAL TOOL

| ILLUSTRATION | TOOL NUMBER | DESCRIPTION | REMARKS |
|---|---|---|---|
|  ST20099PA010 | 20099PA010 | INSTALLER & REMOVER | • Used for replacing the bushing A - trailing link of the housing assembly - rear axle.<br>• Used together with BUSHING REMOVER (20099FG000). |
|  ST20099FG000 | 20099FG000 | BUSHING REMOVER | • Used for replacing the bushing A - trailing link of the housing assembly - rear axle.<br>• Used together with base part of INSTALLER & REMOVER (20099PA000). |

| ILLUSTRATION | TOOL NUMBER | DESCRIPTION | REMARKS |
|---|---|---|---|
|  ST20099AE000 | 20099AE000 | INSTALLER & REMOVER | Used for replacing the bushing B - lateral link. |
|  ST20099AE010 | 20099AE010 | INSTALLER & REMOVER | Used for replacing the bushing C - lateral link. |
|  ST20399FG000 | 20399FG000 | STRUT MOUNT SOCKET | • Used for removing and installing strut mount.<br>• Used for checking torque of strut mount center nut. |

## 2. GENERAL TOOL

| TOOL NAME | REMARKS |
|---|---|
| Alignment tester | Used for measuring wheel alignment. |
| Toe-in gauge | Used for toe-in measurement. |
| Jack | Used for removing and installing suspension. |
| Bearing puller | Used for removing bushings. |
| Tie-rod ball joint puller | Used for disconnecting the lateral link assembly - front. |
| Coil spring compressor | Used for disassembling and assembling shock absorber. |

# 2. Wheel Alignment

## A: INSPECTION

NOTE:
Measure and adjust the front and rear wheel alignment at a time. Refer to “Wheel Alignment” in “FRONT SUSPENSION” section for measurement or adjustment of wheel alignment.

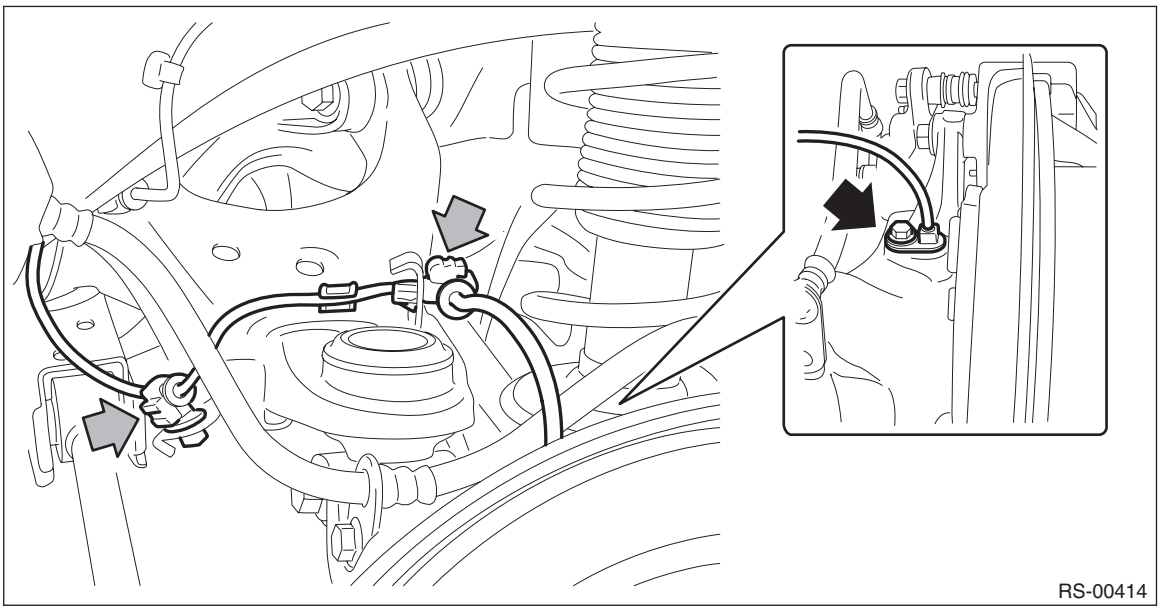
- Inspection: <Ref. to FS-7, INSPECTION, Wheel Alignment.>
- Adjustment: <Ref. to FS-12, ADJUSTMENT, Wheel Alignment.>

# 3. Rear Sub Frame

## A: REMOVAL

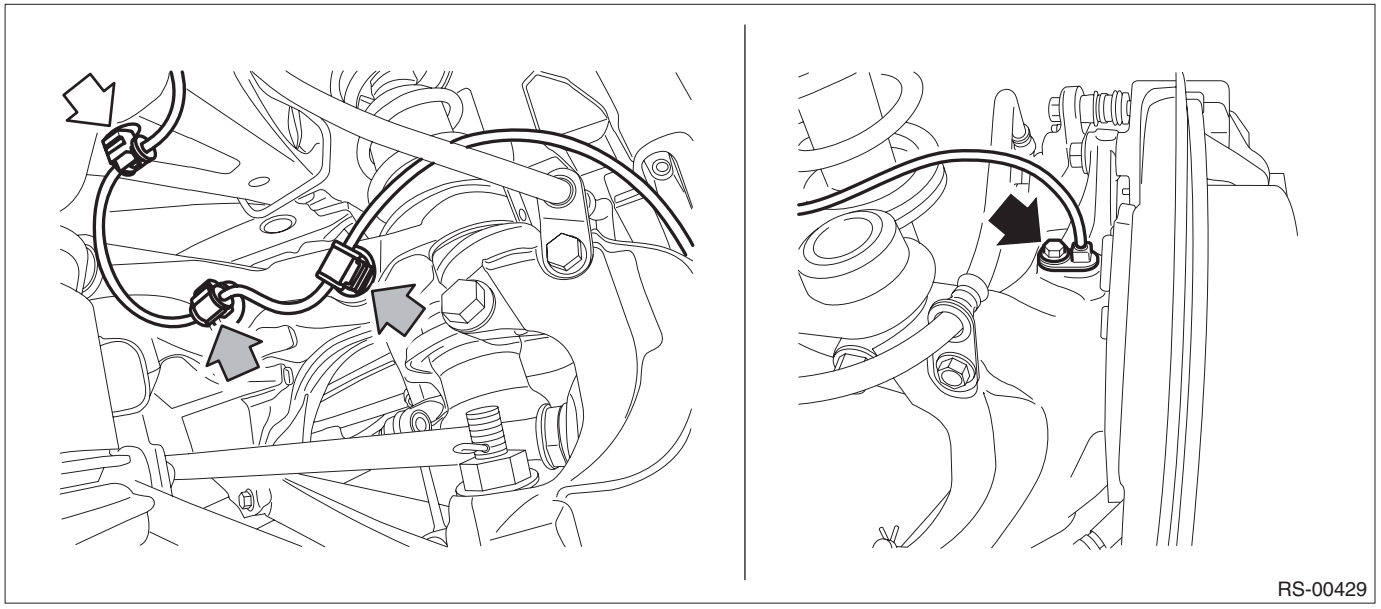
1) Disconnect the ground cable from battery.
2) Lift up the vehicle, and then remove the rear wheels.
3) Remove the propeller shaft assembly. <Ref. to DS-12, REMOVAL, Propeller Shaft.>
4) Remove the clip and bolt on the harness clamp, and remove the rear ABS wheel speed sensor.

**CAUTION:**
- **Be careful not to damage the sensor.**
- **Do not apply excessive force to the sensor harness.**
- Except for XV model



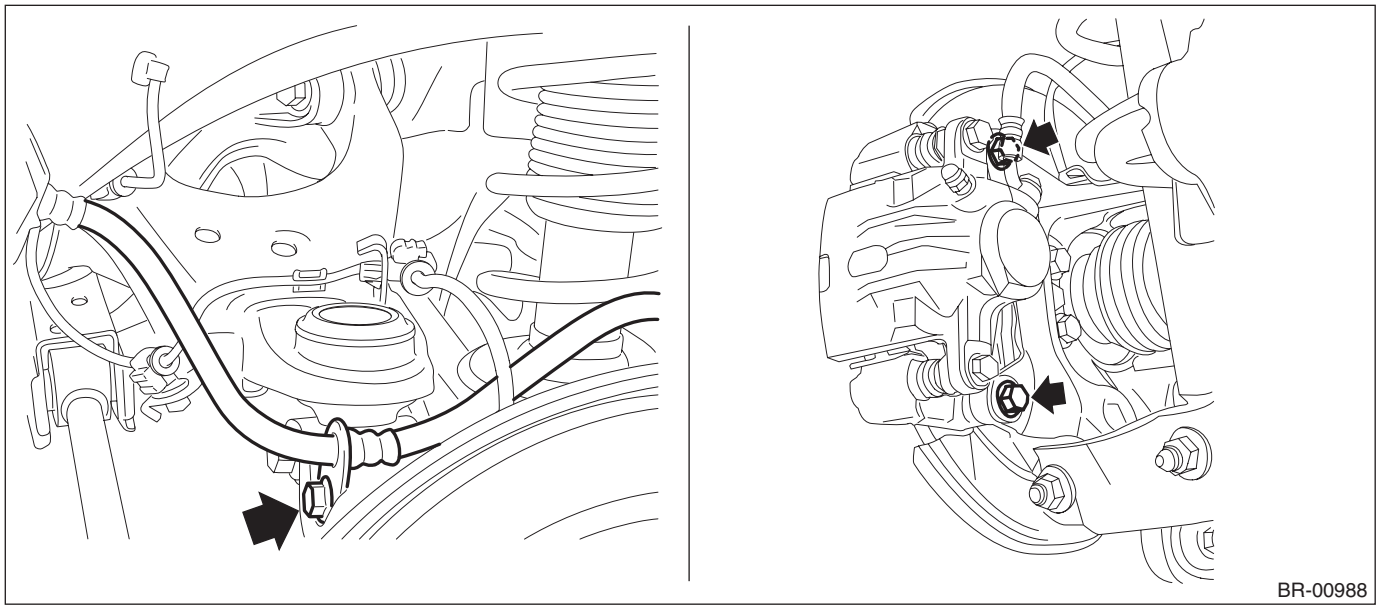
RS-00414

- XV model

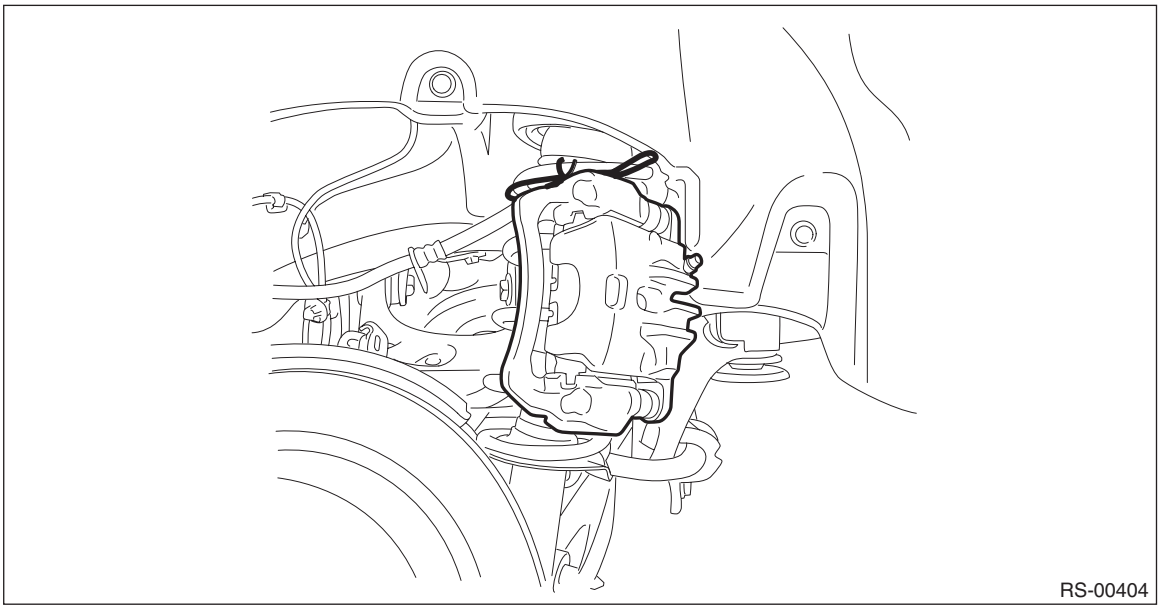


RS-00429

5) Remove the caliper body assembly from the housing assembly - rear axle.
(1) Remove the bolts and then remove the brake hose bracket and caliper body assembly.

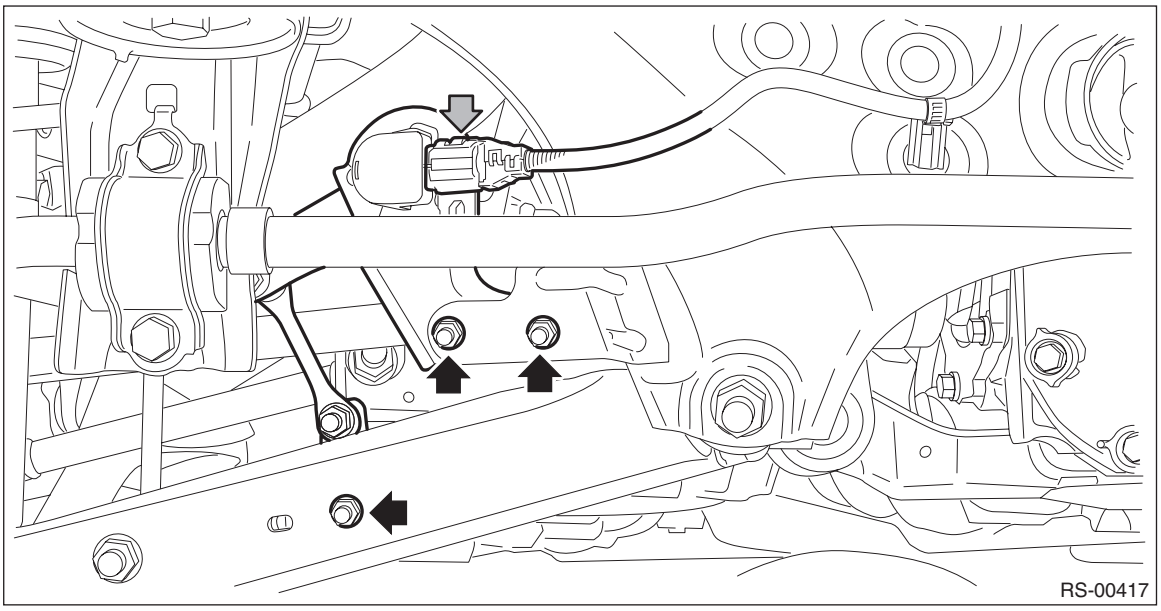


(2) Prepare wiring harnesses etc. to be discarded, and suspend the caliper body assembly from the strut assembly.

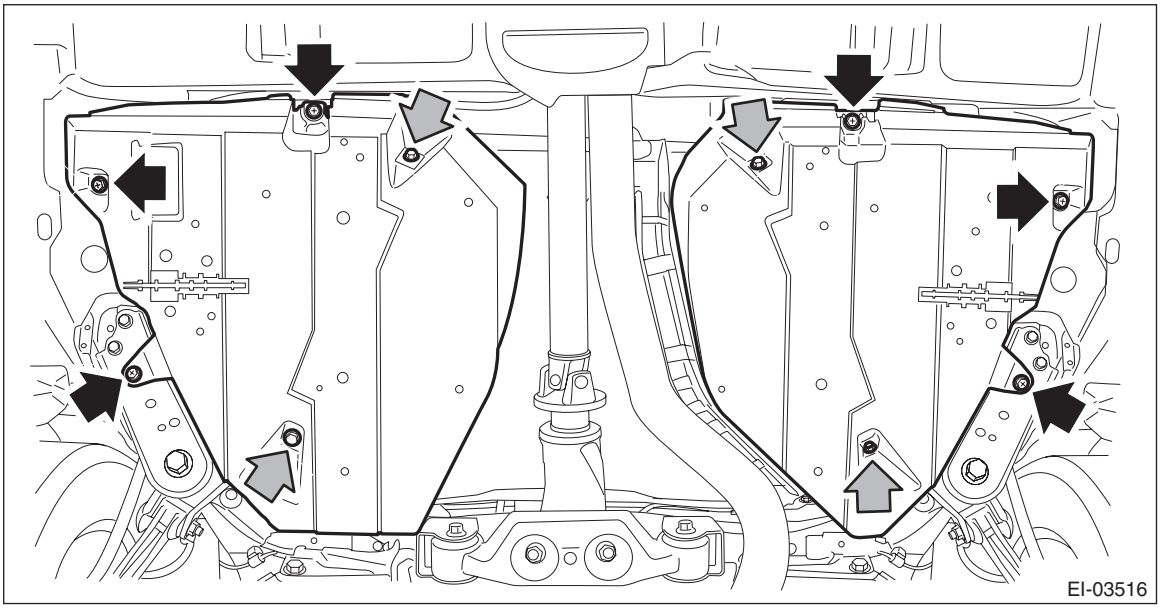


6) Remove the rear parking brake cable from the parking brake assembly. <Ref. to PB-15, REMOVAL, Parking Brake Assembly (Rear Disc Brake).>

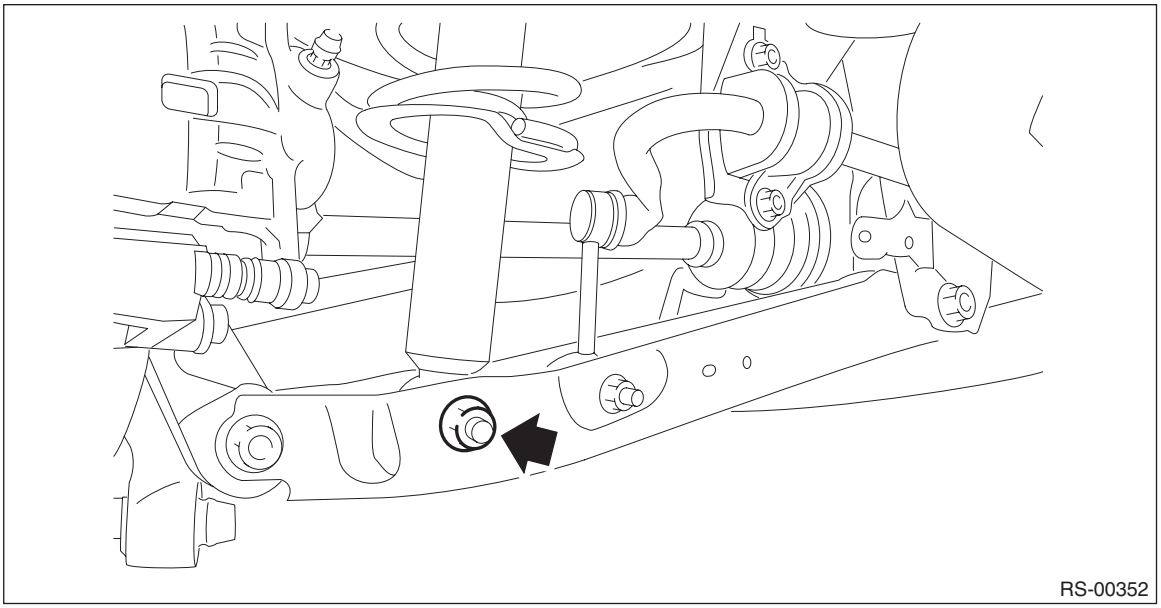
7) Remove the sensor assembly - headlight beam leveler. (Model with auto headlight beam leveler, left side only)
(1) Disconnect the connector of the sensor assembly - headlight beam leveler.
(2) Remove the nuts, and remove the sensor assembly - headlight beam leveler.



8) Remove the bolt and nuts and remove the fuel tank protector.

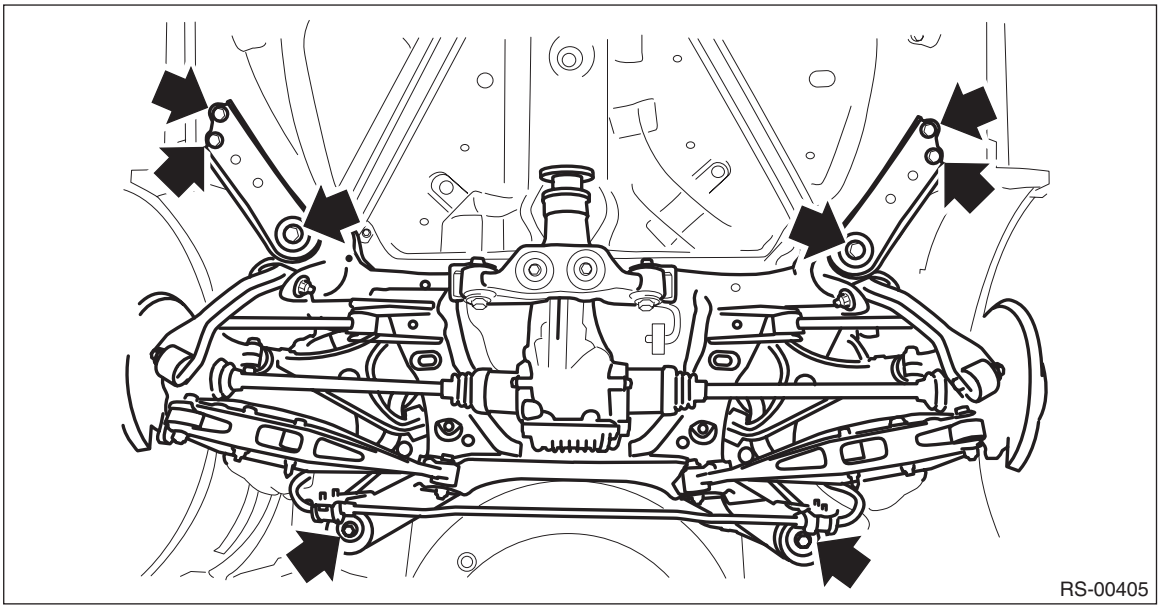


9) Remove the rear sub frame assembly.
(1) Remove the bolts at the bottom of rear strut assembly.



RS-00352

(2) Support the rear sub frame assembly using a transmission jack.
(3) Remove the bolt, and remove the left and right sub frame supports.
(4) Remove the bolts, then remove the rear sub frame assembly.



RS-00405

10) As necessary, remove each part from the rear sub frame assembly.

## B: INSTALLATION

**CAUTION:**
- **Be sure to use a new self-locking nut.**
- **Always tighten the bushing in the state where the vehicle is at curb weight and the wheels are in full contact with the ground.**

1) Check the removed parts for wear, damage and crack, and repair or replace them if faulty.
2) Install each part in the reverse order of removal.

***Tightening torque:***
***Refer to "COMPONENT" of "General Description" for the tightening torque.***

- ***Rear suspension parts: <Ref. to RS-3, COMPONENT, General Description.>***
- ***Fuel tank protector: <Ref. to FU(H4DO)-7, FUEL TANK, COMPONENT, General Description.>***
- ***Rear disc brake parts: <Ref. to BR-6, REAR DISC BRAKE, COMPONENT, General Description.>***

3) Bleed air from brake system.
4) Install the rear wheels.

***Tightening torque:***
***120 N·m (12.24 kgf-m, 88.5 ft-lb)***

5) Inspect the wheel alignment and adjust if necessary.
- Inspection: <Ref. to FS-7, INSPECTION, Wheel Alignment.>
- Adjustment: <Ref. to FS-12, ADJUSTMENT, Wheel Alignment.>

**CAUTION:**
**When the wheel alignment has been adjusted, perform "VDC sensor midpoint setting mode" of the VDC.**

6) Connect the battery ground terminal.
7) Perform reinitialization of the auto headlight beam leveler system. (model with auto headlight beam leveler) <Ref. to LI-17, PROCEDURE, Auto Headlight Beam Leveler System.>

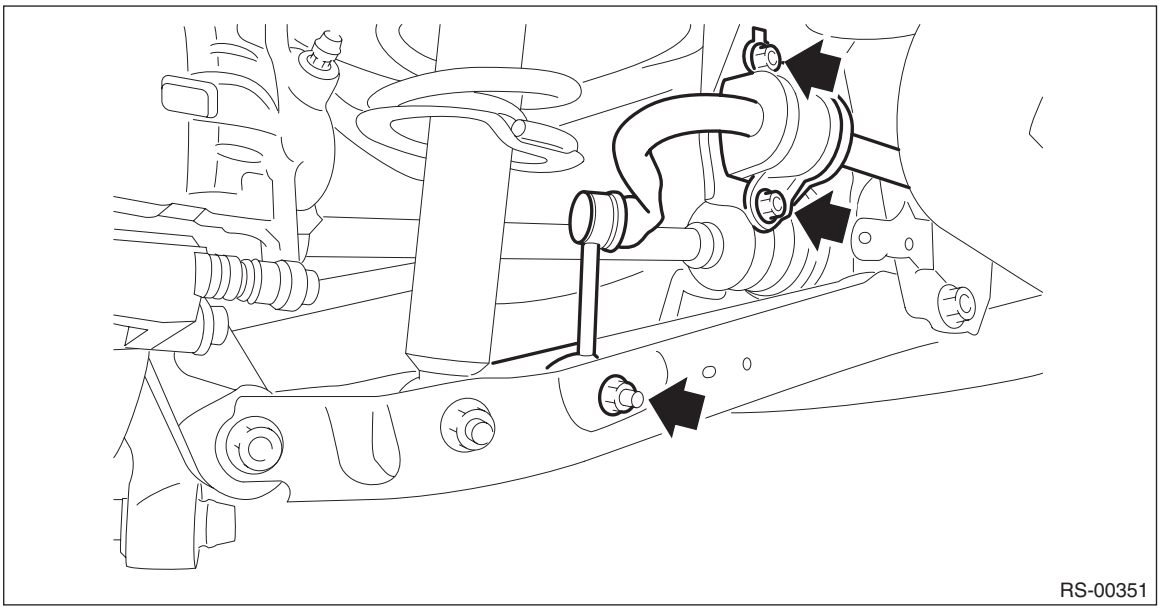
## C: INSPECTION

Check the removed parts for wear, damage and crack, and repair or replace them if faulty.

# 4. Rear Stabilizer

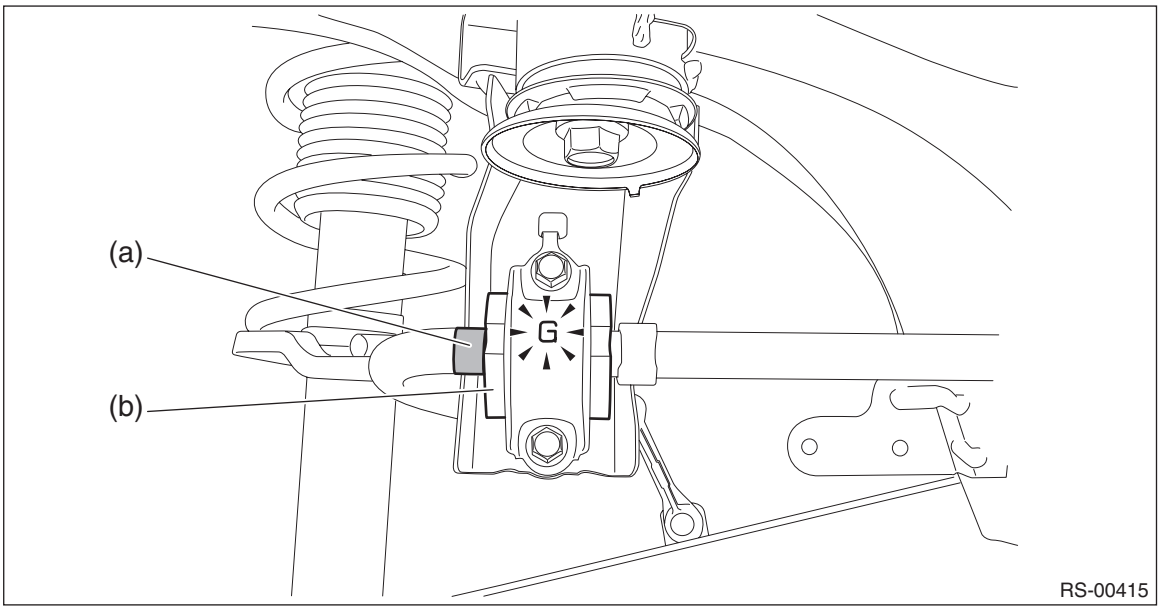
## A: REMOVAL

1) Lift up the vehicle, and then remove the rear wheels.
2) Remove the rear stabilizer.
   (1) Remove the left and right stabilizer link assemblies.
   (2) Detach the clamp - stabilizer bushing and remove the rear stabilizer.



## B: INSTALLATION

**CAUTION:**
- **Be sure to use a new flange nut and self-locking nut.**
- **Always tighten the bushing in the state where the vehicle is at curb weight and the wheels are in full contact with the ground.**
- **Install the clamp - stabilizer bushing with the "G" character facing upward.**
- **When installing, align the edge of identification paint (a) to the end face of the bushing (b).**



1) Before installation, inspect the following items and replace any faulty part with a new one.
- Check the bushing - stabilizer for abnormal cracks, fatigue or damage.
- Check the stabilizer link assembly for damage.

2) Install each part in the reverse order of removal.

***Tightening torque:***
***Clamp - stabilizer bushing: 30 N·m (3.06 kgf-m, 22.1 ft-lb)***
***Stabilizer link assembly: 38 N·m (3.87 kgf-m, 28.0 ft-lb)***

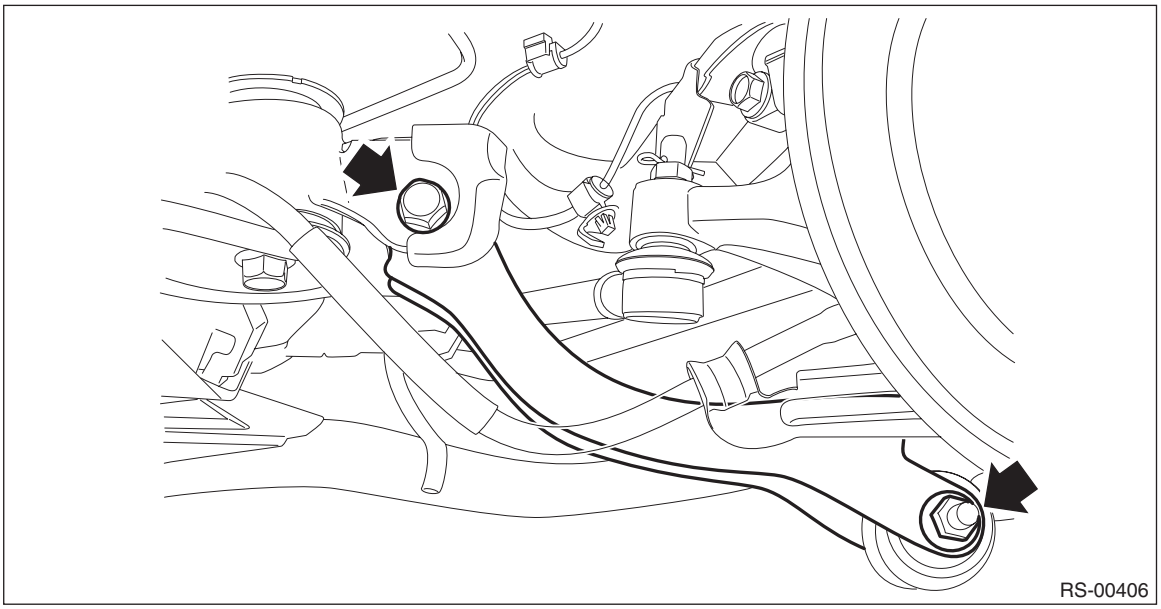
3) Install the rear wheels.

***Tightening torque:***
***120 N·m (12.24 kgf-m, 88.5 ft-lb)***

# 5. Rear Trailing Link

## A: REMOVAL

1) Lift up the vehicle, and then remove the rear wheels.
2) Remove the bolts and nuts, and then remove the trailing link.



## B: INSTALLATION

**CAUTION:**
- **Be sure to use a new self-locking nut.**
- **Always tighten the bushing in the state where the vehicle is at curb weight and the wheels are in full contact with the ground.**

1) Install each part in the reverse order of removal.

***Tightening torque:***
***Trailing link — rear sub frame assembly: 90 N·m (9.18 kgf-m, 66.4 ft-lb)***
***Trailing link — housing assembly - rear axle: 90 N·m (9.18 kgf-m, 66.4 ft-lb)***

2) Install the rear wheels.

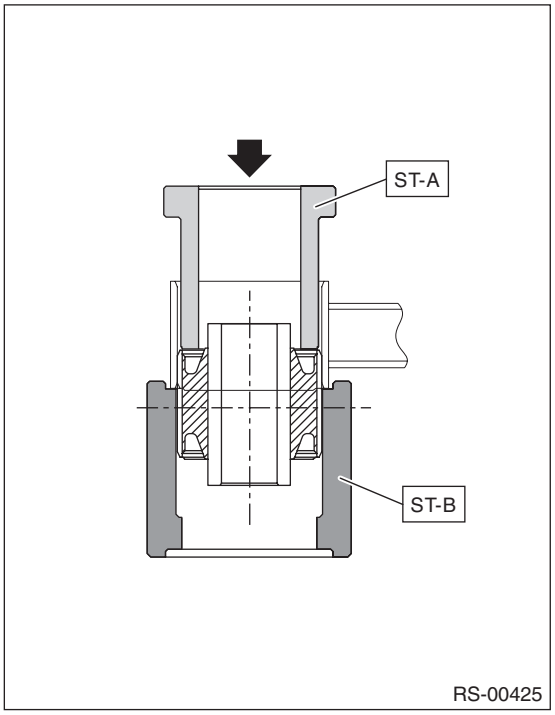
***Tightening torque:***
***120 N·m (12.24 kgf-m, 88.5 ft-lb)***

## C: DISASSEMBLY

### 1. BUSHING A - TRAILING LINK

Using the ST, push out the bushing A - trailing link.

***Preparation tool:***
***ST-A: INSTALLER (899874100)***
***ST-B: INSTALLER & REMOVER (BASE) (20099PA010)***



### 2. BUSHING - TRAILING LINK

For the removal procedure of bushing - trailing link, refer to “Rear Axle” in the “DRIVE SHAFT SYSTEM” section. <Ref. to DS-44, BUSHING - TRAILING LINK, DISASSEMBLY, Rear Axle.>

# D: ASSEMBLY

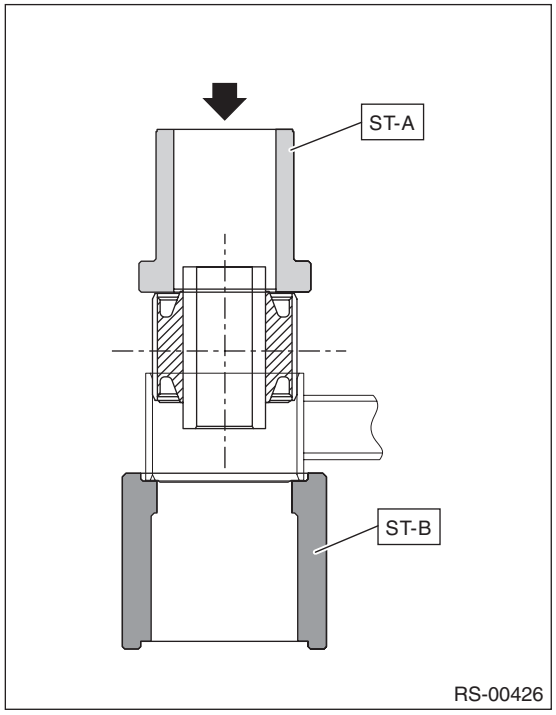
## 1. BUSHING A - TRAILING LINK

1) Before assembly, inspect the following items and replace any faulty part with a new one.
- Perform visual check for damage or bend on the trailing link.
- Visually check the bushing for abnormal cracks, fatigue or damage.

2) Using the ST-A and ST-B, press-fit the bushing.

**CAUTION:**
**Make sure to press the bushing straight in.**

***Preparation tool:***
***ST-A: INSTALLER (899874100)***
***ST-B: INSTALLER & REMOVER (BASE) (20099PA010)***



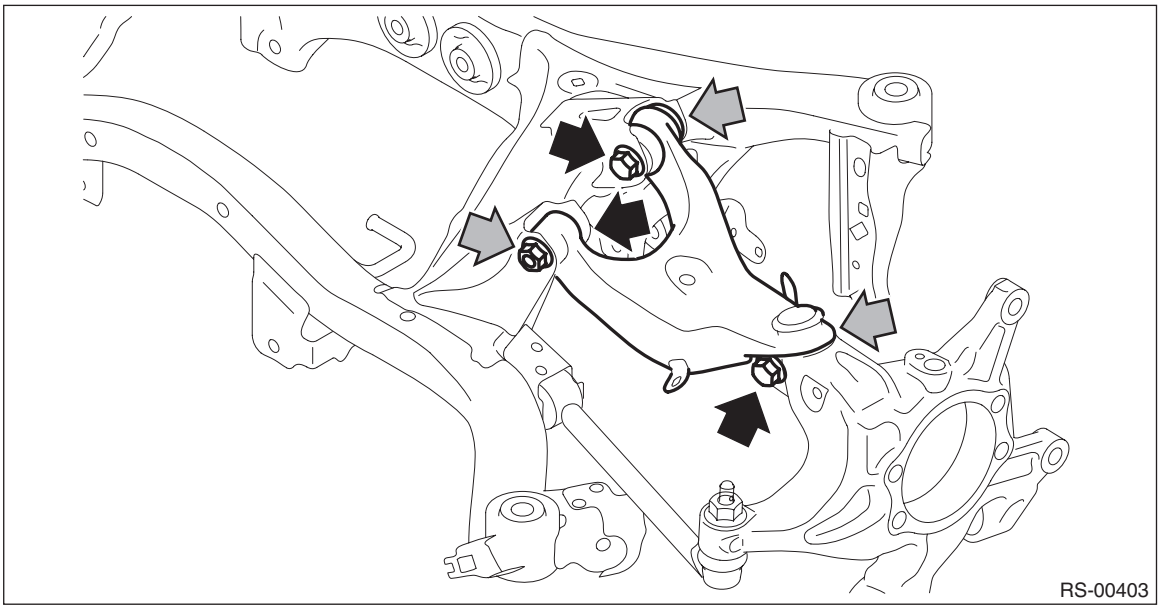
## 2. BUSHING - TRAILING LINK

For the installation procedure of bushing - trailing link, refer to “Rear Axle” in the “DRIVE SHAFT SYSTEM” section. <Ref. to DS-44, BUSHING - TRAILING LINK, DISASSEMBLY, Rear Axle.>

# 6. Upper Arm

## A: REMOVAL

1) Remove the rear sub frame assembly. <Ref. to RS-9, REMOVAL, Rear Sub Frame.>
2) Remove the bolts and nuts to remove the upper arm assembly.

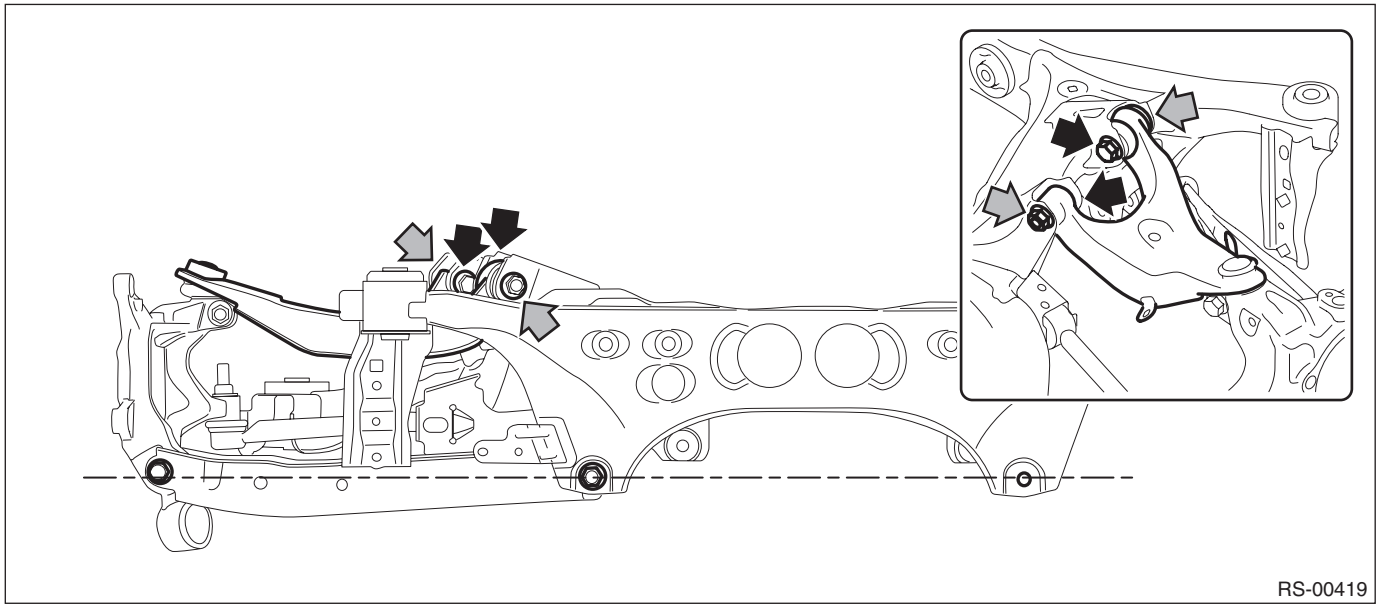


## B: INSTALLATION

**CAUTION:**
- **Use a new self-locking nut.**
- **Always tighten the bushing when the arm is positioned in the state where the vehicle is at curb weight and the wheels are in full contact with the ground.**

1) Before installation, inspect the following items and replace any faulty part with a new one.
- Visually check the upper arm assembly for damage and deformation.
- Visually check the bushing for abnormal cracks, fatigue or damage.
- Visually check the dust cover on the ball joint for abnormal cracks, fatigue or damage.

2) Install the upper arm assembly to the rear sub frame assembly.
   (1) Make the installation sections of the rear lateral link assembly (the bolt on the housing assembly - rear axle side and the bolt on the rear sub frame assembly side) horizontal.
   (2) Install the upper arm assembly to the rear sub frame assembly.



***Tightening torque:***
***Upper arm assembly — rear sub frame assembly: 90 N·m (9.18 kgf-m, 66.4 ft-lb)***

3) Connect the upper arm assembly and the housing assembly - rear axle.

***Tightening torque:***
***Upper arm assembly — housing assembly - rear axle: 80 N·m (8.16 kgf-m, 59.0 ft-lb)***

4) Install the rear sub frame assembly in the reverse order of removal. <Ref. to RS-13, INSTALLATION, Rear Sub Frame.>
5) Route the rear ABS wheel speed sensor cable to the upper arm assembly.
6) Install the rear wheels.

***Tightening torque:***
***120 N·m (12.24 kgf-m, 88.5 ft-lb)***

7) Inspect the wheel alignment and adjust if necessary.
- Inspection: <Ref. to FS-7, INSPECTION, Wheel Alignment.>
- Adjustment: <Ref. to FS-12, ADJUSTMENT, Wheel Alignment.>

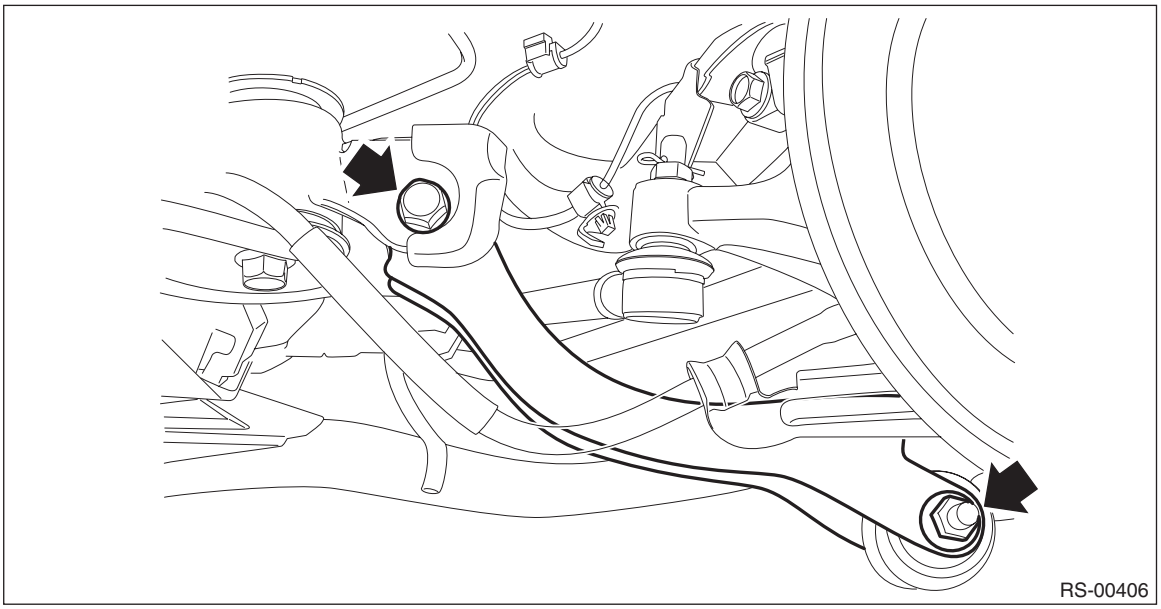
**CAUTION:**
**When the wheel alignment has been adjusted, perform "VDC sensor midpoint setting mode" of the VDC.**

8) Connect the battery ground terminal.
9) Perform reinitialization of the auto headlight beam leveler system. (Model with auto headlight beam leveler) <Ref. to LI-17, PROCEDURE, Auto Headlight Beam Leveler System.>

# 7. Front Lateral Link

## A: REMOVAL

1) Lift up the vehicle, and then remove the rear wheels.
2) Remove the bolts and nuts, and then remove the trailing link.

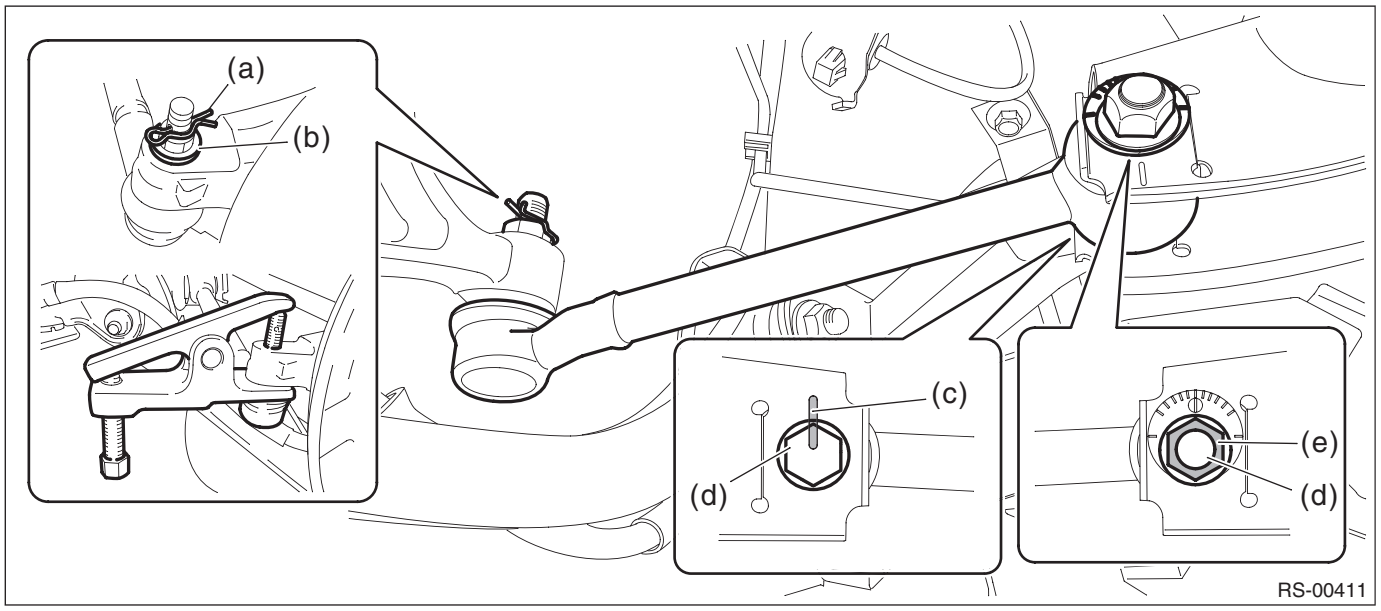


3) Remove the lateral link assembly - front.
   (1) Remove the snap pin (a) and nut (b).
   (2) Remove the ball joint from the housing assembly - rear axle.

***Preparation tool:***
***Tie-rod ball joint puller***

   (3) Scribe alignment marks (c) on the adjusting bolt for lateral link assembly - front and on the rear sub frame assembly.
   (4) Remove the adjusting bolt (d), and remove the lateral link assembly - front.

**CAUTION:**
**When removing the adjusting bolt (d), make sure to fix the bolt head in place when loosening the nut (e).**



## B: INSTALLATION

**CAUTION:**
- **Be sure to use a new self-locking nut.**
- **Always tighten the bushing in the state where the vehicle is at curb weight and the wheels are in full contact with the ground.**

1) Before installation, inspect the following items and replace any faulty part with a new one.
- Visually check the lateral link assembly - front for damage and deformation.
- Visually check the bushing for abnormal cracks, fatigue or damage.
- Visually check the dust cover on the ball joint for abnormal cracks, fatigue or damage.

2) Install each part in the reverse order of removal.

***Tightening torque:***
***Lateral link assembly - front — rear sub frame assembly: 100 N·m (10.20 kgf-m, 73.8 ft-lb)***
***Lateral link assembly - front — housing assembly - rear axle: 60 N·m (6.12 kgf-m, 44.3 ft-lb)***

3) Install the rear wheels.

***Tightening torque:***
***120 N·m (12.24 kgf-m, 88.5 ft-lb)***

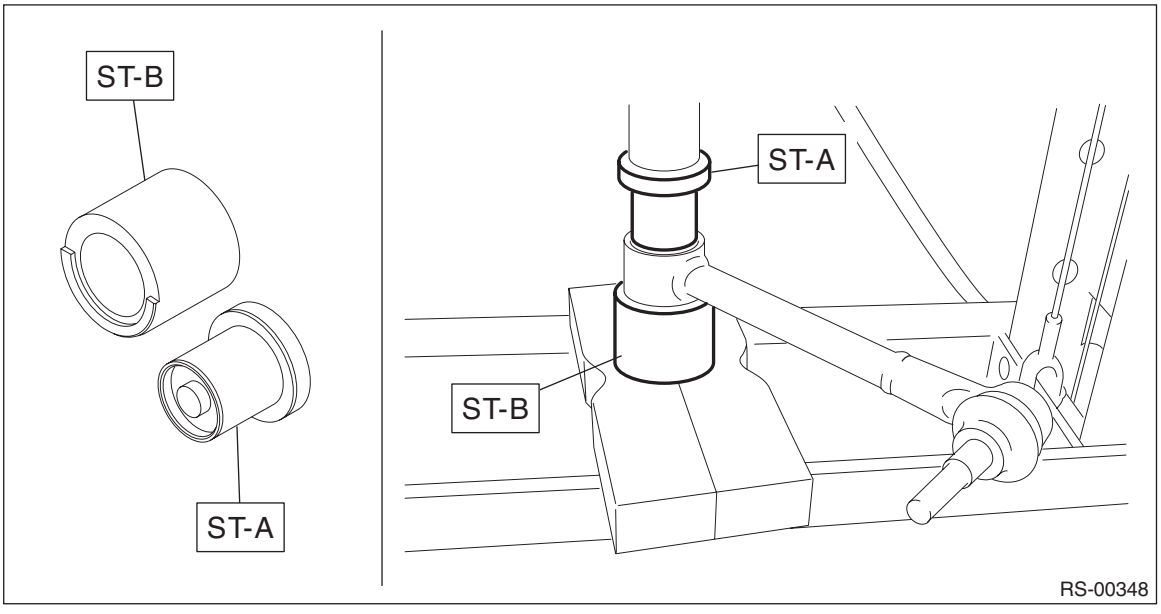
4) Inspect the wheel alignment and adjust if necessary.
- Inspection: <Ref. to FS-7, INSPECTION, Wheel Alignment.>
- Adjustment: <Ref. to FS-12, ADJUSTMENT, Wheel Alignment.>

**CAUTION:**
**When the wheel alignment has been adjusted, perform “VDC sensor midpoint setting mode” of the VDC.**

## C: DISASSEMBLY

Using the ST, push out the bushing B - lateral link.

***PREPARATION TOOL:***
***ST-A & ST-B: INSTALLER & REMOVER (20299AE000)***



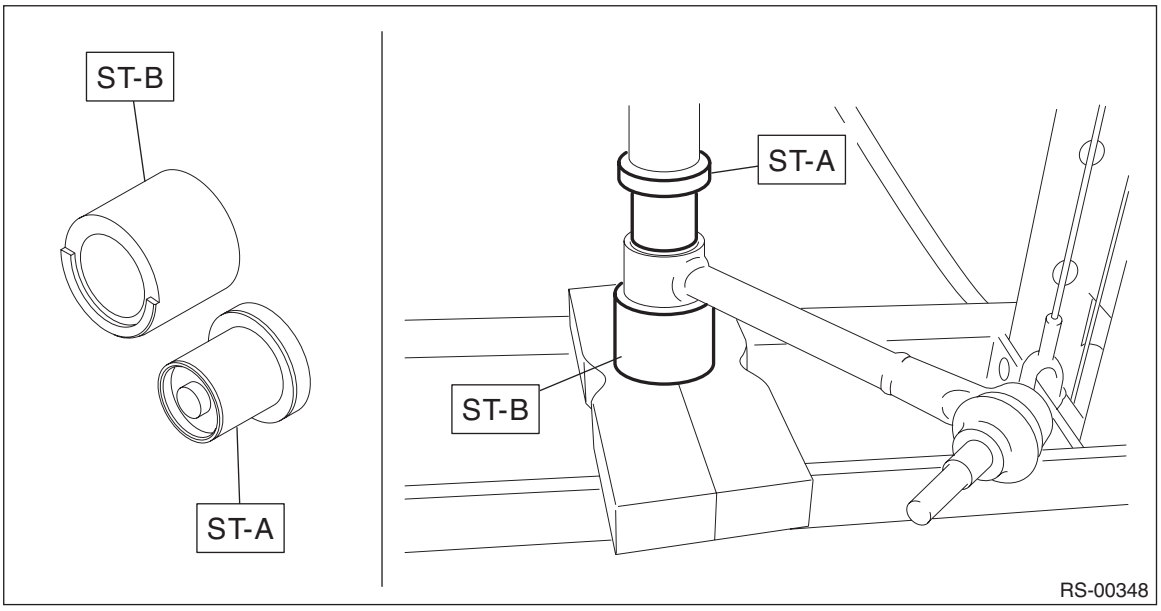
## D: ASSEMBLY

1) Before assembly, inspect the following items and replace any faulty part with a new one.
- Visually check the lateral link assembly - front for damage and deformation.
- Visually check the bushing for abnormal cracks, fatigue or damage.
- Visually check the dust cover on the ball joint for damage.

2) Using the ST, press-fit the bushing B - lateral link.

**CAUTION:**
**Make sure to press the bushing straight in.**

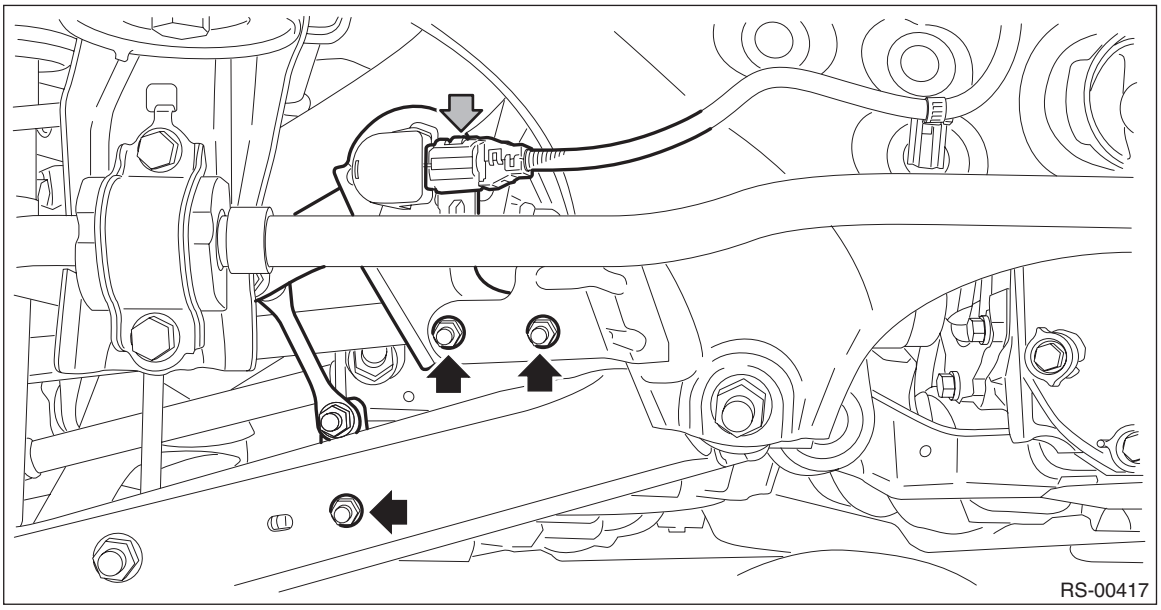
***Preparation tool:***
***ST-A & ST-B: INSTALLER & REMOVER (20299AE000)***



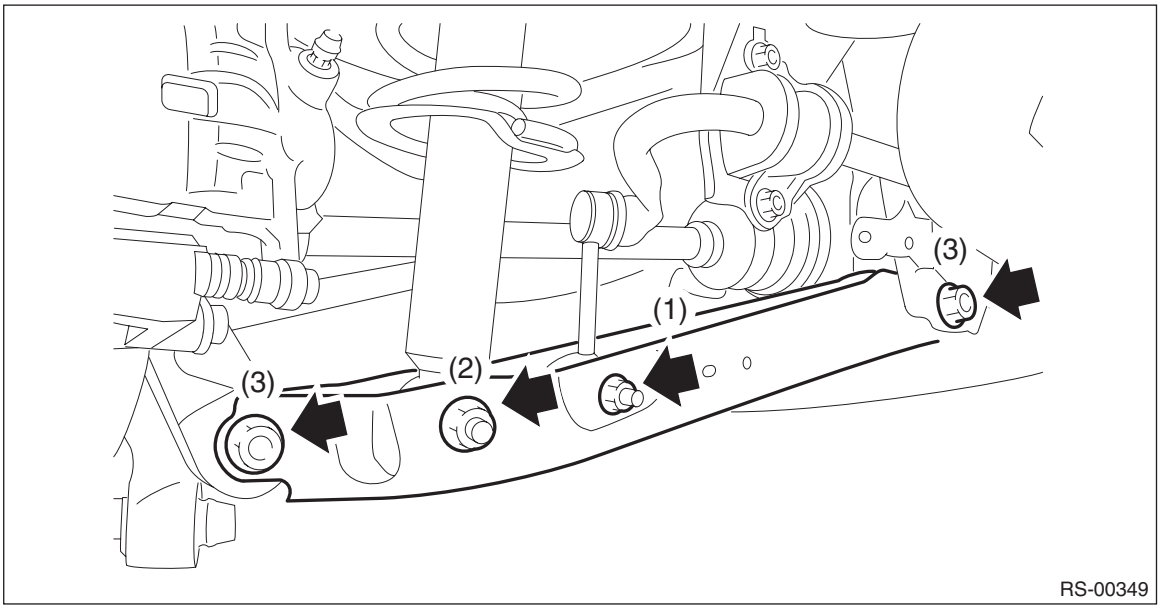
# 8. Rear Lateral Link

## A: REMOVAL

1) Disconnect the ground cable from battery.
2) Lift up the vehicle, and then remove the rear wheels.
3) Remove the sensor assembly - headlight beam leveler. (Model with auto headlight beam leveler, left side only)
   (1) Disconnect the connector of the sensor assembly - headlight beam leveler.
   (2) Remove the nuts, and remove the sensor assembly - headlight beam leveler.



4) Remove the bolts and nuts, and remove the lateral link assembly - rear on the left and right sides.
   (1) Remove the nut and disconnect the rear stabilizer link assembly.
   (2) Remove the bolts at the bottom of rear strut assembly.
   (3) Disconnect the lateral link assembly - rear.



## B: INSTALLATION

**CAUTION:**
- **Be sure to use a new self-locking nut.**
- **Always tighten the bushing in the state where the vehicle is at curb weight and the wheels are in full contact with the ground.**

1) Before installation, inspect the following items and replace any faulty part with a new one.
- Visually check the lateral link assembly - rear for damage and deformation.
- Visually check the bushing for abnormal cracks, fatigue or damage.

2) Install each part in the reverse order of removal.

***Tightening torque:***
***Sensor assembly - headlight beam leveler: 7.5 N·m (0.76 kgf-m, 5.5 ft-lb)***
***Lateral link assembly - rear: 80 N·m (8.16 kgf-m, 59.0 ft-lb)***
***Rear strut assembly: 80 N·m (8.16 kgf-m, 59.0 ft-lb)***
***Stabilizer link assembly: 38 N·m (3.87 kgf-m, 28.0 ft-lb)***
***Sensor assembly - headlight beam leveler: 7.5 N·m (0.76 kgf-m, 5.5 ft-lb)***

3) Install the rear wheels.

***Tightening torque:***
***120 N·m (12.24 kgf-m, 88.5 ft-lb)***

4) Inspect the wheel alignment and adjust if necessary.
- Inspection: <Ref. to FS-7, INSPECTION, Wheel Alignment.>
- Adjustment: <Ref. to FS-12, ADJUSTMENT, Wheel Alignment.>

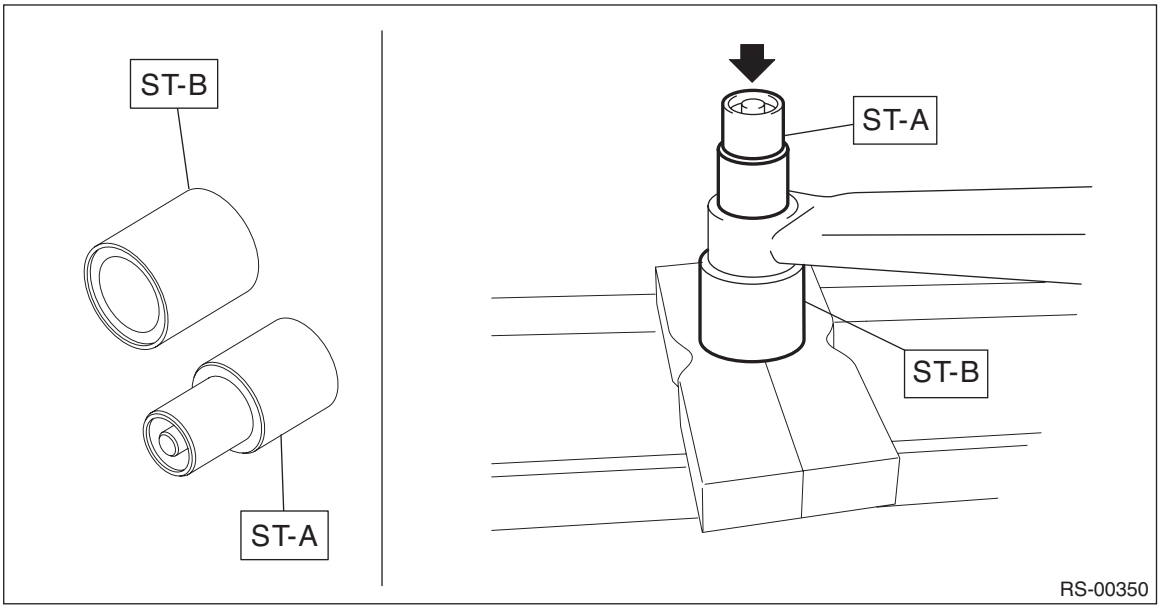
**CAUTION:**
**When the wheel alignment has been adjusted, perform "VDC sensor midpoint setting mode" of the VDC.**

5) Perform reinitialization of the auto headlight beam leveler system. (Model with auto headlight beam leveler) <Ref. to LI-17, REINITIALIZATION, PROCEDURE, Auto Headlight Beam Leveler System.>

## C: DISASSEMBLY

Using the ST, push out the bushing.

***Preparation tool:***
***ST-A & ST-B: INSTALLER & REMOVER (20099AE010)***

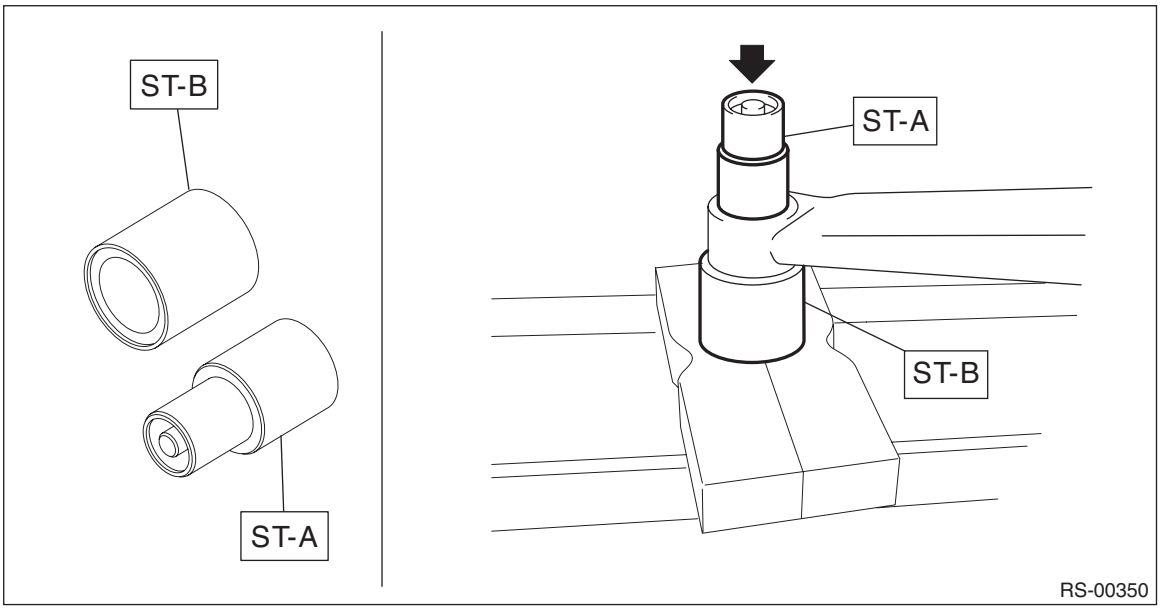


## D: ASSEMBLY

1) Before assembly, inspect the following items and replace any faulty part with a new one.
- Visually check the lateral link assembly - rear for damage and deformation.
- Visually check the bushing for abnormal cracks, fatigue or damage.

2) Using the ST, press the bushing into place.

***Preparation tool:***
***ST-A & ST-B: INSTALLER & REMOVER (20099AE010)***

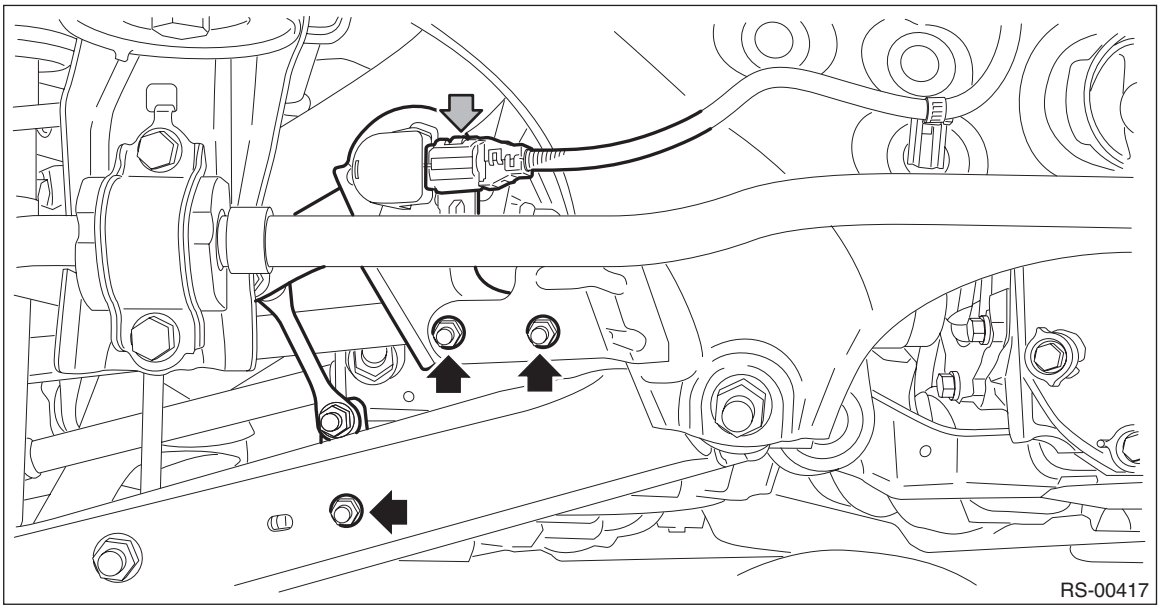


# 9. Rear Shock Absorber

## A: REMOVAL

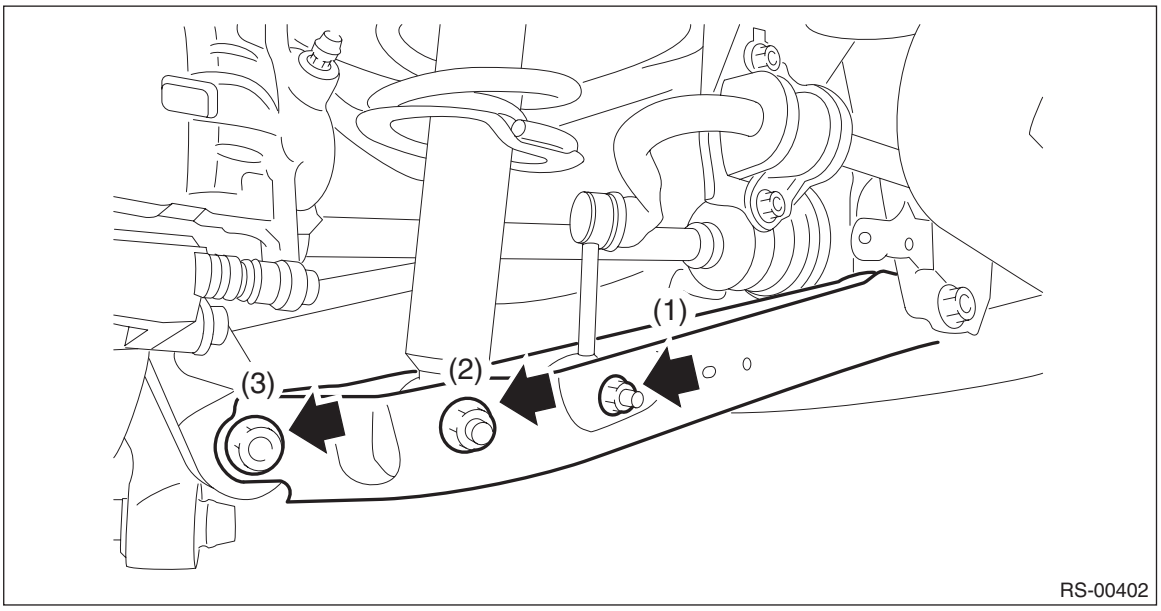
### 1. 4 DOOR MODEL

1) Disconnect the ground cable from battery.
2) Lift up the vehicle, and then remove the rear wheels.
3) Remove the sensor assembly - headlight beam leveler. (Model with auto headlight beam leveler, left side only)
   (1) Disconnect the connector of the sensor assembly - headlight beam leveler.
   (2) Remove the nuts, and remove the sensor assembly - headlight beam leveler.



RS-00417

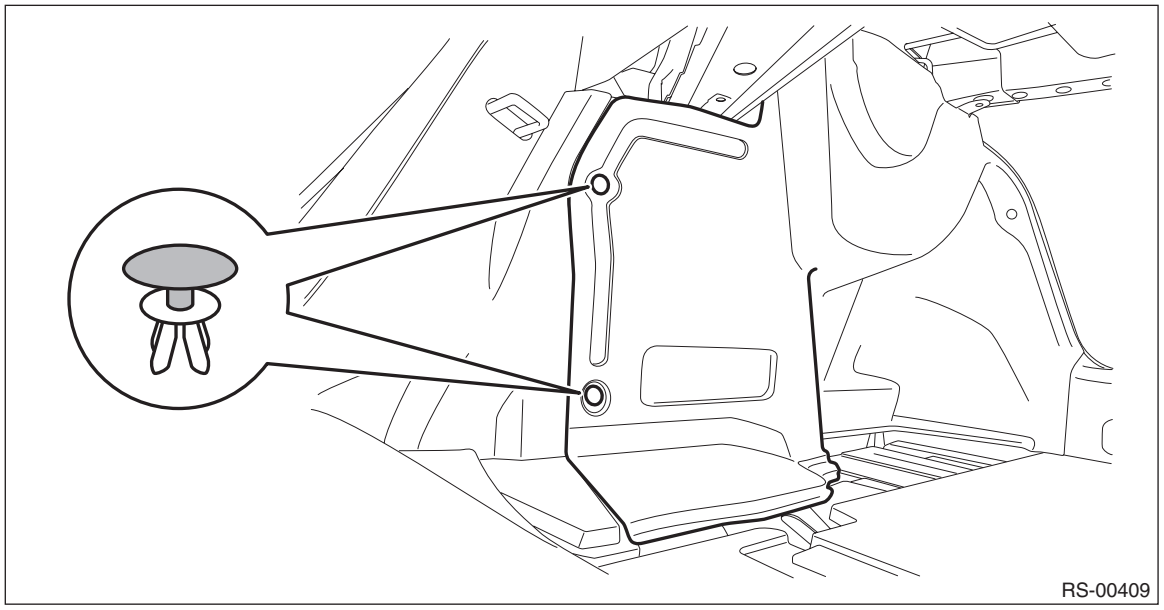
4) Remove the bolts and nuts, and lower the lateral link assembly - rear.
   (1) Remove the nut and disconnect the rear stabilizer link assembly. (model with rear stabilizer)
   (2) Remove the bolts at the bottom of rear strut assembly.
   (3) Disconnect the housing assembly - rear axle from the lateral link assembly - rear.



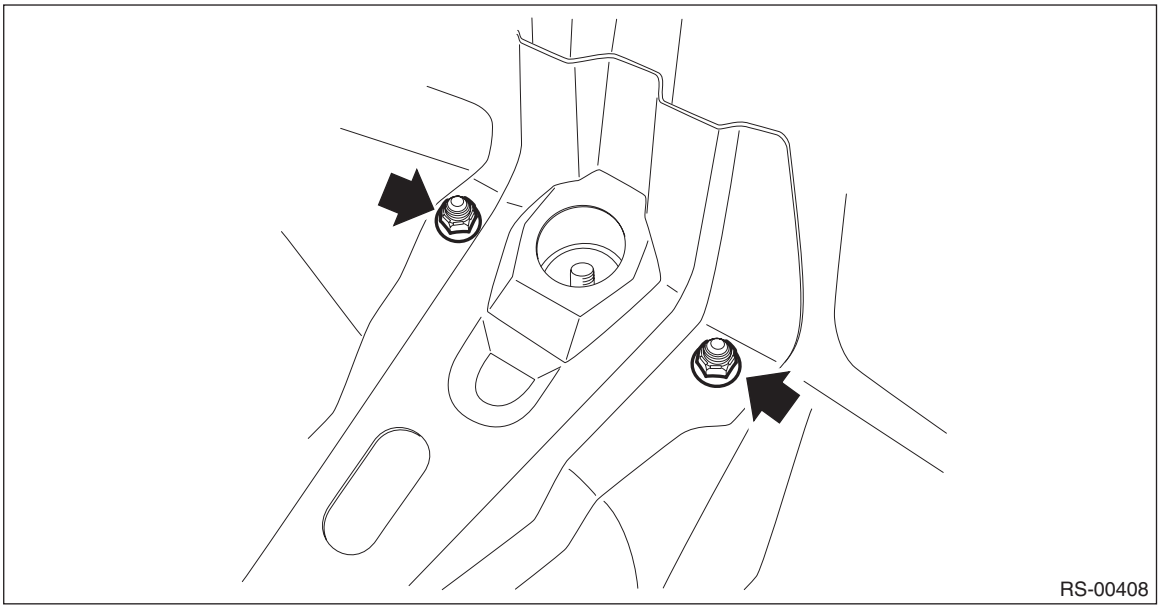
RS-00402

5) Take out the trunk mat.
6) Fold down the rear seat backrest.

7) Remove the clips, and turn over the trim panel - trunk side.



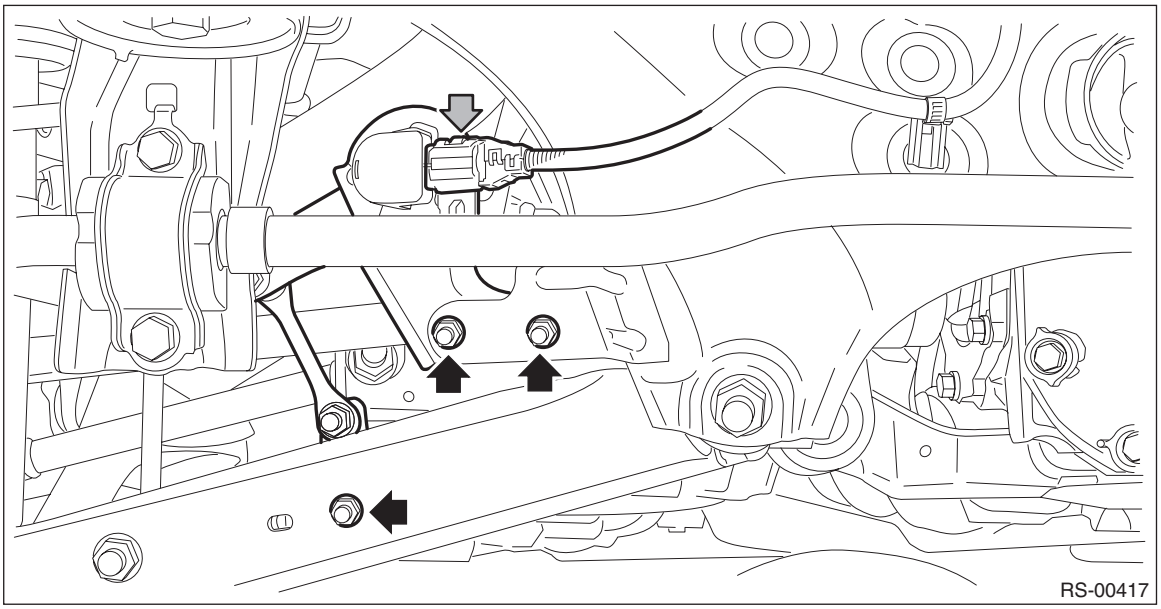
8) Remove the nuts on the upper side of rear strut assembly.



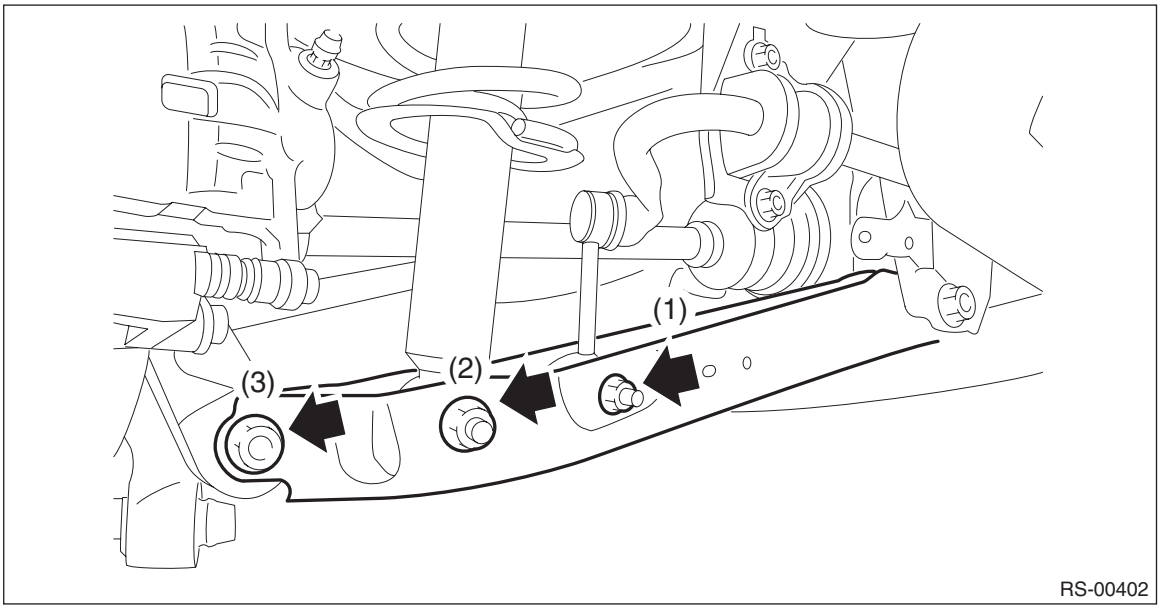
9) Lower the lateral link assembly - rear, and remove the rear strut assembly.

## 2. 5 DOOR MODEL/XV MODEL

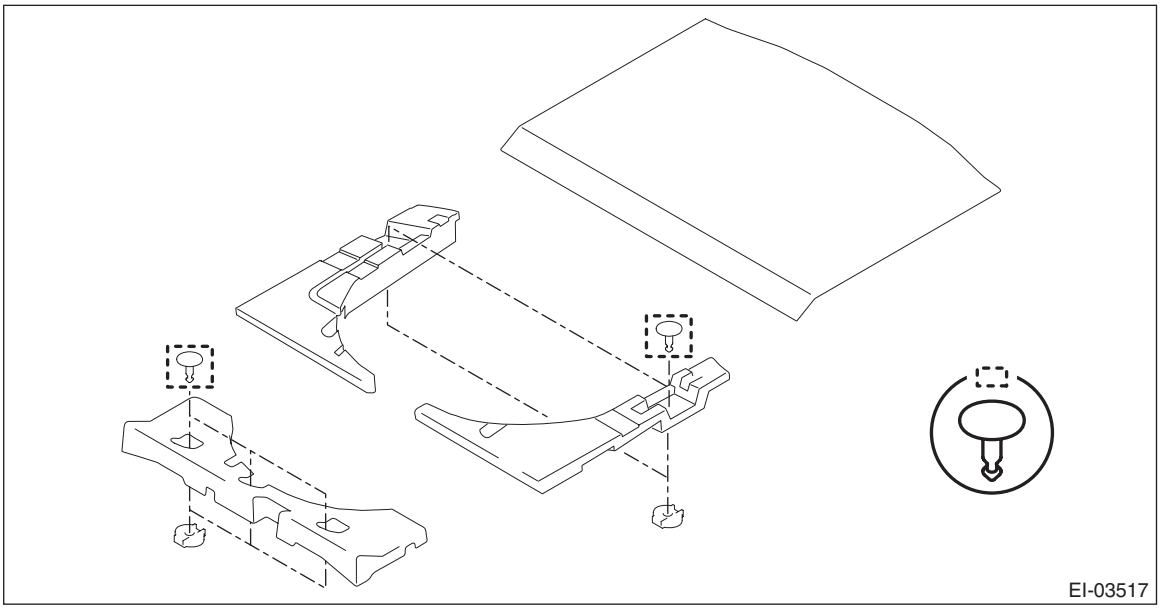
1) Disconnect the ground cable from battery.
2) Lift up the vehicle, and then remove the rear wheels.
3) Remove the sensor assembly - headlight beam leveler. (Model with auto headlight beam leveler, left side only)
   (1) Disconnect the connector of the sensor assembly - headlight beam leveler.
   (2) Remove the nuts, and remove the sensor assembly - headlight beam leveler.



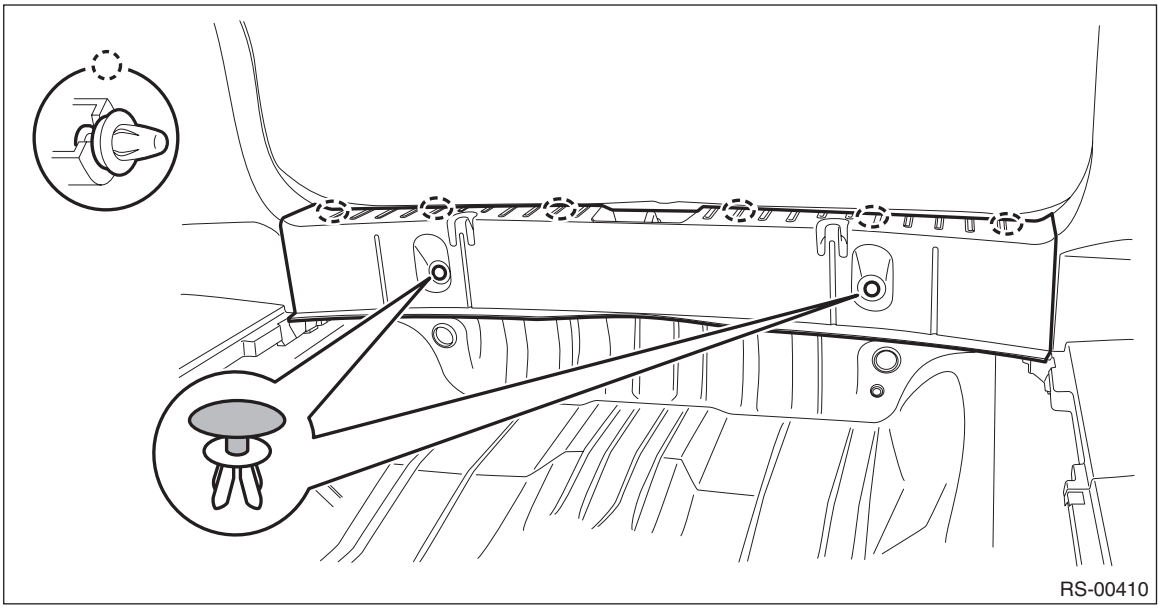
4) Remove the bolts and nuts, and lower the lateral link assembly - rear.
   (1) Remove the nut and disconnect the rear stabilizer link assembly. (model with rear stabilizer)
   (2) Remove the bolts at the bottom of rear strut assembly.
   (3) Disconnect the housing assembly - rear axle from the lateral link assembly - rear.



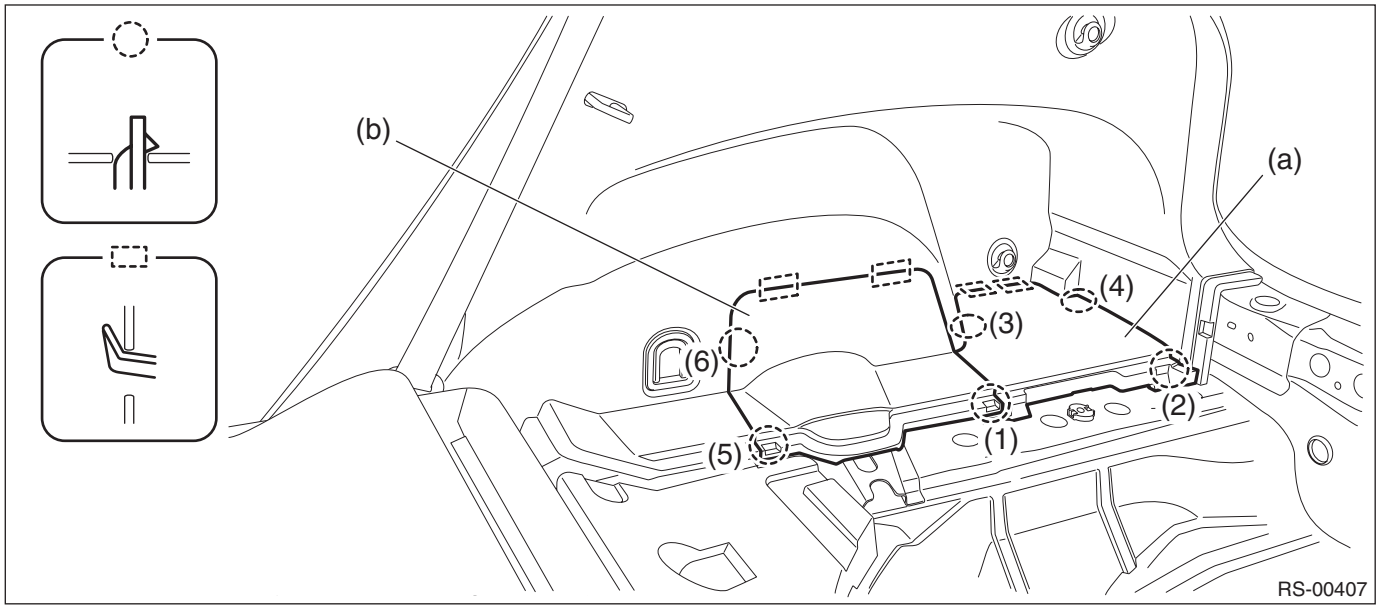
5) Remove the mat - rear floor CTR and the spacer - rear floor side.



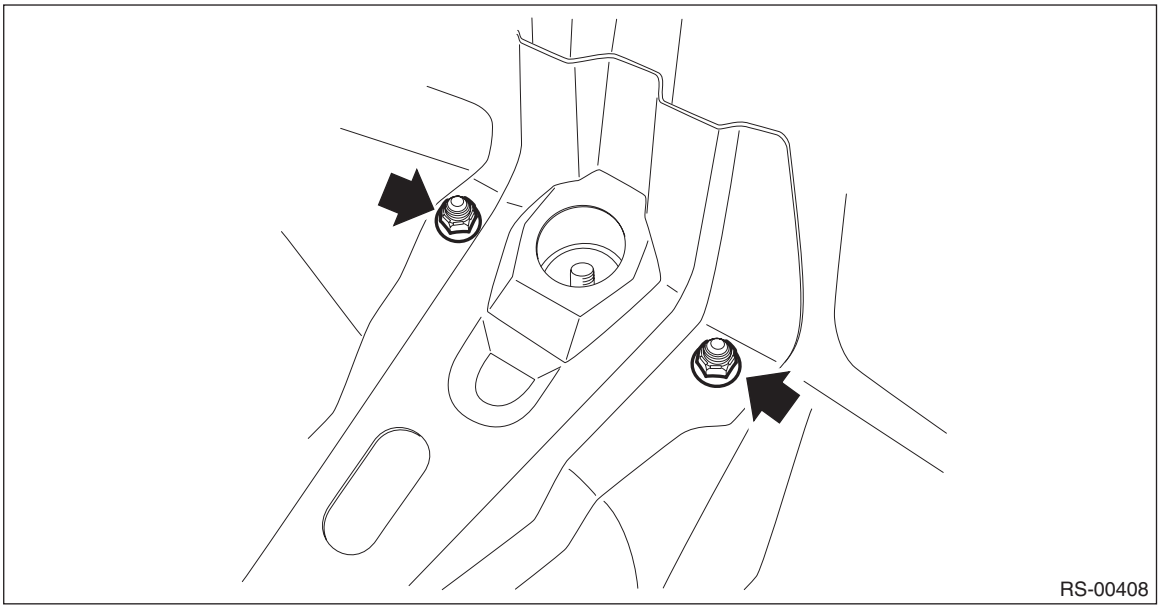
6) Remove the clips, and remove the trim panel - rear skirt.



7) Remove the lid upper rear (a) and cap rear strut (b) in the order from (1) to (6).



8) Remove the nuts on the upper side of rear strut assembly.



9) Lower the lateral link assembly - rear, and remove the rear strut assembly.

## B: INSTALLATION

**CAUTION:**
- **Be sure to use a new self-locking nut.**
- **Always tighten the bushing in the state where the vehicle is at curb weight and the wheels are in full contact with the ground.**

1) Install each part in the reverse order of removal.

***Tightening torque:***
***Sensor assembly - headlight beam leveler: 7.5 N·m (0.76 kgf-m, 5.5 ft-lb)***
***Rear suspension: <Ref. to RS-3, REAR SUSPENSION, COMPONENT, General Description.>***
***Rear strut: <Ref. to RS-5, REAR STRUT, COMPONENT, General Description.>***

2) Install the rear wheels.

***Tightening torque:***
***120 N·m (12.24 kgf-m, 88.5 ft-lb)***

3) Inspect the wheel alignment and adjust if necessary.
- Inspection: <Ref. to FS-7, INSPECTION, Wheel Alignment.>
- Adjustment: <Ref. to FS-12, ADJUSTMENT, Wheel Alignment.>

**CAUTION:**
**When the wheel alignment has been adjusted, perform "VDC sensor midpoint setting mode" of the VDC.**

4) Perform reinitialization of the auto headlight beam leveler system. (Model with auto headlight beam leveler) <Ref. to LI-17, REINITIALIZATION, PROCEDURE, Auto Headlight Beam Leveler System.>

## C: DISASSEMBLY

Refer to "Front Strut" in "FRONT SUSPENSION" section for disassembly. <Ref. to FS-45, DISASSEMBLY, Front Strut.>

## D: ASSEMBLY

Refer to "Front Strut" in "FRONT SUSPENSION" section for assembly. <Ref. to FS-46, ASSEMBLY, Front Strut.>

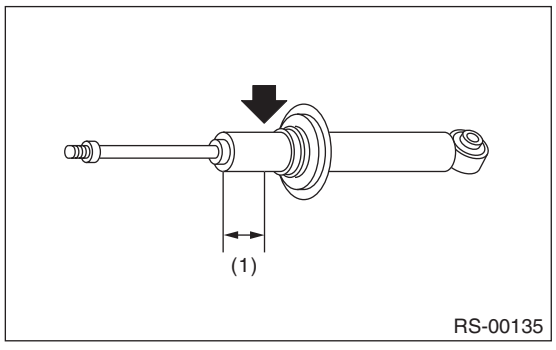
## E: INSPECTION

Refer to "Front Strut" in "FRONT SUSPENSION" section for inspection procedures. <Ref. to FS-48, INSPECTION, Front Strut.>

## F: DISPOSAL

**CAUTION:**
- **Before discarding the shock absorber, be sure to wear goggles to protect eyes from gas, oil and cutting powder.**
- **Do not disassemble the shock absorber or place it into a fire.**
- **When discarding gas filled shock absorbers, drill holes in them to purge the gas.**

1) Place the shock absorber on a level surface with the piston rod fully expanded.
2) Make a hole into the specified position 30 mm (1.18 in) deep using a drill with 2 — 3 mm (0.08 — 0.12 in) diameter.



(1) 40 mm (1.57 in)

# 10.General Diagnostic Table

## A: INSPECTION

### 1. IMPROPER VEHICLE POSTURE OR IMPROPER WHEEL ARCH HEIGHT

| Possible cause | Corrective action |
|---|---|
| (1) Permanent distortion or damaged coil spring | Replace. |
| (2) Rough operation of shock absorber | Replace. |
| (3) Installation of the wrong shock absorber | Replace with proper parts. |
| (4) Installation of the wrong coil spring | Replace with proper parts. |

### 2. POOR RIDE COMFORT

1) Large rebound shock
2) Rocking of the vehicle continues too long after running over bump and hump.
3) Excessive shock in bumping

| Possible cause | Corrective action |
|---|---|
| (1) Damaged coil spring | Replace. |
| (2) Overinflation of tires | Adjust. |
| (3) Improper wheel arch height | Replace the coil springs with new parts. |
| (4) Defective operation of shock absorber | Replace. |
| (5) Damage or deformation of shock absorber mount | Replace. |
| (6) Unsuitable length (maximum or minimum) of shock absorber | Replace with appropriate parts. |
| (7) Deformation or loss of bushing | Replace. |
| (8) Deformation or damage of helper in shock absorber | Replace. |
| (9) Oil leakage from the shock absorber | Replace. |

### 3. NOISE

| Possible cause | Corrective action |
|---|---|
| (1) Wear or damage of shock absorber component parts | Replace. |
| (2) Loosening of the suspension link or arm installing bolt | Tighten to the specified torque. |
| (3) Deformation or loss of bushing | Replace. |
| (4) Unsuitable length (maximum or minimum) of shock absorber | Replace with appropriate parts. |
| (5) Damaged coil spring | Replace. |
| (6) Wear or damage of the ball joint | Replace. |
| (7) Deformation of the clamp - stabilizer bushing | Replace. |

| P195/65R15 89H | 15 × 6J | 48 (1.89) | 100 (3.94) | 230 (2.3, 33) | 220 (2.2, 32) |
| P205/55R16 89V | 16 × 6$^1/_2$J | | | | |
| P205/50R17 88V | 17 × 7J | | | 220 (2.2, 32) | 210 (2.1, 30) |
| | 17 × 7JJ | | | | |
| T135/80D16 101M | 16 × 4T | 20 (0.79) | | 420 (4.2, 60) | |

- XV model

| Tire size | Wheel size | Inset mm (in) | P.C.D. mm (in) | Tire inflation pressure kPa (kgf/cm$^2$, psi) | | |
|---|---|---|---|---|---|---|
| | | | | Front wheel | | Rear wheel |
| P225/55R17 95H | 17 × 7J | 20 (0.79) | 100 (3.94) | MT | 220 (2.2, 32) | 210 (2.1, 30) |
| | | | | CVT | 230 (2.3, 33) | 220 (2.2, 32) |
| T145/90D16 106M | 16 × 4T | | | 420 (4.2, 60) | | |

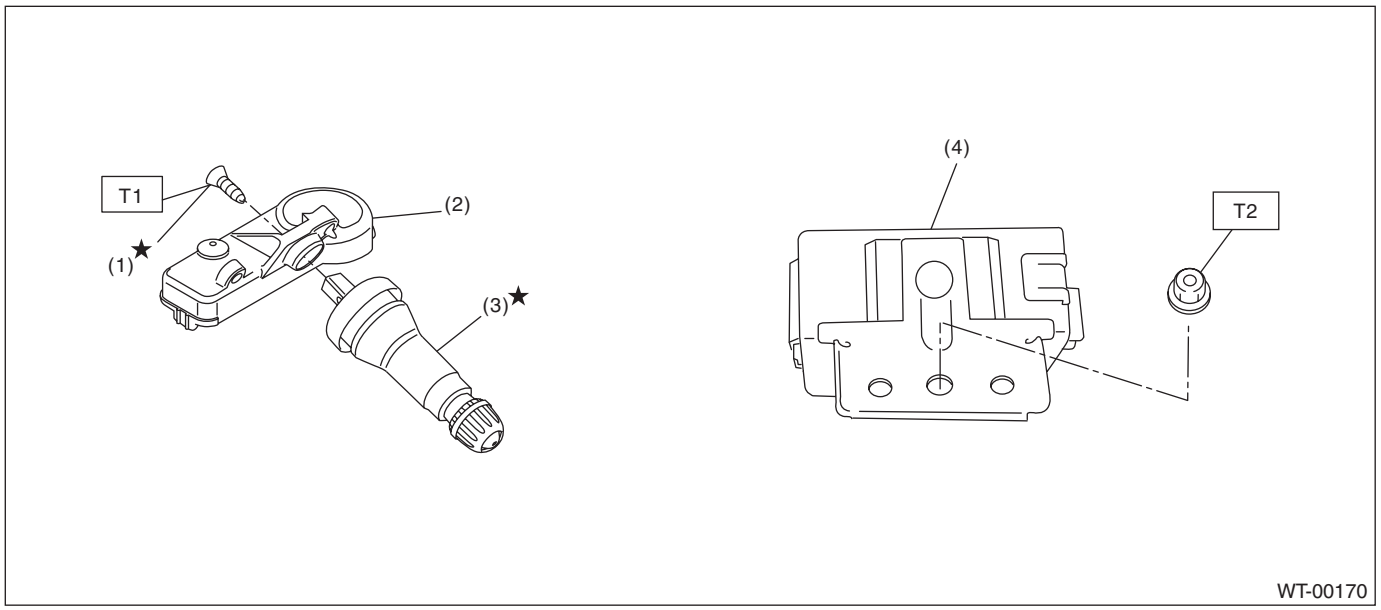
NOTE:
Size and inflation pressure of the standard equipment tire and spare tire for emergency are described on the “Tire inflation pressure” label attached to the body side of the driver’s door.

### 1. SERVICE DATA

| Part | Axial runout | Radial runout |
|---|---|---|
| Steel wheel | 1.5 mm (0.059 in) | |
| Aluminum wheel | 1.0 mm (0.039 in) | |

| Wheel balancing | Standard | Service limit |
|---|---|---|
| Dynamic unbalance | 5 g (0.18 oz) or less | |

## B: COMPONENT



(1) Screw
(2) Transmitter (Snap in type)
(3) Valve
(4) TPMS & keyless entry control module

***Tightening torque: N·m (kgf-m, ft-lb)***
***T1: 1.4 (0.14, 1.0)***
***T2: 7.5 (0.76, 5.5)***

## C: PREPARATION TOOL

### 1. GENERAL TOOL

| TOOL NAME | REMARKS |
|---|---|
| Air pressure gauge | Used for measuring tire air pressure. |
| Dial gauge | Used for measuring wheel runout. |
| Wheel balancer | Used for adjusting wheel balance. |

# 2. Tire and Wheel

## A: REMOVAL

1) Remove the hubcap. (model with hubcap) <Ref. to WT-8, REMOVAL, Full Wheel Cap.>
2) Lift up the vehicle.
3) Remove the wheel nut.
4) Remove the wheels.

**CAUTION:**
**When removing the wheels, be careful not to damage the bolt - hub.**

## B: INSTALLATION

1) Install the wheels to vehicle.
2) Tighten the wheel nuts to the specified torque.

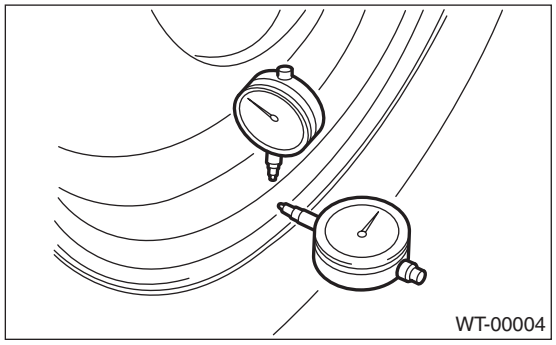
***Tightening torque:***
***120 N·m (12.24 kgf-m, 88.5 ft-lb)***

## C: INSPECTION

### 1. TIRE

**CAUTION:**
**When replacing a tire, make sure to use tires of the same size, construction and load range as originally installed.**

1) Tire size and tire inflation pressure check <Ref. to WT-2, SPECIFICATION, General Description.>
2) Cracks, damage and wear check
3) Tire runout check
   (1) Lift up the vehicle.
   (2) Slowly rotate the wheel to check rim “runout” using a dial gauge.



- Aluminum wheel

| Axial runout limit | Radial runout limit |
|---|---|
| 1.0 mm (0.039 in) | |

- Steel wheel

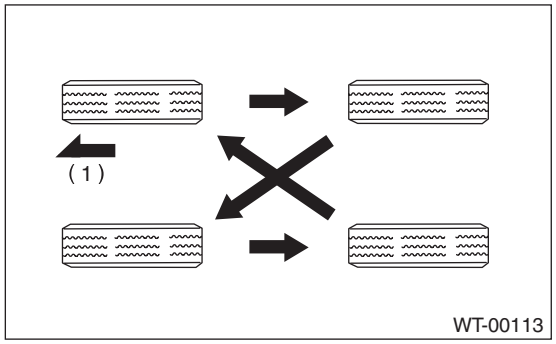
| Axial runout limit | Radial runout limit |
|---|---|
| 1.5 mm (0.059 in) | |

   (3) If the rim runout exceeds service limit, replace the wheel.

## 2. TIRE ROTATION

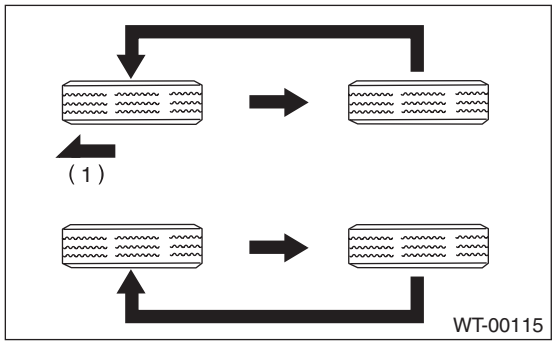
NOTE:
Rotate tires periodically (12,500 km/7,500 miles) in order to prolong life and to prevent uneven wear.
Rotate tires as shown in the figure depending on whether or not the direction of the tire rotation is specified.

- When the direction of tire rotation is not specified



(1) Front side of vehicle

- When the direction of tire rotation is specified

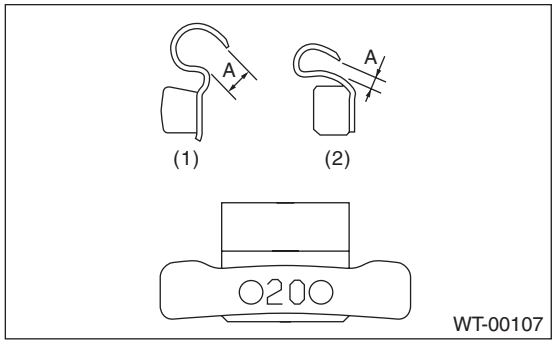


(1) Front side of vehicle

## 3. WHEEL BALANCING

1) Using the wheel balancer, measure wheel balance.
2) Adjust the wheel balancing.

NOTE:
- Unbalance after adjusting the wheel balancing should be 5 g (0.18 oz) or less.
- When using the adhesive type weight, degrease the surface where the adhesive type weight will be applied securely.
- After applying the adhesive type weight, apply a force to the weight and attain full adhesion.
- Using the knock-on type weight, check the size of the knock-on part.



(1) Knock-on type weight for aluminum wheel
(2) Knock-on type weight for steel wheel

***Service limit A:***
***Knock-on type weight for steel wheel: 2.0 mm (0.079 in)***
***Knock-on type weight for aluminum wheel: 5.0 mm (0.197 in)***

# 3. "T-type" Tire

## A: NOTE

"T-type" tire for temporary use is prepared as a spare tire.

**CAUTION:**
- **The "T-type" tire is only for temporary use. Replace with a conventional tire as soon as possible.**
- **Do not use tire chains for "T-type" tires. Doing so can damage the vehicle and the tires because the tires are too small in size to attach chains to.**
- **Do not drive at a speed greater than 80 km/h (50 MPH).**
- **Drive at as low a speed as possible and avoid bumps on the road.**

## B: REPLACEMENT

Refer to "Tire & Wheel" for removal and installation of the "T-type" tire. <Ref. to WT-4, Tire and Wheel.>

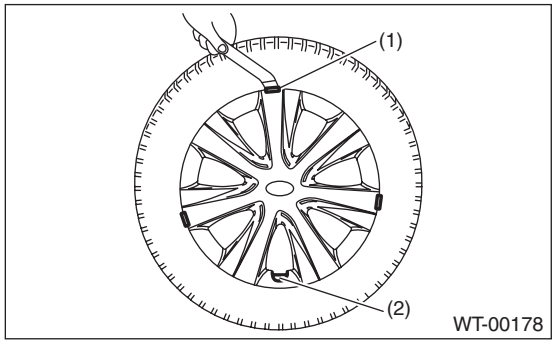
## C: INSPECTION

Refer to "Tire & Wheel" for inspection of the "T-type" tire. <Ref. to WT-4, TIRE, INSPECTION, Tire and Wheel.>

# 4. Full Wheel Cap

## A: REMOVAL

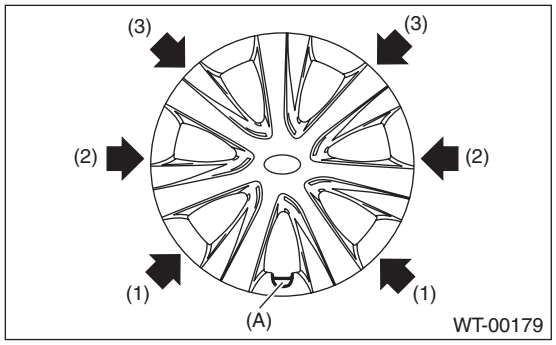
Insert a remover into the notch located diagonally to the valve, and remove the cap by prying the remover to the tire side.



(1) Cutout portion
(2) Valve hole

## B: INSTALLATION

1) Align the valve with the valve hole in the hubcap.
2) Install the hubcap by tapping it in the order from (1) to (3) described in the figure.



(A) Valve hole

## C: INSPECTION

Check for damage on the hubcap.

# 5. Tire Pressure Monitoring System

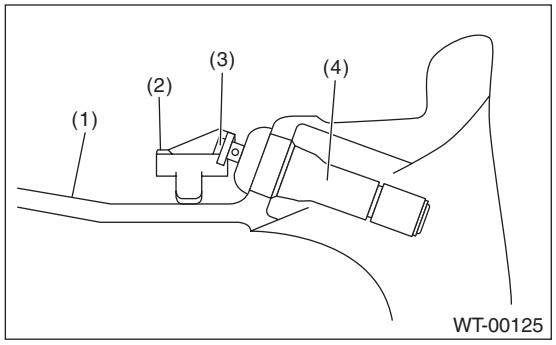
## A: REMOVAL

### 1. TRANSMITTER (TIRE INFLATION PRESSURE SENSOR)

1) Remove the wheels from the vehicle. <Ref. to WT-4, REMOVAL, Tire and Wheel.>
2) Remove the tires from wheels.

**CAUTION:**
**Use a tire changer when removing the tire from the wheel.**
3) Loosen the screw to remove the transmitter from the valve stem.

**CAUTION:**
**Do not reuse the valve and screw.**
**Replace the valve and screw with a new part even when reusing transmitter.**



(1) Wheel
(2) Transmitter
(3) Screw
(4) Valve

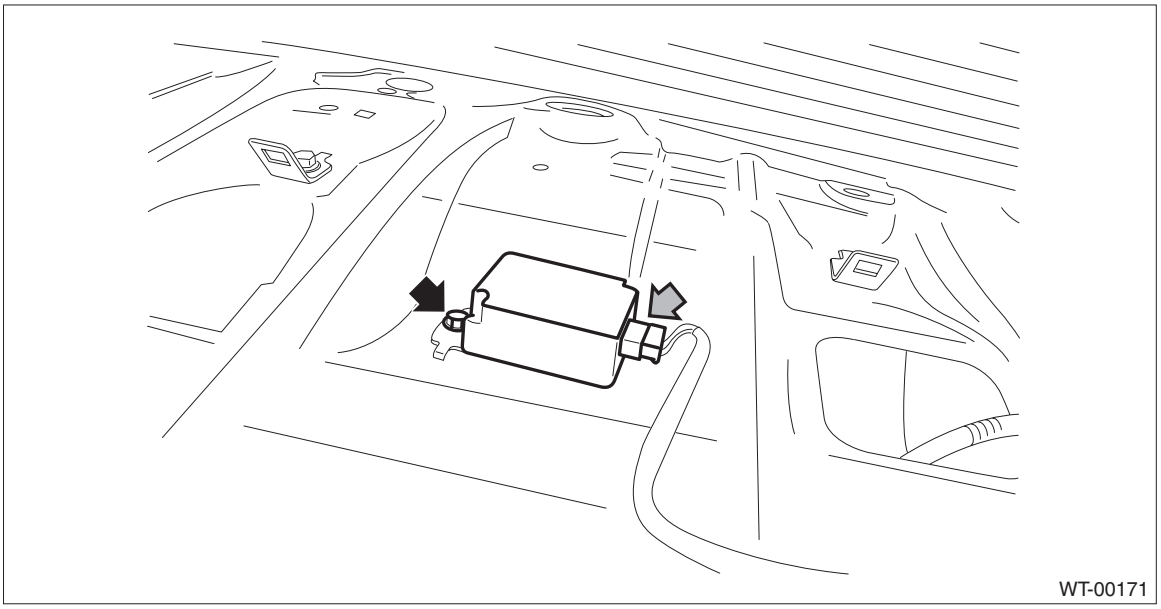
4) Remove the valve from the wheel.

## 2. TPMS & KEYLESS CONTROL MODULE

NOTE:
TPMS control module is integrated with the keyless entry control module.

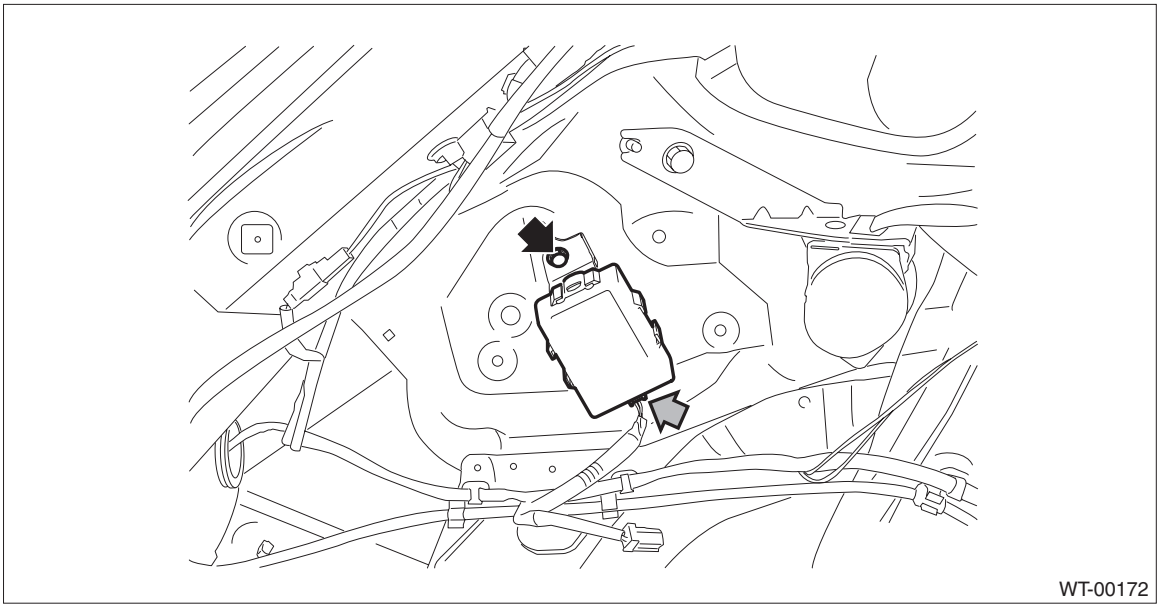
**4 door model**

1) Disconnect the ground cable from battery.
2) Remove the trim panel assembly - rear shelf. <Ref. to EI-112, REMOVAL, Rear Shelf Trim.>
3) Remove the TPMS & keyless control module.
   (1) Disconnect the connector.
   (2) Remove the bolt and then remove the TPMS & keyless control module.



**5 door model/XV model**

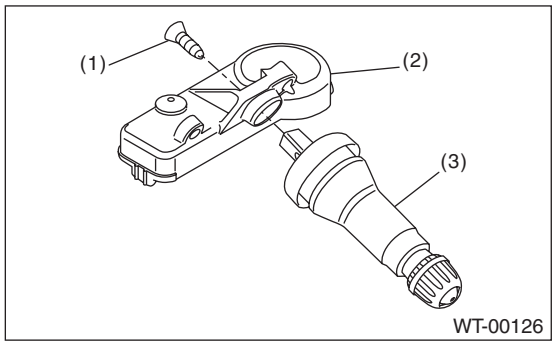
1) Disconnect the ground cable from battery.
2) Remove the trim panel - rear apron LH. <Ref. to EI-108, 5 DOOR MODEL/XV MODEL, REMOVAL, Rear Quarter Trim.>
3) Remove the TPMS & keyless control module.
   (1) Disconnect the connector.
   (2) Remove the bolt and then remove the TPMS & keyless control module.



# B: INSTALLATION

## 1. TRANSMITTER (TIRE INFLATION PRESSURE SENSOR)

**CAUTION:**
**Use the new transmitter assembly or replace the new valve and screw, when installing.**
1) Replace the valve and screw with a new part when reusing transmitter.

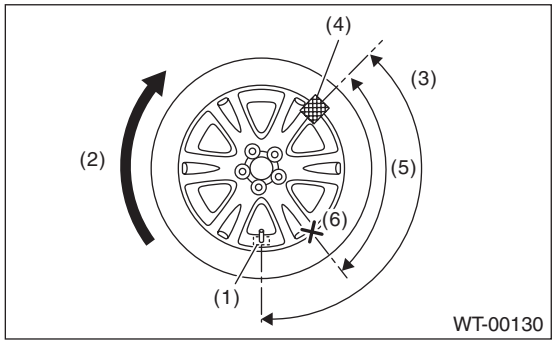


(1) Screw
(2) Transmitter
(3) Valve

***Tightening torque:***
***1.4 N·m (0.14 kgf-m, 1.0 ft-lb)***
2) Install the transmitter to the wheel by aligning it with valve hole.

NOTE:
When using the jig that pulls the valve cap by hooking its neck part, use another short-type cap.
3) Install the tires to wheels.

**CAUTION:**
- **Use a tire changer when installing tire to wheel.**
- **To prevent damaging the transmitter, set the tire changer boom in the position as shown in the figure.**



(1) Transmitter
(2) Direction of turn table rotation
(3) 135°
(4) Tire changer boom
(5) 90°
(6) Starting point for fitting the bead to the rim

4) Install the wheels to vehicle. <Ref. to WT-4, INSTALLATION, Tire and Wheel.>
5) Register the transmitter ID to the TPMS & keyless control module. <Ref. to TPM(diag)-13, Register Transmitter (ID).>

### 2. TPMS & KEYLESS CONTROL MODULE

Install each part in the reverse order of removal.

***Tightening torque:***
***13 N·m (1.33 kgf-m, 9.6 ft-lb)***

## C: ADJUSTMENT

Re-register the transmitter ID when transmitter has been replaced. <Ref. to TPM(diag)-13, Register Transmitter (ID).>

# 6. General Diagnostic Table

## A: INSPECTION

| Symptoms | Possible cause | Corrective action |
|---|---|---|
| Wheel is out of balance. | Improperly inflated tire. | Adjust the tire pressure. |
| | Uneven wear | Check the tire referring to “Abnormal tire wear” in this table, carry out the procedure and replace the tire. |
| | Front wheel alignment | Check or adjust the front wheel alignment.<br>• Inspection: <Ref. to FS-7, INSPECTION, Wheel Alignment.><br>• Adjustment: <Ref. to FS-12, ADJUSTMENT, Wheel Alignment.> |
| | Rear wheel alignment | Check or adjust the rear wheel alignment.<br>• Inspection: <Ref. to FS-7, INSPECTION, Wheel Alignment.><br>• Adjustment: <Ref. to FS-12, ADJUSTMENT, Wheel Alignment.> |
| | Front strut | Check the front strut. <Ref. to FS-48, INSPECTION, Front Strut.> |
| | Rear shock absorber | Check the rear shock absorber. <Ref. to RS-32, INSPECTION, Rear Shock Absorber.> |
| | Housing ASSY - front axle | Check the housing assembly - front axle. <Ref. to DS-34, INSPECTION, Front Hub Unit Bearing.> |
| | Hub unit COMPL - front axle | Check the hub unit COMPL - front axle. <Ref. to DS-34, INSPECTION, Front Hub Unit Bearing.> |
| | Hub unit COMPL - rear axle | Check the hub unit COMPL - rear axle. <Ref. to DS-56, INSPECTION, Rear Hub Unit Bearing.> |
| Vehicle is abnormally out of balance. | Improperly inflated tire. | Adjust the tire pressure. |
| | Uneven wear | Check the tire referring to “Abnormal tire wear” in this table, carry out the procedure and replace the tire. |
| | Front stabilizer | Inspect the front stabilizer. |
| | Front wheel alignment | Check or adjust the front wheel alignment.<br>• Inspection: <Ref. to FS-7, INSPECTION, Wheel Alignment.><br>• Adjustment: <Ref. to FS-12, ADJUSTMENT, Wheel Alignment.> |
| | Rear wheel alignment | Check or adjust the rear wheel alignment.<br>• Inspection: <Ref. to FS-7, INSPECTION, Wheel Alignment.><br>• Adjustment: <Ref. to FS-12, ADJUSTMENT, Wheel Alignment.> |
| Abnormal wheel vibration | Improperly inflated tire. | Adjust the tire pressure. |
| | Uneven wear | Check the tire referring to “Abnormal tire wear” in this table, carry out the procedure and replace the tire. |
| | Improper wheel balancing | Check the wheel balance. <Ref. to WT-6, WHEEL BALANCING, INSPECTION, Tire and Wheel.> |
| | Housing ASSY - front axle | Check the housing assembly - front axle. <Ref. to DS-34, INSPECTION, Front Hub Unit Bearing.> |
| | Hub unit COMPL - front axle | Check the hub unit COMPL - front axle. <Ref. to DS-34, INSPECTION, Front Hub Unit Bearing.> |
| | Hub unit COMPL - rear axle | Check the hub unit COMPL - rear axle. <Ref. to DS-56, INSPECTION, Rear Hub Unit Bearing.> |

| Symptoms | Possible cause | Corrective action |
|---|---|---|
| Abnormal tire wear | Improperly inflated tire. | Adjust the tire pressure. |
| | Improper wheel balancing | Check the wheel balance. <Ref. to WT-6, WHEEL BALANCING, INSPECTION, Tire and Wheel.> |
| | Front wheel alignment | Check or adjust the front wheel alignment.<br>• Inspection: <Ref. to FS-7, INSPECTION, Wheel Alignment.><br>• Adjustment: <Ref. to FS-12, ADJUSTMENT, Wheel Alignment.> |
| | Rear wheel alignment | Check or adjust the rear wheel alignment.<br>• Inspection: <Ref. to FS-7, INSPECTION, Wheel Alignment.><br>• Adjustment: <Ref. to FS-12, ADJUSTMENT, Wheel Alignment.> |

# 1. Basic Diagnostic Procedure

## A: PROCEDURE

**CAUTION:**
**Before removal or installation, be sure to remove any foreign matter (dust, moisture, oil, etc.) from the TPMS & keyless entry control module connector.**

NOTE:
To check harness for open or short circuits, shake the suspected trouble spot or connector.

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK PRE-INSPECTION.**<br>1) Check with the user regarding when the warning light lit or started blinking.<br>2) Before performing diagnostics, check all components which may adversely affect the tire pressure monitor system. <Ref. to TPM(diag)-3, INSPECTION, General Description.> | Is the component that might affect the tire pressure monitor system normal? | Go to step **2**. | Repair or replace each component. |
| 2 | **CHECK DIAGNOSTIC TROUBLE CODE (DTC).**<br>1) Turn the ignition switch to OFF.<br>2) Connect the Subaru Select Monitor to data link connector.<br>3) Turn the ignition switch to ON and run the Subaru Select Monitor.<br>NOTE:<br>If the communication function of the Subaru Select Monitor cannot be executed normally, check the communication circuit. <Ref. to TPM(diag)-7, COMMUNICATION FOR INITIALIZING IMPOSSIBLE, INSPECTION, Subaru Select Monitor.><br>4) Read the DTC. <Ref. to TPM(diag)-10, OPERATION, Read Diagnostic Trouble Code (DTC).> | Is DTC displayed? | Go to step **4**. | Go to step **3**. |
| 3 | **PERFORM GENERAL DIAGNOSTICS.**<br>1) Perform the inspection by referring to “General Diagnostic Table”. <Ref. to TPM(diag)-31, General Diagnostic Table.><br>2) Perform the Clear Memory Mode. <Ref. to TPM(diag)-11, OPERATION, Clear Memory Mode.><br>3) Perform the Inspection Mode. <Ref. to TPM(diag)-15, Inspection Mode.><br>4) Read the DTC. <Ref. to TPM(diag)-10, OPERATION, Read Diagnostic Trouble Code (DTC).><br>Check the DTC is not displayed. | Does the tire pressure warning light illuminates for about 2 seconds and then foes off after turning on the ignition switch, and then go out? | Finish the diagnosis. | Check the tire inflation pressure warning light. <Ref. to TPM(diag)-16, Tire Pressure Warning Light / Trouble Indicator Light Illumination Pattern.> |
| 4 | **PERFORM DIAGNOSIS.**<br>1) Refer to “List of Diagnostic Trouble Code (DTC)”.<br>2) Correct the cause of trouble.<br>3) Perform the Clear Memory Mode. <Ref. to TPM(diag)-11, OPERATION, Clear Memory Mode.><br>4) Perform the drive test.<br>Drive the vehicle at 40 km/h (25 MPH) or faster for at least 10 minutes.<br>5) Read the DTC. <Ref. to TPM(diag)-10, OPERATION, Read Diagnostic Trouble Code (DTC).> | Is DTC displayed? | Repeat steps 1 to 4 until DTC is not shown. | Finish the diagnosis. |

# 2. General Description

## A: CAUTION

### 1. SUPPLEMENTAL RESTRAINT SYSTEM "AIRBAG"

Airbag system wiring harness is routed near the TPM control module.

**CAUTION:**
**• Do not use electrical test equipment on any of the airbag system wiring harness circuits.**
**• Be careful not to damage the wiring harness of the airbag system when servicing the TPMS & keyless entry control module.**

### 2. TPMS & KEYLESS ENTRY CONTROL MODULE

• If the transmitter is replaced, ID registration for the transmitter is required. <Ref. to TPM(diag)-13, OPERATION, Register Transmitter (ID).>
• When adjusting tire pressure indoors in winter, there is a big temperature difference between the indoor facilities and outside. Once the car is outside where the temperature is lower, the air pressure in the tires will drop, causing the tire pressure warning light to illuminate, even if the pressure in the tires was adjusted to standard values indoors. To avoid this, it is necessary to adjust the tire pressure to the high side in consideration of the difference in temperature between inside and outside according to the following table.
• P195/65R15, P205/55R16, P225/55R17 (CVT)

| Temperature °C (°F) | Indoor temperature | 15.5 (60) | | |
|---|---|---|---|---|
| | Ambient temperature | –1 (30) | –12 (10) | –23 (–10) |
| Air pressure kPa (psi) | Front | 250 (36) | 265 (38) | 280 (40) |
| | Rear | 240 (35) | 255 (37) | 270 (39) |

• P205/50R17, P225/55R17 (MT)

| Temperature °C (°F) | Indoor temperature | 15.5 (60) | | |
|---|---|---|---|---|
| | Ambient temperature | –1 (30) | –12 (10) | –23 (–10) |
| Air pressure kPa (psi) | Front | 240 (35) | 255 (37) | 270 (39) |
| | Rear | 230 (33) | 245 (35) | 255 (37) |

## B: INSPECTION

Before performing diagnosis, check the following item which might affect the quality of the tire pressure monitoring system.

### 1. TIRE

• Inspect that the tire pressure is within the specification while the tire is cool. (Refer to Tire Caution Label.)
• Check the tires for damage or the insertion of foreign matters.

### 2. BATTERY

Check that amount of battery fluid, gravity and voltage are within the specifications.

***Standard voltage: 12 V or more***

***Specific gravity: 1.260 or more***

# C: PREPARATION TOOL

## 1. SPECIAL TOOL

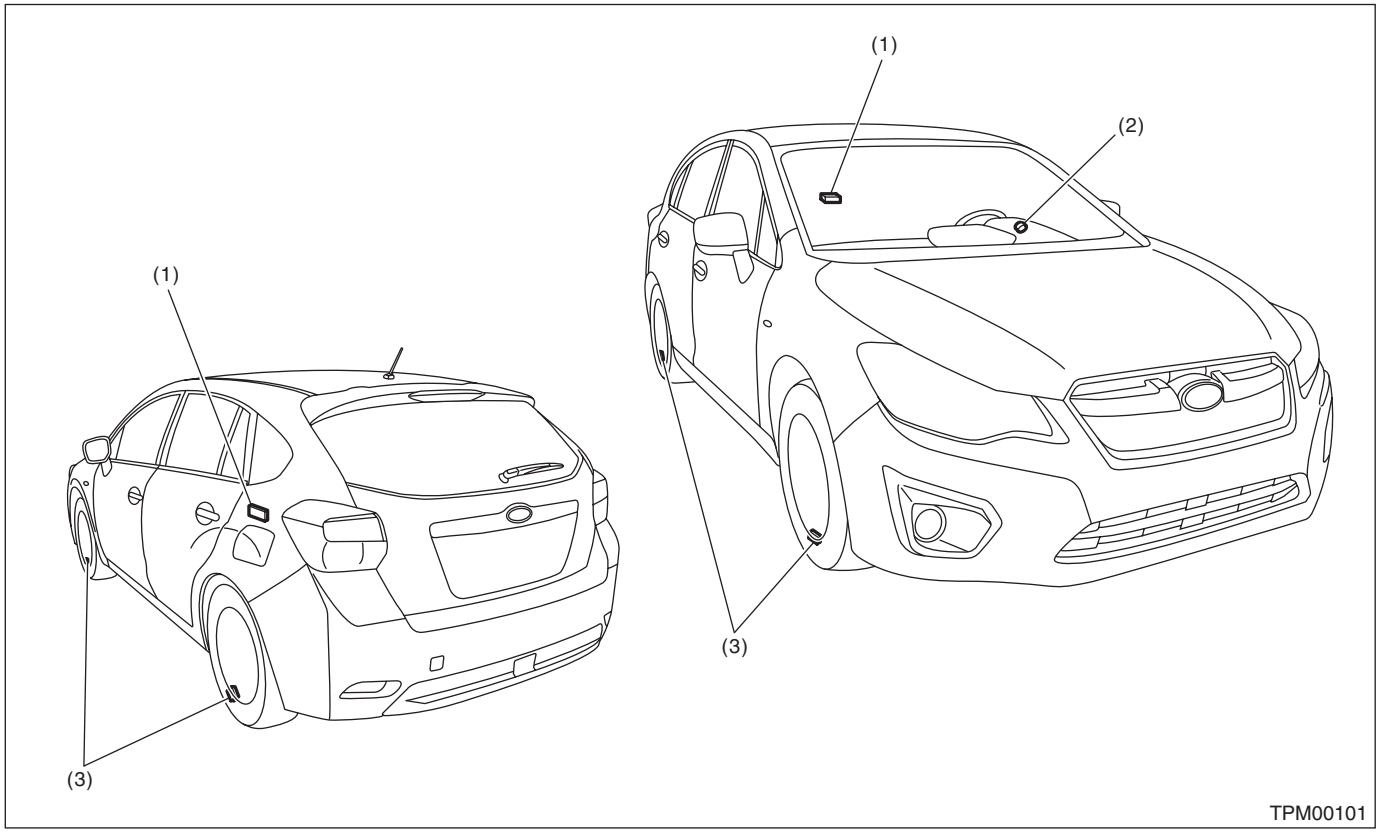
| ILLUSTRATION | TOOL NUMBER | DESCRIPTION | REMARKS |
|---|---|---|---|
|  ST1B022XU0 | 1B022XU0 | SUBARU SELECT MONITOR III KIT | Used for troubleshooting the electrical system. |

## 2. GENERAL TOOL

| TOOL NAME | REMARKS |
|---|---|
| Circuit tester | Used for measuring resistance, voltage and current. |
| Transmitter registration tool | Used to register the transmitter ID. Manufacturer: Kent-Moore Item number: J45295 |

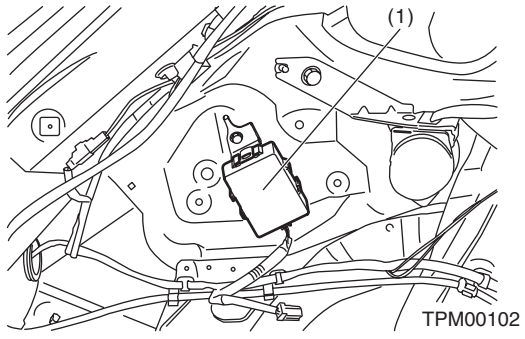
# 3. Electrical Component Location

## A: LOCATION

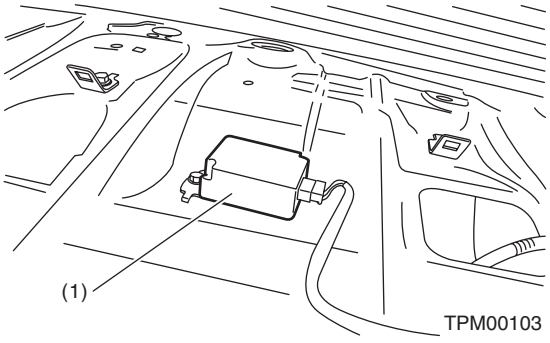


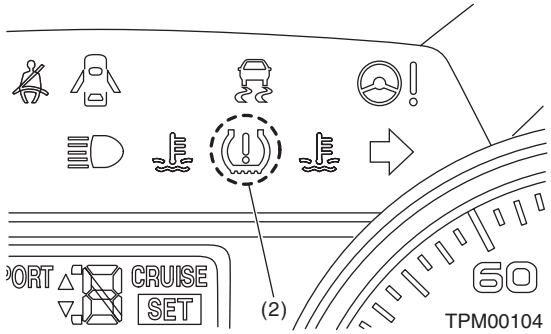
(1) TPMS & keyless entry control module
(2) Tire pressure warning light
(3) Snap-in type transmitter

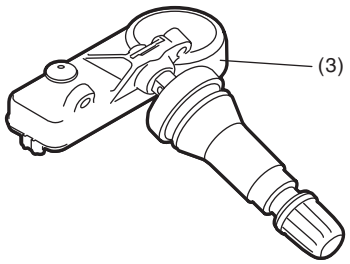
• 5 door model/XV model



• 4 door model







# 4. Control Module I/O Signal

## B: WIRING DIAGRAM

<Ref. to WI-148, WIRING DIAGRAM, Tire Pressure Monitoring System.>

# 5. Subaru Select Monitor

## A: OPERATION

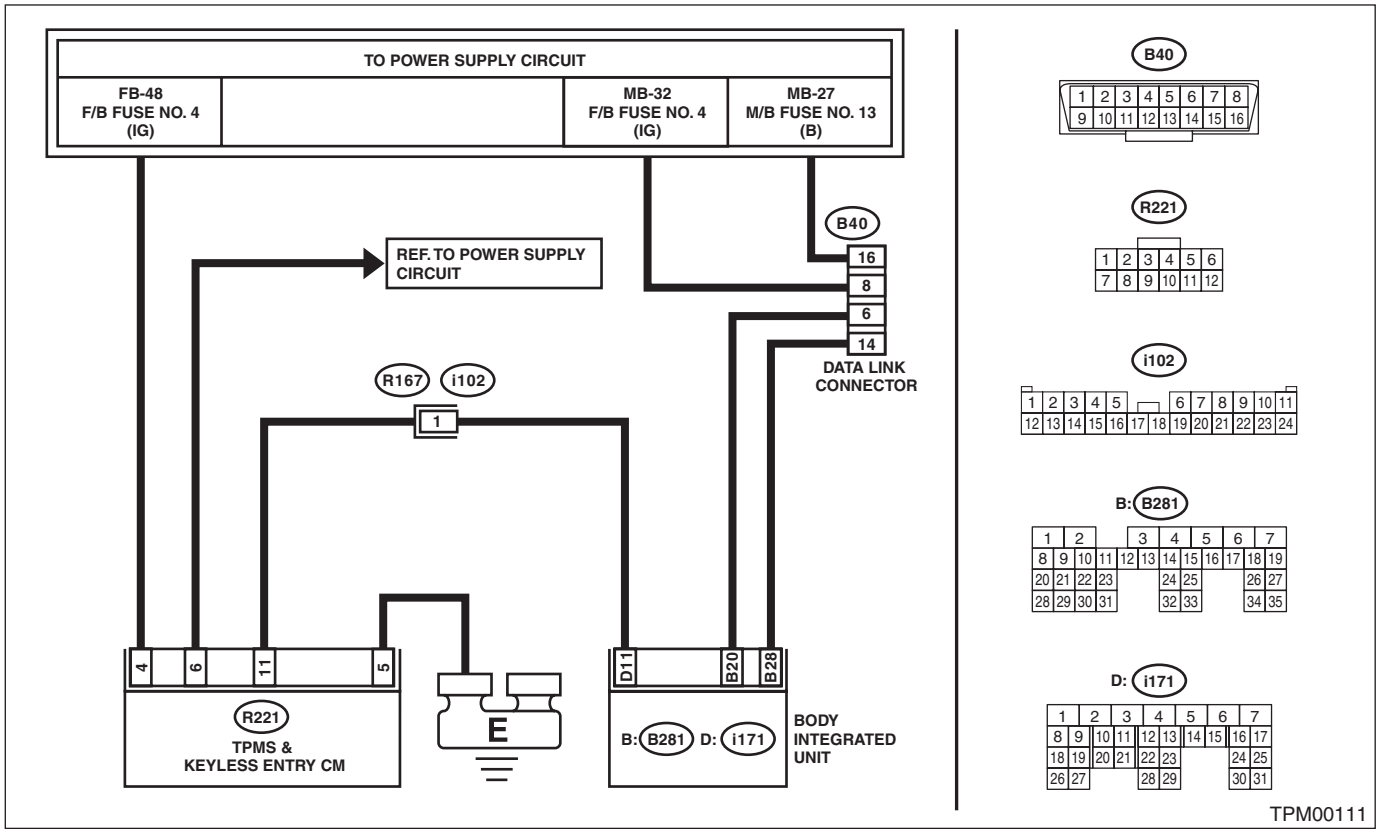
For the operation procedure, refer to the “PC application help for Subaru Select Monitor”.

NOTE:
If TPMS & keyless entry control module and Subaru Select Monitor cannot communicate, check the communication circuit. <Ref. to TPM(diag)-7, INSPECTION, Subaru Select Monitor.>

## B: INSPECTION

### 1. COMMUNICATION FOR INITIALIZING IMPOSSIBLE

**DETECTING CONDITION:**
Defective harness connector
**TROUBLE SYMPTOM:**
Communication is impossible between the TPMS & keyless entry control module and the Subaru Select Monitor.
**WIRING DIAGRAM**:
Tire Pressure Monitoring System <Ref. to WI-148, WIRING DIAGRAM, Tire Pressure Monitoring System.>



| Step | | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK IGNITION SWITCH.** | Is the ignition switch ON? | Go to step **2**. | Turn the ignition switch to ON, and select TPM mode using Subaru Select Monitor. |
| 2 | **CHECK BATTERY.** | Is the voltage 11 V or more? | Go to step **3**. | Charge or replace the battery. |
| 3 | **CHECK BATTERY TERMINAL.** | Is there poor contact at battery terminal? | Repair or tighten the battery terminal. | Go to step **4**. |

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 4 | **CHECK SUBARU SELECT MONITOR COMMUNICATION.**<br>1) Turn the ignition switch to ON.<br>2) Using the Subaru Select Monitor, check whether communication to other systems can be executed normally. | Is the system name displayed on Subaru Select Monitor? | Go to step **8**. | Go to step **5**. |
| 5 | **CHECK SUBARU SELECT MONITOR COMMUNICATION.**<br>1) Turn the ignition switch to OFF.<br>2) Disconnect the TPMS & keyless entry control module connector.<br>3) Turn the ignition switch to ON.<br>4) Check whether communication to other systems can be executed normally. | Is the system name displayed on Subaru Select Monitor? | Replace the TPMS & keyless entry control module. | Go to step **6**. |
| 6 | **CHECK HARNESS CONNECTOR BETWEEN EACH CONTROL MODULE AND BODY INTEGRATED UNIT.**<br>1) Turn the ignition switch to OFF.<br>2) Disconnect the TPMS & keyless entry control module.<br>3) Measure the resistance between the body integrated unit and chassis ground.<br>***Connector & terminal***<br>***(B40) No. 6 — Chassis ground:***<br>***(B40) No. 14 — Chassis ground:*** | Is the resistance 1 MΩ or more? | Go to step **7**. | Repair the harness and connector between each control module and body integrated unit. |
| 7 | **CHECK OUTPUT SIGNAL TO TPMS & KEYLESS ENTRY CONTROL MODULE.**<br>1) Turn the ignition switch to ON.<br>2) Measure the voltage between TPMS & keyless entry control module and chassis ground.<br>***Connector & terminal***<br>***(B40) No. 6 (+) — Chassis ground (–):***<br>***(B40) No. 14 (+) — Chassis ground (–):*** | Is the voltage less than 1 V? | Go to step **8**. | Repair the harness and connector between each control module and body integrated unit. |
| 8 | **CHECK HARNESS CONNECTOR BETWEEN TPMS & KEYLESS ENTRY CONTROL MODULE AND BODY INTEGRATED UNIT.**<br>1) Turn the ignition switch to OFF.<br>2) Measure the resistance between TPMS & keyless entry control module connector and body integrated unit.<br>***Connector & terminal***<br>***(R221) No. 11 — (i171) No. 11:*** | Is the resistance less than 0.5 Ω? | Go to step **9**. | Repair the harness and connector between TPMS & keyless entry control module and body integrated unit. |
| 9 | **CHECK TPMS & KEYLESS ENTRY CONTROL MODULE CONNECTOR.** | Is the connector inserted into the TPMS & keyless entry control module until it locks? | Go to step **10**. | Insert the connector into the TPMS & keyless entry control module. |
| 10 | **CHECK POWER SUPPLY CIRCUIT.**<br>1) Turn the ignition switch to ON.<br>2) Measure the ignition power supply voltage between TPMS & keyless entry control module connector and chassis ground.<br>***Connector & terminal***<br>***(R221) No. 4 (+) — Chassis ground (–):*** | Is the voltage 10 — 15 V? | Go to step **11**. | Repair open circuit of the harness between TPMS & keyless entry control module and battery. |

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 11 | **CHECK HARNESS CONNECTOR BETWEEN TPMS & KEYLESS ENTRY CONTROL MODULE AND CHASSIS GROUND.**<br>1) Turn the ignition switch to OFF.<br>2) Disconnect the connector from the TPMS & keyless entry control module.<br>3) Measure the resistance of harness between TPMS & keyless entry control module and chassis ground.<br>***Connector & terminal***<br>***(R221) No. 5 — Chassis ground:*** | Is the resistance less than 0.5 Ω? | Go to step **12**. | Repair open circuit of the harness of the TPMS & keyless entry control module. |
| 12 | **CHECK POOR CONTACT OF CONNECTOR.** | Is there poor contact in TPMS & keyless entry control module power supply, ground circuit and body integrated unit? | Repair the connector. | Replace the TPMS & keyless entry control module. |

# 6. Read Diagnostic Trouble Code (DTC)

## A: OPERATION

For operation procedures, refer to the “PC application help for Subaru Select Monitor”.

NOTE:
• For details concerning DTCs, refer to List of Diagnostic Trouble Code (DTC). <Ref. to TPM(diag)-20, List of Diagnostic Trouble Code (DTC).>
• All DTCs detected will be displayed.
• If a particular DTC is not properly stored in memory (due to a voltage drop of the TPMS & keyless entry control module power supply, etc.) when a problem occurs, a DTC suffixed with a question mark will appears on the Subaru Select Monitor display. This shows it may be an unreliable reading.
• When DTC is not displayed, check the indicator circuit and communication circuit. <Ref. to TPM(diag)-16, Tire Pressure Warning Light / Trouble Indicator Light Illumination Pattern.>

# 7. Clear Memory Mode

## A: OPERATION

For the operation procedure, refer to the “PC application help for Subaru Select Monitor”.

# 8. Read Current Data

## A: OPERATION

For the operation procedure, refer to the “PC application help for Subaru Select Monitor”.

## B: LIST

| Display | Contents to be displayed | Unit of measure |
|---|---|---|
| Tire 1 FN code | LEARN, LOW BAT, OFF, WAKE, RE ME, NORMAL | LEARN: Transmitted transmitter ID using the transmitter registration tool<br>LOW BAT: Transmitter battery voltage running low<br>OFF: Transmitter function stops (no data transmission)<br>RE ME: Tire air changes ±8.4 kPa<br>WAKE: When data transmission is started from a stopped state.<br>NORMAL: Conditions other than above |
| Tire 2 FN code | | |
| Tire 3 FN code | | |
| Tire 4 FN code | | |
| Tire 1 air pressure | Value converted to tire pressure from data delivered from transmitter is displayed. (The figure may differ from the actual measured values.) | kPa, psig, mmHg, inHg |
| Tire 2 air pressure | | kPa, psig, mmHg, inHg |
| Tire 3 air pressure | | kPa, psig, mmHg, inHg |
| Tire 4 air pressure | | kPa, psig, mmHg, inHg |
| Vehicle Speed | Vehicle speed signal which is input in control module | km/h, MPH |
| Pressure warning | Threshold where tire pressure warning light illuminates | kPa, psig, mmHg, inHg |
| Return pressure | Threshold where tire pressure warning light goes out | kPa, psig, mmHg, inHg |

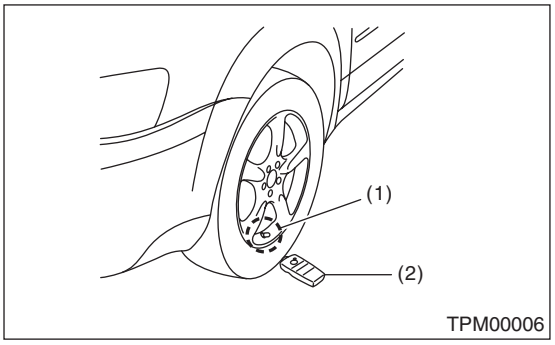
# 9. Register Transmitter (ID)

## A: OPERATION

Perform the registration procedure of the transmitter in the following cases:
- Transmitter replaced.
- TPMS & keyless entry control module replaced.

NOTE:
- If registration of the transmitter ID is not possible after two attempts, replace the TPMS & keyless entry control module.
- During the registration, turn the ignition switch to OFF and end the Subaru Select Monitor. Or if the registration is not performed for 5 minutes or more, the registration mode is cancelled.
- When rotating tires, there is no affect on the performance or functions of the tire pressure monitoring control module even if the transmitter (ID) is not registered, however, the tire position displayed on the Subaru Select Monitor will be incorrect.

1) Adjust all tire pressures to the specifications.
2) Connect Subaru Select Monitor and select the {Each System Check} on the «Main Menu».
3) On «System Selection Menu» display, select {Tire pressure monitor}.
4) After the {Tire pressure monitor} is displayed, select [OK].
5) On «Tire pressure monitor diagnosis» display, select {Transmitter ID regist confirm}.
6) {ID registration mode When execute Registered ID is deleted. Continue?} is displayed, select [OK].
7) Contact the transmitter registration tool to the side wall area near the air valve on the front left tire, and press the switch. The transmitter ID is sent to the TPMS & keyless entry control module. (At that time, the tire pressure warning light blinks to confirm that the registration has started.)



(1) Air valve (transmitter)
(2) Transmitter registration tool

NOTE:
- The registration order of transmitter ID is not specified.
- The transmitter registration tool is used by touching the side wall area near the transmitter.
- When registration of each tire is completed, {ID registration completed} is displayed on the Select Monitor screen.
- If registration procedure stop in the halfway (turning ignition switch to OFF, wrong registration order, etc), proceed from step 5).

8) When ID registration is completed, the tire pressure warning light remains lit for approximately 2 seconds, to end the registration. Switch to the screen displaying the transmitter ID on the Subaru Select Monitor display. <Ref. to TPM(diag)-14, Display Transmitter (ID).>
9) Check the transmitter ID that was registered, then perform a driving test. <Ref. to TPM(diag)-15, Inspection Mode.>

# 10.Display Transmitter (ID)

## A: OPERATION

For the operation procedure, refer to the “PC application help for Subaru Select Monitor”.

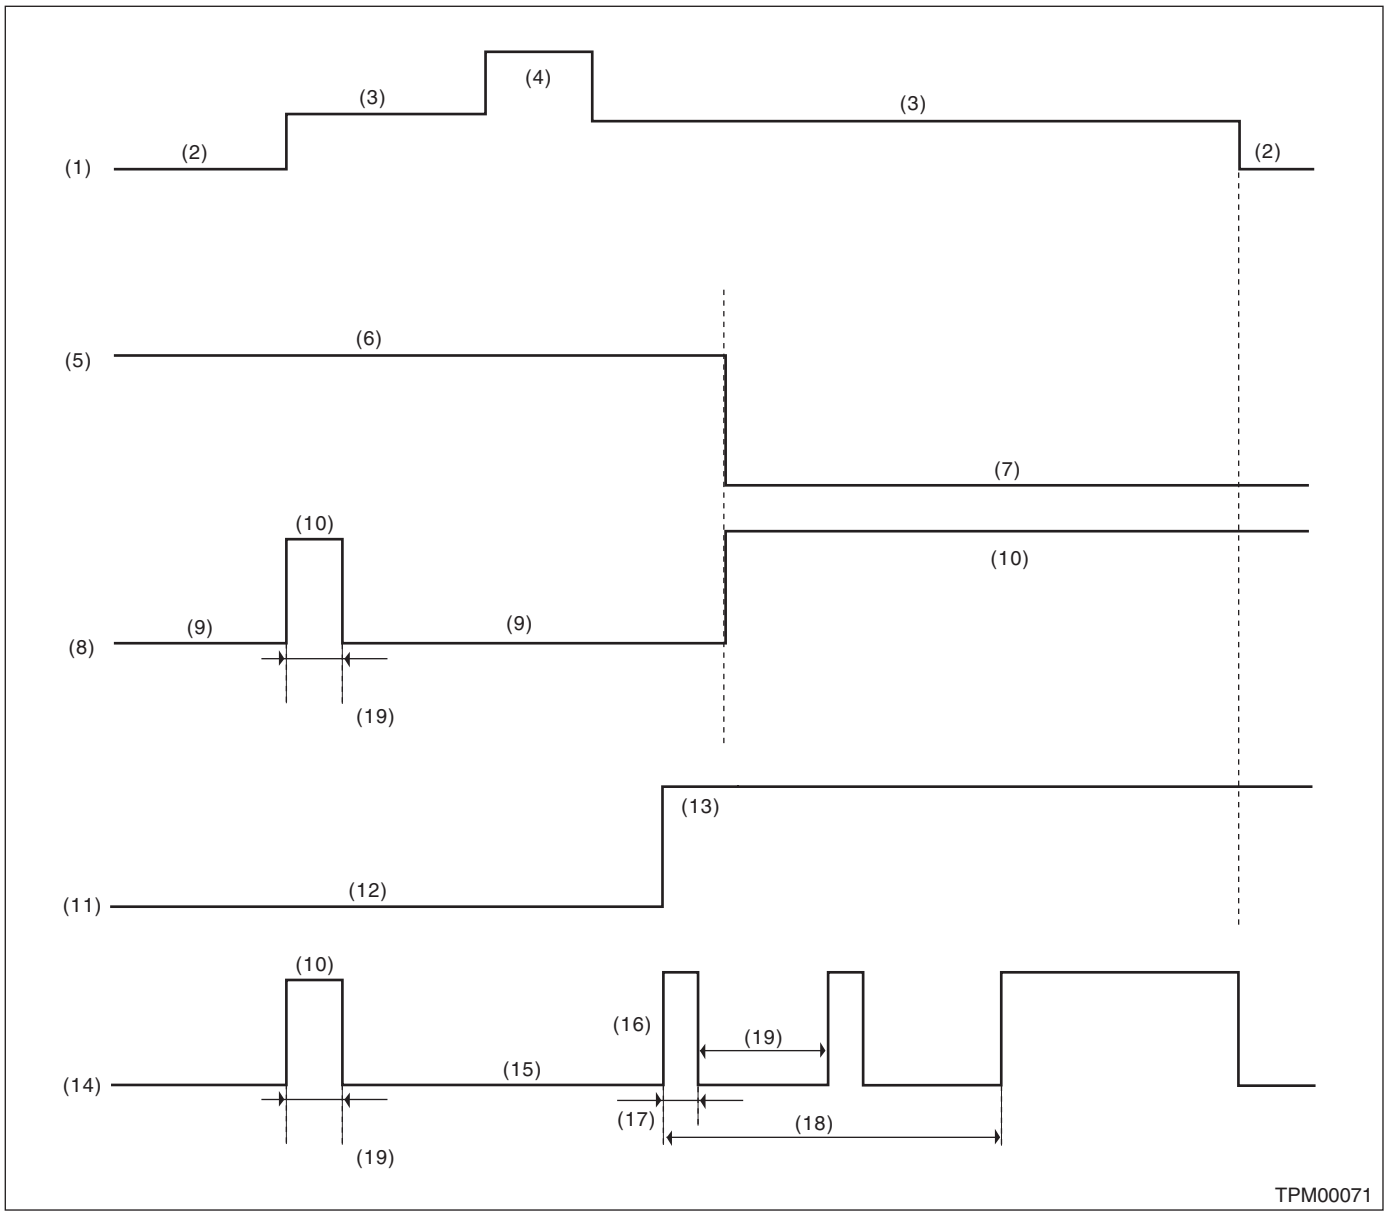
# 11.Inspection Mode

## A: PROCEDURE

Reproduce the malfunction occurrence condition as much as possible. Drive the vehicle at 40 km/h (25 MPH) or faster for at least ten minutes.

# 12. Tire Pressure Warning Light / Trouble Indicator Light Illumination Pattern

## A: INSPECTION



(1) Ignition switch
(2) OFF
(3) ON
(4) Start
(5) Tire inflation pressure condition
(6) Meet the specification
(7) Less than standard value (For the pressure warning level, refer to "CURRENT DATA".) <Ref. to TPM(diag)-12, LIST, Read Current Data.>
(8) Tire inflation pressure warning light (pressure condition)
(9) Light OFF
(10) Light ON
(11) System status
(12) Normal
(13) Malfunction
(14) Tire inflation pressure warning light (system condition)
(15) Light OFF
(16) Blink
(17) 1 second
(18) Blinks 25 times
(19) 2 seconds

1) When the tire pressure warning light does not illuminate in accordance with this illumination pattern, there must be an electrical malfunction.
2) If the tire pressure warning light does not go off, check the TPMS & keyless entry control module/warning light circuit and the combination meter circuit. <Ref. to TPM(diag)-18, TIRE PRESSURE WARNING LIGHT DOES NOT COME OFF, Tire Pressure Warning Light / Trouble Indicator Light Illumination Pattern.>

NOTE:
If the problem is fixed while driving at approximately 40 km/h (25 MPH) after the tire pressure warning light blinks/lights, the warning light goes out and the tire pressure monitor system operates normally. (If there is a decrease in tire pressure, or a malfunction of the system, the malfunction history is displayed.)

## B: TIRE PRESSURE WARNING LIGHT DOES NOT COME ON

**DETECTING CONDITION:**
Defective combination meter

**TROUBLE SYMPTOM:**
When the ignition switch is turned to ON, the tire pressure warning light does not turn on (for approx. 2 seconds).

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK DIAGNOSTIC TROUBLE CODE (DTC).**<br>Connect the Subaru Select Monitor, and read the Diagnostic Trouble Code. <Ref. to TPM(diag)-10, OPERATION, Read Diagnostic Trouble Code (DTC).> | Is diagnostics code (DTC) displayed? | Perform the diagnosis according to the DTC. <Ref. to TPM(diag)-20, List of Diagnostic Trouble Code (DTC).> | Replace the combination meter. <Ref. to IDI-17, REMOVAL, Combination Meter.> |

## C: TIRE PRESSURE WARNING LIGHT DOES NOT COME OFF

**DETECTING CONDITION:**

- Defective combination meter
- Tires pressure drop
- Transmitter ID not registered

**TROUBLE SYMPTOM:**

Tire pressure warning light remains illuminating after engine starts.

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK DTC.**<br>Connect the Subaru Select Monitor, and read the Diagnostic Trouble Code. <Ref. to TPM(diag)-10, OPERATION, Read Diagnostic Trouble Code (DTC).> | Is a DTC displayed? | Perform the diagnosis according to the DTC. <Ref. to TPM(diag)-20, List of Diagnostic Trouble Code (DTC).> | Go to step **2**. |
| 2 | **CHECK TRANSMITTER (ID).**<br>Display the transmitter ID of the tire pressure monitor system. | Is the transmitter ID registered? | Go to step **3**. | Register the transmitter ID. <Ref. to TPM(diag)-13, OPERATION, Register Transmitter (ID).> |
| 3 | **CHECK TRANSMITTER DATA OUTPUT.**<br>1) Select data display of the tire pressure monitoring.<br>2) Start the engine and check the tire pressure warning light output. | Is the warning light output ON? | Replace the TPMS & keyless entry control module. | Replace the combination meter. <Ref. to IDI-17, REMOVAL, Combination Meter.> |

## D: TIRE PRESSURE WARNING LIGHT IS 25 TIMES BLINKING AND TURN ON

**DETECTING CONDITION:**

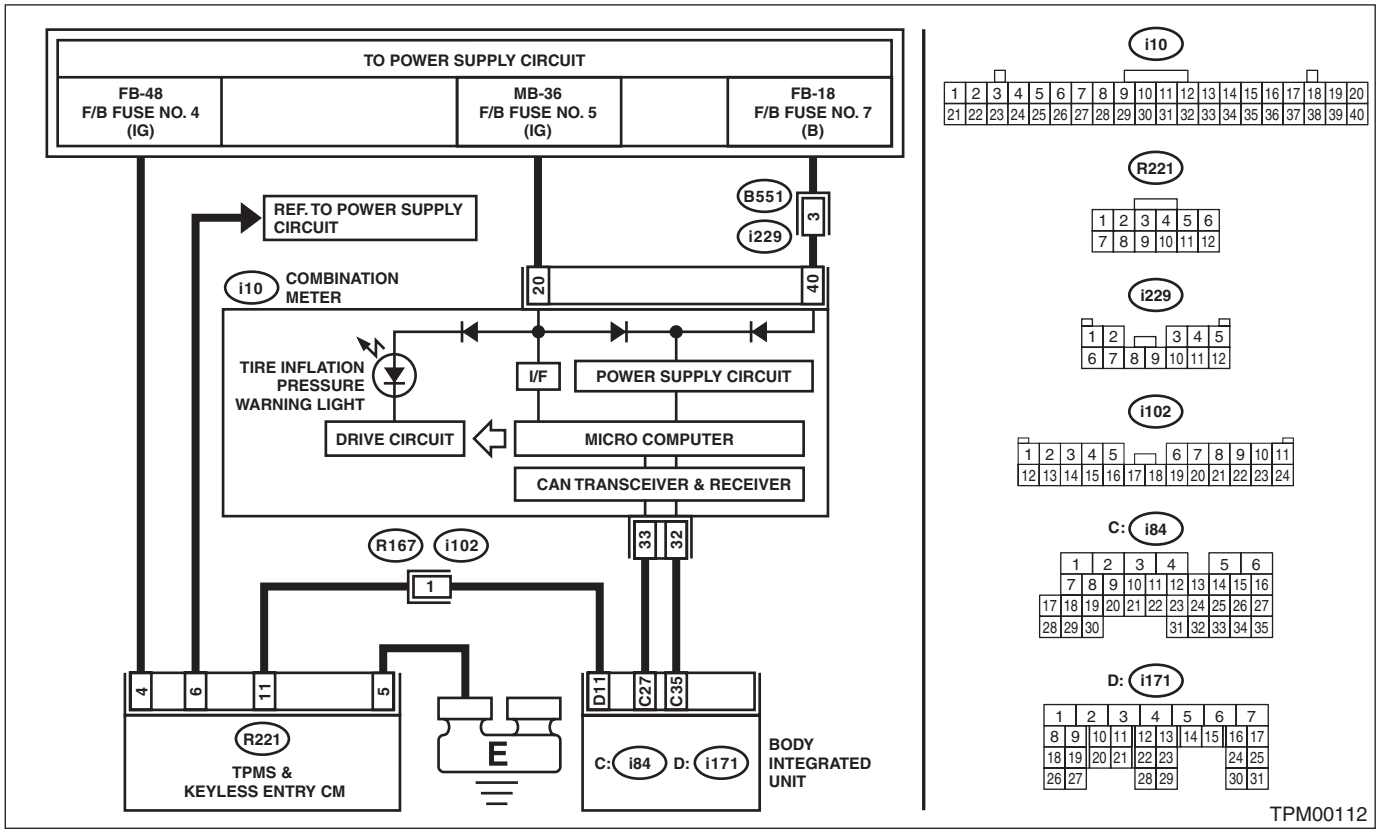
- Defective TPMS & keyless entry control module
- Defective harness
- Transmitter is faulty.

**TROUBLE SYMPTOM:**

Every time the engine starts, tire pressure warning light blinks 25 times and then illuminates.

**WIRING DIAGRAM:**

Tire Pressure Monitoring System <Ref. to WI-148, WIRING DIAGRAM, Tire Pressure Monitoring System.>



| Step | | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK DTC.**<br>Connect the Subaru Select Monitor, and read the Diagnostic Trouble Code. <Ref. to TPM(diag)-10, OPERATION, Read Diagnostic Trouble Code (DTC).> | Is diagnostics code (DTC) displayed? | Perform the diagnosis according to the DTC. <Ref. to TPM(diag)-20, List of Diagnostic Trouble Code (DTC).> | Go to step **2**. |
| 2 | **CHECK LAN COMMUNICATION.**<br>Inspect LAN system. <Ref. to LAN(diag)-2, PROCEDURE, Basic Diagnostic Procedure.> | Is there any fault? | Repair it according to the diagnosis for LAN system. | Go to step **3**. |
| 3 | **CHECK HARNESS.**<br>Measure the resistance between TPMS & keyless entry control module and body integrated unit.<br>***Connector & terminal***<br>***(R221) No. 11 — (i171) No. 11:*** | Is the resistance less than 10 Ω? | Go to step **4**. | Repair the harness. |
| 4 | **CHECK CONNECTOR.**<br>Check each connector. | Is there poor contact or any other faults? | Repair the connector. | Replace the TPMS & keyless entry control module. |

# 13.List of Diagnostic Trouble Code (DTC)

## A: LIST

| DTC | Item | Contents of diagnosis | Remarks |
|---|---|---|---|
| C2021 | Tire 1 Air Pressure Decrease | Tire pressure of tire 1 is reduced. | <Ref. to TPM(diag)-22, DTC C2021 TIRE 1 AIR PRESSURE DECREASE, Diagnostic Procedure with Diagnostic Trouble Code (DTC).> |
| C2022 | Tire 2 Air Pressure Decrease | Tire pressure of tire 2 is reduced. | <Ref. to TPM(diag)-22, DTC C2022 TIRE 2 AIR PRESSURE DECREASE, Diagnostic Procedure with Diagnostic Trouble Code (DTC).> |
| C2023 | Tire 3 Air Pressure Decrease | Tire pressure of tire 3 is reduced. | <Ref. to TPM(diag)-22, DTC C2023 TIRE 3 AIR PRESSURE DECREASE, Diagnostic Procedure with Diagnostic Trouble Code (DTC).> |
| C2024 | Tire 4 Air Pressure Decrease | Tire pressure of tire 4 is reduced. | <Ref. to TPM(diag)-22, DTC C2024 TIRE 4 AIR PRESSURE DECREASE, Diagnostic Procedure with Diagnostic Trouble Code (DTC).> |
| C2121 | Transmitter 1 No Data | Data cannot be received from transmitter 1. | <Ref. to TPM(diag)-23, DTC C2121 TRANSMITTER 1 NO DATA, Diagnostic Procedure with Diagnostic Trouble Code (DTC).> |
| C2122 | Transmitter 2 No Data | Data cannot be received from transmitter 2. | <Ref. to TPM(diag)-23, DTC C2122 TRANSMITTER 2 NO DATA, Diagnostic Procedure with Diagnostic Trouble Code (DTC).> |
| C2123 | Transmitter 3 No Data | Data cannot be received from transmitter 3. | <Ref. to TPM(diag)-23, DTC C2123 TRANSMITTER 3 NO DATA, Diagnostic Procedure with Diagnostic Trouble Code (DTC).> |
| C2124 | Transmitter 4 No Data | Data cannot be received from transmitter 4. | <Ref. to TPM(diag)-24, DTC C2124 TRANSMITTER 4 NO DATA, Diagnostic Procedure with Diagnostic Trouble Code (DTC).> |
| C2221 | Transmitter 1 Pressure Data Abnormal | Transmitter 1 data contents are abnormal. | <Ref. to TPM(diag)-25, DTC C2221 TRANSMITTER 1 PRESSURE DATA ABNORMAL, Diagnostic Procedure with Diagnostic Trouble Code (DTC).> |
| C2222 | Transmitter 2 Pressure Data Abnormal | Transmitter 2 data contents are abnormal. | <Ref. to TPM(diag)-25, DTC C2222 TRANSMITTER 2 PRESSURE DATA ABNORMAL, Diagnostic Procedure with Diagnostic Trouble Code (DTC).> |
| C2223 | Transmitter 3 Pressure Data Abnormal | Transmitter 3 data contents are abnormal. | <Ref. to TPM(diag)-25, DTC C2223 TRANSMITTER 3 PRESSURE DATA ABNORMAL, Diagnostic Procedure with Diagnostic Trouble Code (DTC).> |
| C2224 | Transmitter 4 Pressure Data Abnormal | Transmitter 4 data contents are abnormal. | <Ref. to TPM(diag)-26, DTC C2224 TRANSMITTER 4 PRESSURE DATA ABNORMAL, Diagnostic Procedure with Diagnostic Trouble Code (DTC).> |
| C2321 | Transmitter 1 Function Code Abnormal | Function code has error. | <Ref. to TPM(diag)-27, DTC C2321 TRANSMITTER 1 FUNCTION CODE ABNORMAL, Diagnostic Procedure with Diagnostic Trouble Code (DTC).> |

| DTC | Item | Contents of diagnosis | Remarks |
|---|---|---|---|
| C2322 | Transmitter 2 Function Code Abnormal | Function code has error. | <Ref. to TPM(diag)-27, DTC C2322 TRANSMITTER 2 FUNCTION CODE ABNORMAL, Diagnostic Procedure with Diagnostic Trouble Code (DTC).> |
| C2323 | Transmitter 3 Function Code Abnormal | Function code has error. | <Ref. to TPM(diag)-27, DTC C2323 TRANSMITTER 3 FUNCTION CODE ABNORMAL, Diagnostic Procedure with Diagnostic Trouble Code (DTC).> |
| C2324 | Transmitter 4 Function Code Abnormal | Function code has error. | <Ref. to TPM(diag)-28, DTC C2324 TRANSMITTER 4 FUNCTION CODE ABNORMAL, Diagnostic Procedure with Diagnostic Trouble Code (DTC).> |
| C2421 | Transmitter 1 Battery Voltage Decrease | Transmitter battery voltage is low. | <Ref. to TPM(diag)-29, DTC C2421 TRANSMITTER 1 BATTERY VOLTAGE DECREASE, Diagnostic Procedure with Diagnostic Trouble Code (DTC).> |
| C2422 | Transmitter 2 Battery Voltage Decrease | Transmitter battery voltage is low. | <Ref. to TPM(diag)-29, DTC C2422 TRANSMITTER 2 BATTERY VOLTAGE DECREASE, Diagnostic Procedure with Diagnostic Trouble Code (DTC).> |
| C2423 | Transmitter 3 Battery Voltage Decrease | Transmitter battery voltage is low. | <Ref. to TPM(diag)-29, DTC C2423 TRANSMITTER 3 BATTERY VOLTAGE DECREASE, Diagnostic Procedure with Diagnostic Trouble Code (DTC).> |
| C2424 | Transmitter 4 Battery Voltage Decrease | Transmitter battery voltage is low. | <Ref. to TPM(diag)-29, DTC C2424 TRANSMITTER 4 BATTERY VOLTAGE DECREASE, Diagnostic Procedure with Diagnostic Trouble Code (DTC).> |
| C2521 | Vehicle Speed Is Abnormal | Vehicle speed signal is not input to the control module when the vehicle speed is 6 km/h (3.7 MPH) or more. | <Ref. to TPM(diag)-30, DTC C2521 VEHICLE SPEED IS ABNORMAL, Diagnostic Procedure with Diagnostic Trouble Code (DTC).> |

# 14.Diagnostic Procedure with Diagnostic Trouble Code (DTC)

## A: DTC C2021 TIRE 1 AIR PRESSURE DECREASE

NOTE:
Refer to DTC C2024 for diagnostic procedure. <Ref. to TPM(diag)-22, DTC C2024 TIRE 4 AIR PRESSURE DECREASE, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>

## B: DTC C2022 TIRE 2 AIR PRESSURE DECREASE

NOTE:
Refer to DTC C2024 for diagnostic procedure. <Ref. to TPM(diag)-22, DTC C2024 TIRE 4 AIR PRESSURE DECREASE, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>

## C: DTC C2023 TIRE 3 AIR PRESSURE DECREASE

NOTE:
Refer to DTC C2024 for diagnostic procedure. <Ref. to TPM(diag)-22, DTC C2024 TIRE 4 AIR PRESSURE DECREASE, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>

## D: DTC C2024 TIRE 4 AIR PRESSURE DECREASE

**DTC DETECTING CONDITION**:
Inflation pressure of tires dropped below the specified value.

NOTE:
For the specifications, refer to “CURRENT DATA”. <Ref. to TPM(diag)-12, LIST, Read Current Data.>
**TROUBLE SYMPTOM:**
Tire pressure warning light illuminates.

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK TIRES.**<br>Lift up the vehicle and check for damage in the tires. | Are there cracks or damage? | Replace the tire. | Go to step **2**. |
| 2 | **CHECK TIRES.**<br>Check the tire air pressure. | Is the tire pressure in the specifications? | Go to step **3**. | Adjust the air pressure. |
| 3 | **CHECK TRANSMITTER.**<br>Drive the vehicle at 40 km/h (25 MPH) or faster and compare the data from the transmitter on the four wheels. | Is there a transmitter with different data? | Replace the transmitter (tire pressure sensor). | Go to step **4**. |
| 4 | **PERFORM DRIVING TEST.**<br>1) Perform the Clear Memory Mode. <Ref. to TPM(diag)-11, OPERATION, Clear Memory Mode.><br>2) Perform a driving test. <Ref. to TPM(diag)-15, PROCEDURE, Inspection Mode.><br>3) Read the DTC. <Ref. to TPM(diag)-10, OPERATION, Read Diagnostic Trouble Code (DTC).> | Is DTC displayed? | Inspect by referring to “Diagnostic Procedure with Diagnostic Trouble Code (DTC)”. <Ref. to TPM(diag)-22, Diagnostic Procedure with Diagnostic Trouble Code (DTC).> | Finish the diagnosis. |

**CAUTION:**
**When driving vehicle to perform driving test, there should be always 2 persons (driver and checker) to check.**

## E: DTC C2121 TRANSMITTER 1 NO DATA

NOTE:
Refer to DTC C2124 for diagnostic procedure. <Ref. to TPM(diag)-24, DTC C2124 TRANSMITTER 4 NO DATA, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>

## F: DTC C2122 TRANSMITTER 2 NO DATA

NOTE:
Refer to DTC C2124 for diagnostic procedure. <Ref. to TPM(diag)-24, DTC C2124 TRANSMITTER 4 NO DATA, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>

## G: DTC C2123 TRANSMITTER 3 NO DATA

NOTE:
Refer to DTC C2124 for diagnostic procedure. <Ref. to TPM(diag)-24, DTC C2124 TRANSMITTER 4 NO DATA, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>

## H: DTC C2124 TRANSMITTER 4 NO DATA

**DTC DETECTING CONDITION**:
Data from each transmitter is not received for 8 minutes.
**TROUBLE SYMPTOM:**
Tire pressure warning light blinks 25 times and then illuminates.

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 1 | **START FL TRANSMITTER.**<br>1) Connect the Subaru Select Monitor and then turn the ignition switch to ON.<br>2) Select “Transmit ID data monitor”. <Ref. to TPM(diag)-14, OPERATION, Display Transmitter (ID).><br>3) Use the transmitter registration tool and transmit the ID from the FL transmitter to check “Latest reception ID”. | Is “Latest reception ID” updated? | Go to step **2**. | Replace front left transmitter. |
| 2 | **CHECK FL TRANSMITTER ID.**<br>Check the ID displayed in the updated ID display and the tire 1 registered ID. | Are the two IDs same? | Go to step **3**. | Record the received ID update as the FL transmitter. Go to step **3**. |
| 3 | **START FR TRANSMITTER.**<br>Use the transmitter registration tool and transmit the ID from the FR transmitter to check “Latest reception ID”. | Is “Latest reception ID” updated? | Go to step **4**. | Replace the front right transmitter. |
| 4 | **CHECK FR TRANSMITTER ID.**<br>Check the ID displayed in the updated ID display and the tire 2 registered ID. | Are the two IDs same? | Go to step **5**. | Record the received ID update as the FR transmitter. Go to step **5**. |
| 5 | **START RR TRANSMITTER.**<br>Use the transmitter registration tool and transmit the ID from the RR transmitter to check “Latest reception ID”. | Is “Latest reception ID” updated? | Go to step **6**. | Replace the RR transmitter. |
| 6 | **CHECK RR TRANSMITTER ID.**<br>Check the ID displayed in the updated ID display and the tire 3 registered ID. | Are the two IDs same? | Go to step **7**. | Record the received ID update as the RR transmitter. Go to step **7**. |
| 7 | **START RL TRANSMITTER.**<br>Use the transmitter registration tool and transmit the ID from the RL transmitter to check “Latest reception ID”. | Is “Latest reception ID” updated? | Go to step **8**. | Replace the RL transmitter. |
| 8 | **CHECK RL TRANSMITTER ID.**<br>Check the ID displayed in the updated ID display and the tire 4 registered ID. | Are the two IDs same? | Go to step **9**. | Record the received ID update as the RL transmitter. Go to step **9**. |
| 9 | **CHECK MALFUNCTION TRANSMITTER.** | Is ID recorded by this procedure? | Go to step **10**. | Go to step **1**. |
| 10 | **CHECK MALFUNCTION TRANSMITTER.**<br>Check the registered ID of the transmitter indicated by DTC. | Is there checked ID in the record? | Replace the transmitter of the recorded position. | Replace the transmitter showing the latest ID that is not included in the registered IDs. |

**CAUTION:**
**When driving vehicle to perform driving test, there should be always 2 persons (driver and checker) to check.**

## I: DTC C2221 TRANSMITTER 1 PRESSURE DATA ABNORMAL

NOTE:
Refer to DTC C2224 for diagnostic procedure. <Ref. to TPM(diag)-26, DTC C2224 TRANSMITTER 4 PRESSURE DATA ABNORMAL, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>

## J: DTC C2222 TRANSMITTER 2 PRESSURE DATA ABNORMAL

NOTE:
Refer to DTC C2224 for diagnostic procedure. <Ref. to TPM(diag)-26, DTC C2224 TRANSMITTER 4 PRESSURE DATA ABNORMAL, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>

## K: DTC C2223 TRANSMITTER 3 PRESSURE DATA ABNORMAL

NOTE:
Refer to DTC C2224 for diagnostic procedure. <Ref. to TPM(diag)-26, DTC C2224 TRANSMITTER 4 PRESSURE DATA ABNORMAL, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>

## L: DTC C2224 TRANSMITTER 4 PRESSURE DATA ABNORMAL

**DTC DETECTING CONDITION**:

- When comparing the data from each transmitter to the previous data, the change is large.
- The pressure exceeds what the transmitter can measure. (Excessive pressure)

**TROUBLE SYMPTOM:**

Tire pressure warning light blinks 25 times and then illuminates.

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 1 | **START FL TRANSMITTER.**<br>1) Connect the Subaru Select Monitor and then turn the ignition switch to ON.<br>2) Select “Transmit ID data monitor”. <Ref. to TPM(diag)-14, OPERATION, Display Transmitter (ID).><br>3) Use the transmitter registration tool and transmit the ID from the FL transmitter to check “Latest reception ID”. | Is “Latest reception ID” updated? | Go to step **2**. | Replace front left transmitter. |
| 2 | **CHECK FL TRANSMITTER ID.**<br>Check the ID displayed in the updated ID display and the tire 1 registered ID. | Are the two IDs same? | Go to step **3**. | Record the received ID update as the FL transmitter. Go to step **3**. |
| 3 | **START FR TRANSMITTER.**<br>Use the transmitter registration tool and transmit the ID from the FR transmitter to check “Latest reception ID”. | Is “Latest reception ID” updated? | Go to step **4**. | Replace the front right transmitter. |
| 4 | **CHECK FR TRANSMITTER ID.**<br>Check the ID displayed in the updated ID display and the tire 2 registered ID. | Are the two IDs same? | Go to step **5**. | Record the received ID update as the FR transmitter. Go to step **5**. |
| 5 | **START RR TRANSMITTER.**<br>Use the transmitter registration tool and transmit the ID from the RR transmitter to check “Latest reception ID”. | Is “Latest reception ID” updated? | Go to step **6**. | Replace the RR transmitter. |
| 6 | **CHECK RR TRANSMITTER ID.**<br>Check the ID displayed in the updated ID display and the tire 3 registered ID. | Are the two IDs same? | Go to step **7**. | Record the received ID update as the RR transmitter. Go to step **7**. |
| 7 | **START RL TRANSMITTER.**<br>Use the transmitter registration tool and transmit the ID from the RL transmitter to check “Latest reception ID”. | Is “Latest reception ID” updated? | Go to step **8**. | Replace the RL transmitter. |
| 8 | **CHECK RL TRANSMITTER ID.**<br>Check the ID displayed in the updated ID display and the tire 4 registered ID. | Are the two IDs same? | Go to step **9**. | Record the received ID update as the RL transmitter. Go to step **9**. |
| 9 | **CHECK MALFUNCTION TRANSMITTER.** | Is ID recorded by this procedure? | Go to step **10**. | Go to step **1**. |
| 10 | **CHECK MALFUNCTION TRANSMITTER.**<br>Check the registered ID of the transmitter indicated by DTC. | Is there checked ID in the record? | Replace the transmitter of the recorded position. | Replace the transmitter showing the latest ID that is not included in the registered IDs. |

## M: DTC C2321 TRANSMITTER 1 FUNCTION CODE ABNORMAL

NOTE:
Refer to DTC C2324 for diagnostic procedure. <Ref. to TPM(diag)-28, DTC C2324 TRANSMITTER 4 FUNCTION CODE ABNORMAL, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>

## N: DTC C2322 TRANSMITTER 2 FUNCTION CODE ABNORMAL

NOTE:
Refer to DTC C2324 for diagnostic procedure. <Ref. to TPM(diag)-28, DTC C2324 TRANSMITTER 4 FUNCTION CODE ABNORMAL, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>

## O: DTC C2323 TRANSMITTER 3 FUNCTION CODE ABNORMAL

NOTE:
Refer to DTC C2324 for diagnostic procedure. <Ref. to TPM(diag)-28, DTC C2324 TRANSMITTER 4 FUNCTION CODE ABNORMAL, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>

## P: DTC C2324 TRANSMITTER 4 FUNCTION CODE ABNORMAL

**DTC DETECTING CONDITION**:
Unexpected function codes received from each transmitter.
**TROUBLE SYMPTOM:**
Tire pressure warning light blinks 25 times and then illuminates.

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 1 | **START FL TRANSMITTER.**<br>1) Connect the Subaru Select Monitor and then turn the ignition switch to ON.<br>2) Select “Transmit ID data monitor”. <Ref. to TPM(diag)-14, OPERATION, Display Transmitter (ID).><br>3) Use the transmitter registration tool and transmit the ID from the FL transmitter to check “Latest reception ID”. | Is “Latest reception ID” updated? | Go to step **2**. | Replace front left transmitter. |
| 2 | **CHECK FL TRANSMITTER ID.**<br>Check the ID displayed in the updated ID display and the tire 1 registered ID. | Are the two IDs same? | Go to step **3**. | Record the received ID update as the FL transmitter. Go to step **3**. |
| 3 | **START FR TRANSMITTER.**<br>Use the transmitter registration tool and transmit the ID from the FR transmitter to check “Latest reception ID”. | Is “Latest reception ID” updated? | Go to step **4**. | Replace the front right transmitter. |
| 4 | **CHECK FR TRANSMITTER ID.**<br>Check the ID displayed in the updated ID display and the tire 2 registered ID. | Are the two IDs same? | Go to step **5**. | Record the received ID update as the FR transmitter. Go to step **5**. |
| 5 | **START RR TRANSMITTER.**<br>Use the transmitter registration tool and transmit the ID from the RR transmitter to check “Latest reception ID”. | Is “Latest reception ID” updated? | Go to step **6**. | Replace the RR transmitter. |
| 6 | **CHECK RR TRANSMITTER ID.**<br>Check the ID displayed in the updated ID display and the tire 3 registered ID. | Are the two IDs same? | Go to step **7**. | Record the received ID update as the RR transmitter. Go to step **7**. |
| 7 | **START RL TRANSMITTER.**<br>Use the transmitter registration tool and transmit the ID from the RL transmitter to check “Latest reception ID”. | Is “Latest reception ID” updated? | Go to step **8**. | Replace the RL transmitter. |
| 8 | **CHECK RL TRANSMITTER ID.**<br>Check the ID displayed in the updated ID display and the tire 4 registered ID. | Are the two IDs same? | Go to step **9**. | Record the received ID update as the RL transmitter. Go to step **9**. |
| 9 | **CHECK MALFUNCTION TRANSMITTER.** | Is ID recorded by this procedure? | Go to step **10**. | Replace the transmitter indicated by diagnostics trouble code (DTC). |
| 10 | **CHECK MALFUNCTION TRANSMITTER.**<br>Check the registered ID of the transmitter indicated by DTC. | Is there checked ID in the record? | Replace the transmitter of the recorded position. | Replace the transmitter indicated by diagnostics trouble code (DTC). |

## Q: DTC C2421 TRANSMITTER 1 BATTERY VOLTAGE DECREASE

NOTE:
Refer to DTC C2424 for diagnostic procedure. <Ref. to TPM(diag)-29, DTC C2424 TRANSMITTER 4 BATTERY VOLTAGE DECREASE, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>

## R: DTC C2422 TRANSMITTER 2 BATTERY VOLTAGE DECREASE

NOTE:
Refer to DTC C2424 for diagnostic procedure. <Ref. to TPM(diag)-29, DTC C2424 TRANSMITTER 4 BATTERY VOLTAGE DECREASE, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>

## S: DTC C2423 TRANSMITTER 3 BATTERY VOLTAGE DECREASE

NOTE:
Refer to DTC C2424 for diagnostic procedure. <Ref. to TPM(diag)-29, DTC C2424 TRANSMITTER 4 BATTERY VOLTAGE DECREASE, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>

## T: DTC C2424 TRANSMITTER 4 BATTERY VOLTAGE DECREASE

**DTC DETECTING CONDITION**:
Low battery signals received 20 times from each transmitter.
**TROUBLE SYMPTOM:**
Tire pressure warning light blinks 25 times and then illuminates.

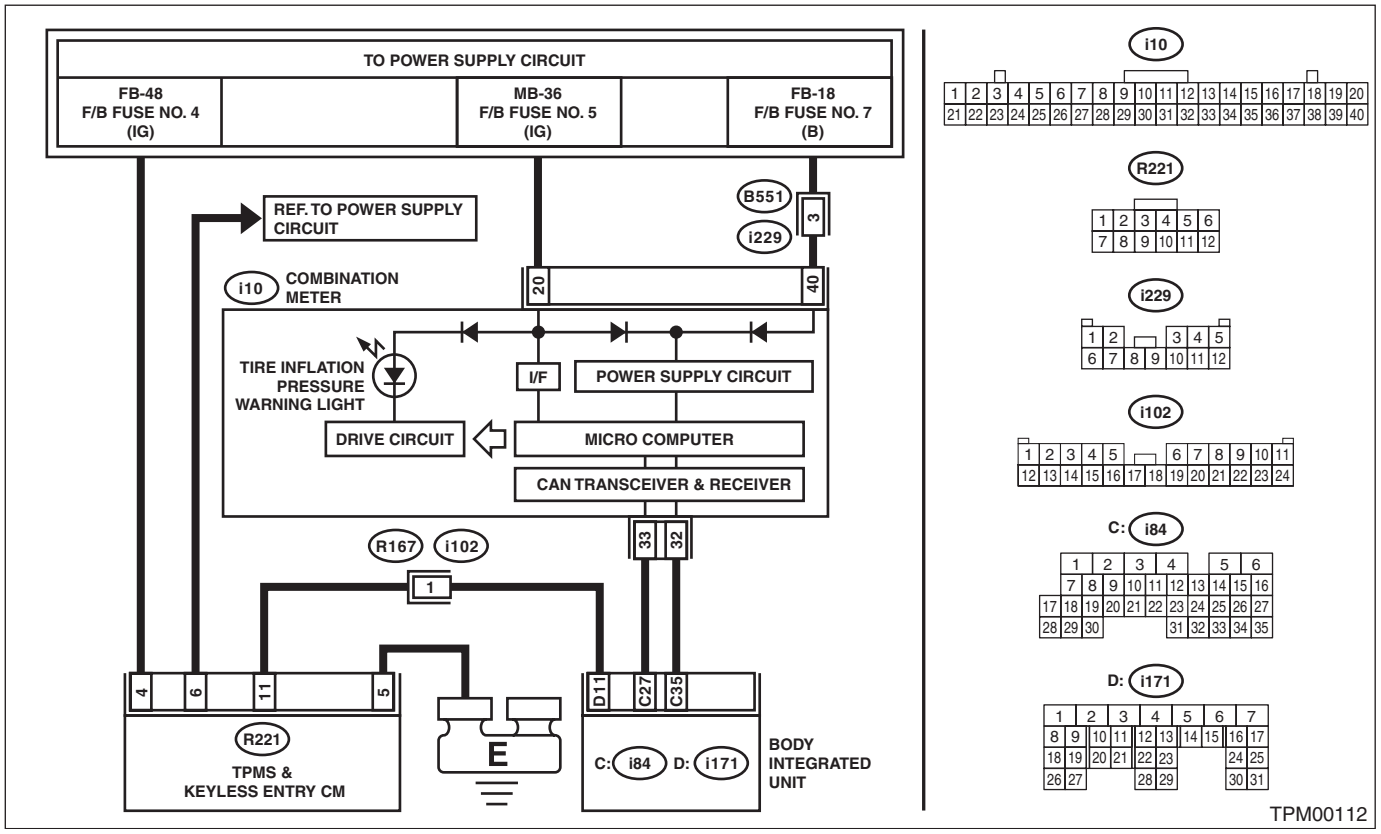
| | Step | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK TRANSMITTER.**<br>1) Replace all transmitters and register their IDs. <Ref. to TPM(diag)-13, OPERATION, Register Transmitter (ID).><br>2) Perform the Clear Memory Mode, and perform driving test. | Is the fault eliminated? | Internal battery of the transmitter had worn out. | Replace the TPMS & keyless entry control module. |

# U: DTC C2521 VEHICLE SPEED IS ABNORMAL

**DTC DETECTING CONDITION**:
Vehicle speed function codes were received from the transmitter, but the vehicle speed signal was not input to the module.

**TROUBLE SYMPTOM:**
Tire pressure warning light blinks 25 times and then illuminates.

**WIRING DIAGRAM:**
Tire Pressure Monitoring System <Ref. to WI-148, WIRING DIAGRAM, Tire Pressure Monitoring System.>



| | Step | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK LAN COMMUNICATION.**<br>Inspect LAN system. <Ref. to LAN(diag)-2, PROCEDURE, Basic Diagnostic Procedure.> | Is there any fault? | Repair it according to the diagnosis for LAN system. | Go to step **2**. |
| 2 | **CHECK HARNESS.**<br>Measure the resistance between TPMS & keyless entry control module and body integrated unit.<br>***Connector & terminal***<br>***(R221) No. 11 — (i171) No. 11:*** | Is the resistance less than 10 Ω? | Go to step **3**. | Repair the harness. |
| 3 | **CHECK CONNECTOR.**<br>Check each connector. | Is there poor contact or any other faults? | Repair the connector. | Replace the TPMS & keyless entry control module. |

# 15.General Diagnostic Table

## A: INSPECTION

| Symptoms | | Faulty parts |
|---|---|---|
| Tire pressure warning light illuminates. | Tire pressure is reduced. | • Improper tire pressure adjustment.<br>• Punctured tire |
| Tire pressure warning light blinks 25 times and then illuminates. | Tire pressure monitoring system has malfunction. | • Air pressure sensor malfunction<br>• Air pressure sensor is out of battery.<br>• Defective TPMS & keyless entry control module<br>• Defective vehicle harness<br>• Defective combination meter |
| Tire pressure is dropping but the warning light does not illuminate. | Tire pressure warning light does not illuminate. | • Air pressure sensor is faulty.<br>• Defective TPMS & keyless entry control module<br>• Defective combination meter |

# 1. General Description

## A: SPECIFICATION

### 1. REAR DIFFERENTIAL

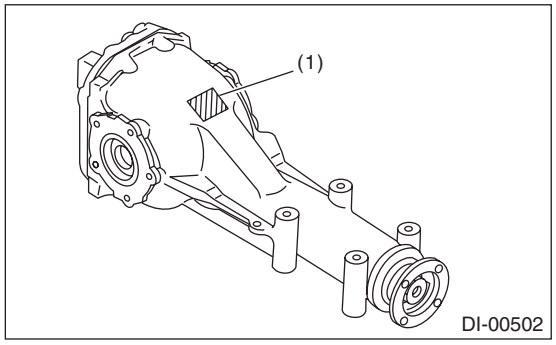
When replacing a rear differential assembly, select the correct one according to the following table.

NOTE:
• Using a different rear differential assembly will cause the drive train and tires to drag or emit abnormal noise.
• For option code, refer to “ID” section. <Ref. to ID-2, IDENTIFICATION, Identification.>

| Model | 2.0 L non-turbo | | |
|---|---|---|---|
| | CVT | 5MT | |
| | | Except for XV model | XV model |
| Rear differential type | VA1-type | T-type | |
| Identification | XD | T2 | TP |
| LSD type | — | | |
| Type of gear | Hypoid gear | | |
| Gear ratio (Number of gear teeth) | 3.700 (37/10) | 4.111 (37/9) | 4.444 (40/9) |
| Oil capacity | 0.8 L (0.8 US qt, 0.7 Imp qt) | | |
| Rear differential gear oil | GL–5 | | |

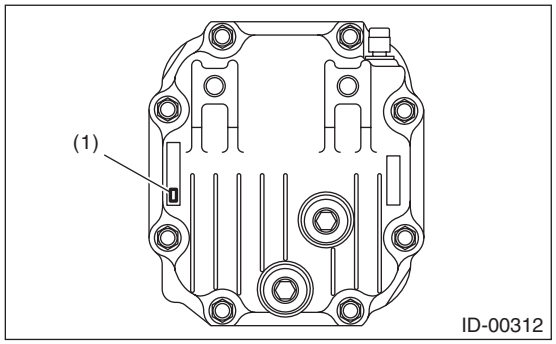
### 2. IDENTIFICATION

Identification positions are shown in the following figures. For details concerning identification, refer to the “ID” section.
• T-type



(1) Identification

• VA1-type

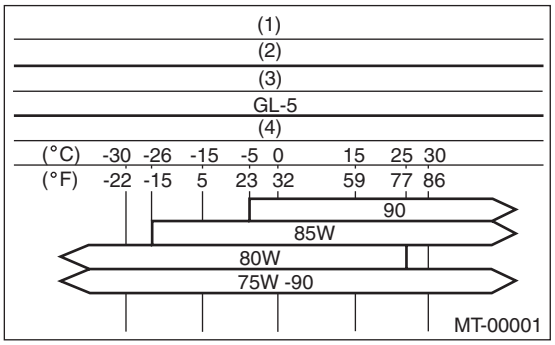


(1) Identification

## 3. REAR DIFFERENTIAL GEAR OIL

***Recommended gear oil:***
***GL–5 (75W–90) or equivalent***

**CAUTION:**
**Each oil manufacturer has its base oil and additives. Thus, do not mix two or more brands.**



(1) Item
(2) Rear differential gear oil
(3) API classification
(4) SAE viscosity No. and applicable temperature

## 4. SERVICE DATA

| | | | |
|---|---|---|---|
| Drive pinion bearing preload (For new bearing) | Measured with spring measurement (Measured at companion flange bolt hole) N (kgf, lbf) | T-type | 18.1 — 38.8 (1.8 — 4.0, 4.1 — 8.7) |
| | | VA1-type | 12.7 — 32.2 (1.3 — 3.3, 2.9 — 7.2) |

## C: CAUTION

- Wear appropriate work clothing, including a cap, protective goggles and protective shoes when performing any work.
- Remove contamination including dirt and corrosion before removal, installation or disassembly.
- Keep the disassembled parts in order and protect them from dust and dirt.
- Before removal, installation or disassembly, be sure to clarify the failure. Avoid unnecessary removal, installation, disassembly and replacement.
- Vehicle components are extremely hot after driving. Be wary of receiving burns from heated parts.
- Use SUBARU genuine gear oil, grease or equivalent. Do not mix gear oil, grease, etc. of different grades or manufacturers.
- Be sure to tighten fasteners including bolts and nuts to the specified torque.
- Place shop jacks or rigid racks at the specified points.
- Apply gear oil onto sliding or revolving surfaces before installation.
- Before installing the O-ring or snap ring, apply a sufficient amount of gear oil to avoid damage and deformation.
- Before securing a part on a vise, place cushioning material such as wood blocks, aluminum plate, or cloth between the part and the vise.
- Avoid damaging the mating surface of the case.

## 2. GENERAL TOOL

| TOOL NAME | REMARKS |
|---|---|
| Transmission jack | Used for removing and installing the rear differential. |
| Puller | Used for removing the side bearing retainer. |
| Thickness gauge | Used for measuring clearance. |
| Hexagon wrench | Used for installing and removing the filler plug and drain plug. |
| Tire lever | Used for removing the rear drive shaft. (VA1-type) |
| Angle gauge | Used for installing the hypoid driven gear. (VA1-type) |

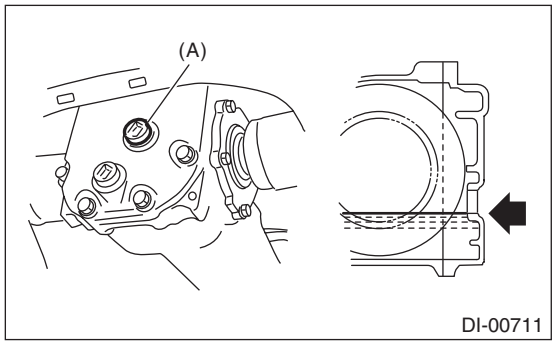
# 2. Differential Gear Oil

## A: INSPECTION

1) Lift up the vehicle.
2) Remove the filler plug, and then check the gear oil. Replace the gear oil if it is contaminated, deteriorated or cloudy. <Ref. to DI-19, REPLACEMENT, Differential Gear Oil.>
3) Check that the gear oil level is within –5 mm (–0.2 in) from the bottom of the filler plug hole. If the level is low, make sure that there is no oil leakage and refill up to the bottom of filler plug hole.

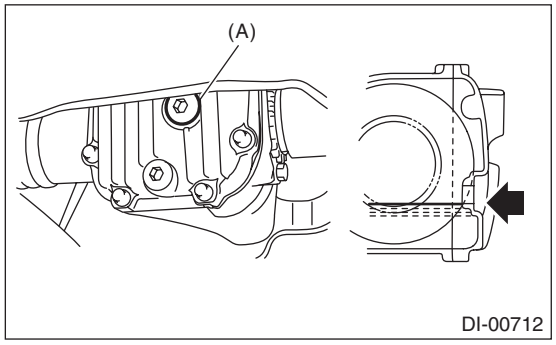
NOTE:
On VA1-types at factory settings, the oil level may be within –14 mm (–0.6 in) from the bottom of the filler plug. This is at normal level, requiring no oil refill.

- T-type



(A) Filler plug

- VA1-type



(A) Filler plug

4) Install the filler plug.

NOTE:
- For the T-type, apply liquid gasket to the filler plug.

***Liquid gasket:***
***THREE BOND 1105 (Part No. 004403010) or equivalent***
- For VA type, use a new gasket.

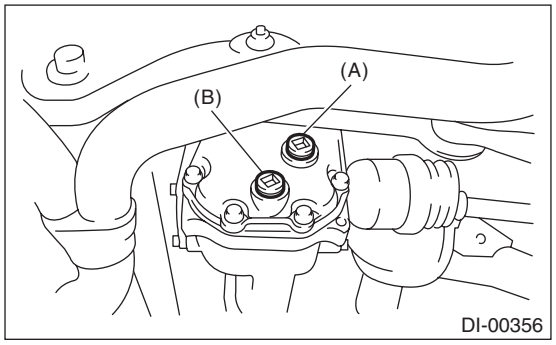
***Tightening torque:***
***T-type:***
***49 N·m (5.0 kgf-m, 36.1 ft-lb)***
***VA-type:***
***50 N·m (5.1 kgf-m, 36.9 ft-lb)***

## B: REPLACEMENT

**CAUTION:**
- **Gear oil is extremely hot just after driving. Be wary of receiving burns.**
- **Be careful not to spill the differential gear oil on exhaust pipe. If gear oil is spilled, wipe it off completely.**

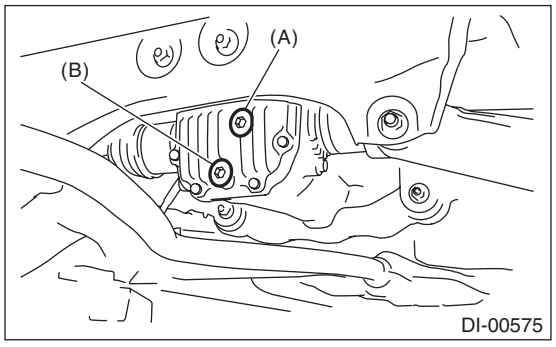
1) Lift up the vehicle.
2) Remove the drain plug and filler plug, and drain the gear oil.

- T-type



(A) Filler plug
(B) Drain plug

- VA1-type



(A) Filler plug
(B) Drain plug

3) Tighten the drain plug.

NOTE:
• For the T-type, apply liquid gasket to the drain plug.

***Liquid gasket:***
***THREE BOND 1105 (Part No. 004403010) or equivalent***
• For VA type, use a new gasket.

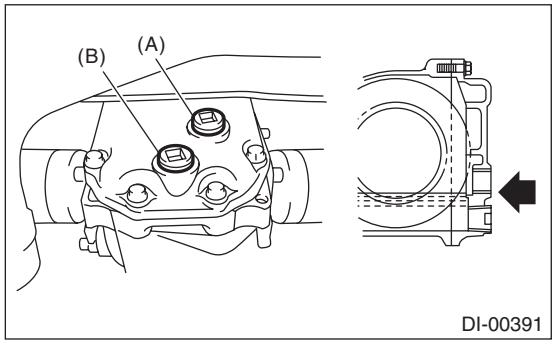
***Tightening torque:***
***T-type***
***49 N·m (5.0 kgf-m, 36.1 ft-lb)***
***VA-type:***
***50 N·m (5.1 kgf-m, 36.9 ft-lb)***

4) Fill the differential carrier with gear oil to the bottom of filler plug.

NOTE:
Carefully refill gear oil while watching the level. Excessive or insufficient oil must be avoided.

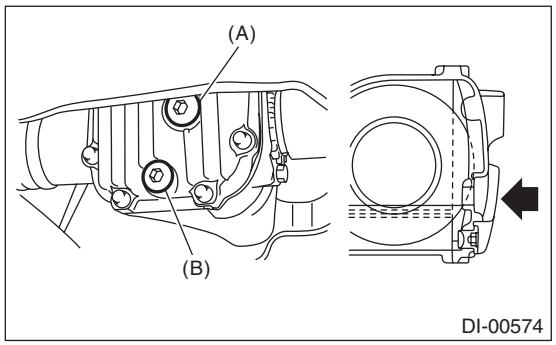
***Recommended gear oil:***
***<Ref. to DI-2, SPECIFICATION, General Description.>***

***Oil capacity:***
***0.8 L (0.8 US qt, 0.7 Imp qt)***
• T-type



(A) Filler plug
(B) Drain plug

• VA1-type



(A) Filler plug
(B) Drain plug

5) Install the filler plug.

NOTE:
• For the T-type, apply liquid gasket to the filler plug.

***Liquid gasket:***
***THREE BOND 1105 (Part No. 004403010) or equivalent***
• For VA type, use a new gasket.

***Tightening torque:***
***T-type:***
***49 N·m (5.0 kgf-m, 36.1 ft-lb)***
***VA-type:***
***50 N·m (5.1 kgf-m, 36.9 ft-lb)***

# 3. Front Differential Assembly

## A: NOTE

### 1. CVT MODEL

For front differential for the CVT model, refer to the “CVT” section. <Ref. to CVT-294, Front Differential Assembly.>

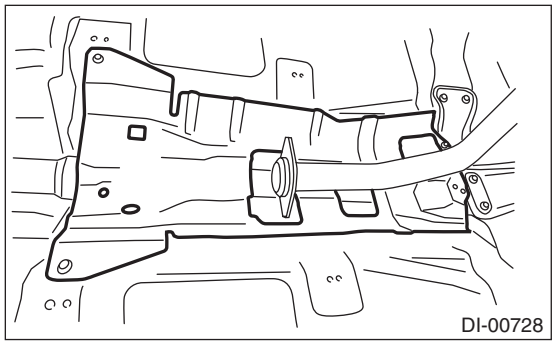
### 2. MT MODEL

For front differential for the 5MT model, refer to the “5MT” section. <Ref. to 5MT-71, Front Differential Assembly.>

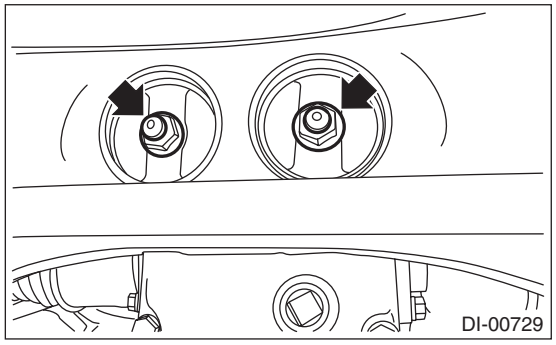
# 4. Rear Differential (T-type)

## A: REMOVAL

1) Shift the select lever or gear shift lever to neutral.
2) Disconnect the ground cable from battery.
3) Release the parking brake.
4) Loosen the wheel nuts.
5) Lift up the vehicle.
6) Remove the rear wheels.
7) Drain differential gear oil. <Ref. to DI-19, REPLACEMENT, Differential Gear Oil.>
8) Remove the rear exhaust pipe. <Ref. to EX(H4DO)-15, REMOVAL, Rear Exhaust Pipe.>
9) Remove the center exhaust cover.



10) Remove the propeller shaft. <Ref. to DS-12, REMOVAL, Propeller Shaft.>
11) Loosen the self-lock nuts which hold the rear differential to the rear sub frame assembly.

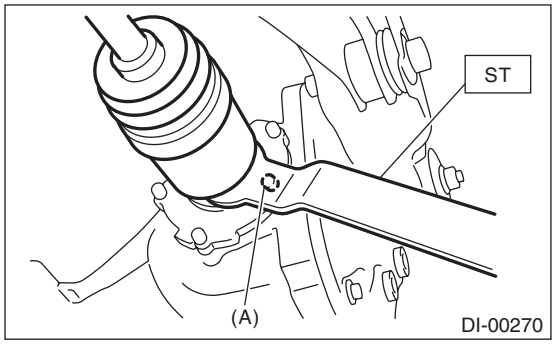


12) Remove the DOJ of rear drive shaft from rear differential using ST or tire lever.

NOTE:
- For the T-type, use the ST.
- For the VA-type, use the tire lever.
- When removing the DOJ from the rear differential, fit the tire lever or ST to the bolts as shown in the figure so as not to damage the side retainer.

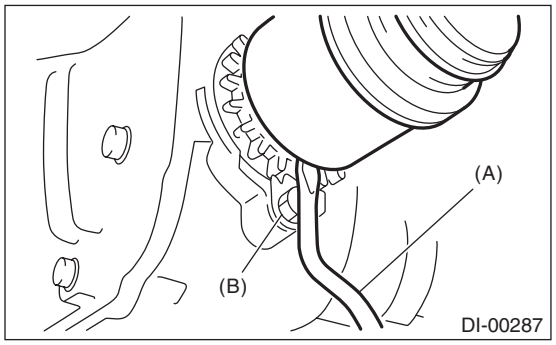
**T-type**

ST 28099PA100 DRIVE SHAFT REMOVER



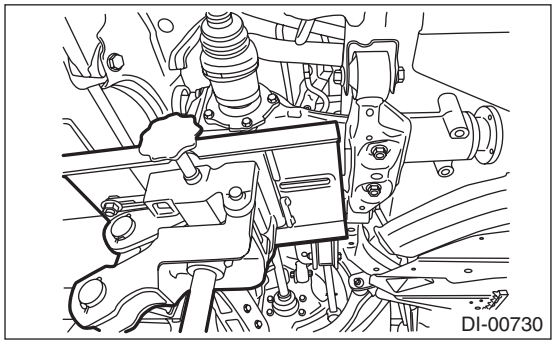
(A) Bolt

**VA-type**

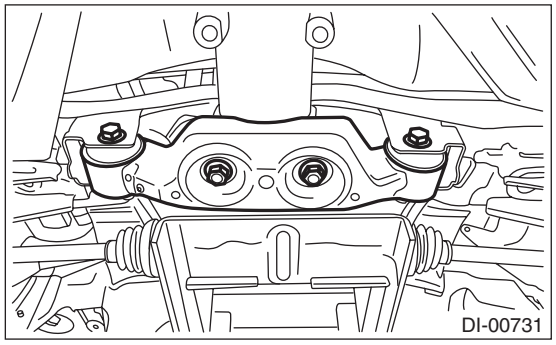


(A) Tire lever
(B) Bolt

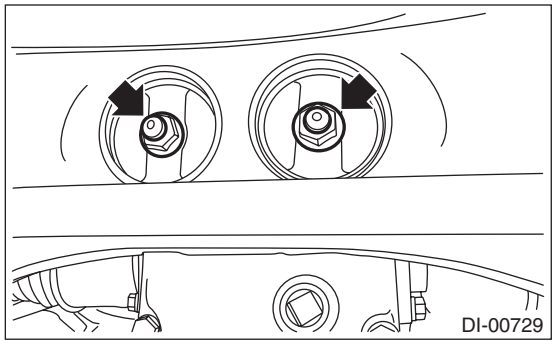
13) Set the rear differential to transmission jack.



14) Remove the rear differential front member.

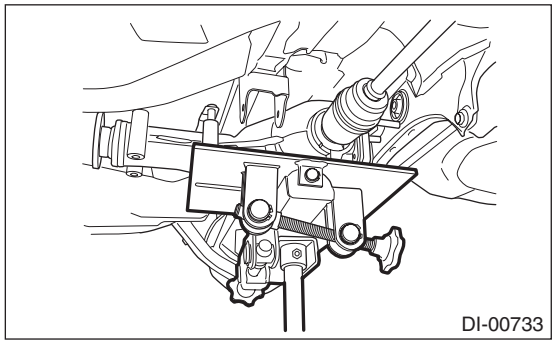


15) Remove the self-lock nuts which hold the rear differential to the rear sub frame assembly.



16) Pull out the rear differential stud bolt from rear differential mount bushing.

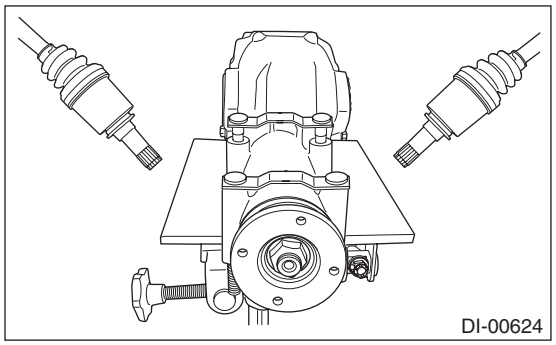
NOTE:
When removing the stud bolt from the rear differential mount bushing, carefully adjust the angle and location of transmission jack and jack stand, if necessary.



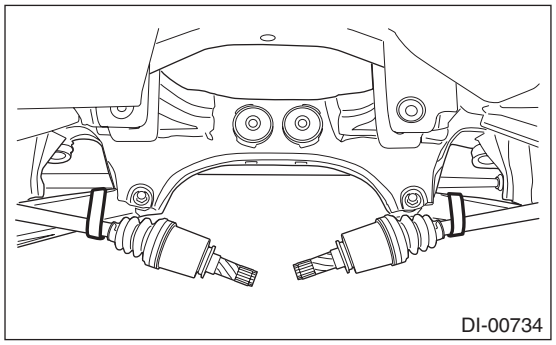
17) Lower the transmission jack.

18) Pull out the rear drive shaft from the rear differential.

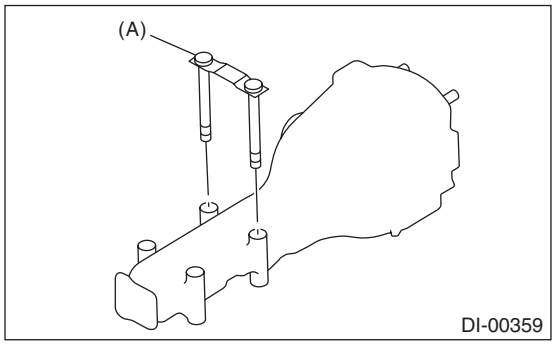
NOTE:
If it is difficult to pull out the rear drive shaft from rear differential, use the ST for T-type and the tire lever for VA-type.
ST 28099PA100 DRIVE SHAFT REMOVER



19) Lower the transmission jack.
20) Secure the rear drive shaft to rear lateral link using wire.



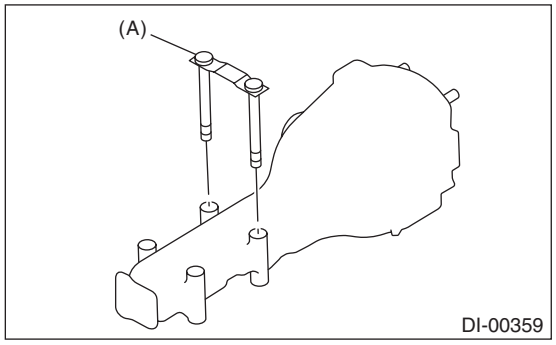
21) Remove the rear differential member plate from rear differential.



(A) Rear differential member plate

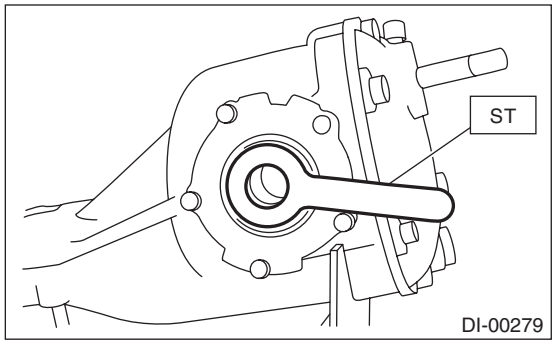
## B: INSTALLATION

1) Attach the rear differential member plate to the rear differential.

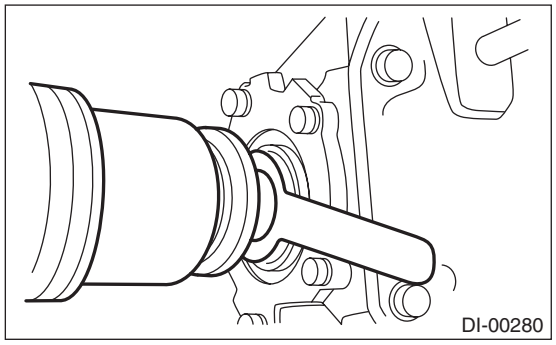


(A) Rear differential member plate

2) Set the rear differential to transmission jack.
3) Set the ST to the rear differential.
ST 28099PA090 OIL SEAL PROTECTOR

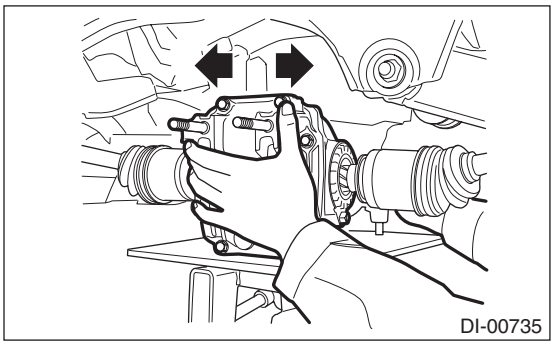


4) Insert the rear drive shaft until the spline portion of the rear drive shaft exceeds the side oil seal.

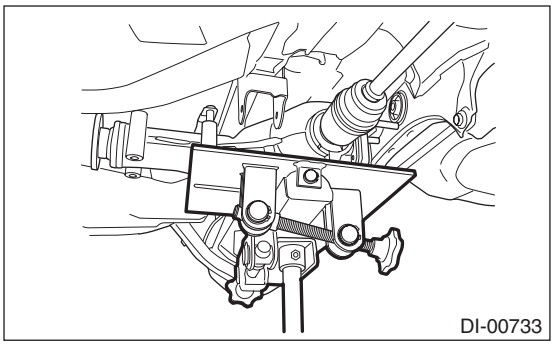


5) Remove ST from rear differential.

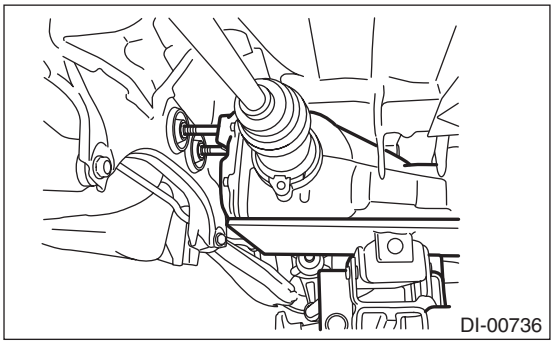
6) Push the rear differential from side to side to insert the DOJ into rear differential completely.



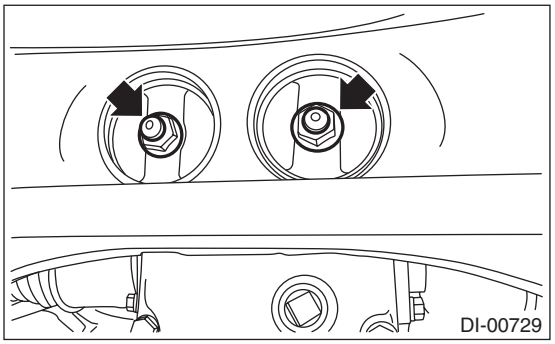
7) Adjust the transmission jack, if necessary, and insert the rear differential stud bolt into the rear differential mount bushing properly.



8) After inserting the rear differential stud bolt into the rear differential mount bushing, lift up the transmission jack and align the rear differential to its attachment position.

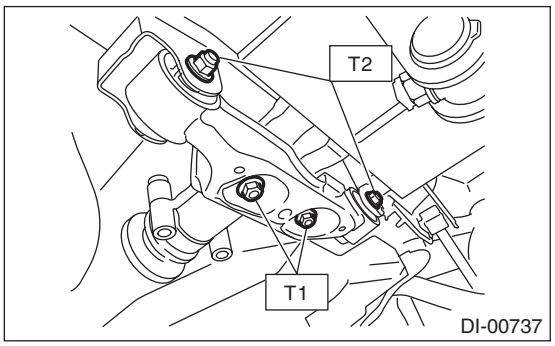


9) Tighten a new self-locking nut temporarily to the rear differential stud bolt.



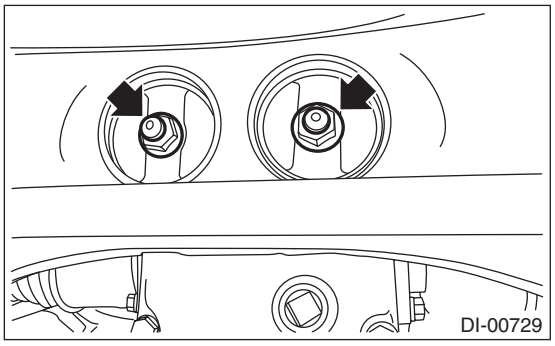
10) Install the rear differential front member with a new self-locking nut.

***Tightening torque:***
***T1: 50 N·m (5.1 kgf-m, 36.9 ft-lb)***
***T2: 110 N·m (11.2 kgf-m, 81.1 ft-lb)***



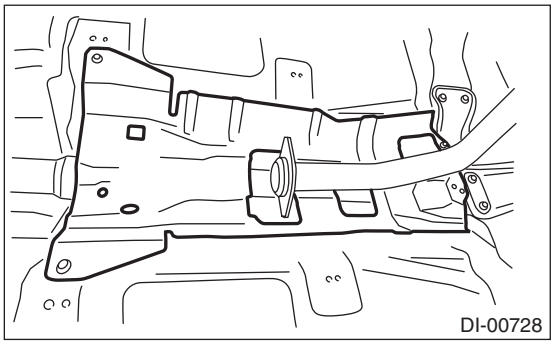
11) Remove the transmission jack.
12) Tighten the self-locking nut.

***Tightening torque:***
***70 N·m (7.1 kgf-m, 51.6 ft-lb)***



13) Install the propeller shaft. <Ref. to DS-13, INSTALLATION, Propeller Shaft.>
14) Install the center exhaust cover.

***Tightening torque:***
***18 N·m (1.8 kgf-m, 13.3 ft-lb)***



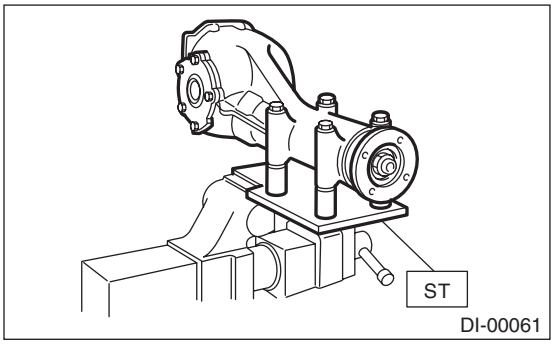
15) Install the rear exhaust pipe. <Ref. to EX(H4DO)-17, INSTALLATION, Rear Exhaust Pipe.>
16) Fill differential gear oil. <Ref. to DI-19, REPLACEMENT, Differential Gear Oil.>
17) Installing procedure hereafter is in the reverse order of removal.
18) Perform “Rear differential inspection mode” using the Subaru Select Monitor. (CVT model) <Ref. to DI-64, Rear Differential Inspection Mode.>

**CAUTION:**
**Be sure to perform rear differential inspection mode when the following work has been performed.**
- **Replacement of rear differential**
- **Replacement of rear differential hypoid gear set**
- **Replacement of transmission assembly**
- **Replacement of front differential hypoid gear set**

## C: DISASSEMBLY

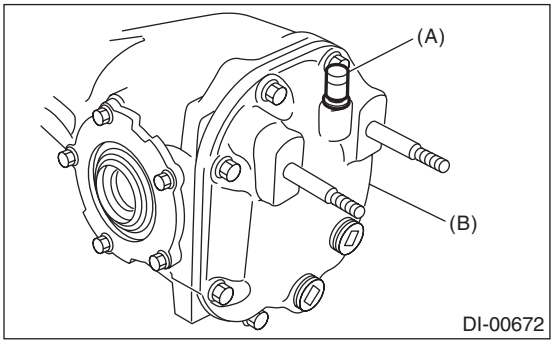
To detect the real cause of trouble, inspect the following items before disassembling.
- Tooth contact and backlash between hypoid driven gear and drive pinion
- Hypoid driven gear runout on its back surface
- Total preload of drive pinion

1) Set the ST on vise and install the differential assembly to ST.
ST 398217700 ATTACHMENT SET



2) Remove the drain plug and filler plug.
3) Remove the air breather cap.

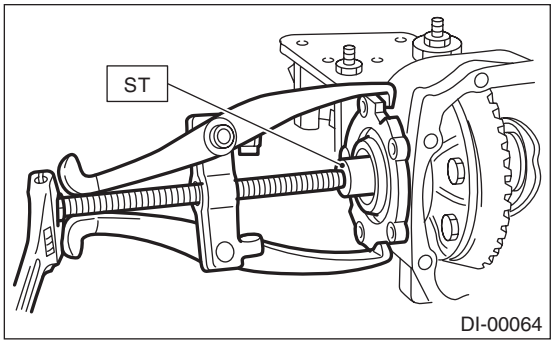
NOTE:
- Do not attempt to remove the air breather cap unless necessary.
- Whenever the air breather cap is removed, replace it with a new part.



(A) Air breather cap
(B) Rear cover

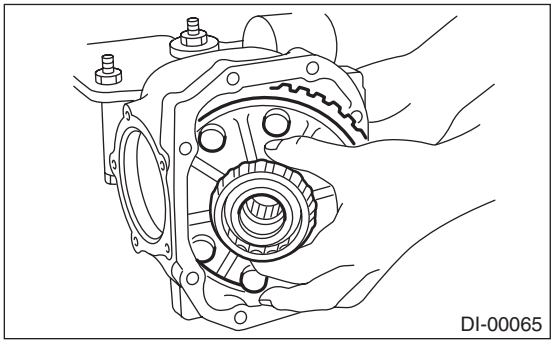
4) Remove the bolts, and then remove the rear cover.
5) Remove the side retainer attachment bolts, set the ST to differential case, and extract the side retainers RH and LH with a puller.

NOTE:
• Side retainer shim of each side should be kept together with its mating retainer.
• Keep the side retainers separate by attaching tags or in similar ways to make it possible to identify RH and LH sides during reassembly.
ST 398457700 ATTACHMENT

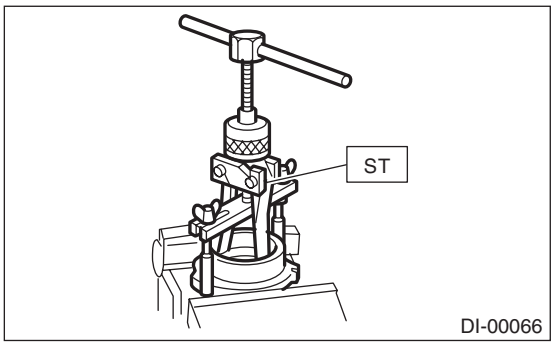


6) Pull out the differential case assembly from the differential carrier.

NOTE:
Be careful not to hit the teeth of hypoid driven gear against the differential carrier.

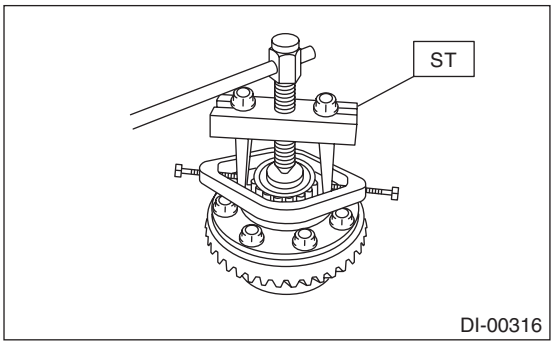


7) Remove the oil seal and O-ring from the side retainer.
8) When replacing the side bearing, remove the bearing race from the side retainer using ST.
ST 398527700 PULLER ASSY

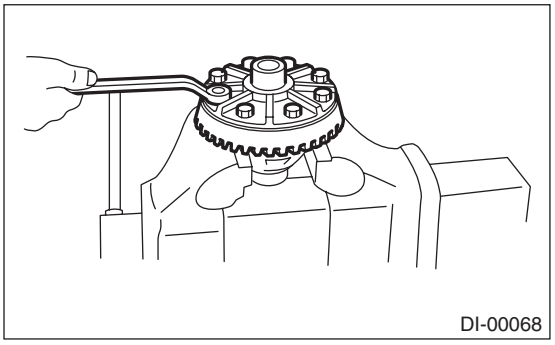


9) Using the ST, remove the bearing cone.

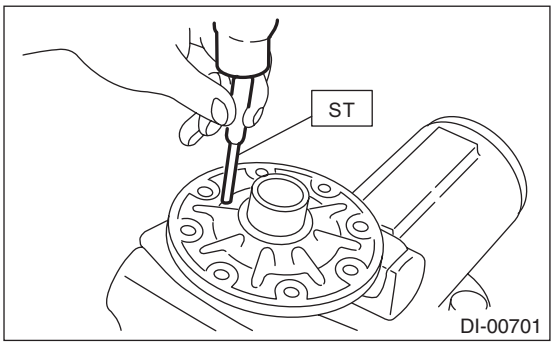
NOTE:
• Do not attempt to disassemble the parts unless necessary.
• Set the ST so that its claws catch the edge of the bearing cone.
• Never mix up the RH and LH bearing races and cones.
ST 18759AA000 PULLER ASSY



10) Remove the hypoid driven gear by loosening hypoid driven gear bolts.

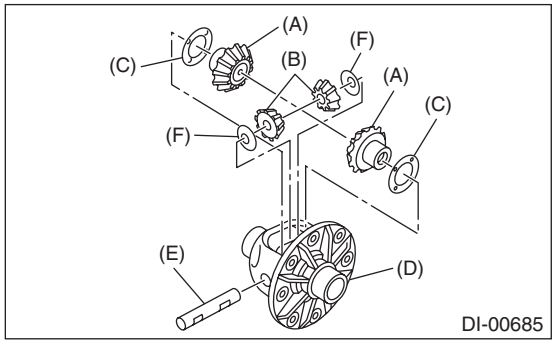


11) Remove the pinion shaft lock pin from hypoid driven gear side using ST.
ST 899904100 STRAIGHT PIN REMOVER



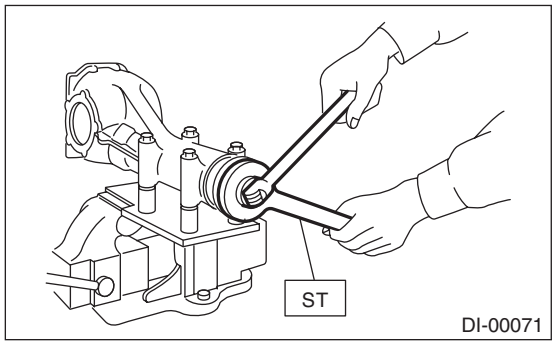
12) Draw out the pinion mate shaft, and remove pinion mate gears, pinion mate gear washers, side gears, and side gear thrust washers.

NOTE:
The gears and washers should be marked with RH or LH, front or rear, or kept separately.

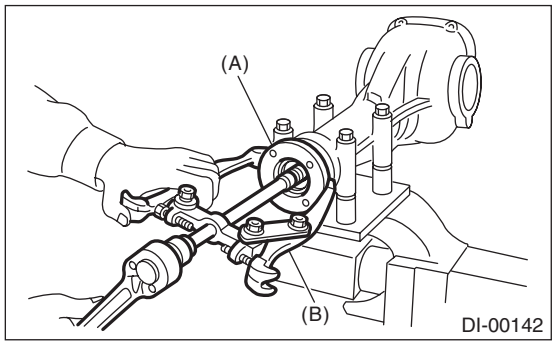


(A) Side gear
(B) Pinion mate gear
(C) Side gear thrust washer
(D) Differential case
(E) Pinion mate shaft
(F) Pinion mate gear washer

13) Remove the self-locking nut while securing the companion flange with ST.
ST 498427200 FLANGE WRENCH



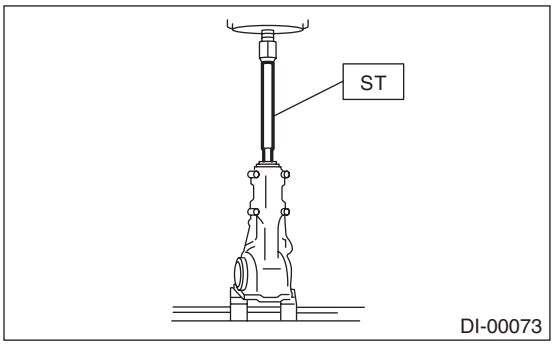
14) Extract the companion flange with a puller.



(A) Companion flange
(B) Puller

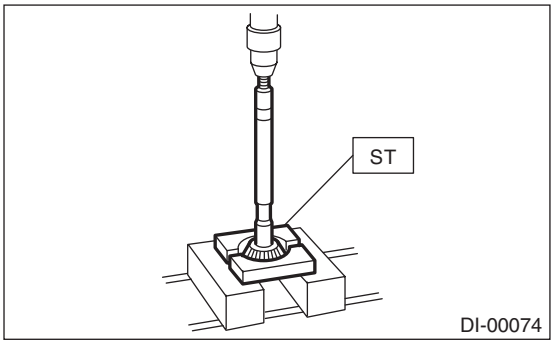
15) Press the end of drive pinion shaft using ST and remove the rear bearing cone, preload adjusting spacer and washer.

NOTE:
Hold the drive pinion so as not to drop it.
ST 398467700 DRIFT

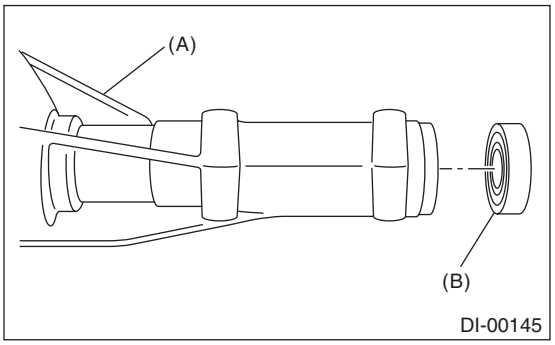


16) Remove the rear bearing cone from drive pinion by supporting the cone with ST.

NOTE:
Place the replacer so that its center-recessed side faces the bearing cone.
ST 398517700 REPLACER

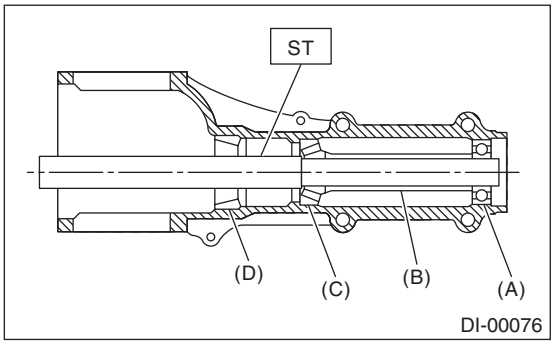


17) Remove the front oil seal from differential carrier using ST.
ST 398527700 PULLER ASSY



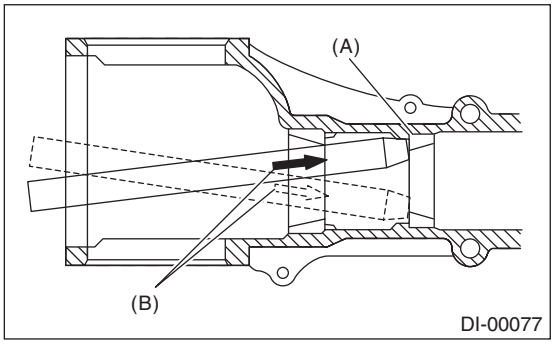
(A) Differential carrier
(B) Front oil seal

18) Remove the pilot bearing together with the front bearing cone and spacer using the ST.
ST 398467700 DRIFT



(A) Pilot bearing
(B) Spacer
(C) Front bearing
(D) Rear bearing race

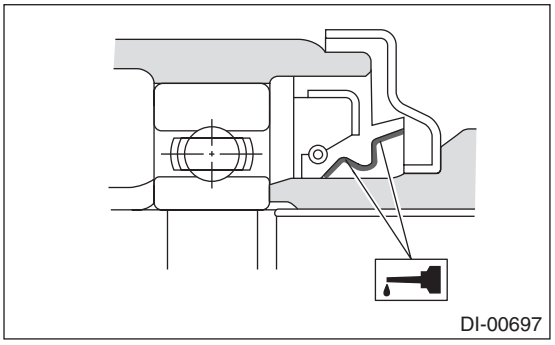
19) When replacing the bearings, use a brass bar to tap out the front bearing race and rear bearing race in this order to remove them.



(A) 2 cutout portions along diagonal lines
(B) Tap alternately with brass bar.

## D: ASSEMBLY

NOTE:
- Assemble in the reverse order of disassembly.
- Check and adjust each part during assembly.
- Keep the shims and washers in order, so that they are not improperly installed.
- Thoroughly clean the surfaces on which the shims, washers and bearings are to be installed.
- Apply gear oil when installing the bearings and thrust washers.
- Be careful not to mix up the RH and LH bearing races.
- Use a new O-ring and gasket.
- Replace the oil seal with a new part at every disassembly.
- Be careful not to mix up the oil seal RH and LH.
- Apply differential gear oil to the lips when installing the oil seal.

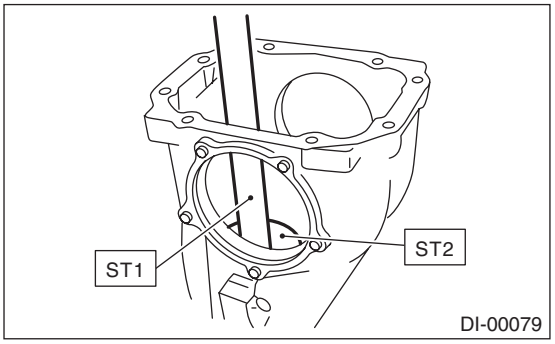


1) Adjusting preload for front and rear bearings

NOTE:
Adjust the bearing preload between front and rear bearings with preload adjusting spacer and washer. Pinion height adjusting washer is not affected by this adjustment. The adjustment must not be carried out with oil seal inserted.

(1) Install the rear bearing race into the differential carrier using ST1 and ST2.

ST1 398477701 HANDLE
ST2 398477703 DRIFT 2



(2) Install the front bearing race to the differential carrier using ST1 and ST2.

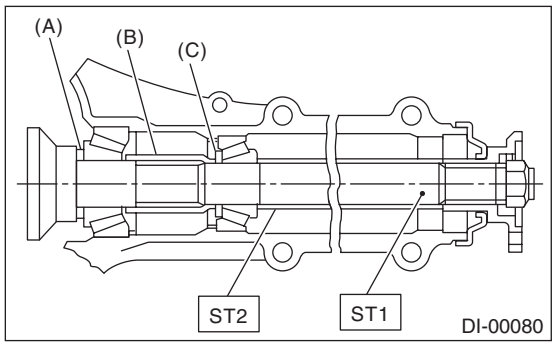
NOTE:
Use a new front bearing race.
ST1 398477701 HANDLE
ST2 398477702 DRIFT

(3) Insert ST1 into the differential carrier with the pinion height adjusting washer and rear bearing cone fitted onto it.

NOTE:
If tooth contact (drive pinion, hypoid driven gear) is normal in the inspection before disassembling, verify that the washer is not deformed, and then re-use the used washer.

(4) Install the preload adjusting spacer and washer, front bearing cone, ST2, companion flange and self-locking nut.

ST1 398507702 DUMMY SHAFT
ST2 398507703 DUMMY COLLAR



(A) Pinion height adjusting washer
(B) Preload adjusting spacer
(C) Preload adjusting washer

(5) Turn the ST1 by hand to smooth the bearing, and tighten the self-locking nut while measuring the initial load or initial torque with a spring scale or torque wrench. Select the preload adjusting washer and spacer so that the specified preload is obtained when nut is tightened to the specified torque.

NOTE:
- Use a new self-locking nut.
- Measure the preload in direction of tangent to the flange.
- Be careful not to give excessive preload.
- When tightening the self-locking nut, lock ST1 with ST2 as shown in the figure.

ST1 398507702 DUMMY SHAFT
ST2 398507704 BLOCK

***Tightening torque:***

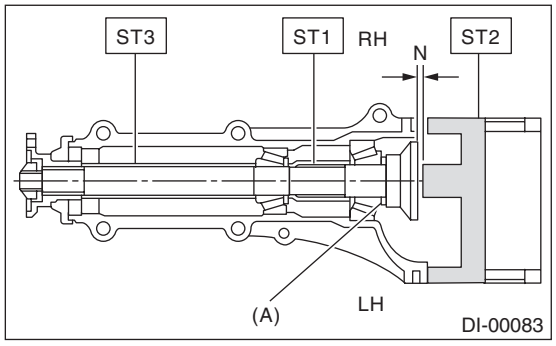
| 383815200 | 2.37 (0.0933) |
| 383825200 | 2.35 (0.0925) |
| 383835200 | 2.33 (0.0917) |
| 383845200 | 2.31 (0.0909) |

| Preload adjusting spacer | |
|---|---|
| Part No. | Length mm (in) |
| 383695201 | 56.2 (2.213) |
| 383695202 | 56.4 (2.220) |
| 383695203 | 56.6 (2.228) |
| 383695204 | 56.8 (2.236) |
| 383695205 | 57.0 (2.244) |
| 383695206 | 57.2 (2.252) |

2) Adjusting drive pinion height:
Adjust the drive pinion height with pinion height adjusting washer installed between the rear bearing cone and the back of pinion gear.
(1) Attach the ST2.

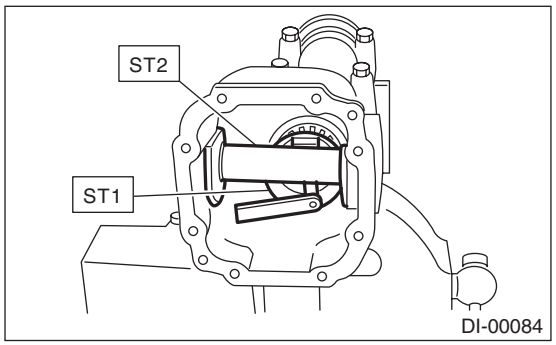
NOTE:
At this time, install a provisionally selected or previously used pinion height adjusting washer. Measure and record the thickness.
ST1 398507702 DUMMY SHAFT
ST2 398507701 DIFFERENTIAL CARRIER GAUGE
ST3 398507703 DUMMY COLLAR



(A) Pinion height adjusting washer

(2) Measure the clearance "N" between the end of ST2 and the end surface of ST1 by using a thickness gauge.

NOTE:
Make sure there is no clearance between the differential carrier and ST2.
ST1 398507702 DUMMY SHAFT
ST2 398507701 DIFFERENTIAL CARRIER GAUGE



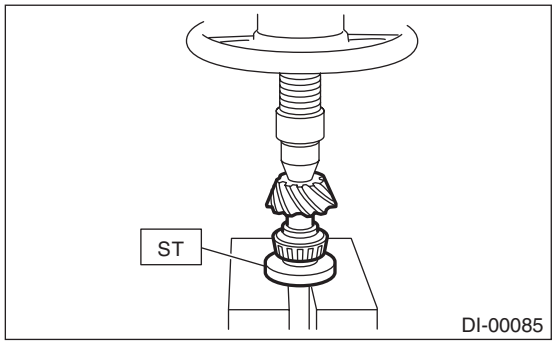
(3) Obtain the thickness of pinion height adjusting washer to be inserted from the following formula, and replace the temporarily installed washer with this one.
$T = To + N - (H \times 0.01) - 0.20$ mm (0.0079 in)

| | | |
|---|---|---|
| T | Thickness of pinion height adjusting washer mm (in) | |
| To | Thickness of washer temporarily inserted mm (in) | |
| N | Clearance of thickness gauge mm (in) | |
| H | Figure marked on drive pinion head | |
| Memo: | | |

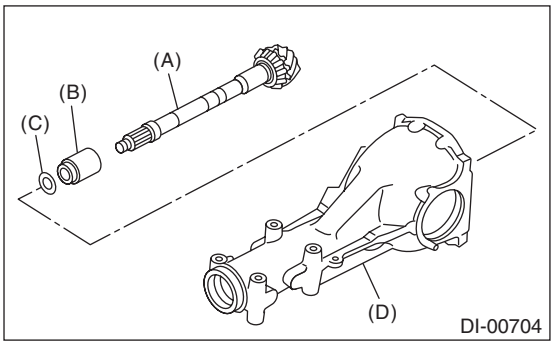
(Example of calculation)
To = 3.39 mm (0.1335 in)
N = 0.24 mm (0.0094 in)
H = + 1
T = 3.39 mm (0.1335 in) + 0.24 mm (0.0094 in) – 0.01 mm (0.0004 in) – 0.20 mm (0.0079 in) = 3.42 mm (0.1346 in)
Result: Thickness = 3.42 mm (0.1346 in)
Therefore use washer 383605200.

| Pinion height adjusting washer | |
|---|---|
| Part No. | Thickness mm (in) |
| 383495200 | 3.09 (0.1217) |
| 383505200 | 3.12 (0.1228) |
| 383515200 | 3.15 (0.1240) |
| 383525200 | 3.18 (0.1252) |
| 383535200 | 3.21 (0.1264) |
| 383545200 | 3.24 (0.1276) |
| 383555200 | 3.27 (0.1287) |
| 383565200 | 3.30 (0.1299) |
| 383575200 | 3.33 (0.1311) |
| 383585200 | 3.36 (0.1323) |
| 383595200 | 3.39 (0.1335) |
| 383605200 | 3.42 (0.1346) |
| 383615200 | 3.45 (0.1358) |
| 383625200 | 3.48 (0.1370) |
| 383635200 | 3.51 (0.1382) |
| 383645200 | 3.54 (0.1394) |
| 383655200 | 3.57 (0.1406) |
| 383665200 | 3.60 (0.1417) |
| 383675200 | 3.63 (0.1429) |
| 383685200 | 3.66 (0.1441) |

3) Install the selected pinion height adjusting washer on drive pinion, and press the rear bearing cone into position with ST.
ST 398177700 INSTALLER



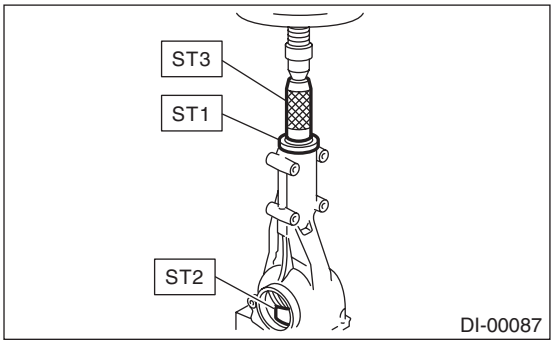
4) Insert the drive pinion into the differential carrier, and install the preselected preload adjusting spacer and washer.



(A) Drive pinion
(B) Preload adjusting spacer
(C) Preload adjusting washer
(D) Differential carrier

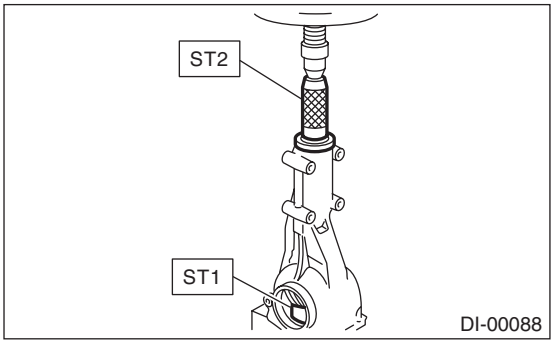
5) Press-fit the front bearing cone with ST1, ST2 and ST3.

NOTE:
Use new front bearing cone.
ST1 398507703 DUMMY COLLAR
ST2 399780104 WEIGHT
ST3 899580100 INSTALLER



6) Insert the spacer, then press-fit the pilot bearing with ST1 and ST2.

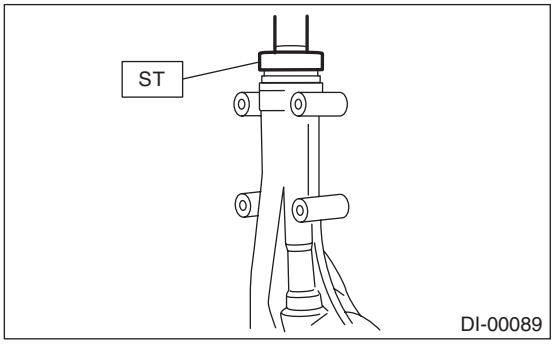
NOTE:
Use a new pilot bearing.
ST1 399780104 WEIGHT
ST2 899580100 INSTALLER



7) Using the ST, install the oil seal.

NOTE:
- Use a new oil seal.
- Press-fit until the oil seal end comes 1 mm (0.04 in) inward from end of carrier.
- Apply differential gear oil to the oil seal lips.

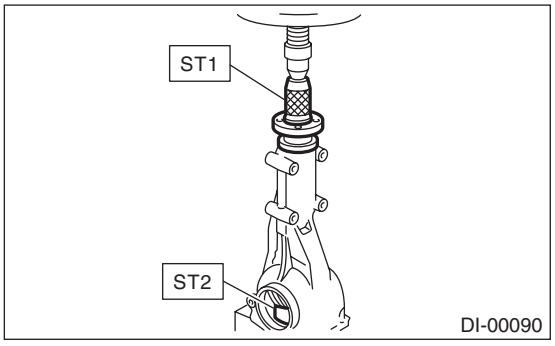
ST 498447120 INSTALLER



8) Press-fit the companion flange with ST1 and ST2.

NOTE:
Be careful not to damage the bearing.

ST1 899874100 INSTALLER
ST2 399780104 WEIGHT



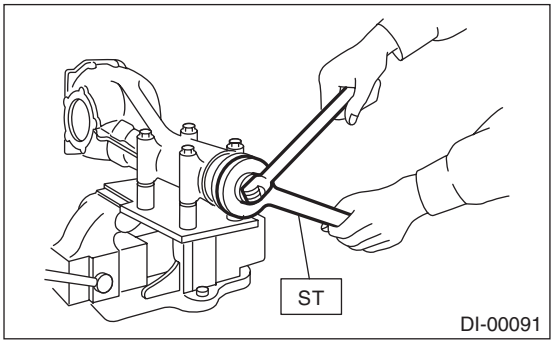
9) Apply seal material on the drive pinion shaft thread and new self-locking nut seat.

***Seal material:***
***THREE BOND 1324 (Part No. 004403042) or equivalent***

10) Attach the new self-locking nut and use the ST to fix the companion flange in place, then tighten the self-locking nut.

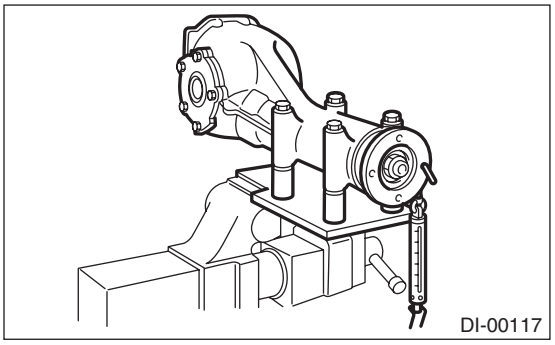
***Tightening torque:***
***181.5 N·m (18.5 kgf-m, 133.9 ft-lb)***

ST 498427200 FLANGE WRENCH

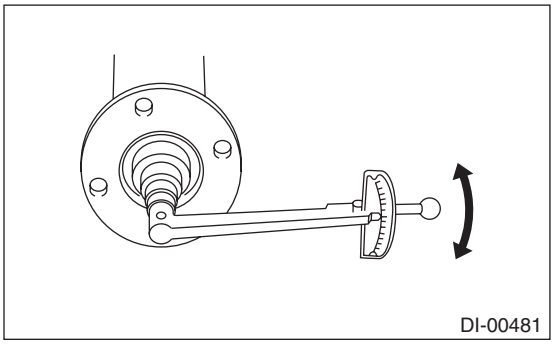


11) Check the initial torque or initial load.

***Initial load:***
***18.1 — 38.8 N (1.8 — 4.0 kgf, 4.1 — 8.7 lbf)***

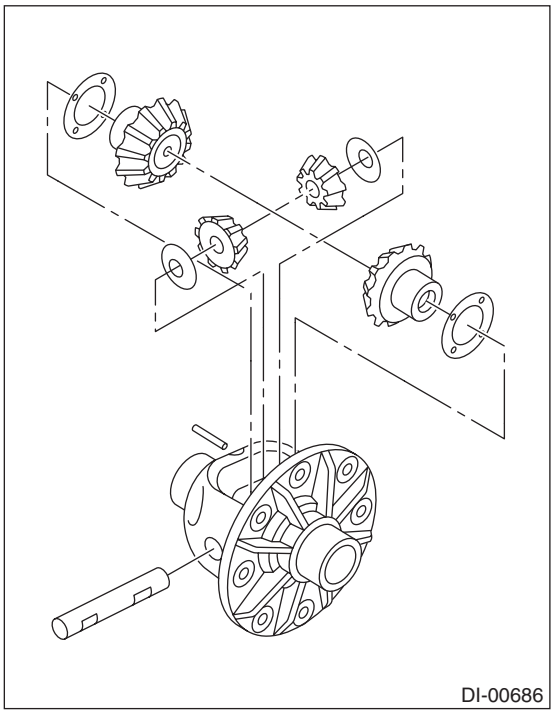


***Initial torque:***
***0.69 — 1.47 N·m (0.07 — 0.15 kgf-m, 0.51 — 1.08 ft-lb)***



12) Assembling differential case
(1) Install the side gears and pinion mate gears, with their side gear thrust washers, pinion mate gear washer, and pinion mate shaft, into the differential case.

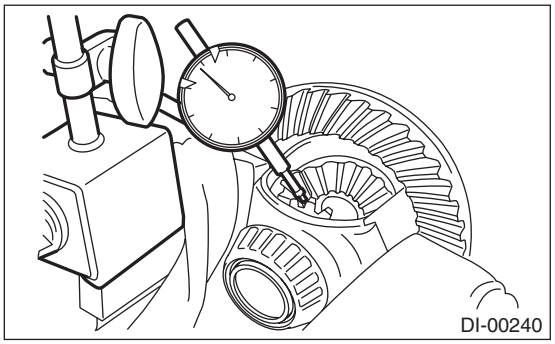
NOTE:
• Apply gear oil on both sides of the washer and on the pinion mate shaft before installing.
• Insert the pinion mate shaft into the differential case by aligning the pin holes.



DI-00686

(2) Measure the side gear backlash.

***Side gear backlash:***
***0.10 — 0.20 mm (0.004 — 0.008 in)***



DI-00240

(3) Adjust the backlash as specified by selecting side gear thrust washer.

| Side gear thrust washer | |
|---|---|
| Part No. | Thickness mm (in) |
| 383445201 | 0.75 — 0.80 (0.0295 — 0.0315) |
| 383445202 | 0.80 — 0.85 (0.0315 — 0.0335) |
| 383445203 | 0.85 — 0.90 (0.0335 — 0.0354) |

(4) Check the condition of rotation after applying oil to the gear tooth surfaces and washer surfaces.
(5) Drive the pinion shaft lock pin into the differential case.

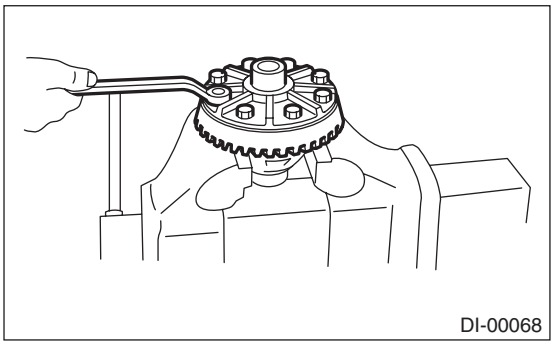
NOTE:
Use a new pinion shaft lock pin.
ST 899904100 STRAIGHT PIN REMOVER

13) Install the driven gear to the differential case.

NOTE:
• Before installing bolts, apply seal material to bolt threads.

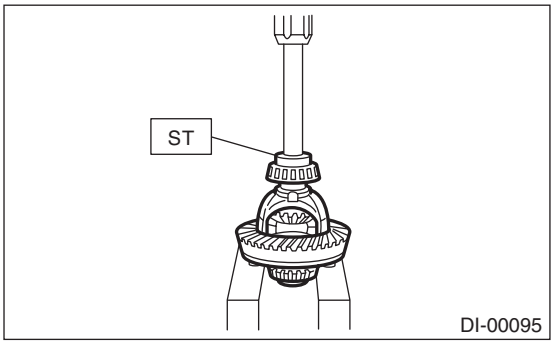
***Seal material:***
***THREE BOND 1324 (Part No. 004403042) or equivalent***
• Make sure there is no clearance between the differential case and driven gear.
• Tighten opposing bolts in order.

***Tightening torque:***
***103 N·m (10.5 kgf-m, 76.0 ft-lb)***



DI-00068

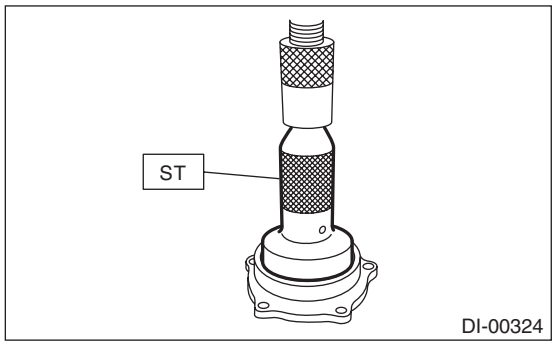
14) Using the ST, press-fit the side bearing to the differential case.
ST 398487700 DRIFT



DI-00095

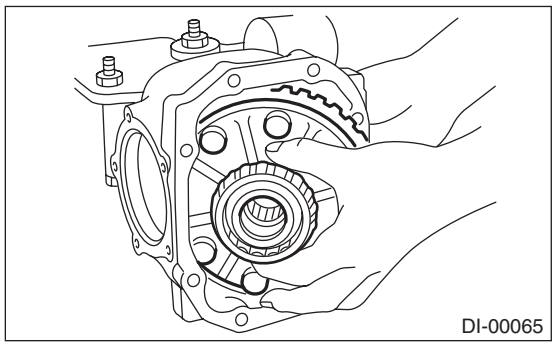
15) Using the ST, press-fit the side bearing outer race to the side retainer.

**CAUTION:**
**Make sure that the bearing outer races and cones are properly assembled.**
ST 398417700 DRIFT



16) Side retainer shim adjustment
(1) The hypoid driven gear backlash and side bearing preload can be adjusted by the side retainer shim thickness.
(2) Install the differential case assembly into differential carrier in the reverse order of disassembly.

NOTE:
Be careful not to hit the teeth of hypoid driven gear against the differential carrier.



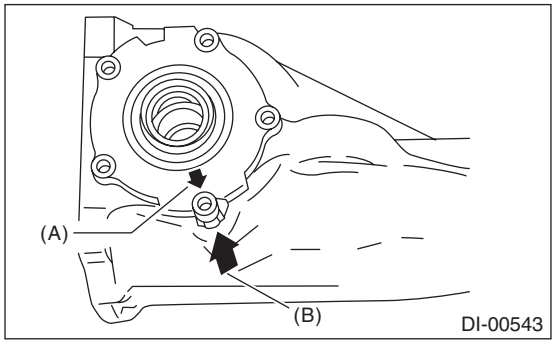
(3) Install the side retainer shim.

NOTE:
• Be careful not to mix up the side retainer shim RH and LH.
• Replace broken or corroded side retainer shims with a new part of the same thickness.

| Side retainer shim | |
|---|---|
| Part No. | Thickness mm (in) |
| 383475201 | 0.20 (0.0079) |
| 383475202 | 0.25 (0.0098) |
| 383475203 | 0.30 (0.0118) |
| 383475204 | 0.40 (0.0157) |
| 383475205 | 0.50 (0.0197) |

(4) Align the arrow mark on the differential carrier with the arrow mark on the side retainer when installing the side retainer.

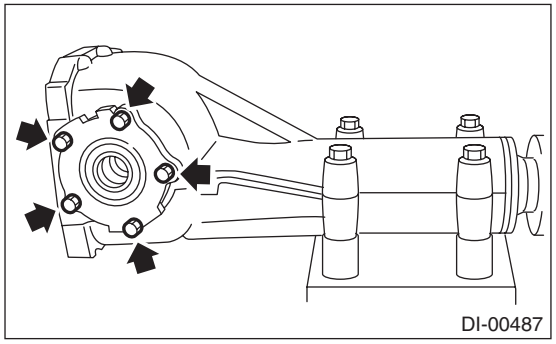
NOTE:
Be careful that the side bearing outer race is not damaged by the bearing roller.



(A) Arrow mark (on the side retainer)
(B) Arrow mark (on the differential carrier)

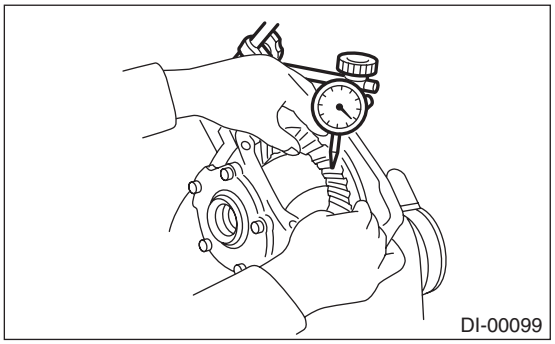
(5) Tighten the side retainer bolts.

***Tightening torque:***
***10.5 N·m (1.1 kgf-m, 7.7 ft-lb)***



(6) Measure the hypoid driven gear to drive pinion backlash. Set the magnet base on differential carrier. Align the contact point of dial gauge with tooth face of hypoid driven gear, and move hypoid driven gear while holding drive pinion still. Read the value indicated on dial gauge. If the backlash is outside the standard range, adjust the side retainer shim by the following method.
**•When backlash is less than 0.1 mm (0.004 in):**
Reduce the thickness of shim on the back side of the hypoid driven gear and increase the thickness of shims on the teeth side of the hypoid driven gear.
**•When backlash exceeds 0.2 mm (0.008 in):**
Increase the thickness of shim on the back side of the hypoid driven gear and reduce the thickness of shims on the teeth side of the hypoid driven gear.

***Backlash:***
***0.10 — 0.20 mm (0.004 — 0.008 in)***

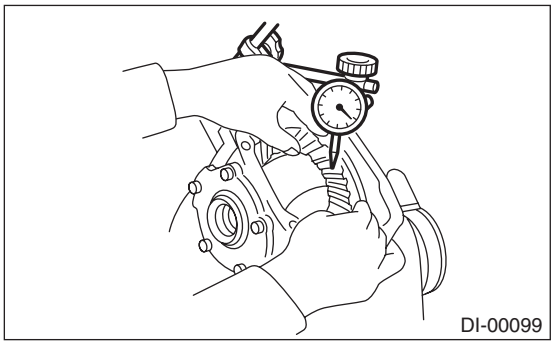


(7) Measure the total preload of the drive pinion. If the total preload is outside the specification range, adjust the thickness of side retainer shims, increasing/reducing both shims by an even amount at a time.

***Total preload:***
***20.7 — 54.4 N (2.1 — 5.5 kgf, 4.7 — 12.2 lbf)***

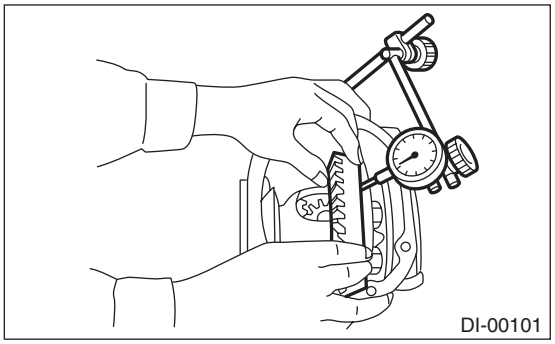
17) Recheck the hypoid driven gear to drive pinion backlash.

***Backlash:***
***0.10 — 0.20 mm (0.004 — 0.008 in)***



18) Check pinion and hypoid driven gears rotate smoothly and make sure of the hypoid driven gear runout on its back surface. If the hypoid driven gear runout on its back surface exceeds the specification, check for any foreign objects between the hypoid driven gear and differential case, and for any deformation of the differential case or hypoid driven gear.

***Hypoid driven gear back surface runout:***
***0.05 mm (0.002 in)***

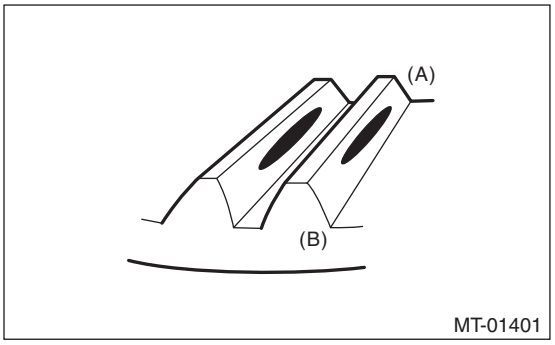


19) Check and adjustment of the tooth contact of hypoid driven gear and drive pinion
(1) Apply lead-free red dye evenly on the both sides of three to four teeth of the hypoid driven gear. Check the contact pattern after rotating the hypoid driven gear several revolutions back and forth until a definite contact pattern appears on the hypoid driven gear.
(2) When the contact pattern is not correct, re-adjust.

NOTE:
Be sure to wipe off the lead-free red dye completely after the adjustment is completed.

- Correct tooth contact

**Check item: Tooth contact pattern is slightly shifted toward toe side under no-load rotation. (When driving, it moves towards the heel side.)**

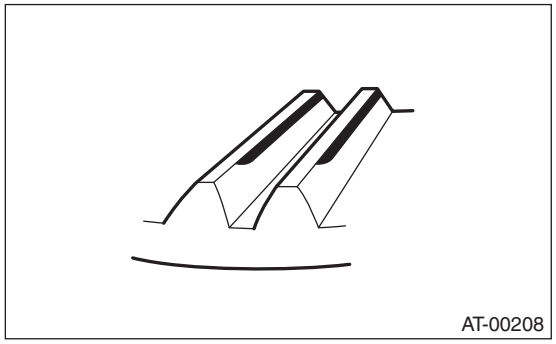


(A) Toe side
(B) Heel side

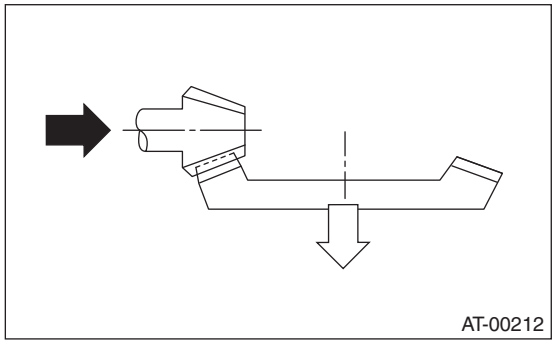
• Face contact

**Check item: Backlash is too large.**

Contact pattern



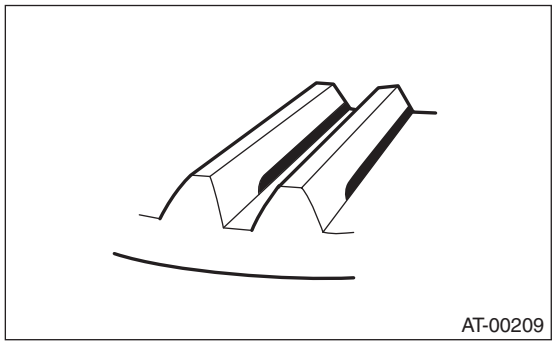
Corrective action: Increase thickness of pinion height adjusting washer according to the procedure for bringing drive pinion close to hypoid driven gear side.



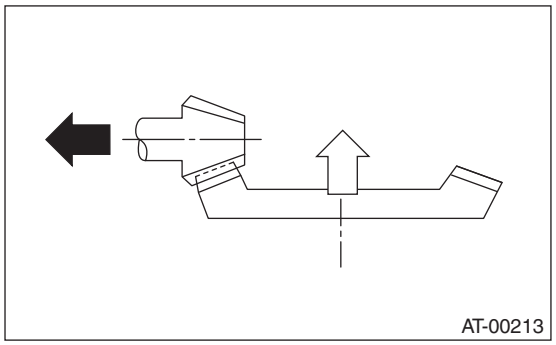
• Flank contact

**Check item: Backlash is too small.**

Contact pattern



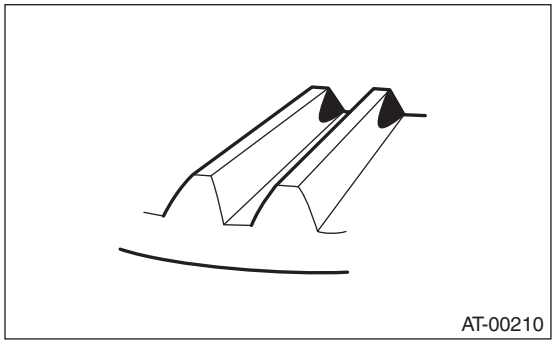
Corrective action: Reduce the thickness of pinion height adjusting washer according to the procedure for bringing drive pinion away from hypoid driven gear.



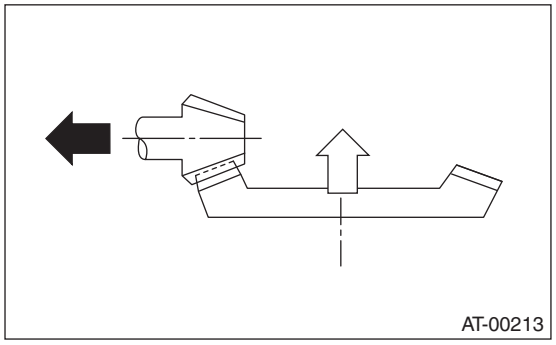
• Toe contact (inside contact)

**Check item: Teeth contact area is too small.**

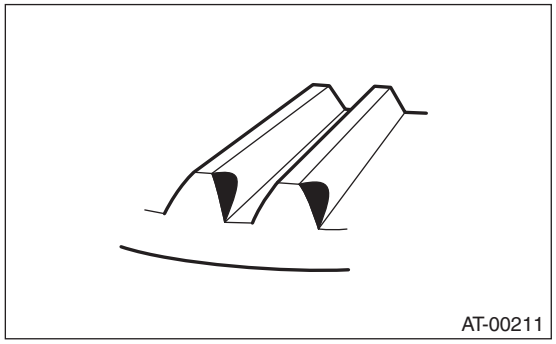
Contact pattern



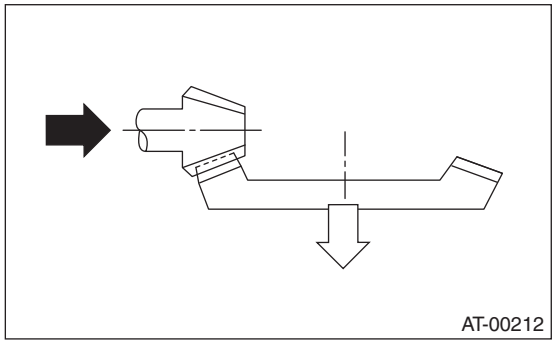
Corrective action: Reduce the thickness of pinion height adjusting washer according to the procedure for bringing drive pinion away from hypoid driven gear.



• Heel contact (outside end contact)
**Check item: Teeth contact area is too small.**
Contact pattern

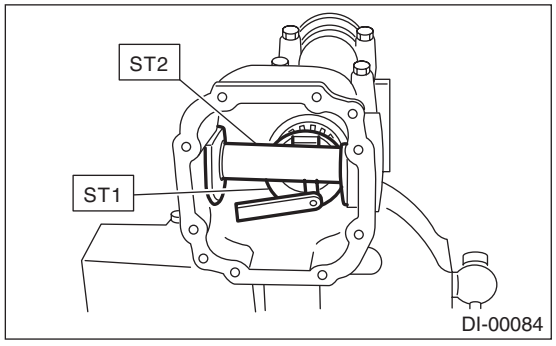


Corrective action: Increase thickness of pinion height adjusting washer according to the procedure for bringing drive pinion close to hypoid driven gear side.



20) If proper tooth contact is not obtained, readjust the drive pinion height by changing the RH and LH side retainer shims and the hypoid gear backlash.
(1) Drive pinion height

ST1 398507702 DUMMY SHAFT
ST2 398507701 DIFFERENTIAL CARRIER GAUGE



T = To + N – (H × 0.01) – 0.20 mm (0.0079 in)

| | | |
|---|---|---|
| T | Thickness of pinion height adjusting washer mm (in) | |
| To | Thickness of washer temporarily inserted mm (in) | |
| N | Clearance of thickness gauge mm (in) | |

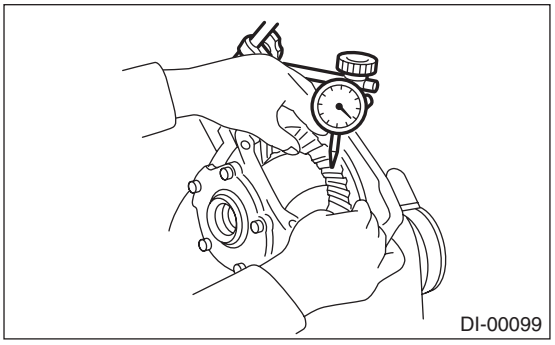
| Memo: | | |

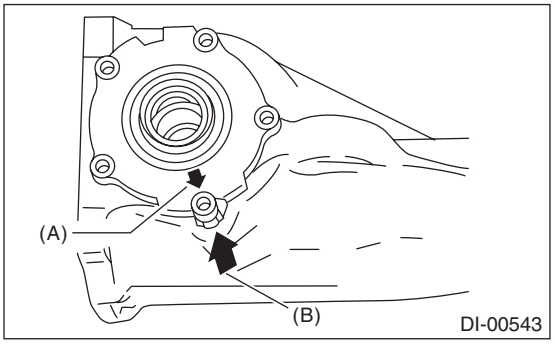
(2) Hypoid gear backlash

***Backlash:***
***0.10 — 0.20 mm (0.004 — 0.008 in)***



21) Remove the RH and LH side retainers.
22) Install the O-ring to left and right side retainers.

NOTE:
Use new O-rings.
23) Install the oil seal to the side retainers on both sides. <Ref. to DI-58, REPLACEMENT, Rear Differential Side Oil Seal.>
24) Align the arrow mark on the differential carrier with the arrow mark on the side retainer when installing the side retainer.

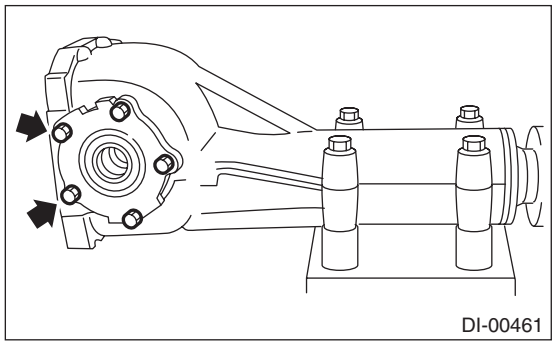


(A) Arrow mark (on the side retainer)
(B) Arrow mark (on the differential carrier)

25) Apply liquid gasket to the bolts indicated by arrows, and tighten the bolts.

***Liquid gasket:***
***THREE BOND 1110B (Part No. K0879Y0020) or equivalent***

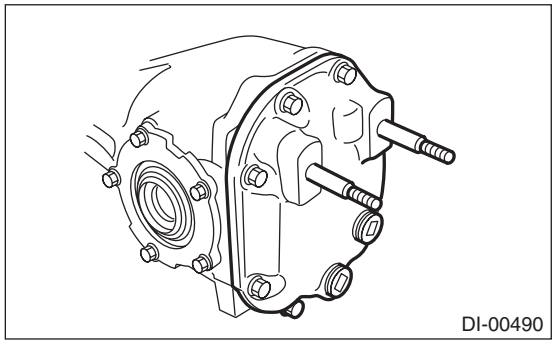
***Tightening torque:***
***10.5 N·m (1.1 kgf-m, 7.7 ft-lb)***



26) Install the gasket and rear cover, and tighten the bolts to specified torque.

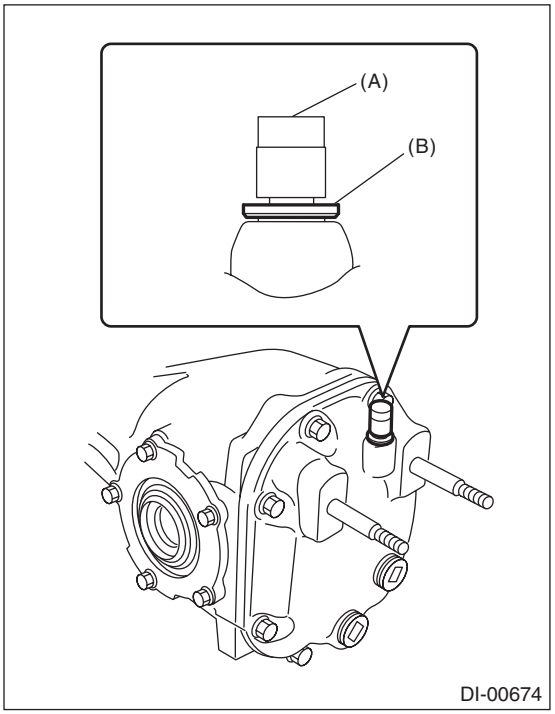
NOTE:
Use a new gasket.

***Tightening torque:***
***29.5 N·m (3.0 kgf-m, 21.8 ft-lb)***



27) Install the air breather cap.

NOTE:
When installing the air breather cap, do not tap section (A). Be sure to tap section (B) to install.



28) Install the drain plug.

NOTE:
Apply liquid gasket to the drain plug.

***Liquid gasket:***
***THREE BOND 1105 (Part No. 004403010) or equivalent***

***Tightening torque:***
***49 N·m (5.0 kgf-m, 36.1 ft-lb)***

29) Install the filler plug.

NOTE:
After installing the rear differential assembly to the vehicle, fill the gear oil, then apply liquid gasket, and tighten to the specified torque. <Ref. to DI-19, REPLACEMENT, Differential Gear Oil.>

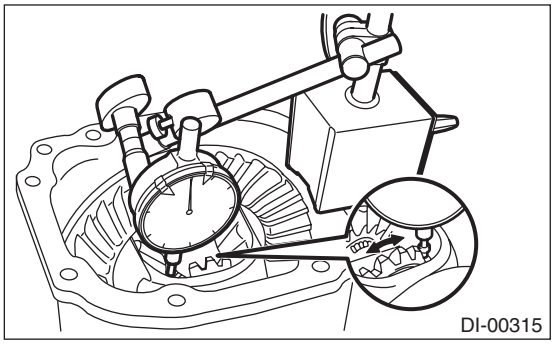
## E: INSPECTION

Wash all the disassembled parts clean, and examine them for wear, damage and other defects. Repair or replace the defective parts as necessary.
1) Hypoid driven gear and drive pinion
• If there is evidently an abnormal tooth contact, find out the cause and adjust until the teeth contact correctly. Replace the gear if there is an excessive worn or an incapable adjustment.
• If crack, cutout or seizure is found, replace the parts as a set. Slight damage of some teeth can be corrected by oil stone or the like.
2) Side gear and pinion mate gear
• Replace if cracks, scoring or other defects are evident on the tooth surface.
• Replace if thrust washer contact surface is worn or scored. Slight damages of the surface can be corrected by oil stones or equivalent.
3) Bearing
Replace if seizure, peeling, wear, rust, dragging during rotation, noise or other defect is evident.
4) Thrust washer of the side gear and pinion mate gear
Replace if seized, flawed, abnormally worn or having other defects.
5) Oil seal
Replace if deformed or damaged, and at every disassembling.
6) Differential carrier
Replace if the bearing bores are worn or damaged.
7) Differential case
Replace if sliding surfaces are abnormally worn, burned, or cracked.
8) Companion flange
Replace if the oil seal lip contact surface shows cracking.

### 1. SIDE GEAR BACKLASH

Using a dial gauge, check the backlash of side gear.

***Side gear backlash:***
***0.10 — 0.20 mm (0.004 — 0.008 in)***
If the side gear backlash is not within the specified range, select the side gear thrust washer and adjust the side gear backlash as specified.

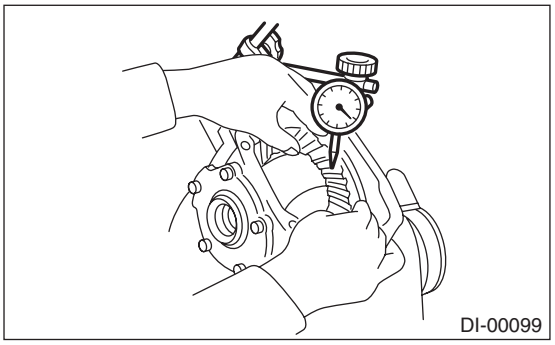


DI-00315

### 2. HYPOID DRIVEN GEAR BACKLASH

Using a dial gauge, check the backlash of hypoid driven gear.

***Hypoid driven gear backlash:***
***0.10 — 0.20 mm (0.004 — 0.008 in)***
If the hypoid driven gear backlash is outside the specification range, adjust the side bearing preload and repair if necessary.

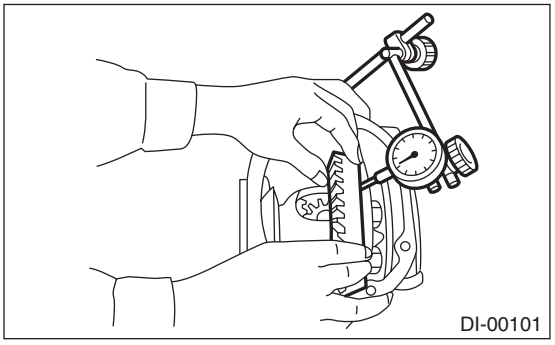


DI-00099

### 3. HYPOID DRIVEN GEAR RUNOUT ON ITS BACK SURFACE

Using a dial gauge, check the hypoid driven gear back surface runout.

***Hypoid driven gear back surface runout:***
***0.05 mm (0.002 in)***
If the hypoid driven gear runout on its back surface exceeds the limit, replace the hypoid driven gear.



DI-00101

### 4. TOOTH CONTACT BETWEEN HYPOID DRIVEN GEAR AND DRIVE PINION

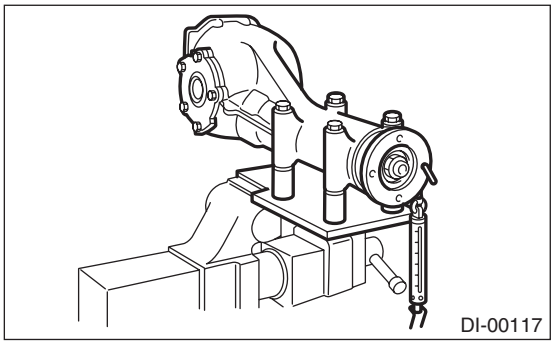
Inspect the tooth contact between the hypoid driven gear and drive pinion. <Ref. to DI-28, ASSEMBLY, Rear Differential (T-type).>

### 5. TOTAL PRELOAD

Using a spring scale, check the total preload.

***Total preload:***
***20.7 — 54.4 N (2.1 — 5.5 kgf, 4.7 — 12.2 lb)***

If the total preload is not within the specified range, adjust the side retainer shim.

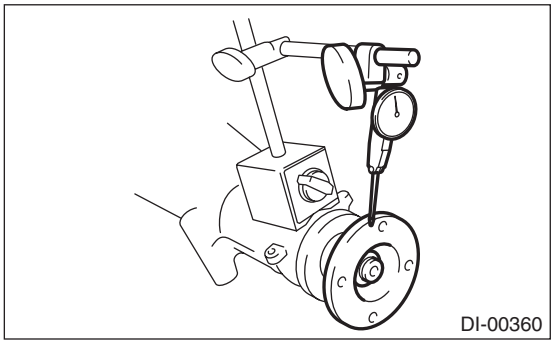


DI-00117

### 6. COMPANION FLANGE

1) If rust or dirt is attached to the companion flange, remove them.
2) Set a dial gauge at a companion flange surface (mating surface of propeller shaft and companion flange), and then measure the companion flange runout.

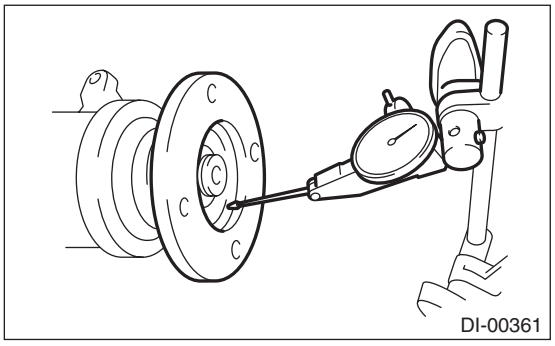
***Limit of runout:***
***0.08 mm (0.003 in)***



DI-00360

3) Set the gauge inside of the companion flange, and measure the runout.

***Limit of runout:***
***0.08 mm (0.003 in)***



DI-00361

4) If either runout exceeds the limit, move the phase of companion flange and drive pinion 90° each, and find the point where the runout is within the limit.
5) If the runout exceeds the limit even after changing the phase, replace the companion flange and recheck the runout.
6) If the runout exceeds the limit after replacing the companion flange, the drive pinion may be assembled incorrectly or bearing is faulty.

## F: ADJUSTMENT

### 1. SIDE GEAR BACKLASH

Adjust the side gear backlash. <Ref. to DI-28, ASSEMBLY, Rear Differential (T-type).>

### 2. HYPOID DRIVEN GEAR BACKLASH

Adjust hypoid driven gear backlash. <Ref. to DI-28, ASSEMBLY, Rear Differential (T-type).>

### 3. TOOTH CONTACT BETWEEN HYPOID DRIVEN GEAR AND DRIVE PINION

Adjust the tooth contact between hypoid driven gear and drive pinion gear. <Ref. to DI-28, ASSEMBLY, Rear Differential (T-type).>

### 4. TOTAL PRELOAD

Adjust the side retainer shim. <Ref. to DI-28, ASSEMBLY, Rear Differential (T-type).>

# 5. Rear Differential (VA-type)

## A: REMOVAL

The removal procedure for VA-type is included in “REMOVAL” for T-type. <Ref. to DI-22, REMOVAL, Rear Differential (T-type).>

## B: INSTALLATION

The installation procedure for VA-type is included in “INSTALLATION” for T-type. <Ref. to DI-24, INSTALLATION, Rear Differential (T-type).>

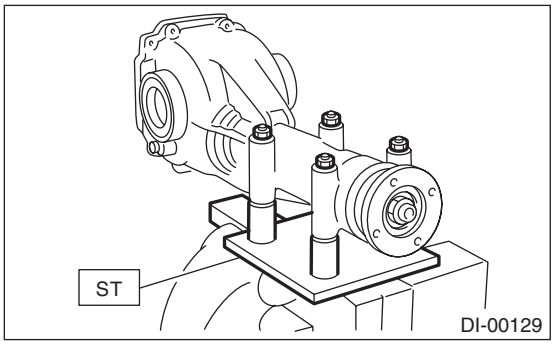
## C: DISASSEMBLY

To detect the real cause of trouble, inspect the following items before disassembling.

• Tooth contact and backlash between hypoid driven gear and drive pinion

1) Set the ST on vise and install the differential assembly to ST.

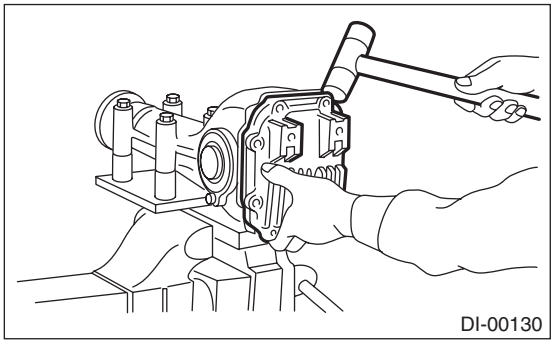
ST 398217700 ATTACHMENT SET



2) Remove the drain plug and filler plug.

3) Remove the rear cover by removing retaining bolts.

NOTE:
Remove it by tapping with a plastic hammer.

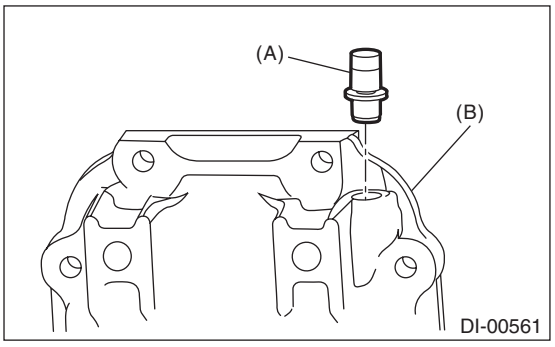


4) Remove the air breather cap.

NOTE:

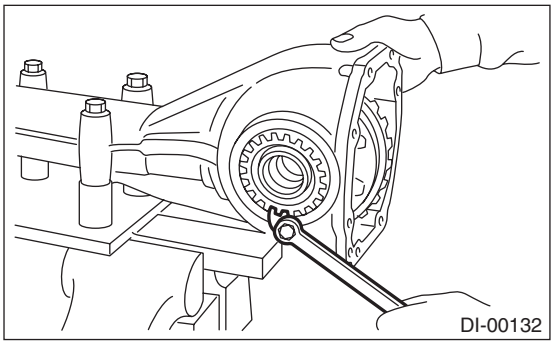
• Do not attempt to remove the air breather cap unless necessary.

• Whenever the air breather cap is removed, replace it with a new part.



(A) Air breather cap
(B) Rear cover

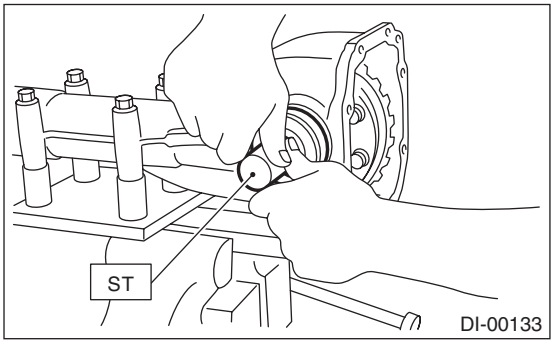
5) Remove the lock plate RH and LH.



6) Remove the side retainer RH and LH with ST.

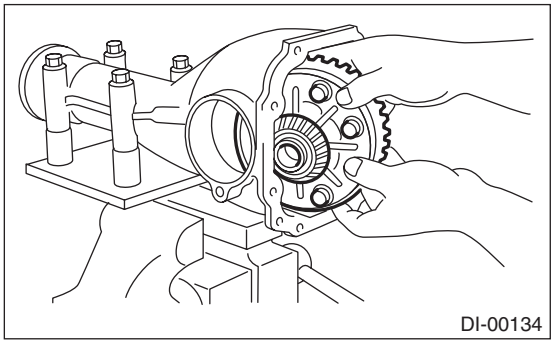
NOTE:
When keeping the retainers aside, use labels etc. to avoid confusing the left and right.

ST 18630AA010 WRENCH COMPL RETAINER

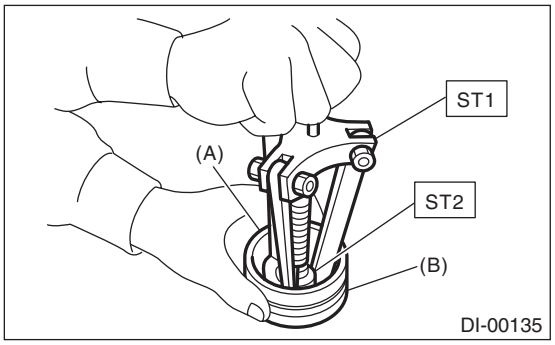


7) Pull out the differential case assembly from differential carrier.

NOTE:
Be careful not to hit the teeth of hypoid driven gear against the differential carrier.



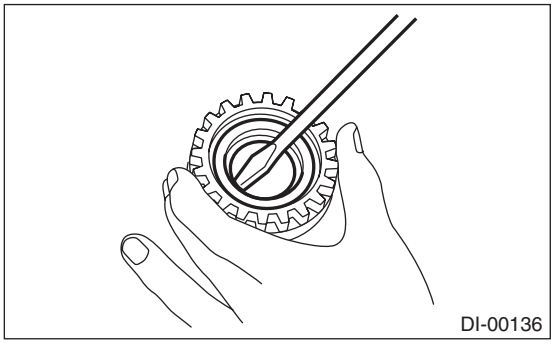
8) Remove the bearing race from side retainer RH and LH with ST1 and ST2.
ST1 499705401 PULLER ASSY
ST2 499705404 SEAT



(A) Bearing race
(B) Side retainer

9) Remove the oil seal from the RH and LH side retainers using a screwdriver.

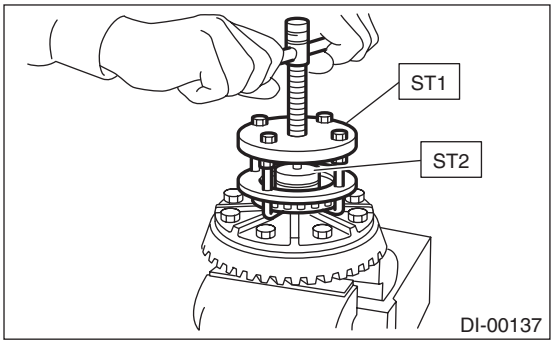
NOTE:
Perform this operation only when changing oil seal.



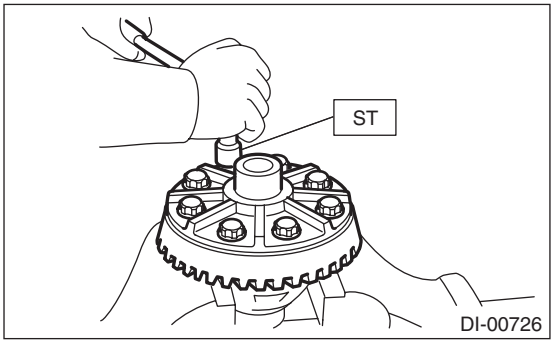
10) Remove the O-ring.

11) Extract the bearing cone with ST1 and ST2.

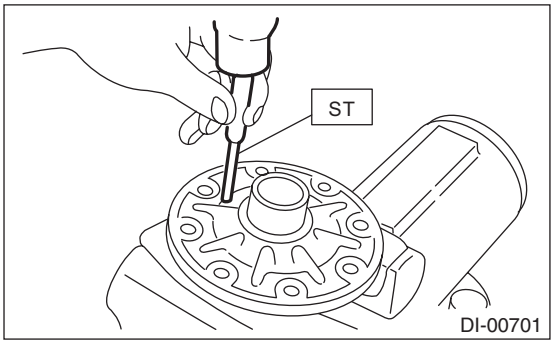
NOTE:
• Do not attempt to disassemble the parts unless necessary.
• Set the puller so that its claws catch the edge of the bearing cone.
• Store so that the right and left side bearing races and cones are not mixed together.
ST1 899524100 PULLER SET
ST2 399520105 SEAT



12) Using the ST, loosen the hypoid driven gear bolt and remove the hypoid driven gear.
ST 18270KA020 SOCKET (E20)

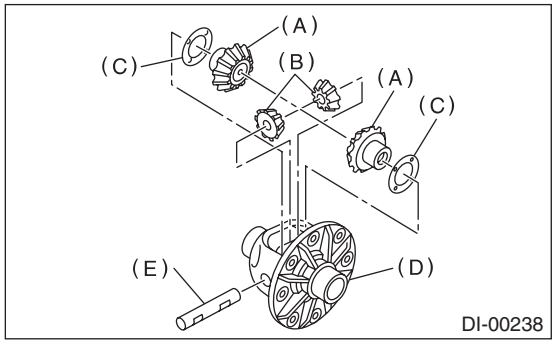


13) Remove the spring pin from hypoid driven gear side using ST.
ST 899904100 STRAIGHT PIN REMOVER



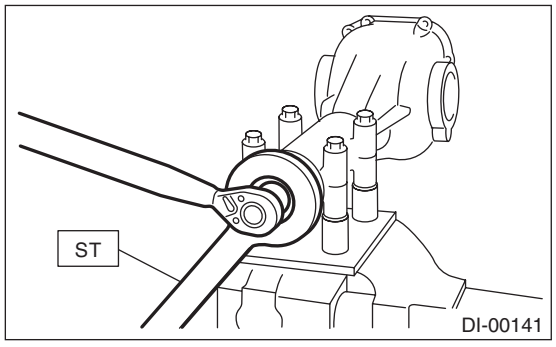
14) Draw out the pinion mate shaft and remove pinion mate gears, side gears and side gear thrust washers.

NOTE:
The gears and washers should be marked with RH or LH, front or rear, or kept separately.

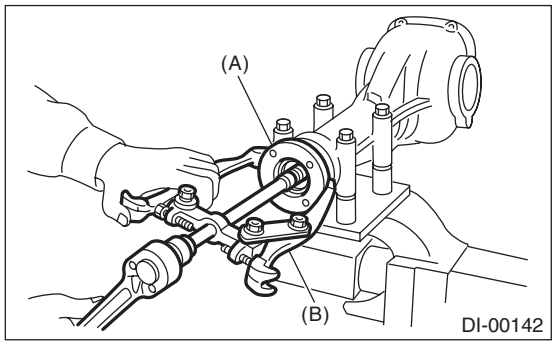


(A) Side gear
(B) Pinion mate gear
(C) Side gear thrust washer
(D) Differential case
(E) Pinion mate shaft

15) Remove the self-locking nut while securing the companion flange with ST.
ST 498427200 FLANGE WRENCH



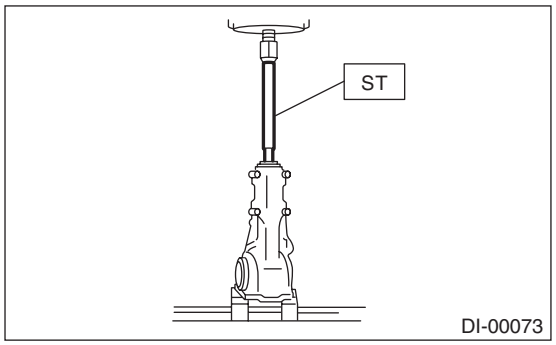
16) Extract the companion flange with a puller.



(A) Companion flange
(B) Puller

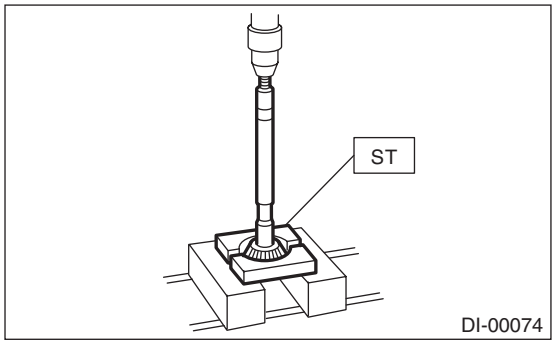
17) Press the end of drive pinion shaft and extract it together with rear bearing cone, pinion height adjusting washer and washer by using the ST.

NOTE:
Hold the drive pinion so as not to drop it.
ST 398467700 DRIFT

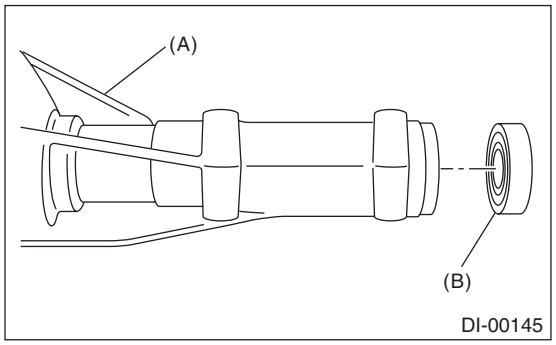


18) Remove the rear bearing cone from drive pinion by supporting the cone with ST.

NOTE:
Place the replacer so that its center-recessed side faces the bearing cone.
ST 498515500 REPLACER

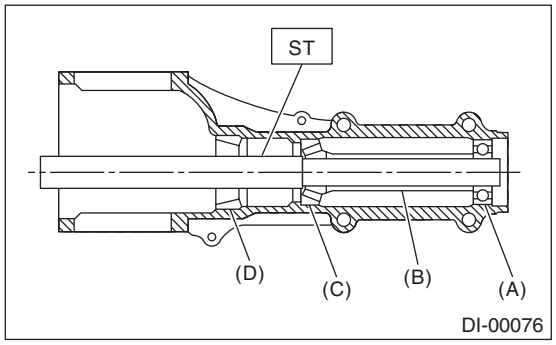


19) Remove the front oil seal from differential carrier using ST.
ST 398527700 PULLER ASSY



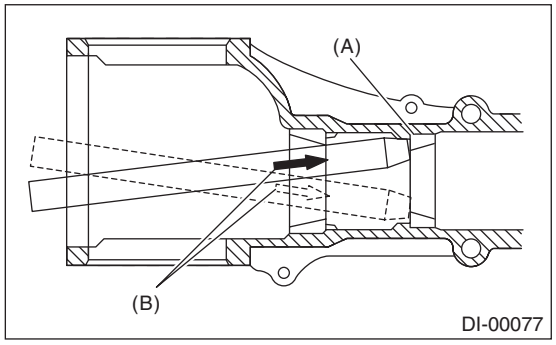
(A) Differential carrier
(B) Front oil seal

20) Remove the pilot bearing together with the front bearing cone and spacer using the ST.
ST 398467700 DRIFT



(A) Pilot bearing
(B) Spacer
(C) Front bearing
(D) Rear bearing cup

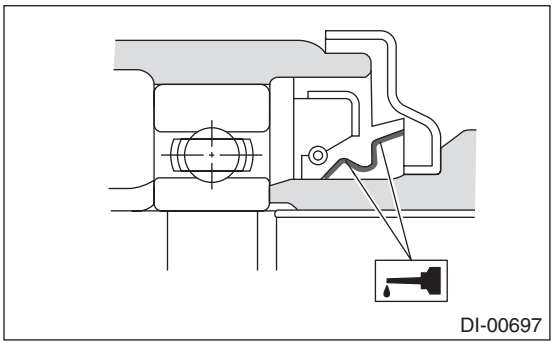
21) When replacing the bearings, hit out the front bearing cup and rear bearing cup in this order using a brass bar.



(A) 2 cutout portions along diagonal lines
(B) Tap alternately with brass bar.

## D: ASSEMBLY

NOTE:
- Assemble in the reverse order of disassembly.
- Check and adjust each part during assembly.
- Use new gaskets and O-rings.
- Keep the shims and washers in order, so that they are not improperly installed.
- Thoroughly clean the surfaces on which the shims, washers and bearings are to be installed.
- Apply gear oil when installing the bearings and thrust washers.
- Be careful not to mix up the RH and LH bearing races.
- Replace the oil seal and O-ring with a new part at every disassembly.
- Be careful not to mix up the side oil seal RH and LH.
- Apply differential gear oil to the lips when installing the oil seal.

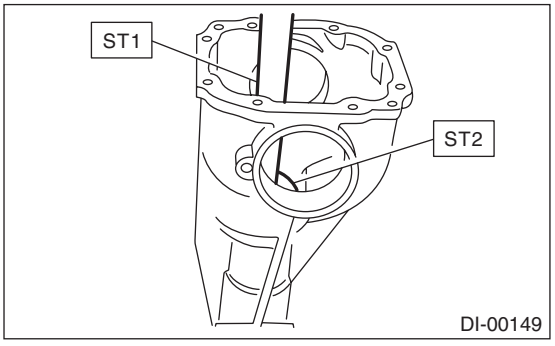


1) Adjusting preload for front and rear bearings

NOTE:
Adjust the bearing preload between front and rear bearings with preload adjusting spacer and washer. Pinion height adjusting washer is not affected by this adjustment. The adjustment must be carried out with oil seal removed.

(1) Install the rear bearing race into the differential carrier using ST1 and ST2.

ST1 398477701 HANDLE
ST2 398477702 DRIFT



(2) Install the front bearing race to the differential carrier using ST1 and ST2.

NOTE:
Use a new front bearing race.
ST1 398477701 HANDLE
ST2 498447110 DRIFT

(3) Insert the front bearing cone.

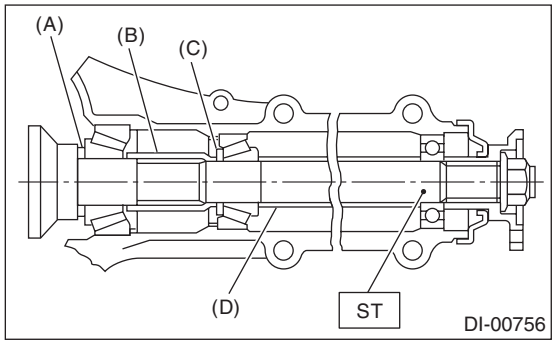
(4) Measure and record the thickness of pinion height adjusting washer.

NOTE:
If tooth contact (drive pinion and hypoid driven gear) is normal in the inspection before disassembling, verify that the washer is not deformed, and then reuse the used washer.

(5) Insert the ST (DUMMY SHAFT) into case with the pinion height adjusting washer and rear bearing cone fitted onto it.

(6) Install the preload adjusting spacer, washer, front bearing cone, spacer, pilot bearing, companion flange, and self-locking nut.

ST 498447150 DUMMY SHAFT
Part No. 32285AA000 Spacer



(A) Pinion height adjusting washer
(B) Preload adjusting spacer
(C) Preload adjusting washer
(D) Spacer (SUBARU genuine parts)

(7) Turn the ST by hand to slowly seat the bearing, and tighten the self-locking nut while measuring the initial load or initial torque with a spring scale or torque wrench. Select the preload adjusting washer and spacer so that the specified preload is obtained when nut is tightened to the specified torque.

NOTE:
- Use a new self-locking nut.
- Measure the preload in direction of tangent to the flange.
- Be careful not to give excessive preload.
- When tightening the self-locking nut, lock ST1 with ST2 as shown in the figure.

ST1 498447150 DUMMY SHAFT

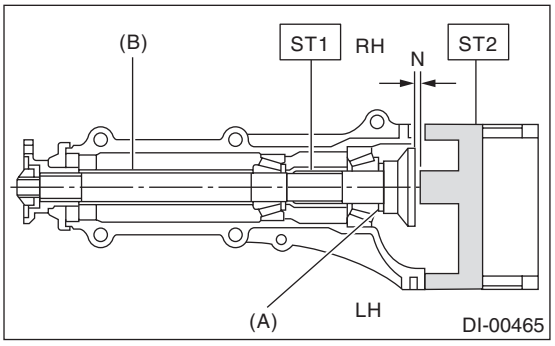
| 38336AA110 | 1.775 (0.0699) |

| Preload adjusting spacer | |
|---|---|
| Part No. | Length mm (in) |
| 32288AA040 | 52.3 (2.059) |
| 32288AA050 | 52.5 (2.067) |
| 31454AA100 | 52.6 (2.071) |
| 32288AA060 | 52.7 (2.075) |
| 31454AA110 | 52.8 (2.079) |
| 32288AA070 | 52.9 (2.083) |
| 31454AA120 | 53.0 (2.087) |
| 32288AA080 | 53.1 (2.091) |
| 32288AA090 | 53.3 (2.098) |

2) Adjusting drive pinion height:
Adjust the drive pinion height with pinion height adjusting washer installed between the rear bearing cone and the back of pinion gear.

(1) Attach the ST2.

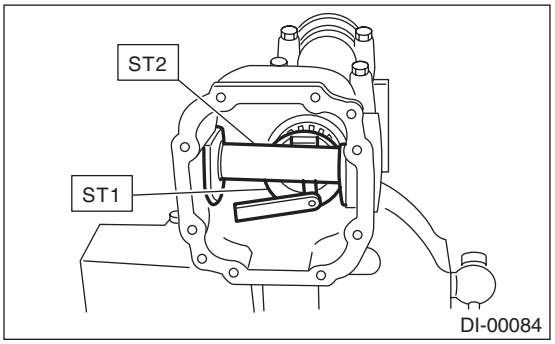
NOTE:
At this time, install a provisionally selected or previously used pinion height adjusting washer.
ST1 498447150 DUMMY SHAFT
ST2 498505501 DIFFERENTIAL CARRIER GAUGE
Part No. 32285AA000 Spacer



(A) Pinion height adjusting washer
(B) Spacer (SUBARU genuine parts)

(2) Measure the clearance “N” between the end of ST2 and the end surface of ST1 by using a thickness gauge.

NOTE:
Make sure there is no clearance between the differential carrier and ST2.
ST1 498447150 DUMMY SHAFT
ST2 498505501 DIFFERENTIAL CARRIER GAUGE



(3) Obtain the thickness of pinion height adjusting washer to be inserted from the following formula, and replace the temporarily installed washer with this one.

NOTE:
Adjust it using the 1 — 3 washers.

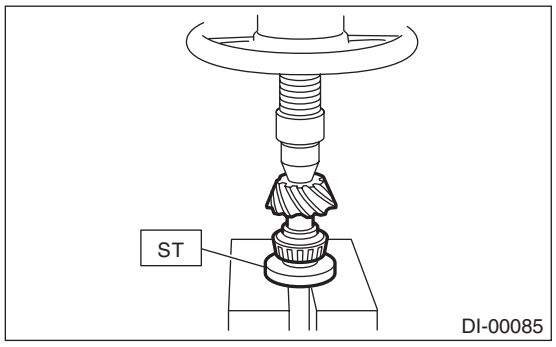
T = To + N – 0.05 mm (0.0020 in)

| | | |
|---|---|---|
| T | Thickness of pinion height adjusting washer mm (in) | |
| To | Thickness of washer temporarily inserted mm (in) | |
| N | Clearance of thickness gauge mm (in) | |
| Memo: | | |

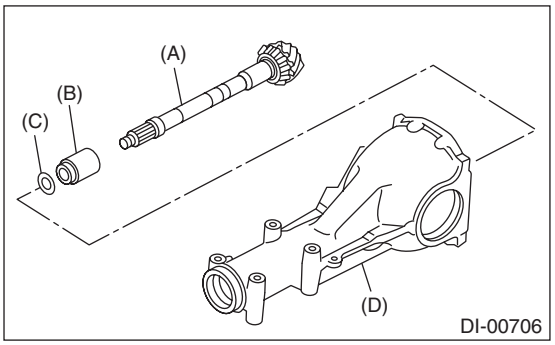
(Example of calculation)
To = 0.15 mm (0.0059 in)
N = 0.1 mm (0.0039 in)
T = 0.15 + 0.1 – 0.05 = 0.2 mm (0.0079 in)
Result: Thickness = 0.2 mm (0.0079 in)
Therefore use part number 32295AA220.

| Pinion height adjusting washer | |
|---|---|
| Part No. | Thickness mm (in) |
| 32295AA200 | 0.150 (0.0059) |
| 32295AA210 | 0.175 (0.0069) |
| 32295AA220 | 0.200 (0.0079) |
| 32295AA230 | 0.225 (0.0089) |
| 32295AA240 | 0.250 (0.0098) |
| 32295AA250 | 0.275 (0.0108) |

3) Install the selected pinion height adjusting washer on drive pinion, and press the rear bearing cone into position with ST.
ST 498175500 INSTALLER



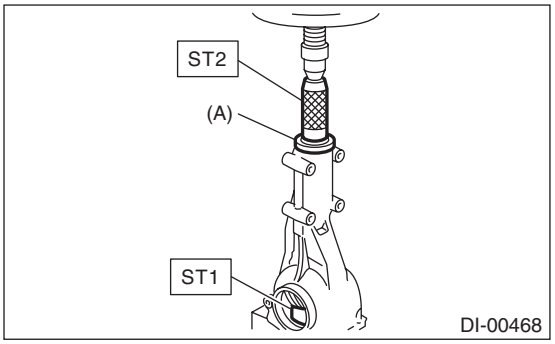
4) Insert the drive pinion into the differential carrier, and install the preselected preload adjusting spacer and washer.



(A) Drive pinion
(B) Preload adjusting spacer
(C) Preload adjusting washer
(D) Differential carrier

5) Press-fit the front bearing cone into the carrier with ST1, ST2 and the spacer.

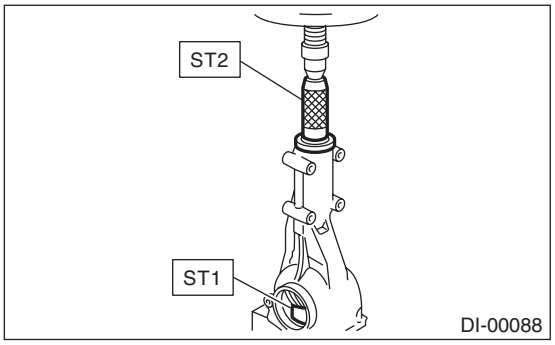
NOTE:
Use new front bearing cone.
ST1 399780104 WEIGHT
ST2 899580100 INSTALLER
Part No. 32285AA000 Spacer



(A) Spacer (SUBARU genuine parts)

6) Insert the spacer, then press-fit the pilot bearing with ST1 and ST2.

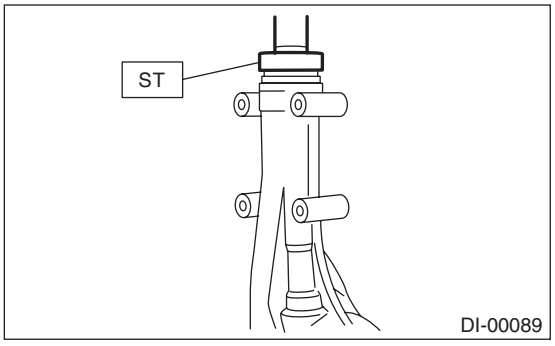
NOTE:
Use a new pilot bearing.
ST1 399780104 WEIGHT
ST2 899580100 INSTALLER



7) Using the ST, install the oil seal.

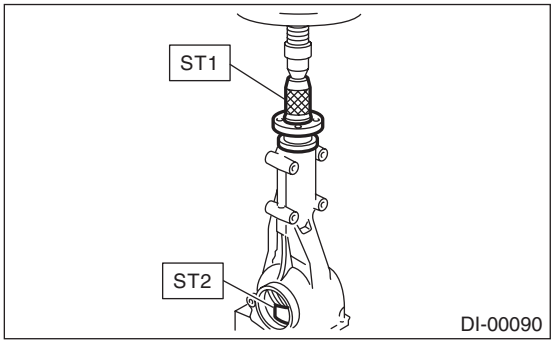
NOTE:
- Use a new oil seal.
- Press-fit until the oil seal end comes 1 mm (0.04 in) inward from end of carrier.
- Apply differential gear oil to the oil seal lips.

ST 498447120 INSTALLER



8) Press-fit the companion flange with ST1 and ST2.

NOTE:
Be careful not to damage the pilot bearing.
ST1 899874100 INSTALLER
ST2 399780104 WEIGHT



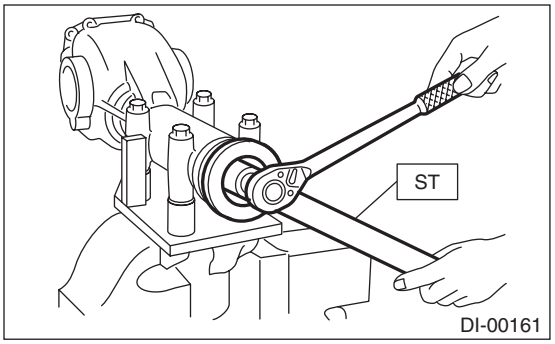
9) Attach the self-locking nut and use the ST to fix the companion flange in place, then tighten the self-locking nut.

NOTE:
- Use a new self-locking nut.
- Before installing the self-locking nut, apply the seal material to the threads of the drive pinion shaft and to the seating surface of the self-locking nut.

***Seal material:***
***THREE BOND 1324 (Part No. 004403042) or equivalent***

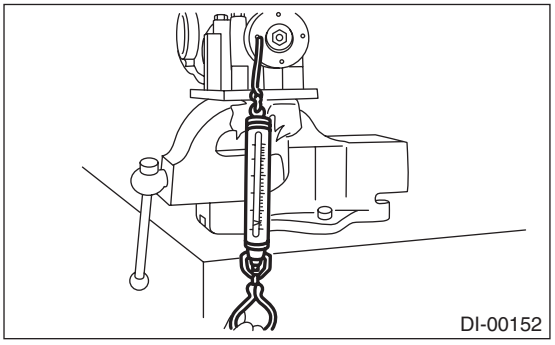
***Tightening torque:***
***191 N·m (19.5 kgf-m, 140.9 ft-lb)***

ST 498427200 FLANGE WRENCH

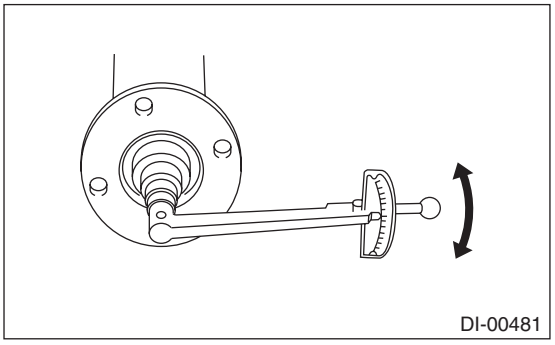


10) Check the initial torque or initial load.

***Initial load:***
***12.7 — 32.2 N (1.3 — 3.3 kgf, 2.9 — 7.2 lbf)***

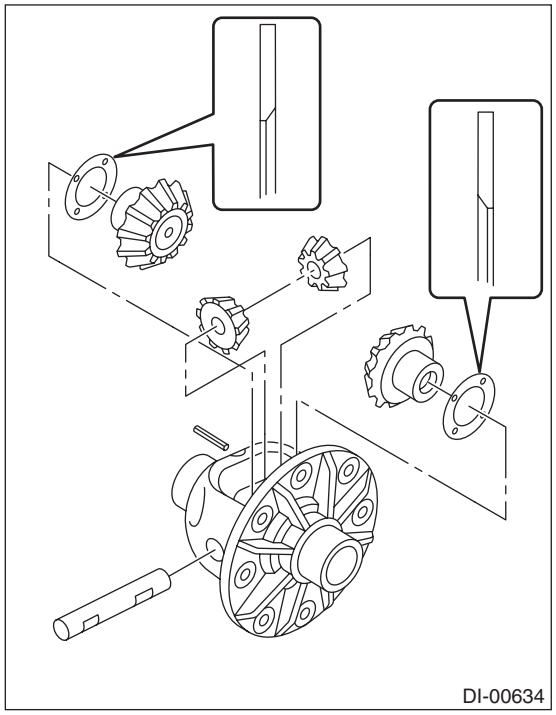


***Initial torque:***
***0.48 — 1.22 N·m (0.05 — 0.12 kgf-m, 0.35 — 0.90 ft-lb)***



11) Assembling differential case
(1) Install the side gears and pinion mate gears, with their thrust washers and pinion mate shaft, into the differential case.

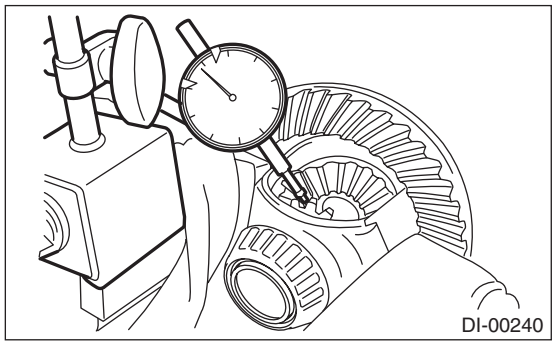
NOTE:
• Apply gear oil on both sides of the washer and on the side gear shaft before installing.
• Insert the pinion mate shaft into the differential case by aligning the pin holes.
• The side gear thrust washer inner surface has a chamfered side. Install the washer with the chamfered side facing toward the side gear.



DI-00634

(2) Measure the side gear backlash.

***Side gear backlash:***
***0.05 — 0.15 mm (0.002 — 0.006 in)***



DI-00240

(3) Adjust the side gear backlash by selecting side gear thrust washer.

| Side gear thrust washer | |
|---|---|
| Part No. | Thickness mm (in) |
| 803135011 | 0.925 — 0.950 (0.0364 — 0.0374) |
| 803135012 | 0.950 — 0.975 (0.0374 — 0.0384) |
| 803135013 | 0.975 — 1.000 (0.0384 — 0.0394) |
| 803135014 | 1.000 — 1.025 (0.0394 — 0.0404) |
| 803135015 | 1.025 — 1.050 (0.0404 — 0.0413) |

(4) Check the condition of rotation after applying oil to the gear tooth surfaces and washer surfaces.
(5) Drive the spring pin into the differential case.

NOTE:
Use new spring pin.

12) Install the hypoid driven gear to differential case.

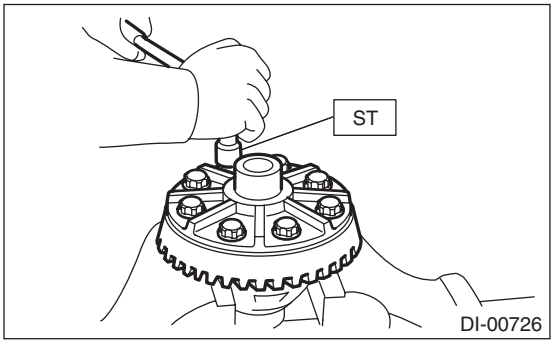
NOTE:
• Before installing bolts, apply seal material to bolt threads.

***Seal material:***
***THREE BOND 1324 (Part No. 004403042) or equivalent***

• Tighten opposing bolts in order.
(1) Tighten the hypoid driven gear mounting bolts to the specified torque using the ST.

ST 18270KA020 SOCKET (E20)

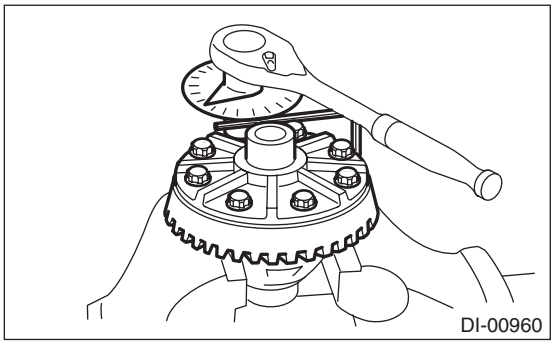
***Tightening torque:***
***20 N·m (2.0 kgf-m, 14.8 ft-lb)***



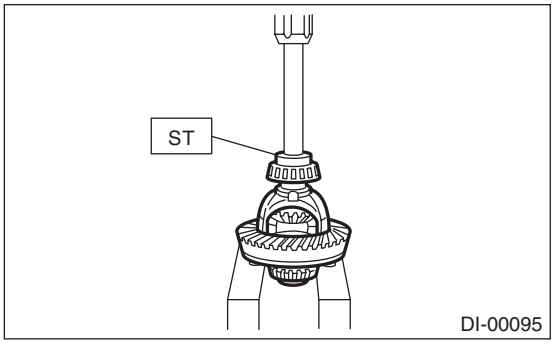
DI-00726

(2) While checking the tightening angle with the angle gauge, further tighten the hypoid driven gear mounting bolts.

***Tightening angle:***
***35°±2°***



13) Using the ST, press-fit the side bearing to the differential case.
ST 498485400 DRIFT

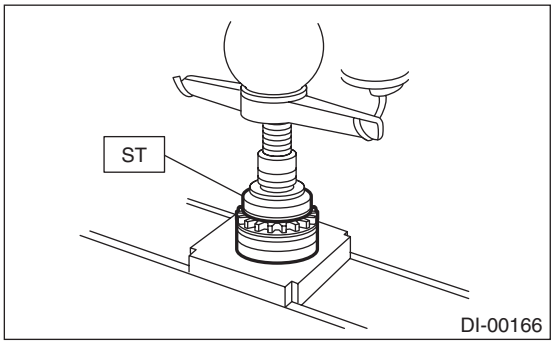


14) Assemble the side retainer.
(1) Install the oil seal into side retainer RH and LH.

**CAUTION:**
**Pay attention to the left and right of the oil seal.**

NOTE:
- Use a new oil seal.
- Apply differential gear oil to the oil seal lip.

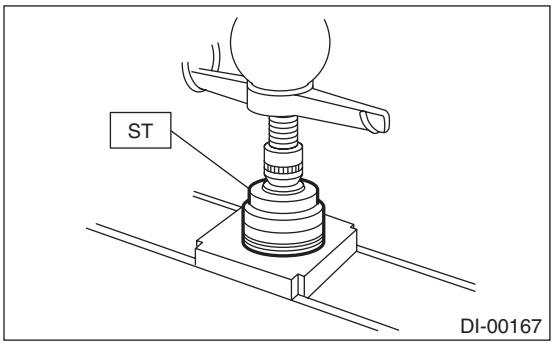
ST 498447100 INSTALLER



(2) Install the bearing race into side retainer RH and LH.

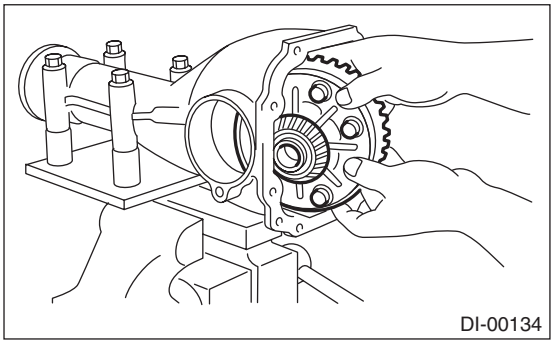
**CAUTION:**
**Make sure that the bearing outer races and cones are properly assembled.**

ST 398477702 DRIFT



(3) Install the differential case assembly into differential carrier in the reverse order of disassembly.

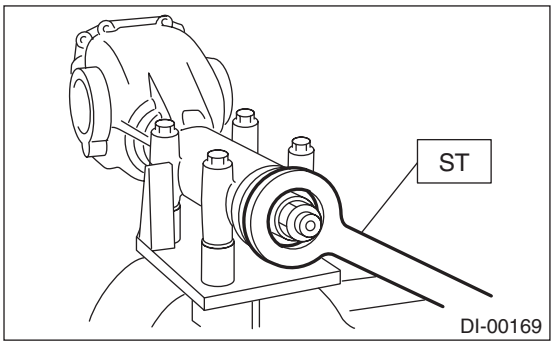
NOTE:
Be careful not to hit the teeth of hypoid driven gear against the differential carrier.



(4) Temporally tighten the side retainers RH and LH in differential carrier to install.

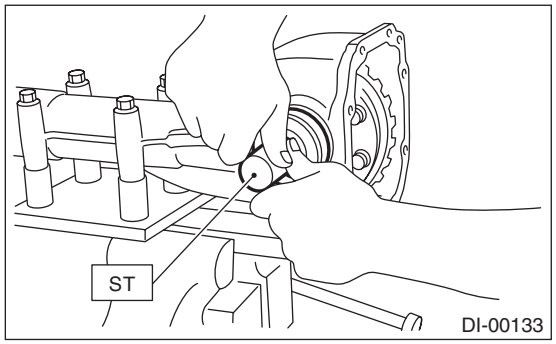
15) Perform the backlash adjustment between the hypoid driven gear and drive pinion, and preload adjustment of differential side bearing.
(1) Turn the drive pinion with ST for better fitting of differential side bearing.

ST 498427200 FLANGE WRENCH



(2) Using the ST, tighten side retainer RH, and then tighten side retainer LH until there is no backlash.

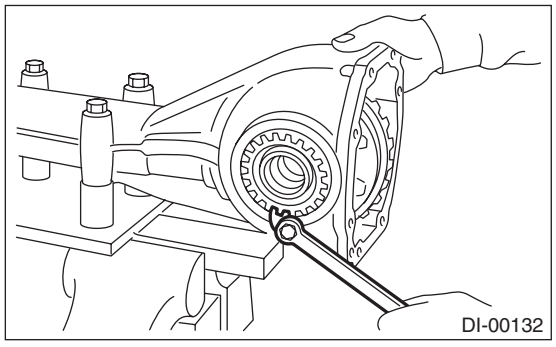
ST 18630AA010 WRENCH COMPL RETAINER



(3) Loosen the side retainer LH by approx. 1 and 1/2 teeth, and tighten the side retainer RH by approx. 2 teeth [amount that the side retainer LH is turned back (approx. 1 and 1/2 teeth) + approx. 1/2 teeth]. Difference between [amount that the side retainer LH is turned back (approx. 1 and 1/2 teeth)] and [amount that the side retainer RH is tightened (approx. 2 teeth)] gives preload.

(4) Temporarily tighten the lock plate.

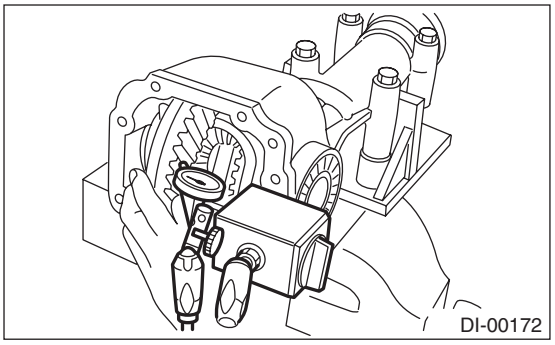
NOTE:
Turn over the lock plate to shift the holder by 1/2 teeth.



(5) Measure the hypoid driven gear-to-drive pinion backlash. Set the magnet base on differential carrier. Align the contact point of dial gauge with tooth face of hypoid driven gear, and move hypoid driven gear while holding drive pinion still. Read the value indicated on dial gauge.

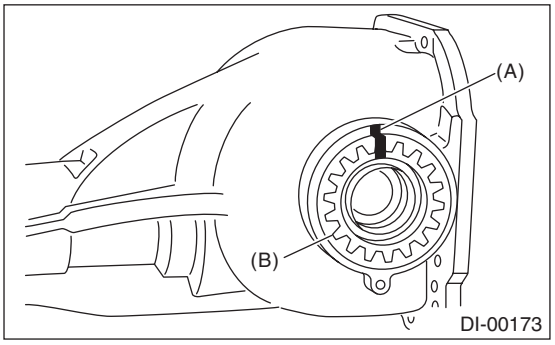
NOTE:
If measured value of backlash is not within the specified range, repeat the procedures for pinion driven gear set backlash adjustment and the differential side bearing preload adjustment.

***Backlash:***
***0.10 — 0.15 mm (0.004 — 0.006 in)***



16) Put alignment marks on both the differential carrier and side retainer. Remove the side retainers one side at a time. After installing an O-ring and applying oil to the threaded portion, restore them to the original position.

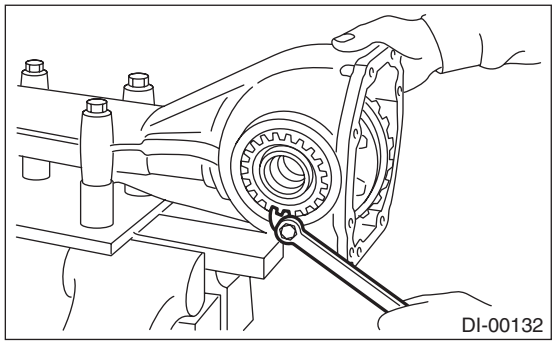
NOTE:
Use new O-rings.



(A) Alignment mark
(B) Side retainer

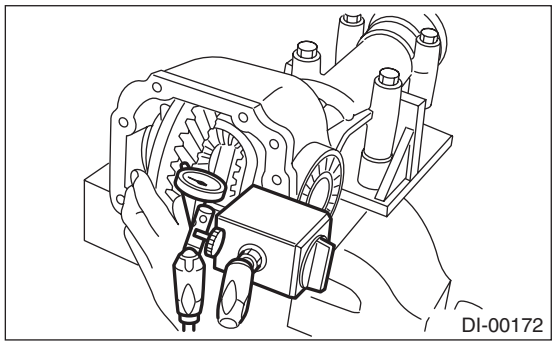
17) Install the lock plate, and tighten the bolts to the specified torque.

***Tightening torque:***
***25 N·m (2.5 kgf-m, 18.4 ft-lb)***



18) Recheck the backlash between hypoid driven gear and drive pinion.

***Backlash:***
***0.10 — 0.15 mm (0.004 — 0.006 in)***



19) Checking and adjusting the tooth contact of hypoid driven gear

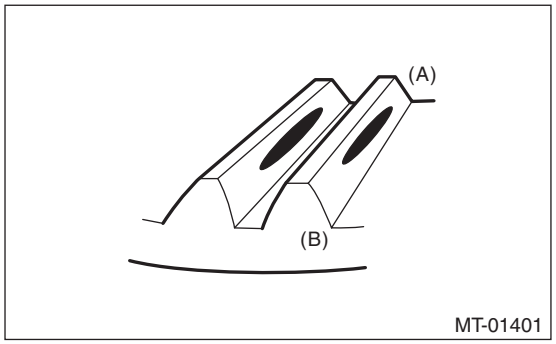
(1) Apply lead-free red dye evenly on the both sides of three to four teeth of the hypoid driven gear. Check the contact pattern after rotating the hypoid driven gear several revolutions back and forth until a definite contact pattern appears on the hypoid driven gear.

(2) When the contact pattern is not correct, readjust.

NOTE:
Be sure to wipe off the lead-free red dye completely after the adjustment is completed.

- Correct tooth contact

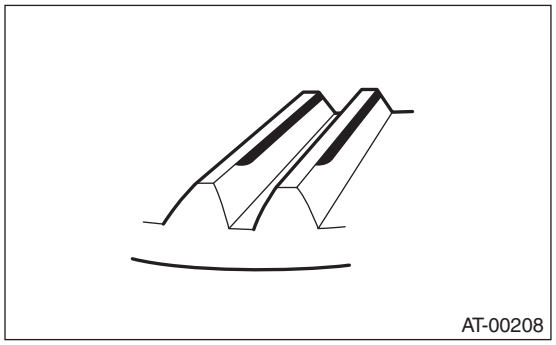
**Check item: Tooth contact pattern is slightly shifted toward toe side under no-load rotation. (When driving, it moves towards the heel side.)**



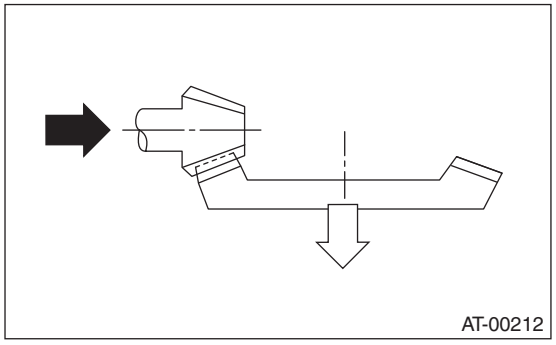
(A) Toe side
(B) Heel side

- Face contact

**Check item: Backlash is too large.**
Contact pattern



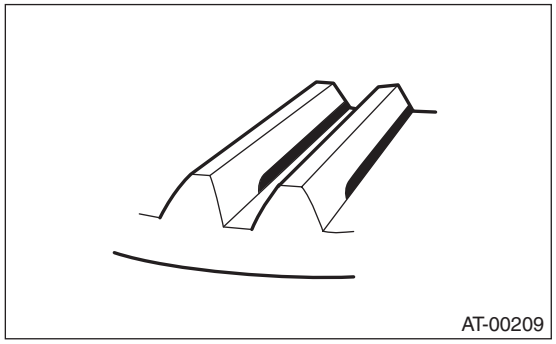
Corrective action: Increase thickness of pinion height adjusting washer according to the procedure for bringing drive pinion close to hypoid driven gear side.



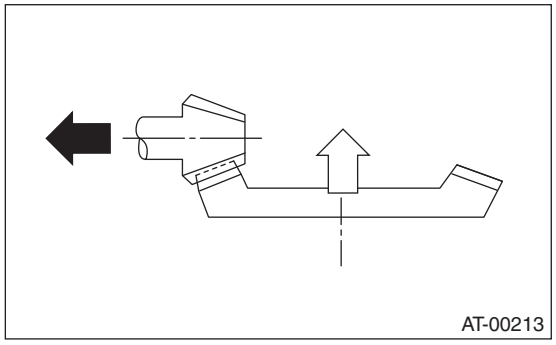
• Flank contact

**Check item: Backlash is too small.**

Contact pattern



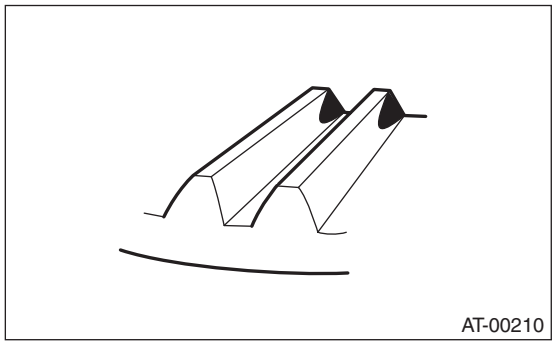
Corrective action: Reduce the thickness of pinion height adjusting washer according to the procedure for bringing drive pinion away from hypoid driven gear.



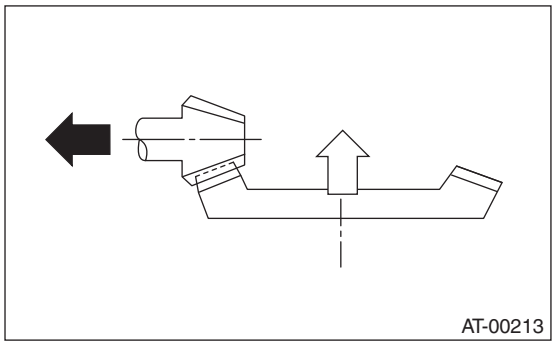
• Toe contact (inside contact)

**Check item: Teeth contact area is too small.**

Contact pattern



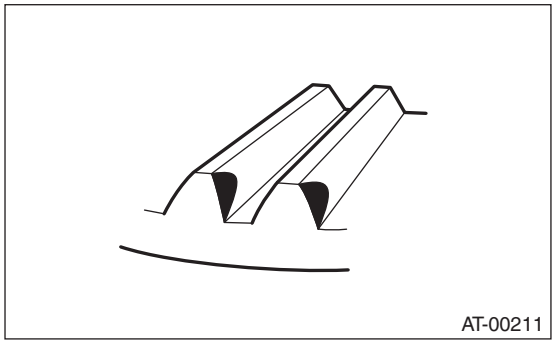
Corrective action: Reduce the thickness of pinion height adjusting washer according to the procedure for bringing drive pinion away from hypoid driven gear side.



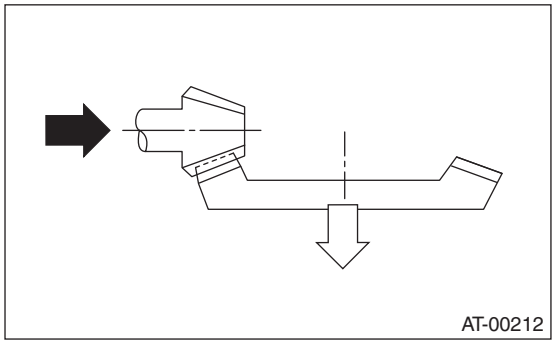
• Heel contact (outside end contact)

**Check item: Teeth contact area is too small.**

Contact pattern



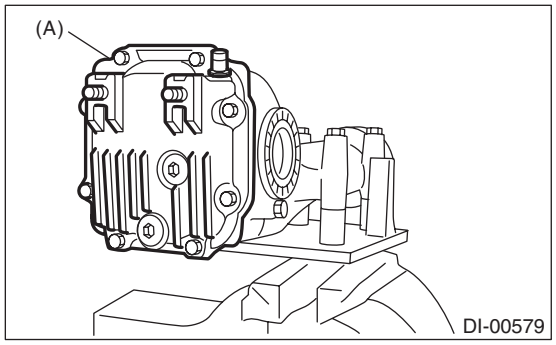
Corrective action: Increase thickness of pinion height adjusting washer according to the procedure for bringing drive pinion close to hypoid driven gear side.



20) If correct tooth contact is not obtained, readjust the drive pinion height and the differential side bearing preload (already mentioned) and the hypoid gear backlash.
21) Install the gasket and rear cover to the differential carrier, and tighten the bolts to specified torque.

NOTE:
Use a new gasket.

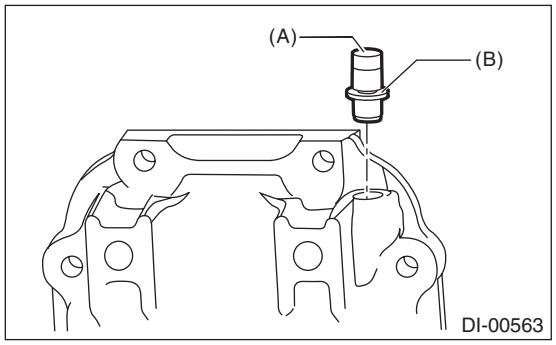
***Tightening torque:***
***25 N·m (2.5 kgf-m, 18.4 ft-lb)***



(A) Rear cover

22) Install the air breather cap.

NOTE:
When installing the air breather cap, do not tap section (A). Be sure to tap section (B) to install.



23) Install the drain plug.

NOTE:
Use a new gasket.

***Tightening torque:***
***50 N·m (5.1 kg-m, 36.9 ft-lb)***
24) Install the filler plug.

NOTE:
After installing the rear differential assembly to the vehicle, fill the gear oil, then use a new gasket, and tighten to the specified torque. <Ref. to DI-19, REPLACEMENT, Differential Gear Oil.>

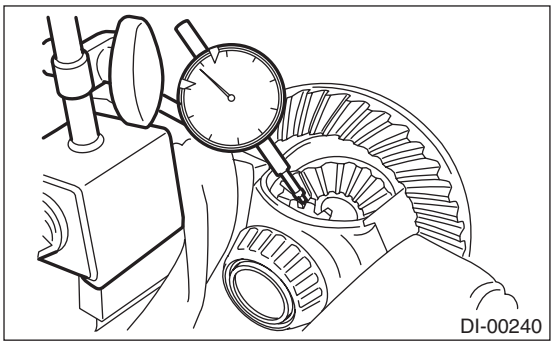
## E: INSPECTION

Wash all the disassembled parts clean, and examine them for wear, damage or other defects. Repair or replace the defective parts as necessary.
1) Hypoid driven gear and drive pinion
• If there is evidently an abnormal tooth contact, find out the cause and adjust until the teeth contact correctly. Replace the gear if there is an excessive worn or an incapable adjustment.
• If crack, cutout or seizure is found, replace the parts as a set. Slight damage of some teeth can be corrected by oil stone or the like.
2) Side gear and pinion mate gear
• Replace if cracks, scoring or other defects are evident on the tooth surface.
• Replace if thrust washer contact surface is worn or seized. Slight damages of the surface can be corrected by oil stones or equivalent.
3) Bearing
Replace if seizure, peeling, wear, rust, dragging during rotation, noise or other defect is evident.
4) Thrust washer of the side gear and pinion mate gear:
Replace if seized, flawed, abnormally worn or having other defects.
5) Oil seal
Replace if deformed or damaged, and at every disassembling.
6) Differential carrier
Replace if the bearing bores are worn or damaged.
7) Differential case
Replace if its sliding surfaces are abnormally worn, burned, or cracked.
8) Companion flange
Replace if the oil seal lip contact surface shows cracking.

### 1. SIDE GEAR BACKLASH

Using a dial gauge, check the backlash of side gear.

***Side gear backlash:***
***0.05 — 0.15 mm (0.002 — 0.006 in)***
If the side gear backlash is outside the specification range, select the side gear thrust washer and adjust the side gear backlash as specified.

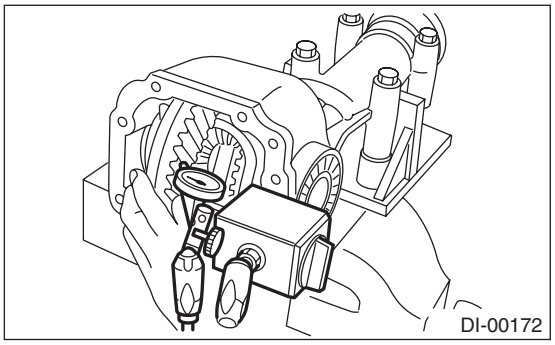


### 2. HYPOID DRIVEN GEAR BACKLASH

Using a dial gauge, check the backlash of hypoid driven gear.

***Hypoid driven gear backlash:***
***0.10 — 0.15 mm (0.004 — 0.006 in)***

If the hypoid driven gear backlash is outside the specification range, adjust the side bearing preload and repair if necessary.

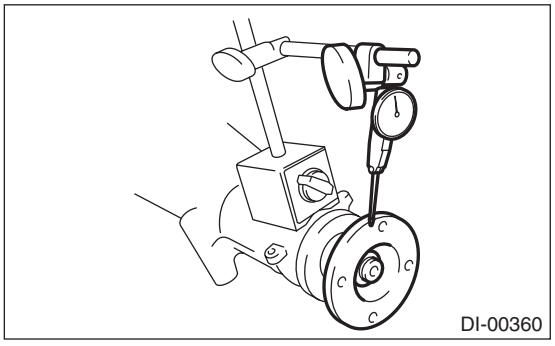


DI-00172

### 3. COMPANION FLANGE

1) If rust or dirt is attached to the companion flange, remove them.
2) Set a dial gauge at a companion flange surface (mating surface of propeller shaft and companion flange), and then measure the companion flange runout.

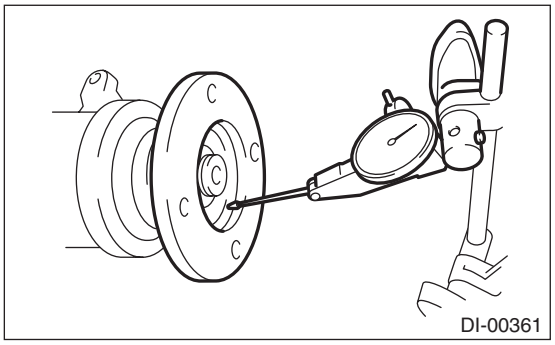
***Limit of runout:***
***0.08 mm (0.003 in)***



DI-00360

3) Set the gauge inside of the companion flange, and measure the runout.

***Limit of runout:***
***0.08 mm (0.003 in)***



DI-00361

4) If either runout exceeds the limit, move the phase of companion flange and drive pinion 90° each, and find the point where the runout is within the limit.
5) If the runout exceeds the limit even after changing the phase, replace the companion flange and recheck the runout.
6) If the runout exceeds the limit after replacing the companion flange, the drive pinion may be assembled incorrectly or bearing is faulty.

### 4. TOOTH CONTACT BETWEEN HYPOID DRIVEN GEAR AND DRIVE PINION

Inspect the tooth contact between the hypoid driven gear and drive pinion. <Ref. to DI-44, ASSEMBLY, Rear Differential (VA-type).>

## F: ADJUSTMENT

### 1. SIDE GEAR BACKLASH

Adjust the side gear backlash. <Ref. to DI-44, ASSEMBLY, Rear Differential (VA-type).>

### 2. HYPOID DRIVEN GEAR BACKLASH

Adjust hypoid driven gear backlash. <Ref. to DI-44, ASSEMBLY, Rear Differential (VA-type).>

### 3. TOOTH CONTACT BETWEEN HYPOID DRIVEN GEAR AND DRIVE PINION

Adjust the tooth contact between hypoid driven gear and drive pinion gear. <Ref. to DI-44, ASSEMBLY, Rear Differential (VA-type).>

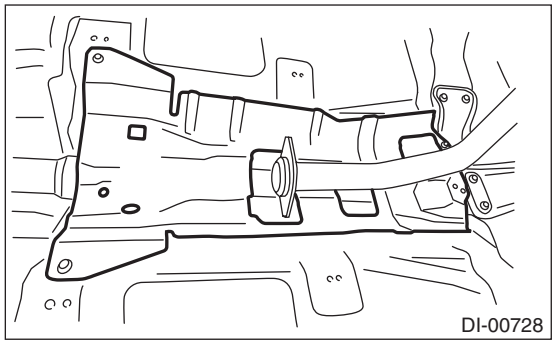
# 6. Rear Differential Front Oil Seal

## A: INSPECTION

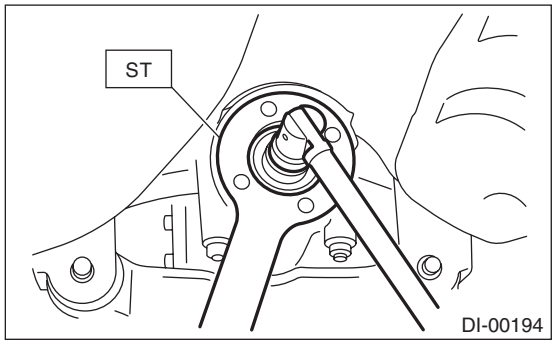
Make sure that there is no leakage from front oil seal portion. If there is any leakage, replace the oil seal and inspect the propeller shaft.

## B: REPLACEMENT

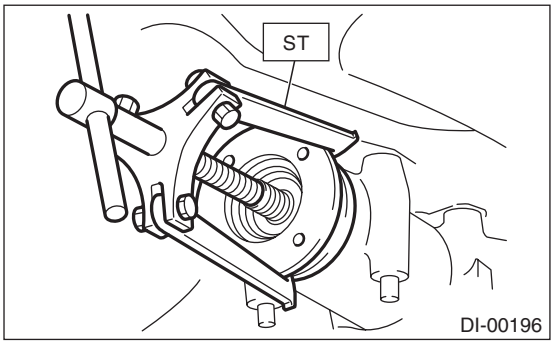
1) Shift the select lever or gear shift lever to neutral.
2) Disconnect the ground cable from battery.
3) Release the parking brake.
4) Lift up the vehicle.
5) Drain differential gear oil. <Ref. to DI-19, REPLACEMENT, Differential Gear Oil.>
6) Remove the rear exhaust pipe. <Ref. to EX(H4DO)-15, REMOVAL, Rear Exhaust Pipe.>
7) Remove the center exhaust cover.



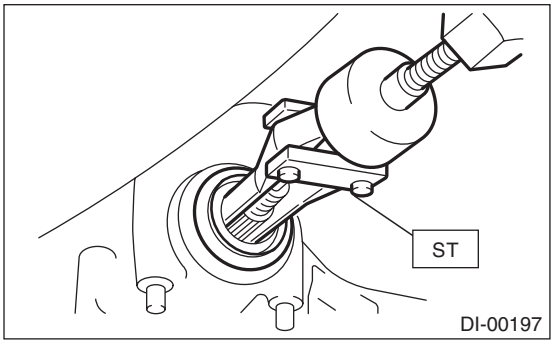
8) Remove the propeller shaft. <Ref. to DS-12, REMOVAL, Propeller Shaft.>
9) Check the initial torque and write it down.
10) Remove the self-locking nut while holding the companion flange with ST.
ST 498427200 FLANGE WRENCH



11) Extract the companion flange using the ST.
ST 399703600 PULLER ASSY



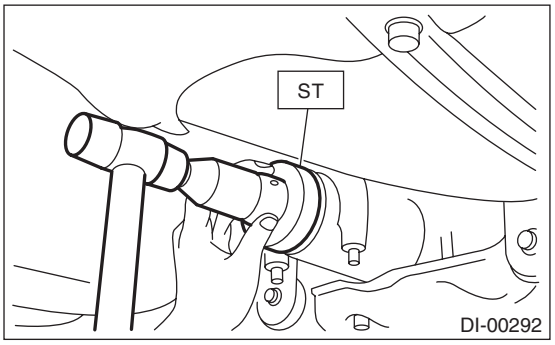
12) Remove the oil seal using ST or screwdriver.
ST 398527700 PULLER ASSY



13) Using the ST, install the oil seal.

NOTE:
- Use a new oil seal.
- Apply differential gear oil to the oil seal lips.

ST 498447120 INSTALLER



14) Install the companion flange.

NOTE:
Use a plastic hammer to install companion flange.

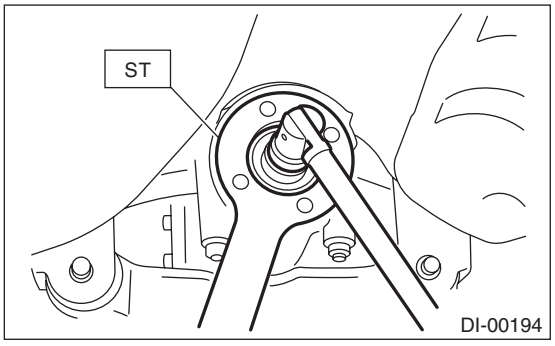
15) Tighten the self-locking nut to the specified torque so that the initial torque of companion flange becomes the same as that before replacing the oil seal.

NOTE:
- Use a new self-locking nut.
- Before installing the self-locking nut, apply the seal material to the threads of the drive pinion shaft and to the seating surface of the self-locking nut.

***Seal material:***
***THREE BOND 1324 (Part No. 004403042) or equivalent***

***Tightening torque:***
***T-type***
***167 — 196 N·m (17.0 — 20.0 kgf-m, 123.2 — 144.6 ft-lb)***
***VA-type***
***162 — 220 N·m (16.5 — 22.5 kgf-m, 119.5 — 162.3 ft-lb)***

ST 498427200 FLANGE WRENCH



16) Hereafter, perform assembly in the reverse order of disassembly.

17) Fill differential gear oil. <Ref. to DI-19, REPLACEMENT, Differential Gear Oil.>

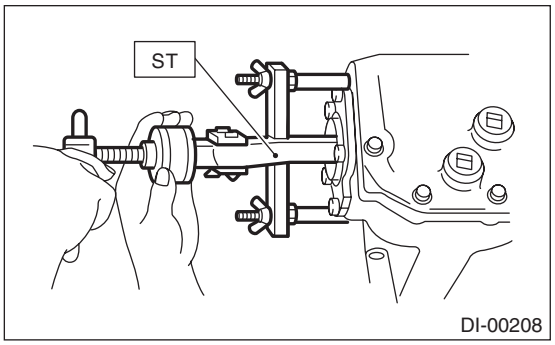
# 7. Rear Differential Side Oil Seal

## A: INSPECTION

Make sure that there is no leakage from side oil seal. If there is any leakage, replace the oil seal.

## B: REPLACEMENT

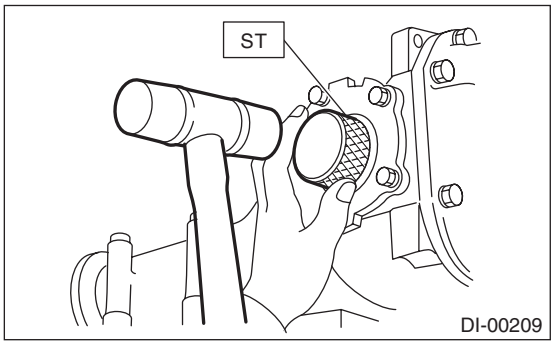
1) Remove the rear differential. <Ref. to DI-22, REMOVAL, Rear Differential (T-type).> <Ref. to DI-41, REMOVAL, Rear Differential (VA-type).>
2) Remove the rear differential side oil seal using a ST or screwdriver wrapped with vinyl tape to prevent the side retainer from scratching.
ST 398527700 PULLER ASSY



3) Using the ST, install the oil seal.

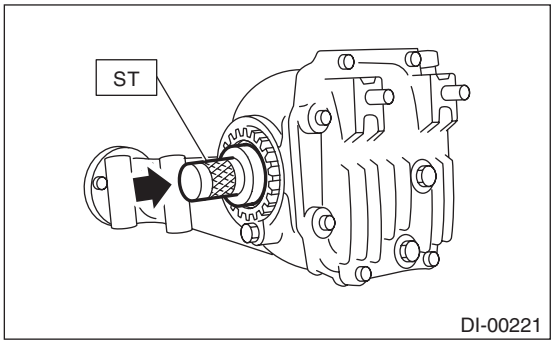
NOTE:
- Use a new oil seal.
- Apply differential gear oil to the oil seal lips.
- T-type

ST 398437700 DRIFT



- VA1-type

ST 498447100 INSTALLER

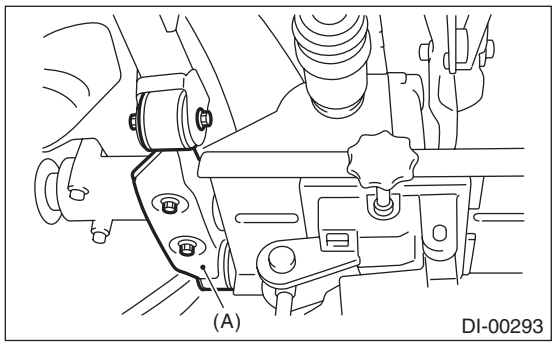


4) Install the rear differential. <Ref. to DI-24, INSTALLATION, Rear Differential (T-type).> <Ref. to DI-41, INSTALLATION, Rear Differential (VA-type).>

# 8. Rear Differential Front Member

## A: REMOVAL

1) Disconnect the ground cable from battery.
2) Lift up the vehicle.
3) Support the rear differential using transmission jack, and then remove the rear differential front member.

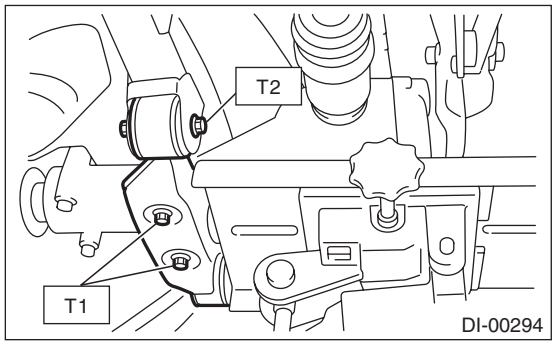


(A) Rear differential front member

## B: INSTALLATION

Install the rear differential front member with a new self-locking nut.

***Tightening torque:***
***T1: 50 N·m (5.1 kgf-m, 36.9 ft-lb)***
***T2: 110 N·m (11.2 kgf-m, 81.1 ft-lb)***



## C: INSPECTION

1) Check the rear differential front member for damage, bend and corrosion.
If damage, bend or corrosion is excessive, replace the rear differential front member.
2) Check the bushings of rear differential member for cracking, hardening and damage. If cracking, hardening or damage is excessive, replace rear differential front member.

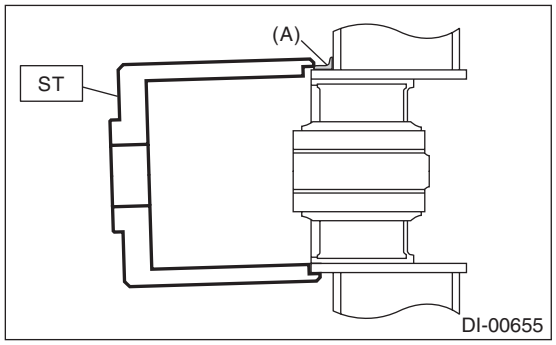
# 9. Rear Differential Mount Bushing

## A: INSPECTION

Check the rear differential mount bushing for cracks, hardening or damage. If cracking, hardening or damage is excessive, replace rear differential mount bushing.

## B: REPLACEMENT

**CAUTION:**
**• If there was so much rust in the rear differential mount bushing, remove the rust before starting work.**
**• Apply molybdenum grease to the square thread of ST (shaft and nut) before use.**
1) Remove the rear differential. <Ref. to DI-22, REMOVAL, Rear Differential (T-type).> <Ref. to DI-41, REMOVAL, Rear Differential (VA-type).>
2) Fit the ST to the periphery of the sub frame cylinder, and make sure that the ST does not contact with welded spots or spatters.
ST 41399FG010 SPECIAL TOOL A

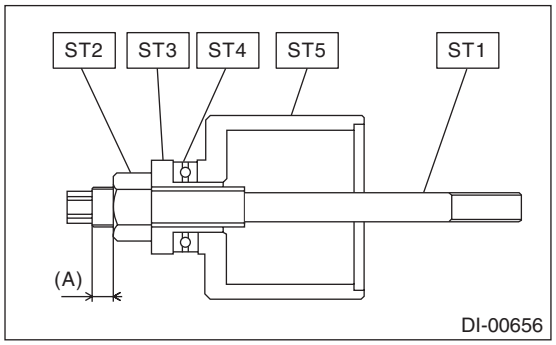


(A) Welded spot

3) If the ST contacts with welded spots or spatters, remove the excessive welds or spatters with sander or the equivalent so that the ST contacts the cylinder peripheral part.

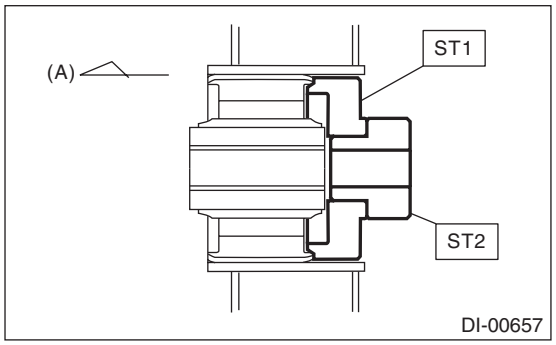
**CAUTION:**
**Performing the operation with the ST contacting with welded spots or spatters may break the ST. Be sure to remove excessive welds or spatters before the operation.**

4) Set ST1, ST2, ST3, ST4 and ST5 as shown in the figure.
ST1 41399FG091 SPECIAL TOOL SHAFT
ST2 41399FG070 SPECIAL TOOL NUT
ST3 41399FG050 SPECIAL TOOL SLEEVE
ST4 41399FG080 SPECIAL TOOL BEARING
ST5 41399FG010 SPECIAL TOOL A



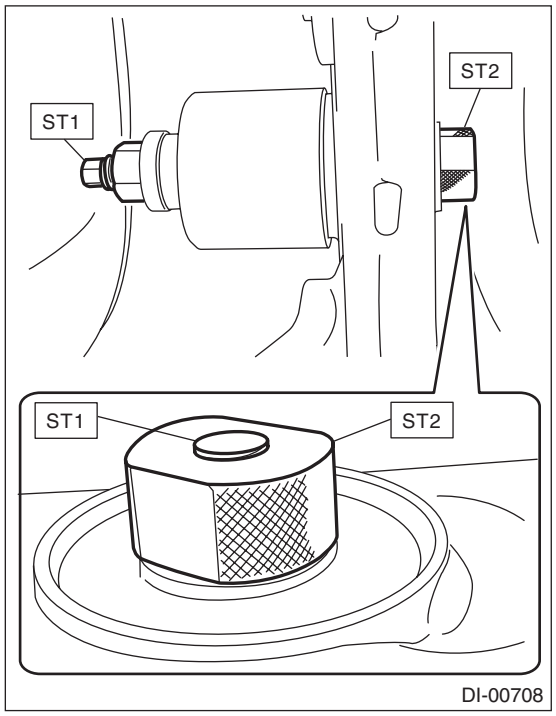
(A) 5 mm (0.2 in) or less

5) Fit and hold the ST1 and ST2 to the rear differential mount bushing from the rear side of vehicle.
ST1 41399FG031 SPECIAL TOOL C
ST2 41399FG061 SPECIAL TOOL RING



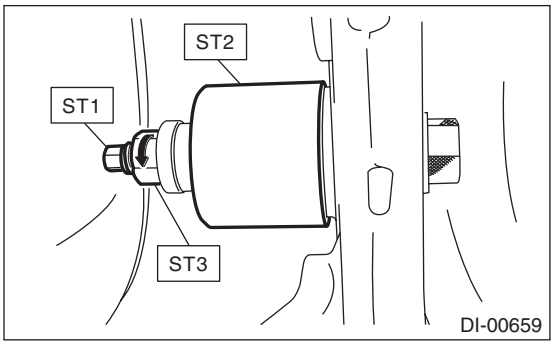
(A) Front side of vehicle

6) Insert the ST set in the step 4) through the rear differential mount bushing hole from the front side of vehicle, and screw in the ST1 by hand till the front end of ST1 comes out slightly from the rear end of ST2.
ST1 41399FG091 SPECIAL TOOL SHAFT
ST2 41399FG061 SPECIAL TOOL RING



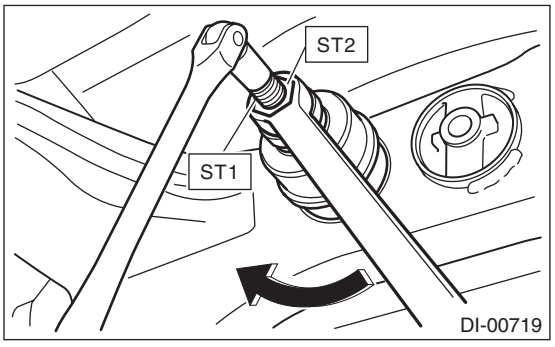
7) Hold the ST1 to prevent it from rotating, and screw in the ST3 by hand till there is no loose fit on the ST2.

**CAUTION:**
**When setting the ST to the vehicle, always make sure that the ST2 fits the periphery of the sub frame cylinder and is not tilted.**
ST1 41399FG091 SPECIAL TOOL SHAFT
ST2 41399FG010 SPECIAL TOOL A
ST3 41399FG070 SPECIAL TOOL NUT



8) Hold the ST1 with a tool to prevent it from rotating, and screw in the ST2 to remove the rear differential mount bushing.

**CAUTION:**
**• Rotation of ST1 will damage the screw at the rear end of rear differential mount bushing. Never rotate the ST1.**
**• If the ST starts to tilt while removing the rear differential mount bushing, stop the work and set the ST again.**
ST1 41399FG091 SPECIAL TOOL SHAFT
ST2 41399FG070 SPECIAL TOOL NUT



9) Set ST1, ST2, ST3, ST4, ST5 and rear differential mount bushing as shown in the figure.

NOTE:
- Set the ST2 nut near to the end of ST1 screw.
- Hold the rear differential mount bushing with its rubber protrusion facing toward the front of the vehicle, and set the rear differential mount bushing to the ST so that the arrow mark faces upward and downward.
- Mark the bottom end of rear differential mount bushing to identify the installing direction.

ST1 41399FG091 SPECIAL TOOL SHAFT

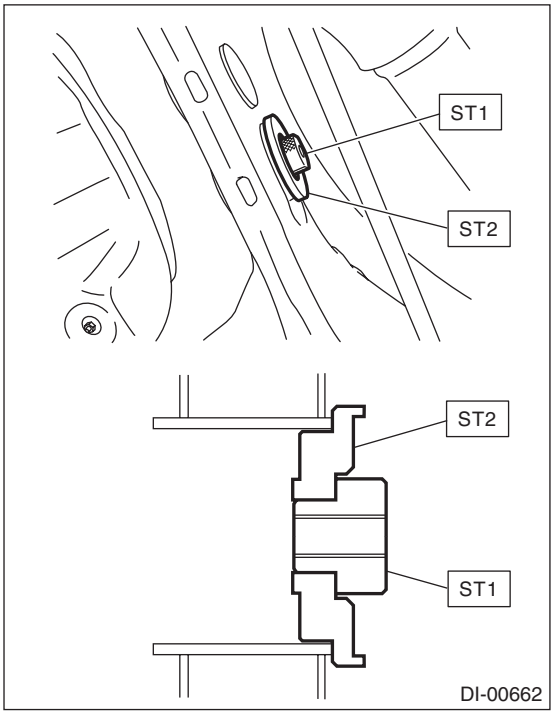
(A) 8 mm (0.31 in) or more
(B) Arrow mark
(C) Protrusion
(D) Marked position
(E) Front side of vehicle
(F) Rear side of vehicle

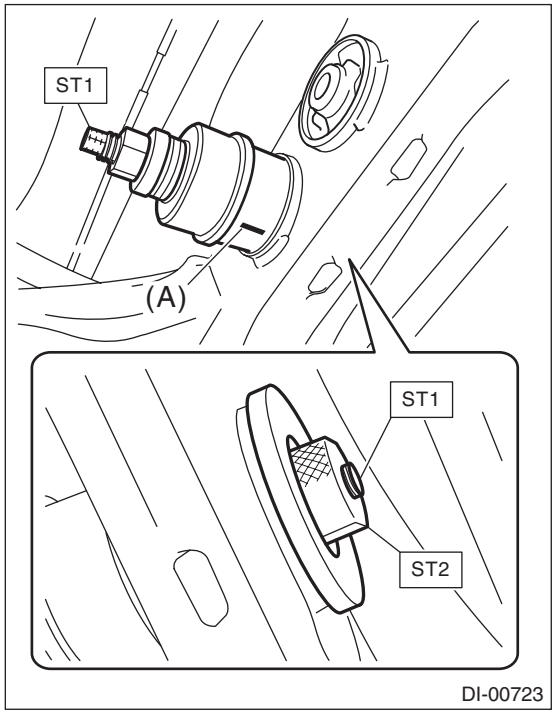
10) Attach ST1 to the ST2, and fit and hold the STs as a unit to the sub frame from the rear side of vehicle.

ST1 41399FG061 SPECIAL TOOL RING
ST2 41399FG041 SPECIAL TOOL D



11) Insert the ST and rear differential mount bushing set in the step 9) through the sub frame from the front side of vehicle, and screw in the ST1 by hand till the front end of ST1 comes out slightly from the rear end of ST2.

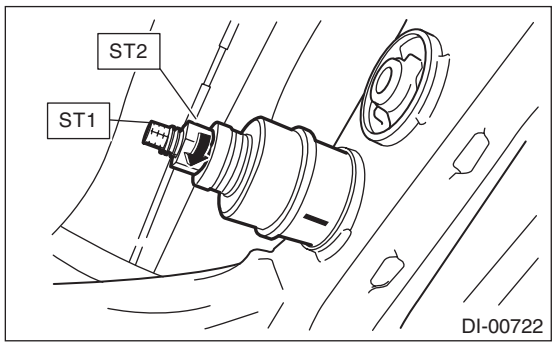
**CAUTION:**
**Set the rear differential mount bushing with its mark facing the bottom end direction.**
ST1 41399FG091 SPECIAL TOOL SHAFT
ST2 41399FG061 SPECIAL TOOL RING



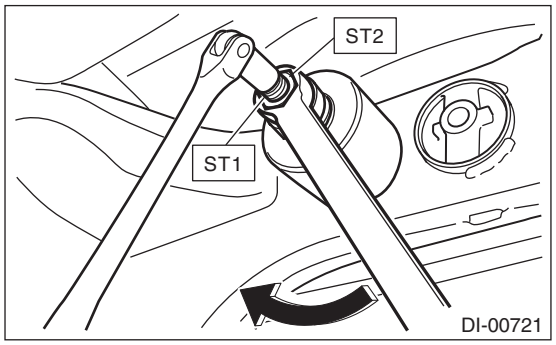
(A) Mark

12) Hold the ST1 to prevent it from rotating, and screw in the ST2 by hand till there is no loose fit on the ST and the rear differential mount bushing.

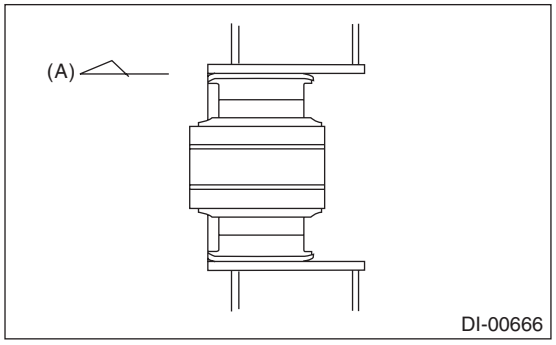
**CAUTION:**
**Make sure that the ST and rear differential mount bushing are not tilted.**
ST1 41399FG091 SPECIAL TOOL SHAFT
ST2 41399FG070 SPECIAL TOOL NUT



13) Screw in the ST2 while holding the ST1 with a tool to prevent it from rotating, and press-fit the rear differential mount bushing to the front end of sub frame cylinder.
ST1 41399FG091 SPECIAL TOOL SHAFT
ST2 41399FG070 SPECIAL TOOL NUT



14) Make sure that the rear differential mount bushing is inserted to the front end of sub frame cylinder.



(A) Front side of vehicle

15) Install the rear differential. <Ref. to DI-24, INSTALLATION, Rear Differential (T-type).> <Ref. to DI-41, INSTALLATION, Rear Differential (VA-type).>

# 10.Rear Differential Inspection Mode

## A: GENERAL DESCRIPTION

**CAUTION:**
**Be sure to perform rear differential inspection mode.**
- Follow the messages displayed on the Subaru Select Monitor when working.
- “Rear differential inspection mode” using the Subaru Select Monitor is available only for the CVT model.
- Perform rear differential inspection mode when the following work has been performed.

Transmission assembly replacement/Replacement of rear differential/Replacement of front differential hypoid gear set/Replacement of rear differential hypoid gear set

## B: PROCEDURE

**CAUTION:**
**Do not turn the power of the Subaru Select Monitor OFF during work, and do not disconnect the data link connector.**
1) Shift the select lever to “P” range.
2) Apply the parking brake.
3) Lift up the vehicle.

**WARNING:**
**Lift up the vehicle until the tire bottom is 30 cm or more above the ground.**
4) Connect the Subaru Select Monitor to data link connector.
5) Turn the ignition switch to ON.
6) Select {Work Support} in the «Transmission Diagnosis» screen of Subaru Select Monitor.
7) Select {Maintenance mode} in the «Work Support» screen of Subaru Select Monitor.
8) Select {Rear differential inspection mode} in the «Maintenance mode» screen of the Subaru Select Monitor.
9) Follow the messages displayed on the Subaru Select Monitor screen when working.
10) The results of the rear differential inspection mode are displayed on the Subaru Select Monitor screen.
- When ended normally: “The rear differential has been replaced normally.”
- When ended abnormally: “A rear differential abnormality has been detected. Reinspect the items at the time of rear differential installation.”
- When interrupted: “Inspection is stopped. Restart this inspection mode from the beginning.”

11) After the message “Inspection has been completed. Set the ignition switch to OFF.” appears, the rear differential inspection mode completes.

NOTE:
- When the rear differential inspection mode is completed properly, the following warning lights may illuminate. But this is not a malfunction. If warning light illuminates, clear the memory.

VDC/ABS, engine, power steering
- For detailed operation procedures, refer to “PC application help for Subaru Select Monitor”.
- If the rear differential inspection mode does not end normally, repeat the mode until it ends normally.
- When the inspection mode does not end normally, the AWD warning light will start blinking at 2 Hz.
- When the rear differential inspection mode ends abnormally, the front differential and rear differential may be different from the specifications for the vehicle.
- When the rear differential inspection mode is interrupted, the following reasons are possible.

| Message | Main reasons for abnormal termination |
|---|---|
| • “Inspection is stopped.”<br>• “Inspection is stopped. Restart this inspection mode from the beginning.” | • TCM has detected a failure.<br>• VDC has a failure.<br>• Brake is applied after start during automatic running.<br>• Too delayed operation to the instructions displayed on the Subaru Select Monitor. |
| “TCM incompatible. Rear differential inspection mode is stopped.” | The model does not support the rear differential inspection mode. |
| The TCM has detected a fault. Inspect following the manual. | TCM has detected a failure. |

12) Perform “Function Check Sequence” for VDC. <Ref. to VDC(diag)-18, FREEZE FRAME DATA, OPERATION, Subaru Select Monitor.> <Ref. to VDC-19, ADJUSTMENT, VDC Control Module and Hydraulic Control Unit (VDCCM&H/U).>

# 11.General Diagnostic Table

## A: INSPECTION

| Symptom or trouble | Possible cause | Remedy |
|---|---|---|
| **1. Oil leakage** | (1) Worn, scratched, or incorrectly seated front or side oil seal. Scored, battered or excessively worn sliding surface of companion flange. | Repair or replace. |
| | (2) Clogged or damaged air breather cap. | Clean, repair or replace. |
| | (3) Loose bolts on the side retainer, or incorrectly fitted O-ring. | Tighten the bolts to specified torque. Replace the O-ring. |
| | (4) Loose rear cover attachment bolts or damaged gasket. | Replace the gasket, and tighten the bolts to specified torque. |
| | (5) Loose filler plug or drain plug. | • Apply liquid gasket, and tighten to the specified torque. (T-type)<br>• Replace the gasket, and tighten to the specified torque. (VA-type) |
| | (6) Wear, damage or incorrect fitting of drive shaft, side retainer or oil seal. | Repair or replace. |
| **2. Seizure**<br>NOTE:<br>Seized or damaged parts should be replaced, and also other parts should be thoroughly checked for any defect and should be repaired or replaced as required. | (1) Insufficient backlash for hypoid gear. | Readjust or replace. |
| | (2) Excessive preload for side, rear or front bearing. | Readjust or replace. |
| | (3) Insufficient or improper oil used. | Add recommended oil to the specified level. |
| **3. Damage**<br>NOTE:<br>Damaged parts should be replaced, and also other parts should be thoroughly checked for any defect and should be repaired or replaced as required. | (1) Improper backlash for hypoid gear. | Readjust or replace. |
| | (2) Insufficient or excessive preload for side, rear or front bearing. | Readjust or replace. |
| | (3) Excessive backlash for differential gear. | Replace gear or thrust washer. |
| | (4) Loose bolts and nuts such as hypoid driven gear bolt. | Retighten. |
| | (5) Damage due to overloading. | Replace. |
| **4. Noises when starting or shifting gears**<br>NOTE:<br>Noises may be caused by differential assembly, universal joint, wheel bearing, etc. Find out what is actually making noise before disassembling. | (1) Improper tooth contact of hypoid driven gear and drive pinion | Readjust. (drive pinion adjustment and backlash adjustment) |
| | (2) Excessive backlash for hypoid driven gear | Replace the gear or the pinion height adjusting washer. |
| | (3) Excessive backlash for side gear. | Replace gear or thrust washer. |
| | (4) Insufficient preload for front or rear bearing. | Readjust. |
| | (5) Loose drive pinion nut. | Tighten to the specified torque. |
| | (6) Loose bolts and nuts such as side retainer attachment bolt. | Tighten to the specified torque. |
| **5. Noises when cornering** | (1) Damaged differential gear. | Replace. |
| | (2) Excessive wear or damage of thrust washer. | Replace. |
| | (3) Broken pinion mate shaft. | Replace. |
| | (4) Stuck or damaged side bearing | Replace. |

| Symptom or trouble | Possible cause | Remedy |
|---|---|---|
| **6. Gear Noise**<br>NOTE:<br>Since noises from engine, muffler, transmission, propeller shaft, wheel bearings, tires, and body are sometimes mistaken for noises from differential assembly, be careful in checking them. Inspection methods to locate noises include coasting, accelerating, cruising, and lifting-up all four wheels. Perform these inspections according to the condition of trouble.<br>When listening to noises, shift the gear into four-wheel drive and fourth speed position, trying to pick up only differential noise. | (1) Improper tooth contact of hypoid driven gear and drive pinion | Readjust or replace the hypoid gear set. |
| | (2) Improper backlash of the hypoid driven gear | Readjust. |
| | (3) Scored or chipped teeth of hypoid gear. | Replace hypoid gear set. |
| | (4) Scuffed hypoid gear | Replace hypoid gear set. |
| | (5) Improper preload for front or rear bearings. | Readjust. |
| | (6) Stuck, scored or chipped teeth of front or rear bearing | Replace. |
| | (7) Stuck, scored or chipped teeth of side bearing | Replace. |
| | (8) Vibrating differential gear. | Replace the differential gear. |

# 1. General Description

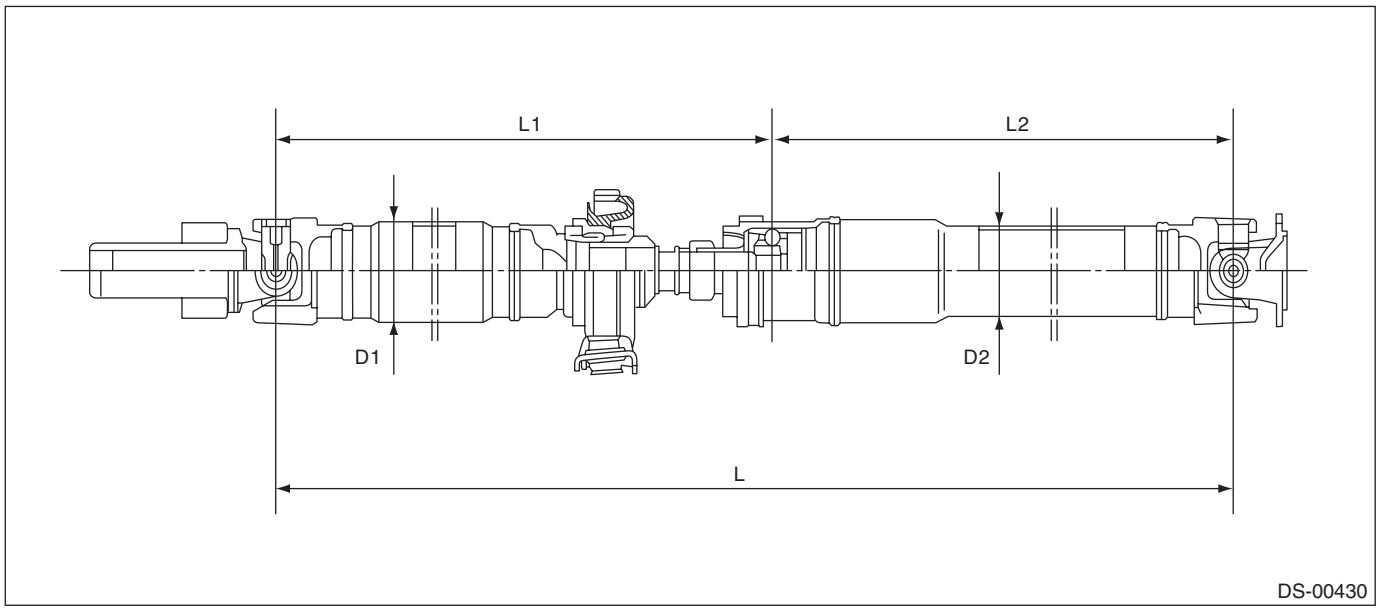
## A: SPECIFICATION

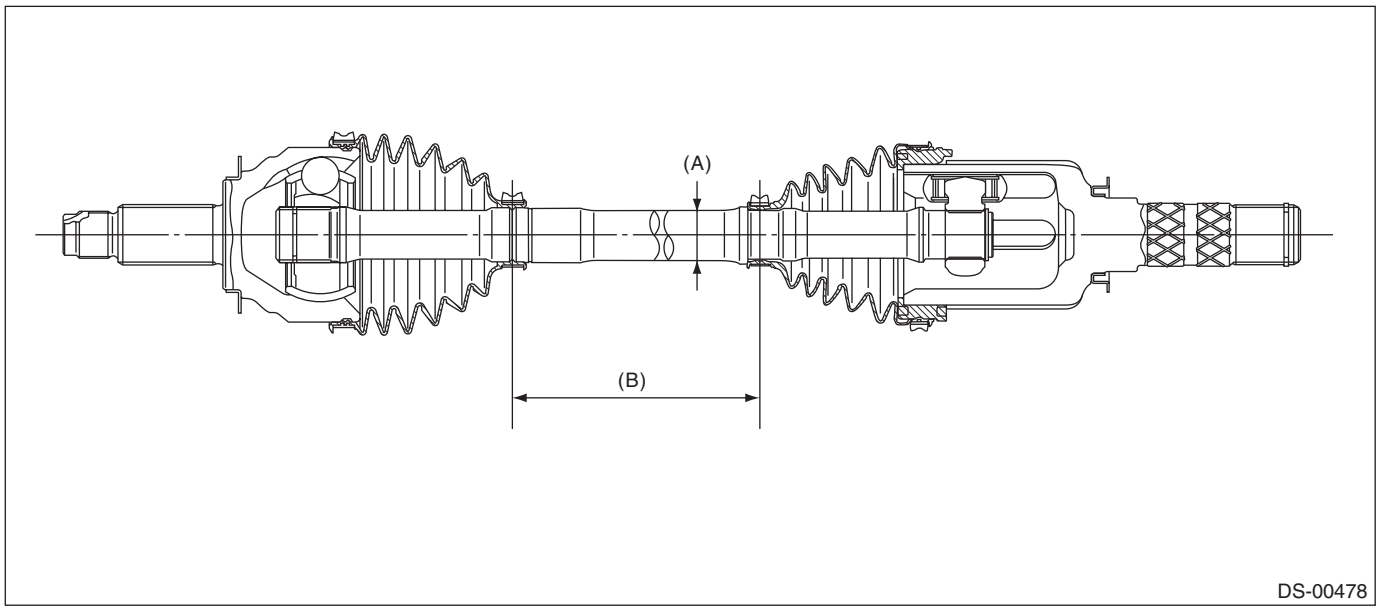
### 1. PROPELLER SHAFT

| Car line | | All models |
|---|---|---|
| Propeller shaft type | | EDJ |
| Front propeller shaft Joint-to-Joint length: $L_1$ | CVT | 675.5 mm (26.59 in) |
| | 5MT | 735.5 mm (28.96 in) |
| Rear propeller shaft Joint-to-Joint length: $L_2$ | | 723 mm (28.46 in) |
| Outer diameter of tube: | $D_1$ | 63.5 mm (2.50 in) |
| | $D_2$ | 57.5 mm (2.26 in) |



## 2. FRONT AXLE SHAFT ASSEMBLY

| Model | Axle shaft type | Axle diameter ϕ mm (in) | Axle length mm (in) |
|---|---|---|---|
| Except for XV model | AC + AAR | 22 (0.87) | 351.5 (13.84) |
| XV model | EBJ + PTJ | 22 (0.87) | 361.4 (14.23) |



(A) Axle diameter (B) Axle length

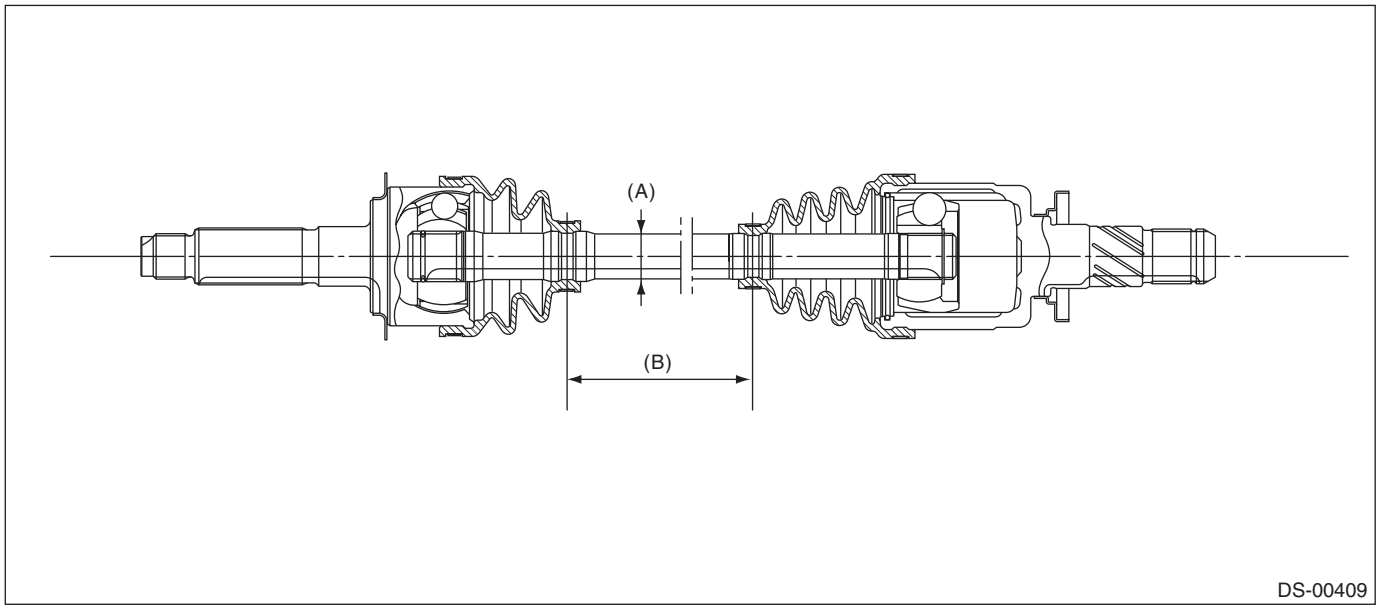
## 3. REAR AXLE SHAFT ASSEMBLY

- Except for XV model

| T/M type | Axle shaft type | Axle diameter ϕ mm (in) | Axle length mm (in) |
|---|---|---|---|
| CVT | BJ + DOJ | 22 (0.87) | 357.45 (14.07) |
| MT | EBJ + DOJ | 22 (0.87) | 372.5 (14.67) |

- XV model

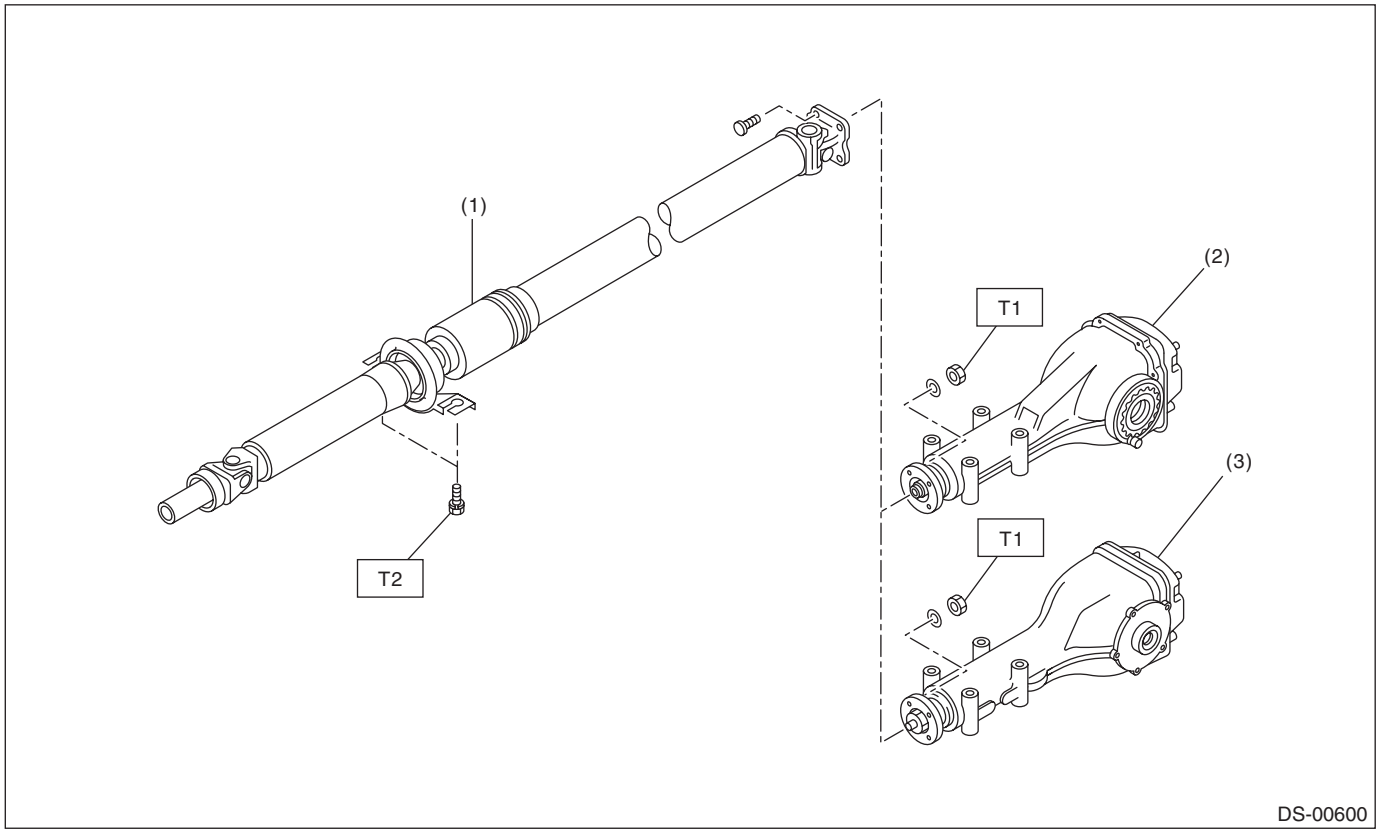
| T/M type | Axle shaft type | Axle diameter ϕ mm (in) | Axle length mm (in) |
|---|---|---|---|
| CVT | BJ + DOJ | 22 (0.87) | 388.6 (15.30) |
| MT | EBJ + DOJ | 22 (0.87) | 388.5 (15.30) |



(A) Axle diameter (B) Axle length

# B: COMPONENT

## 1. PROPELLER SHAFT

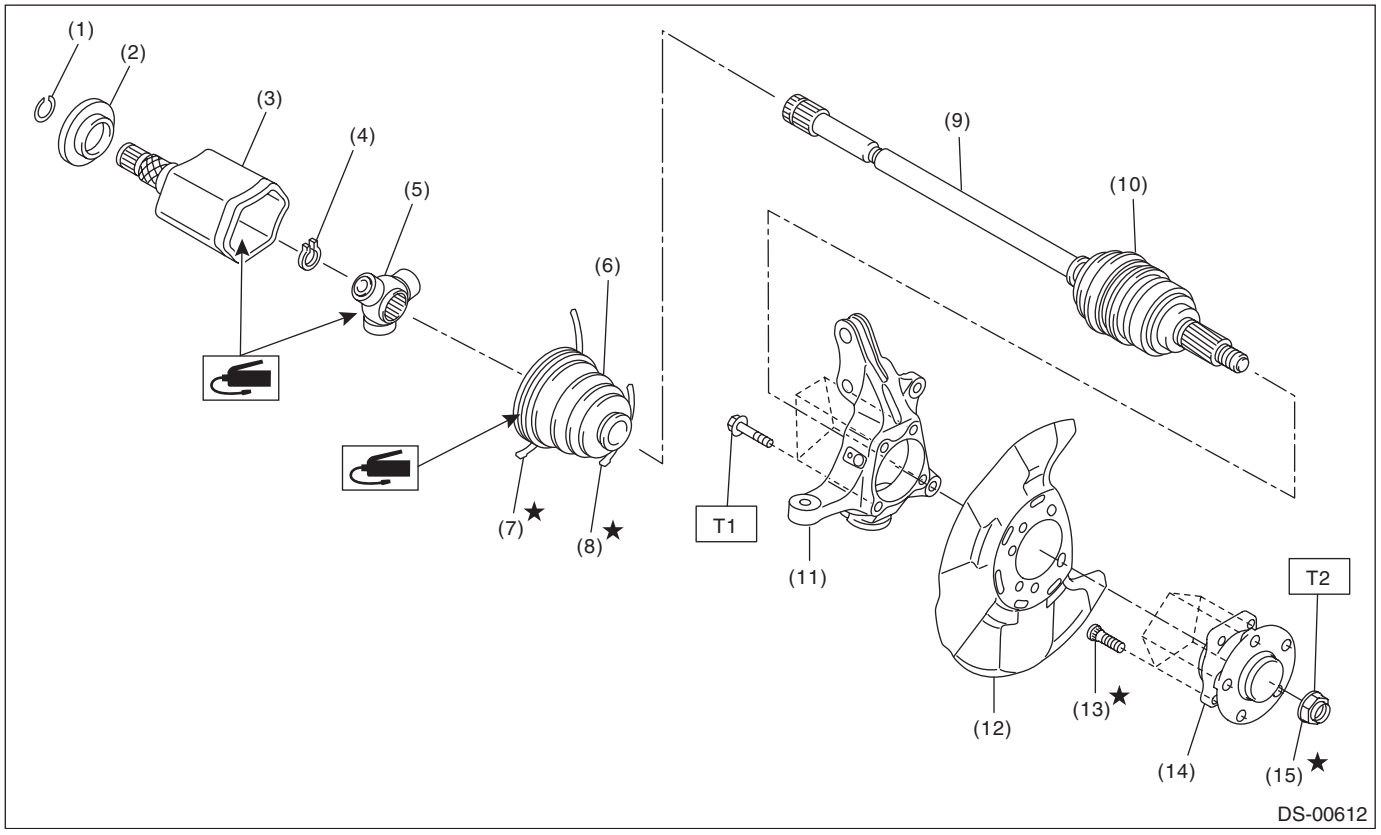


(1) Propeller shaft
(2) Rear differential (VA1-type)
(3) Rear differential (T-type)

***Tightening torque: N·m (kgf-m, ft-lb)***
***T1: 31 (3.16, 22.9)***
***T2: 52 (5.30, 38.4)***

## 2. FRONT AXLE

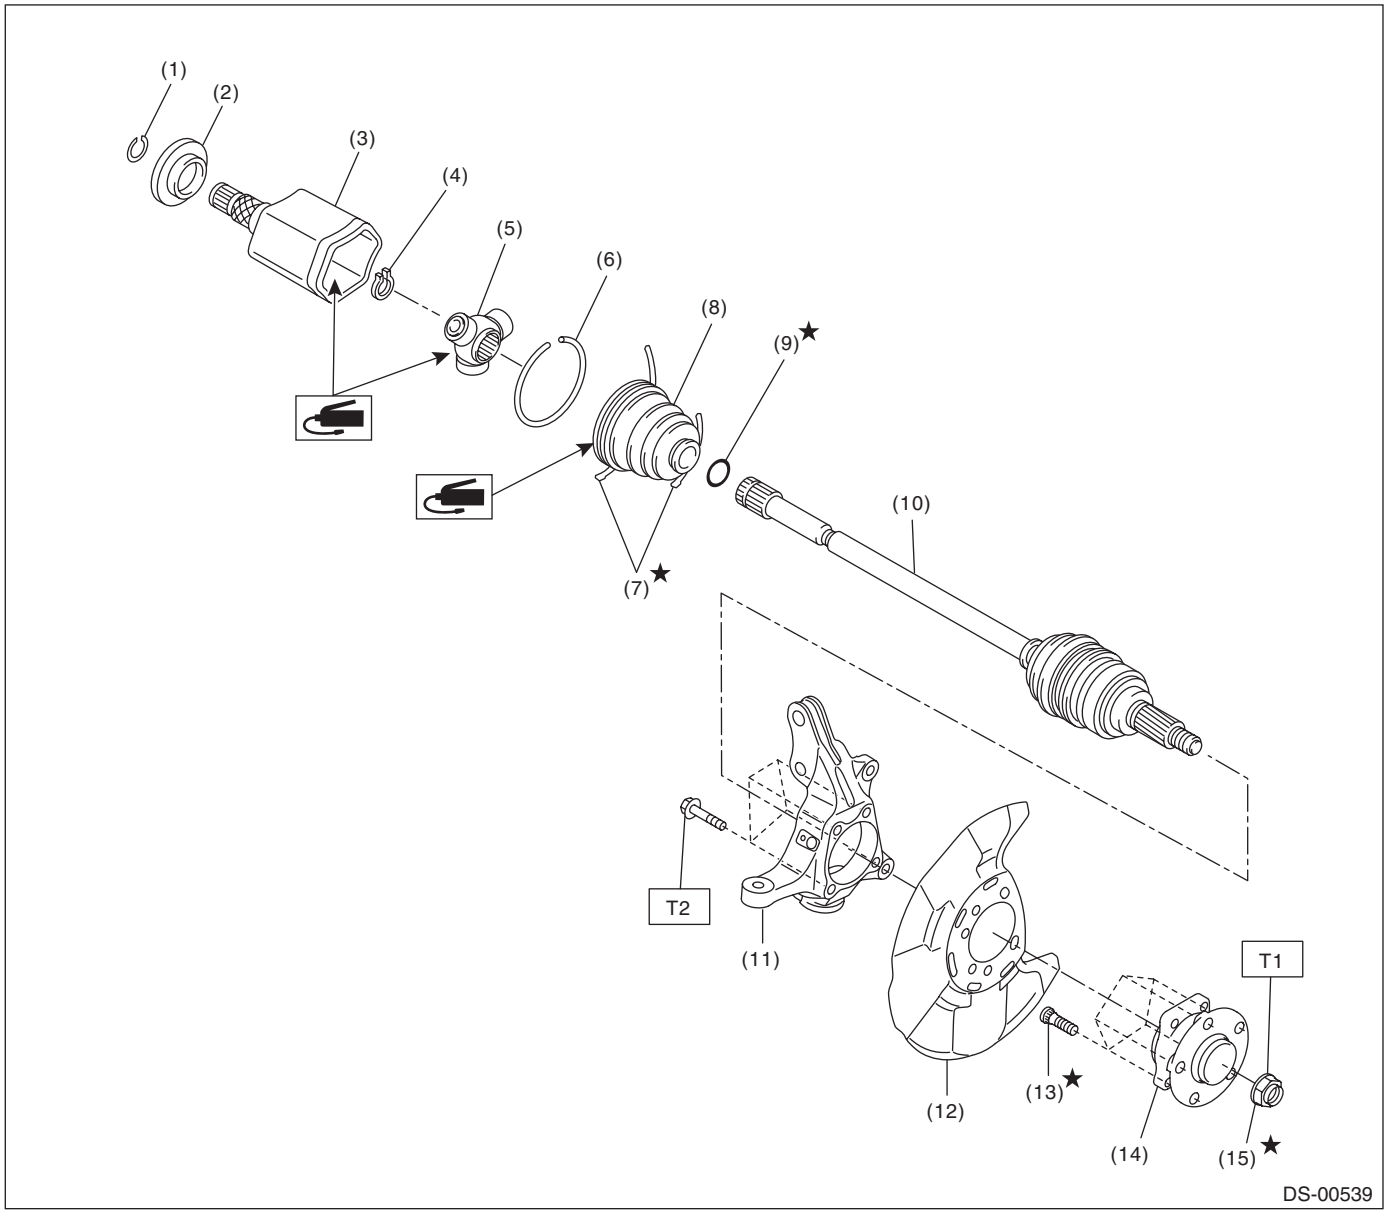
- AC + AAR type



(1) Circlip
(2) Baffle plate
(3) Outer race (AAR)
(4) Snap ring
(5) Trunnion
(6) Boot (AAR)
(7) Band - drive shaft A
(8) Band - drive shaft D
(9) Axle shaft ASSY
(10) Boot (AC)
(11) Housing ASSY - front axle
(12) Back plate - front brake
(13) Bolt - hub
(14) Hub unit COMPL - front axle
(15) Nut - axle

***Tightening torque: N·m (kgf-m, ft-lb)***
***T1: 65 (6.63, 47.9)***
***T2: 220 (22.43, 162.3)***

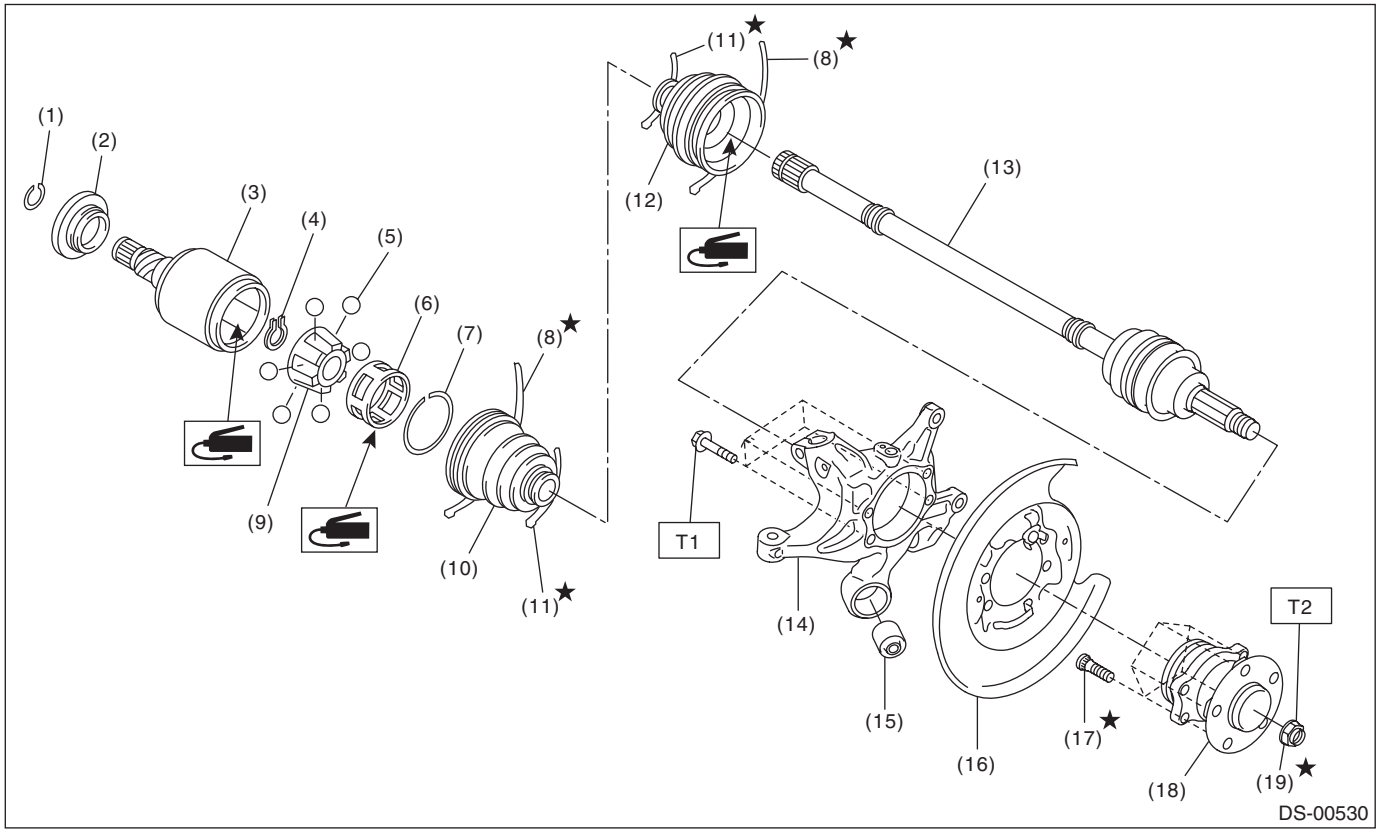
- EBJ + PTJ type



(1) Circlip
(2) Baffle plate
(3) Outer race (PTJ)
(4) Snap ring
(5) Trunnion
(6) Snap ring
(7) Boot band
(8) Boot (PTJ)
(9) O-ring
(10) EBJ shaft ASSY
(11) Housing ASSY - front axle
(12) Back plate - front brake
(13) Bolt - hub
(14) Hub unit COMPL - front axle
(15) Nut - axle

***Tightening torque: N·m (kgf-m, ft-lb)***
***T1: 220 (22.43, 162.3)***
***T2: 65 (6.63, 47.9)***

## 3. REAR AXLE



(1) Circlip A
(2) Baffle plate -
(3) Outer race (DOJ)
(4) Snap ring
(5) Ball
(6) Cage
(7) Circlip B
(8) Band - drive shaft A
(9) Inner race
(10) Boot - drive shaft (DOJ)
(11) Band - drive shaft B
(12) Boot - drive shaft (BJ)
Boot - drive shaft (EBJ)
(13) Shaft ASSY (EBJ) (CVT model)
Shaft ASSY (EBJ) (MT model)
(14) Housing ASSY - rear axle
(15) Bushing - trailing link
(16) Back plate - rear brake
(17) Bolt - hub
(18) Hub unit COMPL - rear axle
(19) Nut - axle

***Tightening torque: N·m (kgf-m, ft-lb)***

***T1: 65 (6.63, 47.9)***
***T2: 190 (19.37, 140.1)***

## C: CAUTION

• Wear appropriate work clothing, including a helmet, protective goggles and protective shoes when performing any work.
• Remove contamination including dirt and corrosion before removal, installation or disassembly.
• Keep the disassembled parts in order and protect them from dust and dirt.
• Before removal, installation or disassembly, be sure to clarify the failure. Avoid unnecessary removal, installation, disassembly and replacement.
• Vehicle components are extremely hot after driving. Be wary of receiving burns from heated parts.
• Use SUBARU genuine grease etc. or equivalent. Do not mix grease etc. of different grades or manufacturers.
• Be sure to tighten fasteners including bolts and nuts to the specified torque.
• Place shop jacks or rigid racks at the specified points.
• Apply grease onto sliding or revolving surfaces before installation.
• Before installing snap rings, apply sufficient amount of grease to avoid damage and deformation.
• Before securing a part on a vise, place cushioning materials such as wood blocks, aluminum plates, or waste cloth between the part and the vise.
• When the suspension-related components have been removed and installed, be sure to adjust the steering sensor. <Ref. to VDC-19, VDC SENSOR MIDPOINT SETTING MODE, ADJUSTMENT, VDC Control Module and Hydraulic Control Unit (VDCCM&H/U).>

## D: PREPARATION TOOL

### 1. SPECIAL TOOL

| ILLUSTRATION | Part No. | DESCRIPTION | REMARKS |
|---|---|---|---|
|  ST20099PA010 | 20099PA010 | INSTALLER & REMOVER | • Used for replacing the bushing - trailing link of the housing assembly - rear axle.<br>• Used together with BUSHING REMOVER (20099FG000). |
|  ST20099FG000 | 20099FG000 | BUSHING REMOVER | • Used for replacing the bushing - trailing link of the housing assembly - rear axle.<br>• Used together with base part of INSTALLER & REMOVER (20099PA010). |

| ILLUSTRATION | Part No. | DESCRIPTION | REMARKS |
|---|---|---|---|

|   ST-925091000 | 925091000 | BAND TIGHTENING TOOL | Used for tightening the band - boot. (A) Jig for the band (B) Ratchet wrench |
|  ST18675AA000 | 18675AA000 | DIFFERENTIAL SIDE OIL SEAL INSTALLER | Used for installing the differential side retainer oil seal. |
|  ST-926470000 | 926470000 | AXLE SHAFT PULLER | • Used for removing the axle shaft. • Used together with AXLE SHAFT PULLER PLATE (28099PA110). |
|  ST28099PA110 | 28099PA110 | AXLE SHAFT PULLER PLATE | Exchange with the plate of the AXLE SHAFT PULLER (926470000) to use. |

| ILLUSTRATION | Part No. | DESCRIPTION | REMARKS |
|---|---|---|---|
|  ST-927080000 | 927080000 | HUB STAND | Used for assembling the bolt - hub of the hub. |
|  ST28399AG000 | 28399AG000 | HUB STAND | Used for extracting the bolt - hub. |
|  ST28399SA010 | 28399SA010 | OIL SEAL PROTECTOR | • Used for installing the front axle shaft into the front differential.<br>• For protecting the oil seal. |
|  ST28099PA090 | 28099PA090 | OIL SEAL PROTECTOR | • Used for installing the rear axle shaft into the rear differential.<br>• For protecting the oil seal. |

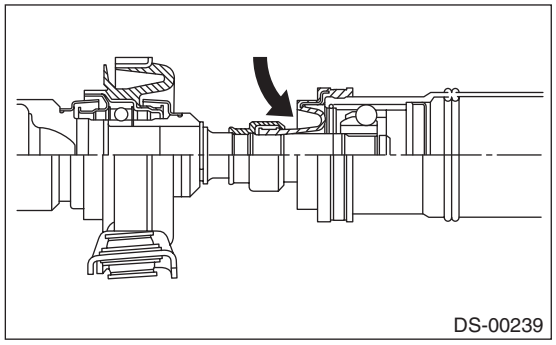
## 2. GENERAL TOOL

| TOOL NAME | REMARKS |
|---|---|
| Tie-rod ball joint puller | Used for disconnecting joints. |
| Dial gauge | Used for inspecting the propeller shaft run-out. |
| Extension cap | Used for preventing leakage of gear oil or ATF. |
| Crowbar | Used for extracting the axle shaft. |
| Needle nose pliers | Used for tightening the band - boot of the rear axle shaft.<br>• Snap-on 96BCP<br>Or equivalent. |

# 2. Propeller Shaft

## A: REMOVAL

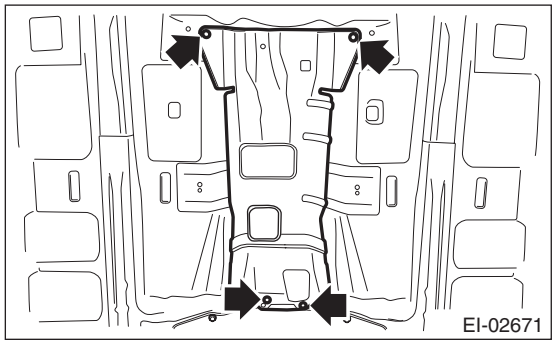
**CAUTION:**
- **Before removing propeller shaft, wrap metal parts with a cloth or rubber material.**
- **Do not disassemble the center EDJ of the propeller shaft.**
- **Before removing propeller shaft, wrap the metal parts attached to the rubber boot of center EDJ with a cloth or rubber material, as shown in the figure. The rubber boot may be damaged due to interference with adjacent metal parts while bending the EDJ during removal.**



DS-00239

1) Shift the select lever or gear shift lever to neutral.
2) Release the parking brake.
3) Lift up the vehicle.
4) Remove the center exhaust pipe, rear exhaust pipe, and muffler.
- Center exhaust pipe & rear exhaust pipe: <Ref. to EX(H4DO)-15, REMOVAL, Rear Exhaust Pipe.>
- Muffler: <Ref. to EX(H4DO)-19, REMOVAL, Muffler.>

5) Remove the bolts to remove the front heat shield cover.

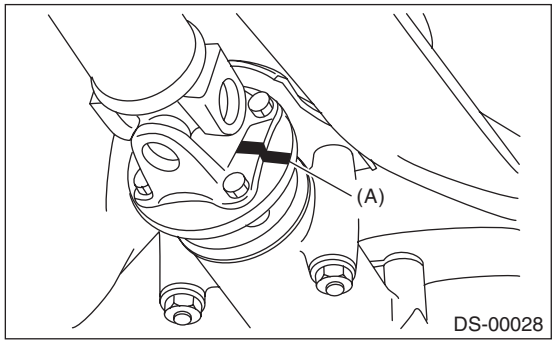


EI-02671

6) Remove the propeller shaft assembly.

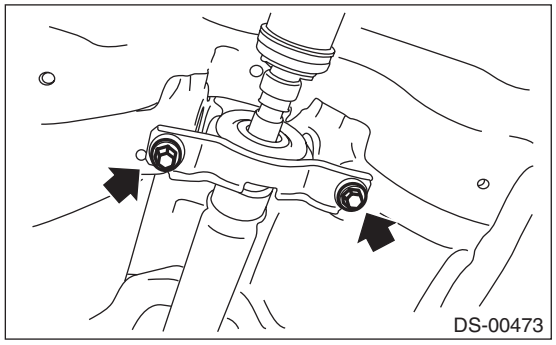
**CAUTION:**
**Do not disassemble the propeller shaft.**

(1) Place alignment marks (A) on the flange yoke and rear differential.
(2) Remove four bolts holding the propeller shaft to the rear differential.



DS-00028

(3) Remove the center bearing.



(4) Remove the propeller shaft from transmission.

**CAUTION:**
**Be careful not to damage oil seals and contact surface of the sleeve yoke.**

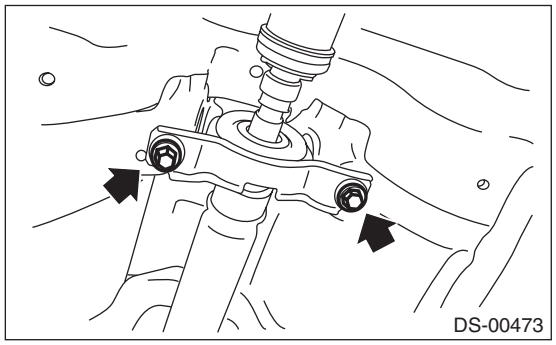
NOTE:
- Use a container to catch ATF or oil flowing from propeller shaft.
- To prevent ATF from leaking, install extension cap etc. to the transmission.

## B: INSTALLATION

1) Before installation, check the following items, and replace the propeller shaft assembly as necessary.
- Dents or cracks on the tube surface
- Splines for deformation or abnormal wear
- Unsmooth joint operation or abnormal noise
- Center bearing for free play, noise or non-smooth operation.
- Oil seals for abnormal wear or damage
- Damaged center bearing

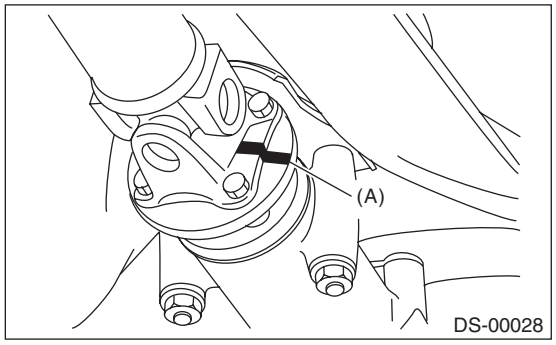
2) Apply fluid or gear oil to the oil seal lip and the propeller shaft.
- CVT model: SUBARU CVT OIL FOR LINEARTRONIC
- MT model: GL-5

3) Insert the sleeve yoke into the transmission and attach center bearing to body.



***Tightening torque:***
***52 N·m (5.30 kgf-m, 38.4 ft-lb)***

4) Align the alignment marks (A), and connect the yoke flange and rear differential.



***Tightening torque:***
***31 N·m (3.16 kgf-m, 22.9 ft-lb)***

5) Check the propeller shaft with the propeller shaft installed to the vehicle. <Ref. to DS-14, INSPECTION, Propeller Shaft.>
6) Install the heat shield cover.

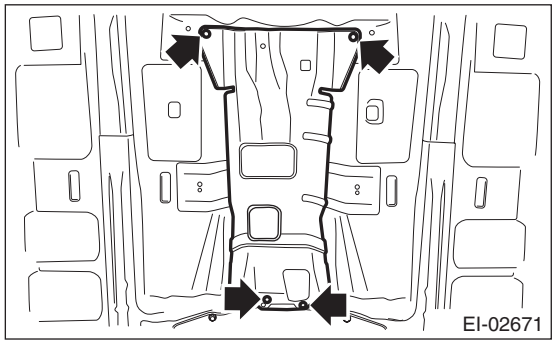
***Tightening torque:***
***18 N·m (1.84 kgf-m, 13.3 ft-lb)***

7) Install the center exhaust pipe and rear exhaust pipe.
8) Lower the vehicle.

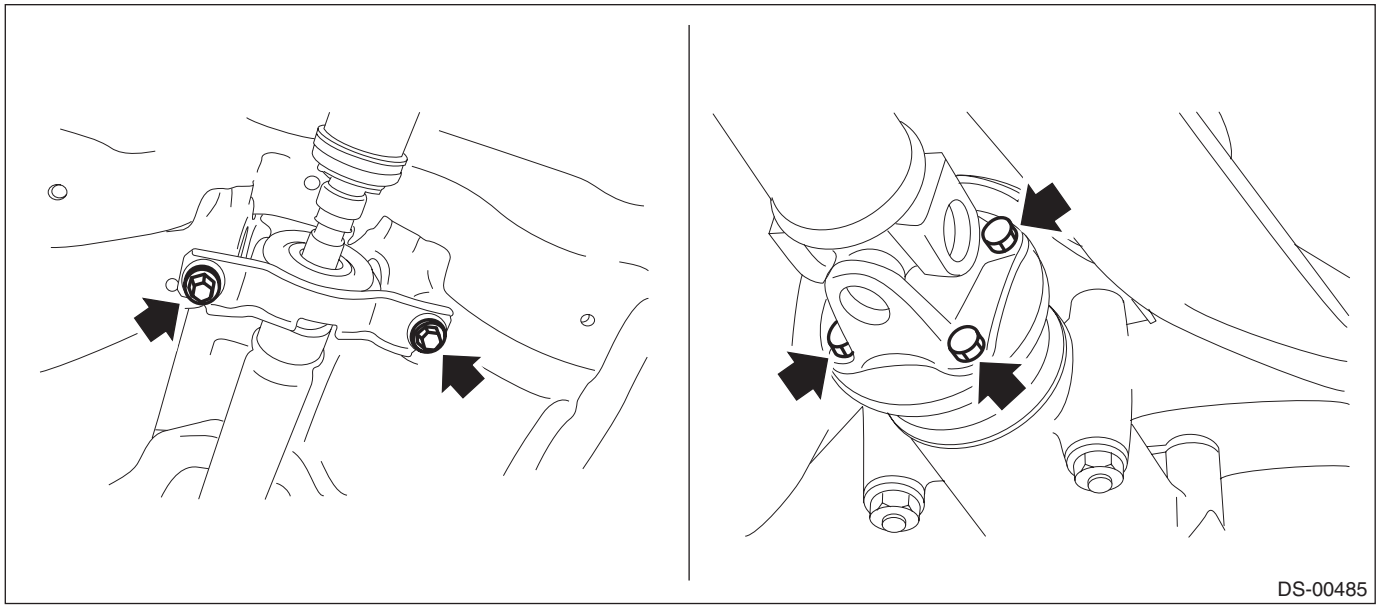
## C: INSPECTION

Check the propeller shaft with the propeller shaft installed to the vehicle.
1) Remove the front exhaust pipe. <Ref. to EX(H4DO)-7, REMOVAL, Front Exhaust Pipe.>
2) Remove the center exhaust pipe, rear exhaust pipe, and muffler.
- Center exhaust pipe & rear exhaust pipe: <Ref. to EX(H4DO)-15, REMOVAL, Rear Exhaust Pipe.>
- Muffler: <Ref. to EX(H4DO)-19, REMOVAL, Muffler.>

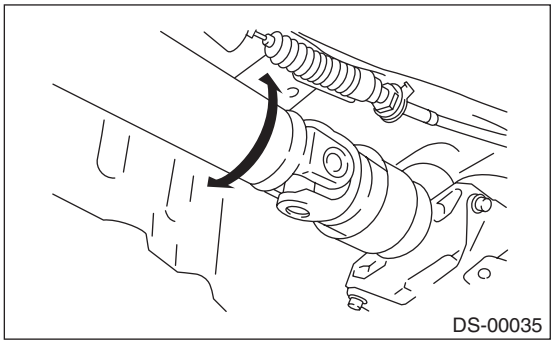
3) Remove the bolts to remove the front heat shield cover.



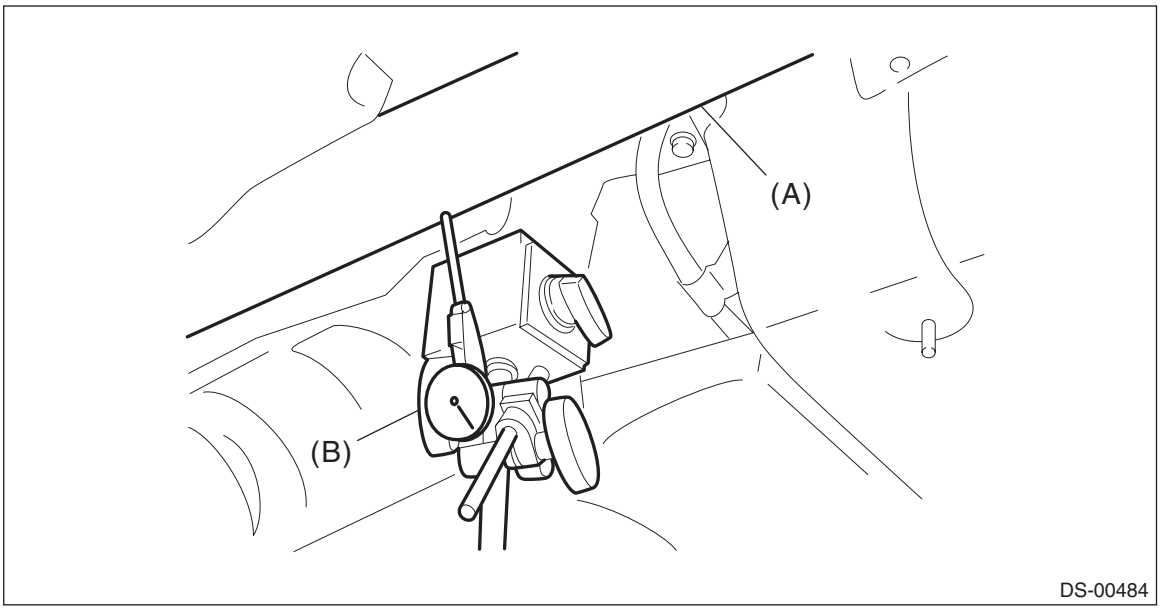
4) Check the propeller shaft mounting bolt for looseness.
   (1) Yoke flange mounting bolts which connect to the rear differential
   (2) Center bearing bracket mounting bolts



5) Check the spline and bearing for the propeller shaft.
   (1) Turn the propeller shaft by hand to check if abnormal free play exists at splines.
   (2) Also move yokes to check if abnormal free play exists at spiders and bearings.

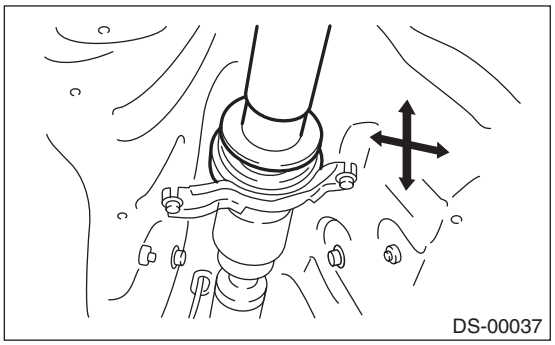


6) Measure the deflection of the propeller shaft.
   (1) Set the dial gauge (B) with its indicator stem at the center of the propeller shaft (A).
   (2) Turn the propeller shaft (A) slowly by hands to check for runout of the propeller shaft.



***Runout:***
***Limit: 0.6 mm (0.024 in)***

7) Check the center bearing for free play.
Move the propeller shaft near the center bearing up, down, left, right by hand, to check for any abnormal free play of the bearings.



8) Replace the propeller shaft assembly if faulty is found in the inspection.

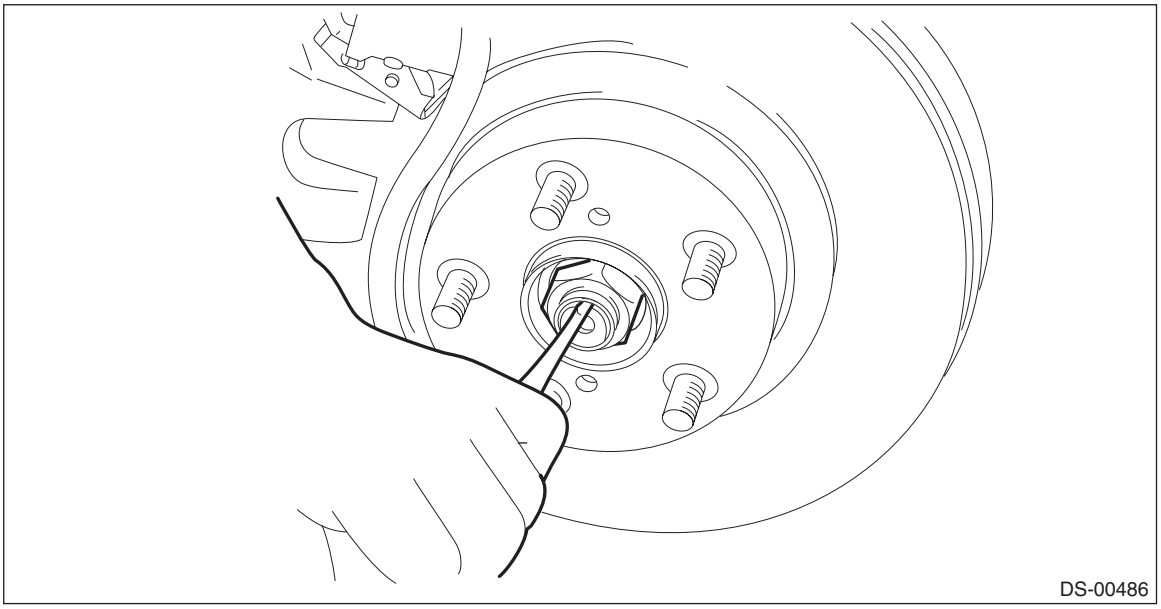
# 3. Front Axle

## A: REMOVAL

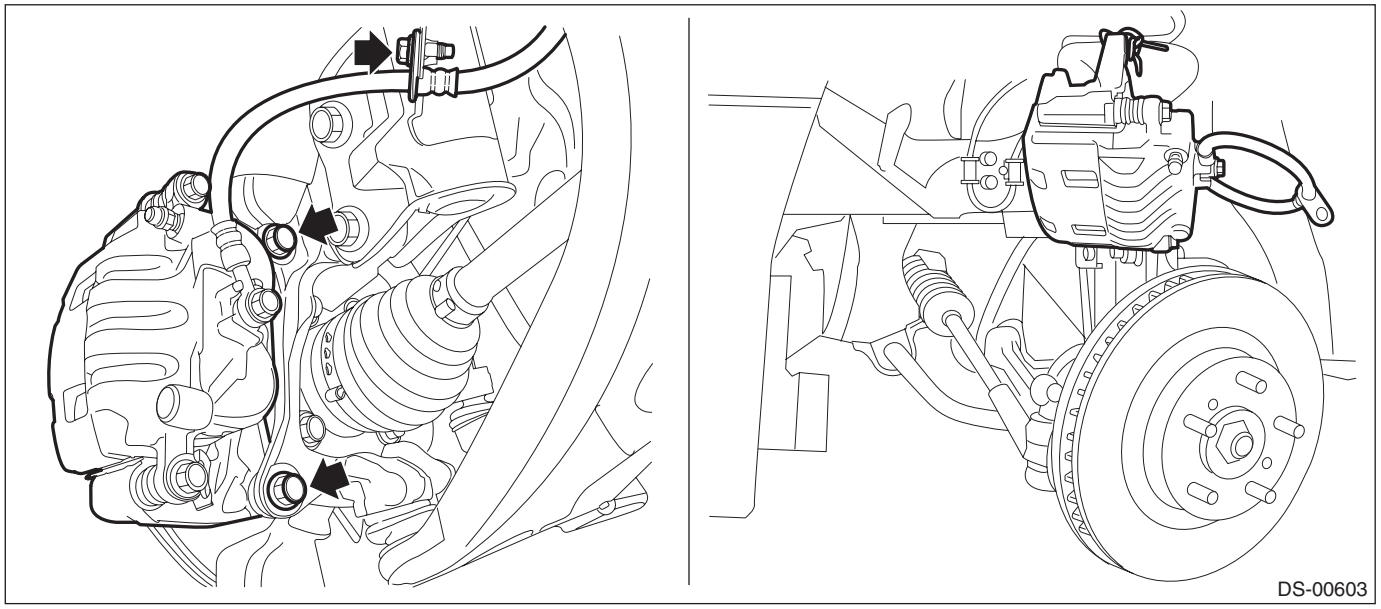
1) Lift up the vehicle, and then remove the front wheels.
2) Remove the nut - axle.

**CAUTION:**
**Do not loosen the nut - axle while the front axle is loaded. Doing so may damage the hub unit COMPL.**

(1) Lift the crimped section of the nut - axle.
(2) Remove the nut - axle using a socket wrench while depressing the brake pedal.

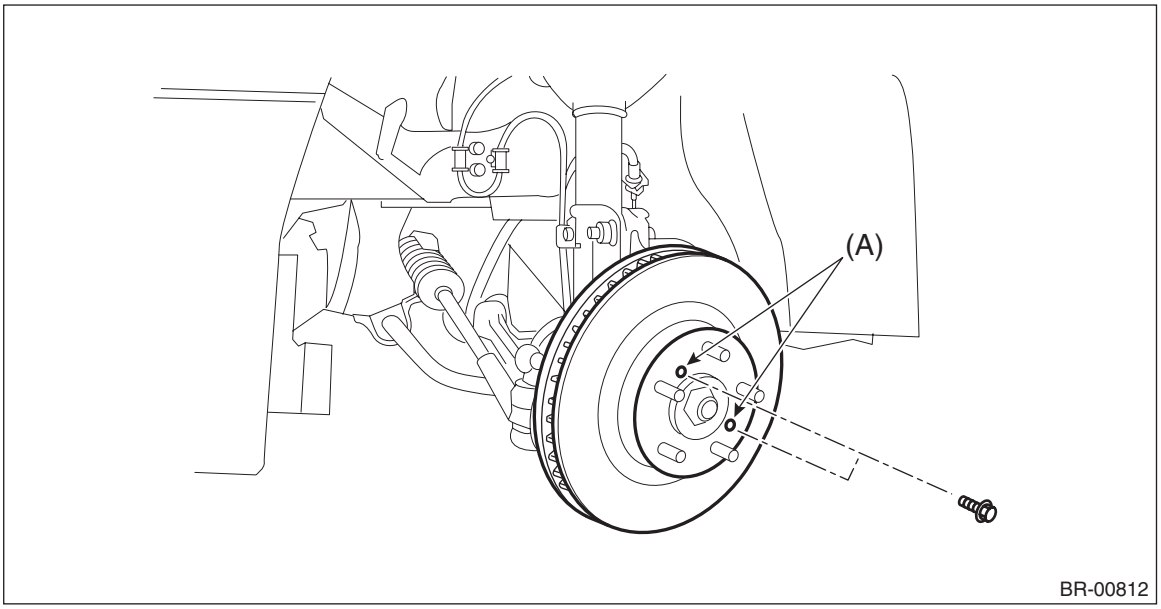


3) Remove the caliper body assembly from the housing assembly - front axle.
(1) Remove the mounting bolts, and then remove the caliper body assembly.
(2) Prepare wiring harnesses etc. to be discarded, and suspend the caliper body assembly from the strut assembly.



4) Remove the disc rotor.

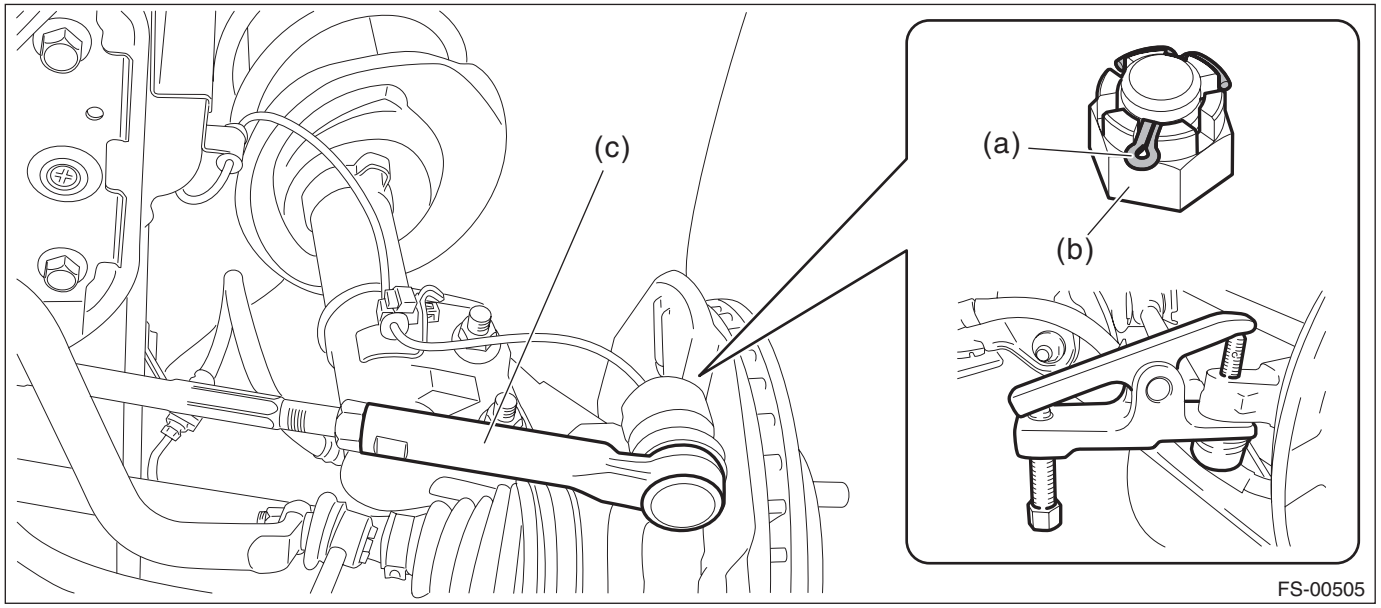
NOTE:
When the disc rotor is difficult to be removed from the hub unit COMPL - front axle, screw in 8 mm (0.31 in) bolt to the threaded part of the disc rotor (A), and remove the disc rotor.



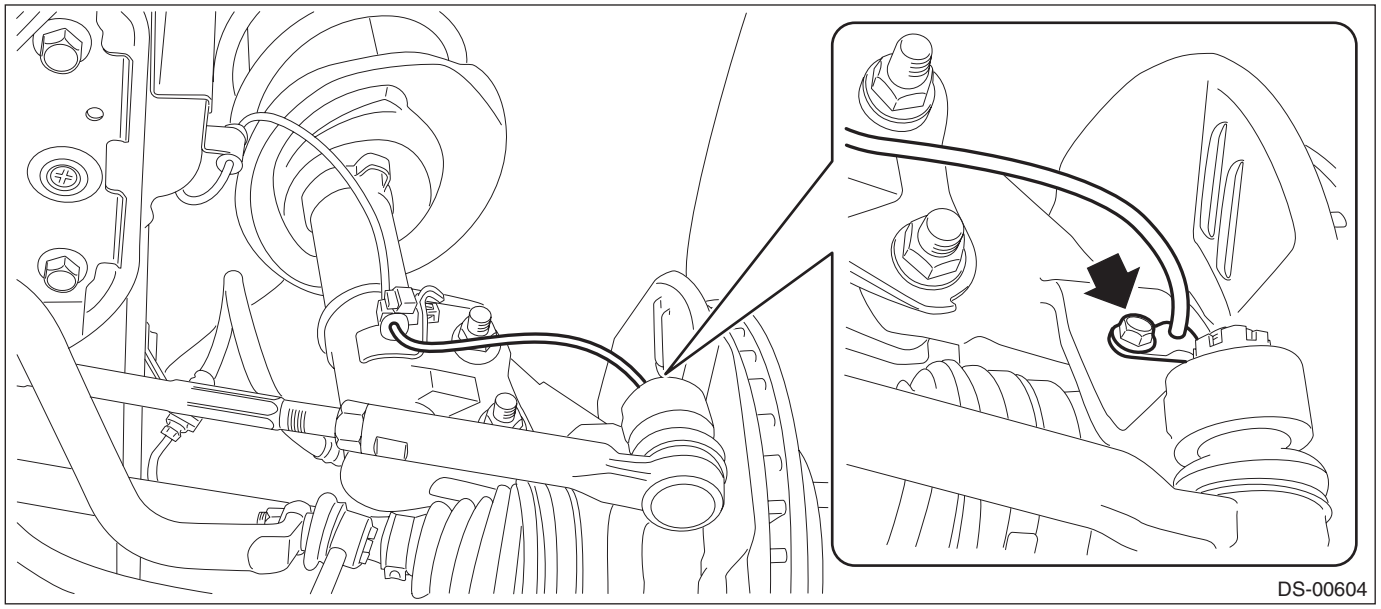
5) Disconnect the tie-rod end.
   (1) Pull out the cotter pin (a).
   (2) Remove the castle nut (b).
   (3) Using a tie-rod ball joint puller, remove the tie-rod end (c).

**CAUTION:**
**Be careful not to damage the boot of the joint.**

***Preparation tool:***
***Tie-rod ball joint puller***

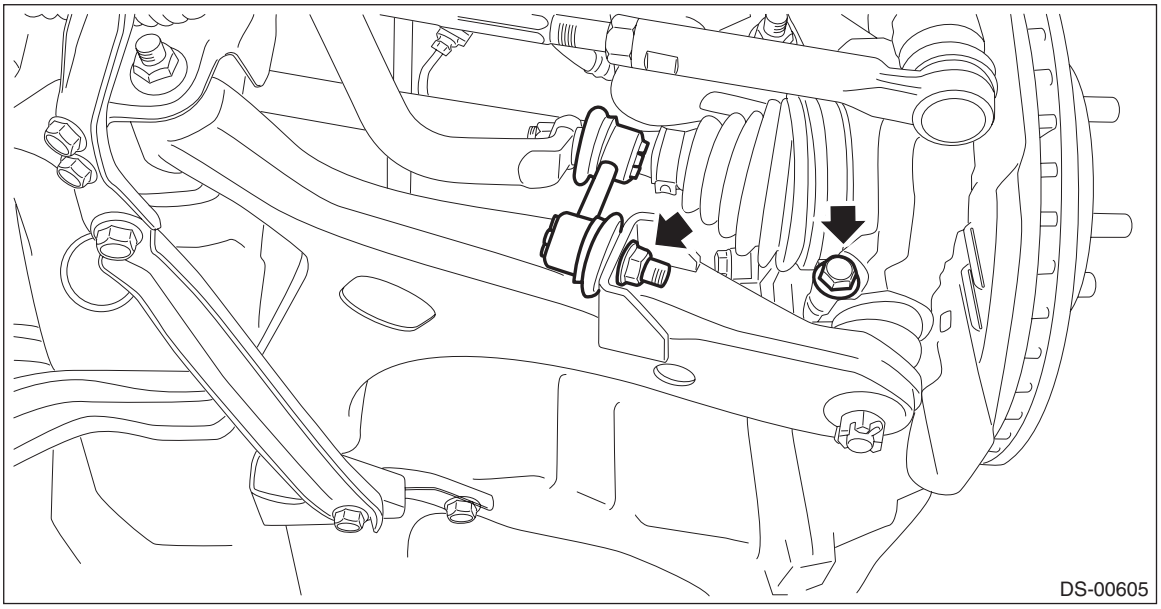


6) Remove the bolts, and remove the front ABS wheel speed sensor.



7) Remove the stabilizer link and ball joint.

**CAUTION:**
**Be careful not to damage the boot of the joint.**

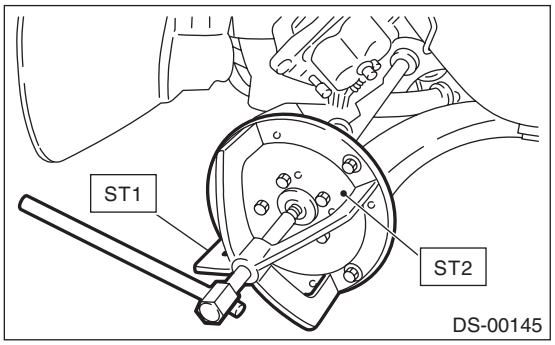


8) Using a crowbar, remove the front axle shaft from the transmission.

**CAUTION:**
**Be careful not to allow the bar to damage holder area.**

9) Remove the front axle shaft assembly from the hub unit COMPL - front axle.

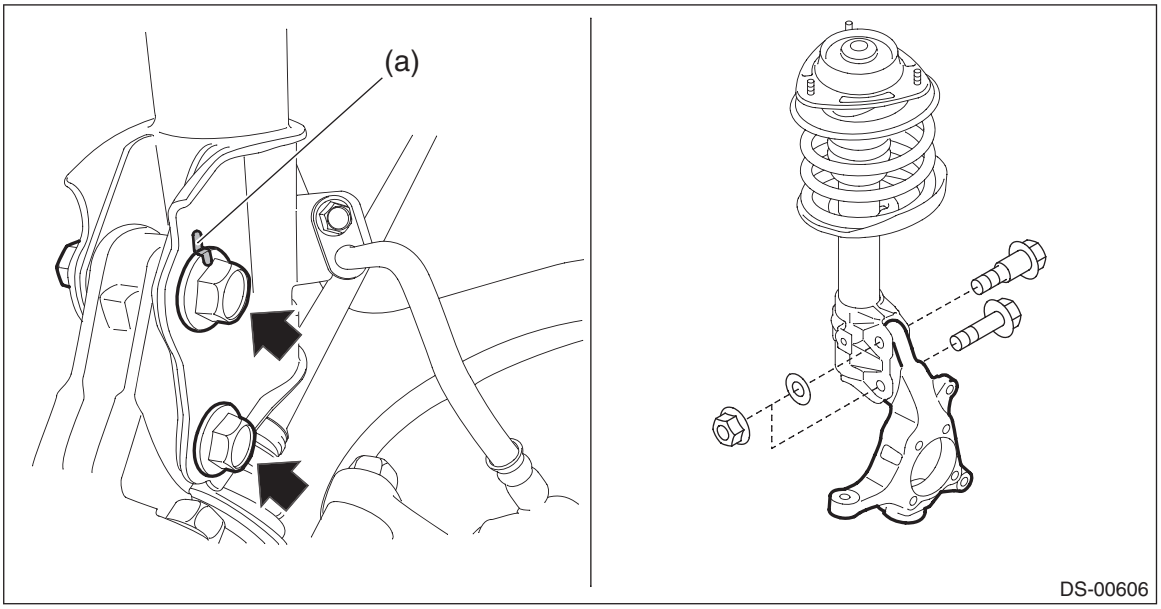
***Preparation tool:***
***ST1: AXLE SHAFT PULLER (926470000)***
***ST2: AXLE SHAFT PULLER PLATE (28099PA110)***



NOTE:
If it is hard to remove, use the ST.

10) Remove the housing assembly - front axle.
(1) Place an alignment mark (a) on the adjusting bolt and the strut.
(2) Remove the adjusting bolts and flange bolts for the strut assembly, and then remove the housing assembly - front axle.

**CAUTION:**
- **While holding the head of the adjusting bolt, loosen the flange nut.**
- **Be careful of the weight of the housing assembly - front axle.**
- **Be careful not to damage the spline portion of the axle shaft.**



11) For removal of the hub unit COMPL - front axle, refer to “Front Hub Unit Bearing”. <Ref. to DS-25, REMOVAL, Front Hub Unit Bearing.>

## B: INSTALLATION

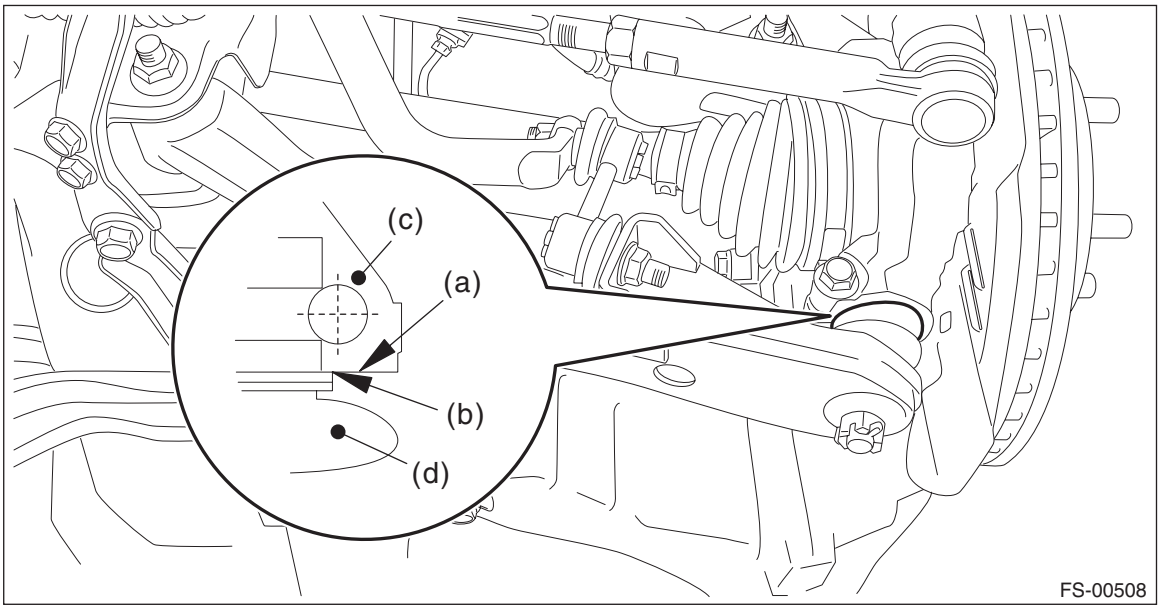
1) Install the front axle shaft assembly.

**CAUTION:**
- **Do not tap the axle shaft using a hammer when installing axle shaft assembly.**
- **Use new nut - axle.**

(1) Insert the axle shaft assembly into the hub spline, and pull in the axle shaft assembly into specified position.
(2) Temporarily tighten the nut - axle.

2) Install the ball joint assembly to the housing assembly - front axle.

**CAUTION:**
- **Before tightening, make sure the bottom surface of the housing assembly - front axle and the stepped section of ball joint are in contact.**
- **Be careful not to damage the boot of the joint.**



(a) Bottom surface of housing ASSY - front axle
(c) Housing ASSY - front axle
(d) Ball joint ASSY
(b) Raised section of ball joint

***Tightening torque:***
***50 N·m (5.10 kgf-m, 36.9 ft-lb)***

3) Install the front ABS wheel speed sensor.

***Tightening torque:***
***7.5 N·m (0.76 kgf-m, 5.5 ft-lb)***

4) Install the disc rotor.
5) Install the caliper body assembly.

***Tightening torque:***
***80 N·m (8.16 kgf-m, 59.0 ft-lb)***

6) Install the stabilizer link assembly.
- Except for XV model

***Tightening torque:***
***38 N·m (3.87 kgf-m, 28.0 ft-lb)***

- XV model

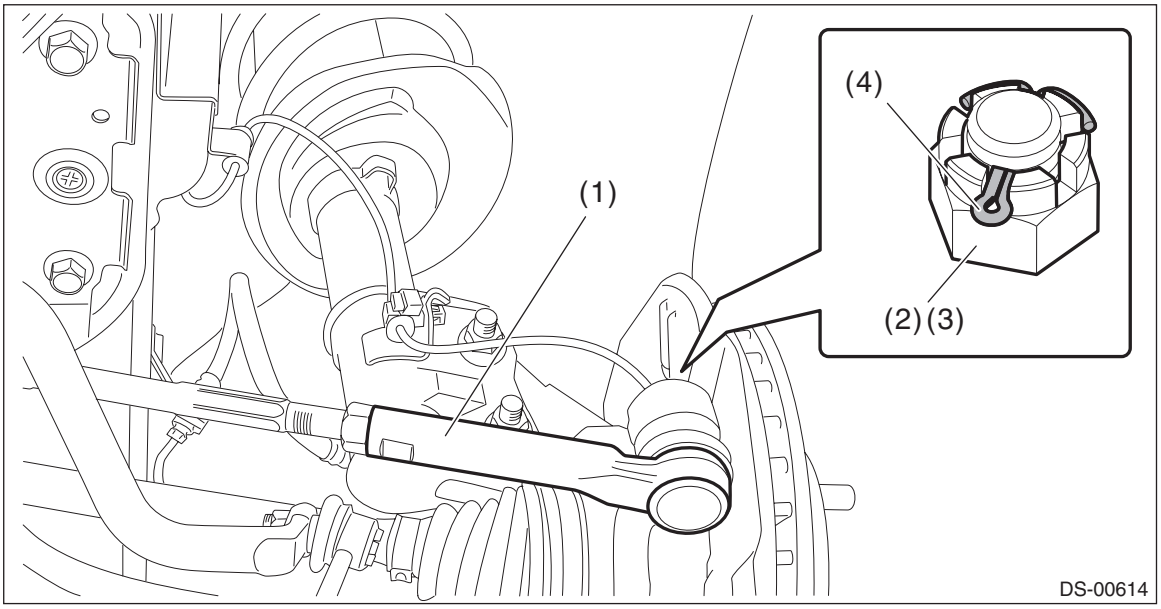
***Tightening torque:***
***60 N·m (6.12 kgf-m, 44.3 ft-lb)***

7) Connect the tie-rod ends.
(1) Connect the tie-rod ends to the housing assembly - front axle.
(2) Tighten the castle nuts to the specified torque.

**CAUTION:**
**When connecting the tie-rod, do not hit the cap at bottom of tie-rod end with a hammer.**

***Tightening torque:***
***27 N·m (2.75 kgf-m, 19.9 ft-lb)***

(3) Tighten the castle nut within the range of 60° so that the cotter pin hole and cutout portion of the castle nut are aligned.
(4) Insert the cotter pin, and bend the tip of the pin to fix it.

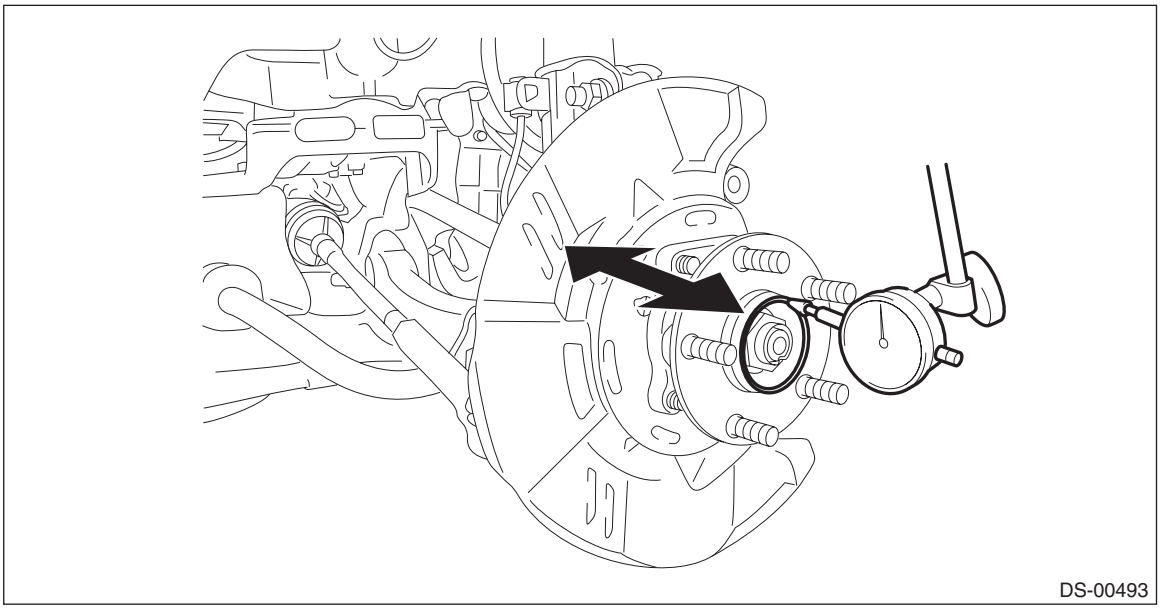


8) While depressing the brake pedal, tighten a new nut - axle to the specified torque and lock it securely.

**CAUTION:**
**Do not load the front axle before tightening the nut - axle. Doing so may damage the hub unit COMPL.**

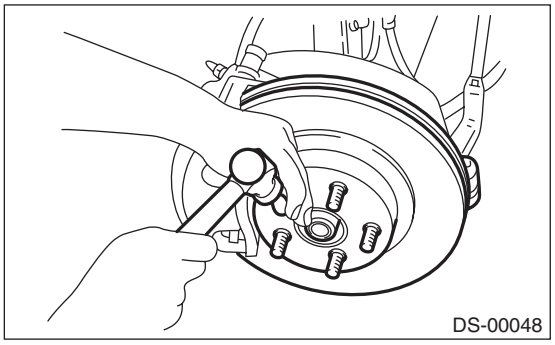
***Tightening torque:***
***220 N·m (22.43 kgf-m, 162.3 ft-lb)***

9) Inspect the lean of axis direction using a dial gauge. Replace the hub unit COMPL - front axle if the play exceeds the limit.



***Service limit:***
***Maximum: 0.05 mm (0.0020 in)***

10) After tightening the nut - axle, lock it securely.

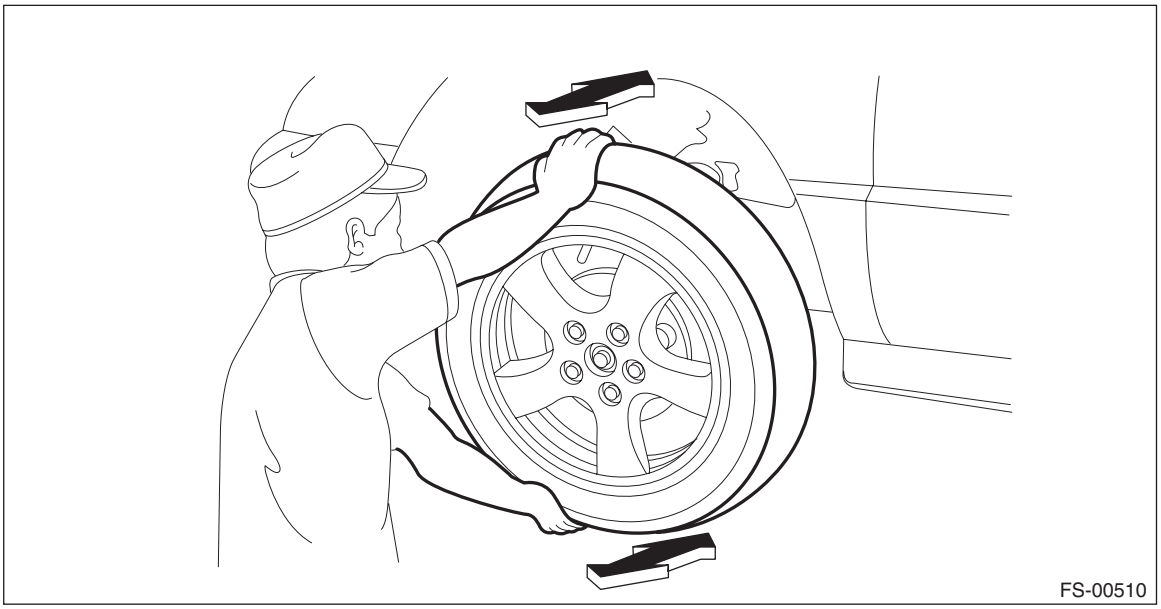


11) Install the front wheels, and perform the following inspections.

***Tightening torque:***
***120 N·m (12.24 kgf-m, 88.5 ft-lb)***

1. Check the wheels for smooth rotation.

2. Check that there is no play by moving the upper and lower portions of front tire in an axial direction with the brake pedal released.



- **Play exists** → Check the hub unit COMPL - front axle. <Ref. to DS-34, INSPECTION, Front Hub Unit Bearing.>

3. Check that there is no play by moving the upper and lower portions of front tire in an axial direction with the brake pedal depressed.

- **Play exists** → Replace the ball joint assembly. <Ref. to FS-32, REMOVAL, Front Ball Joint.>

12) Inspect the wheel alignment and adjust if necessary.

- Inspection: <Ref. to FS-7, INSPECTION, Wheel Alignment.>
- Adjustment: <Ref. to FS-12, ADJUSTMENT, Wheel Alignment.>

**CAUTION:**
**When the wheel alignment has been adjusted, perform "VDC sensor midpoint setting mode.".**

13) Perform reinitialization of the auto headlight beam leveler system. (Model with auto headlight beam leveler) <Ref. to LI-17, PROCEDURE, Auto Headlight Beam Leveler System.>

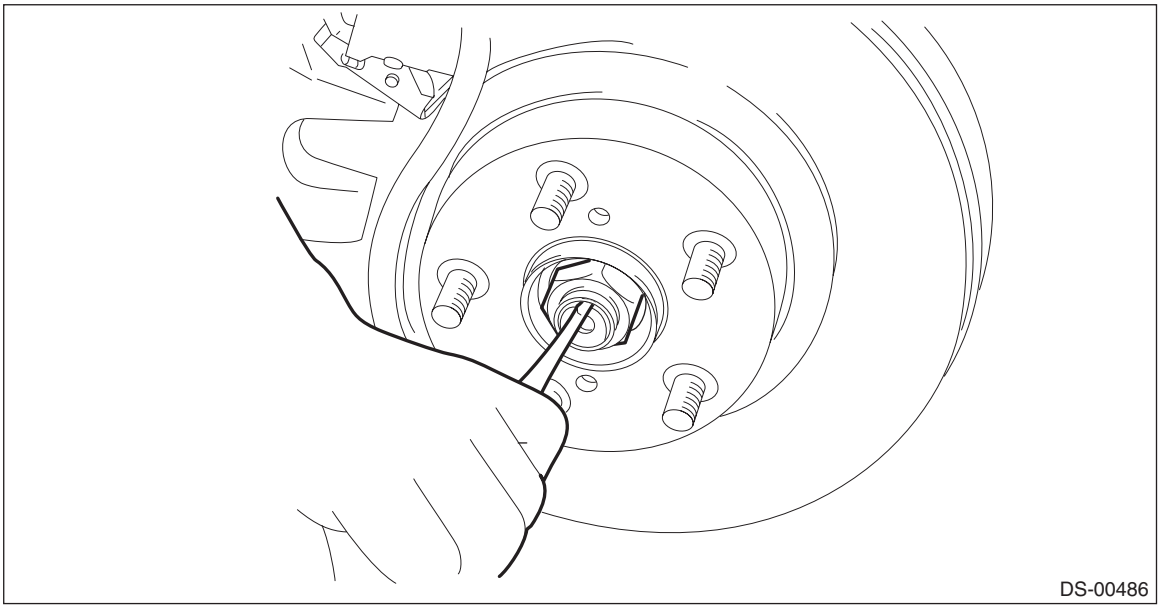
# 4. Front Hub Unit Bearing

## A: REMOVAL

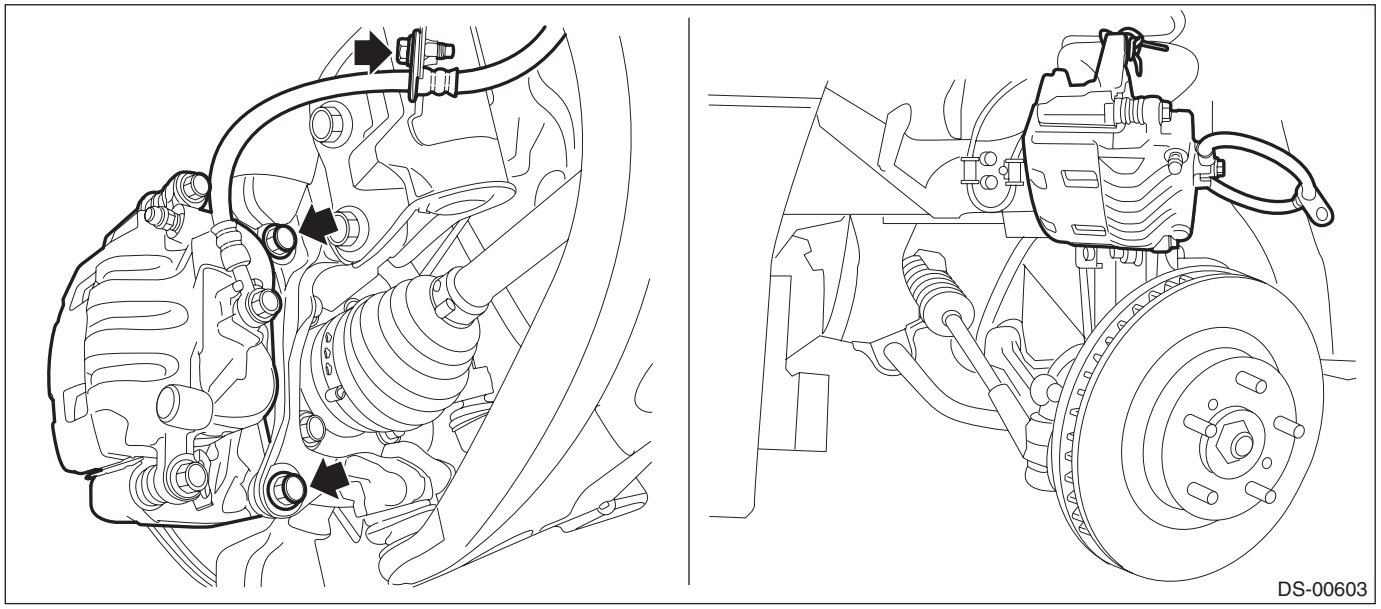
1) Lift up the vehicle, and then remove the front wheels.
2) Remove the nut - axle.

**CAUTION:**
**Do not loosen the nut - axle while the front axle is loaded. Doing so may damage the hub unit COMPL.**

(1) Lift the crimped section of the nut - axle.
(2) Remove the nut - axle using a socket wrench while depressing the brake pedal.

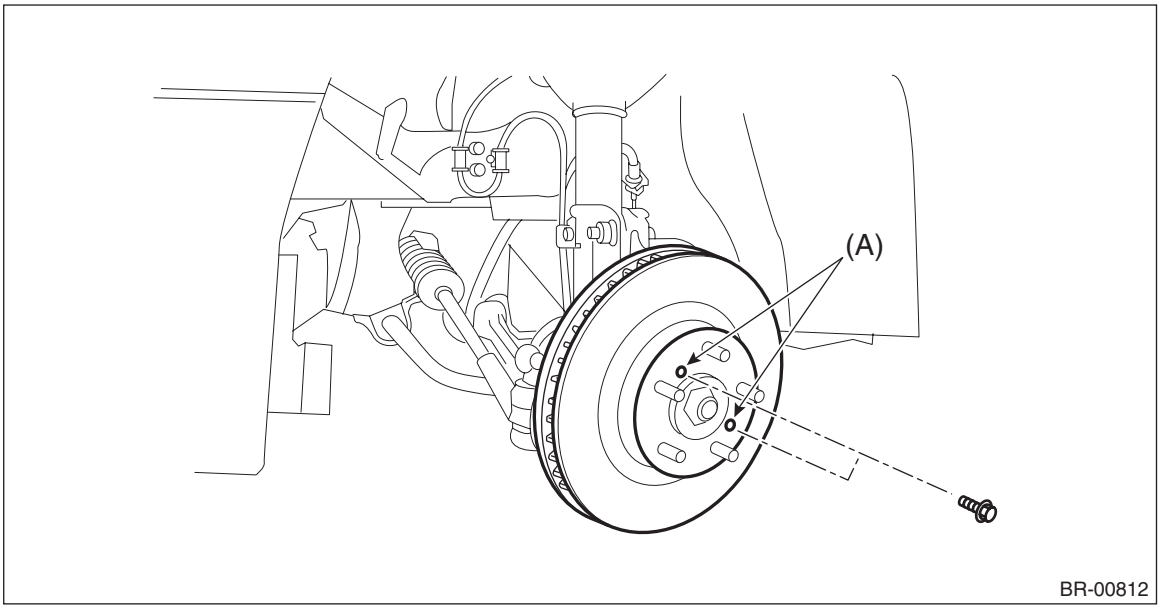


3) Remove the caliper body assembly from the housing assembly - front axle.
(1) Remove the mounting bolts, and then remove the caliper body assembly.
(2) Prepare wiring harnesses etc. to be discarded, and suspend the caliper body assembly from the strut assembly.

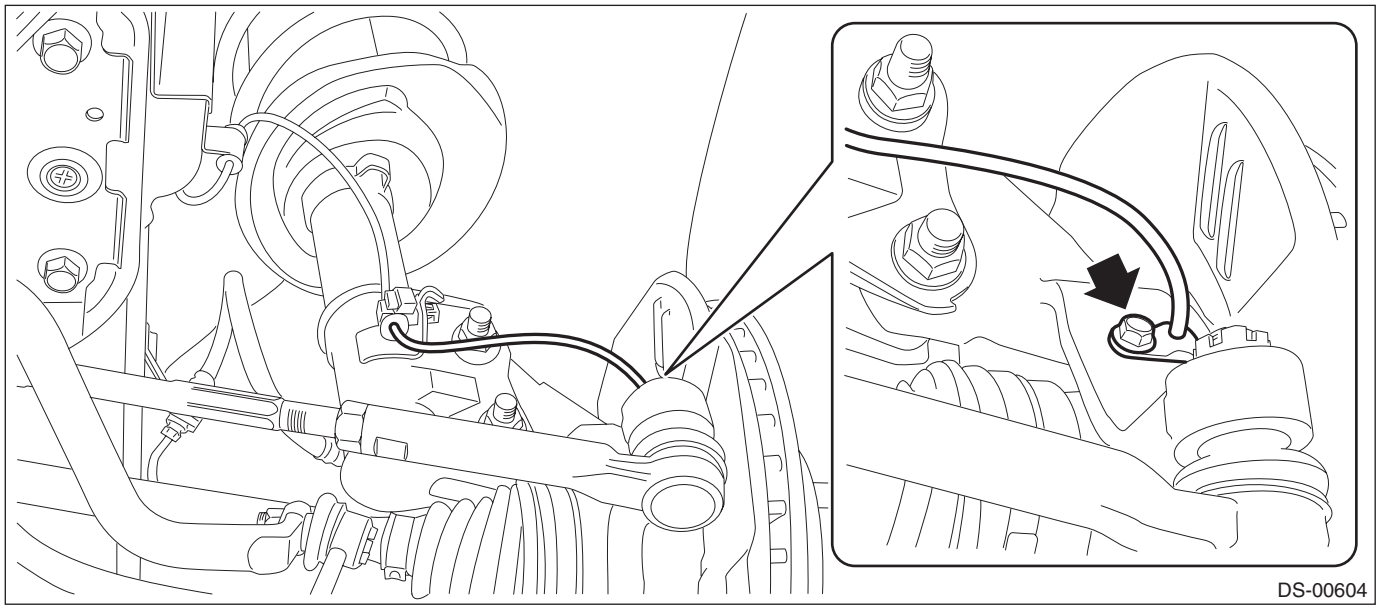


4) Remove the disc rotor.

NOTE:
When the disc rotor is difficult to be removed from the hub unit COMPL - front axle, screw in 8 mm (0.31 in) bolt to the threaded part of the disc rotor (A), and remove the disc rotor.

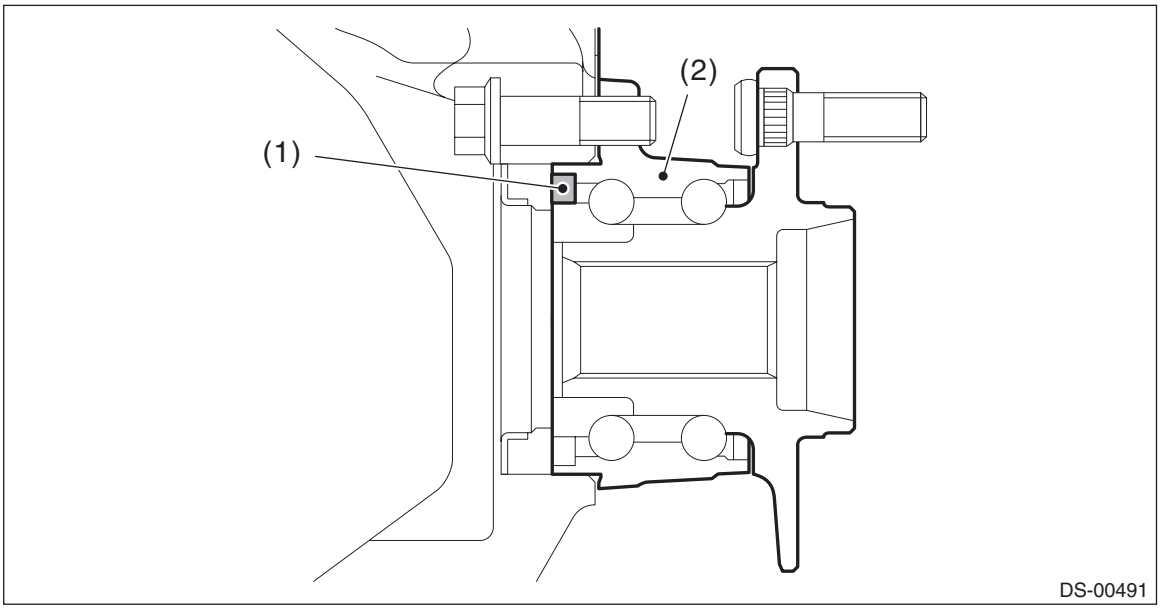


5) Remove the bolts, and remove the front ABS wheel speed sensor.

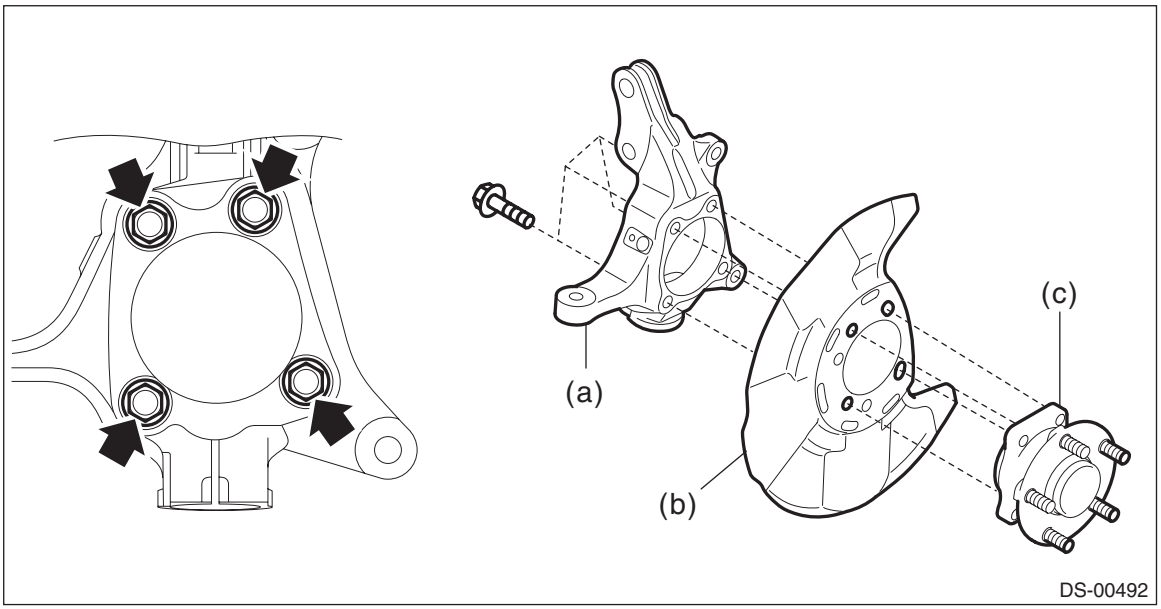


6) Remove the bolts from the housing assembly - front axle, and then remove the hub unit COMPL - front axle.

**CAUTION:**
- **Do not get closer the tool which charged magnetism to magnetic encoder.**
- **Be careful not to damage the magnetic encoder.**



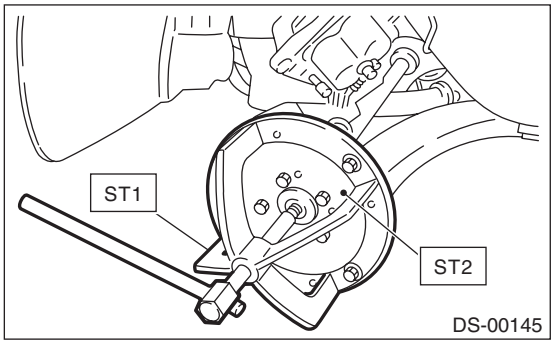
(1) Magnetic encoder (2) Hub unit COMPL - front axle



(a) Housing ASSY - front axle (b) Back plate - front brake (c) Hub unit COMPL - front axle

NOTE:
If it is hard to remove, use the ST.

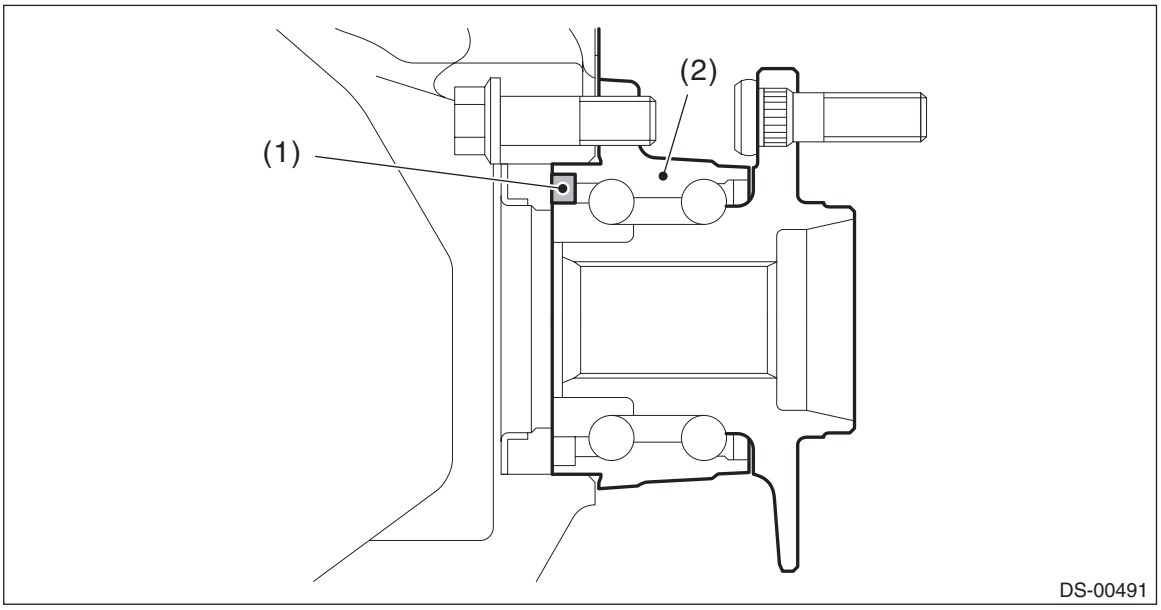
***Preparation tool:***
***ST1: AXLE SHAFT PULLER (926470000)***
***ST2: AXLE SHAFT PULLER PLATE (28099PA110)***



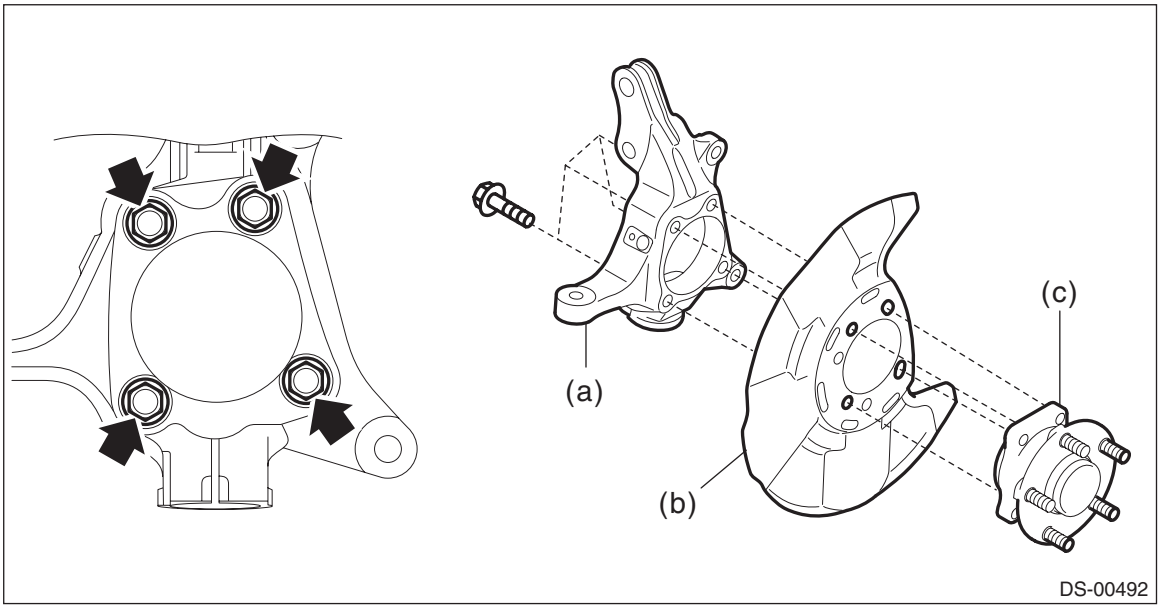
## B: INSTALLATION

1) Place the back plate - front brake between the housing assembly - front axle and the hub unit COMPL - front axle, and tighten the bolt.

**CAUTION:**
- **Do not get closer the tool which charged magnetism to magnetic encoder.**
- **Be careful not to damage the magnetic encoder.**



(1) Magnetic encoder (2) Hub unit COMPL - front axle



(a) Housing ASSY - front axle (b) Back plate - front brake (c) Hub unit COMPL - front axle

***Tightening torque:***
***65 N·m (6.63 kgf-m, 47.9 ft-lb)***

2) Install the front axle shaft assembly.

**CAUTION:**
- **Do not tap the axle shaft using a hammer when installing axle shaft assembly.**
- **Use new nut - axle.**

(1) Insert the axle shaft assembly into the hub spline, and pull in the axle shaft assembly into specified position.
(2) Temporarily tighten the nut - axle.

3) Install the disc rotor to the hub unit COMPL - front axle.
4) Install the caliper body assembly to the housing assembly - front axle.

***Tightening torque:***
***80 N·m (8.16 kgf-m, 59.0 ft-lb)***

5) Install the front ABS wheel speed sensor.

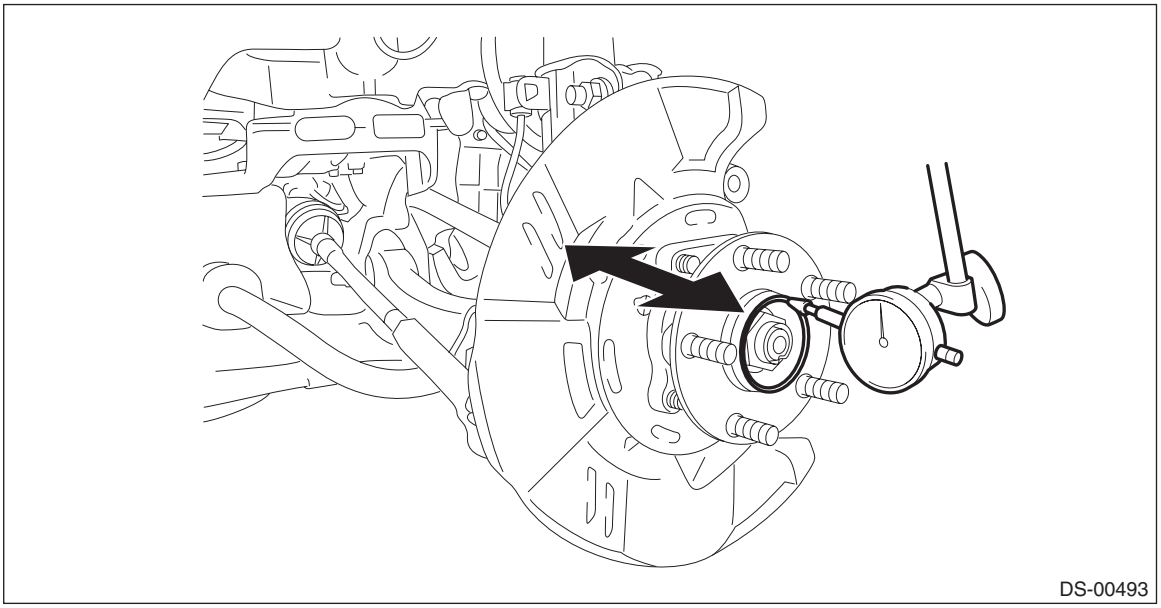
***Tightening torque:***
***7.5 N·m (0.76 kgf-m, 5.5 ft-lb)***

6) While depressing the brake pedal, tighten new nuts - axle to the specified torque.

**CAUTION:**
**Do not load the front axle before tightening the nut - axle. Doing so may damage the hub unit COMPL.**

***Tightening torque:***
***220 N·m (22.43 kgf-m, 162.3 ft-lb)***

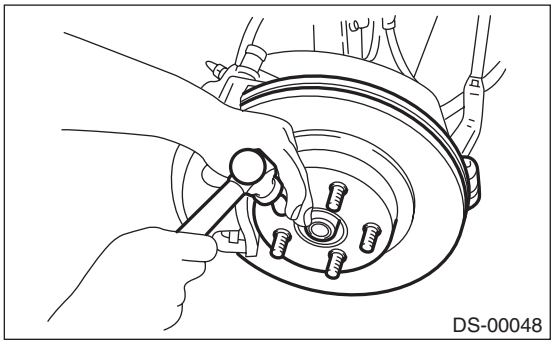
7) Inspect the lean of axis direction using a dial gauge. Replace the hub unit COMPL - front axle if the play exceeds the limit.



DS-00493

***Service limit:***
***Maximum: 0.05 mm (0.0020 in)***

8) After tightening the nut - axle, lock it securely.

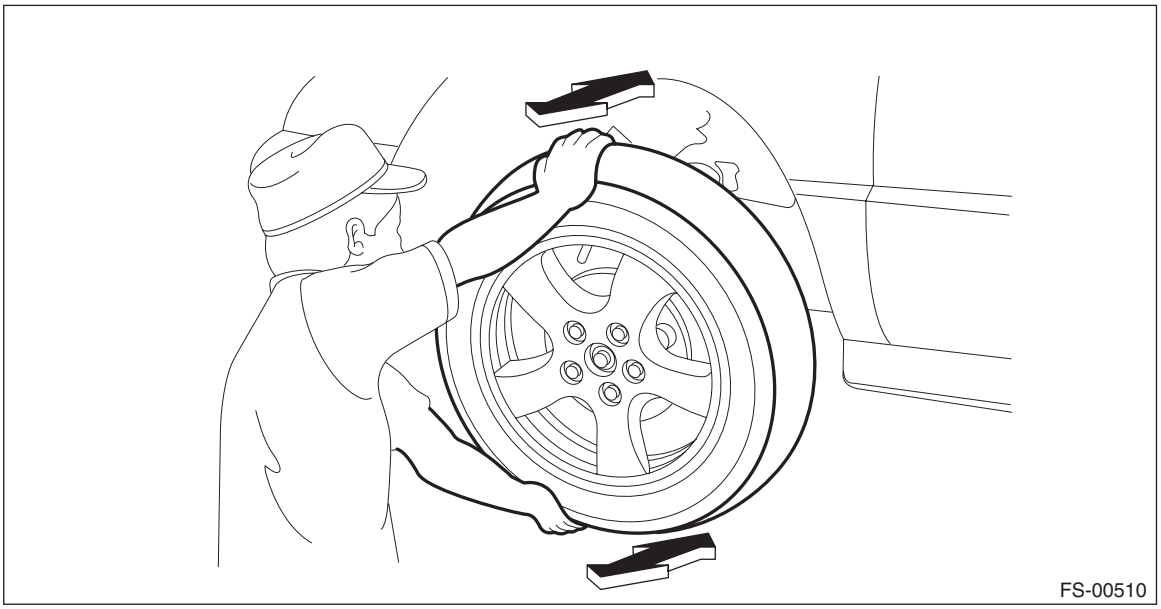


DS-00048

9) Install the front wheels, and perform the following inspections.

***Tightening torque:***
***120 N·m (12.24 kgf-m, 88.5 ft-lb)***

1. Check the wheels for smooth rotation.
2. Check that there is no play by moving the upper and lower portions of front tire in an axial direction with the brake pedal released.



- **Play exists** → Check the hub unit COMPL - front axle. <Ref. to DS-34, INSPECTION, Front Hub Unit Bearing.>

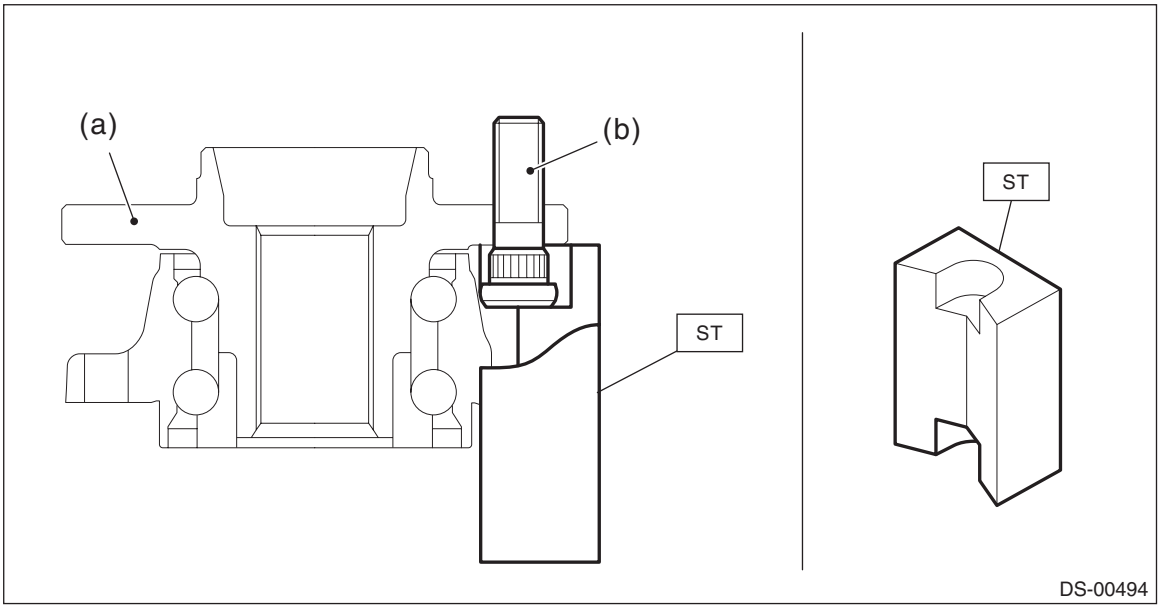
3. Check that there is no play by moving the upper and lower portions of front tire in an axial direction with the brake pedal depressed.
   - **Play exists** → Replace the ball joint assembly. <Ref. to FS-32, REMOVAL, Front Ball Joint.>

## C: DISASSEMBLY

Using the ST or a hydraulic press, push out the bolt - hub (b) from the hub unit COMPL - front axle (a).

**CAUTION:**
- **Be careful not to hammer the bolts - hub. This may deform the hub unit COMPL.**
- **Do not reuse the bolt - hub.**

***PREPARATION TOOL:***
***ST: HUB STAND (28399AG000)***



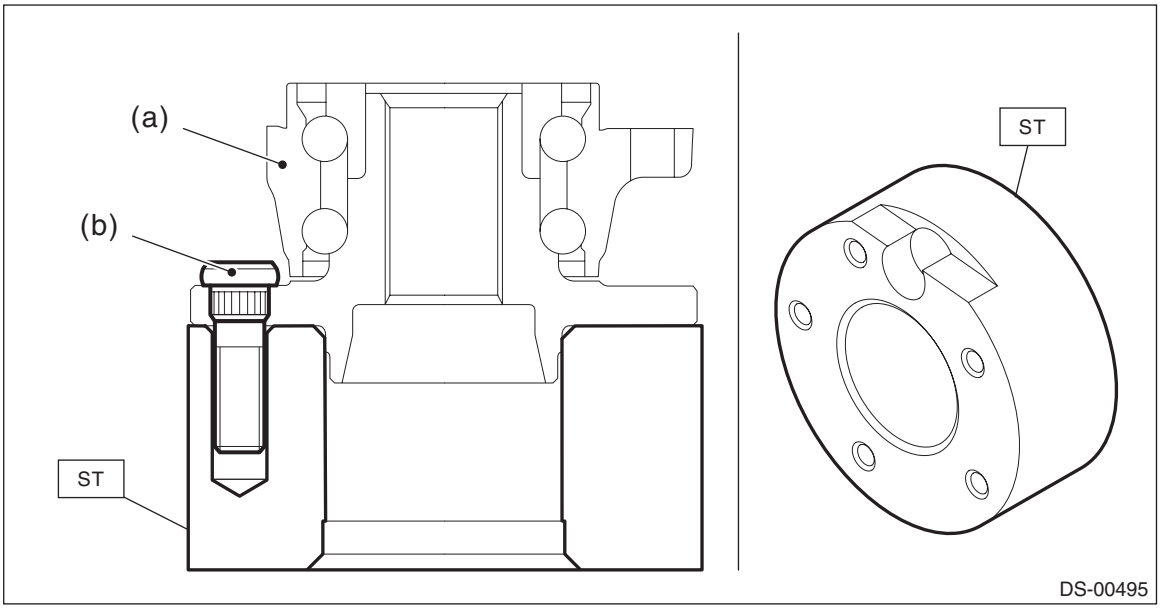
NOTE:
Since the hub unit COMPL can not be disassembled, only bolts - hub can be removed.

## D: ASSEMBLY

1) Install the hub unit COMPL to the ST securely.

***PREPARATION TOOL:***
***ST: HUB STAND (927080000)***

2) Using a press, press new bolts - hub (b) until their seating surfaces contact the hub unit COMPL (a).

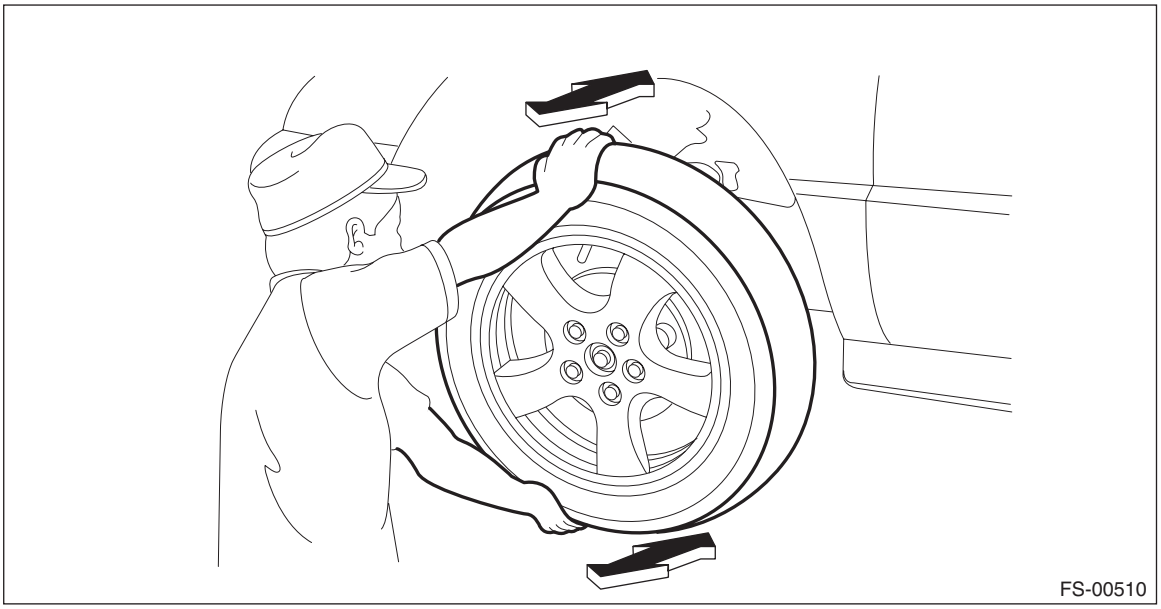


NOTE:
Use the 12 mm (0.47 in) dia. holes in the HUB STAND to prevent bolts from tilting.

## E: INSPECTION

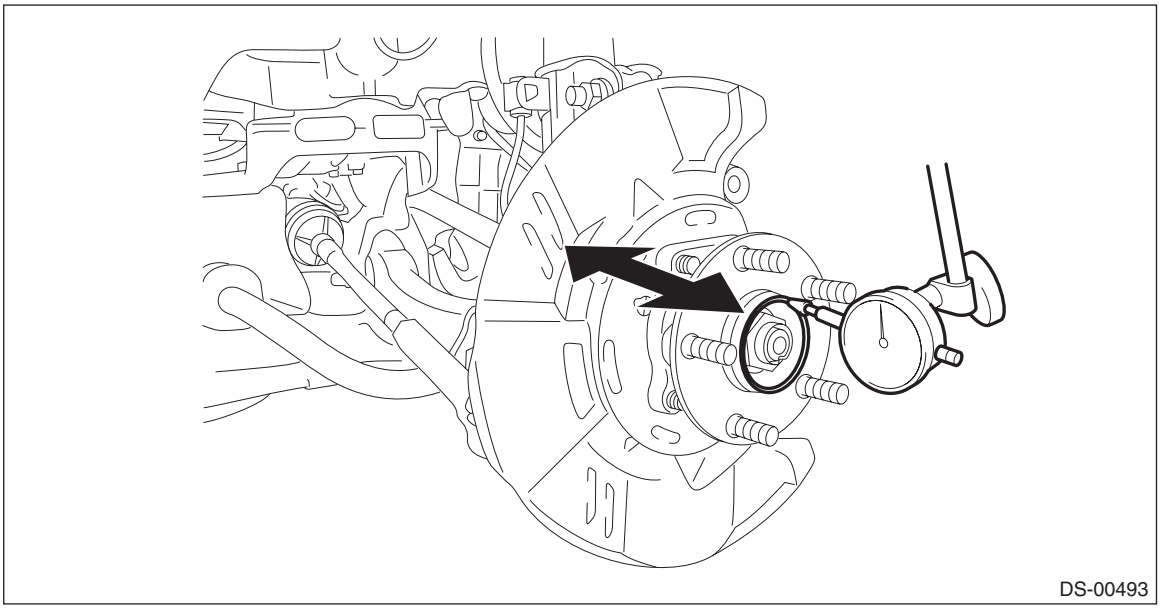
1) Moving the front tire up and down by hand, check there is no play in bearing, and check the wheel rotates smoothly.

**CAUTION:**
**If there is any fault in the bearing, replace the hub unit COMPL.**



2) Inspect the lean of axis direction using a dial gauge. Replace the hub unit COMPL if the play exceeds the limit.

***Service limit:***
***Maximum: 0.05 mm (0.0020 in)***

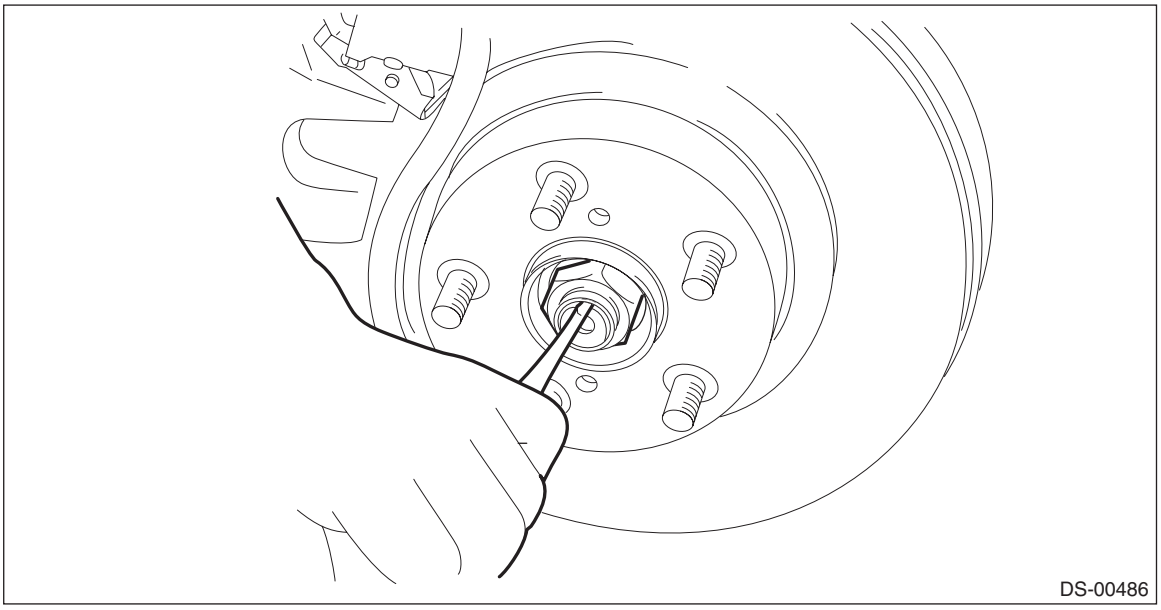


# 5. Rear Axle

## A: REMOVAL

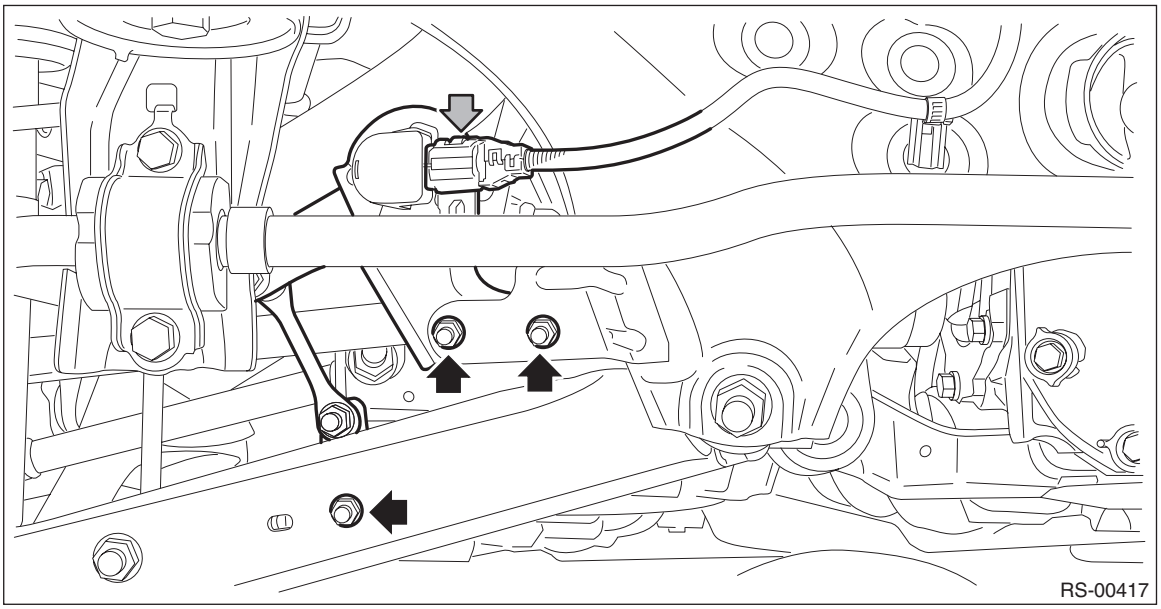
1) Disconnect the ground cable from battery.
2) Lift up the vehicle, and then remove the rear wheels.
3) Remove the nut - axle.

**CAUTION:**
**Do not loosen the nut - axle while the rear axle is loaded. Doing so may damage the hub unit COMPL.**
(1) Lift the crimped section of the nut - axle.
(2) Remove the nut - axle using a socket wrench while depressing the brake pedal.



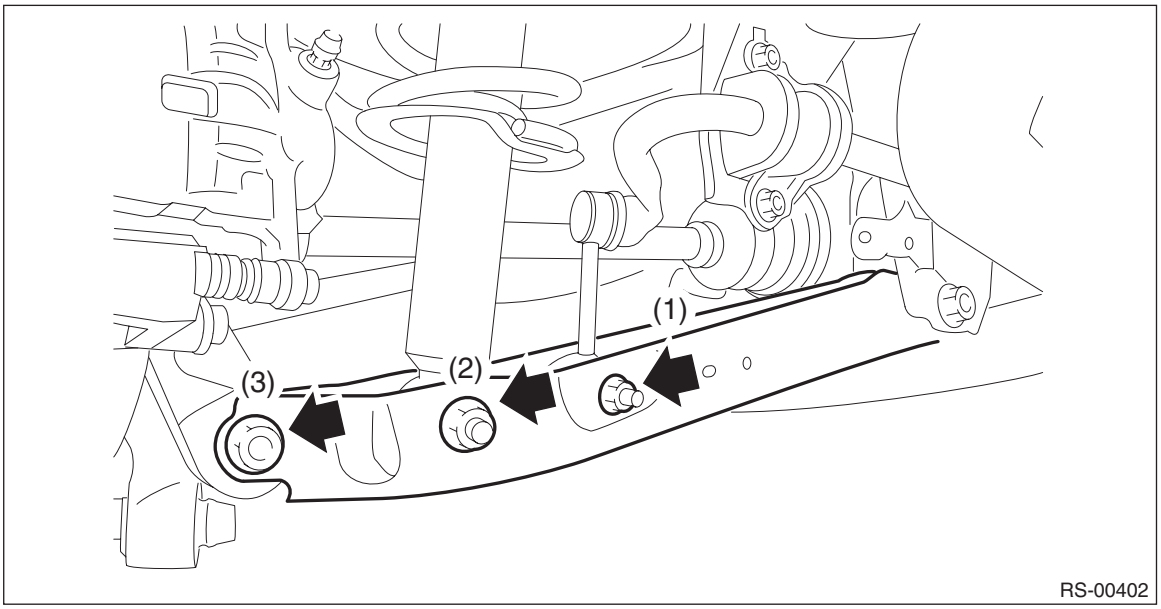
DS-00486

4) Disconnect the sensor assembly - headlight beam leveler. (Model with auto headlight beam leveler)
(1) Disconnect the connector of the sensor assembly - headlight beam leveler.
(2) Remove the bolts and nuts, and remove the sensor assembly - headlight beam leveler.



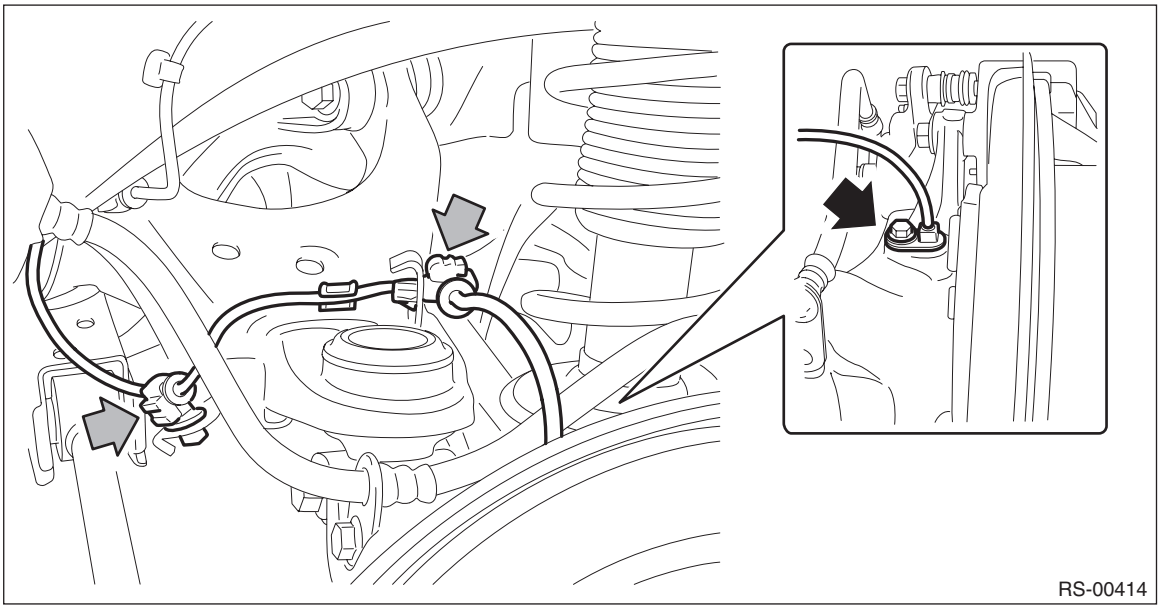
RS-00417

5) Remove the bolts and nuts, and lower the lateral link assembly - rear.
   (1) Remove the nut and disconnect the rear stabilizer link assembly. (model with rear stabilizer)
   (2) Remove the bolts at the bottom of rear strut assembly.
   (3) Disconnect the housing assembly - rear axle from the lateral link assembly - rear.

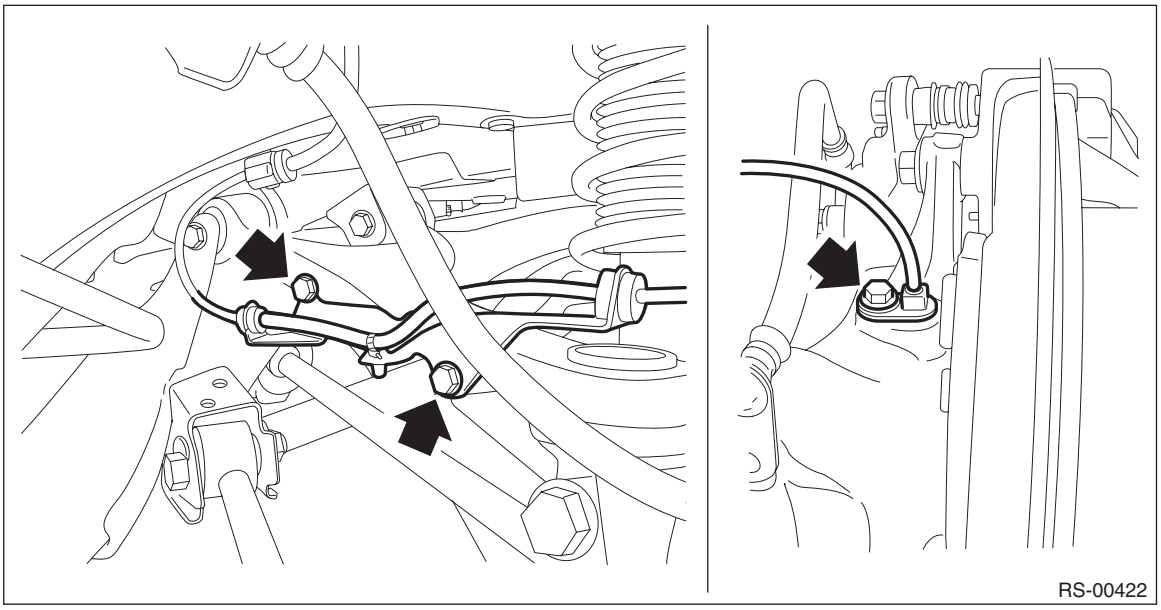


6) Remove the caliper body assembly from the housing assembly - rear axle.
   (1) Remove the bolts, and remove the brake hose bracket and ABS wheel speed sensor.
   (2) Remove the mounting bolts, and then remove the caliper body assembly.

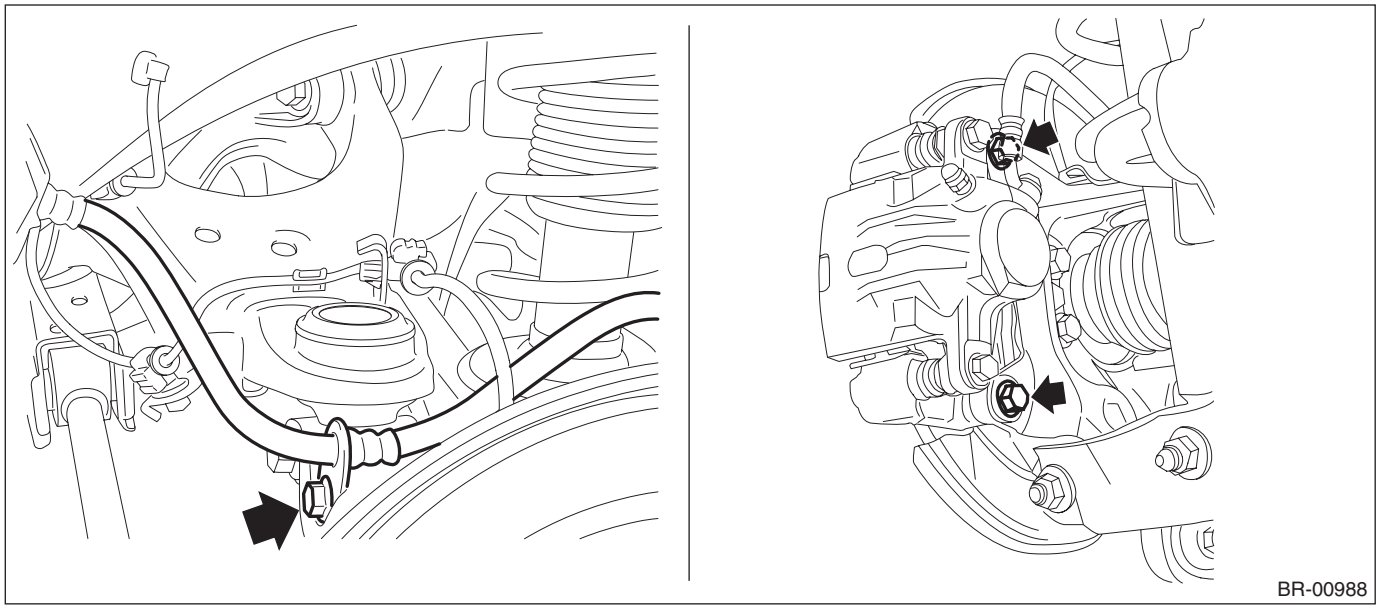
**CAUTION:**
- **Be careful not to damage the sensor.**
- **Do not apply excessive force to the sensor harness.**
  - Except for XV model: Remove the harness clamp clip.



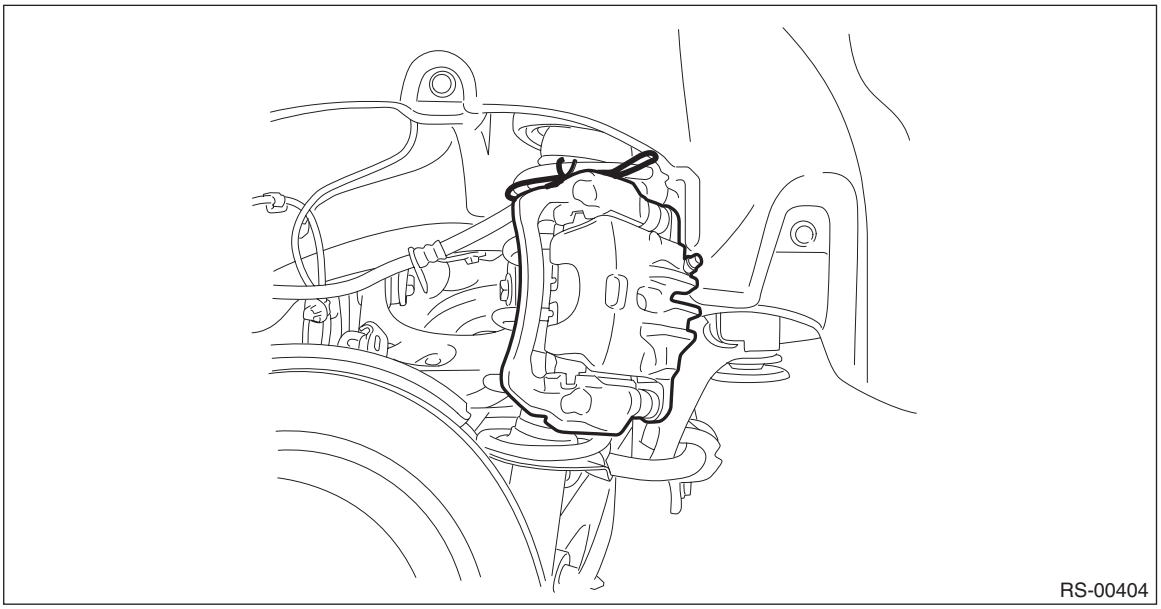
- XV model: Remove the bolts and remove the sensor bracket.



7) Remove the caliper body assembly from the housing assembly - rear axle.
(1) Remove the bolts and then remove the brake hose bracket and caliper body assembly.

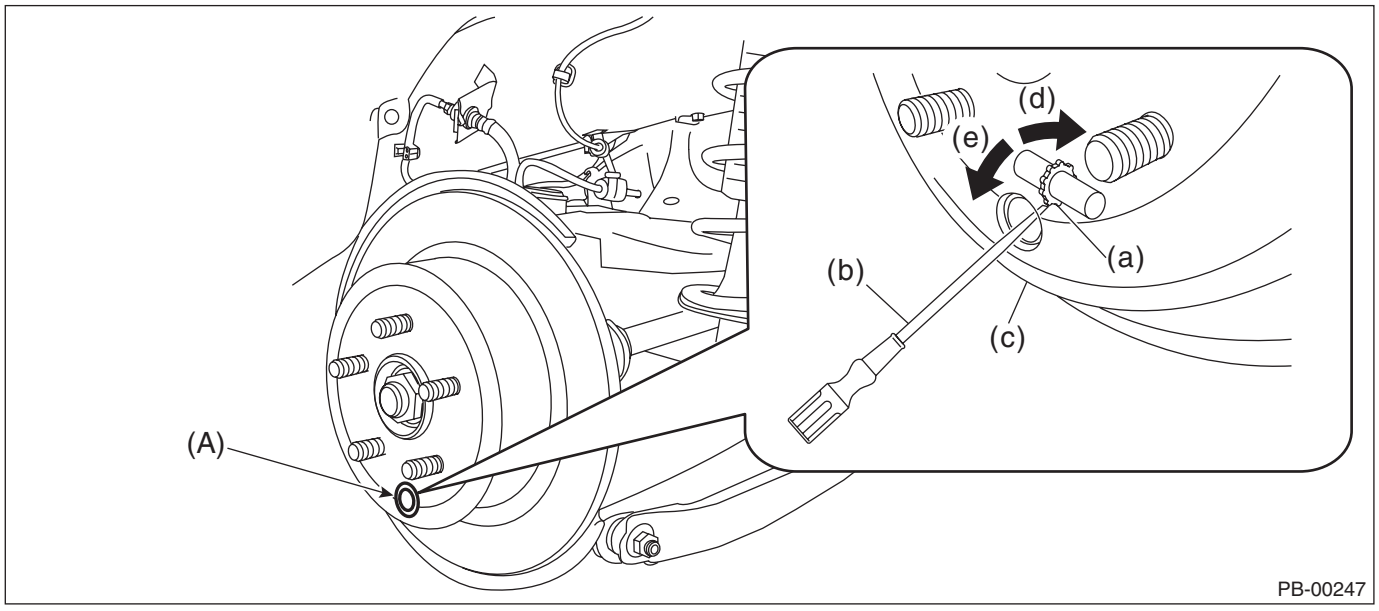


(2) Prepare wiring harnesses etc. to be discarded, and suspend the caliper body assembly from the strut assembly.



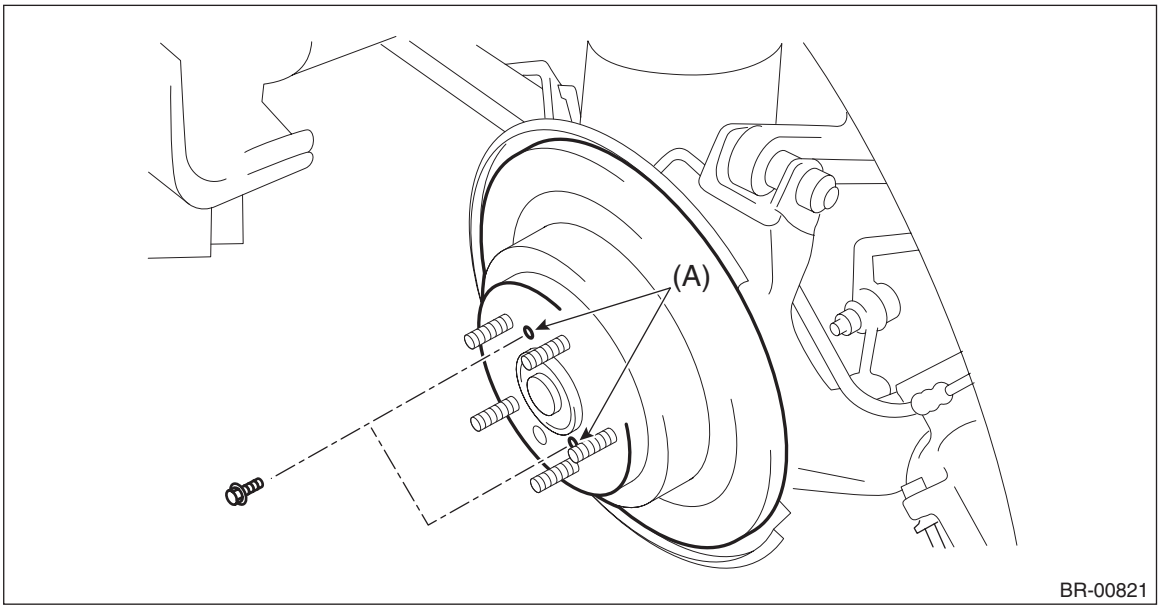
8) Remove the rear disc rotor.

NOTE:
If it is difficult to remove the disc rotor, perform the following two methods in order.
1. Remove the adjusting hole cover (A) for the disc rotor, and rotate the adjuster assembly - rear brake using a flat tip screwdriver until the brake shoe moves far enough from the disc rotor.



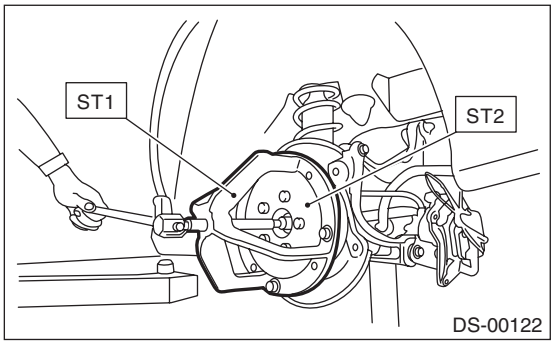
| | | | | | |
|---|---|---|---|---|---|
| (a) | Adjuster ASSY - rear brake | (c) | Disc rotor | (e) | Shorten the adjuster ASSY - rear brake |
| (b) | Flat tip screwdriver | (d) | Extend the adjuster ASSY - rear brake | | |

2. When the disc rotor is difficult to be removed from the hub unit COMPL - rear axle, screw in 8 mm (0.31 in) bolt to the threaded part of the disc rotor (A), and remove the disc rotor.



9) Remove the rear axle shaft assembly from the hub unit COMPL - rear axle.

***Preparation tool:***
***ST1: AXLE SHAFT PULLER (926470000)***
***ST2: AXLE SHAFT PULLER PLATE (28099PA110)***

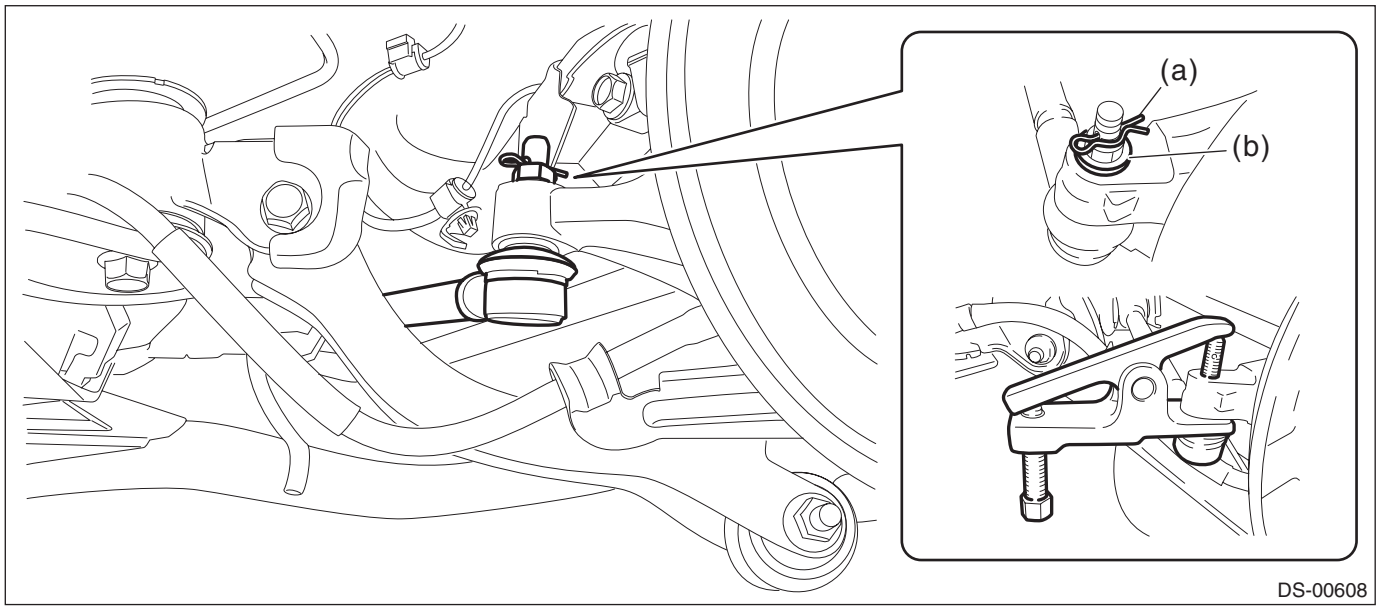


NOTE:
If it is hard to remove, use the ST.

10) Remove the lateral link assembly - front.
(1) Remove the snap pin (a) and nut (b).
(2) Remove the ball joint from the housing assembly - rear axle.

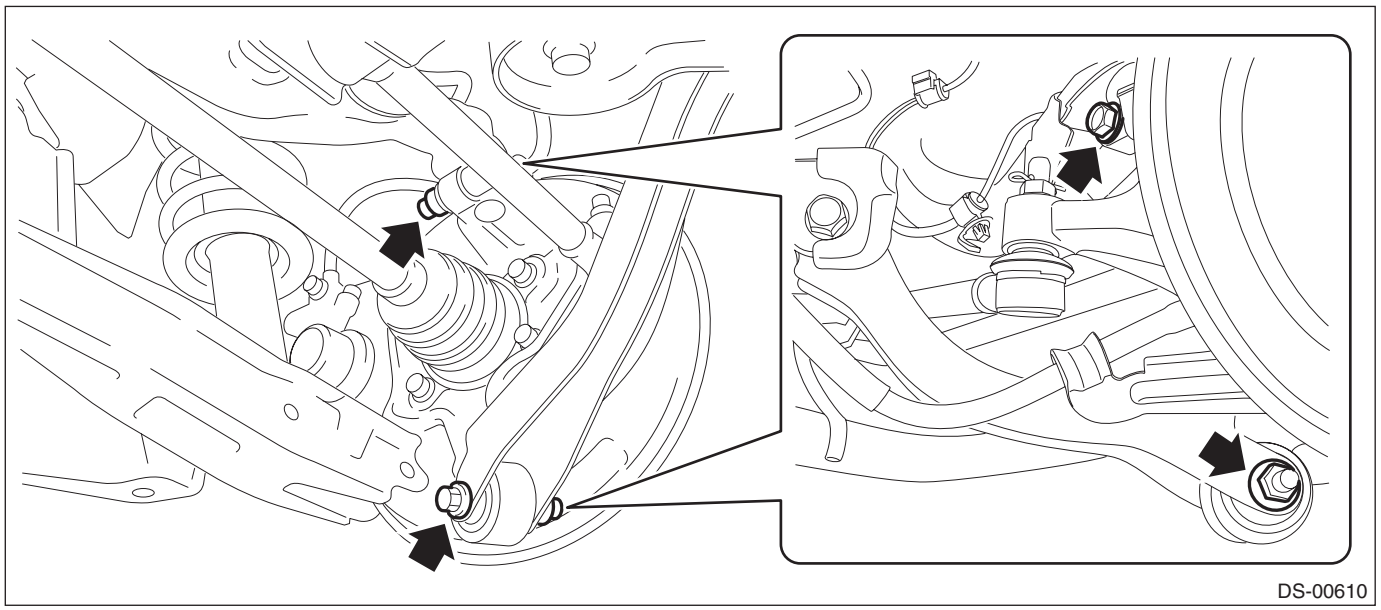
**CAUTION:**
**Be careful not to damage the boot of the joint.**

***Preparation tool:***
***Tie-rod ball joint puller***



11) Remove the housing assembly - rear axle.
(1) Remove the bolts for the upper arm, the trailing link, and the lateral link assembly - rear, and then separate the housing assembly - rear axle.

**CAUTION:**
**Be careful not to damage the boot of the joint.**



(2) Remove the housing assembly - rear axle.

**CAUTION:**
- **Be careful of the weight of the housing assembly - rear axle.**
- **Be careful not to damage the spline portion of the axle shaft.**

12) Refer to “Rear Hub Unit Bearing” for removal of the hub unit COMPL - rear axle. <Ref. to DS-46, REMOVAL, Rear Hub Unit Bearing.>

## B: INSTALLATION

1) Temporarily tighten the housing assembly - rear axle to the upper arm assembly.
2) Install the rear axle shaft assembly.

**CAUTION:**
- **Do not tap the axle shaft using a hammer when installing axle shaft assembly.**
- **Use new nut - axle.**

(1) Insert the axle shaft assembly into the hub spline, and pull in the axle shaft assembly into specified position.
(2) Temporarily tighten the nut - axle.

3) Tighten the rear strut assembly, rear stabilizer link assembly and other links to the specified torque.

***Tightening torque:***
***Rear suspension: <Ref. to RS-3, REAR SUSPENSION, COMPONENT, General Description.>***
***Rear strut: <Ref. to RS-5, REAR STRUT, COMPONENT, General Description.>***

4) Install the rear disc rotor.
5) Install the caliper body assembly.

***Tightening torque:***
***66 N·m (6.73 kgf-m, 48.7 ft-lb)***

6) Install the brake hose bracket and rear ABS wheel speed sensor.

***Tightening torque:***
***Brake hose bracket: 33 N·m (3.36 kgf-m, 24.3 ft-lb)***
***Rear ABS wheel speed sensor: 7.5 N·m (0.76 kgf-m, 5.5 ft-lb)***

7) Install the sensor assembly - headlight beam leveler. (Model with auto headlight beam leveler)

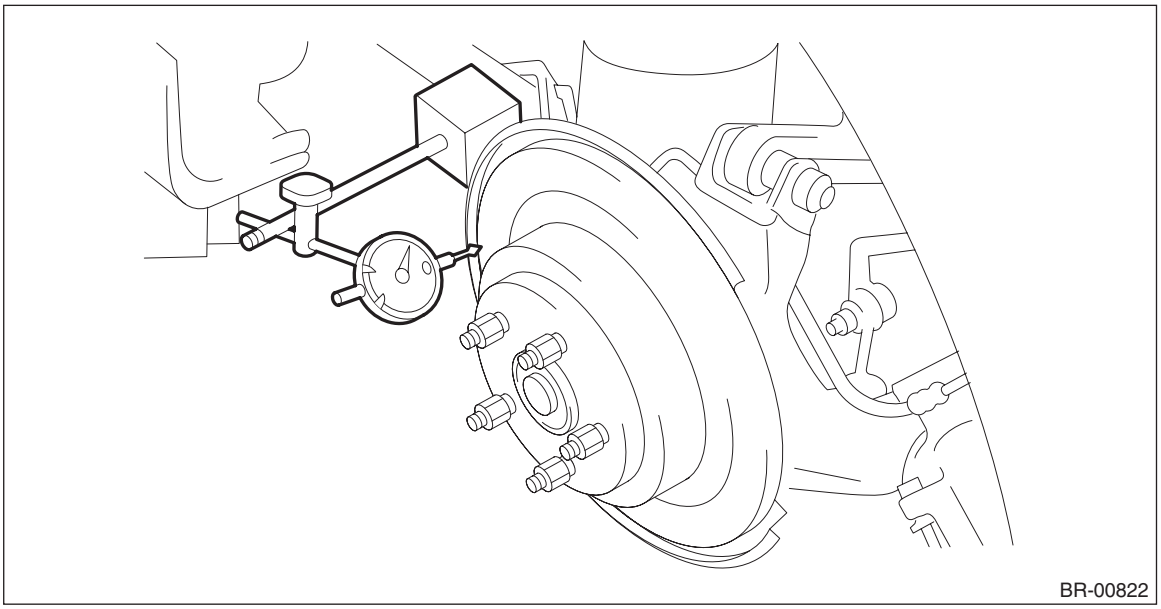
***Tightening torque:***
***7.5 N·m (0.76 kgf-m, 5.5 ft-lb)***

8) While depressing the brake pedal, tighten new nuts - axle to the specified torque.

**CAUTION:**
**Do not load the rear axle before tightening the nut - axle. Doing so may damage the hub unit COMPL.**

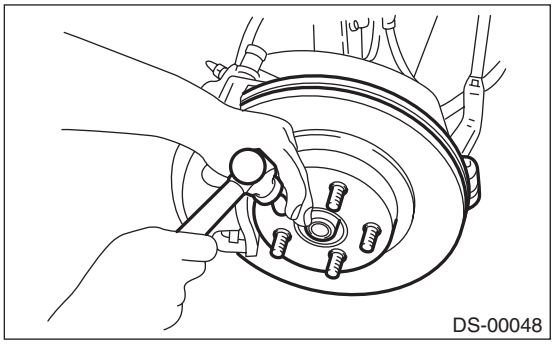
***Tightening torque:***
***190 N·m (19.37 kgf-m, 140.1 ft-lb)***

9) Inspect the lean of axis direction using a dial gauge. Replace the hub unit COMPL - rear axle if the play exceeds the limit.



***Service limit:***
***Maximum: 0.05 mm (0.0020 in)***

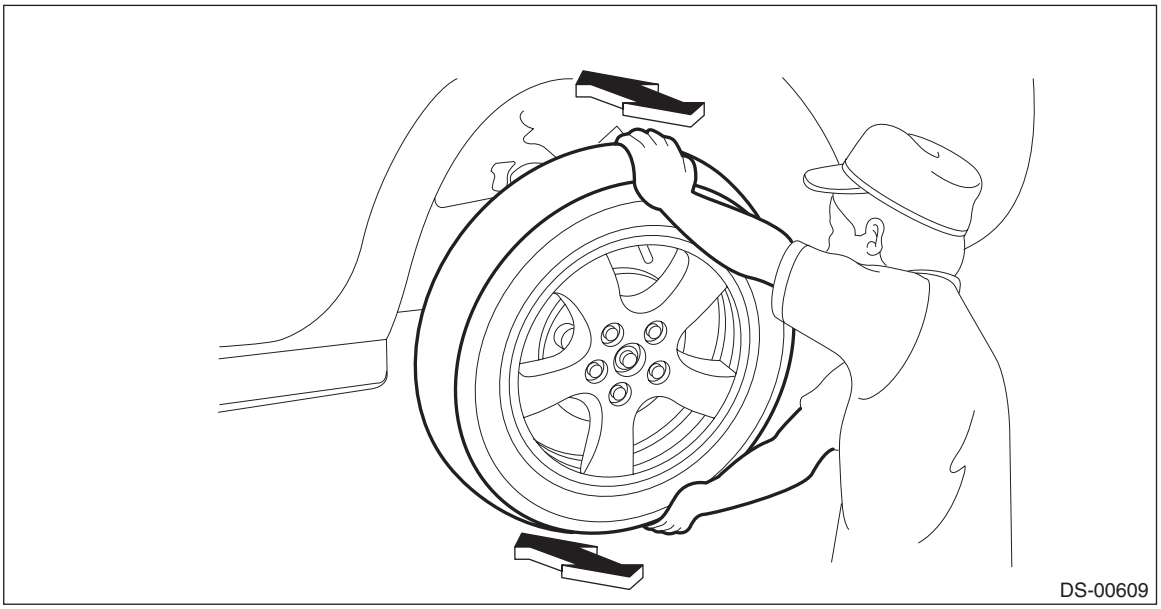
10) After tightening the nut - axle, lock it securely.



11) Install the rear wheels, and perform the following inspections.

***Tightening torque:***
***120 N·m (12.24 kgf-m, 88.5 ft-lb)***

1. Check the wheels for smooth rotation.
2. Check that there is no play by moving the upper and lower portions of rear tire in an axial direction with the brake pedal released.



- **Play exists** → Check the hub unit COMPL - rear axle. <Ref. to DS-56, INSPECTION, Rear Hub Unit Bearing.>

12) Inspect the wheel alignment and adjust if necessary.
- Inspection: <Ref. to FS-7, INSPECTION, Wheel Alignment.>
- Adjustment: <Ref. to FS-12, ADJUSTMENT, Wheel Alignment.>

13) Perform reinitialization of the auto headlight beam leveler system. (Model with auto headlight beam leveler) <Ref. to LI-17, PROCEDURE, Auto Headlight Beam Leveler System.>

# C: DISASSEMBLY

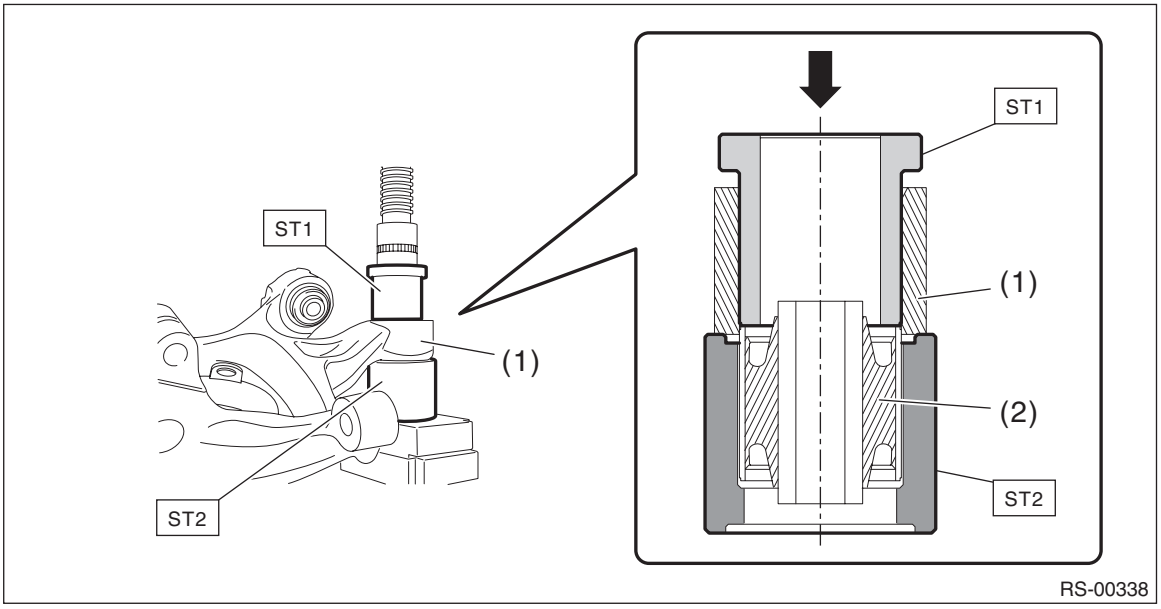
## 1. BUSHING - REAR AXLE HOUSING

Do not remove the housing assembly - rear axle because the bushing - rear axle housing cannot be replaced. If it is removed, replace the housing assembly - rear axle.

## 2. BUSHING - TRAILING LINK

1) Remove the housing assembly - rear axle. <Ref. to DS-35, REMOVAL, Rear Axle.>
2) Using the ST and a hydraulic press, push out the bushing.

***Preparation tool:***
***ST1: BUSHING REMOVER (20099FG000)***
***ST2: INSTALLER & REMOVER (BASE) (20099PA010)***



(1) Housing ASSY - rear axle
(2) Bushing - trailing link

# D: ASSEMBLY

## 1. BUSHING - REAR AXLE HOUSING

Do not remove the housing assembly - rear axle because the bushing - rear axle housing cannot be replaced. If it is removed, replace the housing assembly - rear axle.

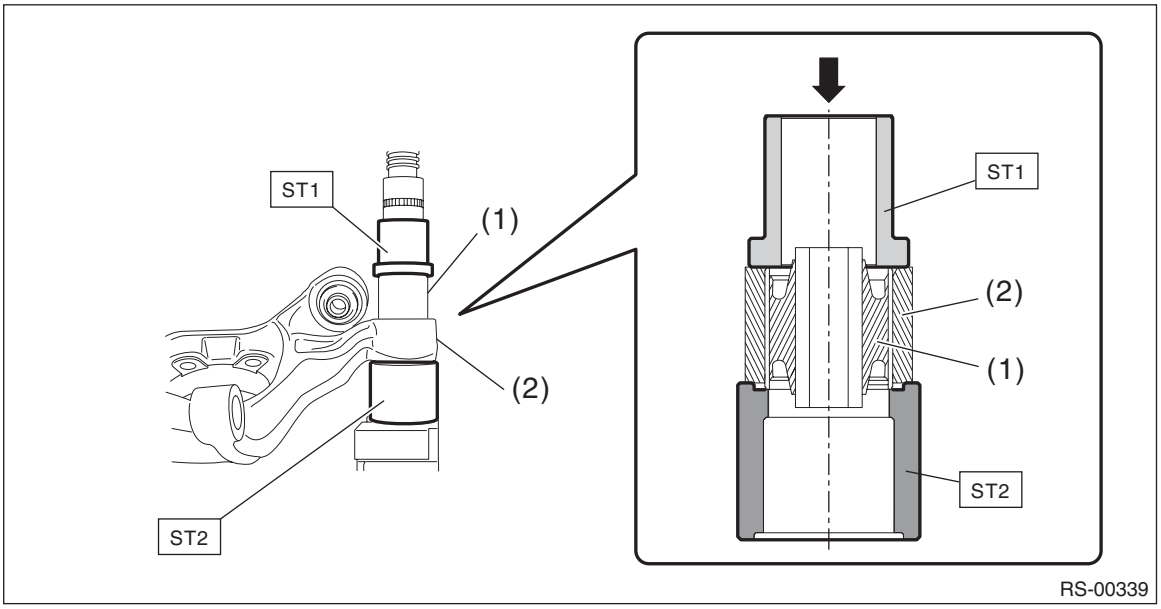
## 2. BUSHING - TRAILING LINK

1) Before assembly, inspect the following items and replace any faulty part with a new one.
- Perform visual check for damage or bend on the trailing link.
- Visually check the bushing for abnormal cracks, fatigue or damage.

2) Press-fit the bushing using ST and the hydraulic press.

**CAUTION:**
**Make sure to press the bushing straight in.**

***Preparation tool:***
***ST1: BUSHING REMOVER (20099FG000)***
***ST2: INSTALLER & REMOVER (BASE) (20099PA010)***



(1) Bushing
(2) Housing ASSY - rear axle

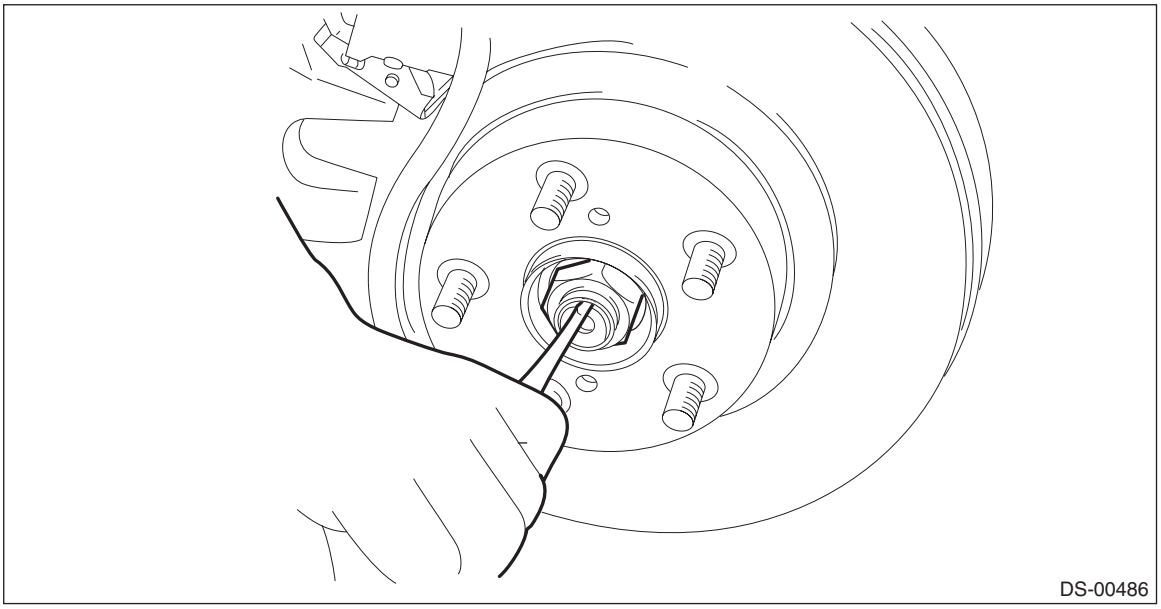
# 6. Rear Hub Unit Bearing

## A: REMOVAL

1) Lift up the vehicle, and then remove the rear wheels.
2) Remove the nut - axle.

**CAUTION:**
**Do not loosen the nut - axle while the rear axle is loaded. Doing so may damage the hub unit COMPL.**

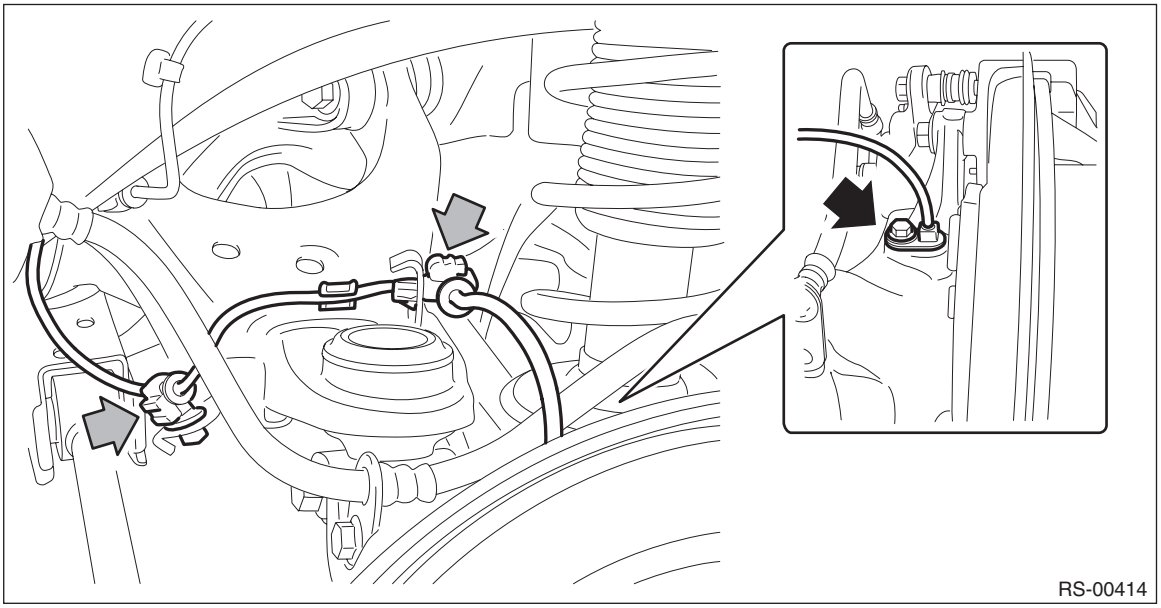
(1) Lift the crimped section of the nut - axle.
(2) Remove the nut - axle using a socket wrench while depressing the brake pedal.



DS-00486

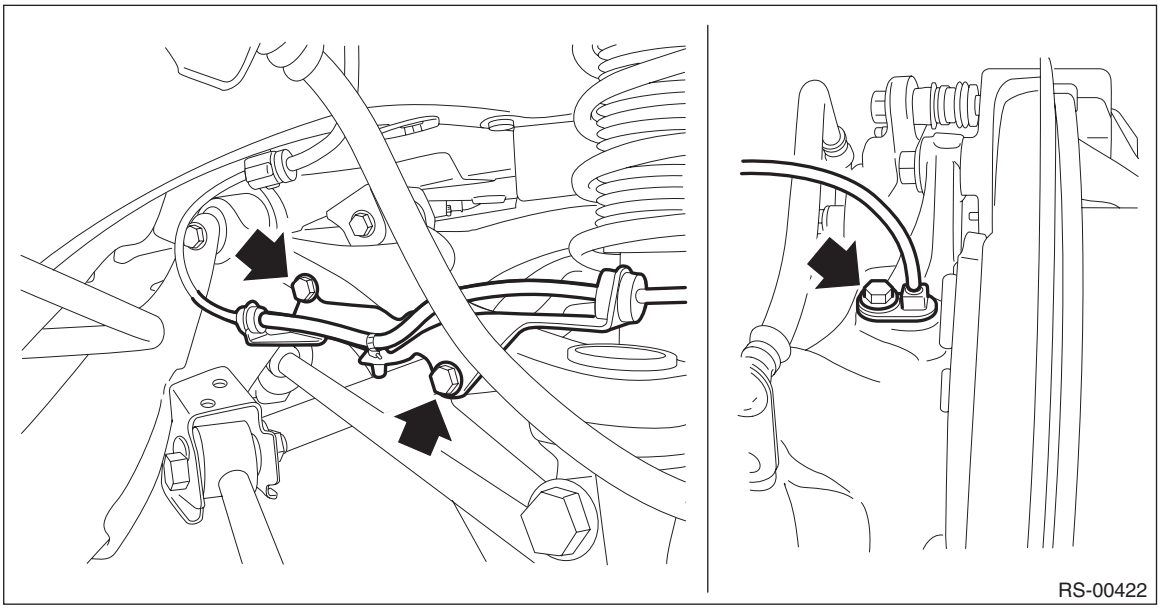
3) Remove the rear ABS wheel speed sensor from the rear axle housing.
(1) Remove the bolts, and remove the rear ABS wheel speed sensor.
(2) Remove the rear ABS wheel speed sensor harness from the upper arm.

**CAUTION:**
- **Be careful not to damage the sensor.**
- **Do not apply excessive force to the sensor harness.**
  - Except for XV model: Remove the harness clamp clip.

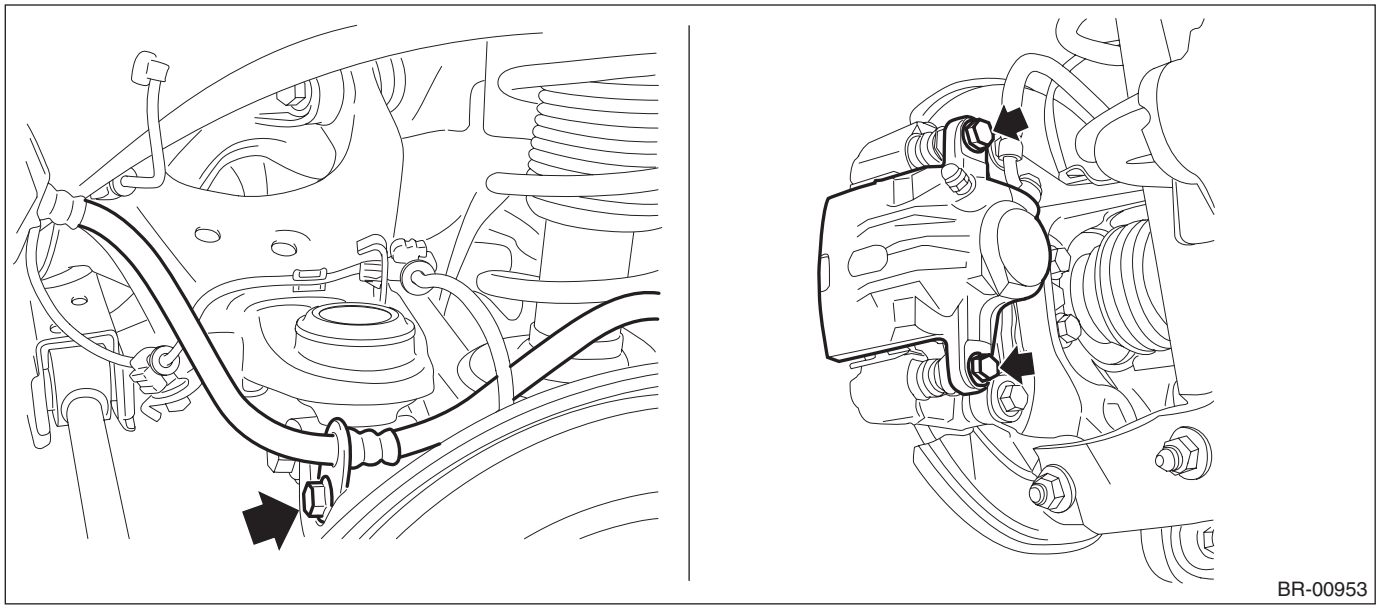


RS-00414

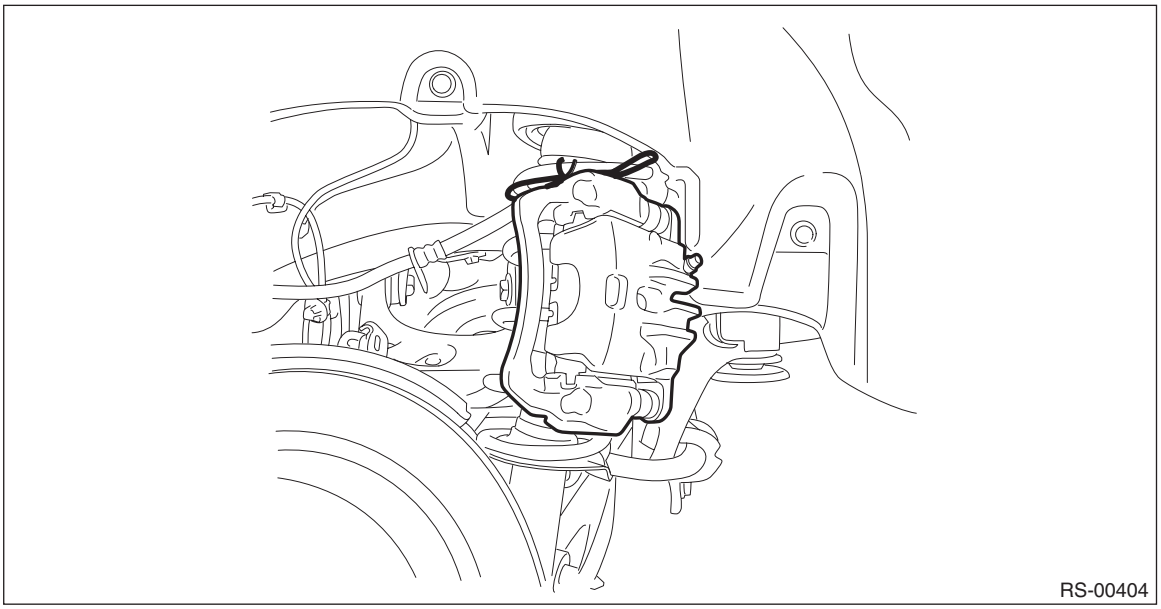
- XV model: Remove the bolts and remove the sensor bracket.



4) Remove the caliper body assembly from the housing assembly - rear axle.
   (1) Remove the bolts and then remove the brake hose bracket and caliper body assembly.

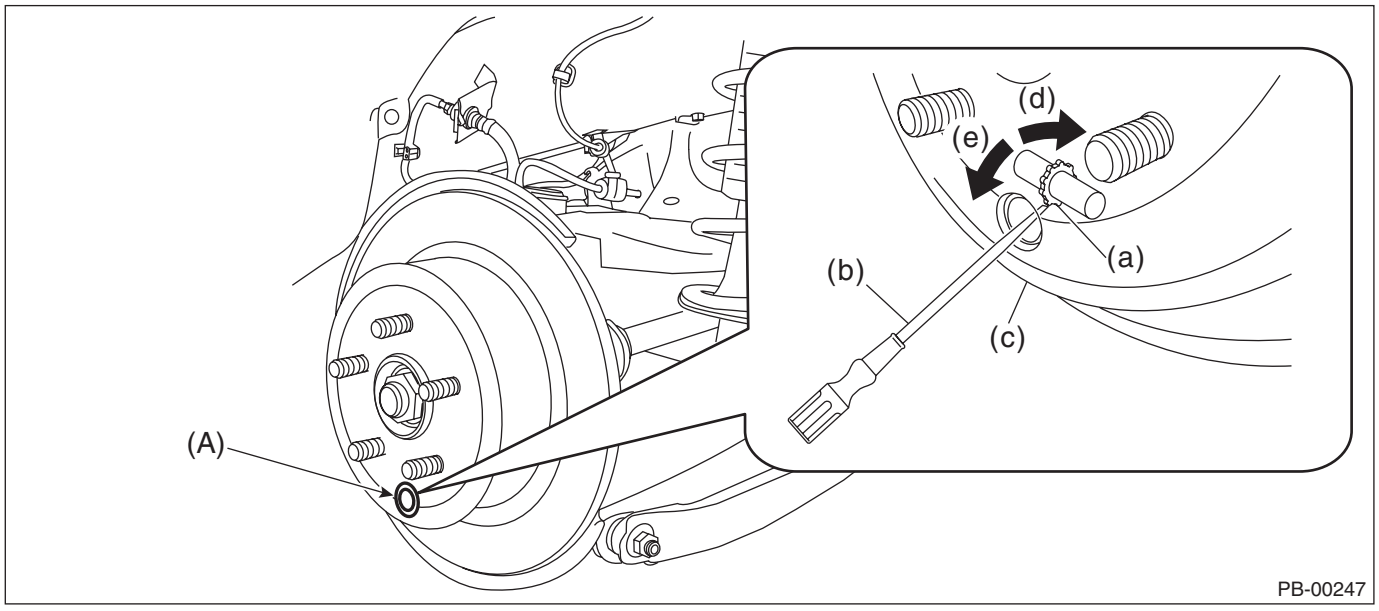


(2) Prepare wiring harnesses etc. to be discarded, and suspend the caliper body assembly from the strut assembly.



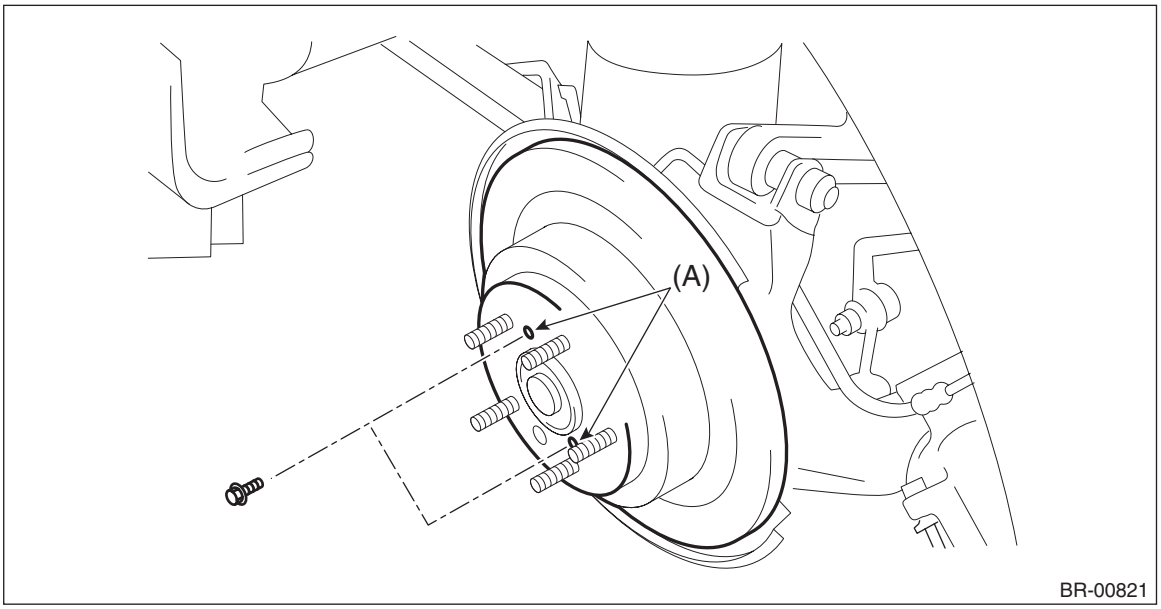
5) Remove the rear disc rotor.

NOTE:
If it is difficult to remove the disc rotor, perform the following two methods in order.
1. Remove the adjusting hole cover (A) for the disc rotor, and rotate the adjuster assembly - rear brake using a flat tip screwdriver until the brake shoe moves far enough from the disc rotor.



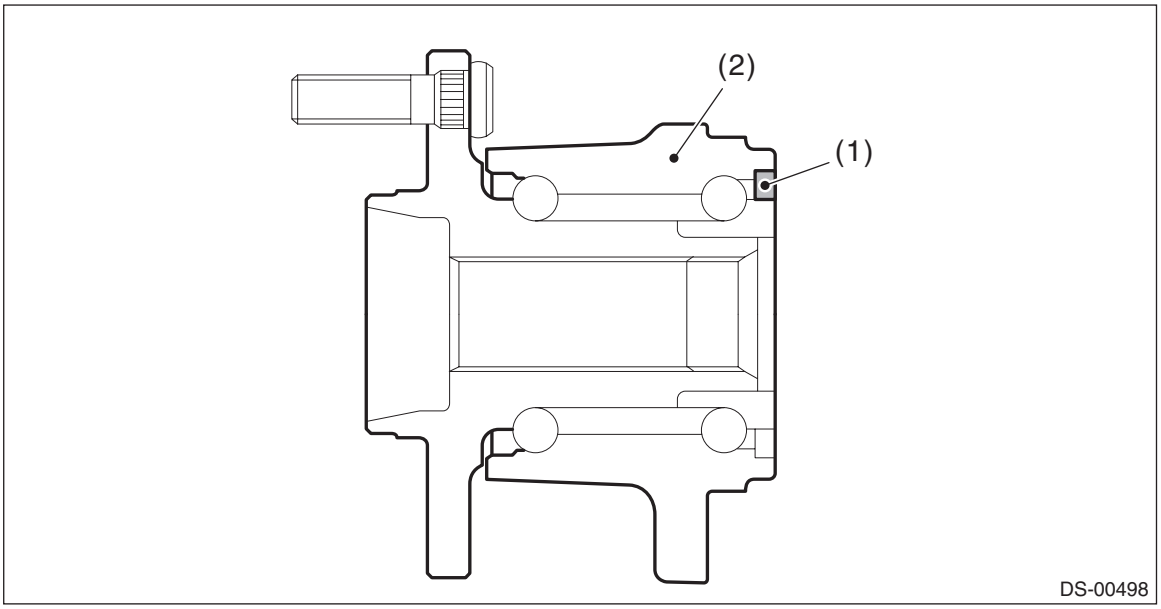
| | | | | | |
|---|---|---|---|---|---|
| (a) | Adjuster ASSY - rear brake | (c) | Disc rotor | (e) | Shorten the adjuster ASSY - rear brake |
| (b) | Flat tip screwdriver | (d) | Extend the adjuster ASSY - rear brake | | |

2. When the disc rotor is difficult to be removed from the hub unit COMPL - rear axle, screw in 8 mm (0.31 in) bolt to the threaded part of the disc rotor (A), and remove the disc rotor.

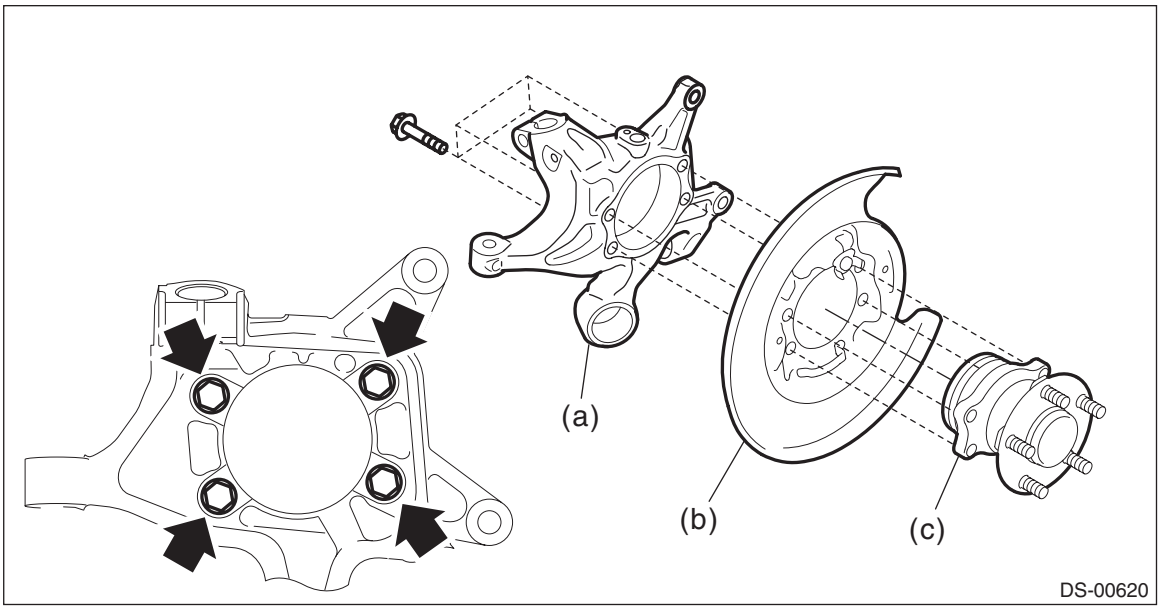


6) Remove the bolts from the housing assembly - rear axle, and then remove the hub unit COMPL - rear axle.

**CAUTION:**
- **Be careful not to damage the magnetic encoder.**
- **Do not get closer the tool which charged magnetism to magnetic encoder.**



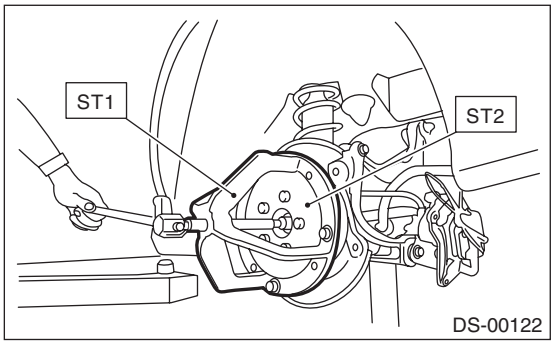
(1) Magnetic encoder (2) Hub unit COMPL - rear axle



(a) Housing ASSY - rear axle (b) Back plate - rear brake (c) Hub unit COMPL - rear axle

NOTE:
If it is hard to remove, use the ST.

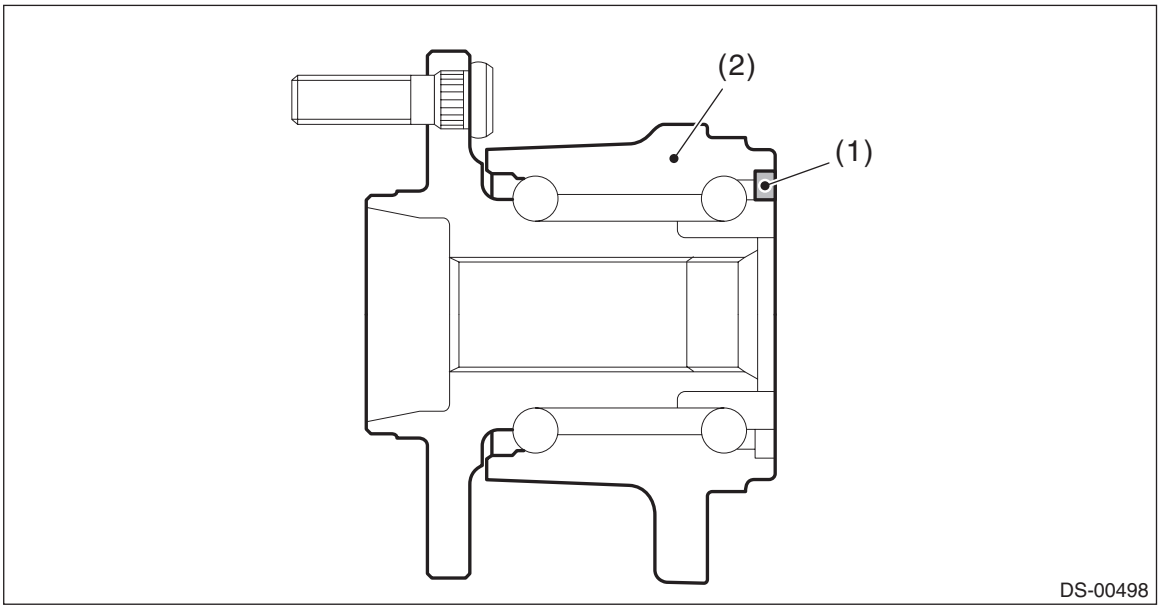
***Preparation tool:***
***ST1: AXLE SHAFT PULLER (926470000)***
***ST2: AXLE SHAFT PULLER PLATE (28099PA110)***



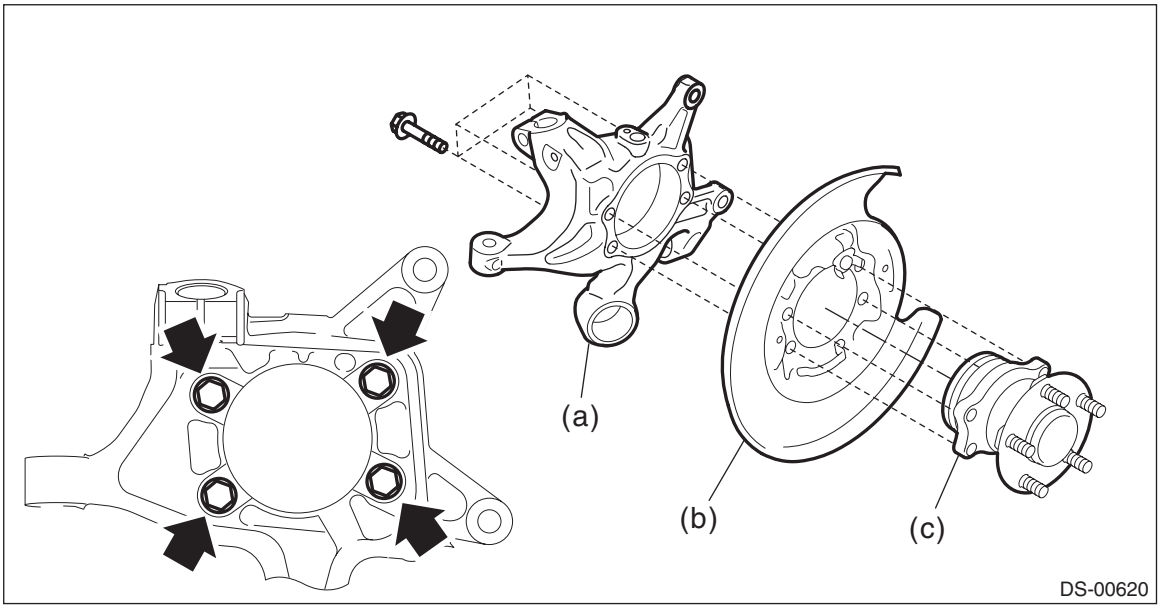
## B: INSTALLATION

1) Place the back plate - rear brake between the housing assembly - rear axle and the hub unit COMPL - rear axle, and tighten the bolt.

**CAUTION:**
- **Be careful not to damage the magnetic encoder.**
- **Do not get closer the tool which charged magnetism to magnetic encoder.**



(1) Magnetic encoder (2) Hub unit COMPL - rear axle



(a) Housing ASSY - rear axle (b) Back plate - rear brake (c) Hub unit COMPL - rear axle

***Tightening torque:***
***65 N·m (6.63 kgf-m, 47.9 ft-lb)***

2) Install the rear axle shaft assembly.

**CAUTION:**
- **Do not tap the axle shaft using a hammer when installing axle shaft assembly.**
- **Use new nut - axle.**
  (1) Insert the axle shaft assembly into the hub spline, and pull in the axle shaft assembly into specified position.
  (2) Temporarily tighten the nut - axle.

3) Install the disc rotor to the hub unit COMPL - rear axle.
4) Install the caliper body assembly to the housing assembly - rear axle.

***Tightening torque:***
***66 N·m (6.73 kgf-m, 48.7 ft-lb)***

5) Install the rear ABS wheel speed sensor.

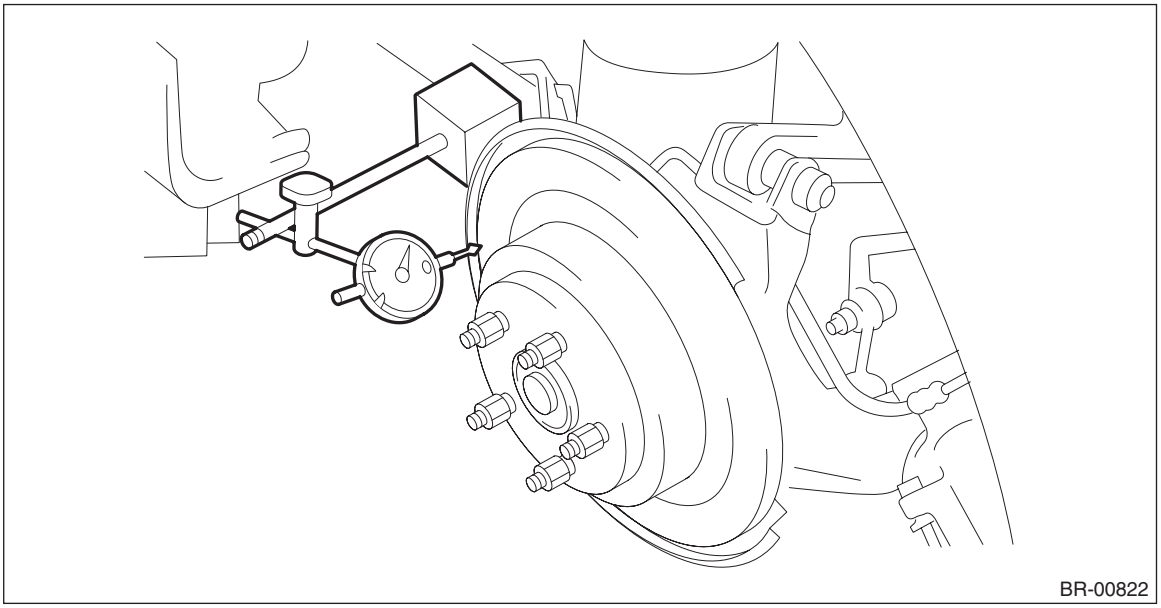
***Tightening torque:***
***7.5 N·m (0.76 kgf-m, 5.5 ft-lb)***

6) While depressing the brake pedal, tighten new nuts - axle to the specified torque.

**CAUTION:**
**Do not load the rear axle before tightening the nut - axle. Doing so may damage the hub unit COMPL.**

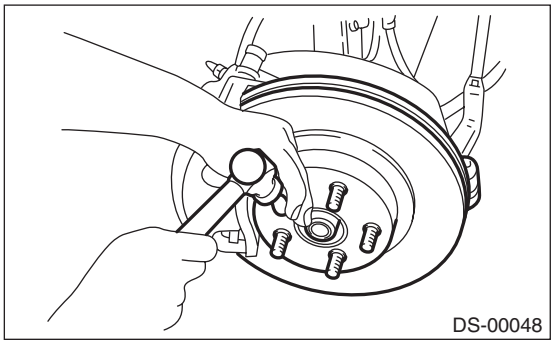
***Tightening torque:***
***190 N·m (19.37 kgf-m, 140.1 ft-lb)***

7) Inspect the lean of axis direction using a dial gauge. Replace the hub unit COMPL - rear axle if the play exceeds the limit.



***Service limit:***
***Maximum: 0.05 mm (0.0020 in)***

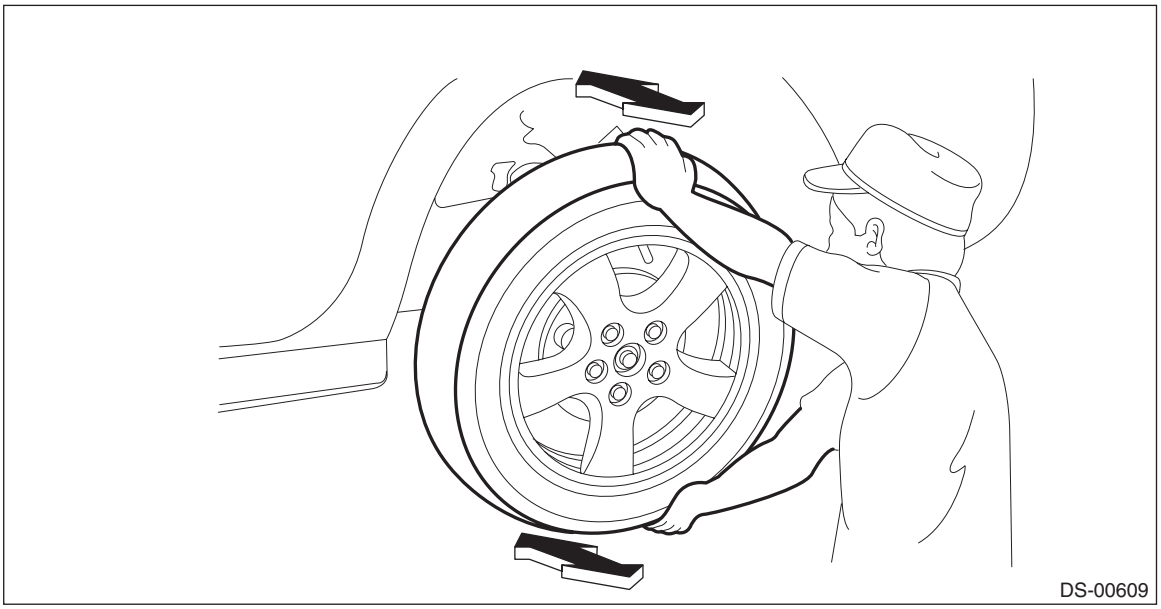
8) After tightening the nut - axle, lock it securely.



9) Install the rear wheels, and perform the following inspections.

***Tightening torque:***
***120 N·m (12.24 kgf-m, 88.5 ft-lb)***

1. Check the wheels for smooth rotation.
2. Check that there is no play by moving the upper and lower portions of rear tire in an axial direction with the brake pedal released.



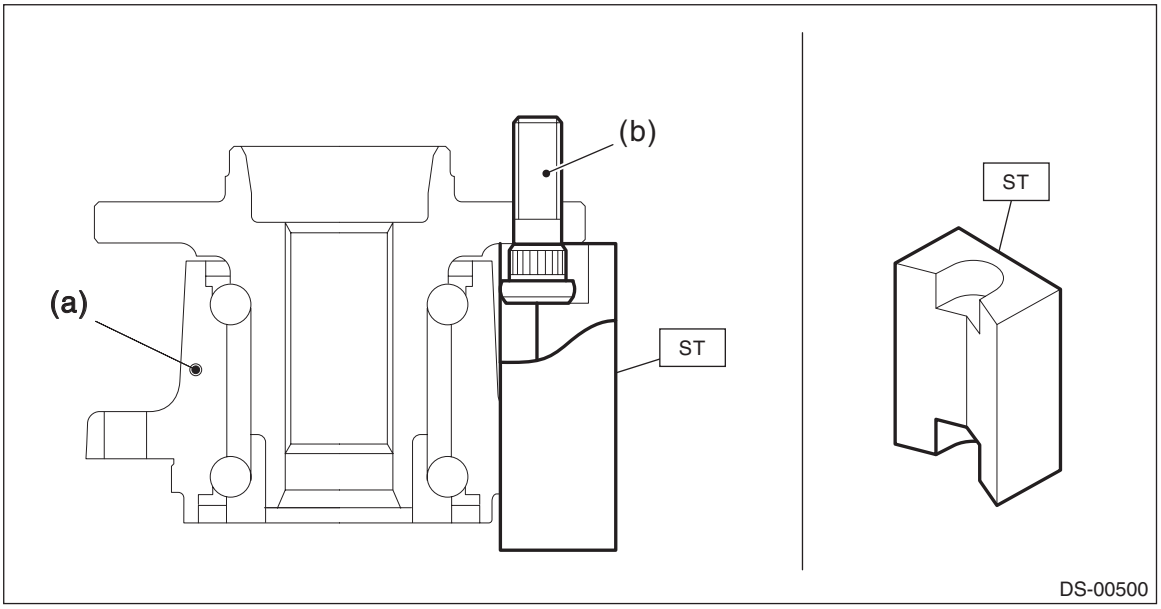
- **Play exists** → Check the hub unit COMPL - rear axle. <Ref. to DS-56, INSPECTION, Rear Hub Unit Bearing.>

## C: DISASSEMBLY

Using the ST or a hydraulic press, push out the bolt - hub (b) from the hub unit COMPL - rear axle (a).

**CAUTION:**
- **Be careful not to hammer the bolts - hub. This may deform the hub unit COMPL.**
- **Do not reuse the bolt - hub.**

***PREPARATION TOOL:***
***ST: HUB STAND (28399AG000)***

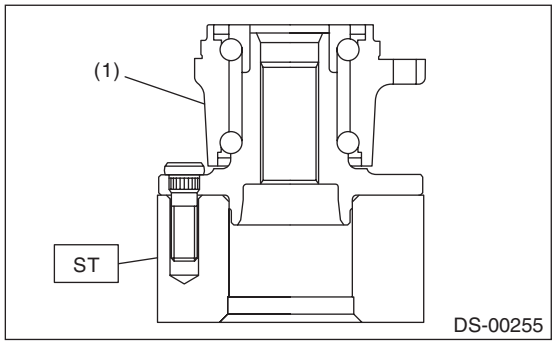


NOTE:
Since the hub unit COMPL - rear axle cannot be disassembled, only bolts - hub can be removed.

## D: ASSEMBLY

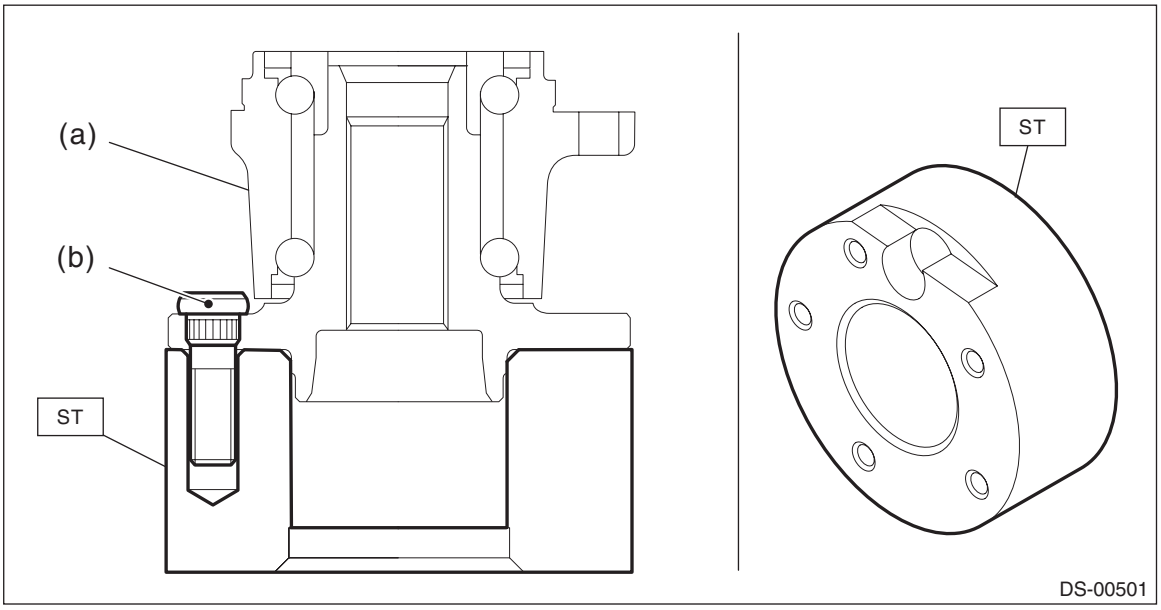
1) Install the hub unit COMPL - rear axle to the ST securely.

***Preparation tool:***
***ST: HUB STAND (927080000)***



(1) Hub unit COMPL - rear axle

2) Using a press, press new bolts - hub (b) until their seating surfaces contact the hub unit COMPL - rear axle (a).

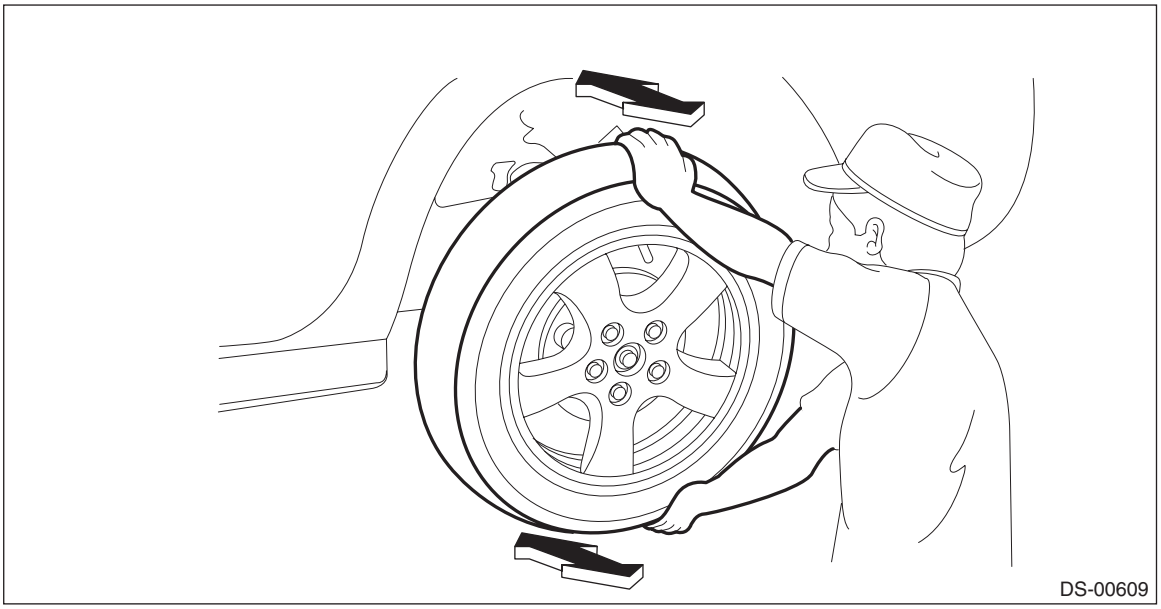


NOTE:
Use the 12 mm (0.47 in) dia. holes in the HUB STAND to prevent bolts from tilting.

## E: INSPECTION

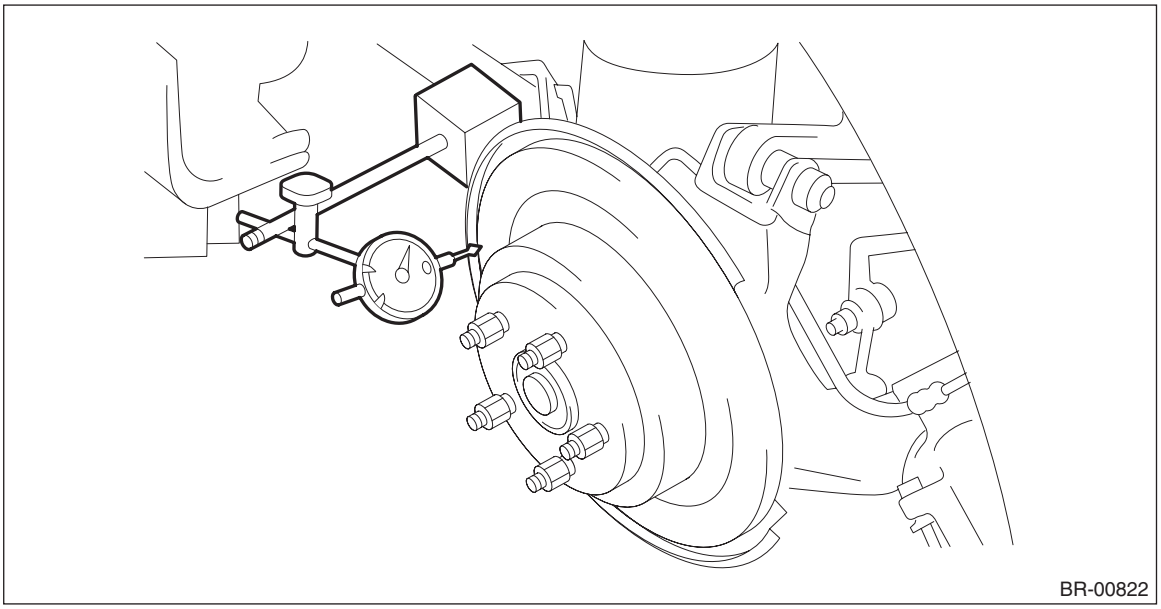
1) Moving the rear tire up and down by hand, check there is no backlash in bearing, and check the wheel rotates smoothly.

**CAUTION:**
**If there is any fault in the bearing, replace the hub unit COMPL - rear axle.**



2) Inspect the lean of axis direction using a dial gauge. Replace the hub unit COMPL - rear axle if the play exceeds the limit.

***Service limit:***
***Maximum: 0.05 mm (0.0020 in)***



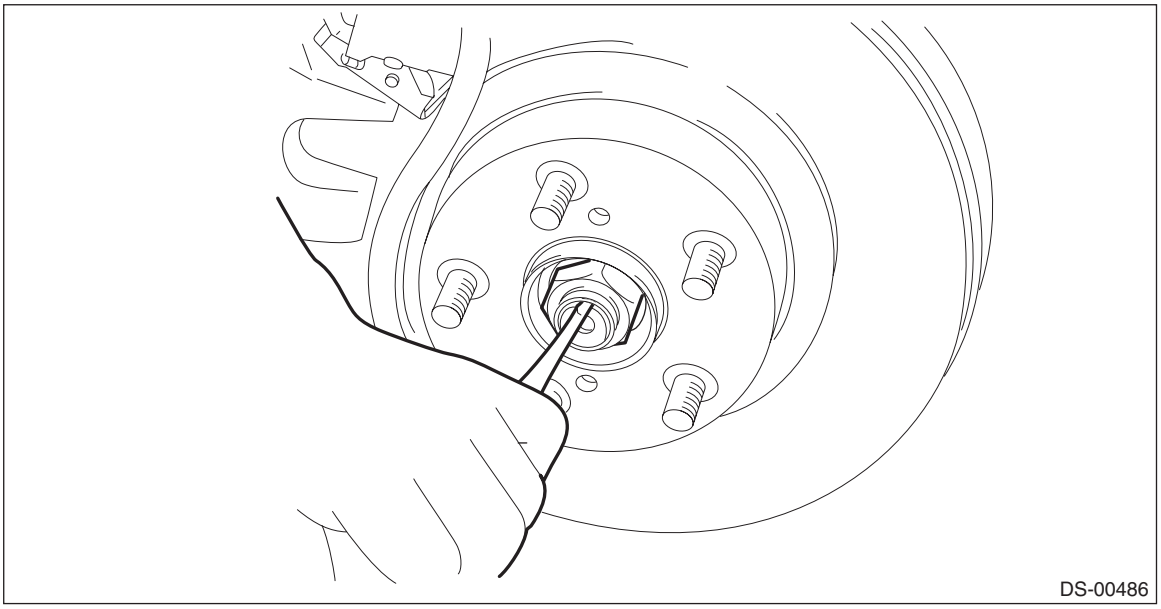
# 7. Front Drive Shaft

## A: REMOVAL

1) Lift up the vehicle, and then remove the front wheels.
2) Remove the nut - axle.

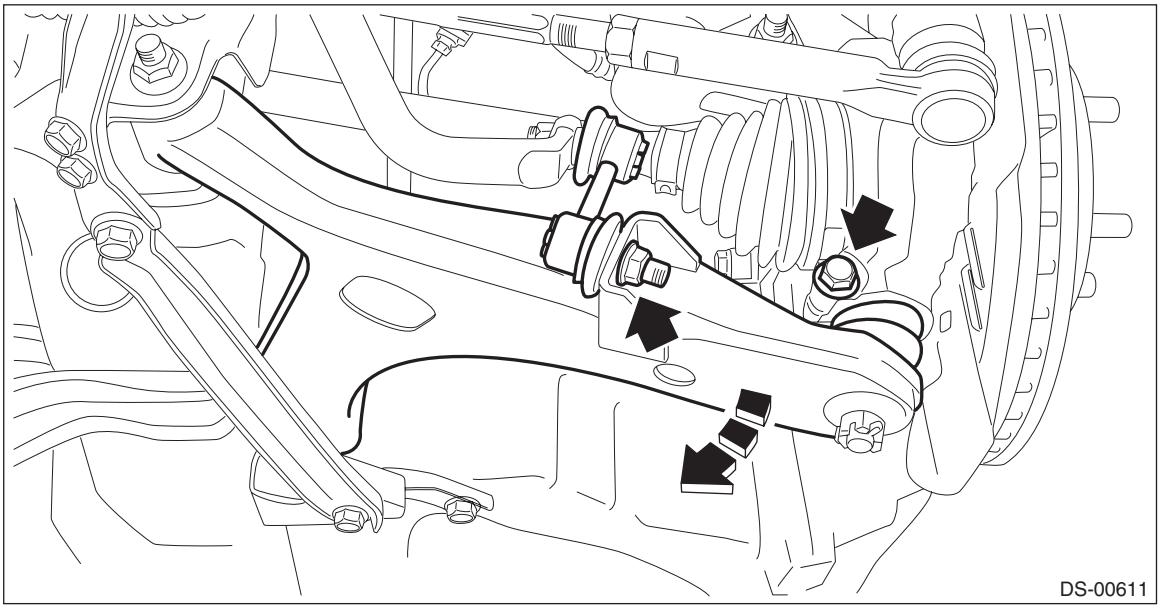
**CAUTION:**
**Do not loosen the nut - axle while the front axle is loaded. Doing so may damage the hub unit COMPL.**

(1) Lift the crimped section of the nut - axle.
(2) Remove the nut - axle using a socket wrench while depressing the brake pedal.



3) Drain the transmission gear oil. (MT model)
4) Drain differential gear oil. (CVT model)
5) Disconnect the ball joint assembly.

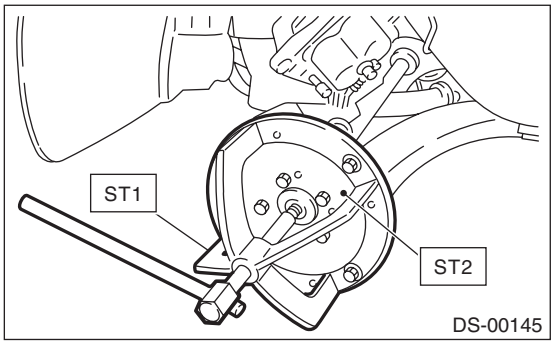
(1) Remove the nut and disconnect the front stabilizer link.
(2) Remove the bolts, disconnect the front arm ball joint, and lower the front arm assembly.



6) Remove the front axle shaft assembly from the housing assembly - front axle.

NOTE:
If it is hard to remove, use the ST.

***PREPARATION TOOL:***
***ST1: AXLE SHAFT PULLER (926470000)***
***ST2: AXLE SHAFT PULLER PLATE (28099PA110)***



7) Using a crowbar, remove the front axle shaft assembly from the transmission.

**CAUTION:**
**Be careful not to allow the bar to damage holder area.**

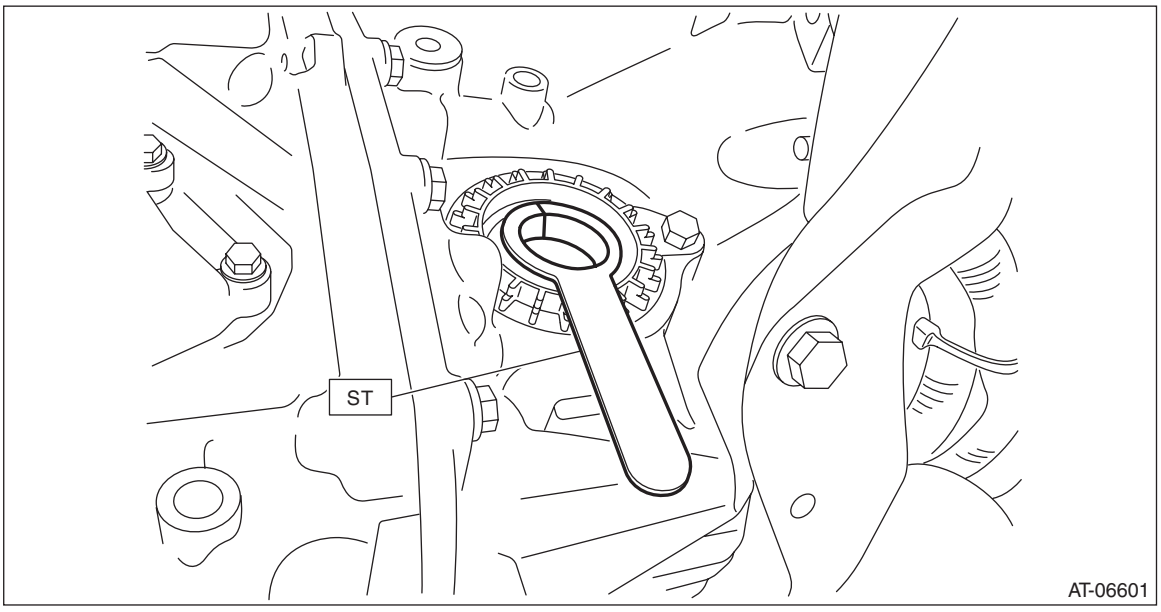
## B: INSTALLATION

1) Before installation, check the axle shaft assembly. <Ref. to DS-70, INSPECTION, Front Drive Shaft.>
2) Replace the differential side retainer oil seal with a new part.
- 5MT model: <Ref. to 5MT-34, REPLACEMENT, Differential Side Retainer Oil Seal.>
- CVT model: <Ref. to CVT-85, REPLACEMENT, Differential Side Retainer Oil Seal.>

NOTE:
After pulling out the axle shaft assembly, be sure to replace with a new oil seal.
3) Insert the axle shaft assembly into the hub spline, and pull in the axle shaft assembly into specified position.

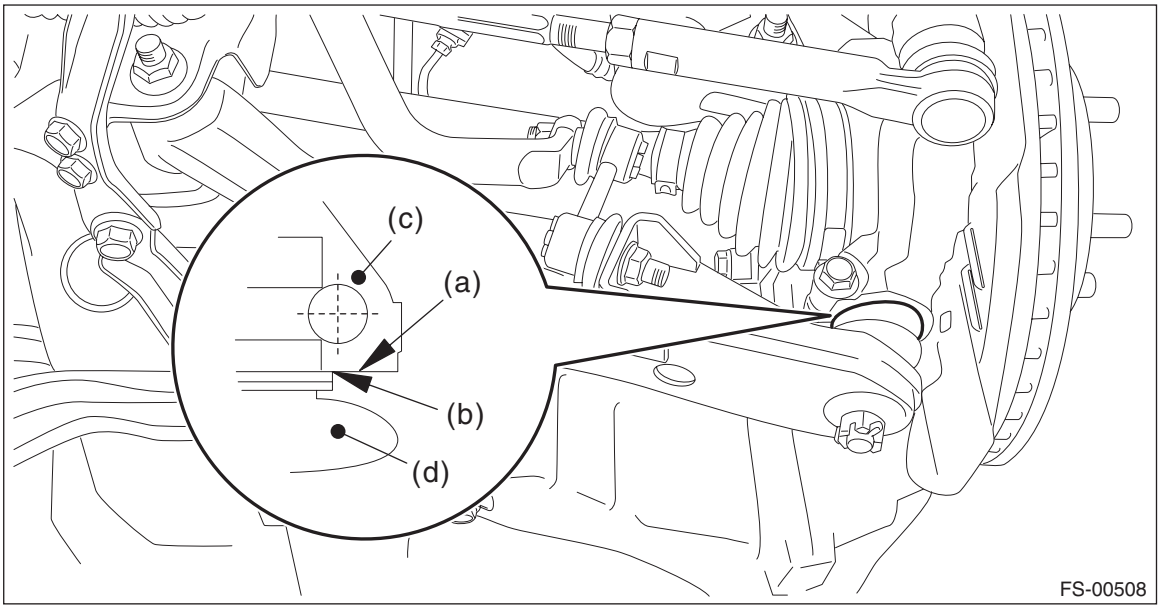
**CAUTION:**
**Do not tap the axle shaft using a hammer when installing axle shaft assembly.**
4) Temporarily tighten the nut - axle.
5) Using the ST, install the front axle shaft assembly to the transmission.

***Preparation tool:***
***ST: OIL SEAL PROTECTOR (28399SA010)***



6) Install the ball joint assembly to the housing assembly - front axle.

**CAUTION:**
**Before tightening, make sure the bottom surface of the housing assembly - front axle and the stepped section of ball joint are in contact.**



(a) Bottom surface of housing ASSY - front axle
(b) Raised section of ball joint
(c) Housing ASSY - front axle
(d) Ball joint

***Tightening torque:***
***50 N·m (5.10 kgf-m, 36.9 ft-lb)***

7) Install the stabilizer link.
- Except for XV model

***Tightening torque:***
***38 N·m (3.87 kgf-m, 28.0 ft-lb)***
- XV model

***Tightening torque:***
***60 N·m (6.12 kgf-m, 44.3 ft-lb)***

8) While depressing the brake pedal, tighten new nuts - axle to the specified torque.

**CAUTION:**
**Do not load the front axle before tightening the nut - axle. Doing so may damage the hub unit COMPL.**

***Tightening torque:***
***220 N·m (22.43 kgf-m, 162.3 ft-lb)***

9) After tightening the nut - axle, lock it securely.
10) Fill transmission gear oil. (MT model)
11) Fill differential gear oil. (CVT model)
12) Install the front wheels.

***Tightening torque:***
***120 N·m (12.24 kgf-m, 88.5 ft-lb)***

13) Inspect the wheel alignment and adjust if necessary.
- Inspection: <Ref. to FS-7, INSPECTION, Wheel Alignment.>
- Adjustment: <Ref. to FS-12, ADJUSTMENT, Wheel Alignment.>

**CAUTION:**
**When the wheel alignment has been adjusted, perform “VDC sensor midpoint setting mode.”.**

14) Perform reinitialization of the auto headlight beam leveler system. (Model with auto headlight beam leveler) <Ref. to LI-17, PROCEDURE, Auto Headlight Beam Leveler System.>

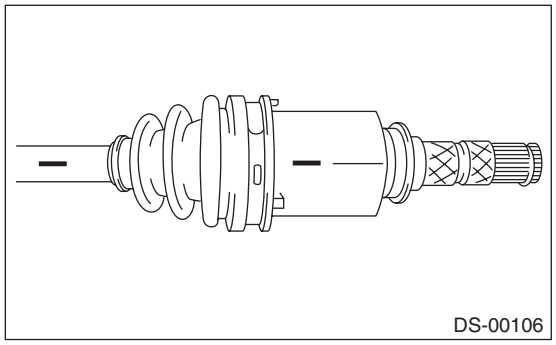
## C: DISASSEMBLY

### 1. AC + AAR TYPE

1) Remove the AAR outer race from shaft assembly.

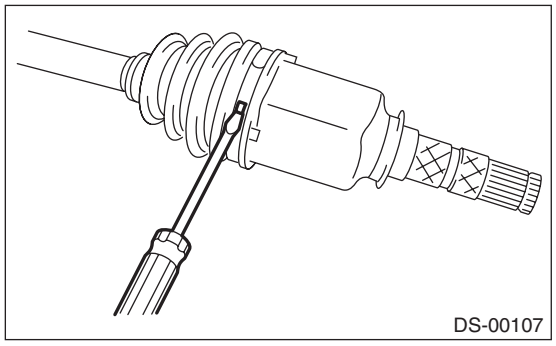
**CAUTION:**
**Be careful not to damage the boot.**

(1) Place alignment marks on the shaft and outer race.



DS-00106

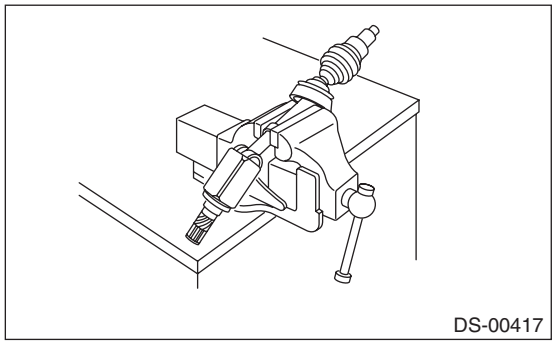
(2) Remove the AAR boot band and boot.



DS-00107

(3) Place the axle shaft between wooden blocks and fix it on a vise.

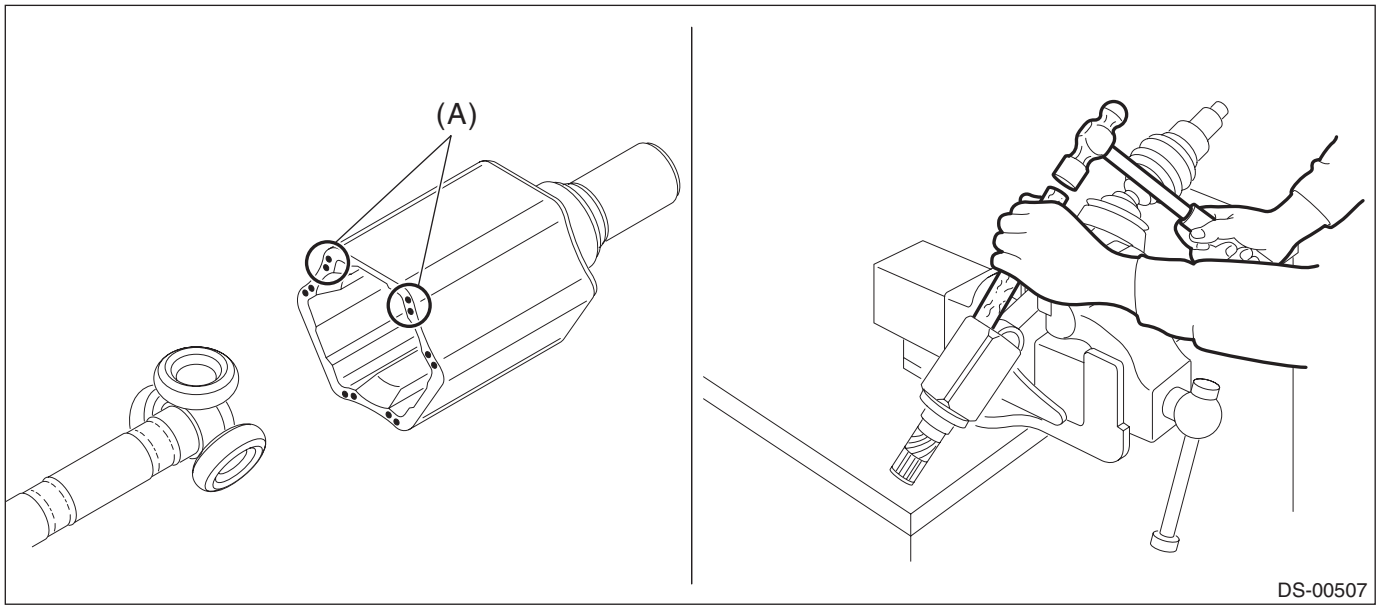
**CAUTION:**
**Do not set the axle shaft directly on a vise.**



DS-00417

(4) Tap the staking are of the outer race alternately with a plastic or wooden bar, and remove one roller at a time.

**CAUTION:**
- **Tap the staking area (A) of the outer race.**
- **Do not use a metal bar as the outer race may deform.**
- **Be careful not to damage the roller parts.**



(5) Remove the outer race from shaft assembly.

**CAUTION:**
**Make sure to have your associate held the outer race when removing the third roller to prevent the outer race from falling.**

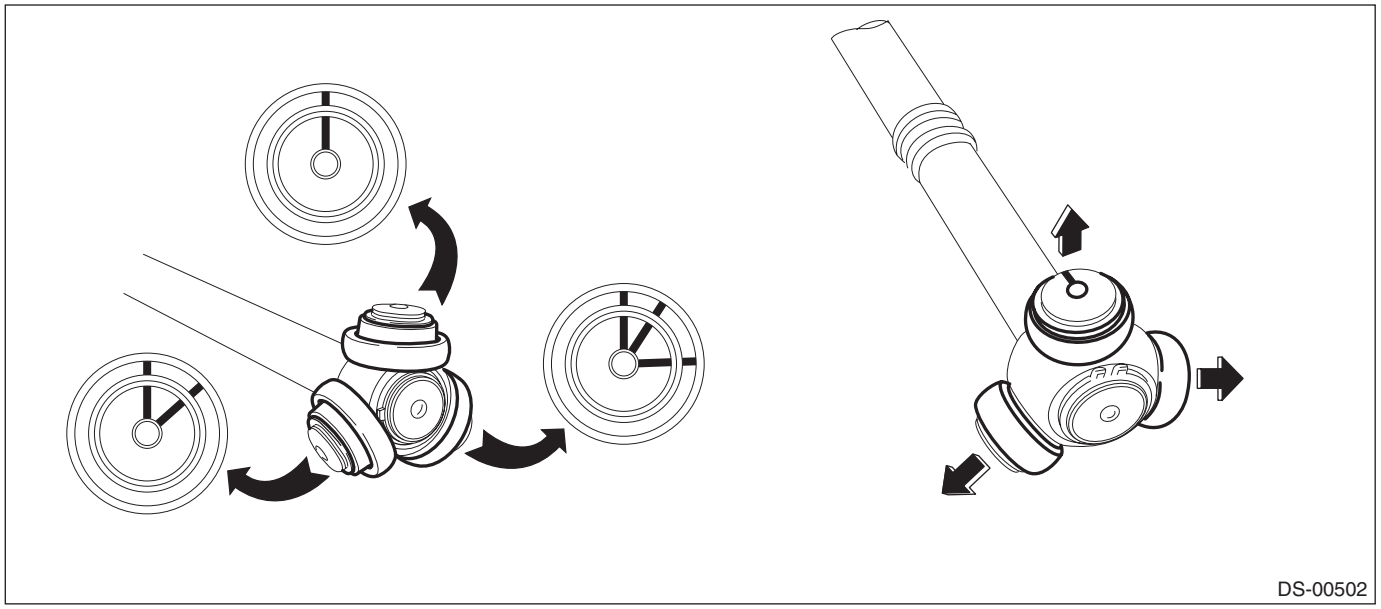
(6) Wipe off grease.

**CAUTION:**
**The grease is a special type of grease. Do not mix with other grease.**

2) Remove the roller kit from trunnion.

**CAUTION:**
**Be careful with the roller kit position.**

(1) Place alignment marks on the roller kit and trunnion.



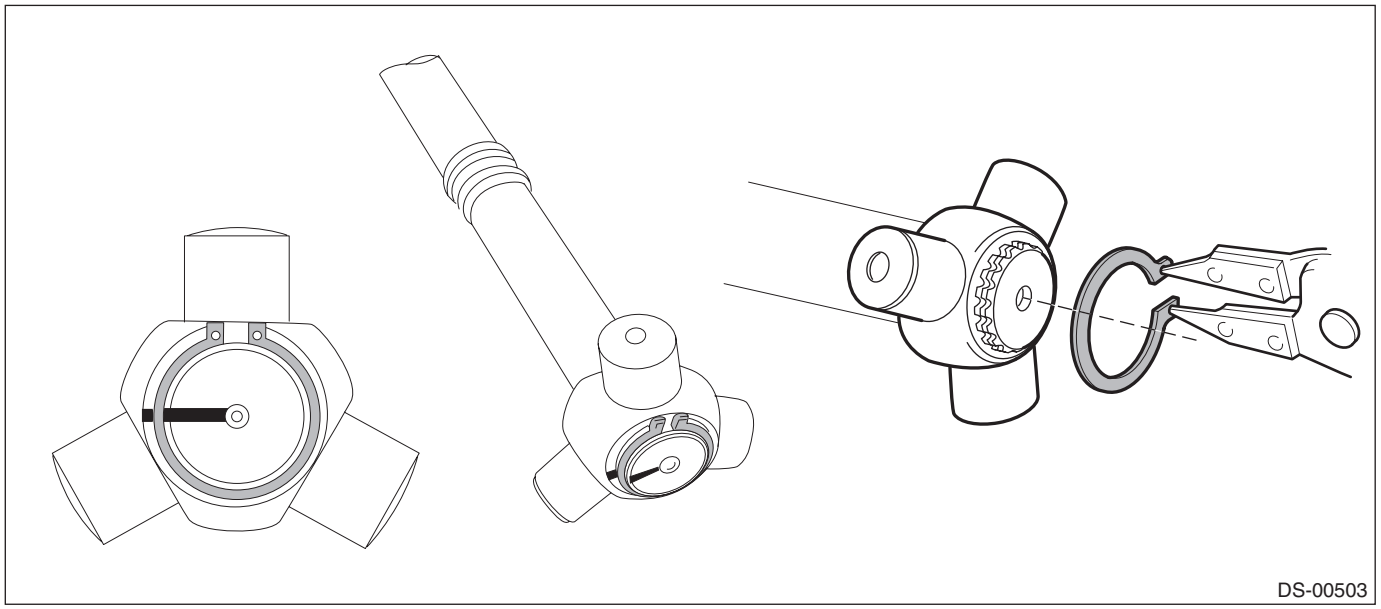
(2) Remove the roller kit from trunnion.

3) Remove the trunnion from the shaft.

(1) Place alignment marks on the trunnion and shaft.

(2) Remove the snap ring and trunnion.

**CAUTION:**
**Be sure to wrap shaft splines with vinyl tape to protect the boot from scratches.**

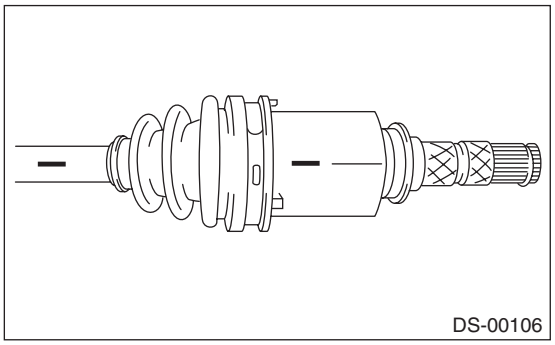


4) Remove the AAR boot.

NOTE:
The AC is a non-disassembly part, so the axle shaft disassembly stops here.

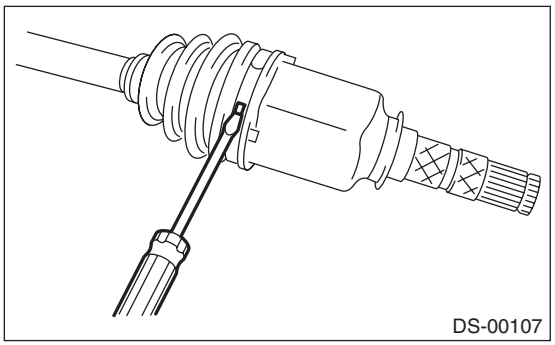
## 2. EBJ + PTJ TYPE

1) Place alignment marks on the shaft and outer race.

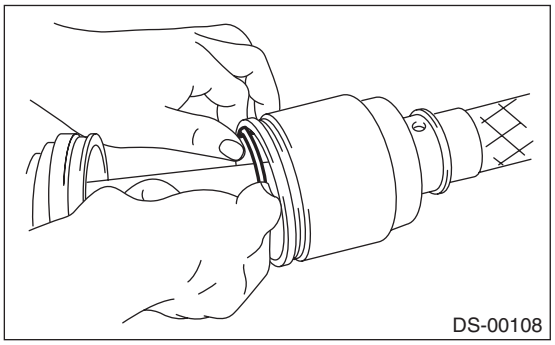


2) Remove the PTJ boot band and boot.

**CAUTION:**
**Be careful not to damage the boot.**



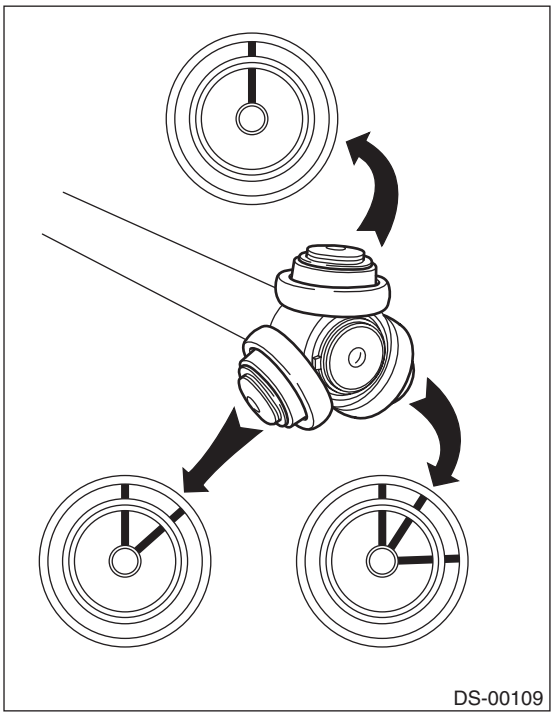
3) Remove the snap ring from PTJ outer race.



4) Remove the PTJ outer race from shaft assembly.
5) Wipe off grease.

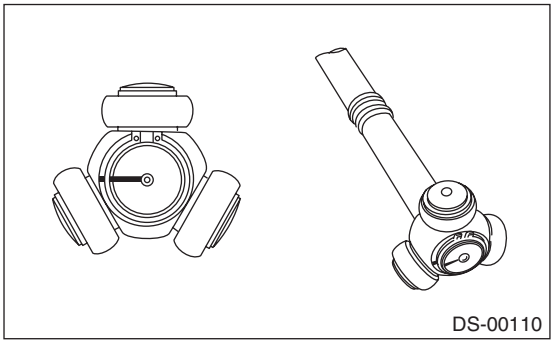
**CAUTION:**
**The grease is a special type of grease. Do not mix with other grease.**

6) Place alignment marks on the roller kit and trunnion.



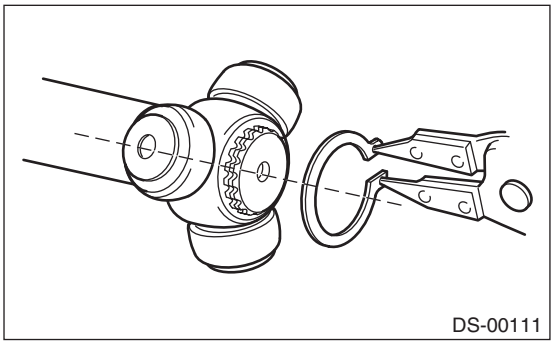
7) Remove the roller kit from trunnion.

**CAUTION:**
**Be careful with the roller kit position.**
8) Place alignment marks on the trunnion and shaft.



9) Remove the snap ring and trunnion.

**CAUTION:**
**Be sure to wrap shaft splines with vinyl tape to protect the boot from scratches.**



10) Remove the PTJ boot.
11) Remove the O-ring from the groove of the shaft.

NOTE:
The EBJ is a non-disassembly part, so the axle disassembly stops here.

# D: ASSEMBLY

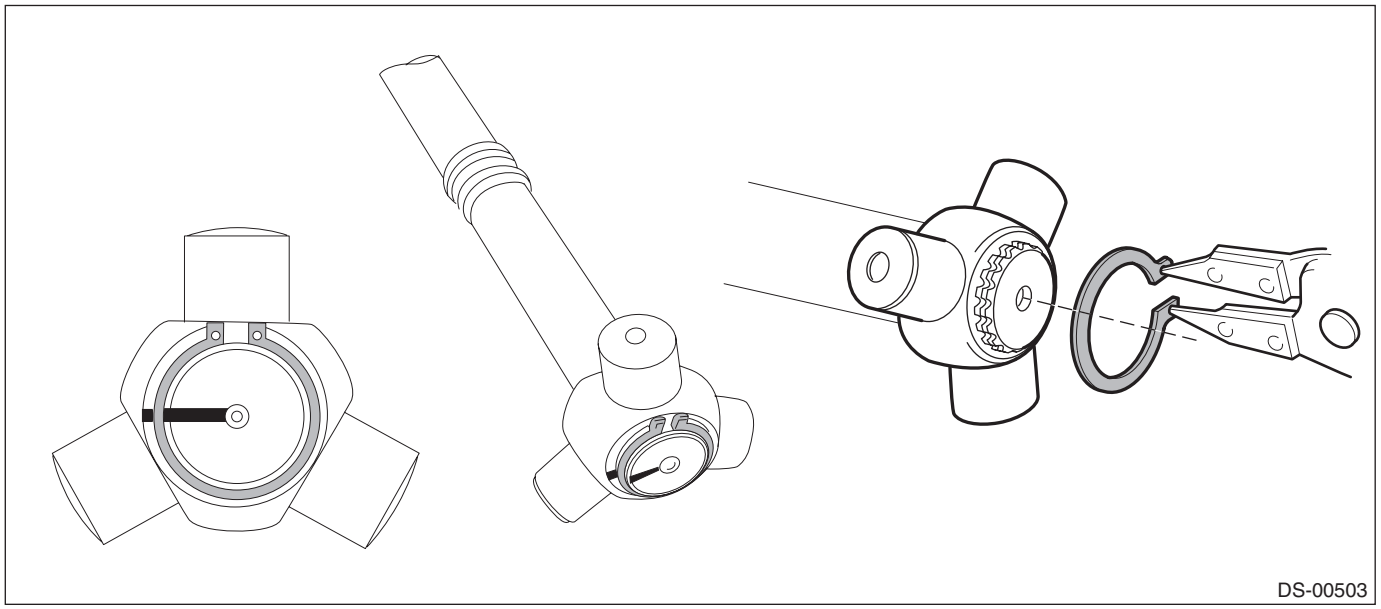
## 1. AC + AAR TYPE

NOTE:
Use specified grease.

***AAR side:***
***One-Luber C***

1) Pass the AAR boot through the shaft.
2) Install the trunnion to the shaft.
   (1) Match the alignment marks, and attach the trunnion onto the shaft.
   (2) Attach the snap ring to the shaft.

**CAUTION:**
**Confirm that the snap ring is completely fitted in the shaft groove.**

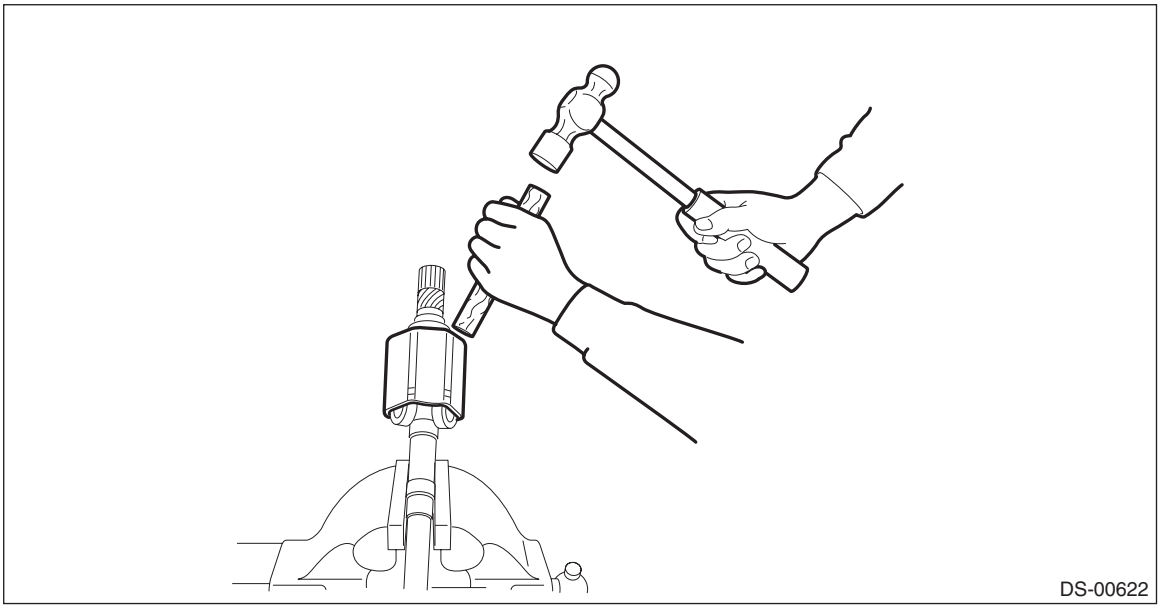


3) Fill 50 to 60 g (1.76 to 2.12 oz) of specified grease into the interior of AAR outer race.
4) Install the trunnion to the roller kit.
   (1) Apply a thin coat of specified grease to the roller kit and trunnion.
   (2) Place the axle shaft between wooden blocks and fix it on a vise.

**CAUTION:**
**Do not set the axle shaft directly on a vise.**
5) Align the alignment marks on the shaft and outer race.

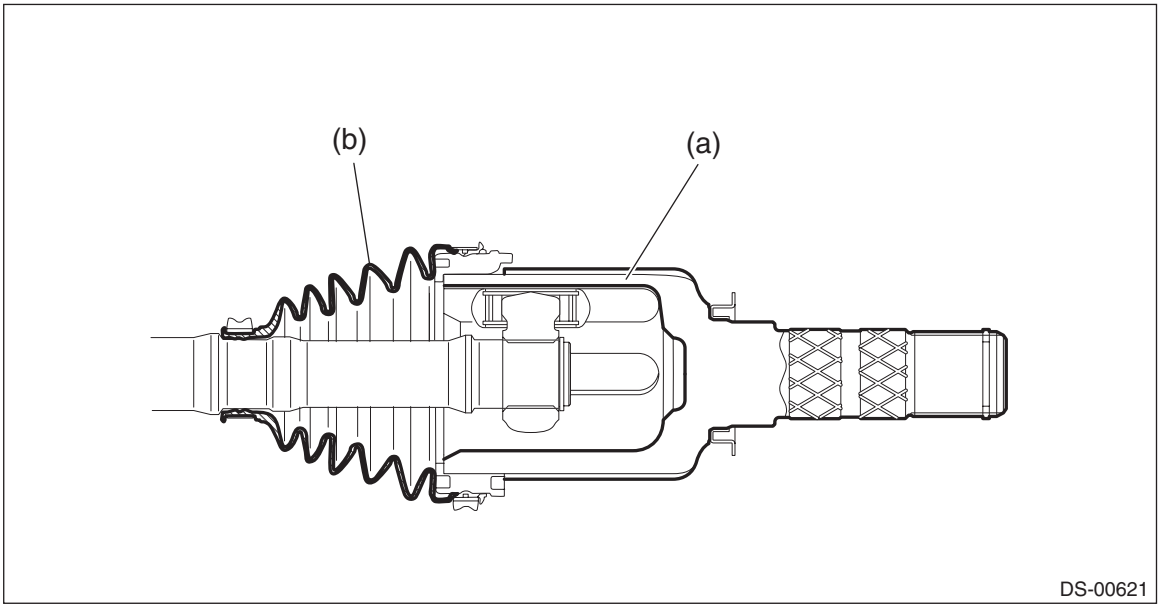
6) Tap the insertion upper part of the outer race alternately using a plastic or wood bar shown in the figure, and then insert the roller one by one.

**CAUTION:**
- **Do not use a metal bar as the outer race may deform.**
- **Do not tap on the end of outer race (shaft part).**
- **Be careful not to deform the baffle plate.**



7) Apply an even coat of the specified grease 30 to 40 g (1.06 to 1.41 oz) to the entire inner surface of boot.
8) Install the AAR boot taking care not to twist it.

**CAUTION:**
**Do not let grease get on groove of the outer race side.**



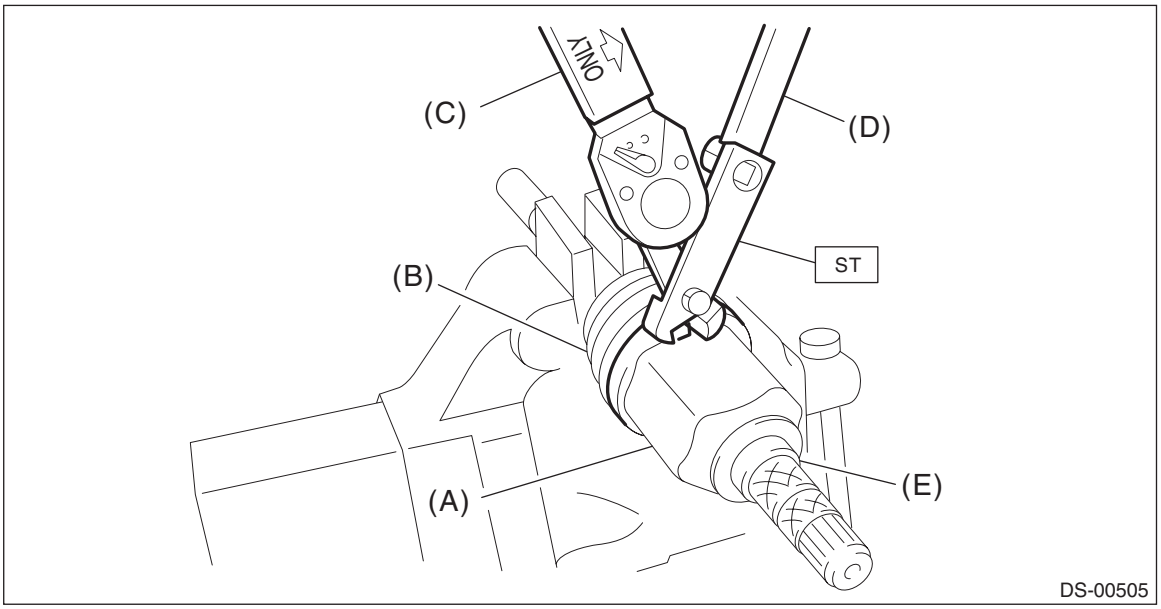
(a) Outer race (b) Boot

9) Insert a flat tip screwdriver, etc. between outer race and boot to make pressure inside of boot as high as barometric pressure.

10) Tighten the boot band.
(1) Install the new large boot band and small boot band at the required positions.
(2) Connect the torque wrench and socket flex handle to the ST.

***Preparation tool:***
***ST: BOOT BAND PLIER (28099AC000)***
***Torque wrench***
***Socket flex handle***

(3) Use a prepared tool, tighten the boot band.



(A) Large boot band
(B) Boot
(C) Torque wrench
(D) Socket flex handle
(E) Outer race

***Clearance at the crimped section of the boot band:***
***Large boot band: 1 mm (0.04 in) or less***
***Small boot band: 1 mm (0.04 in) or less***

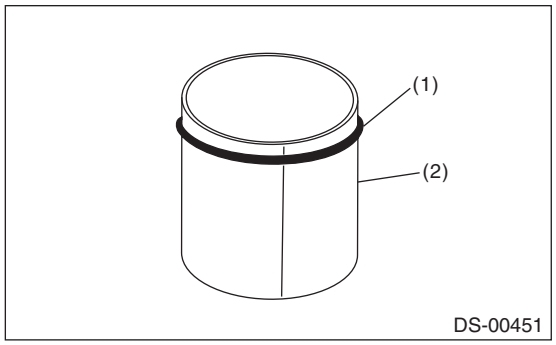
***Tightening torque:***
***Large boot band: 178 N·m (18.15 kgf-m, 131.3 ft-lb)***
***Small boot band: 145 N·m (14.79 kgf-m, 106.9 ft-lb)***

11) Extend and retract the AAR repeatedly to provide an equal coating of grease.

## 2. EBJ + PTJ TYPE

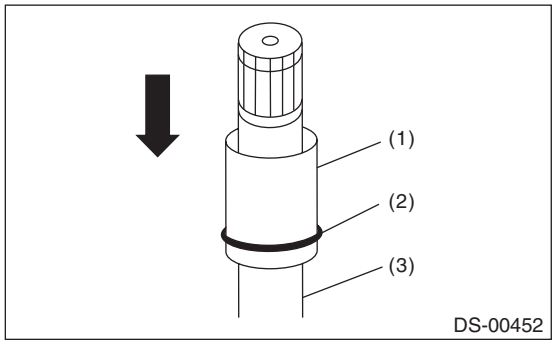
1) Roll up a thick piece of paper to a size where the shaft can pass through, and affix with tape to form a cylinder.
2) Attach a new O-ring on this cylinder.

**CAUTION:**
**• Always use a new O-ring.**
**• Be careful that the O-ring does not become scratched and that there are no foreign objects attached to it.**
**• Make sure to install the O-ring so that it does not twist as much as possible.**
**• Do not stretch the O-ring to 30 mm (1.18 in) inner diameter or more.**



(1) O-ring
(2) Cylinder made with thick paper, etc.

3) Pass the cylinder material onto the shaft, and slide in the direction of the shaft axis.

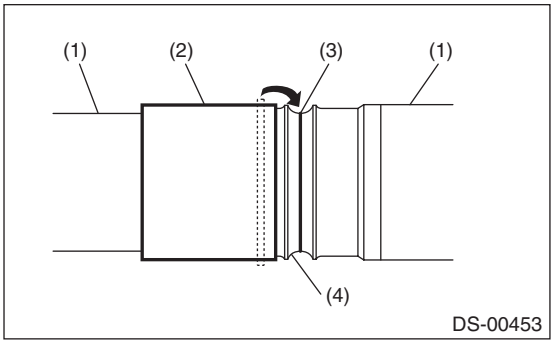


(1) Cylinder material
(2) O-ring
(3) Shaft

4) Clean the shaft boot groove, and wipe off the grease.

5) Slide the cylinder material near the shaft boot groove, and move the O-ring from the cylinder material onto the shaft boot groove.

**CAUTION:**
**• Attach the O-ring to the shaft boot groove center.**
**• Be careful that the O-ring does not become scratched and that there are no foreign objects attached to it.**
**• Make sure to install the O-ring so that it does not twist as much as possible.**
**• With the O-ring attached, do not wash with kerosene, gasoline, etc.**

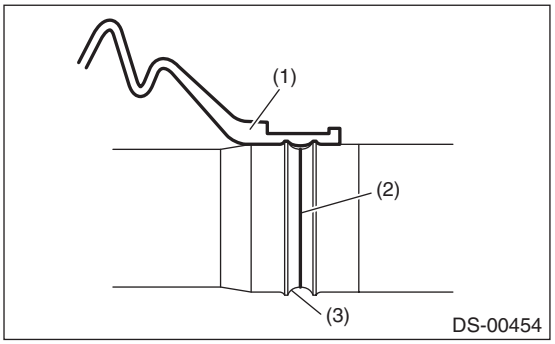


(1) Shaft
(2) Cylinder material
(3) O-ring
(4) Boot groove

6) Pass the PTJ small diameter boot band through the shaft.
7) Wrap vinyl tape around the splines of the shaft.

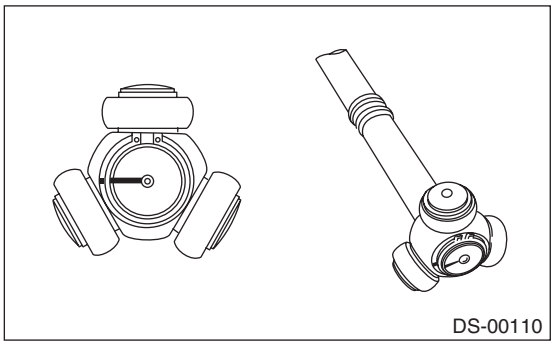
**CAUTION:**
**To prevent damage to the boots, make sure to always wrap with vinyl tape for protection.**
8) Install a new PTJ boot.

**CAUTION:**
**Make sure to fit securely on the boot groove of the shaft.**



(1) PTJ boot
(2) O-ring
(3) Boot groove

9) Match the alignment marks, and attach the trunnion onto the shaft.



10) Attach the snap ring to the shaft.

**CAUTION:**
**Confirm that the snap ring is completely fitted in the shaft groove.**

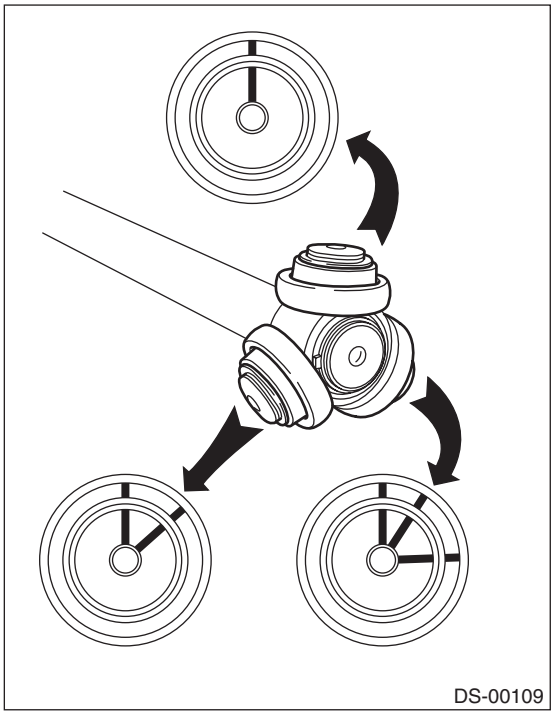
11) Fill 100 to 110 g (3.53 to 3.88 oz) of specified grease into the interior of the PTJ outer race.

***Grease:***
***NKG302***

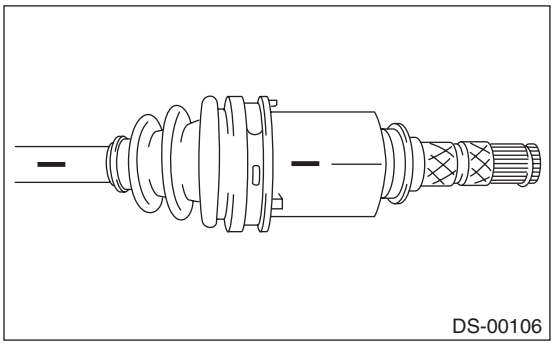
12) Apply a thin coat of specified grease to the roller kit and trunnion.

13) Match the alignment marks of the roller kit and trunnion, and attach the roller kit.

**CAUTION:**
**Be careful with the roller kit position.**



14) Match the alignment marks of the shaft and outer race, and attach the outer race.



15) Install the snap ring in the groove of the PTJ outer race.

**CAUTION:**
**Pull the shaft lightly and make sure that the snap ring is completely fitted in the groove.**

16) Apply an even coat of the specified grease 30 to 40 g (1.06 to 1.41 oz) to the entire inner surface of boot.

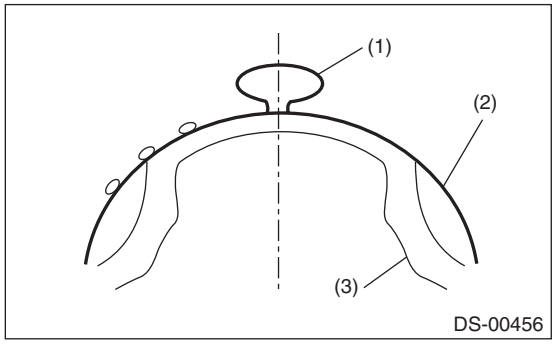
17) Attach the PTJ boot taking care not to twist it.

**CAUTION:**
- **Clean the large end of PTJ boot and the boot groove well, and remove the grease and other substances.**
- **When installing the PTJ boot, position the outer race of the PTJ at center of the stroke.**

18) Set the new boot band at the specified position.

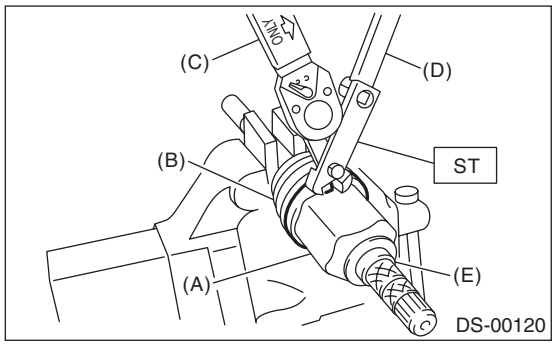
19) Tighten the boot bands using ST, torque wrench and socket flex handle.

**CAUTION:**
**The large boot band is to be tightened so that the omega shaped part is at the position indicated in the figure below.**



(1) Omega shaped part
(2) Boot band
(3) Outer race

ST 28099AC000 BOOT BAND PLIER



(A) Large boot band
(B) Boot
(C) Torque wrench
(D) Socket flex handle
(E) Outer race

***Tightening torque:***
***Large boot band***
***178 N·m (18.15 kgf-m, 131.3 ft-lb)***
***Small boot band***
***145 N·m (14.79 kgf-m, 106.9 ft-lb)***

20) Extend and retract the PTJ repeatedly so that grease is spread evenly.

## E: INSPECTION

Check the removed parts for damage, wear, corrosion etc. If faulty, repair or replace.

- **AAR and AC:**

Check for seizure, corrosion, damage, wear and excessive play.

- **PTJ (Pillow Tripod Joint)**

Check for seizure, corrosion, damage, wear and excessive play.

- **EBJ (High-Efficiency Compact Ball fixed Joint)**

Check for seizure, corrosion, damage and excessive play.

- **Shaft:**

Check for excessive bending, twisting, damage and wear.

- **Boot:**

Check for wear, warping, breakage and scratches.

- **Grease:**

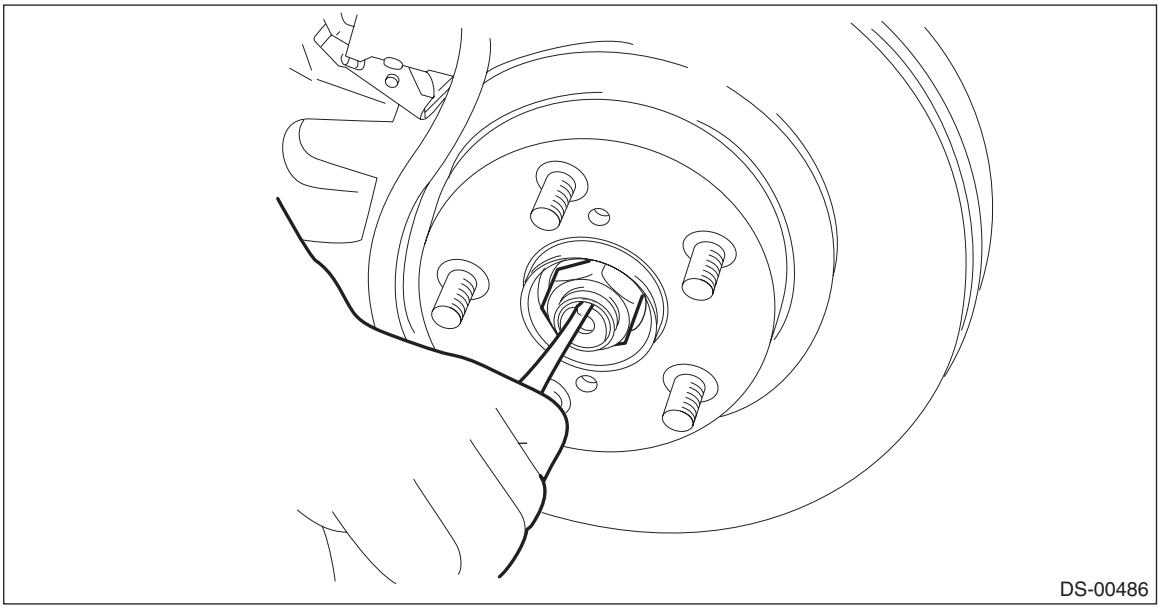
Check for discoloration and fluidity.

# 8. Rear Drive Shaft

## A: REMOVAL

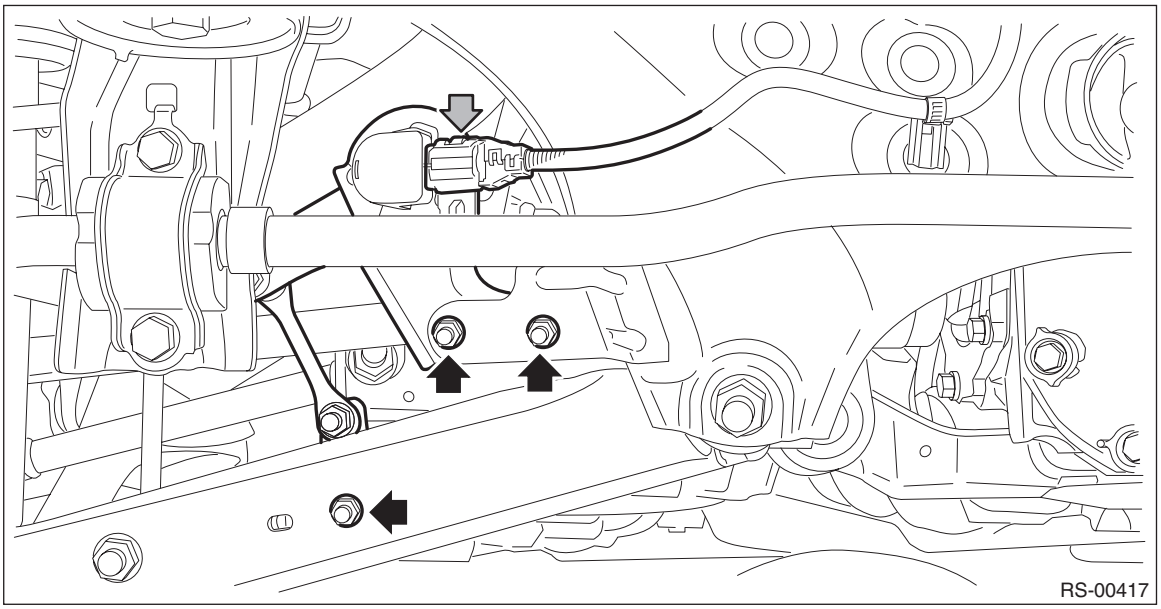
1) Disconnect the ground cable from battery.
2) Lift up the vehicle, and then remove the rear wheels.
3) Remove the nut - axle.

**CAUTION:**
**Do not loosen the nut - axle while the rear axle is loaded. Doing so may damage the hub unit COMPL.**
(1) Lift the crimped section of the nut - axle.
(2) Remove the nut - axle using a socket wrench while depressing the brake pedal.



DS-00486

4) Remove the sensor assembly - headlight beam leveler. (Model with auto headlight beam leveler)
(1) Disconnect the connector of the sensor assembly - headlight beam leveler.
(2) Remove the bolts and nuts, and remove the sensor assembly - headlight beam leveler.



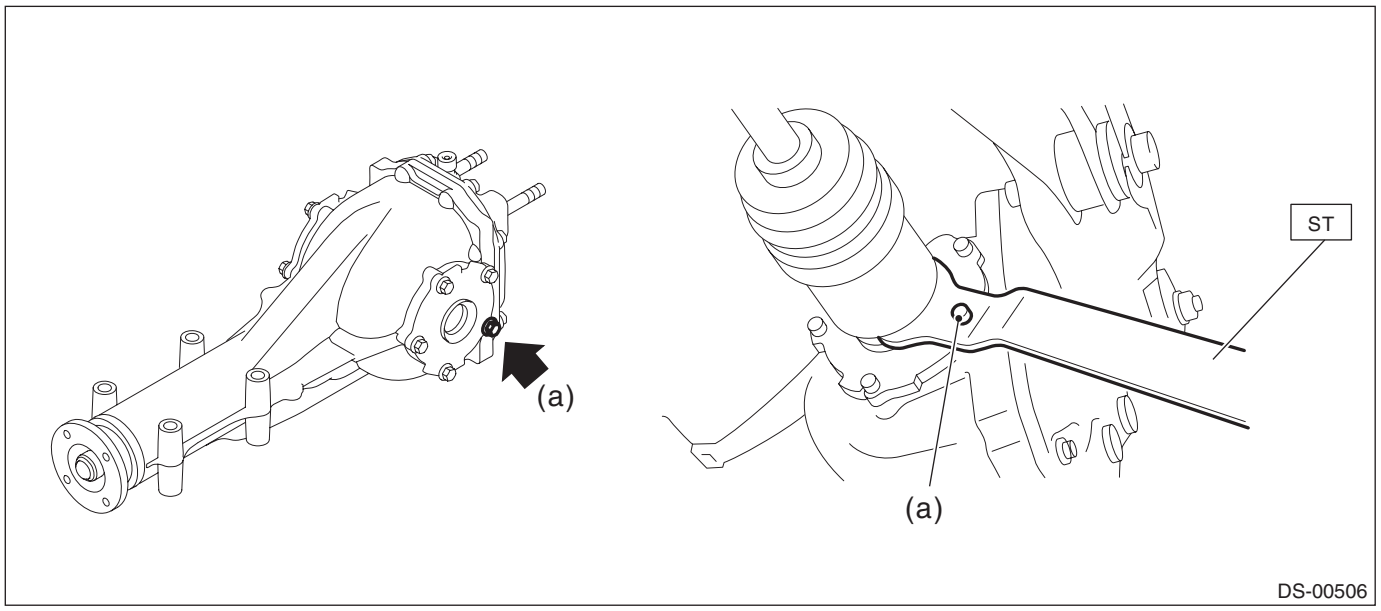
RS-00417

5) Drain differential gear oil.
6) Remove the propeller shaft. <Ref. to DS-12, REMOVAL, Propeller Shaft.>

7) Loosen the joint of rear differential assembly and rear axle shaft assembly.
- T type: Pull out the rear axle shaft assembly by fitting the ST to the bolt (a) as shown in the figure.

**CAUTION:**
**Fit the ST to the bolts as shown in the figure to prevent damage of the side bearing retainer.**

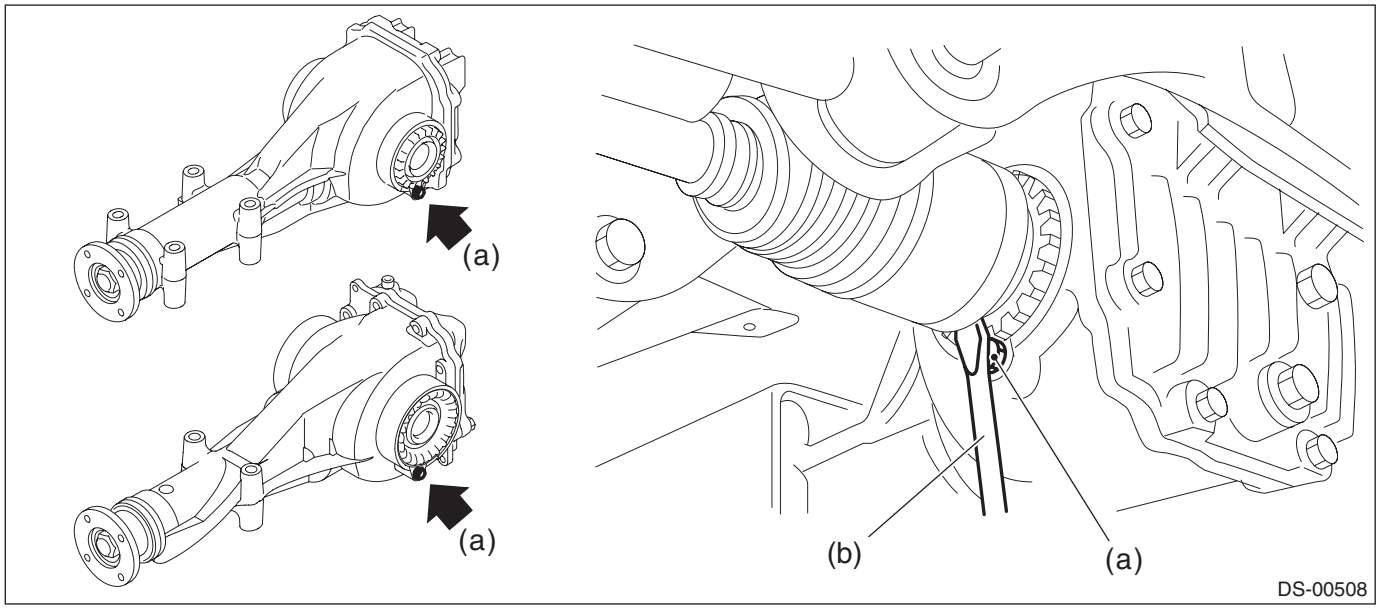
***Preparation tool:***
***ST: DRIVE SHAFT REMOVER (28099PA100)***



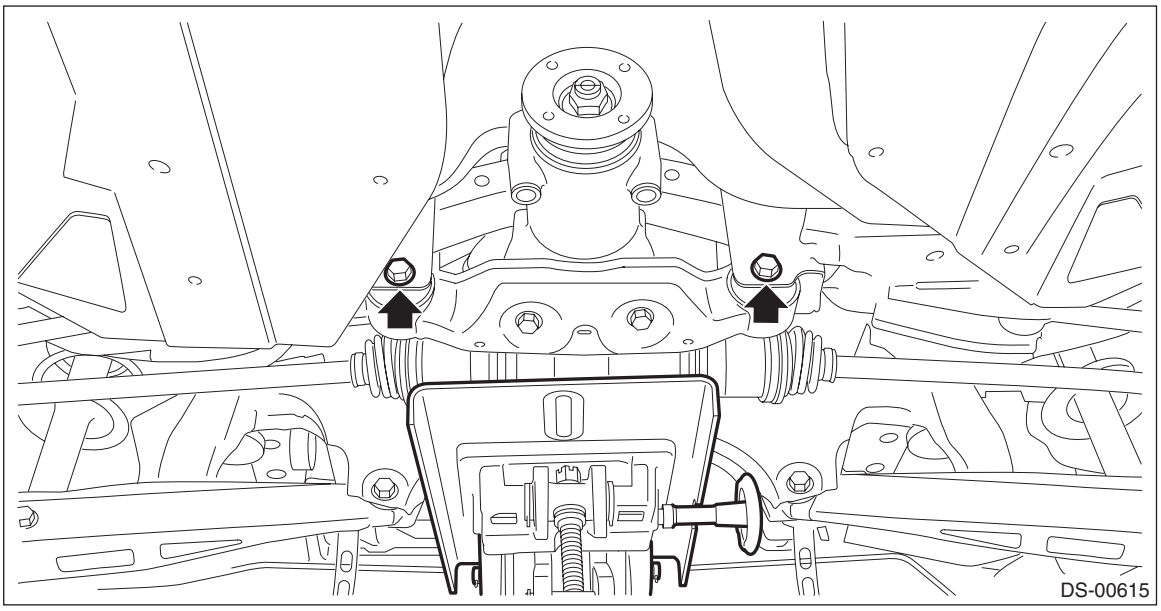
- VA type: Pull out the rear axle shaft assembly by fitting the tire lever (b) to the bolt (a) as shown in the figure.

**CAUTION:**
**To prevent damage to the side bearing retainer, use by placing the tire lever against the bolt as shown in the figure.**

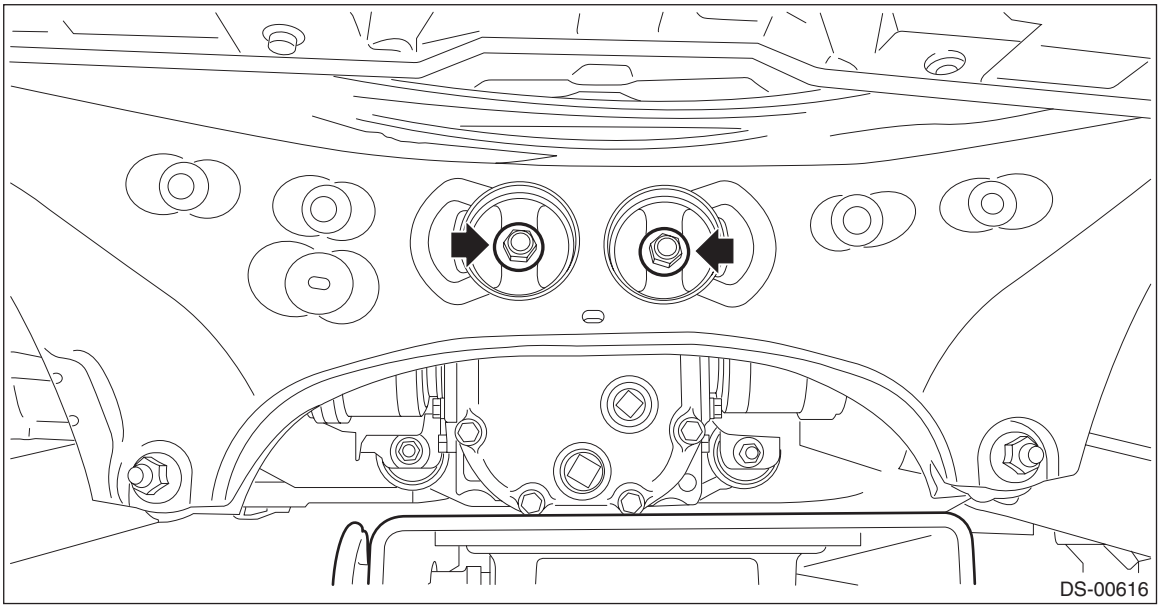
***Preparation tool:***
***Tire lever***



8) Remove the installation section of rear differential assembly.
(1) Support the rear differential assembly with a transmission jack.
(2) Remove the bolts which hold the rear differential front crossmember from the rear sub frame assembly.

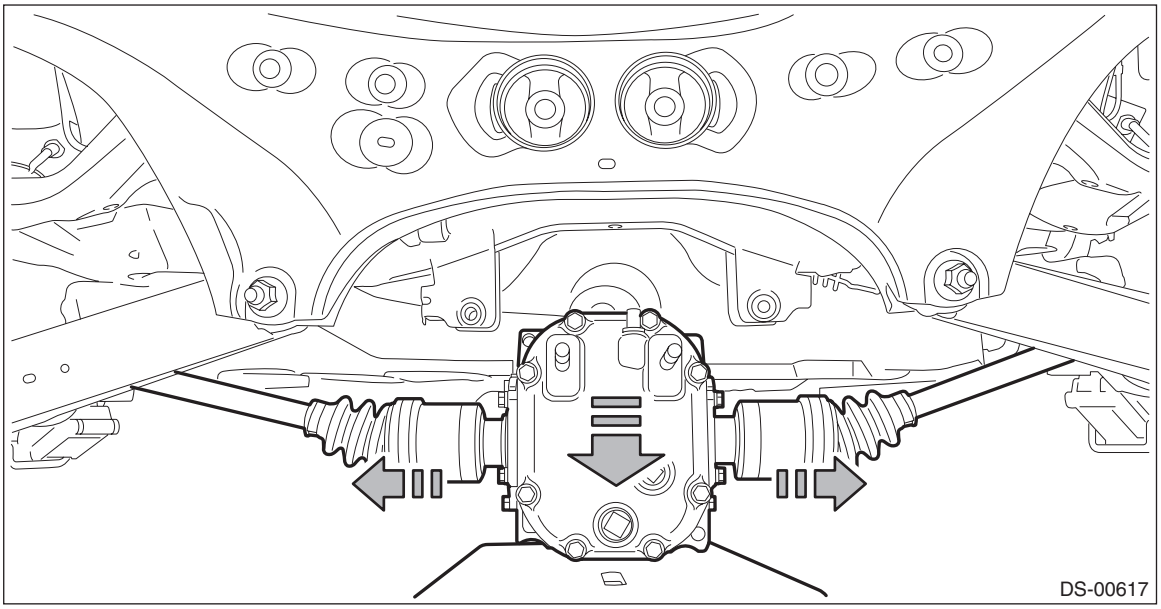


(3) Remove the self-locking nuts which hold the rear differential to the rear sub frame assembly.



9) Completely pull out the rear axle shaft assembly while lowering the rear differential.

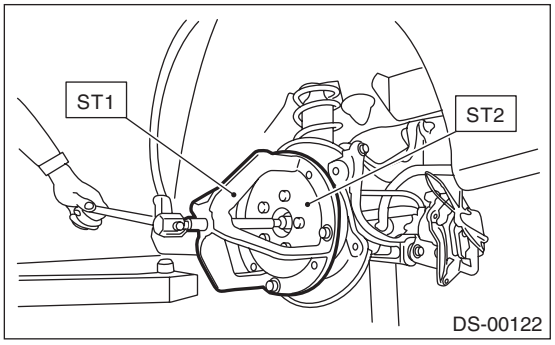
**CAUTION:**
**Pay attention to avoid damaging the boot of axle shaft.**



10) Remove the rear axle shaft assembly from the housing assembly - rear axle.

NOTE:
If it is hard to remove, use the ST.

***Preparation tool:***
***ST1: AXLE SHAFT PULLER (926470000)***
***ST2: AXLE SHAFT PULLER PLATE (28099PA110)***

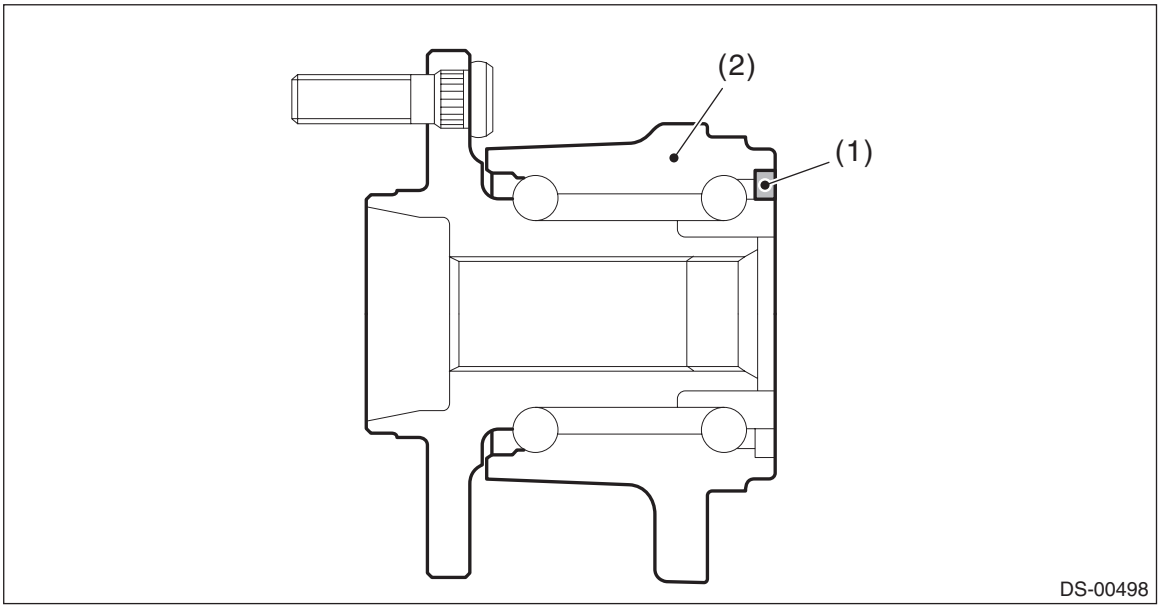


## B: INSTALLATION

1) Replace the rear differential side oil seal. <Ref. to DI-58, REPLACEMENT, Rear Differential Side Oil Seal.>

NOTE:
After pulling out the axle shaft assembly, be sure to replace with a new oil seal.
2) Insert the axle shaft assembly into the rear hub spline, and pull in the axle shaft assembly into specified position.

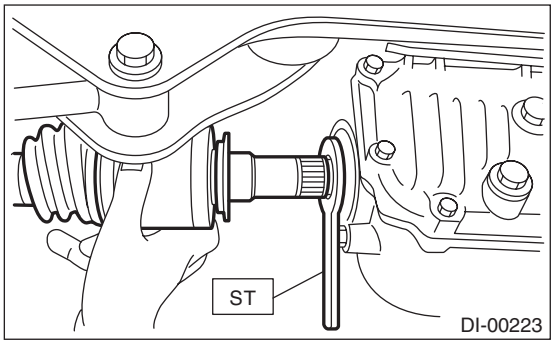
**CAUTION:**
- **Be careful not to damage the magnetic encoder.**
- **Do not get closer the tool which charged magnetism to magnetic encoder.**
- **Do not tap the axle shaft using a hammer when installing axle shaft assembly.**



(1) Magnetic encoder (2) Hub unit COMPL - rear axle

3) Temporarily tighten the nut - axle.
4) Using the ST, install the rear axle shaft assembly to the rear differential.

***Preparation tool:***
***ST: OIL SEAL PROTECTOR (28099PA090)***



5) Install the rear differential assembly to the rear sub frame assembly.

**CAUTION:**
**Be sure to use a new self-locking nut.**

***Tightening torque:***
***Differential assembly — bushing - differential: 70 N·m (7.14 kgf-m, 51.6 ft-lb)***
***Differential assembly — rear sub frame assembly: 110 N·m (11.22 kgf-m, 81.1 ft-lb)***

6) Install the sensor assembly - headlight beam leveler.

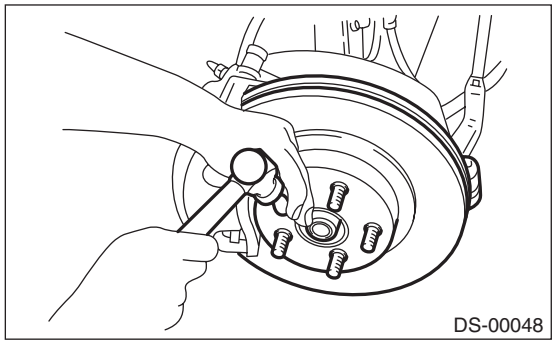
***Tightening torque:***
***7.5 N·m (0.76 kgf-m, 5.5 ft-lb)***

7) While pressing the brake pedal, tighten the new axle nuts to the specified torque.

**CAUTION:**
**Do not load the rear axle before tightening the nut - axle. Doing so may damage the hub unit COMPL.**

***Tightening torque:***
***190 N·m (19.37 kgf-m, 140.1 ft-lb)***

8) Lock the nut - axle securely.



9) Fill differential gear oil.
10) Install the rear wheels.

***Tightening torque:***
***120 N·m (12.24 kgf-m, 88.5 ft-lb)***

11) Perform reinitialization of the auto headlight beam leveler system. (Model with auto headlight beam leveler) <Ref. to LI-17, PROCEDURE, Auto Headlight Beam Leveler System.>

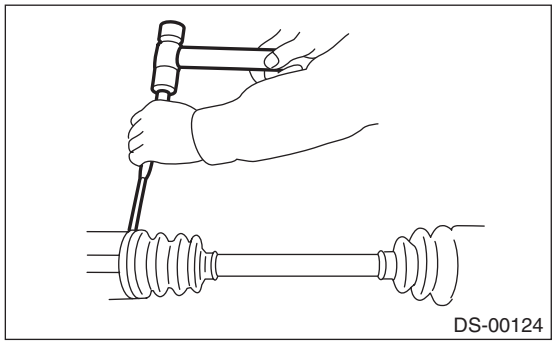
## C: DISASSEMBLY

1) Take out the DOJ outer race from the shaft assembly.

**CAUTION:**
**Be careful not to damage the boot.**

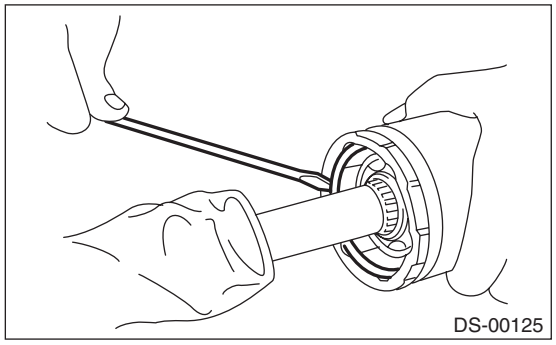
(1) Using a flat tip screwdriver or plier, loosen the boot band on the large end of DOJ boot.

**CAUTION:**
**Be careful not to damage the boot.**



(2) Remove the boot band on the small end of DOJ boot in the same manner.
(3) Remove the large end of DOJ boot from DOJ outer race.

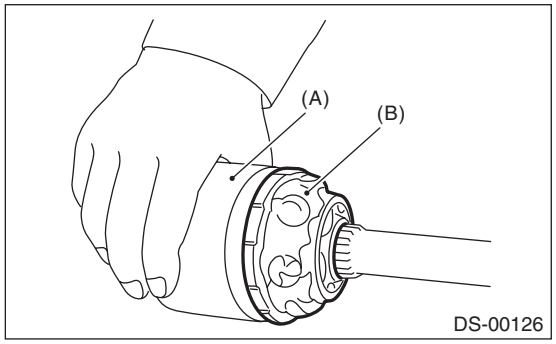
(4) Remove the round snap ring at the neck of DOJ outer race with a flat tip screwdriver.



(5) Take out the DOJ outer race from the shaft assembly.
(6) Wipe off the grease and take out the ball bearings.

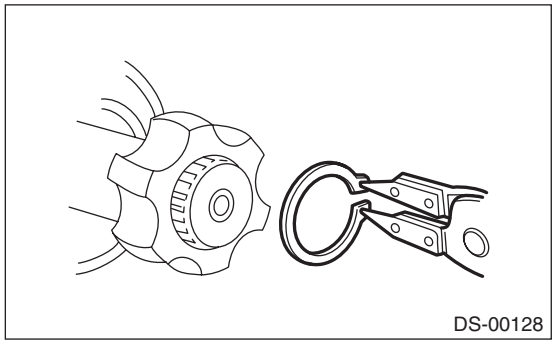
**CAUTION:**
**The grease is a special grease (grease for constant velocity joints). Do not mix with other greases.**

NOTE:
Disassemble the parts taking care not to lose balls.



(A) Outer race
(B) Grease

2) Remove the cage from the inner race.
(1) Turn the cage by a half pitch to the track groove of inner race and shift the cage.
(2) Using pliers, remove the snap ring fixing the inner race to the shaft.



(3) Take out the DOJ inner race.
(4) Take off the DOJ cage from shaft and remove the DOJ boot.

**CAUTION:**
**Wrap shaft splines with vinyl tape to protect the boot from scratches.**

3) Remove the BJ boot or EBJ boot in the same procedure as the DOJ boot.

NOTE:
The BJ is a non-disassembly part, so the axle shaft disassembly stops here.

# D: ASSEMBLY

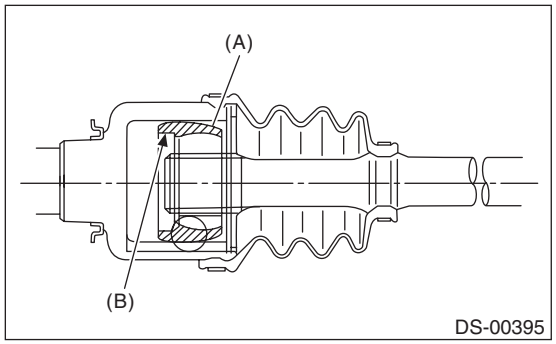
## 1. MT MODEL

**CAUTION:**
**Wrap shaft splines with vinyl tape to protect the boot from scratches.**

NOTE:
Use specified grease.

***Grease:***
***BJ, EBJ side: NKG814***
***DOJ side: NKG814***

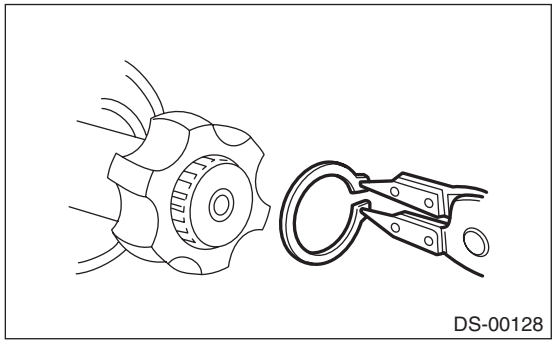
1) Install the DOJ inner race to the shaft.
   (1) Install the EBJ boot to the specified position, and fill it with 50 to 60 g (1.76 to 2.12 oz) of specified grease.
   (2) Place the DOJ boot at the center of shaft.
   (3) Insert the DOJ cage onto shaft.



(A) Cage
(B) Cutout portion

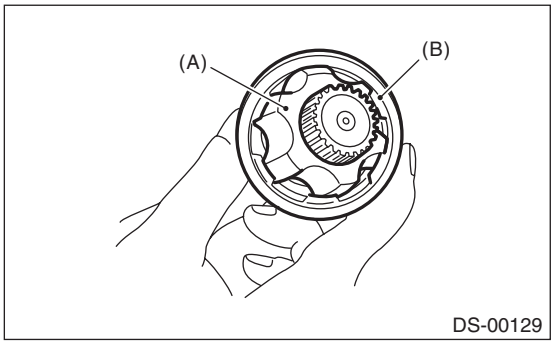
NOTE:
Insert the cage with the cutout portion facing the shaft end, since the cage has an orientation.

   (4) Install the DOJ inner race on shaft and fix the snap ring in place with pliers.

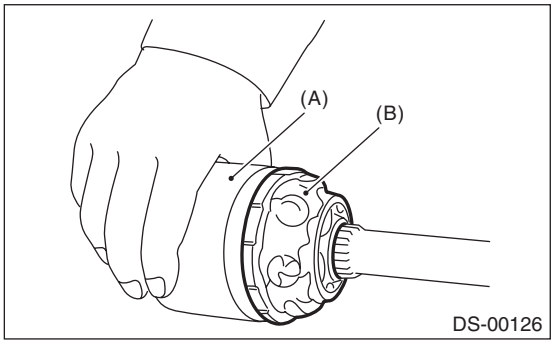


NOTE:
Confirm that the snap ring is completely fitted in the shaft groove.

2) Install the cage to the inner race.
(1) Install the cage (B) with the protruding section aligned with the track on the inner race (A), and turn by a half pitch.



(2) Fill 80 to 90 g (2.82 to 3.17 oz) of specified grease into the inner side of the DOJ outer race.
(3) Apply a thin coat of specified grease to the cage pocket and ball.
(4) Insert the ball bearings into the cage pocket.
3) Connect the shaft assembly to the outer race.
(1) Align the outer race track and ball positions, and place the shaft, inner race, cage and ball bearings in the original positions, and then fix outer race in place.



(A) Outer race
(B) Grease

(2) Install the snap ring in the groove on the DOJ outer race.

**CAUTION:**
**Be careful of the following items during installation:**
- **Make sure that the balls, cage and inner race are completely fitted in the outer race of DOJ.**
- **Use care not to place the matched position of snap ring in the ball groove of outer race.**
- **Pull the shaft lightly and assure that the circlip is completely fitted in the groove.**

(3) Apply an even coat of the specified grease [20 to 30 g (0.71 to 1.06 oz)] to the entire inner surface of boot. Also apply grease to the shaft.
(4) Install the DOJ boot taking care not to twist it.

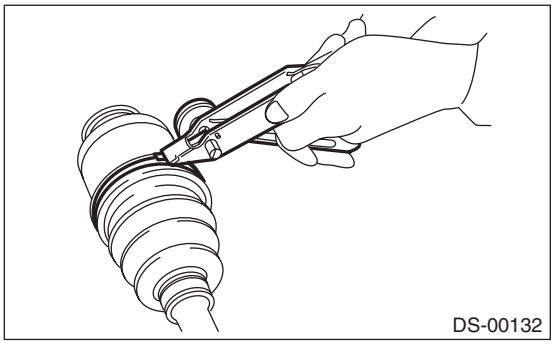
NOTE:
- The inside of the large end of DOJ boot and the boot groove shall be cleaned so as to be free from grease and other substances.
- When installing the DOJ boot, position the outer race of DOJ at center of the stroke.

(5) Put a new band through the clip and wind twice in the band groove of the boot.
(6) Pinch the end of band with pliers. Hold the clip and tighten securely.

NOTE:
When tightening boot, use care so that the air within the boot is appropriate.

(7) Tighten the band using the ST.

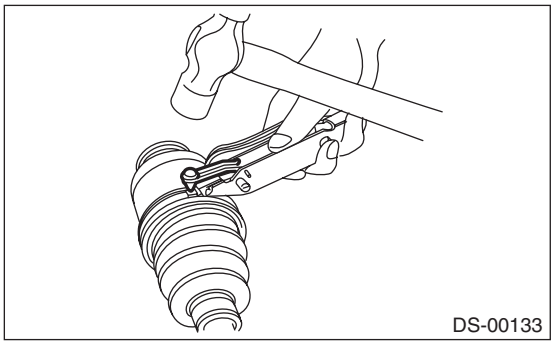
***Preparation tool:***
***ST: BAND TIGHTENING TOOL (925091000)***



NOTE:
Tighten the band until it cannot be moved by hand.

(8) Tap the clip with the punch provided at the end of the ST.

***Preparation tool:***
***ST: BAND TIGHTENING TOOL (925091000)***



NOTE:
Tap to an extent that the boot underneath is not damaged.

(9) Cut off the band with an allowance of about 10 mm (0.39 in) left from the clip and bend this allowance over the clip.

**CAUTION:**
**Make sure that the end of the band is in close contact with clip.**

4) Extend and retract the DOJ repeatedly to provide an equal coating of grease.

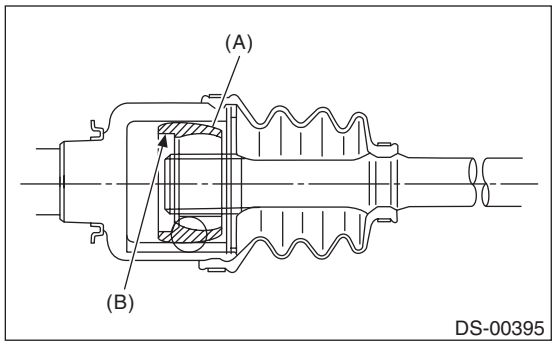
## 2. CVT MODEL

**CAUTION:**
**Wrap shaft splines with vinyl tape to protect the boot from scratches.**

NOTE:
Use specified grease.

***Grease:***
***BJ side: Raremax LF-G***
***DOJ side: Raremax LF-G***

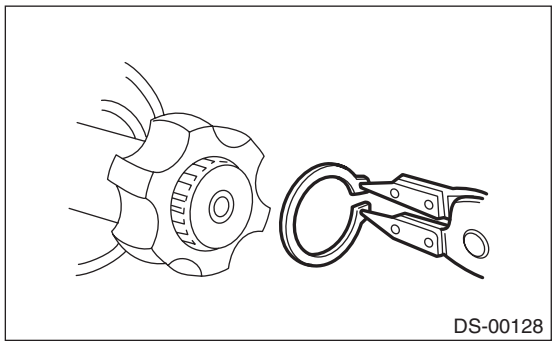
1) Install the DOJ inner race to the shaft.
   (1) Install the BJ boot to the specified position, and fill it with 50 to 60 g (1.76 to 2.12 oz) of specified grease.
   (2) Place the DOJ boot at the center of shaft.
   (3) Insert the DOJ cage onto shaft.



(A) Cage
(B) Cutout portion

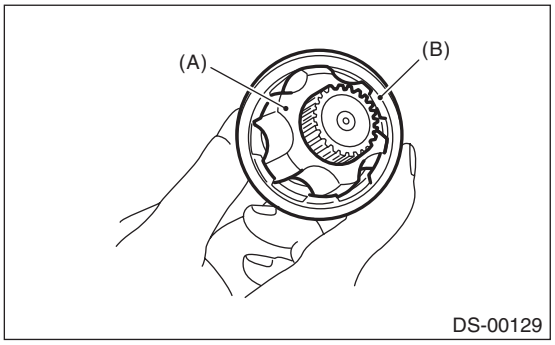
NOTE:
Insert the cage with the cutout portion facing the shaft end, since the cage has an orientation.

   (4) Install the DOJ inner race on shaft and fix the snap ring in place with pliers.



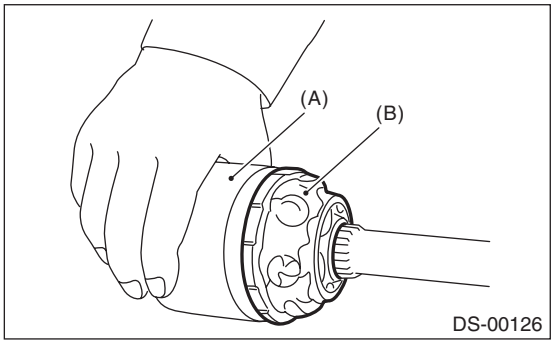
NOTE:
Confirm that the snap ring is completely fitted in the shaft groove.

2) Install the cage to the inner race.
(1) Install the cage (B) with the protruding section aligned with the track on the inner race (A), and turn by a half pitch.



(2) Fill 80 to 90 g (2.82 to 3.17 oz) of specified grease into the inner side of the DOJ outer race.
(3) Apply a thin coat of specified grease to the cage pocket and ball.
(4) Insert the ball bearings into the cage pocket.

3) Connect the shaft assembly to the outer race.
(1) Align the outer race track and ball positions, and place the shaft, inner race, cage and ball bearings in the original positions, and then fix outer race in place.



(A) Outer race
(B) Grease

(2) Install the snap ring in the groove on the DOJ outer race.

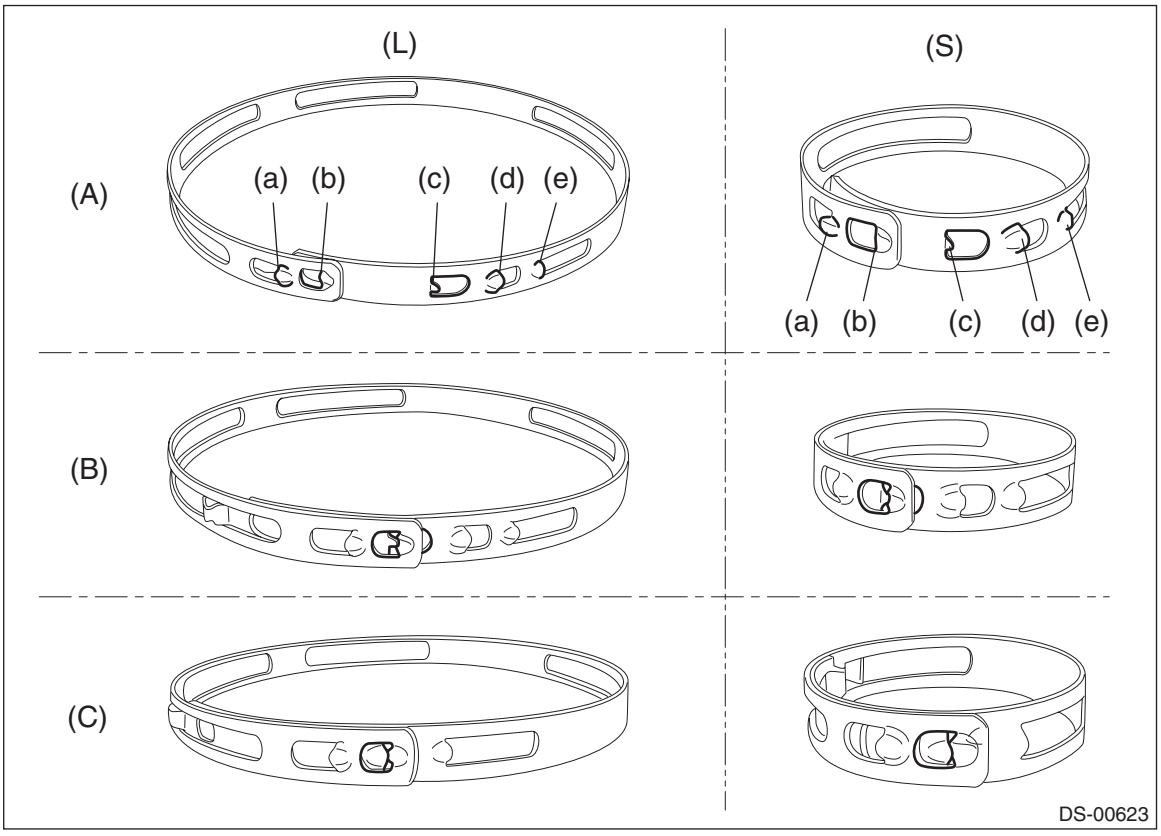
**CAUTION:**
**Be careful of the following items during installation:**
- **Make sure that the balls, cage and inner race are completely fitted in the outer race of DOJ.**
- **Use care not to place the matched position of snap ring in the ball groove of outer race.**
- **Pull the shaft lightly and assure that the circlip is completely fitted in the groove.**

(3) Apply an even coat of the specified grease [20 to 30 g (0.71 to 1.06 oz)] to the entire inner surface of boot. Also apply grease to the shaft.
(4) Install the DOJ boot and BJ boot taking care not to twist it.

NOTE:
- The inside of the large end of DOJ boot and the boot groove shall be cleaned so as to be free from grease and other substances.
- When installing the DOJ boot, position the outer race of DOJ at center of the stroke.

(5) Prepare a new band, pinch (a) and (e) of the band with needle nose pliers, and align it with the groove of the boot.

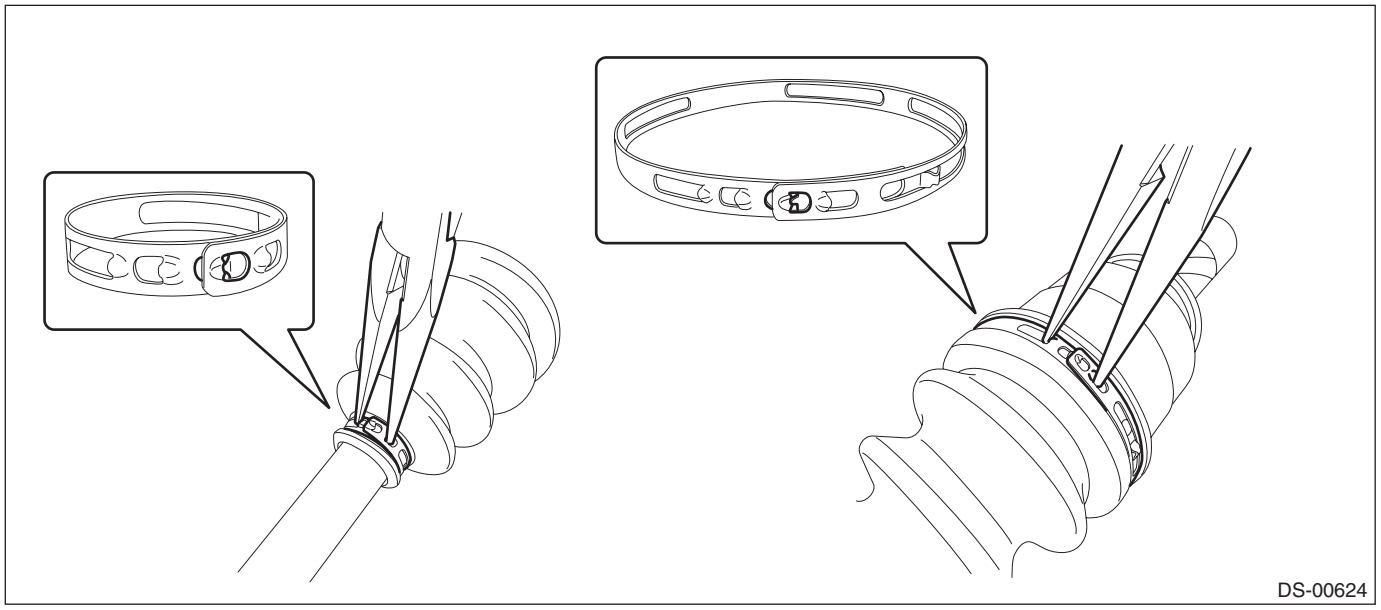
**CAUTION:**
- **Be careful not to damage the boot.**
- **When tightening boot, use care so that the air within the boot is appropriate.**



| | | | | | |
|---|---|---|---|---|---|
| (L) | Band for large diameter | (S) | Band for small diameter | | |
| (A) | Free position | (B) | Temporarily tightening position | (C) | Fully tightening position |
| (a) | Holding portion using pliers | (c) | Convex claw for temporarily tightening position | (e) | Holding portion using pliers |
| (b) | Concave claw | (d) | Convex claw | | |

(6) Pinch (a) and (e) of the band with needle nose pliers, and align the concave claw (b) with the convex claw (c) for temporarily tightening position.

***Preparation tool:***
***Needle nose pliers***



(7) Check the positions of the boot and band, align the concave claw (b) with the convex claw (d), and tighten the band.

4) Extend and retract the DOJ repeatedly to provide an equal coating of grease.

## E: INSPECTION

Check the removed parts for damage, wear, corrosion etc. Repair or replace if defective.

- **DOJ (Double Offset Joint):**

Check for seizure, corrosion, damage, wear and excessive play.

- **BJ (Bell Joint):**

Check for seizure, corrosion, damage and excessive play.

- **EBJ (High-Efficiency Compact Ball fixed Joint)**

Check for seizure, corrosion, damage and excessive play.

- **Shaft:**

Check for excessive bending, twisting, damage and wear.

- **Boot:**

Check for wear, warping, breakage and scratches.

- **Grease:**

Check for discoloration and fluidity.

# 9. General Diagnostic Table

## A: INSPECTION

NOTE:
Vibration while cruising may be caused by an unbalanced tire, improper tire inflation pressure, improper wheel alignment, etc.

| Symptoms | Possible cause | Corrective action |
|---|---|---|
| **Noise or vibration from propeller shaft** | • Center bearing<br>• Runout of propeller shaft<br>• Loose or gap at connections | Inspect the propeller shaft. <Ref. to DS-14, INSPECTION, Propeller Shaft.> |
| **Abnormal wheel vibration** | Wheel is out of balance. | Check the wheel balance. <Ref. to WT-6, WHEEL BALANCING, INSPECTION, Tire and Wheel.> |
| | Front wheel alignment | Check the front wheel alignment. <Ref. to FS-7, INSPECTION, Wheel Alignment.> |
| | Rear wheel alignment | Check the rear wheel alignment. <Ref. to RS-8, INSPECTION, Wheel Alignment.> |
| | Front strut | Check the front strut. <Ref. to FS-48, INSPECTION, Front Strut.> |
| | Rear shock absorber | Check the rear shock absorber. <Ref. to RS-32, INSPECTION, Rear Shock Absorber.> |
| | Front axle shaft | Check the front axle shaft. <Ref. to DS-70, INSPECTION, Front Drive Shaft.> |
| | Rear axle shaft | Check the rear axle shaft. <Ref. to DS-84, INSPECTION, Rear Drive Shaft.> |
| | Hub unit COMPL - front axle | Check the hub unit COMPL - front axle. <Ref. to DS-34, INSPECTION, Front Hub Unit Bearing.> |
| | Hub unit COMPL - rear axle | Check the hub unit COMPL - rear axle. <Ref. to DS-56, INSPECTION, Rear Hub Unit Bearing.> |
| **Noise from the underbody** | Wheel is out of balance. | Check the wheel balance. <Ref. to WT-6, WHEEL BALANCING, INSPECTION, Tire and Wheel.> |
| | Front wheel alignment | Check the front wheel alignment. <Ref. to FS-7, INSPECTION, Wheel Alignment.> |
| | Rear wheel alignment | Check the rear wheel alignment. <Ref. to RS-8, INSPECTION, Wheel Alignment.> |
| | Front strut | Check the front strut. <Ref. to FS-48, INSPECTION, Front Strut.> |
| | Rear shock absorber | Check the rear shock absorber. <Ref. to RS-32, INSPECTION, Rear Shock Absorber.> |

## C: CAUTION

• Wear appropriate work clothing, including a helmet, protective goggles and protective shoes when performing any work.
• Remove contamination including dirt and corrosion before removal, installation or disassembly.
• Keep the disassembled parts in order and protect them from dust and dirt.
• Before disconnecting connectors of sensors or units, be sure to disconnect the ground cable from battery.
• Before removal, installation or disassembly, be sure to clarify the failure. Avoid unnecessary removal, installation, disassembly and replacement.
• Vehicle components are extremely hot after driving. Be wary of receiving burns from heated parts.
• Be sure to tighten fasteners including bolts and nuts to the specified torque.
• Place shop jacks or rigid racks at the specified points.
• When removing, installing or replacing the VDCCM&H/U, VDCCM&H/U bracket, steering wheel or steering angle sensor, perform “VDC sensor midpoint setting mode” of the VDC. <Ref. to VDC-19, VDC SENSOR MIDPOINT SETTING MODE, ADJUSTMENT, VDC Control Module and Hydraulic Control Unit (VDCCM&H/U).>

## D: PREPARATION TOOL

### 1. SPECIAL TOOL

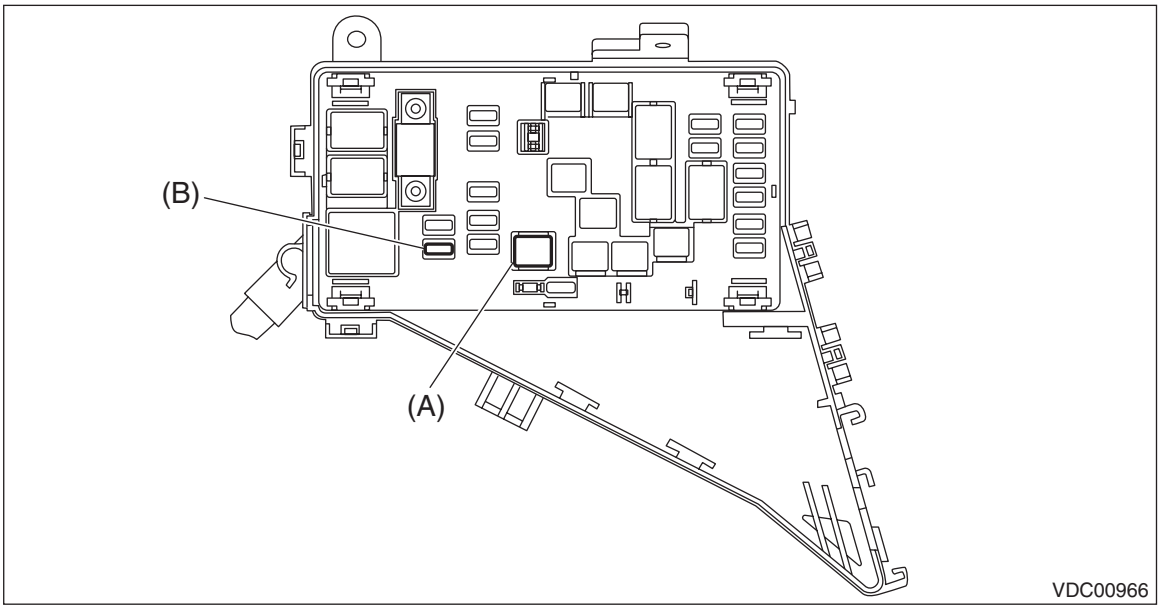
| ILLUSTRATION | TOOL NUMBER | DESCRIPTION | REMARKS |
|---|---|---|---|
|  ST1B022XU0 | 1B022XU0 | SUBARU SELECT MONITOR III KIT | Used for setting of each function and troubleshooting for electrical system. |

### 2. GENERAL TOOL

| TOOL NAME | REMARKS |
|---|---|
| Circuit tester | Used for measuring resistance and voltage. |
| Pressure gauge | Used for measuring oil pressure. |
| Oscilloscope | Used for measuring the sensor. |
| Steering wheel puller | Used for removing the steering wheel. |

# 2. Relay and Fuse

## A: LOCATION



| | | |
|---|---|---|
| Main fuse box | Fuse 50A (VDC CM&H/U) | (A) |
| | Fuse 30A (VDC CM&H/U) | (B) |

NOTE:
For other related fuses, refer to the wiring diagram. <Ref. to WI-15, Power Supply Circuit.>

## B: INSPECTION

### 1. CHECK FUSE

1) Remove the fuse and inspect visually.
2) If the fuse is blown out, replace the fuse.

# 3. Vehicle Dynamics Control System

## A: WIRING DIAGRAM

Refer to “Vehicle Dynamics Control System” in the wiring diagram. <Ref. to WI-152, WIRING DIAGRAM, Vehicle Dynamics Control System.>

## B: ELECTRICAL SPECIFICATION

Refer to the Control Module I/O Signal of the “Vehicle Dynamics Control System (VDC) (DIAGNOSTICS)”. <Ref. to VDC(diag)-12, ELECTRICAL SPECIFICATION, Control Module I/O Signal.>

## C: INSPECTION

Refer to the “Vehicle Dynamics Control System (VDC) (DIAGNOSTICS)”. <Ref. to VDC(diag)-86, INSPECTION, General Diagnostic Table.>

## D: NOTE

For operation procedures of each component of the vehicle dynamics control system, refer to the respective section.

- VDC control module & hydraulic control unit (VDCCM&H/U): <Ref. to VDC-9, VDC Control Module and Hydraulic Control Unit (VDCCM&H/U).>
- Yaw rate & G sensor: <Ref. to VDC-26, Yaw Rate and G Sensor.>
- Steering angle sensor: <Ref. to VDC-27, Steering Angle Sensor.>
- Front ABS wheel speed sensor: <Ref. to VDC-31, Front ABS Wheel Speed Sensor.>
- Rear ABS wheel speed sensor: <Ref. to VDC-34, Rear ABS Wheel Speed Sensor.>
- Front magnetic encoder: <Ref. to VDC-40, Front Magnetic Encoder.>
- Rear magnetic encoder: <Ref. to VDC-41, Rear Magnetic Encoder.>
- VDC OFF switch: <Ref. to VDC-42, VDC OFF Switch.>

# 4. VDC Control Module and Hydraulic Control Unit (VDCCM&H/U)

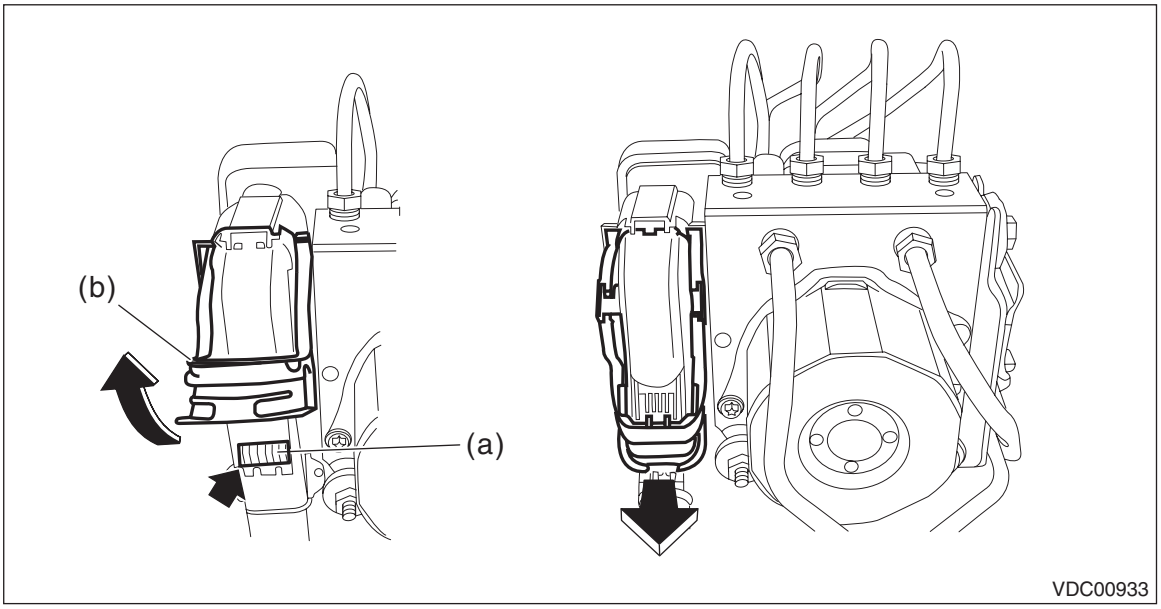
## A: REMOVAL

1) Disconnect the ground cable from battery.
2) Remove the intake boot. <Ref. to IN(H4DO)-12, REMOVAL, Air Intake Boot.>

**CAUTION:**
**Move aside the intake boot to perform the operation without disconnecting the PCV hose.**

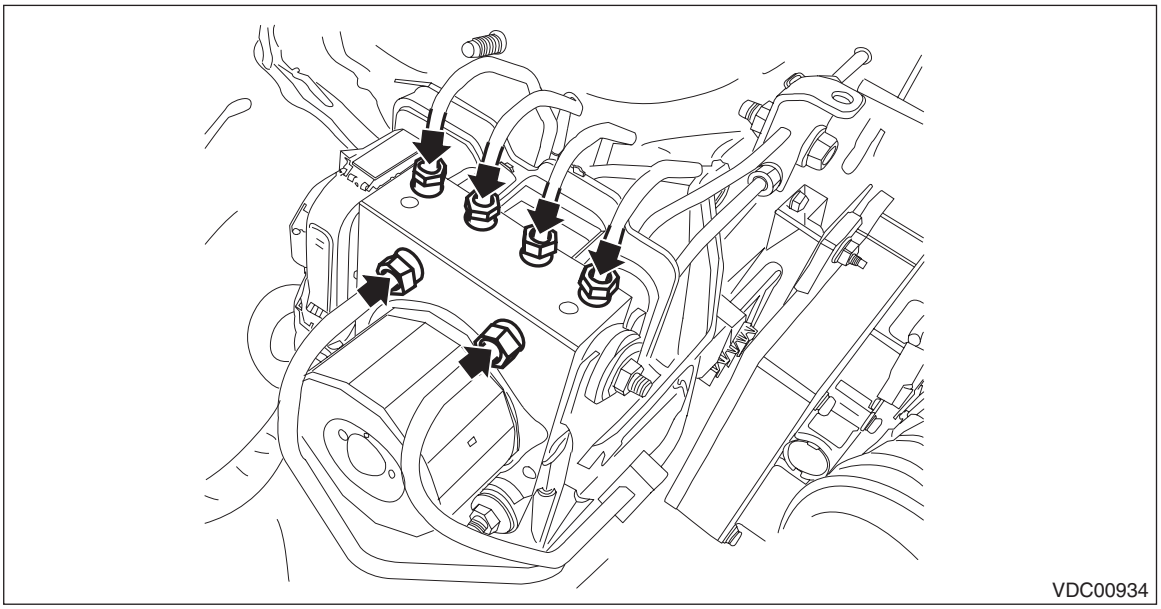
3) Remove the VDC control module & hydraulic control unit (VDCCM&H/U).
   (1) Remove any dirt from around the VDCCM&H/U.
   (2) Pull up the lock lever (b) while pressing the lock button (a) and disconnect the VDCCM&H/U connector.

**CAUTION:**
**Do not pull on the harness when disconnecting the connector.**



(3) Using a flare nut wrench, disconnect each brake pipe from VDCCM&H/U.

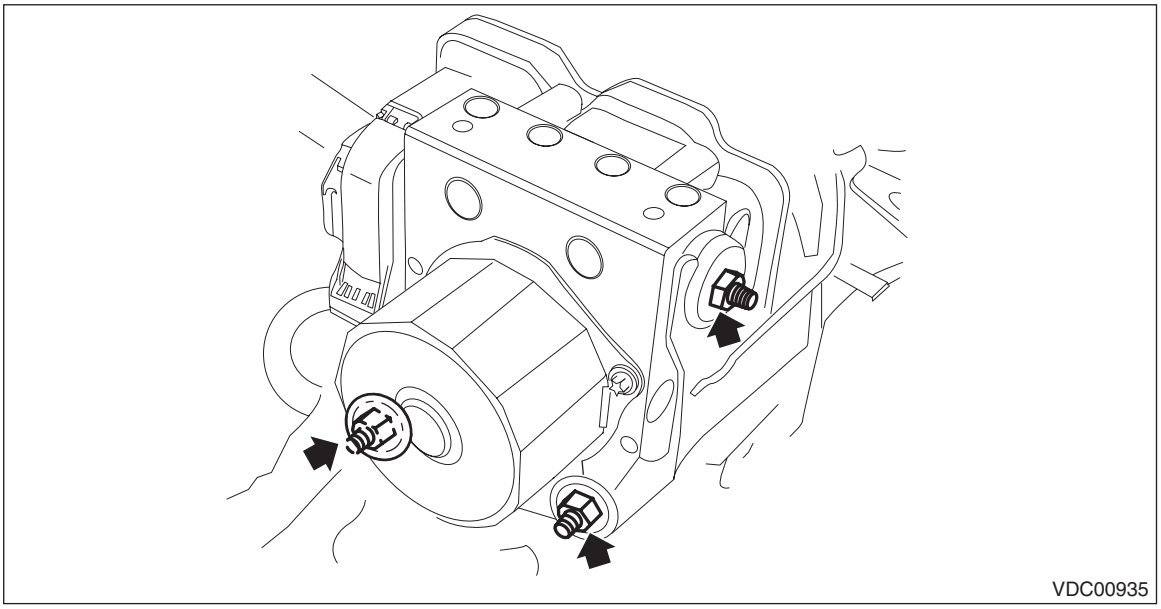
**CAUTION:**
**• Wrap the brake pipe with a vinyl bag so as not to spill the brake fluid on the painted surface of the vehicle body.**
**• If brake fluid is spilled on the painted surface of the vehicle body, wash it off immediately with water and wipe clean.**



VDC00934

(4) Remove the nuts and remove the VDCCM&H/U from the bracket - hydraulic unit.

**CAUTION:**
- **Do not drop or bump the VDCCM&H/U.**
- **Do not turn the VDCCM&H/U upside down or place it sideways for storage.**
- **Be careful not to let foreign matter enter the VDCCM&H/U.**
- **Be careful that no water and fluid enter the connectors.**



VDC00935

## B: INSTALLATION

**CAUTION:**
**• When installing the VDCCM&H/U to the bracket - hydraulic unit, make sure that there is no oil adhered to the bolts and the threads of VDCCM&H/U. If the oil is adhered, degrease it carefully before tightening.**
**• Connect the VDCCM&H/U connector securely.**
**• When installing the VDCCM&H/U, replace the damper - hydraulic unit, spacer and nut with new parts.**
1) Install each part in the reverse order of removal.

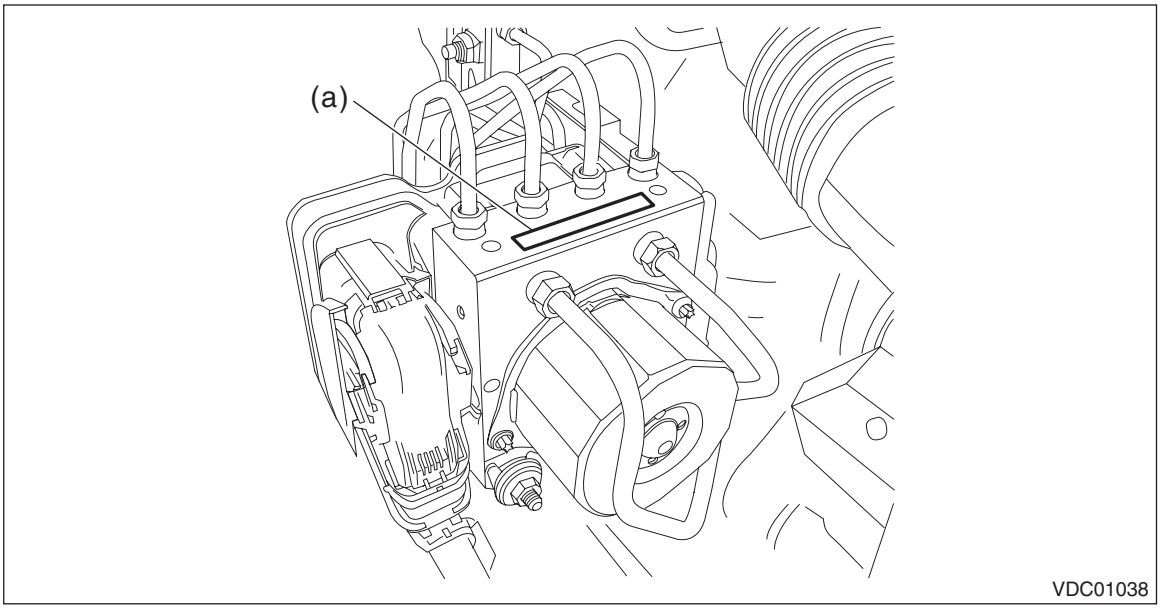
***Tightening torque:***
***Refer to "COMPONENT" of "General Description". <Ref. to VDC-5, VDC CONTROL MODULE & HYDRAULIC CONTROL UNIT (VDCCM&H/U), COMPONENT, General Description.>***
2) Bleed air from the brake system. <Ref. to BR-59, Air Bleeding.>
3) Perform parameter confirmation, selection, and registration.

NOTE:
• When the VDCCM&H/U is replaced with a new part, be sure to perform the selection · registration operation.
• Be sure to use the Subaru Select Monitor for the selection and registration of parameter.
• When the registration has not been performed, the DTC code "Parameter selection error" is detected together with the ABS/EBD/VDC warning light illumination.
(1) Check that the applied model and grade of the relevant vehicle are included. <Ref. to VDC(diag)-19, PARAMETER CHECK, OPERATION, Subaru Select Monitor.>
(2) On {Confirm on parameter} display, enter the applied model of the relevant vehicle and check if it is correct. If the information is not correct, perform parameter selection and registration. <Ref. to VDC(diag)-19, PARAMETER SELECTION, OPERATION, Subaru Select Monitor.>
4) Perform mode setting for each sensor.
• VDC sensor midpoint setting mode: <Ref. to VDC-19, VDC SENSOR MIDPOINT SETTING MODE, ADJUSTMENT, VDC Control Module and Hydraulic Control Unit (VDCCM&H/U).>

## C: INSPECTION

1) Check the identification (a) of the VDC control module & hydraulic control unit (VDCCM&H/U).

NOTE:
For the identification, refer to "SPECIFICATION" in "General Description". <Ref. to VDC-2, SPECIFICATION, General Description.>



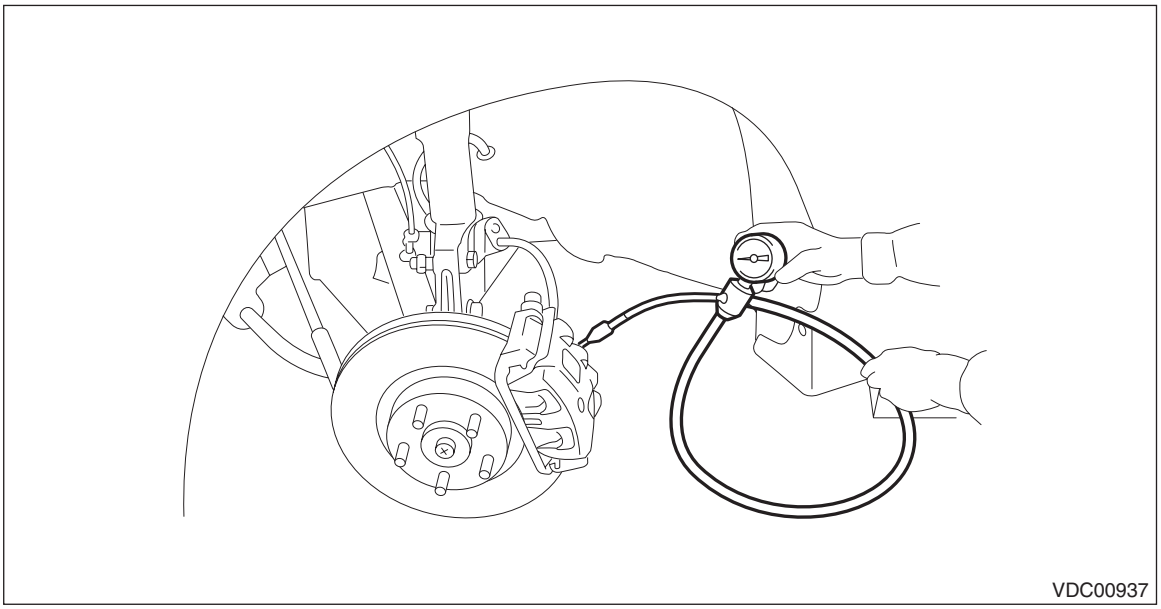
2) Check the condition of connection and settlement of connector, and correct or replace if defective.

## 1. CHECKING THE HYDRAULIC UNIT ABS OPERATION BY PRESSURE GAUGE

1) Lift up the vehicle, and then remove the wheel.
2) Remove the bleeder - screws from the FL and FR caliper bodies.
3) Connect two pressure gauges to FL and FR caliper bodies.

**CAUTION:**
- **Use a pressure gauge used exclusively for brake fluid measurement.**
- **Do not use the pressure gauge used for the measurement of transmission oil. Doing so will cause the piston seal to expand and deform.**

NOTE:
Wrap sealing tape around the pressure gauge.



4) Bleed air from the pressure gauges and the FL and FR caliper bodies.
5) Perform ABS sequence control. <Ref. to VDC-20, ABS Sequence Control.>

NOTE:
When the hydraulic unit begins to work, first the FL side performs decompression, hold and compression, and then the FR side performs decompression, hold and compression.
6) Read values indicated on the pressure gauge and check if the fluctuation of the values between decompression and compression meets the standard values. Depress the brake pedal and check that the kick-back is normal, and tightness is normal.

| Inspection conditions | Front wheel | Rear wheel |
|---|---|---|
| Initial value | 3,500 kPa (36 kgf/cm$^2$, 511 psi) | 3,500 kPa (36 kgf/cm$^2$, 511 psi) |
| When depressurized | 500 kPa (5 kgf/cm$^2$, 73 psi) or less | 500 kPa (5 kgf/cm$^2$, 73 psi) or less |
| When pressurized | 3,500 kPa (36 kgf/cm$^2$, 511 psi) or more | 3,500 kPa (36 kgf/cm$^2$, 511 psi) or more |

7) Disconnect the pressure gauges from FL and FR caliper bodies.
8) Install the bleeder - screws of FL and FR caliper bodies.
9) Remove the bleeder - screws from RL and RR caliper bodies.
10) Connect two pressure gauges to RL and RR caliper bodies.
11) Bleed air from RL and RR caliper bodies, and pressure gauge.

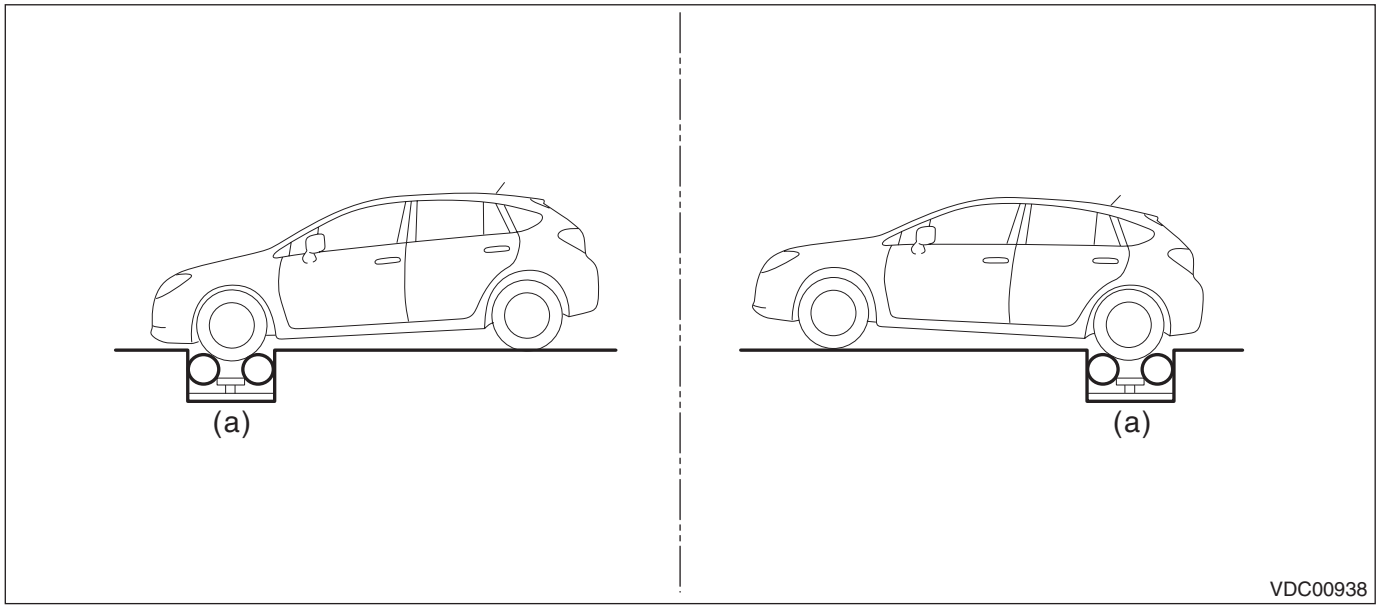
12) Perform ABS sequence control. <Ref. to VDC-20, ABS Sequence Control.>

NOTE:
When the hydraulic unit begins to work, first the RR side performs decompression, hold and compression, and then the RL side performs decompression, hold and compression.

13) Read values indicated on the pressure gauge and check if the fluctuation of the values between decompression and compression meets specification. Depress the brake pedal and check that the kick-back is normal, and tightness is normal.
14) Disconnect the pressure gauge from the RL and RR caliper bodies.
15) Install the bleeder - screws of RL and RR caliper bodies.
16) Bleed air from the brake system. <Ref. to BR-59, Air Bleeding.>

## 2. CHECKING THE HYDRAULIC UNIT ABS OPERATION WITH THE BRAKE TESTER

1) Set wheels other than the one to measure on free rollers.
2) Prepare for the ABS sequence control operation. <Ref. to VDC-20, ABS Sequence Control.>
3) Set the front wheels or rear wheels on the brake tester (a) and set the gear to neutral.



4) Operate the brake tester.
5) Perform ABS sequence control. <Ref. to VDC-20, ABS Sequence Control.>
6) When the hydraulic unit begins to work, check the following work sequence.
   (1) The FL wheel performs decompression, hold and compression in sequence, and subsequently the FR wheel repeats the cycle.
   (2) The RR wheel performs decompression, hold and compression in sequence, and subsequently the RL wheel repeats the cycle.
7) Read values indicated on the brake tester and check if the fluctuation of the values between decompression and compression meets specification.

| Inspection conditions | Front wheel | Rear wheel |
|---|---|---|
| Initial value | 1,000 N<br>(102 kgf, 225 lb) | 1,000 N<br>(102 kgf, 225 lb) |
| When depressurized | 500 N<br>(51 kgf, 112 lb)<br>or less | 500 N<br>(51 kgf, 112 lb)<br>or less |
| When pressurized | 1,000 N<br>(102 kgf, 225 lb)<br>or more | 1,000 N<br>(102 kgf, 225 lb)<br>or more |

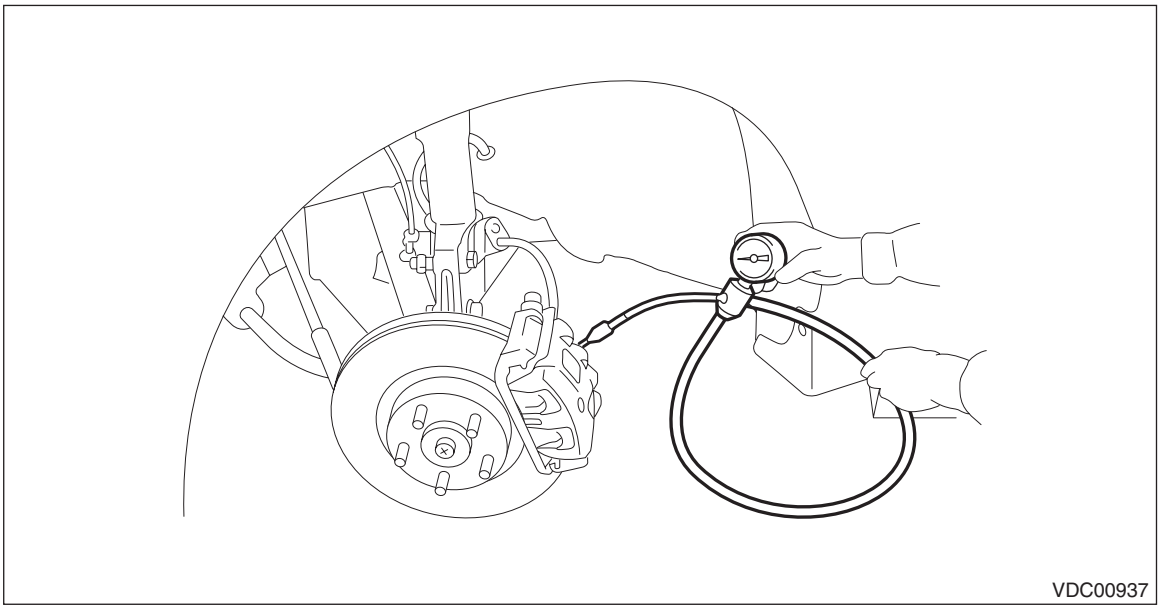
8) After the inspection, depress the brake pedal and check that it is not abnormally hard, and tightness is normal.

## 3. CHECKING THE HYDRAULIC UNIT VDC OPERATION USING A PRESSURE GAUGE

1) Lift up the vehicle, and then remove the wheel.
2) Remove the bleeder - screws from FL and FR caliper bodies.
3) Connect two pressure gauges to FL and FR caliper bodies.

**CAUTION:**
- **Use a pressure gauge used exclusively for brake fluid measurement.**
- **Do not use a pressure gauge used for the measuring transmission oil pressure, as the piston seal may expand and deform.**

NOTE:
Wrap sealing tape around the pressure gauge.



4) Bleed air from the pressure gauge.
5) Perform VDC sequence control. <Ref. to VDC-23, VDC Sequence Control.>

NOTE:
When the hydraulic unit begins to work, first the FL side performs compression, hold, and decompression, and then the FR side performs compression, hold, and decompression.
6) Read values indicated on the pressure gauge and check if the fluctuation of the values between decompression and compression meets specification. Depress the brake pedal and check that it is not abnormally hard, and tightness is normal.

| Inspection conditions | Front wheel | Rear wheel |
|---|---|---|
| When pressurized | 3,000 kPa (31 kgf/cm$^2$, 441 psi) or more | 3,000 kPa (31 kgf/cm$^2$, 441 psi) or more |
| When depressurized | 500 kPa (5 kgf/cm$^2$, 73 psi) or less | 500 kPa (5 kgf/cm$^2$, 73 psi) or less |

7) Disconnect the pressure gauges from FL and FR caliper bodies.
8) Install the bleeder - screws of FL and FR caliper bodies.
9) Remove the bleeder - screws from RL and RR caliper bodies.
10) Connect two pressure gauges to RL and RR caliper bodies.
11) Bleed air from RL and RR caliper bodies, and pressure gauge.

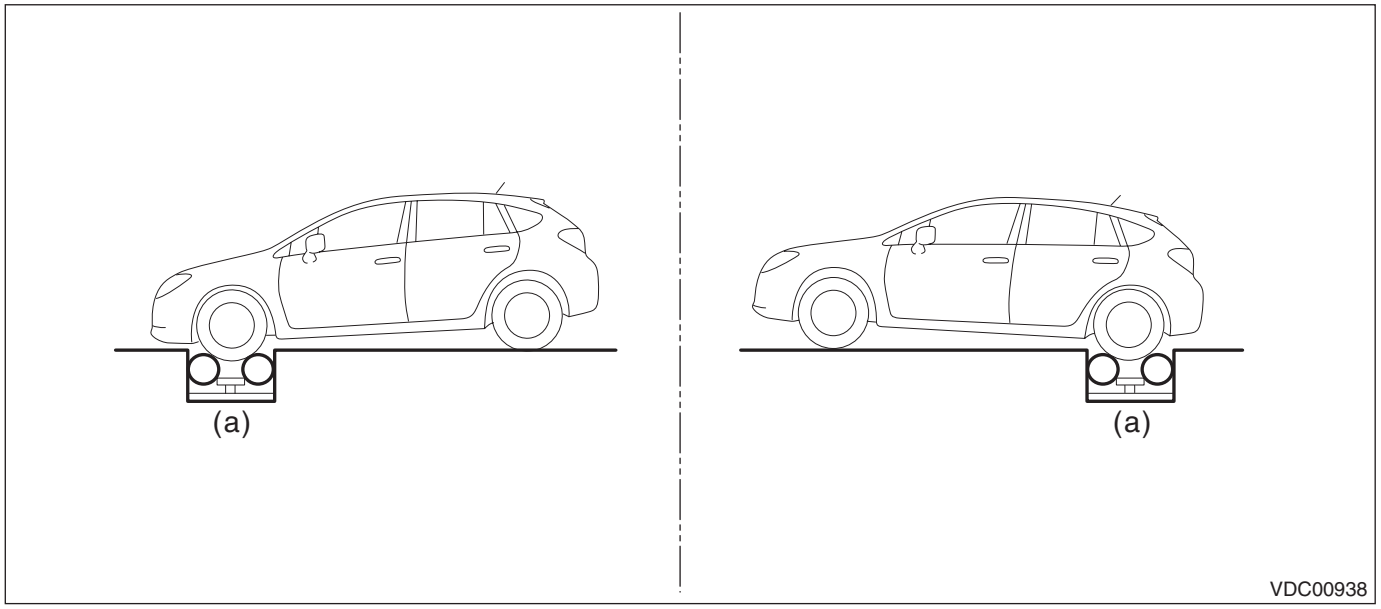
12) Perform VDC sequence control. <Ref. to VDC-23, VDC Sequence Control.>

NOTE:
When the hydraulic unit begins to work, first the RR side performs compression, hold, and decompression, and then the RL side performs compression, hold, and decompression.

13) Read the values indicated on the pressure gauges and check if it is within specification. Depress the brake pedal and check that it is not abnormally hard, and tightness is normal.
14) Disconnect the pressure gauge from the RL and RR caliper bodies.
15) Install the bleeder - screws of RL and RR caliper bodies.
16) Bleed air from the brake system. <Ref. to BR-59, Air Bleeding.>

## 4. CHECK HYDRAULIC UNIT VDC OPERATION WITH BRAKE TESTER

1) Set wheels other than the one to measure on free rollers.
2) Prepare to operate the VDC sequence control. <Ref. to VDC-23, VDC Sequence Control.>
3) Set the front wheels or rear wheels on the brake tester (a) and set the gear to neutral.



4) Operate the brake tester.
5) Perform VDC sequence control. <Ref. to VDC-23, VDC Sequence Control.>
6) When the hydraulic unit begins to work, check the following work sequence.
   (1) The FL wheel performs compression, hold and decompression in sequence, and subsequently the FR wheel repeats the cycle.
   (2) The RR wheel performs compression, hold and decompression in sequence, and subsequently the RL wheel repeats the cycle.
7) Read values indicated on the brake tester and check if the fluctuation of the values between decompression and compression meets specification.

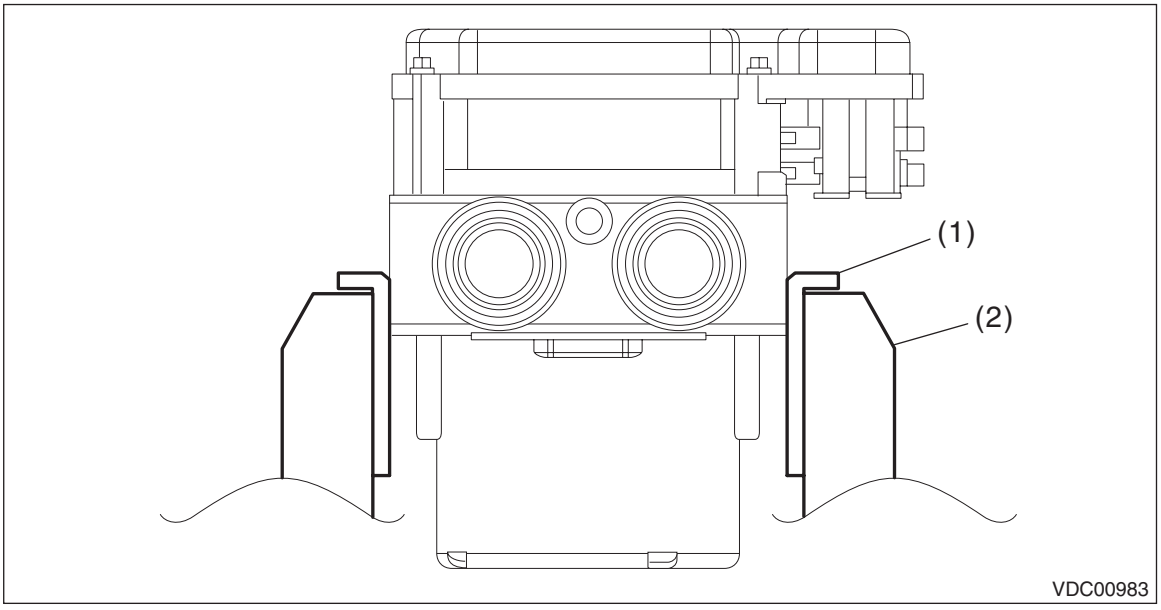
| Inspection conditions | Front wheel | Rear wheel |
|---|---|---|
| When pressurized | 2,000 N<br>(204 kgf, 450 lbf)<br>or more | 2,000 N<br>(204 kgf, 450 lbf)<br>or more |
| When depressurized | 500 N<br>(51 kgf, 112 lbf)<br>or less | 500 N<br>(51 kgf, 112 lbf)<br>or less |

8) After the inspection, depress the brake pedal and check that it is not abnormally hard, and tightness is normal.

## D: REPLACEMENT

**CAUTION:**
**• Because the pressure sensor built into the H/U is easily damaged by static electricity, start the operation after performing static electricity measures.**
**• Be careful not to touch the sensors in the H/U to prevent damage.**
**• Because the seal of the VDCCM cannot be replaced, do not pull or peel it by lifting it up.**
**• Because the screw of the H/U will become slightly worn in every replacement procedure, 5 times is the maximum number of times for replacement. If a problem is found such as not being able to torque the screw to specifications even before 5 replacement operations are performed, replace the H/U body.**
**• When installing the VDCCM, always use new screws.**
**• When the sealing surface of the VDCCM or H/U is dirty or damaged and it cannot be cleaned or repaired, replace with a new part.**
1) Remove the VDCCM&H/U. <Ref. to VDC-9, REMOVAL, VDC Control Module and Hydraulic Control Unit (VDCCM&H/U).>
2) To prevent entry of foreign objects and brake fluid leakage, plug the oil pressure port of the VDCCM&H/U using a screw plug, etc.
3) Set the pump motor section of the removed VDCCM&H/U face down on a vise.

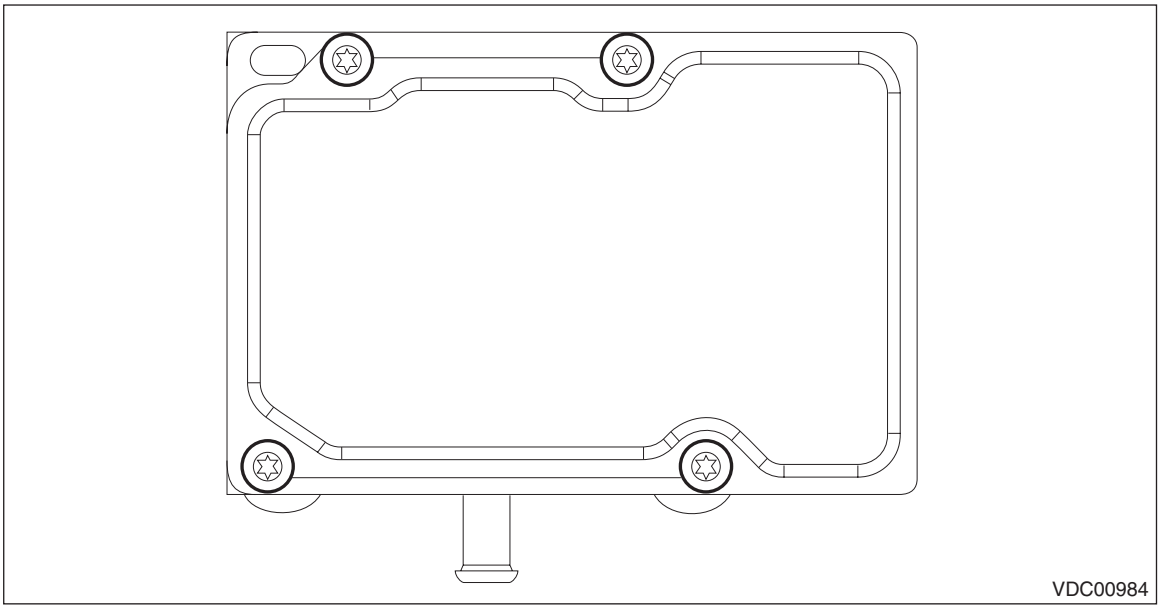
NOTE:
Before securing a part on a vise, place cushioning material such as wood blocks, aluminum plate, or cloth between the part and the vise.



(1) Aluminum plate, etc. (2) Vise

4) Using TORX® bit E5, remove the four screws of VDCCM.

**CAUTION:**
**Do not re-use the screws.**



5) Slowly pull out the VDCCM upward from the H/U.

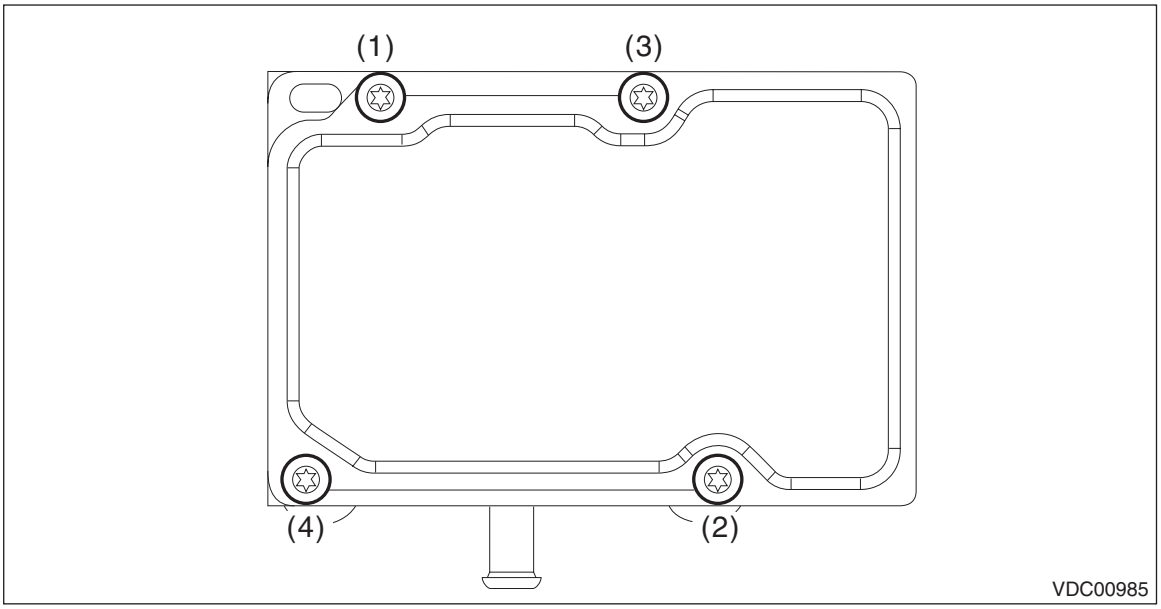
NOTE:
To prevent damaging of coil section, remove the VDCCM straight up from H/U without twisting.
6) Make sure there is no dirt or damage on the sealing surface of the H/U.

**CAUTION:**
- **Do not clean the VDCCM&H/U by applying compressed air.**
- **Even if damage is found on the H/U seal, do not attempt repair by filing or with a metal scraper. To remove the seal residue, always use a plastic scraper. Do not use chemical such as paint thinner, etc., to clean.**

7) Position the coil of the new VDCCM to align with the H/U valve.
8) To prevent deformation of the VDCCM housing cover, hold the corner of VDCCM and install it to the H/U without tilting.

9) Using a TORX® bit E5, attach/tighten new screws in the order of (1) through (4).

**CAUTION:**
**Always use new screws.**



***Tightening torque:***
***1.5 N·m (0.15 kgf-m, 1.1 ft-lb)***

10) Check that there is no foreign matter in mating surface between the VDCCM&H/U.
11) Using a TORX® bit E5, tighten the screws in the order of (1) through (4) again.

***Tightening torque:***
***3 N·m (0.31 kgf-m, 2.2 ft-lb)***

12) Check that there is no gap in the mating surface between VDCCM&H/U.
13) Install the VDCCM&H/U to the vehicle.

**CAUTION:**
**When installing the VDCCM&H/U, replace the damper - hydraulic unit, spacer and nut with new parts.**

14) Bleed air from the brake system. <Ref. to BR-59, PROCEDURE, Air Bleeding.>
15) Perform the selection and registration operation of parameter. <Ref. to VDC(diag)-19, PARAMETER SELECTION, OPERATION, Subaru Select Monitor.>

NOTE:
- After replacing the VDCCM, be sure to perform the selection · registration operation of parameter.
- For the selection and registration of parameter, the Subaru Select Monitor is required.
- When the registration has not been performed, the DTC code “Parameter selection error” is detected together with the ABS/EBD/VDC warning light illumination.

16) Check the parameter to confirm that the applied models and grades of the relevant vehicle are included. <Ref. to VDC(diag)-19, PARAMETER CHECK, OPERATION, Subaru Select Monitor.>
17) If the applied models and grades of the relevant vehicle are not included, perform the selection · registration operation of parameter with the {Confirm on parameter} screen again. <Ref. to VDC(diag)-19, PARAMETER SELECTION, OPERATION, Subaru Select Monitor.>
18) Execute Clear Memory after parameter selection and registration operations because the DTC for “Parameter selection error” is memorized.

# E: ADJUSTMENT

## 1. VDC SENSOR MIDPOINT SETTING MODE

After installing, replacing or adjusting the following parts, perform the VDC sensor midpoint setting mode.

- Steering angle sensor
- Steering wheel
- Suspension parts
- Wheel alignment
- VDCCM&H/U
- VDCCM&H/U bracket

1) Park the vehicle on a level surface, and set the steering wheel to the neutral position.
2) Connect the Subaru Select Monitor to data link connector.
   (1) Run the “PC application for Subaru Select Monitor”.
   (2) On «Main Menu» display, select {Each System Check}.
   (3) Select {Brake Control System}. When {VDC} is displayed, select the [OK] button.
   (4) From {Current Data Display & Save}, select {Steer Angle Sensor Op}, {Longitudinal G Sensor} and {Lateral G sensor Output}.
3) Check that the steering angle sensor output value is between –10 and 10 deg.
4) Check that output values for the longitudinal G sensor and lateral G sensor are -2 — 2 $m/s^2$.
5) From {Work Support}, select {VDC sensor midpoint setting mode}, and perform the setting according to the procedure displayed on the Subaru Select Monitor Screen.
6) Drive the vehicle for 10 minutes, and check that there is no system malfunction or the warning light illumination while driving.
7) Make sure that the DTC is not stored.

# 5. ABS Sequence Control

## A: OPERATION

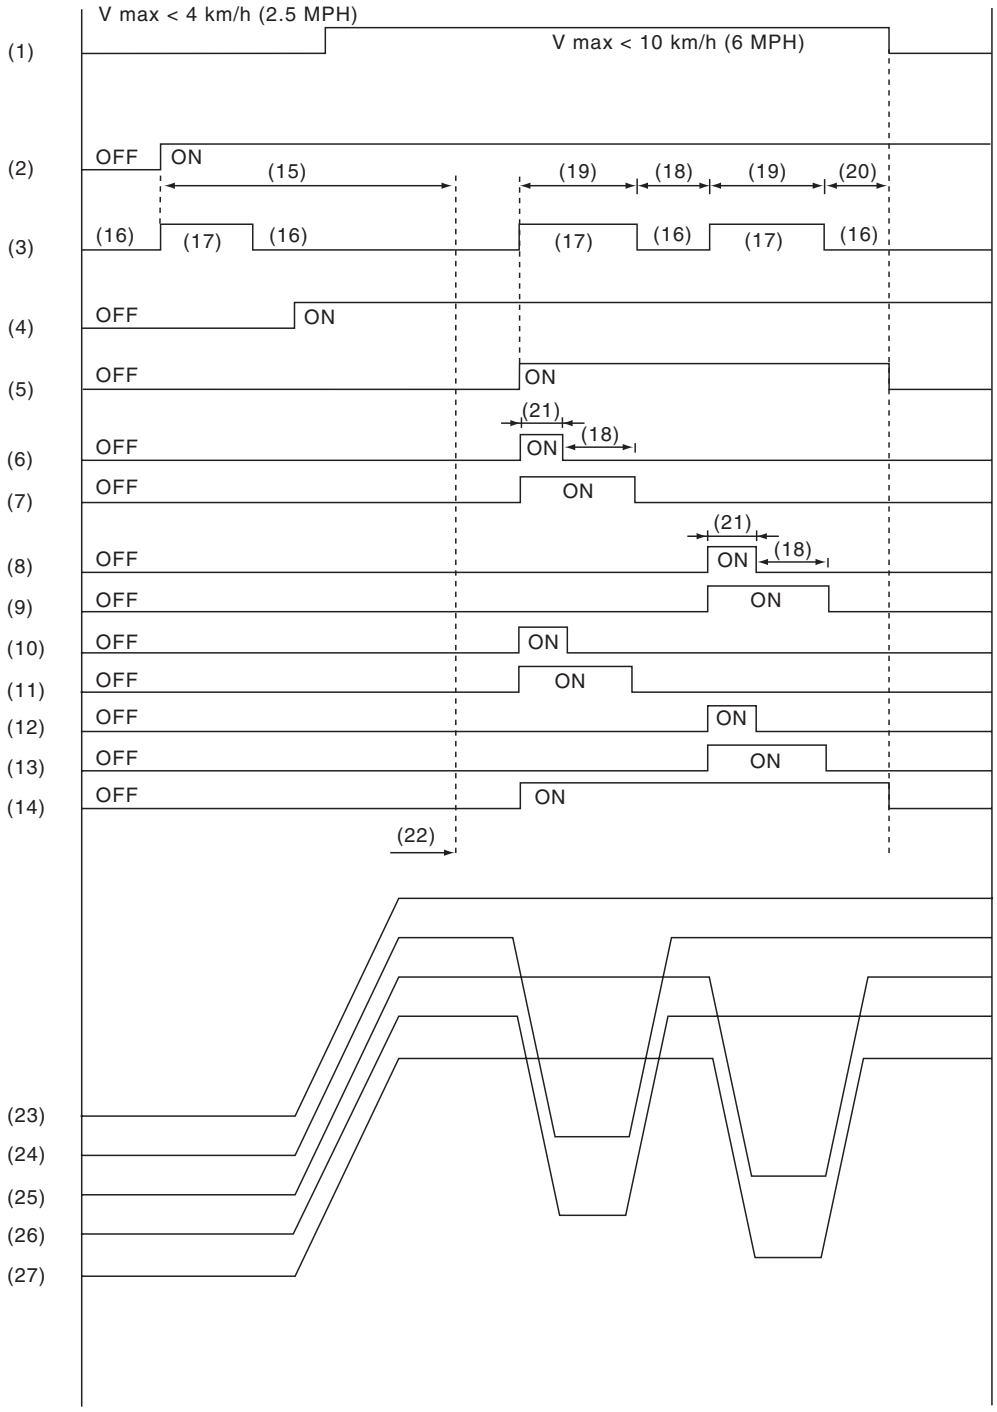
1) While the ABS sequence control is being performed, the operation of the hydraulic unit can be checked using the brake tester or pressure gauge after the hydraulic unit solenoid valve operation.
2) ABS sequence control can be started by the Subaru Select Monitor.

### 1. ABS SEQUENCE CONTROL WITH SUBARU SELECT MONITOR

NOTE:
In the event of any trouble, the ABS sequence control will not operate.
1) Connect the Subaru Select Monitor to data link connector.
   (1) Run the “PC application for Subaru Select Monitor”.
   (2) On «Main Menu» display, select {Each System Check}.
   (3) Select {Brake Control System}. When {VDC} is displayed, select the [OK] button.
   (4) Select the {ABS Sequence Control Mode} from {Work Support}.
2) Follow the procedures displayed in the Subaru Select Monitor to execute the following.
   (1) When using a brake tester, depress the brake pedal with a force of 100 N (10.2 kgf, 22.5 lbf).
   (2) When using a pressure gauge, press the brake pedal so that the pressure gauge indicates 3,500 kPa (36 kgf/cm$^2$, 511 psi).
3) The brake system being operated is displayed on the Subaru Select Monitor.

## 2. CONDITIONS FOR ABS SEQUENCE CONTROL

NOTE:
The control operation starts at point A.



VDC00988

(1) All wheel speed
(2) Ignition key
(3) ABS warning light
(4) Switch - stop light
(5) Valve relay
(6) FL decompression valve
(7) FL compression valve
(8) FR decompression valve
(9) FR compression valve
(10) RR decompression valve
(11) RR compression valve
(12) RL decompression valve
(13) RL compression valve
(14) Pump motor
(15) A few seconds
(16) Light OFF
(17) Light ON
(18) 1.0 second
(19) 1.4 seconds
(20) 0.6 seconds
(21) 0.4 seconds

(23) Master cylinder pressure
(24) FL wheel cylinder pressure
(25) FR wheel cylinder pressure
(26) RR wheel cylinder pressure
(27) RL wheel cylinder pressure

# B: SPECIFICATION

## 1. CONDITIONS FOR COMPLETION OF ABS SEQUENCE CONTROL

When the following conditions develop, the ABS sequence control stops and ABS operation is returned to the normal control mode.

- When the speed of at least one wheel reaches 10 km/h (6 MPH).
- When the brake pedal is released during ABS sequence control and the switch - stop light becomes OFF.
- After completion of ABS sequence control.
- When a malfunction is detected.

# 6. VDC Sequence Control

## A: OPERATION

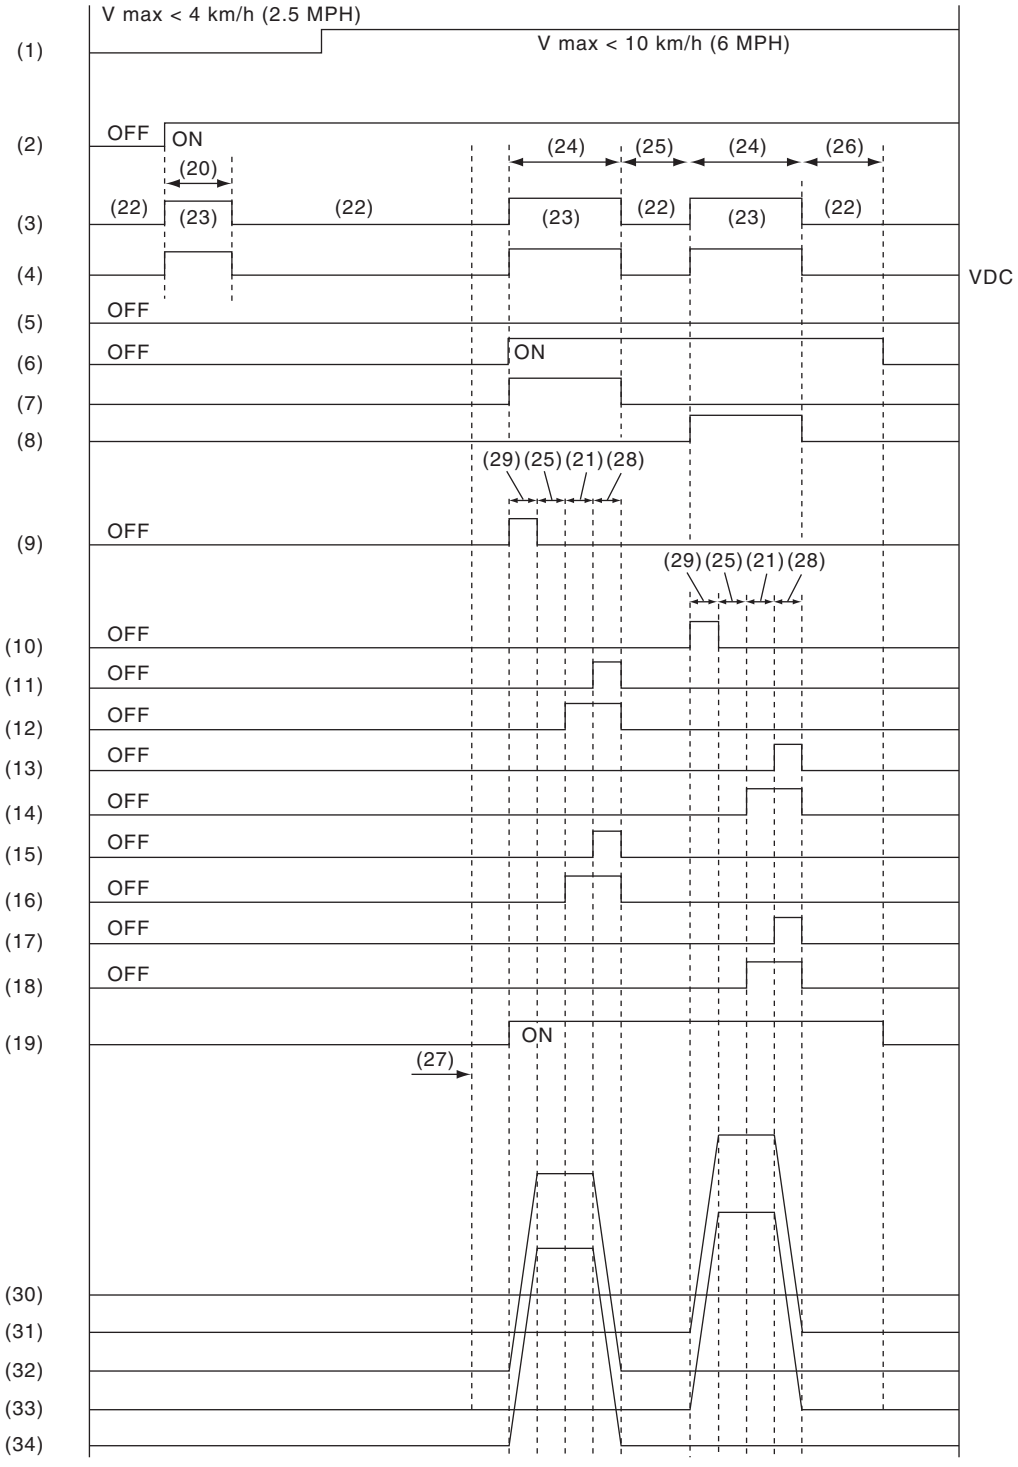
1) While the VDC sequence control is performed, the operation of the hydraulic unit can be checked using the brake tester or pressure gauge after the hydraulic unit solenoid valve is operated.
2) VDC sequence control can be started by Subaru Select Monitor.

### 1. VDC SEQUENCE CONTROL WITH SUBARU SELECT MONITOR

NOTE:
In the event of any trouble, sequence control will not operate.
1) Connect the Subaru Select Monitor to data link connector.
   (1) Run the “PC application for Subaru Select Monitor”.
   (2) On «Main Menu» display, select {Each System Check}.
   (3) Select {Brake Control System}. When {VDC} is displayed, select the [OK] button.
   (4) Select the {VDC Function Check Mode} from {Work Support}.
2) Operate according to the procedures displayed in the Subaru Select Monitor.
3) The brake system being operated is displayed on the Subaru Select Monitor.

## 2. CONDITIONS FOR VDC SEQUENCE CONTROL

NOTE:
The control operation starts at point A.



(1) All wheel speed
(2) Ignition key
(3) ABS warning light
(4) VDC warning light
(5) Switch - stop light
(6) Valve relay

(33) RL wheel cylinder pressure
(34) RR wheel cylinder pressure

# B: SPECIFICATION

## 1. CONDITIONS FOR COMPLETION OF VDC SEQUENCE CONTROL

When the following conditions develop, the VDC sequence control stops and VDC operation is returned to the normal control mode.

- When the speed of at least one wheel reaches 10 km/h (6 MPH).
- After completion of VDC sequence control.
- When a malfunction is detected.

# 7. Yaw Rate and G Sensor

## A: NOTE

Yaw rate & longitudinal G and lateral G sensor are integrated with the VDC control module&hydraulic control module (VDCCM&H/U).

## B: INSPECTION

### 1. YAW RATE & LONGITUDINAL G AND LATERAL G SENSOR SIGNAL

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK YAW RATE & G SENSOR.**<br>1) Check the installation condition of the VDC control module & hydraulic control module (VDCCM&H/U).<br>2) Select “Current Data Display & Save” on the Subaru Select Monitor.<br>3) Read the output of yaw rate & G sensor. | When the vehicle is placed horizontally, are the displayed values –1.5 — 1.5 $m/s^2$ for longitudinal G and lateral G sensor, and –4 — 4 deg/s for yaw rate sensor? | Go to step **2**. | Replace the VDC control module & hydraulic control unit (VDCCM&H/U). |
| 2 | **PERFORM DRIVING TEST.**<br>Drive for approximately 10 minutes, and check that there is no system malfunction or the warning light illumination while driving. | Is there any abnormal movement or the warning light illumination while driving? | Perform the diagnosis according to DTCs for the VDC system. <Ref. to VDC(diag)-37, List of Diagnostic Trouble Code (DTC).> | G sensor is normal. |

# 8. Steering Angle Sensor

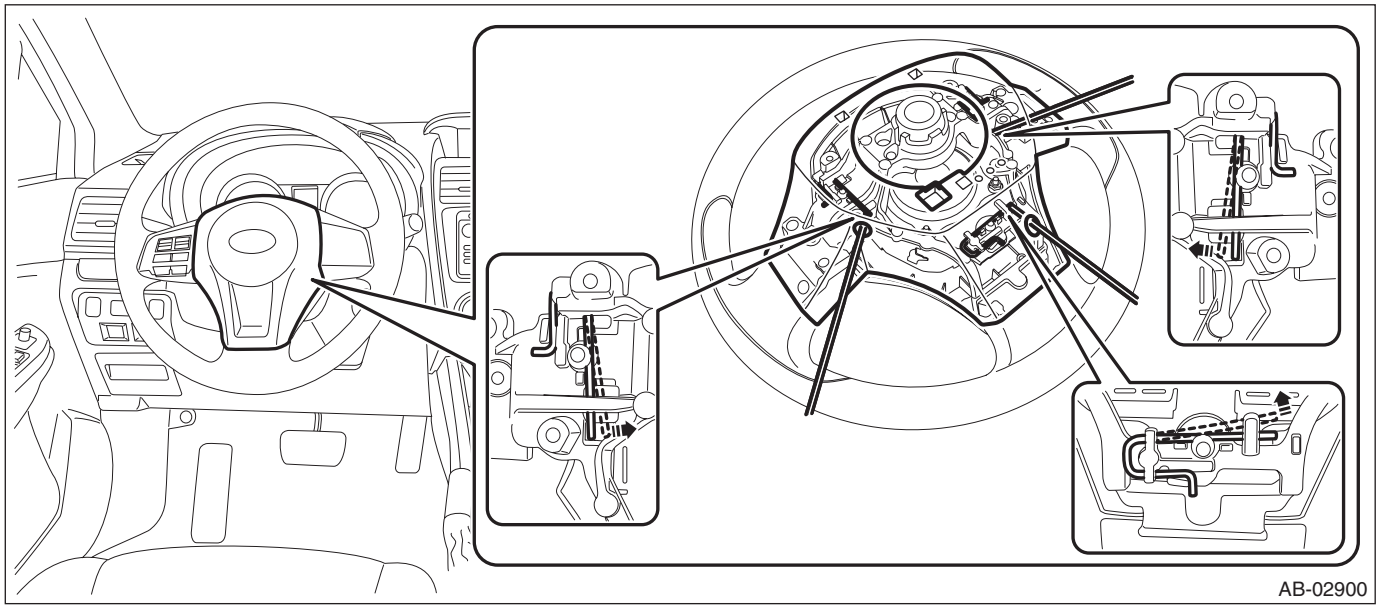
## A: REPLACEMENT

**CAUTION:**
**When the steering wheel and steering angle sensor have been removed, perform "VDC sensor midpoint setting mode" of the VDC. <Ref. to VDC-19, VDC SENSOR MIDPOINT SETTING MODE, ADJUSTMENT, VDC Control Module and Hydraulic Control Unit (VDCCM&H/U).>**

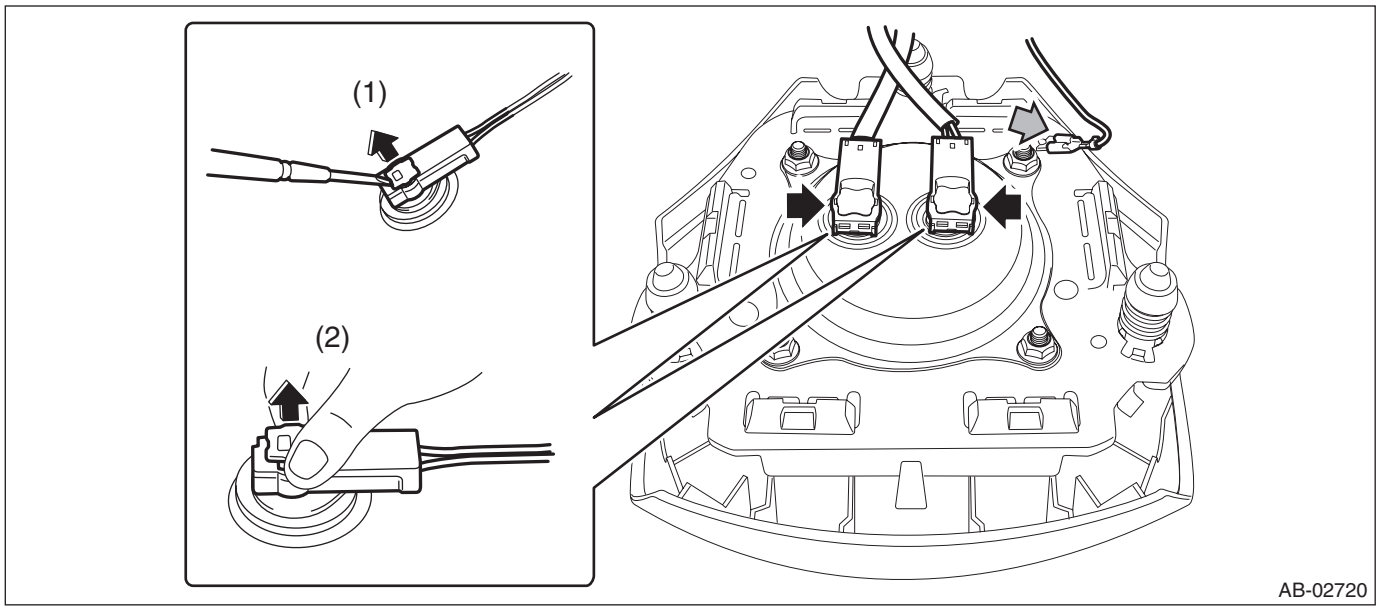
1) Position the front wheels straight ahead. (After moving a vehicle 5 m (16 ft) or more with front wheels positioned straight ahead, make sure that the vehicle moves straight ahead.)
2) Turn the ignition switch to OFF.
3) Disconnect the ground cable from battery and wait for at least 60 seconds before starting work.
4) Remove the driver's airbag module.

**CAUTION:**
**Before servicing the airbag module, always refer to "CAUTION" of "General Description" in the "AIRBAG SYSTEM" section. <Ref. to AB-11, CAUTION, General Description.>**

(1) Using a hexagon wrench wrapped with protective tape, push in the snap pins to disengage the locks (3 places).



(2) Disconnect the horn harness and airbag connector, and remove the airbag module. <Ref. to AB-24, DRIVER'S AIRBAG MODULE, CURTAIN AIRBAG MODULE & PRETENSIONER, PROCEDURE, Airbag Connector.>

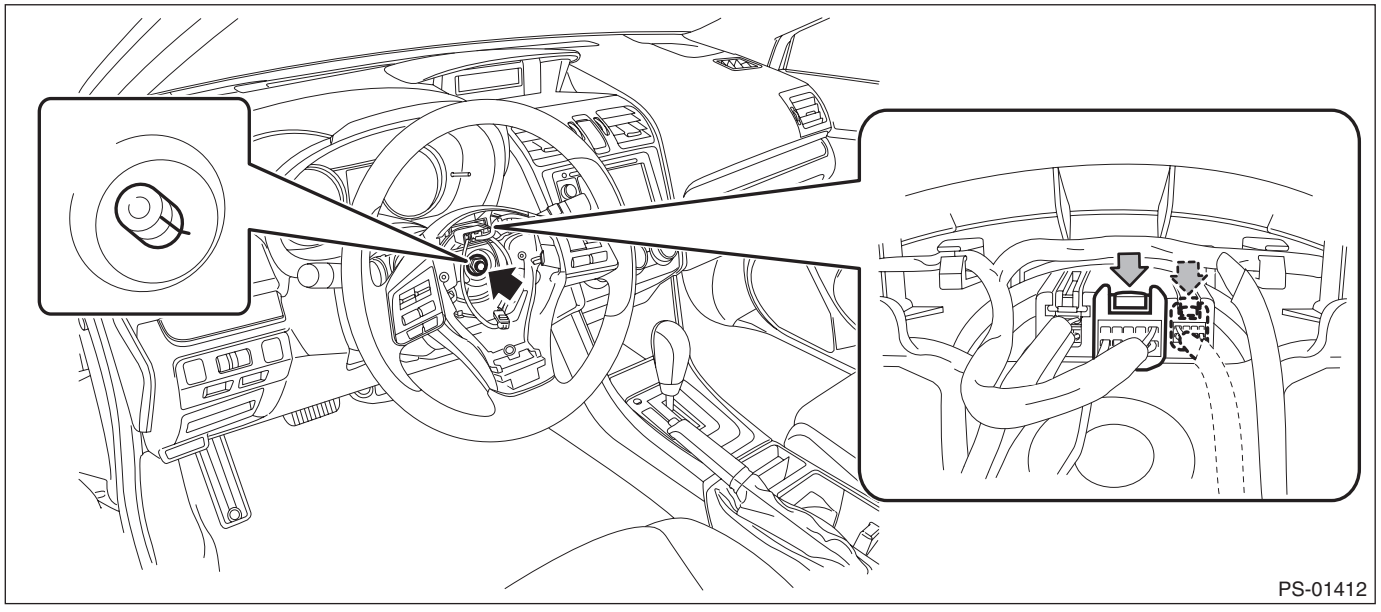


5) Remove the steering wheel.

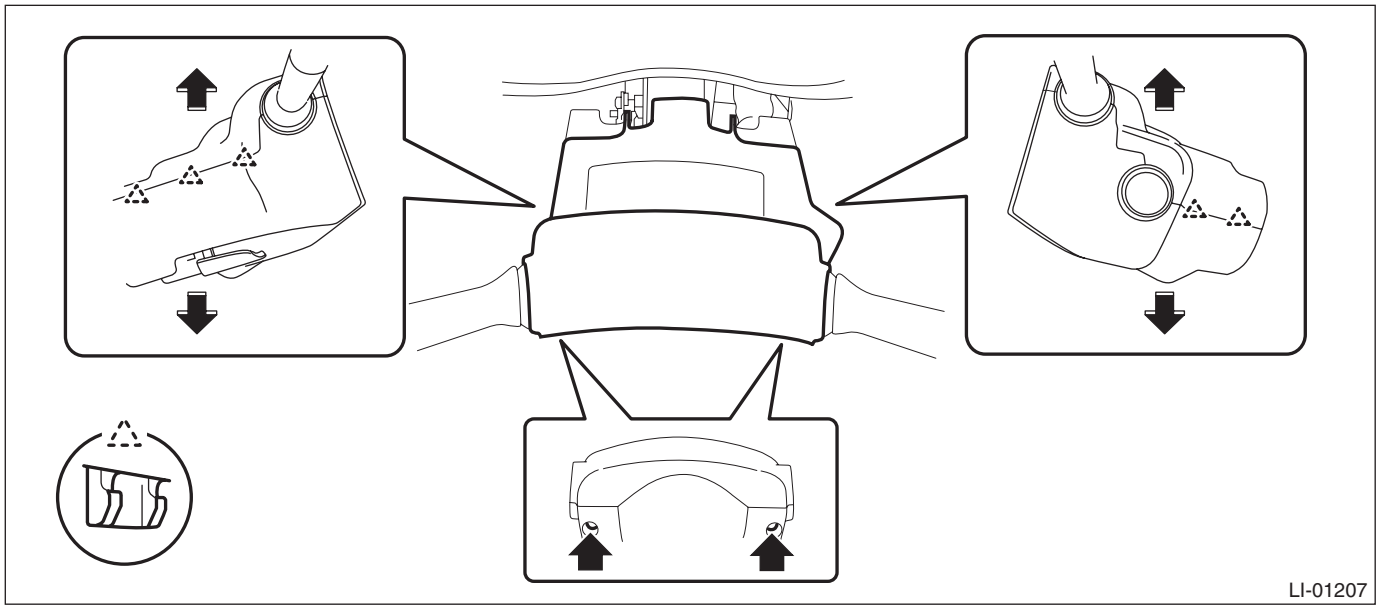
**CAUTION:**
**• Always use the steering wheel puller for removal to avoid deforming the steering wheel.**
**• If the steering wheel has been removed, make sure that the steering roll connector is not turned from the original position.**

***PREPARATION TOOL:***
***Steering wheel puller***

(1) Disconnect the connector and remove the nut.
(2) Put alignment marks and remove the steering wheel.



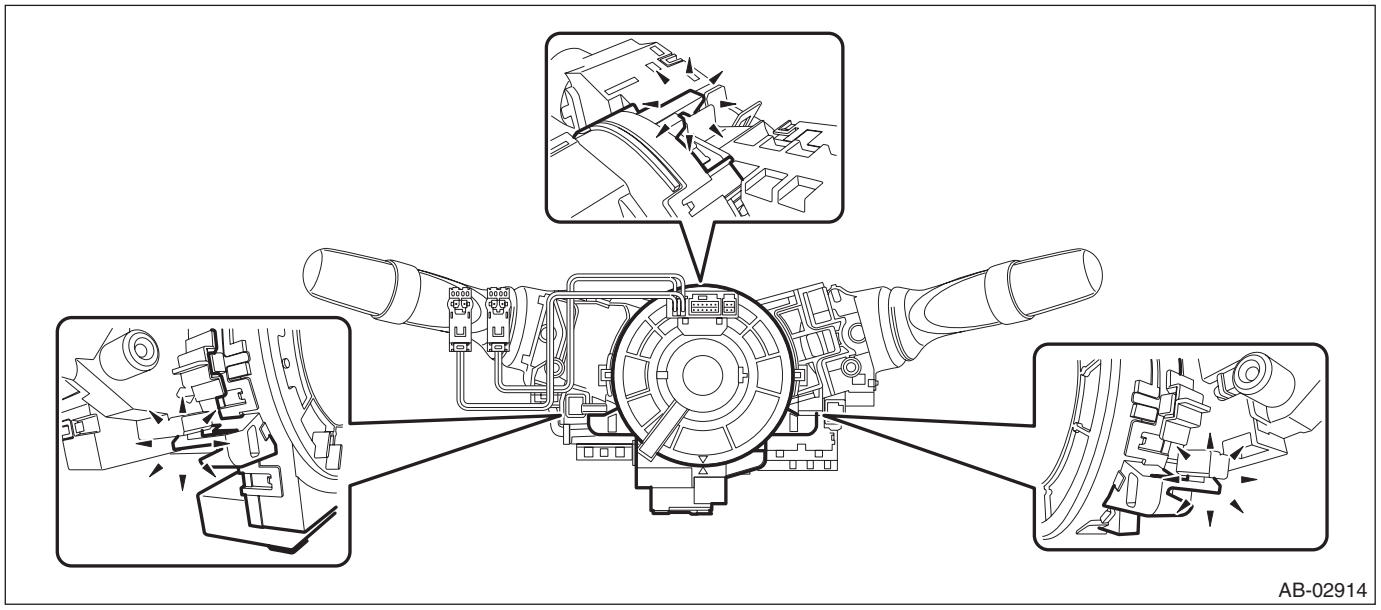
6) Remove the cover assembly - column.
(1) Release the screw and claw, and remove the cover assembly - column UPR and the cover assembly - column LWR.



LI-01207

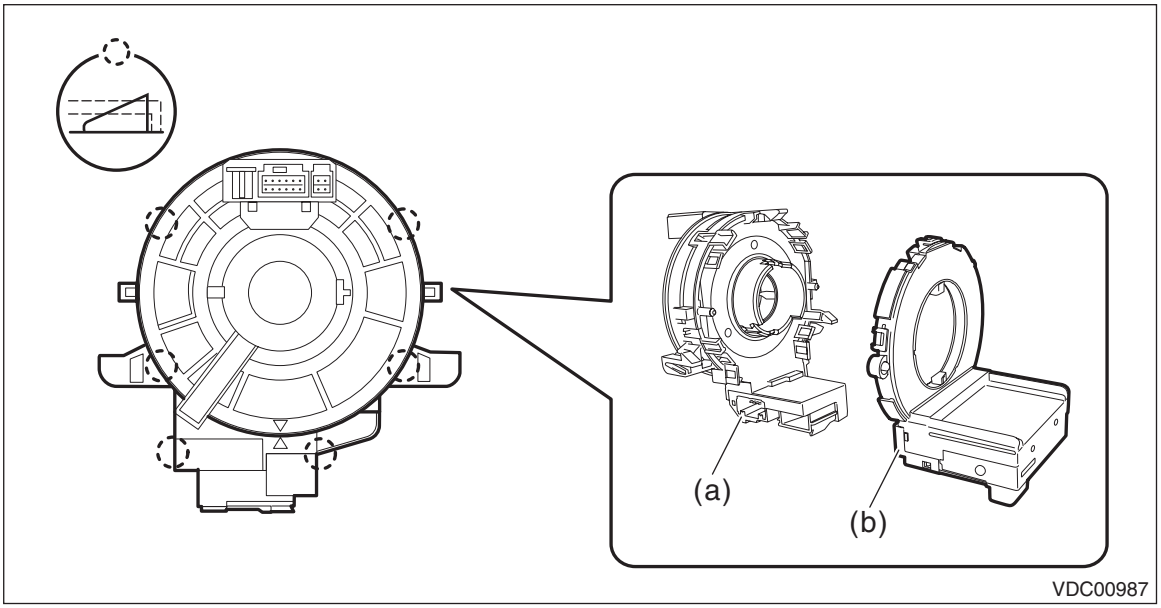
7) Remove the steering roll connector.

**CAUTION:**
**Make sure that the steering roll connector is not turned from the original position.**
(1) Disconnect the connector under the steering roll connector.
(2) Release the claws and remove the steering roll connector.



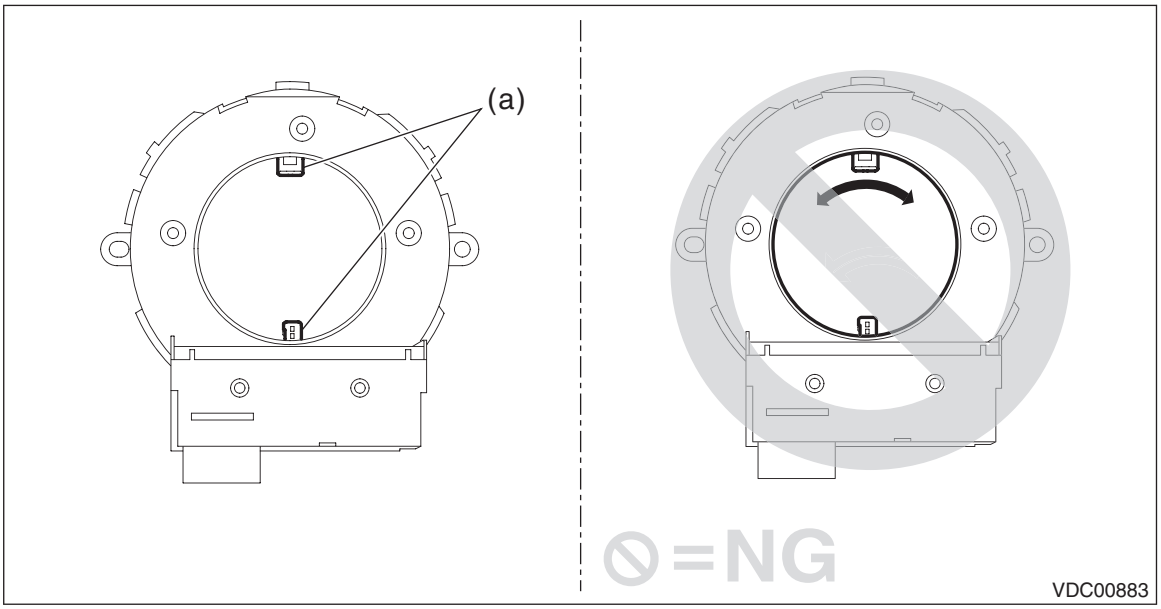
AB-02914

8) Remove the steering angle sensor.
(1) Release the claws and remove the steering angle sensor (b) from the steering roll connector (a).



9) Install the steering angle sensor.
(1) Apply grease to the protrusion (a) of new steering angle sensor.

**CAUTION:**
**Do not rotate the steering angle sensor protrusion.**



(2) Align the center of steering roll connector. <Ref. to AB-107, INSTALLATION, Roll Connector.>
(3) Align the position of the protrusion and install the steering angle sensor to the steering roll connector.
10) Install each part in the reverse order of removal.

***Tightening torque:***
***Steering wheel: 39 N·m (3.98 kgf-m, 28.8 ft-lb)***

***Clearance:***
***Cover assembly - column to steering wheel: 4 — 6 mm (0.16 — 0.24 in)***
11) After installation, perform the neutral position setting of the steering angle sensor. <Ref. to VDC-19, VDC SENSOR MIDPOINT SETTING MODE, ADJUSTMENT, VDC Control Module and Hydraulic Control Unit (VDCCM&H/U).>

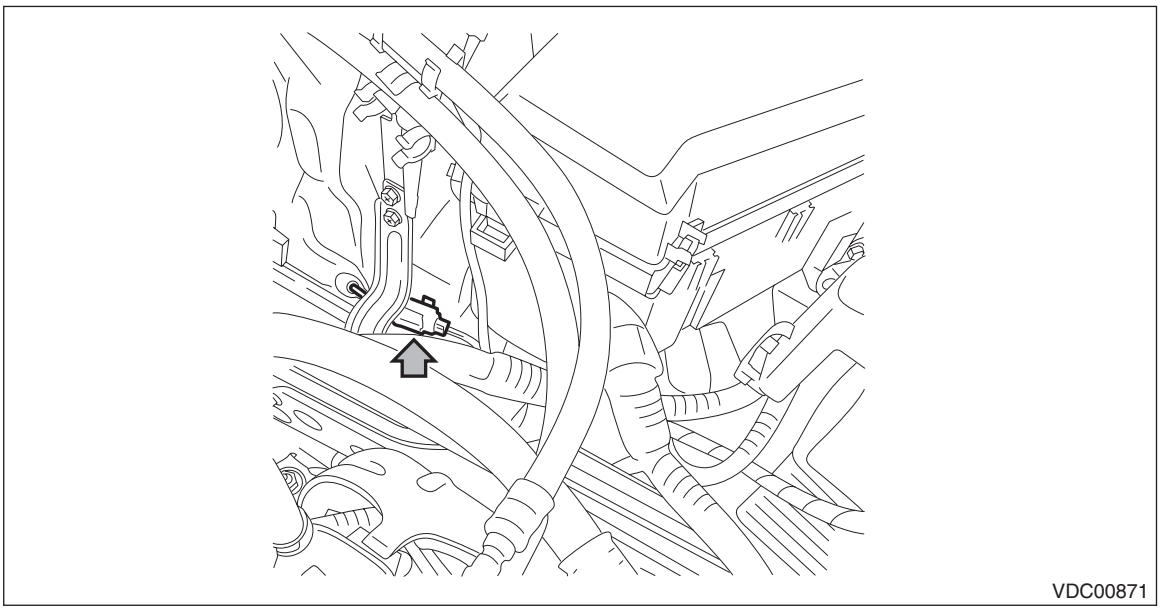
# 9. Front ABS Wheel Speed Sensor

## A: REMOVAL

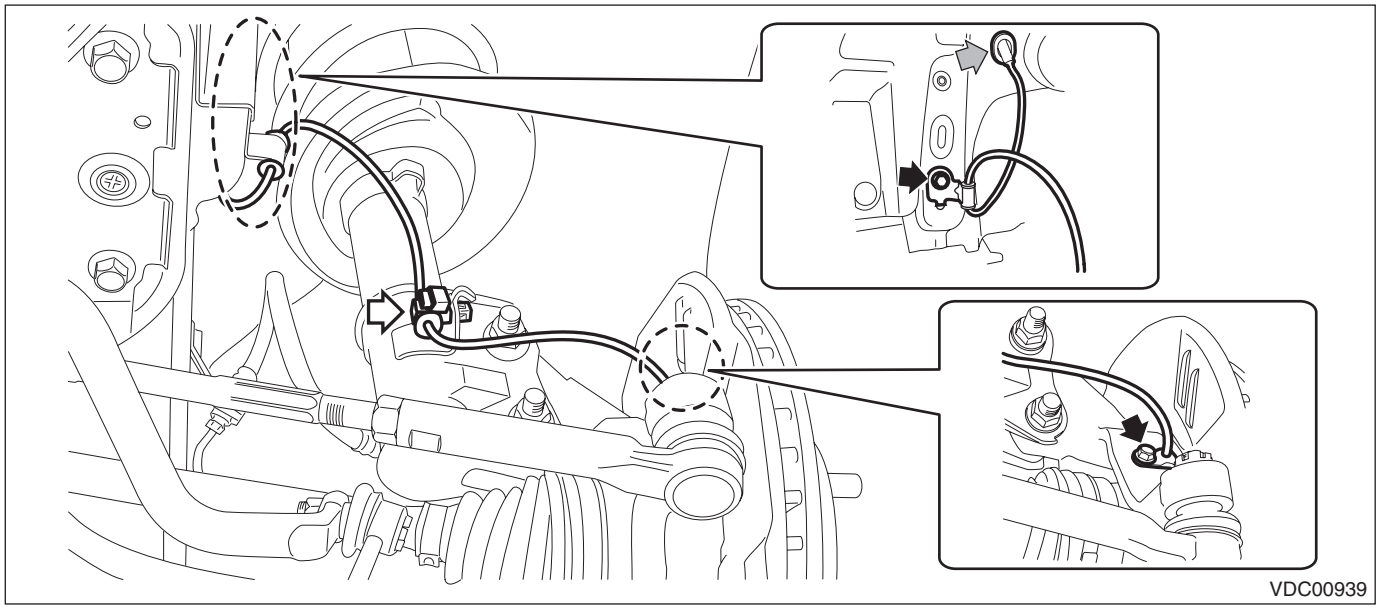
1) Disconnect the ground cable from battery.
2) Lift up the vehicle, and then remove the front wheels.
3) Remove the front ABS wheel speed sensor.

**CAUTION:**
- **Be careful not to damage the sensor.**
- **Do not apply excessive force to the sensor harness.**
- **Leave the sensor harness clamp on the vehicle side.**

(1) Disconnect the connector of the front ABS wheel speed sensor in the engine compartment.



(2) Remove each harness clip and grommet.
(3) Remove the bolts, and remove the front ABS wheel speed sensor from the housing assembly - front axle.



## B: INSTALLATION

**CAUTION:**
- **Be careful not to damage the sensor.**
- **Do not apply excessive force to the sensor harness.**

Install each part in the reverse order of removal.

NOTE:
- Check the identification (mark) on the harness to make sure there is no warpage. <Ref. to VDC-2, SPECIFICATION, General Description.>
- Check if the harness is not pulled and does not come in contact with the suspension or body while operating the steering.

***Tightening torque:***
***Front ABS wheel speed sensor: 7.5 N·m (0.76 kgf-m, 5.5 ft-lb)***
***Front ABS wheel speed sensor bracket: 33 N·m (3.36 kgf-m, 24.3 ft-lb)***
***Front wheel: 120 N·m (12.24 kgf-m, 88.5 ft-lb)***

# C: INSPECTION

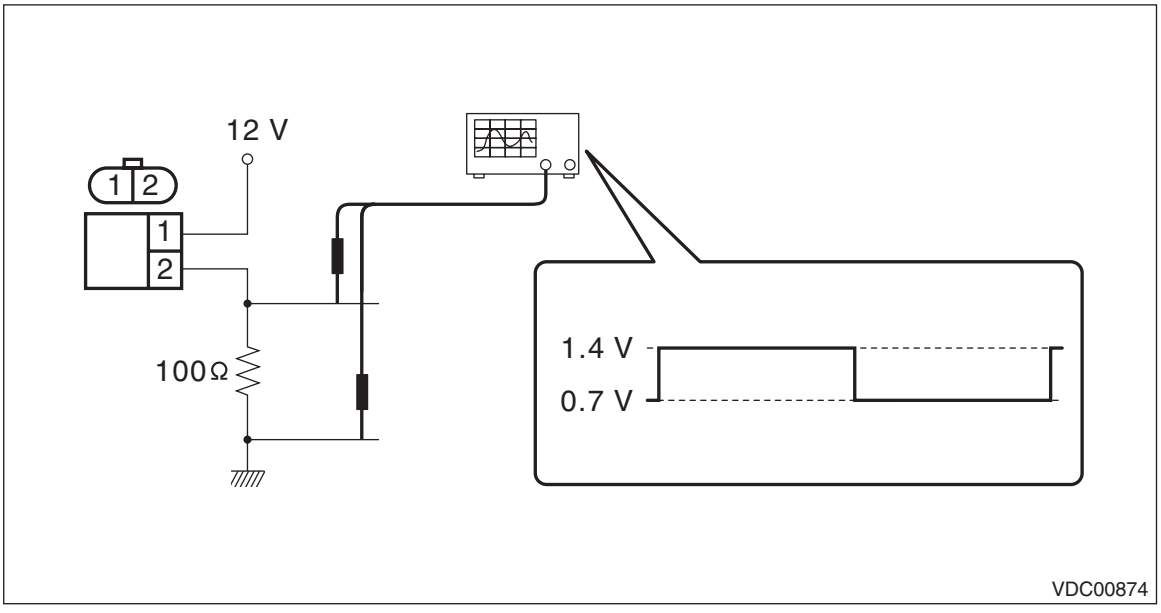
## 1. CHECK WITH SUBARU SELECT MONITOR

1) Connect the Subaru Select Monitor to data link connector.
   (1) Run the “PC application for Subaru Select Monitor”.
   (2) On «Main Menu» display, select {Each System Check}.
   (3) Select {Brake Control System}. When {VDC} is displayed, select the [OK] button.
   (4) From {Current Data Display & Save}, select {FR Wheel Speed} and {FL Wheel Speed}.
2) Check if the speed indicated on the display changes in the same manner as the speedometer reading during acceleration/deceleration when the steering wheel is in the straight-ahead position.
3) If the speed indicated on the display does not change in the inspection, check the ABS wheel speed sensor. <Ref. to VDC-33, CHECK ABS WHEEL SPEED SENSOR UNIT, INSPECTION, Front ABS Wheel Speed Sensor.>

## 2. CHECK ABS WHEEL SPEED SENSOR UNIT

1) Visually check the tip of the ABS wheel speed sensor for foreign particles or damage. If necessary, clean the tip or replace the ABS wheel speed sensor.
2) Disconnect the ABS wheel speed sensor connector.
3) Check the ABS wheel speed sensor cable for discontinuity. If defective, replace the ABS wheel speed sensor.
4) Connect a 12 V power supply to No. 1 terminal of ABS wheel speed sensor connector, then attach resistance to the No. 2 terminal. Rotate the wheel at about 2.75 km/h (2 MPH), and measure the voltage using an oscilloscope.

***Standard value of output voltage:***
***0.7 — 1.4 V***



5) Replace the ABS wheel speed sensor if the inspection result is not within the standard value.

# 10.Rear ABS Wheel Speed Sensor

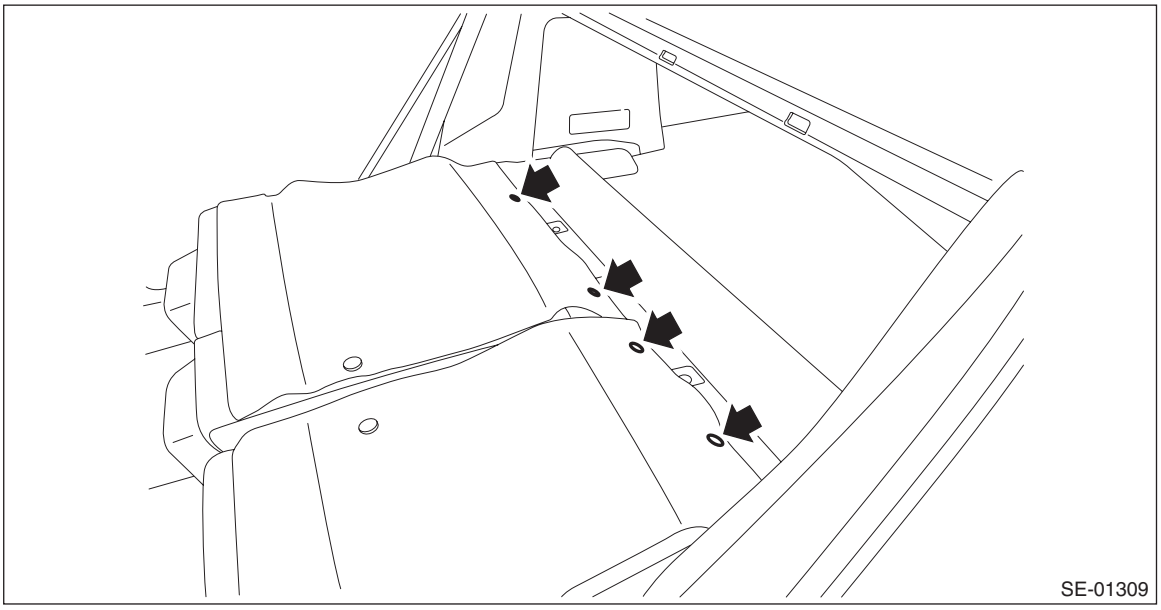
## A: REMOVAL

### 1. 4 DOOR MODEL

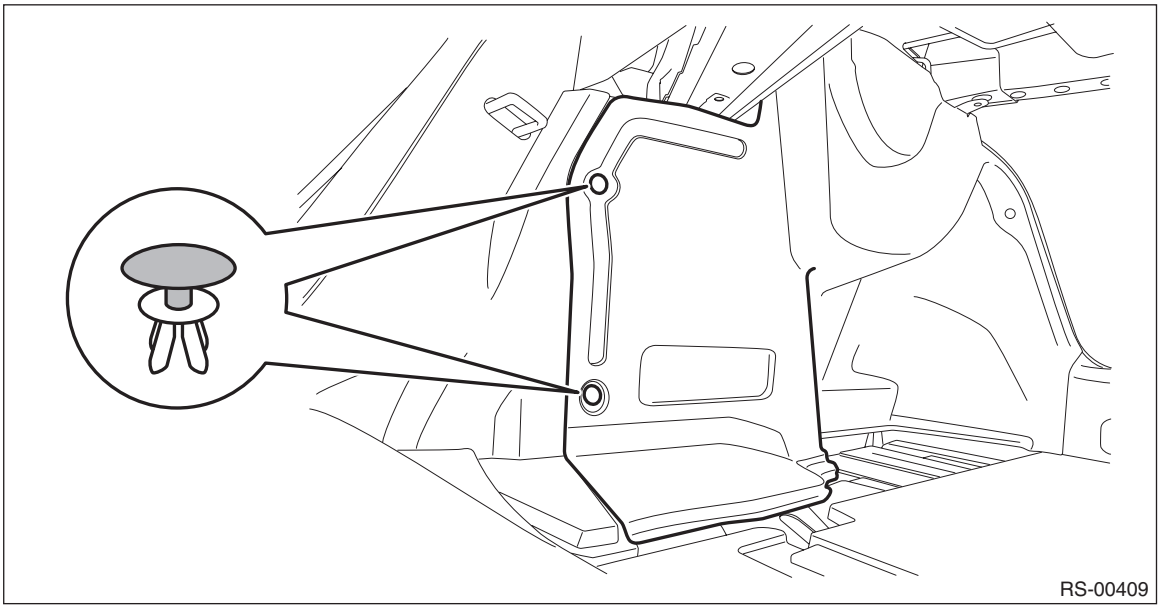
1) Disconnect the ground cable from battery.
2) Lift up the vehicle, and then remove the rear wheels.
3) Remove the rear ABS wheel speed sensor.

**CAUTION:**
- **Be careful not to damage the sensor.**
- **Do not apply excessive force to the sensor harness.**
- **Leave the sensor harness clamp on the vehicle side.**

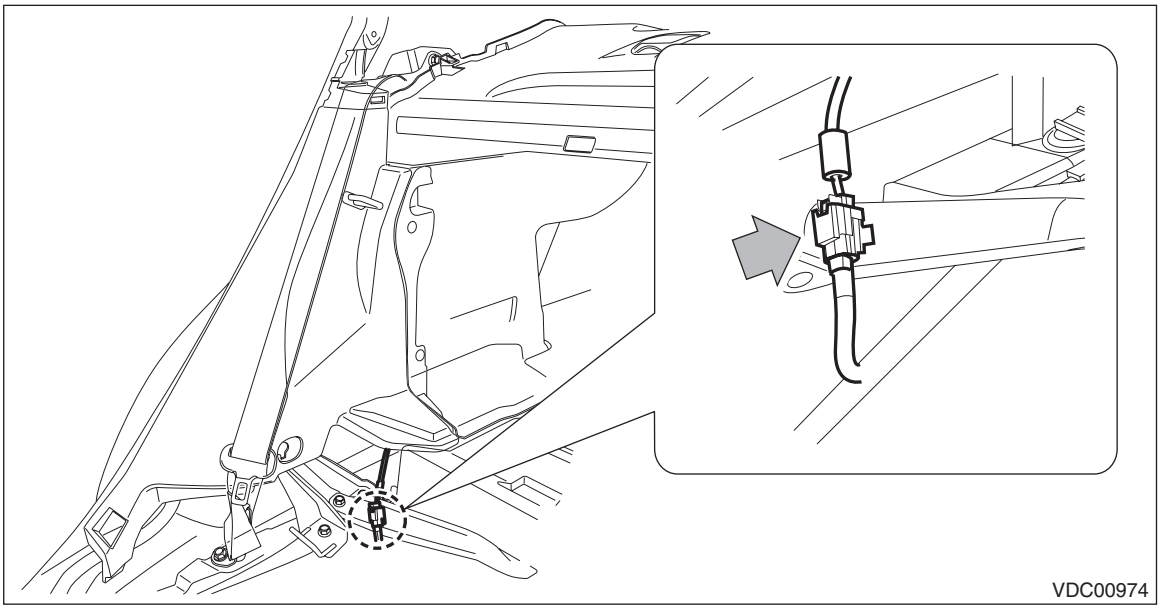
(1) Take out the trunk mat.
(2) Tilt the backrest assembly of the rear seat forward.
(3) Remove the clips located at the bottom of the cover COMPL - rear backrest LH and RH of the rear seat back.



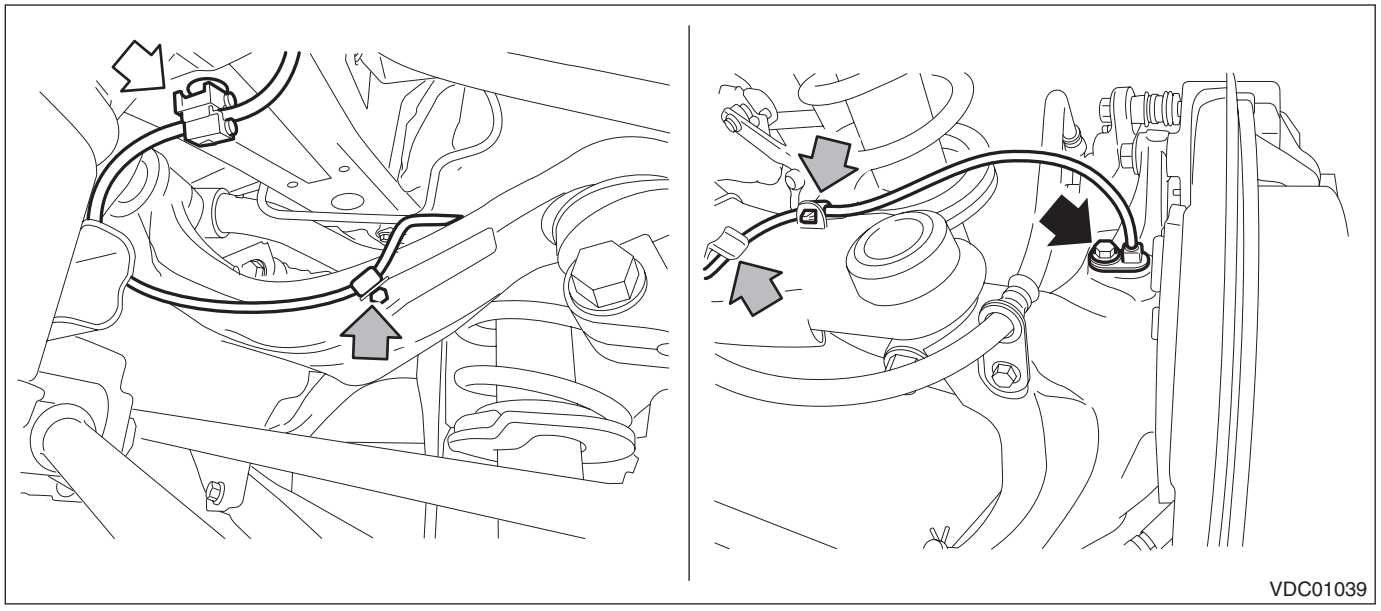
(4) Remove the clips, and turn over the trim panel - trunk side.



(5) Disconnect the connector of the rear ABS wheel speed sensor.



(6) Remove the grommet from the rear wheel housing, and pull out the connector of the rear ABS wheel speed sensor.
(7) Remove the harness clip and bolt, and remove the rear ABS wheel speed sensor.

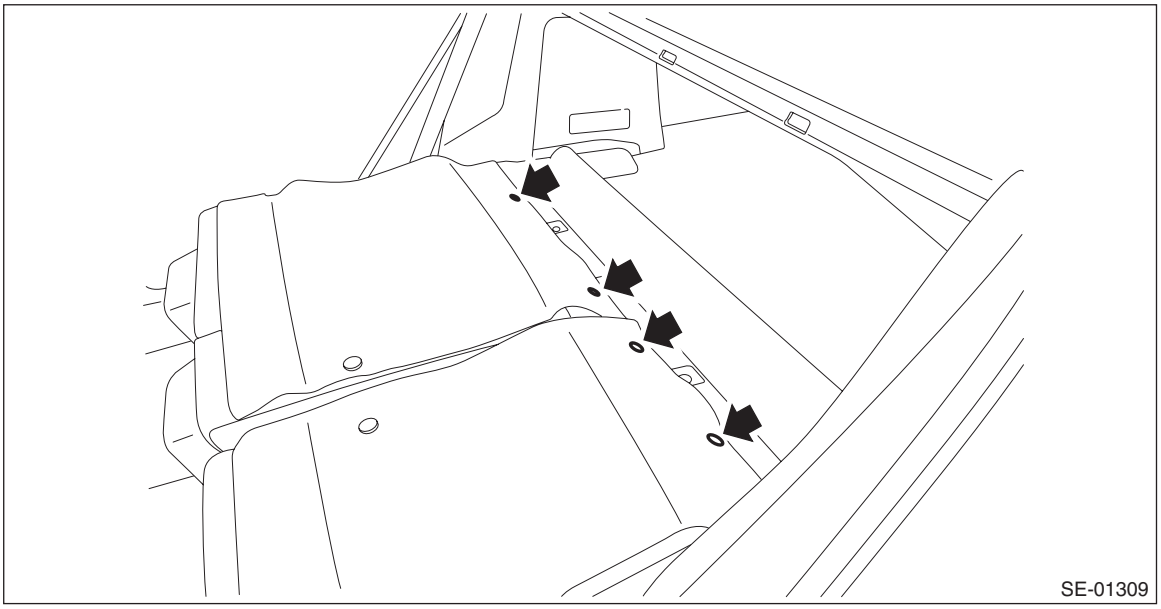


## 2. 5 DOOR MODEL/XV MODEL

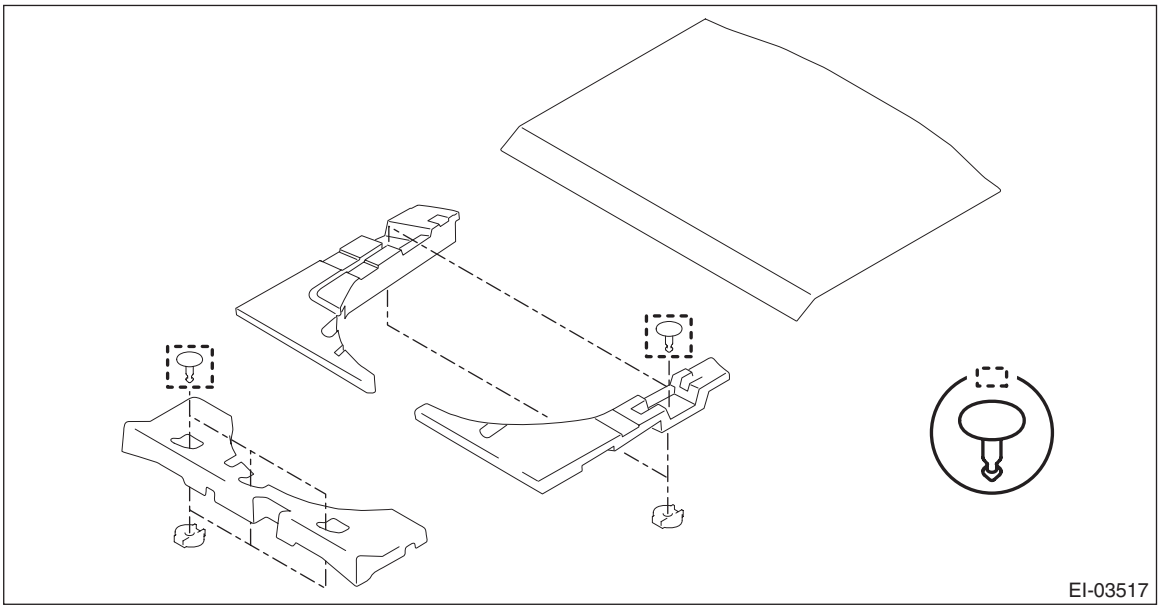
1) Disconnect the ground cable from battery.
2) Lift up the vehicle, and then remove the rear wheels.
3) Remove the rear ABS wheel speed sensor.

**CAUTION:**
- **Be careful not to damage the sensor.**
- **Do not apply excessive force to the sensor harness.**
- **Leave the sensor harness clamp on the vehicle side.**

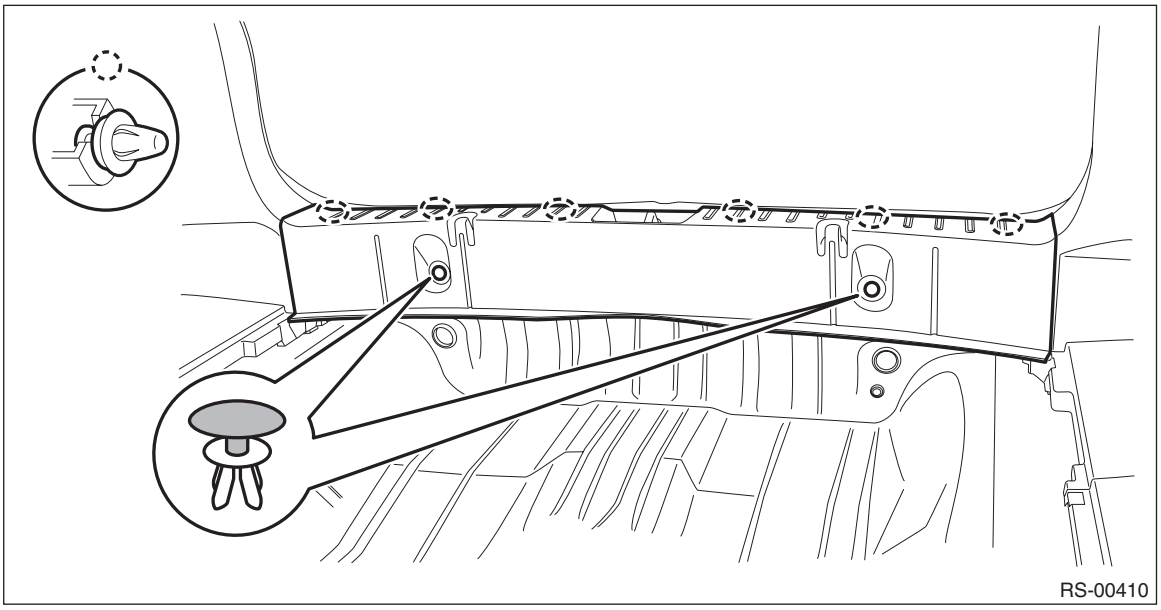
(1) Tilt the backrest assembly of the rear seat forward.
(2) Remove the clips located at the bottom of the cover COMPL - rear backrest LH and RH of the rear seat back.



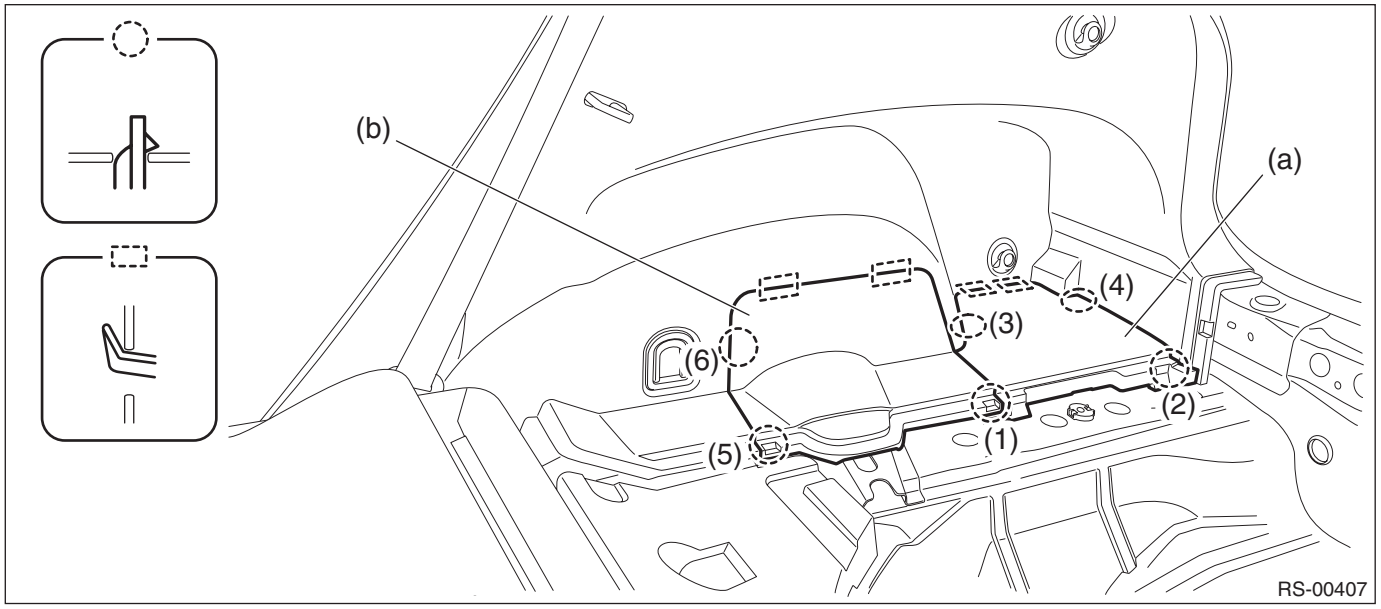
(3) Remove the mat - rear floor CTR and the spacer - rear floor side.



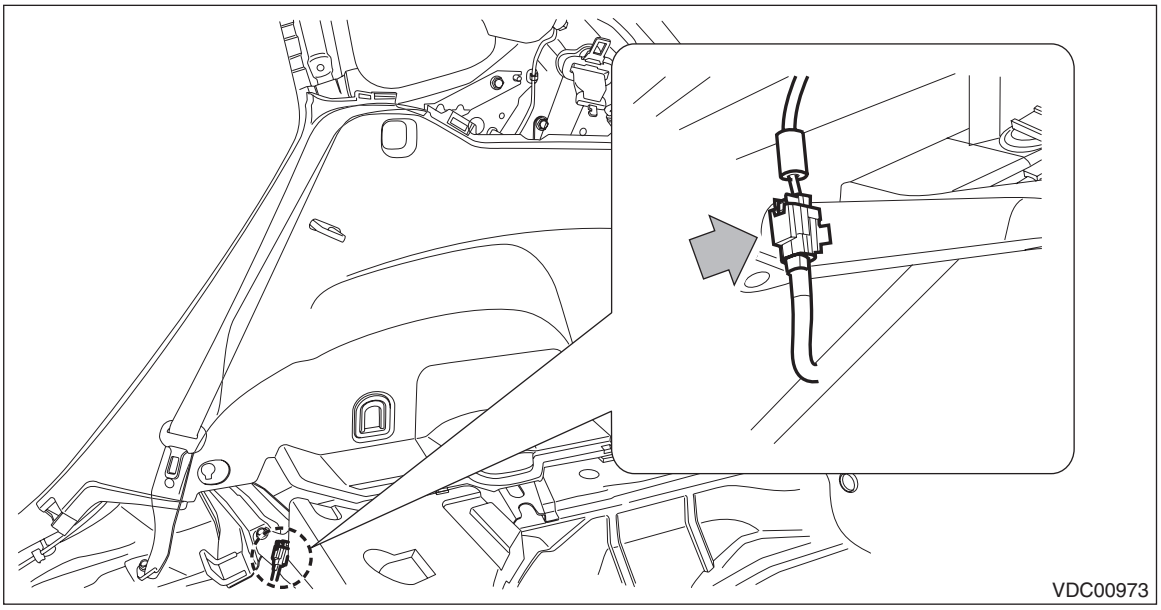
(4) Remove the clips, and remove the trim panel - rear skirt.



(5) Remove the lid upper rear (a) and the cap - rear strut (b) in the order from (1) to (6).

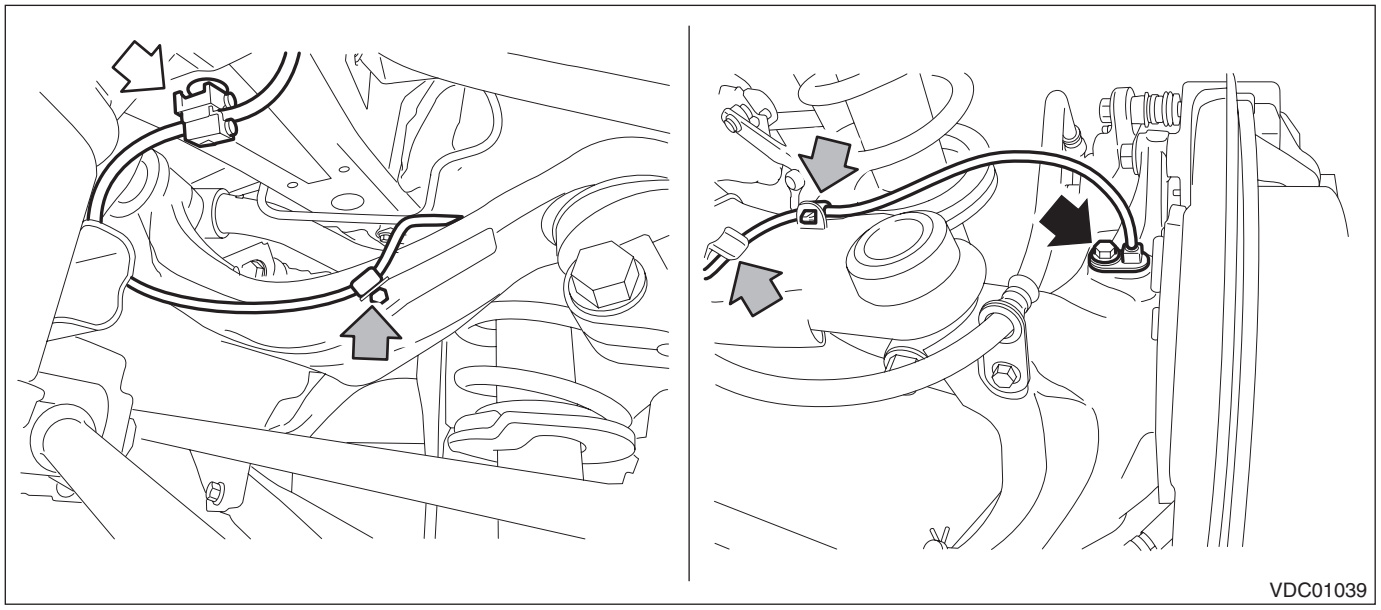


(6) Disconnect the connector of the rear ABS wheel speed sensor.

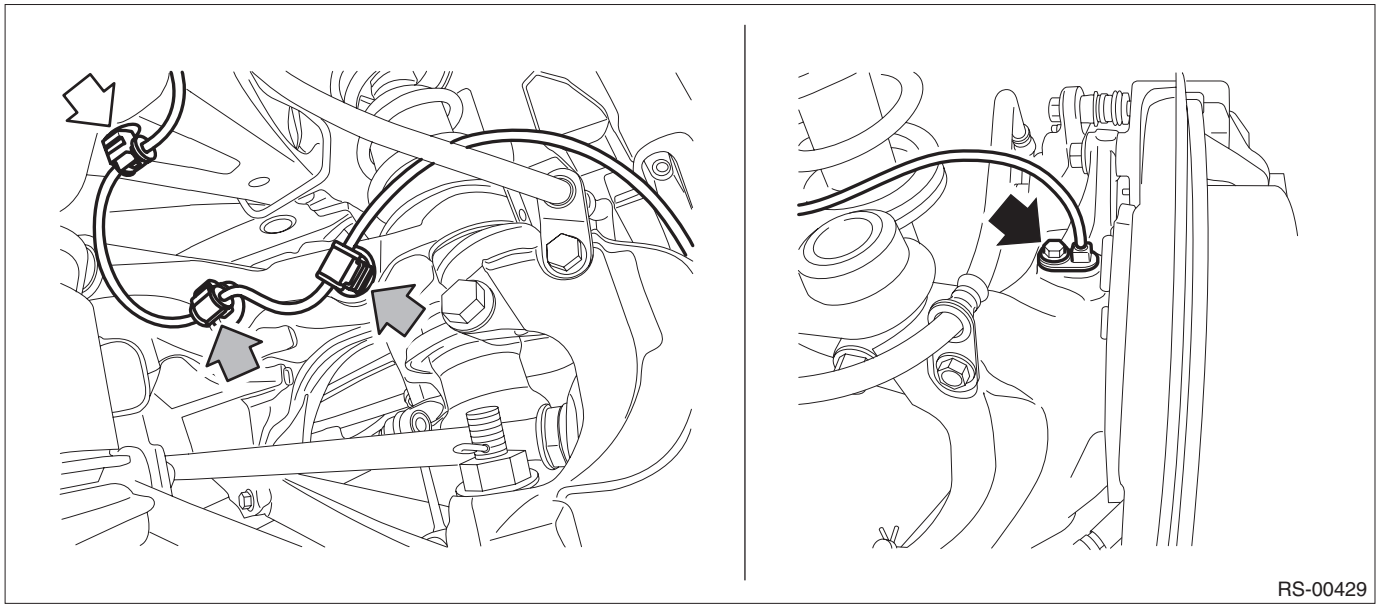


(7) Remove the grommet from the rear wheel housing, and pull out the connector of the rear ABS wheel speed sensor.
(8) Remove the harness clip and bolt, and remove the rear ABS wheel speed sensor.

- Except for XV model



- XV model



## B: INSTALLATION

**CAUTION:**
**Be careful not to damage the sensor.**

1) Install each part in the reverse order of removal.
2) Route the rear ABS wheel speed sensor cable to the upper arm assembly.

NOTE:
Check the identification (mark) on the harness to make sure there is no warpage. <Ref. to VDC-2, SPECIFICATION, General Description.>

***Tightening torque:***
***Rear ABS wheel speed sensor: 7.5 N·m (0.76 kgf-m, 5.5 ft-lb)***
***Rear wheel: 120 N·m (12.24 kgf-m, 88.5 ft-lb)***

## C: INSPECTION

### 1. ABS WHEEL SPEED SENSOR

For inspection of rear ABS wheel speed sensor, refer to inspection of front ABS wheel speed sensor. <Ref. to VDC-33, CHECK ABS WHEEL SPEED SENSOR UNIT, INSPECTION, Front ABS Wheel Speed Sensor.>

# 11.Front Magnetic Encoder

## A: REMOVAL

Refer to “Front Hub Unit Bearing” for removal, because the front magnetic encoder is integrated with the hub unit COMPL - front axle. <Ref. to DS-25, REMOVAL, Front Hub Unit Bearing.>

## B: INSTALLATION

Refer to “Front Hub Unit Bearing” for installation, because the front magnetic encoder is integrated with the hub unit COMPL - front axle. <Ref. to DS-29, INSTALLATION, Front Hub Unit Bearing.>

## C: INSPECTION

Visually check the magnetic encoder for any damage. If necessary, replace with a new hub unit COMPL - front axle.

NOTE:
Because the magnetic encoder is integrated with hub unit COMPL, replace the hub unit COMPL with a new part if there is any defect found on the magnetic encoder.

# 12.Rear Magnetic Encoder

## A: REMOVAL

Refer to “Rear Hub Unit Bearing” for removal, because the rear magnetic encoder is integrated with the hub unit COMPL - rear axle. <Ref. to DS-46, REMOVAL, Rear Hub Unit Bearing.>

## B: INSTALLATION

Refer to “Rear Hub Unit Bearing” for installation, because the rear magnetic encoder is integrated with the hub unit COMPL - rear axle. <Ref. to DS-51, INSTALLATION, Rear Hub Unit Bearing.>

## C: INSPECTION

Visually check the magnetic encoder parts for any damage. If necessary, replace with a new hub unit COMPL - rear axle.

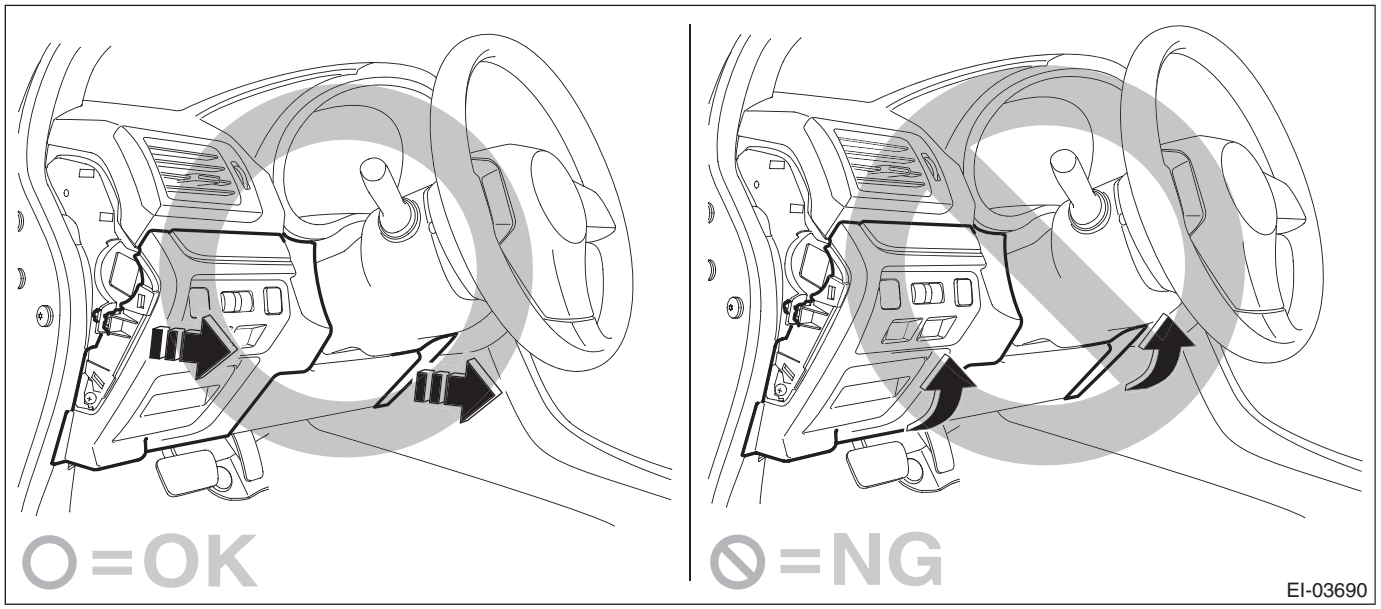
NOTE:
Because the magnetic encoder is integrated with hub unit COMPL, replace the hub unit COMPL with a new part if there is any defect found on the magnetic encoder.

# 13.VDC OFF Switch

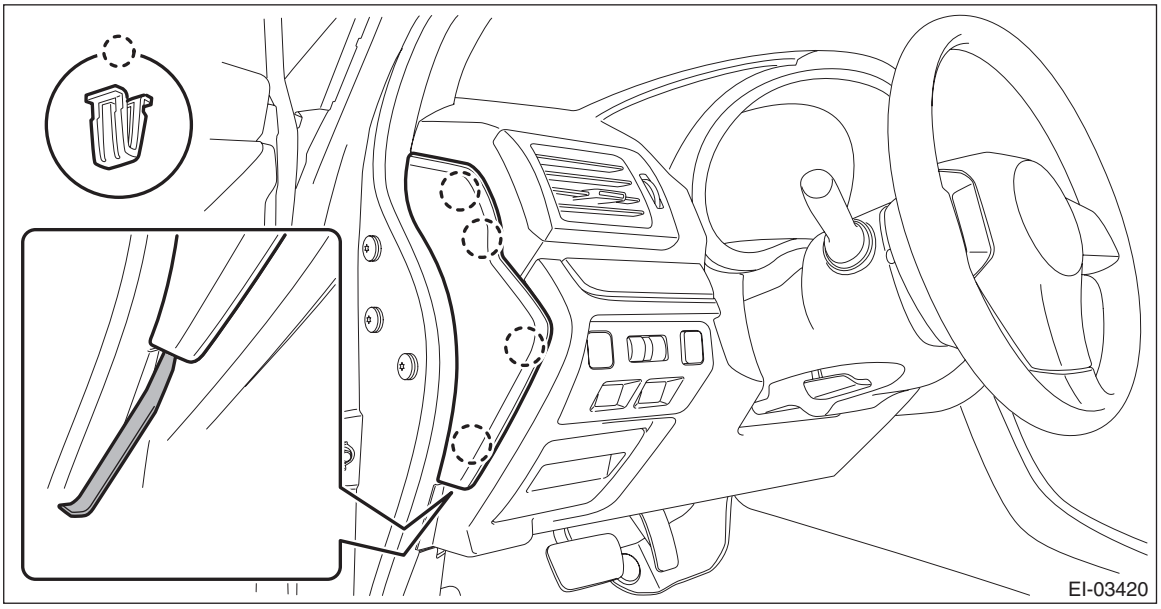
## A: REMOVAL

1) Remove the cover assembly - instrument panel LWR driver.

**CAUTION:**
**When removing the cover assembly - instrument panel LWR driver, be sure to pull it toward you. If attempting to remove by turning it upward, the claws may be damaged.**



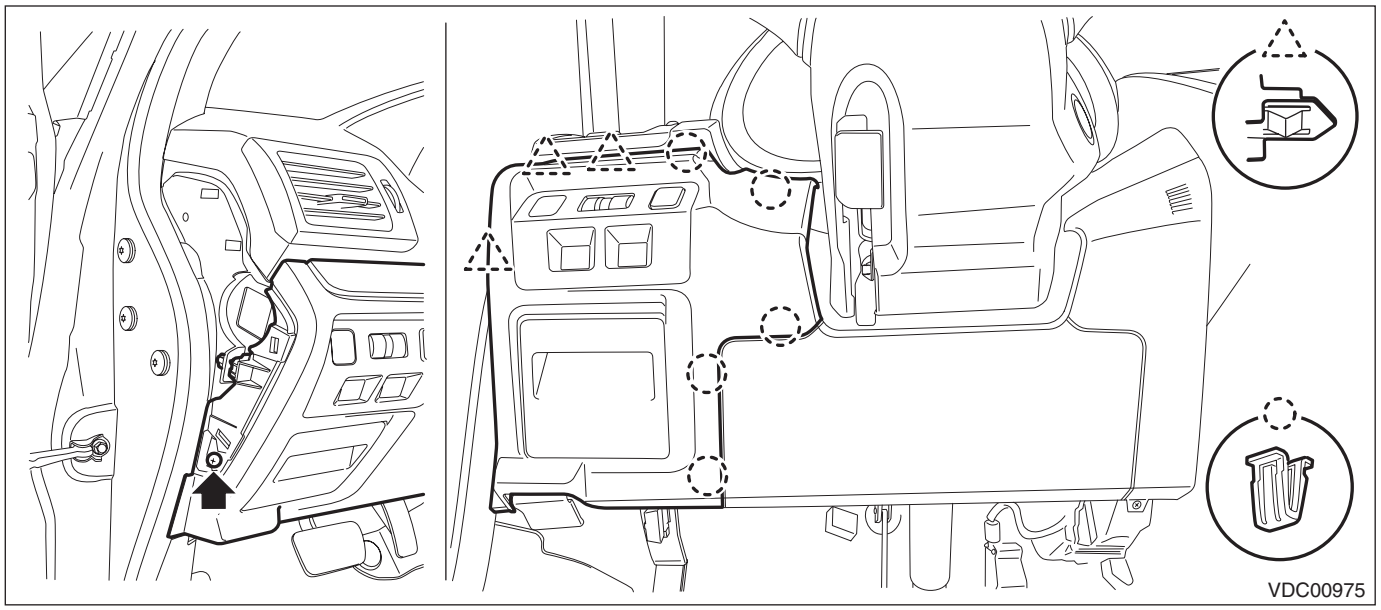
(1) Remove the clips, and remove the cover - instrument panel side LH.



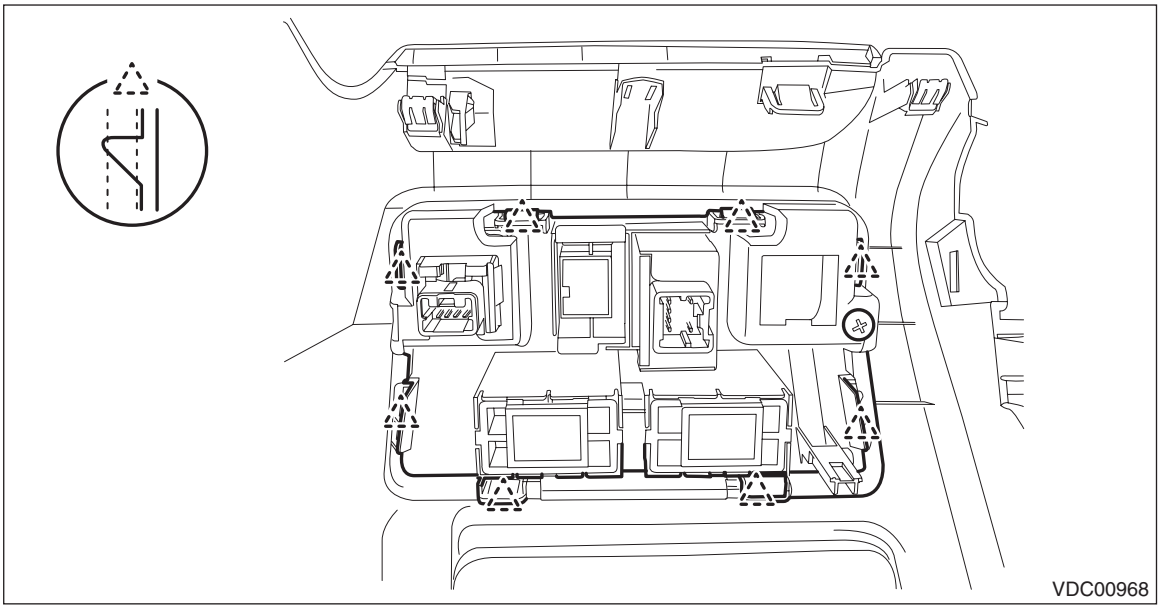
NOTE:
Using a plastic remover, open the cover - instrument panel side LH.

(2) Remove the screws and release the clips and claws.

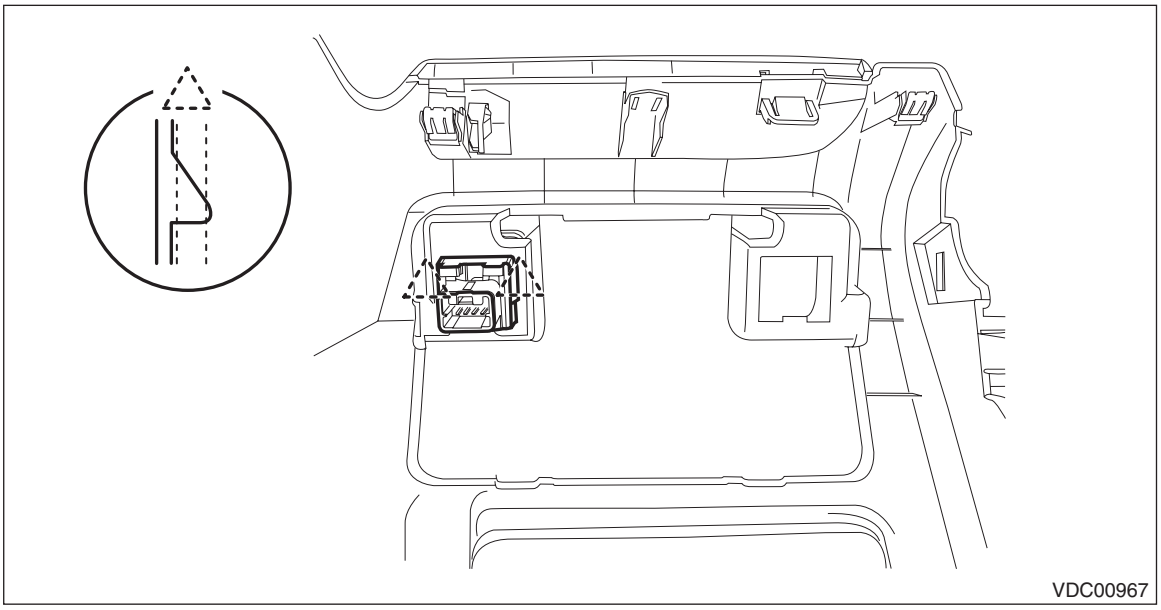
(3) Disconnect the harness connectors, and remove the cover assembly - instrument panel LWR driver OUT.



2) Remove the screws and release the claws, then detach the cover.



3) Release the claws and remove the VDC OFF switch.



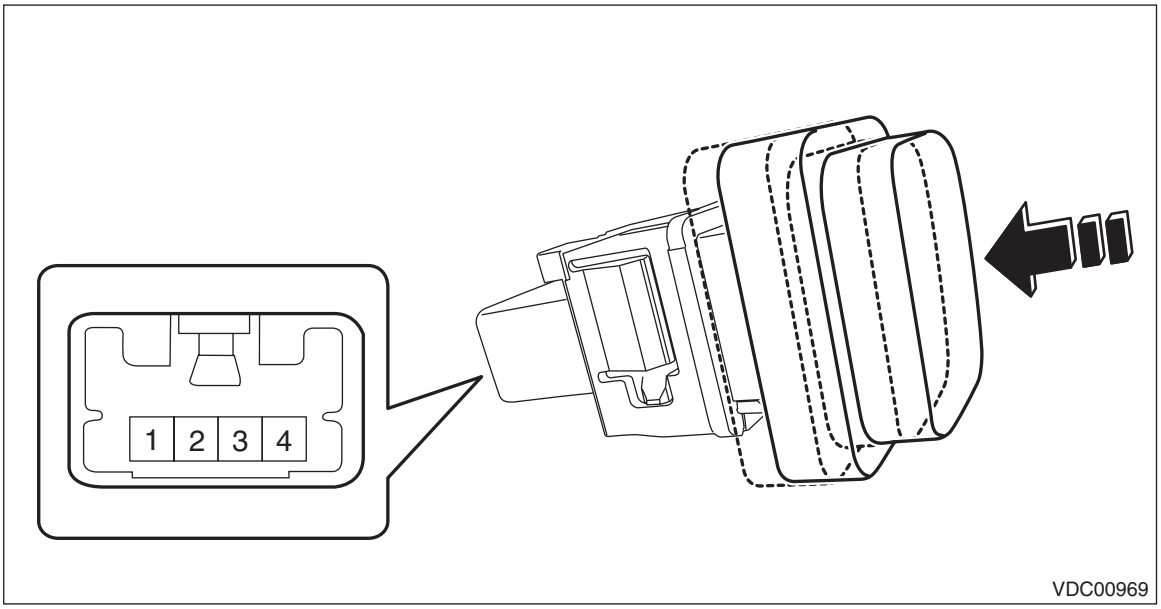
## B: INSTALLATION

Install each part in the reverse order of removal.

## C: INSPECTION

1) Disconnect the VDC OFF switch connector.
2) Check the resistance between the VDC OFF switch terminals.

***PREPARATION TOOL:***
***Circuit tester***



| Terminal No. | Inspection conditions | Standard |
|---|---|---|
| 2 — 3 | Switch OFF | 1 MΩ or more |
| | Switch ON | Less than 1 Ω |

3) Replace the VDC OFF switch if the inspection result is not within the standard value.

# 1. Basic Diagnostic Procedure

## A: PROCEDURE

**CAUTION:**
**Remove foreign matter (dust, water, oil etc.) from the VDCCM&H/U connector during removal and installation.**

NOTE:
- To check the harness for open or short circuits, shake problem spot or connector.
- Refer to “Check List for Interview”. <Ref. to VDC(diag)-4, Check List for Interview.>

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK PRE-INSPECTION.**<br>1) Ask the customer when and how the trouble occurred using the interview check list. <Ref. to VDC(diag)-4, Check List for Interview.><br>2) Before performing diagnostics, check the component which might affect VDC problems. <Ref. to VDC(diag)-8, INSPECTION, General Description.> | Is the component that might influence the VDC problem normal? | Go to step **2**. | Repair or replace each component. |
| 2 | **CHECK INDICATION OF DTC.**<br>1) Turn the ignition switch to OFF.<br>2) Connect the Subaru Select Monitor to data link connector.<br>3) Turn the ignition switch to ON and run the Subaru Select Monitor.<br>4) Read the DTC using the Subaru Select Monitor. <Ref. to VDC(diag)-22, OPERATION, Read Diagnostic Trouble Code (DTC).><br>NOTE:<br>If the communication function of the Subaru Select Monitor cannot be executed properly, check the communication circuit. <Ref. to VDC(diag)-20, COMMUNICATION FOR INITIALIZING IMPOSSIBLE, INSPECTION, Subaru Select Monitor.> | Is DTC displayed on Subaru Select Monitor? | Record the DTC.<br>Go to step **4**. | Go to step **3**. |
| 3 | **PERFORM GENERAL DIAGNOSTICS.**<br>1) Perform the inspection by referring to “General Diagnostic Table”. <Ref. to VDC(diag)-86, INSPECTION, General Diagnostic Table.><br>2) Perform the Clear Memory Mode. <Ref. to VDC(diag)-24, OPERATION, Clear Memory Mode.><br>3) Perform the Inspection Mode. <Ref. to VDC(diag)-23, PROCEDURE, Inspection Mode.><br>4) Read the DTC. <Ref. to VDC(diag)-22, OPERATION, Read Diagnostic Trouble Code (DTC).><br>5) Check the DTC is not displayed. | Do the VDC warning light & VDC indicator light, VDC OFF indicator light and ABS warning light go off after starting the engine? | Finish the diagnosis. | Check the combination meter circuit. <Ref. to VDC(diag)-29, ABS WARNING LIGHT DOES NOT GO OFF, Warning Light Illumination Pattern.> <Ref. to VDC(diag)-30, VDC WARNING LIGHT AND VDC INDICATOR LIGHT DO NOT GO OFF, Warning Light Illumination Pattern.> <Ref. to VDC(diag)-31, VDC OFF INDICATOR LIGHT DOES NOT GO OFF, Warning Light Illumination Pattern.> |

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 4 | **CHECK FREEZE FRAME DATA.**<br>Using the Subaru Select Monitor, check the freeze frame data of the VDC control module. | Are freeze frame data recorded? | Record the freeze frame data.<br>Go to step **5**. | Go to step **5**. |
| 5 | **PERFORM DIAGNOSIS.**<br>1) Refer to “List of Diagnostic Trouble Code (DTC)”.<br>NOTE:<br>For the DTC list, refer to “List of Diagnostic Trouble Code (DTC)”. <Ref. to VDC(diag)-37, LIST, List of Diagnostic Trouble Code (DTC).><br>2) Correct the cause of trouble.<br>3) Perform the Clear Memory Mode. <Ref. to VDC(diag)-24, OPERATION, Clear Memory Mode.><br>4) Perform the Inspection Mode. <Ref. to VDC(diag)-23, PROCEDURE, Inspection Mode.><br>5) Read the DTC. <Ref. to VDC(diag)-22, OPERATION, Read Diagnostic Trouble Code (DTC).> | Is DTC displayed? | Repeat step 5 until DTC is not shown. | Finish the diagnosis. |

# 2. Check List for Interview

## A: CHECK

Check the following item about the vehicle's state.

### 1. STATE OF ABS WARNING LIGHT

| | | | |
|---|---|---|---|
| ABS warning light illuminates. | ❑ Always<br>❑ Sometimes<br>❑ Only once<br>❑ Does not illuminate<br>• When/How long does it illuminate? | | |
| Ignition key position | ❑ LOCK<br>❑ ACC<br>❑ ON (before starting engine)<br>❑ START<br>❑ ON (after starting engine, engine is running)<br>❑ ON (after starting engine, engine is at a standstill) | | |
| Timing | ❑ Immediately after turning the ignition switch to ON<br>❑ Immediately after turning the ignition switch to START | | |
| | ❑ While accelerating | — | km/h |
| | | — | MPH |
| | ❑ While driving at a constant speed | km/h | MPH |
| | ❑ While decelerating | — | km/h |
| | | — | MPH |
| | ❑ When turning to the right | Steering angle: | deg |
| | | Steering time: | Sec. |
| | ❑ When turning to the left | Steering angle: | deg |
| | | Steering time: | Sec. |
| | ❑ When other electrical parts are operating | | |
| | • Part name:<br>• Operating condition: | | |

## 2. STATE OF VDC WARNING LIGHT & VDC INDICATOR LIGHT

| | | | |
|---|---|---|---|
| VDC warning light & VDC indicator light illuminates. | ❑ Always<br>❑ Sometimes<br>❑ Only once<br>❑ Does not illuminate<br>• When/How long does it illuminate? | | |
| Ignition key position | ❑ LOCK<br>❑ ACC<br>❑ ON (before starting engine)<br>❑ START<br>❑ ON (after starting engine, engine is running)<br>❑ ON (after starting engine, engine is at a standstill) | | |
| Timing | ❑ Immediately after turning the ignition switch to ON<br>❑ Immediately after turning the ignition switch to START | | |

# 3. General Description

## A: CAUTION

### 1. SUPPLEMENTAL RESTRAINT SYSTEM "AIRBAG"

Airbag system wiring harness is routed near the ABS wheel speed sensor and VDCCM&H/U.

**CAUTION:**
**• Do not use electrical test equipment on wiring harness and connector circuits of the airbag system.**
**• Be careful not to damage the airbag system wiring harness when servicing the ABS wheel speed sensor and VDCCM&H/U.**

## B: INSPECTION

Before performing diagnosis, check the following items which might affect VDC problems.

### 1. BATTERY

Measure the battery voltage and check electrolyte.

***Standard voltage:***
***12 V or more***

***Specific gravity:***
***1.260 or more***

### 2. GROUND

Check the tightening torque of ground (GB-5) bolt of VDC.

***Tightening torque:***
***13 N·m (1.3 kgf-m, 9.6 ft-lb)***

### 3. BRAKE FLUID

1) Check the brake fluid level.
2) Check the brake fluid for leaks.

### 4. HYDRAULIC UNIT

Check the hydraulic unit.
• When using the brake tester <Ref. to VDC-13, CHECKING THE HYDRAULIC UNIT ABS OPERATION WITH THE BRAKE TESTER, INSPECTION, VDC Control Module and Hydraulic Control Unit (VDCCM&H/U).>
• When not using the brake tester <Ref. to VDC-12, CHECKING THE HYDRAULIC UNIT ABS OPERATION BY PRESSURE GAUGE, INSPECTION, VDC Control Module and Hydraulic Control Unit (VDCCM&H/U).>

### 5. BRAKE DRAG

Check for brake drag.

### 6. BRAKE PAD AND ROTOR

Check the brake pad and rotor.
• Front <Ref. to BR-17, INSPECTION, Front Brake Pad.> <Ref. to BR-19, INSPECTION, Front Disc Rotor.>
• Rear <Ref. to BR-31, INSPECTION, Rear Brake Pad.> <Ref. to BR-34, INSPECTION, Rear Disc Rotor.>

### 7. TIRES

Check the tire specifications, tire wear and air pressure. <Ref. to WT-2, SPECIFICATION, General Description.>

# C: PREPARATION TOOL

## 1. SPECIAL TOOL

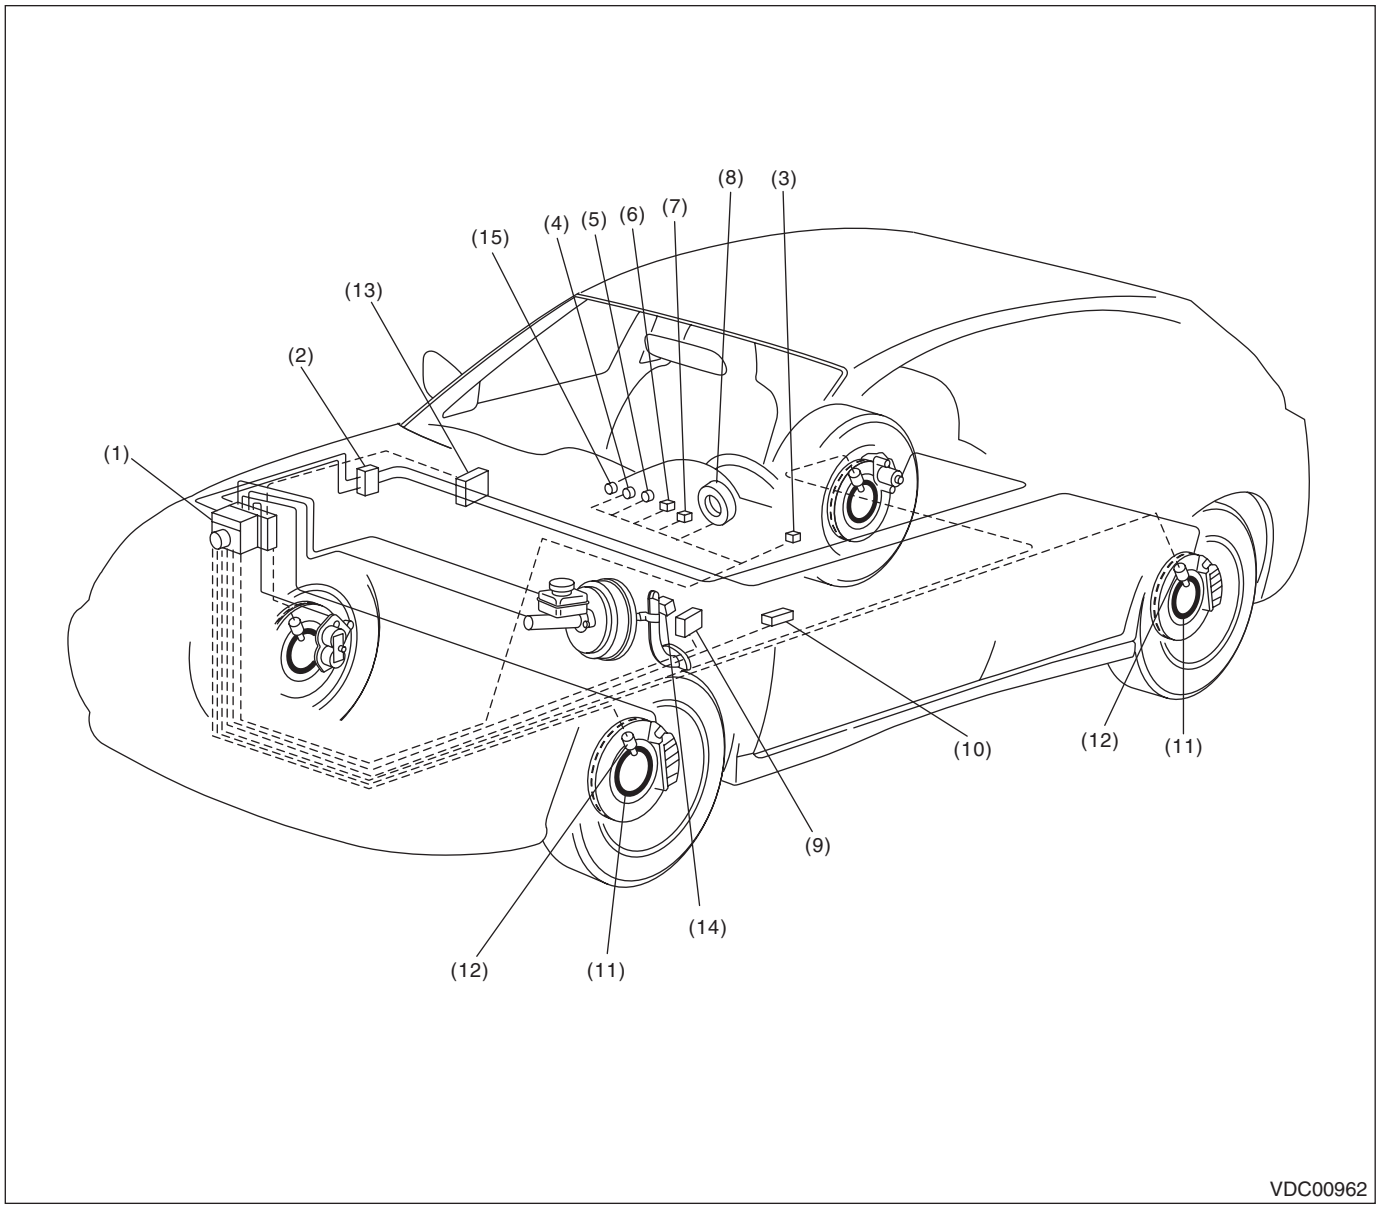
| ILLUSTRATION | TOOL NUMBER | DESCRIPTION | REMARKS |
|---|---|---|---|
|  ST1B022XU0 | 1B022XU0 | SUBARU SELECT MONITOR III KIT | Used for troubleshooting the electrical system. |

## 2. GENERAL TOOL

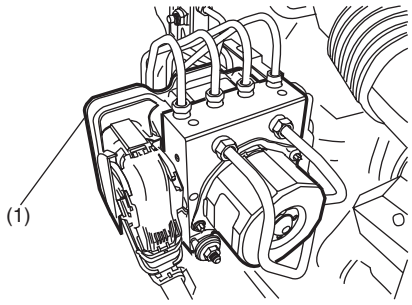
| TOOL NAME | REMARKS |
|---|---|
| Circuit tester | Used for measuring resistance, voltage and current. |
| Oscilloscope | Used for measuring the sensor. |

# 4. Electrical Component Location

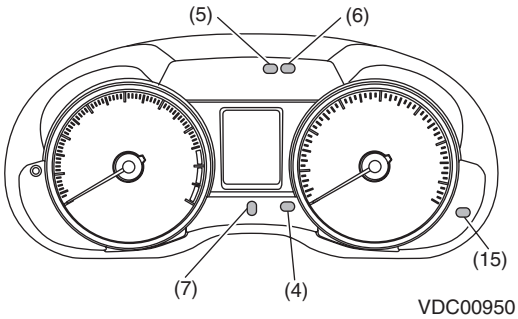
## A: LOCATION



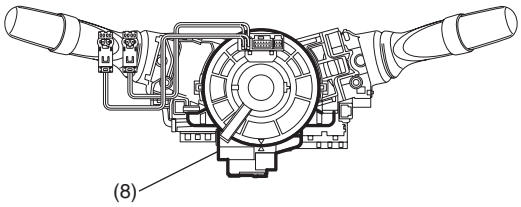
| | | | | | |
|---|---|---|---|---|---|
| (1) | VDC control module and hydraulic control unit (VDCCM&H/U) | (6) | VDC warning light & VDC indicator light | (11) | Magnetic encoder |
| (2) | Connector | (7) | VDC OFF indicator light | (12) | ABS wheel speed sensor |
| (3) | VDC OFF switch | (8) | Steering angle sensor | (13) | Engine control module (ECM) |
| (4) | ABS warning light | (9) | Transmission control module (TCM) | (14) | Stop light switch |
| (5) | Brake warning light (EBD warning light) | (10) | Data link connector | (15) | Hill start assist warning light |



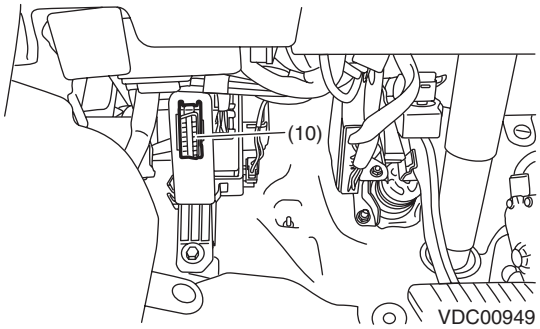
VDC00948



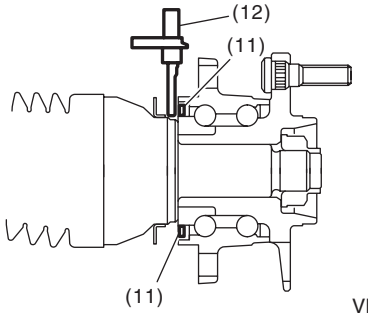
VDC00950



VDC00952



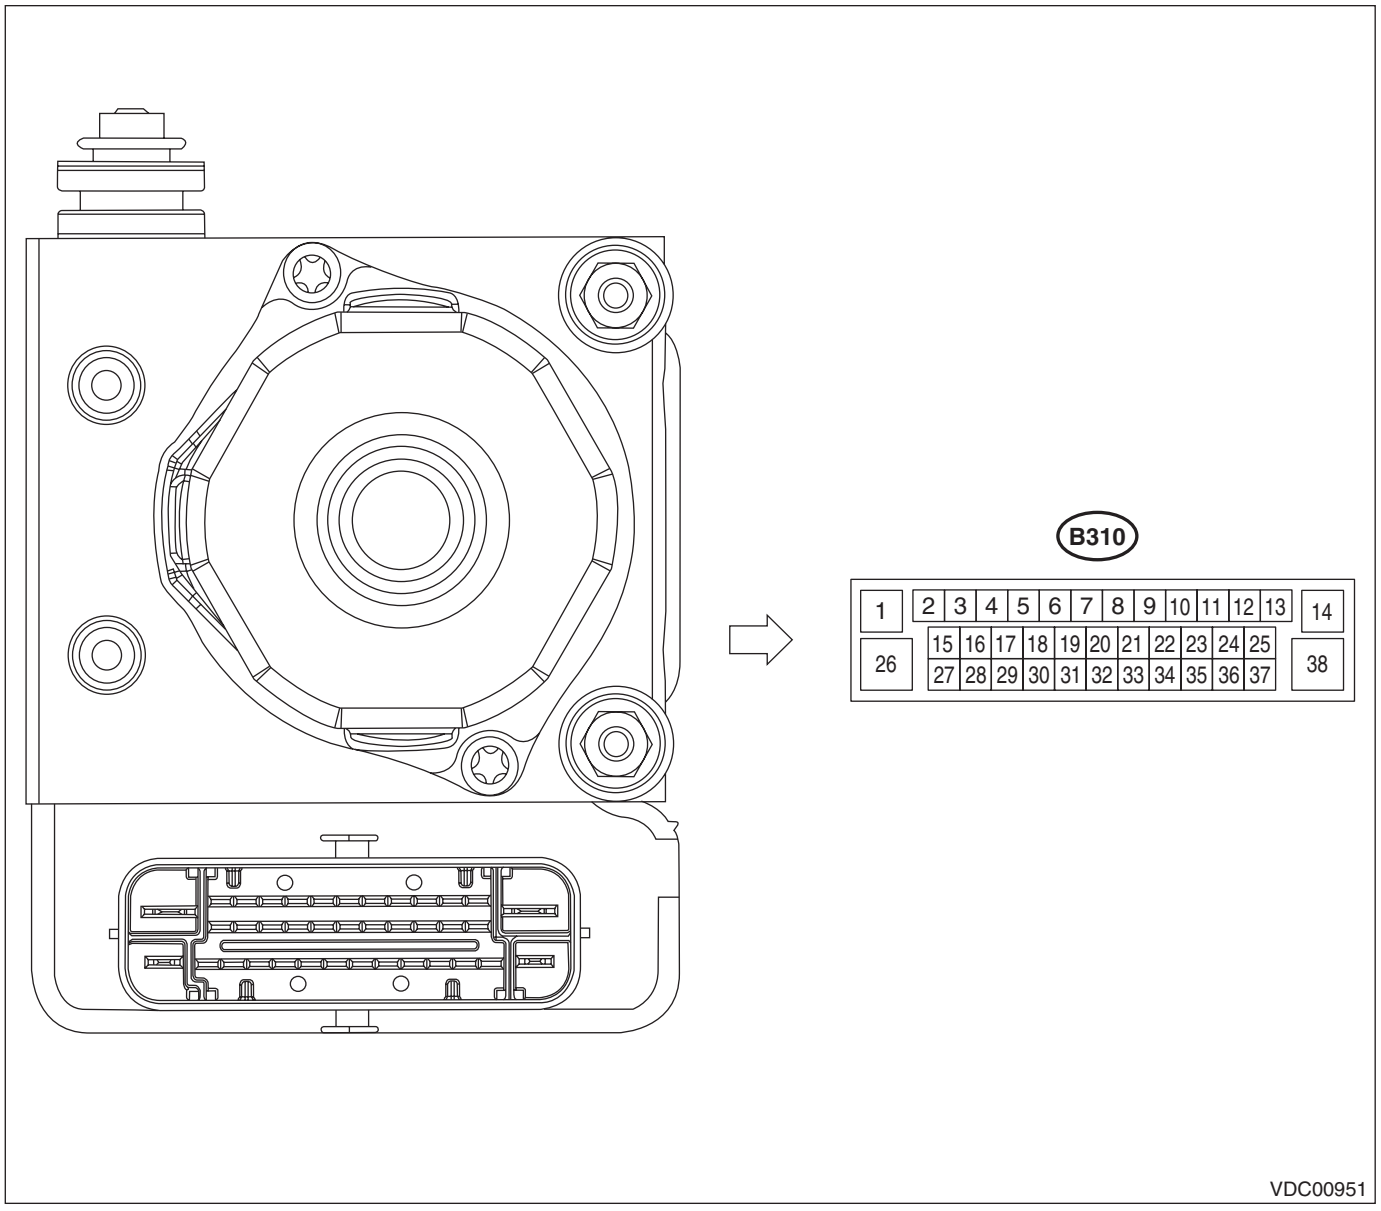
VDC00949



VDC00741

# 5. Control Module I/O Signal

## A: ELECTRICAL SPECIFICATION



NOTE:
- Terminal numbers in VDCCM&H/U connector are shown in the figure.
- When the connector is removed from the VDCCM&H/U, the brake warning light (EBD warning light), ABS warning light, VDC warning light & VDC indicator light, VDC OFF indicator light, and the hill start assist warning light illuminate.

| Content | | | Terminal No. (+) — (–) | Input/Output signal |
|---|---|---|---|---|
| | | | | Measured value and measuring conditions |
| Power supply | | | 4 — 14 | 10 — 15 V when the ignition switch is ON. |
| ABS wheel speed sensor | Front LH wheel | Power supply | 20 — 14 | 0 — 18 V |
| | | Signal | 8 | 7 — 14 mA: Rectangle waveform |
| | Front RH wheel | Power supply | 17 — 14 | 0 — 18 V |
| | | Signal | 29 | 7 — 14 mA: Rectangle waveform |
| | Rear LH wheel | Power supply | 7 — 14 | 0 — 18 V |
| | | Signal | 19 | 7 — 14 mA: Rectangle waveform |
| | Rear RH wheel | Power supply | 18 — 14 | 0 — 18 V |
| | | Signal | 5 | 7 — 14 mA: Rectangle waveform |
| CAN communication line (H) | | | 2 | 2.75 — 4.5 V pulse signal |
| CAN communication line (L) | | | 15 | 0.5 — 2.25 V pulse signal |
| Valve relay power supply | | | 1 — 14 | 10 — 15 V when the ignition switch is ON. |
| Motor relay power supply | | | 26 — 38 | 10 — 15 V when the ignition switch is ON. |
| Stop light switch | | | 6 — 14 | 1.5 V or less when the stop light is OFF; otherwise, 10 — 15 V when the stop light is ON. |
| Vehicle speed output signal | | | 27 | 0 ←→ 12 V pulse |
| VDC OFF switch | | | 37 — 14 | 1 Ω or less when the OFF switch is “ON”; 1 MΩ or more when the switch is “OFF”. |
| Ground | | | 14 | — |
| Ground | | | 38 | — |

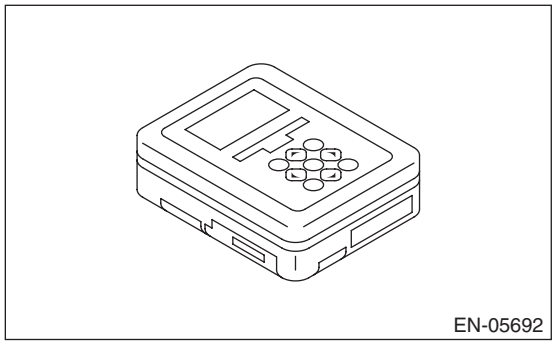
# 6. Subaru Select Monitor

## A: OPERATION

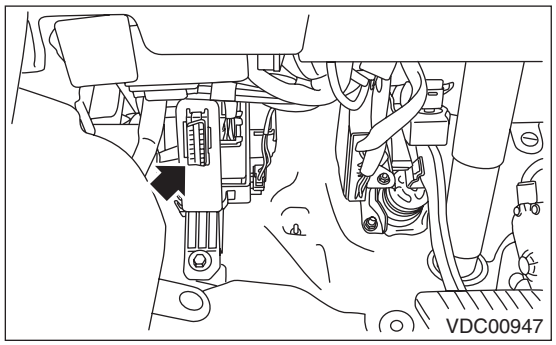
### 1. HOW TO USE SUBARU SELECT MONITOR

1) Prepare the Subaru Select Monitor kit. <Ref. to VDC(diag)-9, SPECIAL TOOL, PREPARATION TOOL, General Description.>



2) Prepare PC with Subaru Select Monitor installed.
3) Connect the USB cable to SDI (Subaru Diagnosis Interface) and USB port on the personal computer (dedicated port for the Subaru Select Monitor).

NOTE:
The dedicated port for the Subaru Select Monitor means the USB port which was used to install the Subaru Select Monitor.
4) Connect the diagnosis cable to SDI.
5) Connect SDI to data link connector located in the lower portion of the instrument panel (on the driver's side).



**CAUTION:**
**Do not connect scan tools other than the Subaru Select Monitor.**
6) Start the PC.
7) Turn the ignition switch to ON (engine OFF) and run the "PC application for Subaru Select Monitor".

NOTE:
For detailed operation procedures, refer to "PC application help for Subaru Select Monitor".
8) If VDC and Subaru Select Monitor cannot communicate, check the communication circuit. <Ref. to VDC(diag)-20, COMMUNICATION FOR INITIALIZING IMPOSSIBLE, INSPECTION, Subaru Select Monitor.>
9) Record the DTC and data.

## 2. READ CURRENT DATA

1) On «Main Menu» display, select {Each System Check}.
2) On «System Selection Menu» display, select {Brake Control System}.
3) When {VDC} is displayed, select the [OK] button.
4) On «Brake Control Diagnosis» display, select {Current Data Display & Save}.
5) On «Data Display Menu» display, select the data display method.
6) Using the scroll key, scroll the display screen up or down until necessary data is shown.

• A list of the support data is shown in the following table.

| Display | Contents to be displayed | Unit of measure |
|---|---|---|
| FR Wheel Speed | Wheel speed detected by front ABS wheel speed sensor RH is displayed. | km/h or MPH |
| FL Wheel Speed | Wheel speed detected by front ABS wheel speed sensor LH is displayed. | km/h or MPH |
| RR Wheel Speed | Wheel speed detected by rear ABS wheel speed sensor RH is displayed. | km/h or MPH |
| RL Wheel Speed | Wheel speed detected by rear ABS wheel speed sensor LH is displayed. | km/h or MPH |
| Steering Angle Sensor | Steering angle detected by steering angle sensor is displayed. | deg |
| Yaw Rate Sensor | Vehicle angular speed detected by yaw rate sensor is displayed. | deg/s |
| Pressure Sensor | Brake fluid pressure detected by pressure sensor is displayed. | bar |
| Longitudinal G Sensor | Vehicle longitudinal acceleration detected by longitudinal G sensor is displayed. | $m/s^2$ |
| Lateral G Sensor | Vehicle lateral acceleration detected by lateral G sensor is displayed. | $m/s^2$ |
| Voltage of IGN | Voltage supplied to VDCCM&H/U is displayed. | V |
| M. Relay monitor Voltage | Voltage applied to the motor relay is displayed. | V |
| Motor Relay Signal | Motor relay operation signal is displayed. | ON or OFF |
| Valve Relay Signal | Valve relay operation signal is displayed. | ON or OFF |
| EBD Warning Light | ON operation of the EBD warning light is displayed. | ON or OFF |
| ABS Warning Lamp | ON operation of the ABS warning light is displayed. | ON or OFF |
| VDC Warning Lamp | ON operation of the VDC warning light is displayed. | ON or OFF |
| EBD Control Flag | EBD operation condition is displayed. | ON or OFF |
| ABS Control Flag | ABS operation condition is displayed. | ON or OFF |
| TCS Control Flag | TCS operation condition is displayed. | ON or OFF |
| VDC Control Flag | VDC operation condition is displayed. | ON or OFF |
| E/G Control Stop Flag | Engine control command signal is displayed. | 1 or 0 |
| VDC-OFF Light | ON/OFF condition of VDC OFF indicator light is displayed. | ON or OFF |
| OFF SW Signal | Operation condition of VDC OFF switch is displayed. | ON or OFF |
| Brake Light Switch | Brake ON/OFF is displayed. | ON or OFF |
| Clutch Switch | Clutch ON/OFF is displayed. (For MT model only. Fixed to OFF on AT model.) | ON or OFF |
| Reverse Signal | Reverse gear ON/OFF is displayed. (For MT model only. Fixed to OFF on AT model.) | ON or OFF |

NOTE:
For detailed operation procedures, refer to “PC application help for Subaru Select Monitor”.

## 3. FUNCTION CHECK

| Display | Contents of display | Index No. |
|---|---|---|
| ABS Sequence Control Mode | Operate the valve and pump motor continuously to perform the ABS sequence control. | <Ref. to VDC-20, ABS Sequence Control.> |
| VDC Function Check Mode | Operate the valve and pump motor continuously to perform the VDC sequence control. | <Ref. to VDC-23, VDC Sequence Control.> |
| VDC sensor midpoint setting mode | Set the steering angle sensor neutral position, and the lateral G sensor and longitudinal G sensor “0” point. | <Ref. to VDC-19, VDC SENSOR MIDPOINT SETTING MODE, ADJUSTMENT, VDC Control Module and Hydraulic Control Unit (VDCCM&H/U).> |

## 4. FREEZE FRAME DATA

NOTE:
- Data stored at the time of trouble occurrence is shown on display.
- Each time a trouble occurs, the latest information is stored in the freeze frame data in memory.
- If a freeze frame data is not properly stored in memory (due to a drop in VDCCM power supply, etc.), a DTC suffixed with a question mark “?” appears on the Subaru Select Monitor display. This shows it may be an unreliable reading.

| Display | Contents to be displayed |
|---|---|
| FR Wheel Speed | Wheel speed detected by front ABS wheel speed sensor RH is displayed in km/h or MPH. |
| FL Wheel Speed | Wheel speed detected by front ABS wheel speed sensor LH is displayed in km/h or MPH. |
| RR Wheel Speed | Wheel speed detected by rear ABS wheel speed sensor RH is displayed in km/h or MPH. |
| RL Wheel Speed | Wheel speed detected by rear ABS wheel speed sensor LH is displayed in km/h or MPH. |
| Vehicle Speed | Vehicle speed calculated by VDC control module is displayed. |
| Steering Angle Sensor | Steering angle detected by steering angle sensor is displayed. |
| Yaw Rate Sensor | Vehicle angular speed detected by yaw rate sensor is displayed. |
| Pressure Sensor | Brake fluid pressure detected by pressure sensor is displayed. |
| Longitudinal G Sensor | Vehicle longitudinal acceleration detected by longitudinal G sensor is displayed. |
| Lateral G Sensor | Vehicle lateral acceleration detected by lateral G sensor is displayed. |
| Voltage of IGN | Voltage supplied to VDC control module is displayed. |

| Display | Contents to be displayed |
|---|---|
| Acceleration Pedal Position | Accelerator pedal opening angle is displayed. |
| Engine Speed | Engine speed on malfunction occurrence is displayed. |
| Steering angle flag | Whether the absolute angle of the steering angle sensor was determined is displayed. |
| EBD Control Flag | EBD control condition is displayed. |
| ABS Control Flag | ABS control condition is displayed. |
| TCS Control Flag | TCS control condition is displayed. |
| VDC Control Flag | VDC control condition is displayed. |
| E/G Control Stop Flag | Engine control command signal is displayed. |
| OFF Switch Detection | ON/OFF condition of the VDC operated by the driver is displayed. |
| Brake Light Switch | Brake ON/OFF is displayed. |
| Clutch Switch | Clutch ON/OFF is displayed. (For MT model only. Fixed to OFF on AT model.) |
| Reverse Signal | Reverse gear ON/OFF is displayed. (For MT model only. Fixed to OFF on AT model.) |

## 5. PARAMETER SELECTION

**CAUTION:**
**• Subaru Select Monitor is required for parameter selection.**
**• This function can be used for the replacement part of VDCCM&H/U.**

NOTE:
• When the VDCCM&H/U is replaced with a replacement part, be sure to perform the parameter selection/registration to the VDCCM&H/U using this function.
• To confirm the applied model, refer to the “model number plate” attached on the vehicle. <Ref. to ID-2, IDENTIFICATION, Identification.>
• When the applied model is entered wrong, re-entry is possible.
• When the registration has not been performed, the DTC code “Parameter” is detected together with the ABS/EBD/VDC warning light illumination.
1) Connect the Subaru Select Monitor.
2) On «Main Menu» display, select {Each System Check}.
3) On «System Selection Menu» display, select {Brake Control System}.
4) When {VDC} is displayed, select the [OK] button.
5) On «Brake Control Diagnosis» display, select {Work Support}.
6) On «Work Support» display, select {Select Parameter}.
7) Check the applied model and option code indicated in the “Model number plate”. <Ref. to ID-2, IDENTIFICATION, Identification.>
8) Enter the applied model of 7-digit alphanumeric characters and press the [Enter] key.
9) When the option code input screen appears after entering the applied model, enter the option code consisting of 4-digit alphanumeric characters, and press the [Enter] key When the option code is 3 digits, add “0” (zero) in front and enter the code as 4 digits.
10) When the confirmation screen indicating the vehicle information appears, check that the correct applied model and grade are displayed and click the [OK] button.

NOTE:
When the displayed applied model and grade are different from those of the vehicle, perform registration operations again after clicking the [OK] button.
11) Execute the Clear Memory Mode after parameter selection and registration operations because the DTC for “Parameter selection error” is memorized. <Ref. to VDC(diag)-24, Clear Memory Mode.>

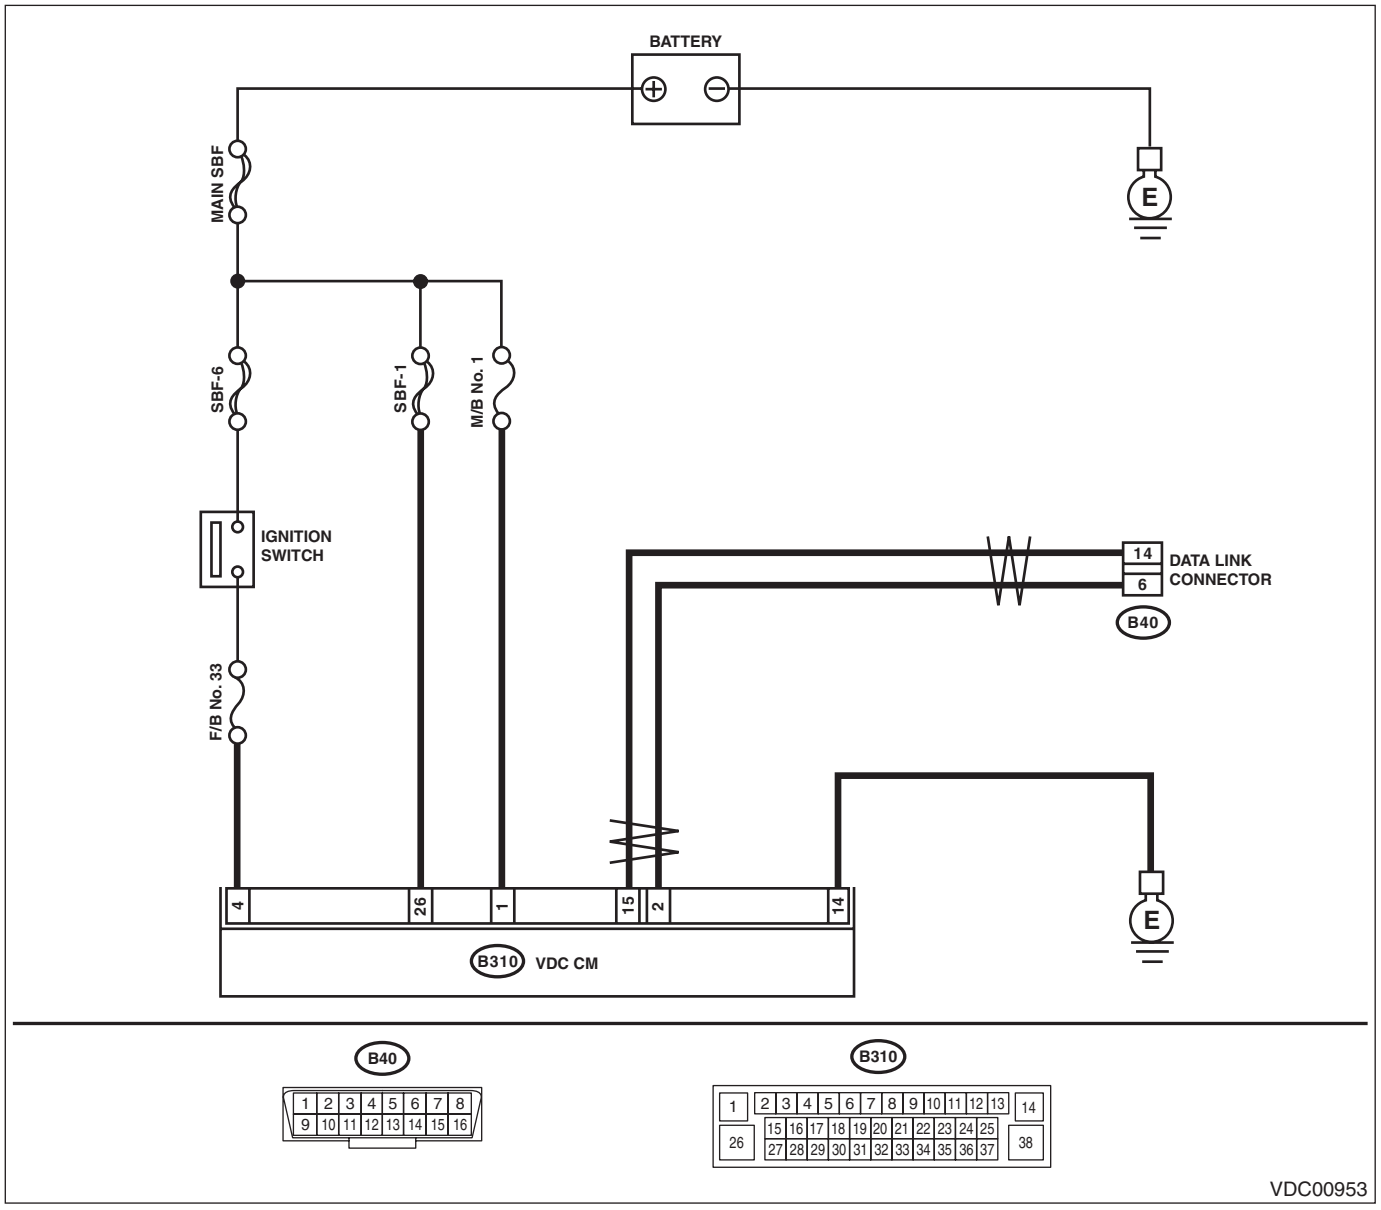
## 6. PARAMETER CHECK

NOTE:
The parameter data registered in the VDCCM is shown on the display.
1) Connect the Subaru Select Monitor.
2) On «Main Menu» display, select {Each System Check}.
3) On «System Selection Menu» display, select {Brake Control System}.
4) When {VDC} is displayed, select the [OK] button.
5) On «Brake Control Diagnosis» display, select {Work Support}.
6) On «Work Support» display, select {Confirm on parameter}.
7) On the {Confirm on parameter} display screen, check that the applied model and grade of the target vehicle are included, and click the [OK] button.
8) If the applied model and grade of the target vehicle are not included on the {Confirm on parameter} display screen, perform “parameter selection and registration”. <Ref. to VDC(diag)-19, PARAMETER SELECTION, OPERATION, Subaru Select Monitor.>

# B: INSPECTION

## 1. COMMUNICATION FOR INITIALIZING IMPOSSIBLE

**DETECTING CONDITION:**
Defective harness connector
**TROUBLE SYMPTOM:**
Communication is impossible between VDC and Subaru Select Monitor.
**WIRING DIAGRAM**:
Vehicle Dynamics Control System <Ref. to WI-152, Vehicle Dynamics Control System.>



| Step | | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK IGNITION SWITCH.** | Is the ignition switch ON? | Go to step **2**. | Turn the ignition switch to ON, and select VDC mode using Subaru Select Monitor. |
| 2 | **CHECK BATTERY.**<br>1) Turn the ignition switch to OFF.<br>2) Measure the battery voltage. | Is the voltage 11 V or more? | Go to step **3**. | Charge or replace the battery. |

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 3 | **CHECK BATTERY TERMINAL.** | Is there poor contact at battery terminal? | Repair or tighten the battery terminal. | Go to step **5**. |
| 4 | **CHECK INSTALLATION OF VDCCM&H/U CONNECTOR.**<br>Turn the ignition switch to OFF. | Is the VDCCM&H/U connector inserted into VDCCM&H/U until the clamp locks onto it? | Go to step **5**. | Insert VDCCM&H/U connector into VDCCM&H/U. |
| 5 | **CHECK LAN SYSTEM.**<br>Perform the diagnosis for LAN system. <Ref. to LAN(diag)-2, Basic Diagnostic Procedure.> | Is there any fault in LAN system? | Perform the diagnosis according to DTC for LAN system. <Ref. to LAN(diag)-50, List of Diagnostic Trouble Code (DTC).> | Go to step **6**. |
| 6 | **CHECK SUBARU SELECT MONITOR COMMUNICATION.**<br>1) Turn the ignition switch to ON.<br>2) Check whether communication to VDC system can be executed normally. | Is the system name displayed on Subaru Select Monitor? | Check the DTC in VDC system. <Ref. to VDC(diag)-22, Read Diagnostic Trouble Code (DTC).> | Go to step **7**. |
| 7 | **CHECK POWER SUPPLY CIRCUIT.**<br>1) Turn the ignition switch to ON. (engine OFF)<br>2) Measure the ignition power supply voltage between VDCCM&H/U connector and chassis ground.<br>***Connector & terminal***<br>***(B310) No. 4 (+) — Chassis ground (–):***<br>***(B310) No. 1 (+) — Chassis ground (–):***<br>***(B310) No. 26 (+) — Chassis ground (–):*** | Is the voltage 10 — 15 V? | Go to step **8**. | Repair open circuit in harness between VDCCM&H/U and battery. |
| 8 | **CHECK HARNESS CONNECTOR BETWEEN VDCCM&H/U AND CHASSIS GROUND.**<br>1) Turn the ignition switch to OFF.<br>2) Disconnect the connector from the VDCCM&H/U.<br>3) Measure the resistance of harness between VDCCM&H/U connector and chassis ground.<br>***Connector & terminal***<br>***(B310) No. 14 — Chassis ground:*** | Is the resistance less than 10 Ω? | Go to step **9**. | Repair the open circuit of VDCCM&H/U ground circuit and poor contact of connector. |
| 9 | **CHECK POOR CONTACT OF CONNECTOR.** | Is there poor contact of control module power supply, ground circuit and data link connector? | Repair the connector. | Replace the VDCCM&H/U. <Ref. to VDC-9, VDC Control Module and Hydraulic Control Unit (VDCCM&H/U).> |

# 7. Read Diagnostic Trouble Code (DTC)

## A: OPERATION

• For detailed operation procedures, refer to “PC application help for Subaru Select Monitor”.
• For details concerning DTCs, refer to “List of Diagnostic Trouble Code (DTC)”. <Ref. to VDC(diag)-37, List of Diagnostic Trouble Code (DTC).>

# 8. Inspection Mode

## A: PROCEDURE

Reproduce the malfunction occurrence condition as much as possible.
Drive the vehicle at least ten minutes.

NOTE:
Make sure the vehicle is not dragged to one side under usual driving condition.

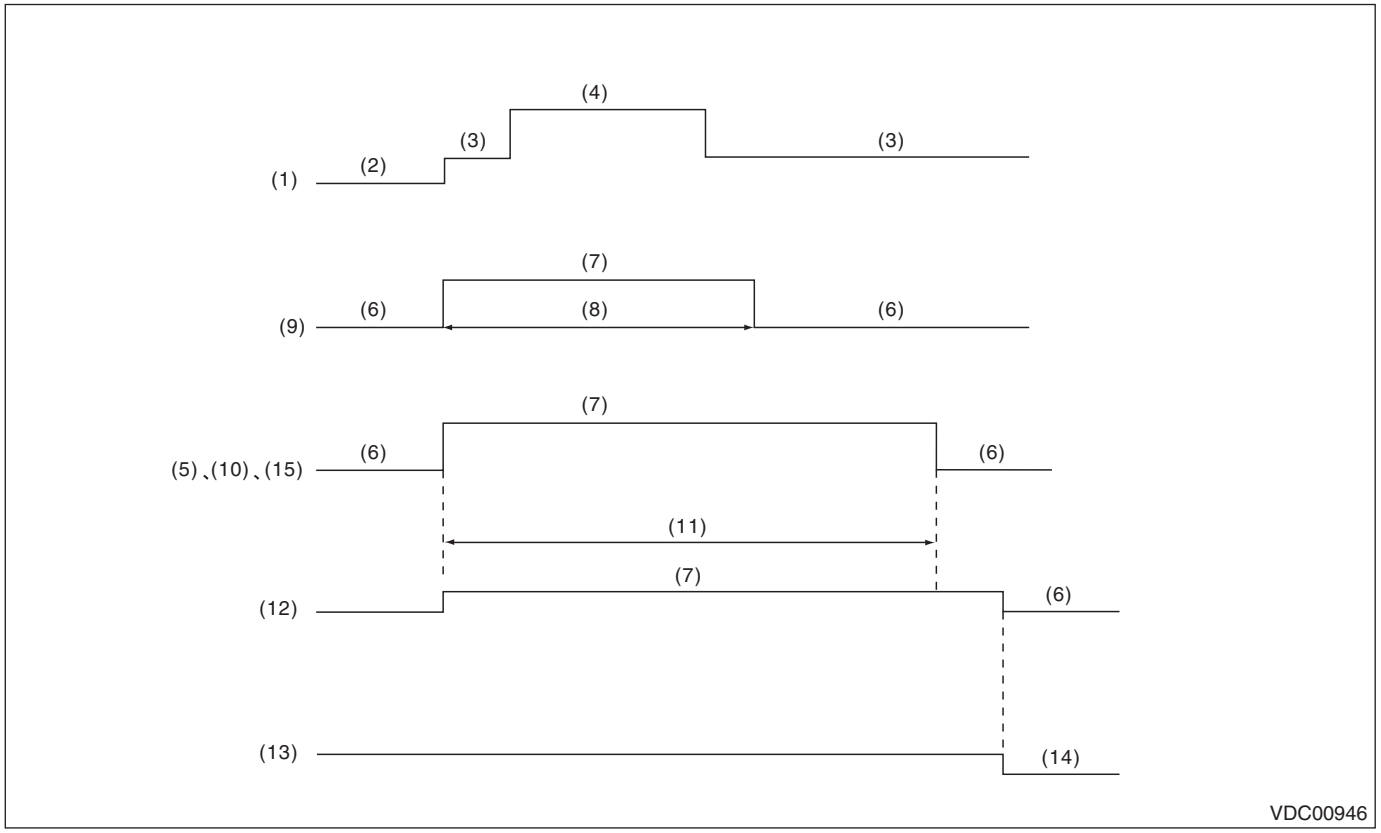
# 9. Clear Memory Mode

## A: OPERATION

For detailed operation procedures, refer to “PC application help for Subaru Select Monitor”.

# 10.Warning Light Illumination Pattern

## A: INSPECTION



| | | | | | |
|---|---|---|---|---|---|
| (1) | Ignition switch | (6) | Light OFF | (11) | 2 seconds or more |
| (2) | OFF | (7) | Light ON | (12) | Brake warning light (EBD warning light) |
| (3) | ON | (8) | 2 seconds | (13) | Parking brake |
| (4) | Engine start | (9) | VDC OFF indicator light | (14) | Released |
| (5) | ABS warning light | (10) | VDC warning light & VDC indicator light | (15) | Hill start assist warning light |

NOTE:
Hill start assist warning light always illuminates when the hill start assist is in the OFF mode.

1) When warning lights or indicator lights do not illuminate in accordance with this illumination pattern, there must be an electrical malfunction.
2) When the warning lights or indicator lights remain constantly OFF, check the combination meter circuit. <Ref. to VDC(diag)-27, EBD WARNING LIGHT, ABS WARNING, VDC OFF INDICATOR LIGHT, VDC WARNING LIGHT AND VDC INDICATOR LIGHT DO NOT COME ON, Warning Light Illumination Pattern.> <Ref. to VDC(diag)-28, HILL START ASSIST WARNING LIGHT DOES NOT COME ON, Warning Light Illumination Pattern.>
3) When the ABS warning light, VDC OFF indicator light, VDC warning light & VDC indicator light, and hill start assist warning light do not go off, check the combination meter circuit or CAN communication circuit. <Ref. to VDC(diag)-29, ABS WARNING LIGHT DOES NOT GO OFF, Warning Light Illumination Pattern.> <Ref. to VDC(diag)-31, VDC OFF INDICATOR LIGHT DOES NOT GO OFF, Warning Light Illumination Pattern.> <Ref. to VDC(diag)-30, VDC WARNING LIGHT AND VDC INDICATOR LIGHT DO NOT GO OFF, Warning Light Illumination Pattern.> <Ref. to VDC(diag)-33, HILL START ASSIST WARNING LIGHT DOES NOT GO OFF, Warning Light Illumination Pattern.>

NOTE:
• Even though the ABS warning light, and the VDC warning light & VDC indicator light do not go off in 2 seconds after illuminating, the ABS and VDC functions are normal if the warning lights go off while the vehicle is driven at approximately 38 km/h (23 MPH). However, while these lights are on, the functions with their warning lights illuminated do not operate.
• It may take several minutes before the VDC warning light & VDC indicator light goes off, if the vehicle is parked under low temperature for a specified time. This is not defective because it is resulted from low engine coolant temperature. Perform the Clear Memory Mode because DTC may be recorded at this time. <Ref. to VDC(diag)-24, Clear Memory Mode.>
• With the vehicle jack-up/lift-up or set on free rollers, when the wheels lock or spin after starting the engine, ABS warning light, and VDC warning light & VDC indicator light may illuminate because VDC-CM&H/U detects the abnormal conditions from ABS wheel speed sensor or longitudinal G sensor. In this case, this is not a malfunction. Perform the Clear Memory Mode. <Ref. to VDC(diag)-24, Clear Memory Mode.>

## B: EBD WARNING LIGHT, ABS WARNING, VDC OFF INDICATOR LIGHT, VDC WARNING LIGHT AND VDC INDICATOR LIGHT DO NOT COME ON

**DETECTING CONDITION:**
Defective combination meter

**TROUBLE SYMPTOM:**
When the ignition switch is turned to ON (engine OFF), EBD warning light, ABS warning light, VDC OFF indicator light, and VDC warning light & VDC indicator light do not illuminate.

NOTE:
When pressing the VDC OFF switch for 10 seconds or more, the VDC OFF indicator light goes off and cannot operate any more. When turning the ignition switch from OFF to ON, the OFF operation enabled status is restored.

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK OTHER INDICATOR LIGHT.**<br>Turn the ignition switch to ON. | Does other indicator light illuminate soon after “ON”? | Go to step **2**. | Check the combination meter. <Ref. to IDI-7, SELF-DIAGNOSIS DISPLAY MODE, OPERATION, Combination Meter System.> |
| 2 | **CHECK VDCCM.**<br>When the engine does not start, display the current data of VDCCM using Subaru Select Monitor. | Immediately after the ignition switch is turned to ON, is the «EBD Warning Light» ON? | Go to step **3**. | Replace the VDCCM only. <Ref. to VDC-16, REPLACEMENT, VDC Control Module and Hydraulic Control Unit (VDCCM&H/U).> |
| 3 | **CHECK VDCCM.**<br>When the engine does not start, display the current data of VDCCM using Subaru Select Monitor. | Immediately after the ignition switch is turned to ON, is the «ABS Warning Lamp» ON? | Go to step **4**. | Replace the VDCCM only. <Ref. to VDC-16, REPLACEMENT, VDC Control Module and Hydraulic Control Unit (VDCCM&H/U).> |
| 4 | **CHECK VDCCM.**<br>When the engine does not start, display the current data of VDCCM using Subaru Select Monitor. | Immediately after the ignition switch is turned to ON, is the «VDC Warning Lamp» ON? | Check the combination meter. <Ref. to IDI-7, SELF-DIAGNOSIS DISPLAY MODE, OPERATION, Combination Meter System.> | Replace the VDCCM only. <Ref. to VDC-16, REPLACEMENT, VDC Control Module and Hydraulic Control Unit (VDCCM&H/U).> |

## C: HILL START ASSIST WARNING LIGHT DOES NOT COME ON

**DETECTING CONDITION:**
Defective combination meter

**TROUBLE SYMPTOM:**
When the ignition switch is turned to ON (engine OFF), hill start assist warning light does not illuminate.

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK OTHER INDICATOR LIGHT.**<br>Turn the ignition switch to ON. (engine OFF) | Do other indicator lights illuminate? | Go to step **2**. | Check the combination meter. <Ref. to IDI-7, SELF-DIAGNOSIS DISPLAY MODE, OPERATION, Combination Meter System.> |
| 2 | **READ DTC.**<br>Read the DTC. <Ref. to VDC(diag)-22, Read Diagnostic Trouble Code (DTC).> | Is DTC displayed? | Perform the diagnosis according to DTC. <Ref. to VDC(diag)-37, List of Diagnostic Trouble Code (DTC).> | Go to step **3**. |
| 3 | **CHECK LAN SYSTEM.**<br>Perform the diagnosis for LAN system. <Ref. to LAN(diag)-2, Basic Diagnostic Procedure.> | Is there any fault in LAN system? | Perform the diagnosis according to DTC for LAN system. <Ref. to LAN(diag)-50, List of Diagnostic Trouble Code (DTC).> | Go to step **4**. |
| 4 | **CHECK COMBINATION METER.**<br>Check the combination meter. <Ref. to IDI-7, SELF-DIAGNOSIS DISPLAY MODE, OPERATION, Combination Meter System.> | Is combination meter OK? | Replace the VDCCM only. <Ref. to VDC-16, REPLACEMENT, VDC Control Module and Hydraulic Control Unit (VDCCM&H/U).> | Replace the combination meter. <Ref. to IDI-17, Combination Meter.> |

## D: ABS WARNING LIGHT DOES NOT GO OFF

**DETECTING CONDITION:**

- Defective combination meter
- Defective CAN communication

**TROUBLE SYMPTOM:**

When starting the engine, the ABS warning light is kept on.

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 1 | **READ DTC.**<br>Read the DTC. <Ref. to VDC(diag)-22, Read Diagnostic Trouble Code (DTC).> | Is DTC displayed? | Perform the diagnosis according to DTC. <Ref. to VDC(diag)-37, List of Diagnostic Trouble Code (DTC).> | Go to step **2**. |
| 2 | **CHECK VDCCM.**<br>Display the current data of VDCCM using Subaru Select Monitor. | Is the «ABS Warning Lamp» ON? | Go to step **3**. | Go to step **4**. |
| 3 | **READ DTC.**<br>Read the DTC after driving the vehicle at 40 km/h (25 MPH) or more. | Is DTC displayed? | Perform the diagnosis according to DTC. <Ref. to VDC(diag)-37, List of Diagnostic Trouble Code (DTC).> | Go to step **4**. |
| 4 | **CHECK LAN SYSTEM.**<br>Perform the diagnosis for LAN system. <Ref. to LAN(diag)-2, Basic Diagnostic Procedure.> | Is there any fault in LAN system? | Perform the diagnosis according to DTC for LAN system. <Ref. to LAN(diag)-50, List of Diagnostic Trouble Code (DTC).> | Go to step **5**. |
| 5 | **CHECK COMBINATION METER.**<br>Check the combination meter. <Ref. to IDI-7, SELF-DIAGNOSIS DISPLAY MODE, OPERATION, Combination Meter System.> | Is combination meter OK? | Replace the VDCCM only. <Ref. to VDC-16, REPLACEMENT, VDC Control Module and Hydraulic Control Unit (VDCCM&H/U).> | Replace the combination meter. <Ref. to IDI-17, Combination Meter.> |

## E: VDC WARNING LIGHT AND VDC INDICATOR LIGHT DO NOT GO OFF

**DETECTING CONDITION:**

- Defective combination meter
- Defective engine
- Defective CAN communication

**TROUBLE SYMPTOM:**

When starting the engine, the VDC warning light & VDC indicator light remains lit.

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 1 | **READ DTC.**<br>Read the DTC. <Ref. to VDC(diag)-22, Read Diagnostic Trouble Code (DTC).> | Is DTC displayed? | Perform the diagnosis according to DTC. <Ref. to VDC(diag)-37, List of Diagnostic Trouble Code (DTC).> | Go to step **2**. |
| 2 | **CHECK VDCCM.**<br>Display the current data of VDCCM using Subaru Select Monitor. | Is the «VDC Warning Lamp» ON? | Go to step **3**. | Go to step **4**. |
| 3 | **READ DTC.**<br>Read the DTC after driving the vehicle at 40 km/h (25 MPH) or more. | Is DTC displayed? | Perform the diagnosis according to DTC. <Ref. to VDC(diag)-37, List of Diagnostic Trouble Code (DTC).> | Go to step **4**. |
| 4 | **CHECK LAN SYSTEM.**<br>Perform the diagnosis for LAN system. <Ref. to LAN(diag)-2, Basic Diagnostic Procedure.> | Is there any fault in LAN system? | Perform the diagnosis according to DTC for LAN system. <Ref. to LAN(diag)-50, List of Diagnostic Trouble Code (DTC).> | Go to step **5**. |
| 5 | **CHECK COMBINATION METER.**<br>Check the combination meter. <Ref. to IDI-7, SELF-DIAGNOSIS DISPLAY MODE, OPERATION, Combination Meter System.> | Is combination meter OK? | Replace the VDCCM only. <Ref. to VDC-16, REPLACEMENT, VDC Control Module and Hydraulic Control Unit (VDCCM&H/U).> | Replace the combination meter. <Ref. to IDI-17, Combination Meter.> |

## F: VDC OFF INDICATOR LIGHT DOES NOT GO OFF

**DETECTING CONDITION:**

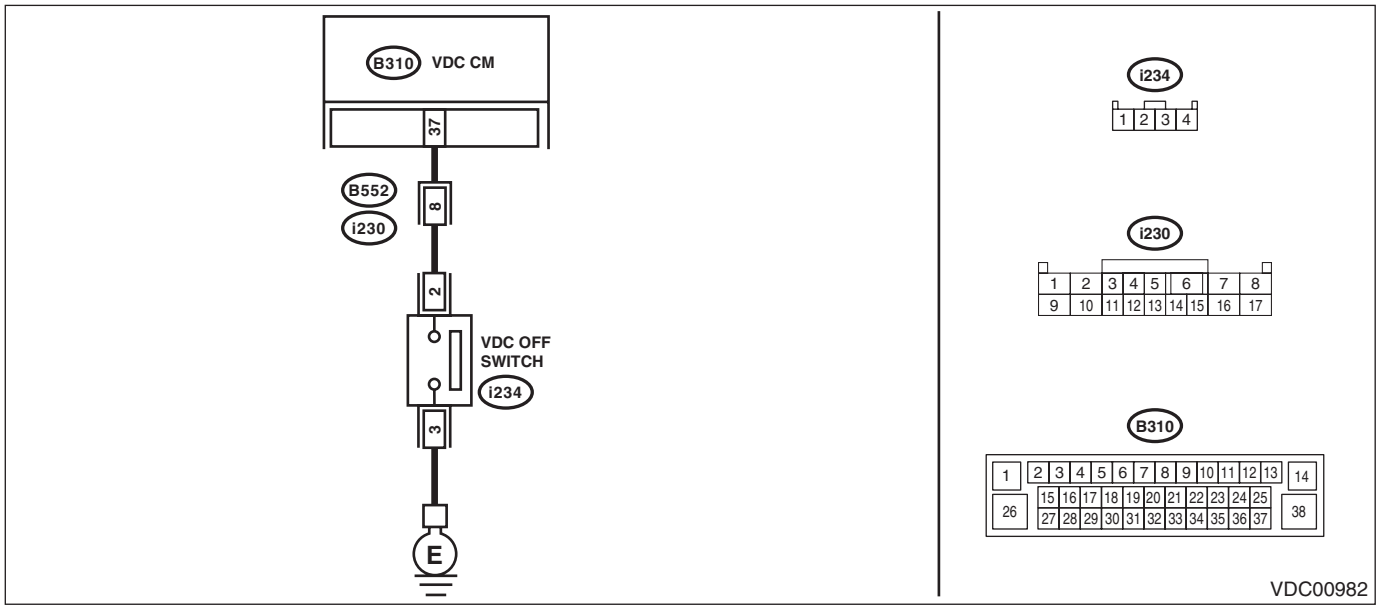
- Defective combination meter
- Defective CAN communication
- VDC OFF switch is shorted.

**TROUBLE SYMPTOM:**

When starting the engine, VDC OFF indicator light is kept ON.

**WIRING DIAGRAM:**

Vehicle Dynamics Control System <Ref. to WI-152, Vehicle Dynamics Control System.>



| Step | | Check | Yes | No |
|---|---|---|---|---|
| 1 | **READ DTC.**<br>Read the DTC. <Ref. to VDC(diag)-22, Read Diagnostic Trouble Code (DTC).> | Is DTC displayed? | Perform the diagnosis according to DTC. <Ref. to VDC(diag)-37, List of Diagnostic Trouble Code (DTC).> | Go to step **2**. |
| 2 | **CHECK VDC OFF SWITCH.**<br>Remove and check VDC OFF switch. <Ref. to VDC-42, VDC OFF Switch.> | Is the VDC OFF switch normal? | Go to step **3**. | Replace the VDC OFF switch. |
| 3 | **CHECK VDC OFF SWITCH CIRCUIT.**<br>1) Disconnect the connector from the VDCCM&H/U.<br>2) Measure the resistance between VDCCM&H/U connector and chassis ground.<br>***Connector & terminal***<br>***(B310) No. 37 — Chassis ground:*** | Is the resistance less than 10 Ω? | Check the VDC OFF switch circuit. | Go to step **4**. |
| 4 | **CHECK LAN SYSTEM.**<br>Perform the diagnosis for LAN system. <Ref. to LAN(diag)-2, Basic Diagnostic Procedure.> | Is there any fault in LAN system? | Perform the diagnosis according to DTC for LAN system. <Ref. to LAN(diag)-50, List of Diagnostic Trouble Code (DTC).> | Go to step **5**. |

| Step | | Check | Yes | No |
|---|---|---|---|---|
| 5 | **CHECK COMBINATION METER.**<br>Check the combination meter. <Ref. to IDI-7, SELF-DIAGNOSIS DISPLAY MODE, OPERATION, Combination Meter System.> | Is combination meter OK? | Replace the VDCCM only. <Ref. to VDC-16, REPLACEMENT, VDC Control Module and Hydraulic Control Unit (VDCCM&H/U).> | Replace the combination meter. <Ref. to IDI-17, Combination Meter.> |

## G: HILL START ASSIST WARNING LIGHT DOES NOT GO OFF

**DETECTING CONDITION:**

- Defective combination meter
- Defective CAN communication

**TROUBLE SYMPTOM:**

When starting the engine, the hill start assist warning light continues to illuminate.

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 1 | **READ DTC.**<br>Read the DTC. <Ref. to VDC(diag)-22, Read Diagnostic Trouble Code (DTC).> | Is DTC displayed? | Perform the diagnosis according to DTC. <Ref. to VDC(diag)-37, List of Diagnostic Trouble Code (DTC).> | Go to step **2**. |
| 2 | **CHECK LAN SYSTEM.**<br>Perform the diagnosis for LAN system. <Ref. to LAN(diag)-2, Basic Diagnostic Procedure.> | Is there any fault in LAN system? | Perform the diagnosis according to DTC for LAN system. <Ref. to LAN(diag)-50, List of Diagnostic Trouble Code (DTC).> | Go to step **3**. |
| 3 | **CHECK COMBINATION METER.**<br>Check the combination meter. <Ref. to IDI-7, SELF-DIAGNOSIS DISPLAY MODE, OPERATION, Combination Meter System.> | Is combination meter OK? | Replace the VDCCM only. <Ref. to VDC-16, REPLACEMENT, VDC Control Module and Hydraulic Control Unit (VDCCM&H/U).> | Replace the combination meter. <Ref. to IDI-17, Combination Meter.> |

## H: BRAKE WARNING LIGHT DOES NOT GO OFF

**DETECTING CONDITION:**

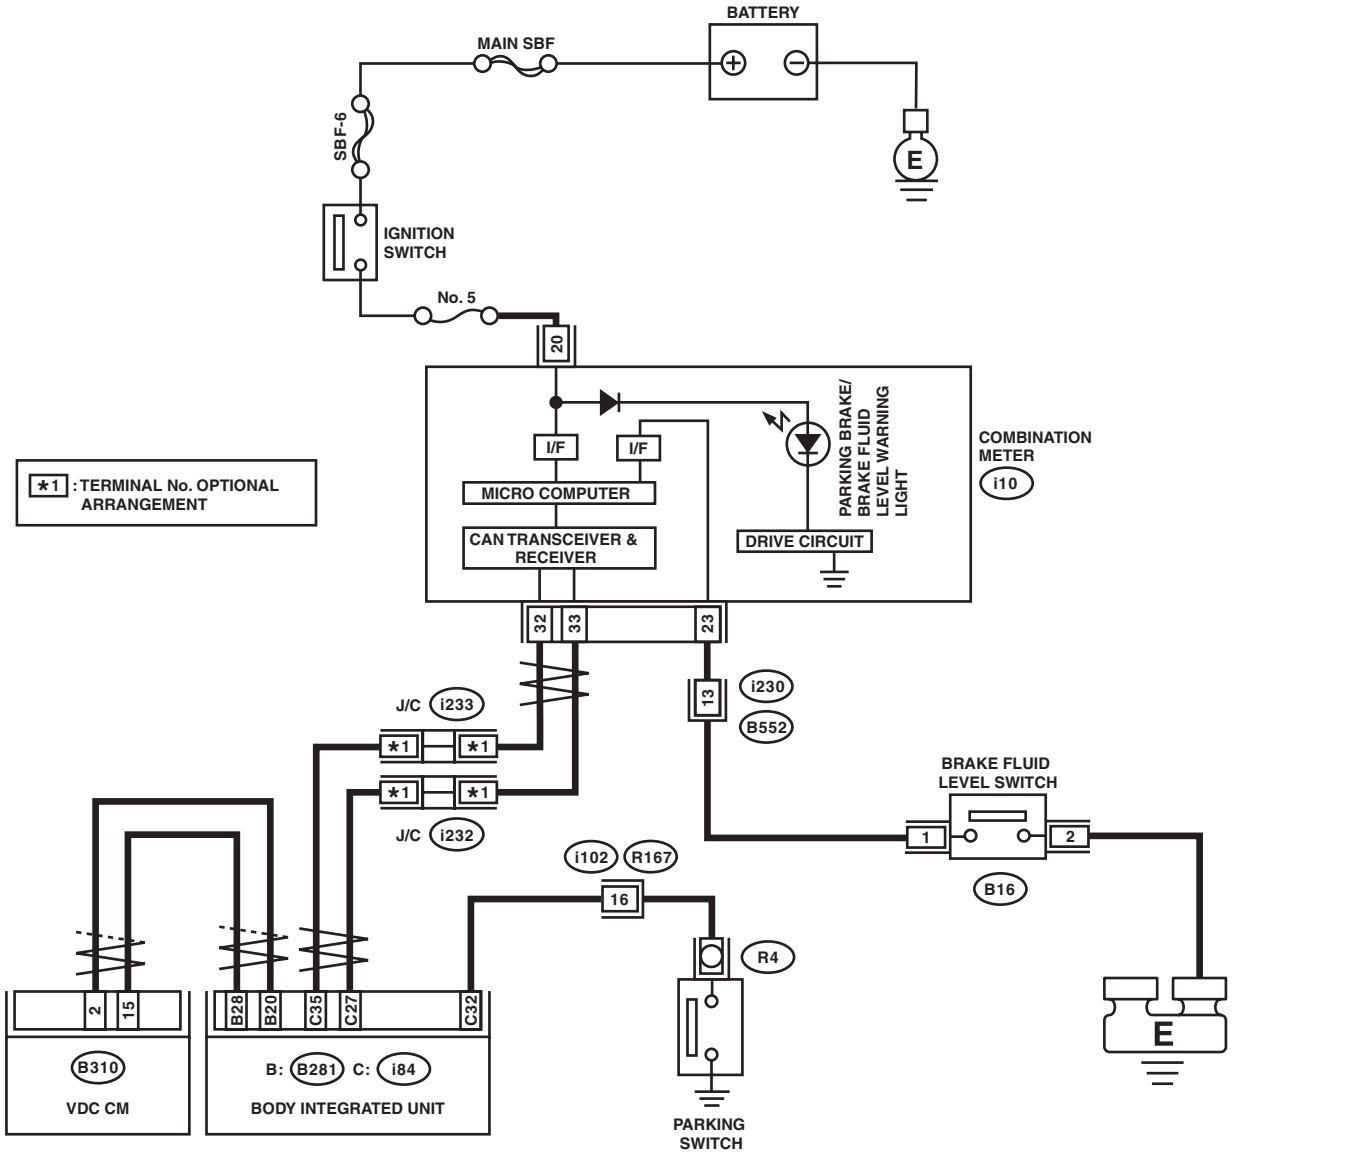
- Brake warning light circuit is shorted.
- Defective sensor/connector
- Defective CAN communication

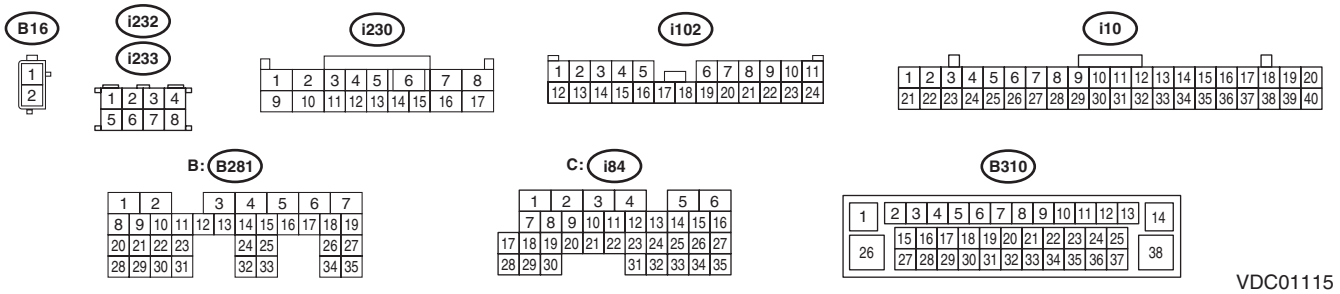
**TROUBLE SYMPTOM:**

After starting the engine, the brake warning light remains lit though the parking lever is released.

**WIRING DIAGRAM:**

Parking brake / brake fluid level warning light system <Ref. to WI-115, Parking Brake / Brake Fluid Level Warning Light System.>





VDC01115

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK INSTALLATION OF VDCCM&H/U CONNECTOR.**<br>1) Turn the ignition switch to OFF.<br>2) Check that the VDCCM&H/U connector is inserted until it is locked by clamp. | Is the connector firmly inserted? | Go to step **2**. | Insert the VDCCM&H/U connector until it is locked by clamp. |
| 2 | **READ DTC.**<br>Read the DTC. <Ref. to VDC(diag)-22, Read Diagnostic Trouble Code (DTC).> | Is DTC displayed? | Perform the diagnosis according to DTC. <Ref. to VDC(diag)-37, List of Diagnostic Trouble Code (DTC).> | Go to step **3**. |
| 3 | **CHECK BRAKE FLUID AMOUNT.**<br>Check the amount of brake fluid in the reservoir tank of master cylinder. | Does the level of the brake fluid amount fall between the lines of "MAX" and "MIN"? | Go to step **4**. | Replenish brake fluid to the specified value. |
| 4 | **CHECK BRAKE FLUID LEVEL SWITCH.**<br>1) Turn the ignition switch to OFF.<br>2) Disconnect the level switch connector (B16) from master cylinder.<br>3) Measure the resistance of master cylinder terminals.<br>***Terminals***<br>***No. 1 — No. 2:*** | Is the resistance 1 MΩ or more? | Go to step **5**. | Replace the master cylinder. <Ref. to BR-44, Master Cylinder.> |
| 5 | **CHECK GROUND SHORT OF HARNESS.**<br>1) Disconnect the connector (i10) from combination meter.<br>2) Measure the resistance between combination meter connector and chassis ground.<br>***Connector & terminal***<br>***(i10) No. 23 — Chassis ground:*** | Is the resistance 1 MΩ or more? | Go to step **6**. | Repair the harness between combination meter and brake fluid level switch. |
| 6 | **CHECK PARKING BRAKE SWITCH.**<br>1) Disconnect the connector (R4) from parking brake switch.<br>2) Release the parking brake.<br>3) Measure the resistance between parking brake switch terminal and chassis ground. | Is the resistance 1 MΩ or more? | Go to step **7**. | Replace the parking brake switch. |
| 7 | **CHECK GROUND SHORT OF HARNESS.**<br>1) Disconnect the connector (i84) from body integrated unit.<br>2) Measure the resistance between body integrated unit connector and chassis ground.<br>***Connector & terminal***<br>***(i84) No. 32 — Chassis ground:*** | Is the resistance 1 MΩ or more? | Go to step **8**. | Repair the harness between body integrated unit and parking brake switch. |
| 8 | **CHECK POOR CONTACT OF CONNECTOR.**<br>Check for poor contact of all connectors. | Is there poor contact? | Repair the connector. | Go to step **9**. |
| 9 | **CHECK LAN SYSTEM.**<br>Perform the diagnosis for LAN system. <Ref. to LAN(diag)-2, Basic Diagnostic Procedure.> | Is there any fault in LAN system? | Perform the diagnosis according to DTC for LAN system. <Ref. to LAN(diag)-50, List of Diagnostic Trouble Code (DTC).> | Go to step **10**. |
| 10 | **CHECK COMBINATION METER.**<br>Check the combination meter. <Ref. to IDI-7, SELF-DIAGNOSIS DISPLAY MODE, OPERATION, Combination Meter System.> | Is combination meter OK? | Replace the VDCCM only. <Ref. to VDC-16, REPLACEMENT, VDC Control Module and Hydraulic Control Unit (VDCCM&H/U).> | Replace the combination meter. <Ref. to IDI-17, Combination Meter.> |

# 11.List of Diagnostic Trouble Code (DTC)

## A: LIST

| DTC | Item | Content of diagnosis | Reference |
|---|---|---|---|
| C1211 | FR Wheel Speed Sensor System Wire Break/ Excessive Input | Open/high input of front ABS wheel speed sensor RH | <Ref. to VDC(diag)-41, DTC C1211 FR WHEEL SPEED SENSOR SYSTEM WIRE BREAK/EXCESSIVE INPUT, Diagnostic Procedure with Diagnostic Trouble Code (DTC).> |
| C1212 | FR Wheel Speed Sensor System | Front ABS wheel speed sensor RH signal malfunction | <Ref. to VDC(diag)-44, DTC C1212 FR WHEEL SPEED SENSOR SYSTEM, Diagnostic Procedure with Diagnostic Trouble Code (DTC).> |
| C1221 | FL Wheel Speed Sensor System Wire Break/ Excessive Input | Open/high input of front ABS wheel speed sensor LH | <Ref. to VDC(diag)-41, DTC C1221 FL WHEEL SPEED SENSOR SYSTEM WIRE BREAK/ EXCESSIVE INPUT, Diagnostic Procedure with Diagnostic Trouble Code (DTC).> |
| C1222 | FL Wheel Speed Sensor System | Front ABS wheel speed sensor LH signal malfunction | <Ref. to VDC(diag)-44, DTC C1222 FL WHEEL SPEED SENSOR SYSTEM, Diagnostic Procedure with Diagnostic Trouble Code (DTC).> |
| C1231 | RR Wheel Speed Sensor System Wire Break/ Excessive Input | Open/high input of rear ABS wheel speed sensor RH | <Ref. to VDC(diag)-41, DTC C1231 RR WHEEL SPEED SENSOR SYSTEM WIRE BREAK/EXCESSIVE INPUT, Diagnostic Procedure with Diagnostic Trouble Code (DTC).> |
| C1232 | RR Wheel Speed Sensor System | Rear ABS wheel speed sensor RH signal malfunction | <Ref. to VDC(diag)-44, DTC C1232 RR WHEEL SPEED SENSOR SYSTEM, Diagnostic Procedure with Diagnostic Trouble Code (DTC).> |
| C1241 | RL Wheel Speed Sensor System Wire Break/ Excessive Input | Open/high input of rear ABS wheel speed sensor LH | <Ref. to VDC(diag)-42, DTC C1241 RL WHEEL SPEED SENSOR SYSTEM WIRE BREAK/EXCESSIVE INPUT, Diagnostic Procedure with Diagnostic Trouble Code (DTC).> |
| C1242 | RL Wheel Speed Sensor System | Rear ABS wheel speed sensor LH signal malfunction | <Ref. to VDC(diag)-45, DTC C1242 RL WHEEL SPEED SENSOR SYSTEM, Diagnostic Procedure with Diagnostic Trouble Code (DTC).> |
| C1251 | Wheel Speed Sensor System | Wheel speed sensor malfunction | <Ref. to VDC(diag)-46, DTC C1251 WHEEL SPEED SENSOR SYSTEM, Diagnostic Procedure with Diagnostic Trouble Code (DTC).> |
| C1252 | Wheel Speed Sensor Signal of One of The Wheels | ABS wheel speed sensor signal malfunction in one of four wheels | <Ref. to VDC(diag)-47, DTC C1252 WHEEL SPEED SENSOR SIGNAL OF ONE OF THE WHEELS, Diagnostic Procedure with Diagnostic Trouble Code (DTC).> |
| C1311 | FR Inlet Solenoid Valve System | Front inlet solenoid valve RH malfunction in VDCCM&H/U | <Ref. to VDC(diag)-48, DTC C1311 FR INLET SOLENOID VALVE SYSTEM, Diagnostic Procedure with Diagnostic Trouble Code (DTC).> |
| C1312 | FR Outlet Solenoid Valve System | Front outlet solenoid valve RH malfunction in VDCCM&H/U | <Ref. to VDC(diag)-48, DTC C1312 FR OUTLET SOLENOID VALVE SYSTEM, Diagnostic Procedure with Diagnostic Trouble Code (DTC).> |
| C1321 | FL Inlet Solenoid Valve System | Front inlet solenoid valve LH malfunction in VDCCM&H/U | <Ref. to VDC(diag)-48, DTC C1321 FL INLET SOLENOID VALVE SYSTEM, Diagnostic Procedure with Diagnostic Trouble Code (DTC).> |
| C1322 | FL Outlet Solenoid Valve System | Front outlet solenoid valve LH malfunction in VDCCM&H/U | <Ref. to VDC(diag)-48, DTC C1322 FL OUTLET SOLENOID VALVE SYSTEM, Diagnostic Procedure with Diagnostic Trouble Code (DTC).> |

| DTC | Item | Content of diagnosis | Reference |
|---|---|---|---|
| C1331 | RR Inlet Solenoid Valve System | Rear inlet solenoid valve RH malfunction in VDCCM&H/U | <Ref. to VDC(diag)-49, DTC C1331 RR INLET SOLENOID VALVE SYSTEM, Diagnostic Procedure with Diagnostic Trouble Code (DTC).> |
| C1332 | RR Outlet Solenoid Valve System | Rear outlet solenoid valve RH malfunction in VDCCM&H/U | <Ref. to VDC(diag)-49, DTC C1332 RR OUTLET SOLENOID VALVE SYSTEM, Diagnostic Procedure with Diagnostic Trouble Code (DTC).> |
| C1341 | RL Inlet Solenoid Valve System | Rear inlet solenoid valve LH malfunction in VDCCM&H/U | <Ref. to VDC(diag)-49, DTC C1341 RL INLET SOLENOID VALVE SYSTEM, Diagnostic Procedure with Diagnostic Trouble Code (DTC).> |
| C1342 | RL Outlet Solenoid Valve System | Rear outlet solenoid valve LH malfunction in VDCCM&H/U | <Ref. to VDC(diag)-49, DTC C1342 RL OUTLET SOLENOID VALVE SYSTEM, Diagnostic Procedure with Diagnostic Trouble Code (DTC).> |
| C1351 | VDC Change-Over Valve 1 (P) | Primary cut valve malfunction in VDCCM&H/U | <Ref. to VDC(diag)-49, DTC C1351 VDC CHANGE-OVER VALVE 1 (P), Diagnostic Procedure with Diagnostic Trouble Code (DTC).> |

# 12. Diagnostic Procedure with Diagnostic Trouble Code (DTC)

## A: DTC C1211 FR WHEEL SPEED SENSOR SYSTEM WIRE BREAK/EXCESSIVE INPUT

NOTE:
For the diagnostic procedure, refer to “DTC C1241 RL WHEEL SPEED SENSOR SYSTEM WIRE BREAK/EXCESSIVE INPUT”. <Ref. to VDC(diag)-42, DTC C1241 RL WHEEL SPEED SENSOR SYSTEM WIRE BREAK/EXCESSIVE INPUT, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>

## B: DTC C1221 FL WHEEL SPEED SENSOR SYSTEM WIRE BREAK/EXCESSIVE INPUT

NOTE:
For the diagnostic procedure, refer to “DTC C1241 RL WHEEL SPEED SENSOR SYSTEM WIRE BREAK/EXCESSIVE INPUT”. <Ref. to VDC(diag)-42, DTC C1241 RL WHEEL SPEED SENSOR SYSTEM WIRE BREAK/EXCESSIVE INPUT, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>

## C: DTC C1231 RR WHEEL SPEED SENSOR SYSTEM WIRE BREAK/EXCESSIVE INPUT

NOTE:
For the diagnostic procedure, refer to “DTC C1241 RL WHEEL SPEED SENSOR SYSTEM WIRE BREAK/EXCESSIVE INPUT”. <Ref. to VDC(diag)-42, DTC C1241 RL WHEEL SPEED SENSOR SYSTEM WIRE BREAK/EXCESSIVE INPUT, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>

## D: DTC C1241 RL WHEEL SPEED SENSOR SYSTEM WIRE BREAK/EXCESSIVE INPUT

**DTC DETECTING CONDITION:**

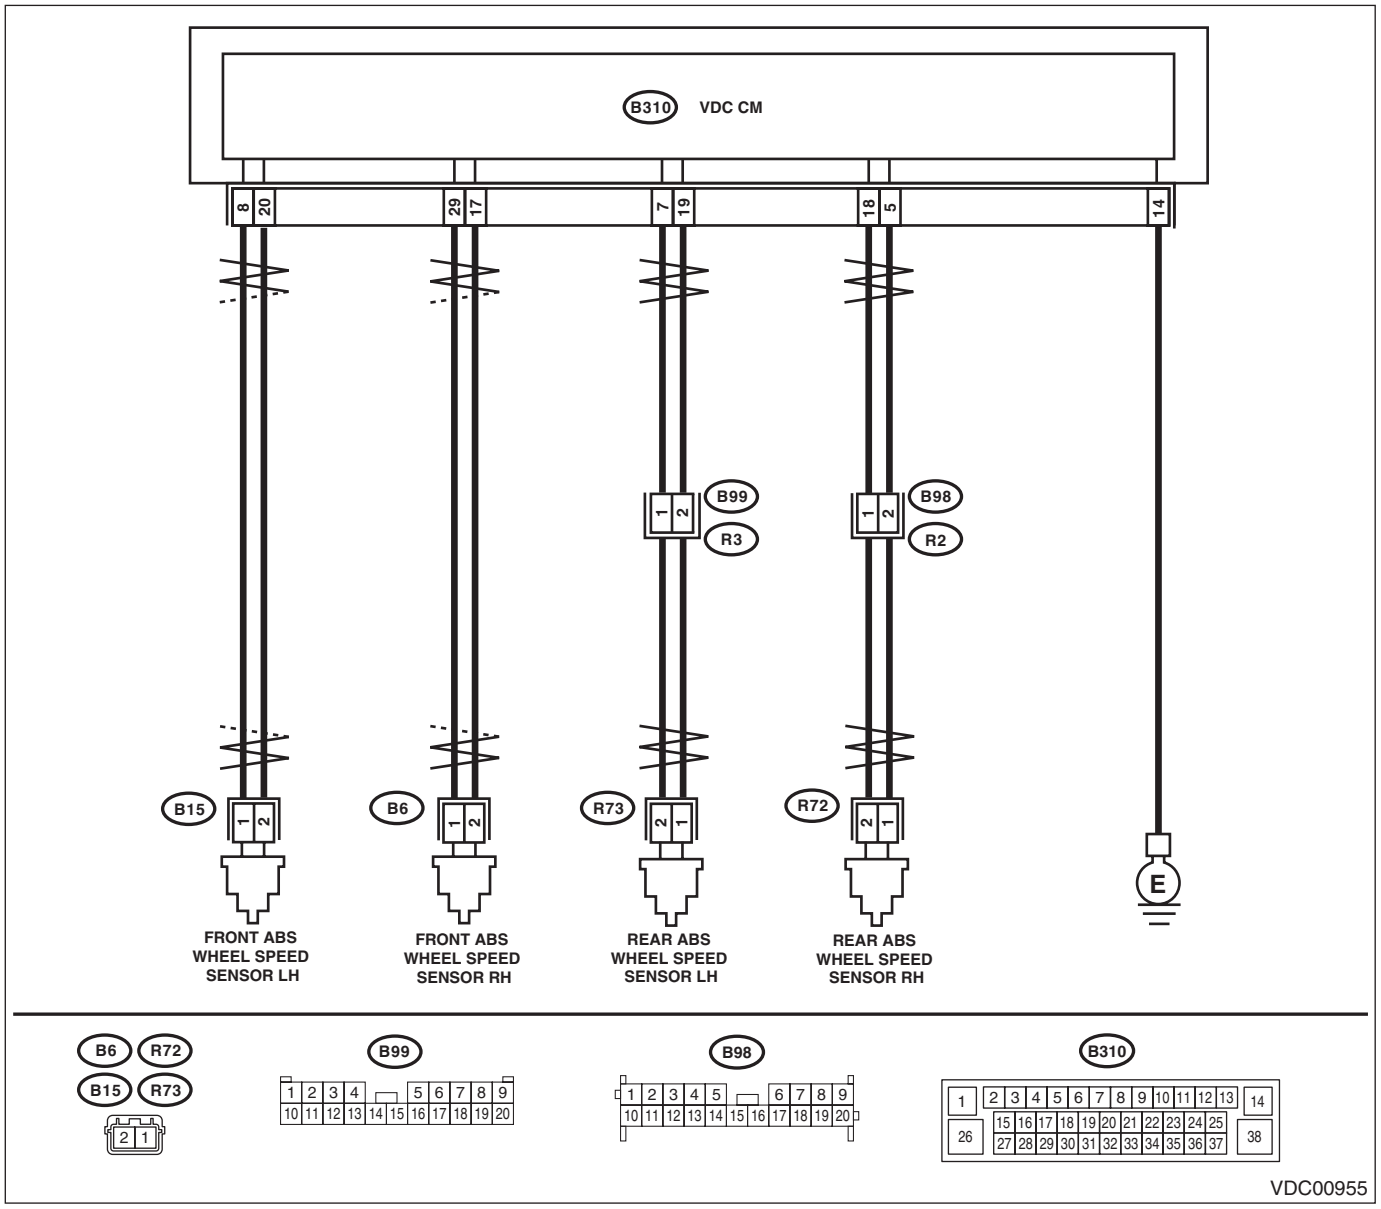
- Defective ABS wheel speed sensor (broken wire, input voltage too high)
- Defective harness connector

**TROUBLE SYMPTOM:**

- ABS does not operate.
- VDC does not operate.
- Hill start assist does not operate.

**WIRING DIAGRAM:**

Vehicle Dynamics Control System <Ref. to WI-152, Vehicle Dynamics Control System.>



| | Step | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK POOR CONTACT OF CONNECTOR.**<br>Check if there is poor contact between VDCCM&H/U and ABS wheel speed sensor. | Is there poor contact? | Repair the connector. | Go to step **2**. |
| 2 | **CHECK HARNESS CONNECTOR BETWEEN VDCCM&H/U AND ABS WHEEL SPEED SENSOR.**<br>1) Disconnect the connector (B310) from the VDCCM&H/U.<br>2) Disconnect the connector from ABS wheel speed sensor.<br>3) Measure the resistance between VDCCM&H/U connector and ABS wheel speed sensor connector.<br>***Connector & terminal***<br>***DTC C1211***<br>***(B310) No. 29 — (B6) No. 1:***<br>***(B310) No. 17 — (B6) No. 2:***<br>***DTC C1221***<br>***(B310) No. 8 — (B15) No. 1:***<br>***(B310) No. 20 — (B15) No. 2:***<br>***DTC C1231***<br>***(B310) No. 5 — (R72) No. 1:***<br>***(B310) No. 18 — (R72) No. 2:***<br>***DTC C1241***<br>***(B310) No. 19 — (R73) No. 1:***<br>***(B310) No. 7 — (R73) No. 2:*** | Is the resistance less than 1 Ω? | Go to step **3**. | Repair the harness connector between VDCCM&H/U and ABS wheel speed sensor. |
| 3 | **CHECK GROUND SHORT OF HARNESS.**<br>Measure the resistance between VDCCM&H/U connector and chassis ground.<br>***Connector & terminal***<br>***DTC C1211***<br>***(B310) No. 29 — Chassis ground:***<br>***DTC C1221***<br>***(B310) No. 8 — Chassis ground:***<br>***DTC C1231***<br>***(B310) No. 5 — Chassis ground:***<br>***DTC C1241***<br>***(B310) No. 19 — Chassis ground:*** | Is the resistance 1 MΩ or more? | Go to step **4**. | Repair the harness connector between VDCCM&H/U and ABS wheel speed sensor. |
| 4 | **CHECK ABS WHEEL SPEED SENSOR POWER SUPPLY CIRCUIT.**<br>1) Connect the VDCCM&H/U connector.<br>2) Turn the ignition switch to ON.<br>3) Measure the voltage between ABS wheel speed sensor connector and chassis ground.<br>***Connector & terminal***<br>***DTC C1211***<br>***(B6) No. 2 (+) — Chassis ground (–):***<br>***DTC C1221***<br>***(B15) No. 2 (+) — Chassis ground (–):***<br>***DTC C1231***<br>***(R72) No. 2 (+) — Chassis ground (–):***<br>***DTC C1241***<br>***(R73) No. 2 (+) — Chassis ground (–):*** | Is the voltage 5 — 16 V? | Go to step **6**. | Go to step **5**. |

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 5 | **CHECK VDCCM&H/U POWER SUPPLY CIRCUIT.**<br>1) Turn the ignition switch to OFF.<br>2) Disconnect the VDCCM&H/U connector.<br>3) Turn the ignition switch to ON.<br>4) Measure the voltage between VDCCM&H/U connector terminals.<br>***Connector & terminal***<br>***(B310) No. 4 (+) — (B310) No. 14 (–):***<br>***(B310) No. 1 (+) — (B310) No. 14 (–):***<br>***(B310) No. 26 (+) — (B310) No. 14 (–):*** | Is the voltage 10 — 15 V? | Go to step **6**. | Check the generator, battery and VDCCM&H/U power supply circuit. |
| 6 | **CHECK ABS WHEEL SPEED SENSOR SIGNAL.**<br>1) Install the ABS wheel speed sensor.<br>2) Prepare an oscilloscope.<br>3) Check the ABS wheel speed sensor. <Ref. to VDC-33, CHECK ABS WHEEL SPEED SENSOR UNIT, INSPECTION, Front ABS Wheel Speed Sensor.> | Is the pattern the same waveform as shown in the figure? | Go to step **7**. | Replace the ABS wheel speed sensor. <Ref. to VDC-31, Front ABS Wheel Speed Sensor.> |
| 7 | **CHECK VDCCM&H/U.**<br>1) Connect all connectors.<br>2) Clear the memory. <Ref. to VDC(diag)-24, Clear Memory Mode.><br>3) Perform the Inspection Mode. <Ref. to VDC(diag)-23, Inspection Mode.><br>4) Read the DTC. | Is the same DTC displayed? | Replace the VDCCM only. <Ref. to VDC-16, REPLACEMENT, VDC Control Module and Hydraulic Control Unit (VDCCM&H/U).> | Go to step **8**. |
| 8 | **CHECK OTHER DTC DETECTION.** | Is any other DTC displayed? | Perform the diagnosis according to DTC. <Ref. to VDC(diag)-37, List of Diagnostic Trouble Code (DTC).> | It results from a temporary noise interference. |

## E: DTC C1212 FR WHEEL SPEED SENSOR SYSTEM

NOTE:
For the diagnostic procedure, refer to “DTC C1242 RL WHEEL SPEED SENSOR SYSTEM”. <Ref. to VDC(diag)-45, DTC C1242 RL WHEEL SPEED SENSOR SYSTEM, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>

## F: DTC C1222 FL WHEEL SPEED SENSOR SYSTEM

NOTE:
For the diagnostic procedure, refer to “DTC C1242 RL WHEEL SPEED SENSOR SYSTEM”. <Ref. to VDC(diag)-45, DTC C1242 RL WHEEL SPEED SENSOR SYSTEM, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>

## G: DTC C1232 RR WHEEL SPEED SENSOR SYSTEM

NOTE:
For the diagnostic procedure, refer to “DTC C1242 RL WHEEL SPEED SENSOR SYSTEM”. <Ref. to VDC(diag)-45, DTC C1242 RL WHEEL SPEED SENSOR SYSTEM, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>

## H: DTC C1242 RL WHEEL SPEED SENSOR SYSTEM

**DTC DETECTING CONDITION:**

- Defective ABS wheel speed sensor signal (noise, irregular signal, etc.)
- Defective harness connector

**TROUBLE SYMPTOM:**

- ABS does not operate.
- VDC does not operate.
- Hill start assist does not operate.

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK OUTPUT OF ABS WHEEL SPEED SENSOR USING SUBARU SELECT MONITOR.**<br>1) Select "Current Data Display & Save" on the Subaru Select Monitor.<br>2) Read the defective ABS wheel speed sensor output. | Does the speed indicated on the display change in response to the speedometer reading during acceleration/deceleration when the steering wheel is in the straight-ahead position? | Go to step **2**. | Go to step **7**. |
| 2 | **CHECK POOR CONTACT OF CONNECTOR.**<br>Turn the ignition switch to OFF. | Is there poor contact of connectors between VDCCM&H/U and ABS wheel speed sensor? | Repair the connector. | Go to step **3**. |
| 3 | **CHECK CAUSE OF SIGNAL NOISE.**<br>Make sure the radio wave devices and electronic components are installed correctly. | Are the radio wave devices and electronic components installed correctly? | Go to step **4**. | Install the radio wave devices and electronic components properly. |
| 4 | **CHECK CAUSE OF SIGNAL NOISE.**<br>Check if the noise sources (such as an antenna) are installed near the sensor harness. | Are noise sources installed? | Install the noise sources apart from sensor harness. | Go to step **5**. |
| 5 | **CHECK VDCCM&H/U.**<br>1) Connect all connectors.<br>2) Clear the memory. <Ref. to VDC(diag)-24, Clear Memory Mode.><br>3) Perform the Inspection Mode. <Ref. to VDC(diag)-23, Inspection Mode.><br>4) Read the DTC. | Is the same DTC displayed? | Replace the VDCCM only. <Ref. to VDC-16, REPLACEMENT, VDC Control Module and Hydraulic Control Unit (VDCCM&H/U).> | Go to step **6**. |
| 6 | **CHECK OTHER DTC DETECTION.** | Is any other DTC displayed? | Perform the diagnosis according to DTC. <Ref. to VDC(diag)-37, List of Diagnostic Trouble Code (DTC).> | It results from a temporary noise interference. |
| 7 | **CHECK INSTALLATION OF ABS WHEEL SPEED SENSOR.** | Is the ABS wheel speed sensor installation bolt tightened to 7.5 N·m (0.76 kgf-m, 5.5 ft-lb)? | Go to step **8**. | Tighten the ABS wheel speed sensor installation bolts. |
| 8 | **CHECK ABS WHEEL SPEED SENSOR SIGNAL.**<br>1) Install the ABS wheel speed sensor.<br>2) Prepare an oscilloscope.<br>3) Check the ABS wheel speed sensor. <Ref. to VDC-33, CHECK ABS WHEEL SPEED SENSOR UNIT, INSPECTION, Front ABS Wheel Speed Sensor.> | Does the oscilloscope indicate the waveform pattern like shown in the figure when the tire is slowly turned? Does the oscilloscope indication repeat the waveform pattern like shown in the figure when the tire is slowly turned in equal speed for one rotation or more? | Go to step **10**. | Go to step **9**. |

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 9 | **CHECK ABS WHEEL SPEED SENSOR OR MAGNETIC ENCODER.** | Are there foreign matter, breakage or damage at the tip of ABS wheel speed sensor or magnetic encoder? | Remove dirt thoroughly. Also replace the ABS wheel speed sensor or magnetic encoder as a unit with hub unit bearing if it is broken or damaged. | Go to step **10**. |
| 10 | **CHECK CAUSE OF SIGNAL NOISE.**<br>Make sure the radio wave devices and electronic components are installed correctly. | Are the radio wave devices and electronic components installed correctly? | Go to step **11**. | Install the radio wave devices and electronic components properly. |
| 11 | **CHECK CAUSE OF SIGNAL NOISE.**<br>Check if the noise sources (such as an antenna) are installed near the sensor harness. | Are noise sources installed? | Install the noise sources apart from sensor harness. | Go to step **12**. |
| 12 | **CHECK VDCCM&H/U.**<br>1) Connect all connectors.<br>2) Clear the memory. <Ref. to VDC(diag)-24, Clear Memory Mode.><br>3) Perform the Inspection Mode. <Ref. to VDC(diag)-23, Inspection Mode.><br>4) Read the DTC. | Is the same DTC displayed? | Replace the VDCCM only. <Ref. to VDC-16, REPLACEMENT, VDC Control Module and Hydraulic Control Unit (VDCCM&H/U).> | Go to step **13**. |
| 13 | **CHECK OTHER DTC DETECTION.** | Is any other DTC displayed? | Perform the diagnosis according to DTC. <Ref. to VDC(diag)-37, List of Diagnostic Trouble Code (DTC).> | It results from a temporary noise interference.<br>NOTE:<br>Though the ABS warning light may remain on at this time, this is normal. Drive the vehicle at 60 km/h (37 MPH) or more in order to turn ABS warning light off. Be sure to drive the vehicle and check that the warning light goes off. |

## I: DTC C1251 WHEEL SPEED SENSOR SYSTEM

NOTE:
For the diagnostic procedure, refer to “DTC C1241 RL WHEEL SPEED SENSOR SYSTEM WIRE BREAK/ EXCESSIVE INPUT”. <Ref. to VDC(diag)-42, DTC C1241 RL WHEEL SPEED SENSOR SYSTEM WIRE BREAK/EXCESSIVE INPUT, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>

## J: DTC C1252 WHEEL SPEED SENSOR SIGNAL OF ONE OF THE WHEELS

**DTC DETECTING CONDITION:**

- Defective ABS wheel speed sensor signal (noise, irregular signal, etc.)
- Defective magnetic encoder
- When a wheel is turned freely for a long time

**TROUBLE SYMPTOM:**

- ABS does not operate.
- VDC does not operate.
- EBD may not operate.
- Hill start assist does not operate.

NOTE:
Brake warning light comes on as well as ABS warning light when EBD does not operate.

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 1 | **WHETHER A WHEEL TURNED FREELY OR NOT.**<br>Check if the wheels have been turned freely for one minute or more, such as when the vehicle is jacked-up, under full-lock cornering or when the wheels are not in contact with road surface. | Did the wheels turn freely? | VDC is normal. Clear the memory.<br>NOTE:<br>This diagnostic trouble code may sometimes occur if the wheels turn freely for a long time, for example when the vehicle is towed or jacked-up, or when steering wheel is continuously turned all the way. | Go to step **2**. |
| 2 | **CHECK TIRE SPECIFICATIONS.**<br>Turn the ignition switch to OFF. | Are the tire specifications correct? | Go to step **3**. | Replace the tire. |
| 3 | **CHECK WEAR OF TIRE.** | Is the tire worn excessively? | Replace the tire. | Go to step **4**. |
| 4 | **CHECK TIRE INFLATION PRESSURE.** | Is the tire pressure correct? | Go to step **5**. | Adjust the tire pressure. |
| 5 | **CHECK INSTALLATION OF ABS WHEEL SPEED SENSOR.** | Are the ABS wheel speed sensor installation bolts tightened to 7.5 N·m (0.76 kgf-m, 5.5 ft-lb)? (For four wheels) | Go to step **6**. | Tighten the ABS wheel speed sensor installation bolts. |
| 6 | **CHECK ABS WHEEL SPEED SENSOR SIGNAL.**<br>1) Install the ABS wheel speed sensor.<br>2) Prepare an oscilloscope.<br>3) Check the ABS wheel speed sensor. <Ref. to VDC-33, CHECK ABS WHEEL SPEED SENSOR UNIT, INSPECTION, Front ABS Wheel Speed Sensor.> | Does the oscilloscope indicate the waveform pattern like shown in the figure when the tire is slowly turned? Does the oscilloscope indication repeat the waveform pattern like shown in the figure when the tire is slowly turned in equal speed for one rotation or more? (For all four wheels) | Go to step **8**. | Go to step **7**. |
| 7 | **CHECK ABS WHEEL SPEED SENSOR OR MAGNETIC ENCODER.** | Are there foreign matter, breakage or damage at the tip of ABS wheel speed sensor or magnetic encoder? (For all four wheels) | Remove dirt thoroughly. Also replace the ABS wheel speed sensor or magnetic encoder as a unit with hub unit bearing if it is broken or damaged. | Go to step **8**. |

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 8 | **CHECK VDCCM&H/U.**<br>1) Connect all connectors.<br>2) Clear the memory. <Ref. to VDC(diag)-24, Clear Memory Mode.><br>3) Perform the Inspection Mode. <Ref. to VDC(diag)-23, Inspection Mode.><br>4) Read the DTC. | Is the same DTC displayed? | Replace the VDCCM only. <Ref. to VDC-16, REPLACEMENT, VDC Control Module and Hydraulic Control Unit (VDCCM&H/U).> | Go to step **9**. |
| 9 | **CHECK OTHER DTC DETECTION.** | Is any other DTC displayed? | Perform the diagnosis according to DTC. <Ref. to VDC(diag)-37, List of Diagnostic Trouble Code (DTC).> | It results from a temporary noise interference. |

## K: DTC C1311 FR INLET SOLENOID VALVE SYSTEM

NOTE:
For the diagnostic procedure, refer to “DTC C1362 VDC CHANGE-OVER VALVE 2 (S)”. <Ref. to VDC(diag)-50, DTC C1362 VDC CHANGE-OVER VALVE 2 (S), Diagnostic Procedure with Diagnostic Trouble Code (DTC).>

## L: DTC C1312 FR OUTLET SOLENOID VALVE SYSTEM

NOTE:
For the diagnostic procedure, refer to “DTC C1362 VDC CHANGE-OVER VALVE 2 (S)”. <Ref. to VDC(diag)-50, DTC C1362 VDC CHANGE-OVER VALVE 2 (S), Diagnostic Procedure with Diagnostic Trouble Code (DTC).>

## M: DTC C1321 FL INLET SOLENOID VALVE SYSTEM

NOTE:
For the diagnostic procedure, refer to “DTC C1362 VDC CHANGE-OVER VALVE 2 (S)”. <Ref. to VDC(diag)-50, DTC C1362 VDC CHANGE-OVER VALVE 2 (S), Diagnostic Procedure with Diagnostic Trouble Code (DTC).>

## N: DTC C1322 FL OUTLET SOLENOID VALVE SYSTEM

NOTE:
For the diagnostic procedure, refer to “DTC C1362 VDC CHANGE-OVER VALVE 2 (S)”. <Ref. to VDC(diag)-50, DTC C1362 VDC CHANGE-OVER VALVE 2 (S), Diagnostic Procedure with Diagnostic Trouble Code (DTC).>

## O: DTC C1331 RR INLET SOLENOID VALVE SYSTEM

NOTE:
For the diagnostic procedure, refer to “DTC C1362 VDC CHANGE-OVER VALVE 2 (S)”. <Ref. to VDC(diag)-50, DTC C1362 VDC CHANGE-OVER VALVE 2 (S), Diagnostic Procedure with Diagnostic Trouble Code (DTC).>

## P: DTC C1332 RR OUTLET SOLENOID VALVE SYSTEM

NOTE:
For the diagnostic procedure, refer to “DTC C1362 VDC CHANGE-OVER VALVE 2 (S)”. <Ref. to VDC(diag)-50, DTC C1362 VDC CHANGE-OVER VALVE 2 (S), Diagnostic Procedure with Diagnostic Trouble Code (DTC).>

## Q: DTC C1341 RL INLET SOLENOID VALVE SYSTEM

NOTE:
For the diagnostic procedure, refer to “DTC C1362 VDC CHANGE-OVER VALVE 2 (S)”. <Ref. to VDC(diag)-50, DTC C1362 VDC CHANGE-OVER VALVE 2 (S), Diagnostic Procedure with Diagnostic Trouble Code (DTC).>

## R: DTC C1342 RL OUTLET SOLENOID VALVE SYSTEM

NOTE:
For the diagnostic procedure, refer to “DTC C1362 VDC CHANGE-OVER VALVE 2 (S)”. <Ref. to VDC(diag)-50, DTC C1362 VDC CHANGE-OVER VALVE 2 (S), Diagnostic Procedure with Diagnostic Trouble Code (DTC).>

## S: DTC C1351 VDC CHANGE-OVER VALVE 1 (P)

NOTE:
For the diagnostic procedure, refer to “DTC C1362 VDC CHANGE-OVER VALVE 2 (S)”. <Ref. to VDC(diag)-50, DTC C1362 VDC CHANGE-OVER VALVE 2 (S), Diagnostic Procedure with Diagnostic Trouble Code (DTC).>

## T: DTC C1352 VDC CHANGE-OVER VALVE 1 (S)

NOTE:
For the diagnostic procedure, refer to “DTC C1362 VDC CHANGE-OVER VALVE 2 (S)”. <Ref. to VDC(diag)-50, DTC C1362 VDC CHANGE-OVER VALVE 2 (S), Diagnostic Procedure with Diagnostic Trouble Code (DTC).>

## U: DTC C1361 VDC CHANGE-OVER VALVE 2 (P)

NOTE:
For the diagnostic procedure, refer to “DTC C1362 VDC CHANGE-OVER VALVE 2 (S)”. <Ref. to VDC(diag)-50, DTC C1362 VDC CHANGE-OVER VALVE 2 (S), Diagnostic Procedure with Diagnostic Trouble Code (DTC).>

## V: DTC C1362 VDC CHANGE-OVER VALVE 2 (S)

**DTC DETECTING CONDITION:**

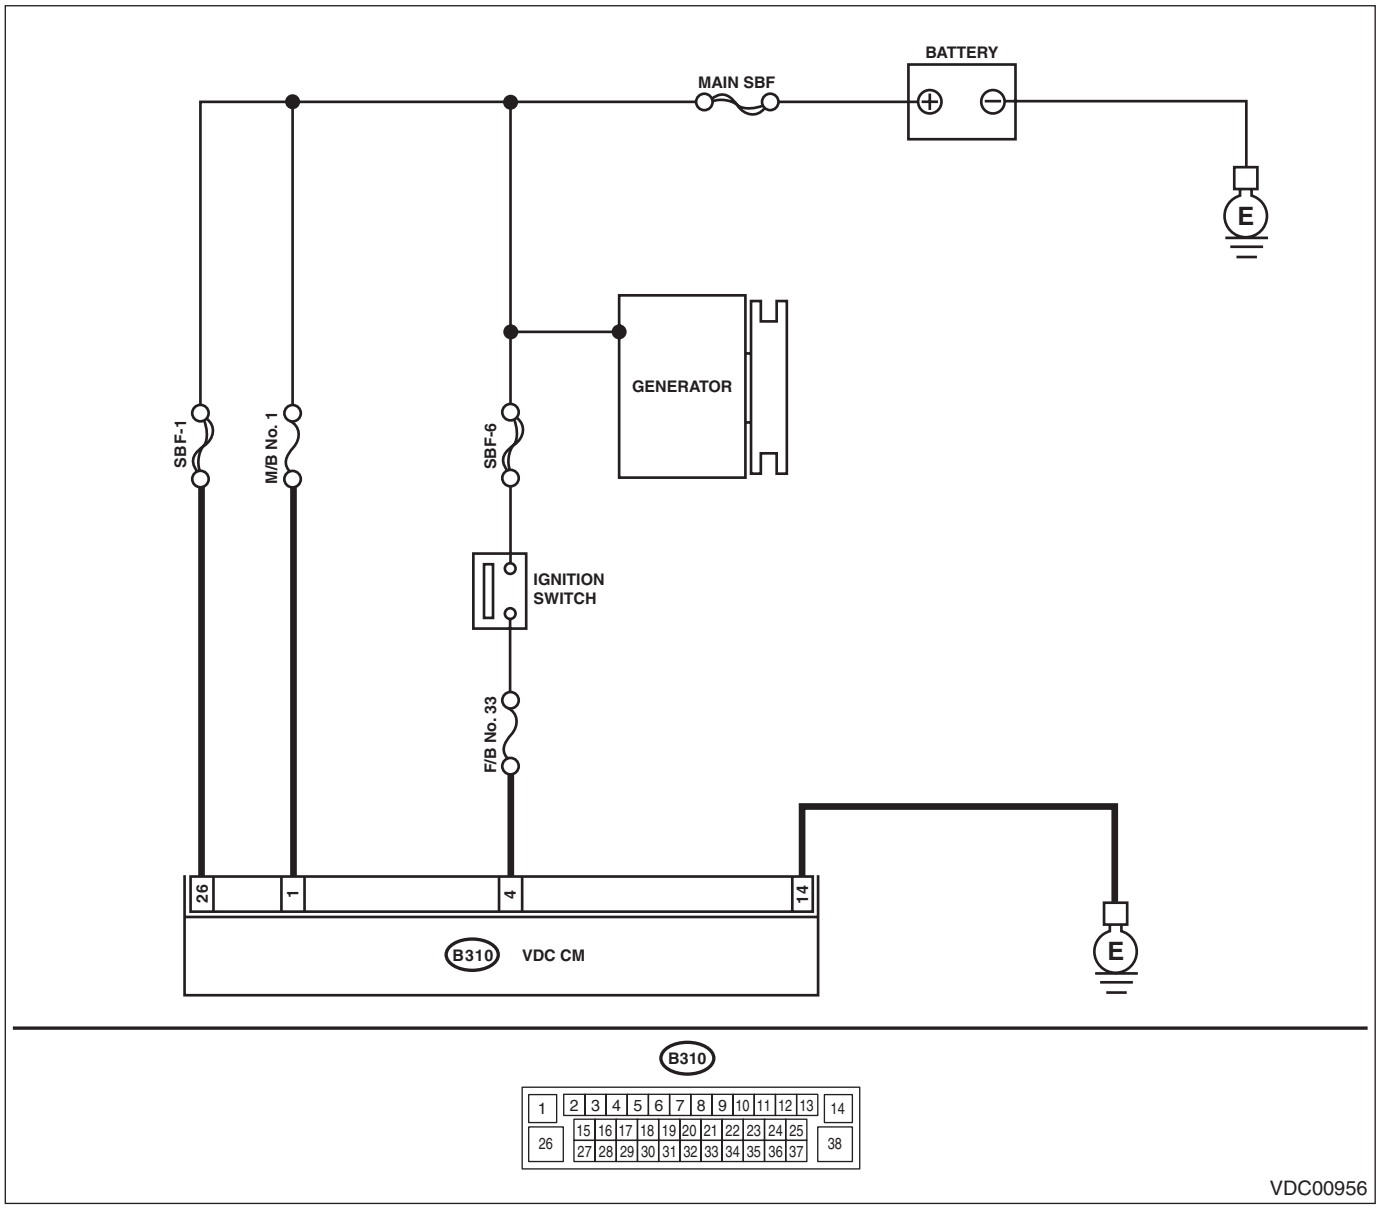
- Defective harness connector
- Defective VDCH/U solenoid valve

**TROUBLE SYMPTOM:**

- ABS does not operate.
- EBD does not operate.
- VDC does not operate.
- Hill start assist does not operate.

**WIRING DIAGRAM:**

Vehicle Dynamics Control System <Ref. to WI-152, Vehicle Dynamics Control System.>

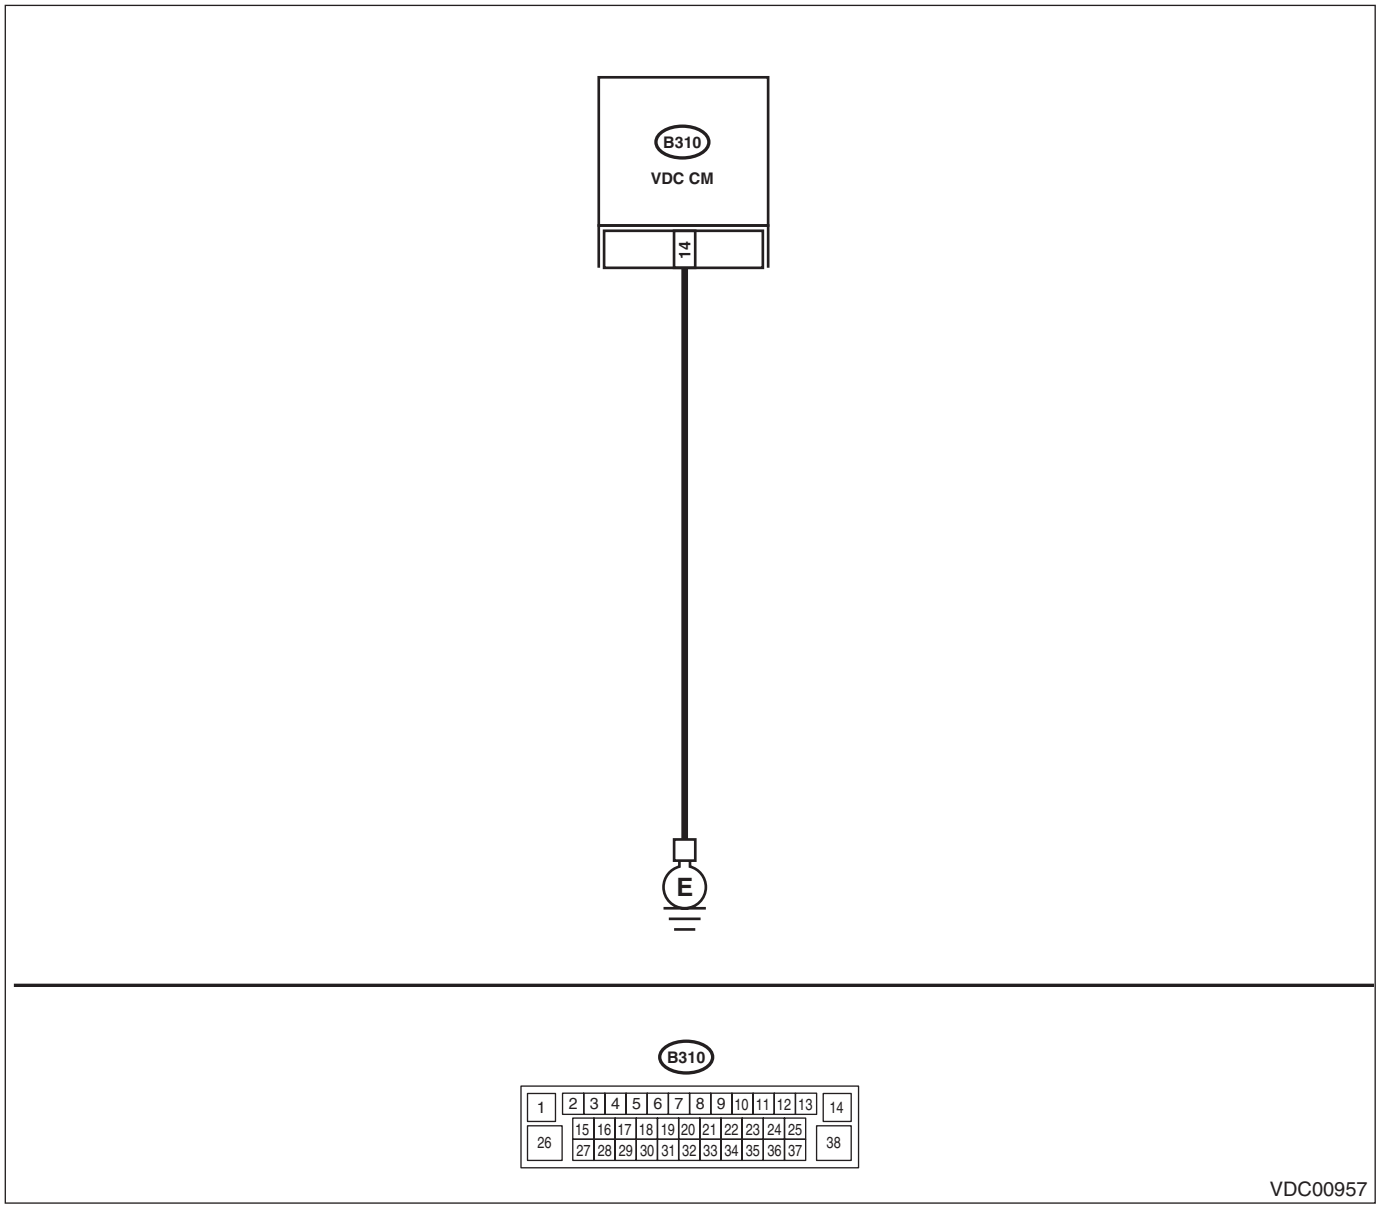


| | Step | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK VDCCM&H/U INPUT VOLTAGE.**<br>1) Turn the ignition switch to OFF.<br>2) Disconnect the connector from the VDCCM&H/U.<br>3) Run the engine at idle.<br>4) Measure the voltage between VDCCM&H/U connector and chassis ground.<br>***Connector & terminal***<br>***(B310) No. 4 (+) — (B310) No. 14 (–):***<br>***(B310) No. 1 (+) — (B310) No. 14 (–):***<br>***(B310) No. 26 (+) — (B310) No. 14 (–):*** | Is the voltage 10 — 15 V? | Go to step **2**. | Repair the power supply circuit. |
| 2 | **CHECK VDCCM&H/U GROUND CIRCUIT.**<br>1) Turn the ignition switch to OFF.<br>2) Measure the resistance between VDCCM&H/U connector and chassis ground.<br>***Connector & terminal***<br>***(B310) No. 14 — Chassis ground:*** | Is the resistance less than 10 Ω? | Go to step **3**. | Repair the VDCCM&H/U ground harness. |
| 3 | **CHECK POOR CONTACT OF CONNECTORS.** | Is there poor contact of connector between generator, battery and VDCCM&H/U? | Repair the connector. | Go to step **4**. |
| 4 | **CHECK VDCCM&H/U.**<br>1) Connect all connectors.<br>2) Clear the memory. <Ref. to VDC(diag)-24, Clear Memory Mode.><br>3) Perform the Inspection Mode. <Ref. to VDC(diag)-23, Inspection Mode.><br>4) Read the DTC. | Is the same DTC displayed? | Replace the VDCCM&H/U. <Ref. to VDC-9, VDC Control Module and Hydraulic Control Unit (VDCCM&H/U).> | Go to step **5**. |
| 5 | **CHECK OTHER DTC DETECTION.** | Is any other DTC displayed? | Perform the diagnosis according to DTC. <Ref. to VDC(diag)-37, List of Diagnostic Trouble Code (DTC).> | Temporary poor contact occurs. |

## W: DTC C1411 ECU

**DTC DETECTING CONDITION:**
Defective VDCCM
**TROUBLE SYMPTOM:**
- ABS does not operate.
- EBD does not operate.
- VDC does not operate.
- Hill start assist does not operate.

**WIRING DIAGRAM:**
Vehicle Dynamics Control System <Ref. to WI-152, Vehicle Dynamics Control System.>



| | Step | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK VDCCM&H/U GROUND CIRCUIT.**<br>1) Turn the ignition switch to OFF.<br>2) Disconnect the connector from the VDCCM&H/U.<br>3) Measure the resistance between VDCCM&H/U and chassis ground.<br>***Connector & terminal***<br>***(B310) No. 14 — Chassis ground:*** | Is the resistance less than 10 Ω? | Go to step **2**. | Repair the VDCCM&H/U ground harness. |
| 2 | **CHECK POOR CONTACT OF CONNECTORS.** | Is there poor contact of the connector between the battery, ignition switch and VDCCM&H/U? | Repair the connector. | Go to step **3**. |
| 3 | **CHECK CAUSE OF SIGNAL NOISE.** | Are the radio wave devices and electronic components installed correctly? | Go to step **4**. | Install the radio wave devices and electronic components properly. |
| 4 | **CHECK CAUSE OF SIGNAL NOISE.** | Is there a noise source (such as an antenna) installed near the sensor harness and VDCCM? | Install the noise sources apart from sensor harness and VDCCM. | Go to step **5**. |
| 5 | **CHECK VDCCM&H/U.**<br>1) Connect all connectors.<br>2) Clear the memory. <Ref. to VDC(diag)-24, Clear Memory Mode.><br>3) Perform the Inspection Mode. <Ref. to VDC(diag)-23, Inspection Mode.><br>4) Read the DTC. | Is the same DTC displayed? | Replace the VDCCM only. <Ref. to VDC-16, REPLACEMENT, VDC Control Module and Hydraulic Control Unit (VDCCM&H/U).> | Go to step **6**. |
| 6 | **CHECK OTHER DTC DETECTION.** | Is any other DTC displayed? | Perform the diagnosis according to DTC. <Ref. to VDC(diag)-37, List of Diagnostic Trouble Code (DTC).> | Temporary poor contact occurs. |

## X: DTC C1412 PARAMETER

**DTC DETECTING CONDITION:**
VDCCM parameter selection error
**TROUBLE SYMPTOM:**
- ABS does not operate.
- EBD does not operate.
- VDC does not operate.
- Hill start assist does not operate.

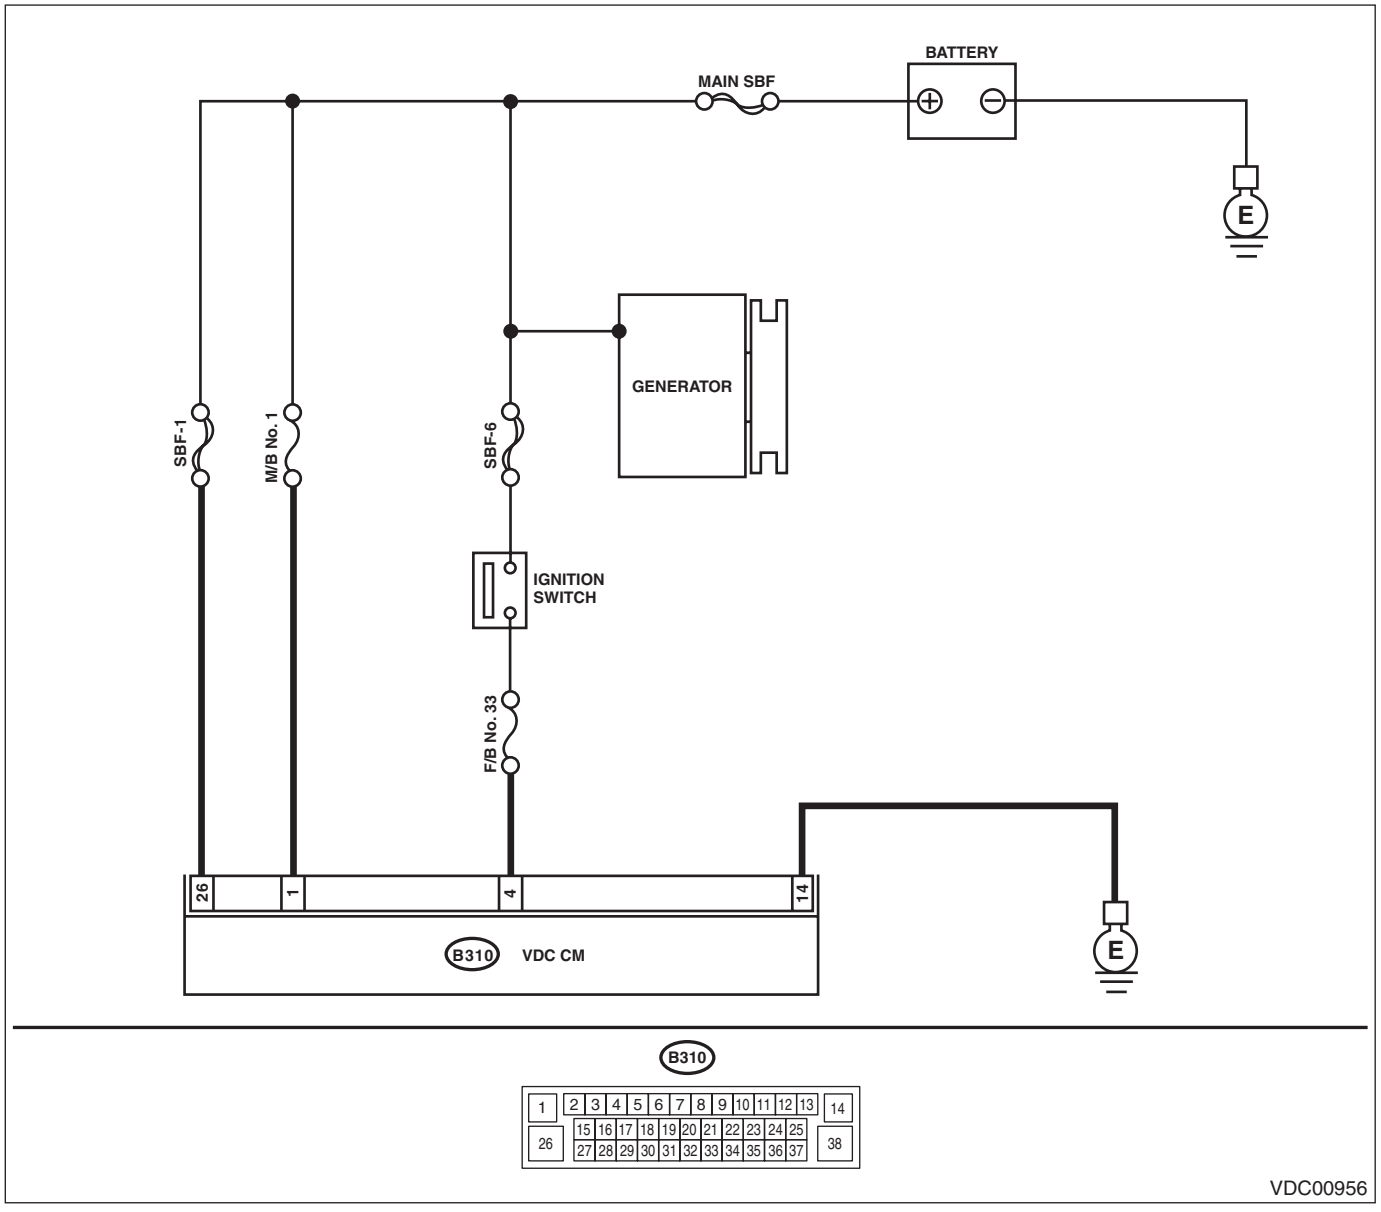
NOTE:
When the VDCCM or VDCCM&H/U is replaced, this DTC may be stored.

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK VDCCM&H/U IDENTIFICATION SYMBOL.**<br>Check the identification symbol attached on the H/U. <Ref. to VDC-2, SPECIFICATION, General Description.> | Is the identification symbol correct? | Go to step **2**. | Replace the VDCCM&H/U. <Ref. to VDC-9, VDC Control Module and Hydraulic Control Unit (VDCCM&H/U).> |
| 2 | **CHECK PARAMETER SELECTED IN VDCCM.**<br><Ref. to VDC(diag)-19, PARAMETER CHECK, OPERATION, Subaru Select Monitor.> | Does the parameter registered in the VDCCM match the relevant vehicle? | Replace the VDCCM&H/U. <Ref. to VDC-9, VDC Control Module and Hydraulic Control Unit (VDCCM&H/U).> | Select and register the correct parameter. <Ref. to VDC(diag)-19, PARAMETER SELECTION, OPERATION, Subaru Select Monitor.> |

# Y: DTC C1413 POWER SUPPLY VOLT ERROR

**DTC DETECTING CONDITION:**
Improper VDCCM&H/U power supply voltage
**TROUBLE SYMPTOM:**
- ABS does not operate.
- EBD may not operate.
- VDC does not operate.
- Hill start assist does not operate.

NOTE:
Warning lights go off if voltage returns.
**WIRING DIAGRAM:**
Vehicle Dynamics Control System <Ref. to WI-152, Vehicle Dynamics Control System.>



| | Step | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK GENERATOR.**<br>1) Start the engine.<br>2) Run the engine at idle after warming up.<br>3) Measure the voltage between generator terminal B and chassis ground.<br>***Terminals***<br>***Generator terminal B (+) — Chassis ground (–):*** | Is the voltage 10 — 15 V? | Go to step **2**. | Repair the generator. <Ref. to SC(H4DO)-35, Generator.> |
| 2 | **CHECK BATTERY TERMINAL.**<br>Turn the ignition switch to OFF. | Are the positive and negative battery terminals clamped tightly? | Go to step **3**. | Tighten the terminal. |
| 3 | **CHECK VDCCM&H/U INPUT VOLTAGE.**<br>1) Disconnect the connector from the VDCCM&H/U.<br>2) Run the engine at idle.<br>3) Operate devices such as headlights, air conditioner, rear defogger, etc. which produce an electrical load.<br>4) Measure the voltage between VDCCM&H/U connector and chassis ground.<br>***Connector & terminal***<br>***(B310) No. 4 (+) — (B310) No. 14 (–):***<br>***(B310) No. 1 (+) — (B310) No. 14 (–):***<br>***(B310) No. 26 (+) — (B310) No. 14 (–):*** | Is the voltage 10 — 15 V? | Go to step **4**. | Repair the power supply circuit. |
| 4 | **CHECK VDCCM&H/U GROUND CIRCUIT.**<br>1) Turn the ignition switch to OFF.<br>2) Measure the resistance between VDCCM&H/U connector and chassis ground.<br>***Connector & terminal***<br>***(B310) No. 14 — Chassis ground:*** | Is the resistance less than 10 Ω? | Go to step **5**. | Repair the VDCCM&H/U ground harness. |
| 5 | **CHECK POOR CONTACT OF CONNECTORS.** | Is there poor contact of connector between generator, battery and VDCCM&H/U? | Repair the connector. | Go to step **6**. |
| 6 | **CHECK VDCCM&H/U.**<br>1) Connect all connectors.<br>2) Clear the memory. <Ref. to VDC(diag)-24, Clear Memory Mode.><br>3) Perform the Inspection Mode. <Ref. to VDC(diag)-23, Inspection Mode.><br>4) Read the DTC. | Is the same DTC displayed? | Replace the VDCCM only. <Ref. to VDC-16, REPLACEMENT, VDC Control Module and Hydraulic Control Unit (VDCCM&H/U).> | Go to step **7**. |
| 7 | **CHECK OTHER DTC DETECTION.** | Is any other DTC displayed? | Perform the diagnosis according to DTC. <Ref. to VDC(diag)-37, List of Diagnostic Trouble Code (DTC).> | Temporary poor contact occurs. |

## Z: DTC C1421 ECM CONTROL SYSTEM

**DTC DETECTING CONDITION:**
ECM malfunctioning
**TROUBLE SYMPTOM:**
- ABS does not operate.
- VDC does not operate.
- Hill start assist does not operate.

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK COOPERATION CONTROL FEASIBILITY OF ECM USING SUBARU SELECT MONITOR.**<br>1) Start the engine, and run the engine at idle approximately 5 minutes.<br>2) Connect Subaru Select Monitor, and select “Current Data Display & Save”.<br>3) Check the «E/G Control Stop Flag» displayed on screen. | Is the «E/G Control Stop Flag» “1”? | Go to step **4**. | Go to step **2**. |
| 2 | **CHECK WARNING LIGHT.**<br>Check whether the VDC warning light illuminates after driving for 1 minute or more at a speed of 10 km/h (6 MPH) or more. | Does the VDC warning light illuminate? | Go to step **3**. | VDC is normal. Perform the Clear Memory Mode.<br>NOTE:<br>DTC may be recorded if cranking is performed during driving. |
| 3 | **CHECK POOR CONTACT OF CONNECTORS.** | Is there poor contact of ECM connector? | Repair the connector. | Go to step **4**. |
| 4 | **CHECK ECM.**<br>Refer to the basic diagnostic procedure for Engine (diagnostics). | Is ECM normal? | Go to step **5**. | Replace the ECM. <Ref. to FU(H4DO)-102, Engine Control Module (ECM).> |
| 5 | **CHECK VDCCM&H/U.**<br>1) Connect all connectors.<br>2) Perform the Clear Memory Mode. <Ref. to VDC(diag)-24, Clear Memory Mode.><br>3) Perform the Inspection Mode. <Ref. to VDC(diag)-23, Inspection Mode.><br>4) Read the DTC. | Is the same DTC displayed? | Replace the VDCCM only. <Ref. to VDC-16, REPLACEMENT, VDC Control Module and Hydraulic Control Unit (VDCCM&H/U).> | Go to step **6**. |
| 6 | **CHECK OTHER DTC DETECTION.** | Is any other DTC displayed? | Perform the diagnosis according to DTC. <Ref. to VDC(diag)-37, List of Diagnostic Trouble Code (DTC).> | It results from a temporary noise interference. |

## AA:DTC C1422 VDC INTERRUPTION FOR ENGINE CONVENIENCE

**DTC DETECTING CONDITION:**
ECM prohibits the cooperation control.
**TROUBLE SYMPTOM:**
VDC does not operate.

NOTE:
- For the diagnostic procedure, refer to “DTC C1421 ECM CONTROL SYSTEM”. <Ref. to VDC(diag)-57, DTC C1421 ECM CONTROL SYSTEM, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>
- Warning lights go off if the cooperation control of ECM returns.

## AB:DTC C1423 DIFFERENT ECU SPECIFICATIONS

**DTC DETECTING CONDITION:**
Different control module specification
**TROUBLE SYMPTOM:**
- ABS does not operate.
- VDC does not operate.
- Hill start assist does not operate.

NOTE:
When parameter selection for VDCCM is improper, this DTC may be memorized.

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK VDCCM&H/U IDENTIFICATION SYMBOL.**<br>Check the identification symbol attached on the H/U. <Ref. to VDC-2, SPECIFICATION, General Description.> | Is the identification symbol correct? | Go to step **2**. | Replace the VDCCM&H/U. <Ref. to VDC-9, VDC Control Module and Hydraulic Control Unit (VDCCM&H/U).> |
| 2 | **CHECK PARAMETER SELECTED IN VDCCM.**<br><Ref. to VDC(diag)-19, PARAMETER CHECK, OPERATION, Subaru Select Monitor.> | Does the parameter registered in the VDCCM match the relevant vehicle? | CVT model: Go to step **3**.<br>MT model: Go to step **5**. | Select and register the correct parameter. <Ref. to VDC(diag)-19, PARAMETER SELECTION, OPERATION, Subaru Select Monitor.> |
| 3 | **CHECK TCM SPECIFICATION.**<br>Check the TCM specification. | Is the specification of TCM same as vehicle specification? | Go to step **4**. | Replace the TCM. <Ref. to CVT-136, Transmission Control Module (TCM).> |
| 4 | **CHECK CVT SYSTEM.**<br>1) Start the engine.<br>2) Check the DTC in CVT system. | Is DTC of CVT system displayed? | Perform the diagnosis according to DTC. <Ref. to CVT(diag)-29, List of Diagnostic Trouble Code (DTC).> | Go to step **5**. |
| 5 | **CHECK ECM SPECIFICATION.**<br>Check the ECM specification. | Is the specification of ECM same as vehicle specification? | Go to step **6**. | Replace the ECM. <Ref. to FU(H4DO)-102, Engine Control Module (ECM).> |
| 6 | **CHECK VDCCM&H/U.**<br>1) Connect all connectors.<br>2) Clear the memory. <Ref. to VDC(diag)-24, Clear Memory Mode.><br>3) Perform the Inspection Mode. <Ref. to VDC(diag)-23, Inspection Mode.><br>4) Read the DTC. | Is the same DTC displayed? | Replace the VDCCM only. <Ref. to VDC-16, REPLACEMENT, VDC Control Module and Hydraulic Control Unit (VDCCM&H/U).> | Go to step **7**. |
| 7 | **CHECK OTHER DTC DETECTION.** | Is any other DTC displayed? | Perform the diagnosis according to DTC. <Ref. to VDC(diag)-37, List of Diagnostic Trouble Code (DTC).> | It results from a temporary noise interference. |

## AC:DTC C1424 ECM FAILURE

**DTC DETECTING CONDITION:**
ECM malfunctioning
**TROUBLE SYMPTOM:**
- ABS does not operate.
- VDC does not operate.
- Hill start assist does not operate.

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK ECM.**<br>1) Start the engine.<br>2) Check DTC of ECM. | Is DTC displayed? | Perform the diagnosis according to DTC. | Go to step **2**. |
| 2 | **CHECK VDCCM&H/U.**<br>1) Connect all connectors.<br>2) Clear the memory. <Ref. to VDC(diag)-24, Clear Memory Mode.><br>3) Perform the Inspection Mode. <Ref. to VDC(diag)-23, Inspection Mode.><br>4) Read the DTC. | Is the same DTC displayed? | Replace the VDCCM only. <Ref. to VDC-16, REPLACEMENT, VDC Control Module and Hydraulic Control Unit (VDCCM&H/U).> | Go to step **3**. |
| 3 | **CHECK OTHER DTC DETECTION.** | Is any other DTC displayed? | Perform the diagnosis according to DTC. <Ref. to VDC(diag)-37, List of Diagnostic Trouble Code (DTC).> | It results from a temporary noise interference. |

## AD:DTC C1431 AT ABNORMAL

**DTC DETECTING CONDITION:**
Defective TCM
**TROUBLE SYMPTOM:**
- ABS does not operate.
- VDC does not operate.
- Hill start assist does not operate.

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK TCM.**<br>1) Start the engine.<br>2) Check DTC of TCM. | Is DTC displayed? | Perform the diagnosis according to DTC. | Go to step **2**. |
| 2 | **CHECK VDCCM&H/U.**<br>1) Turn the ignition switch to OFF.<br>2) After turning the ignition switch to ON for approx. 10 seconds, turn it to OFF.<br>3) Turn the ignition switch to ON again.<br>4) Connect all connectors.<br>5) Clear the memory. <Ref. to VDC(diag)-24, Clear Memory Mode.><br>6) Perform the Inspection Mode. <Ref. to VDC(diag)-23, Inspection Mode.><br>7) Read the DTC. | Is the same DTC displayed? | Replace the VDCCM only. <Ref. to VDC-16, REPLACEMENT, VDC Control Module and Hydraulic Control Unit (VDCCM&H/U).> | Go to step **3**. |
| 3 | **CHECK OTHER DTC DETECTION.** | Is any other DTC displayed? | Perform the diagnosis according to DTC. <Ref. to VDC(diag)-37, List of Diagnostic Trouble Code (DTC).> | It results from a temporary noise interference. |

## AE:DTC C1432 DIFFERENT ECU SPECIFICATIONS

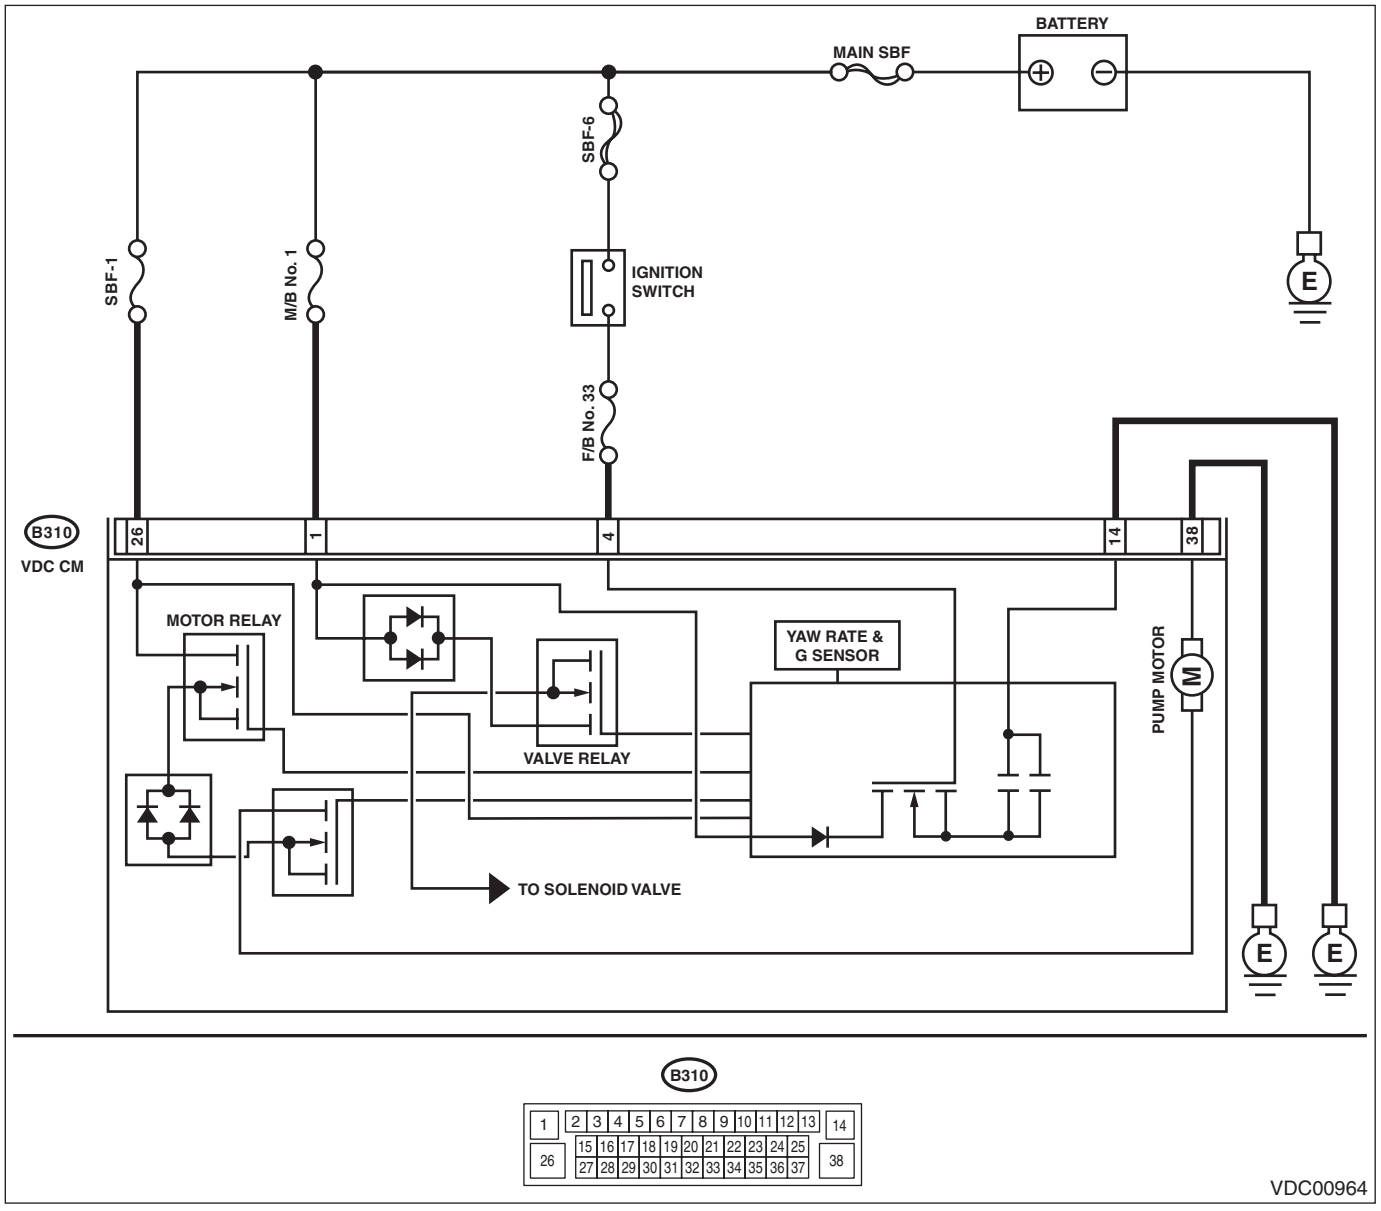
NOTE:
For the diagnostic procedure, refer to “DTC C1423 DIFFERENT ECU SPECIFICATIONS”. <Ref. to VDC(diag)-58, DTC C1423 DIFFERENT ECU SPECIFICATIONS, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>

## AF:DTC C1511 VALVE RELAY

**DTC DETECTING CONDITION:**
Defective valve relay

**TROUBLE SYMPTOM:**
- ABS does not operate.
- EBD does not operate.
- VDC does not operate.
- Hill start assist does not operate.

**WIRING DIAGRAM:**
Vehicle Dynamics Control System <Ref. to WI-152, Vehicle Dynamics Control System.>



| | Step | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK VDCCM&H/U INPUT VOLTAGE.**<br>1) Turn the ignition switch to OFF.<br>2) Disconnect the connector from the VDCCM&H/U.<br>3) Run the engine at idle.<br>4) Measure the voltage between VDCCM&H/U connector and chassis ground.<br>***Connector & terminal***<br>***(B310) No. 1 (+) — Chassis ground (–):***<br>***(B310) No. 4 (+) — Chassis ground (–):*** | Is the voltage 10 — 15 V? | Go to step **2**. | Repair the power supply circuit. |
| 2 | **CHECK VDCCM&H/U INPUT VOLTAGE.**<br>Calculate the voltage difference measured in step 1.<br>A: (B310) No. 1 (+) — Chassis ground (–):<br>B: (B310) No. 4 (+) — Chassis ground (–): | Is the voltage difference between A and B 2 V or more? | Repair the power supply circuit. | Go to step **3**. |
| 3 | **CHECK VDCCM&H/U GROUND CIRCUIT.**<br>1) Turn the ignition switch to OFF.<br>2) Measure the resistance between VDCCM&H/U connector and chassis ground.<br>***Connector & terminal***<br>***(B310) No. 14 — Chassis ground:*** | Is the resistance less than 10 Ω? | Go to step **4**. | Repair the VDCCM&H/U ground harness. |
| 4 | **CHECK POOR CONTACT OF CONNECTORS.** | Is there poor contact of connector between generator, battery and VDCCM&H/U? | Repair the connector. | Go to step **5**. |
| 5 | **CHECK VDCCM&H/U.**<br>1) Connect all connectors.<br>2) Clear the memory. <Ref. to VDC(diag)-24, Clear Memory Mode.><br>3) Perform the Inspection Mode. <Ref. to VDC(diag)-23, Inspection Mode.><br>4) Read the DTC. | Is the same DTC displayed? | Replace the VDCCM only. <Ref. to VDC-16, REPLACEMENT, VDC Control Module and Hydraulic Control Unit (VDCCM&H/U).> | Go to step **6**. |
| 6 | **CHECK OTHER DTC DETECTION.** | Is any other DTC displayed? | Perform the diagnosis according to DTC. <Ref. to VDC(diag)-37, List of Diagnostic Trouble Code (DTC).> | Temporary poor contact occurs. |

## AG:DTC C1512 VALVE SYSTEM

NOTE:
For the diagnostic procedure, refer to “DTC C1362 VDC CHANGE-OVER VALVE 2 (S)”. <Ref. to VDC(diag)-70, DTC C1542 CLUTCH ON FAULT, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>

## AH:DTC C1521 MOTOR RELAY

**DTC DETECTING CONDITION:**

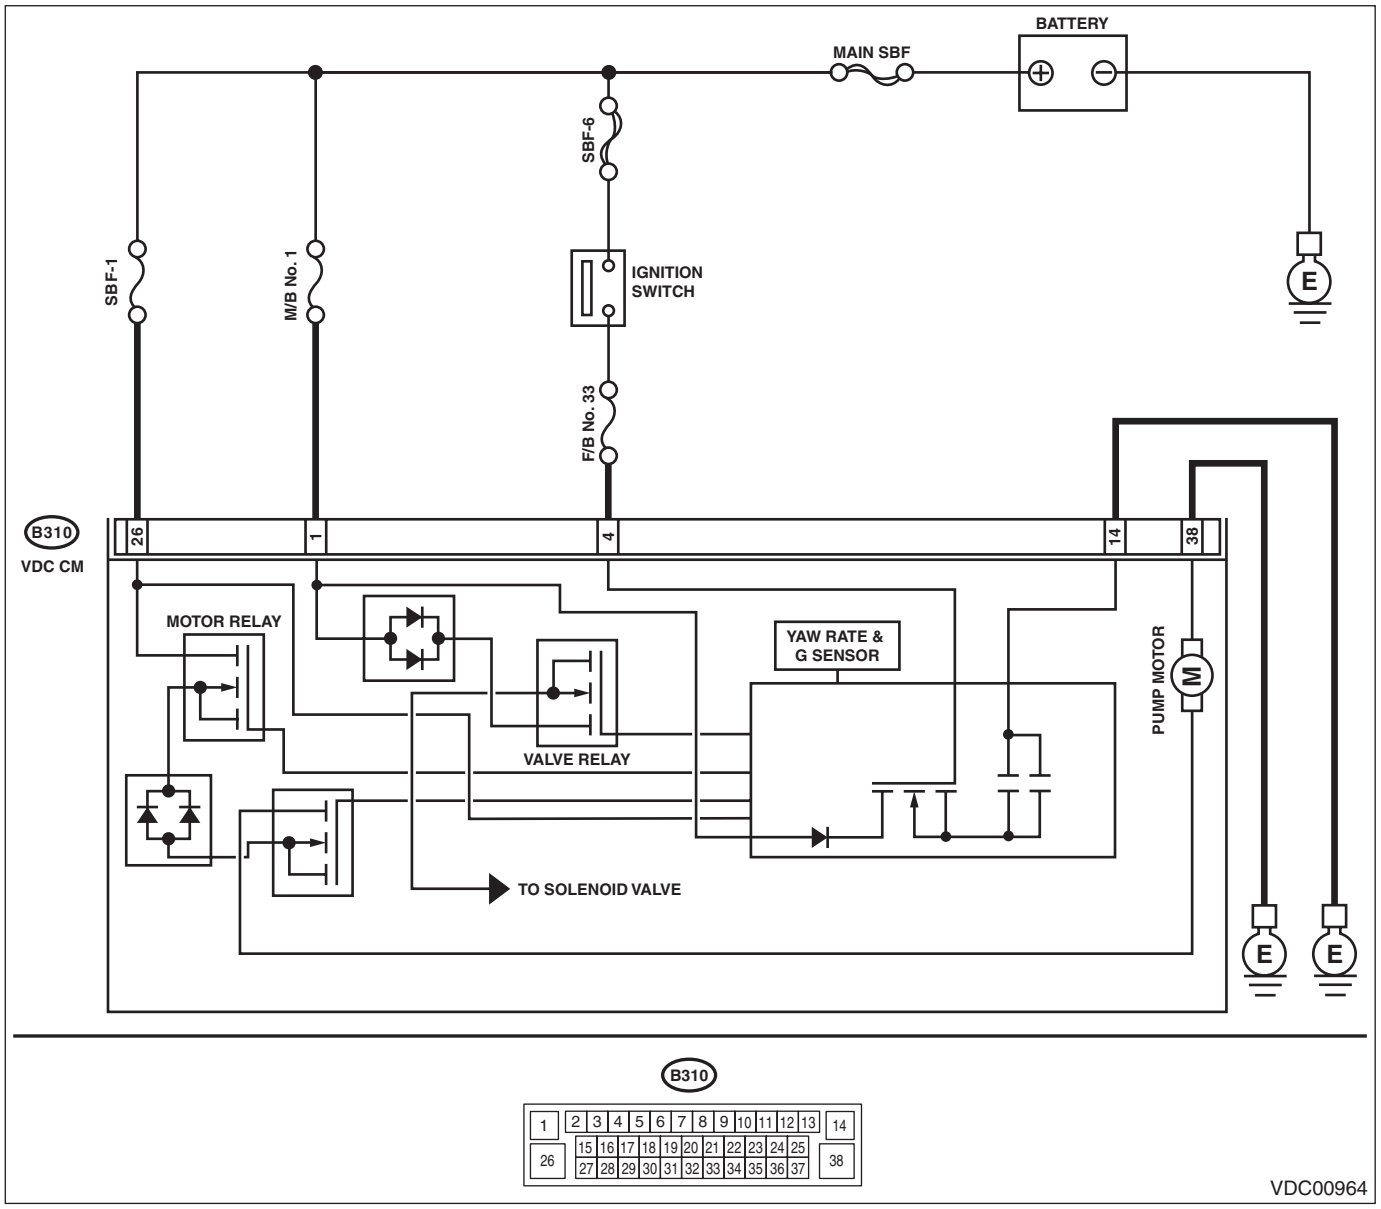
- Defective motor and motor relay
- Defective harness connector

**TROUBLE SYMPTOM:**

- ABS does not operate.
- VDC does not operate.
- EBD may not operate.
- Hill start assist does not operate.

**WIRING DIAGRAM:**

Vehicle Dynamics Control System <Ref. to WI-152, Vehicle Dynamics Control System.>



| | Step | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK VDCCM&H/U INPUT VOLTAGE.**<br>1) Turn the ignition switch to OFF.<br>2) Disconnect the connector from the VDCCM&H/U.<br>3) Turn the ignition switch to ON.<br>4) Measure the voltage between VDCCM&H/U connector and chassis ground.<br>***Connector & terminal***<br>***(B310) No. 4 (+) — Chassis ground (–):***<br>***(B310) No. 26 (+) — Chassis ground (–):*** | Is the voltage 10 — 15 V? | Go to step **2**. | Repair the VDCCM&H/U power supply circuit. |
| 2 | **CHECK VDCCM&H/U INPUT VOLTAGE.**<br>Calculate the voltage difference measured in step 1.<br>A: (B310) No. 4 (+) — Chassis ground (–):<br>B: (B310) No. 26 (+) — Chassis ground (–): | Is the voltage difference between A and B 2 V or more? | Repair the power supply circuit. | Go to step **3**. |
| 3 | **CHECK INSTALLATION OF VDCCM&H/U GROUND.** | Is the VDCCM&H/U ground terminal installation bolt tightened to 13 N·m (1.3 kgf-m, 9.6 ft-lb)? | Go to step **4**. | Tighten the VDCCM&H/U ground terminal installation bolt. |
| 4 | **CHECK VDCCM&H/U GROUND CIRCUIT.**<br>1) Turn the ignition switch to OFF.<br>2) Measure the resistance between VDCCM&H/U connector and chassis ground.<br>***Connector & terminal***<br>***(B310) No. 14 — Chassis ground:***<br>***(B310) No. 38 — Chassis ground:*** | Is the resistance less than 10 Ω? | Go to step **5**. | Repair the VDCCM&H/U ground harness. |
| 5 | **CHECK VDCCM&H/U MOTOR RELAY.**<br>Measure the resistance between VDCCM&H/U terminals.<br>***Terminals***<br>***No. 26 — No. 38:*** | Is the resistance 1 MΩ or more? | Go to step **6**. | Replace the VDCCM&H/U. <Ref. to VDC-9, VDC Control Module and Hydraulic Control Unit (VDCCM&H/U).> |
| 6 | **CHECK POOR CONTACT OF CONNECTORS.**<br>Turn the ignition switch to OFF. | Is there poor contact of connector between generator, battery and VDCCM&H/U? | Repair the connector. | Go to step **7**. |
| 7 | **CHECK VDCCM&H/U.**<br>1) Connect all connectors.<br>2) Clear the memory. <Ref. to VDC(diag)-24, Clear Memory Mode.><br>3) Perform the Inspection Mode. <Ref. to VDC(diag)-23, Inspection Mode.><br>4) Read the DTC. | Is the same DTC displayed? | Replace the VDCCM&H/U. <Ref. to VDC-9, VDC Control Module and Hydraulic Control Unit (VDCCM&H/U).> | Go to step **8**. |

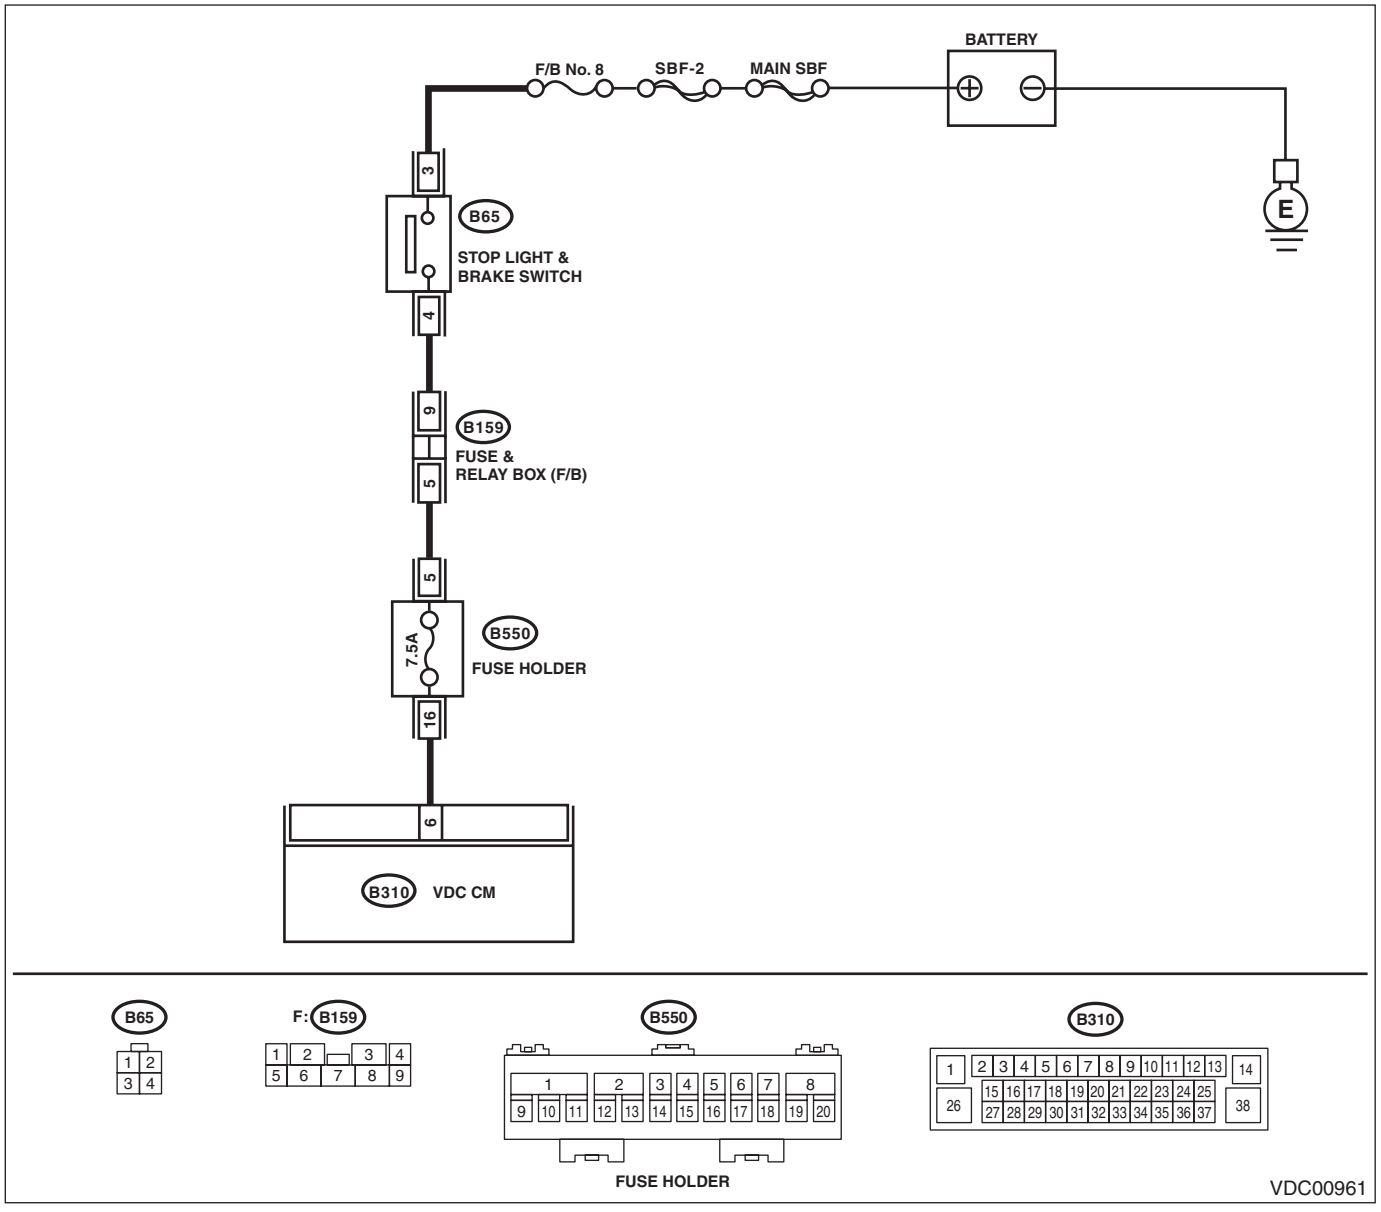
| Step | | Check | Yes | No |
|---|---|---|---|---|
| 8 | CHECK OTHER DTC DETECTION. | Is any other DTC displayed? | Perform the diagnosis according to DTC. <Ref. to VDC(diag)-37, List of Diagnostic Trouble Code (DTC).> | Temporary poor contact occurs.<br>NOTE:<br>Though the ABS warning light, and the VDC warning light & VDC indicator light may remain lit at this point, this is normal. Drive the vehicle at 40 km/h (25 MPH) or more in order to turn off the ABS warning light, and the VDC warning light & VDC indicator light. Be sure to drive the vehicle and check that the warning light goes off. |

## AI: DTC C1531 BLS OFF FAULT

**DTC DETECTING CONDITION:**
Defective stop light switch

**TROUBLE SYMPTOM:**
- ABS does not operate.
- VDC does not operate.
- Hill start assist does not operate.

**WIRING DIAGRAM**:
Stop light system <Ref. to WI-145, Stop Light System.>



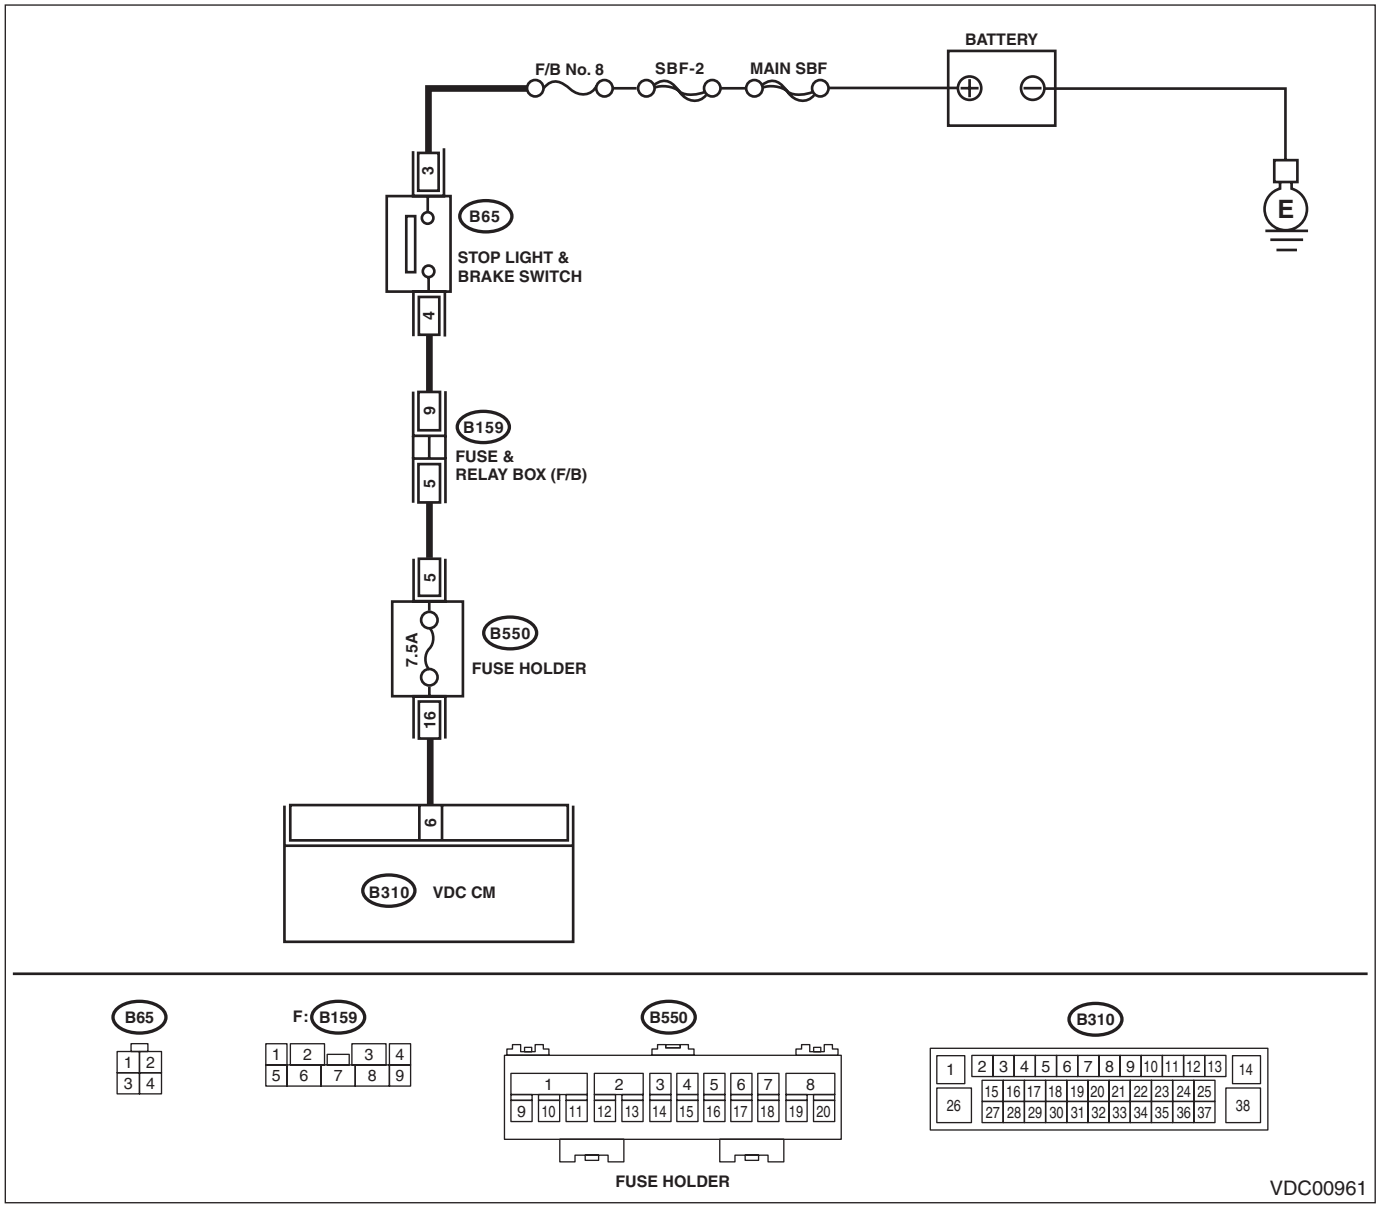
| | Step | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK STOP LIGHT SWITCH.**<br>1) Turn the ignition switch to OFF.<br>2) Disconnect the stop light switch connector.<br>3) Measure the resistance of stop light switch terminals.<br>***Connector & terminal***<br>***(B65) No. 3 — No. 4:*** | Is the resistance 1 Ω or less when the switch is ON (when pedal is depressed)? | Go to step **2**. | Replace the stop light switch. <Ref. to BR-71, Stop Light Switch.> |
| 2 | **CHECK STOP LIGHT POWER SUPPLY.**<br>Measure the voltage between stop light switch terminal and chassis ground.<br>***Connector & terminal***<br>***(B65) No. 3 (+) — Chassis ground (–):*** | Is the voltage 10 — 15 V? | Go to step **3**. | Repair the stop light power supply circuit. |
| 3 | **CHECK STOP LIGHT SWITCH HARNESS.**<br>1) Disconnect the connector from the VDCCM&H/U.<br>2) Measure the resistance between VDCCM&H/U and stop light switch.<br>***Connector & terminal***<br>***(B65) No. 4 — (B310) No. 6:*** | Is the resistance less than 1 Ω? | Go to step **4**. | Repair the stop light switch circuit. |
| 4 | **CHECK POOR CONTACT OF CONNECTORS.** | Is there poor contact of connector between stop light switch and VDCCM&H/U? | Repair the connector. | Go to step **5**. |
| 5 | **CHECK VDCCM&H/U.**<br>1) Connect all connectors.<br>2) Clear the memory. <Ref. to VDC(diag)-24, Clear Memory Mode.><br>3) Perform the Inspection Mode. <Ref. to VDC(diag)-23, Inspection Mode.><br>4) Read the DTC. | Is the same DTC displayed? | Replace the VDCCM only. <Ref. to VDC-16, REPLACEMENT, VDC Control Module and Hydraulic Control Unit (VDCCM&H/U).> | Go to step **6**. |
| 6 | **CHECK OTHER DTC DETECTION.** | Is any other DTC displayed? | Perform the diagnosis according to DTC. <Ref. to VDC(diag)-37, List of Diagnostic Trouble Code (DTC).> | Temporary poor contact occurs. |

## AJ:DTC C1532 BLS ON FAULT

**DTC DETECTING CONDITION:**
Defective stop light switch

**TROUBLE SYMPTOM:**
- ABS does not operate.
- VDC does not operate.
- Hill start assist does not operate.

**WIRING DIAGRAM**:
Stop light system <Ref. to WI-145, Stop Light System.>



| | Step | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK STOP LIGHT SWITCH.**<br>1) Turn the ignition switch to OFF.<br>2) Disconnect the stop light switch connector.<br>3) Measure the resistance of stop light switch terminals.<br>***Connector & terminal***<br>***(B65) No. 3 — No. 4:*** | Is the resistance 1 MΩ or more when switch is OFF (when pedal is not depressed)? | Go to step **2**. | Replace the stop light switch. <Ref. to BR-71, Stop Light Switch.> |
| 2 | **CHECK STOP LIGHT SWITCH HARNESS.**<br>1) Disconnect the connector from the VDCCM&H/U.<br>2) Measure the resistance between VDCCM&H/U connector and chassis ground.<br>***Connector & terminal***<br>***(B310) No. 6 — Chassis ground:*** | Is the resistance less than 1 MΩ? | Go to step **3**. | Repair the stop light switch circuit. |
| 3 | **INTERVIEW CUSTOMERS.**<br>Make sure that the operation was performed in which accelerator pedal and brake pedal were depressed simultaneously (with depressing brake pedal with left foot). | Were the acceleration pedal and brake pedal depressed simultaneously? | System is normal. (DTC may be recorded while brake is applied during driving.) | Go to step **4**. |
| 4 | **CHECK VDCCM&H/U.**<br>1) Connect all connectors.<br>2) Clear the memory. <Ref. to VDC(diag)-24, Clear Memory Mode.><br>3) Perform the Inspection Mode. <Ref. to VDC(diag)-23, Inspection Mode.><br>4) Read the DTC. | Is the same DTC displayed? | Replace the VDCCM only. <Ref. to VDC-16, REPLACEMENT, VDC Control Module and Hydraulic Control Unit (VDCCM&H/U).> | Go to step **5**. |
| 5 | **CHECK OTHER DTC DETECTION.** | Is any other DTC displayed? | Perform the diagnosis according to DTC. <Ref. to VDC(diag)-37, List of Diagnostic Trouble Code (DTC).> | Temporary poor contact occurs. |

## AK:DTC C1541 CLUTCH OFF FAULT

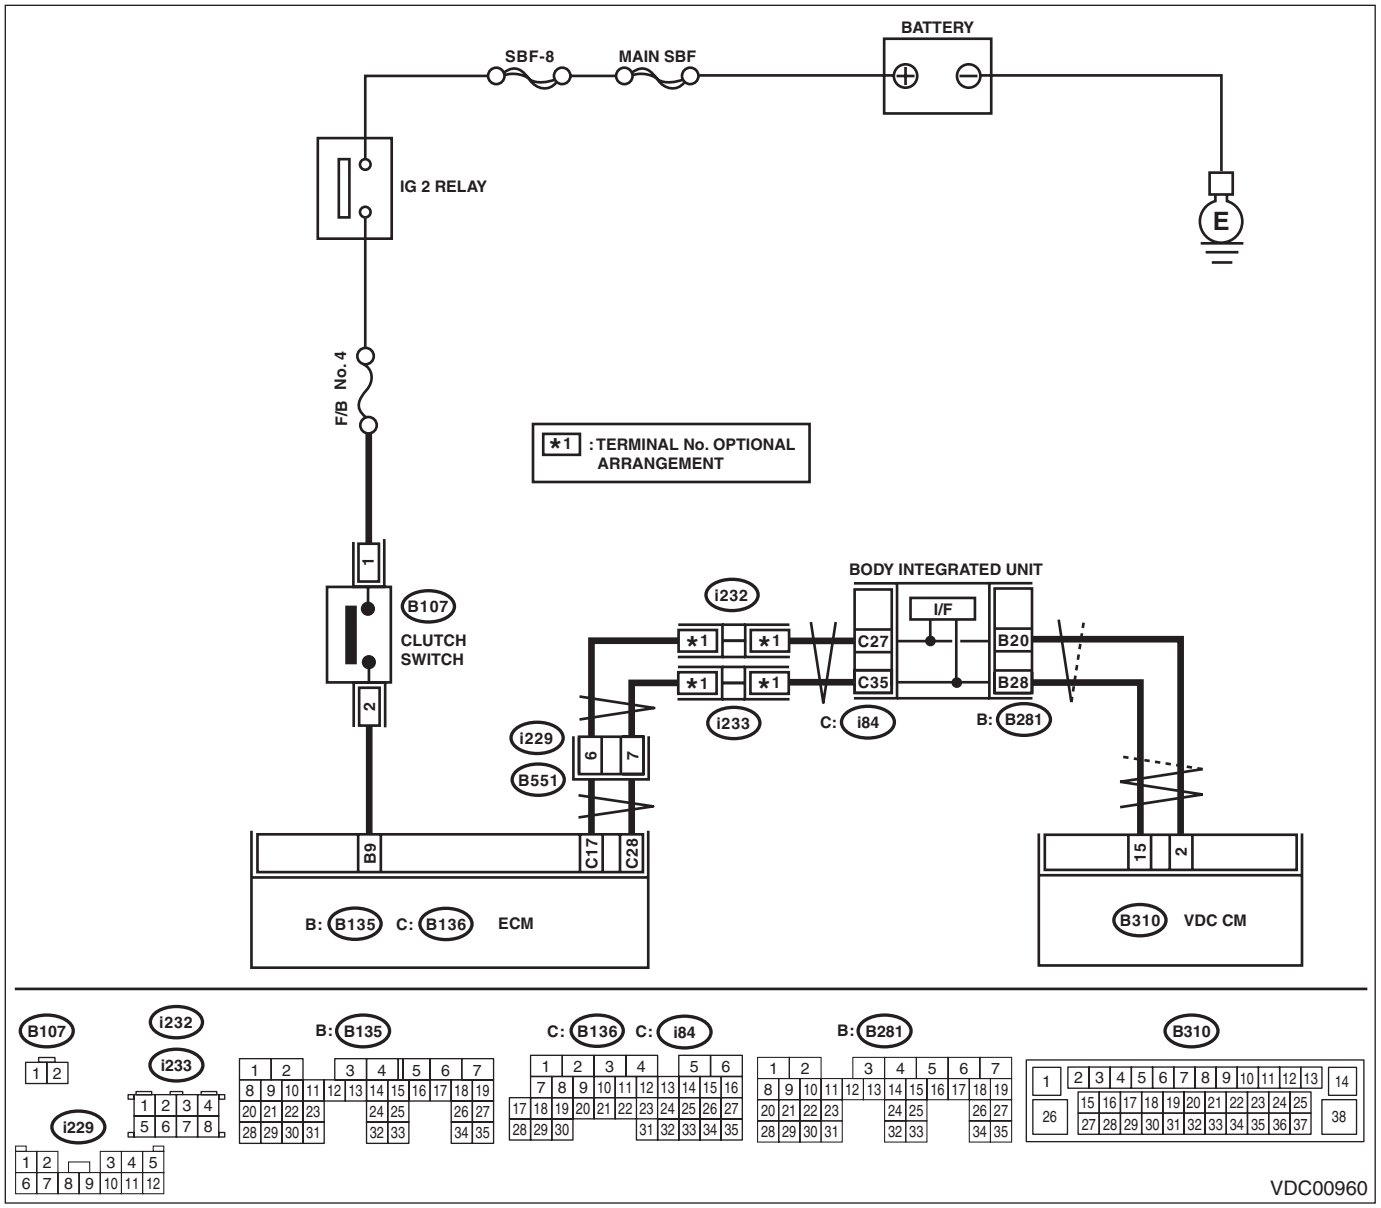
NOTE:
For the diagnostic procedure, refer to “DTC C1542 CLUTCH ON FAULT”. <Ref. to VDC(diag)-70, DTC C1542 CLUTCH ON FAULT, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>

## AL:DTC C1542 CLUTCH ON FAULT

**DTC DETECTING CONDITION:**
Abnormal clutch signal
**TROUBLE SYMPTOM:**
Hill start assist does not operate.

NOTE:
Depending on the user clutch operation patterns, the hill start assist warning light may illuminate for a while, and then go off.
**Illumination condition:**
While the vehicle speed is 10 km/h (6 MPH) or above, and the clutch switch signal ON (depressed) condition continues five minutes or more, if the vehicle speed lowers to 10 km/h (6 MPH) or below, the module judge as abnormal (clutch switch stuck ON), and then turn on the warning light.
**Turning off condition:**
If the clutch switch signal OFF (foot released) condition continues for 2 second, the module turns off the warning light.
The hill start assist function does not operate, while the warning light illuminates.

**WIRING DIAGRAM:**
Engine electrical system <Ref. to WI-74, Engine Electrical System.>
CAN communication system <Ref. to WI-46, CAN Communication System.>



| Step | | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK LAN SYSTEM.**<br>Perform the diagnosis for LAN system. <Ref. to LAN(diag)-2, Basic Diagnostic Procedure.> | Is there any fault in LAN system? | Perform the diagnosis according to DTC for LAN system. <Ref. to LAN(diag)-50, List of Diagnostic Trouble Code (DTC).> | Go to step **2**. |
| 2 | **CHECK CLUTCH SIGNAL USING SUBARU SELECT MONITOR.**<br>1) Select “Current Data Display & Save” on the Subaru Select Monitor. <Ref. to VDC(diag)-17, READ CURRENT DATA, OPERATION, Subaru Select Monitor.><br>2) Read the «Clutch Switch» displayed on display. | Is “OFF” displayed when the clutch pedal is not depressed, and is “ON” displayed when depressed? | Go to step **5**. | Go to step **3**. |

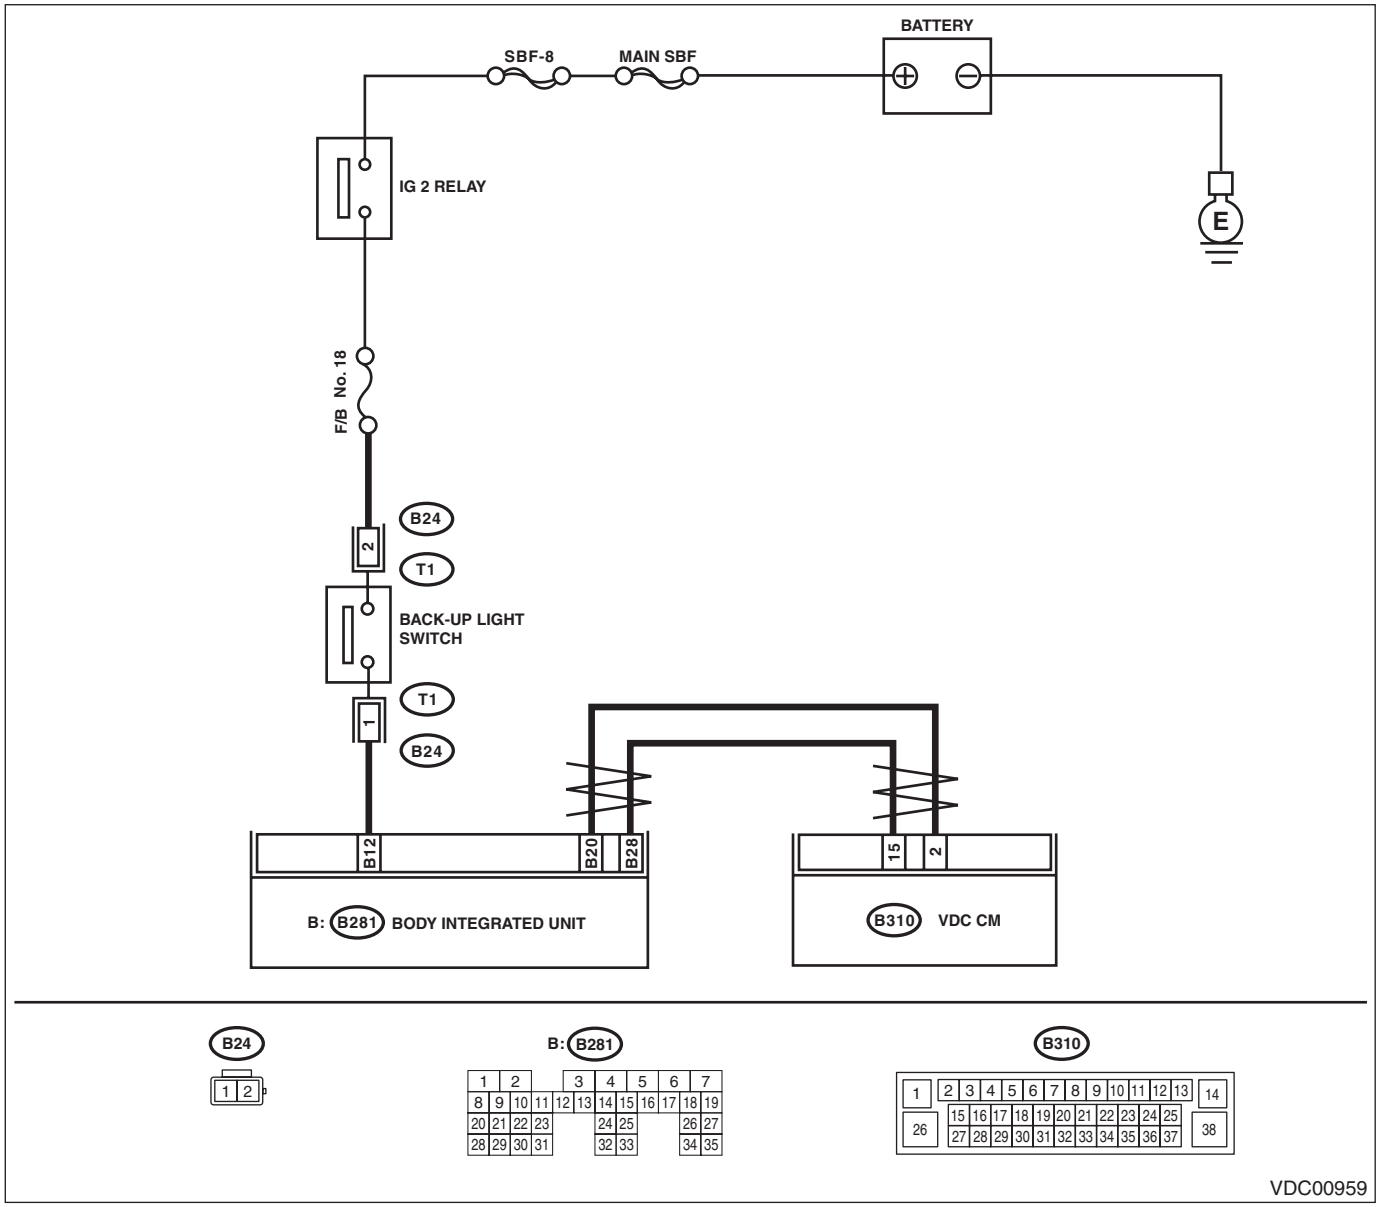
| | Step | Check | Yes | No |
|---|---|---|---|---|
| 3 | **CHECK CLUTCH SIGNAL OF ECM USING SUBARU SELECT MONITOR.**<br>1) Select “Current Data Display & Save” on Subaru Select Monitor. <Ref. to EN(H4DO)(diag)-36, READ CURRENT DATA FOR ENGINE (NORMAL MODE), OPERATION, Subaru Select Monitor.><br>2) Read the «Clutch Switch» displayed on display. | Is “OFF” displayed when the clutch pedal is not depressed, and is “ON” displayed when depressed? | Go to step **5**. | Go to step **4**. |
| 4 | **CHECK HARNESS BETWEEN ECM AND CLUTCH SWITCH.**<br>1) Turn the ignition switch to OFF.<br>2) Disconnect the connectors from ECM and clutch switch.<br>3) Measure the resistance of harness between ECM and clutch switch connector.<br>***Connector & terminal***<br>***(B135) No. 9 — (B107) No. 2:*** | Is the resistance less than 1 Ω? | Repair the power supply circuit of clutch switch. Or replace the clutch switch. <Ref. to CL-26, Clutch Switch.> | Repair the harness between ECM and clutch switch connector. |
| 5 | **CHECK VDCCM&H/U.**<br>1) Connect all connectors.<br>2) Clear the memory. <Ref. to VDC(diag)-24, Clear Memory Mode.><br>3) Perform the Inspection Mode. <Ref. to VDC(diag)-23, Inspection Mode.><br>4) Read the DTC. | Is the same DTC displayed? | Replace the VDCCM&H/U. <Ref. to VDC-9, VDC Control Module and Hydraulic Control Unit (VDCCM&H/U).> | Go to step **6**. |
| 6 | **CHECK OTHER DTC DETECTION.** | Is any other DTC displayed? | Perform the diagnosis according to DTC. <Ref. to VDC(diag)-37, List of Diagnostic Trouble Code (DTC).> | Temporary poor contact occurs. |

## AM:DTC C1561 REVERSE OFF FAULT

NOTE:
For the diagnostic procedure, refer to “DTC C1562 REVERSE ON FAULT”. <Ref. to VDC(diag)-73, DTC C1562 REVERSE ON FAULT, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>

## AN:DTC C1562 REVERSE ON FAULT

**DTC DETECTING CONDITION:**
Abnormal reverse signal
**TROUBLE SYMPTOM:**
Hill start assist does not operate.
**WIRING DIAGRAM:**
Back-up light system <Ref. to WI-45, Back-up Light System.>
CAN communication system <Ref. to WI-46, CAN Communication System.>



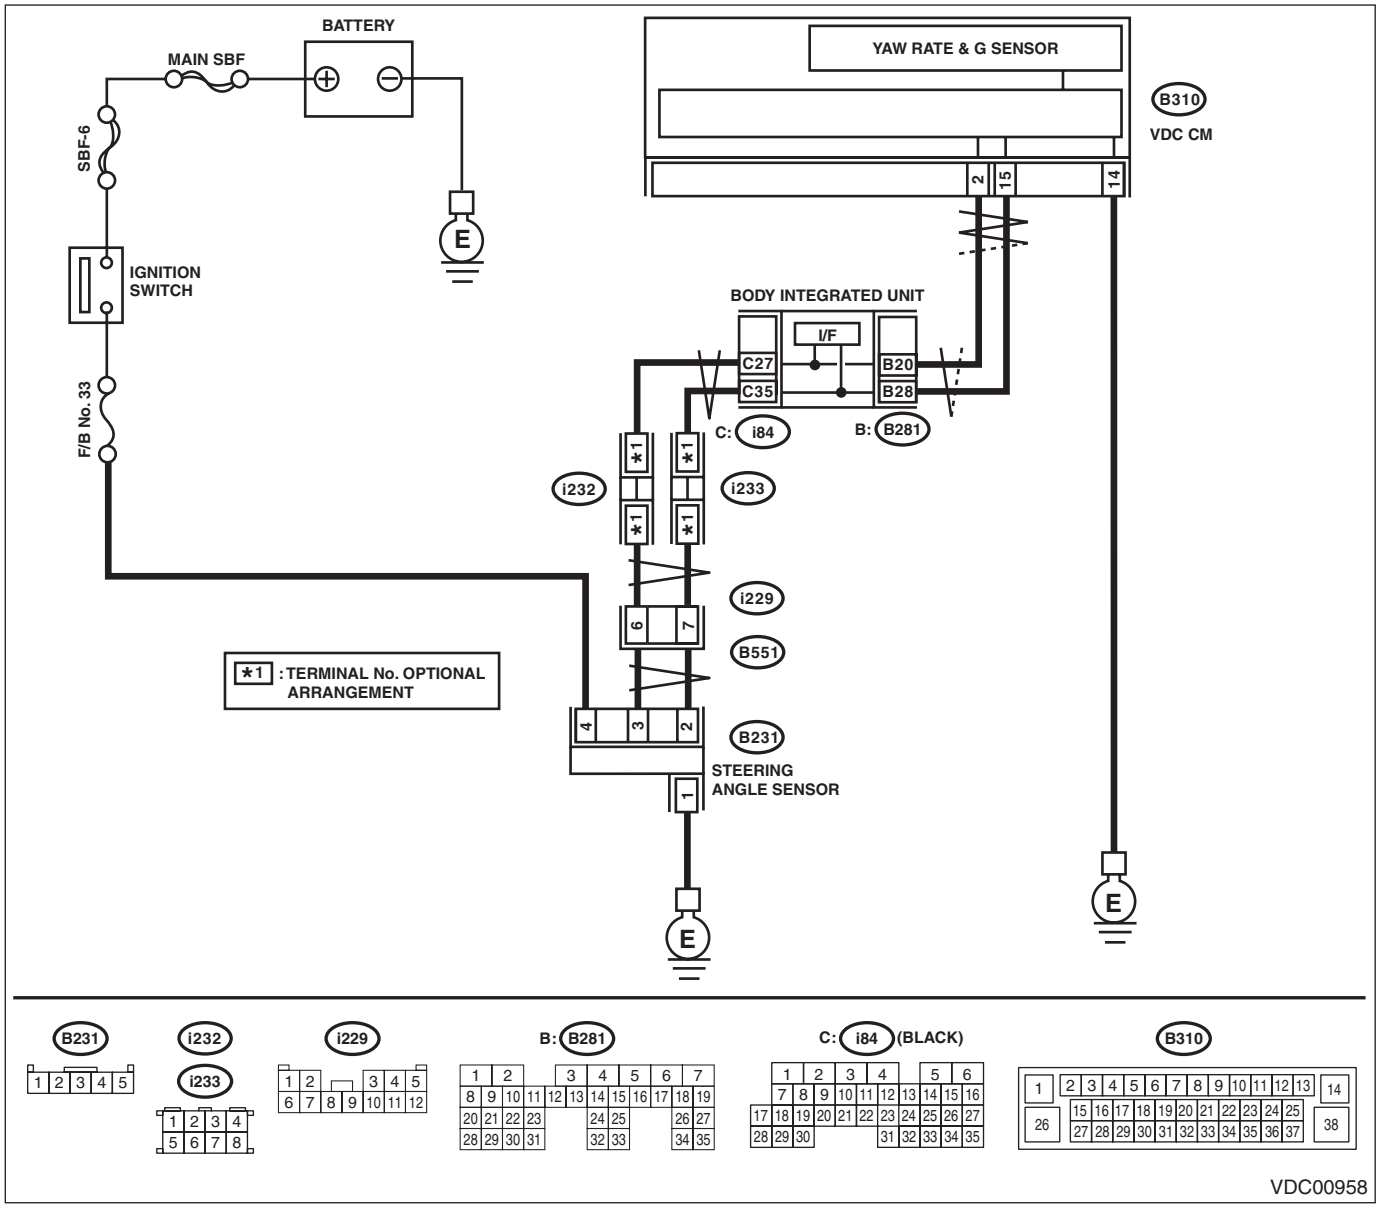
| | Step | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK LAN SYSTEM.**<br>Perform the diagnosis for LAN system. <Ref. to LAN(diag)-2, Basic Diagnostic Procedure.> | Is there any fault in LAN system? | Perform the diagnosis according to DTC for LAN system. <Ref. to LAN(diag)-50, List of Diagnostic Trouble Code (DTC).> | Go to step **2**. |
| 2 | **CHECK REVERSE SIGNAL USING SUBARU SELECT MONITOR.**<br>1) Select “Current Data Display & Save” on the Subaru Select Monitor. <Ref. to VDC(diag)-17, READ CURRENT DATA, OPERATION, Subaru Select Monitor.><br>2) Read the «Reverse Signal» displayed on display. | Is “OFF” displayed when the shift lever is placed in any position other than reverse, and is “ON” displayed in reverse position? | Go to step **5**. | Go to step **3**. |
| 3 | **CHECK BACK-UP LIGHT ILLUMINATION.**<br>1) Turn the ignition switch to ON.<br>2) Place the shift lever in reverse position. | Does the back-up light illuminate? | Go to step **4**. | Repair the back-up light circuit. |
| 4 | **CHECK HARNESS BETWEEN BODY INTEGRATED UNIT AND BACK-UP LIGHT SWITCH.**<br>1) Turn the ignition switch to OFF.<br>2) Disconnect the connectors from body integrated unit and back-up light switch.<br>3) Measure the resistance of harness between body integrated unit and back-up light switch connector.<br>***Connector & terminal***<br>***(B280) No. 12 — (B24) No. 1:*** | Is the resistance less than 1 Ω? | Replace the back-up light switch. <Ref. to 5MT-35, Switches and Harness.> | Repair the harness between body integrated unit and back-up light switch connector. |
| 5 | **CHECK VDCCM&H/U.**<br>1) Connect all connectors.<br>2) Clear the memory. <Ref. to VDC(diag)-24, Clear Memory Mode.><br>3) Perform the Inspection Mode. <Ref. to VDC(diag)-23, Inspection Mode.><br>4) Read the DTC. | Is the same DTC displayed? | Replace the VDCCM&H/U. <Ref. to VDC-9, VDC Control Module and Hydraulic Control Unit (VDCCM&H/U).> | Go to step **6**. |
| 6 | **CHECK OTHER DTC DETECTION.** | Is any other DTC displayed? | Perform the diagnosis according to DTC. <Ref. to VDC(diag)-37, List of Diagnostic Trouble Code (DTC).> | Temporary poor contact occurs. |

# AO:DTC C1711 STEERING ANGLE SENSOR ABNORMAL

**DTC DETECTING CONDITION:**
Defective steering angle sensor

**TROUBLE SYMPTOM:**
- ABS does not operate.
- VDC does not operate.
- Hill start assist does not operate.

**WIRING DIAGRAM:**
Vehicle Dynamics Control System <Ref. to WI-152, Vehicle Dynamics Control System.>



| | Step | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK POWER SUPPLY FOR STEERING ANGLE SENSOR.**<br>1) Turn the ignition switch to OFF.<br>2) Disconnect the connector from steering angle sensor.<br>3) Turn the ignition switch to ON.<br>4) Measure the voltage between steering angle sensor and chassis ground.<br>***Connector & terminal***<br>***(B231) No. 4 (+) — Chassis ground (–):*** | Is the voltage 10 — 15 V? | Go to step **2**. | Repair the steering angle sensor power supply circuit. |
| 2 | **CHECK GROUND CIRCUIT OF STEERING ANGLE SENSOR.**<br>Measure the resistance between steering angle sensor and chassis ground.<br>***Connector & terminal***<br>***(B231) No. 1 — Chassis ground:*** | Is the resistance less than 10 Ω? | Go to step **3**. | Repair ground circuit in the steering angle sensor. |
| 3 | **CHECK STEERING ANGLE SENSOR HARNESS.**<br>1) Disconnect the connector from the VDCCM&H/U.<br>2) Measure the resistance between VDCCM&H/U and steering angel sensor.<br>***Connector & terminal***<br>***(B231) No. 2 — (B310) No. 15:***<br>***(B231) No. 3 — (B310) No. 2:*** | Is the resistance less than 1 Ω? | Go to step **4**. | Repair the harness between the steering angle sensor and VDCCM&H/U. |
| 4 | **CHECK GROUND SHORT CIRCUIT OF STEERING ANGLE SENSOR HARNESS.**<br>Measure the resistance between steering angle sensor and chassis ground.<br>***Connector & terminal***<br>***(B231) No. 2 — Chassis ground:***<br>***(B231) No. 3 — Chassis ground:*** | Is the resistance 1 MΩ or more? | Go to step **5**. | Repair the harness between the steering angle sensor and VDCCM&H/U. |
| 5 | **CHECK STEERING WHEEL.**<br>1) Drive the vehicle on a flat road.<br>2) Park the vehicle straight.<br>3) Check the steering wheel for deviation from center. | Is the deviation from the center of steering wheel less than 5°? | Go to step **6**. | Perform the centering adjustment of steering wheel, and perform the VDC sensor midpoint setting mode. <Ref. to VDC-19, VDC SENSOR MIDPOINT SETTING MODE, ADJUSTMENT, VDC Control Module and Hydraulic Control Unit (VDCCM&H/U).> |
| 6 | **CHECK OUTPUT OF STEERING ANGLE SENSOR USING SUBARU SELECT MONITOR.**<br>1) Adjust steering wheel to the center position.<br>2) Connect Subaru Select Monitor, and select “Current Data Display & Save”.<br>3) Read the «Steering Angle Sensor» displayed on display. | Is the indicated reading of the «Steering Angle Sensor» on the monitor display –10° — 10°? | Perform the VDC sensor midpoint setting mode. Go to step **7**. <Ref. to VDC-19, VDC SENSOR MIDPOINT SETTING MODE, ADJUSTMENT, VDC Control Module and Hydraulic Control Unit (VDCCM&H/U).> | Check the installation of the steering wheel and steering angle sensor. |

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 7 | **CHECK STEERING ANGLE SENSOR USING SUBARU SELECT MONITOR.**<br>1) Turn the ignition switch to OFF.<br>2) Connect all connectors.<br>3) Clear the memory. <Ref. to VDC(diag)-24, Clear Memory Mode.><br>4) Perform the Inspection Mode. <Ref. to VDC(diag)-23, Inspection Mode.><br>5) Read the DTC. | Is the same DTC displayed? | Go to step **8**. | Go to step **9**. |
| 8 | **CHECK VDCCM&H/U.**<br>1) Turn the ignition switch to OFF.<br>2) Replace the steering angle sensor. <Ref. to VDC-27, Steering Angle Sensor.><br>3) Clear the memory. <Ref. to VDC(diag)-24, Clear Memory Mode.><br>4) Perform the Inspection Mode. <Ref. to VDC(diag)-23, Inspection Mode.><br>5) Read the DTC. | Is the same DTC displayed? | Replace the VDCCM only. <Ref. to VDC-16, REPLACEMENT, VDC Control Module and Hydraulic Control Unit (VDCCM&H/U).> | Go to step **10**. |
| 9 | **CHECK OTHER DTC DETECTION.** | Is any other DTC displayed? | Perform the diagnosis according to DTC. <Ref. to VDC(diag)-37, List of Diagnostic Trouble Code (DTC).> | Temporary poor contact occurs. |
| 10 | **CHECK OTHER DTC DETECTION.** | Is any other DTC displayed? | Perform the diagnosis according to DTC. <Ref. to VDC(diag)-37, List of Diagnostic Trouble Code (DTC).> | Original steering angle sensor malfunction |

## AP:DTC C1721 YAW RATE SENSOR ABNORMAL

**DTC DETECTING CONDITION:**
Defective yaw rate & G sensor
**TROUBLE SYMPTOM:**
- ABS does not operate.
- VDC does not operate.
- Hill start assist does not operate.

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 1 | **INTERVIEW CUSTOMERS.**<br>Check if the vehicle ran the road with banks or sandy surface (which does not mean a dirt road). | Did the vehicle run the road with banks or sandy surface (which does not mean a dirt road)? | VDCCM&H/U may record DTC when the vehicle ran the road with banks or sandy surface (which does not mean a dirt road). | Go to step **2**. |
| 2 | **CHECK INSTALLATION OF VDCCM&H/U.** | Is VDCCM&H/U installed properly without being tilted?<br>Is the bracket deformation-free?<br>Are the VDCCM&H/U installation bolts installed without missing or getting loose? | Go to step **3**. | Repair the defective part. Go to step **3**.<br>• Install VDCCM&H/U properly.<br>• Replace the bracket if faulty.<br>• Tighten the VDCCM&H/U installation bolt.<br><Ref. to VDC-5, VDC CONTROL MODULE & HYDRAULIC CONTROL UNIT (VDCCM&H/U), COMPONENT, General Description.> |
| 3 | **CHECK OUTPUT OF YAW RATE & G SENSOR WITH SUBARU SELECT MONITOR.**<br>1) Drive the vehicle on a flat road.<br>2) Park the vehicle straight.<br>3) Select “Current Data Display & Save” on the Subaru Select Monitor.<br>4) Read the «Yaw Rate Sensor» displayed on display. | Is the reading indicated on monitor display –4 — 4 deg/s? | Go to step **4**. | Replace the VDCCM only.<br><Ref. to VDC-16, REPLACEMENT, VDC Control Module and Hydraulic Control Unit (VDCCM&H/U).> |
| 4 | **CHECK OUTPUT OF STEERING ANGLE SENSOR WITH SUBARU SELECT MONITOR.**<br>1) Drive the vehicle on a flat road.<br>2) Park the vehicle straight.<br>3) Select “Current Data Display & Save” on the Subaru Select Monitor.<br>4) Read the «Steering Angle Sensor» displayed on display. | Is the reading indicated on monitor display –10 — 10°? | Go to step **5**. | Perform the centering adjustment of steering wheel. |

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 5 | **CHECK VDCCM&H/U.**<br>1) Turn the ignition switch to OFF.<br>2) Clear the memory. <Ref. to VDC(diag)-24, Clear Memory Mode.><br>3) Perform the Inspection Mode. <Ref. to VDC(diag)-23, Inspection Mode.><br>4) Read the DTC. | Is the same DTC displayed? | Replace the VDCCM only. <Ref. to VDC-16, REPLACEMENT, VDC Control Module and Hydraulic Control Unit (VDCCM&H/U).> | Go to step **6**. |
| 6 | **CHECK OTHER DTC DETECTION.** | Is any other DTC displayed? | Perform the diagnosis according to DTC. <Ref. to VDC(diag)-37, List of Diagnostic Trouble Code (DTC).> | It results from a temporary noise interference. |

## AQ:DTC C1731 G SENSOR ABNORMAL

NOTE:
For the diagnostic procedure, refer to “DTC C1732 LATERAL G SENSOR ABNORMAL”. <Ref. to VDC(diag)-80, DTC C1732 LATERAL G SENSOR ABNORMAL, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>

## AR:DTC C1732 LATERAL G SENSOR ABNORMAL

**DTC DETECTING CONDITION:**
Defective lateral G sensor
**TROUBLE SYMPTOM:**
- ABS does not operate.
- VDC does not operate.
- Hill start assist does not operate.

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK INSTALLATION OF VDCCM&H/U.** | Is VDCCM&H/U installed properly without being tilted?<br>Is the bracket deformation-free?<br>Are the VDCCM&H/U installation bolts installed without missing or getting loose? | Go to step **2**. | Repair the defective part. Go to step **2**.<br>• Install VDCCM&H/U properly.<br>• Replace the bracket if faulty.<br>• Tighten the VDCCM&H/U installation bolt.<br><Ref. to VDC-5, VDC CONTROL MODULE & HYDRAULIC CONTROL UNIT (VDCCM&H/U), COMPONENT, General Description.> |
| 2 | **CHECK OUTPUT OF STEERING ANGLE SENSOR USING SUBARU SELECT MONITOR.**<br>1) Park the vehicle straight on a level surface.<br>2) Connect Subaru Select Monitor, and select “Current Data Display & Save”.<br>3) Read the «Steering Angle Sensor» displayed on display. | Is the indicated reading of the steering angle sensor on the monitor display –10° — 10°? | Go to step **3**. | Check the installation of steering angle sensor. |
| 3 | **CHECK OUTPUT OF LATERAL G SENSOR AND LONGITUDINAL G SENSOR WITH SUBARU SELECT MONITOR.**<br>1) Park the vehicle straight on a level surface.<br>2) Connect Subaru Select Monitor, and select “Current Data Display & Save”.<br>3) Read the «Lateral G Sensor» and « Longitudinal G Sensor » displayed on display. | Is the indicated reading of the lateral G sensor and longitudinal G sensor on the monitor display –2 — 2 $m/s^2$? | Go to step **4**. | Recheck from step 1, and if the problem is not solved, go to next. Go to step **7**. |
| 4 | **SET 0 POINT OF LATERAL G SENSOR AND LONGITUDINAL G SENSOR WITH SUBARU SELECT MONITOR.**<br>1) Select “Work Support” on Subaru Select Monitor.<br>2) Perform the VDC sensor midpoint setting mode. <Ref. to VDC-19, VDC SENSOR MIDPOINT SETTING MODE, ADJUSTMENT, VDC Control Module and Hydraulic Control Unit (VDCCM&H/U).> | Is the 0 point setting successful? | Go to step **5**. | Recheck from step 1, and when the 0 point setting is not possible, replace the VDCCM only. <Ref. to VDC-16, REPLACEMENT, VDC Control Module and Hydraulic Control Unit (VDCCM&H/U).> |

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 5 | **PERFORM DRIVING TEST.**<br>Drive approximately 10 minutes, and check if the warning lights illuminate or improperly operate during driving.<br>In a safe place, drive the vehicle while alternating acceleration and deceleration as much as possible. | Did the ABS warning light or VDC warning light remain off? Does ABS or VDC operate without malfunction? | Go to step **6**. | Recheck from step 1, and when the warning lights illuminate or improperly operate, replace the VDCCM only. <Ref. to VDC-16, REPLACEMENT, VDC Control Module and Hydraulic Control Unit (VDCCM&H/U).> |
| 6 | **CHECK OUTPUT OF LATERAL G SENSOR AND LONGITUDINAL G SENSOR WITH SUBARU SELECT MONITOR.**<br>1) Park the vehicle on a level surface.<br>2) Connect Subaru Select Monitor, and select "Current Data Display & Save".<br>3) Read the «Lateral G Sensor» and « Longitudinal G Sensor » displayed on display. | Is the indicated reading of the lateral G sensor and longitudinal G sensor on the monitor display –1.5 — 1.5 $m/s^2$? | It results from a temporary noise interference. | Recheck from step 1, and if the problem is not solved, replace the VDCCM only. <Ref. to VDC-16, REPLACEMENT, VDC Control Module and Hydraulic Control Unit (VDCCM&H/U).> |
| 7 | **CHECK OUTPUT OF LATERAL G SENSOR AND LONGITUDINAL G SENSOR WITH SUBARU SELECT MONITOR.**<br>1) Remove the VDCCM&H/U installation bolt and bracket.<br>2) Keep VDCCM&H/U in a horizontal position.<br>3) Connect Subaru Select Monitor, and select "Current Data Display & Save".<br>4) Read the «Lateral G Sensor» and « Longitudinal G Sensor » displayed on display. | When the VDCCM&H/U is in a horizontal position, is the indicated reading of the lateral G sensor and longitudinal G sensor on the monitor display –1.5 — 1.5 $m/s^2$? | Check the bracket and brake pipe, and install VDCCM&H/U in a horizontal position to the vehicle. | Replace the VDCCM only. <Ref. to VDC-16, REPLACEMENT, VDC Control Module and Hydraulic Control Unit (VDCCM&H/U).> |

## AS:DTC C1733 LONGITUDINAL G SENSOR ABNORMAL

**DTC DETECTING CONDITION:**

Defective longitudinal G sensor

**TROUBLE SYMPTOM:**

- ABS does not operate.
- VDC does not operate.
- Hill start assist does not operate.

NOTE:

For the diagnostic procedure, refer to "DTC C1732 LATERAL G SENSOR ABNORMAL". <Ref. to VDC(diag)-80, DTC C1732 LATERAL G SENSOR ABNORMAL, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>

# AT:DTC C1741 PRESSURE SENSOR

**DTC DETECTING CONDITION:**
Defective pressure sensor
**TROUBLE SYMPTOM:**
- ABS does not operate.
- VDC does not operate.
- Hill start assist does not operate.

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK STOP LIGHT SWITCH CIRCUIT.**<br>Check stop light switch open circuit. | Is the stop light switch circuit OK? | Go to step **2**. | Repair the stop light switch circuit.<br>NOTE:<br>If there is malfunction in the stop light circuit, DTC may be recorded in the memory. |
| 2 | **CHECK OUTPUT OF PRESSURE SENSOR WITH SUBARU SELECT MONITOR.**<br>1) Select “Current Data Display & Save” in Subaru Select Monitor. <Ref. to VDC(diag)-17, READ CURRENT DATA, OPERATION, Subaru Select Monitor.><br>2) Read the «Pressure Sensor» displayed on display. | With the brake pedal released, is the displayed value 0 — 11 bar? | Go to step **3**. | Replace the VDCCM&H/U. <Ref. to VDC-9, VDC Control Module and Hydraulic Control Unit (VDCCM&H/U).> |
| 3 | **CHECK OUTPUT OF PRESSURE SENSOR WITH SUBARU SELECT MONITOR.**<br>1) Select “Current Data Display & Save” in Subaru Select Monitor. <Ref. to VDC(diag)-17, READ CURRENT DATA, OPERATION, Subaru Select Monitor.><br>2) Read the «Pressure Sensor» displayed on display. | When the brake pedal is operated, does the pressure sensor output value displayed on the display change in accordance with the brake pedal? | Go to step **4**. | Replace the VDCCM&H/U. <Ref. to VDC-9, VDC Control Module and Hydraulic Control Unit (VDCCM&H/U).> |
| 4 | **CHECK PRESSURE SENSOR.**<br>1) Clear the memory. <Ref. to VDC(diag)-24, Clear Memory Mode.><br>2) Perform the Inspection Mode. <Ref. to VDC(diag)-23, Inspection Mode.><br>3) Read the DTC. | Is the same DTC displayed? | Replace the VDCCM&H/U. <Ref. to VDC-9, VDC Control Module and Hydraulic Control Unit (VDCCM&H/U).> | Go to step **5**. |
| 5 | **CHECK OTHER DTC DETECTION.** | Is any other DTC displayed? | Perform the diagnosis according to DTC. <Ref. to VDC(diag)-37, List of Diagnostic Trouble Code (DTC).> | It results from a temporary noise interference. |

## AU:DTC C1811 SYSTEM FAILURE

**DTC DETECTING CONDITION:**
ABS and VDC long time sequential control
**TROUBLE SYMPTOM:**
- ABS does not operate.
- VDC does not operate.
- EBD may not operate.
- Hill start assist does not operate.

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK INSTALLATION OF VDCCM&H/U.** | Is VDCCM&H/U installed properly without being tilted?<br>Is the bracket deformation-free?<br>Are the VDCCM&H/U installation bolts installed without missing or getting loose? | Go to step **2**. | Repair the defective part. Go to step **2**.<br>• Install VDCCM&H/U properly.<br>• Replace the bracket if faulty.<br>• Tighten the VDCCM&H/U installation bolt.<br><Ref. to VDC-5, VDC CONTROL MODULE & HYDRAULIC CONTROL UNIT (VDCCM&H/U), COMPONENT, General Description.> |
| 2 | **CHECK STEERING WHEEL.**<br>1) Drive the vehicle on a flat road.<br>2) Park the vehicle straight.<br>3) Check the steering wheel for deviation from center. | Is the deviation from the center of steering wheel less than 5°? | Go to step **3**. | Perform the centering adjustment of steering wheel, and perform the VDC sensor midpoint setting mode. Go to step **3**. <Ref. to VDC-19, VDC SENSOR MIDPOINT SETTING MODE, ADJUSTMENT, VDC Control Module and Hydraulic Control Unit (VDCCM&H/U).> |
| 3 | **CHECK OUTPUT OF STEERING ANGLE SENSOR USING SUBARU SELECT MONITOR.**<br>1) Adjust steering wheel to the center position.<br>2) Connect Subaru Select Monitor, and select “Current Data Display & Save”.<br>3) Read the «Steer Angle Sensor Op» displayed on display. | Is the indicated reading of the «Steer Angle Sensor Op» on the monitor display –10° — 10°? | Go to step **4**. | Check the installation of the steering wheel and steering angle sensor, and replace the parts if necessary. |

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 4 | **CHECK OUTPUT OF SENSORS USING SUBARU SELECT MONITOR.**<br>1) Drive the vehicle on a flat road.<br>2) Park the vehicle straight.<br>3) Connect Subaru Select Monitor, and select "Current Data Display & Save".<br>4) Read output of sensors displayed on display. | Are the indicated reading of sensor outputs following values?<br>Lateral G sensor Output: –2 — 2 $m/s^2$<br>Fr Rr G sensor Output: –2 — 2 $m/s^2$<br>Yaw Rate Sensor Output: –4 — 4 deg/s | Go to step **5**. | Recheck from step 1, and if the problem is not solved, go to next. Go to step **8**. |
| 5 | **SET 0 POINT FOR LONGITUDINAL G SENSOR USING SUBARU SELECT MONITOR.**<br>1) Select "Work Support" on Subaru Select Monitor.<br>2) Perform the VDC sensor midpoint setting mode. <Ref. to VDC-19, VDC SENSOR MIDPOINT SETTING MODE, ADJUSTMENT, VDC Control Module and Hydraulic Control Unit (VDCCM&H/U).> | Is the 0 point setting successful? | Go to step **6**. | Recheck from step 1, and when the 0 point setting is not possible, replace the VDCCM and the steering angle sensor. <Ref. to VDC-16, REPLACEMENT, VDC Control Module and Hydraulic Control Unit (VDCCM&H/U).> <Ref. to VDC-27, Steering Angle Sensor.> |
| 6 | **PERFORM DRIVING TEST.**<br>Drive approximately 10 minutes, and check if the warning lights illuminate or improperly operate during driving. | Did the ABS warning light or VDC warning light remain off? Does ABS or VDC operate without malfunction? | Go to step **7**. | Recheck from step 1, and when the warning lights illuminate or improperly operate, replace the VDCCM only. <Ref. to VDC-16, REPLACEMENT, VDC Control Module and Hydraulic Control Unit (VDCCM&H/U).> |
| 7 | **CHECK OUTPUT OF SENSORS USING SUBARU SELECT MONITOR.**<br>1) Park the vehicle on a level surface.<br>2) Connect Subaru Select Monitor, and select "Current Data Display & Save".<br>3) Read output of sensors displayed on display. | Are the indicated reading of sensor outputs following values?<br>Lateral G sensor Output: –2 — 2 $m/s^2$<br>Fr Rr G sensor Output: –2 — 2 $m/s^2$<br>Yaw Rate Sensor Output: –4 — 4 deg/s | It results from a temporary noise interference. | Replace the VDCCM only. <Ref. to VDC-16, REPLACEMENT, VDC Control Module and Hydraulic Control Unit (VDCCM&H/U).> |
| 8 | **CHECK OUTPUT OF SENSORS USING SUBARU SELECT MONITOR.**<br>1) Remove the VDCCM&H/U installation bolt and bracket.<br>2) Keep VDCCM&H/U in a horizontal position.<br>3) Connect Subaru Select Monitor, and select "Current Data Display & Save".<br>4) Read output of sensors displayed on display. | When VDCCM&H/U is in a horizontal position, are the indicated reading of sensor outputs following values?<br>Lateral G sensor Output: –1.5 — 1.5 $m/s^2$<br>Fr Rr G sensor Output: –1.5 — 1.5 $m/s^2$<br>Yaw Rate Sensor Output: –4 — 4 deg/s | Check the bracket and brake pipe, and install VDCCM&H/U in a horizontal position to the vehicle. | Replace the VDCCM only. <Ref. to VDC-16, REPLACEMENT, VDC Control Module and Hydraulic Control Unit (VDCCM&H/U).> |

# 13.General Diagnostic Table

## A: INSPECTION

| Symptoms | | Main probable cause | Other probable cause |
|---|---|---|---|
| Poor brake performance | Long braking/ stopping distance | • VDCCM&H/U<br>• Brake pad<br>• Aeration to brake line<br>• Tire specifications, tire wear and air pressures<br>• Incorrect wiring or piping connections | • Defective ABS wheel speed sensor or sensor gap<br>• Defective steering angle sensor or improper neutral position<br>• Defective yaw rate & G sensor or improper installation of VDCCM&H/U.<br>• Master cylinder<br>• Brake caliper<br>• Disc rotor<br>• Brake pipe<br>• Brake booster |
| | Wheel lock | • VDCCM&H/U<br>• Defective ABS wheel speed sensor or sensor gap<br>• Incorrect wiring or piping connections | • Defective steering angle sensor or improper neutral position<br>• Defective yaw rate & G sensor or improper installation of VDCCM&H/U.<br>• Brake caliper<br>• Brake pipe |
| | Brake drag | • VDCCM&H/U<br>• Defective ABS wheel speed sensor or sensor gap<br>• Master cylinder<br>• Brake caliper<br>• Parking brake<br>• Axle and wheels<br>• Brake pedal play | • Defective steering angle sensor or improper neutral position<br>• Defective yaw rate & G sensor or improper installation of VDCCM&H/U.<br>• Brake pad<br>• Brake pipe |
| | Long brake pedal stroke | • Aeration to brake line<br>• Brake pedal play | • VDCCM&H/U<br>• Master cylinder<br>• Brake caliper<br>• Brake pad<br>• Brake pipe<br>• Brake booster |
| | Vehicle vertical pitching | • VDCCM&H/U<br>• Road surface (uneven)<br>• Suspension play or fatigue (reduced damping)<br>• Incorrect wiring or piping connections | • Defective ABS wheel speed sensor or sensor gap<br>• Defective steering angle sensor or improper neutral position<br>• Defective yaw rate & G sensor or improper installation of VDCCM&H/U. |
| Poor brake performance | Unstable or uneven braking | • VDCCM&H/U<br>• Defective ABS wheel speed sensor or sensor gap<br>• Brake caliper<br>• Brake pad<br>• Road surface (uneven)<br>• Tire specifications, tire wear and air pressures<br>• Incorrect wiring or piping connections | • Defective ABS wheel speed sensor or sensor gap<br>• Defective steering angle sensor or improper neutral position<br>• Defective yaw rate & G sensor or improper installation of VDCCM&H/U.<br>• Master cylinder<br>• Disc rotor<br>• Brake pipe<br>• Axle and wheels<br>• Road with crowns or banks<br>• Suspension play or fatigue (reduced damping) |

| Symptoms | | Main probable cause | Other probable cause |
|---|---|---|---|
| Vibration or noise<br>• When braking suddenly<br>• When accelerating suddenly<br>• While driving on a slippery road | Excessive brake pedal vibration | • Road surface (uneven)<br>• Incorrect wiring or piping connections | • VDCCM&H/U<br>• Brake booster<br>• Suspension play or fatigue (reduced damping) |
| | Noise from VDCH/U | • VDCCM&H/U (mount bushing)<br>• Defective ABS wheel speed sensor or sensor gap<br>• Brake pipe | • VDCCM&H/U<br>• Defective steering angle sensor or improper neutral position<br>• Defective yaw rate & G sensor or improper installation of VDCCM&H/U. |
| | Noise from the front side of vehicle | • VDCCM&H/U (mount bushing)<br>• Defective ABS wheel speed sensor or sensor gap<br>• Master cylinder<br>• Brake caliper<br>• Brake pad<br>• Disc rotor<br>• Brake pipe<br>• Brake booster<br>• Suspension play or fatigue (reduced damping) | • Axle and wheels<br>• Tire specifications, tire wear and air pressures |
| | Noise from the rear side of vehicle | • Defective ABS wheel speed sensor or sensor gap<br>• Brake caliper<br>• Brake pad<br>• Disc rotor<br>• Parking brake<br>• Brake pipe<br>• Suspension play or fatigue (reduced damping) | • Axle and wheels<br>• Tire specifications, tire wear and air pressures |
| Engine does not accelerate or goes into a stall when accelerating suddenly or driving on a slippery surface. | | • VDCCM&H/U<br>• Defective ABS wheel speed sensor or sensor gap<br>• Master cylinder<br>• Brake caliper<br>• Parking brake<br>• Incorrect wiring or piping | • Defective steering angle sensor or improper neutral position<br>• Defective yaw rate & G sensor or improper installation of VDCCM&H/U.<br>• Brake pad<br>• Brake pipe |

# General Diagnostic Table

| Symptoms | | Main probable cause | Other probable cause |
|---|---|---|---|
| Poor change-direction-operation stability of TCS | Deviation to right or left direction | • VDCCM&H/U<br>• Defective ABS wheel speed sensor or sensor gap<br>• Defective steering angle sensor or improper neutral position<br>• Defective yaw rate & G sensor or improper installation of VDCCM&H/U.<br>• Brake caliper<br>• Brake pad<br>• Wheel alignment<br>• Road surface (uneven)<br>• Road with crowns or banks<br>• Tire specifications, tire wear and air pressures<br>• Incorrect wiring or piping connections | • Disc rotor<br>• Brake pipe<br>• Axle and wheels<br>• Suspension play or fatigue (reduced damping) |
| | Vehicle spin | • VDCCM&H/U<br>• Defective ABS wheel speed sensor or sensor gap<br>• Defective steering angle sensor or improper neutral position<br>• Defective yaw rate & G sensor or improper installation of VDCCM&H/U.<br>• Brake pad<br>• Tire specifications, tire wear and air pressures<br>• Incorrect wiring or piping connections | • Brake caliper<br>• Brake pipe |
| Steering wheel drag while driving | | • VDCCM&H/U<br>• Defective ABS wheel speed sensor or sensor gap<br>• Defective steering angle sensor or improper neutral position<br>• Defective yaw rate & G sensor or improper installation of VDCCM&H/U.<br>• Incorrect wiring or piping connections<br>• Power steering system | • Brake caliper<br>• Brake pad<br>• Disc rotor<br>• Wheel alignment<br>• Road surface (uneven)<br>• Road with crowns or banks<br>• Suspension play or fatigue (reduced damping)<br>• Tire specifications, tire wear and air pressures |

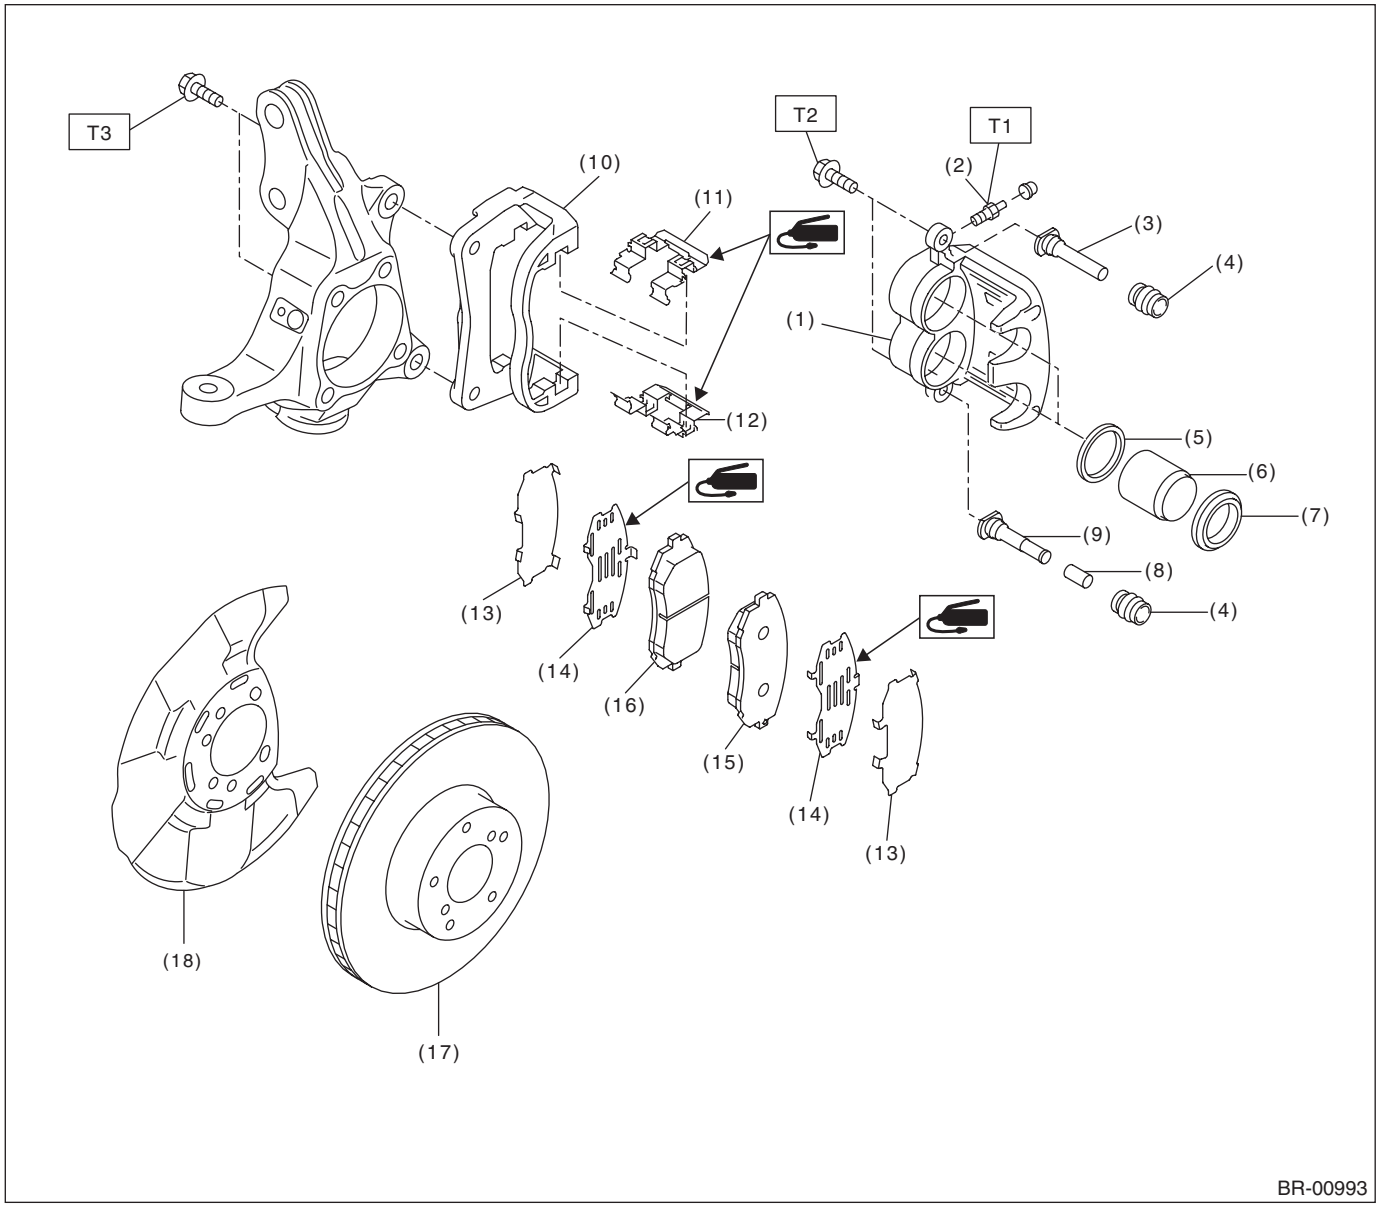
# B: COMPONENT

## 1. FRONT DISC BRAKE

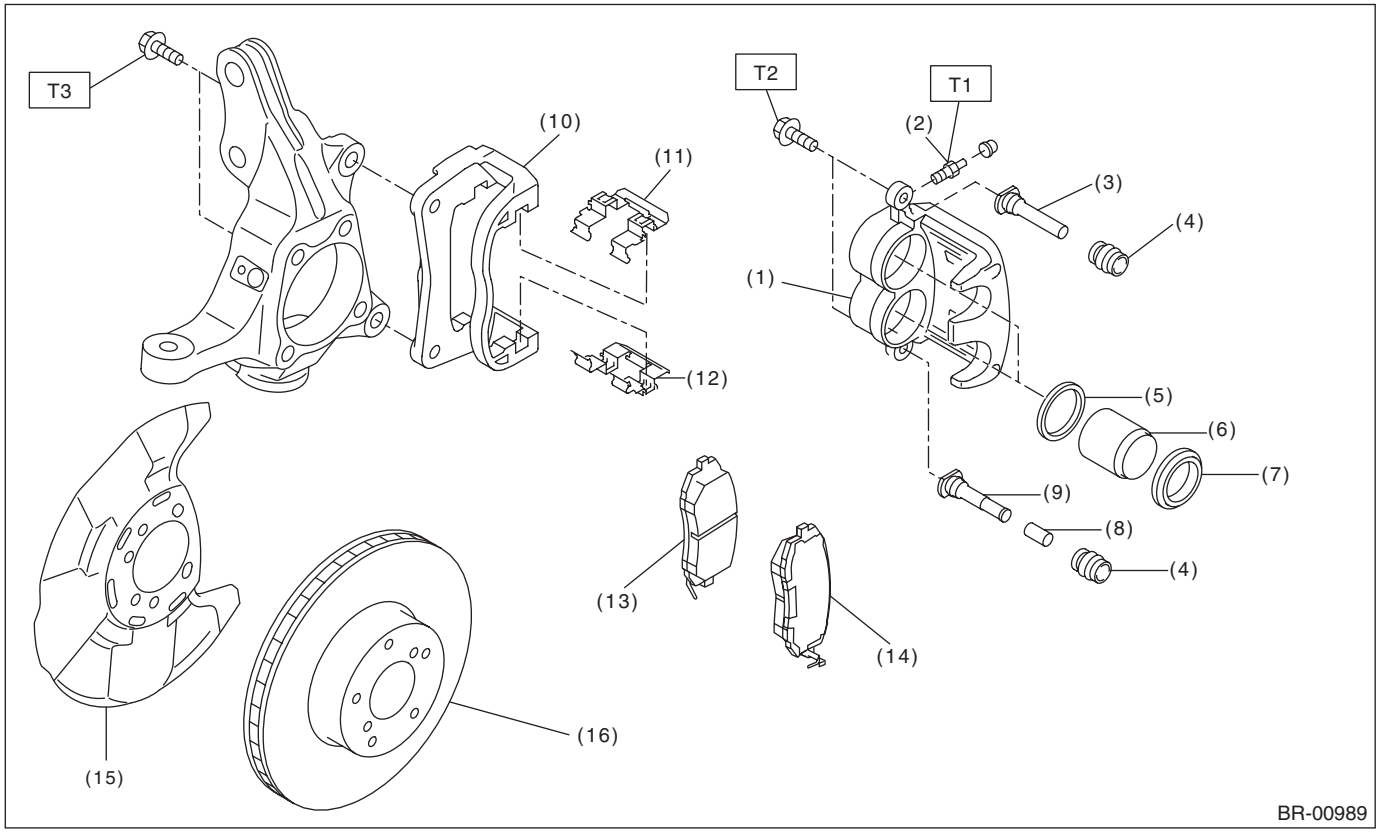
- 15-inch type



(1) Caliper body
(2) Bleeder - screw
(3) Guide pin - front brake (black)
(4) Pin boot
(5) Piston seal
(6) Piston - disc brake
(7) Piston boot
(8) Lock pin - sleeve
(9) Lock pin - front brake (silver)
(10) Support - front disc brake
(11) Pad clip - upper
(12) Pad clip - lower
(13) Shim - disc brake front outer
(14) Shim - disc brake front inner
(15) Pad - disc brake front outer
(16) Pad - disc brake front inner
(17) Disc rotor
(18) Back plate - front brake

***Tightening torque: N·m (kgf-m, ft-lb)***
***T1: 8 (0.82, 5.9)***
***T2: 27 (2.75, 19.9)***
***T3: 80 (8.16, 59)***

- 16-inch type



| | | | |
|---|---|---|---|
| (1) | Caliper body | (9) | Lock pin - front brake (silver) |
| (2) | Bleeder - screw | (10) | Support - front disc brake |
| (3) | Guide pin - front brake (black) | (11) | Pad clip - upper |
| (4) | Pin boot | (12) | Pad clip - lower |
| (5) | Piston seal | (13) | Pad - disc brake front inner |
| (6) | Piston - disc brake | (14) | Pad - disc brake front outer |
| (7) | Piston boot | (15) | Back plate - front brake |
| (8) | Lock pin - sleeve | (16) | Disc rotor |

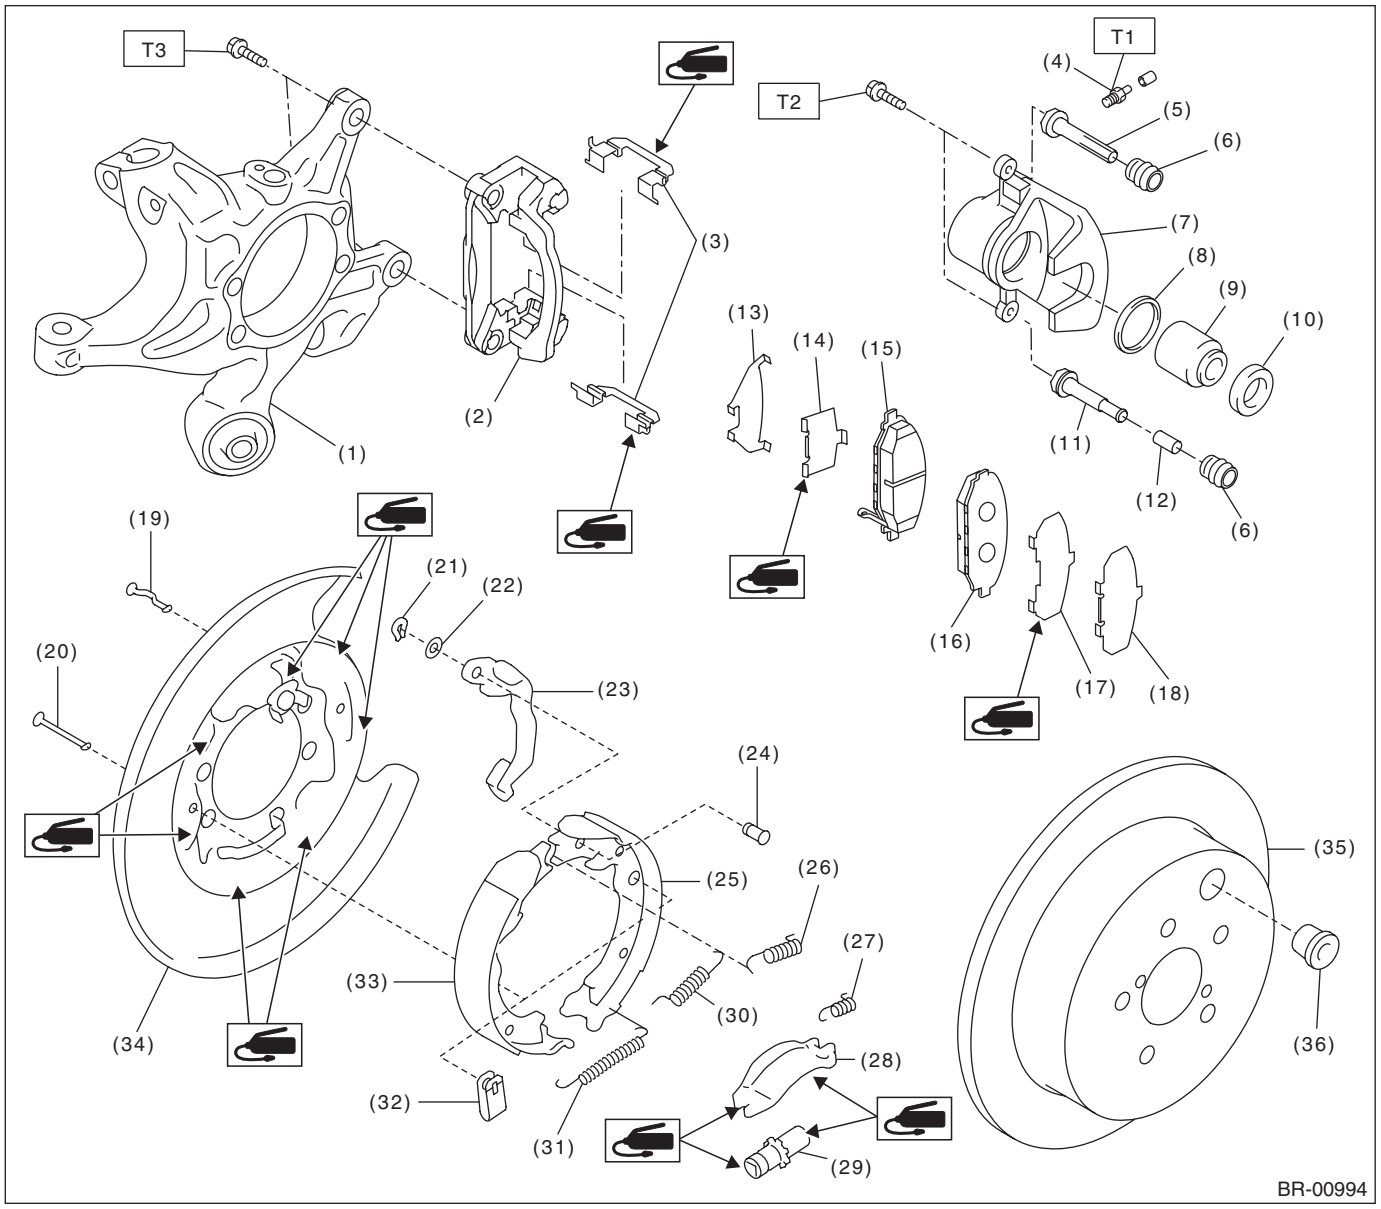
***Tightening torque: N·m (kgf-m, ft-lb)***

***T1: 8 (0.82, 5.9)***

***T2: 27 (2.75, 19.9)***

***T3: 80 (8.16, 59.0)***

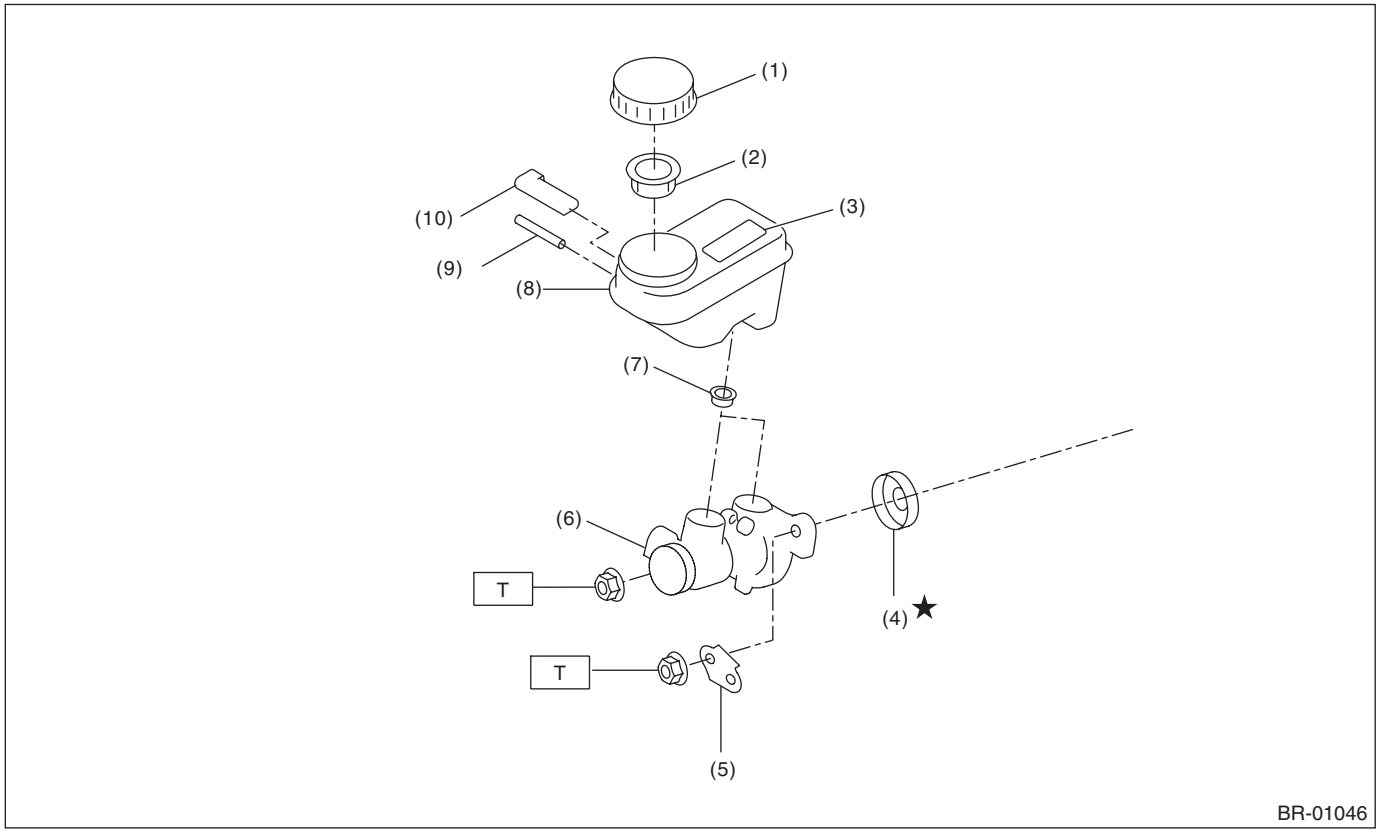
## 2. REAR DISC BRAKE



(1) Housing ASSY - rear axle
(2) Support - rear disc brake
(3) Pad clip - rear brake
(4) Bleeder - screw
(5) Guide pin - front brake (black)
(6) Pin boot
(7) Caliper body
(8) Piston seal
(9) Piston - disc brake
(10) Piston boot
(11) Lock pin - rear brake (silver)
(12) Lock pin - sleeve
(13) Shim - disc brake rear outer
(14) Shim - disc brake rear inner
(15) Pad - disc brake rear inner
(16) Pad - disc brake rear outer
(17) Shim - disc brake rear inner
(18) Shim - disc brake rear outer
(19) Pin - secondary shoe hold-down
(20) Pin - primary shoe hold-down
(21) Retainer - rear brake
(22) Spring washer - rear brake
(23) Parking lever - rear
(24) Pin - parking lever
(25) Parking brake shoe (secondary)
(26) Spring - secondary shoe return
(27) Spring - strut
(28) Strut - brake
(29) Adjuster ASSY - rear brake
(30) Spring - primary shoe return
(31) Spring - adjuster
(32) Cup - shoe hold-down
(33) Parking brake shoe (primary)
(34) Back plate - rear brake
(35) Disc rotor (solid type)
(36) Adjusting hole cover

***Tightening torque: N·m (kgf-m, ft-lb)***
***T1: 8 (0.82, 5.9)***
***T2: 27 (2.75, 19.9)***
***T3: 66 (6.73, 48.7)***

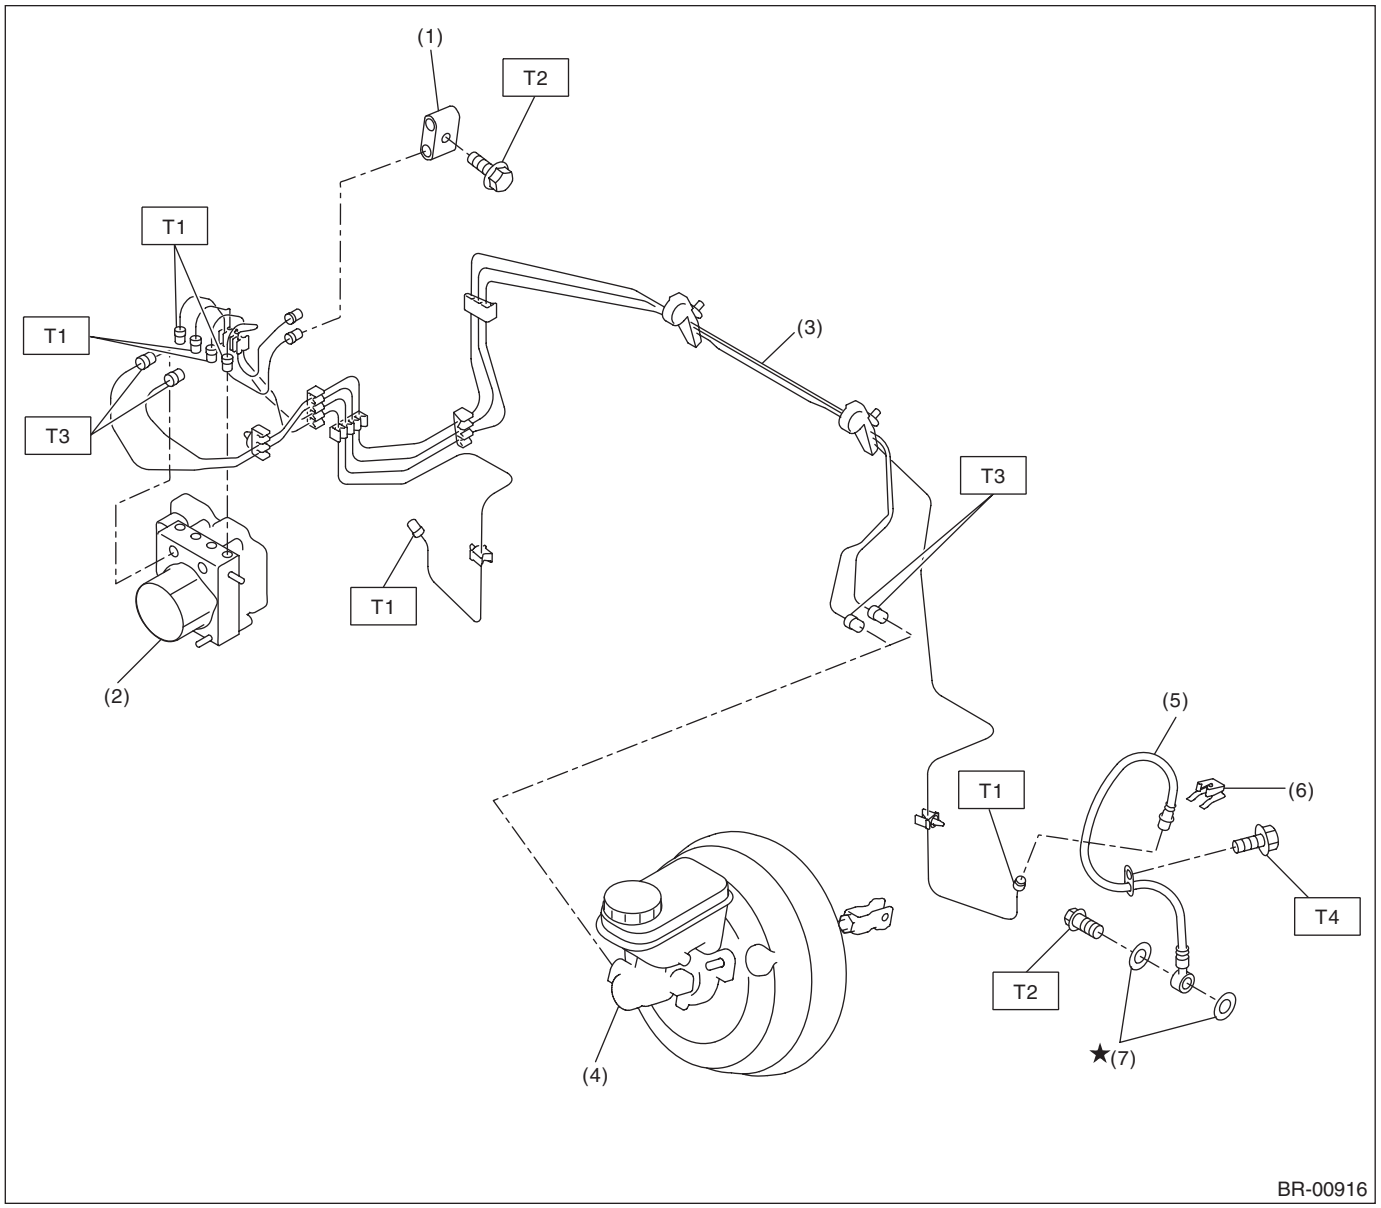
## 3. MASTER CYLINDER



| | | | |
|---|---|---|---|
| (1) | Cap - reservoir tank | (6) | Cylinder body ASSY |
| (2) | Filter - master cylinder | (7) | Seal |
| (3) | Caution label (model with caution label) | (8) | Reservoir tank |
| (4) | Seal sub ASSY | (9) | Pin |
| (5) | Bracket - master cylinder | (10) | Level - indicator |

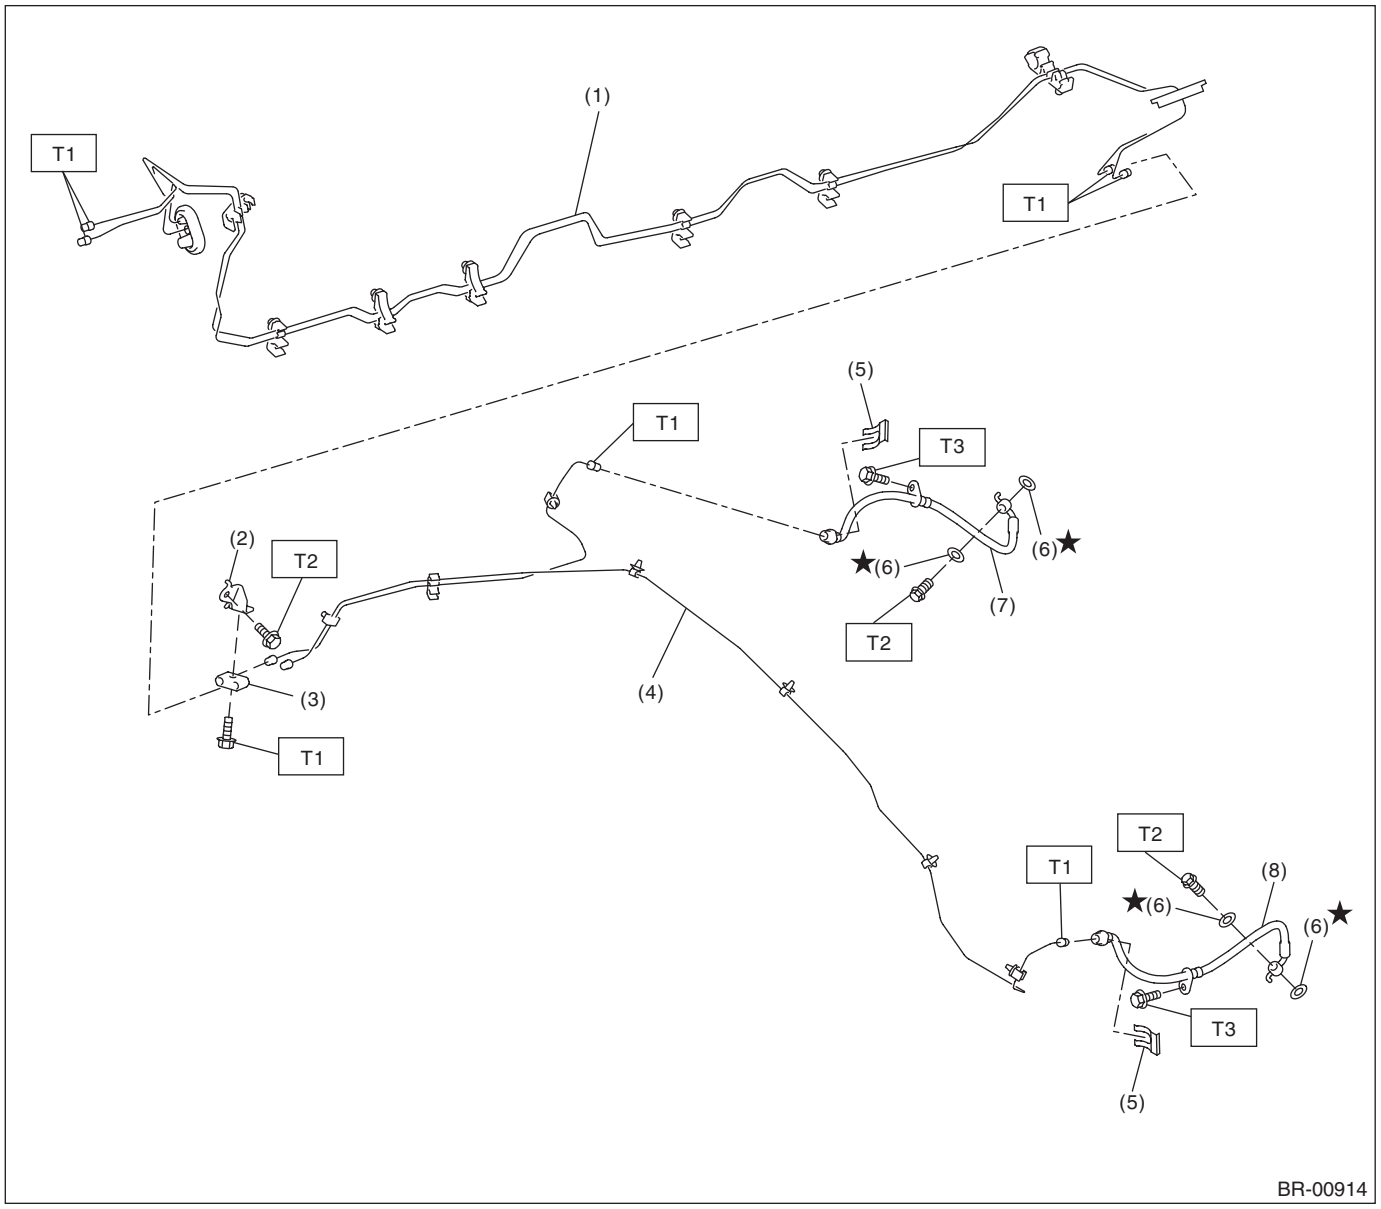
***Tightening torque: N·m (kgf-m, ft-lb)***
***T: 13 (1.33, 9.6)***

## 4. FRONT BRAKE PIPES AND HOSES



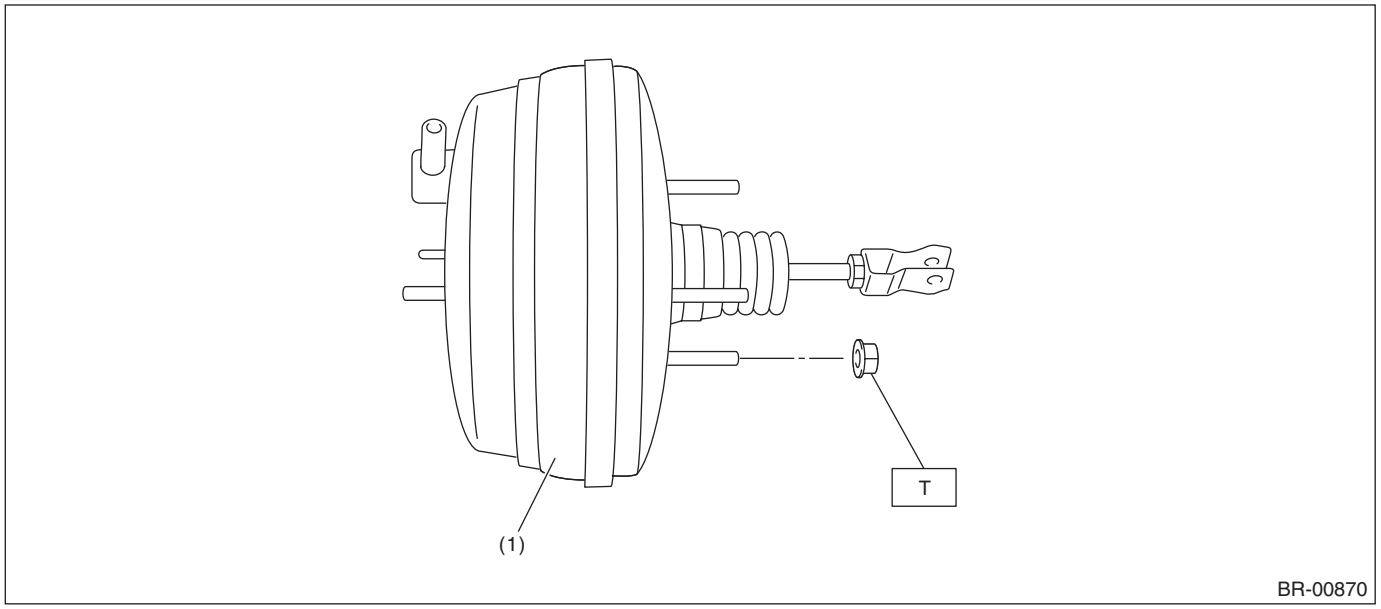
| | | | | |
|---|---|---|---|---|
| (1) | Connector - two-way | (5) | Front brake hose RH/LH | ***Tightening torque: N·m (kgf-m, ft-lb)*** |
| (2) | VDC control module and hydraulic control unit (VDCCM&H/U) | (6) | Clamp | ***T1: 15 (1.53, 11.1)*** |
| (3) | Front brake pipe ASSY | (7) | Gasket | ***T2: 18 (1.84, 13.3)*** |
| (4) | Master cylinder ASSY | | | ***T3: 19 ( 1.94, 14.0)*** |
| | | | | ***T4: 33 (3.36, 24.3)*** |

## 5. CENTER AND REAR BRAKE PIPES AND HOSES



| | | | | |
|---|---|---|---|---|
| (1) | Center brake pipe ASSY | (5) | Clamp | ***Tightening torque: N·m (kgf-m, ft-lb)*** |
| (2) | Bracket | (6) | Gasket | ***T1: 15 (1.53, 11.1)*** |
| (3) | Connector | (7) | Rear brake hose RH | ***T2: 18 (1.84, 13.3)*** |
| (4) | Rear brake pipe ASSY | (8) | Rear brake hose LH | ***T3: 33 (3.36, 24.3)*** |

## 6. BRAKE BOOSTER

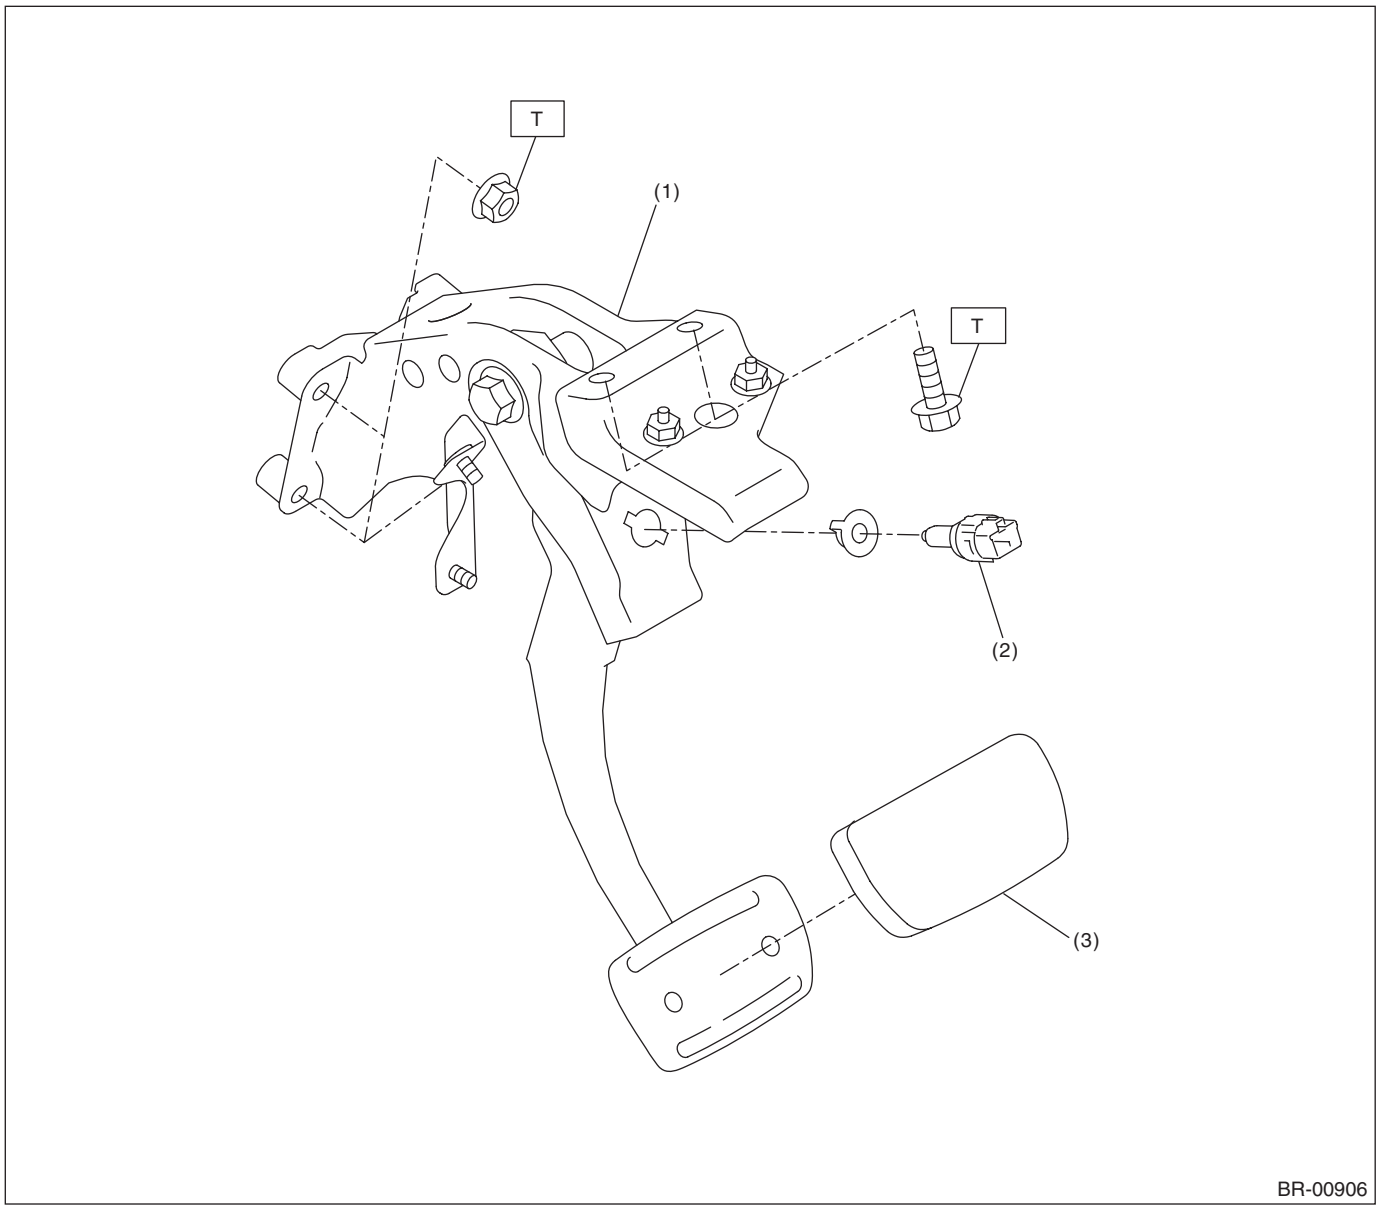


(1) Vacuum booster ASSY

***Tightening torque: N·m (kgf-m, ft-lb)***
***T: 18 (1.84, 13.3)***

## 7. BRAKE PEDAL

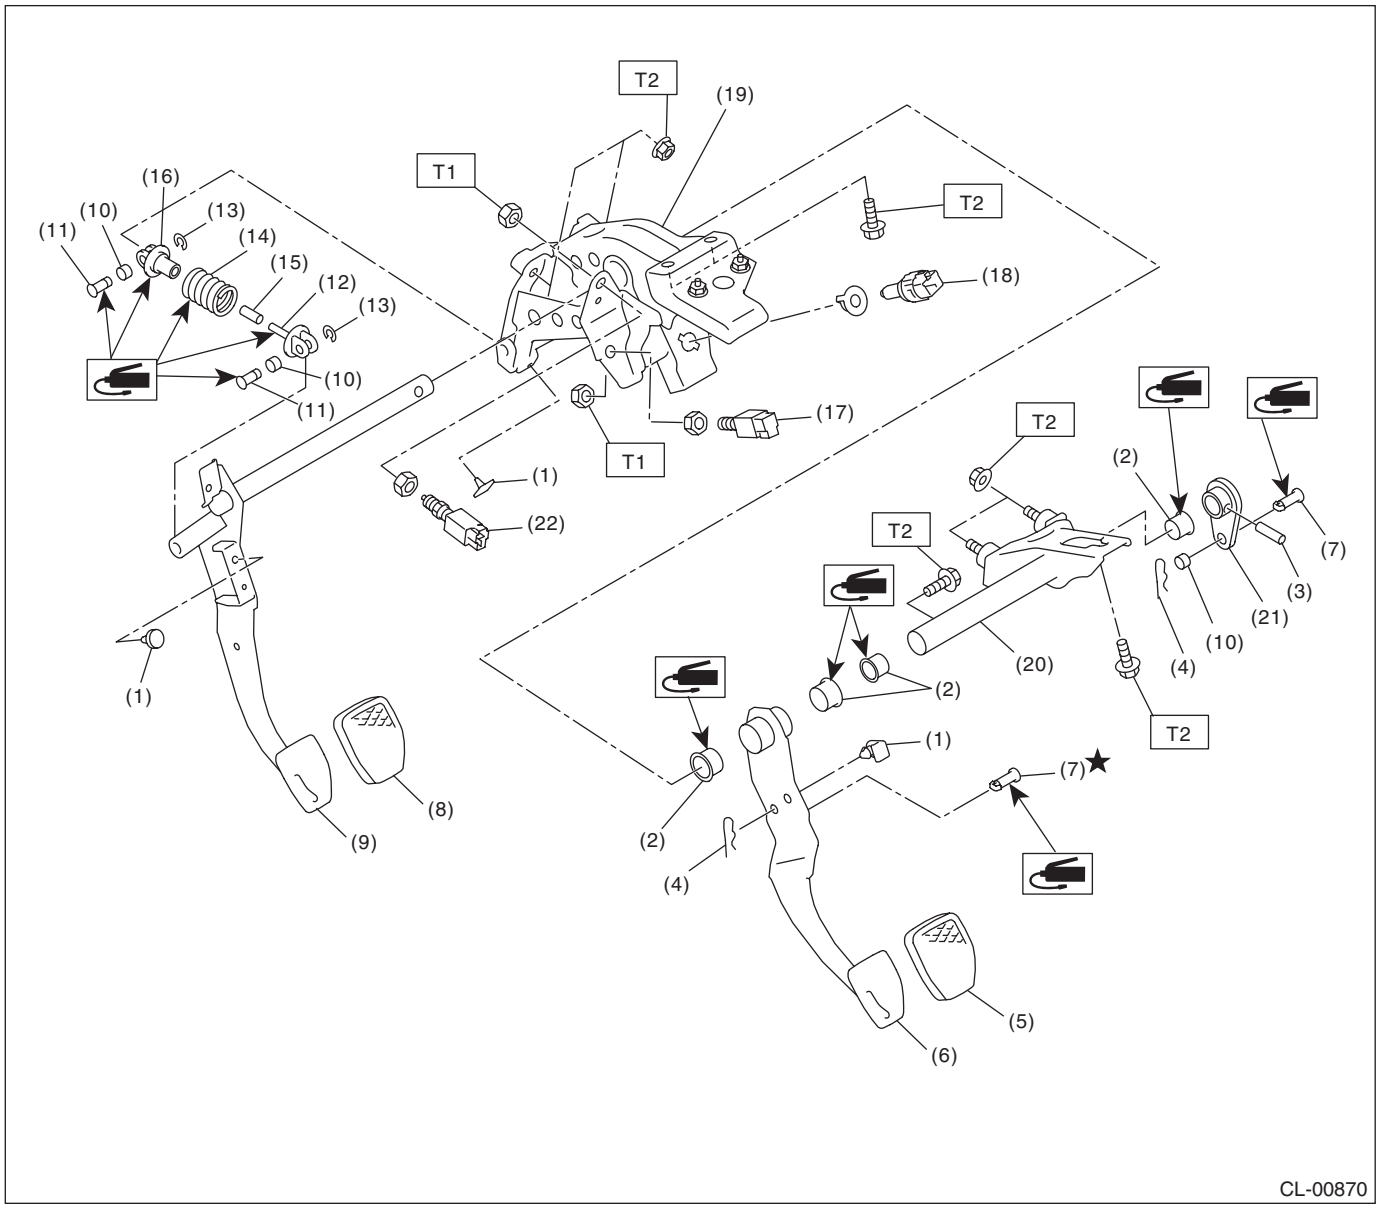
- AT model



(1) Brake pedal ASSY
(2) Switch - stop light
(3) Pad - brake pedal

***Tightening torque: N·m (kgf-m, ft-lb)***
***T: 18 (1.84, 13.3)***

- MT model



(1) Stopper
(2) Bushing
(3) Spring pin
(4) Snap pin
(5) Pad - brake pedal
(6) Brake pedal
(7) Clevis pin
(8) Pad - clutch pedal
(9) Clutch pedal
(10) Bushing C
(11) Clutch clevis pin
(12) Assist rod A
(13) Clip
(14) Assist spring
(15) Assist bushing
(16) Assist rod B
(17) Clutch switch
(18) Switch - stop light
(19) Pedal bracket
(20) Clutch master cylinder bracket
(21) Lever
(22) Clutch start switch

***Tightening torque: N·m (kgf-m, ft-lb)***
***T1: 8 (0.82, 5.9)***
***T2: 18 (1.84, 13.3)***

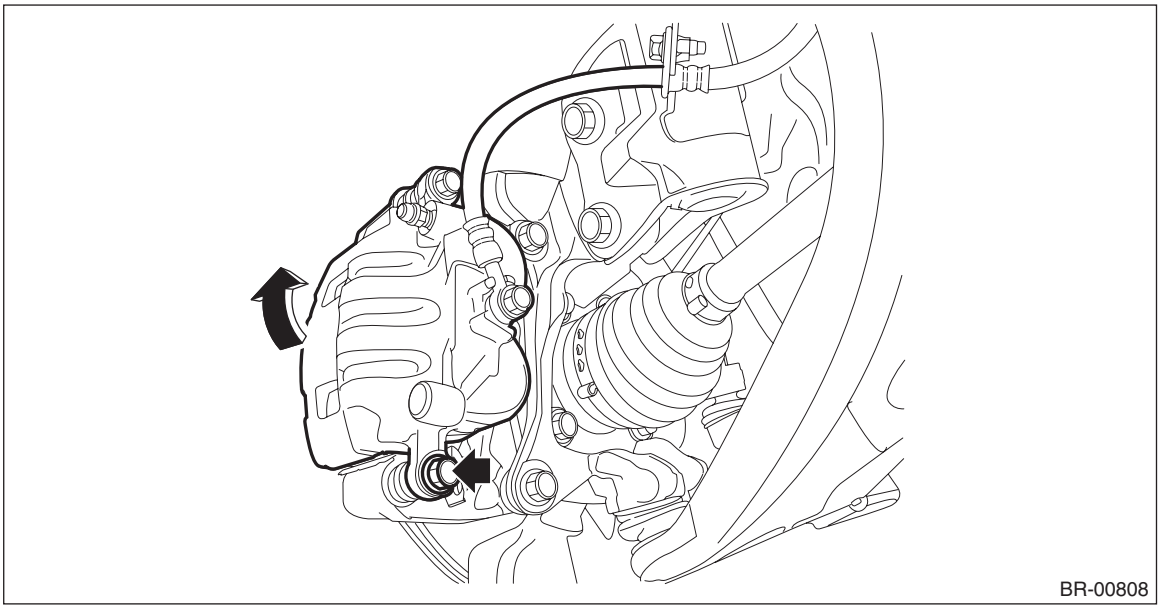
## C: CAUTION

- Wear appropriate work clothing, including a helmet, protective goggles and protective shoes when performing any work.
- Before removal, installation or disassembly, be sure to clarify the failure. Avoid unnecessary removal, installation, disassembly and replacement.
- Use SUBARU genuine grease etc. or equivalent. Do not mix grease etc. of different grades or manufacturers.
- Before securing a part on a vise, place cushioning material such as wood blocks, aluminum plate, or cloth between the part and the vise.
- Be sure to tighten fasteners including bolts and nuts to the specified torque.
- Place shop jacks or rigid racks at the specified points.

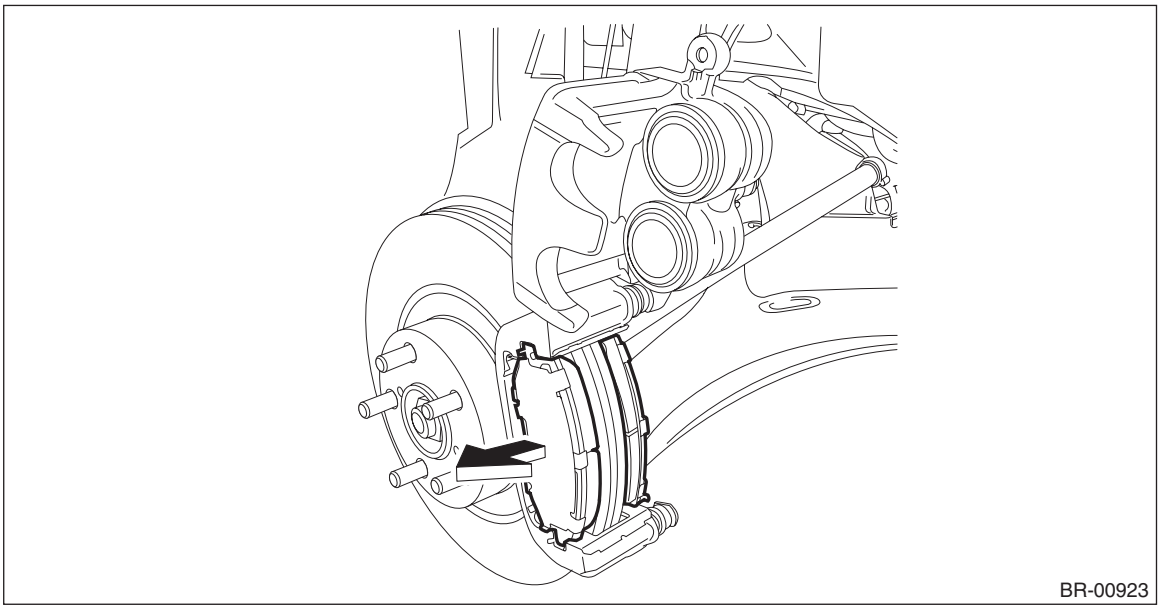
# 2. Front Brake Pad

## A: REMOVAL

1) Lift up the vehicle, and then remove the front wheels.
2) Remove the front brake pad.
   (1) Remove the caliper bolt on the lower side.
   (2) Raise the caliper body assembly and support it.



NOTE:
Do not disconnect the brake hose from the caliper body assembly.
   (3) Remove the brake pad from support - front disc brake.

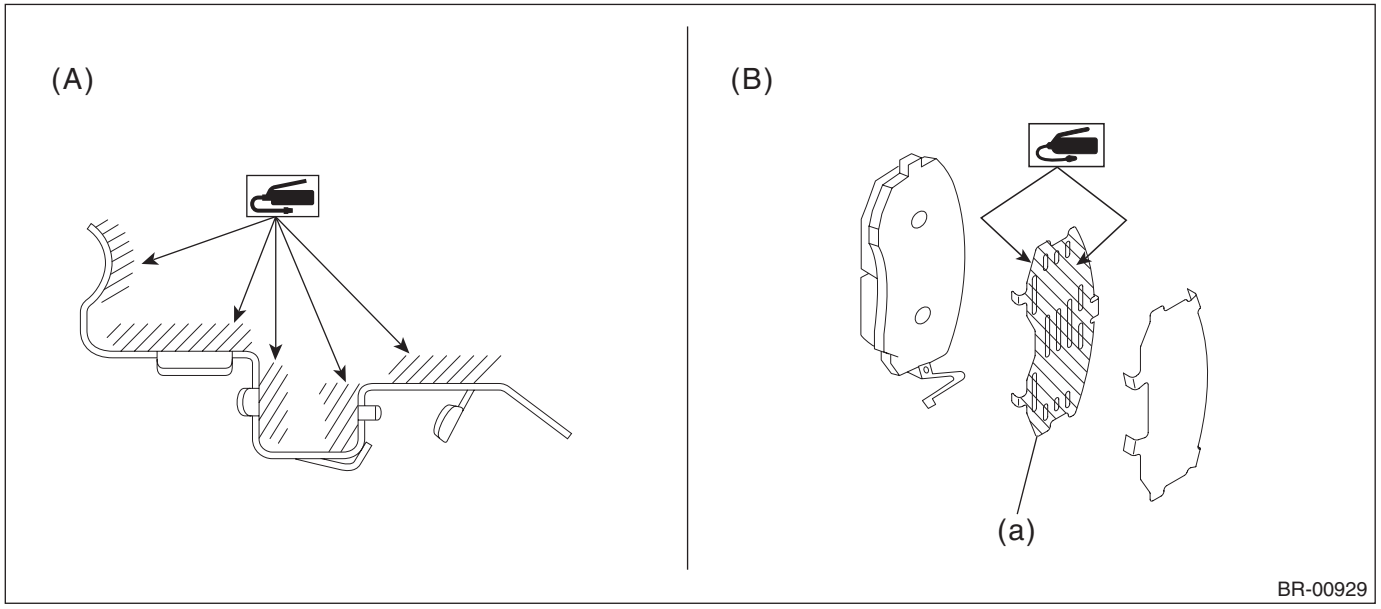


## B: INSTALLATION

NOTE:
Before installation, remove mud and foreign matter from the caliper body assembly and support - front disc brake.
1) Check the brake pad. <Ref. to BR-17, INSPECTION, Front Brake Pad.>
2) Apply a thin coat of grease to the pad clip. (A)

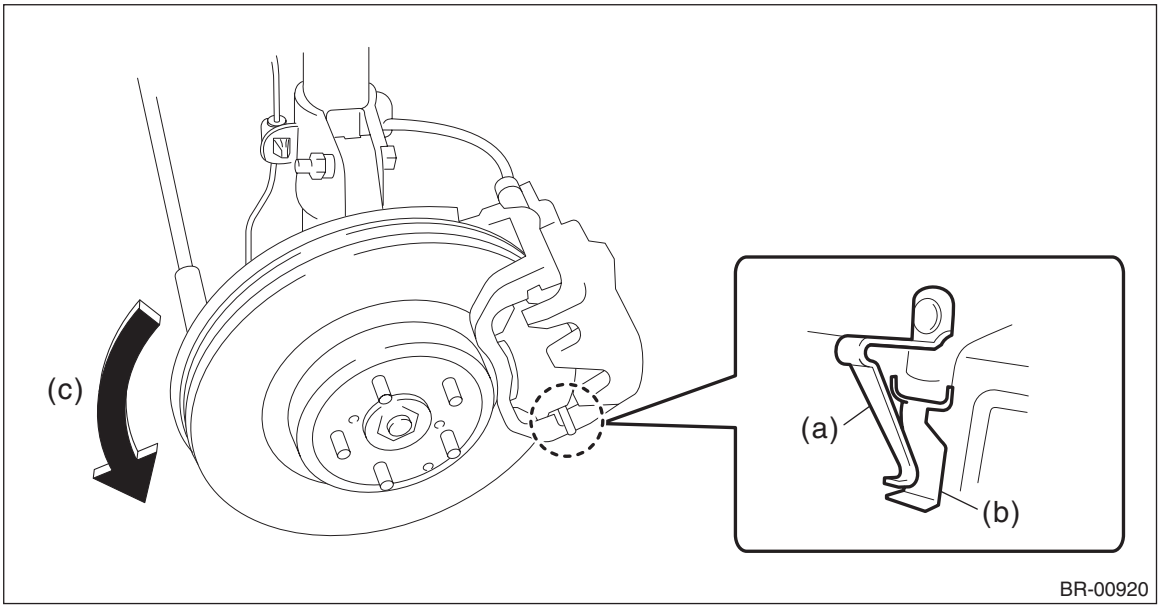
***Grease:***
***Molykote M7439 (Part No. 003602001) or an item contained in the pad kit***
3) Apply a thin coat of grease to the pad and both sides of the shim - disc brake front inner (a). (B)

***Grease:***
***Molykote AS880N (Part No. K0777YA010) or an item contained in the pad kit***



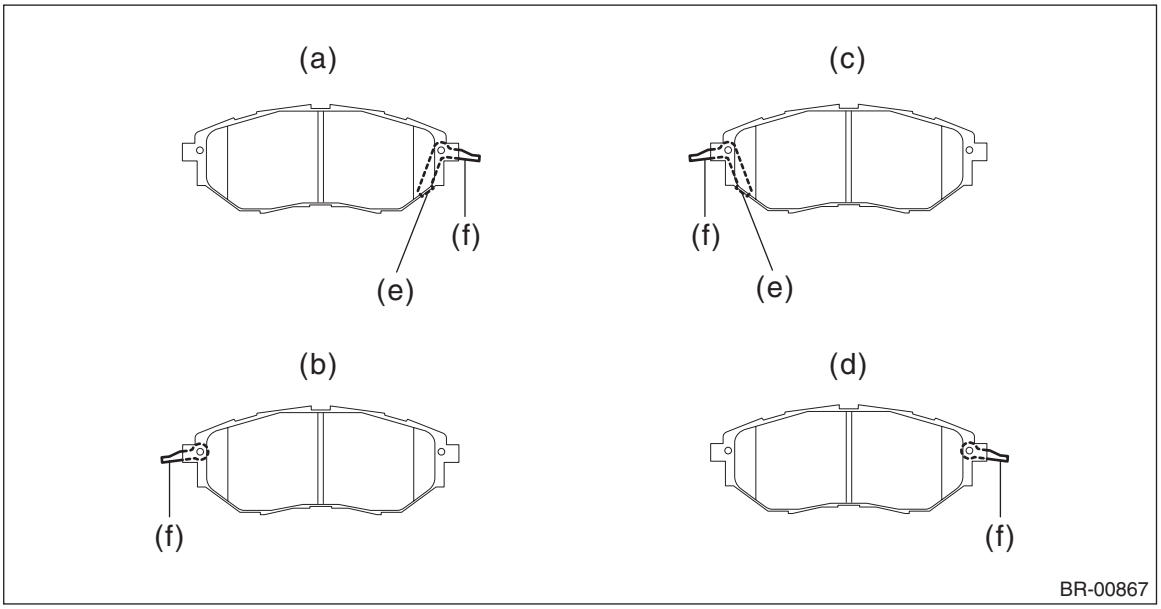
4) Install the brake pad to the support - front disc brake.

**CAUTION:**
**• Be sure to install so that the pad return spring faces the input side of the direction of brake rotor rotation, as shown in the figure.**
**• Correctly install the pad return spring to the supporting surface of the pad clip as shown in the figure.**
**• If the pad return spring is deformed or damaged, replace the brake pad with a new part.**



(a) Pad return spring
(b) Supporting surface of pad clip
(c) Direction of brake rotor rotation

NOTE:
Install the brake pad indicator in proper direction.



(a) LH — IN
(b) LH — OUT
(c) RH — IN
(d) RH — OUT
(e) Pad indicator
(f) Pad return spring

5) Install the caliper body assembly to the support - front disc brake.

***Tightening torque:***
***Caliper bolt: 27 N·m (2.75 kgf-m, 19.9 ft-lb)***

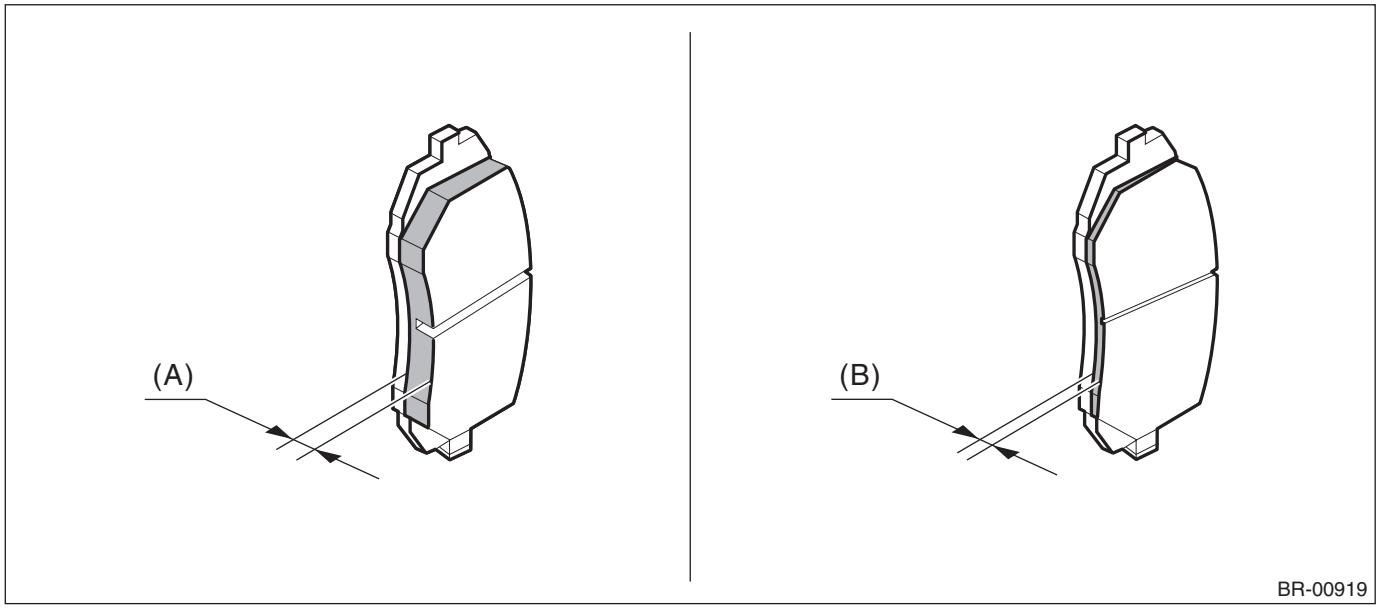
6) Install the front wheels.

***Tightening torque:***
***120 N·m (12.24 kgf-m, 88.5 ft-lb)***

## C: INSPECTION

1) Check the pad thickness (A).

NOTE:
- Always replace the pads of both wheels and both sides as a set.
- Replace pad clips if they are twisted or worn.
- Replace the pad if there is oil or grease on it.



| | Standard (A) | Wear limit (B) |
|---|---|---|
| Pad thickness | 11 mm (0.43 in) | 1.5 mm (0.059 in) |

NOTE:
- Always replace the pads of both wheels and both sides as a set.
- Replace pad clips if they are twisted or worn.
- Wear indicators are installed on the inner and outer disc brake pads.

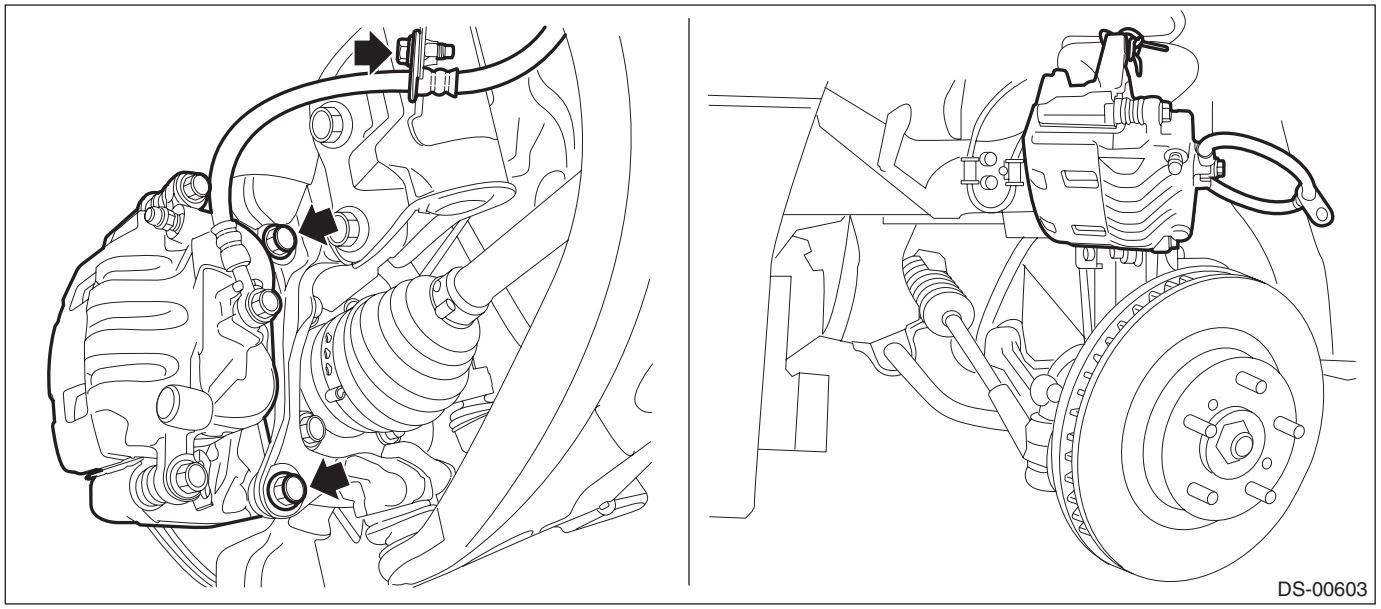
If the pad is worn to the limit, the end of wear indicator contacts disc rotor, and a squeaking sound is heard as the wheel rotates. If the sound is heard, replace the pad.
- Replace the pad if there is oil or grease on it.

2) If the wear limit is exceeded in the inspection, replace the brake pad.

# 3. Front Disc Rotor

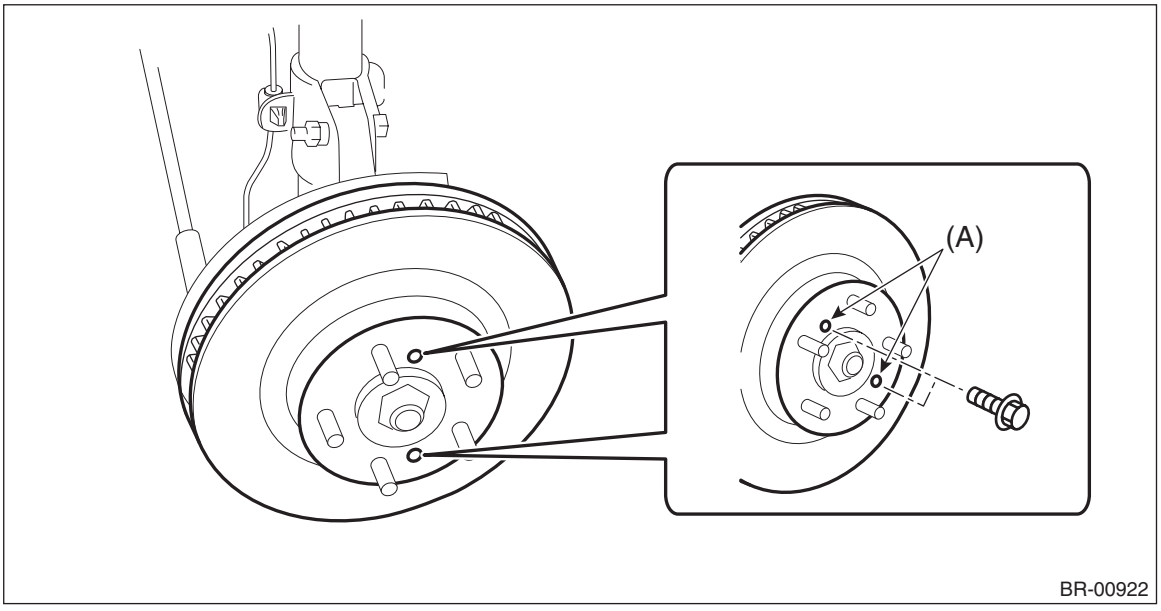
## A: REMOVAL

1) Lift up the vehicle, and then remove the front wheels.
2) Remove the caliper body assembly from the housing assembly - front axle.
   (1) Remove the bolt from the brake hose bracket.
   (2) Remove the mounting bolt, and remove the caliper body assembly.
   (3) Prepare wiring harnesses etc. to be discarded, and suspend the caliper body assembly from the strut assembly.



3) Remove the front disc rotor.

NOTE:
When the disc rotor is difficult to be removed from the hub unit COMPL - front axle, screw in 8 mm (0.31 in) bolt to the threaded part of the disc rotor (A), and remove the disc rotor.



## B: INSTALLATION

NOTE:
Before installation, remove mud and foreign matter from the caliper body assembly.
1) Before installation, check the front disc rotor. <Ref. to BR-19, INSPECTION, Front Disc Rotor.>
2) Install each part in the reverse order of removal.

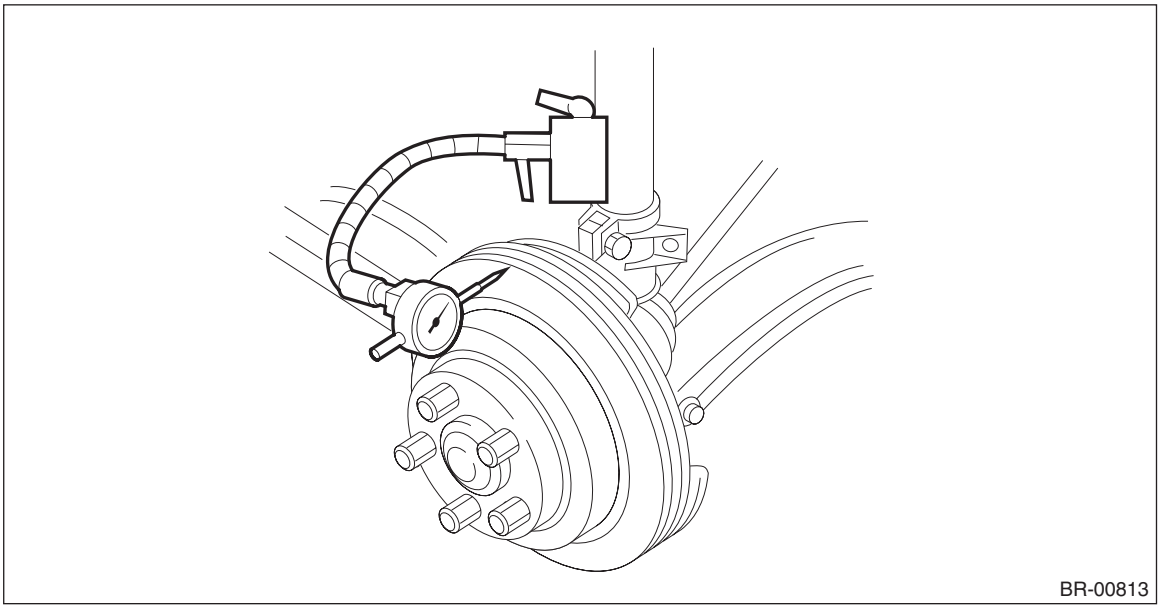
***Tightening torque:***
***Brake hose bracket: 33 N·m (3.36 kgf-m, 24.3 ft-lb)***
***Mounting bolt: 80 N·m (8.16 kgf-m, 59.0 ft-lb)***
***Front wheel: 120 N·m (12.24 kgf-m, 88.5 ft-lb)***

## C: INSPECTION

### 1. DISC ROTOR RUNOUT CHECK

1) Check the hub unit COMPL - front axle for free play and runout before the inspection of disc rotor runout limit. <Ref. to DS-34, INSPECTION, Front Hub Unit Bearing.>
2) Tighten the wheel nuts to secure disc rotor.
3) Set a dial gauge 10 mm (0.39 in) inward from the disc rotor outer circumference, and check the disc rotor runout while rotating the disc rotor.

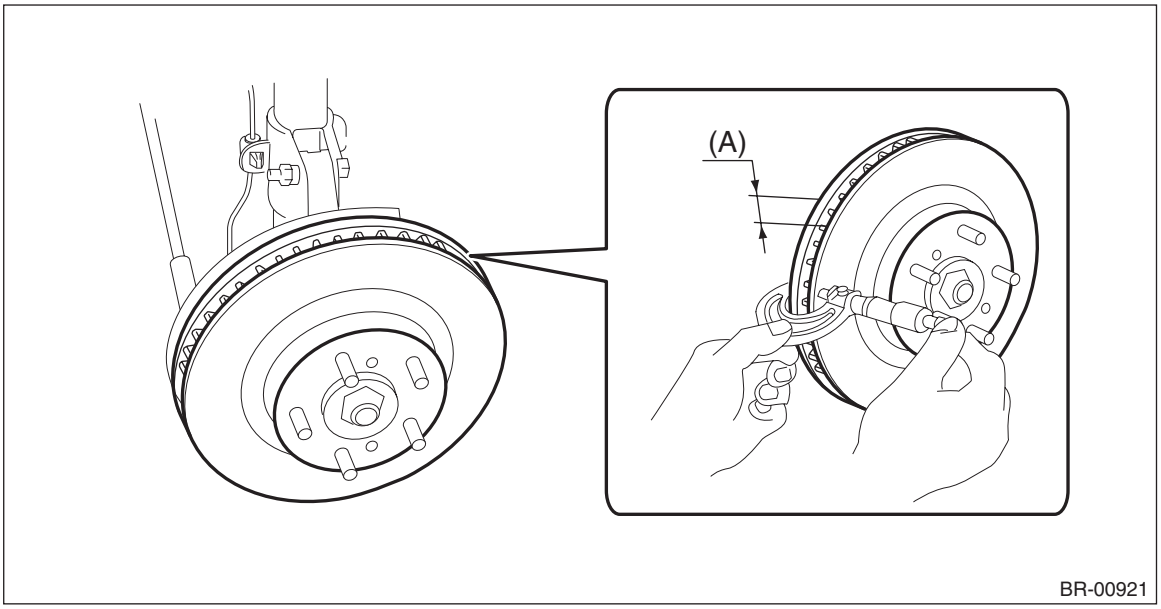
***Disc rotor runout limit: 0.05 mm (0.0020 in)***



4) If the runout limit is exceeded in the inspection, replace the disc rotor.

## 2. DISC ROTOR THICKNESS CHECK

1) Set a micrometer 10 mm (0.39 in) inward from the disc rotor outer perimeter, and then measure the disc rotor thickness (A).



| | Size | Standard | Wear limit | Disc rotor outer diameter |
|---|---|---|---|---|
| Disc rotor thickness (A) | 15-inch | 24 mm (0.94 in) | 22 mm (0.87 in) | 277 mm (10.91 in) |
| | 16-inch | | | 294 mm (11.57 in) |

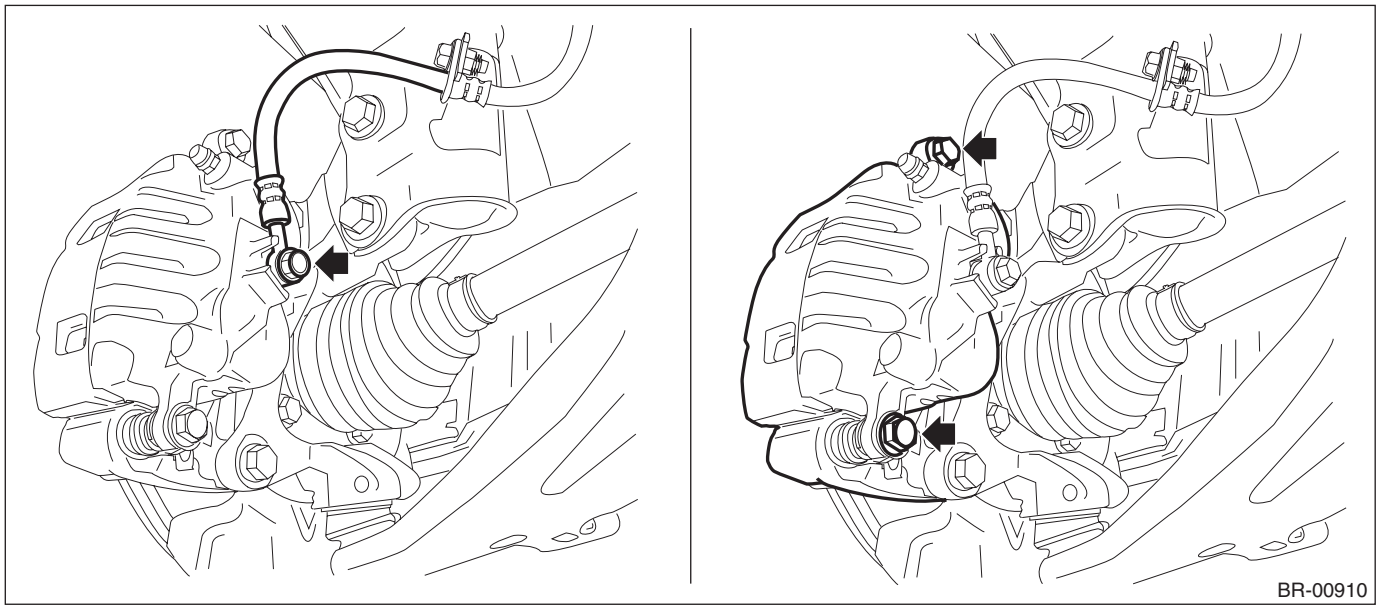
2) If the wear limit is exceeded in the inspection, replace the disc rotor.

# 4. Front Disc Brake Assembly

## A: REMOVAL

**CAUTION:**
**Do not allow brake fluid to come in contact with the painted surface of the vehicle body. If it does, wash off with water and wipe away completely.**

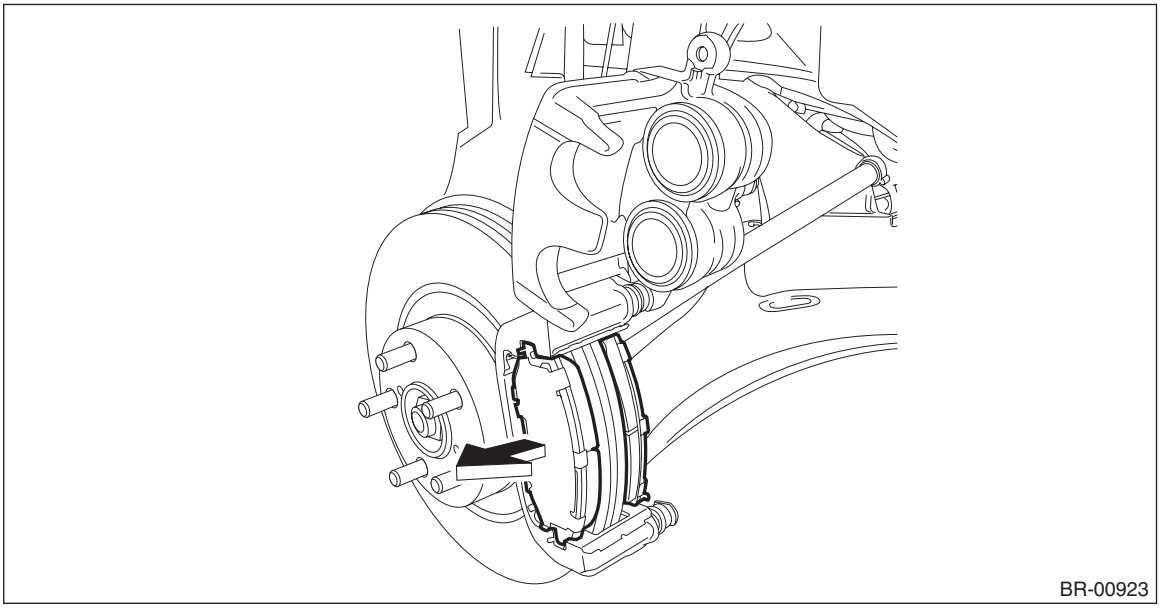
1) Lift up the vehicle, and then remove the front wheels.
2) Remove the caliper body assembly.
   (1) Remove the union bolt and caliper bolt, and remove the caliper body assembly from the support - front disc brake.



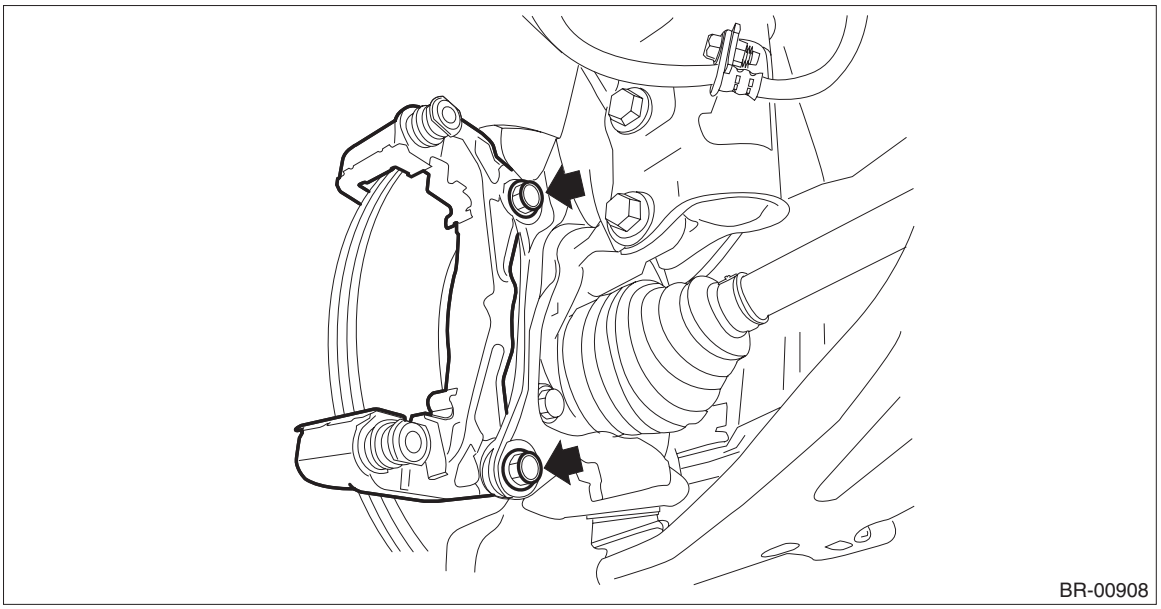
3) Remove the support - front disc brake.

NOTE:
Remove the support - front disc brake only when replacing the disc rotor or the support - front disc brake. It is not necessary to remove it when servicing the caliper body assembly.

   (1) Remove the brake pad from support - front disc brake.



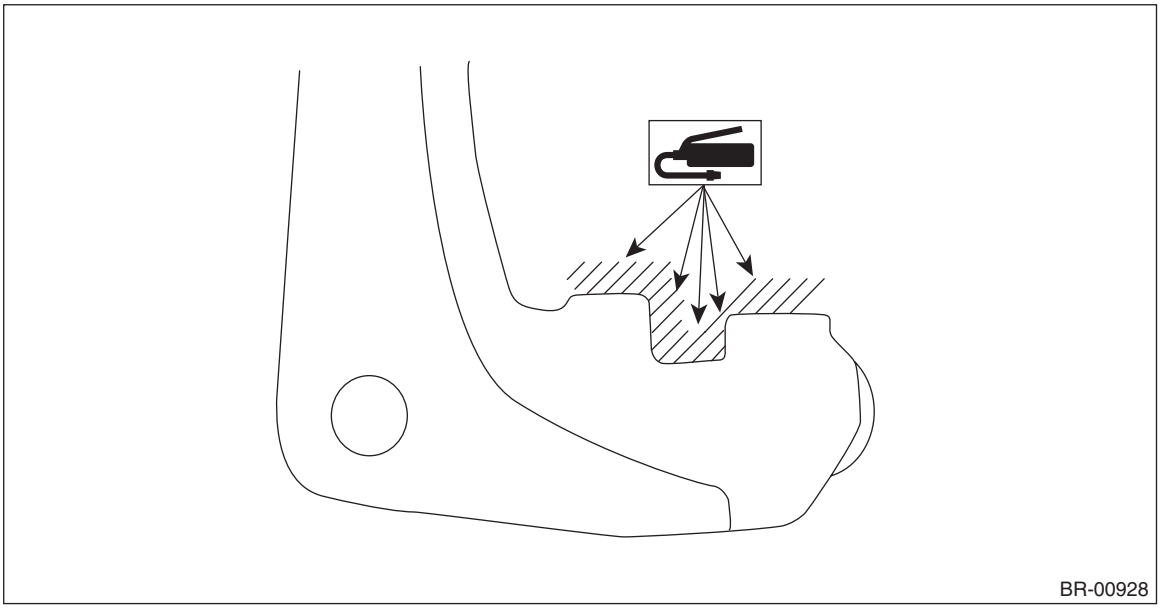
(2) Remove the mounting bolts, and then remove the support - front disc brake from the housing assembly - front axle.



## B: INSTALLATION

NOTE:
Before installation, remove mud and foreign matter from the caliper body assembly and support - front disc brake.
1) Check each part. <Ref. to BR-28, INSPECTION, Front Disc Brake Assembly.>
2) Apply a thin coat of grease to the support - front disc brake.

***Grease:***
***Molykote M7439 (Part No. 003602001)***



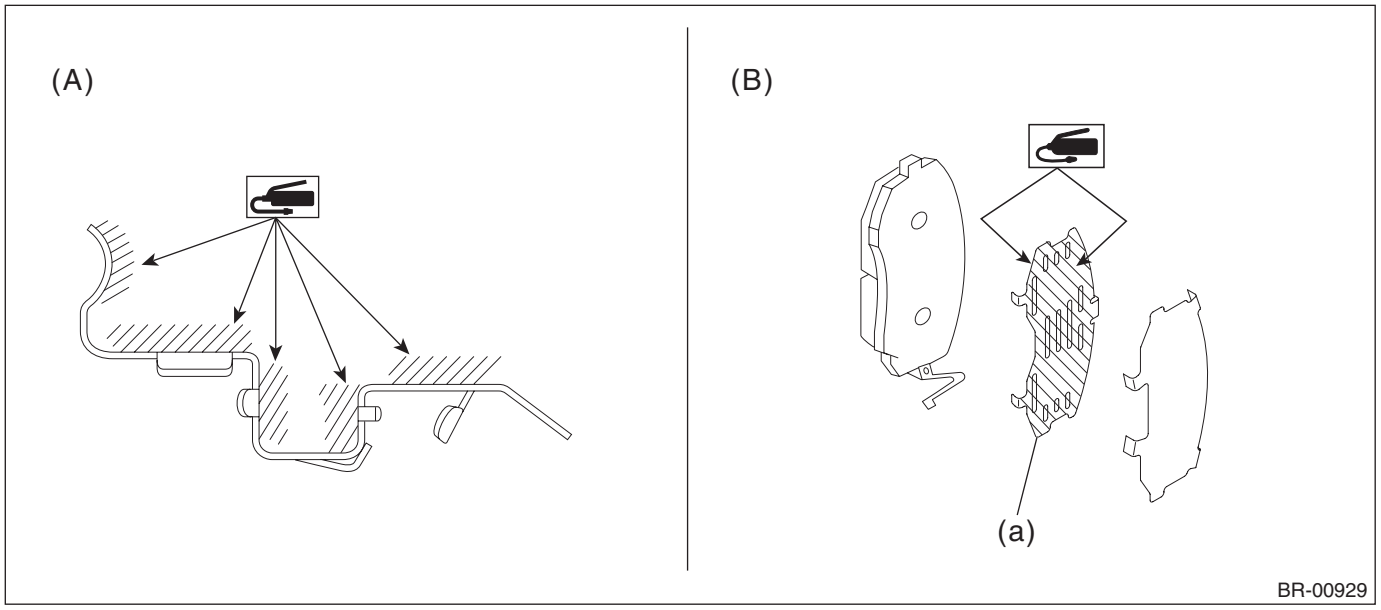
3) Install the support - front disc brake to the housing assembly - front axle.

***Tightening torque:***
***Mounting bolt: 80 N·m (8.16 kgf-m, 59.0 ft-lb)***
4) Apply a thin coat of grease to the pad clip. (A)

***Grease:***
***Molykote M7439 (Part No. 003602001) or an item contained in the pad kit***

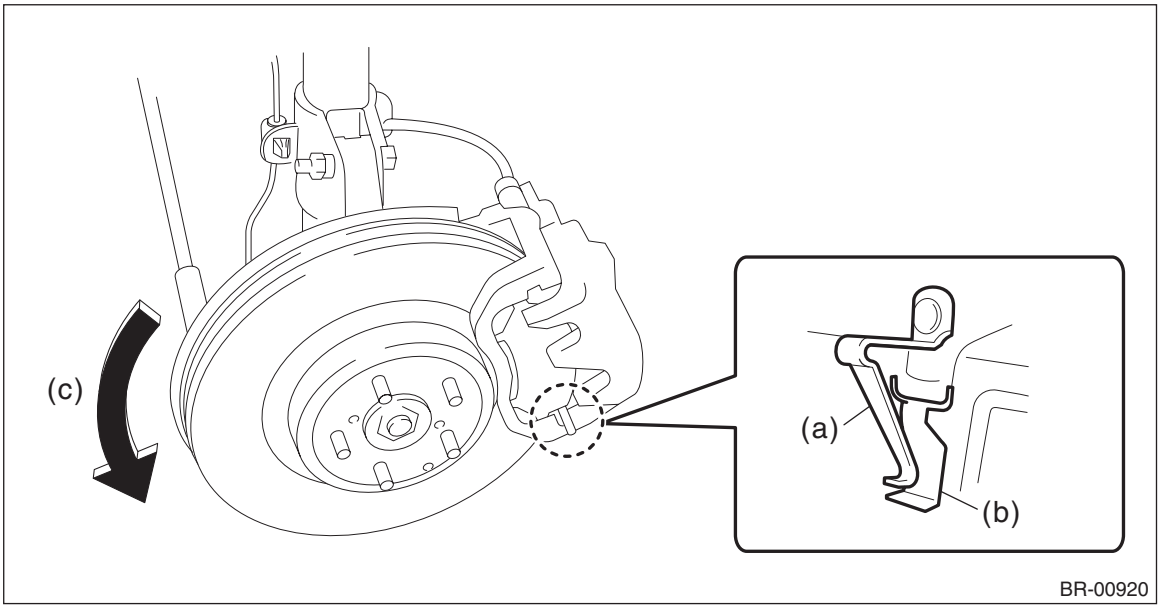
5) Apply a thin coat of grease to the pad and both sides of the shim - disc brake front inner (a). (B)

***Grease:***
***Molykote AS880N (Part No. K0777YA010) or an item contained in the pad kit***



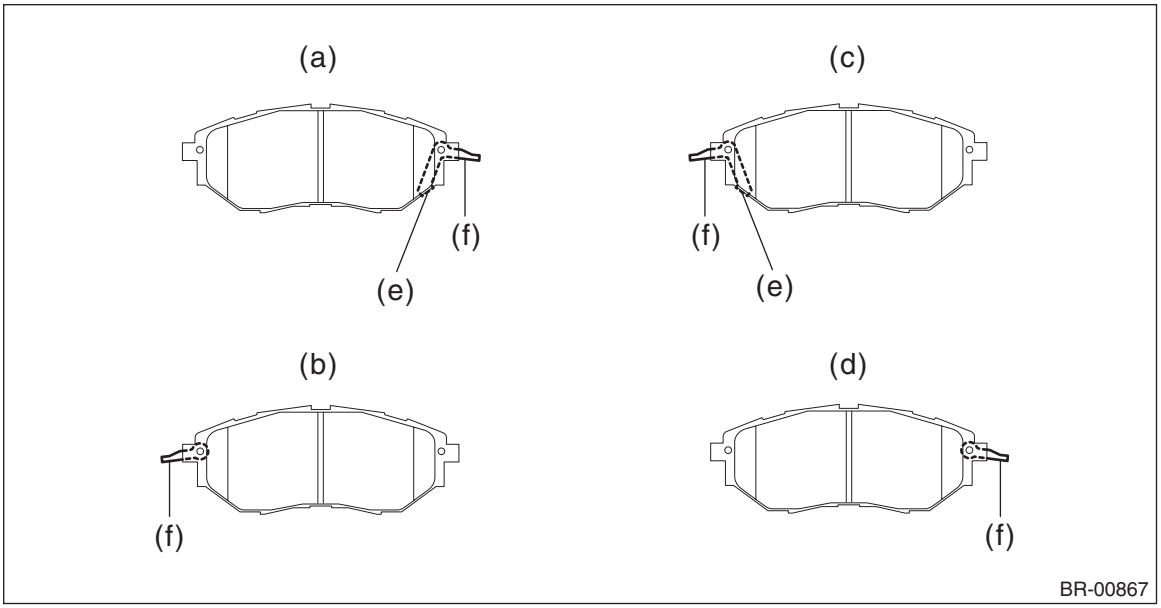
6) Install the brake pad to the support - front disc brake.

**CAUTION:**
**• Be sure to install so that the pad return spring faces the input side of the direction of brake rotor rotation, as shown in the figure.**
**• Correctly install the pad return spring to the supporting surface of the pad clip as shown in the figure.**
**• If the pad return spring is deformed or damaged, replace the brake pad with a new part.**



(a) Pad return spring (b) Supporting surface of pad clip (c) Direction of brake rotor rotation

NOTE:
Install the brake pad indicator in proper direction.



(a) LH — IN
(b) LH — OUT
(c) RH — IN
(d) RH — OUT
(e) Pad indicator
(f) Pad return spring

7) Install the caliper body assembly to the support - front disc brake.

***Tightening torque:***
***Caliper bolt: 27 N·m (2.75 kgf-m, 19.9 ft-lb)***

8) Connect the brake hose using a new brake hose gasket.

***Tightening torque:***
***Union bolt: 18 N·m (1.84 kgf-m, 13.3 ft-lb)***

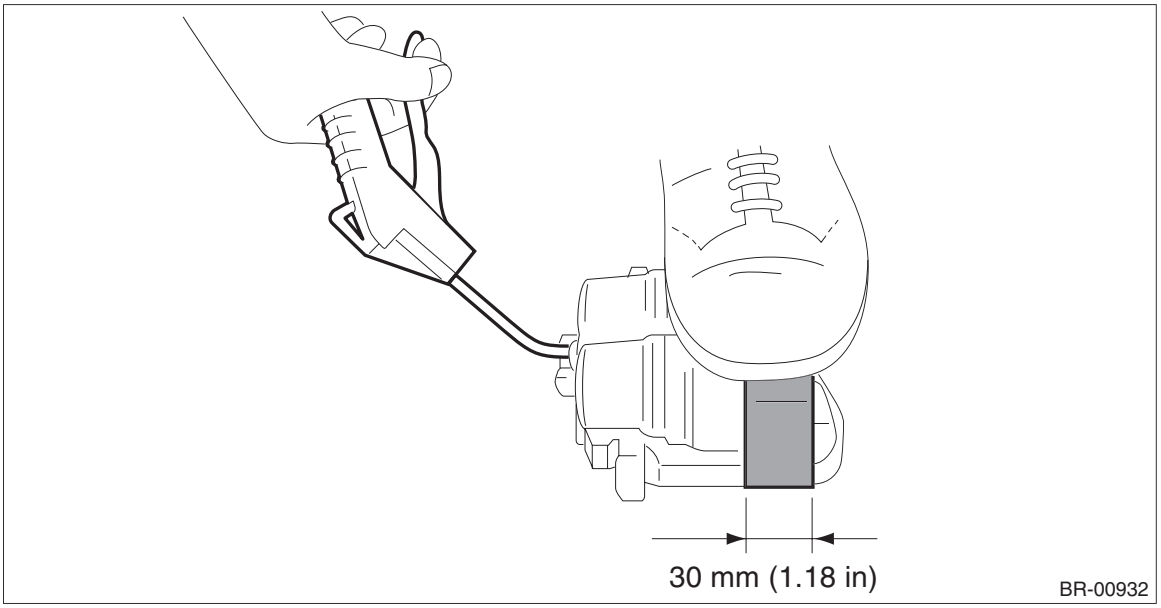
9) Bleed air from the brake system. <Ref. to BR-60, BRAKE LINE, PROCEDURE, Air Bleeding.>
10) Install the front wheels.

***Tightening torque:***
***120 N·m (12.24 kgf-m, 88.5 ft-lb)***

## C: DISASSEMBLY

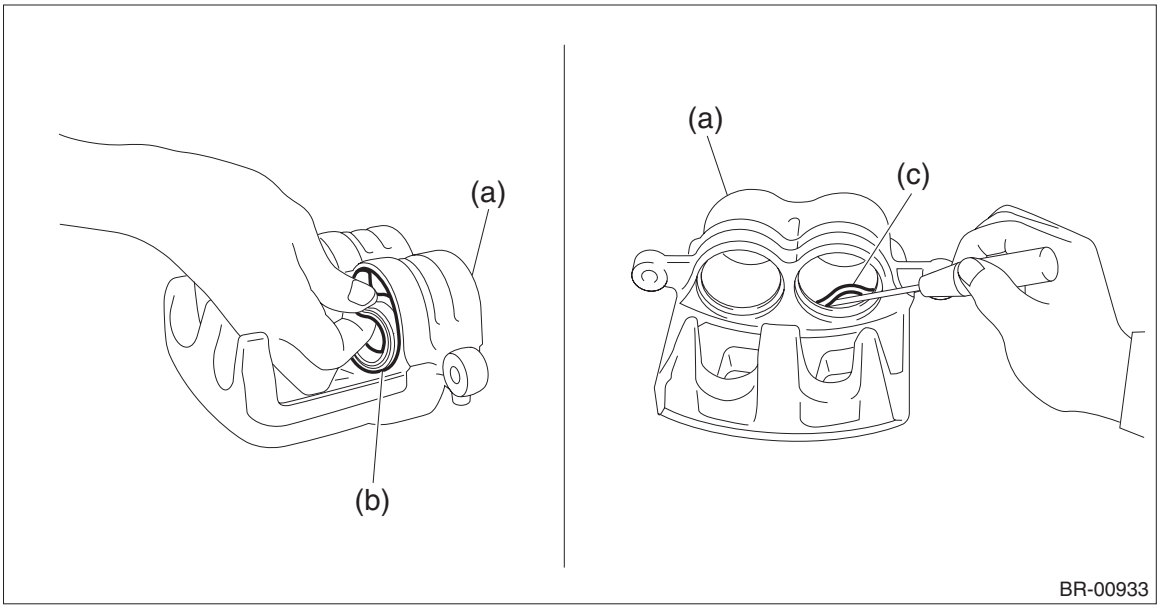
**CAUTION:**
**Be careful not to allow foreign matter to enter the brake hose connector.**

1) Remove mud and foreign matter from the caliper body.
2) Remove the piston - disc brake.
   (1) Place a wooden block in the caliper body as shown in the figure to prevent the piston - disc brake from jumping out and being damaged.
   (2) Using an air gun, gradually apply compressed air via the brake hose installation hole to push out the piston - disc brake.

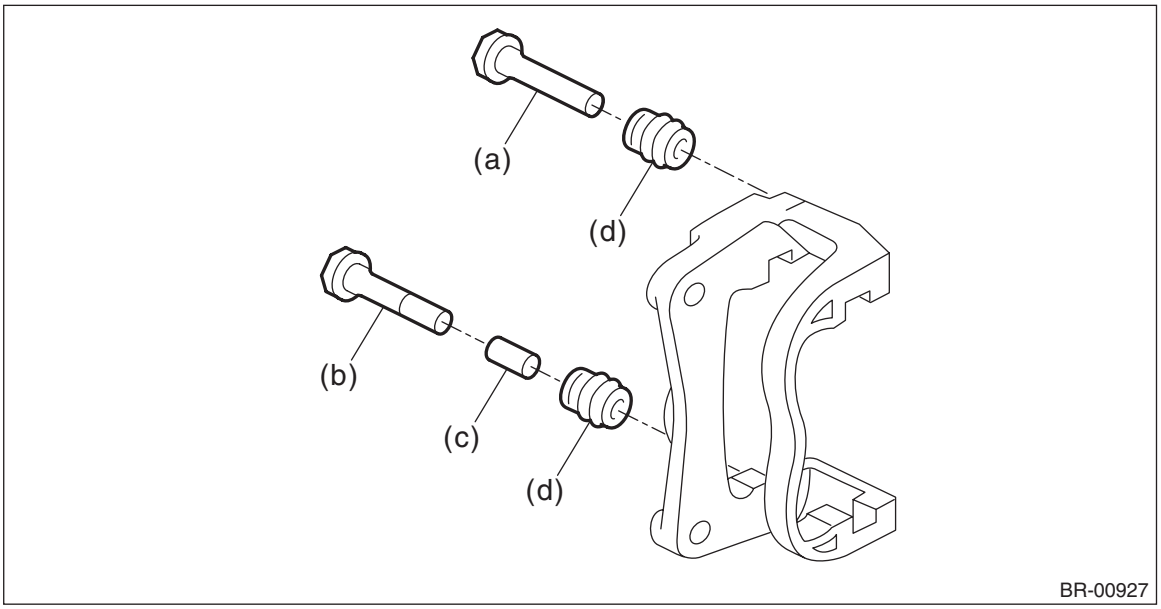


3) Remove the piston boot (b) and piston seal (c) from the caliper body cylinder (a).

**CAUTION:**
**Do not damage the cylinder and piston seal groove.**



4) Remove the guide pin - front brake, lock pin - front brake, lock pin - sleeve, and pin boot from the support - front disc brake.

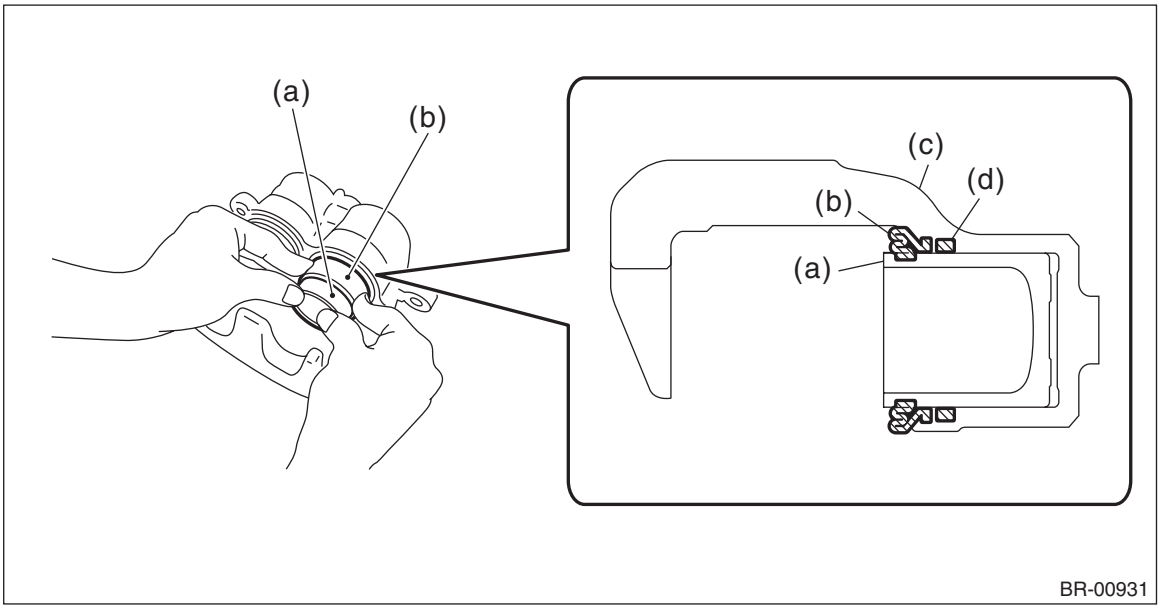


(a) Guide pin - front brake (black)
(b) Lock pin - front brake (silver)
(c) Lock pin - sleeve
(d) Pin boot

## D: ASSEMBLY

1) Before assembly, check each part. <Ref. to BR-28, INSPECTION, Front Disc Brake Assembly.>
2) Clean the inside of the caliper body cylinder using brake fluid.
3) Apply a coat of brake fluid to piston seal and install the piston seal to the caliper body cylinder groove.
4) Apply a coat of brake fluid to the inner surface of caliper body cylinder and the entire outer surface of the piston - disc brake.
5) Apply grease contained in the piston seal kit to the piston boot, and install it to the groove at the end of the cylinder.
6) Insert the piston - disc brake into the caliper body cylinder.
7) Position the piston boot in the grooves on the piston - disc brake and the caliper body cylinder.

**CAUTION:**
**Do not force the piston - disc brake into the caliper body cylinder.**

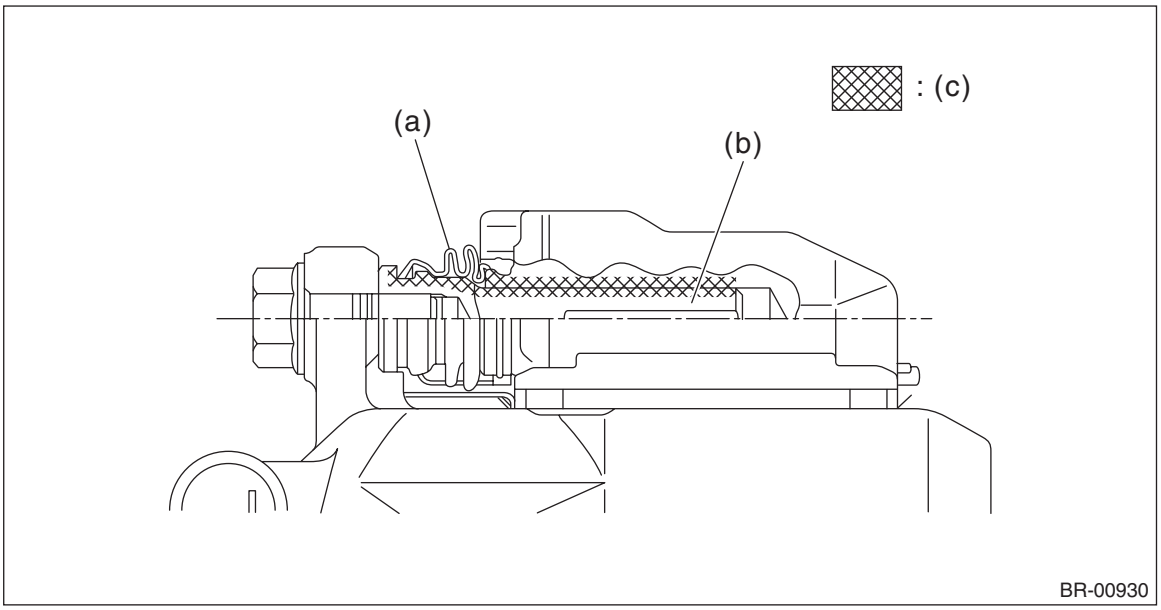


(a) Piston - disc brake
(b) Piston boot
(c) Caliper body assembly
(d) Piston seal

8) Apply grease contained in the piston seal kit to the lock pin - front brake, the outer surface of guide pin - front brake, the inner surface of support cylinder, and the grooves of pin boot.

9) Install the pin boot to the lock pin - front brake and guide pin - front brake, and insert them into the support cylinder.

**CAUTION:**
**Insert the lock pin - front brake and guide pin - front brake into specified position, and make sure that they slide and seat properly.**



(a) Pin boot
(b) Lock pin - front brake or guide pin - front brake
(c) Grease applied area

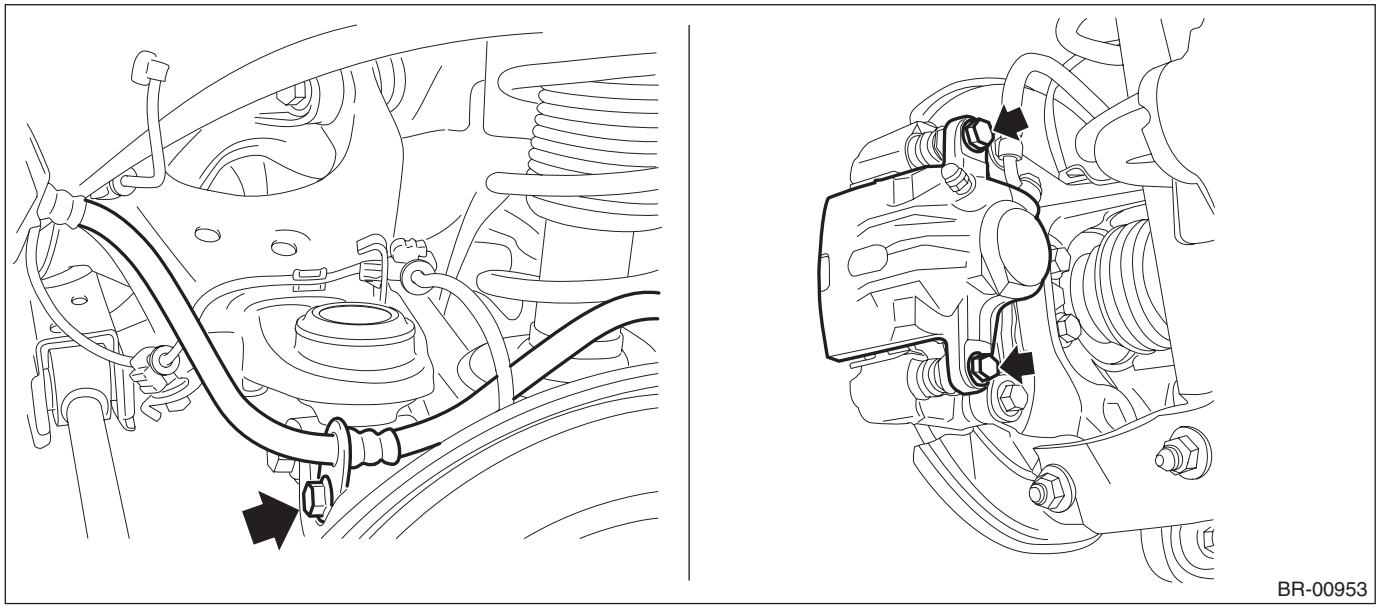
## E: INSPECTION

1) Check the caliper body cylinder and piston for uneven wear, damage or rust.
2) Check the rubber parts for damage or deterioration.
3) If faulty is found in the inspection, replace the relevant part.

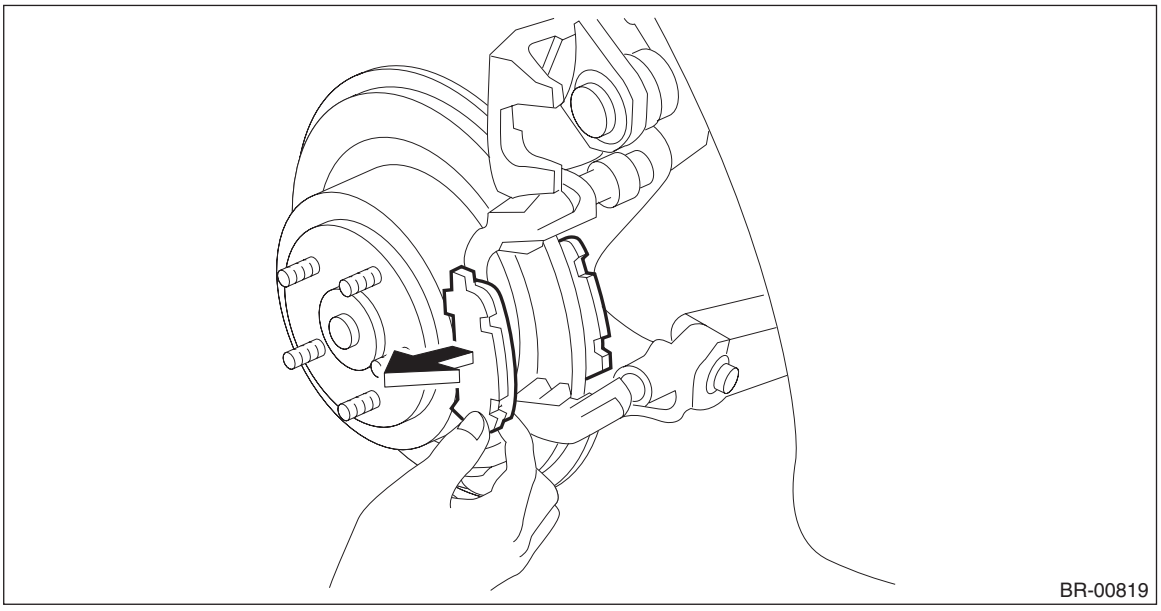
# 5. Rear Brake Pad

## A: REMOVAL

1) Lift up the vehicle, and then remove the rear wheels.
2) Remove the rear brake pad.
   (1) Remove the bolts and remove the brake hose bracket.
   (2) Remove the caliper bolt, and raise and hold the caliper body assembly.



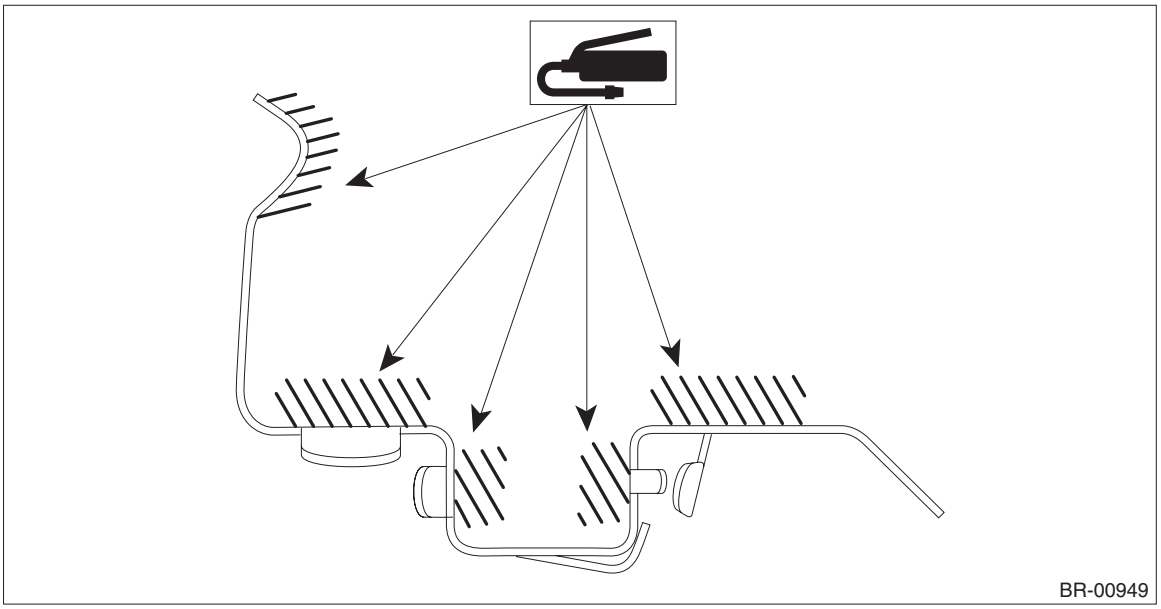
NOTE:
Do not disconnect the brake hose from the caliper body assembly.
   (3) Remove the brake pad from support - rear disc brake.



## B: INSTALLATION

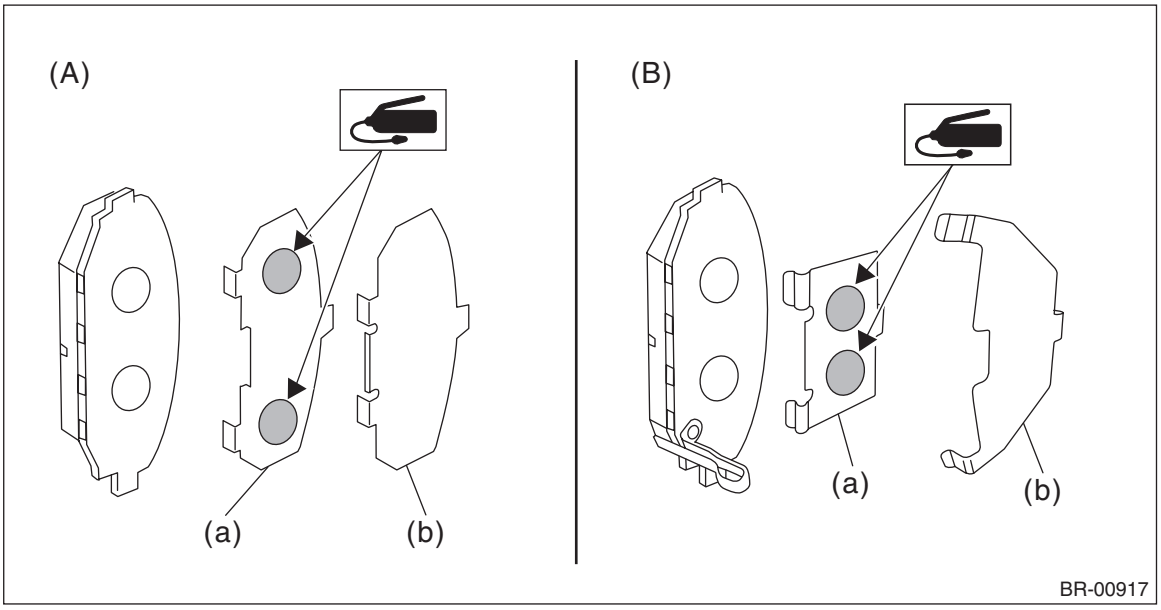
NOTE:
Before installation, remove mud and foreign matter from the caliper body assembly and support - rear disc brake.
1) Before installation, check the brake pad. <Ref. to BR-31, INSPECTION, Rear Brake Pad.>
2) Apply a thin coat of grease to the pad clip.

***Grease:***
***Molykote M7439 (Part No. 003602001) or an item contained in the pad kit***



3) Apply a thin coat of grease to the shim - disc brake rear inner (a) and the shim - disc brake rear outer (b).

***Grease:***
***Grease contained in the pad kit or WAKO grease V160***



(A) Pad - disc brake rear outer (B) Pad - disc brake rear inner

4) Install the brake pad to the support - rear disc brake.

5) Install the caliper body assembly to the support - rear disc brake.

***Tightening torque:***
***Caliper bolt: 27 N·m (2.75 kgf-m, 19.9 ft-lb)***

6) Install the brake hose bracket.

***Tightening torque:***
***Brake hose bracket: 33 N·m (3.36 kgf-m, 24.3 ft-lb)***

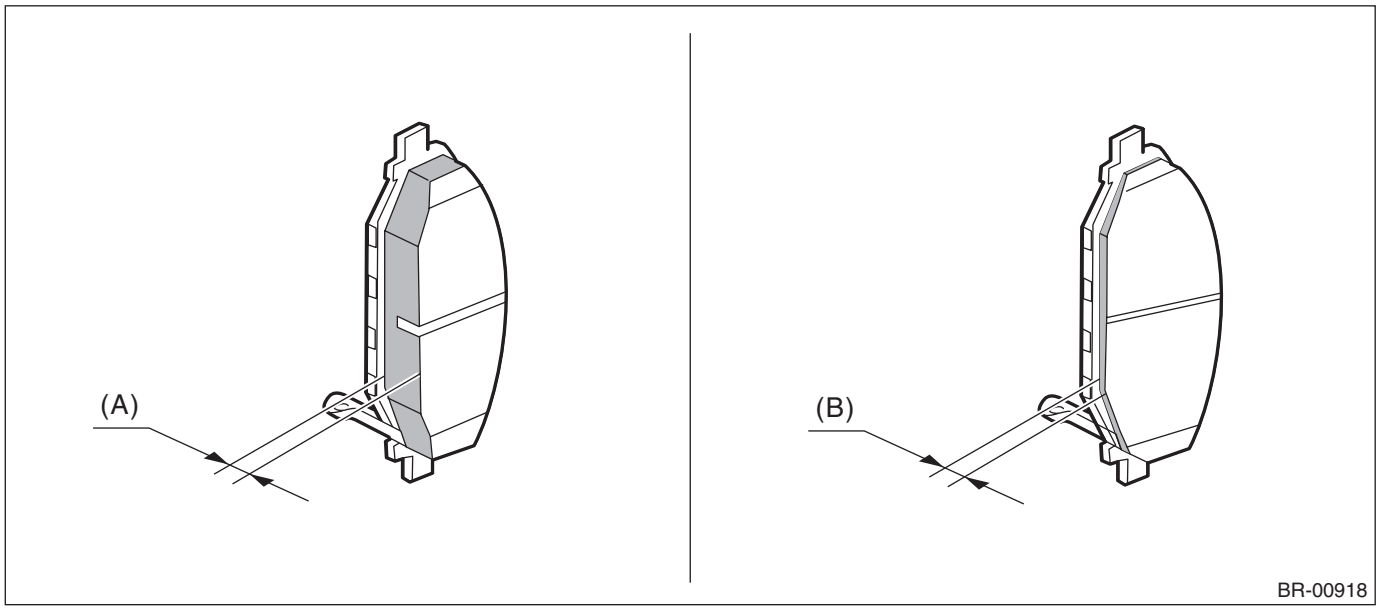
7) Install the rear wheels.

***Tightening torque:***
***120 N·m (12.24 kgf-m, 88.5 ft-lb)***

## C: INSPECTION

1) Check the pad thickness.

NOTE:
- Always replace the pads of both wheels and both sides as a set.
- Replace pad clips if they are twisted or worn.
- Replace the pad if there is oil or grease on it.
- A wear indicator is installed on the pad - disc brake rear inner. If the pad is worn to the limit, the end of wear indicator contacts disc rotor, and a squeaking sound is heard as the wheel rotates. If the sound is heard, replace the pad.



| | Disc rotor type | Standard (A) | Wear limit (B) |
|---|---|---|---|
| Pad thickness | Solid | 9 mm (0.35 in) | 1.5 mm (0.059 in) |

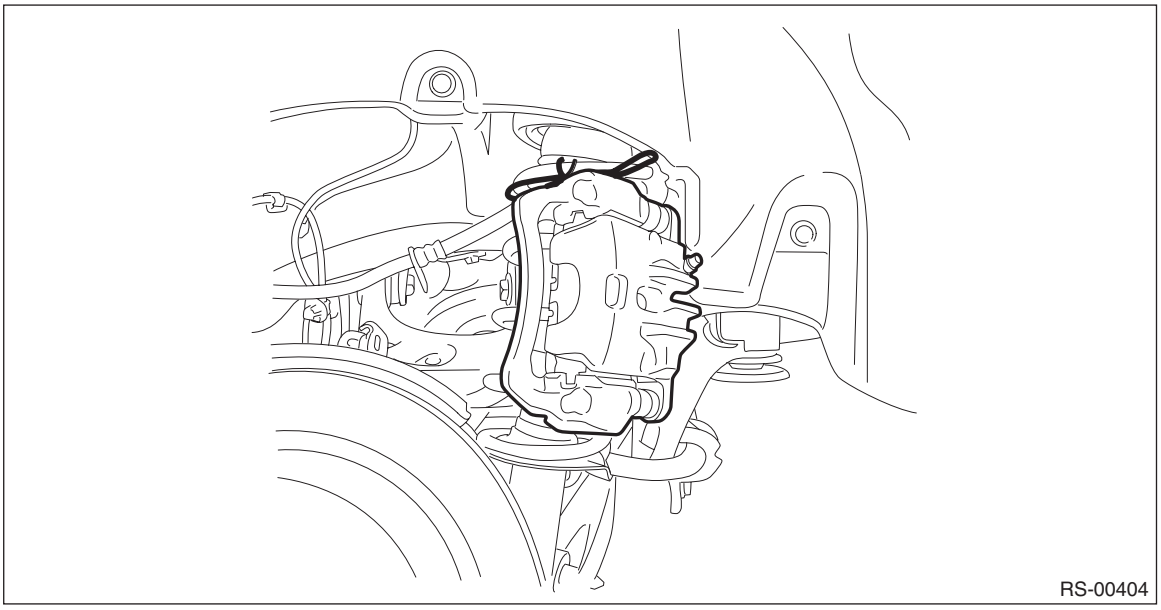
2) If the wear limit is exceeded in the inspection, replace the brake pad.

# 6. Rear Disc Rotor

## A: REMOVAL

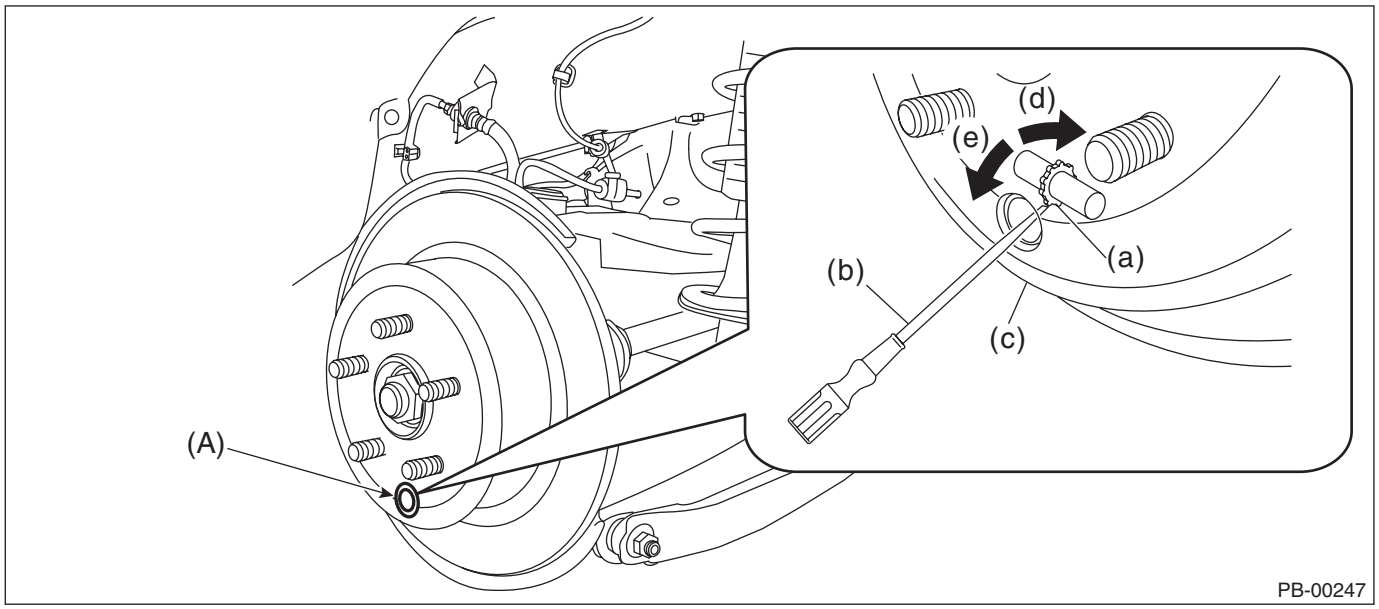
1) Lift up the vehicle, and then remove the rear wheels.
2) Release the lever assembly - hand brake.
3) Remove the caliper body assembly from the housing assembly - rear axle.
   (1) Remove the bolt from the brake hose bracket.
   (2) Remove the mounting bolt, and remove the caliper body assembly.

   (3) Prepare wiring harnesses etc. to be discarded, and suspend the caliper body assembly from the strut assembly.



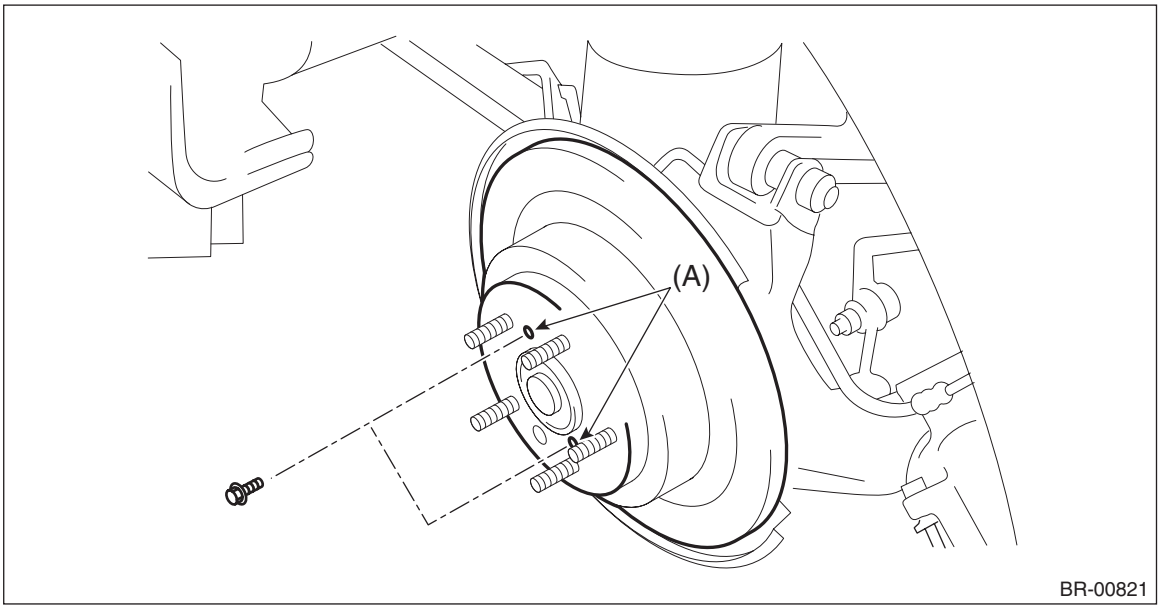
4) Remove the rear disc rotor.

NOTE:
If it is difficult to remove the disc rotor, perform the following two methods in order.
1. Remove the adjusting hole cover (A), insert the flat tip screwdriver, and rotate the adjuster assembly - rear brake until the brake shoe moves far enough to remove the disc rotor.



| | | | | | |
|---|---|---|---|---|---|
| (a) | Adjuster ASSY - rear brake | (c) | Disc rotor | (e) | Shorten the adjuster ASSY - rear brake |
| (b) | Flat tip screwdriver | (d) | Extend the adjuster ASSY - rear brake | | |

2. When the disc rotor is difficult to be removed from the hub unit COMPL - rear axle, screw in 8 mm (0.31 in) bolt to the threaded part of the disc rotor (A), and remove the disc rotor.



## B: INSTALLATION

NOTE:
Before installation, remove mud and foreign matter from the caliper body assembly.
1) Before installation, check the rear disc rotor. <Ref. to BR-34, INSPECTION, Rear Disc Rotor.>
2) Install each part in the reverse order of removal.
3) Adjust the parking brake. <Ref. to PB-22, ADJUSTMENT, Parking Brake Assembly (Rear Disc Brake).>

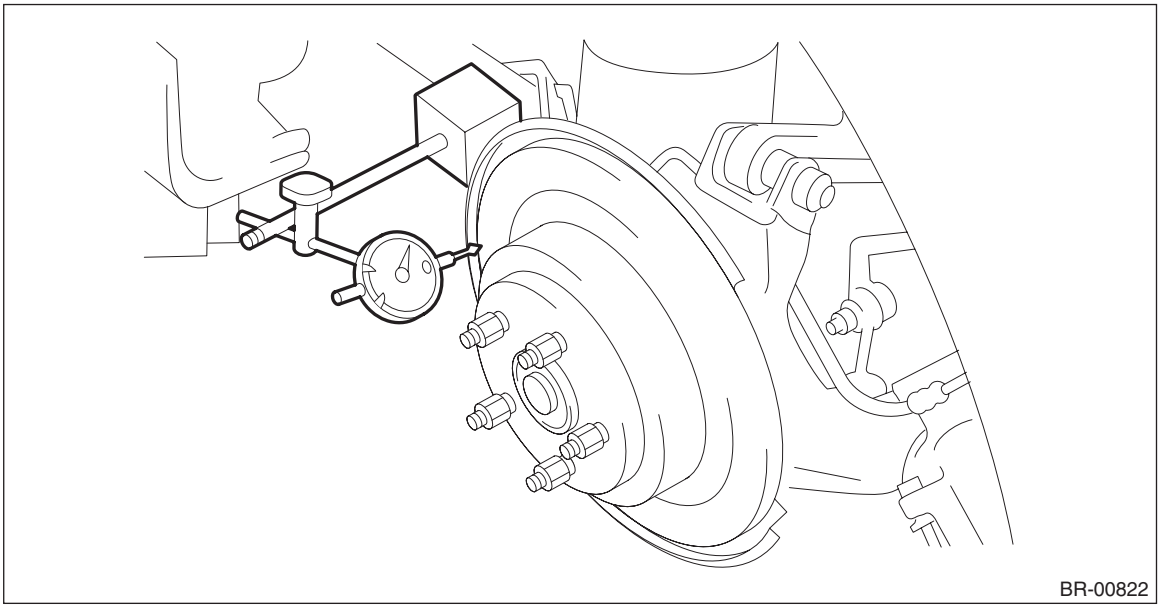
***Tightening torque:***
***Brake hose bracket: 33 N·m (3.36 kgf-m, 24.3 ft-lb)***
***Mounting bolt: 66 N·m (6.73 kgf-m, 48.7 ft-lb)***
***Rear wheel: 120 N·m (12.24 kgf-m, 88.5 ft-lb)***

## C: INSPECTION

### 1. DISC ROTOR RUNOUT CHECK

1) Check the hub unit COMPL - rear axle for free play and runout before the inspection of disc rotor runout limit. <Ref. to DS-56, INSPECTION, Rear Hub Unit Bearing.>
2) Secure the disc rotor by tightening the five wheel nuts.
3) Set a dial gauge 10 mm (0.39 in) inward from the disc rotor outer circumference, and check the disc rotor runout while rotating the disc rotor.

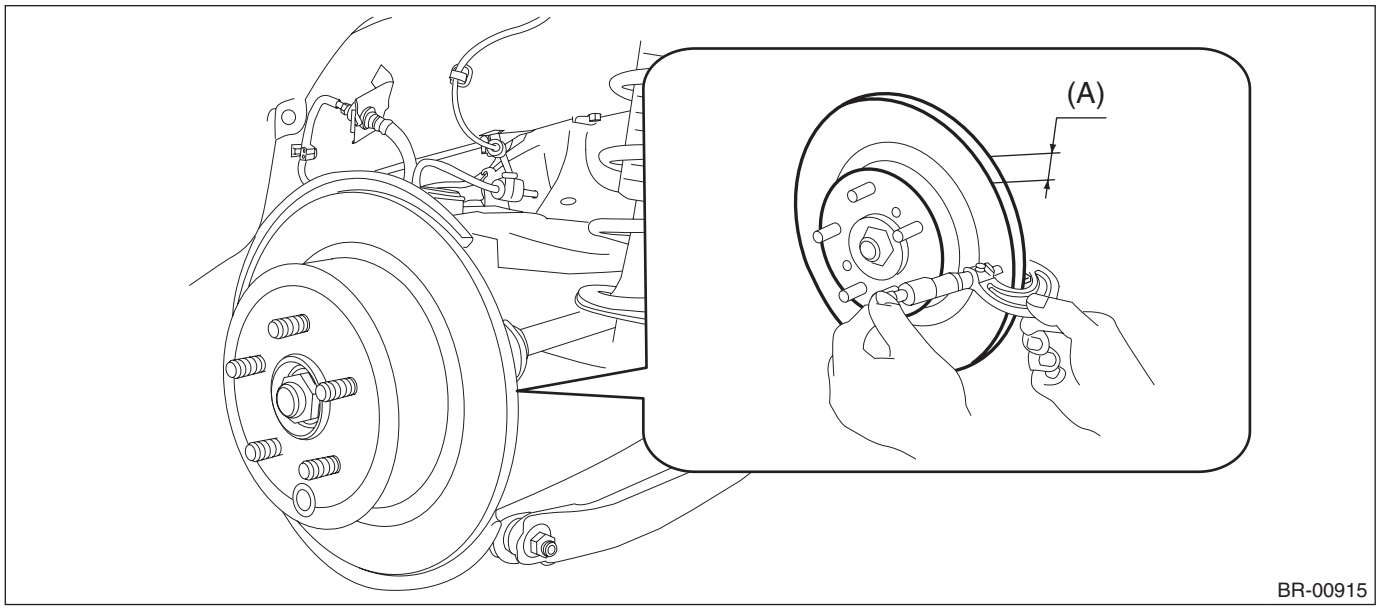
***Disc rotor runout limit:***
***0.05 mm (0.0020 in)***



4) If the runout limit is exceeded in the inspection, replace the disc rotor.

## 2. DISC ROTOR THICKNESS CHECK

1) Set a micrometer 10 mm (0.39 in) inward from the disc rotor outer perimeter, and then measure the disc rotor thickness (A).



| | Type of disc rotor | Standard | Wear limit | Disc rotor outer diameter |
|---|---|---|---|---|
| Disc rotor thickness (A) | Solid disc | 10 mm (0.39 in) | 8.5 mm (0.33 in) | 274 mm (10.79 in) |

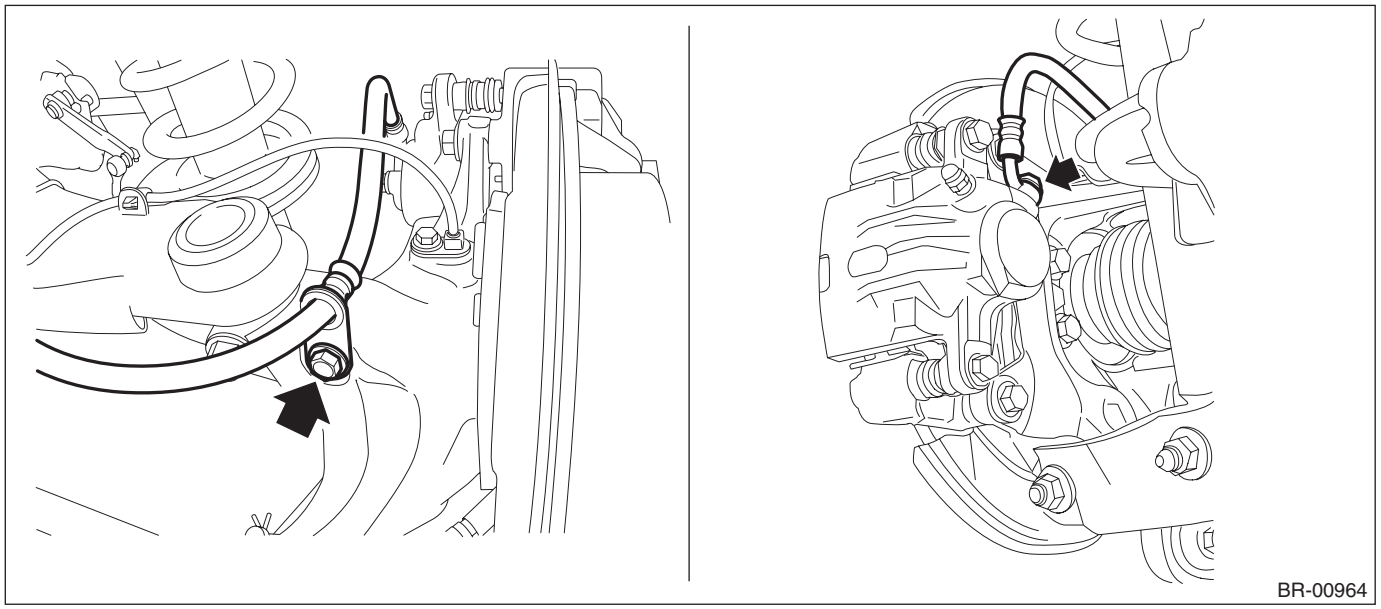
2) If the wear limit is exceeded in the inspection, replace the disc rotor.

# 7. Rear Disc Brake Assembly

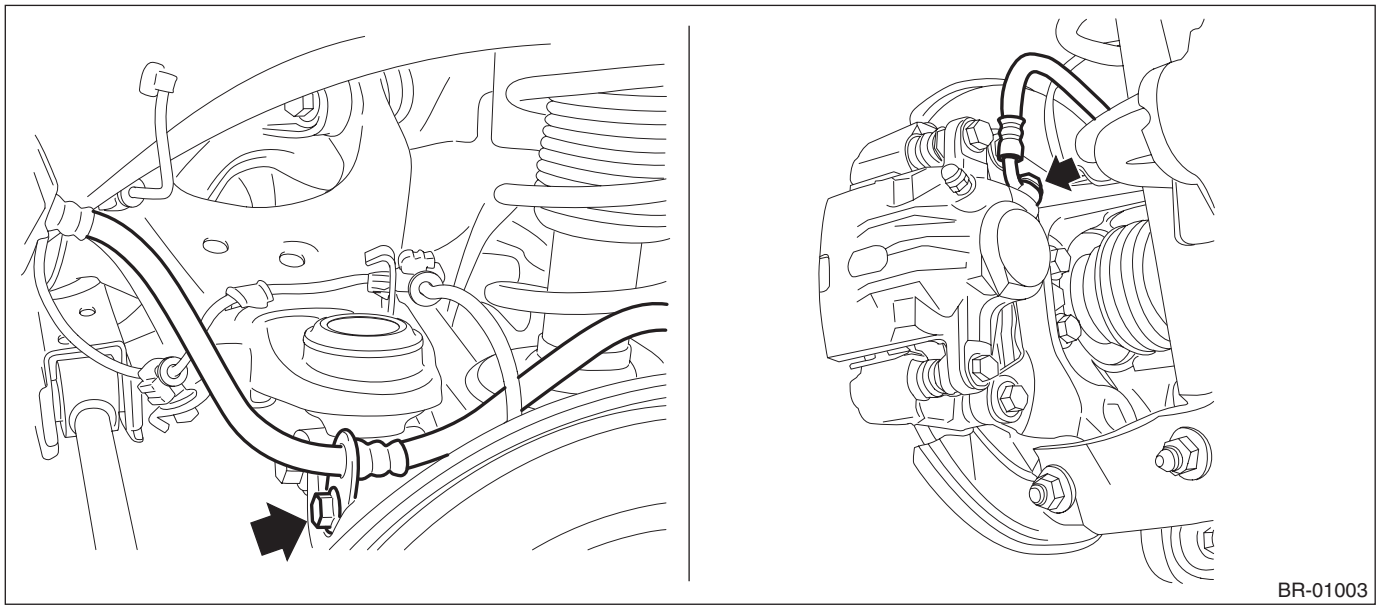
## A: REMOVAL

**CAUTION:**
**Do not allow brake fluid to come in contact with the painted surface of the vehicle body. If it does, wash off with water and wipe away completely.**

1) Lift up the vehicle, and then remove the rear wheels.
2) Remove the caliper body assembly from the support - rear disc brake.
   (1) Remove the brake hose bracket and union bolt.

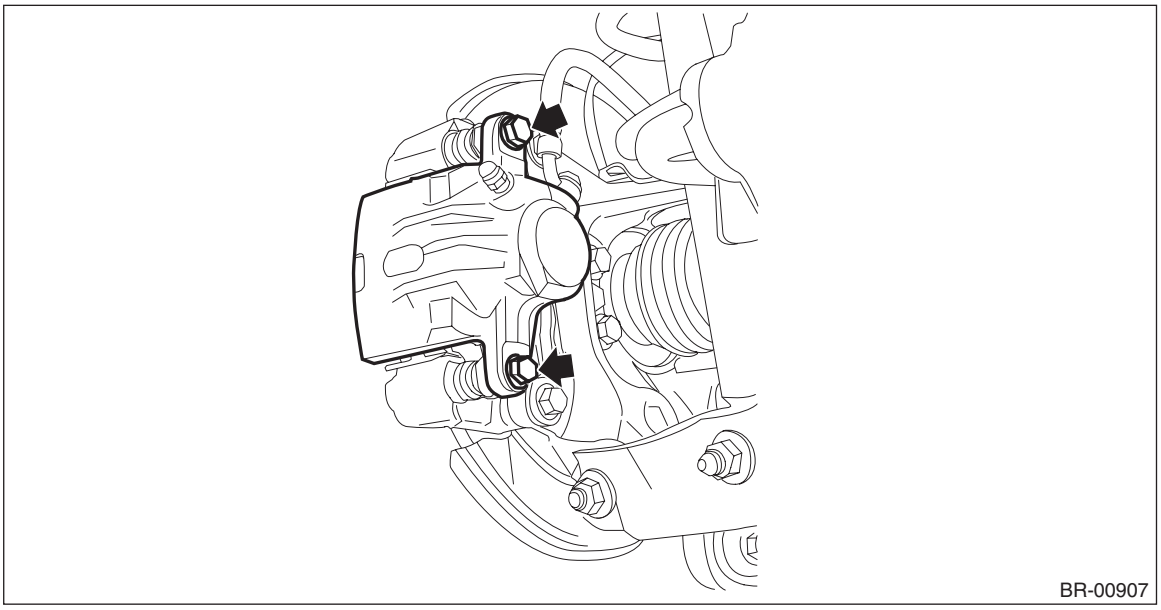


BR-00964



BR-01003

(2) Remove the caliper bolt, and remove the caliper body assembly.



3) Remove the support - rear disc brake.

NOTE:
Remove the support - rear disc brake only when replacing the disc rotor or the support - rear disc brake. It is not necessary to remove it when servicing the caliper body assembly.

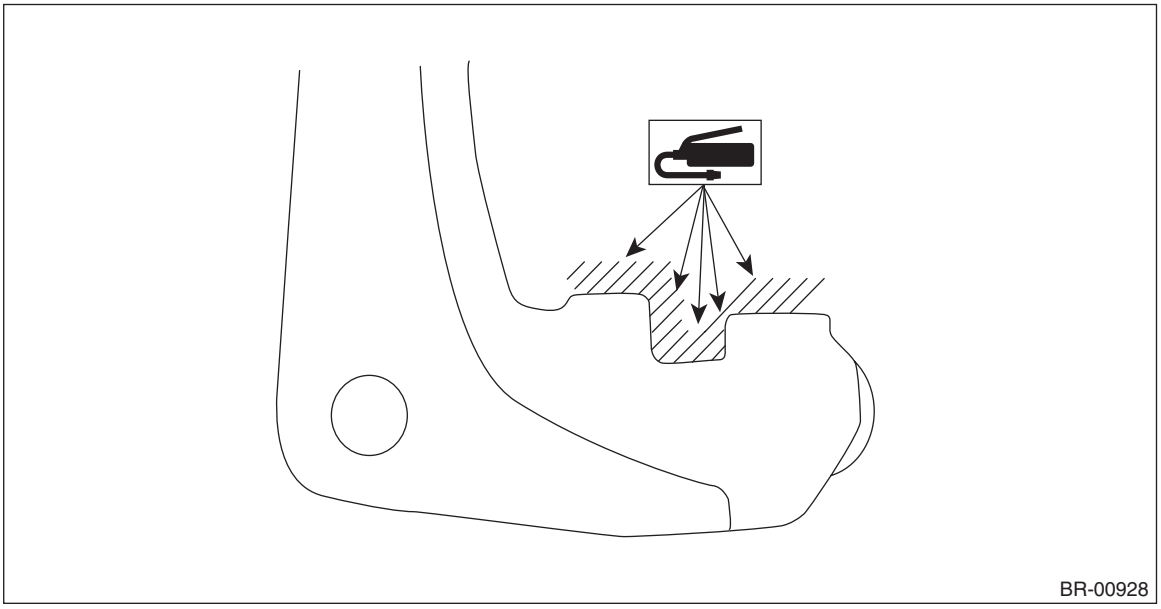
(1) Remove the brake pad from support - rear disc brake.
(2) Remove the mounting bolts, and then remove the support - rear disc brake from the housing assembly - rear axle.

## B: INSTALLATION

NOTE:
Before installation, remove mud and foreign matter from the caliper body assembly and support - rear disc brake.

1) Before installation, check each part. <Ref. to BR-43, INSPECTION, Rear Disc Brake Assembly.>
2) Apply a thin coat of grease included with pad kit to the support - rear disc brake.

***Grease:***
***Molykote M7439 (Part No. 003602001) or an item contained in the pad kit***

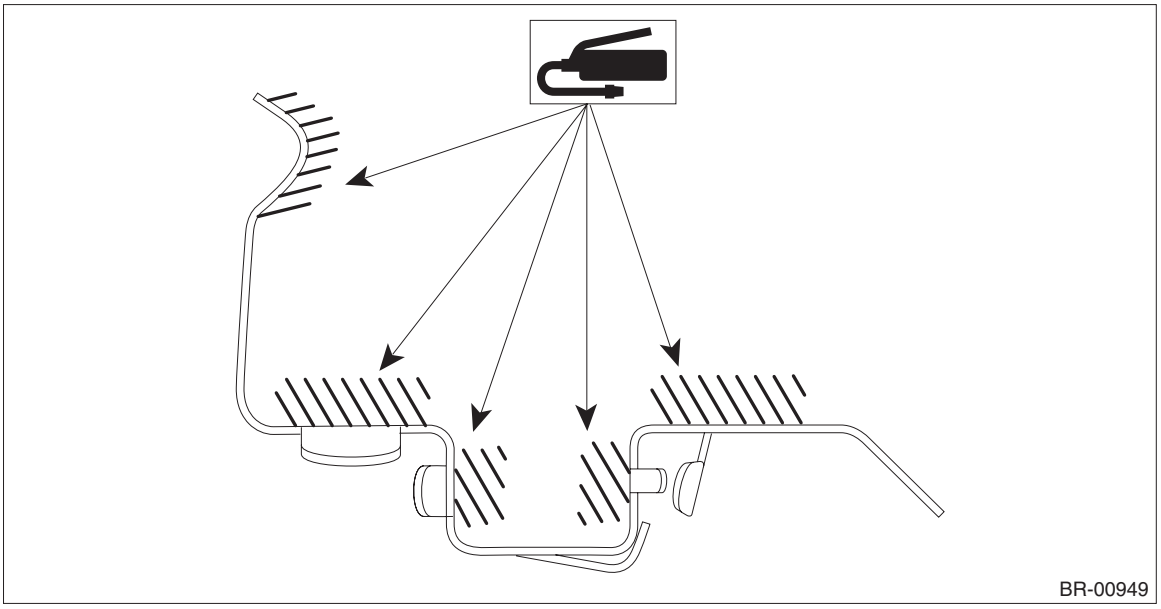


3) Install the support - rear disc brake to the housing assembly - rear axle.

***Tightening torque:***
***Mounting bolt: 66 N·m (6.73 kgf-m, 48.7 ft-lb)***

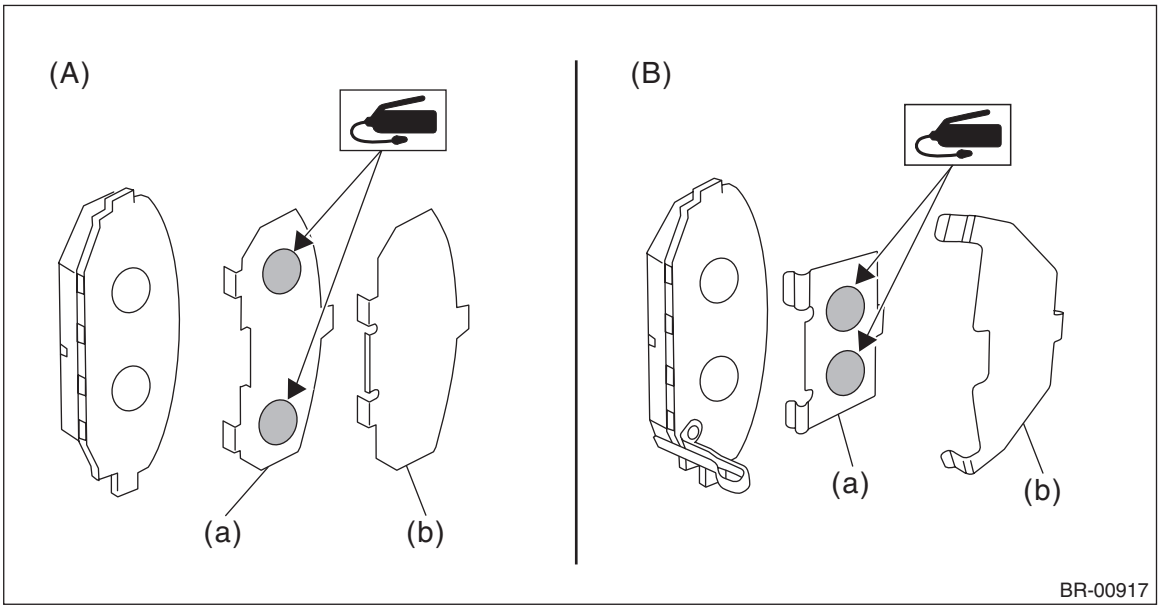
4) Apply a thin coat of grease to the pad clip.

***Grease:***
***Molykote M7439 (Part No. 003602001) or an item contained in the pad kit***



5) Apply a thin coat of grease to the shim - disc brake rear inner (a) and the shim - disc brake rear outer (b).

***Grease:***
***Grease contained in the pad kit or WAKO grease V160***



(A) Pad - disc brake rear outer (B) Pad - disc brake rear inner

6) Install the brake pad to the support - rear disc brake.

7) Install the caliper body assembly to the support - rear disc brake.

***Tightening torque:***
***Caliper bolt: 27 N·m (2.75 kgf-m, 19.9 ft-lb)***
8) Install the brake hose bracket.

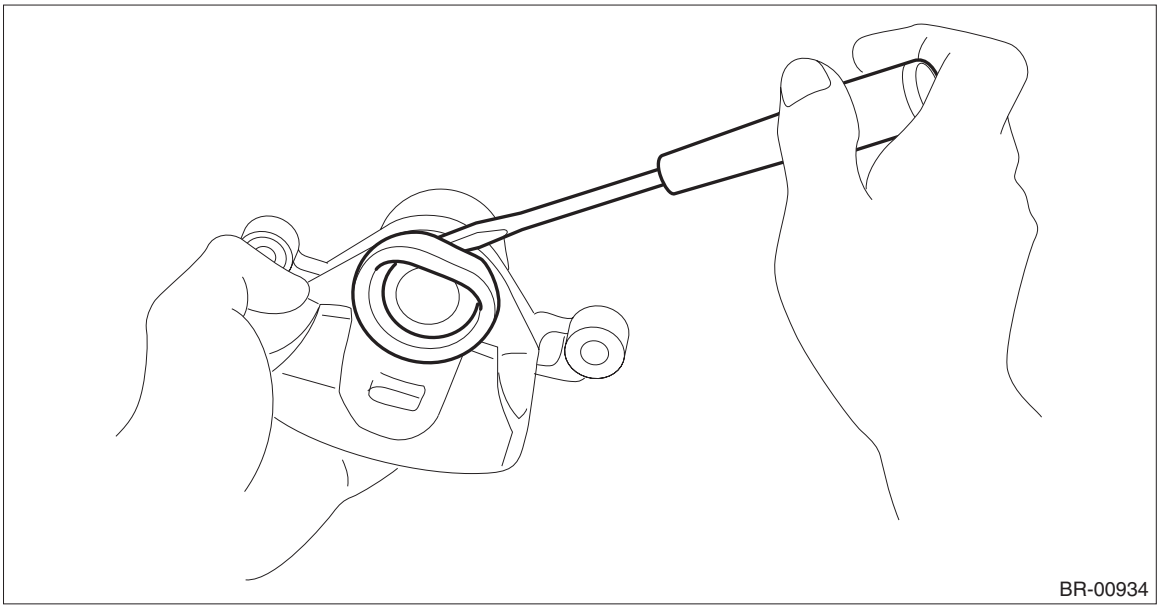
***Tightening torque:***
***Brake hose bracket: 33 N·m (3.36 kgf-m, 14.3 ft-lb)***
9) Connect the brake hose using a new brake hose gasket.

***Tightening torque:***
***Union bolt: 18 N·m (1.84 kgf-m, 13.3 ft-lb)***
10) Bleed air from the brake system. <Ref. to BR-60, BRAKE LINE, PROCEDURE, Air Bleeding.>
11) Install the rear wheels.

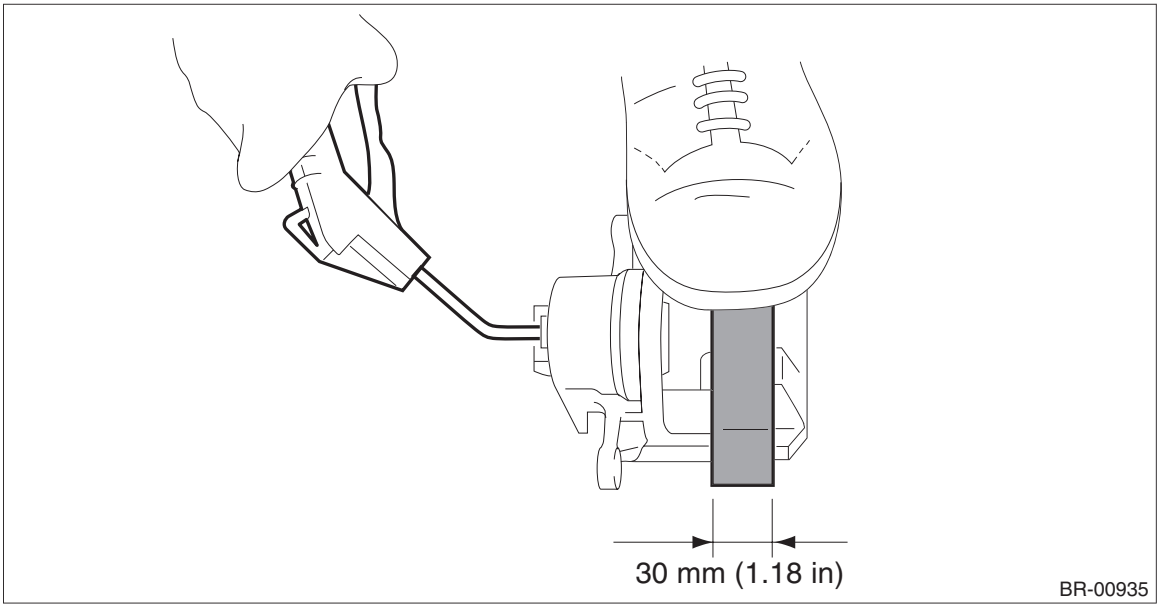
***Tightening torque:***
***120 N·m (12.24 kgf-m, 88.5 ft-lb)***

## C: DISASSEMBLY

**CAUTION:**
**Be careful not to allow foreign matter to enter the brake hose connector.**
1) Remove mud and foreign matter from the caliper body assembly.
2) Remove the piston boot from caliper body cylinder.

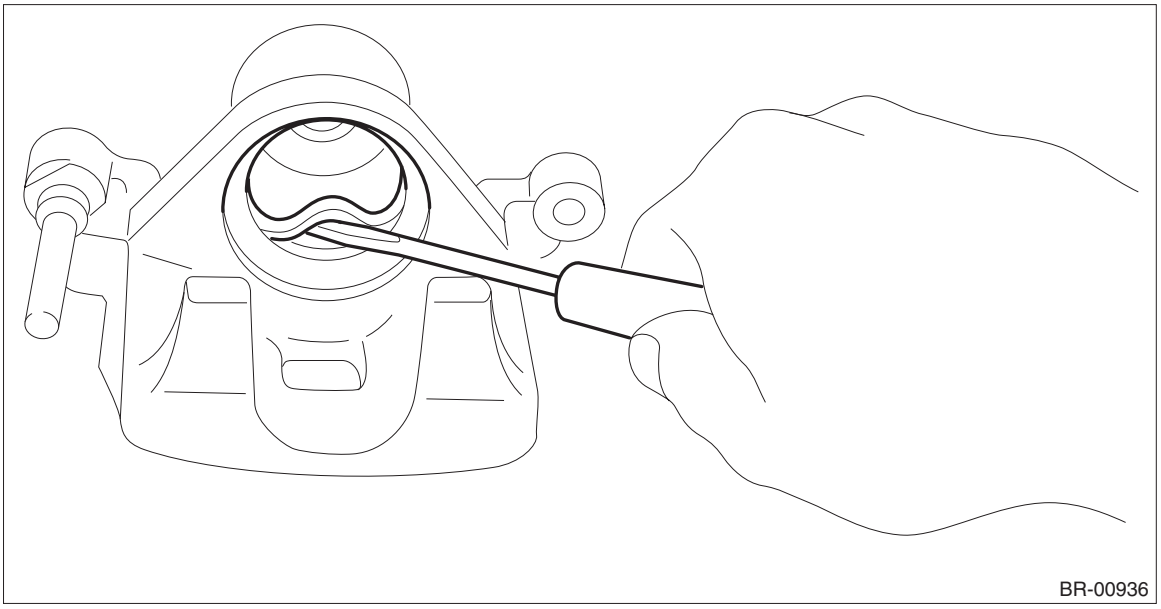


3) Remove the piston - disc brake.
(1) Place a wooden block in the caliper body assembly as shown in the figure to prevent the piston - disc brake from jumping out and being damaged.
(2) Using an air gun, gradually apply compressed air via the brake hose installation hole to push out the piston - disc brake.

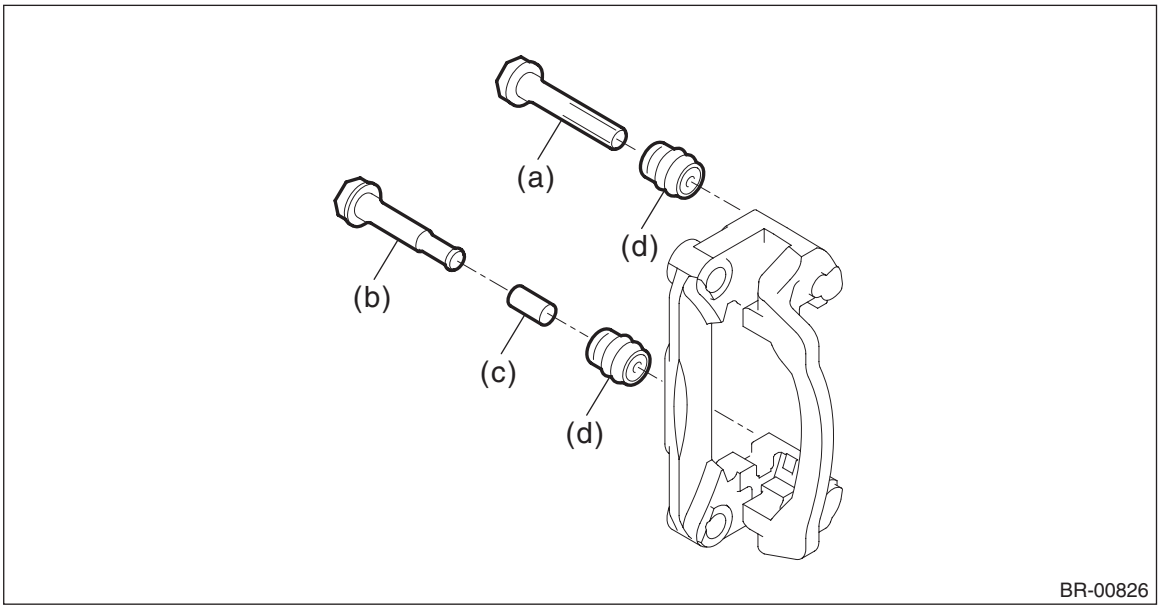


4) Remove the piston seal from caliper body cylinder.

**CAUTION:**
**Do not damage the cylinder and piston seal groove.**



5) Remove the guide pin - front brake, lock pin - rear brake, lock pin - sleeve, and pin boot from the support - rear disc brake.

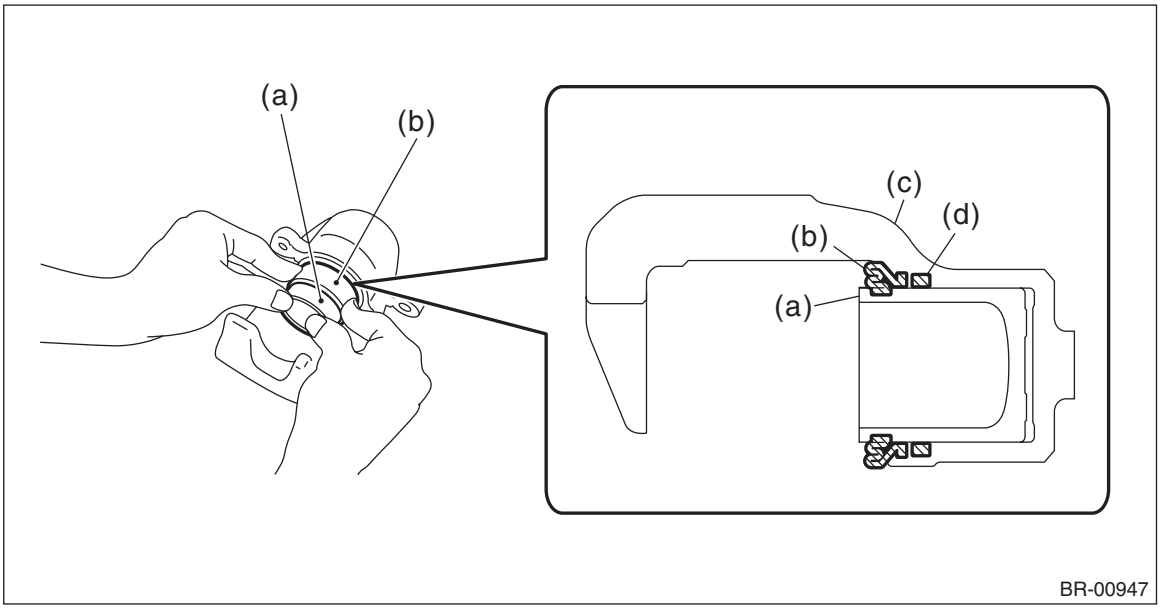


(a) Guide pin - front brake (black)
(b) Lock pin - rear brake (silver)
(c) Lock pin - sleeve
(d) Pin boot

## D: ASSEMBLY

1) Before installation, check each part. <Ref. to BR-43, INSPECTION, Rear Disc Brake Assembly.>
2) Clean the inside of the caliper body cylinder using brake fluid.
3) Apply a coat of brake fluid to piston seal and install the piston seal to the caliper body cylinder groove.
4) Apply a coat of brake fluid to the inner surface of caliper body cylinder and the entire outer surface of the piston - disc brake.
5) Apply grease contained in the piston seal kit to the piston boot, and install it to the groove at the end of the cylinder.
6) Insert the piston - disc brake into the caliper body cylinder.

**CAUTION:**
**Do not force the piston - disc brake into the caliper body cylinder.**
7) Position the piston boot in the grooves on the piston - disc brake and the caliper body cylinder.

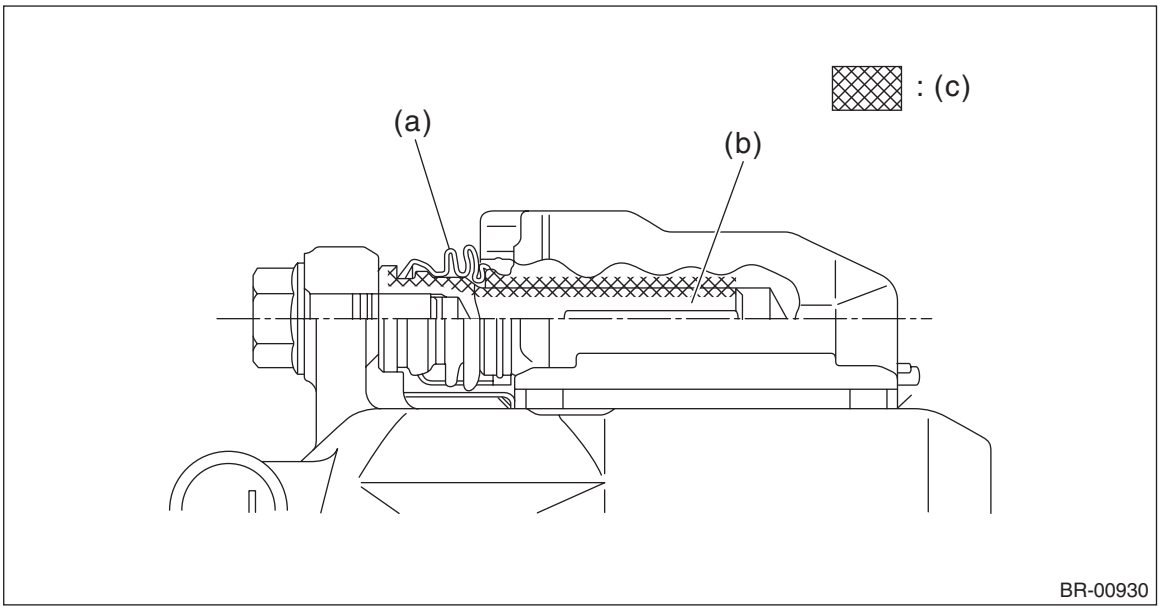


(a) Piston - disc brake
(b) Piston boot
(c) Caliper body
(d) Piston seal

8) Apply grease contained in the piston seal kit to the lock pin - rear brake, the outer surface of guide pin - front brake, the inner surface of support cylinder, and the grooves of pin boot.

9) Install the pin boot to the lock pin - rear brake and guide pin - front brake, and insert them into the support cylinder.

**CAUTION:**
**Insert the lock pin - rear brake and guide pin - front brake into specified position, and make sure that they slide and seat properly.**



(a) Pin boot
(b) Lock pin - rear brake or guide pin - rear brake
(c) Grease applied area

## E: INSPECTION

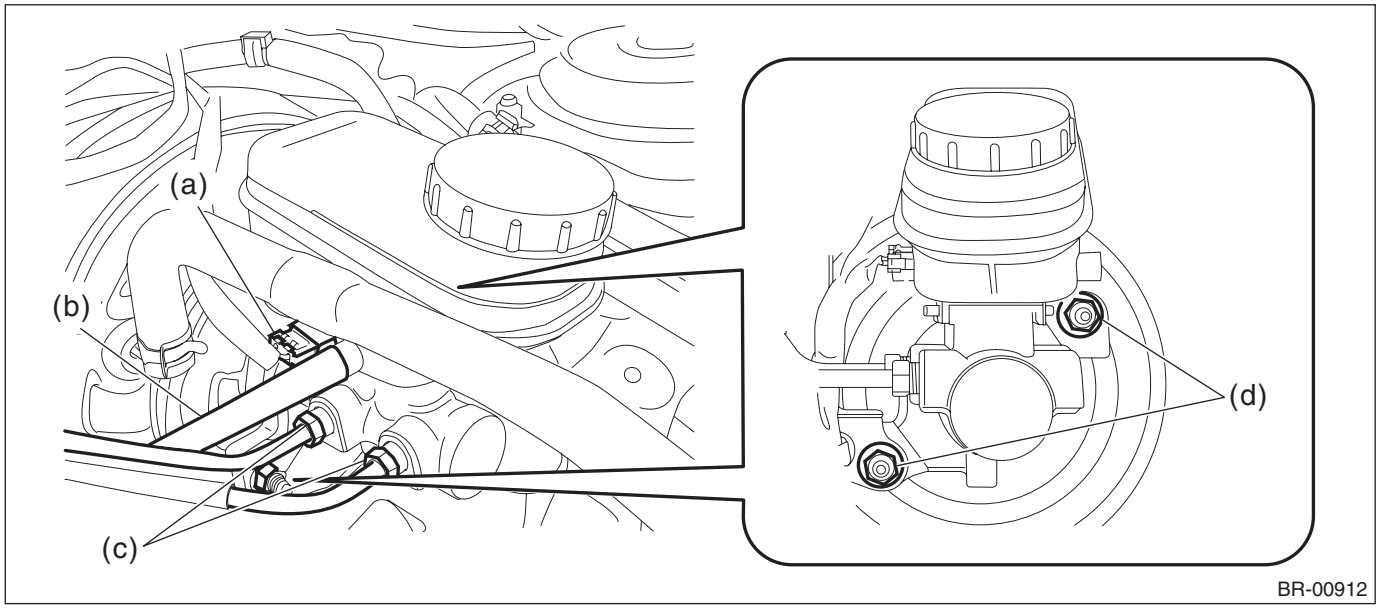
1) Check the caliper body cylinder and piston - disc brake for uneven wear, damage or rust.
2) Check the rubber parts for damage or deterioration.
3) If faulty is found in the inspection, replace the relevant part.

# 8. Master Cylinder

## A: REMOVAL

**CAUTION:**
**Do not allow brake fluid to come in contact with the painted surface of the vehicle body. If it does, wash off with water and wipe away completely.**

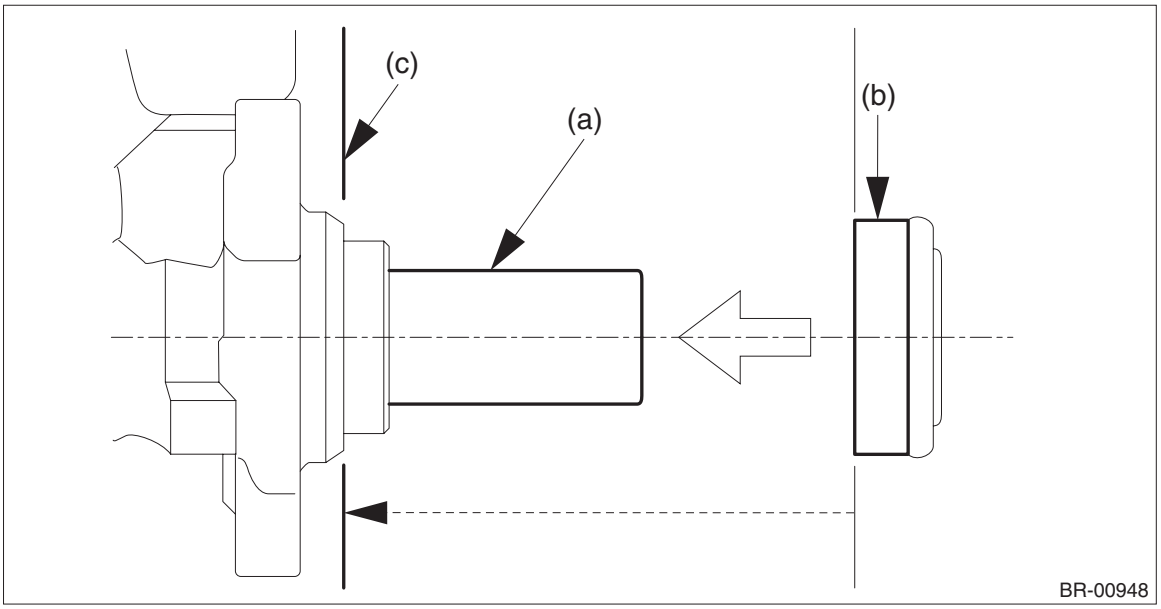
1) Disconnect the ground cable from battery.
2) Drain brake fluid from the reservoir tank completely.
3) Remove the master cylinder assembly.
   (1) Disconnect the fluid level gauge connector (a).
   (2) Disconnect the clutch hose (b). (MT model)
   (3) Disconnect the brake pipe (c).
   (4) Remove the nut (d), and slowly remove the master cylinder assembly from the vacuum booster assembly.



## B: INSTALLATION

1) Replace the seal sub assembly for the master cylinder assembly with a new part.

**CAUTION:**
**Be careful not to install the seal sub assembly in the wrong location.**



(a) Primary piston
(b) Seal sub ASSY
(c) Install the seal sub assembly to this surface.

2) Install each part in the reverse order of removal.

***Tightening torque:***
***Master cylinder assembly: 13 N·m (1.33 kgf-m, 9.6 ft-lb)***
***Brake pipe flare nut: 19 N·m (1.94 kgf-m, 14.0 ft-lb)***

3) Bleed air from the brake system. <Ref. to BR-59, PROCEDURE, Air Bleeding.>

## C: REPLACEMENT

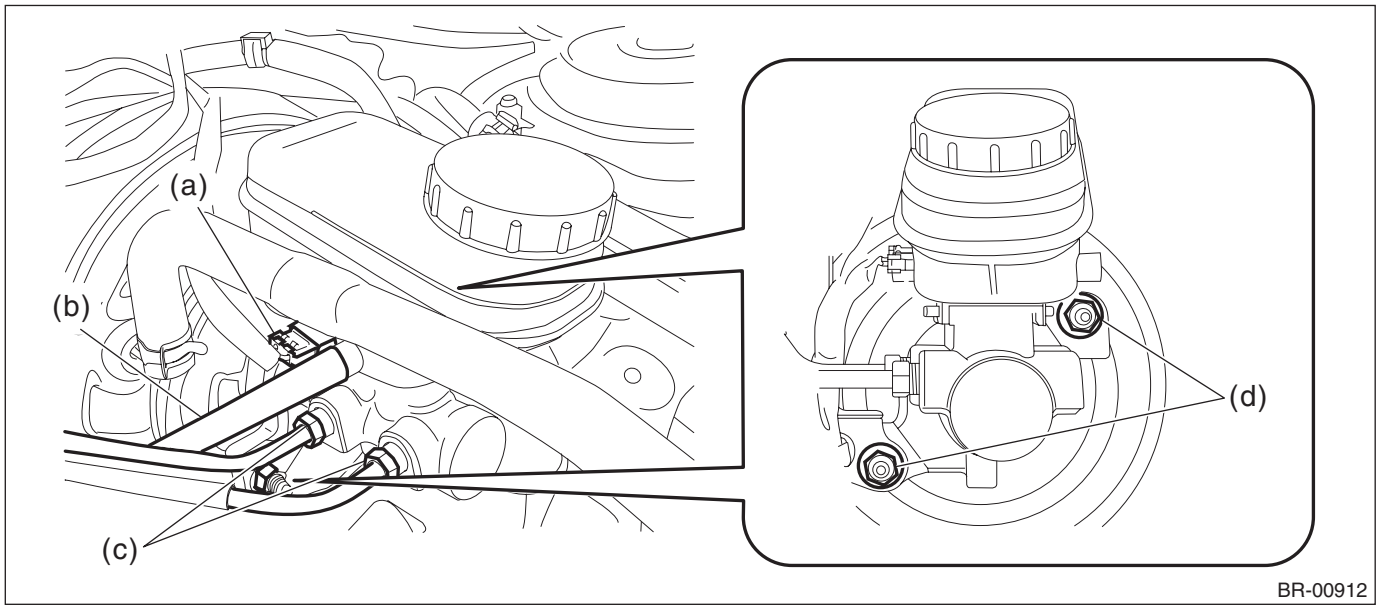
**CAUTION:**
**Since the master cylinder assembly cannot be disassembled, disassembly and cleaning are prohibited. When replacing, replace the master cylinder assembly.**

# 9. Brake Booster

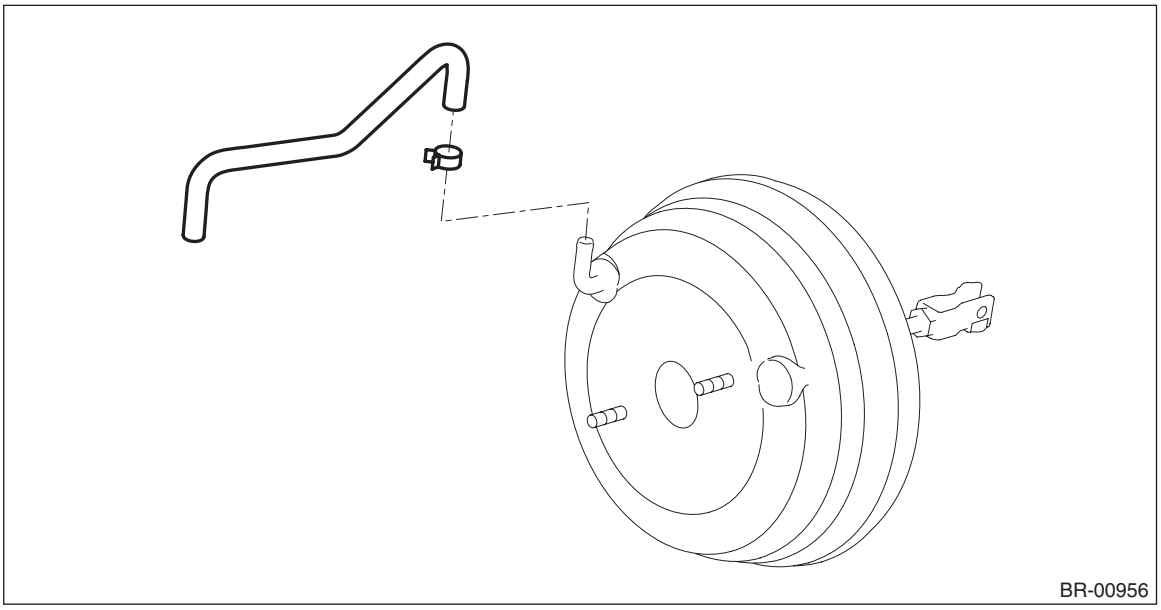
## A: REMOVAL

**CAUTION:**
**Do not allow brake fluid to come in contact with the painted surface of the vehicle body. If it does, wash off with water and wipe away completely.**

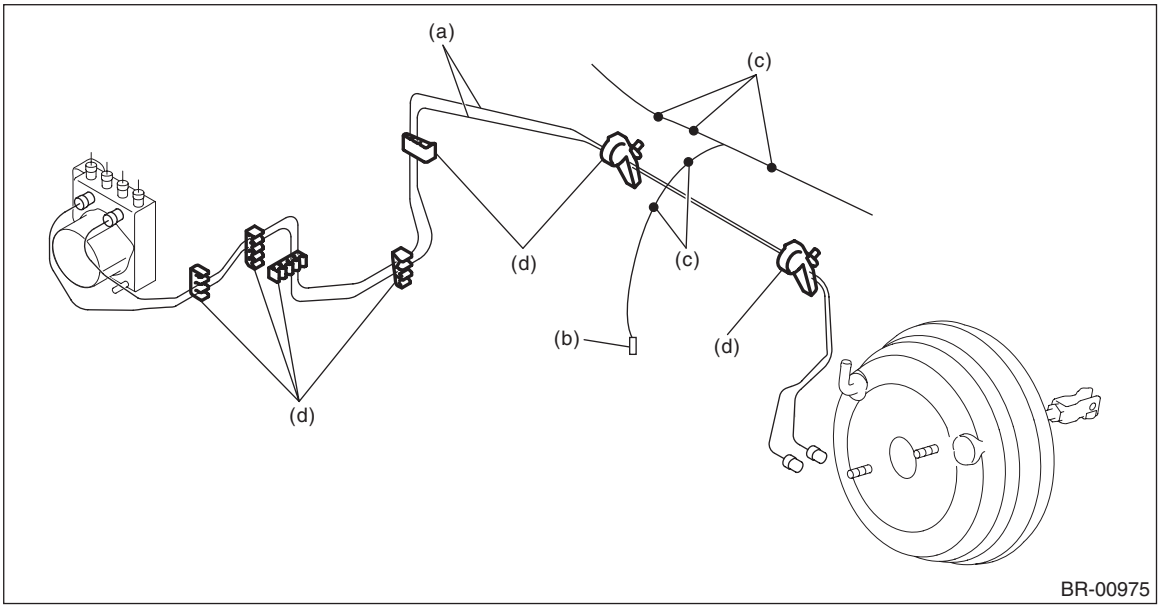
1) Disconnect the ground cable from battery and wait for at least 60 seconds before starting work.
2) Drain brake fluid from the reservoir tank completely.
3) Disconnect the air conditioner pipe. <Ref. to AC-71, REMOVAL, Hose and Pipe.>
4) Remove the power steering control module. <Ref. to PS-42, REMOVAL, Power Steering Control Module.>
5) Remove the master cylinder assembly.
   (1) Disconnect the fluid level gauge connector (a).
   (2) Disconnect the clutch hose (b). (MT model)
   (3) Disconnect the brake pipe (c).
   (4) Remove the nut (d), and slowly remove the master cylinder assembly from the vacuum booster assembly.



6) Remove the clamp and remove the vacuum hose.

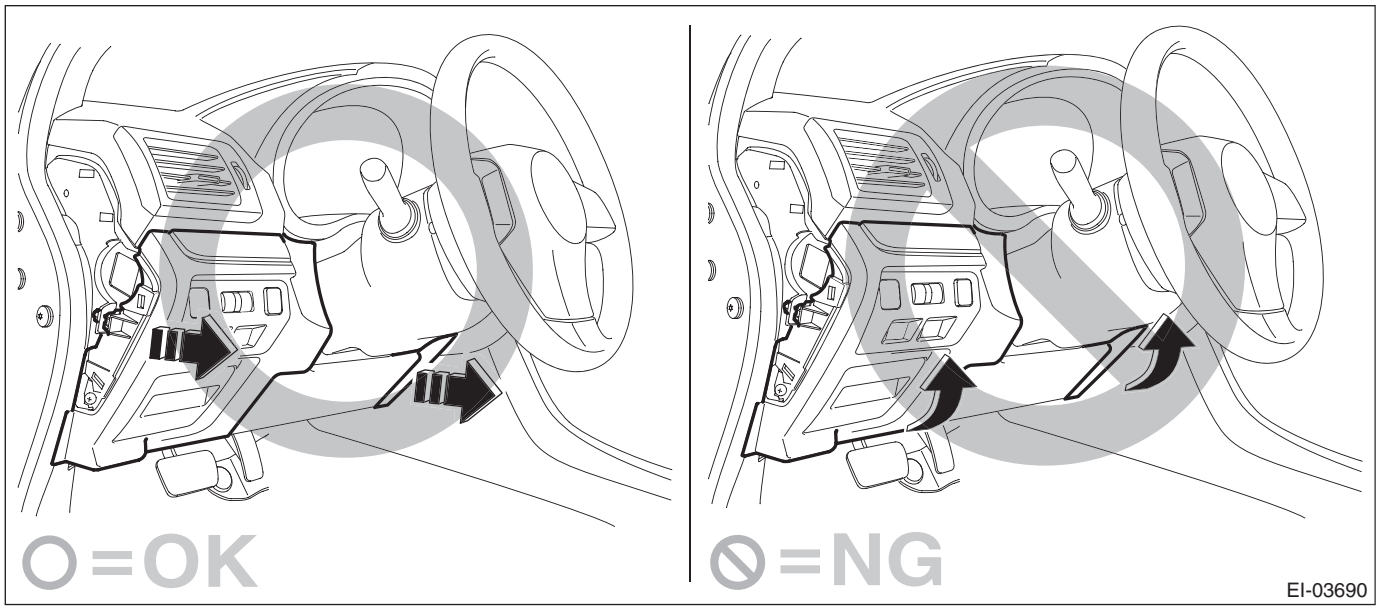


7) Remove the brake pipe assembly (a).
   (1) Disconnect the starter connector (b) and harness clip (c).
   (2) Remove the brake pipe assembly (a) from the pipe clip (d).

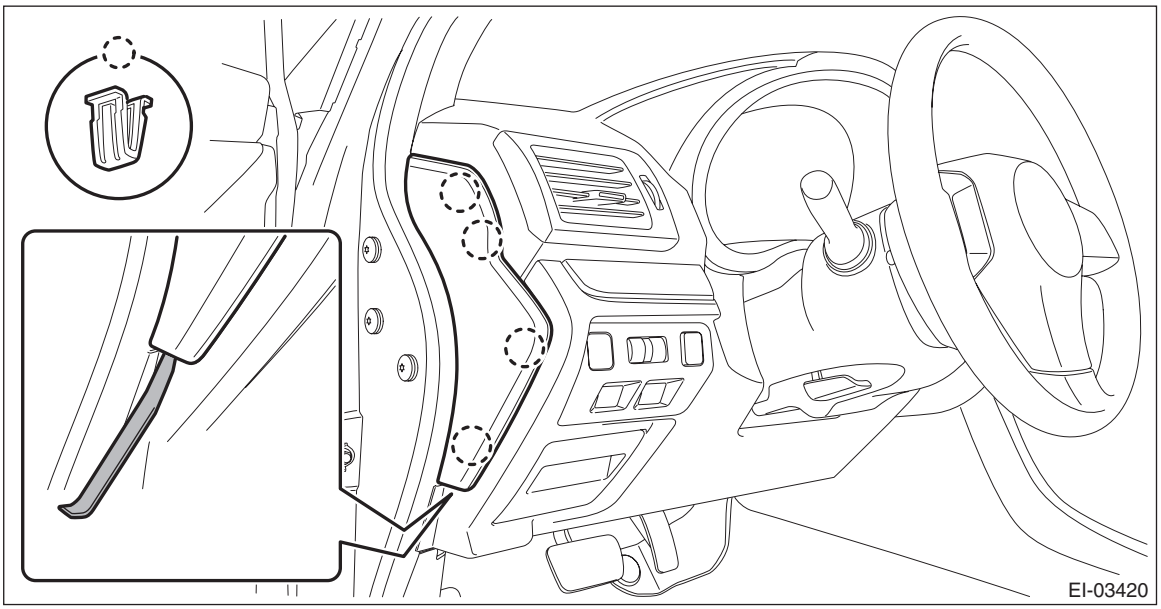


8) Remove the cover assembly - instrument panel LWR driver.

**CAUTION:**
**When removing the cover assembly - instrument panel LWR driver, be sure to pull it toward you. If attempting to remove by turning it upward, the claws may be damaged.**



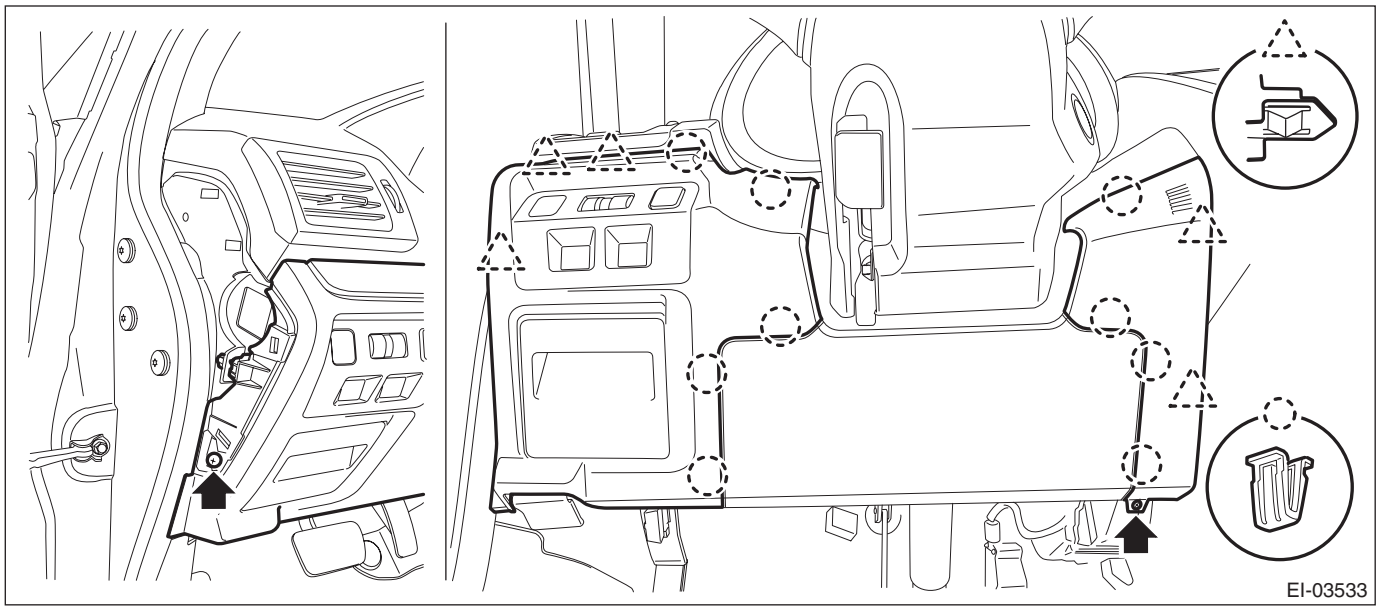
(1) Remove the clips, and remove the cover - instrument panel side LH.



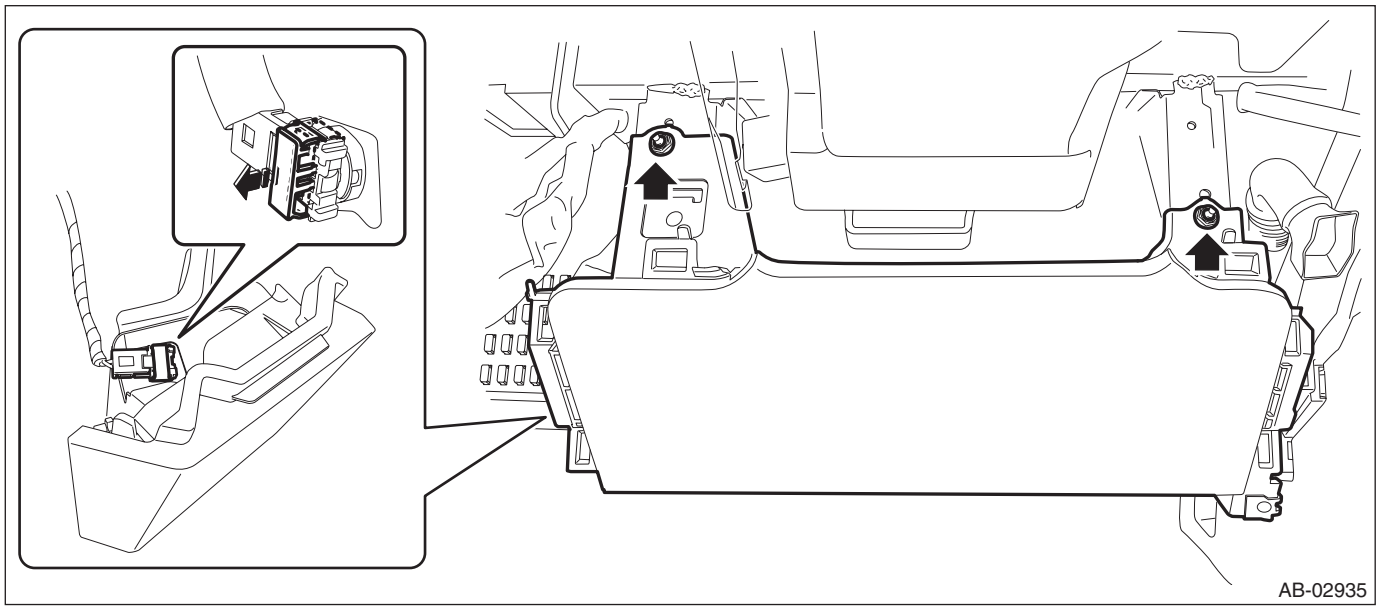
NOTE:
Using a plastic remover, open the cover - instrument panel side LH.

(2) Remove the screws and release the clips and claws.

(3) Disconnect the harness connectors, and remove the cover assembly - instrument panel LWR driver INN and OUT.

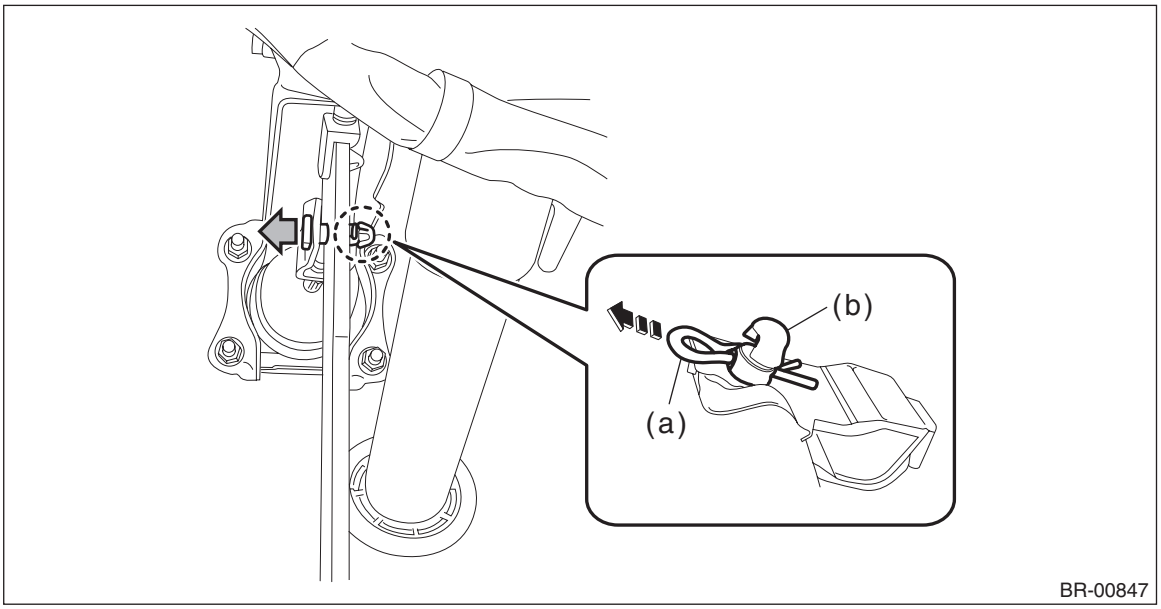


9) Remove the nuts to remove the knee airbag module and disconnect the harness connector. <Ref. to AB-33, KNEE AIRBAG MODULE, PROCEDURE, Airbag Connector.>



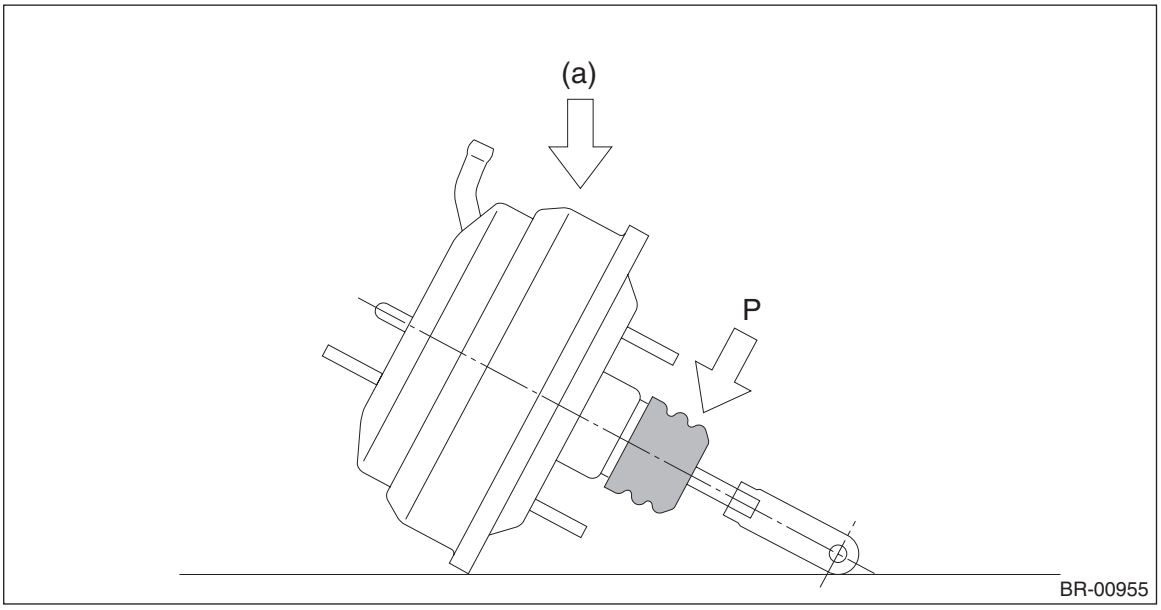
10) Remove the snap pin (a) and clevis pin (b), and remove the operating rod from the brake pedal.

**CAUTION:**
**• Be careful not to apply excessive force to the operating rod when handling the operating rod. The angle may change by ±3°, and it may result in damage to power piston cylinder.**
**• Do not change the push rod length.**

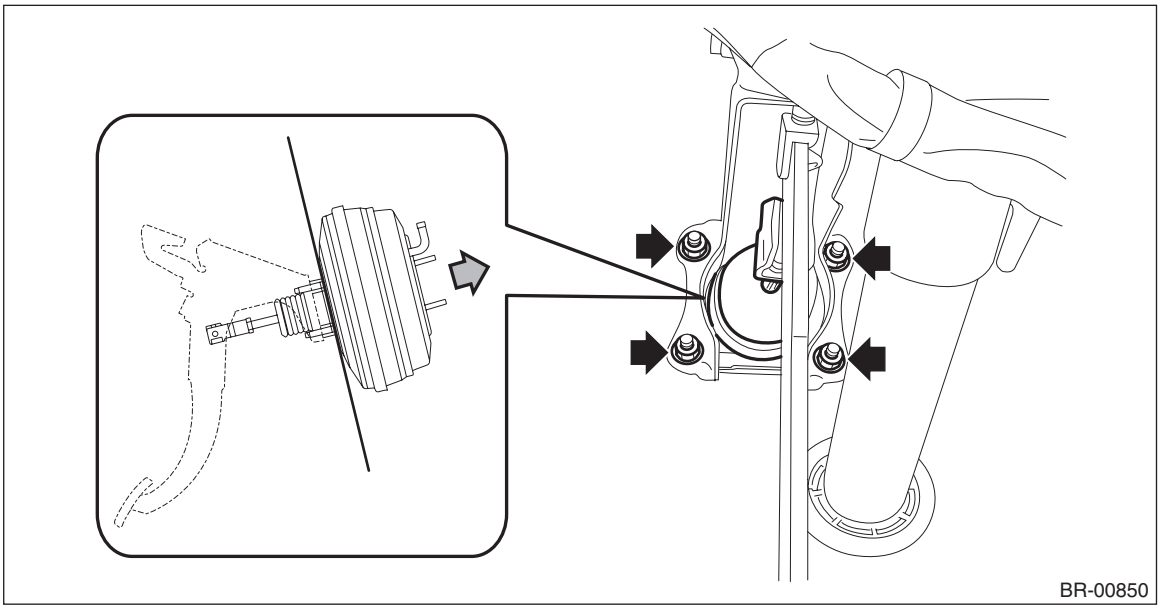


11) Remove the vacuum booster assembly.

**CAUTION:**
**• Do not disassemble the vacuum booster assembly.**
**• Make sure that the booster shell and vacuum pipe are not subject to strong impacts.**
**• Be careful not to drop the vacuum booster assembly. If the vacuum booster assembly is dropped accidentally, replace it.**
**• Be careful when placing the vacuum booster assembly on floor.**
**• If external force (a) is applied from above when the vacuum booster assembly is placed in this position, the resin portion as indicated by "P" may become damaged.**



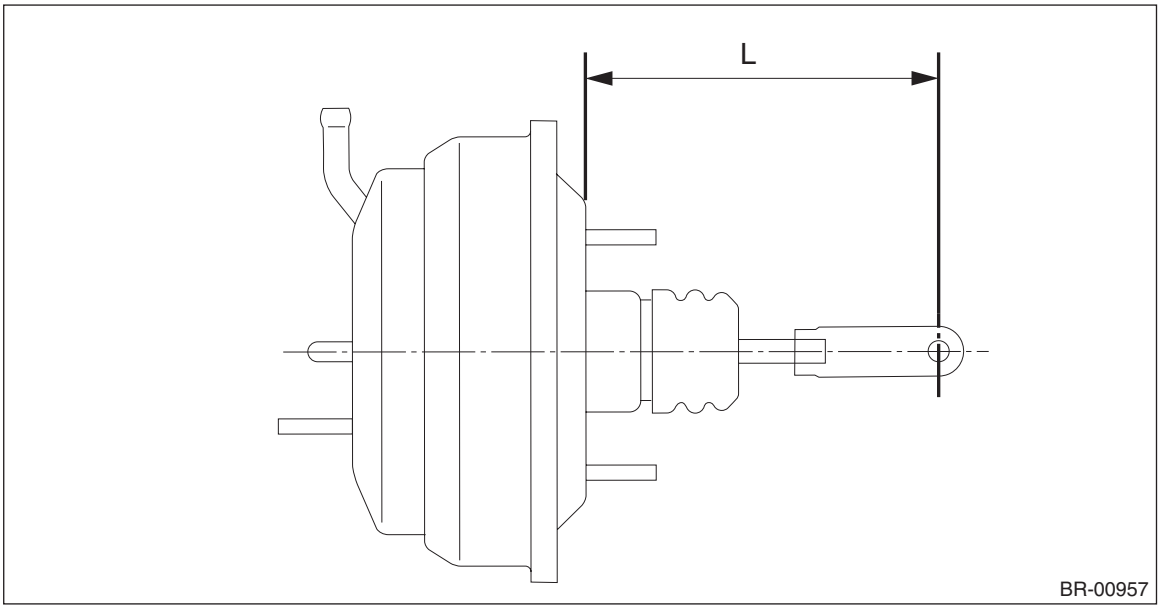
(1) Remove the nuts, and then remove the vacuum booster assembly.



## B: INSTALLATION

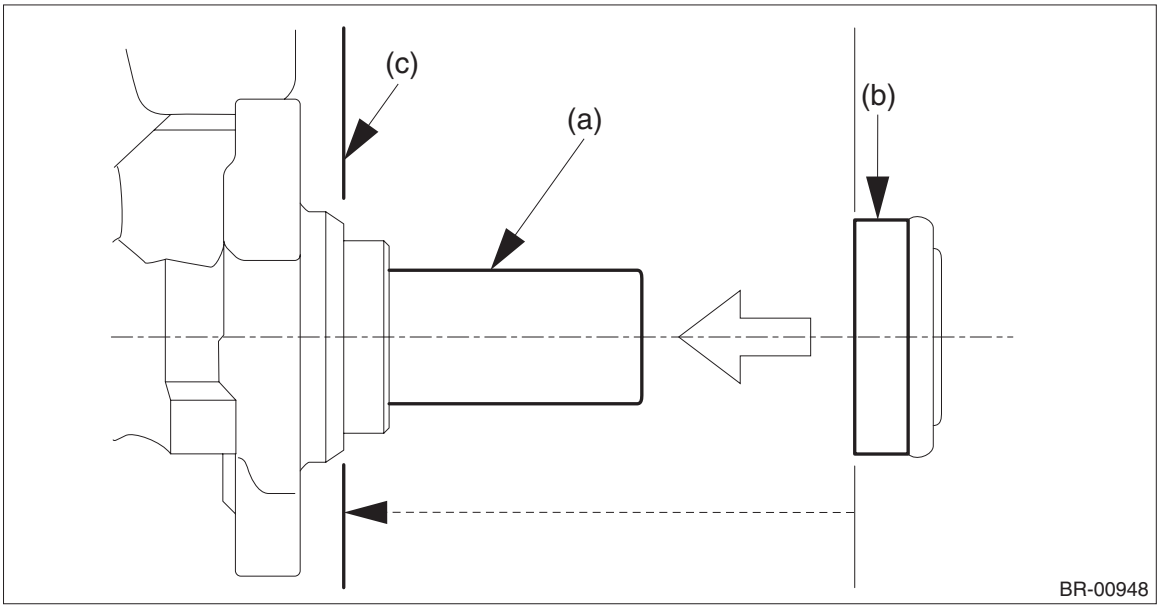
1) Check and adjust the operating rod of the vacuum booster assembly.
   (1) Measure the length between the vacuum booster assembly mounting surface and clevis pin hole.
   (2) If it is not within the specification, loosen the lock nut, rotate the vacuum booster assembly operating rod to adjust the rod length.

***Specification L:***
***136.3 mm (5.37 in)***



2) Install each part in the reverse order of removal.

**CAUTION:**
**• Apply grease to the snap pin to prevent the operating rod from wear.**
**• Replace the clevis pin with new parts, and apply thin coat of NIGTIGHT LYW No. 2 grease to the clevis pin.**
**• When installing the master cylinder assembly, replace the seal sub assembly with a new part, and install it to the vacuum booster assembly.**



(a) Primary piston
(b) Seal sub ASSY
(c) Install the seal sub assembly to this surface.

***Tightening torque:***
***Vacuum booster assembly: 18 N·m (1.84 kgf-m, 13.3 ft-lb)***
***Master cylinder assembly: 13 N·m (1.33 kgf-m, 9.6 ft-lb)***
***Brake pipe flare nut: 19 N·m (1.94 kgf-m, 14.0 ft-lb)***
***Operating lock nut: 22 N·m (2.24 kgf-m, 16.2 ft-lb)***
***Knee airbag module: 7.5 N·m (0.76 kgf-m, 5.5 ft-lb)***

3) Install the air conditioner pipe. <Ref. to AC-12, AIR CONDITIONING UNIT, COMPONENT, General Description.>
4) Bleed air from the brake system. <Ref. to BR-59, PROCEDURE, Air Bleeding.>
5) Perform a road test to make sure the brakes do not drag.

# C: INSPECTION

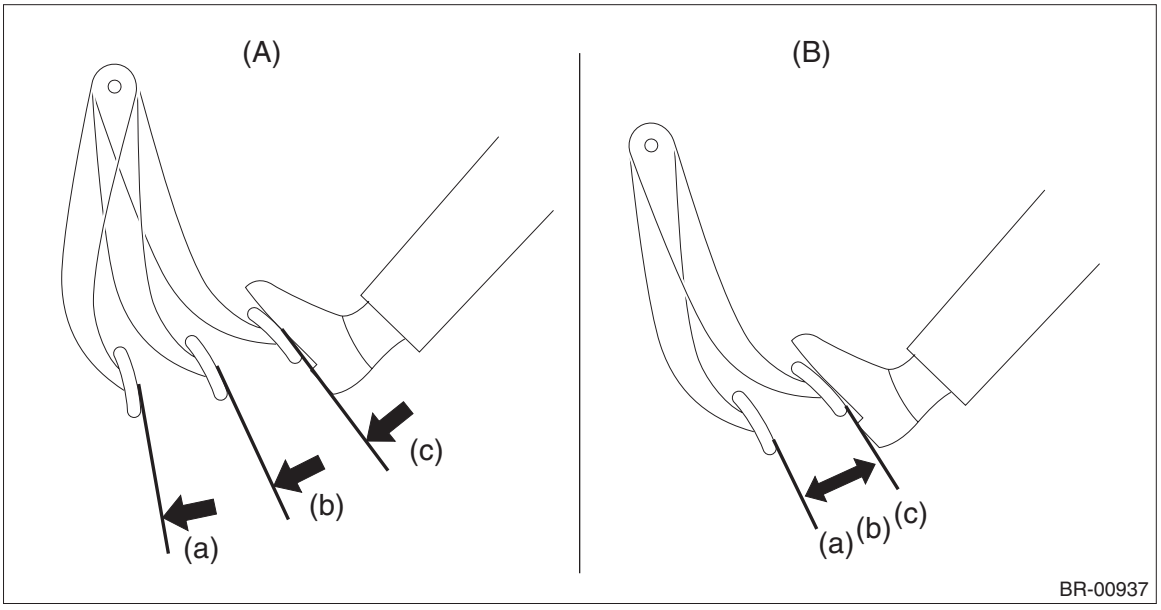
## 1. OPERATION CHECK WHEN NOT USING MEASURING DEVICES

**CAUTION:**
**When checking operation, be sure to apply the parking brake securely.**
When an operation check is performed with no measuring devices, a faulty part cannot be identified correctly. But it is possible to identify the outline of the defect by performing the check according to the following procedures.

- **Air tightness check**

1) Start the engine, and idle it for 1 to 2 minutes, then turn it OFF.
2) Depress the brake pedal several times applying the normal pedal force.

NOTE:
The pedal stroke should be the longest at the 1st depression, and it should become shorter at each successive depression.
3) If no change occurs in the pedal height when pressed, the vacuum booster assembly is faulty.



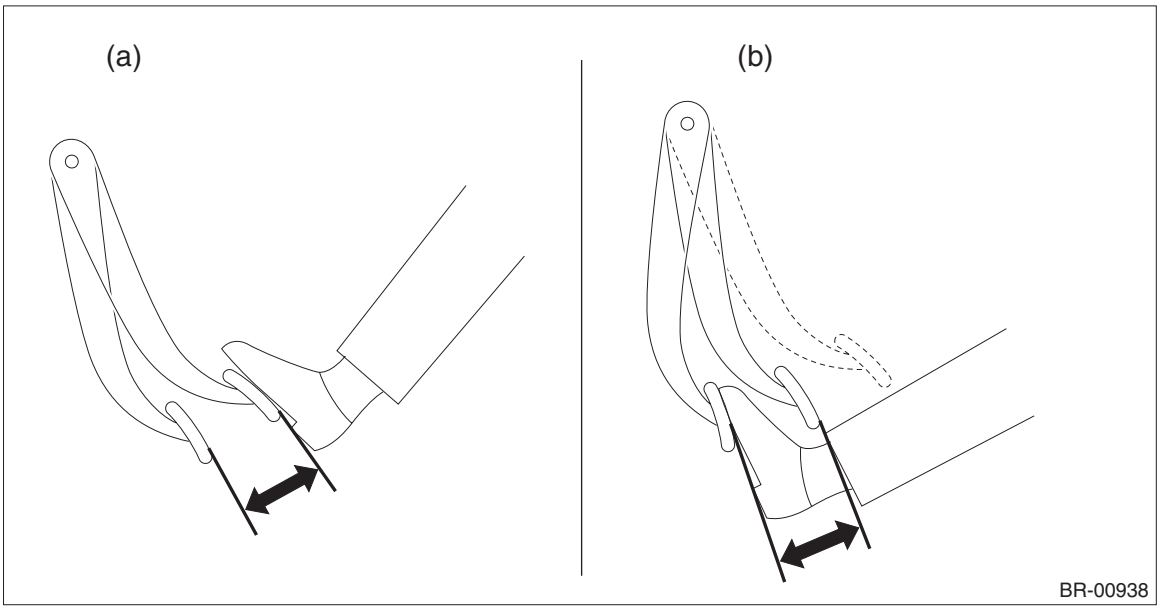
(A) Normal (B) Not OK

(a) 1st (b) 2nd (c) 3rd

NOTE:
- In case of defective operation, inspect the condition of the check valve and vacuum hose as well.
- Replace them if faulty, and perform the test again.
- If no improvement is observed, check precisely with gauges.

- **Check operation**

1) While the engine is OFF, depress the brake pedal several times applying the same pedal force, to check for a change in pedal height.



(a) When engine is stopped (b) When engine is started

2) With the brake pedal depressed, start the engine.
3) As the engine starts, the brake pedal should move slowly toward the floor. If the pedal height does not change, the vacuum booster assembly is faulty.

NOTE:
If a faulty part is detected after inspection, check precisely with measuring devices.

- **Loaded air tightness check**

Depress the brake pedal while the engine is running, and turn the engine to OFF while the pedal is depressed.
Keep the pedal depressed for 30 seconds. If the pedal height does not change, the function of vacuum booster assembly is normal. If the pedal height increases, it is faulty.

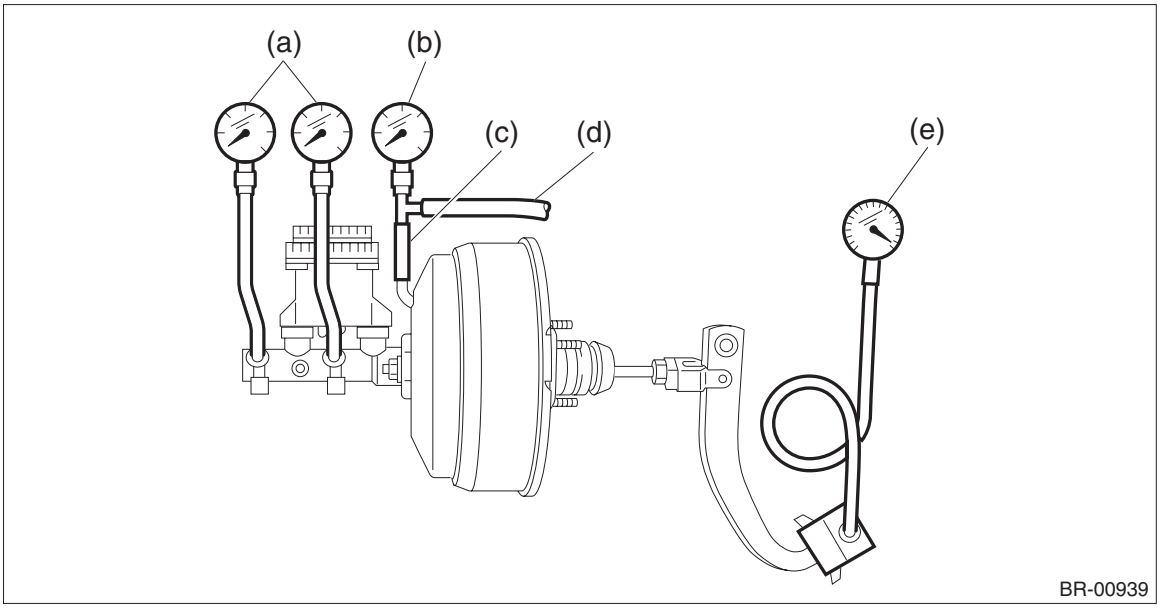
NOTE:
If a faulty part is detected after inspection, check precisely with measuring devices.

## 2. OPERATION CHECK WHEN USING MEASURING DEVICES

**CAUTION:**
**When checking operation, be sure to apply the parking brake securely.**

**• Check with measuring devices**

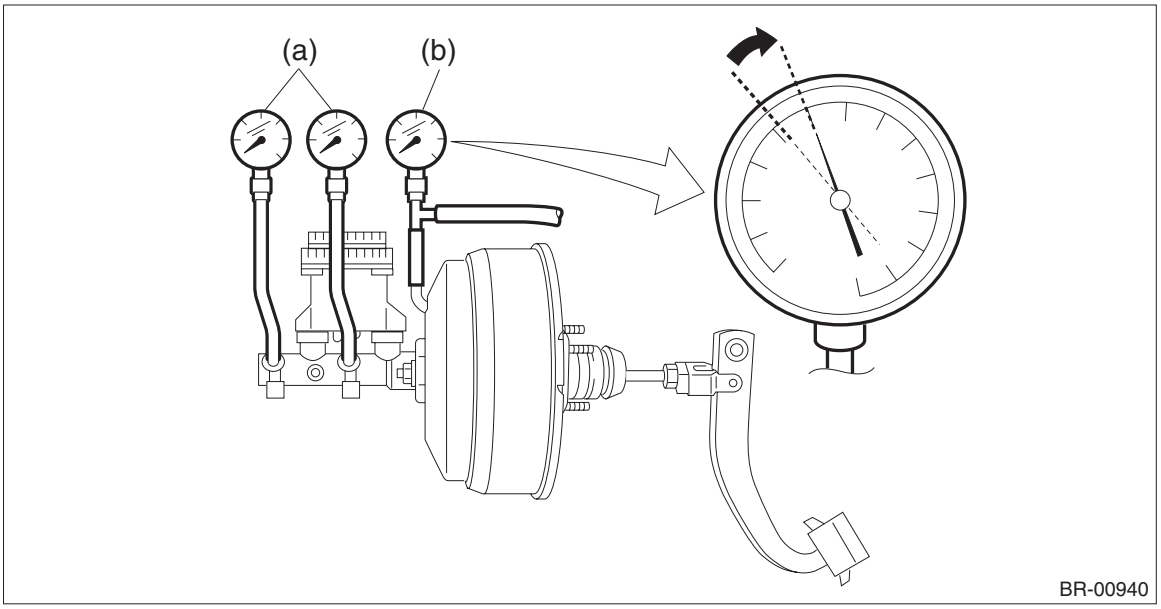
Connect a measuring device as shown in the figure. After bleeding air from the pressure gauge, perform each check.



(a) Pressure gauge
(b) Vacuum gauge
(c) Adapter hose
(d) Vacuum hose
(e) Pedal force gauge

**• Air tightness check**

1) Start the engine and keep it running at idle until vacuum pressure indicates 66.7 kPa (500 mmHg, 19.69 inHg) while the brake pedal is not depressed.



(a) Pressure gauge
(b) Vacuum gauge

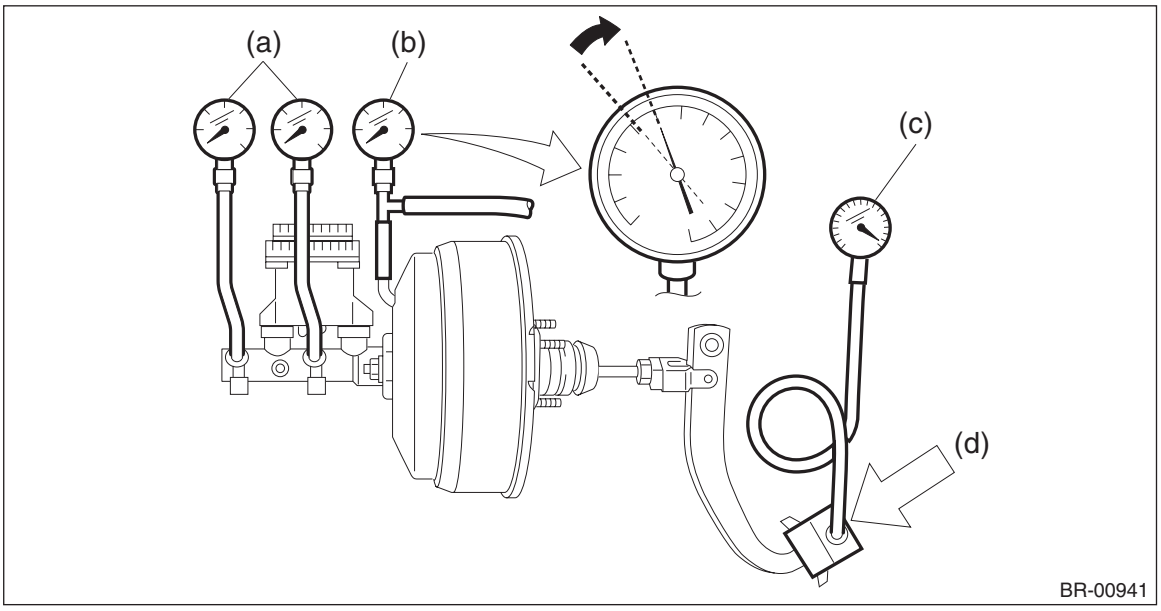
2) Stop the engine and check the vacuum pressure.
If the value matches the following standard, the vacuum booster assembly function is normal.

***Vacuum pressure: standard***
***The range of vacuum pressure drop within 15 seconds after stopping the engine is 3.3 kPa (25 mmHg, 0.98 inHg) or less.***

If a faulty part is detected after inspection, it may results from one of the following causes.
- Check valve malfunction
- Leak from vacuum hose
- Leak from shell joint section or stud bolt welded section
- Damaged diaphragm
- Leak from valve body seal and bearing section
- Leak from plate and seal assembly section
- Leak from poppet valve assembly section

**• Loaded air tightness check**

1) Start the engine and depress the brake pedal with a pedal force of 196 N (20 kgf, 44 lbf).
2) Keep the engine running at idle and the pedal depressed until vacuum pressure of the vacuum gauge indicates 66.7 kPa (500 mmHg, 19.69 inHg).



(a) Pressure gauge
(b) Vacuum gauge
(c) Pedal force gauge
(d) Depressed

3) Stop the engine and check the vacuum gauge.
If the value matches the following standard, the vacuum booster function is normal.

***Vacuum pressure: standard***
***The range of vacuum pressure drop within 15 seconds after stopping the engine is 3.3 kPa (25 mmHg, 0.98 inHg) or less.***

If a faulty part is detected after inspection, refer to “AIR TIGHTNESS CHECK”.
<Ref. to BR-53, INSPECTION, Brake Booster.>
4) If the vacuum booster assembly is faulty, replace it with a new part.

**• Lack of boost action check**

1) Turn the engine OFF, and set the value of the vacuum gauge to “0”.
2) Check the fluid pressure when the brake pedal is depressed. The pressure must be greater than the specification listed.

| | | |
|---|---|---|
| Brake pedal force: N (kgf, lbf) | 147 (15, 33) | 294 (30, 66) |
| Fluid pressure: kPa (kgf/cm$^2$, psi) | 533 (5, 77) | 1,551 (16, 225) |

**• Boosting action check**

1) Set the vacuum gauge reading to 66.7 kPa (500 mmHg, 19.69 inHg) with the engine running.
2) Check the fluid pressure when the brake pedal is depressed. The pressure must be greater than the specification listed.

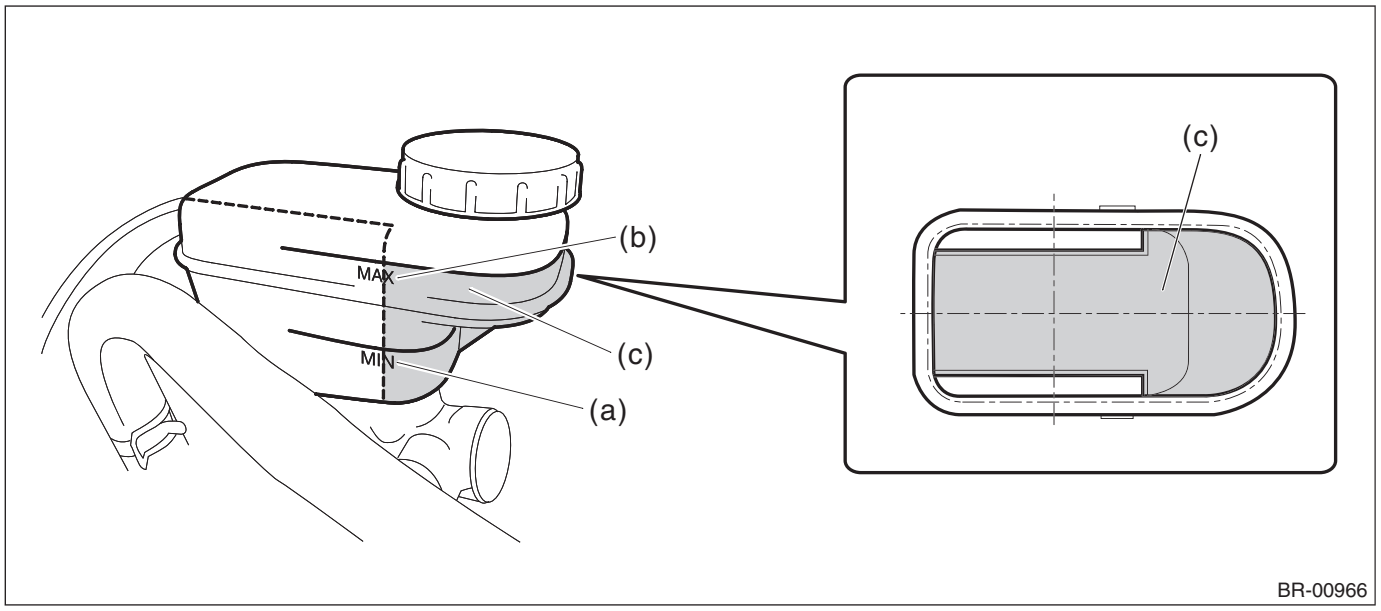
| | | |
|---|---|---|
| Brake pedal force: N (kgf, lbf) | 147 (15, 33) | 294 (30, 66) |
| Fluid pressure: kPa (kgf/cm$^2$, psi) | 6,177 (63, 896) | 11,273 (115, 1,635) |

# 10.Brake Fluid

## A: INSPECTION

1) Check that the amount of brake fluid is between the lines of “MIN” (a) and “MAX” (b) from a straight view or within 90° to the right and left forward.
If out of the specified range, refill with brake fluid (c) or drain it.
If the brake fluid level is close to “MIN”, check the brake pad for wear and refill with brake fluid.

**CAUTION:**
**Always check the level using the specified direction because there is a partition in the reservoir tank.**



2) Check the fluid for discoloration. If the fluid is extremely discolored, replace with the new fluid.

## B: REPLACEMENT

**CAUTION:**
**• Do not let brake fluid come into contact with the painted surface of the vehicle body. Wash away with water immediately and wipe off if it is spilled by accident.**
**• Avoid mixing brake fluid of different brands to prevent fluid performance from degrading.**
**• Be careful not to allow dirt or dust to enter the reservoir tank.**

NOTE:
• During the operation, keep the reservoir tank filled with brake fluid to prevent entry of air.
• Operate the brake pedal slowly.
• For convenience and safety, perform the work with 2 people.
• The required amount of brake fluid is approximately 500 mL (16.9 US fl oz, 17.6 Imp fl oz) for the entire brake system.
1) Lift up the vehicle and set rigid racks at the specified locations, or keep the vehicle lifted.
2) Remove both the front and rear wheels.
3) Drain brake fluid from the reservoir tank.
4) Refill the reservoir tank with recommended brake fluid.

***Recommended brake fluid:***
***FMVSS No. 116, DOT3, or DOT4***
Perform the same procedure as for bleeding the brake line, until new brake fluid comes out from vinyl tube. <Ref. to BR-59, PROCEDURE, Air Bleeding.>

# 11.Air Bleeding

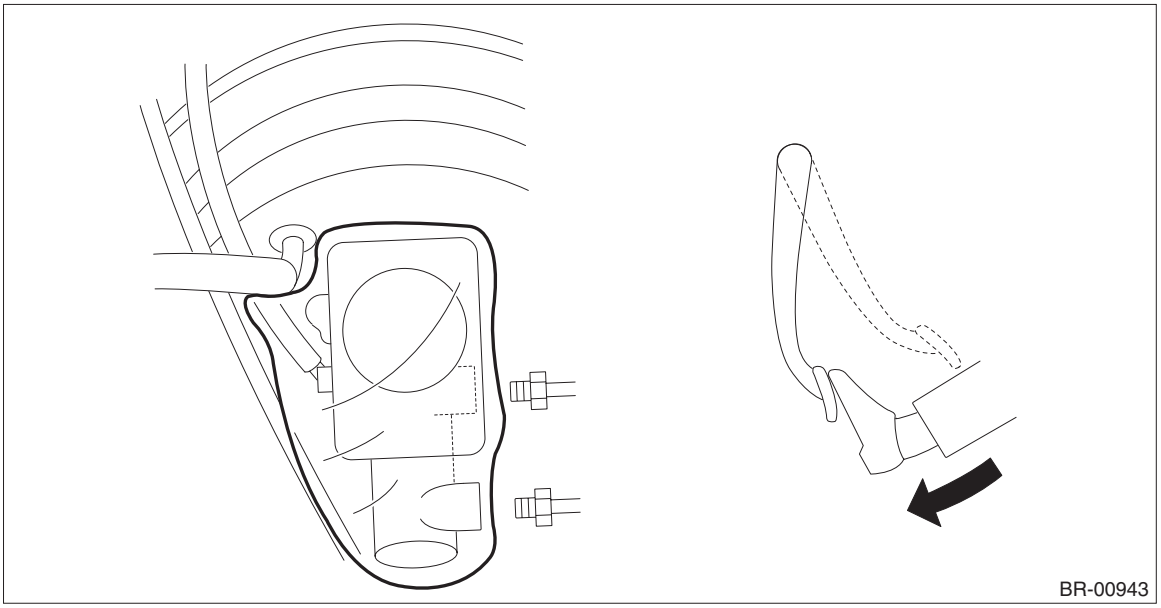
## A: PROCEDURE

**CAUTION:**
**• Do not let brake fluid come into contact with the painted surface of the vehicle body. Wash away with water immediately and wipe off if it is spilled by accident.**
**• Avoid mixing brake fluid of different brands to prevent fluid performance from degrading.**
**• Be careful not to allow dirt or dust to enter the reservoir tank.**

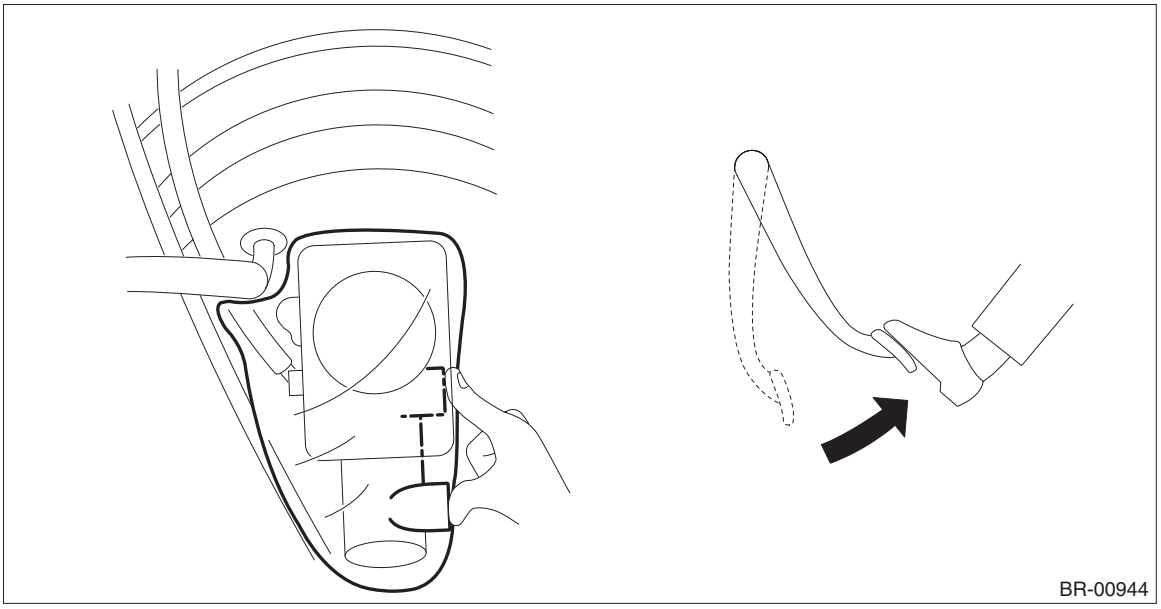
### 1. MASTER CYLINDER

NOTE:
• When the master cylinder assembly is replaced or the reservoir tank is empty, bleed the brake master cylinder and the clutch master cylinder (MT model).
• If bleeding of the master cylinder assembly is not necessary, omit the following procedures, and perform bleeding of the brake line. <Ref. to BR-60, BRAKE LINE, PROCEDURE, Air Bleeding.>
1) Add the brake fluid to the reservoir tank of the master cylinder assembly.

NOTE:
• MT model: Add the brake fluid until it flows out from the clutch hose nipple.
• Except for MT model: Add the brake fluid up to the “MAX” level.
• While bleeding air, keep the reservoir tank filled with brake fluid at MIN level or higher to prevent entry of air.
2) Disconnect the brake line at primary and secondary sides.
3) Wrap the master cylinder assembly with a plastic bag.
4) Depress the brake pedal slowly and hold it.



5) Plug the outlet plug with your finger, and then release the brake pedal.



6) Repeat the step 4) and 5) several times.
7) Remove the plastic bag.
8) Install the brake pipe to the master cylinder assembly.

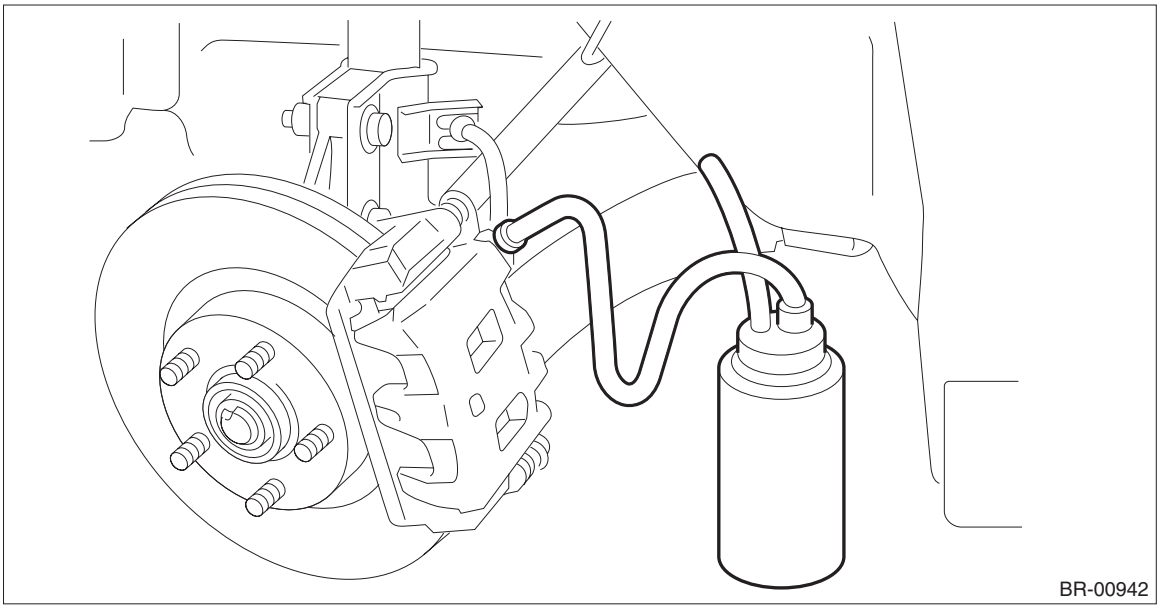
***Tightening torque:***
***Brake pipe flare nut: 19 N·m (1.94 kgf-m, 14.0 ft-lb)***

9) Bleed air from the brake line. <Ref. to BR-60, BRAKE LINE, PROCEDURE, Air Bleeding.>

## 2. BRAKE LINE

1) When the master cylinder assembly is replaced or the reservoir tank is empty, bleed the master cylinder assembly before bleeding the brake line. <Ref. to BR-59, MASTER CYLINDER, PROCEDURE, Air Bleeding.>
2) Fill the reservoir tank of the master cylinder assembly with brake fluid.

NOTE:
While bleeding air, keep the reservoir tank filled with brake fluid to prevent entry of air.
3) Attach one end of the vinyl tube to the bleeder - screw and the other end to the brake fluid container.

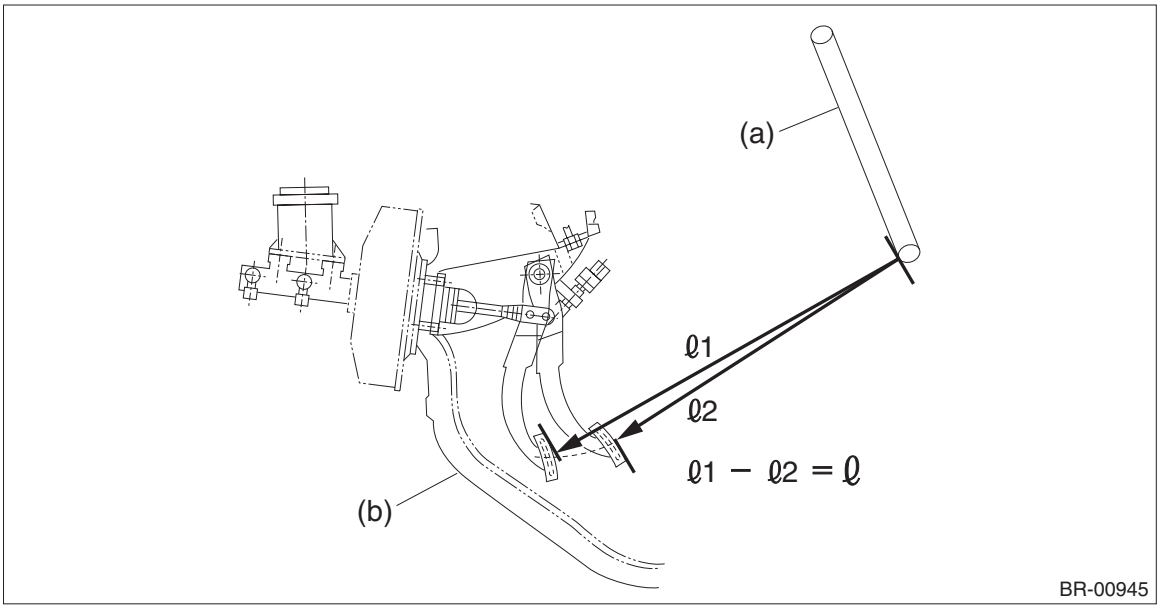


4) Depress the brake pedal several times, and hold it.

5) Loosen the bleeder - screw to drain brake fluid. Tighten the bleeder - screw quickly, and release the brake pedal.
6) Repeat the steps 4) to 5) until there are no more air bubbles in the vinyl tube.
7) Repeat the steps from 2) to 6) above to bleed air from each wheel.

NOTE:
Perform air bleed starting in the order from the farthest wheel cylinder from the master cylinder assembly.
8) Securely tighten the bleeder - screw.

***Tightening torque:***
***Bleeder - screw: 8 N·m (0.82 kgf-m, 5.9 ft-lb)***
9) Check that there are no brake fluid leaks in the entire brake system.
10) Check the pedal stroke.
(1) Warm up the engine until the engine speed stabilizes.
(2) Depress and hold the brake pedal with a force of 500 N (51 kgf, 112 lbf).
(3) Adjust the tilt position of the steering wheel to the lowest position.
(4) Measure the distance between brake pedal and steering wheel.
(5) Release the pedal, and measure the distance between pedal and steering wheel again.



(a) Steering wheel (b) Toe board

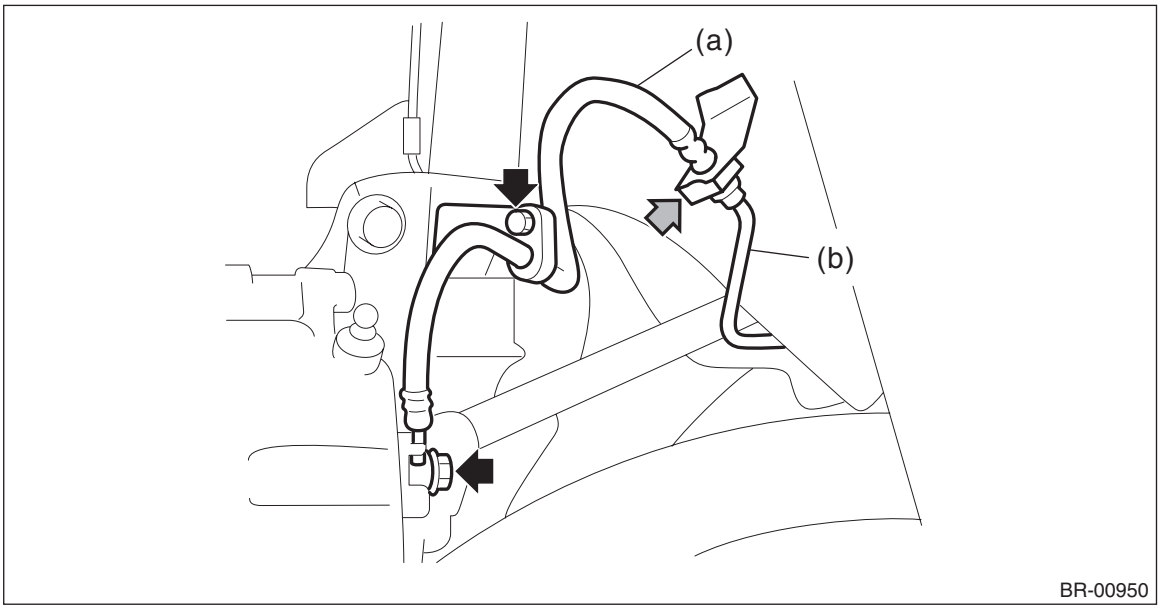
***Specification of pedal stroke:***
***110 mm (433 in) or less when depressing the pedal with a force of 500 N (51 kgf, 112 lbf)***
11) If the distance is more than specification, there is a possibility of air being caught in the brake line. Bleed the brake line of all air until the pedal stroke meets the specification.
12) Operate the hydraulic control unit in the sequence control mode. <Ref. to VDC-20, ABS Sequence Control.>
13) Check the pedal stroke again.
14) If the distance is more than specification, there is a possibility of air being caught in the hydraulic unit. Repeat above steps 2) to 9) until the pedal stroke meets the specification.
15) Fill the reservoir tank with brake fluid up to the “MAX” level.
16) Perform a road test and ensure that the brakes operate normally.

# 12.Brake Hose

## A: REMOVAL

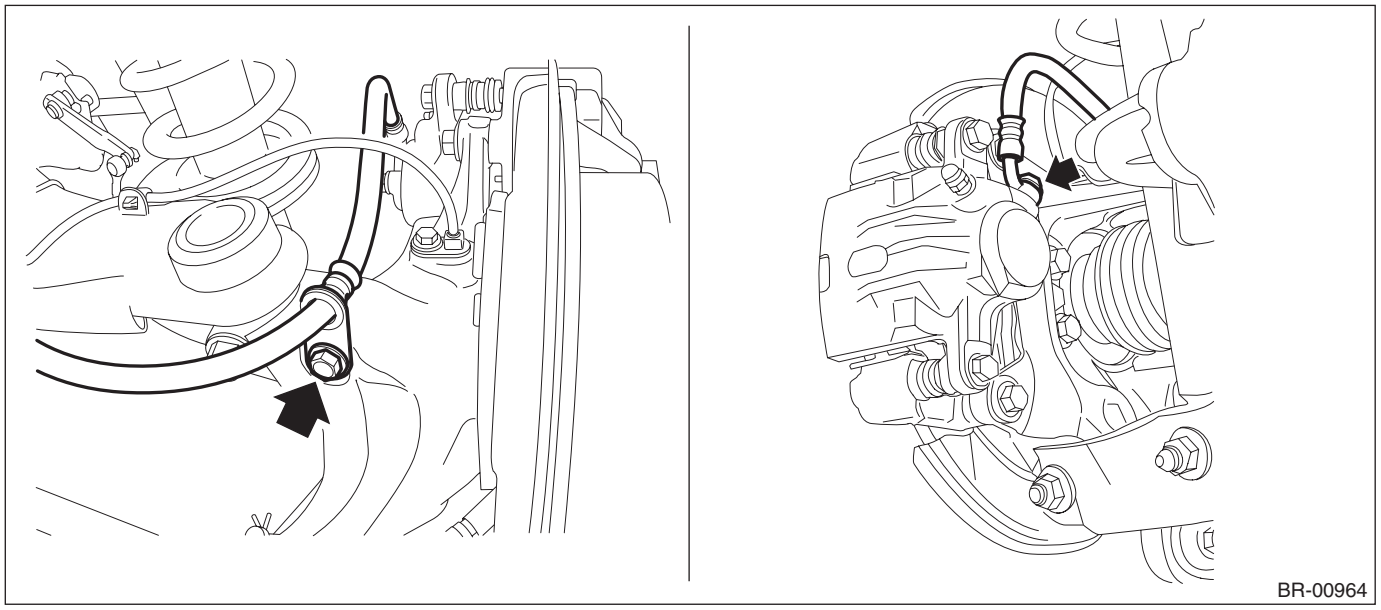
### 1. FRONT BRAKE HOSE

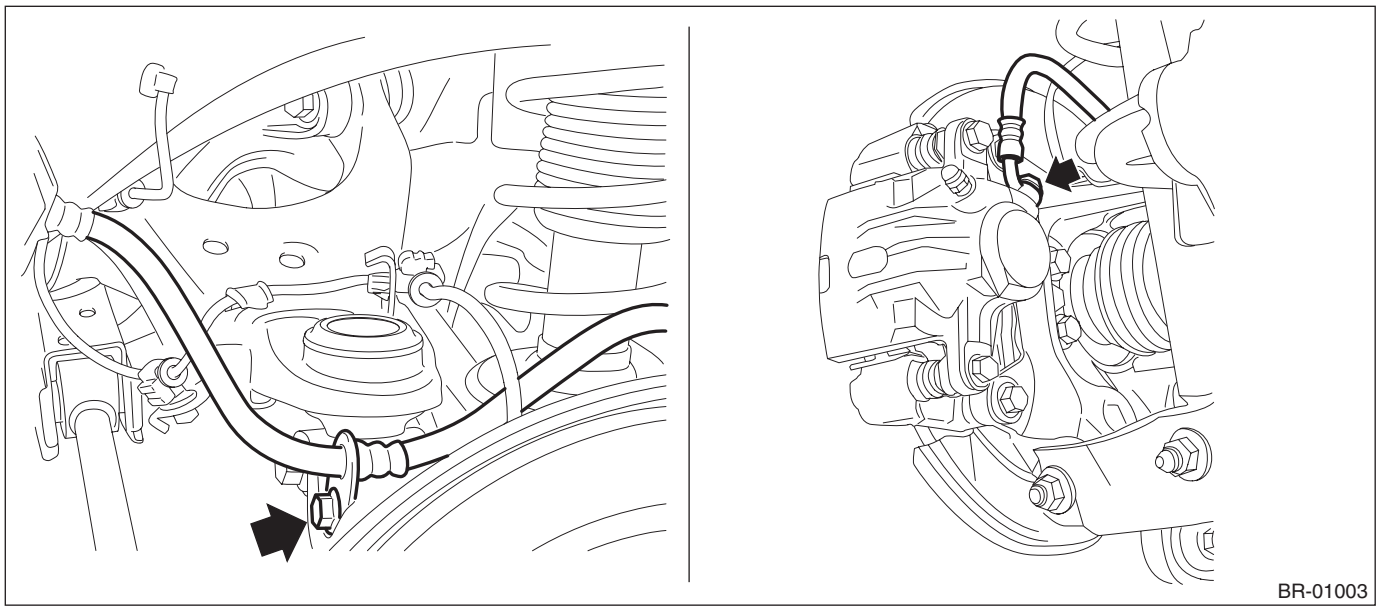
1) Separate the brake pipe (b) from brake hose (a) using a flare nut wrench.
2) Remove the clamp, strut mounting bolt and union bolt, and remove the front brake hose.



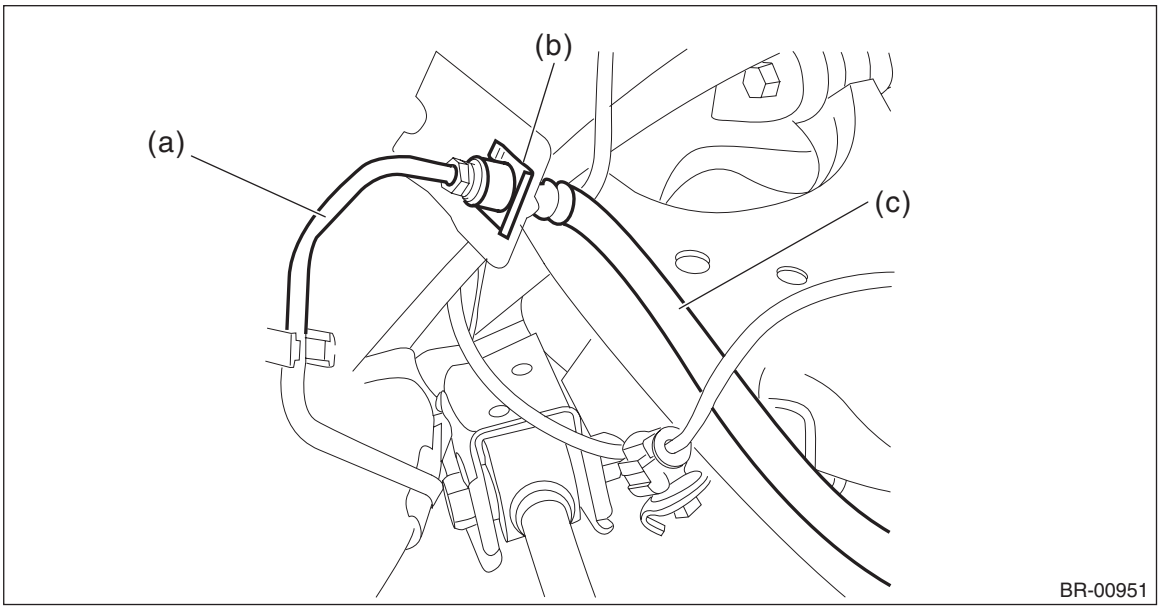
### 2. REAR BRAKE HOSE

1) Remove the brake hose bracket bolt and union bolt.





2) Separate the brake pipe (a) using a flare nut wrench.
3) Remove the brake hose clamp (b), and remove the rear brake hose (c).



## B: INSTALLATION

### 1. FRONT BRAKE HOSE

1) Secure the brake hose to strut mount.

***Tightening torque:***
***Brake hose: 33 N·m (3.36 kgf-m, 24.3 ft-lb)***

2) Connect the brake hose to the front caliper body assembly using a new gasket.

***Tightening torque:***
***Union bolt: 18 N·m (1.84 kgf-m, 13.3 ft-lb)***

3) Position the disc in straight position and route the brake hose through the hole in the bracket on the wheel apron side.

**CAUTION:**
**Do not twist the brake hose.**

4) Temporarily tighten the flare nut which connects brake pipe and hose.
5) Secure the brake hose to wheel apron bracket with clamp.
6) Tighten the flare nut to the specified torque.

***Tightening torque:***
***Brake pipe flare nut: 15 N·m (1.53 kgf-m, 11.1 ft-lb)***

7) Bleed air from the brake system. <Ref. to BR-59, PROCEDURE, Air Bleeding.>

### 2. REAR BRAKE HOSE

1) Route the brake hose through the hole of bracket, and lightly tighten the flare nut to connect brake pipe.
2) Insert the clamp to secure brake hose.

***Tightening torque:***
***Brake hose bracket: 33 N·m (3.36 kgf-m, 24.3 ft-lb)***

3) Install the brake hose to rear caliper body using a new gasket.

***Tightening torque:***
***Union bolt: 18 N·m (1.84 kgf-m, 13.3 ft-lb)***

4) Tighten the flare nut to the specified torque.

***Tightening torque:***
***Brake pipe flare nut: 15 N·m (1.53 kgf-m, 11.1 ft-lb)***

5) Bleed air from the brake system. <Ref. to BR-59, PROCEDURE, Air Bleeding.>

## C: INSPECTION

Check the hose for crack, interference with other parts, damage, and fluid leakage on connecting sections. If any faulty is found, repair or replace the relevant part.

# 13.Brake Pipe

## A: REMOVAL

**CAUTION:**
**• Yellow connectors and harnesses with yellow tapes around them are the connectors and harnesses for the airbag system. Using a tester above such circuits may cause malfunction of airbag system. Follow the cautions for "AIRBAG SYSTEM" in this case. <Ref. to AB-11, CAUTION, General Description.>**
**• Be careful not to damage the airbag system wiring harness when servicing the center brake pipe.**
**• When removing the brake pipe, do not bend.**

NOTE:
The airbag system wiring harness is routed near the center brake pipe.

## B: INSTALLATION

**CAUTION:**
**• Yellow connectors and harnesses with yellow tapes around them are the connectors and harnesses for the airbag system. Using a tester above such circuits may cause malfunction of airbag system. Follow the cautions for "AIRBAG SYSTEM" in this case. <Ref. to AB-11, CAUTION, General Description.>**
**• Be careful not to damage the airbag system wiring harness when servicing the center brake pipe.**
**• When installing the brake pipe, do not bend.**
**• After installing the brake pipe and hose, perform air bleed.**
**• After installing the brake hoses, make sure that they do not contact the tires or suspension assembly, etc.**

NOTE:
The airbag system wiring harness is routed near the center brake pipe.

***Tightening torque:***
***Front brake pipes & hoses: <Ref. to BR-8, FRONT BRAKE PIPES AND HOSES, COMPONENT, General Description.>***
***Center & rear brake pipes and hoses: <Ref. to BR-9, CENTER AND REAR BRAKE PIPES AND HOSES, COMPONENT, General Description.>***

## C: INSPECTION

Check the pipe for crack and damage, and also check the connection for fluid leakage. If any faulty is found, repair or replace the relevant part.

NOTE:
Use a mirror when inspecting back sides and other locations which are hard to see.

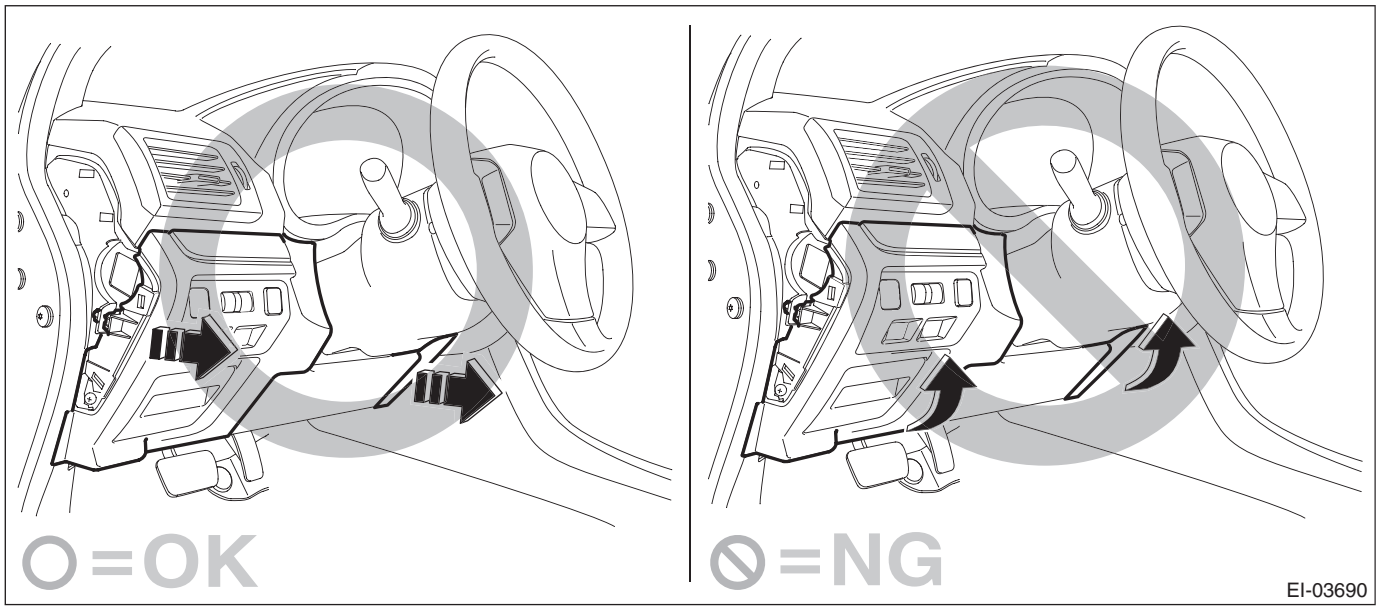
# 14.Brake Pedal

## A: REMOVAL

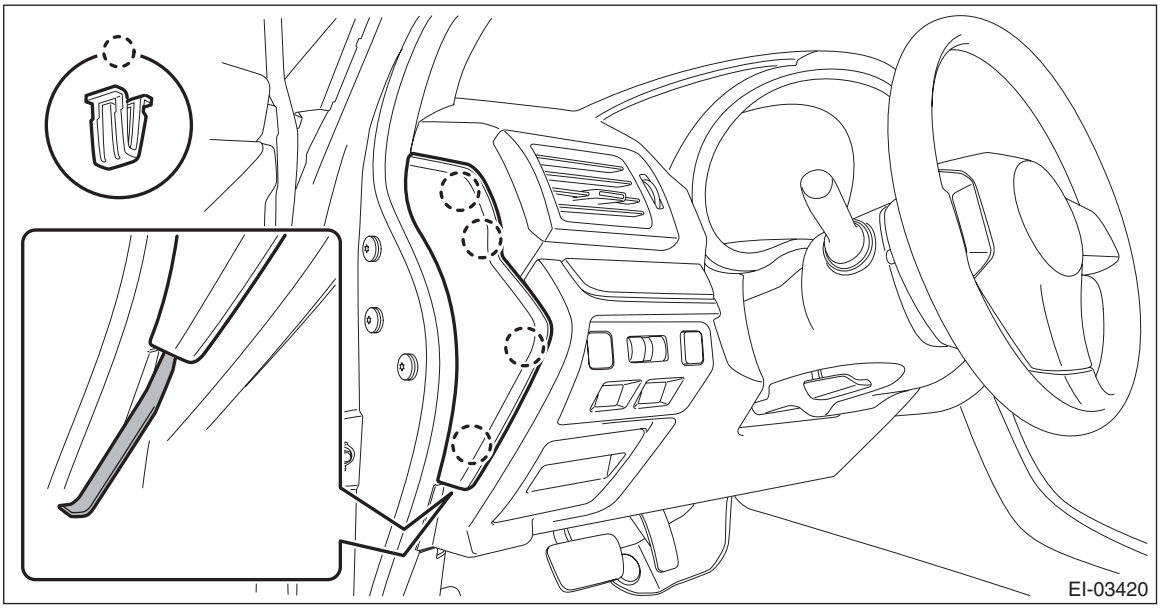
### 1. CVT MODEL

1) Disconnect the ground cable from battery and wait for at least 60 seconds before starting work.
2) Remove the cover assembly - instrument panel LWR driver.

**CAUTION:**
**When removing the cover assembly - instrument panel LWR driver, be sure to pull it toward you. If attempting to remove by turning it upward, the claws may be damaged.**



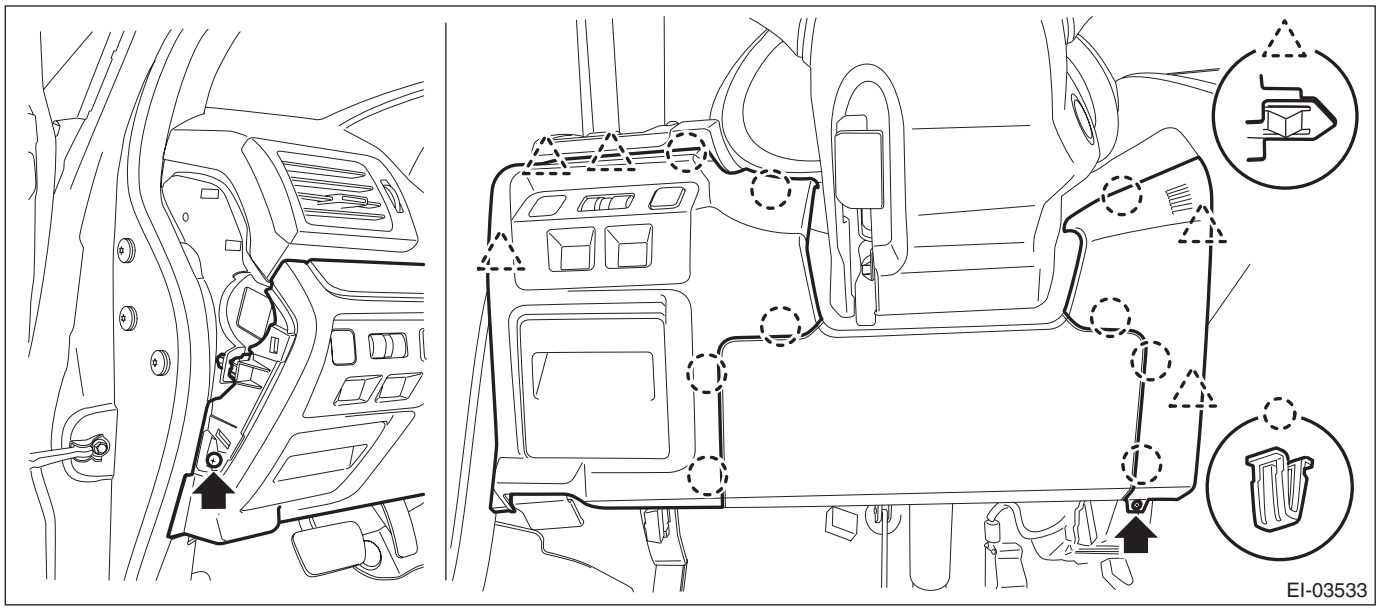
(1) Remove the clips, and remove the cover - instrument panel side LH.



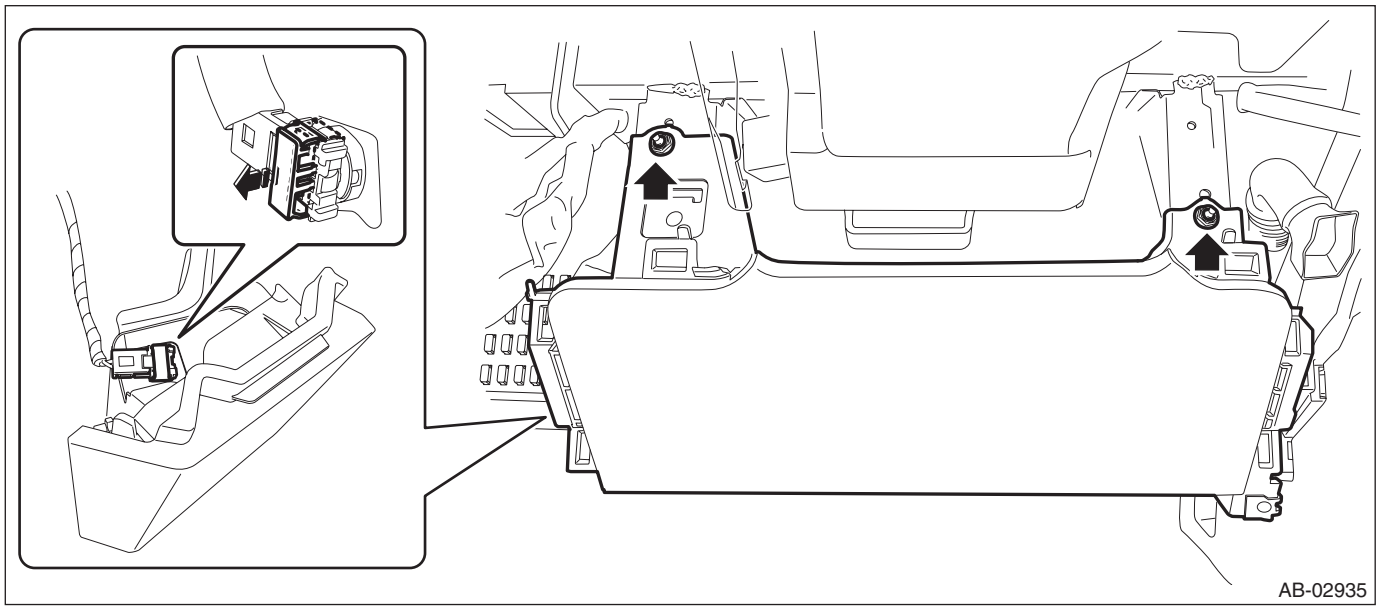
NOTE:
Using a plastic remover, open the cover - instrument panel side LH.

(2) Remove the screws and release the clips and claws.

(3) Disconnect the harness connectors, and remove the cover assembly - instrument panel LWR driver INN and OUT.

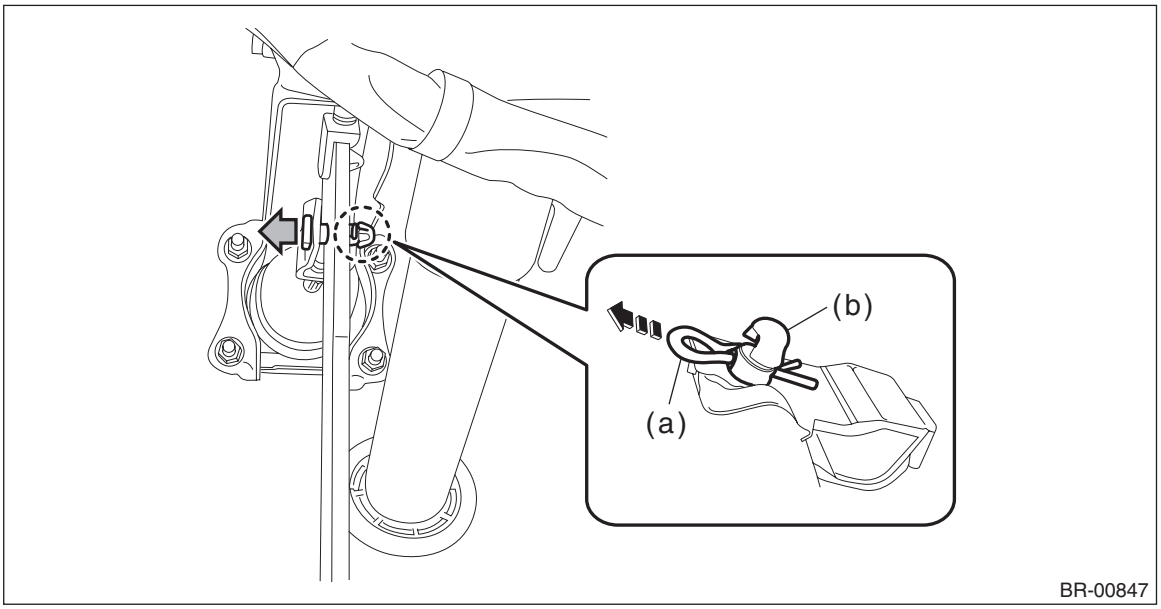


3) Remove the nuts to remove the knee airbag module and disconnect the harness connector. <Ref. to AB-33, KNEE AIRBAG MODULE, PROCEDURE, Airbag Connector.>

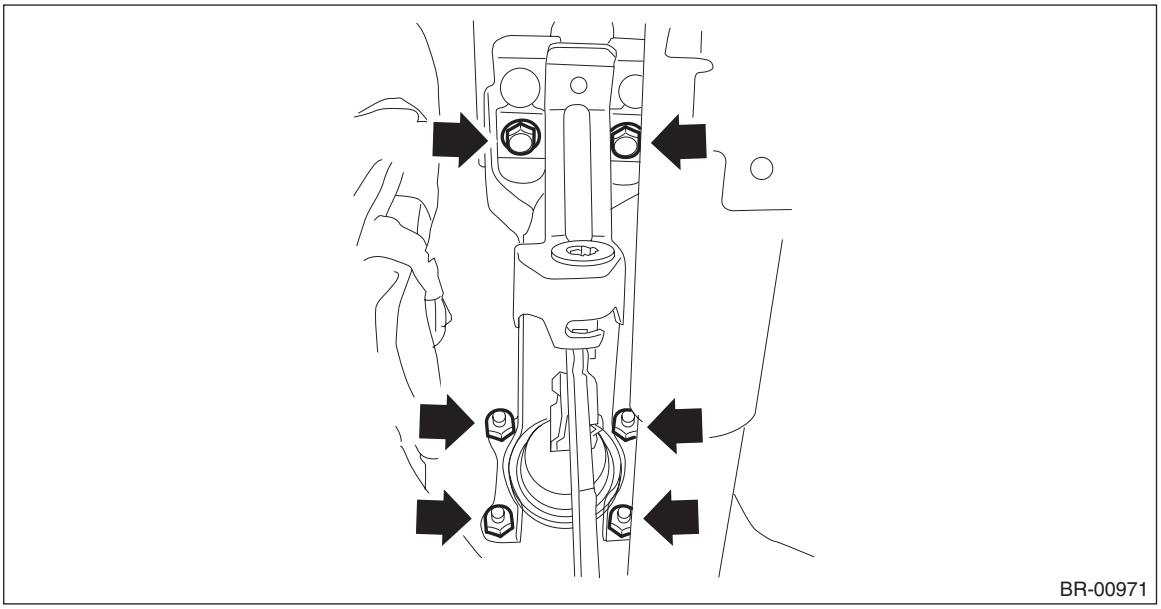


4) Remove the brake pedal assembly.
(1) Disconnect the switch - stop light connector.
(2) Remove the snap pin (a) and clevis pin (b), and remove the operating rod from the brake pedal.

**CAUTION:**
**• Be careful not to apply excessive force to the operating rod when handling the operating rod. The angle may change by ±3°, and it may result in damage to power piston cylinder.**
**• Do not change the push rod length.**



(3) Remove the bolt and nut, and then detach the brake pedal assembly.



## 2. MT MODEL

NOTE:
Brake pedal is integrated with the clutch pedal.
For removal procedures of the brake pedal, refer to Clutch section. <Ref. to CL-22, REMOVAL, Clutch Pedal.>

## B: INSTALLATION

1) Install each part in the reverse order of removal.

**CAUTION:**
- **Apply grease to the snap pin to prevent the operating rod from wear.**
- **Replace the clevis pin with new parts, and apply thin coat of NIGTIGHT LYW No. 2 grease to the clevis pin.**

***Tightening torque:***
***Brake pedal: 18 N·m (1.84 kgf-m, 13.3 ft-lb)***
***Knee airbag module: 7.5 N·m (0.76 kgf-m, 5.5 ft-lb)***

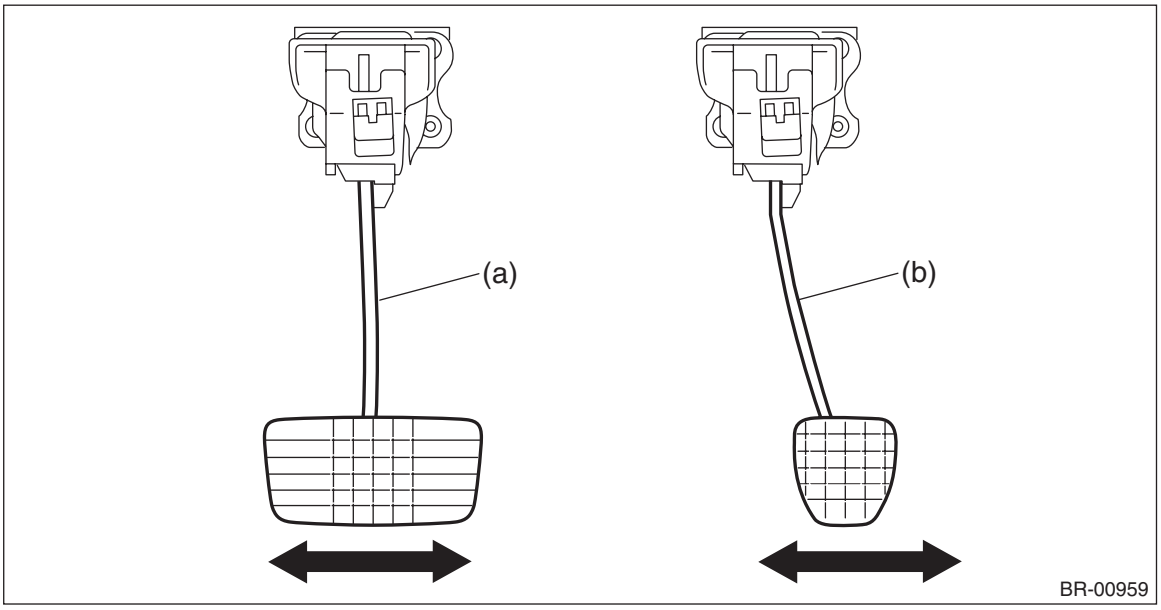
2) Check that the brake light operate properly.
3) Check the brake pedal after installation. <Ref. to BR-69, INSPECTION, Brake Pedal.>

## C: INSPECTION

1) Move the pad - brake pedal in a horizontal direction with a force of approx. 10 N (1 kgf, 2 lbf), and check that the pedal deflection is in the range of specifications.

**CAUTION:**
**If excessive deflection is noted, replace with a new bushing.**

***Deflection of brake pedal:***
***Wear limit: 5.0 mm (0.197 in) or less***

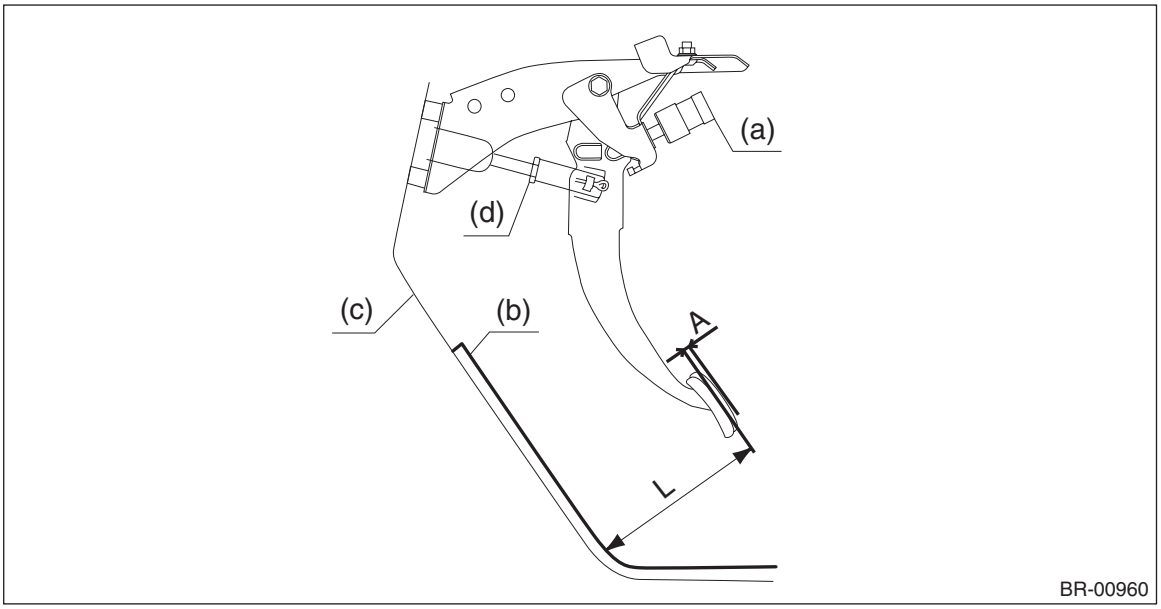


(a) Brake pedal (except for MT model) (b) Brake pedal (MT model)

2) Check the position of the pedal pad.

***Pedal height L:***
***140 — 150 mm (5.51 — 5.91 in)***

***Brake pedal free play A:***
***0.5 — 2 mm (0.020 — 0.079 in) [When pulling the brake pedal upward with a force of less than 10 N (1 kgf, 2 lbf).]***



(a) Switch - stop light
(b) Mat
(c) Toe board
(d) Brake booster operating rod

3) If it is not within the specification, loosen the lock nuts of vacuum booster operating rod, and rotate the rod to adjust the pedal height L within the specification.
4) Tighten the lock nut.

***Tightening torque:***
***Operating lock nut: 22 N·m (2.24 kgf-m, 16.2 ft-lb)***

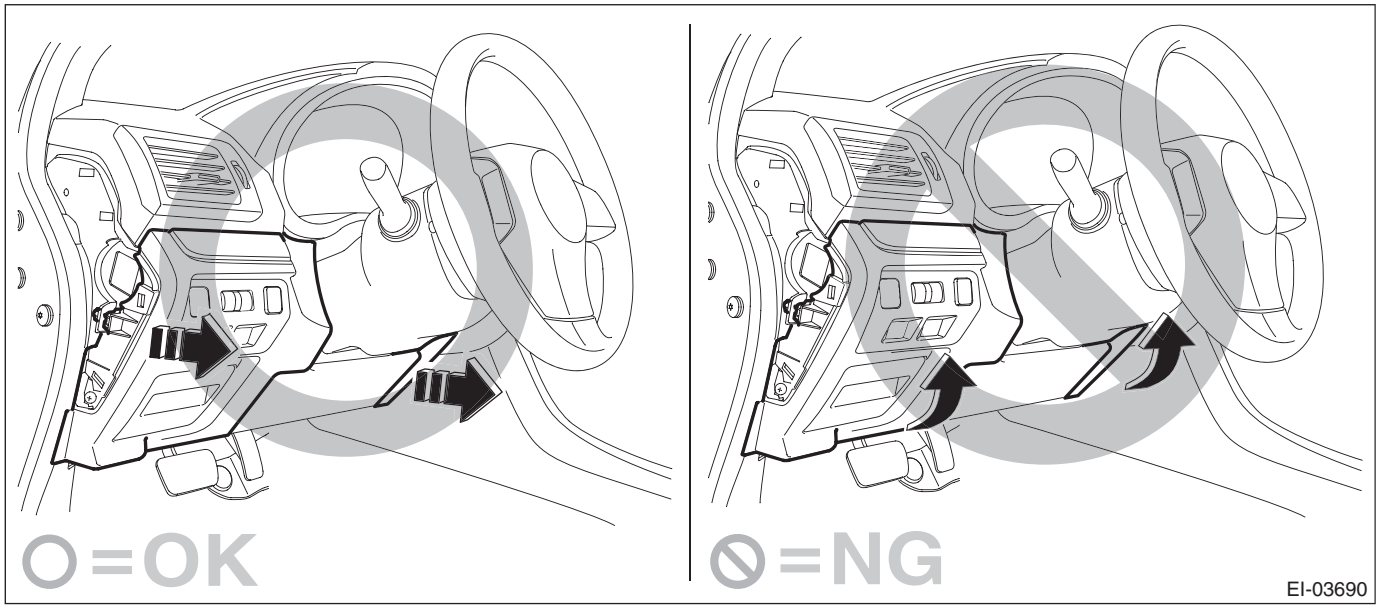
NOTE:
Check the brake pedal height. When adjusting, also adjust the switch - stop light.

# 15.Stop Light Switch

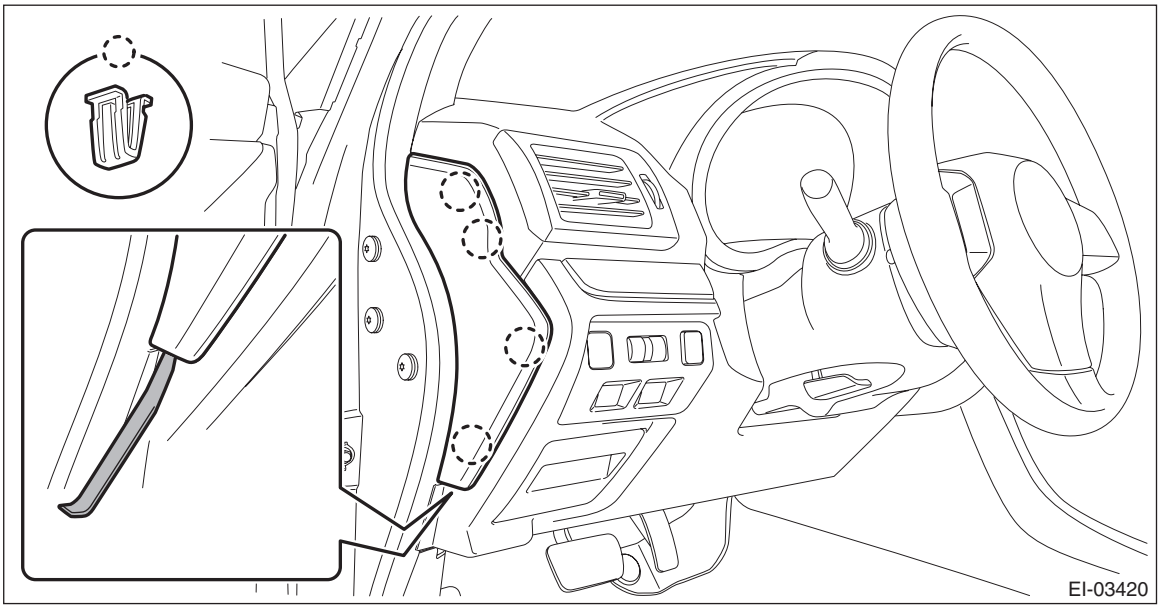
## A: REMOVAL

1) Disconnect the ground cable from battery and wait for at least 60 seconds before starting work.
2) Remove the cover assembly - instrument panel LWR driver.

**CAUTION:**
**When removing the cover assembly - instrument panel LWR driver, be sure to pull it toward you. If attempting to remove by turning it upward, the claws may be damaged.**



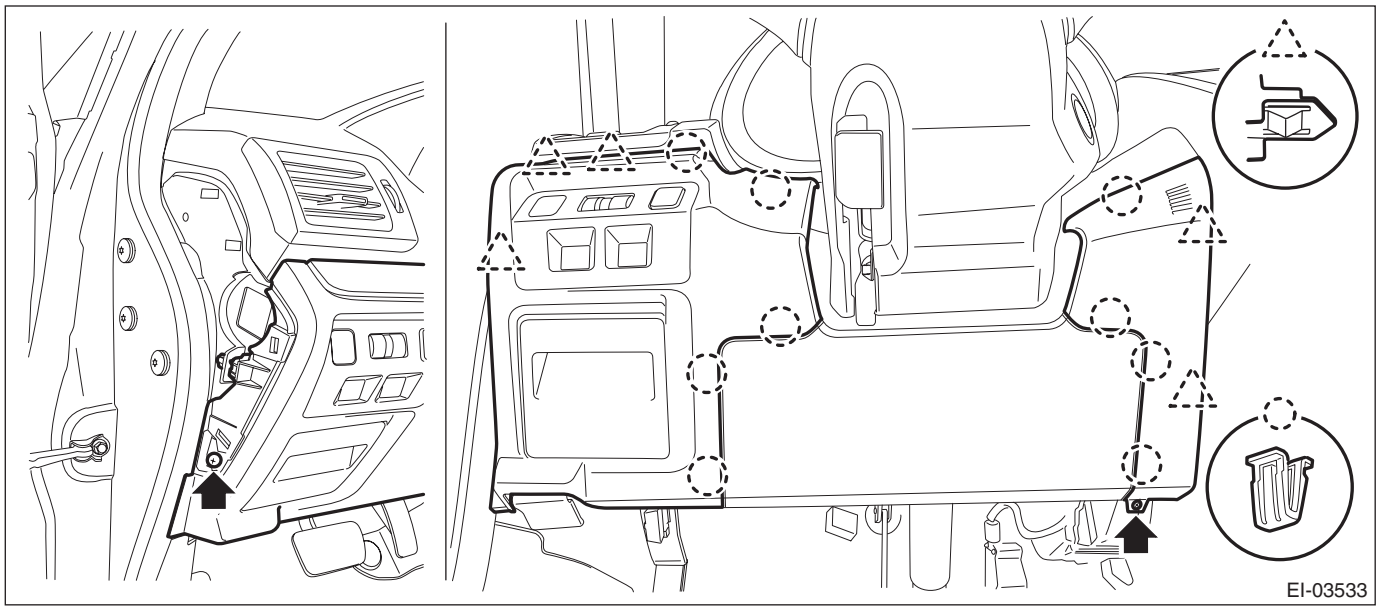
(1) Remove the clips, and remove the cover - instrument panel side LH.



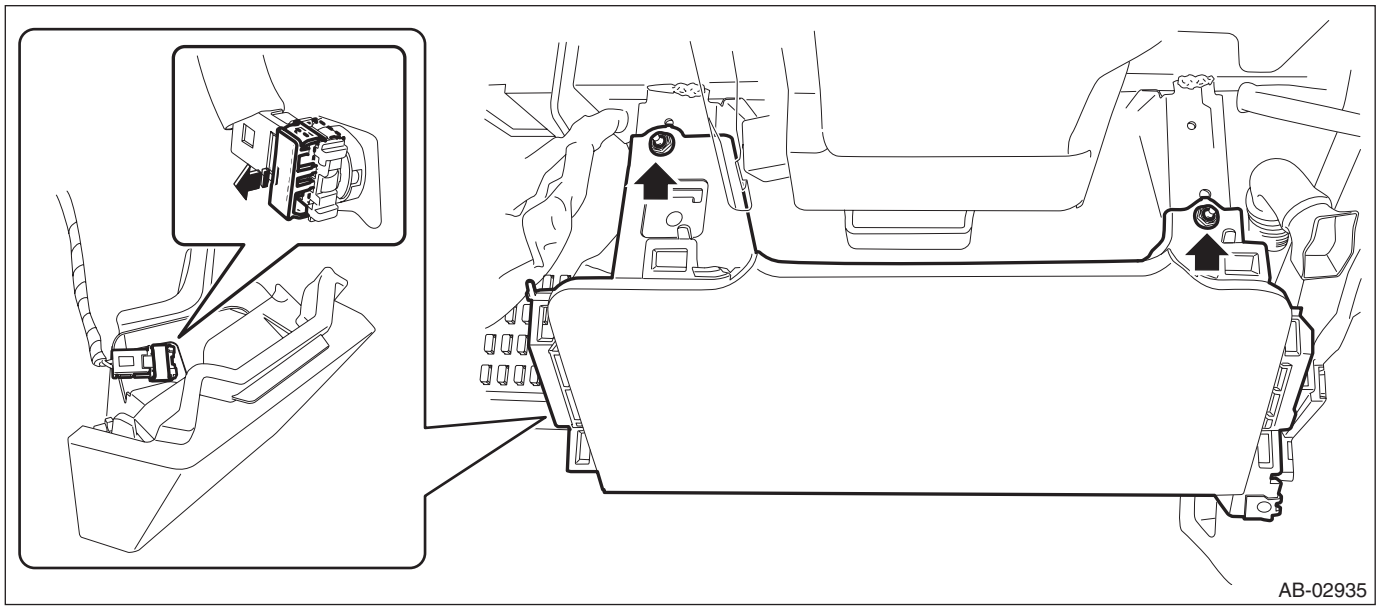
NOTE:
Using a plastic remover, open the cover - instrument panel side LH.

(2) Remove the screws and release the clips and claws.

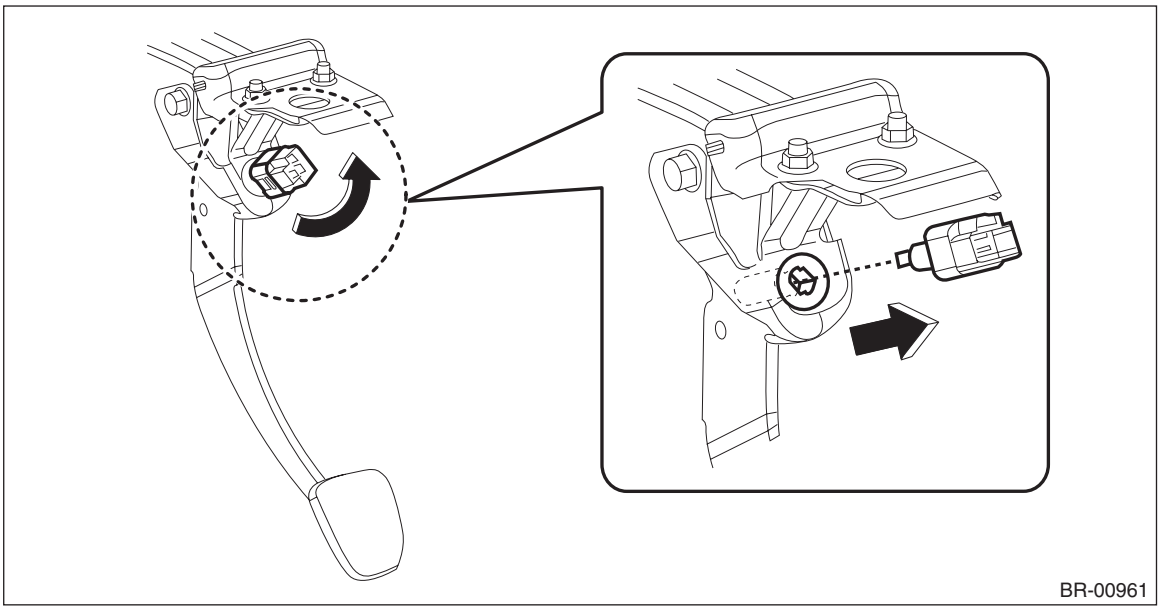
(3) Disconnect the harness connectors, and remove the cover assembly - instrument panel LWR driver INN and OUT.



3) Remove the nuts to remove the knee airbag module and disconnect the harness connector. <Ref. to AB-33, KNEE AIRBAG MODULE, PROCEDURE, Airbag Connector.>



4) Remove the switch - stop light.
(1) Disconnect the switch - stop light connector.
(2) Remove the switch - stop light by turning it counterclockwise.



## B: INSTALLATION

1) Adjust the position of the switch - stop light, and then secure the stop light switch by turning it clockwise. <Ref. to BR-76, ADJUSTMENT, Stop Light Switch.>
2) Install each part in the reverse order of removal.

***Tightening torque:***
***Knee airbag module: 7.5 N·m (0.76 kgf-m, 5.5 ft-lb)***

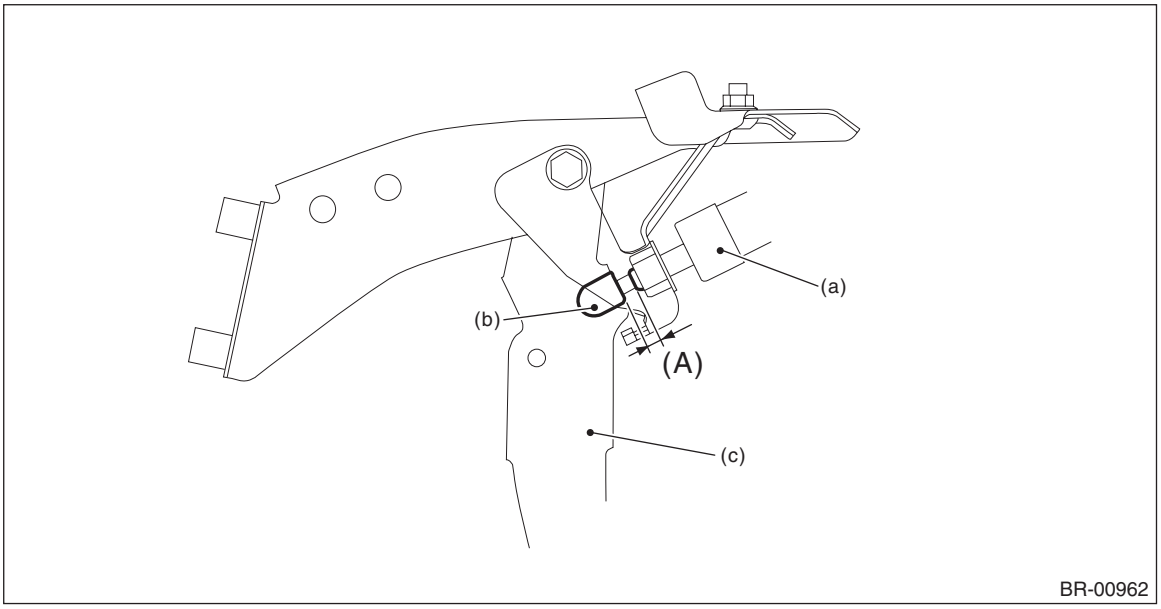
# C: INSPECTION

## 1. CLEARANCE CHECK

1) Measure the clearance between the end of the switch - stop light and the stopper.

***Specification:***

***Clearance (A) of the switch - stop light: 1 mm — 2 mm (0.04 in — 0.08 in)***



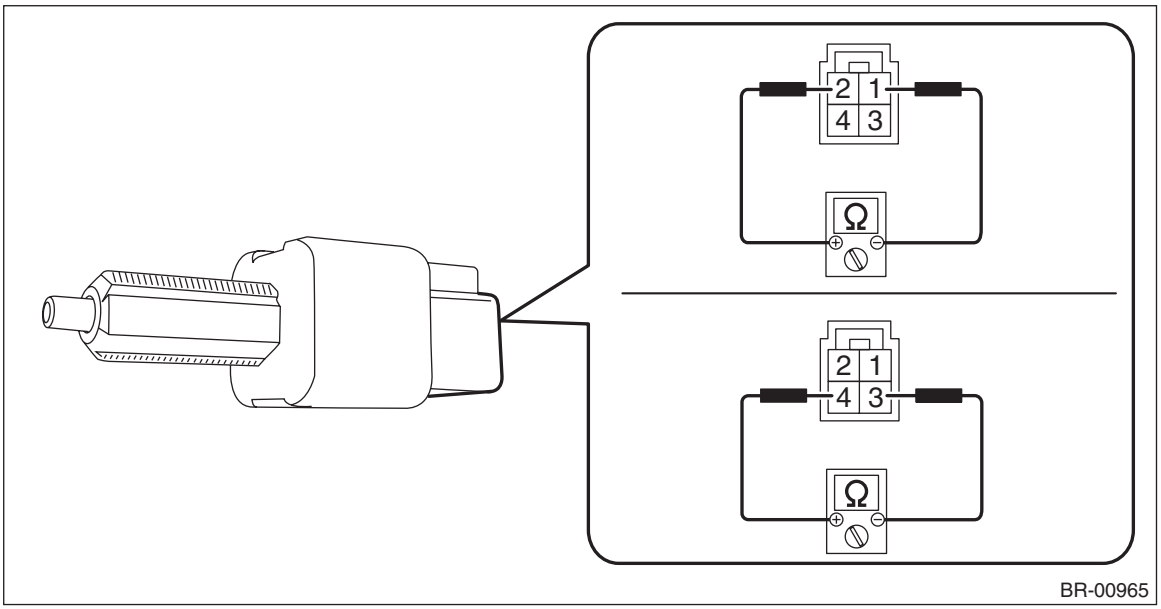
(a) Switch - stop light (b) Stopper (c) Brake pedal

2) Adjust the position of the switch - stop light if the inspection result is not within the standard value. <Ref. to BR-76, ADJUSTMENT, Stop Light Switch.>

## 2. CHECK RESISTANCE

1) Disconnect the switch - stop light connector.
2) Check the resistance between the terminals of switch - stop light.

***Preparation tool:***
***Circuit tester***



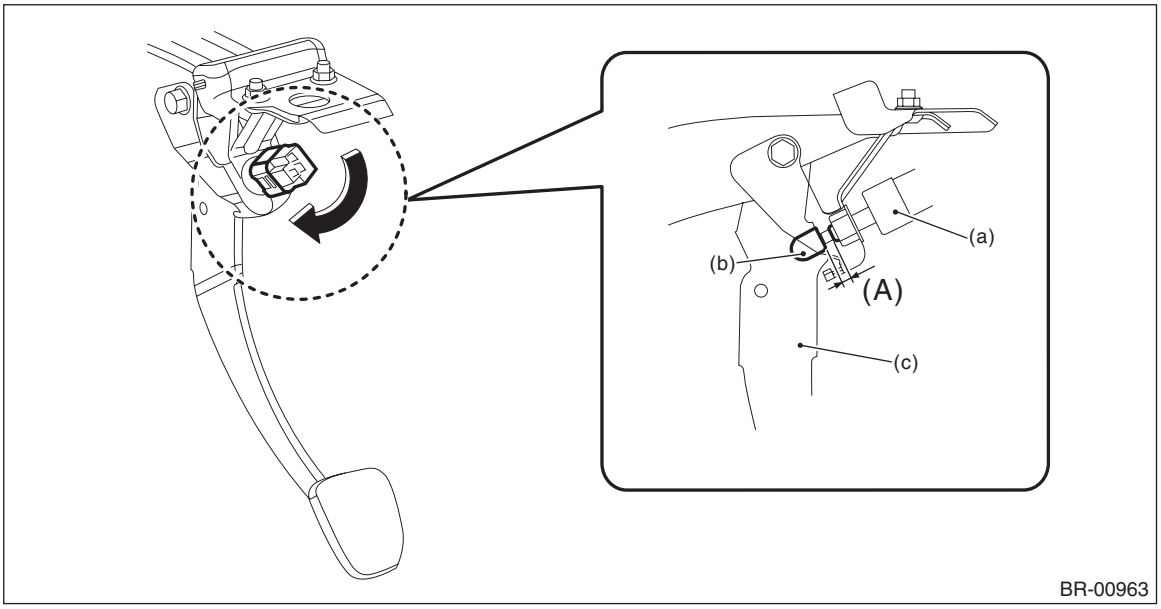
| Terminal No. | Inspection conditions | Standard |
|---|---|---|
| 1 — 2 | When brake pedal is depressed | 1 MΩ or more |
| | When brake pedal is released | Less than 1 Ω |
| 3 — 4 | When brake pedal is depressed | Less than 1 Ω |
| | When brake pedal is released | 1 MΩ or more |

3) Replace the switch - stop light if the inspection result is not within the standard value.

## D: ADJUSTMENT

1) While pulling up the brake pedal (c) toward you, insert the switch - stop light (a) until it reaches the stopper (b).
2) Install the switch - stop light by turning it clockwise.

**CAUTION:**
**Turn the switch - stop light clockwise when installing so that it can return backward by approximately 1 mm (0.04 in) and clearance is automatically adjusted.**
**Insert until it contacts the stopper, and make sure that clearance (A) of the end of switch - stop light and the stopper is 1 mm — 2 mm (0.04 in — 0.08 in).**



(a) Switch - stop light (b) Stopper (c) Brake pedal

# 16.General Diagnostic Table

## A: INSPECTION

| | Trouble and possible cause | Corrective action |
|---|---|---|
| **1. Insufficient braking** | (1) Fluid leakage from the hydraulic mechanism | Repair or replace. (cup, piston seal, piston boot, master cylinder piston kit, pipe or hose) |
| | (2) Entry of air into the hydraulic mechanism | Bleed air. |
| | (3) Wear, deteriorated surface material, water or fluid on lining | Replace, grind or clean. |
| | (4) Improper operation of master cylinder assembly, disc caliper, vacuum booster assembly or check valve | Repair or replace. |
| **2. Unstable or uneven braking** | (1) Fluid on lining or rotor | Correct the cause of fluid leakage, and clean or replace. |
| | (2) Rotor defective | Repair or replace the rotor. |
| | (3) Improper lining contact, deteriorated surface, deteriorated or worn lining material | Repair by grinding, or replace. |
| | (4) Deformed back plate | Repair or replace. |
| | (5) Overinflation of tires | Adjust the air pressure. |
| | (6) Defective wheel alignment | Adjust alignment. |
| | (7) Loose back plate or support installation bolt | Tighten to the specified torque. |
| | (8) Defective hub unit COMPL | Replace. |
| | (9) Defective hydraulic system | Replace the cylinder, brake pipe or hose. |
| | (10) Unstable performance of the parking brake | Check, adjust or replace the rear brake and cable system. |
| **3. Excessive pedal stroke** | (1) Entry of air into the hydraulic mechanism | Bleed air. |
| | (2) Excessive play in the master cylinder push rod | Adjust. |
| | (3) Fluid leakage from the hydraulic mechanism | Repair or replace. (cup, piston seal, piston boot, master cylinder piston kit, pipe or hose) |
| | (4) Improper lining contact or worn lining | Repair or replace. |
| **4. Brake dragging or improper brake return** | (1) Insufficient pedal play | Adjust play. |
| | (2) Improper master cylinder return | Clean or replace the cylinder. |
| | (3) Clogged hydraulic system | Replace. |
| | (4) Improper return or adjustment of parking brake | Repair or adjust. |
| | (5) Weakened spring tension or breakage of shoe return spring | Replace the spring. |
| | (6) Improper disc caliper operation | Repair or replace. |
| | (7) Faulty wheel bearing | Replace. |
| **5. Brake noise (1) (creaking sound)** | (1) Hardened or deteriorated brake pad | Replace the pad. |
| | (2) Worn brake pad | Replace the pad. |
| | (3) Loose back plate or support installation bolt | Tighten to the specified torque. |
| | (4) Loose hub unit COMPL | Tighten to the specified torque. |
| | (5) Dirty rotor | Clean the rotor, or clean and replace brake assembly. |
| **6. Brake noise (2) (hissing sound)** | (1) Worn brake pad | Replace the pad. |
| | (2) Improperly installed pad | Correct or replace the pad. |
| | (3) Loose or bent rotor | Retighten or replace. |
| **7. Brake noise (3) (click sound)** | Excessively worn pad or support | Replace the pad or the support. |

# PARKING BRAKE

1. General Description .....2
2. Parking Brake Lever .....4
3. Parking Brake Cable .....9
4. Parking Brake Assembly (Rear Disc Brake) .....15
5. General Diagnostic Table .....24

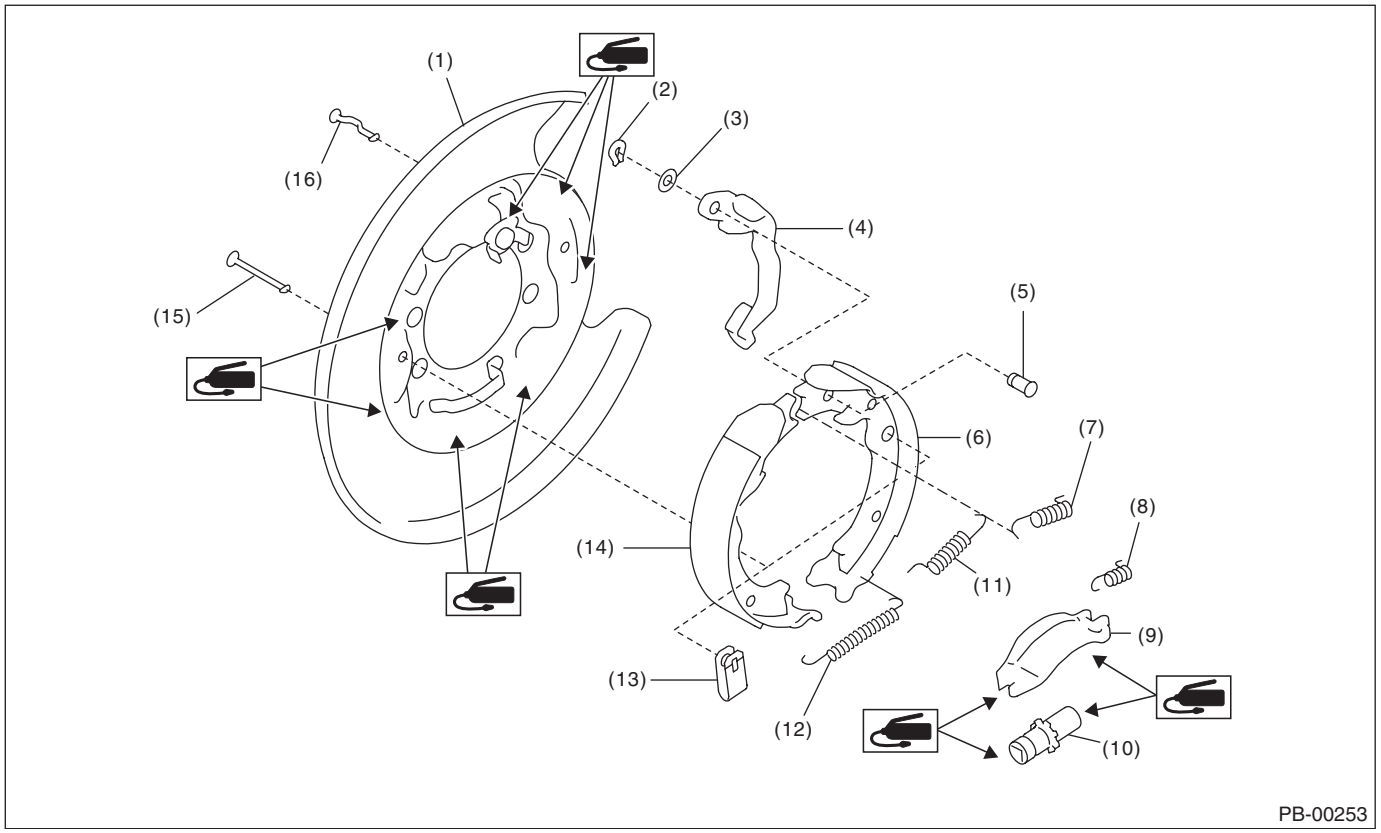
# 1. General Description

## A: SPECIFICATION

| | | |
|---|---|---|
| Model | | Rear disc brake |
| Type | | Mechanical, drum in disc rear brakes |
| Effective drum diameter | mm (in) | 170 (6.69) |
| Lining dimensions<br>(Length × Width × Thickness) | mm (in) | 147.7 × 30.0 × 3.5<br>(5.81 × 1.181 × 0.14) |
| Clearance adjustment | | Manual adjustment |
| Lever stroke | Notches/N (kgf, lbf) | 7 — 8/200 (20.4, 45) |

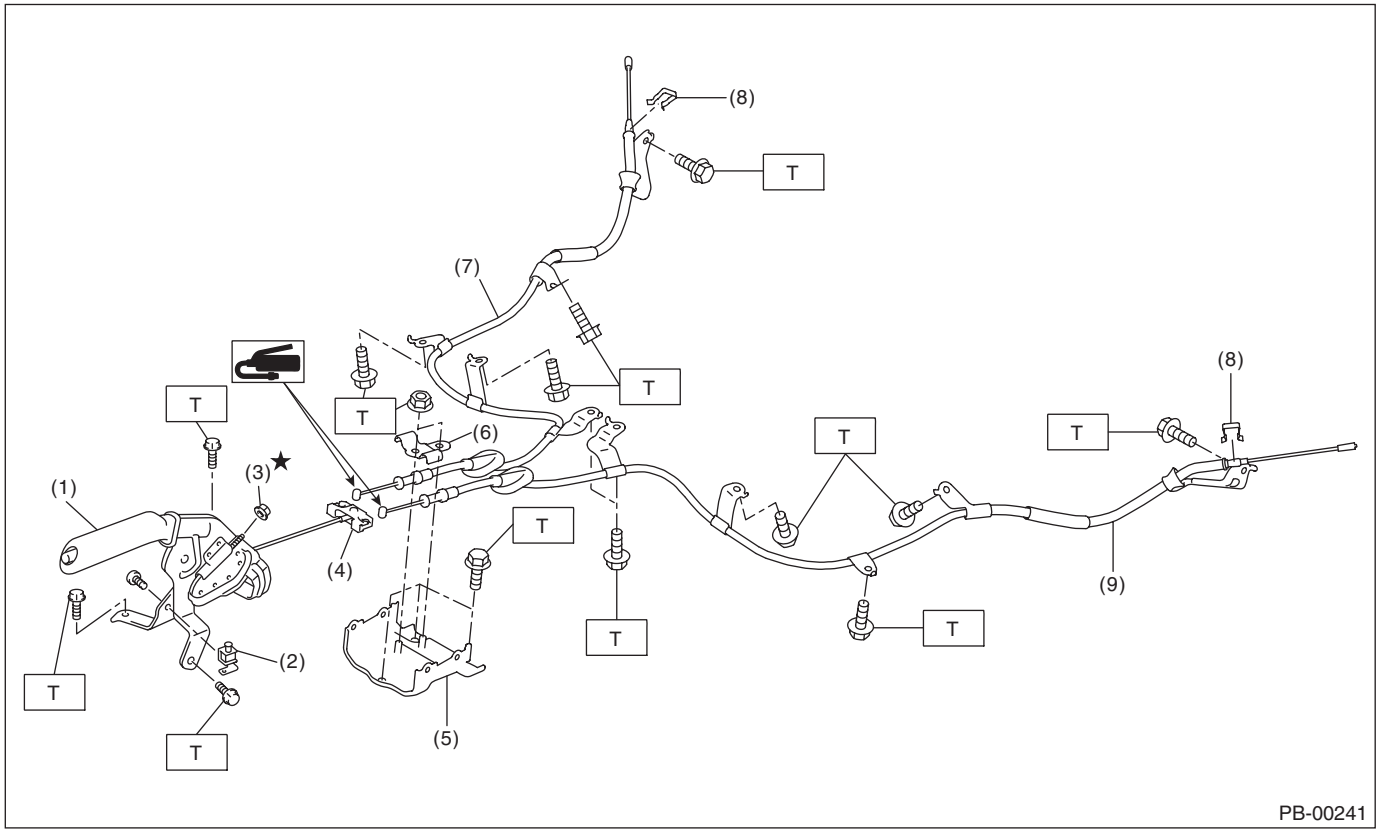
## B: COMPONENT

### 1. PARKING BRAKE (REAR DISC BRAKE)



(1) Back plate - rear brake
(2) Retainer - rear brake
(3) Spring washer - rear brake
(4) Parking lever - rear
(5) Pin - parking lever
(6) Parking brake shoe (secondary)
(7) Spring - secondary shoe return
(8) Spring - strut
(9) Strut - brake
(10) Adjuster ASSY - rear brake
(11) Spring - primary shoe return
(12) Spring - adjuster
(13) Cup - shoe hold-down
(14) Parking brake shoe (primary)
(15) Pin - primary shoe hold-down
(16) Pin - secondary shoe hold-down

## 2. PARKING BRAKE LEVER & CABLE



| | | | | | |
|---|---|---|---|---|---|
| (1) | Lever assembly - hand brake | (5) | Bracket | (9) | Cable ASSY - parking brake LH |
| (2) | Switch ASSY - hand brake | (6) | Clamp A - hand brake cable | | |
| (3) | Adjusting nut (self-locking nut) | (7) | Cable ASSY - parking brake RH | ***Tightening torque: N·m (kgf-m, ft-lb)*** | |
| (4) | Equalizer | (8) | Clamp B - hand brake cable | ***T: 18 (1.84, 13.3)*** | |

# C: CAUTION

- Wear appropriate work clothing, including a helmet, protective goggles and protective shoes when performing any work.
- Before removal, installation or disassembly, be sure to clarify the failure. Avoid unnecessary removal, installation, disassembly and replacement.
- Vehicle components are extremely hot after driving. Be wary of receiving burns from heated parts.
- Use SUBARU genuine grease etc. or equivalent. Do not mix grease etc. of different grades or manufacturers.
- Be sure to tighten fasteners including bolts and nuts to the specified torque.
- Place shop jacks or rigid racks at the specified points.
- Make sure grease does not come into contact with the parking shoes.

# D: PREPARATION TOOL

## 1. GENERAL TOOL

| TOOL NAME | REMARKS |
|---|---|
| Circuit tester | Used for measuring resistance and voltage. |

# 2. Parking Brake Lever

## A: REMOVAL

1) Set the wheel stoppers to tires.
2) Remove the headrest assembly - front.
3) Move the passenger's seat towards the front.
4) Remove the driver's seat outside the vehicle.
   (1) Tilt the backrest assembly forward and move the front seat to the front most position.
   (2) Remove the cover - bolt rear (A) and remove the bolts.

   (3) Move the front seat to the rearmost position, and remove the bolts.
5) Disconnect the ground cable from battery and wait for at least 60 seconds before starting work.

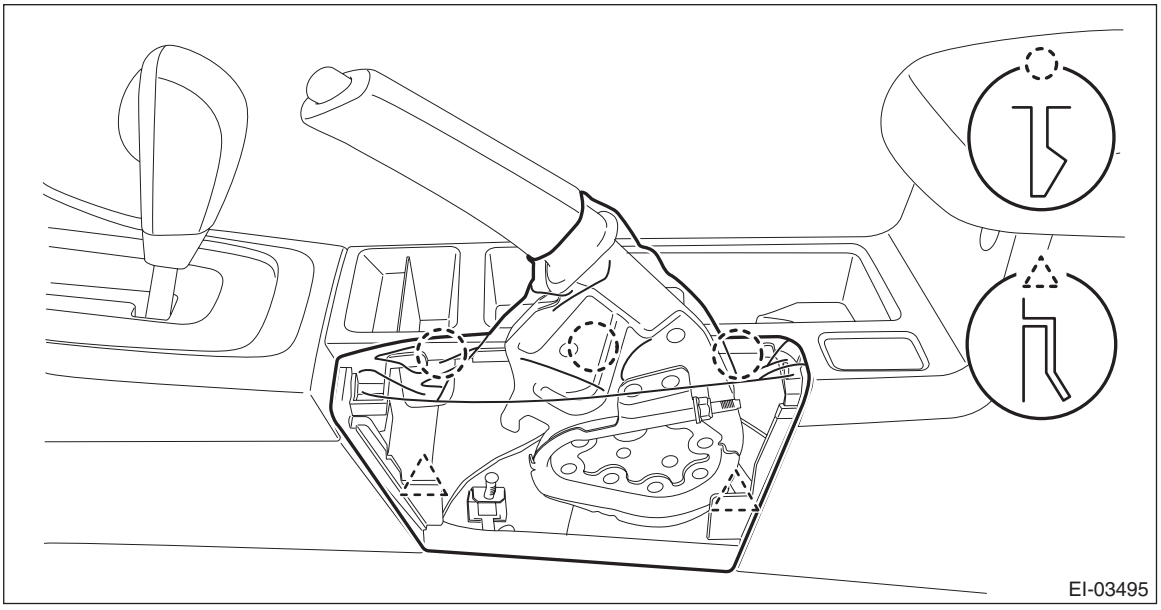
**CAUTION:**
**The airbag system is fitted with a backup power supply. After disconnecting the battery ground cable, the airbag may operate if you do not wait for 60 seconds before starting the service of airbag system.**

6) Disconnect the connector under the front seat.
- Seat belt warning light connector (driver's seat)
- Side airbag connector <Ref. to AB-31, SIDE AIRBAG MODULE, PROCEDURE, Airbag Connector.>
- Seat heater connector (model with seat heater)

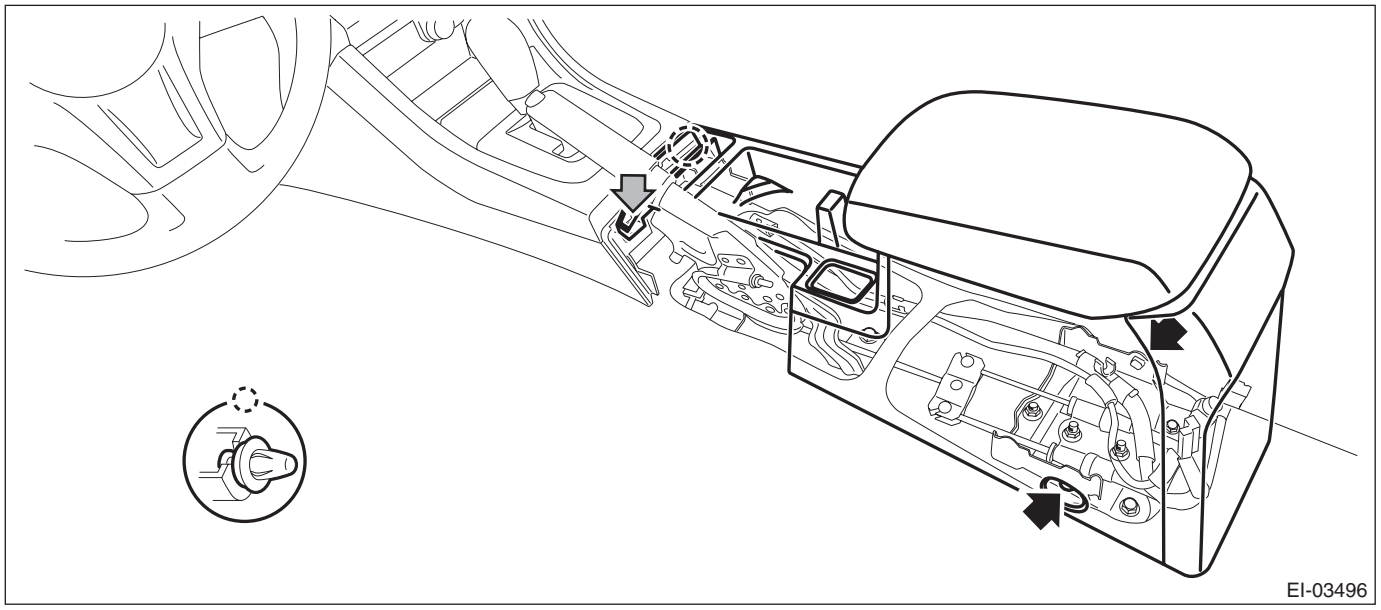
7) Take out the front seat from the vehicle.

**CAUTION:**
**Be careful not to damage the body.**

8) Remove the console box assembly.
(1) Release the claws, and then remove the boot - parking brake.

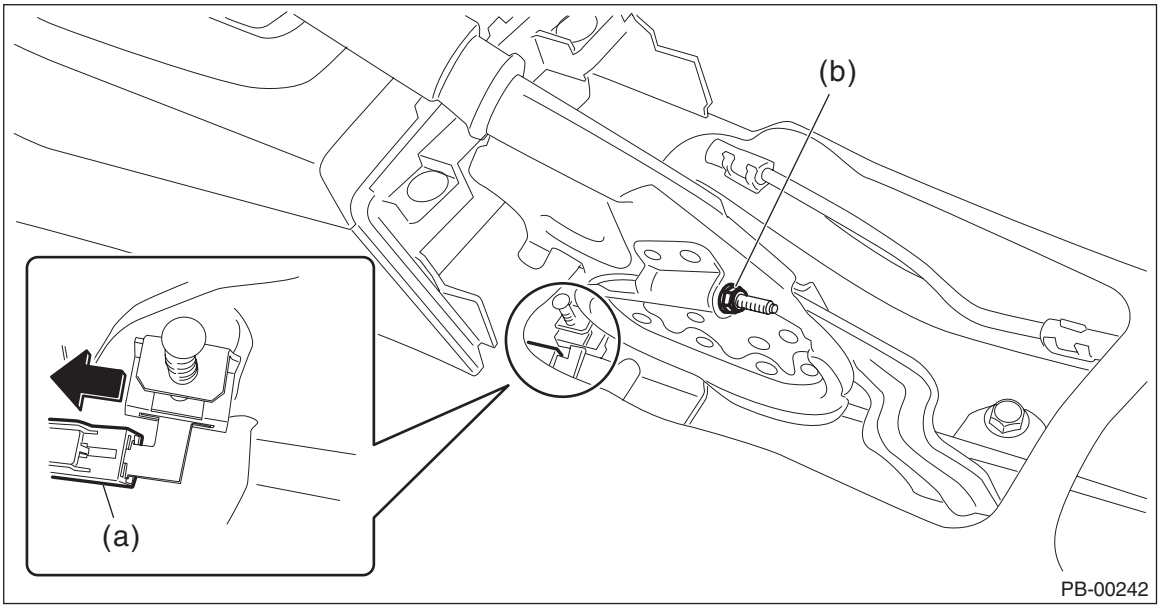


(2) Move the seat forward, and remove the bolts after detaching the left and right caps.
(3) Remove the screws and clips, disconnect the harness connector and remove the console box assembly.

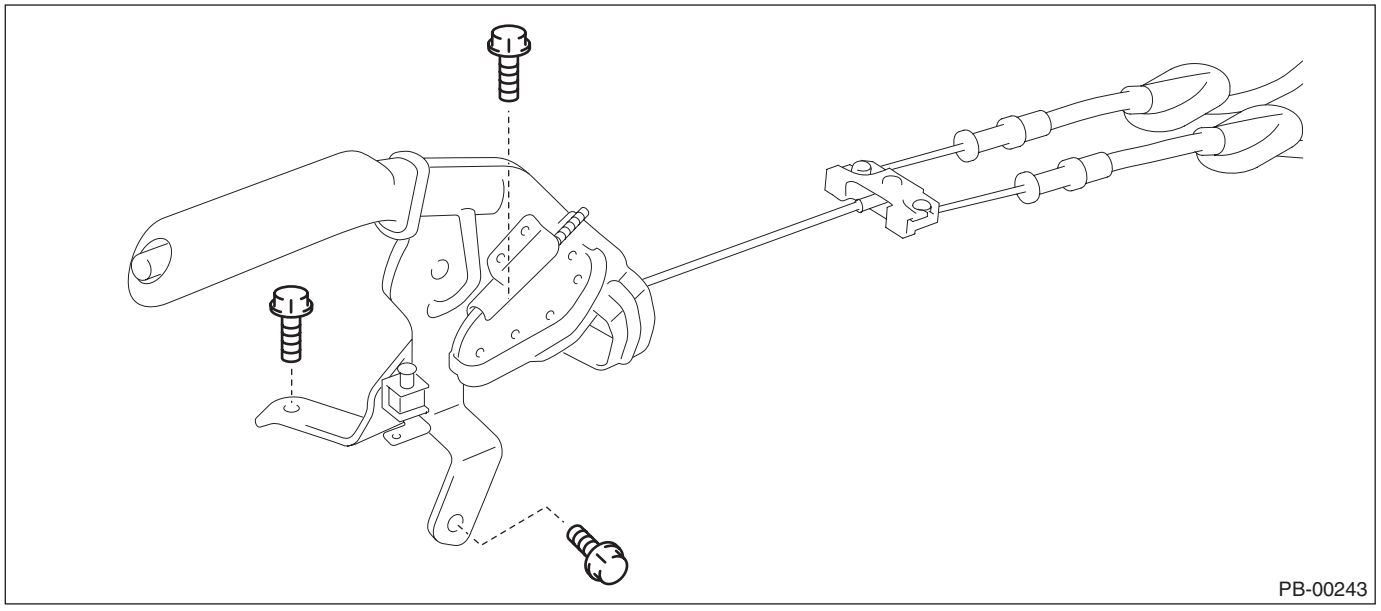


9) Remove the lever assembly - hand brake.
(1) Disconnect the connector (a) of the switch assembly - hand brake.
(2) Remove the adjusting nut (b).

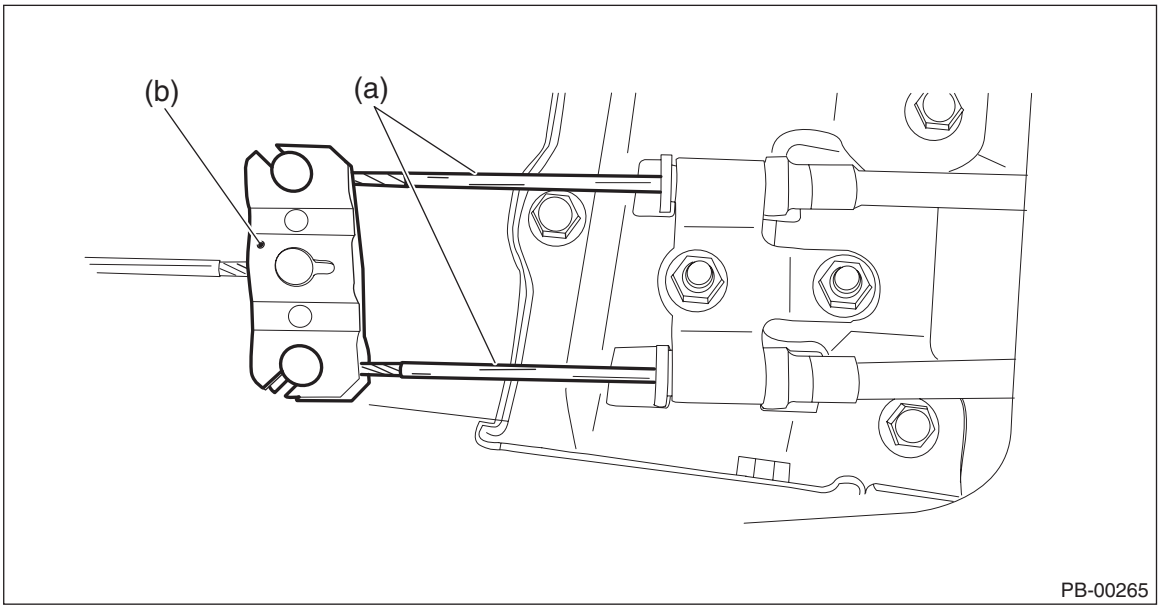
**CAUTION:**
**A self-locking nut is used for the adjusting nut of parking cable. Therefore, replace the self-locking nut with a new one when disassembling.**



(3) Remove the bolt, and then remove the lever assembly - hand brake.



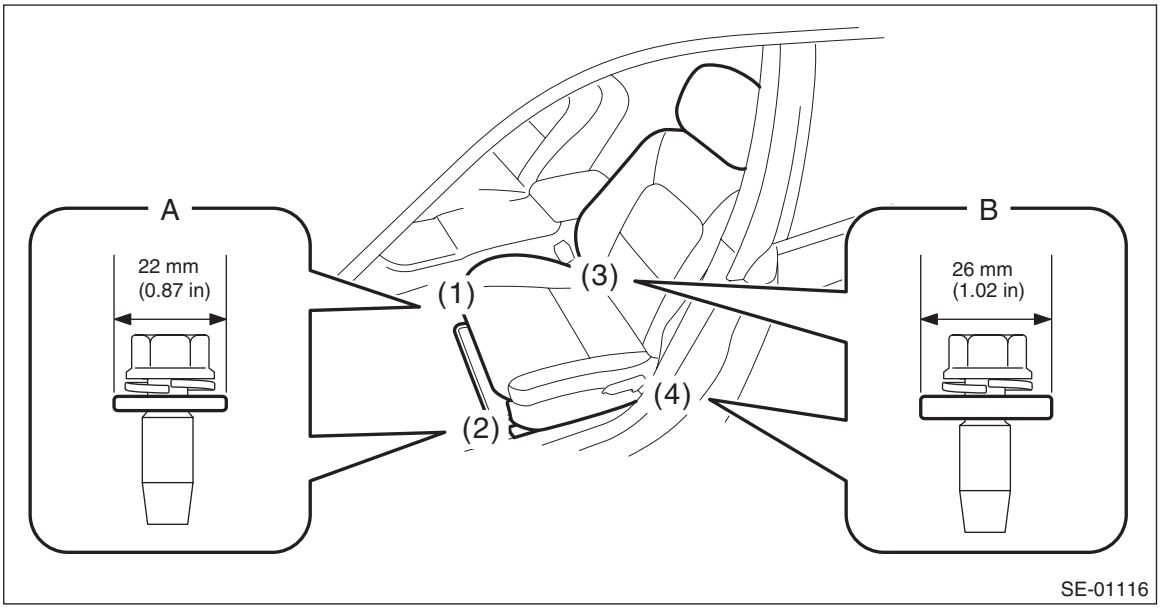
10) Remove the inner cable end (a) from the equalizer (b).



## B: INSTALLATION

1) Install each part in the reverse order of removal.

**CAUTION:**
**• The front seat mounting bolts differ between the front mounting points and the rear mounting points. When installing the front seat, make sure that you are using correct bolts at correct positions.**
**• Tighten the slide rail assembly installing bolts in the order as shown in the figure, in several steps by gradually increasing the torque until they reach the specified torque.**



- **Front (bolt A): Washer diameter 22 mm (0.87 in)**
- **Rear (bolt B): Washer diameter 26 mm (1.02 in)**

***Tightening torque:***
***Front seat assembly: 53 N·m (5.40 kgf-m, 39.1 ft-lb)***

***Tightening torque:***
***Lever assembly - hand brake: 18 N·m (1.84 kgf-m, 13.3 ft-lb)***
***Console box assembly: 6.5 N·m (0.66 kgf-m, 4.8 ft-lb)***

2) Install a new adjusting nut (self-locking nut).
3) Be sure to adjust the lever stroke. <Ref. to PB-8, ADJUSTMENT, Parking Brake Lever.>

## C: INSPECTION

### 1. LEVER ASSY

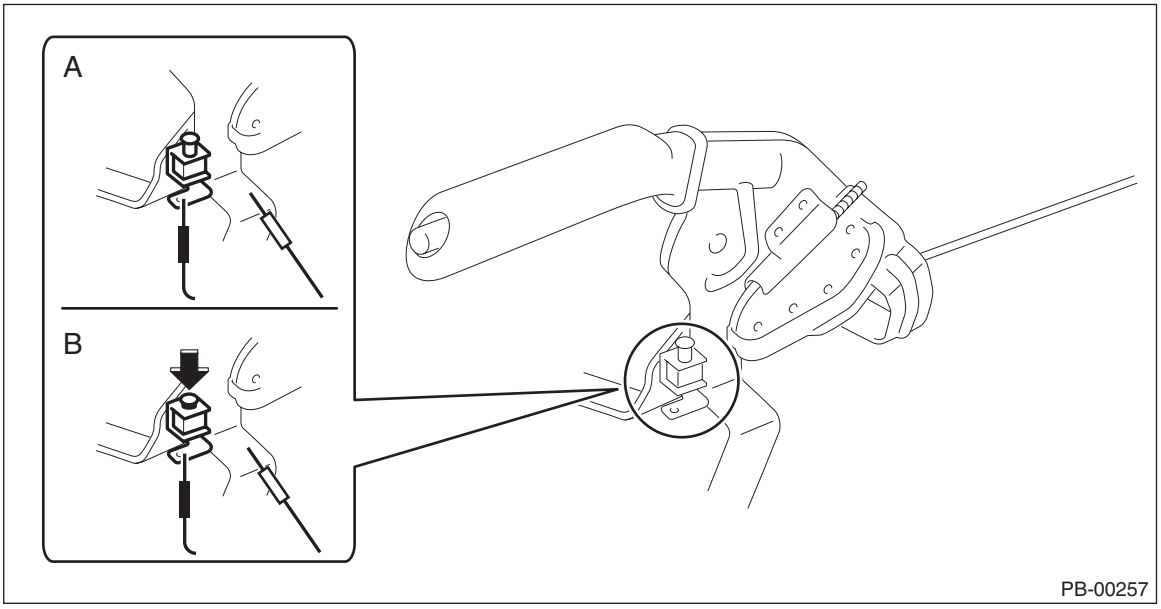
1) Operate the lever assembly - hand brake 3 to 4 times and fully return the lever assembly - hand brake.
2) While slowly pulling up the lever assembly - hand brake, count the notches.

***Lever stroke:***
***7 to 8 notches when pulled with a force of 200 N (20.4 kgf, 45 lbf)***
If it is not within the specified value, adjust the parking brake. <Ref. to PB-22, ADJUSTMENT, Parking Brake Assembly (Rear Disc Brake).>

### 2. SWITCH ASSEMBLY

1) Measure the resistance between the switch assembly - hand brake and chassis ground.

***Preparation tool:***
***Circuit tester***



| | Switch position | Standard |
|---|---|---|
| A | When shaft is free (ON) | Less than 1 Ω |
| B | When shaft is pressed in (OFF) | 10 kΩ or more |

If it is not within the specified value, replace the switch assembly - hand brake.

## D: ADJUSTMENT

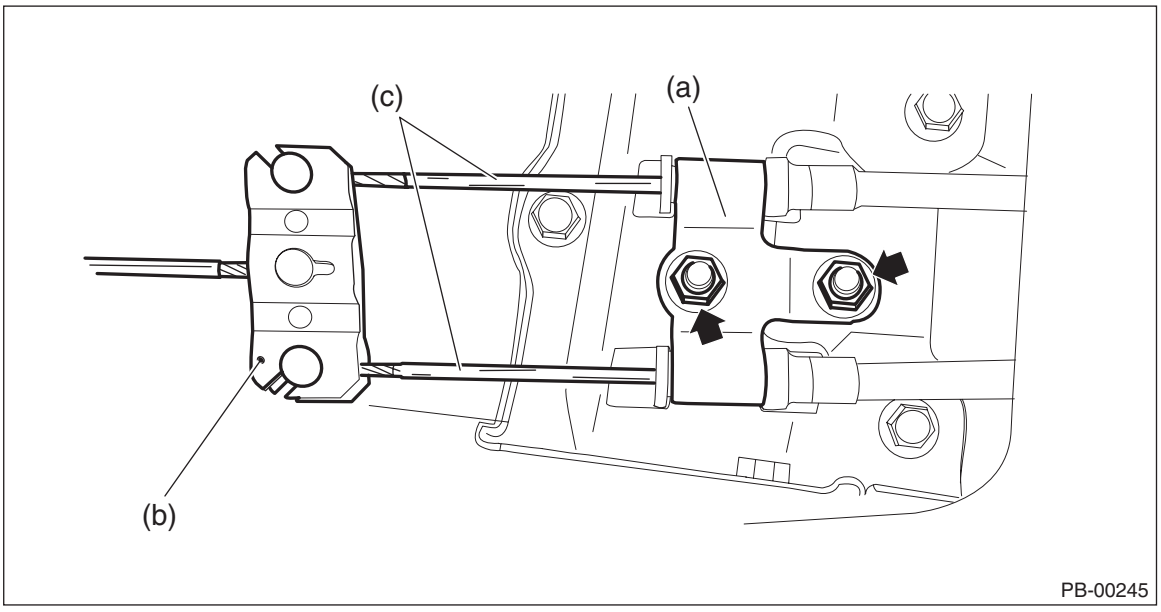
Adjust the parking lever stroke. <Ref. to PB-23, LEVER STROKE, ADJUSTMENT, Parking Brake Assembly (Rear Disc Brake).>

# 3. Parking Brake Cable

## A: REMOVAL

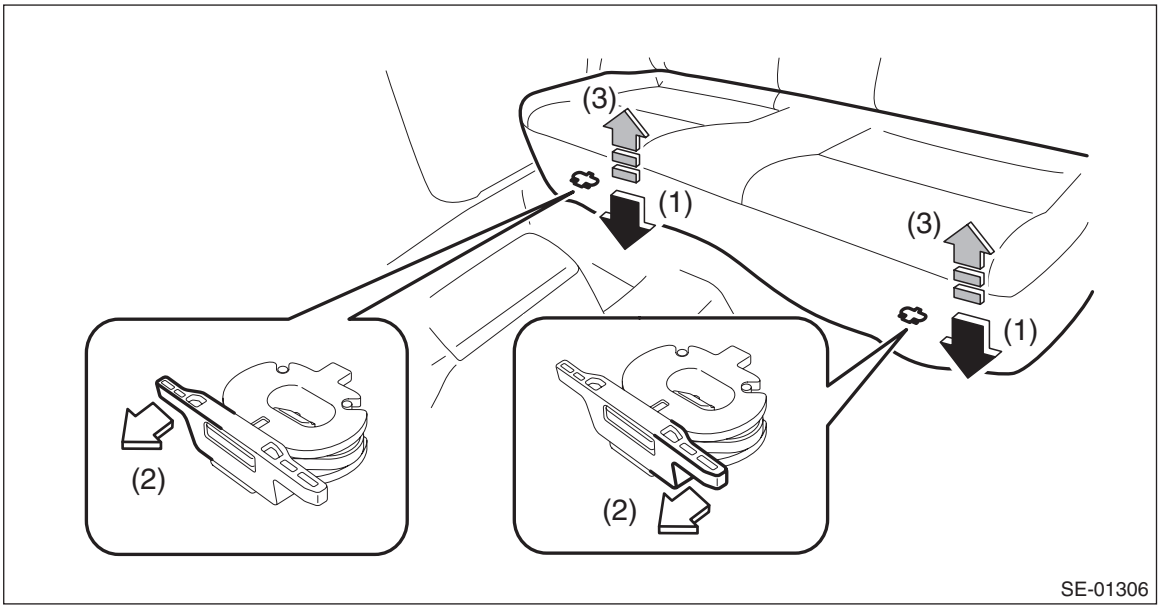
**CAUTION:**
**• Airbag system satellite safing sensor is located in the lower of the rear seat cushion center. Before removing the rear seat, refer to "CAUTION" of "General Description" in "AIRBAG SYSTEM" section. <Ref. to AB-11, CAUTION, General Description.>**
**• The airbag system is fitted with a backup power supply. After disconnecting the battery ground cable, the airbag may operate if you do not wait for 60 seconds before starting the service of airbag system.**

1) Remove the lever assembly - hand brake. <Ref. to PB-4, REMOVAL, Parking Brake Lever.>
2) Remove the nut and remove the clamp A - hand brake cable (a).
3) Remove the inner cable end (c) from the equalizer (b).

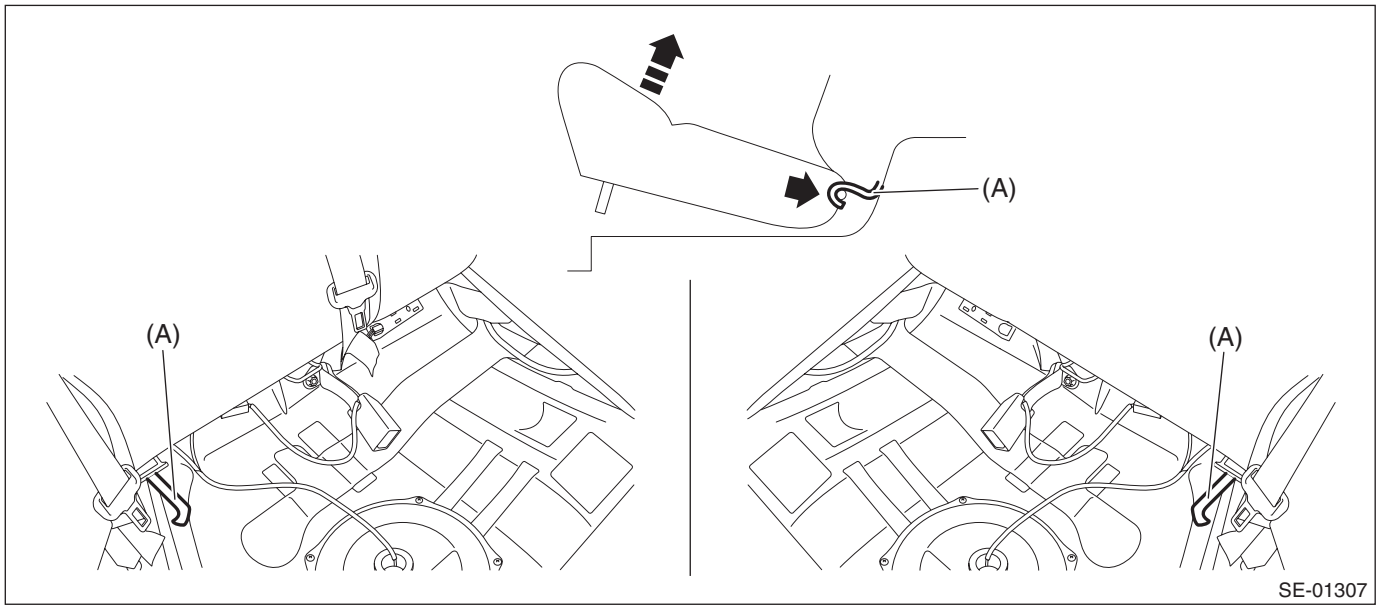


4) Remove the rear seat cushion assembly.
(1) Push the corners of the rear seat cushion from above.
(2) While pushing the corners of the rear seat cushion from above, pull the knob of the hook - seat cushion rear towards yourself.
(3) While pulling the knob towards yourself, disconnect the hooks by lifting up the rear seat cushion.

NOTE:
Pull the left side of the knob to disconnect the LH side hook, and pull the right side of the knob to disconnect the RH side hook.

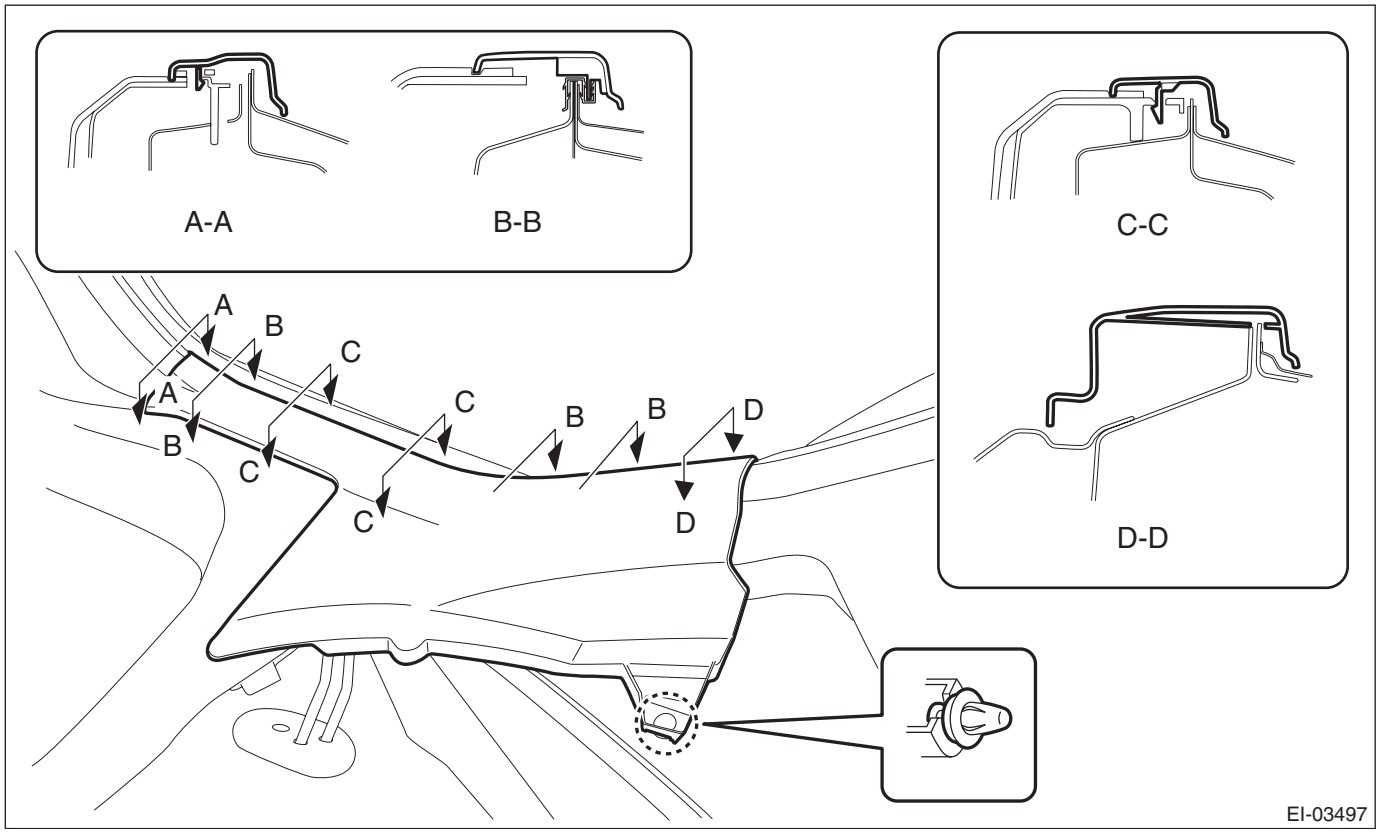


(4) Remove the hook (A) by pushing it back while lifting the front side of the rear seat cushion, and remove the rear seat cushion.

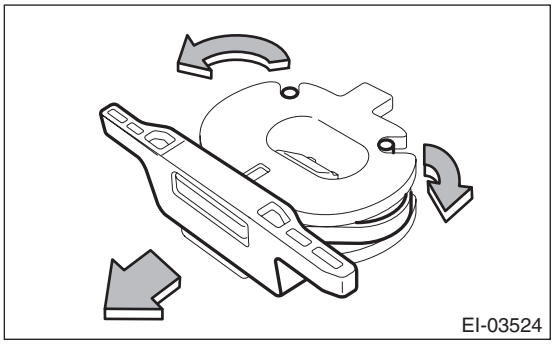


5) Release the clips and claws, and remove the side sill covers - rear INN on the left and right sides.

**CAUTION:**
**Do not pull with excessive force. Doing so may damage the claws of the side sill cover - rear INN.**

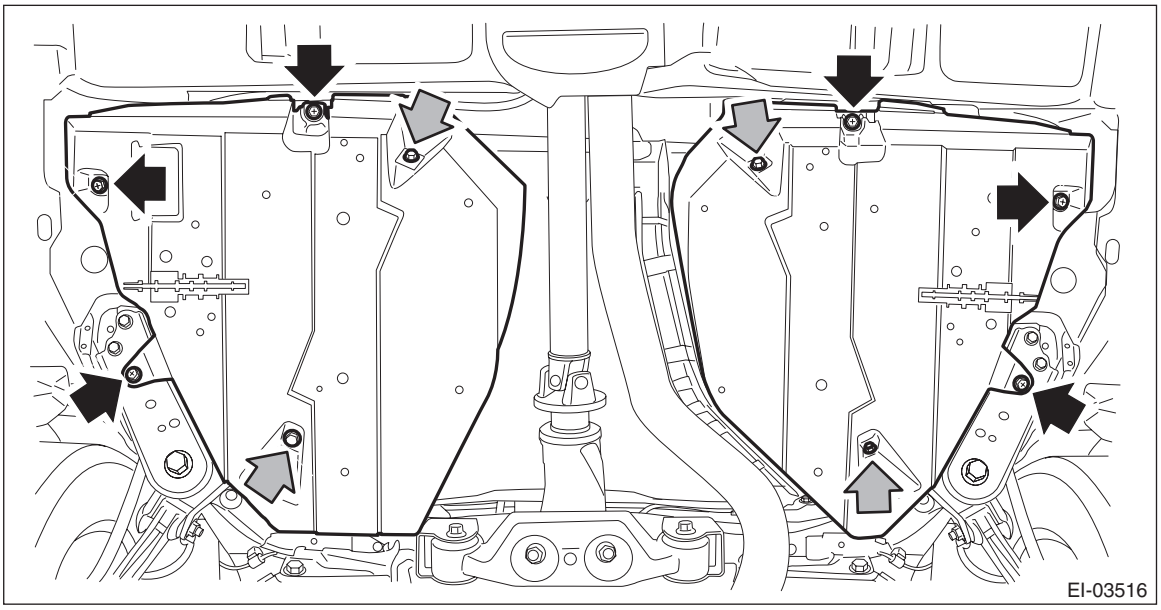


6) Remove the clips and knobs of the hook - seat cushion rear.



7) Turn over the floor carpet and remove the grommet of the cable assembly - parking brake from the rear floor.
8) Lift up the vehicle, and then remove the rear wheels.

9) Remove the bolt and nuts and remove the fuel tank protector.

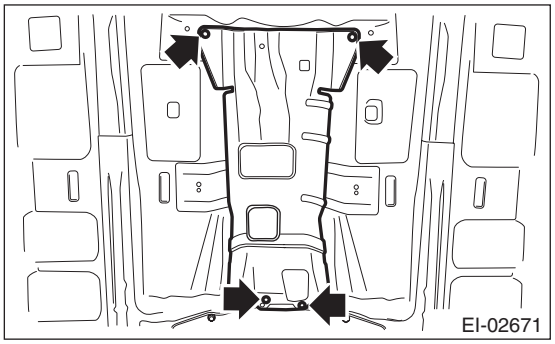


10) Remove the cable assembly - parking brake from the lever section of parking brake shoe. <Ref. to PB-15, REMOVAL, Parking Brake Assembly (Rear Disc Brake).>

11) Remove the center exhaust pipe, rear exhaust pipe, and muffler.

- Center exhaust pipe & rear exhaust pipe: <Ref. to EX(H4DO)-15, REMOVAL, Rear Exhaust Pipe.>
- Muffler: <Ref. to EX(H4DO)-19, REMOVAL, Muffler.>

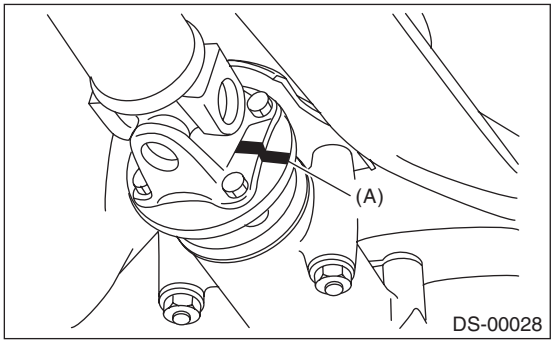
12) Remove the bolts to remove the front heat shield cover.



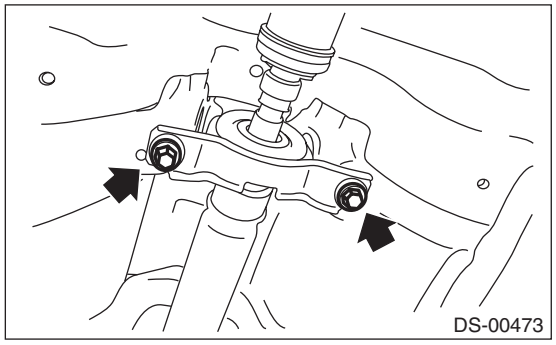
13) Remove the propeller shaft assembly.

**CAUTION:**
**Do not disassemble the propeller shaft.**

(1) Place alignment marks (A) on the flange yoke and rear differential.
(2) Remove four bolts holding the propeller shaft to the rear differential.



(3) Remove the center bearing.

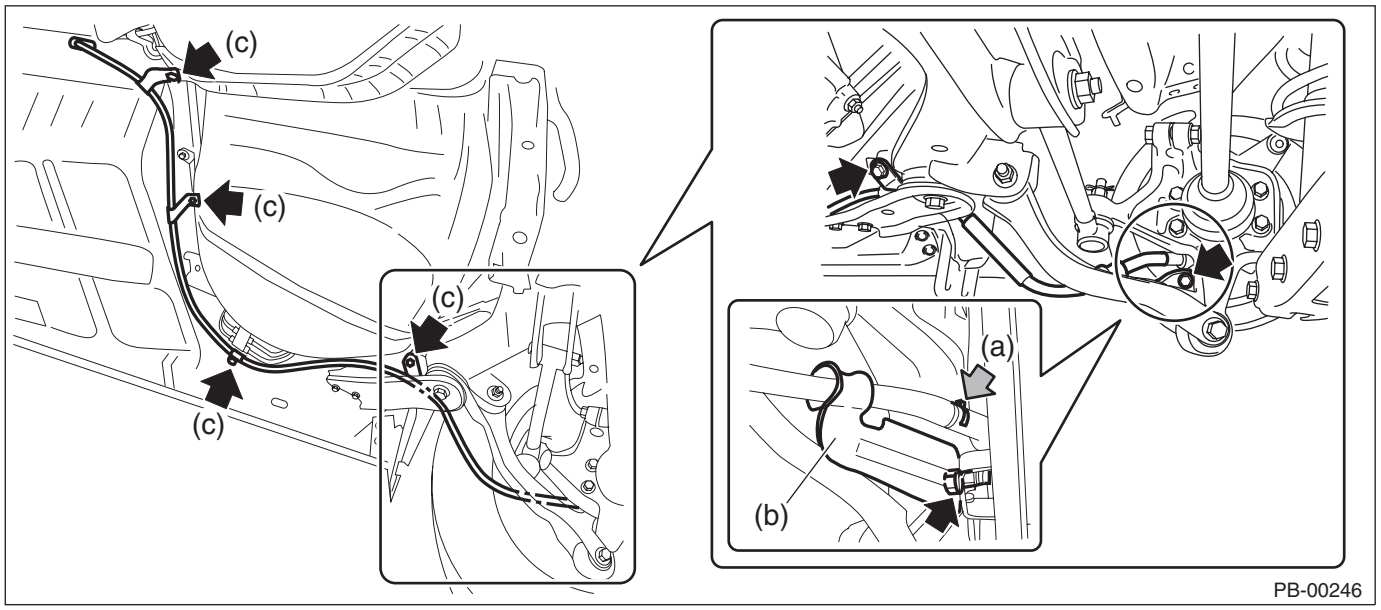


(4) Remove the propeller shaft from transmission.

**CAUTION:**
**Be careful not to damage oil seals and contact surface of the sleeve yoke.**

NOTE:
- Use a container to catch ATF or oil flowing from propeller shaft.
- To prevent ATF from leaking, install extension cap etc. to the transmission.

14) Remove the clamp B - hand brake cable (a) from the rear brake.
15) Remove the cable clamp (b) from the back plate - rear brake.
16) Remove the cable clamp (c) from the rear floor, and remove the cable assembly - parking brake.



## B: INSTALLATION

1) Install each part in the reverse order of removal.

**CAUTION:**
**Do not reuse the nut (self locking nut). Always replace with a new part.**

***Tightening torque:***
***Protector - fuel tank nut: 9 N·m (0.92 kgf-m, 6.6 ft-lb)***
***Protector - fuel tank bolt: 18 N·m (1.84 kgf-m, 13.3 ft-lb)***
***Cable clamp: 18 N·m (1.84 kgf-m, 13.3 ft-lb)***
***Rear wheel: 120 N·m (12.24 kgf-m, 88.5 ft-lb)***

NOTE:
- Apply grease to the cable guide inside the tunnel, and pass the cable through.
- After installing the backrest assembly, make sure that each seat belt operates normally.
- Make sure that they are properly secured on each hook on the vehicle side.

2) Be sure to adjust the lever stroke. <Ref. to PB-8, ADJUSTMENT, Parking Brake Lever.>

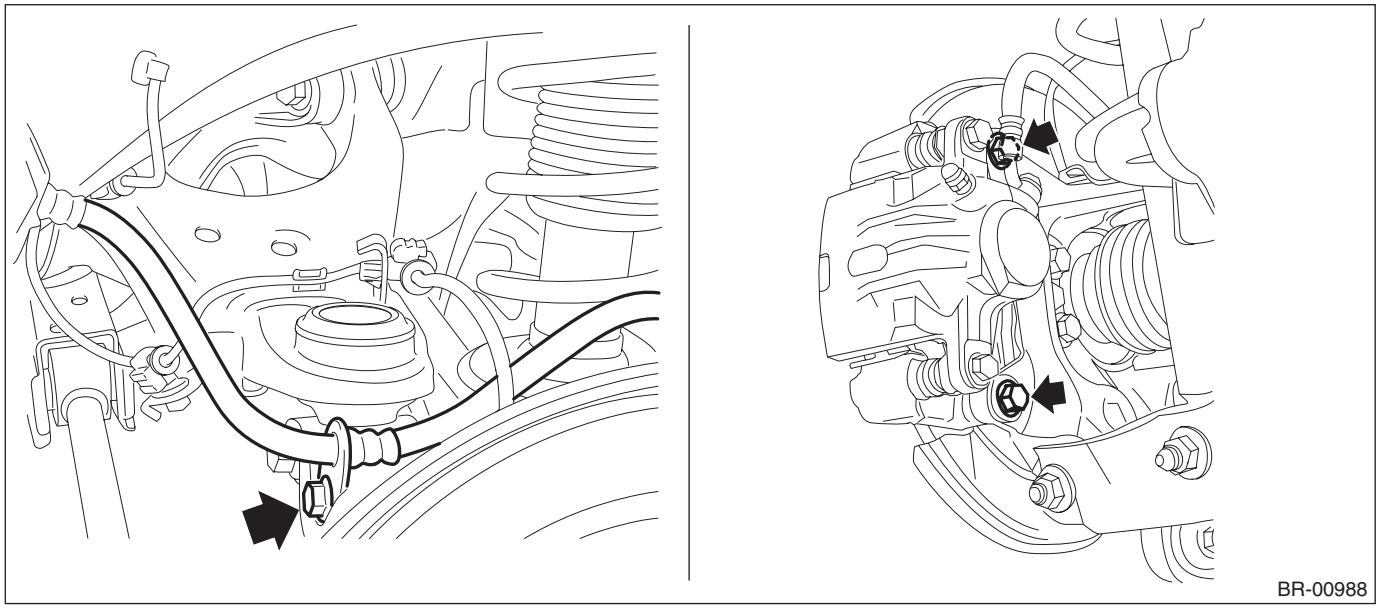
## C: INSPECTION

Check the removed cable and replace if damaged, rusty or malfunctioning.
1) Check the cable for smooth operation.
2) Check the inner cable for damage and rust.
3) Check the outer cable for damage, bends and cracks.

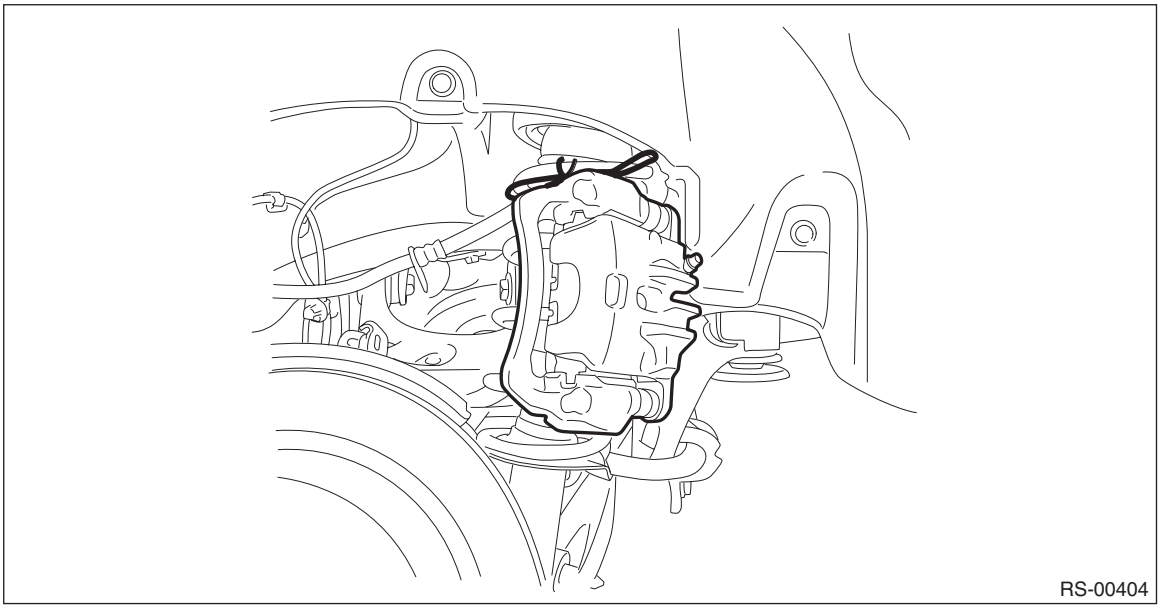
# 4. Parking Brake Assembly (Rear Disc Brake)

## A: REMOVAL

1) Release the parking brake.
2) Lift up the vehicle, and then remove the rear wheels.
3) Remove the brake hose bracket.
4) Remove the attachment bolts and remove the rear disc brake caliper assembly.



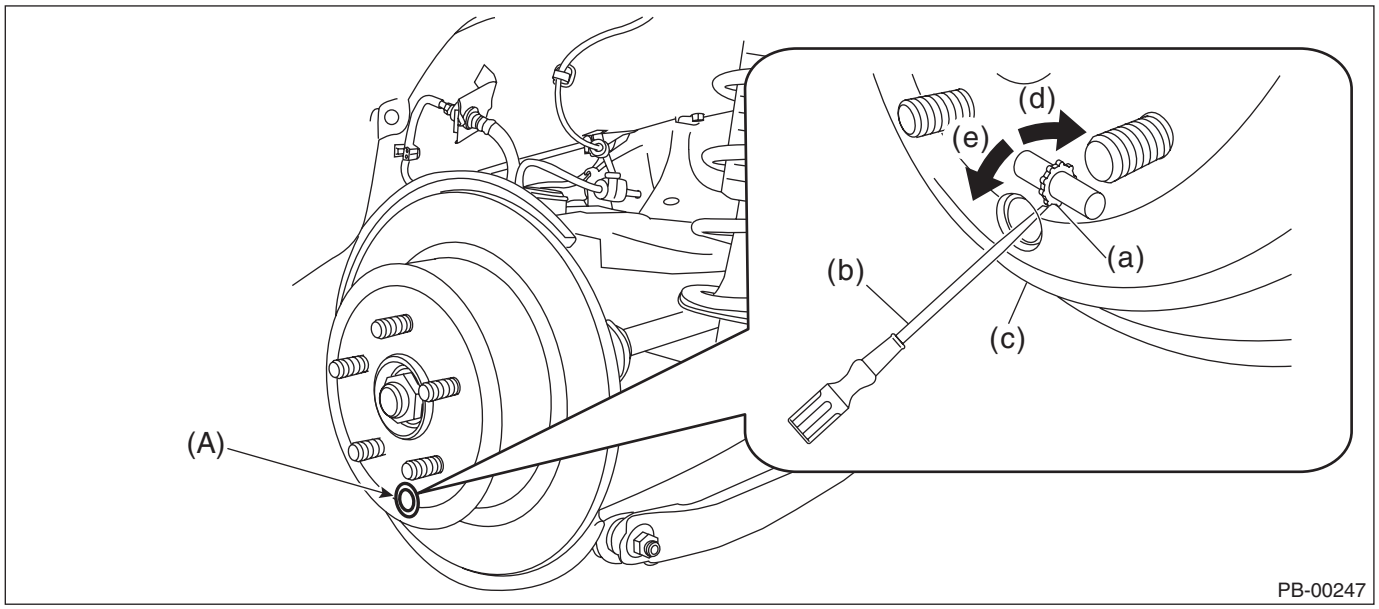
5) Suspend the rear disc brake caliper assembly so that the brake hose is not stretched.



6) Mark an alignment mark on the rear disc brake rotor and the hub unit COMPL - rear axle, and then remove the rear disc rotor.

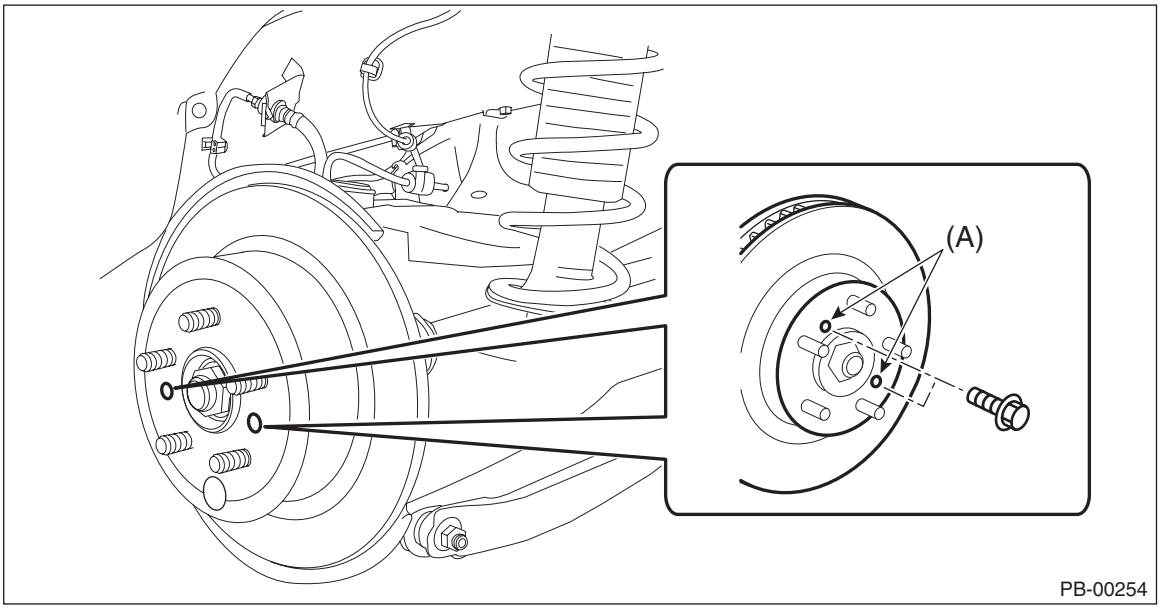
NOTE:
If the rear disc rotor is difficult to remove, try the following two methods in order.

(1) Remove the adjusting hole cover (A) for the disc rotor, and rotate the adjuster assembly - rear brake using a flat tip screwdriver until the brake shoe moves far enough from the disc rotor.

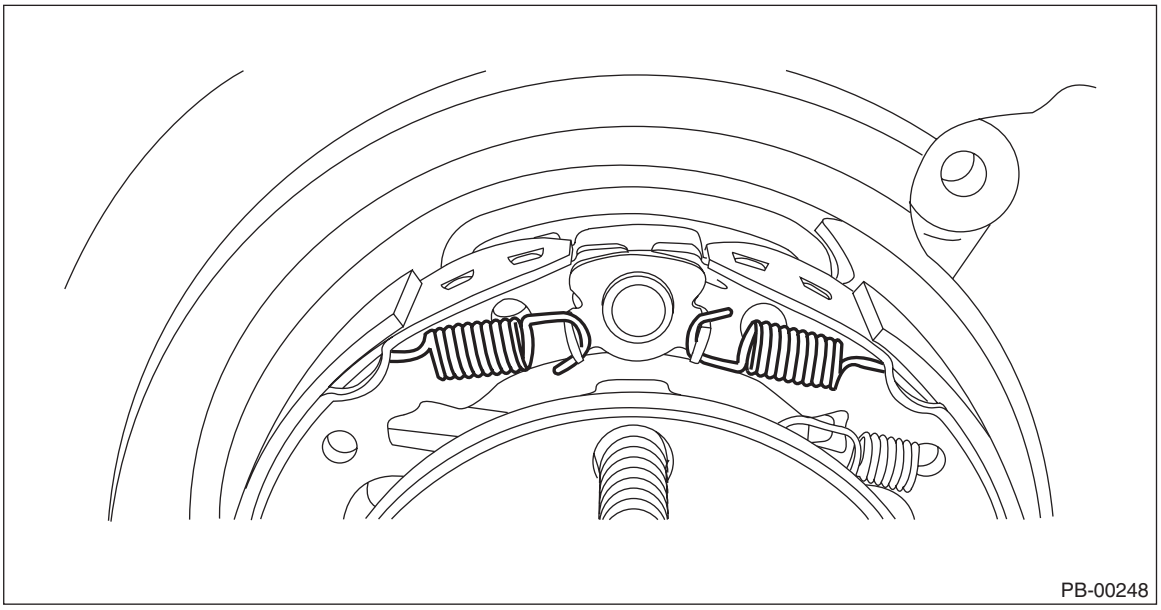


(a) Adjuster ASSY - rear brake
(b) Flat tip screwdriver
(c) Rear disc rotor
(d) Extend the adjuster ASSY - rear brake
(e) Shorten the adjuster ASSY - rear brake

(2) If the rear disc rotor is seized on the hub unit COMPL - rear axle, drive the rear disc rotor out by pushing it with two 8 mm bolts inserted through the holes (A) on the rotor.



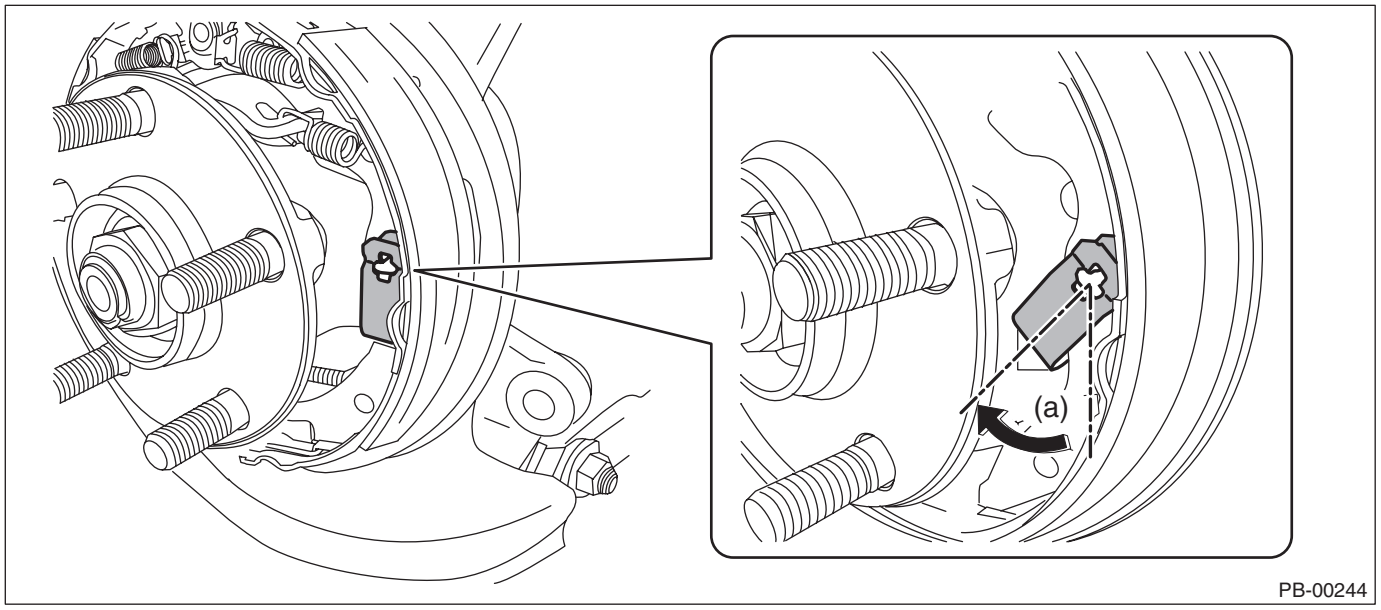
7) Remove the spring - primary shoe return and the spring - secondary shoe return.



8) Remove the parking brake shoe on the primary side.
   (1) Remove the cup - shoe hold-down (a) and the spring - adjuster, and remove the parking brake shoe (b).

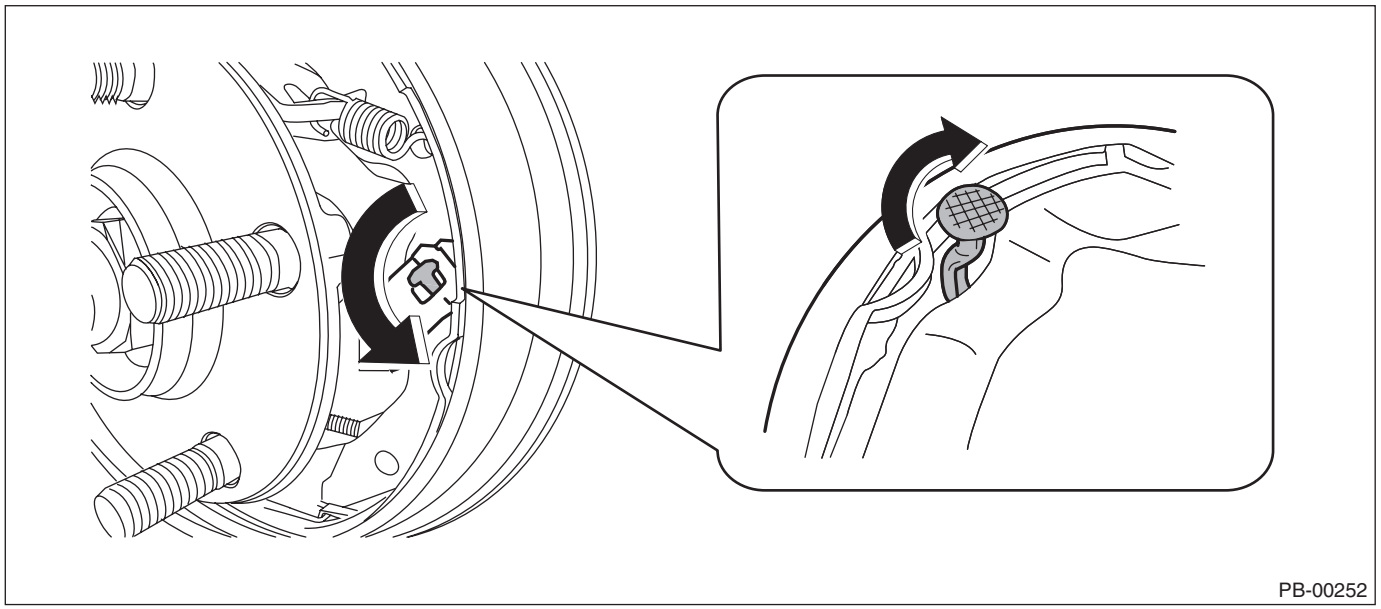
   (2) Remove the strut - brake and the spring - strut.
   (3) Remove the adjuster assembly - rear brake.

9) Remove the parking brake shoe on the secondary side.
(1) Rotate the cup - shoe hold-down in the direction of the front side of the vehicle.

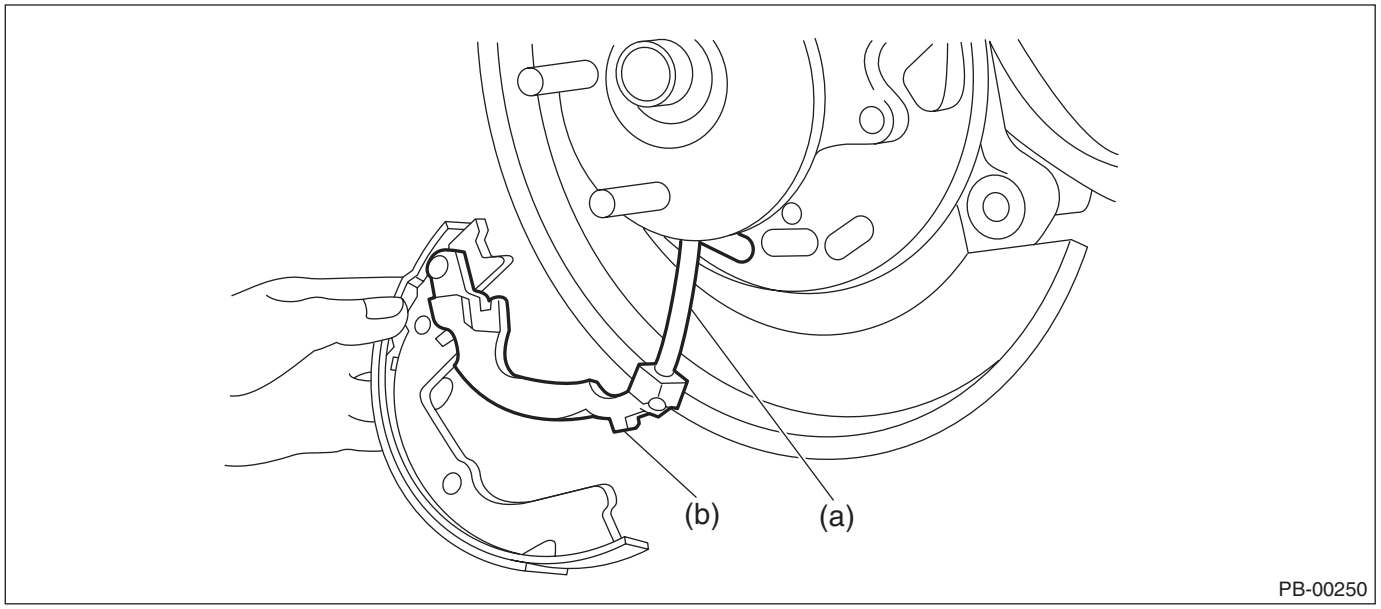


(a) Approx. 45°

(2) Press and shorten the cup - shoe hold-down.
(3) Rotate the pin - secondary shoe hold-down in the opposite direction, and pull out the pin - shoe hold-down.



10) Remove the cable assembly - hand brake cable (a) from the parking lever - rear (b).



11) Remove the retainer - rear brake from the secondary side parking brake shoe. Remove the parking lever - rear from the brake shoe.

## B: INSTALLATION

**CAUTION:**
**Be sure the lining surface is free from brake fluid and grease.**

1) Apply brake grease to the following locations.

***Brake grease:***
***Molykote 44MA (Part No. 26648FJ000)***

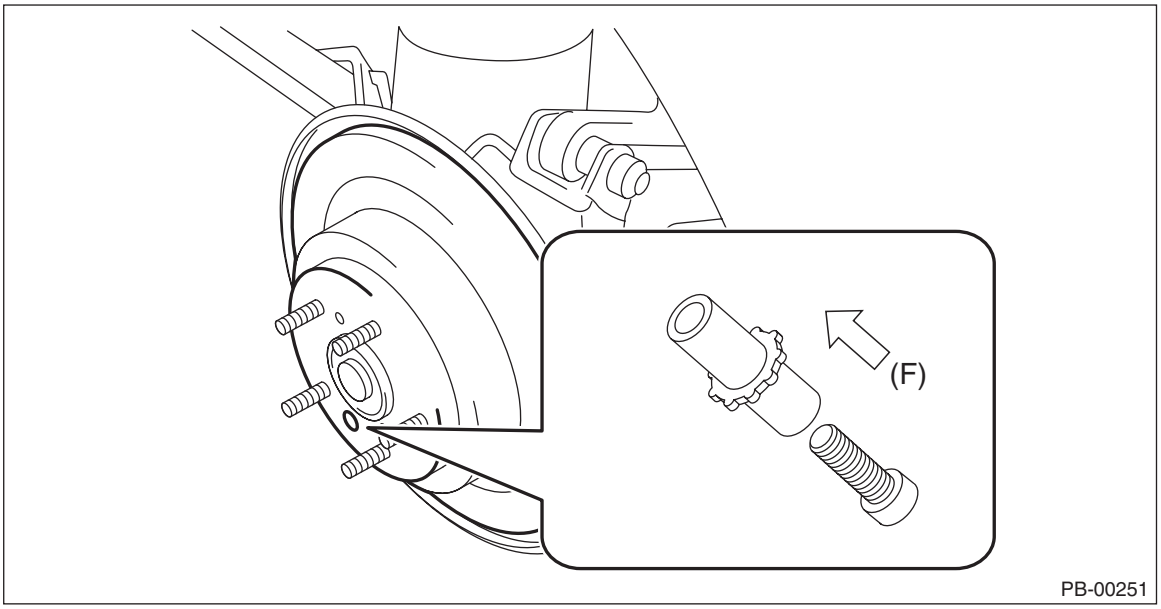
- Six contact surfaces of the parking brake shoe rim and back plate - rear brake
- Contact surface of the parking brake shoe and the anchor pin
- Contact surface of the parking lever assembly - rear and the strut - brake
- Contact surface of the parking brake shoe and the adjuster assembly - rear brake
- Contact surface of the parking brake shoe and the strut - brake
- Contact surface of the parking lever - rear and the parking brake shoe

2) Install the spring washer - rear brake and the lever to the secondary side parking brake shoe pin, and lock the retainer - rear brake securely.

3) Install the cable assembly - parking brake to the lever.

4) Attach the adjuster assembly - rear brake and the spring - adjuster to the parking brake shoe.

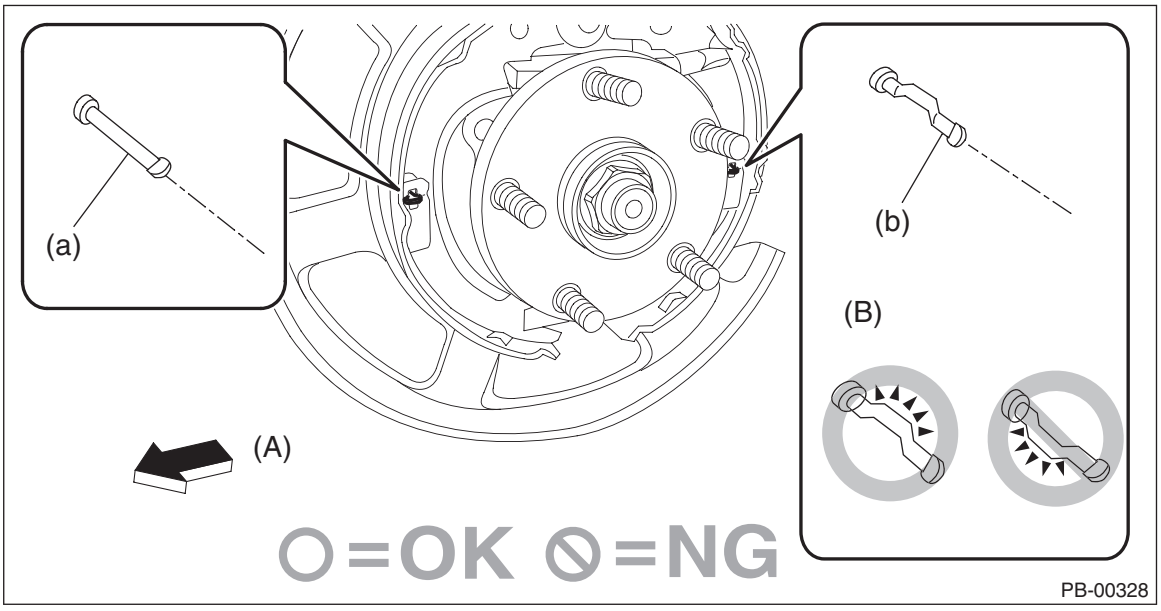
NOTE:
Install the adjuster assembly - rear brake with the screw section facing to the direction shown in the figure below.



(F) Left wheel: front side of vehicle, right wheel: rear side of vehicle

5) Check that the cable assembly - parking brake does not fall from the cable guide.
6) Install the parking brake shoes to the back plate - rear brake with the pins - shoe hold-down and the cups - shoe hold-down.

NOTE:
- Do not reversely install the pin - primary shoe hold-down (a) and the pin - secondary shoe hold-down (b).
- When installing the pin - secondary shoe hold-down (b), face the convex portion to the rear of the vehicle not to contact with the parking lever - rear.



(A) Front side of vehicle

(B) Orientation of pin - shoe hold-down relative to the front of the vehicle

7) Install the strut - brake and the spring - strut to the parking brake shoes.

NOTE:
Install the spring - strut so that it comes towards the front side of the vehicle.
8) Install the return springs on the primary side first, and then the secondary side.
9) Install the brake disc rotor and the brake caliper assembly.
10) Install the brake hose bracket.

***Tightening torque:***
***Refer to "COMPONENT" of "General Description". <Ref. to BR-4, COMPONENT, General Description.>***
11) Adjust the parking brake. <Ref. to PB-22, ADJUSTMENT, Parking Brake Assembly (Rear Disc Brake).>
12) Install the rear wheels.

***Tightening torque:***
***120 N·m (12.24 kgf-m, 88.5 ft-lb)***
13) If new parking brake shoes are replaced, drive the vehicle to break-in the parking brake lining.
(1) Drive the vehicle at approximately 35 km/h (22 MPH) or more.
(2) While pressing the button of lever assembly - hand brake, pull the lever assembly - hand brake with a force of 150 N (15.3 kgf, 33.7 lbf).
(3) Drive the vehicle for about 200 m (0.12 mile) in this condition.
(4) Wait 5 to 10 minutes for the parking brake to cool down. Repeat steps (1) through (3) again.
(5) After breaking-in, re-adjust the parking brakes.

## C: INSPECTION

1) Measure the inner diameter of the rear disc rotor. If scoring or worn is found on the disc, replace the rear disc rotor.

***Disc rotor inner diameter:***
***Specification: 170 mm (6.69 in)***
***Service limit: 171 mm (6.73 in)***
2) Measure the lining thickness. If it exceeds the limit, replace the brake shoe.

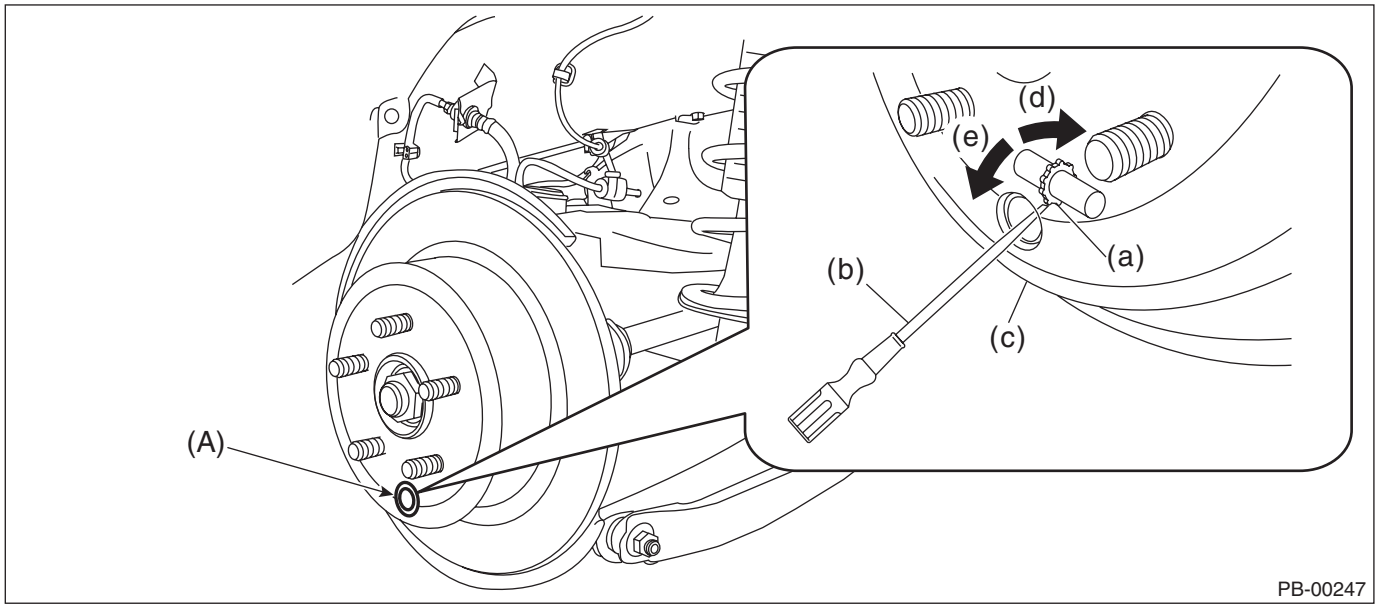
***Lining thickness:***
***Specification: 3.5 mm (0.14 in)***
***Service limit: 1.5 mm (0.059 in)***

NOTE:
Replace the right and left parking brake shoe as a set.

# D: ADJUSTMENT

## 1. SHOE CLEARANCE

1) Return the lever assembly - hand brake completely.
2) Loosen the adjusting nut, and make the cable free.
3) Remove the adjusting hole cover (A) from the rear disc rotor.
4) Insert the flat tip screwdriver (B) into the brake adjustment hole (A), and rotate the adjuster assembly - rear brake (a) until the parking brake shoe contacts the rear disc rotor.



| | | | | | |
|---|---|---|---|---|---|
| (a) | Adjuster ASSY - rear brake | (c) | Disc rotor | (e) | Shorten the adjuster ASSY - rear brake |
| (b) | Flat tip screwdriver | (d) | Extend the adjuster ASSY - rear brake | | |

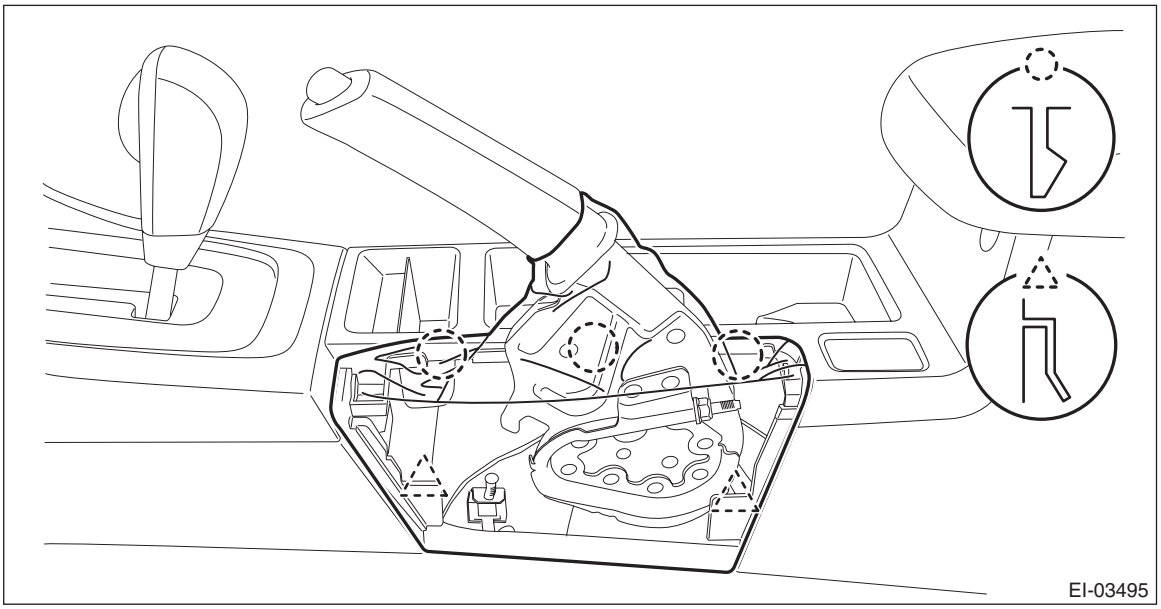
5) Loosen the adjuster assembly - rear brake by 8 notches in the direction of the arrow (e).

**CAUTION:**
- **Check there is no brake drag.**
- **Make sure that the adjuster assembly - rear brake is loosened by 8 notches. If it is not loosened sufficiently, dragging may occur.**

6) Install the adjusting hole cover to the disc rotor.
7) Adjust the parking lever stroke. <Ref. to PB-23, LEVER STROKE, ADJUSTMENT, Parking Brake Assembly (Rear Disc Brake).>

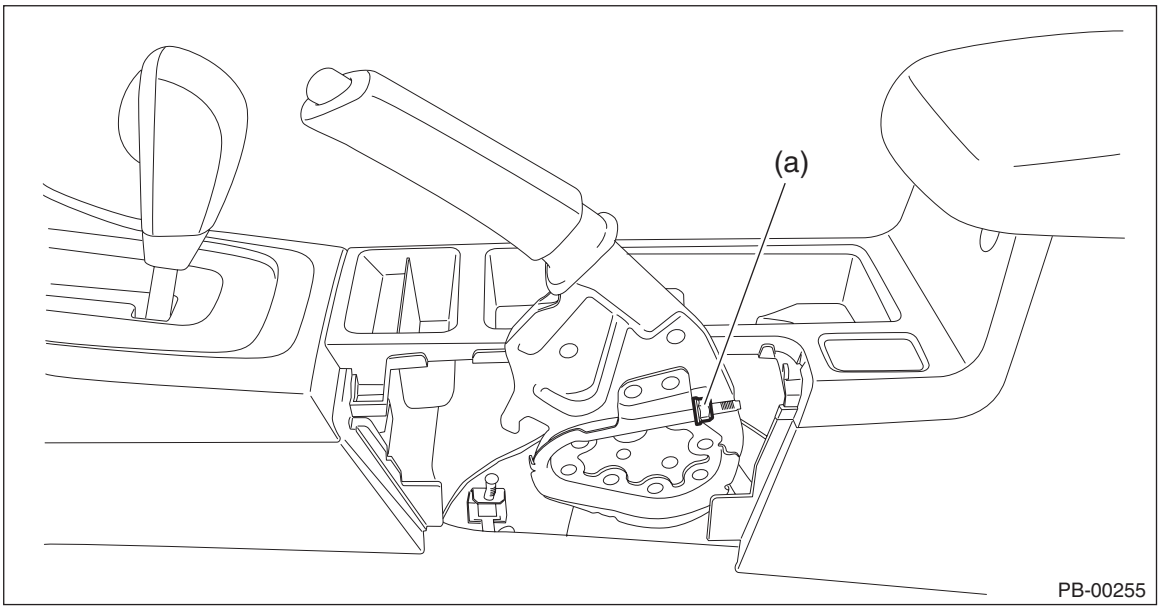
## 2. LEVER STROKE

1) Adjust the shoe clearance before adjusting lever stroke. <Ref. to PB-22, SHOE CLEARANCE, ADJUSTMENT, Parking Brake Assembly (Rear Disc Brake).>
2) Release the claws, and then remove the boot - parking brake.



3) Pull the lever assembly - hand brake hard 3 to 5 times.
4) Turn the adjusting nut (a) until the lever stroke is at the specified value.

***Lever stroke:***
***7 to 8 notches when pulled with a force of 200 N (20.4 kgf, 45 lbf)***



5) Check there is no brake drag.
6) Check that the brake warning light illuminates when the lever assembly - hand brake is operated.

NOTE:
The light must illuminate when the first notch is reached after pulling the lever.
7) Install the boot - parking brake.

# 5. General Diagnostic Table

## A: INSPECTION

| Symptoms | Possible cause | Corrective action |
|---|---|---|
| Brake dragging | Lever assembly - hand brake is maladjusted. | Adjust. |
| | Parking brake cable does not move. | Repair or replace. |
| | Parking brake shoe clearance is maladjusted. | Adjust. |
| | Spring - shoe return is faulty. | Replace. |
| Noise from brake | Spring - shoe return is faulty. | Replace. |
| | Cup - shoe hold-down is faulty. | Replace. |

(1) Bracket - control module
(2) Power steering control module
(3) Harness bracket

***Tightening torque: N·m (kgf-m, ft-lb)***
***T: 7.5 (0.76, 5.5)***

## C: CAUTION

• Wear appropriate work clothing, including a helmet, protective goggles and protective shoes when performing any work.
• Before removal, installation or disassembly, be sure to clarify the failure. Avoid unnecessary removal, installation, disassembly and replacement.
• Vehicle components are extremely hot after driving. Be wary of receiving burns from heated parts.
• Use grease and oil of Subaru genuine or the equivalent products. Do not mix them of different grades or manufacturers.
• Be sure to tighten fasteners including bolts and nuts to the specified torque.
• Place shop jacks or rigid racks at the specified points.
• Before securing a part on a vise, place cushioning material such as wooden blocks, aluminum plate or cloth between the part and the vise.

## D: PREPARATION TOOL

### 1. SPECIAL TOOL

| ILLUSTRATION | TOOL NUMBER | DESCRIPTION | REMARKS |
|---|---|---|---|
|  ST34099PA100 | 34099PA100 | SPANNER | Used when measuring the rotating resistance of gearbox assembly. |

### 2. GENERAL TOOL

| TOOL NAME | REMARKS |
|---|---|
| Steering wheel puller | Used for removing the steering wheel. |

# 2. Power Steering System

## A: WIRING DIAGRAM

Refer to “Electric Power Steering System” in the wiring diagram. <Ref. to WI-152, WIRING DIAGRAM, Vehicle Dynamics Control System.>

## B: ELECTRICAL SPECIFICATION

Refer to Control Module I/O Signal of “POWER ASSISTED SYSTEM (POWER STEERING) (DIAGNOSTICS)”. <Ref. to PS(diag)-10, ELECTRICAL SPECIFICATION, Control Module I/O Signal.>

## C: INSPECTION

Refer to “POWER ASSISTED SYSTEM (POWER STEERING) (DIAGNOSTICS)”. <Ref. to PS(diag)-2, Basic Diagnostic Procedure.>

## D: NOTE

For procedure of each component in the power steering system, refer to the respective section.

- Steering wheel: <Ref. to PS-8, Steering Wheel.>
- Universal joint assembly - steering: <Ref. to PS-13, Universal Joint.>
- Steering column: <Ref. to PS-18, Steering Column.>
- Electric power steering gearbox: <Ref. to PS-26, Electric Power Steering Gearbox.>
- Power steering control module: <Ref. to PS-42, Power Steering Control Module.>

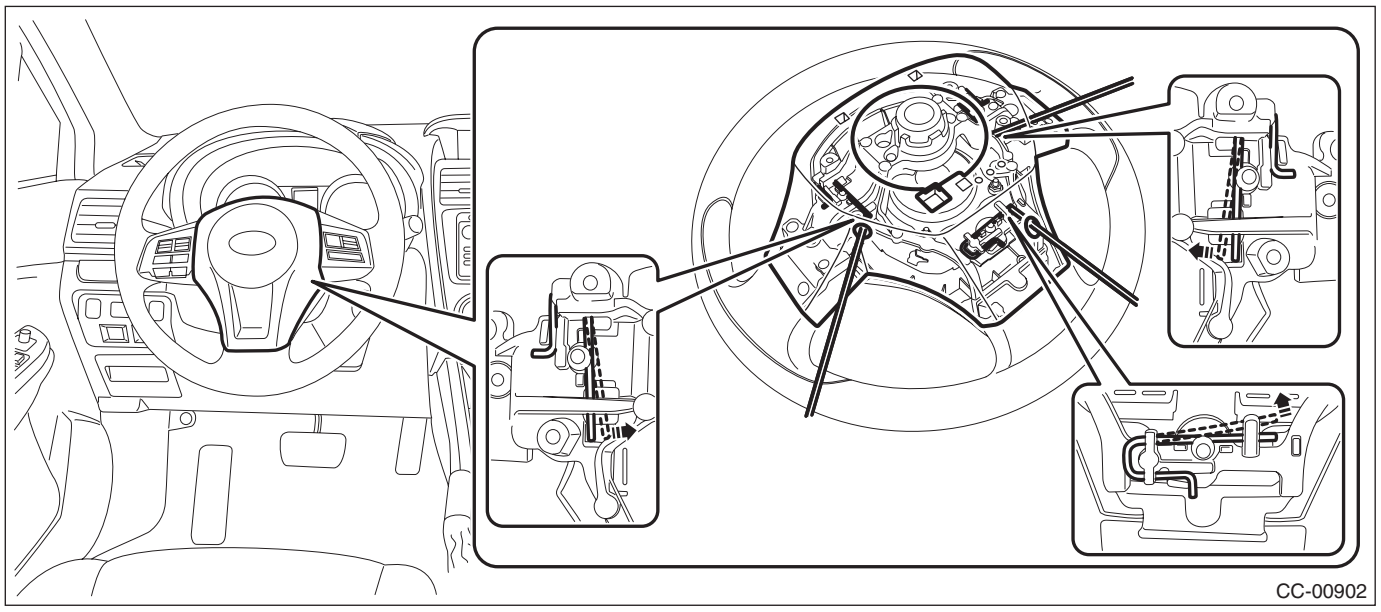
# 3. Steering Wheel

## A: REMOVAL

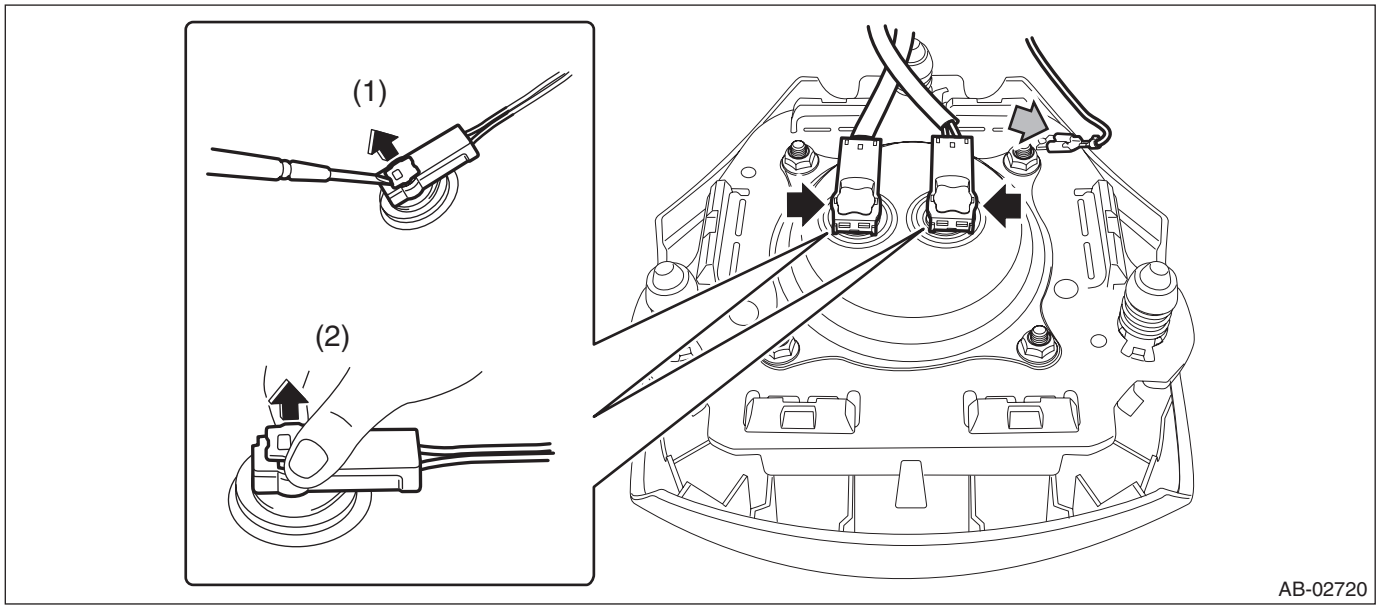
1) Disconnect the negative terminal from the battery, and wait for 60 seconds or more.
2) Set the tire to the straight-ahead position.
3) Remove the driver's airbag module.

**CAUTION:**
**Before performing service on the airbag module, always refer to "CAUTION" of "General Description" in "AIRBAG SYSTEM" section. <Ref. to AB-11, CAUTION, General Description.>**

(1) Using a hexagon wrench wrapped with protective tape, push in the snap pins to disengage the locks (3 places).



(2) Disconnect the horn harness and airbag connector, and remove the airbag module. <Ref. to AB-24, DRIVER'S AIRBAG MODULE, CURTAIN AIRBAG MODULE & PRETENSIONER, PROCEDURE, Airbag Connector.>

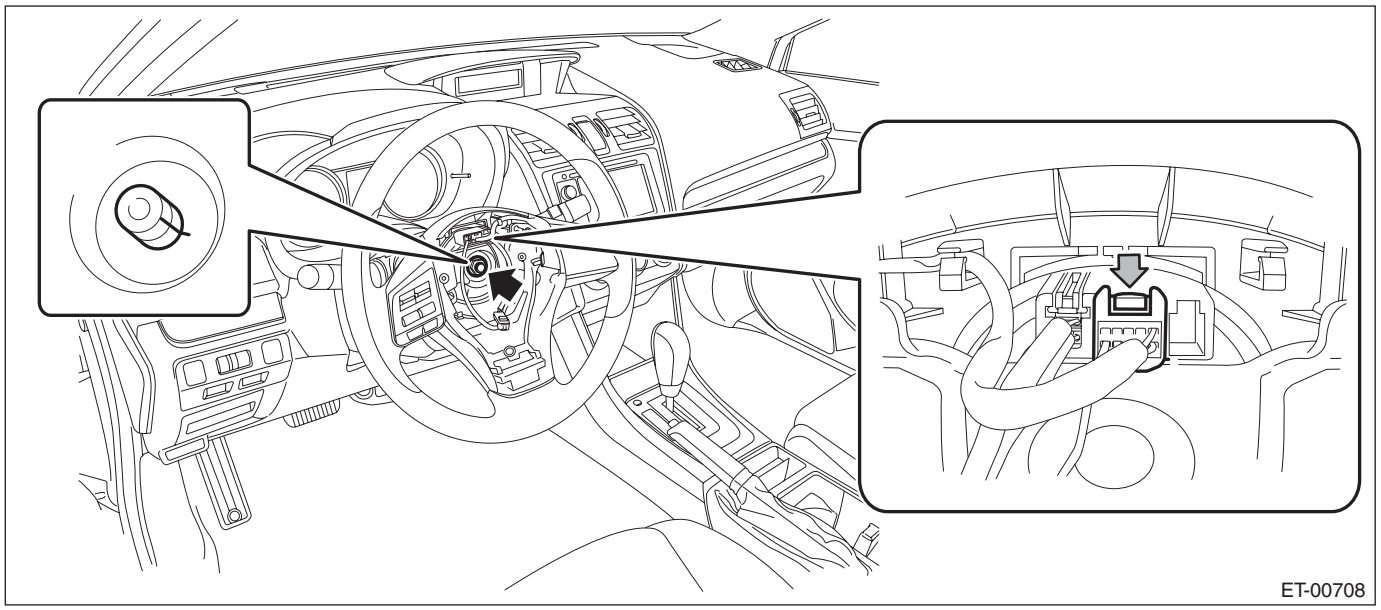


4) Remove the steering wheel.

**CAUTION:**
**• Always use the steering wheel puller for removal to avoid deforming the steering wheel.**
**• If the steering wheel has been removed, make sure that the steering roll connector is not turned from the original position.**

***PREPARATION TOOL:***
***Steering wheel puller***

(1) Disconnect the connector and remove the nut.
(2) Put alignment marks and remove the steering wheel.



## B: INSTALLATION

**CAUTION:**
**• Before handling the airbag module, refer to "CAUTION" of "General Description" in "AIRBAG SYSTEM". <Ref. to AB-11, CAUTION, General Description.>**
**• Be careful not to damage the curtain airbag module during removal.**
**• If the steering wheel and steering angle sensor are removed, perform "VDC sensor midpoint setting mode" of the VDC. <Ref. to VDC-19, VDC SENSOR MIDPOINT SETTING MODE, ADJUSTMENT, VDC Control Module and Hydraulic Control Unit (VDCCM&H/U).>**
1) Align the center position of the roll connector. <Ref. to AB-109, ADJUSTMENT, Roll Connector.>
2) Install each part in the reverse order of removal.

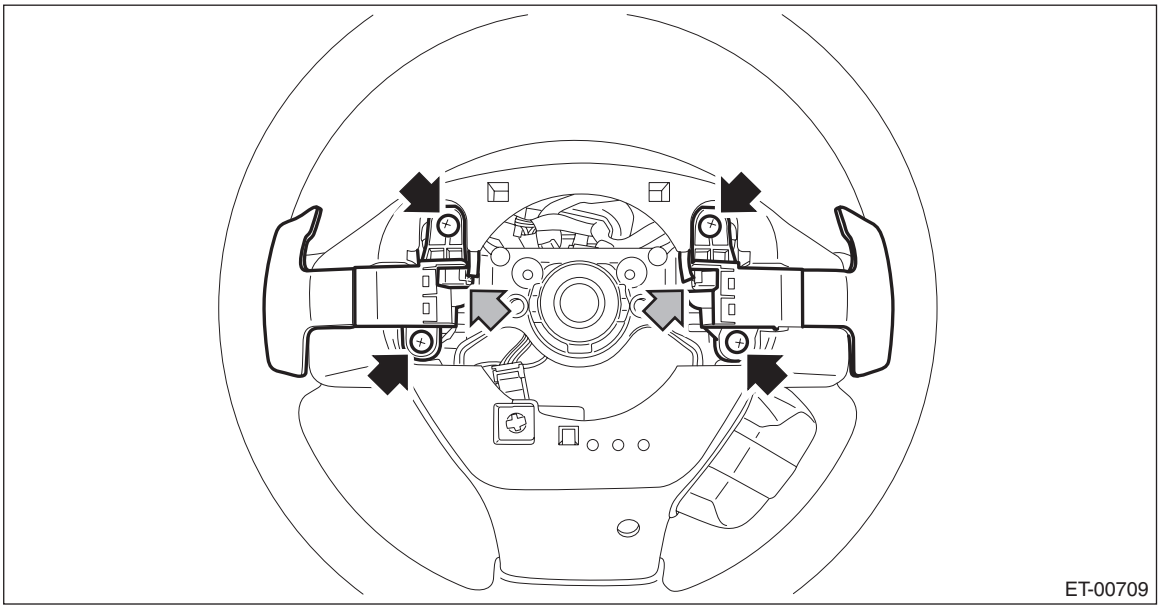
NOTE:
Align the alignment marks on the steering wheel and the column assembly - steering.

***Tightening torque:***
***Steering wheel: 39 N·m (3.98 kgf-m, 28.8 ft-lb)***

***Clearance:***
***Cover assembly - column to Steering wheel: 4 — 6 mm (0.16 — 0.24 in)***

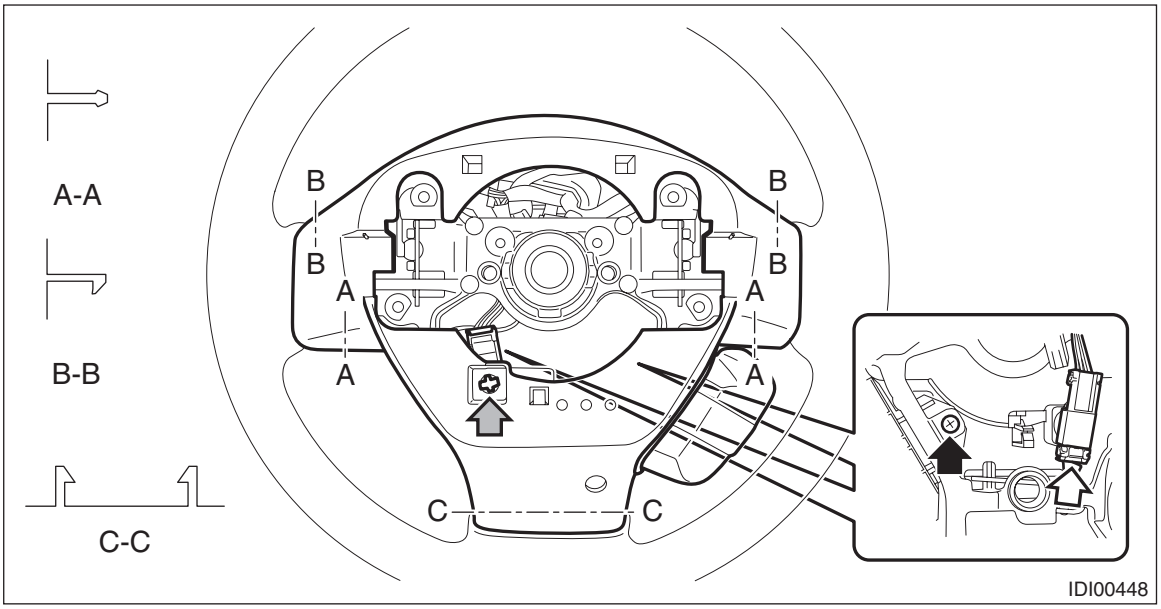
## C: DISASSEMBLY

1) Remove the screw, disconnect the connector and remove the paddle shift switch. (Model with paddle shift)

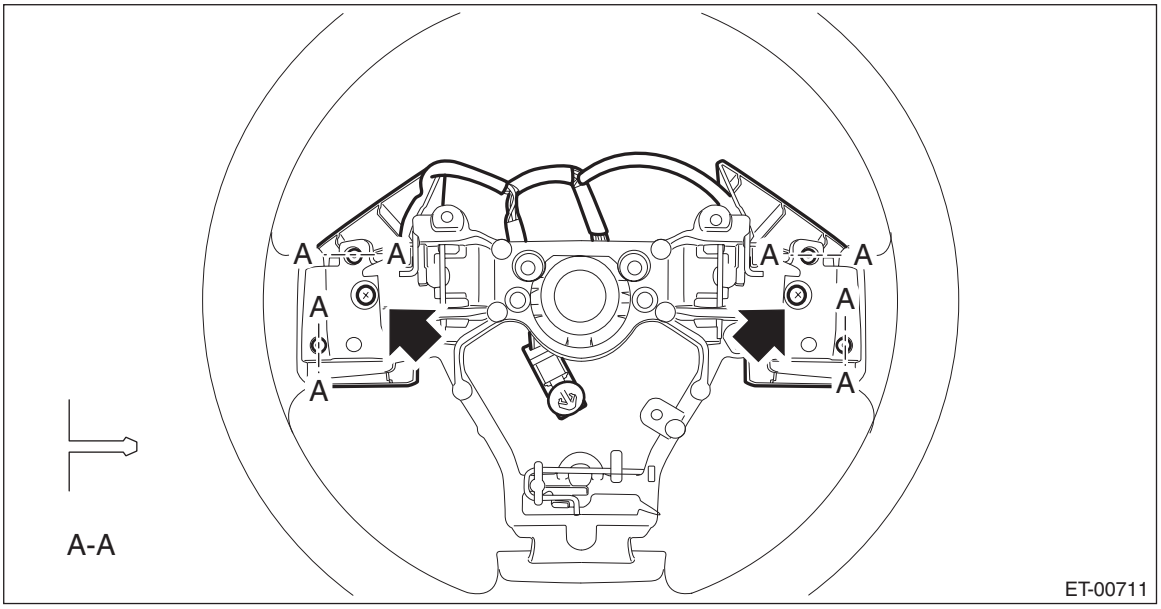


2) Release the claws and clips, and remove the cover - steering wheel LWR.

NOTE:
For model with steering switch, remove the connector and screw.



3) Remove the screws and then remove the satellite switch assembly.

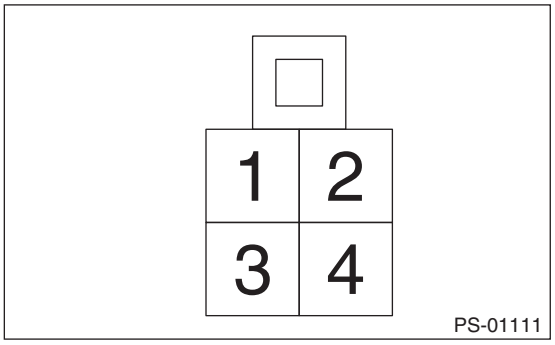


## D: ASSEMBLY

Assemble each part in the reverse order of disassembly.

## E: INSPECTION

Check the resistance of paddle switch.



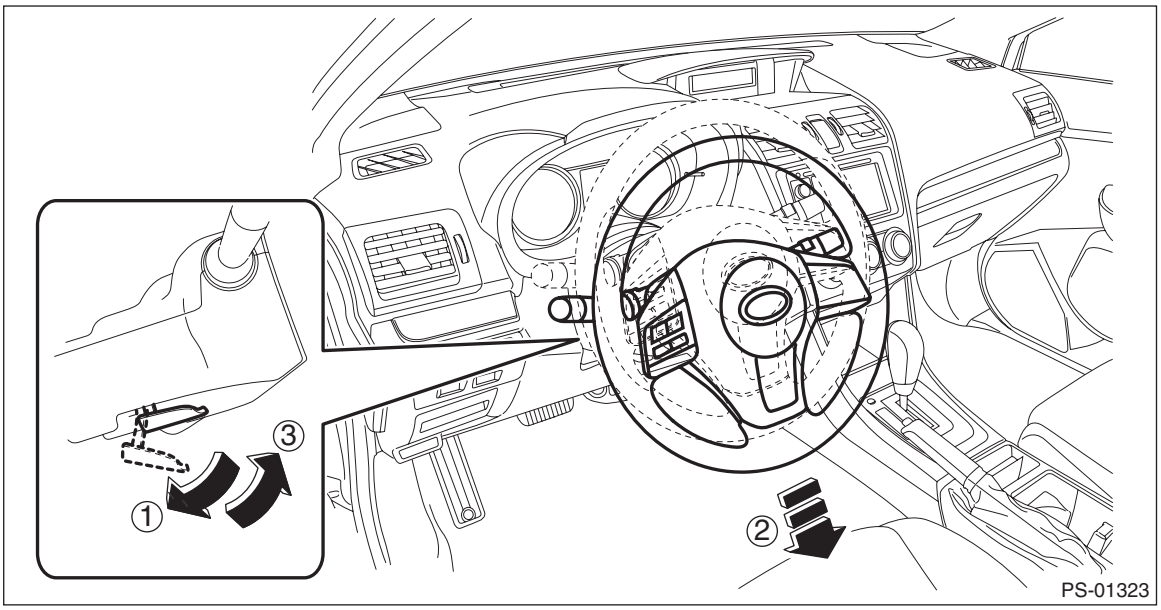
| Step | | Check | Yes | No |
|---|---|---|---|---|
| 1 | **SHIFT-UP SWITCH CONTINUITY CHECK.**<br>1) Operate the + side of paddle shift assembly and hold it.<br>2) Measure the resistance between the paddle shift assembly connectors.<br>***Terminals***<br>***No. 1 — No. 3:*** | Is the resistance less than 10 Ω? | Go to step **2**. | Replace the paddle shift assembly. |
| 2 | **SHIFT-DOWN SWITCH CONTINUITY CHECK.**<br>1) Operate the – side of paddle shift assembly and hold it.<br>2) Measure the resistance between the paddle shift assembly connectors.<br>***Terminals***<br>***No. 1 — No. 4:*** | Is the resistance less than 10 Ω? | Go to step **3**. | Replace the paddle shift assembly. |
| 3 | **CHECK SHIFT SWITCH INSULATION.**<br>1) Do not operate the paddle shift assembly.<br>2) Measure the resistance between the paddle shift assembly connectors.<br>***Terminals***<br>***No. 1 — No. 3:***<br>***No. 1 — No. 4:*** | Is the resistance 1 MΩ or more? | Paddle shift assembly is normal. | Replace the paddle shift assembly. |

Replace the paddle switch if the inspection result is not within the standard.

# 4. Universal Joint

## A: REMOVAL

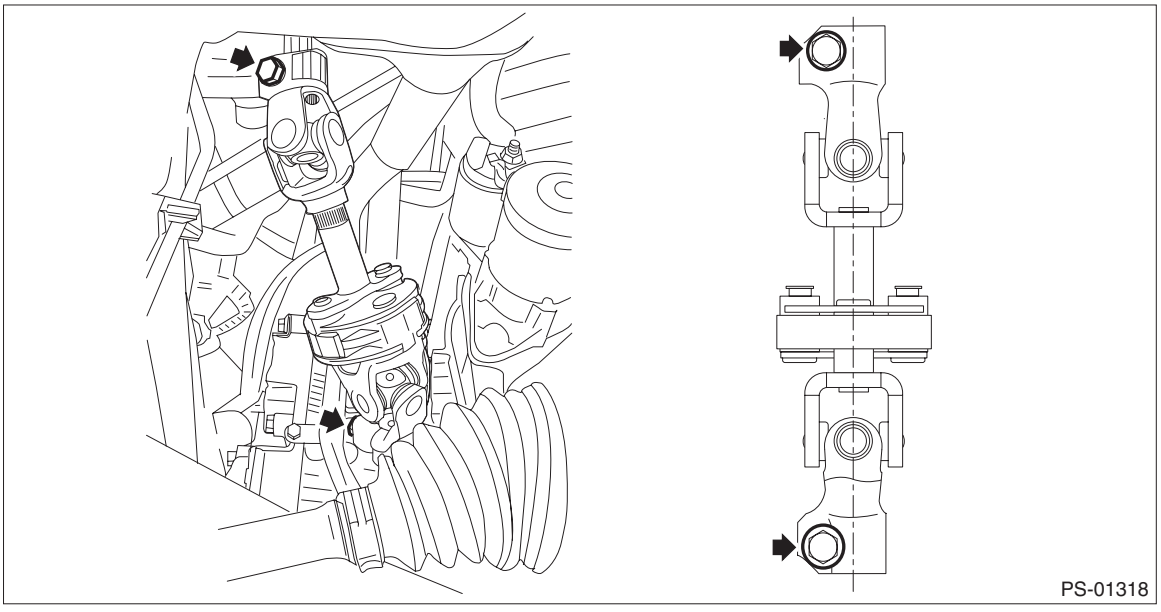
1) Adjust the tilt position of the column assembly - steering to the lowest position and lock the tilt lever.



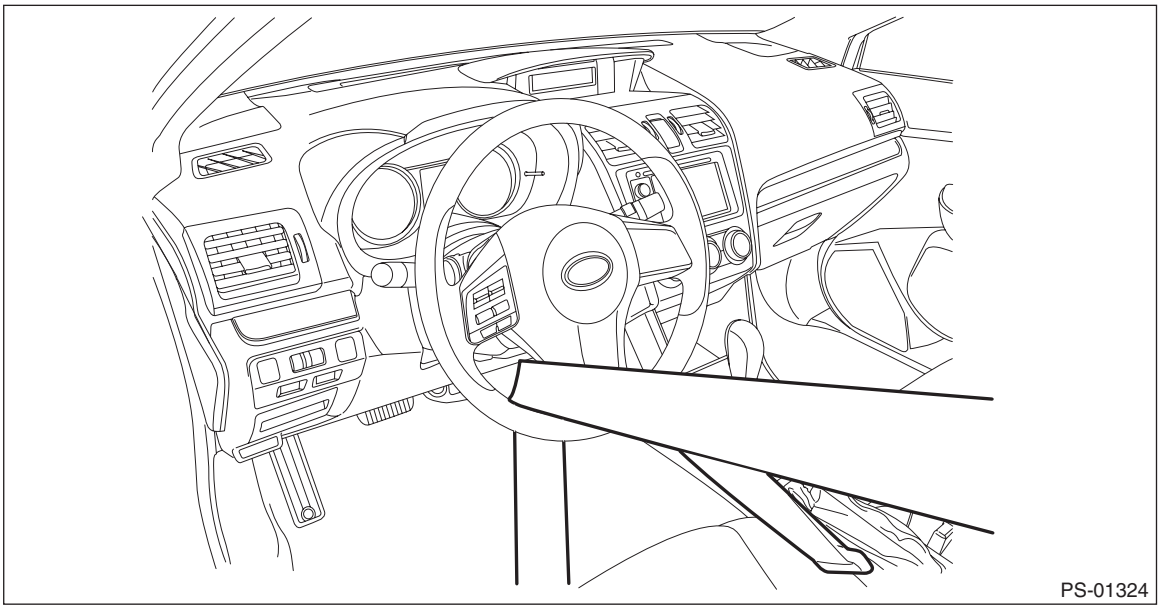
2) Remove the universal joint assembly - steering.
   (1) Place alignment marks on the universal joint assembly - steering.

NOTE:
Place alignment marks on the following positions.
- Between the column assembly - steering and the universal joint assembly - steering
- Between the steering gearbox assembly and the universal joint assembly - steering

   (2) Remove the bolt, and remove the universal joint assembly - steering.

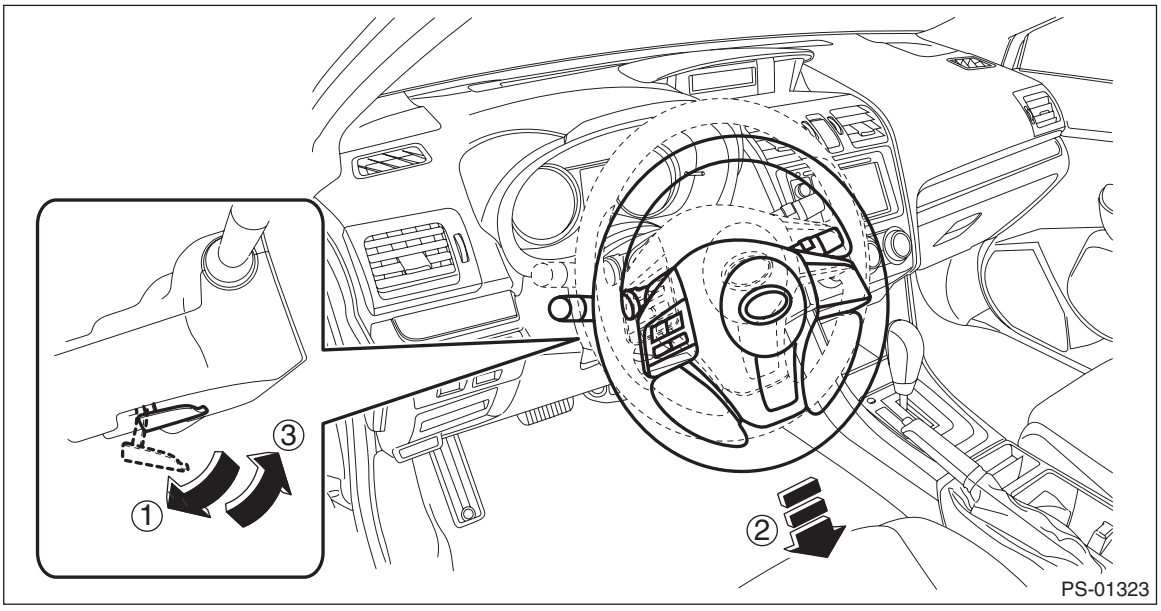


3) Prevent the steering wheel from turning using the seat belt.



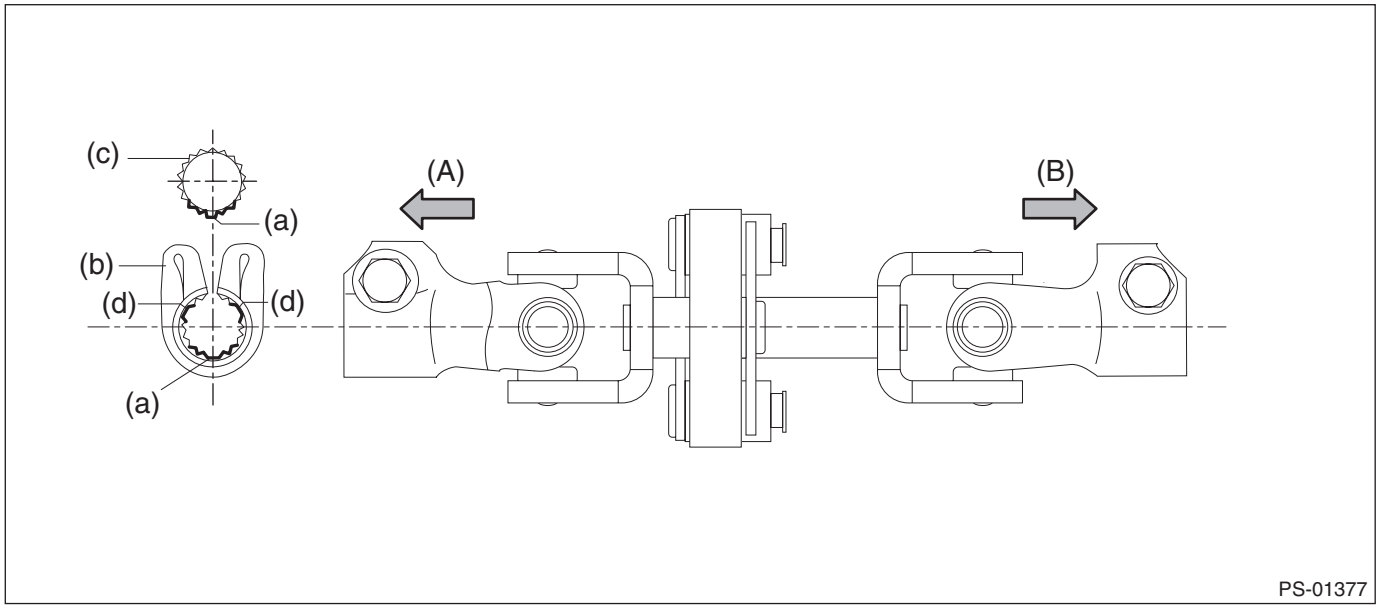
## B: INSTALLATION

1) Before installation, check the universal joint assembly - steering. <Ref. to PS-16, INSPECTION, Universal Joint.>
2) Adjust the tilt position of the column assembly - steering to the neutral position and lock the tilt lever.



3) Align the cutout portion (a) at serrated section of the column shaft (c) and yoke (b), then install the universal joint assembly - steering into column shaft.

**CAUTION:**
**Be sure to align the protruded portion (a) of the column shaft with the cutout portion (a) at serrated section. If another cutout portions (d) are used for alignment, the bolt of the universal joint assembly - steering cannot be assembled.**



(A) Column shaft side (B) Gearbox side

4) Install the universal joint assembly - steering to the serrations of the gearbox assembly by matching the alignment marks.
5) Tighten the bolts on the gearbox side first, and then the column shaft side.

**CAUTION:**
**Be sure to follow the tightening order and tightening torque of the universal joint assembly - steering to avoid the steering effort from becoming heavy.**

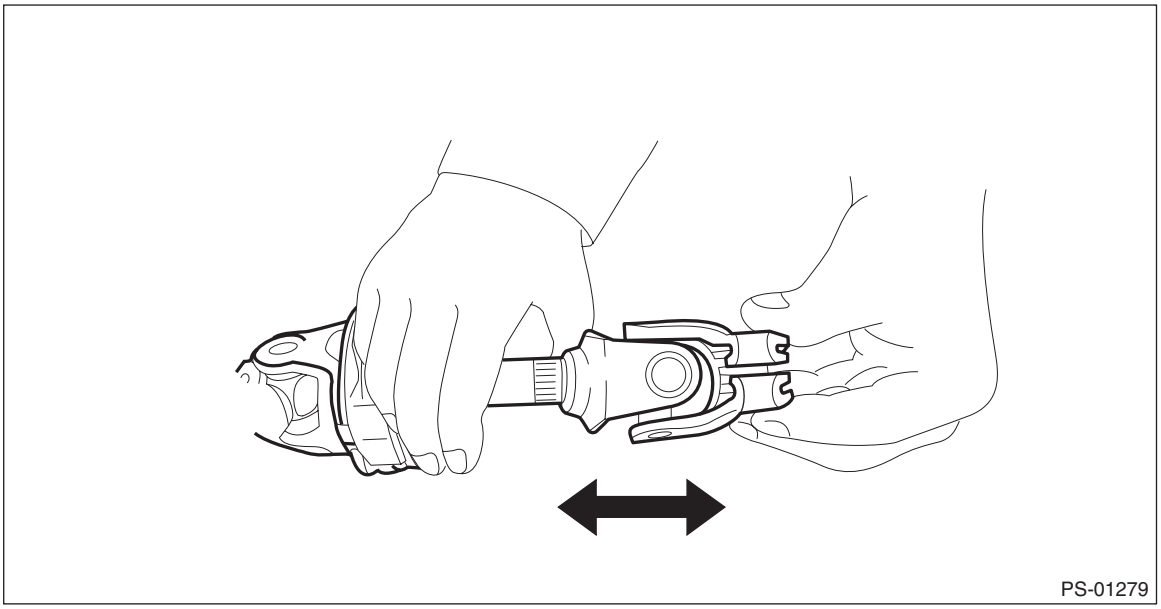
***Tightening torque:***
***24 N·m (2.45 kgf-m, 17.7 ft-lb)***

***Clearance:***
***Universal joint assembly - steering coupling to adjacent parts: 15 mm (0.59 in) or more***

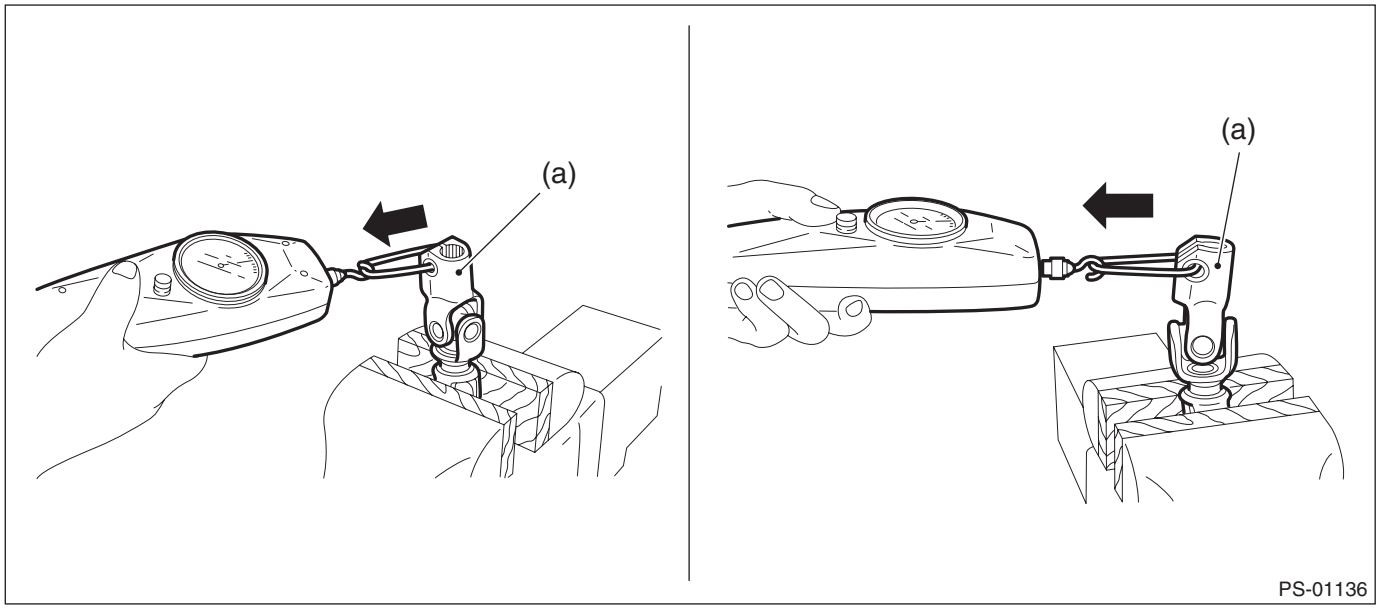
## C: INSPECTION

Check for wear, damage or any other faults.
1) Check the universal joint assembly - steering for excessive looseness.

***Service limit:***
***Play of the universal joint assembly - steering: 0 mm (0 in)***

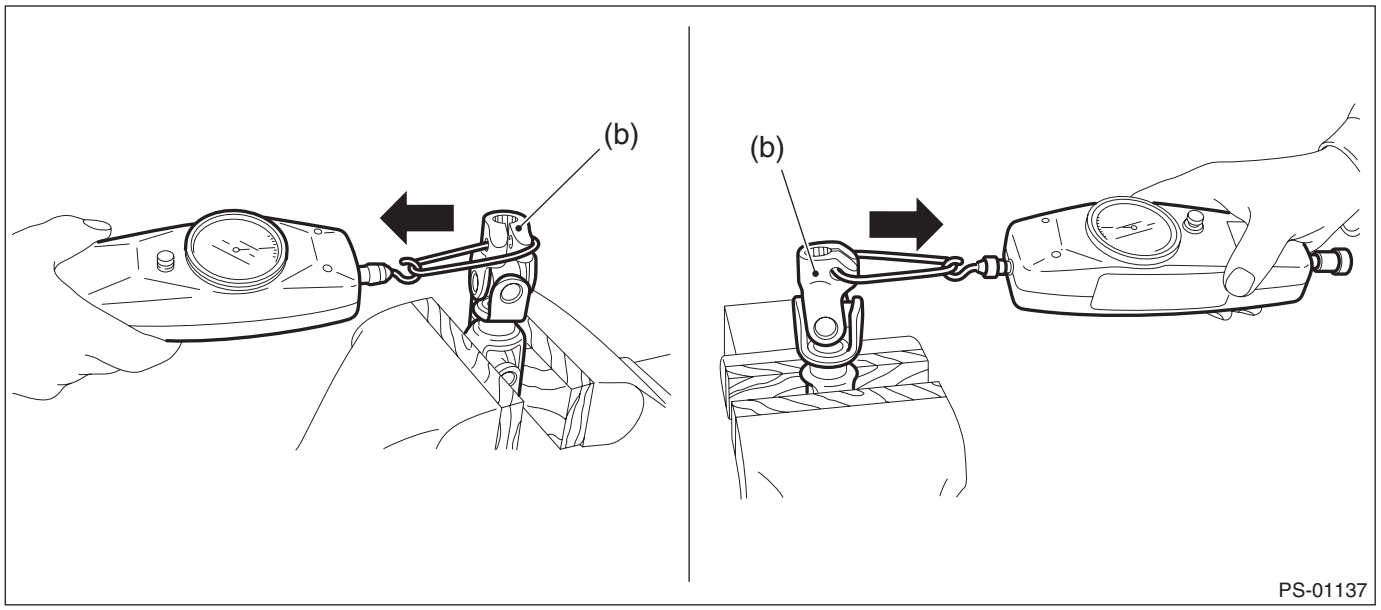


2) Measure the swing torque of the universal joint assembly - steering.
(1) Place the universal joint assembly - steering between wooden blocks and fix it on a vise.
(2) With the yoke (a) of gearbox side facing up, measure the swing torque in two directions.



***Service limit:***
***Maximum load: 3.8 N (0.39 kgf, 0.86 lbf) or less***

(3) With the yoke (b) of column assembly - steering side facing up, measure the swing torque in two directions.



***Service limit:***

***Maximum load: 7.3 N (0.74 kgf, 1.64 lbf) or less***

(4) Replace as necessary, if it is found defective.

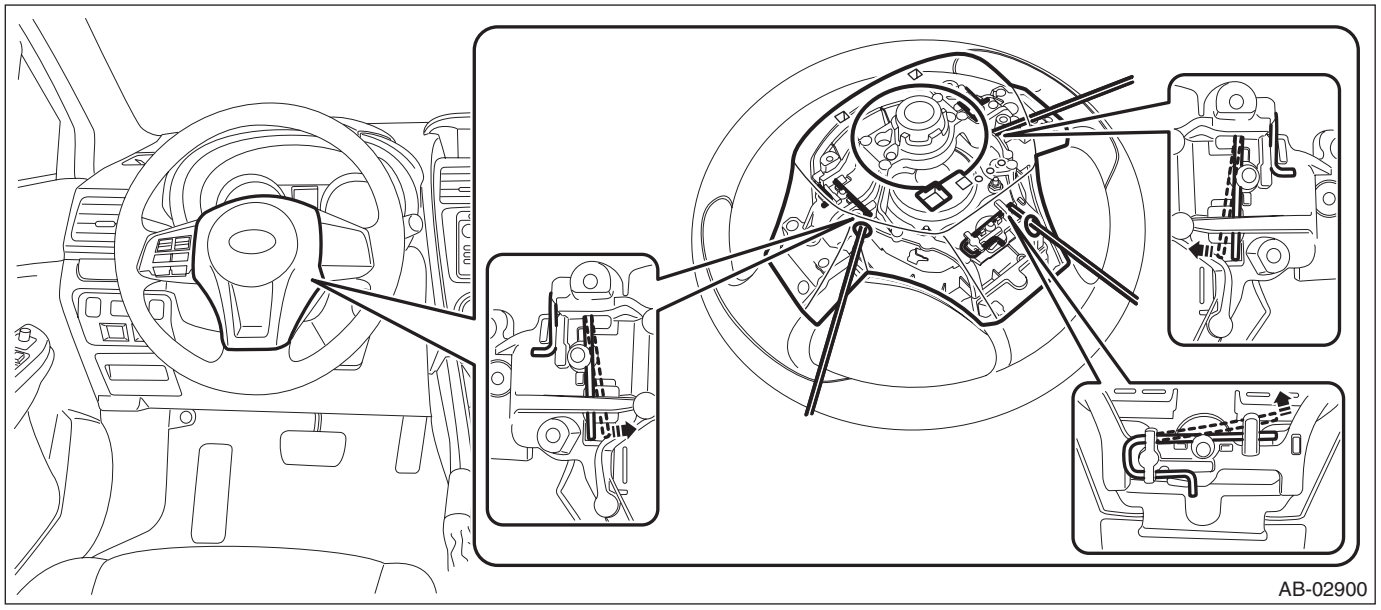
# 5. Steering Column

## A: REMOVAL

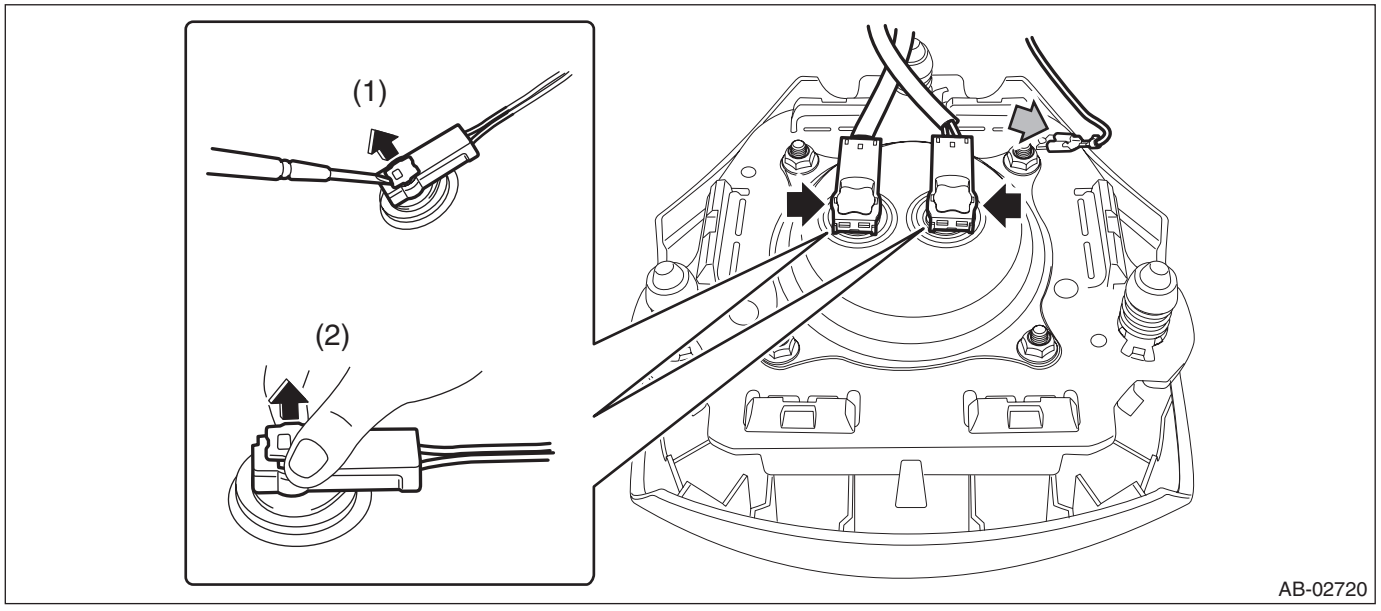
1) Disconnect the ground cable from battery and wait for at least 60 seconds before starting work.
2) Remove the driver's airbag module.

**CAUTION:**
**Before performing service on the airbag module, always refer to "CAUTION" of "General Description" in "AIRBAG SYSTEM" section. <Ref. to AB-11, CAUTION, General Description.>**

(1) Using a hexagon wrench etc. wrapped by protective tape, insert the snap pins and release the locks (3 locations).



(2) Disconnect the horn harness and airbag connector, and remove the airbag module. <Ref. to AB-24, DRIVER'S AIRBAG MODULE, CURTAIN AIRBAG MODULE & PRETENSIONER, PROCEDURE, Airbag Connector.>

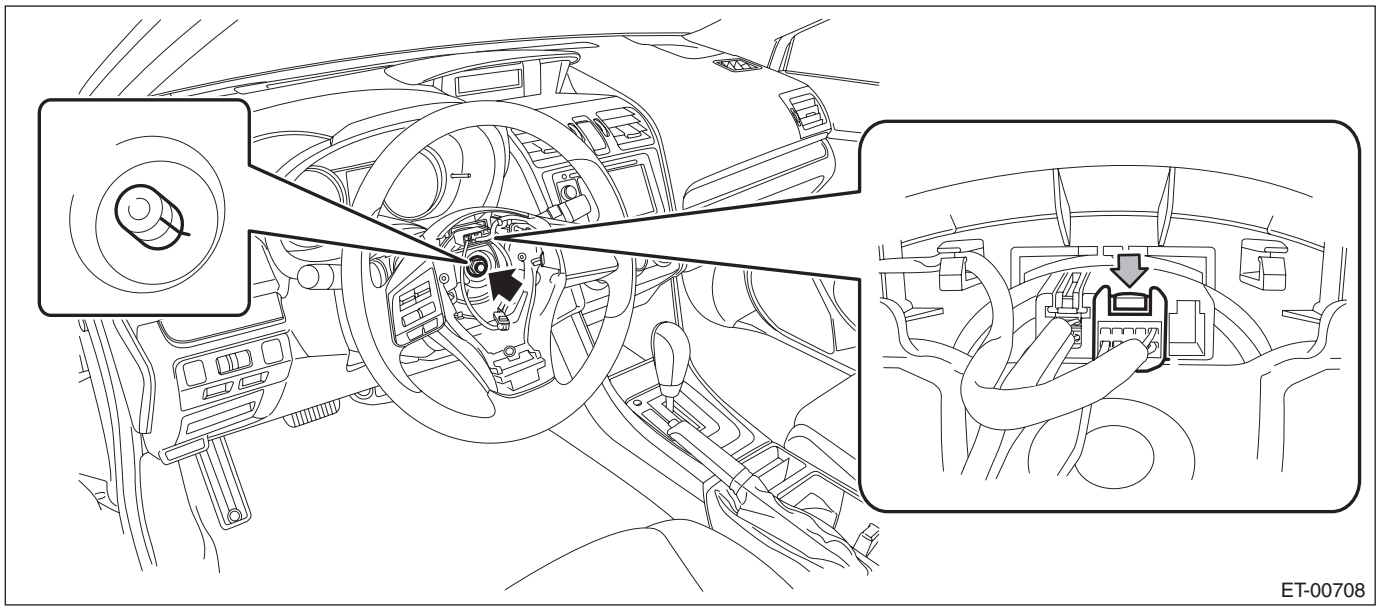


3) Remove the steering wheel.

**CAUTION:**
**• Always use the steering wheel puller for removal to avoid deforming the steering wheel.**
**• If the steering wheel has been removed, make sure that the steering roll connector is not turned from the original position.**

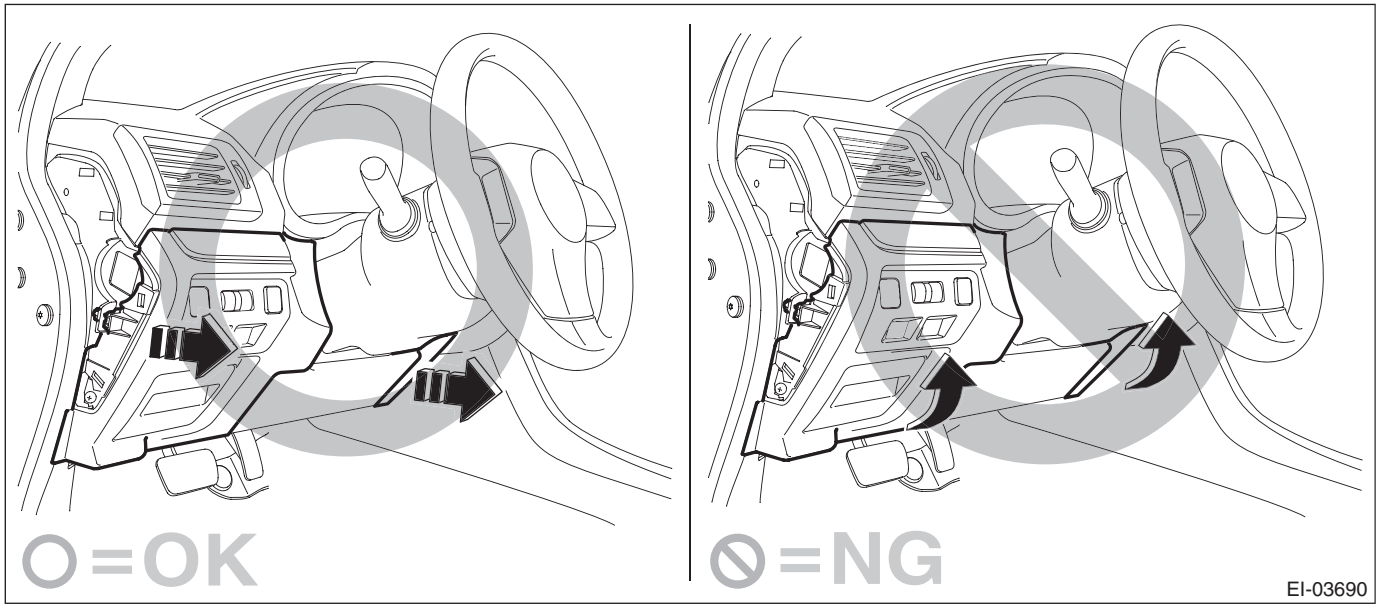
***Preparation tool:***
***Steering wheel puller***

(1) Disconnect the connector and remove the nut.
(2) Put alignment marks and remove the steering wheel.

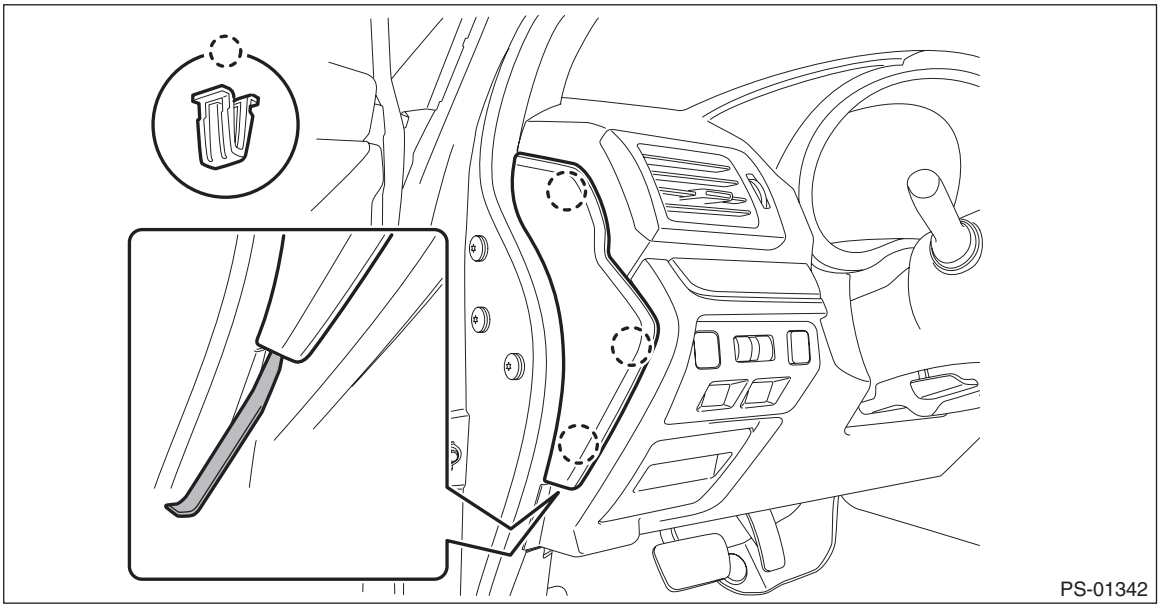


4) Remove the cover assembly - instrument panel LWR driver.

**CAUTION:**
**When removing the cover assembly - instrument panel LWR driver, be sure to pull it toward you. If attempting to remove by turning it upward, the claws may be damaged.**



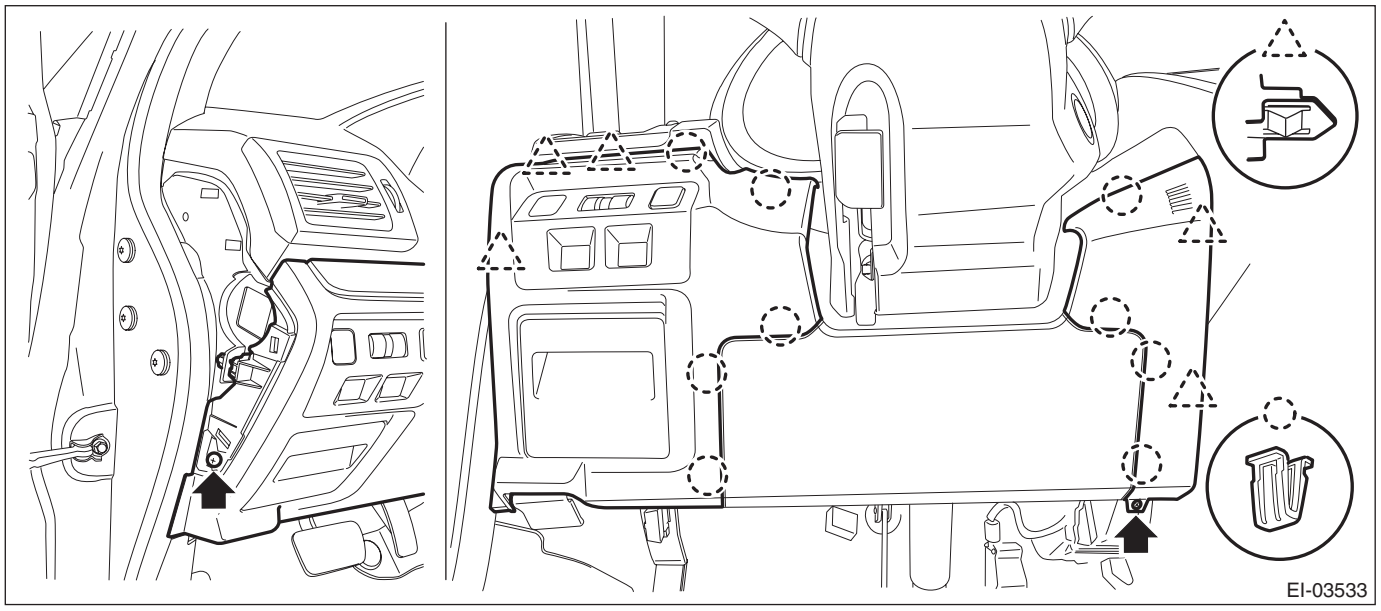
(1) Remove the clips, and remove the cover - instrument panel side LH.



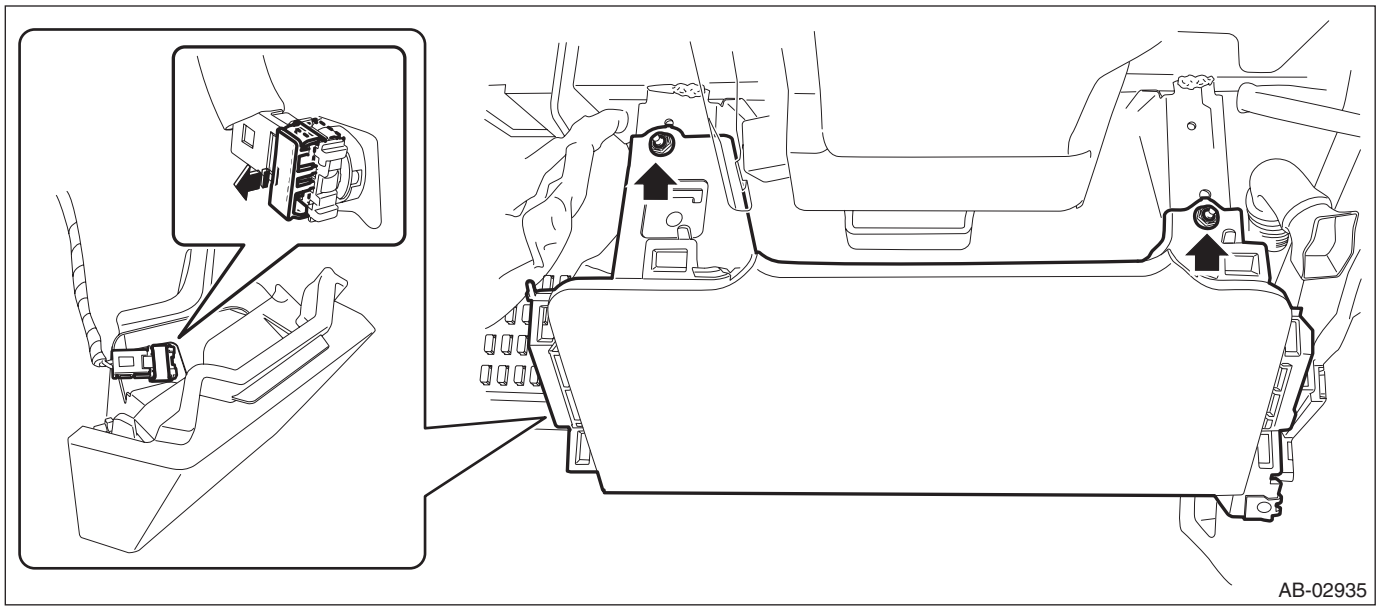
NOTE:
Using a plastic remover, open the cover - instrument panel side LH.

(2) Remove the screws and release the clips and claws.

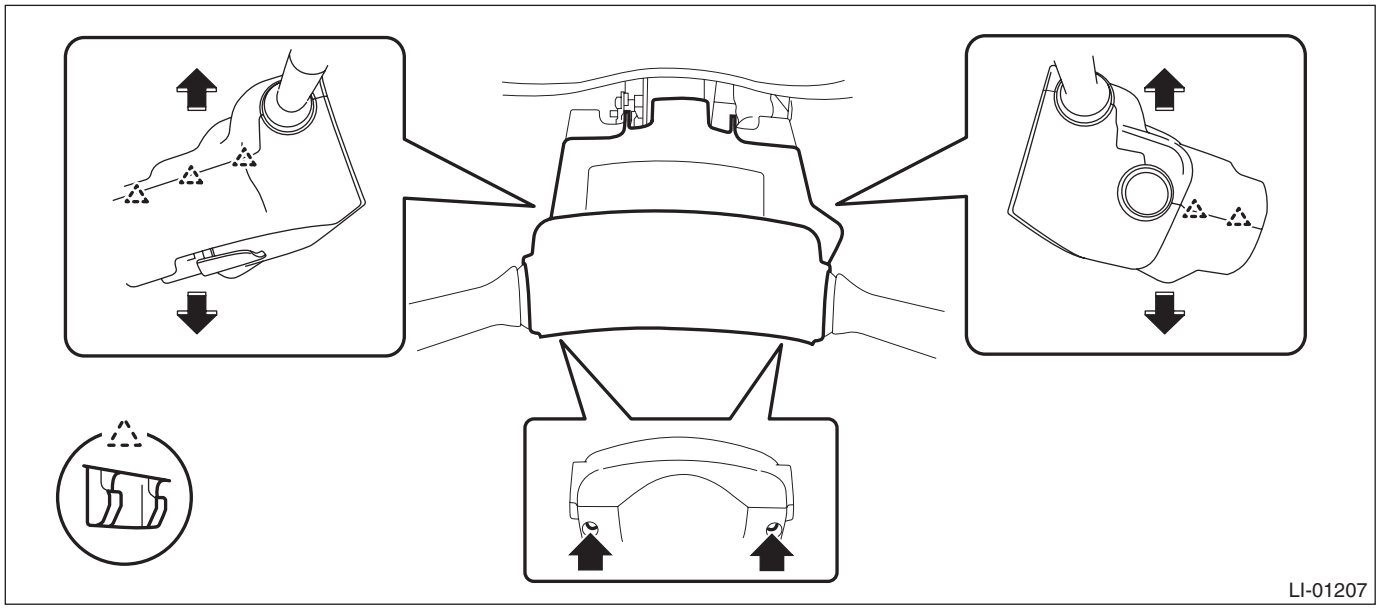
(3) Disconnect the harness connectors, and remove the cover assembly - instrument panel LWR driver INN and the cover assembly - instrument panel LWR driver OUT.



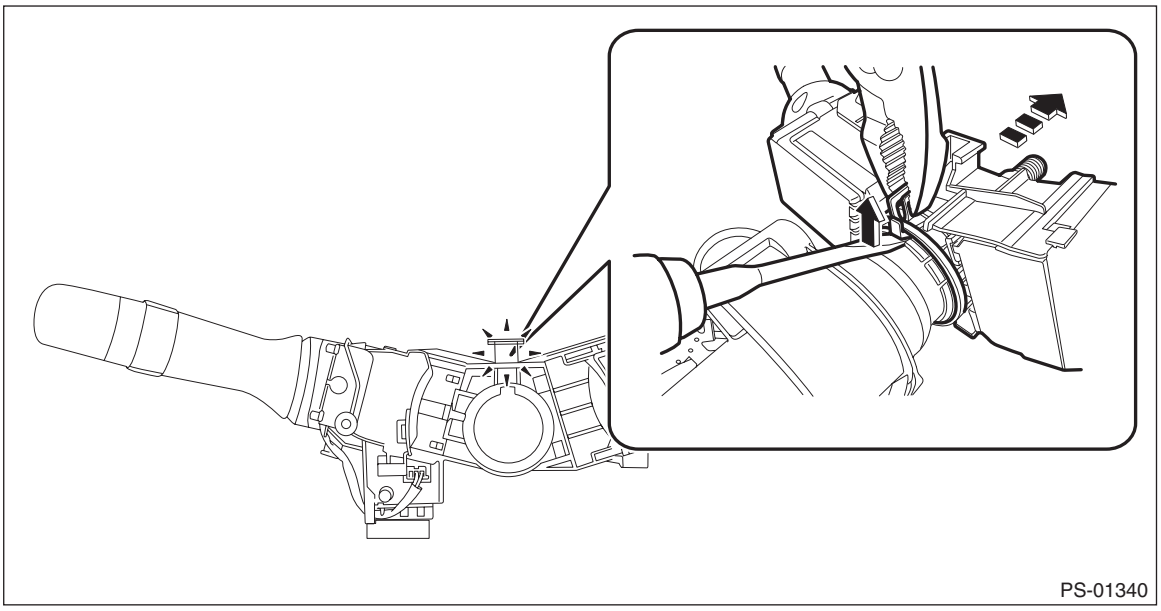
5) Remove the nuts to remove the knee airbag module and disconnect the harness connector. <Ref. to AB-33, KNEE AIRBAG MODULE, PROCEDURE, Airbag Connector.>



6) Remove the cover assembly - column.
(1) Remove the screws.
(2) Release the claw, and remove the cover assembly - column UPR and the cover assembly - column LWR.



7) Remove the switch assembly - combination.
   (1) Disconnect the connector, and loosen the clamp to release the claws.
   (2) Pull out the switch assembly - combination from the column assembly - steering.

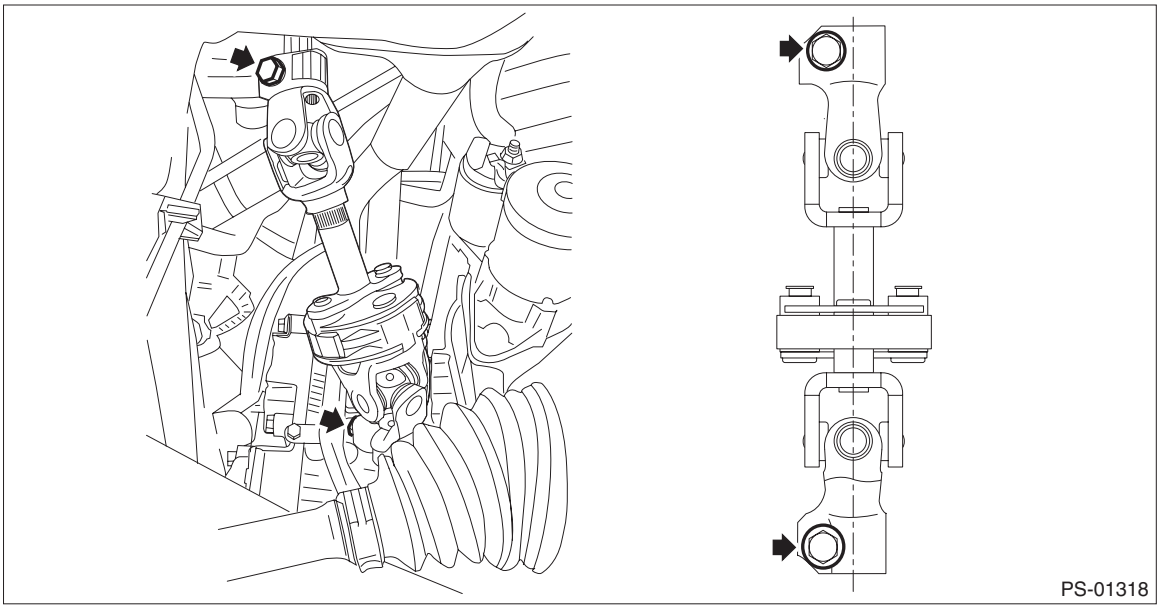


8) Remove all connectors from the column assembly - steering.
9) Remove the universal joint assembly - steering.

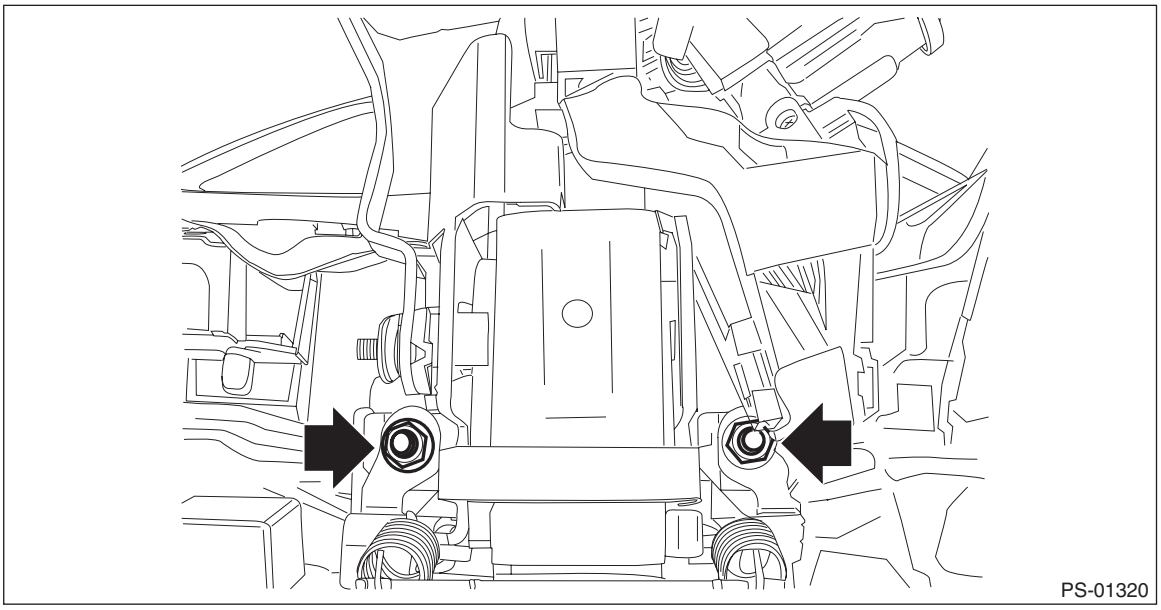
**CAUTION:**
**To prevent damage to the universal joint assembly - steering and error of handling force, make sure to remove the universal joint assembly - steering.**
   (1) Place alignment marks on the universal joint assembly - steering.

NOTE:
Place alignment marks on the following positions.
- Between the column assembly - steering and the universal joint assembly - steering
- Between the steering gearbox assembly and the universal joint assembly - steering

   (2) Remove the bolt, and remove the universal joint assembly - steering.



10) Remove the two nuts under the beam COMPL - steering securing the column assembly - steering.



11) Pull out the column assembly - steering from the hole on toe board.

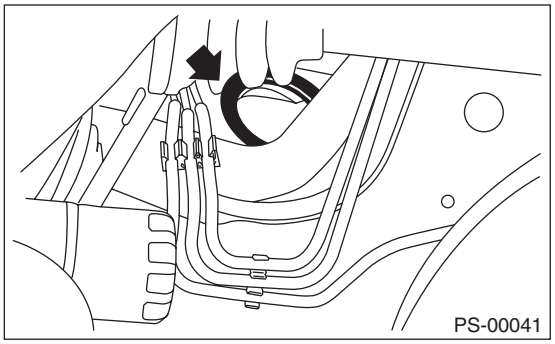
**CAUTION:**
**Do not loosen the tilt lever when the column assembly - steering is not secured to the vehicle.**

12) Remove the ignition key lock from the column assembly - steering. <Ref. to SL-61, REPLACEMENT, Ignition Key Lock.>

## B: INSTALLATION

**CAUTION:**
**If the steering wheel and steering angle sensor are removed, perform "VDC sensor midpoint setting mode" of the VDC. <Ref. to VDC-19, VDC SENSOR MIDPOINT SETTING MODE, ADJUSTMENT, VDC Control Module and Hydraulic Control Unit (VDCCM&H/U).>**

1) Install the grommet to the toe board.



2) Insert the end of the column assembly - steering into the toe board grommet.
3) Tighten the column assembly - steering installation bolt located under the beam COMPL - steering with the tilt lever fixed.

***Tightening torque:***
***20 N·m (2.04 kgf-m, 14.8 ft-lb)***

4) Connect all connectors located under the beam COMPL - steering.
5) Connect the horn harness and airbag connector, and install the airbag module.
6) Install the knee airbag module.
7) Install the cover assembly - instrument panel LWR driver INN and OUT.

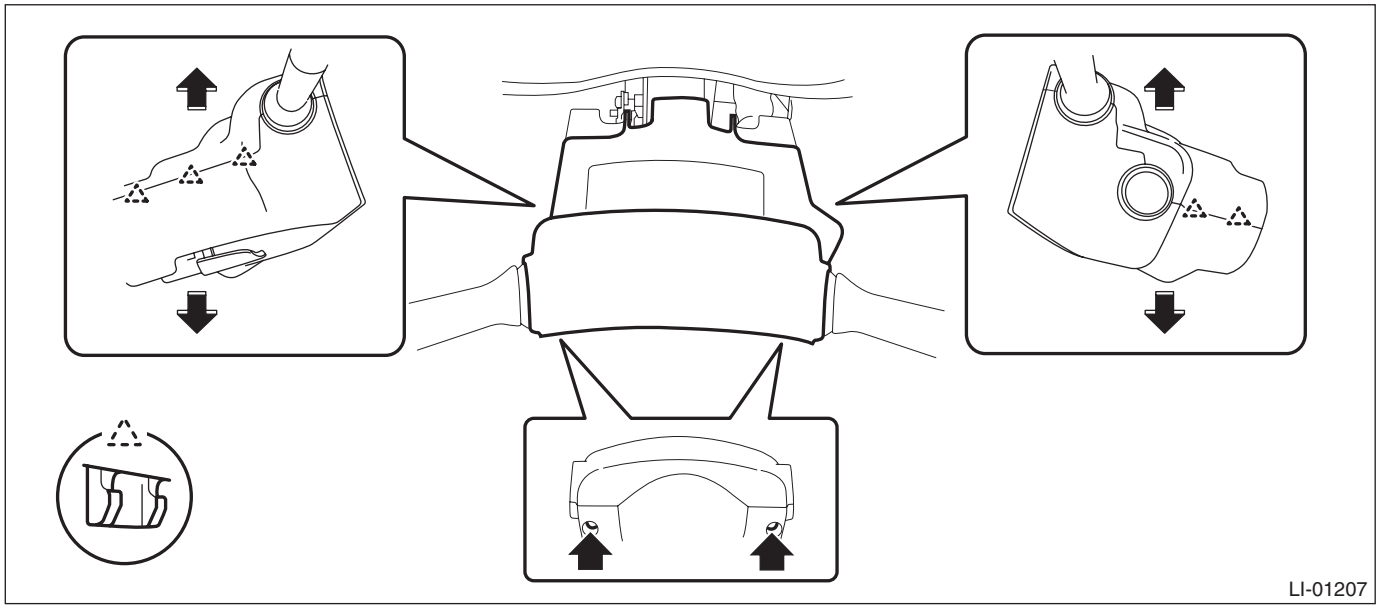
8) Install the universal joint assembly - steering. <Ref. to PS-14, INSTALLATION, Universal Joint.>

**CAUTION:**
**• Always install the universal joint assembly - steering after installing the steering column to avoid damage to the universal joint assembly - steering.**
**• Be sure to follow the tightening order and tightening torque of the universal joint assembly - steering to avoid the steering effort from becoming heavy.**

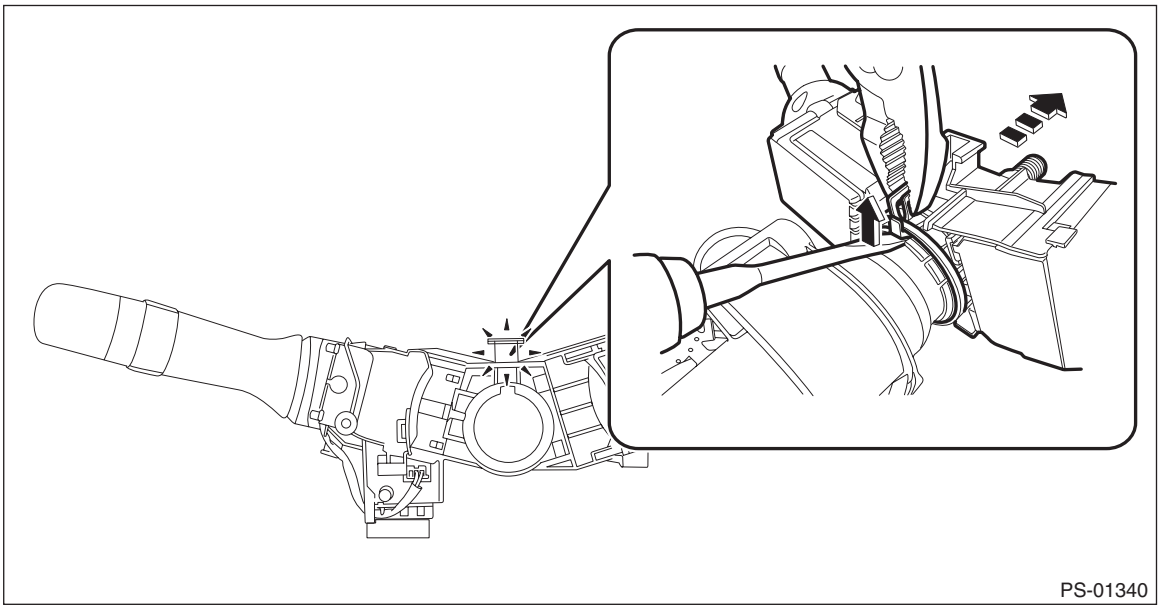
9) Align the center position of the steering roll connector. <Ref. to AB-109, ADJUSTMENT, Roll Connector.>
10) Install the steering wheel. <Ref. to PS-10, INSTALLATION, Steering Wheel.>

## C: DISASSEMBLY

1) Remove the cover assembly - column.
   (1) Lower the lever of the steering column.
   (2) Release the screw and claw, and remove the cover assembly - column UPR and the cover assembly - column LWR.



2) Remove the switch assembly - combination.
   (1) Disconnect the connector, and loosen the clamp to release the claws.
   (2) Pull out the switch assembly - combination from the column assembly - steering.



## D: ASSEMBLY

Assemble each part in the reverse order of disassembly.

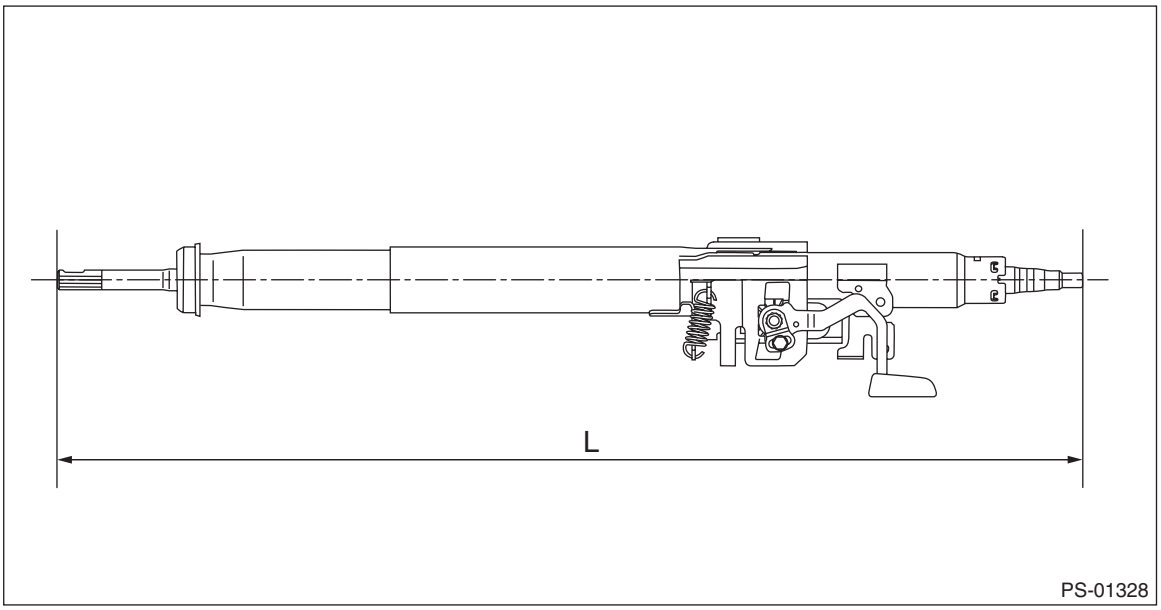
## E: INSPECTION

### 1. UNIT INSPECTION

Measure the overall length of the column assembly - steering. If not within specification, replace it.

***Standard: Overall length L***

***Tilt and telescopic column (measure while minimized):***
***$819.7^{+1.5}_{-1.5}$ mm ($32.3^{+0.059}_{-0.059}$ in)***



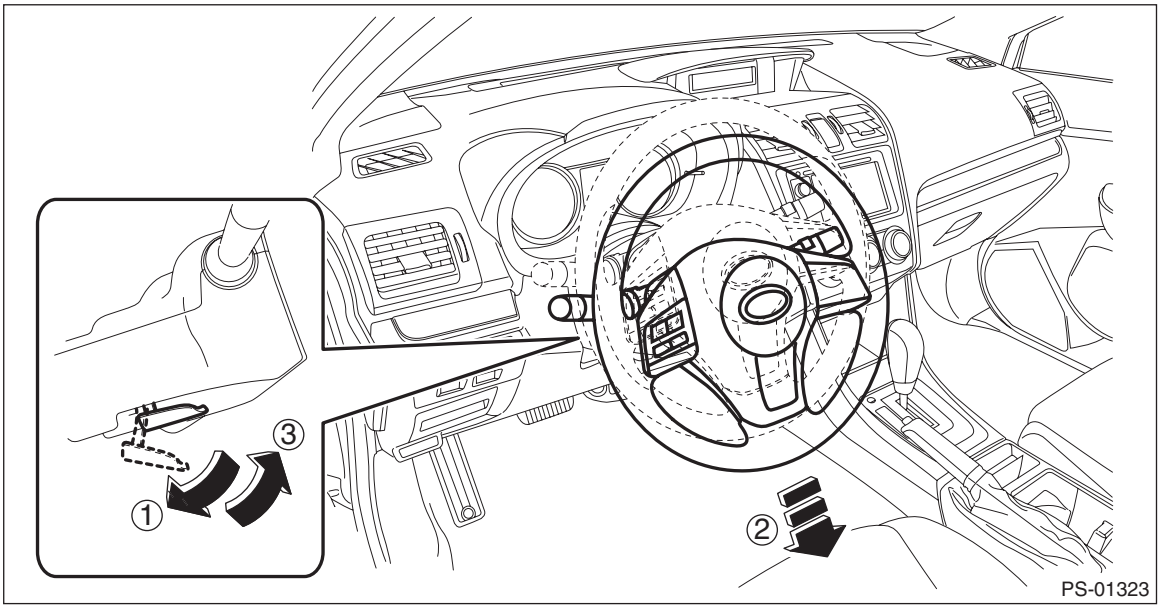
### 2. INSPECTION OF AIRBAG SYSTEM

Refer to “Airbag System” for airbag inspection procedure. <Ref. to AB-43, INSTALLATION, Driver’s Airbag Module.>

# 6. Electric Power Steering Gearbox

## A: REMOVAL

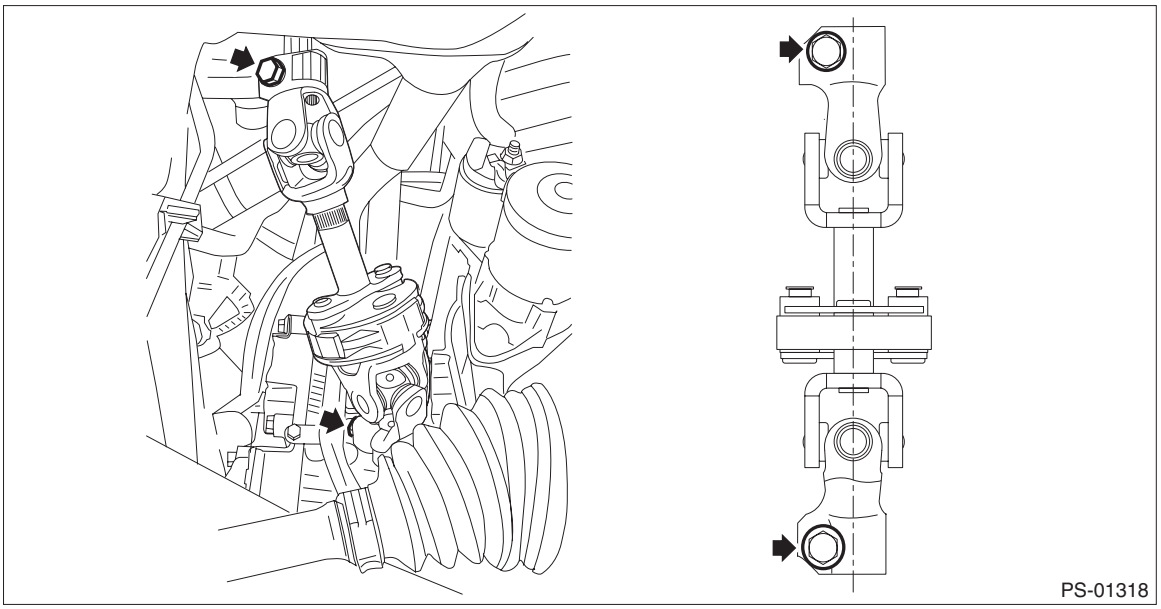
**CAUTION:**
**• The power steering control module continues to operate after the engine stops and calculate the temperature in the control module. Therefore, before starting service of the power steering system which requires disconnection of the connector, stop the engine and allow approx. 30 minutes until the control module becomes cold.**
**• Before removal or installation, be sure to remove any foreign matter (dust, moisture, oil, etc.) from the power steering control module connector.**
1) Disconnect the ground cable from battery.
2) Adjust the tilt position of the column assembly - steering to the lowest position and lock the tilt lever.



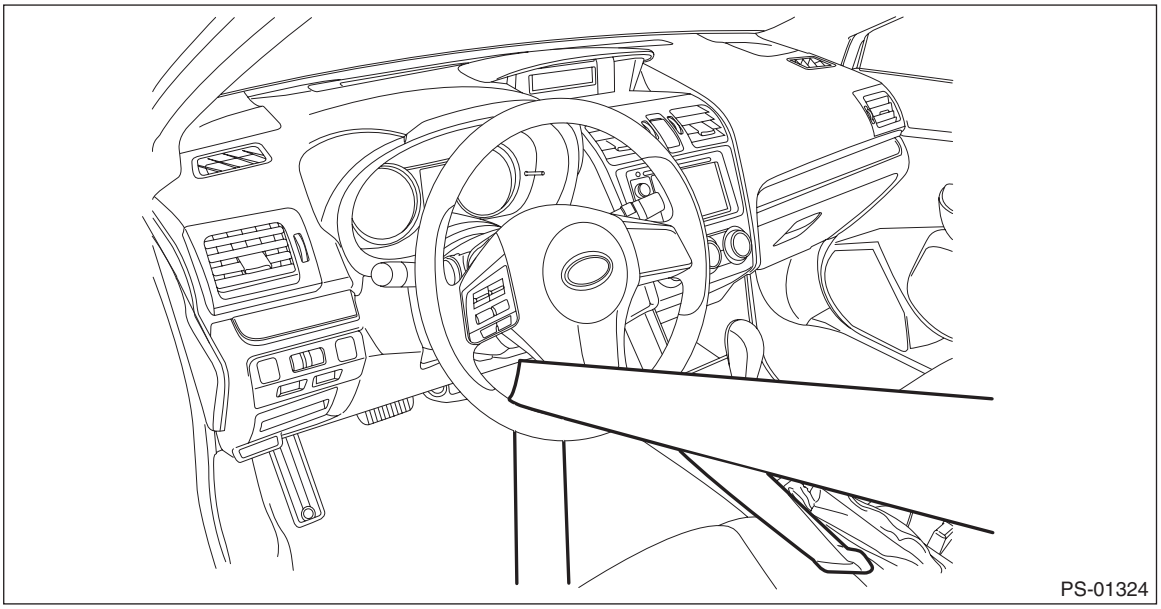
3) Remove the universal joint assembly - steering.
(1) Place alignment marks on the universal joint assembly - steering.

NOTE:
Place alignment marks on the following positions.
- Between the column assembly - steering and the universal joint assembly - steering
- Between the steering gearbox assembly and the universal joint assembly - steering

(2) Remove the bolt, and remove the universal joint assembly - steering.

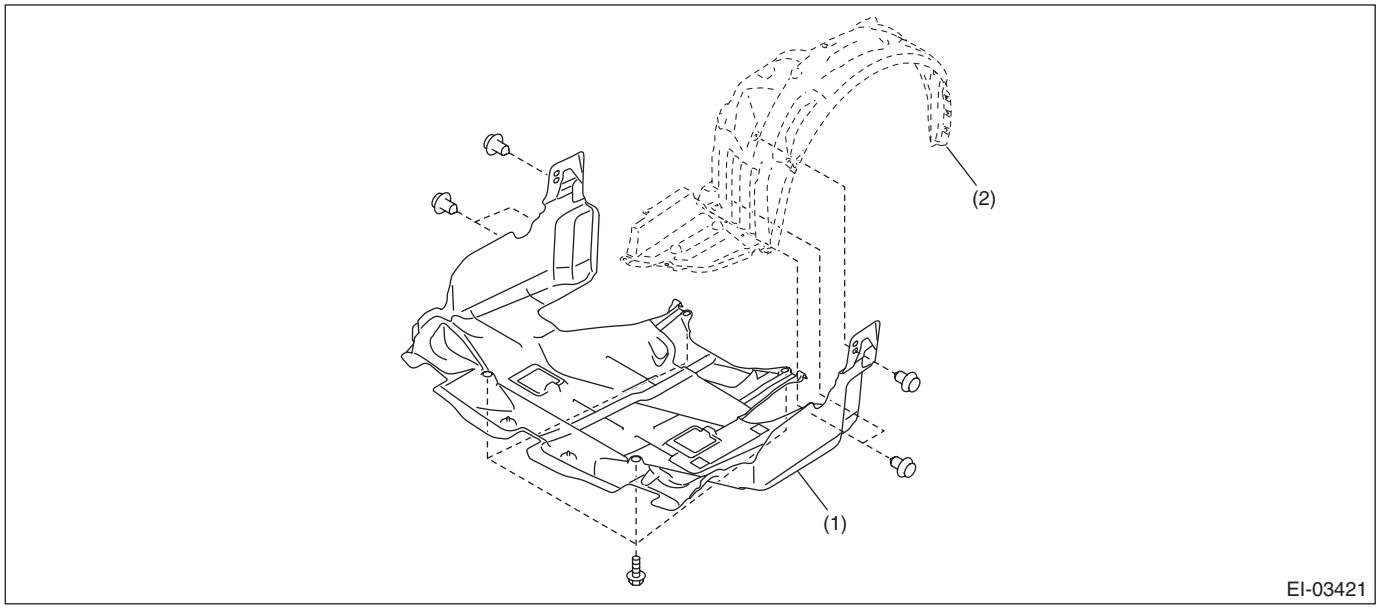


4) Prevent the steering wheel from turning using the seat belt.



5) Disconnect the connector and harness clamp from power steering control module.

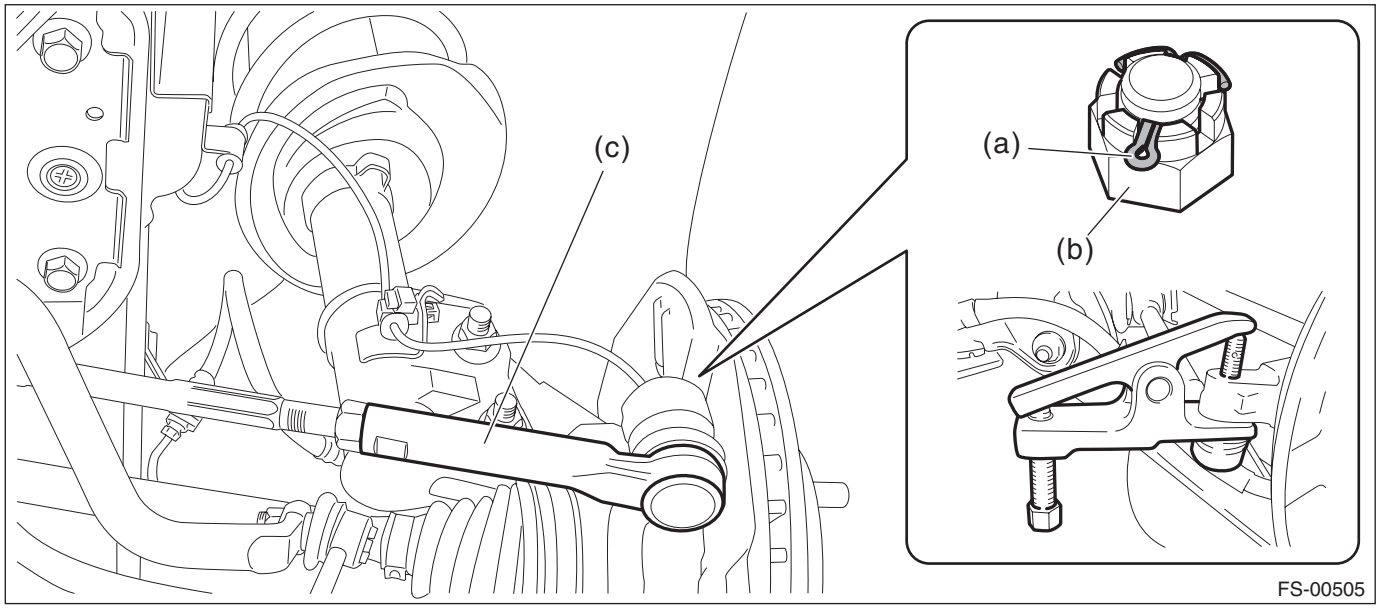
6) Remove the bolts and clips, and remove the under cover - front.



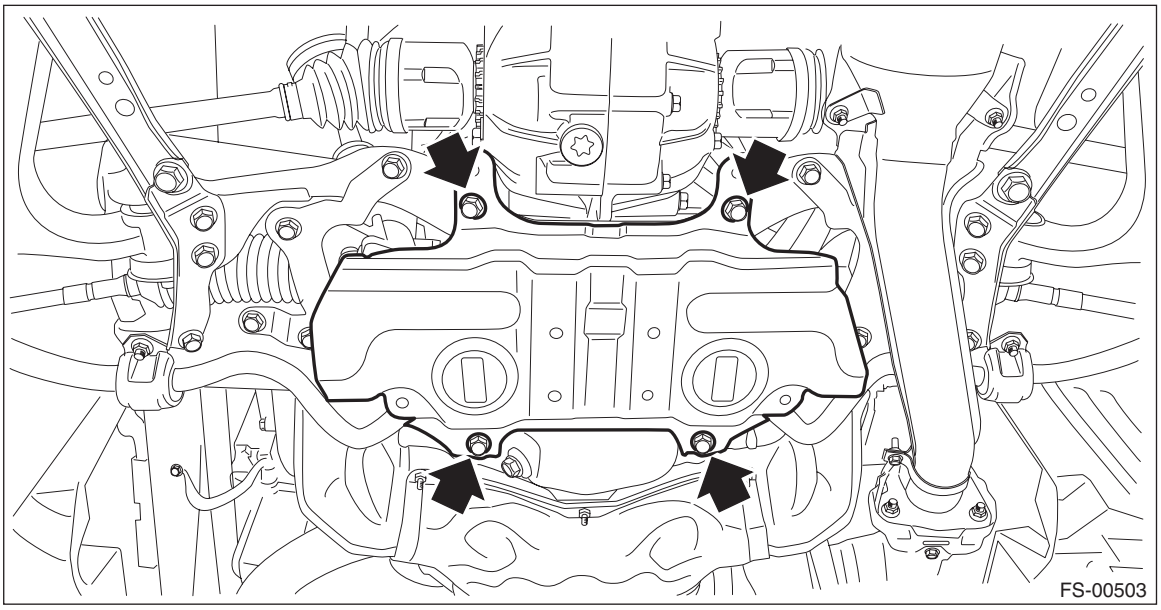
(1) Under cover - front (2) Mud guard - front

7) Remove the front wheels.
8) Disconnect the tie-rod end.
   (1) Pull out the cotter pin (a).
   (2) Remove the castle nut (b).
   (3) Using a tie-rod ball joint puller, remove the tie-rod end (c).

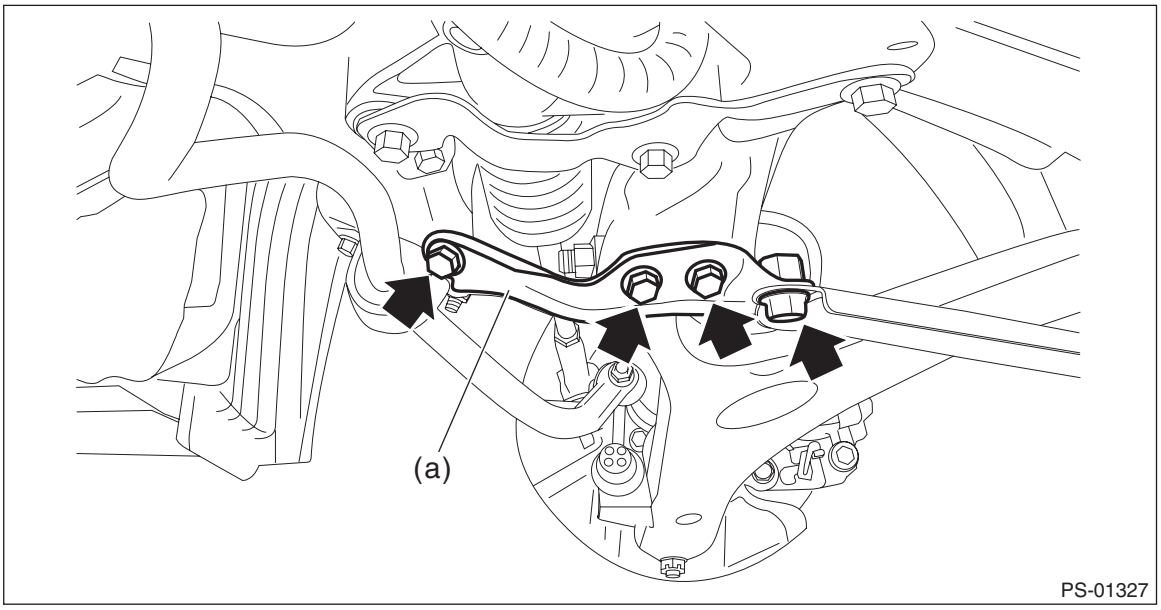
***Preparation tool:***
***Tie-rod ball joint puller***



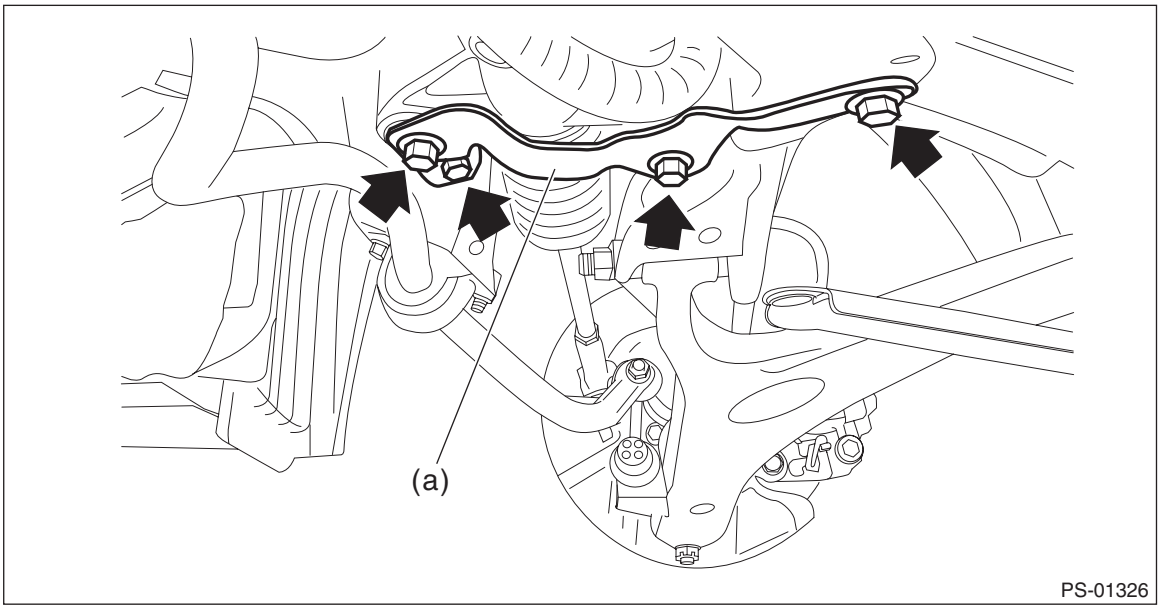
9) Remove the front crossmember support.



10) Remove the front exhaust pipe assembly. <Ref. to EX(H4DO)-7, REMOVAL, Front Exhaust Pipe.>
11) Remove the support plate - front crossmember (a).



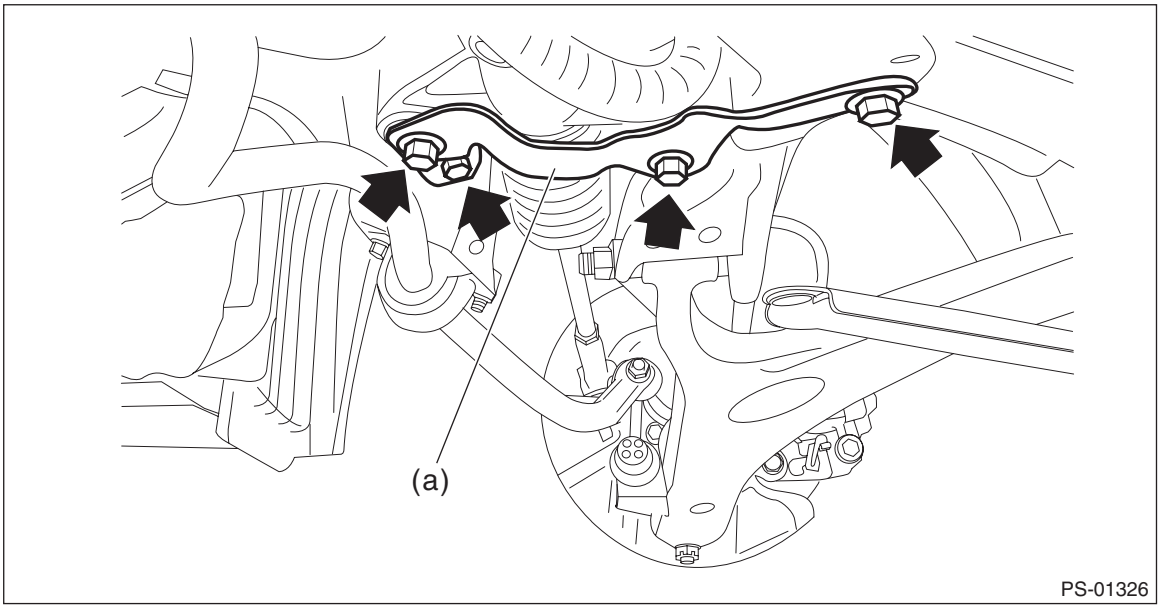
12) Remove the bolts securing the steering gearbox assembly, and remove the stiffener (a) and steering gearbox assembly.



## B: INSTALLATION

1) Insert the steering gearbox assembly into crossmember, being careful not to damage the boot of the steering gearbox assembly.
2) Install the steering gearbox assembly to the crossmember by tightening the bolts through the stiffener (a) to the specified torque.

***Tightening torque:***
***60 N·m (6.12 kgf-m, 44.3 ft-lb)***

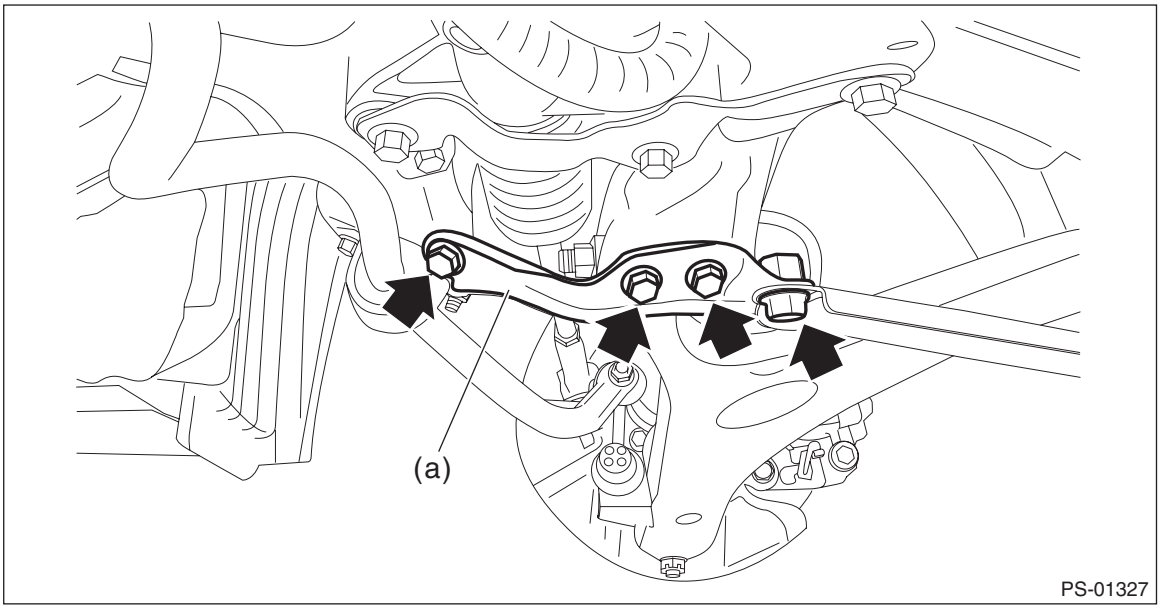


3) Install the universal joint assembly - steering. <Ref. to PS-14, INSTALLATION, Universal Joint.>

**CAUTION:**
**Tighten the bolts of the universal joint assembly - steering in the order of steering gearbox side and column shaft side.**

4) Install the support plate - front crossmember (a).

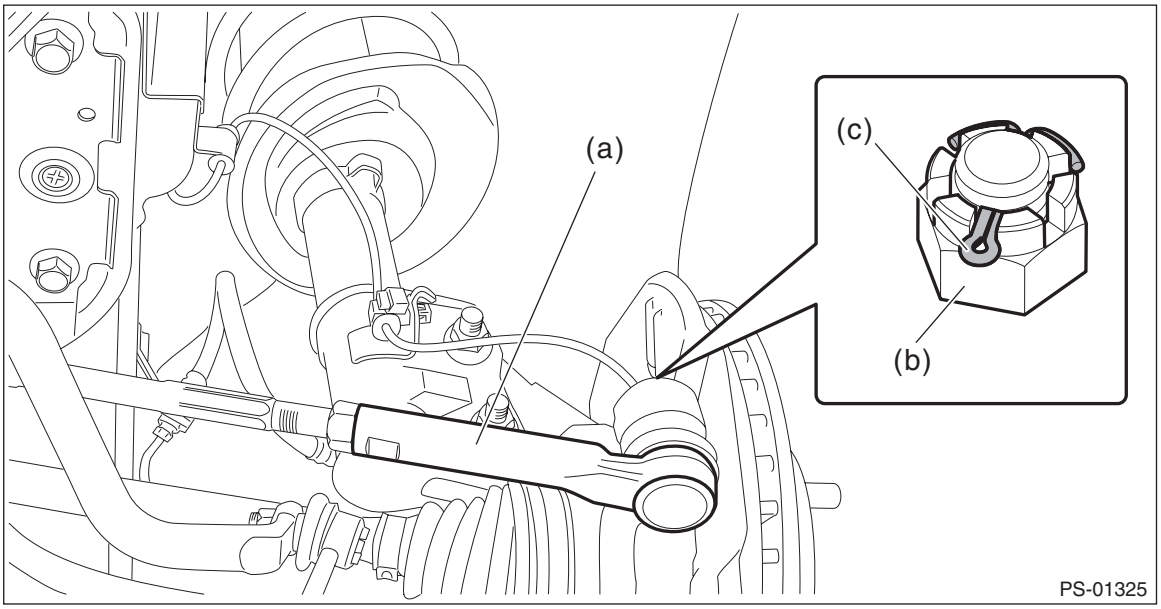
***Tightening torque:***
***Support plate - front crossmember: 60 N·m (6.12 kgf-m, 44.3 ft-lb)***
***Front support: 100 N·m (10.20 kgf-m, 73.8 ft-lb)***



5) Connect the tie-rod ends and knuckle arm.
(1) Connect the tie-rod end (a) to the housing assembly - front axle.
(2) Tighten the castle nuts (b) to the specified torque.

**CAUTION:**
**During connection, do not hit the cap at bottom of tie-rod end with a hammer.**

***Castle nut tightening torque:***
***27 N·m (2.75 kgf-m, 19.9 ft-lb)***
(3) Tighten within the range of 60° so that the cotter pin hole and cutout portion of the castle nut (b) are aligned.
(4) Insert the cotter pin (c), and bend the tip of the pin to fix it.



6) Install the front crossmember - support.

***Tightening torque:***
***60 N·m (6.12 kgf-m, 44.3 ft-lb)***

7) Install the front exhaust pipe assembly. <Ref. to EX(H4DO)-10, INSTALLATION, Front Exhaust Pipe.>
8) Install the under cover - front. <Ref. to EI-27, INSTALLATION, Front Under Cover.>
9) Install the front wheels.
10) Lower the vehicle.
11) Tighten the wheel nuts to the specified torque.

***Tightening torque:***
***120 N·m (12.24 kgf-m, 88.5 ft-lb)***

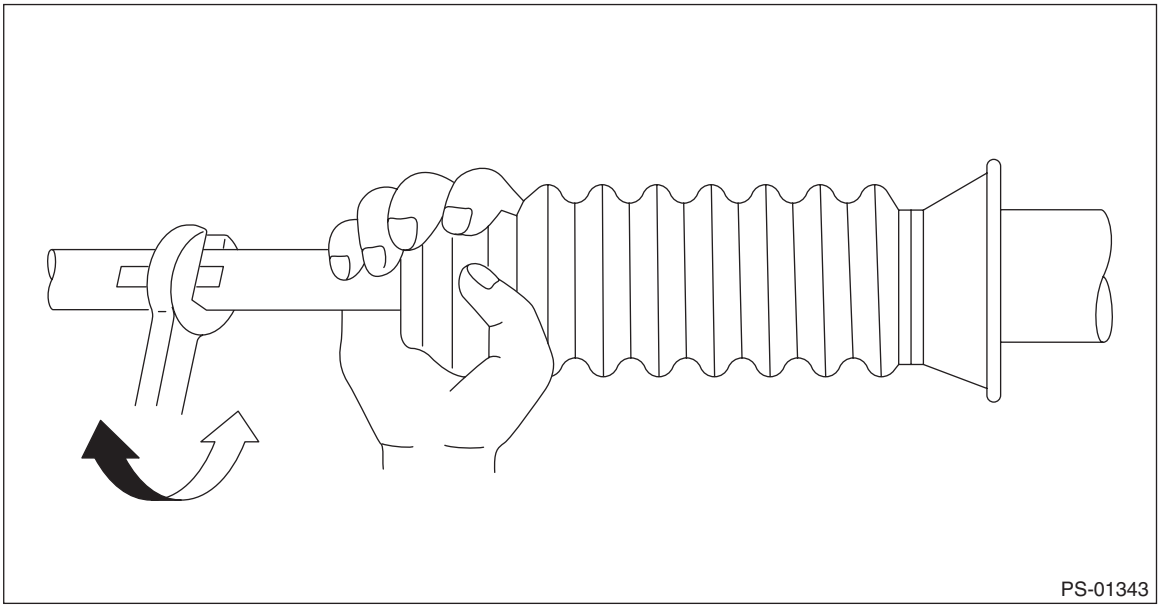
12) Connect the power steering control module harness connector.
13) Connect the battery ground terminal.

**CAUTION:**
**When the wheel alignment has been adjusted, perform the adjustment of the steering angle sensor. <Ref. to VDC-19, ADJUSTMENT, VDC Control Module and Hydraulic Control Unit (VDCCM&H/U).>**

14) After adjusting toe-in and steering angle, tighten the lock nut on tie-rod end.

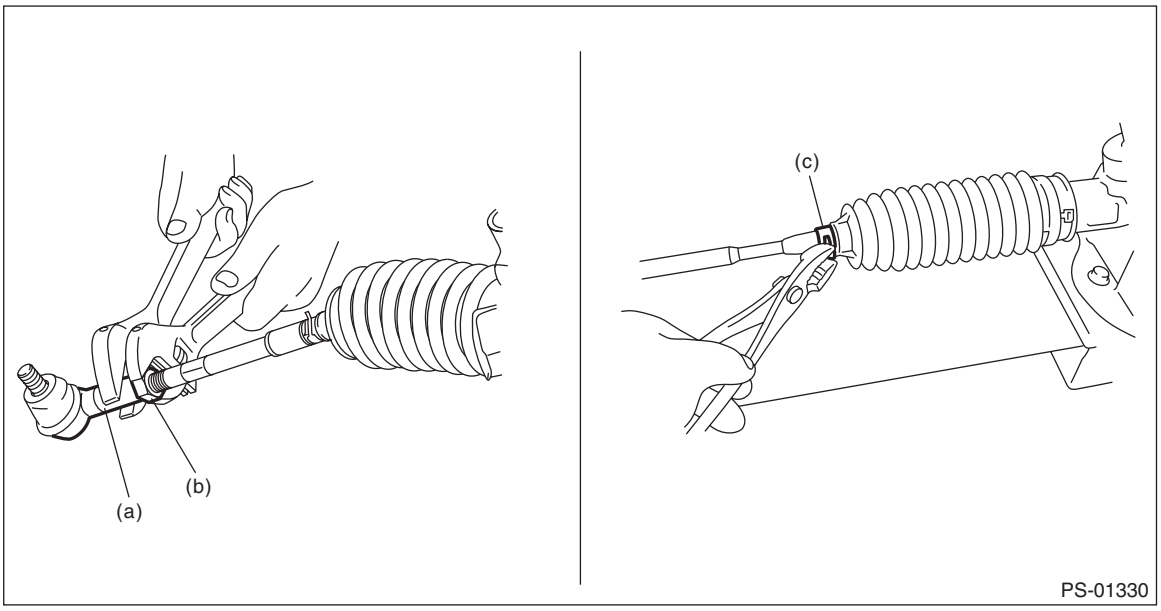
***Tightening torque:***
***85 N·m (8.67 kgf-m, 62.7 ft-lb)***

NOTE:
When adjusting toe-in, hold the boot - steering gearbox as shown to prevent it from being rotated or twisted. If it becomes twisted, straighten it.



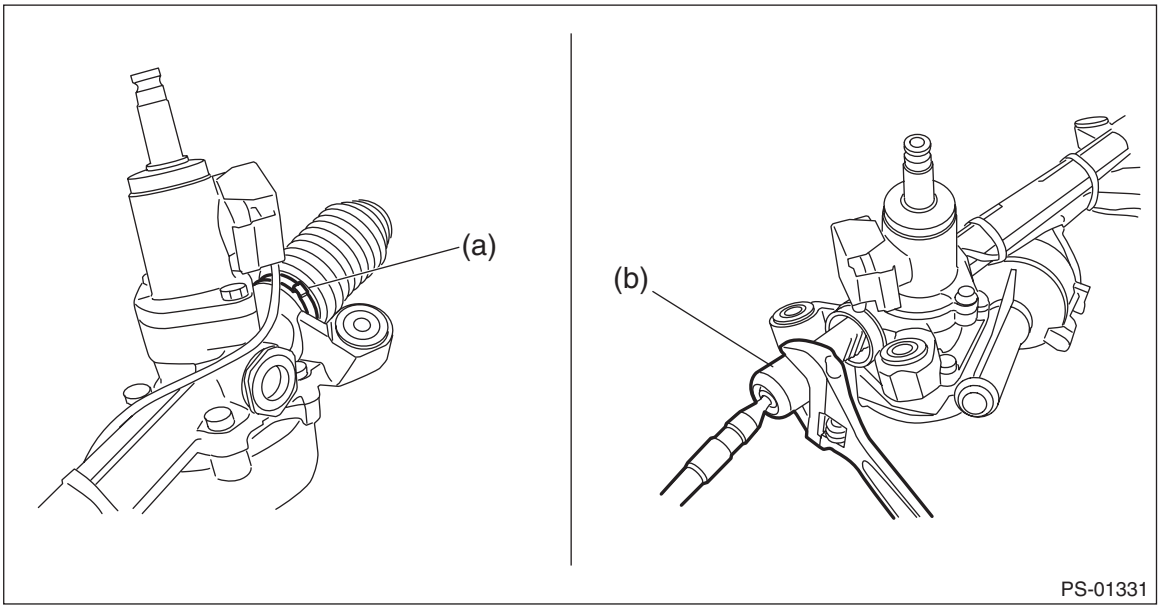
## C: DISASSEMBLY

**CAUTION:**
**• Nut for fixing the rack is on the driver's side only. When removing the tie-rod on the passenger's side, turn over the boot - steering gearbox on the driver's side, and fix the rack during operation.**
**• When fixing the steering gearbox assembly in a vise, apply a wooden piece on the flange portion.**
1) Remove the tie-rod end (a) and lock nut (b) from the steering gearbox assembly.
2) Remove the clip - boot tie-rod (c) located outside the boot - steering gearbox using the pliers, and then slide the boot - steering gearbox to the tie-rod end side.



3) Remove the tie-rod (b) from the gearbox assembly.
(1) Using a flat tip screwdriver, remove the band - boot (a) from the boot - steering gearbox.

NOTE:
Replace the boot - steering gearbox or the band - boot (a) if there is damage, cracks or deterioration.
(2) Remove the tie-rod (b).



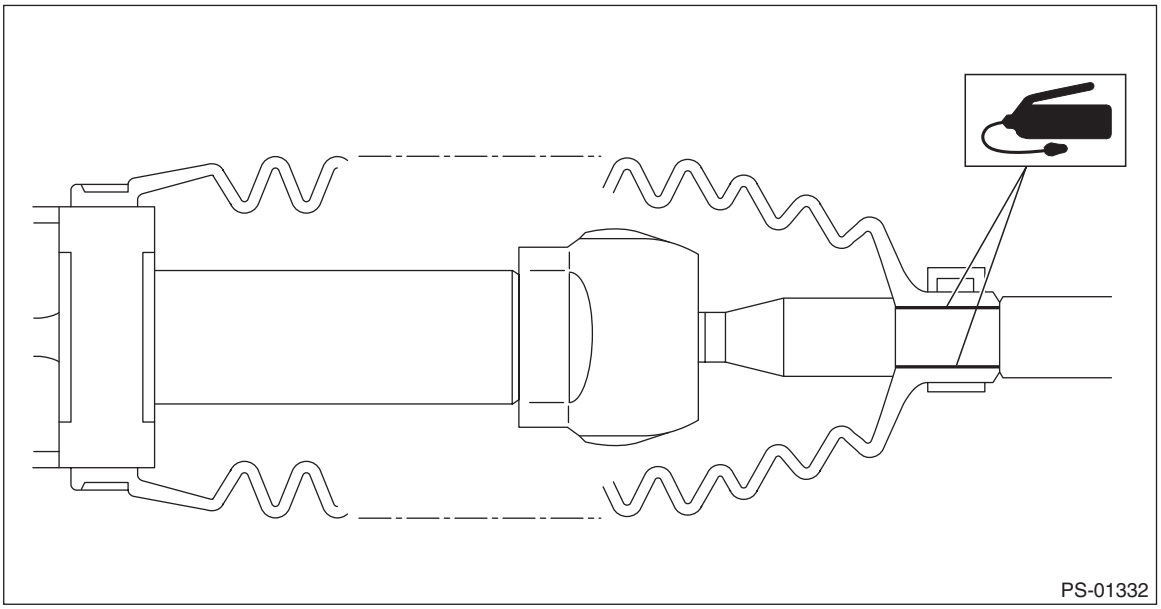
## D: ASSEMBLY

1) Install the tie-rod into rack.

***Tightening torque:***
***90 N·m (9.18 kgf-m, 66.4 ft-lb)***

NOTE:
Check the mating face of rack and tie-rod for foreign matter such as dust etc.
2) Apply a coat of grease to the tie-rod groove, and then install the boot - steering gearbox to the housing.

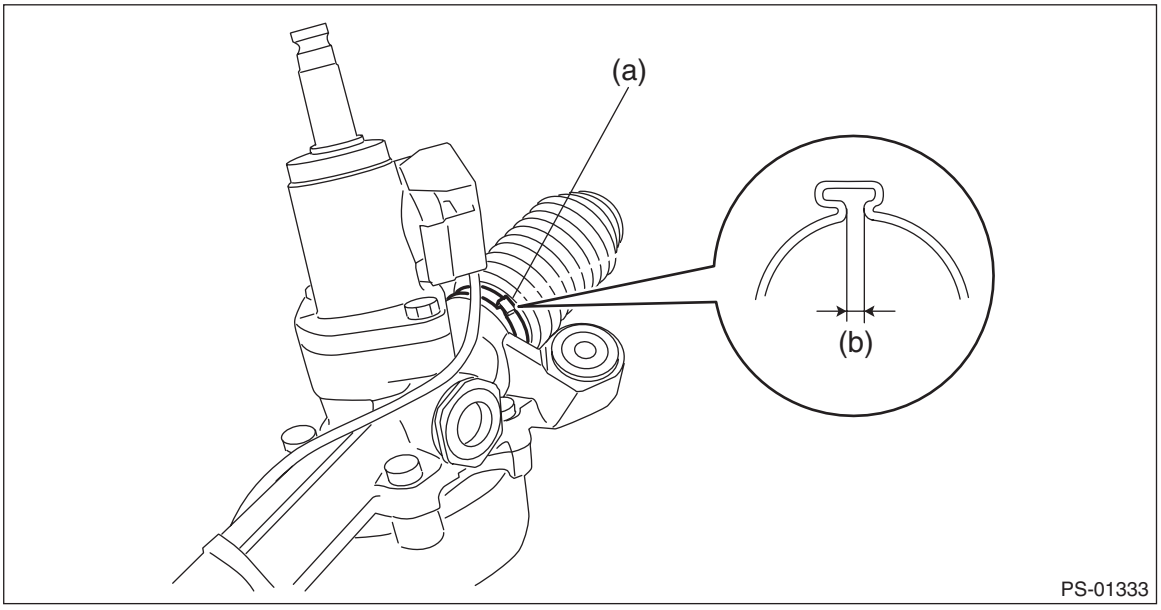
NOTE:
Make sure that the boot - steering gearbox is installed without unusual inflation or deflation.



PS-01332

3) Using the boot clamp pliers, crimp the boot so that the clearance (b) of the band - boot (a) crimp portion becomes 2 mm (0.08 in) or less.

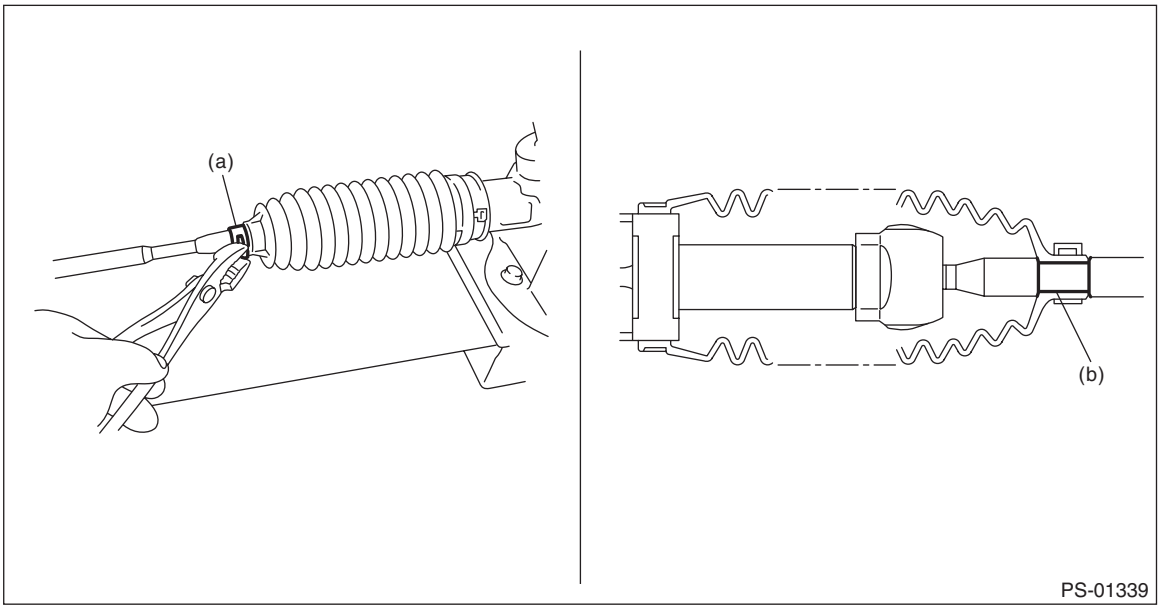
NOTE:
Use a new band - boot.



PS-01333

4) Fix the end of the boot - steering gearbox with clip - boot tie-rod (a).

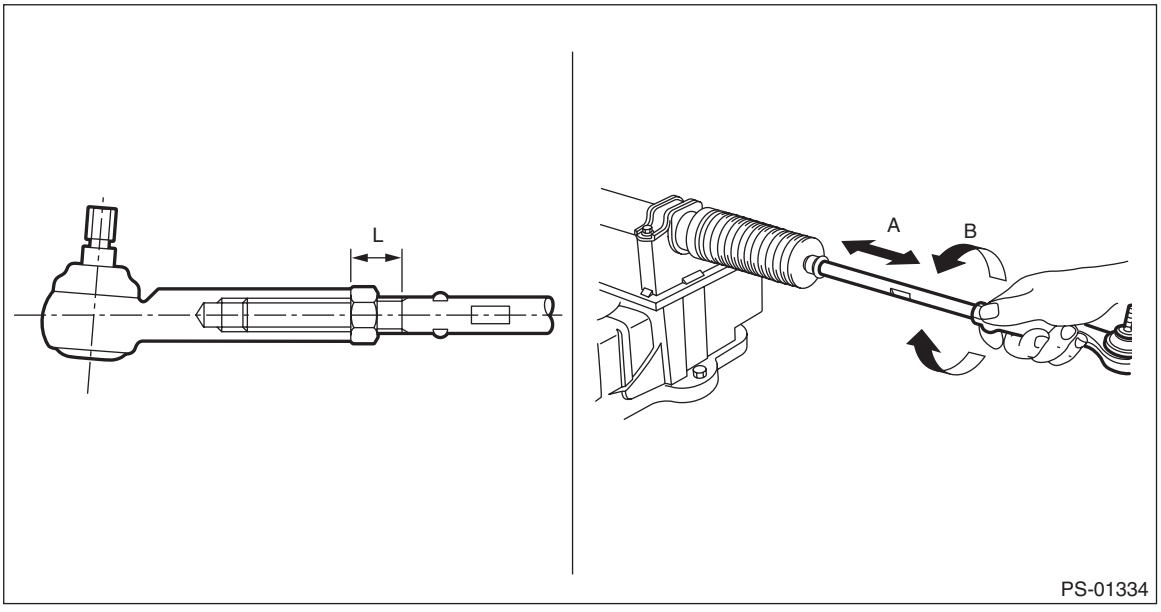
5) After installation, check that the end of the boot - steering gearbox is installed to the groove (b) of the tie-rod.



6) If the tie-rod end has been removed, screw in lock nut and tie-rod end to the screwed portion of tie-rod, and tighten the lock nut temporarily in a position as shown in the figure.

***Installed tie-rod length L:***
***33 mm (1.3 in)***

7) Inspect the steering gearbox assembly as follows:
1. "A" Holding the tie-rod end, repeat lock to lock several times as quickly as possible.
2. "B" Holding the tie-rod end, turn it slowly at a radius several times as large as possible.
3. Finally, make sure that the boot - steering gearbox is installed in the specified position without inflating.



8) Remove the steering gearbox assembly from ST.

# E: INSPECTION

## 1. UNIT INSPECTION

Check components for wear, damage or other faults. Adjust or replace if necessary.

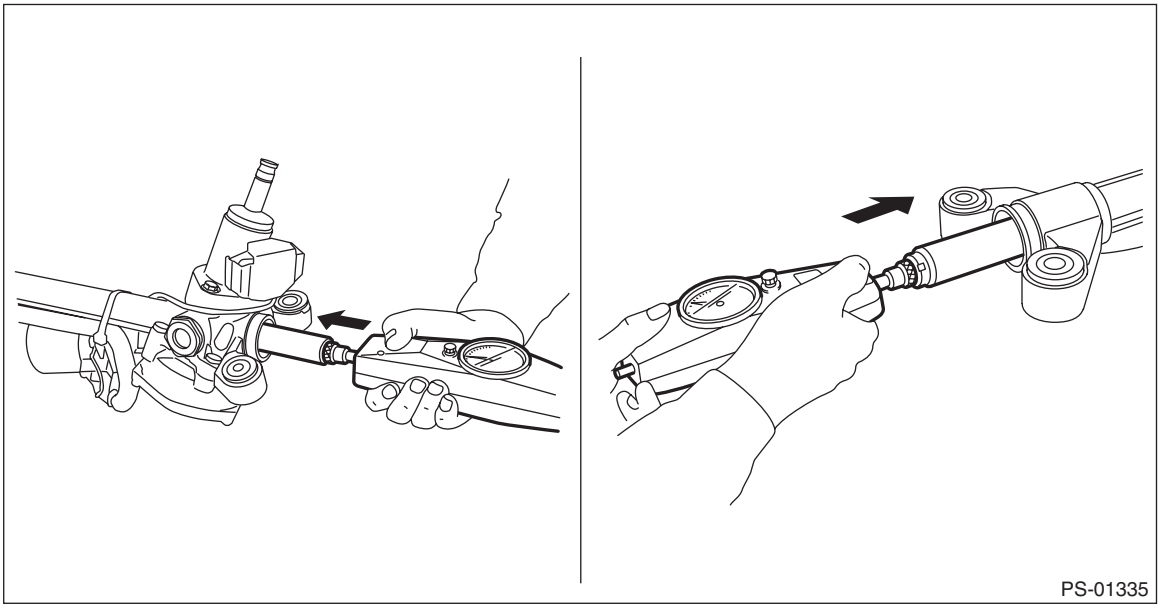
## 2. LIMIT

Make a measurements as follows. If it exceeds the specified service limits, adjust or replace.

NOTE:
When fixing the steering gearbox assembly in a vise, apply a wooden piece on the flange portion.

***Rack shaft sliding resistance (Except for XV model):***
***Limit: 350 N (36 kgf, 79 lbf) or less***
***Left/right differential of sliding resistance: 20% or less***

***Rack shaft sliding resistance (XV model):***
***Limit: 333 N (34 kgf, 75 lbf) or less***
***Left/right differential of sliding resistance: 20% or less***

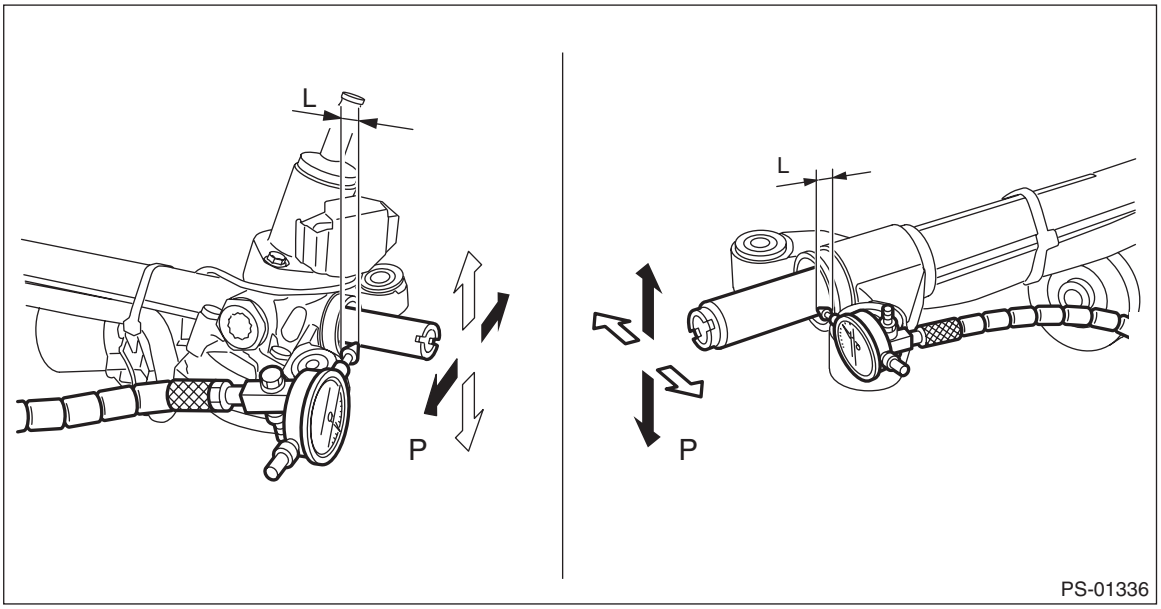


### 3. RACK SHAFT PLAY IN THE RADIAL DIRECTION

***Right-turn steering:***
***Service limit:***
***Direction ⬅ ➡: 0.4 mm (0.016 in) or less***
***Direction ⇦ ⇨: 0.6 mm (0.024 in) or less***

***Left-turn steering:***
***Service limit:***
***Direction ⇦ ⇨ ⬅ ➡: 0.4 mm (0.016 in) or less***

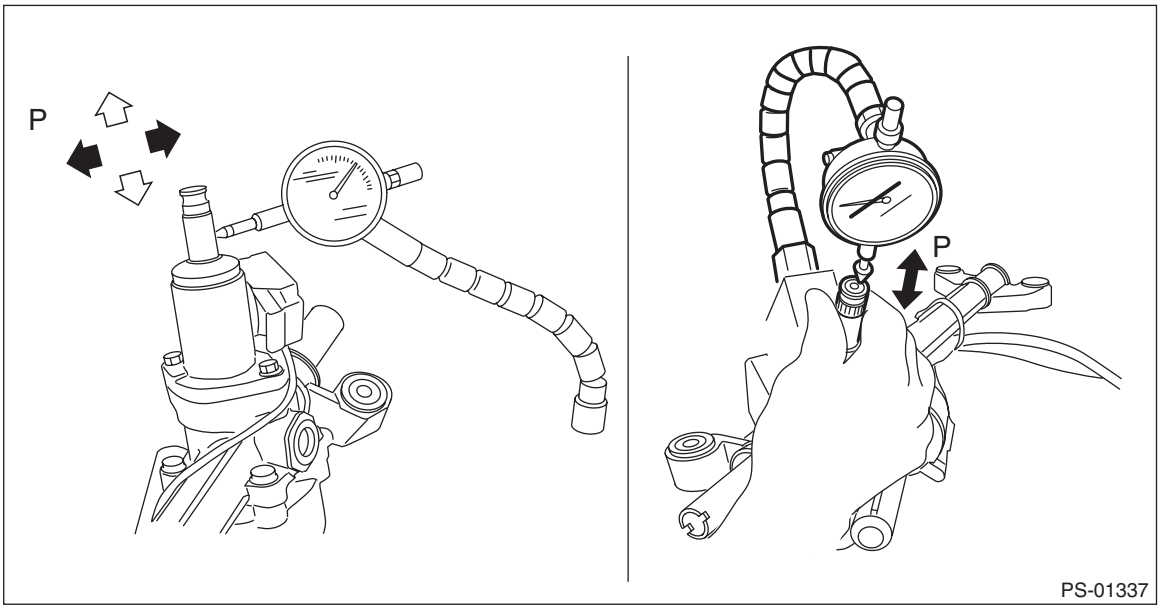
***Condition:***
***L: 5 mm (0.20 in)***
***P: 98 N (10 kgf, 22 lbf)***



## 4. INPUT SHAFT PLAY

***In radial direction:***
***Wear limit: 0.18 mm (0.0071 in) or less***
***Condition: P = 98 N (10 kgf, 22 lbf)***

***In axial direction:***
***Service limit: 0.27 mm (0.0106 in) or less***
***Condition: P = 20 — 49 N (2 — 5 kgf, 4 — 11 lbf)***



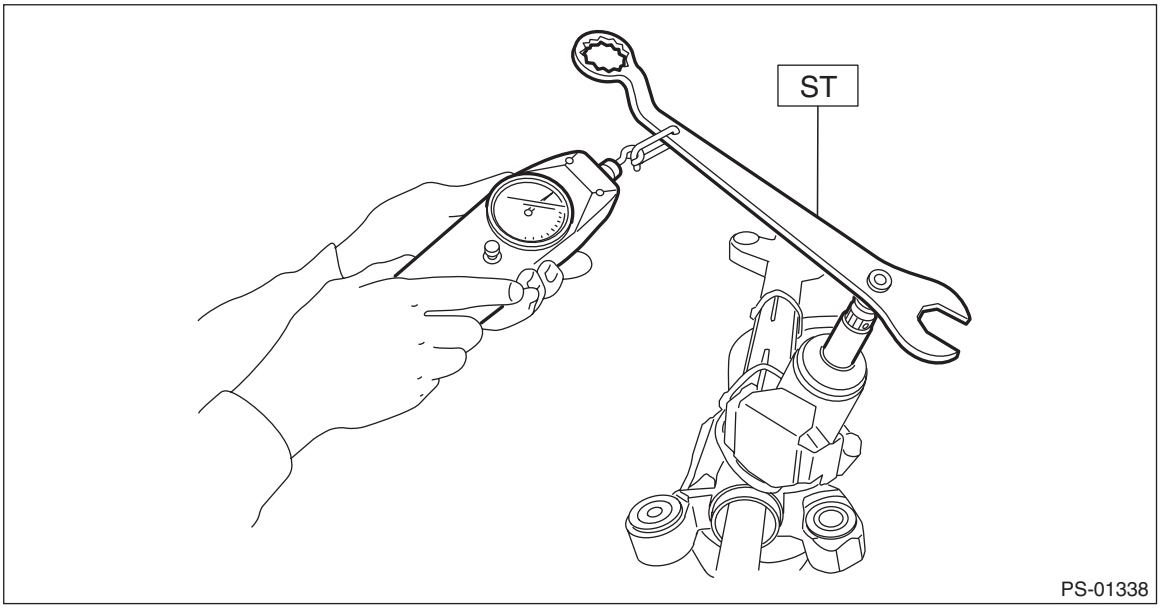
## 5. TURNING RESISTANCE OF GEARBOX

1) Using the ST, measure the rotational resistance of the steering gearbox assembly.

***Preparation tool:***
***ST: SPANNER (34099PA100)***

***Service limit (Except for XV model):***
***Maximum allowable resistance: 18.3 N (1.9 kgf, 4.1 lbf) or less***
***Difference between right and left rotational resistance: 20% or less***

***Service limit (XV model):***
***Maximum allowable resistance: 17.7 N (1.8 kgf, 4.0 lbf) or less***
***Difference between right and left rotational resistance: 20% or less***



# F: ADJUSTMENT

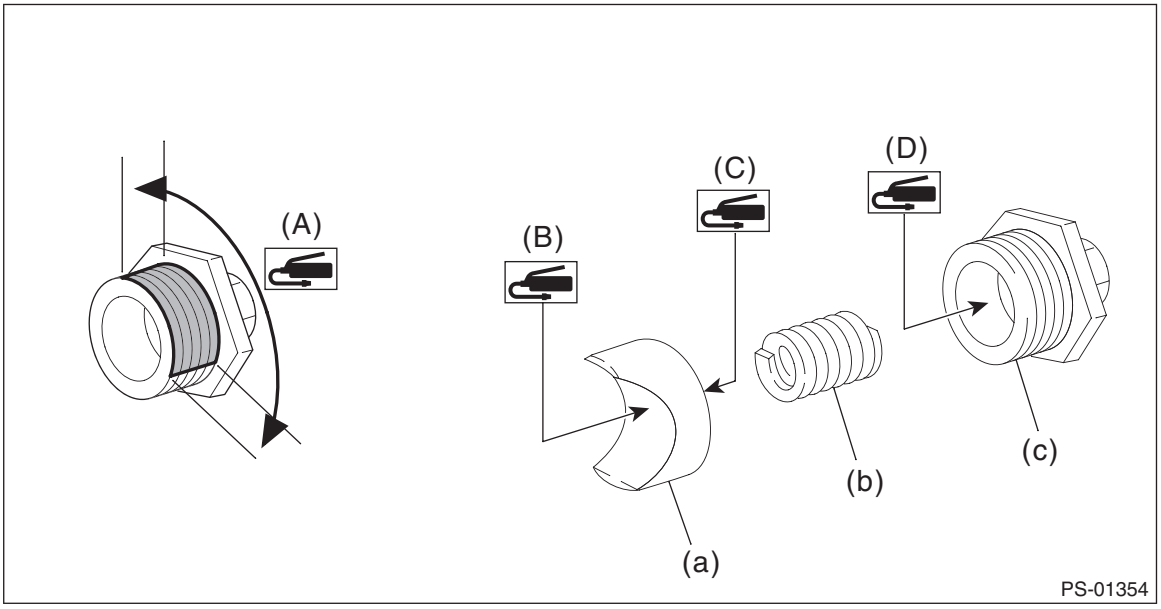
## 1. GEARBOX BACKLASH ADJUSTMENT

1) Remove the steering gearbox assembly. <Ref. to PS-26, REMOVAL, Electric Power Steering Gearbox.>
2) Loosen the lock nut and adjusting screw.
3) Apply a coat of grease to the sliding surface (B) of the pad - pressure (a) and seating surface (C) of spring - gearbox (b), and then insert the pad - pressure (a) into steering body.
4) Charge the adjusting screw (c) with grease (D), and then insert the spring - gearbox (b) into adjusting screw. Then install on the steering body.

***Grease:***
***Multemp AC-P***

5) Apply liquid gasket to 1/3 or more (A) of entire perimeter of adjusting screw thread (c).

***Liquid gasket:***
***THREE BOND TB-1111B***



6) Tighten the adjusting screw to 9.8 N·m (1.0 kgf-m, 7.2 ft-lb), then loosen it.
7) Tighten the adjusting screw to 6 N·m (0.6 kgf-m, 4.4 ft-lb).
8) Loosen the adjusting screw by 20°.
9) While fixing the adjusting screw, tighten the lock nuts.

***Tightening torque:***
***49.4 N·m (5.04 kgf-m, 36.4 ft-lb)***

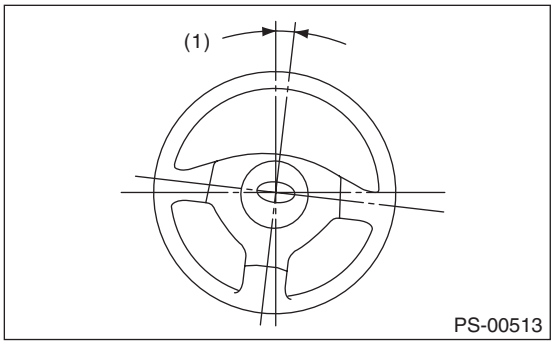
## 2. FRONT WHEEL ALIGNMENT ADJUSTMENT

1) Adjust the front toe. <Ref. to FS-15, FRONT WHEEL TOE-IN, ADJUSTMENT, Wheel Alignment.>
2) Check the steering angle of the wheels.

***Standard of steering angle:***

| *Model* | *Except for XV model* | *XV model* |
|---|---|---|
| *Inner wheel* | *38.3°±1.5°* | *38.5°±1.5°* |
| *Outer wheel* | *33.7°±1.5°* | *34.0°±1.5°* |

3) When the steering wheel is in the following condition, perform the steering wheel installation over again.
- When wheels are set in the straight ahead position, the steering wheel spokes are not horizontal.
- Error is more than 5° on the periphery of the steering wheel.



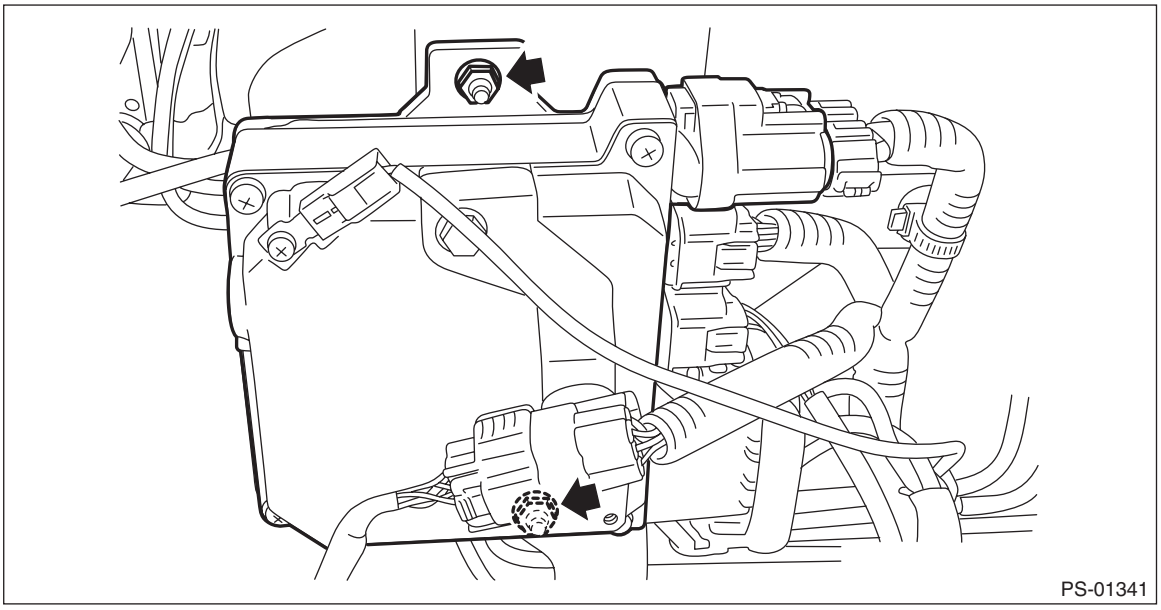
(1) 5° or less

4) If the steering wheel spokes are not horizontal with vehicle set in the straight ahead position after this adjustment, correct it by turning the right and left tie-rods in the opposite direction from each other by the same angle. Also check that there are no abnormal steering force, failure of the steering wheel to return or other faults.

# 7. Power Steering Control Module

## A: REMOVAL

1) Disconnect the ground cable from battery.
2) Remove the power steering control module.
   (1) Disconnect the connector of the power steering control module.
   (2) Remove the nuts, and remove the power steering control module.



## B: INSTALLATION

1) Install the power steering control module.

***Tightening torque:***
***7.5 N·m (0.76 kgf-m, 5.5 ft-lb)***

2) Connect the harness connector.

**CAUTION:**
**Make sure that the connector is securely locked.**

3) Attach the harness bracket.

***Tightening torque:***
***7.5 N·m (0.76 kgf-m, 5.5 ft-lb)***

# 8. General Diagnostic Table

## A: INSPECTION

| Trouble | Possible cause | Corrective action |
|---|---|---|
| • Steering effort is heavy in all ranges.<br>• Steering effort is heavy at stand still.<br>• Steering wheel vibrates when turning. | 1. Tire and wheel<br>• Improper tire out of specifications<br>• Improper wheel out of specification<br>• Tires not properly inflated | Replace or reinflate. |
| | 2. Measure the steering wheel effort. <Ref. to PS-39, TURNING RESISTANCE OF GEARBOX, INSPECTION, Electric Power Steering Gearbox.> | Adjust or replace. |
| • Vehicle leads to one side or the other.<br>• Returning force of steering wheel to center is poor.<br>• Steering wheel vibrates when turning. | 1. Tire and wheel<br>• Flat tire<br>• Mixed use of different tires<br>• Mixed use of different wheels<br>• Abnormal wear of tire<br>• Unequal tread remaining<br>• Unequal pressure of tire | Adjust, fix or replace. |
| | 2. Front wheel alignment<br>• Improper or unequal caster<br>• Improper or unequal toe-in<br>• Loose suspension connections | Adjust or retighten. |
| | 3. Measure the steering wheel effort. <Ref. to PS-39, TURNING RESISTANCE OF GEARBOX, INSPECTION, Electric Power Steering Gearbox.> | Adjust or replace. |

NOTE:
When performing repeated steering operation with the vehicle at standstill, the steering effort may be temporarily heavy because the heat generated in the system activates the power steering protection control. This is not a malfunction caused by the steering system. After a while, it will return to normal steering effort. (In this case, the steering warning light will not come on and there will be no DTC.)

### 1. NOISE AND VIBRATION

NOTE:
• When turning the steering wheel with the brake applied when the vehicle is parked, a screeching noise may be generated by the brake disc and pads. This is not a fault in the steering system.
• There may be a small vibration around the steering devices when turning the steering wheel at standstill, even though the component parts are operating properly.

| Trouble | Possible cause | Corrective action |
|---|---|---|
| Rattling noise (intermittent)<br>While engine is running. | Interference with adjacent parts | Check the clearance.<br>Correct if necessary. |
| | Looseness of linkage, play of steering, improper tightening (looseness) of suspension joint or column assembly - steering | Retighten or replace. |
| | Noise emitted from inside of the gearbox | Replace the gearbox assembly. |
| Knocking<br>When turning steering wheel in both directions with small angle repeatedly at engine ON or OFF. | Excessive backlash<br>Loosened lock nut for adjusting backlash | Adjust the backlash. When the noise remains after adjustment, replace the gearbox assembly. |
| | Insufficient tightening or play in the tie-rod or tie-rod end | Retighten or replace. |
| Grinding noise (intermittent)<br>While engine is running. (While operating the steering.) | Fault inside of gearbox | Replace the gearbox assembly. |
| | Faulty bearing of the column assembly - steering | Apply grease or replace. |
| | Occurs when turning the steering wheel with brakes (service or parking) applied. | If the noise goes off when brake is released, it is normal. |
| Vibration<br>While engine is running. (with/without steering turned) | Excessive play in steering, looseness of suspension parts | Retighten. |

## 2. MEASUREMENT OF STEERING EFFORT

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK STEERING WARNING LIGHT.** | Does the STEERING warning light illuminate? | Read the DTC, and inspect according to it. | Go to step **2**. |
| 2 | **CHECK STEERING WARNING LIGHT.**<br>1) Connect the Subaru Select Monitor, and turn the steering wheel. (one lock to lock)<br>2) Check the “EPS operation flag” in the current data. | Is the EPS operation flag normal without displaying any DTC code? | Go to step **3**. | If the EPS operation flag is “Assist limitation”, stop the engine for approx. 10 minutes and perform the procedures from step 1 again. |
| 3 | **CHECK STEERING EFFORT.**<br>1) Stop the vehicle on paved road.<br>2) Set the tire air pressure to the specification.<br>3) Start the engine.<br>4) Run the engine at idle.<br>5) Install a spring scale on the steering wheel.<br>6) Pull the spring scale at a right angle to the steering wheel, and measure both right and left steering wheel efforts.<br>  <br>PS-01008 | Is the steering effort less than 29.4 N (3.0 kgf, 6.6 lbf)? | Go to step **4**. | Go to step **8**. |
| 4 | **CHECK STEERING EFFORT.**<br>1) Stop the engine.<br>2) Pull the spring scale at a right angle to the steering wheel, and measure both right and left steering wheel efforts. | Is the steering effort less than 294.2 N (30 kgf, 66.2 lbf)? | Go to step **5**. | Perform the inspection or adjustment around the suspension part. |
| 5 | **CHECK TORQUE SENSOR OUTPUT VALUE.**<br>1) Connect the Subaru Select Monitor.<br>2) Read the output of torque sensor voltage.<br>NOTE:<br>When measuring, place the steering wheel at the center position. | Is the voltage 2.425 — 2.575 V? | Go to step **6**. | Replace the gearbox assembly. <Ref. to PS-26, Electric Power Steering Gearbox.> |
| 6 | **CHECK TORQUE SENSOR OUTPUT VALUE.**<br>1) Remove the universal joint assembly - steering.<br>2) Connect the Subaru Select Monitor.<br>3) Read the output of torque sensor voltage. | Is the voltage 2.425 — 2.575 V? | Go to step **7**. | Replace the gearbox assembly. <Ref. to PS-26, Electric Power Steering Gearbox.> |

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 7 | **CHECK TORQUE SENSOR OUTPUT VALUE.**<br>1) Remove the universal joint assembly - steering.<br>NOTE:<br>Check that the universal joint assembly - steering moves up and down smoothly without installing the bolt. Then tighten the bolts first on the gearbox side and then on the column shaft side.<br>2) Connect the Subaru Select Monitor.<br>3) Read the output of torque sensor voltage. | Is the voltage 2.425 — 2.575 V? | Go to step **8**. | Check the universal joint assembly - steering. <Ref. to PS-26, Electric Power Steering Gearbox.> |
| 8 | **CHECK STEERING WHEEL EFFORT.**<br>1) Remove the universal joint assembly - steering.<br>2) Measure the steering wheel effort. | Is the steering effort less than 2.26 N (0.23 kgf, 0.51 lbf)? | Go to step **9**. | Replace the column assembly - steering. <Ref. to PS-26, Electric Power Steering Gearbox.> |
| 9 | **CHECK STEERING WHEEL EFFORT.**<br>Measure the steering wheel effort. | Is the difference of steering effort between right and left less than 20%? | Go to step **10**. | Replace the column assembly - steering. <Ref. to PS-18, Steering Column.> |
| 10 | **CHECK UNIVERSAL JOINT ASSEMBLY - STEERING.**<br>Measure the swing torque of joint. (Yoke of column assembly - steering side) <Ref. to PS-16, INSPECTION, Universal Joint.> | Is the swing torque of the universal joint assembly - steering less than 7.3 N (0.74 kgf, 1.64 lbf)? | Go to step **11**. | Replace the universal joint assembly - steering with a new part. <Ref. to PS-13, Universal Joint.> |
| 11 | **CHECK UNIVERSAL JOINT ASSEMBLY - STEERING.**<br>Measure the swing torque of joint. (Yoke of gearbox side) <Ref. to PS-16, INSPECTION, Universal Joint.> | Is the swing torque of the universal joint assembly - steering less than 3.8 N (0.39 kgf, 0.86 lbf)? | Go to step **12**. | Replace the universal joint assembly - steering with a new part. <Ref. to PS-13, Universal Joint.> |
| 12 | **CHECK FRONT WHEEL.**<br>Check the front wheels. | Does the front wheels have unsteady revolution or rattling, or does the brake drag? | Inspect, readjust and replace if necessary. | Go to step **13**. |
| 13 | **CHECK TIE-ROD ENDS.**<br>Remove the tie-rod ends. | Does the tie-rod ends of suspension have unsteady revolution or rattling? | Inspect and replace if necessary. | Go to step **14**. |
| 14 | **CHECK BALL JOINT.**<br>Remove the ball joint. | Does the ball joints of suspension have unsteady revolution or rattling? | Inspect and replace if necessary. | Go to step **15**. |
| 15 | **CHECK GEARBOX.**<br>Measure the rotating of gearbox.<br><Ref. to PS-36, LIMIT, INSPECTION, Electric Power Steering Gearbox.> | Except for XV model: Is the turn resistance of the steering gearbox less than 18.3 N (1.9 kgf, 4.1 lbf)? Is the difference between the right and left rotational resistances less than 20%?<br>XV model: Is the turn resistance of the steering gearbox less than 17.7 N (1.8 kgf, 4.0 lbf)? Is the difference between the right and left rotational resistances less than 20%? | Go to step **16**. | Replace the gearbox assembly. <Ref. to PS-26, Electric Power Steering Gearbox.> |

| Step | | Check | Yes | No |
|---|---|---|---|---|
| 16 | **CHECK GEARBOX.**<br>Measure the sliding of gearbox. | Except for XV model: Is the sliding resistance of the steering gearbox less than 350 N (35 kgf, 79 lbf)? Is the difference between the right and left sliding resistances less than 20%?<br>XV model: Is the sliding resistance of the steering gearbox less than 333 N (34 kgf, 75 lbf)? Is the difference between the right and left sliding resistances less than 20%? | Steering effort is normal. | Replace the gearbox assembly. <Ref. to PS-26, Electric Power Steering Gearbox.> |

# 1. Basic Diagnostic Procedure

## A: PROCEDURE

**CAUTION:**
**• The power steering control module continues to operate after the engine stops and calculate the temperature in the control module. Therefore, before starting service of the power steering system which requires disconnection of the connector, stop the engine and allow approx. 10 minutes until the control module becomes cold.**
**• Before removal or installation, be sure to remove any foreign matter (dust, moisture, oil, etc.) from the power steering control module connector.**

NOTE:
• Shake the connector at the suspected trouble location to check for open or short circuits of the harness.
• Refer to “Check List for Interview”. <Ref. to PS(diag)-4, Check List for Interview.>

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK PRE-INSPECTION.**<br>1) Ask the customer when and how the trouble occurred using the interview check list. <Ref. to PS(diag)-4, Check List for Interview.><br>2) Check the illumination status of the steering warning light while the engine is running.<br>3) Before performing diagnostics, check components which might affect power steering problems. <Ref. to PS(diag)-7, INSPECTION, General Description.><br>4) Save the data of «Overheating protection intervention history» «IGN count from overheating protection (most recent) (previous) (before previous)» «Assist limit history (low voltage, high voltage)» using Subaru Select Monitor. <Ref. to PS(diag)-13, READ CURRENT DATA, OPERATION, Subaru Select Monitor.> | Are components that might influence the power steering problem operating properly? | Go to step **2**. | Repair or replace each component. |
| 2 | **CHECK INDICATION OF DTC.**<br>1) Turn the ignition switch to OFF.<br>2) Connect the Subaru Select Monitor to data link connector.<br>3) Turn the ignition switch to ON and run the Subaru Select Monitor.<br>4) Read the DTC using the Subaru Select Monitor. <Ref. to PS(diag)-18, OPERATION, Read Diagnostic Trouble Code (DTC).><br>NOTE:<br>If the communication function of the Subaru Select Monitor cannot be executed properly, check the communication circuit. <Ref. to PS(diag)-14, COMMUNICATION FOR INITIALIZING IMPOSSIBLE, INSPECTION, Subaru Select Monitor.> | Is DTC displayed? | Record the DTC.<br>Go to step **4**. | Go to step **3**. |
| 3 | **PERFORM GENERAL DIAGNOSTICS.**<br>1) If the steering warning light is illuminated while the engine is running, perform the Clear Memory Mode. <Ref. to PS(diag)-20, OPERATION, Clear Memory Mode.><br>2) Perform the Inspection Mode. <Ref. to PS(diag)-19, Inspection Mode.><br>3) Read the DTC. <Ref. to PS(diag)-18, OPERATION, Read Diagnostic Trouble Code (DTC).><br>Check the DTC is not displayed. | Does the steering warning light illuminate at ignition switch ON, and turn off two seconds after the engine is started? | Finish the diagnosis. | <Ref. to PS(diag)-17, WITHOUT DTC, INSPECTION, Subaru Select Monitor.> |

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 4 | **CHECK FREEZE FRAME DATA.**<br>Using the Subaru Select Monitor, check the freeze frame data for the power steering control module. | Are freeze frame data recorded? | Record the freeze frame data.<br>Go to step **5**. | Go to step **5**. |
| 5 | **PERFORM DIAGNOSIS.**<br>1) Refer to “List of Diagnostic Trouble Code (DTC)”. <Ref. to PS(diag)-24, LIST, List of Diagnostic Trouble Code (DTC).><br>2) Correct the cause of trouble.<br>3) Check the illumination status of the steering warning light while the engine is running, and if the warning light is lit, perform Clear Memory Mode. <Ref. to PS(diag)-20, OPERATION, Clear Memory Mode.><br>4) Perform the Inspection Mode. <Ref. to PS(diag)-19, Inspection Mode.><br>5) Read the DTC. <Ref. to PS(diag)-18, OPERATION, Read Diagnostic Trouble Code (DTC).> | Is DTC displayed? | Repeat step 5 until DTC is not shown. | Finish the diagnosis. |

# 2. Check List for Interview

## A: CHECK

Check the following items regarding condition of the vehicle.

### 1. TROUBLE STATUS

| | |
|---|---|
| Phenomenon of the vehicle | ❑ Steering is heavy<br>❑ Steering is not smooth<br>❑ Steering is unstable (wondering)<br>❑ Steering does not return to center<br>❑ Steering is not straight |
| | ❑ Steering force required is not the same for right and left turn<br>❑ Steering force required is not even<br>❑ Steering is too light |
| | ❑ Noise<br>❑ Vibration<br>❑ STEERING warning light illuminates<br>❑ Other |
| Frequency | ❑ Always<br>❑ Sometimes<br>❑ Immediately after starting the engine<br>❑ Only once<br>❑ Other |
| | ❑ Recovers after leaving it for minutes |
| Steering wheel operation | ❑ Dry steering<br>❑ When turning<br>❑ Quick steering<br>❑ Slow steering<br>❑ Returning the steering wheel |
| | ❑ Releasing the steering wheel<br>❑ Only supporting the steering wheel by hand<br>❑ Repetitive dry steering |
| Steering wheel status / direction | ❑ Around center position<br>❑ Near end of lock to lock |
| | ❑ When turning the steering to right<br>❑ When turning the steering to left<br>❑ Both to right and to left<br>❑ (1) Steering angle: degrees<br>❑ (2) Maneuvering time: minutes |
| | ❑ Slow steering<br>❑ Quick steering<br>❑ While holding the steering<br>❑ When repeating the dry wheel operation |
| Vehicle speed | ❑ Stall 0 km/h (0 MPH)<br>❑ Very low speed — 20 km/h (— 12 MPH)<br>❑ Low speed — 40 km/h (— 25 MPH)<br>❑ Medium speed — 80 km/h (— 50 MPH)<br>❑ High speed — 80 km/h or more (— 50 MPH or more) |
| | ❑ At starting<br>❑ While accelerating<br>❑ While decelerating<br>❑ When accelerating rapidly<br>❑ When decelerating rapidly |
| | ❑ Other |
| Engine speed | ❑ Idling<br>❑ (1) Around rpm<br>❑ (2) rpm — rpm<br>❑ (3) rpm or more / or less |

## 2. STATE OF STEERING WARNING LIGHT

| | |
|---|---|
| STEERING warning light illuminates | ❑ Always<br>❑ Sometimes<br>❑ Only once<br>❑ Does not illuminate<br>❑ Other |
| Ignition key position | ❑ LOCK<br>❑ ACC<br>❑ ON (when starting engine)<br>❑ START<br>❑ ON (when starting engine, while engine is running)<br>❑ ON (when starting engine, when engine is at a standstill) |
| Timing | ❑ Immediately after turning the ignition ON<br>❑ Immediately after turning the ignition to START |
| | ❑ Idling<br>❑ While accelerating<br>❑ While decelerating<br>❑ When cruising at — km/h (MPH) |
| | ❑ When other electrical parts are operating<br>(parts name: operating condition: ) |

## 3. ENVIRONMENT

| | |
|---|---|
| a) Weather | ❑ Fine<br>❑ Cloudy<br>❑ Rainy<br>❑ Snowy<br>❑ Others: |
| b) Outside temperature | ❑ °C ( °F) |
| c) Road | ❑ Inner city<br>❑ Suburbs<br>❑ Highway<br>❑ Local street<br>❑ Alley way<br>❑ Private road<br>❑ Parking lot<br>❑ Mountain road<br>❑ Paved road<br>❑ Unpaved road<br>❑ Gravel road<br>❑ Sandy place<br>❑ Muddy road<br>❑ Concrete road<br>❑ Stone pavement<br>❑ Racetrack<br>❑ Others: |
| d) Road surface | ❑ Dry<br>❑ Wet<br>❑ Covered with fresh snow<br>❑ Covered with hardened snow<br>❑ Others: |
| e) Tire | ❑ Tire chain<br>❑ Studless tire<br>❑ T-type tire (front RH, front LH, rear RH, rear LH) |
| f) Tire inflation pressure | Front RH: kPa Front LH: kPa Rear RH: kPa Rear LH: kPa |
| g) Degree of wear | Front RH: mm (in) Front LH: mm (in) Rear RH: mm (in) Rear LH: mm (in) |
| h) Genuine part | ❑ Yes<br>❑ No<br>Record after-market parts if any. (Steering wheel, audio, tires, and similar parts) |
| i) Condition of suspension alignment | |
| j) Electrical load conditions | ❑ Audio<br>❑ Air conditioner<br>❑ Other |
| k) Loaded state | Condition: |
| l) Repair parts | ❑ None<br>❑ Provided<br>Contents: |
| m) Others | |

# 3. General Description

## A: CAUTION

### 1. SRS AIRBAG SYSTEM

The airbag system wiring harness is routed near the power steering control module.

**CAUTION:**
**• Do not use the electrical test equipment on the airbag system wiring harnesses or connector circuits.**
**• Be careful not to damage the airbag system wiring harness during maintenance of the power steering control module.**

## B: INSPECTION

Before performing diagnosis, check the following items which might be affecting the power steering problem.

### 1. BATTERY

Measure the battery voltage and check electrolyte.

***Standard voltage: 12 V or higher (must not drop below 10 V during operation under electrical load)***

***Specific gravity: 1.260 or more***

### 2. TIRES

Check the tire specifications, tire wear and air pressure. <Ref. to WT-2, SPECIFICATION, General Description.>

## C: PREPARATION TOOL

### 1. SPECIAL TOOL

| ILLUSTRATION | TOOL NUMBER | DESCRIPTION | REMARKS |
|---|---|---|---|
|  ST1B022XU0 | 1B022XU0 | SUBARU SELECT MONITOR III KIT | Used for troubleshooting the electrical system. |
|  ST34199AG100 | 34199AG100 | SPECIAL TOOL HARNESS | Used for troubleshooting the electrical system. |

### 2. GENERAL TOOL

| TOOL NAME | REMARKS |
|---|---|
| Circuit tester | Used for measuring resistance, voltage and current. |
| Oscilloscope | Used for measuring the sensor. |

# 4. Electrical Component Location

## A: LOCATION

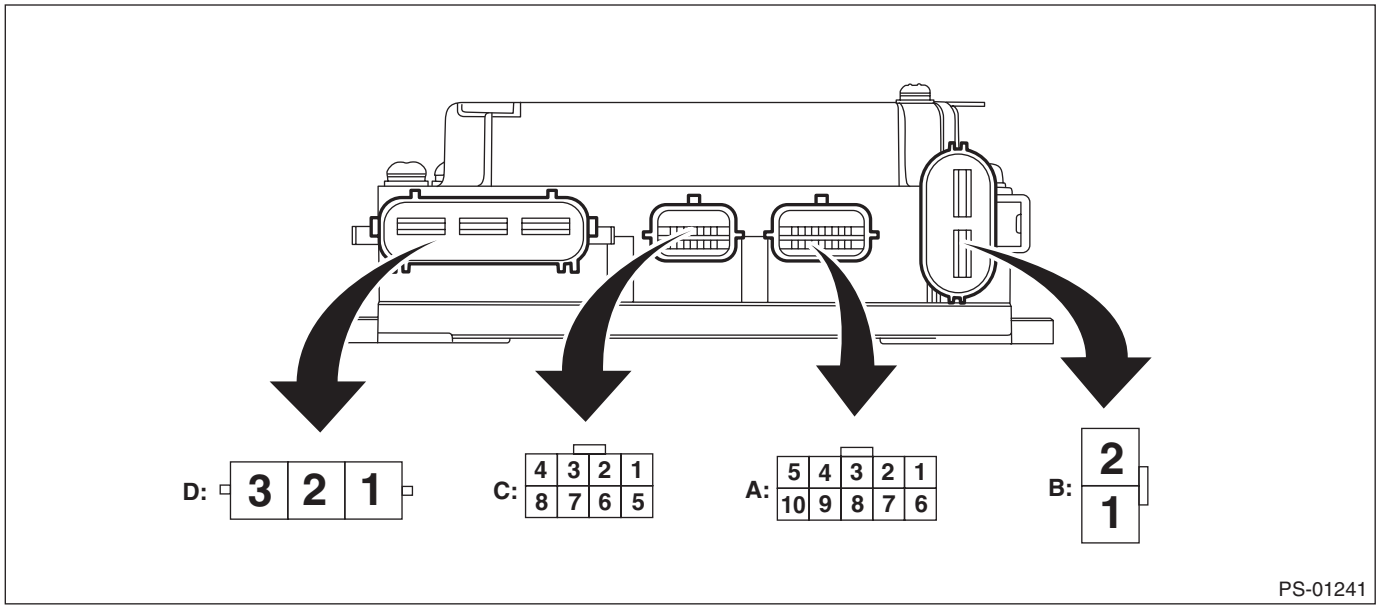
# 5. Control Module I/O Signal

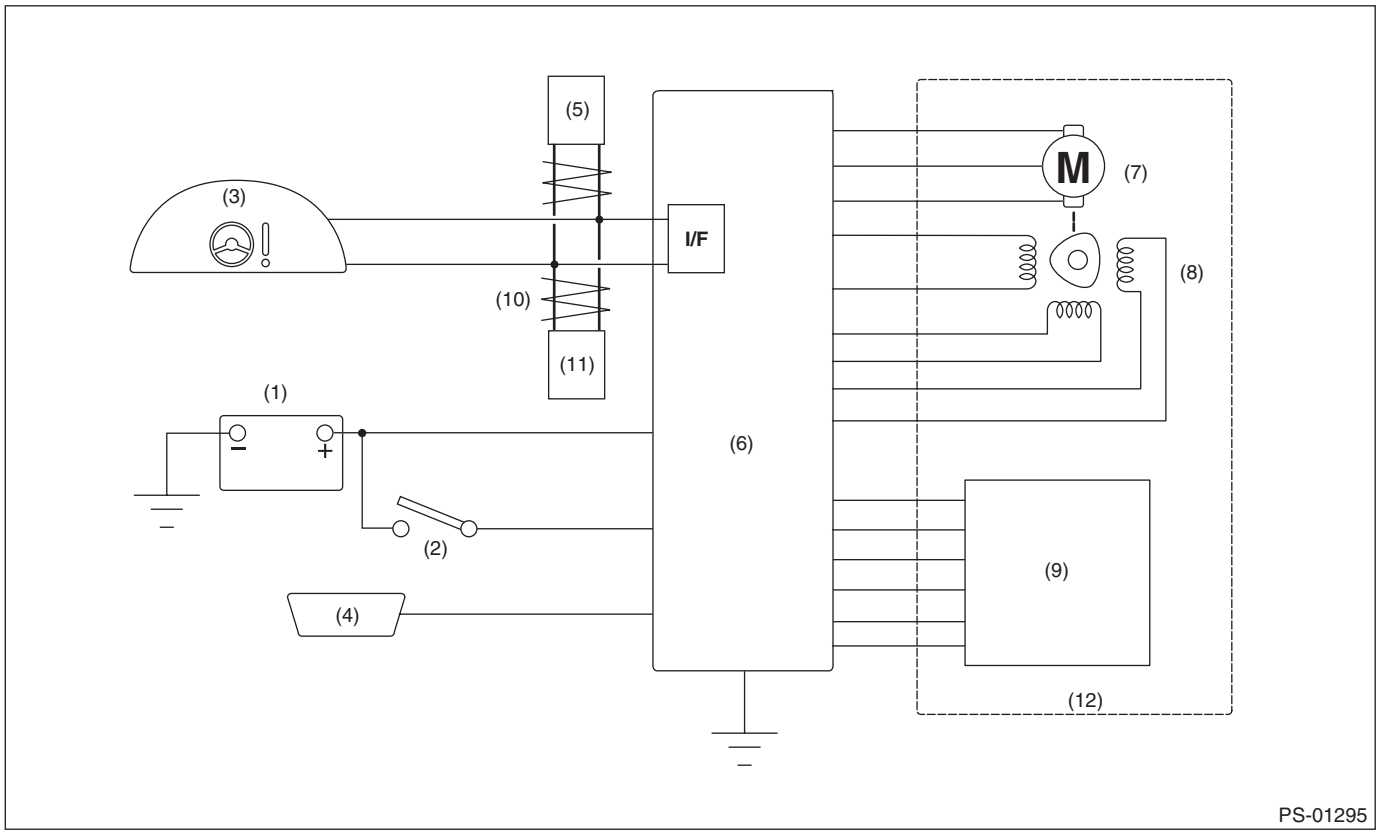
## A: ELECTRICAL SPECIFICATION



NOTE:
The terminal numbers of the power steering control module connectors are as indicated in the figure.

| Description | Terminal No. | Input/output signal |
|---|---|---|
| | | Measured value and measuring conditions |
| Power supply (IG SW) | A1 | Battery voltage is detected with the ignition switch ON when measuring between A1 — B1. |
| Subaru Select Monitor communication line | A2 | Digital signal; can not be measured |
| Shield GND | A3 | 0 V is constantly detected. |
| Main torque sensor | A4 | The voltage changes when the steering is operated to the right or left with the ignition switch ON. |
| Sub torque sensor | A5 | The voltage changes when the steering is operated to the right or left with the ignition switch ON. |
| CAN communication | A6 | Digital signal; can not be measured |
| CAN communication | A7 | Digital signal; can not be measured |
| Torque sensor operating power supply | A8 | Approximately 8 V is detected with ignition switch ON. |
| Torque sensor ground | A9 | 0 V is constantly detected. |
| Torque sensor standard power supply | A10 | Approximately 3 V is detected with ignition switch ON. |
| Ground | B1 | Battery voltage is constantly detected when measuring between B1 — B2. |
| Power supply | B2 | |
| Resolver S1 | C1 | Varies depending on the operational status of the motor. |
| Resolver S3 | C2 | |
| Resolver S2 | C3 | |
| Resolver S4 | C4 | |
| Excitation power supply for resolver | C5 | |
| Common output | C6 | |
| Motor U phase | D1 | Varies depending on the motor output. |
| Motor V phase | D2 | |
| Motor W phase | D3 | |

## B: WIRING DIAGRAM



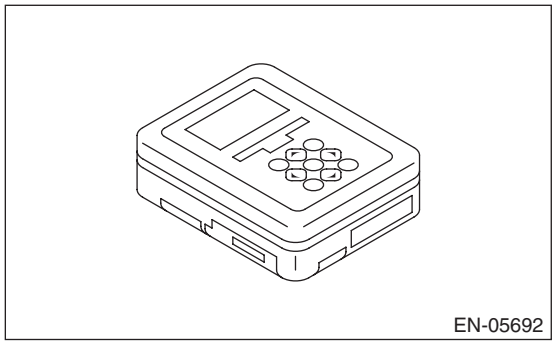
| | | | | | |
|---|---|---|---|---|---|
| (1) | Battery | (5) | Engine control module (ECM) | (9) | Torque sensor (main & sub) |
| (2) | Ignition switch | (6) | Power steering control module | (10) | CAN communication |
| (3) | STEERING warning light (combination meter) | (7) | Motor | (11) | VDC CM |
| (4) | Data link connector (for Subaru Select Monitor) | (8) | Resolver sensor | (12) | Steering gearbox |

# 6. Subaru Select Monitor

## A: OPERATION

### 1. HOW TO USE SUBARU SELECT MONITOR

1) Prepare the Subaru Select Monitor kit. <Ref. to PS(diag)-7, SPECIAL TOOL, PREPARATION TOOL, General Description.>

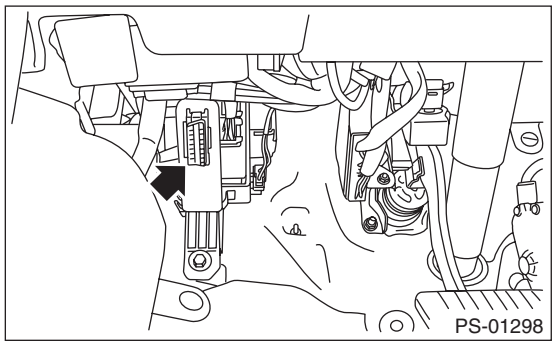


EN-05692

2) Prepare PC with Subaru Select Monitor installed.
3) Connect the USB cable to SDI (Subaru Diagnosis Interface) and USB port on the personal computer (dedicated port for the Subaru Select Monitor).

NOTE:
The dedicated port for the Subaru Select Monitor means the USB port which was used to install the Subaru Select Monitor.

4) Connect the diagnosis cable to SDI.
5) Connect SDI to data link connector located in the lower portion of the instrument panel (on the driver's side).



PS-01298

**CAUTION:**
**Do not connect scan tools other than the Subaru Select Monitor.**

6) Start the PC.
7) Turn the ignition switch to ON (engine OFF) and run the "PC application for Subaru Select Monitor".
8) Record the DTC and data.

NOTE:
For detailed operation procedures, refer to "PC application help for Subaru Select Monitor".

9) If the power steering control module and Subaru Select Monitor can not communicate, check the communication circuit. <Ref. to PS(diag)-14, COMMUNICATION FOR INITIALIZING IMPOSSIBLE, INSPECTION, Subaru Select Monitor.>

## 2. READ CURRENT DATA

1) On «Main Menu» display, select {Each System Check}.
2) On «System Selection Menu» display, select {Power Steering System}.
3) On «Power Steering Diagnosis» display, select {Current Data Display & Save}.
4) Using the scroll key, scroll the display screen up or down until the desired data is shown.
The list is indicated in the following table.

| Display | Contents to be displayed | Range | Unit |
|---|---|---|---|
| Torque sensor main output | Main torque sensor output voltage is displayed. | 0 — 5 | V |
| Torque sensor sub output | Sub torque sensor output voltage is displayed. | 0 — 5 | V |
| Torque sensor reference voltage | Torque sensor standard voltage is displayed. | 0 — 5 | V |
| Power current | The current flowing to CM is displayed. | –128 — 127 | A |
| Vehicle speed | Vehicle speed is displayed. (CAN communication data) | 0 — 255 | km/h |
| Engine speed | Engine speed is displayed. (CAN communication data) | 0 — 12750 | rpm |
| Detection current at ECM | The current flowing to the motor relay is displayed. | –128 — 127 | A |
| 3-phase motor current (U-phase) | The U phase actual current value as calculated by the micro-computer from the torque sensor input is displayed. | –128 — 127 | A |
| 3-phase motor current (V-phase) | The V phase actual current value as calculated by the micro-computer from the torque sensor input is displayed. | –128 — 127 | A |
| Motor angular speed | Data from the resolver sensor is displayed. | –4096 — 4064 | rpm |
| ECM Temperature | The thermistor temperature of the steering control module is displayed. | –50 — 205 | °C |
| Power supply voltage | Battery voltage is displayed. | 0 — 25.5 | V |
| Torque sensor power supply voltage | The power supply voltage output to the torque sensor is displayed. | 0 — 10.2 | V |
| IG voltage | The power supply voltage supplied to the ECM is displayed. | 0 — 25.5 | V |
| CAN bus status | Either Active/Passive/Bus Off is displayed. | Active | — |
| EPS operating condition | Either Normal/Assist Stop/Assist Limitation is displayed. | Normal | — |
| Target Current at ECM | The motor target current value required for assist is displayed. | –128 — 127 | A |
| Steering angle | Steering angle of steering wheel is displayed. | –640 — 635 | deg |
| Reading assist MAP | Either MAP1/MAP2/MAP3 is displayed. | MAP1 | — |
| Overheating protection intervention history | Number of interventions to the overheat protection control (assist limitation for protecting the power steering from overheating) *1 | 0 — 250 | times |
| IGN count from overheating protection (most recent) | Number of times the ignition switch is ON from the intervention to overheat protection control (most recent) until now *2 | 0 — 65000 | times |
| IGN count from overheating protection (previous) | Number of times the ignition switch is ON from the intervention to overheat protection control (previous) until now *2 | 0 — 65000 | times |
| IGN count from overheating protection (before previous) | Number of times the ignition switch is ON from the intervention to overheat protection control (before previous) until now *2 | 0 — 65000 | times |
| Assist limit history (low voltage, high voltage) | Number of intervention to assist limit when the power supply voltage is low or high *1 | 0 — 250 | times |

NOTE:
- *1 When the value exceeds the maximum of 250 times, 250 is displayed.
- *2 When there is no intervention of the overheating protection control, “65535” is displayed. If an error such as control unit memory error, etc. occurs, “65534” is displayed.

## 3. FREEZE FRAME DATA

NOTE:
- Freeze frame data stored at the time of trouble occurrence is shown on the display.
- Each time a trouble occurs, the latest information is stored in the freeze frame data in memory.
- One freeze frame data will be stored.

# B: INSPECTION

## 1. COMMUNICATION FOR INITIALIZING IMPOSSIBLE

**DETECTING CONDITION:**

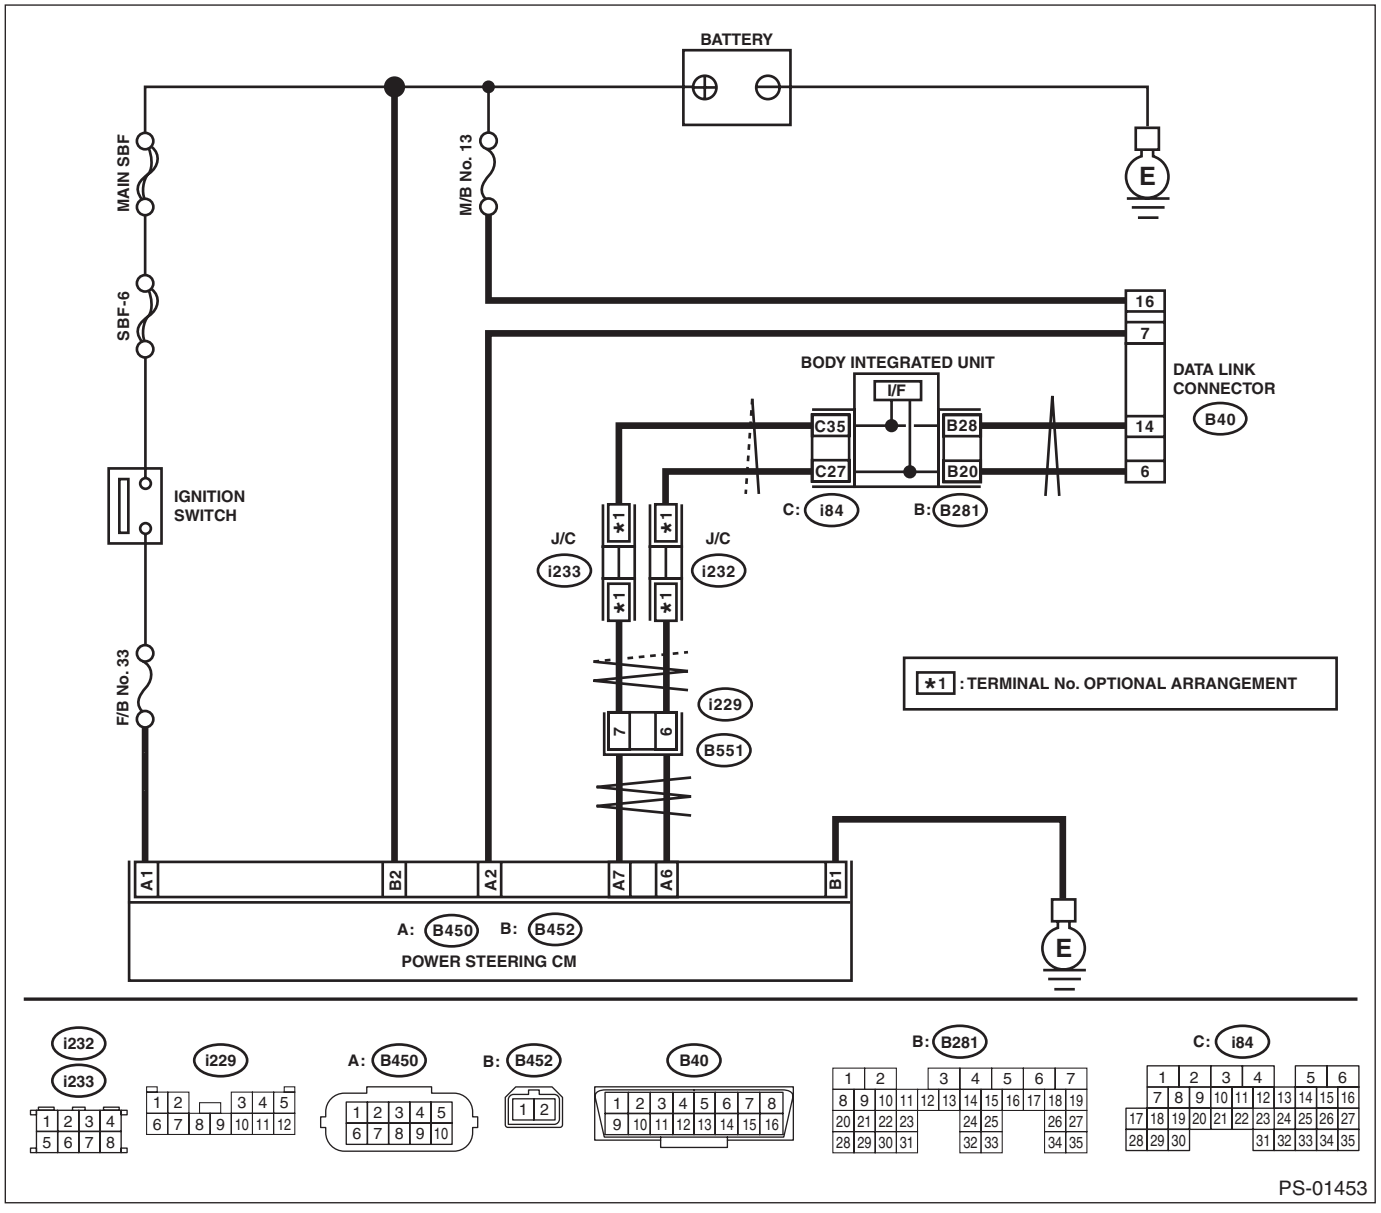
- Defective harness connector
- Defective power steering control module

**TROUBLE SYMPTOM:**

- Communication is impossible between the power steering control module and Subaru Select Monitor.
- After starting the engine, the STEERING warning light does not illuminate but steering effort is heavy.

**WIRING DIAGRAM:**

Electric Power Steering System <Ref. to WI-73, Electric Power Steering System.>



| | Step | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK IGNITION SWITCH.** | Is the ignition switch ON? | Go to step **2**. | Turn the ignition switch to ON, and select the power steering mode using the Subaru Select Monitor. |
| 2 | **CHECK BATTERY.**<br>1) Turn the ignition switch to OFF.<br>2) Measure the battery voltage. | Is the voltage 12 V or more? | Go to step **3**. | Charge or replace the battery. |
| 3 | **CHECK BATTERY TERMINAL.** | Is there poor contact at battery terminal? | Repair or tighten the battery terminal. | Go to step **4**. |
| 4 | **CHECK SUBARU SELECT MONITOR COMMUNICATION.**<br>1) Turn the ignition switch to ON.<br>2) Using the Subaru Select Monitor, check whether communication to other systems can be executed normally. | Is the system name displayed on Subaru Select Monitor? | Go to step **8**. | Go to step **5**. |
| 5 | **CHECK SUBARU SELECT MONITOR COMMUNICATION.**<br>1) Turn the ignition switch to OFF.<br>2) Disconnect the power steering control module connector.<br>3) Turn the ignition switch to ON.<br>4) Check whether communication to other systems can be executed normally. | Is the system name displayed on Subaru Select Monitor? | Replace the power steering control module. <Ref. to PS-42, Power Steering Control Module.> | Go to step **6**. |
| 6 | **CHECK HARNESS CONNECTOR BETWEEN EACH CONTROL MODULE AND DATA LINK CONNECTOR.**<br>1) Turn the ignition switch to OFF.<br>2) Disconnect the connectors from ECM, VDC CM, airbag CM and body integrated unit.<br>**CAUTION:**<br>**When disconnecting the connector from airbag CM, always follow the precautions on AB section. <Ref. to AB-11, CAUTION, General Description.>**<br>3) Measure the resistance between data link connector and chassis ground.<br>***Connector & terminal***<br>***(B40) No. 7 — Chassis ground:*** | Is the resistance 1 MΩ or more? | Go to step **7**. | Repair the short circuit to ground in harness and connector between each control module and data link connector. |
| 7 | **CHECK HARNESS CONNECTOR BETWEEN POWER STEERING CONTROL MODULE AND DATA LINK CONNECTOR.**<br>1) Turn the ignition switch to ON.<br>2) Measure the voltage between the power steering control module and chassis ground.<br>***Connector & terminal***<br>***(B40) No. 7 (+) — Chassis ground (–):*** | Is the voltage less than 1 V? | Go to step **8**. | Repair the short circuit to power supply in harness and connector between each control module and data link connector. |
| 8 | **CHECK HARNESS CONNECTOR BETWEEN POWER STEERING CONTROL MODULE AND DATA LINK CONNECTOR.**<br>Measure the resistance between the power steering control module connector and the data link connector.<br>***Connector & terminal***<br>***(B450) No. 2 — (B40) No. 7:*** | Is the resistance less than 0.5 Ω? | Go to step **9**. | Repair the open circuit or poor contact of harness and connectors between the power steering control module and data link connector. |

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 9 | **CHECK POWER STEERING CONTROL MODULE CONNECTOR INSTALLATION.**<br>Turn the ignition switch to OFF. | Is the power steering control module connector inserted into the power steering control module until the clamp locks? | Go to step **10**. | Insert the power steering control module connector into the power steering control module. |
| 10 | **CHECK POWER SUPPLY CIRCUIT.**<br>1) Turn the ignition switch to OFF.<br>2) Disconnect the power steering control module connector (B452).<br>3) Turn the ignition switch to ON. (engine OFF)<br>4) Measure the ignition power supply voltage between the power steering control module connector and chassis ground.<br>***Connector & terminal***<br>***(B450) No. 1 (+) — Chassis ground (–):***<br>***(B452) No. 2 (+) — Chassis ground (–):*** | Is the voltage 10 — 15 V? | Go to step **11**. | Repair the open circuit of harness or the poor contact of connector between the power steering control module and the battery. |
| 11 | **CHECK HARNESS CONNECTOR BETWEEN POWER STEERING CONTROL MODULE AND CHASSIS GROUND.**<br>1) Turn the ignition switch to OFF.<br>2) Disconnect the connector from the power steering control module.<br>3) Measure the resistance in the harness between the power steering control module and chassis ground.<br>***Connector & terminal***<br>***(B452) No. 1 — Chassis ground:*** | Is the resistance less than 0.5 Ω? | Go to step **12**. | Repair the open circuit or poor contact of the harness between the power steering control module and chassis ground. |
| 12 | **CHECK POOR CONTACT OF CONNECTOR.** | Is there poor contact of control module power supply, ground circuit and data link connector? | Repair the connector. | Replace the power steering control module. <Ref. to PS-42, Power Steering Control Module.> |

## 2. WITHOUT DTC

**DETECTING CONDITION:**

- Defective combination meter
- Open circuit of harness

**TROUBLE SYMPTOM:**

- The steering warning light will not turn off.
- “No diagnostic Code Present” will be displayed on the Subaru Select Monitor.

NOTE:
When the steering warning light is OFF and “No diagnostic Code Present” is displayed on Subaru Select Monitor when all DTCs are read, the system is operating properly.

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK LAN SYSTEM.**<br>Perform the diagnosis for LAN system using the Subaru Select Monitor. <Ref. to LAN(diag)-2, Basic Diagnostic Procedure.> | Is DTC U0131 detected? | Perform the diagnosis according to DTC for LAN system. <Ref. to LAN(diag)-50, List of Diagnostic Trouble Code (DTC).> | Go to step **2**. |
| 2 | **CHECK COMBINATION METER.**<br>Check the steering warning light when the ignition is turned from OFF to ON. | Does the steering warning light illuminate at ignition switch ON, and turn off two seconds after the engine is started? | Finish the diagnosis. | Replace the combination meter. <Ref. to IDI-17, Combination Meter.> |

# 7. Read Diagnostic Trouble Code (DTC)

## A: OPERATION

• For detailed operation procedures, refer to “PC application help for Subaru Select Monitor”.
• For details concerning the DTC, refer to “List of Diagnostic Trouble Code (DTC)”. <Ref. to PS(diag)-24, List of Diagnostic Trouble Code (DTC).>

# 8. Inspection Mode

## A: PROCEDURE

Reproduce the malfunction occurrence condition as much as possible.

# 9. Clear Memory Mode

## A: OPERATION

• For detailed operation procedures, refer to “PC application help for Subaru Select Monitor”.
• Before performing memory clear, check the current data, and if there are any data of DTC, trouble status information, overheating protection intervention history, IGN count from overheating protection and assist limit history, save them.

# 10.STEERING Warning Light

## A: STEERING WARNING LIGHT DOES NOT COME ON

### 1. POWER STEERING ASSIST ENABLED

**DETECTING CONDITION:**

- Defective combination meter
- Defective harness

**TROUBLE SYMPTOM:**

When the ignition switch is turned to ON (engine OFF), the steering warning light does not illuminate.

NOTE:
It is operating normally if the warning light illuminates when the ignition switch is turned to ON (engine OFF), and turns off approximately two seconds after engine start.

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK ILLUMINATION OF OTHER LIGHTS.**<br>Turn the ignition switch to ON. (engine OFF) | Do other warning lights illuminate? | Go to step **2**. | Check the combination meter. <Ref. to IDI-10, INSPECTION, Combination Meter System.> |
| 2 | **CHECK LAN SYSTEM.**<br>Perform the diagnosis for LAN system using the Subaru Select Monitor. <Ref. to LAN(diag)-2, Basic Diagnostic Procedure.> | Is DTC related to CAN displayed? | Perform the diagnosis according to DTC. <Ref. to LAN(diag)-50, List of Diagnostic Trouble Code (DTC).> | Go to step **3**. |
| 3 | **CHECK COMBINATION METER.**<br>Perform the self-diagnosis of combination meter. <Ref. to IDI-7, SELF-DIAGNOSIS DISPLAY MODE, OPERATION, Combination Meter System.> | Is the self diagnosis normal? | The combination meter is normal. | Check the combination meter. <Ref. to IDI-10, INSPECTION, Combination Meter System.> |

## 2. POWER STEERING ASSIST DISABLED

**DETECTING CONDITION:**
CAN communication error (Engine rpm signal not received)
**TROUBLE SYMPTOM:**
The STEERING warning light is normal but there is no power steering assist (steering feels heavy).

NOTE:
• Power steering assist is not started unless an ignition switch ON signal or engine speed signal is input.
• In any of the following cases, the power steering assist is limited and steering wheel operation may become heavy.
If the steering wheel is held to an end for a long time, or the steering wheel turning to right and left at slow speed is repeated during parking, the assist limitation (overheat protection control) may operate to prevent failures by overheat.
In this case, by stopping the engine for approx. 10 minutes for cooling, the assist will start operating. While assist limitation (overheat protection control) is in active, “Assist limitation” is displayed in the «EPS operating condition» in the Subaru Select Monitor “Current Data Display & Save”.
• History can be confirmed on «Overheating protection intervention history» or «IGN count from overheating protection» of “Current Data Display & Save”.
• The overheat protection control system is normal operation, therefore, the STEERING warning light will not come on and there will be no DTC displayed.
• If the power steering system connector is disconnected while cooling under the overheat protection control, different DTC may be recorded. If there is no DTC and assist limitation is in active, stop the engine for approx. 10 minutes for cooling.

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK CURRENT DATA.**<br>Using the Subaru Select Monitor, display «EPS operating condition». <Ref. to PS(diag)-13, READ CURRENT DATA, OPERATION, Subaru Select Monitor.> | Is “Assist limitation” displayed? | Stop the engine for approx. 10 minutes, and cool down the power steering control module. After cooling down, perform the step 1 again. | Go to step **2**. |
| 2 | **CHECK DTC.**<br>Read the DTC of the power steering control module using Subaru Select Monitor. <Ref. to PS(diag)-18, Read Diagnostic Trouble Code (DTC).> | Is DTC displayed? | Perform the diagnosis according to DTC. <Ref. to PS(diag)-24, List of Diagnostic Trouble Code (DTC).> | Go to step **3**. |
| 3 | **CHECK CURRENT DATA.**<br>1) Using the Subaru Select Monitor, display «Torque sensor main output» and «Torque sensor sub output».<br>2) Move the steering wheel to the left and right. | Do the torque sensor values change? | Go to step **4**. | Check the torque sensor circuit. <Ref. to PS(diag)-26, DTC C2511 TORQUE SENSOR FAILURE 1 (MAIN), Diagnostic Procedure with Diagnostic Trouble Code (DTC).> |
| 4 | **CHECK CURRENT DATA.**<br>1) Start the engine.<br>2) Using the Subaru Select Monitor, display «Engine Speed». | Is the engine speed signal the same as that in the combination meter? | Replace the power steering control module. <Ref. to PS-42, Power Steering Control Module.> | Check the CAN communication. <Ref. to LAN(diag)-2, Basic Diagnostic Procedure.> |

## B: STEERING WARNING LIGHT DOES NOT GO OFF

**DETECTING CONDITION:**

- Defective combination meter
- Open circuit of harness

**TROUBLE SYMPTOM:**

When starting the engine, the steering warning light continues to illuminate.

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK DTC.**<br>Read the DTC of the power steering control module using the Subaru Select Monitor. <Ref. to PS(diag)-18, Read Diagnostic Trouble Code (DTC).> | Is DTC displayed? | Perform the diagnosis according to DTC. <Ref. to PS(diag)-24, List of Diagnostic Trouble Code (DTC).> | Go to step **2**. |
| 2 | **CHECK LAN SYSTEM.**<br>Perform the diagnosis for LAN system using the Subaru Select Monitor. <Ref. to LAN(diag)-2, Basic Diagnostic Procedure.> | Is a DTC related to CAN detected? | Perform the diagnosis according to DTC. <Ref. to LAN(diag)-50, List of Diagnostic Trouble Code (DTC).> | Check the combination meter. <Ref. to IDI-10, INSPECTION, Combination Meter System.> |

# 11.List of Diagnostic Trouble Code (DTC)

## A: LIST

| DTC | Item | Content of diagnosis | Note |
|---|---|---|---|
| None | Without DTC | Normal | <Ref. to PS(diag)-17, WITHOUT DTC, INSPECTION, Subaru Select Monitor.> |
| | “Assist limitation” is displayed in the current data «EPS operating condition». | Assist limitation is performed due to overheat protection control. | <Ref. to PS(diag)-22, POWER STEERING ASSIST DISABLED, STEERING WARNING LIGHT DOES NOT COME ON, STEERING Warning Light.> |
| | The current data «Overheating protection intervention history» is more than once. | There are previous records of intervention to overheat protection control. | <Ref. to PS(diag)-22, POWER STEERING ASSIST DISABLED, STEERING WARNING LIGHT DOES NOT COME ON, STEERING Warning Light.> |
| C2511 | Torque Sensor Failure 1 (Main) | • Poor connector contact<br>• Forgot to connect connector<br>• Faulty torque sensor section circuit<br>• Faulty torque sensor coil | <Ref. to PS(diag)-26, DTC C2511 TORQUE SENSOR FAILURE 1 (MAIN), Diagnostic Procedure with Diagnostic Trouble Code (DTC).> |

| U1120 | Lost Communication With Autostart Stop Control Module | Defective CAN communication | <Ref. to PS(diag)-34, DTC U1120 LOST COMMUNICATION WITH AUTOSTART STOP CONTROL MODULE, Diagnostic Procedure with Diagnostic Trouble Code (DTC).> |

# 12.Diagnostic Procedure with Diagnostic Trouble Code (DTC)

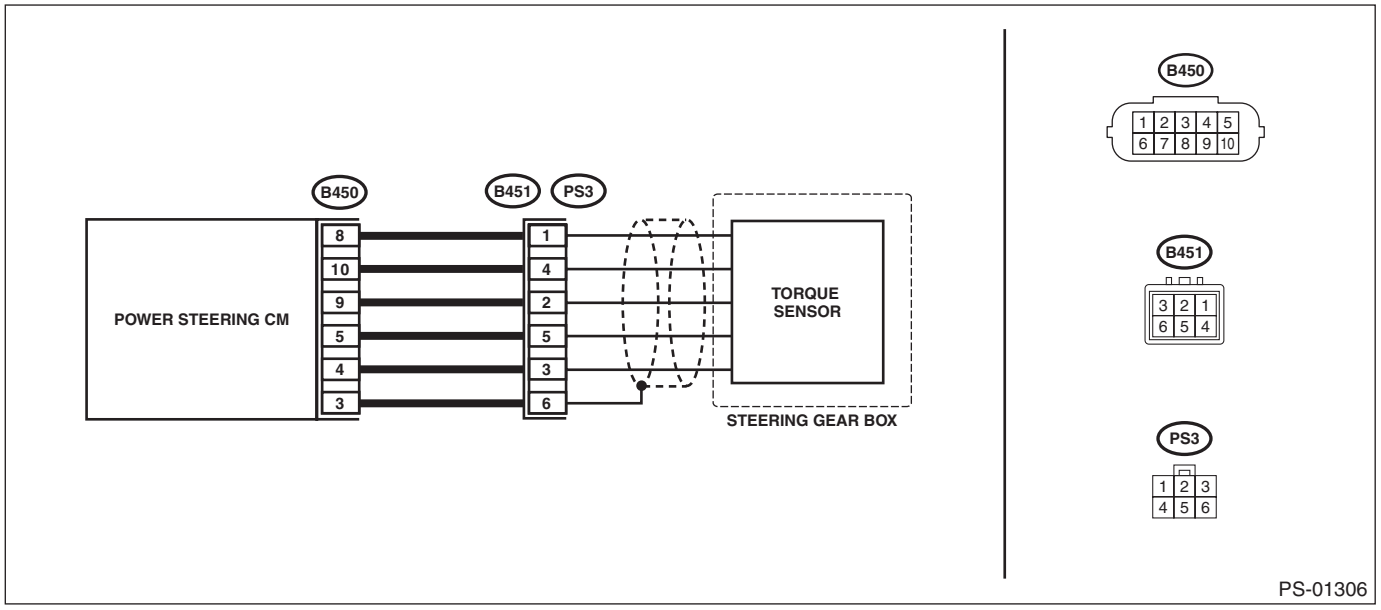
## A: DTC C2511 TORQUE SENSOR FAILURE 1 (MAIN)

**TROUBLE SYMPTOM:**

- The steering wheel operation feels heavy.
- STEERING warning light illuminates.

**WIRING DIAGRAM:**

Electric Power Steering System <Ref. to WI-73, Electric Power Steering System.>



| Step | | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK TORQUE SENSOR SIGNAL.**<br>1) Display the current data of the power steering control module using the Subaru Select Monitor.<br>2) Check the voltage of «Torque sensor main output», «Torque sensor sub output», «Torque sensor reference voltage» and «Torque sensor power supply voltage». | Are the voltage of «Torque sensor main output» and «Torque sensor sub output» 2.5±0.1 V?<br>Is the voltage of «Torque sensor reference voltage» 3±0.1 V?<br>Is the voltage of «Torque sensor power supply voltage» 8±0.4 V? | Check for poor contact of the connector, and check the conditions again. If the condition recur, go to the next step. Go to step **2**.<br>If it does not recur, complete the inspection. | Go to step **2**. |
| 2 | **CHECK HARNESS.**<br>1) Turn the ignition switch to OFF.<br>2) Disconnect the connector (B451).<br>3) Using a tester and test harness, check the internal resistance of the harness terminals.<br>***Connector & terminal***<br>***(B450) No. 4 — (B451) No. 3:***<br>***(B450) No. 5 — (B451) No. 5:***<br>***(B450) No. 8 — (B451) No. 1:***<br>***(B450) No. 9 — (B451) No. 2:***<br>***(B450) No. 10 — (B451) No. 4:*** | Is the resistance less than 10 Ω? | Go to step **3**. | Repair or replace the harness. |

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 3 | **CHECK TORQUE SENSOR.**<br>1) Turn the ignition switch to OFF.<br>2) Disconnect the power steering control module connector (B450).<br>3) Using a tester and test harness, check the internal resistance of the torque sensor.<br>4) Check for whether the resistance between the terminals change or not when the steering is turned to the left and right.<br>***Connector & terminal***<br>***(B450) No. 4 — No. 8:***<br>***(B450) No. 5 — No. 8:***<br>***(B450) No. 4 — No. 9:***<br>***(B450) No. 5 — No. 9:***<br>***(B450) No. 4 — No. 10:***<br>***(B450) No. 5 — No. 10:*** | Did resistance change in all measurement locations? | Replace the power steering control module. <Ref. to PS-42, Power Steering Control Module.> | Replace the steering gearbox. <Ref. to PS-26, Electric Power Steering Gearbox.> |

## B: DTC C2512 TORQUE SENSOR FAILURE 2 (SUB)

NOTE:
For the diagnostic procedures, refer to “DTC 2511 TORQUE SENSOR FAILURE 1 (MAIN)”. <Ref. to PS(diag)-26, DTC C2511 TORQUE SENSOR FAILURE 1 (MAIN), Diagnostic Procedure with Diagnostic Trouble Code (DTC).>

## C: DTC C2513 TORQUE SENSOR FAILURE 3 (MUCH TOLERANCE)

NOTE:
For the diagnostic procedures, refer to “DTC 2511 TORQUE SENSOR FAILURE 1 (MAIN)”. <Ref. to PS(diag)-26, DTC C2511 TORQUE SENSOR FAILURE 1 (MAIN), Diagnostic Procedure with Diagnostic Trouble Code (DTC).>

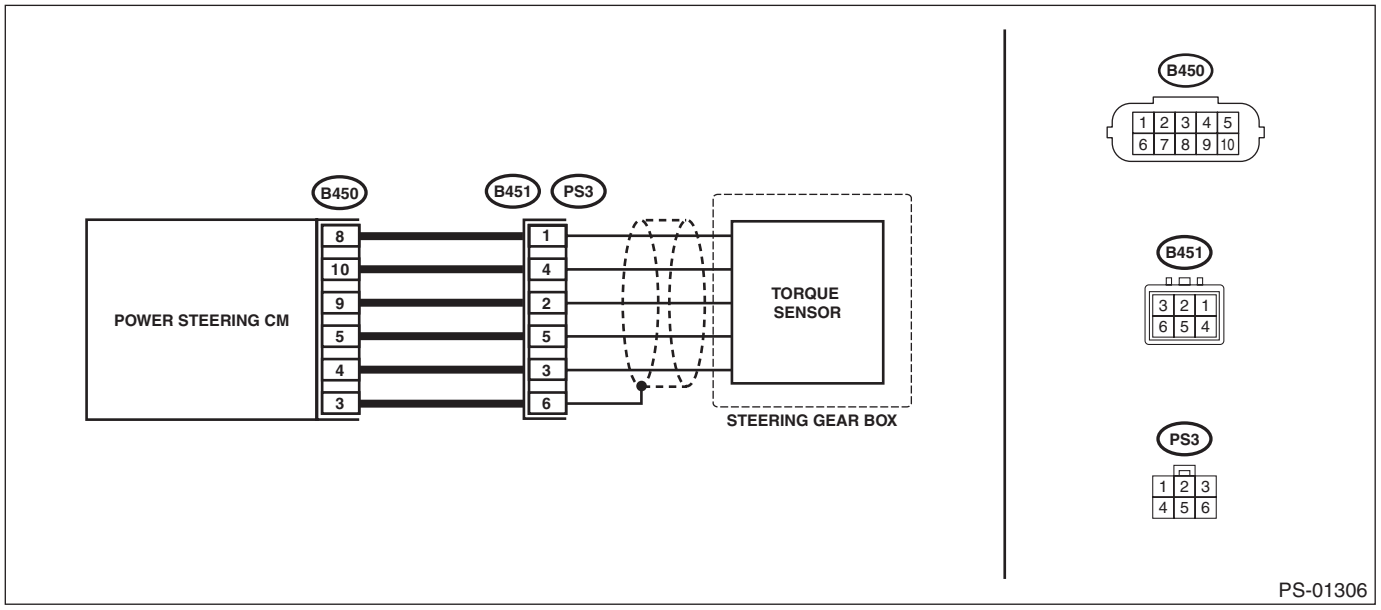
## D: DTC C2514 TORQUE SENSOR POWER SUPPLY FAILURE

**TROUBLE SYMPTOM:**

- The steering wheel operation feels heavy.
- STEERING warning light illuminates.

**WIRING DIAGRAM:**

Electric Power Steering System <Ref. to WI-73, Electric Power Steering System.>



| Step | | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK TORQUE SENSOR SIGNAL.**<br>1) Display the current data of the power steering control module using the Subaru Select Monitor.<br>2) Check the voltage of «Torque sensor main output», «Torque sensor sub output», «Torque sensor reference voltage» and «Torque sensor power supply voltage». | Are the voltage of «Torque sensor main output» and «Torque sensor sub output» 2.5±0.1 V?<br>Is the voltage of «Torque sensor reference voltage» 3±0.1 V?<br>Is the voltage of «Torque sensor power supply voltage» 8±0.4 V? | Check for poor contact of the connector, and check the conditions again. If the condition recur, go to the next step. Go to step **2**.<br>If it does not recur, complete the inspection. | Go to step **2**. |
| 2 | **CHECK HARNESS.**<br>1) Turn the ignition switch to OFF.<br>2) Disconnect the connector (B451).<br>3) Using a tester and test harness, check the internal resistance of the harness terminals.<br>***Connector & terminal***<br>***(B450) No. 4 — (B451) No. 3:***<br>***(B450) No. 5 — (B451) No. 5:***<br>***(B450) No. 8 — (B451) No. 1:***<br>***(B450) No. 9 — (B451) No. 2:***<br>***(B450) No. 10 — (B451) No. 4:*** | Is the resistance less than 10 Ω? | Replace the power steering control module. <Ref. to PS-42, Power Steering Control Module.> | Repair or replace the harness. |

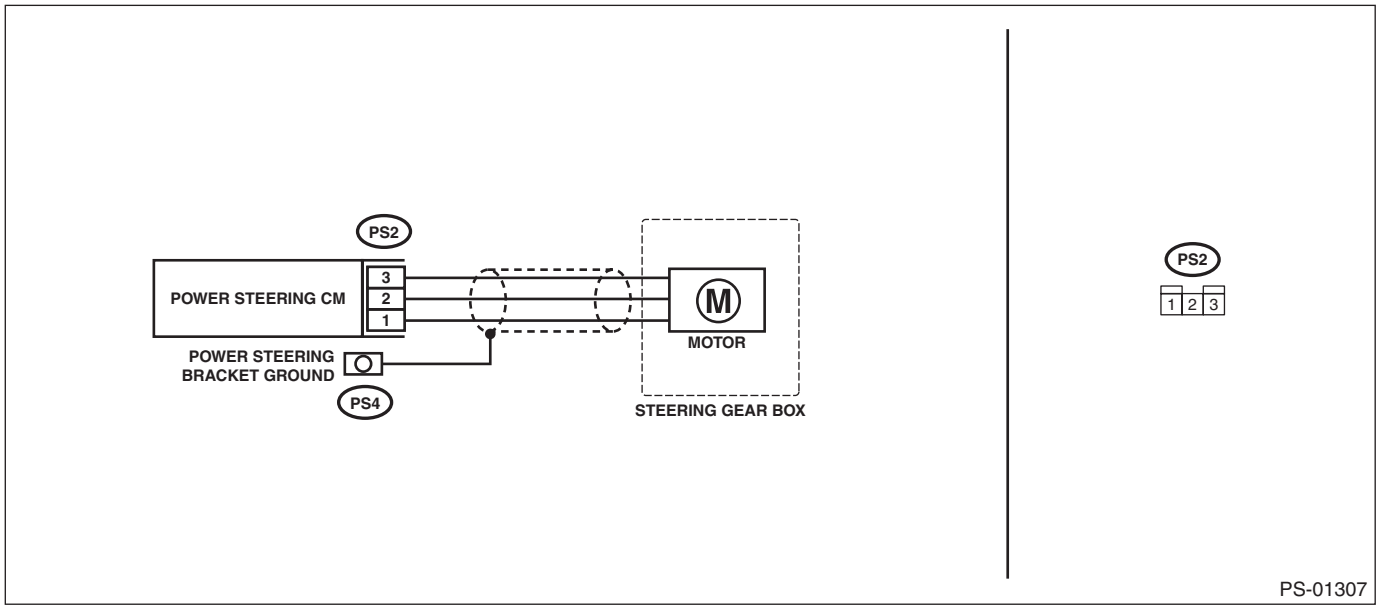
## E: DTC C2521 MOTOR FAILURE 1 (MOTOR)

**TROUBLE SYMPTOM:**

- The steering wheel operation feels heavy.
- STEERING warning light illuminates.

**WIRING DIAGRAM:**

Electric Power Steering System <Ref. to WI-73, Electric Power Steering System.>



| Step | | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK MOTOR UNIT.**<br>1) Turn the ignition switch to OFF.<br>2) Disconnect the connector (PS2) from the power steering control module.<br>3) Use a tester to check for continuity in the motor.<br>***Connector & terminal***<br>***(PS2) No. 1 — No. 2:***<br>***(PS2) No. 1 — No. 3:***<br>***(PS2) No. 2 — No. 3:*** | Is there continuity? | Go to step **2**. | Replace the steering gearbox. <Ref. to PS-26, Electric Power Steering Gearbox.> |
| 2 | **CHECK MOTOR INSULATION.**<br>Use a tester to check for short circuits in the motor.<br>***Connector & terminal***<br>***(PS2) No. 1 — Steering gearbox body:***<br>***(PS2) No. 2 — Steering gearbox body:***<br>***(PS2) No. 3 — Steering gearbox body:*** | Is the resistance 1 MΩ or more? | Replace the power steering control module. <Ref. to PS-42, Power Steering Control Module.> | Replace the steering gearbox. <Ref. to PS-26, Electric Power Steering Gearbox.> |

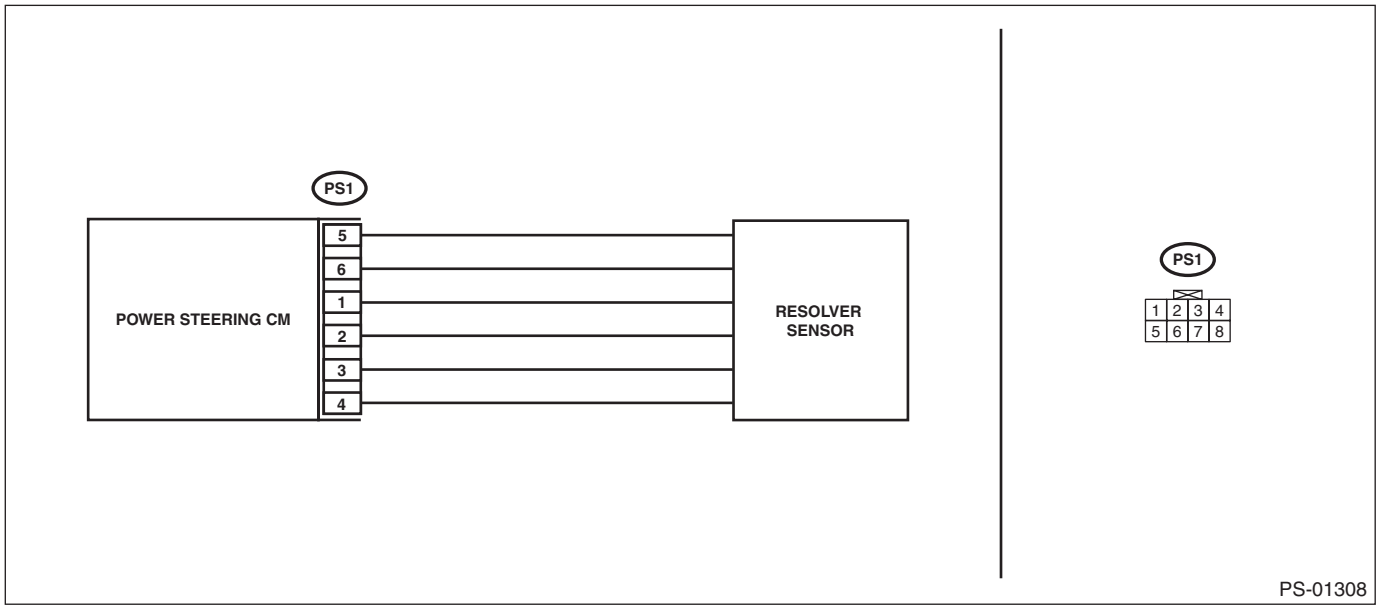
## F: DTC C2522 MOTOR FAILURE 2 (ANGLE ABNORMAL)

**TROUBLE SYMPTOM:**

- The steering wheel operation feels heavy.
- STEERING warning light illuminates.

**WIRING DIAGRAM:**

Electric Power Steering System <Ref. to WI-73, Electric Power Steering System.>



| | Step | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK MOTOR UNIT.**<br>1) Turn the ignition switch to OFF.<br>2) Disconnect the connector (PS1) from the power steering control module.<br>3) Use a tester to check for continuity in the resolver sensor.<br>***Connector & terminal***<br>***(PS1) No. 1 — No. 2 :***<br>***(PS1) No. 3 — No. 4 :***<br>***(PS1) No. 5 — No. 6 :*** | Is there continuity? | Go to step **2**. | Replace the steering gearbox. <Ref. to PS-26, Electric Power Steering Gearbox.> |
| 2 | **CHECK RESOLVER SENSOR INSULATION.**<br>Using a tester, check for short circuits in the resolver sensor.<br>***Connector & terminal***<br>***(PS1) No. 1 — Steering gearbox body:***<br>***(PS1) No. 2 — Steering gearbox body:***<br>***(PS1) No. 3 — Steering gearbox body:***<br>***(PS1) No. 4 — Steering gearbox body:***<br>***(PS1) No. 5 — Steering gearbox body:***<br>***(PS1) No. 6 — Steering gearbox body:*** | Is the resistance 1 MΩ or more? | Replace the power steering control module. <Ref. to PS-42, Power Steering Control Module.> | Replace the steering gearbox. <Ref. to PS-26, Electric Power Steering Gearbox.> |

## G: DTC C2531 ECU FAILURE 1 (CPU FAILURE)

**TROUBLE SYMPTOM:**

- The steering wheel operation feels heavy.
- STEERING warning light illuminates.

NOTE:
When this code is displayed, replace the power steering control module with new parts. <Ref. to PS-42, Power Steering Control Module.>

## H: DTC C2532 ECU FAILURE 2 (PERIPHERAL CIRCUIT FAILURE)

**TROUBLE SYMPTOM:**

- The steering wheel operation feels heavy.
- STEERING warning light illuminates.

NOTE:
When this code is displayed, replace the power steering control module with new parts. <Ref. to PS-42, Power Steering Control Module.>

## I: DTC C2533 ECM FAILURE 3 (BOARD TEMPERATURE SENSOR FAILURE)

**TROUBLE SYMPTOM:**
The steering wheel operation feels heavy.

NOTE:
When this code is displayed, replace the power steering control module with new parts. <Ref. to PS-42, Power Steering Control Module.>

## J: DTC C2541 VEHICLE SPEED IS ABNORMAL

**TROUBLE SYMPTOM:**
The steering wheel operation feels heavy.

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK DTC.**<br>Read all DTCs using the Subaru Select Monitor. | Are VDC CM or vehicle speed-related DTCs detected? | Perform the diagnosis according to the DTC. | Go to step **2**. |
| 2 | **CHECK LAN SYSTEM.**<br>Perform the diagnosis for LAN system using the Subaru Select Monitor. <Ref. to LAN(diag)-2, Basic Diagnostic Procedure.> | Is a DTC of the body integrated unit displayed? | Perform the diagnosis according to the DTC. <Ref. to LAN(diag)-50, List of Diagnostic Trouble Code (DTC).> | Go to step **3**. |
| 3 | **CHECK VEHICLE SPEED SIGNAL.**<br>1) Use the Subaru Select Monitor, display the current data [Vehicle Speed] of the power steering control module.<br>2) Lift up the vehicle (so that the wheels turn freely), start the engine, and raise engine speed in gear.<br>**CAUTION:**<br>**Be careful that no one is near the spinning tires and nothing gets caught in them.**<br>3) Check for whether the data changes according to vehicle speed. | Is the data in sync with the vehicle speed? | It is possible that temporary poor communication occurs. Perform memory clear. | Replace the power steering control module. <Ref. to PS-42, Power Steering Control Module.> |

## K: DTC C2543 ERROR PASSIVE STATUS

**TROUBLE SYMPTOM:**
The steering wheel operation feels heavy.

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK LAN SYSTEM.**<br>Perform the diagnosis for LAN system using the Subaru Select Monitor. <Ref. to LAN(diag)-2, Basic Diagnostic Procedure.> | Is a DTC of the CAN communication displayed? | Perform the diagnosis according to the DTC. <Ref. to LAN(diag)-50, List of Diagnostic Trouble Code (DTC).> | Check for poor contact of the connector, and check the conditions again. If the condition recurs, perform the diagnosis according to the DTC. <Ref. to LAN(diag)-50, List of Diagnostic Trouble Code (DTC).><br>If it does not recur, complete the inspection. |

## L: DTC C2551 POWER SUPPLY RELAY FAILURE

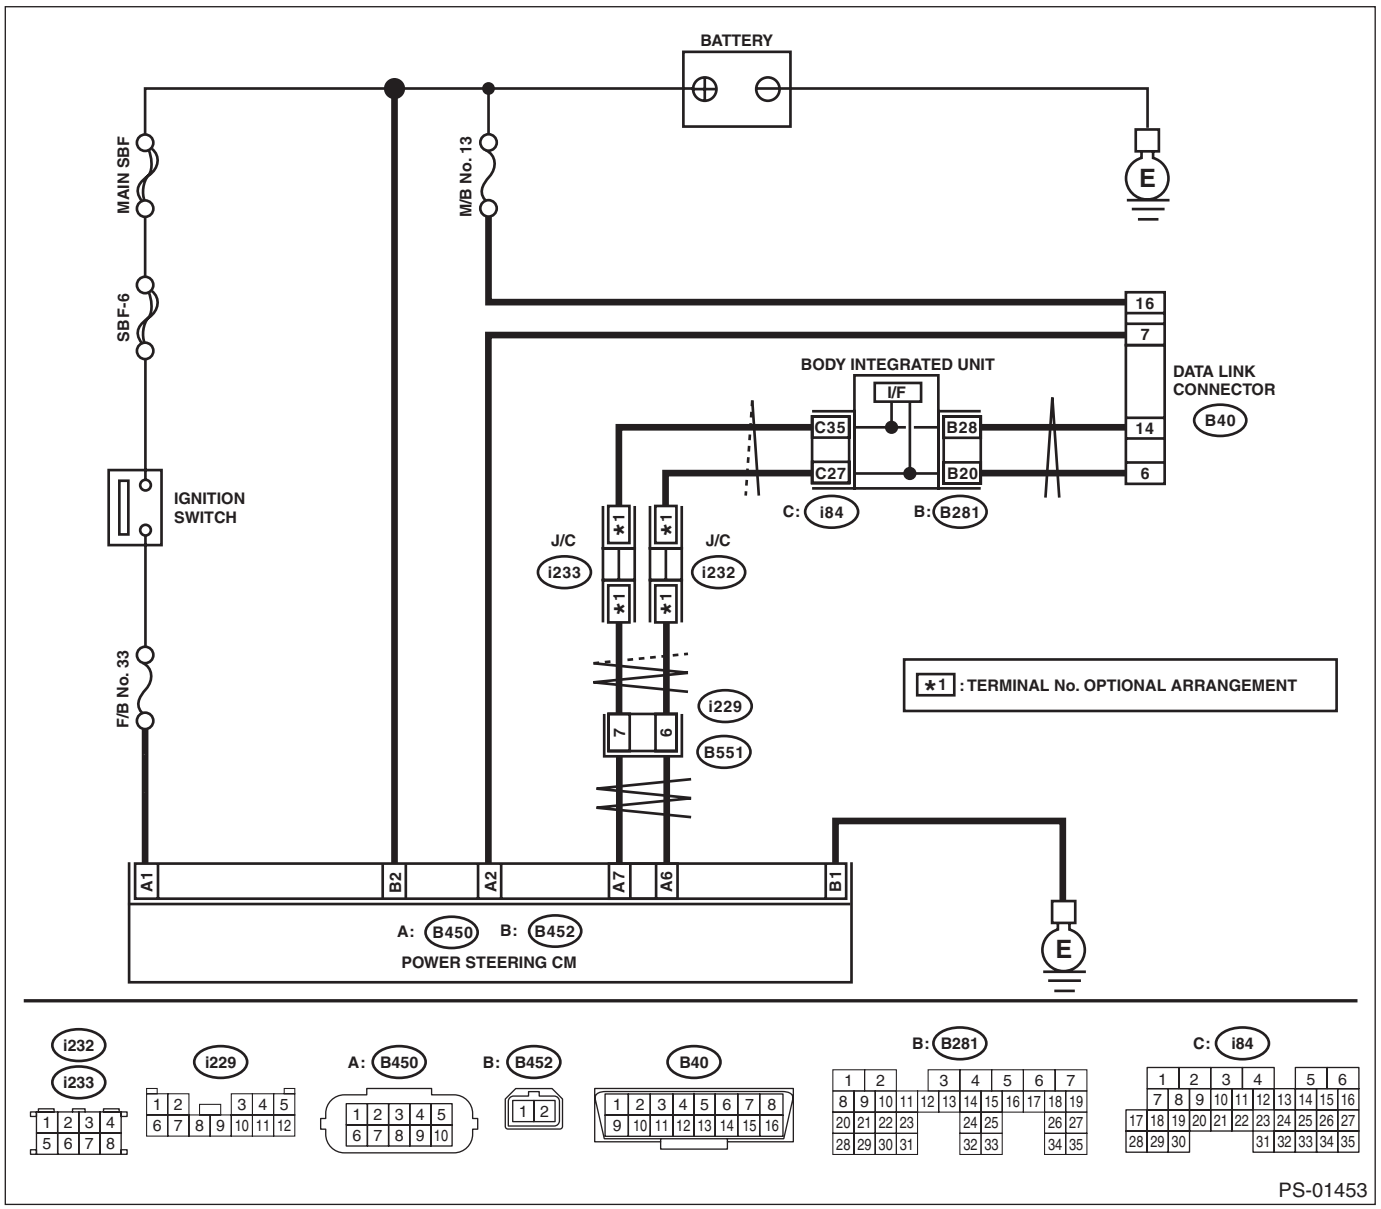
**TROUBLE SYMPTOM:**

- The steering wheel operation feels heavy.
- STEERING warning light illuminates.

NOTE:
If power supply voltage failure exists at the vehicle side, the warning light goes off if the normal voltage returns.

**WIRING DIAGRAM:**

Electric Power Steering System <Ref. to WI-73, Electric Power Steering System.>



| | Step | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK BATTERY.**<br>1) Measure the battery voltage.<br>2) Measure the battery specific gravity. | Is the voltage 12 V or more? Is the specific gravity 1.260 or more? | Go to step **2**. | Charge or replace the battery. |
| 2 | **CHECK WIRING HARNESS.**<br>1) Disconnect the connector of the power steering control module.<br>2) Turn the ignition switch to ON.<br>3) Using a tester and test harness, check the voltage between terminals.<br>***Connector & terminal***<br>***(B452) No. 2 (+) — Chassis ground (–):*** | Is the voltage 12 V or more? | Go to step **3**. | Repair the open circuit of harness or the poor contact of connector between the power steering control module and the battery. |
| 3 | **CHECK GROUND CIRCUIT.**<br>1) Turn the ignition switch to OFF.<br>2) Using a tester and test harness, check the resistance between terminals.<br>***Connector & terminal***<br>***(B452) No. 1 — Chassis ground:*** | Is the resistance less than 1 Ω? | Check for poor contact of terminals in the power steering control module, and if there are no malfunctions, replace the power steering control module. <Ref. to PS-42, Power Steering Control Module.> | Repair the open circuit or poor contact of the harness between the power steering control module and chassis ground. |

## M: DTC C2552 MOTOR RELAY ABNORMAL

**TROUBLE SYMPTOM:**

- The steering wheel operation feels heavy.
- STEERING warning light illuminates.

NOTE:
When this code is displayed, replace the power steering control module with new parts. <Ref. to PS-42, Power Steering Control Module.>

## N: DTC U0073 CONTROL MODULE COMMUNICATION BUS “A” OFF

NOTE:
Refer to “LAN SYSTEM (DIAGNOSTICS)” for diagnostic procedures. <Ref. to LAN(diag)-2, Basic Diagnostic Procedure.>

## O: DTC U0122 LOST COMMUNICATION WITH VEHICLE DYNAMICS CONTROL MODULE

NOTE:
Refer to “LAN SYSTEM (DIAGNOSTICS)” for diagnostic procedures. <Ref. to LAN(diag)-2, Basic Diagnostic Procedure.>

## P: DTC U0416 INVALID DATA RECEIVED FROM VEHICLE DYNAMICS CONTROL MODULE

NOTE:
Refer to “LAN SYSTEM (DIAGNOSTICS)” for diagnostic procedures. <Ref. to LAN(diag)-2, Basic Diagnostic Procedure.>

## Q: DTC U1120 LOST COMMUNICATION WITH AUTOSTART STOP CONTROL MODULE

NOTE:
Refer to “LAN SYSTEM (DIAGNOSTICS)” for diagnostic procedures. <Ref. to LAN(diag)-2, Basic Diagnostic Procedure.>

# BODY SECTION

This service manual has been prepared to provide SUBARU service personnel with the necessary information and data for the correct maintenance and repair of SUBARU vehicles.
This manual includes the procedures for maintenance, disassembling, reassembling, inspection and adjustment of components and diagnostics for guidance of experienced mechanics.
Please peruse and utilize this manual fully to ensure complete repair work for satisfying our customers by keeping their vehicle in optimum condition. When replacement of parts during repair work is needed, be sure to use SUBARU genuine parts.

All information, illustration and specifications contained in this manual are based on the latest product information available at the time of publication approval.

# 1. General Description

## A: SPECIFICATION

### 1. HEATER SYSTEM

| Item | | Specifications | Condition |
|---|---|---|---|
| Heating capacity | | 5.0 kW (4,299 kcal/h, 17,059 BTU/h) or more | • Air flow control dial or switch: FOOT<br>• Temperature control dial: HI (MAX HOT)<br>• Temperature difference between hot water and inlet air: 65°C (149°F)<br>• Hot water flow rate: 360 L (95.1 US gal, 79.2 Imp gal)/h |
| Air flow rate | | 290 $m^3$ (10,243 cu ft)/h | FOOT mode (FRESH), MAX HOT at 12.5 V |
| Max air flow rate | | 480 $m^3$ (16,954 cu ft)/h | • Temperature control dial: LO (MAX COOL)<br>• Fan dial: HI (MAX)<br>Auto A/C model: 7th position<br>Manual A/C model: 4th position<br>• FRESH/RECIRC switch: RECIRC |
| Heater core | Dimensions (W × H × T) | 257.5 × 118.5 × 27 mm (10.1 × 4.67 × 1.06 in) | — |
| Blower motor | Type | Magnet motor 300 W or less | 12 V |
| | Fan type and size (diameter × width) | Sirocco fan type 150 × 75 mm (5.91 × 2.95 in) | — |

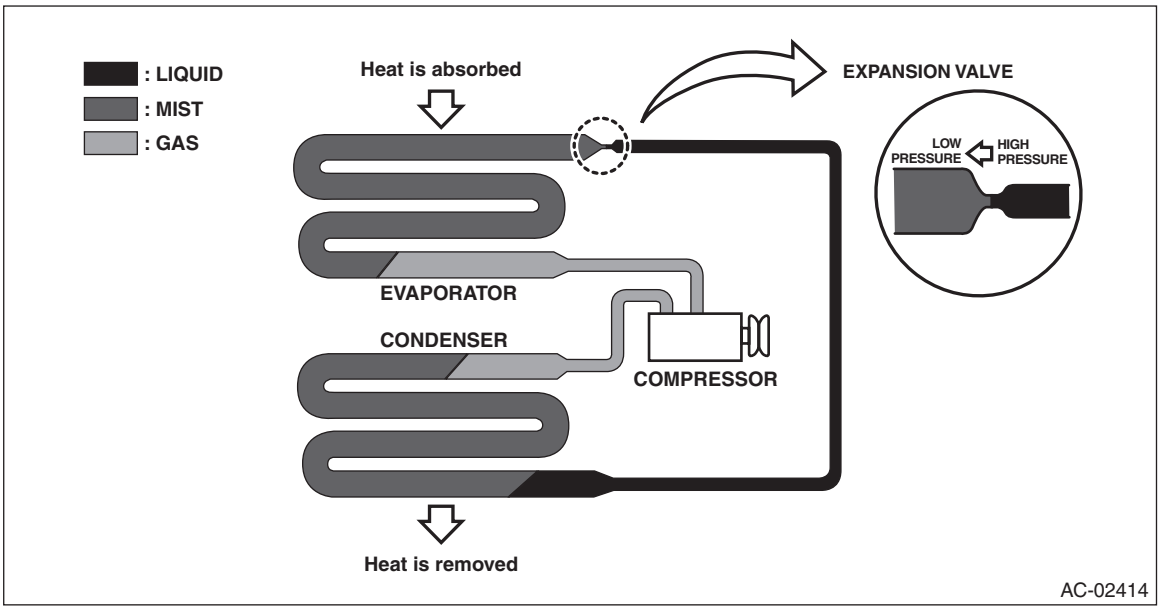
### 2. A/C SYSTEM

| Item | | Specifications |
|---|---|---|
| Type of air conditioner | | Reheat air-mix type |
| Cooling capacity | | 5.0 kW (4,299 kcal/h, 17,059 BTU/h) |
| Refrigerant | | HFC-134a ($CH_2FCF_3$) [0.475±0.025 kg (1.05±0.06 lb)] |
| Compressor | Type | Rotary fixed capacity (DKV-10Z) |
| | Discharge | 105 cc (6.41 cu in)/rev |
| | Max. permissible speed | 7,700 rpm |
| Magnet clutch | Type | Dry, single-disc type |
| | Power consumption | 41.2 W |
| | Type of belt | V-belt 6 PK |
| | Pulley dia. (effective dia.) | 110 mm (4.33 in) |
| | Pulley ratio | 1.3 |
| Condenser | Type | Sub cool type |
| | Core face area | 0.188 $m^2$ (2.002 sq ft) |
| | Core thickness | 16 mm (0.63 in) |
| | Radiation area | 4.5 $m^2$ (48.44 sq ft) |
| Expansion valve | Type | Block |
| Evaporator | Type | Dual-tank |
| | Dimensions (W × H × T) | 290.1 × 172 × 39 mm (11.42 × 6.77 × 1.54 in) |

| Item | | | Specifications |
|---|---|---|---|
| Blower fan | | Fan type | Sirocco fan |
| | | Outer diameter × width | 150 × 75 mm (5.91 × 2.95 in) |
| | | Power consumption | 280 W |
| Condenser fan (Sub fan) | | Motor type | Magnet |
| | | Power consumption | 120 W |
| | | Fan outer diameter | 318.5 mm (12.5 in) |
| Radiator fan (Main fan) | | Motor type | Magnet |
| | | Power consumption | 120 W |
| | | Fan outer diameter | 318.5 mm (12.5 in) |
| Idle speed | | No load | 650±50 rpm |
| | | A/C ON | 800 — 900±50 rpm |
| Triple switch (Pressure switch) | Low-pressure switch operating pressure | ON → OFF | 196±25 kPa (2.00±0.25 kgf/cm$^2$, 28.4±3.6 psi) |
| | | OFF → ON | 225±30 kPa (2.29±0.31 kgf/cm$^2$, 32.6±4.3 psi) |
| | High-pressure switch operating pressure | ON → OFF | 2,940±200 kPa (29.98±2.04 kgf/cm$^2$, 426.3±29 psi) |
| | | OFF → ON | 2,350±200 kPa (24.00±2.04 kgf/cm$^2$, 340.7±29.0 psi) |
| | Middle-pressure switch operating pressure | ON → OFF | 1,470±120 kPa (14.99±1.22 kgf/cm$^2$, 213.15±17.4 psi) |
| | | OFF → ON | 1,770±100 kPa (18.05±1.02 kgf/cm$^2$, 256.65±14.5 psi) |
| Thermo-control amplifier working temperature | | |  AC-00601<br>(1) ON<br>(2) OFF<br>(3) 1.5±0.3°C (34.7±0.5°F)<br>(4) 1.0±0.5°C (33.8±0.9°F) |

## 3. BASIC OPERATION

The cooling system cools down the compartment by using the pipes connecting parts and cycling the evaporable liquid (refrigerant) within the sealed system in a repeated process of “vaporization — liquefaction — re-vaporization”.

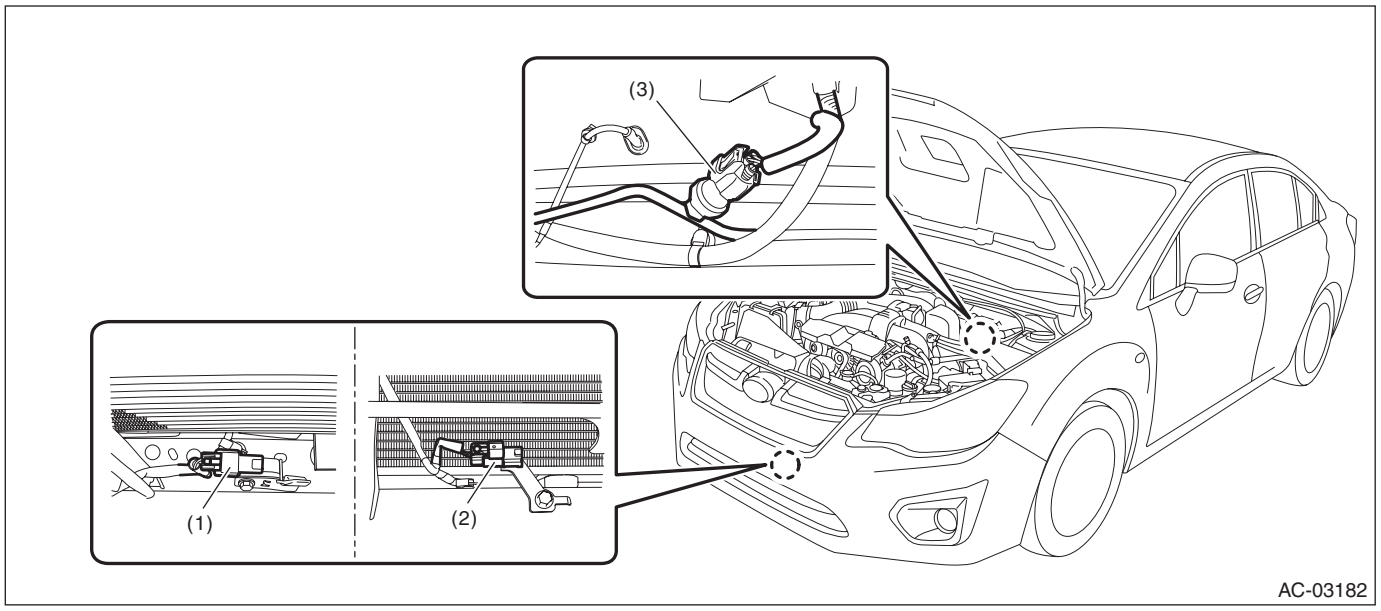


| Item | Operation |
|---|---|
| Compressor | Sucks and pressurizes the low temperature, low pressure refrigerant gas that was vaporized at the evaporator by absorbing heat from the compartment, and sends the high temperature, high pressure refrigerant gas to the condenser. |
| Condenser | Cools the high temperature, high pressure refrigerant gas sent from the compressor for condense and liquefaction. |
| Expansion valve | • Sprays the high temperature, high pressure liquid refrigerant from the small hole in order to let the refrigerant expand rapidly to turn it into low temperature, low pressure mist.<br>• The refrigerant amount is adjusted according to the refrigerant vaporization condition in the evaporator. |
| Evaporator | The evaporator turns into a low temperature condition when the mist refrigerant that was turned into a low temperature, low pressure condition at the expansion valve is vaporized in large quantity in the evaporator. Passing air flow through the low temperature evaporator emits cold air. |

# B: LOCATION

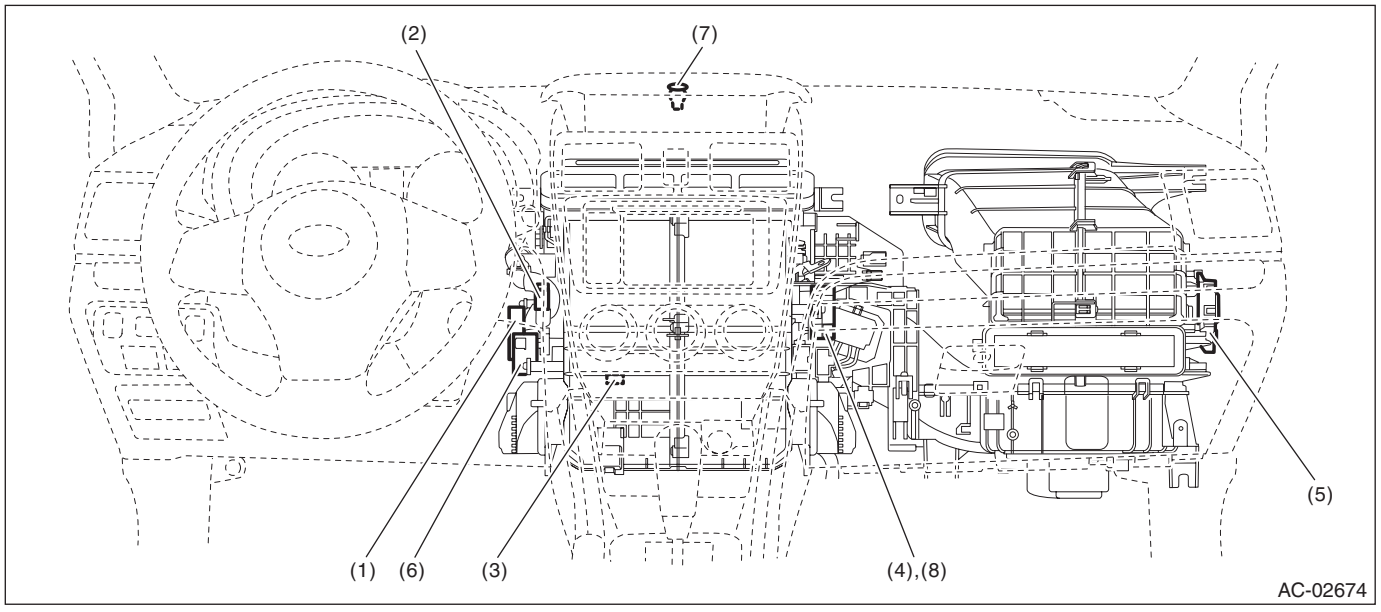
## 1. ELECTRICAL COMPONENT (ACTUATORS AND SENSORS)

- Engine compartment



(1) Ambient sensor (except for XV model)
(2) Ambient sensor (XV model)
(3) Pressure switch

- Compartment

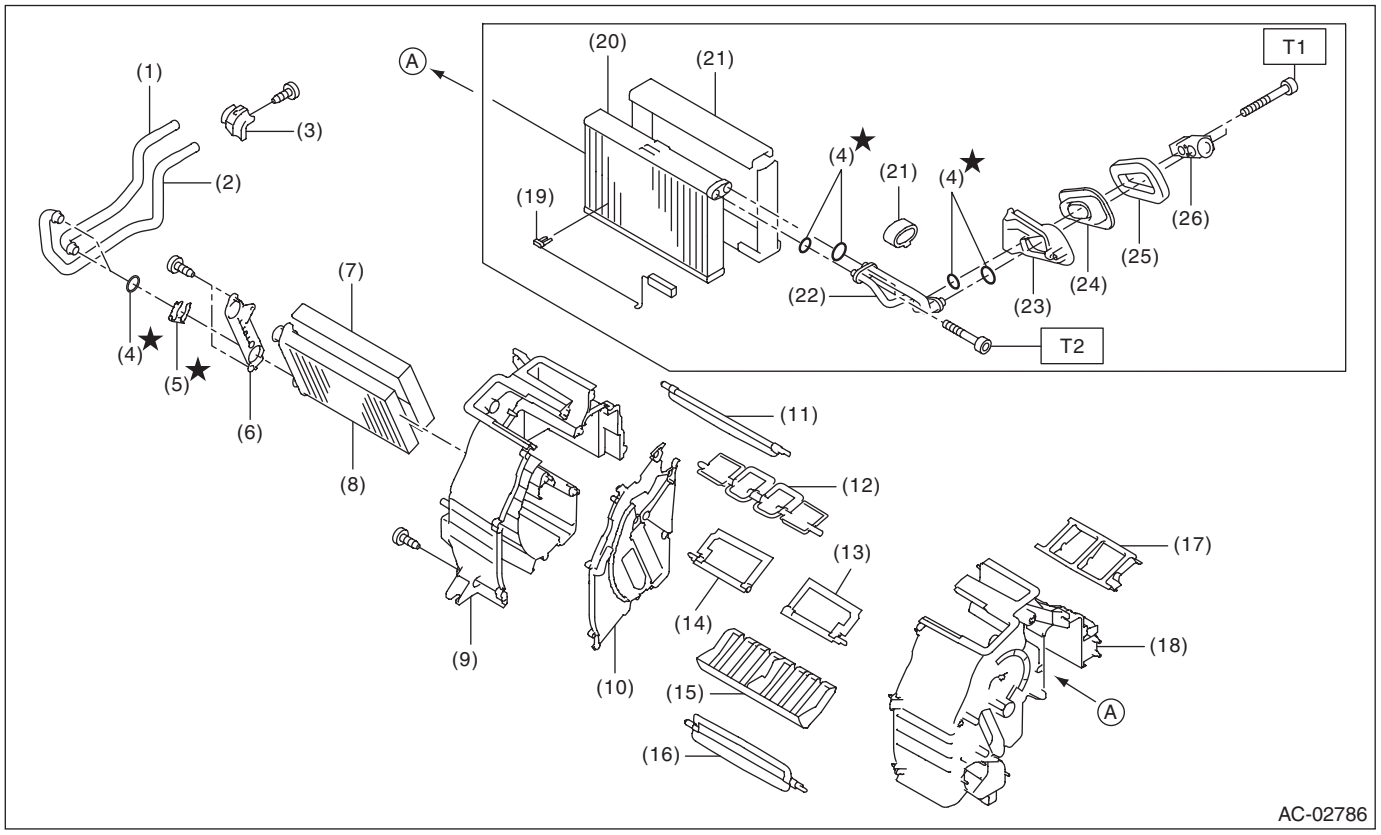


(1) Dual A/C air mix door actuator LH
(2) In-vehicle sensor
(3) Evaporator sensor
(4) Dual A/C air mix door actuator RH
(5) Intake door actuator
(6) Mode door actuator
(7) Sunload sensor
(8) Single A/C air mix door actuator

# C: COMPONENT

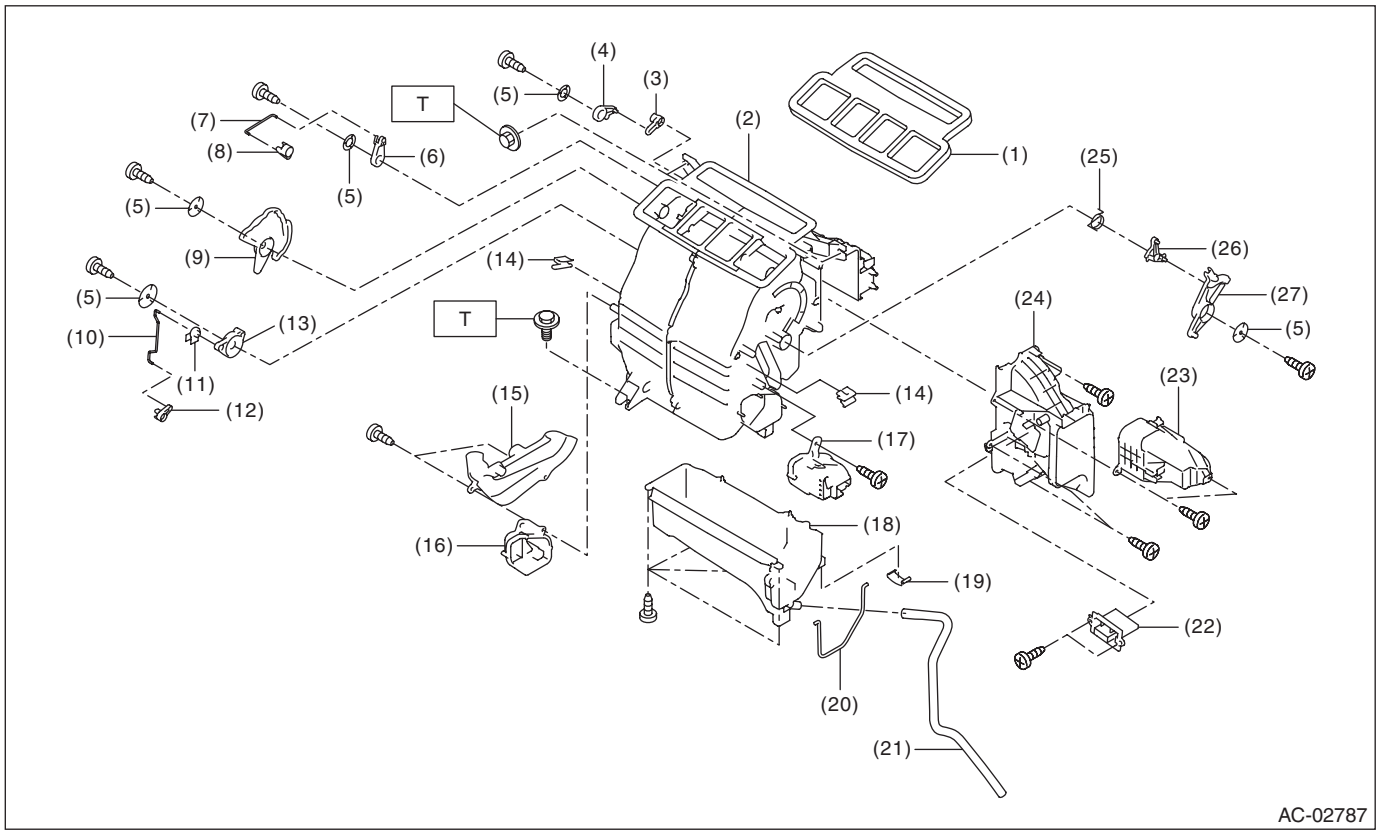
## 1. HEATER AND COOLING UNIT

- Manual A/C model



(1) Pipe - inlet
(2) Pipe - outlet
(3) Clamp - pipe
(4) Seal O-ring
(5) Clamp
(6) Plate - heater core
(7) Packing - heater core
(8) Heater core
(9) Case - heater unit UPR LH
(10) Plate CTR
(11) Shutter - defroster
(12) Shutter - vent
(13) Shutter - air mix RH
(14) Shutter - air mix LH
(15) Guide - heater unit
(16) Shutter - foot
(17) Case - vent duct
(18) Case - heater unit UPR RH
(19) Thermostat - cooling
(20) Evaporator ASSY - cooling
(21) Packing - evaporator core
(22) Pipe - evaporator core
(23) Case - expansion valve
(24) Seal - cooling
(25) Packing - heater unit
(26) Expansion valve - cooling

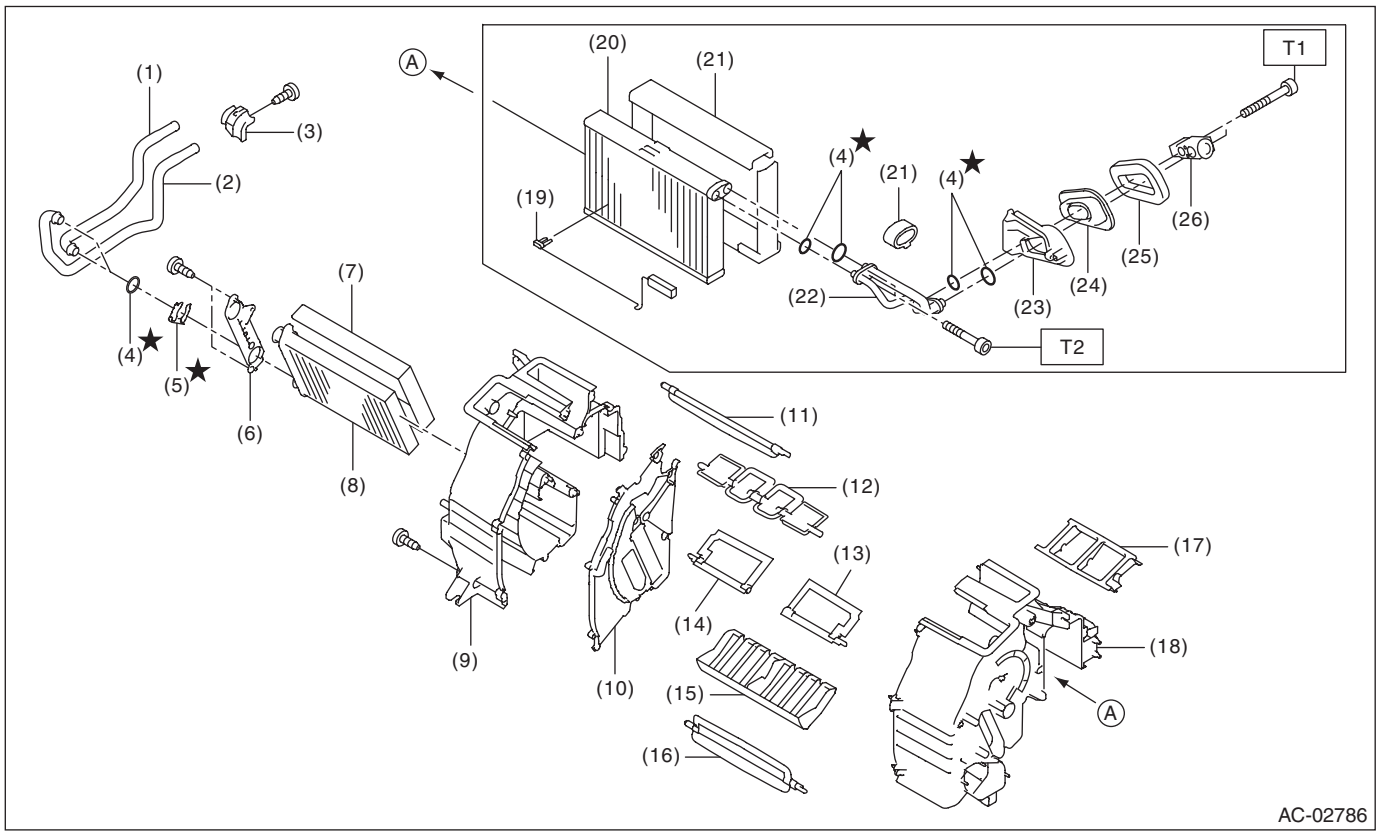
***Tightening torque: N·m (kgf-m, ft-lb)***
***T1: 5.0 (0.51, 3.7)***
***T2: 6.7 (0.68, 4.9)***



(1) Packing - heater unit
(2) Case - heater unit
(3) Lever - defroster
(4) Lever - defroster sub
(5) Washer - heater
(6) Lever - ventilator sub
(7) Rod - ventilator
(8) Lever - ventilator door
(9) Lever - mode
(10) Rod - foot
(11) Clip
(12) Lever - foot
(13) Lever - foot sub
(14) Clamp - cable
(15) Cover - heater pipe
(16) Duct - foot LH
(17) Duct - foot RH
(18) Case - heater LWR
(19) Clip - case
(20) Packing - evaporator cover
(21) Hose - drain
(22) Resistor
(23) Cover
(24) Cover - heater unit
(25) Spring - heater unit
(26) Lever A
(27) Lever B

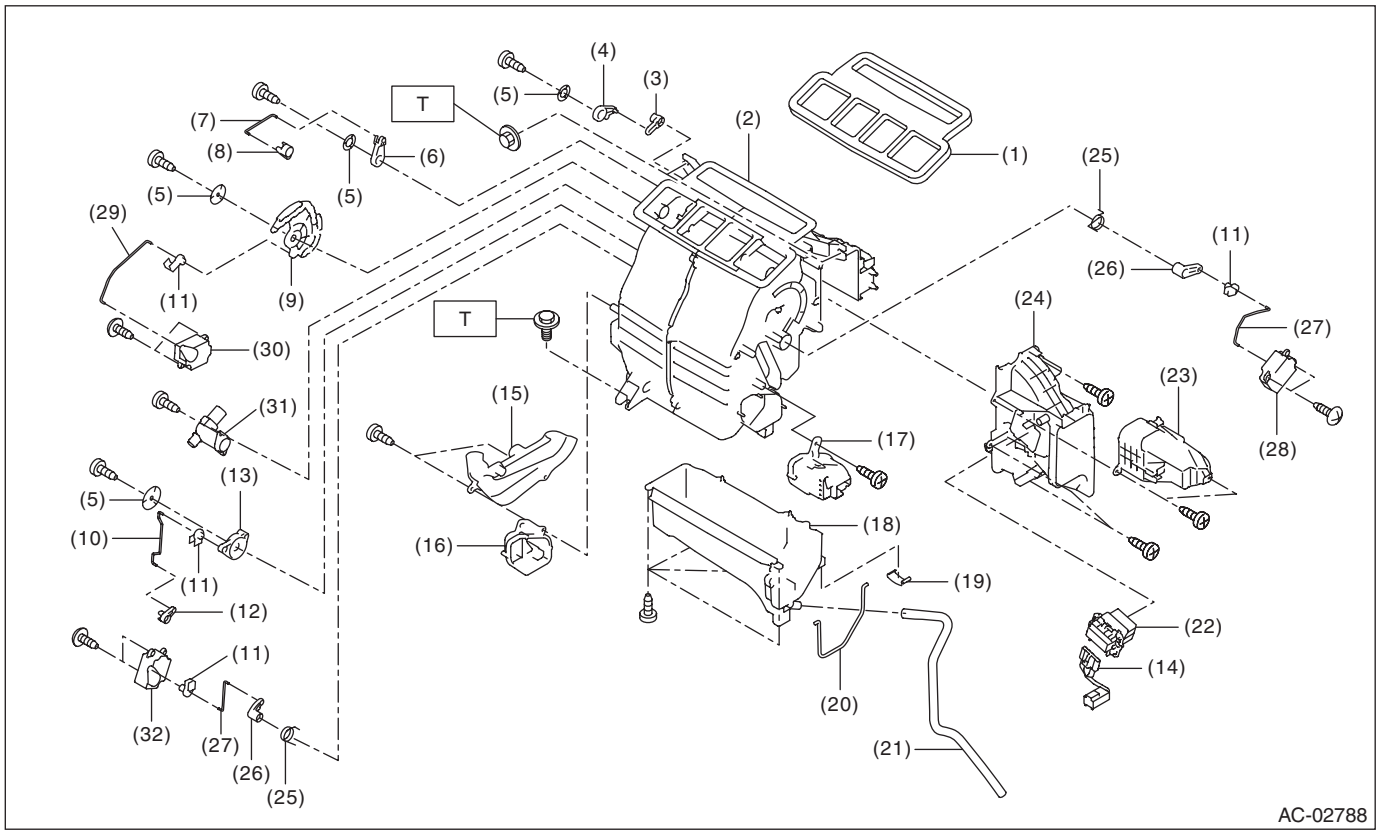
***Tightening torque: N·m (kgf-m, ft-lb)***
***T: 7.5 (0.76, 5.5)***

- Auto A/C model



(1) Pipe - inlet
(2) Pipe - outlet
(3) Clamp - pipe
(4) Seal O-ring
(5) Clamp
(6) Plate - heater core
(7) Packing - heater core
(8) Heater core
(9) Case - heater unit UPR LH
(10) Plate CTR
(11) Shutter - defroster
(12) Shutter - vent
(13) Shutter - air mix RH
(14) Shutter - air mix LH
(15) Guide - heater unit
(16) Shutter - foot
(17) Case - vent duct
(18) Case - heater unit UPR RH
(19) Thermostat - cooling
(20) Evaporator ASSY - cooling
(21) Packing - evaporator core
(22) Pipe - evaporator core
(23) Case - expansion valve
(24) Seal - cooling
(25) Packing - heater unit
(26) Expansion valve - cooling

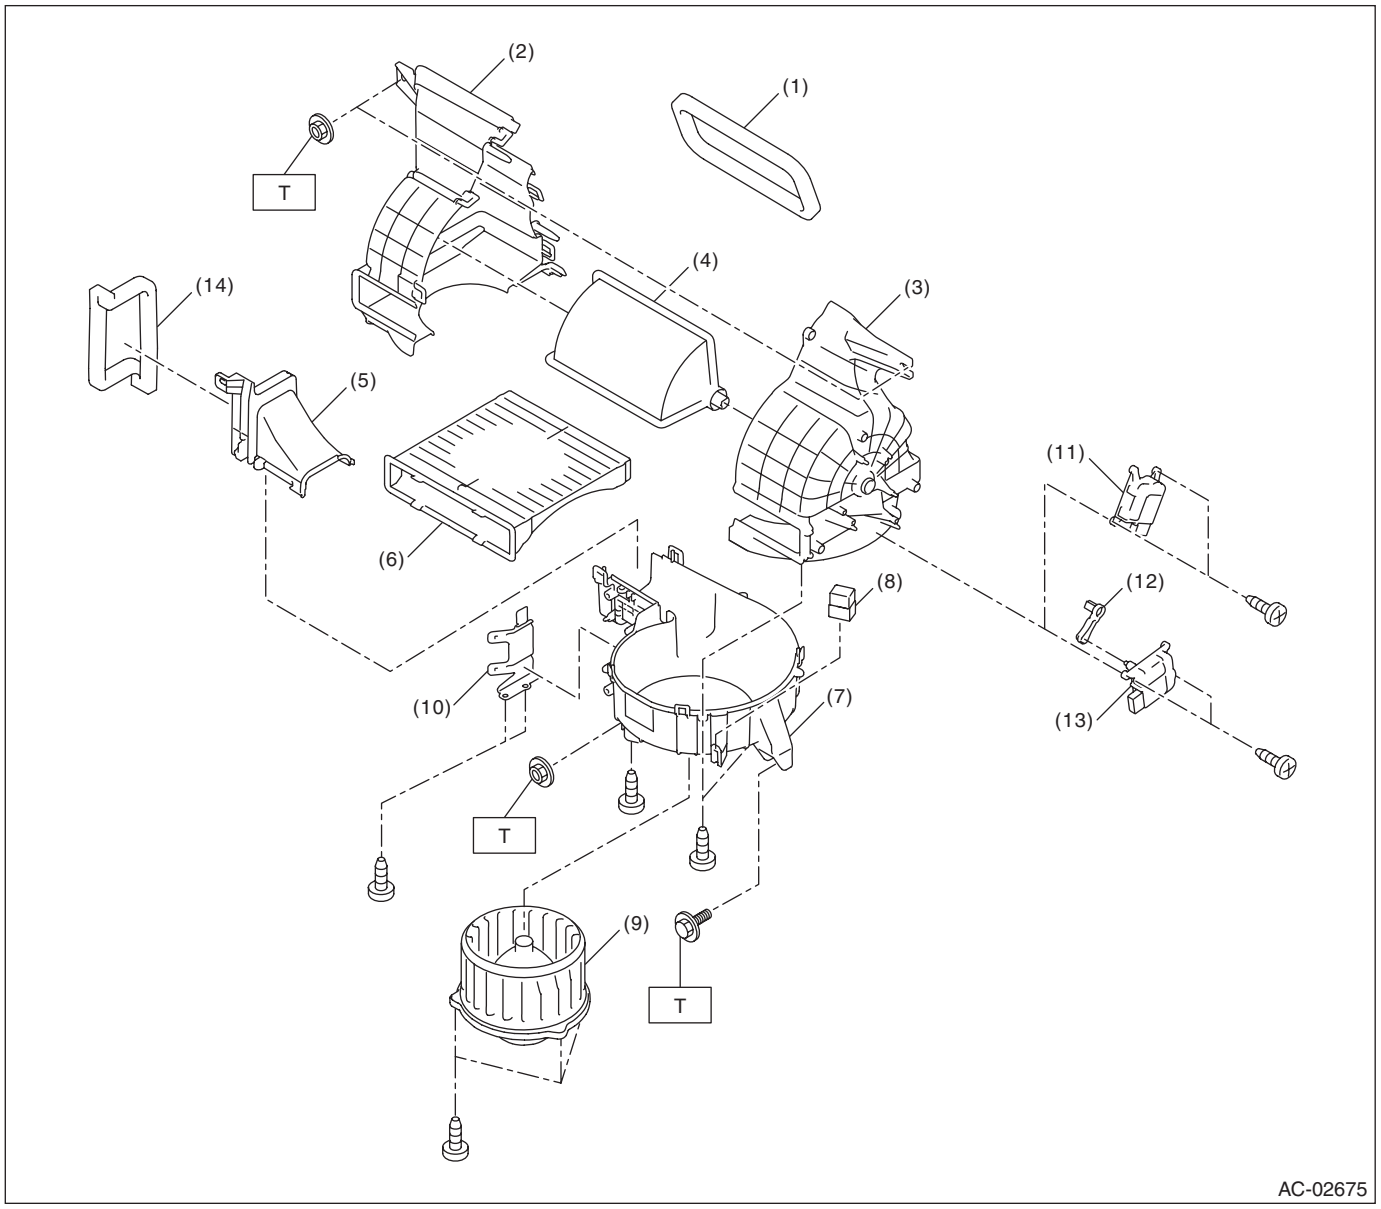
***Tightening torque: N·m (kgf-m, ft-lb)***
***T1: 5.0 (0.51, 3.7)***
***T2: 6.7 (0.68, 4.9)***



(1) Packing - heater unit
(2) Case - heater unit
(3) Lever - defroster
(4) Lever - defroster sub
(5) Washer - heater
(6) Lever - ventilator sub
(7) Rod - ventilator
(8) Lever - ventilator door
(9) Lever - mode
(10) Rod - foot
(11) Clip
(12) Lever - foot
(13) Lever - foot sub
(14) Harness - heater unit
(15) Cover - heater pipe
(16) Duct - foot LH
(17) Duct - foot RH
(18) Case - heater LWR
(19) Clip - case
(20) Packing - evaporator cover
(21) Hose - drain
(22) Power transistor
(23) Cover
(24) Cover - heater unit
(25) Spring - heater unit
(26) Lever - air mix
(27) Rod - air mix
(28) Motor - actuator mix RH
(29) Rod - mode
(30) Motor - actuator mode
(31) Aspirator - heater unit
(32) Motor - actuator mix LH (dual A/C model)

***Tightening torque: N·m (kgf-m, ft-lb)***
***T: 7.5 (0.76, 5.5)***

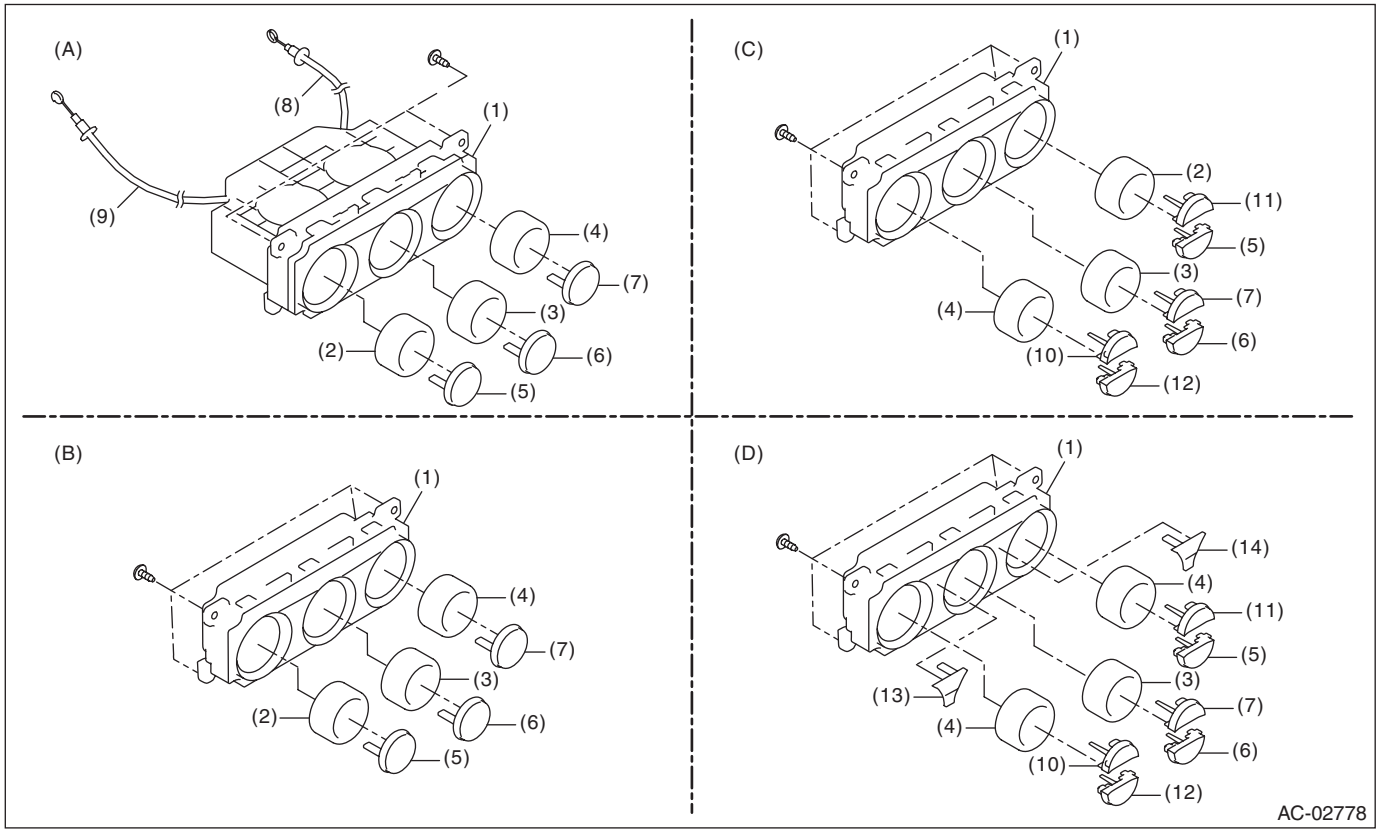
## 2. BLOWER MOTOR UNIT



(1) Packing - blower
(2) Case - blower intake LH
(3) Case - blower intake RH
(4) Shutter - blower
(5) Case upper - blower
(6) Filter kit
(7) Case lower - blower
(8) Blower motor relay
(9) Blower - motor
(10) Bracket
(11) Motor - actuator blower (auto A/C model)
(12) Lever
(13) Motor - actuator blower (manual A/C model)
(14) Packing

***Tightening torque: N·m (kgf-m, ft-lb)***
***T: 7.5 (0.76, 5.5)***

## 3. CONTROL PANEL



(A) Manual A/C model

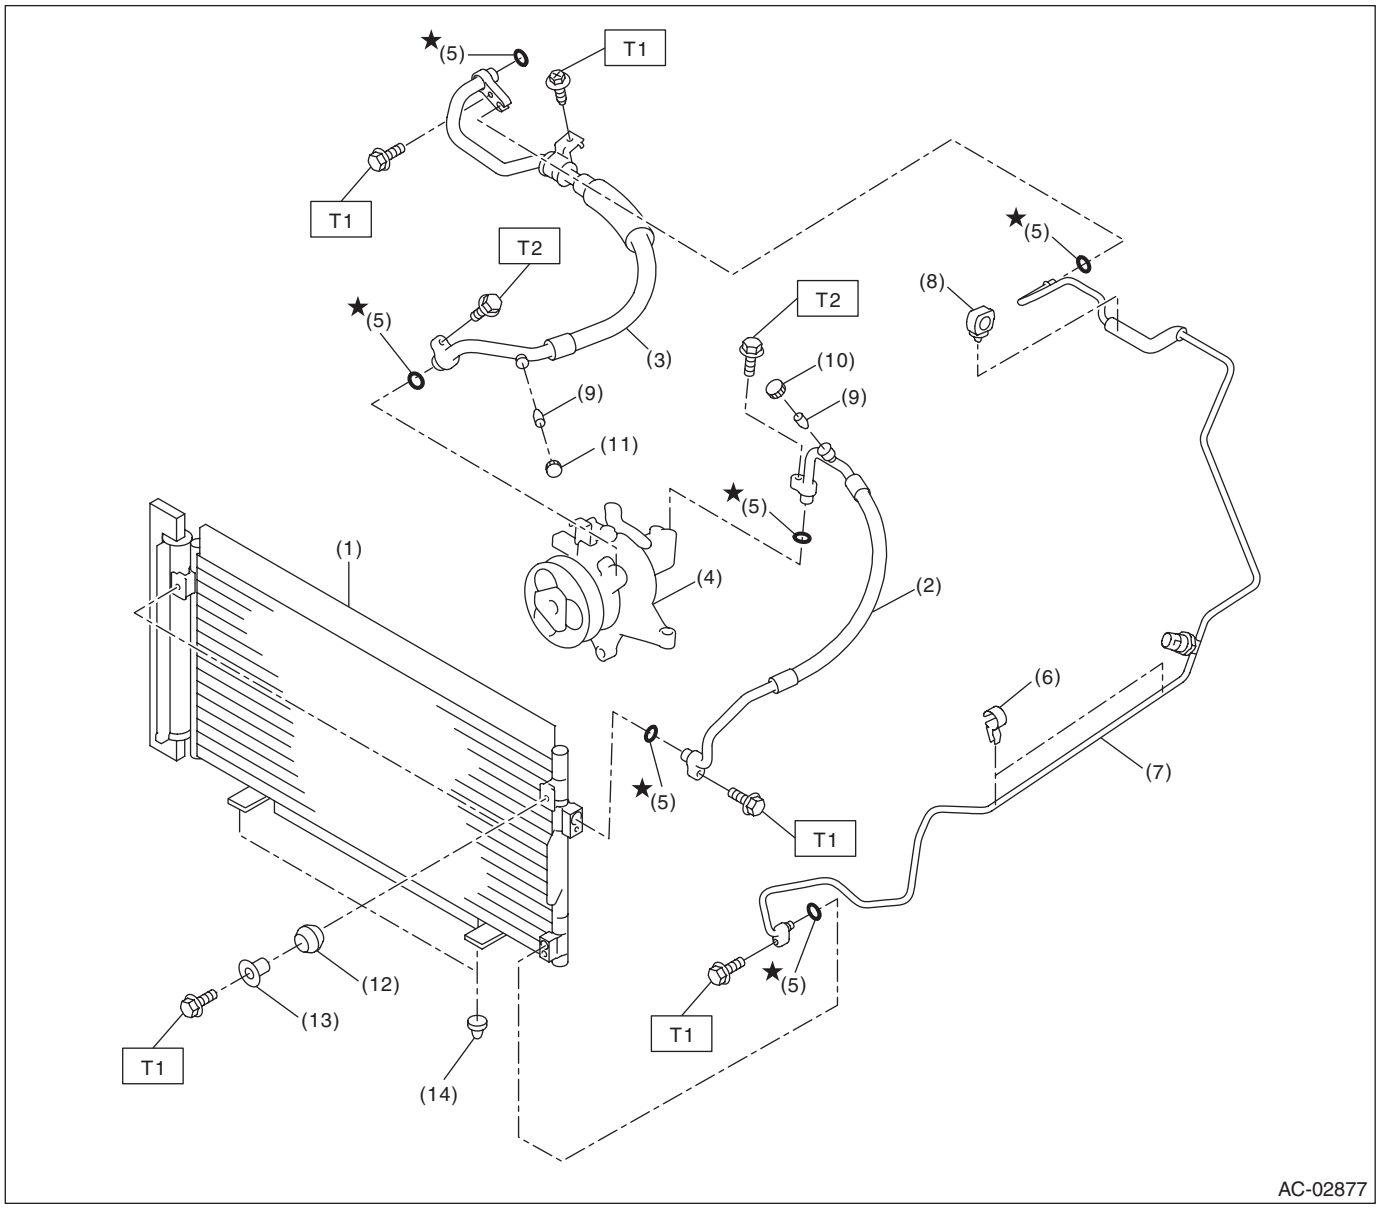
(B) Single auto A/C model (with standard MFD)

(C) Single auto A/C model (with high grade MFD)

(D) Dual auto A/C model

(1) Control case
(2) Air flow control dial
(3) Fan dial
(4) Temperature adjustment dial
(5) Rear window defogger switch
(6) FRESH/RECIRC switch
(7) A/C switch
(8) Temperature control cable
(9) Air flow control cable
(10) AUTO switch
(11) Defroster switch
(12) OFF switch
(13) Air flow control switch
(14) Dual switch

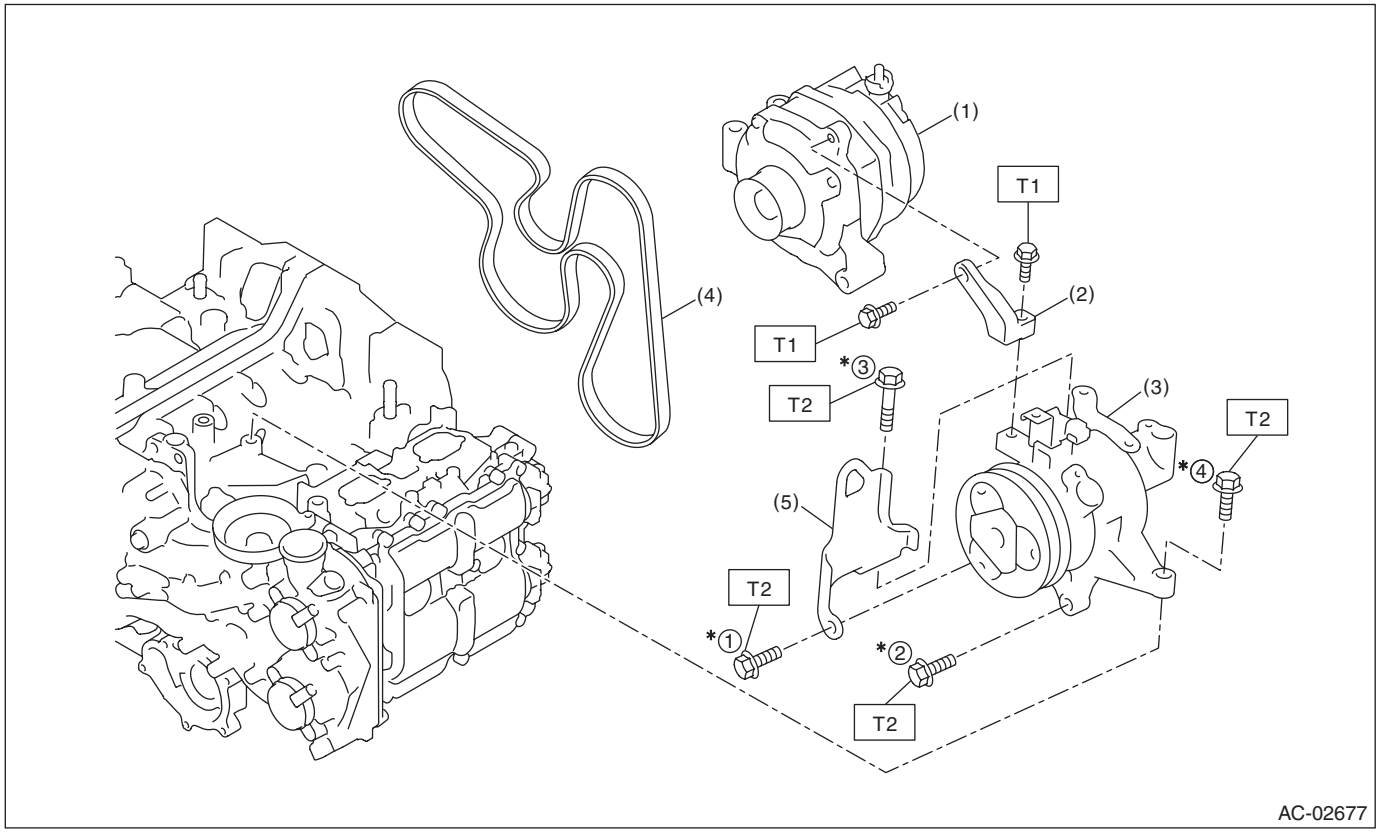
## 4. AIR CONDITIONING UNIT



(1) Condenser ASSY - air conditioner
(2) Hose - pressure discharge
(3) Hose - pressure suction
(4) Compressor ASSY
(5) Seal O-ring
(6) Clip - pipe
(7) Pipe - evaporator cooling
(8) Clip
(9) Valve - hose pressure
(10) Cap - hose pressure discharge
(11) Cap - hose pressure suction
(12) Grommet
(13) Spacer
(14) Bushing - condenser

***Tightening torque: N·m (kgf-m, ft-lb)***
***T1: 7.5 (0.76, 5.5)***
***T2: 10 (1.02, 7.4)***

## 5. COMPRESSOR

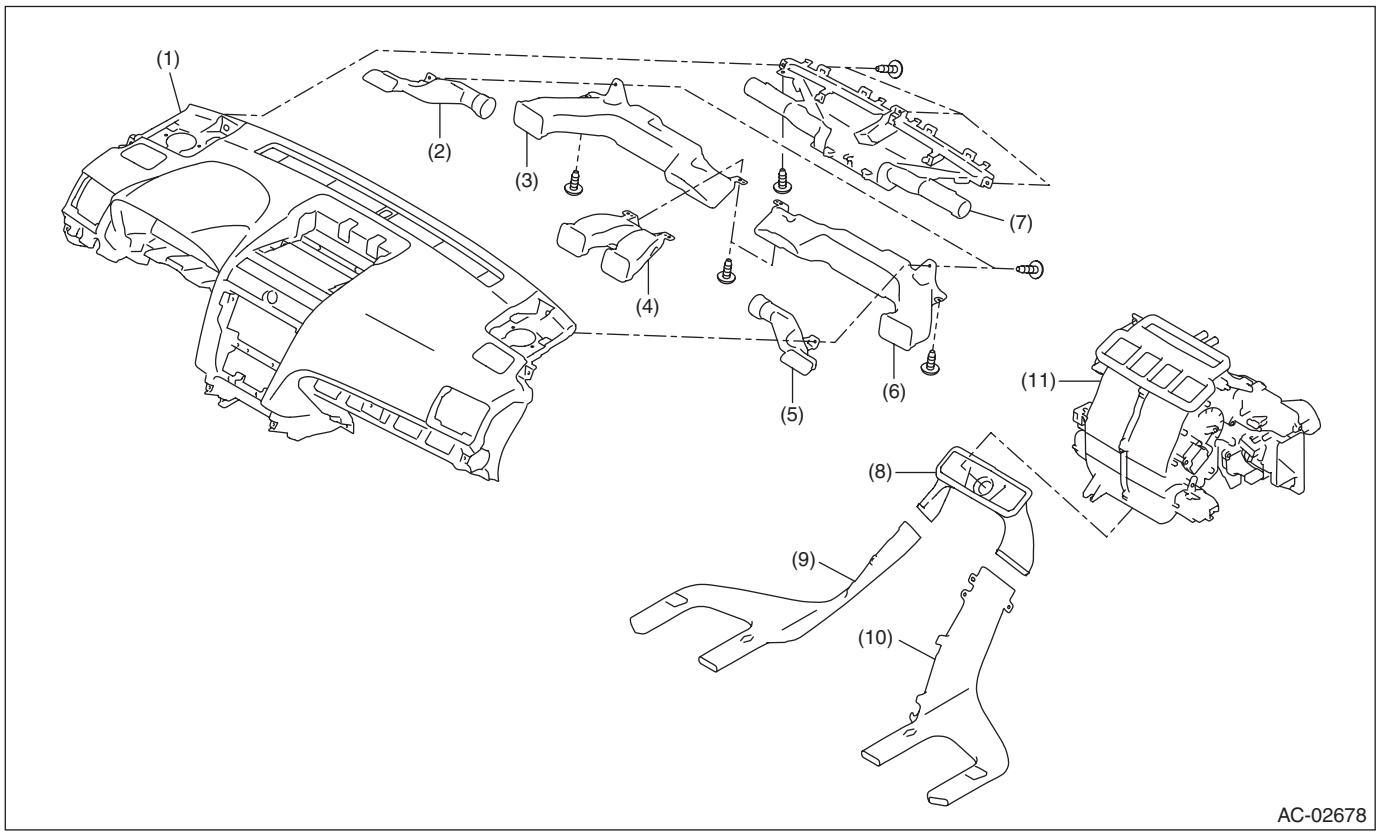


(1) Generator ASSY
(2) Bracket ASSY - compressor
(3) Compressor ASSY
(4) V-belt (6 PK)
(5) Hanger - engine front

* Tighten the compressor in the numerical order as shown in the figure.

***Tightening torque: N·m (kgf-m, ft-lb)***
***T1: 25 (2.55, 18.4)***
***T2: 36 (3.67, 26.6)***

## 6. HEATER DUCT



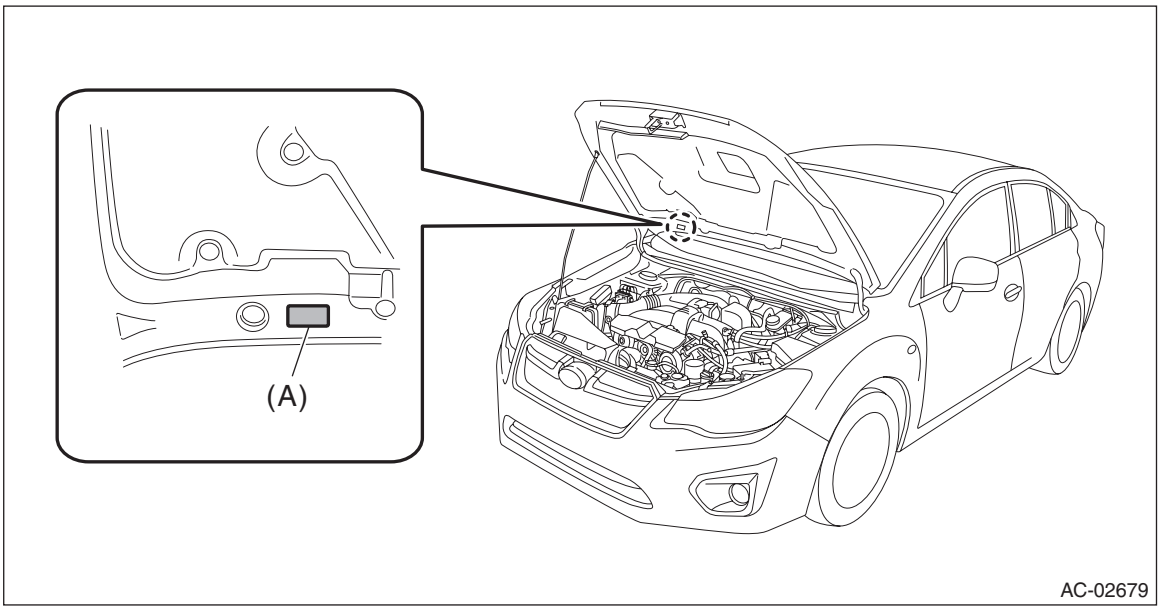
(1) Panel COMPL - instrument
(2) Duct - side defroster LH
(3) Duct - side ventilation LH
(4) Duct - center vent
(5) Duct - side defroster RH
(6) Duct - side ventilation RH
(7) Nozzle - front defroster
(8) Duct - rear heater CTR
(9) Duct - rear heater LH
(10) Duct - rear heater RH
(11) Heater and cooling unit ASSY

## D: CAUTION

• Before disassembling or reassembling parts, always disconnect the battery ground cable from battery. When replacing the radio, control module, and other parts provided with memory functions, record the memory contents before disconnecting the battery ground cable. Otherwise, the memory is cleared.
• Reassemble the parts in the reverse order of disassembly procedure unless otherwise indicated.
• Connect the connectors securely during reassembly.
• After reassembly, make sure that each component operates normally.

### 1. HFC-134A A/C SYSTEM

• The cooling system components for the HFC-134a system such as the refrigerant and compressor oil are different from the conventional CFC-12 system components and they are incompatible with each other.
• Vehicles with the HFC-134a system can be identified by the label (A) attached to the vehicle.
Before maintenance, check A/C system which is installed to the vehicle.



### 2. COMPRESSOR OIL

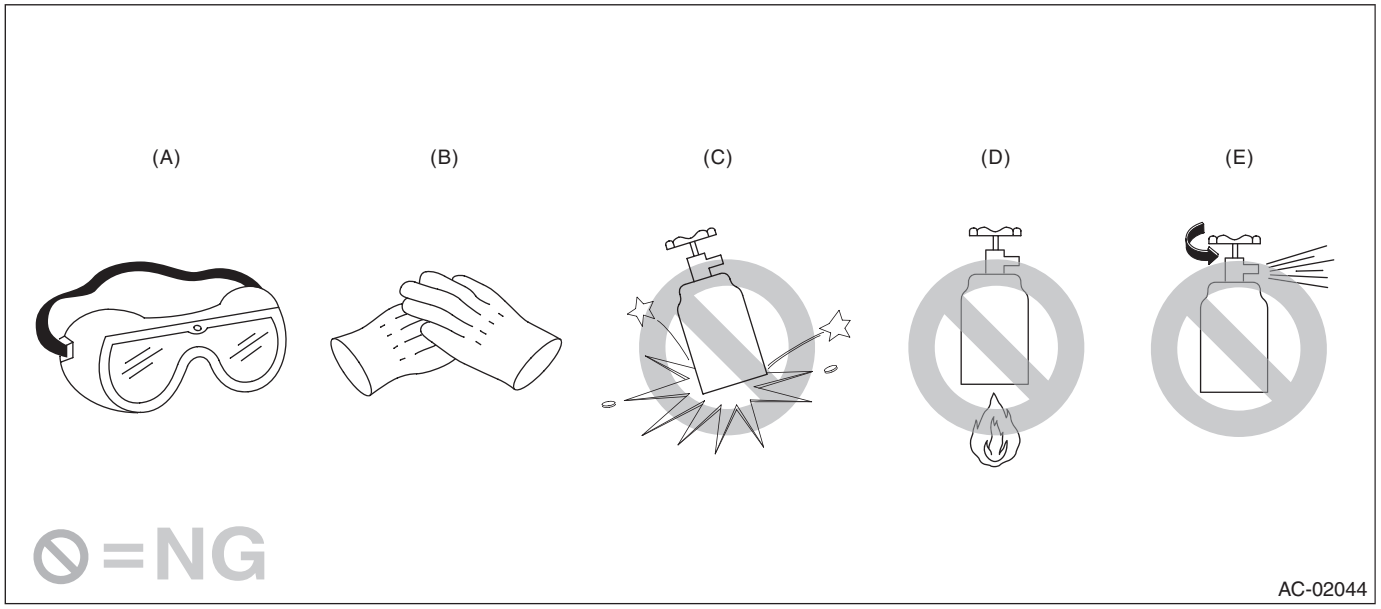
• HFC-134a compressor oil has no compatibility with that of CFC-12 system.
• Use only the manufacturer-authorized compressor oil for the HFC-134a system; only use DH-PR (ZXL200PG).
• Do not mix multiple compressor oils.
If CFC-12 compressor oil is used in the HFC-134a A/C system, the compressor may become stuck due to poor lubrication, or the refrigerant may leak due to swelling of rubber parts.
On the other hand, if HFC-134a compressor oil is used in a CFC-12 A/C system, the durability of the A/C system will be lowered.
• HFC-134a compressor oil is very hygroscopic. When replacing or installing/removing A/C parts, immediately isolate the oil from atmosphere using a plug or tape. In order to avoid moisture, store the oil in a container with its cap tightly closed.

### 3. REFRIGERANT

• CFC-12 refrigerant cannot be used in a HFC-134a A/C system. HFC-134a refrigerant, also cannot be used in a CFC-12 A/C system.
• If an incorrect or no refrigerant is used, it will result in poor lubrication and the compressor itself may be damaged.

## 4. HANDLING OF REFRIGERANT

• The refrigerant boils at approx. –30°C (–22°F). When handling it, be sure to wear protective goggles and protective gloves. Direct contact of the refrigerant with skin may cause frostbite.
If the refrigerant gets into your eye, avoid rubbing your eyes with your hands. Wash your eye with plenty of water, and receive medical treatment from an eye doctor.
• Do not heat a service can. If a service can is directly heated, or put into boiling water, the inside pressure will become extremely high. This may cause the can to explode. If a service can must be warmed up, use warm water of 40°C (104°F) or less.
• Do not drop or impact a service can. (Observe the precautions and operation procedure described on the refrigerant can.)
• When the engine is running, do not open the high-pressure valve of manifold gauge. The high-pressure gas will back-flow resulting in an explosion of the can.
• Provide good ventilation and do not work in a closed area.
• In order to prevent global warming, avoid releasing HFC-134a into the atmosphere. Using a refrigerant recovery system, discharge and recycle the gas.

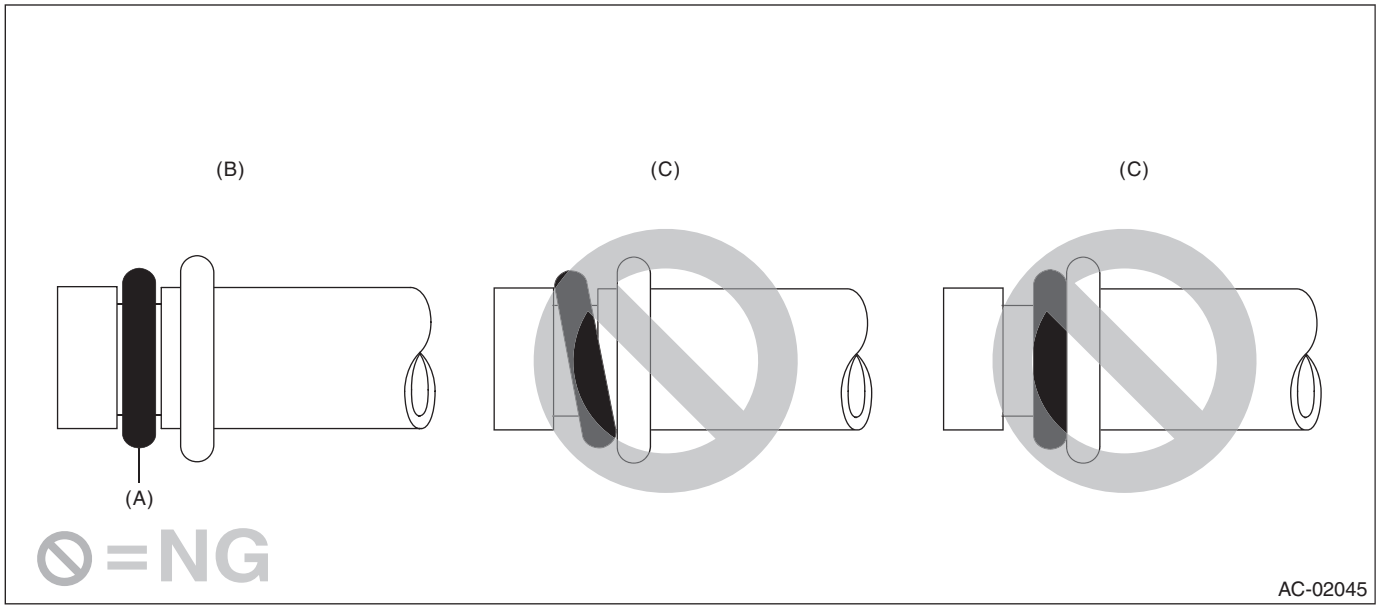


(A) Goggles
(B) Gloves
(C) Do not apply impact.
(D) No direct heat on container
(E) Do not discharge

## 5. O-RING CONNECTIONS

• Always use a new O-ring.
• In order to keep the O-rings free of lint which will cause a refrigerant gas leak, perform work without using gloves or waste cloths.
• Apply compressor oil to O-rings to avoid sticking, before installation.
• Use a torque wrench to tighten the O-ring fittings. Over-tightening will result in damage of the O-ring and deformation of the pipe end.
• If the work is interrupted before completing pipe connections, recap the pipes, components and fittings with a plug or tape to prevent foreign matter from entering.
• Visually check the surfaces and mating surfaces of O-rings, threads and connecting points. If a failure is found, replace the applicable parts.

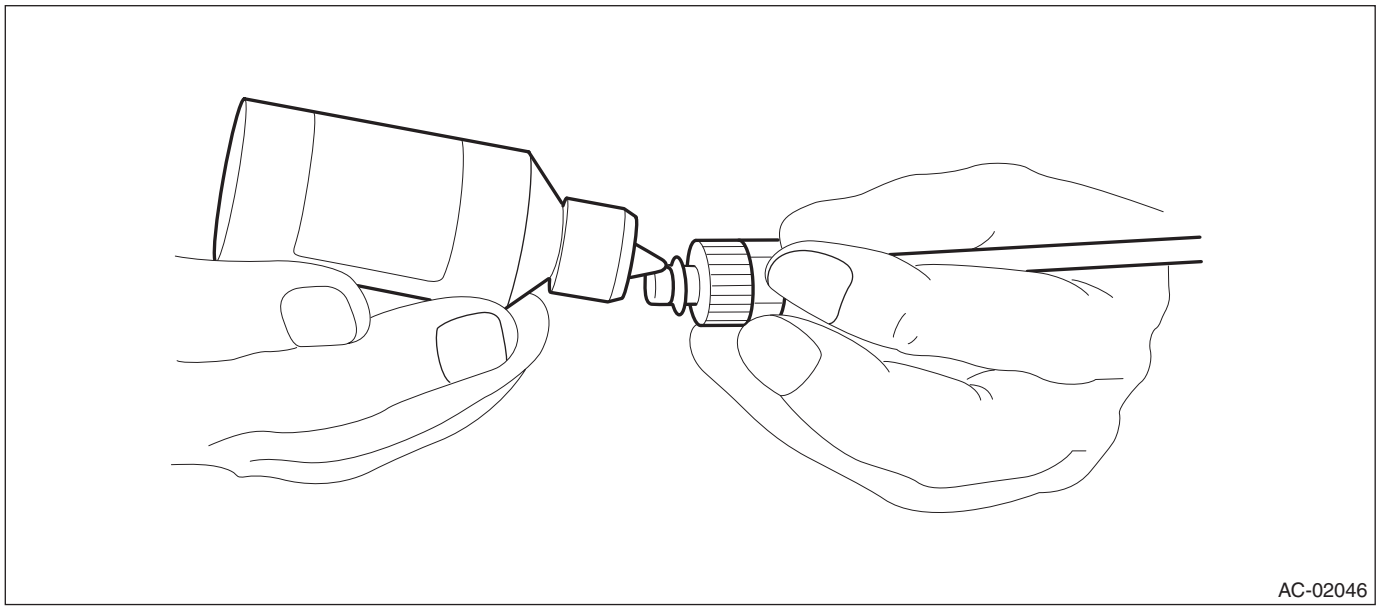
- Install the O-rings straight against the pipe groove.



(A) O-ring (B) OK (C) NG

- Use compressor oil specified in the service manual to lubricate the O-rings.

Apply oil to the top and sides of O-rings before installation.
Apply compressor oil to the pipe grooves.



- After tightening, use a clean cloth to remove excess compressor oil from the connections and any oil which may have run on the vehicle body or other parts.
- If any leakage is suspected after tightening, do not tighten the connections further, but disconnect the connections, remove the O-rings, and check the O-rings, threads, and connections.

# E: PREPARATION TOOL

## 1. SPECIAL TOOL

| ILLUSTRATION | TOOL NUMBER | DESCRIPTION | REMARKS |
|---|---|---|---|
|  ST1B022XU0 | 1B022XU0 | SUBARU SELECT MONITOR III KIT | Used for troubleshooting the electrical system.<br>NOTE:<br>For detailed operation procedures of SUBARU SELECT MONITOR III KIT, refer to “PC application help for Subaru Select Monitor”. |

## 2. GENERAL TOOL

**CAUTION:**
**When working on vehicles with a HFC-134a system, only use HFC-134a specified tools and parts. Do not mix CFC-12 tools and parts. If HFC-134a and CFC-12 refrigerant or compressor oil is mixed, it will result in poor lubrication and the compressor itself may be damaged.**
**In order to prevent the mixture of HFC-134a and CFC-12 parts and liquid, the type of tool and screw, and the replacement valves used are different. The gas leak detectors for the HFC-134a and CFC-12 systems must also not be interchanged.**

| | HFC-134a | CFC-12 |
|---|---|---|
| Tool & screw type | Millimeter size | Inch size |
| Valve type | Quick joint type | Screw-in type |

| Illustration | Tools and Equipment |
|---|---|

# 3. Refrigerant Pressure with Manifold Gauge Set

## A: PROCEDURE

### 1. REFRIGERANT GAS PRESSURE INSPECTION

***Preparation tool:***
***Manifold gauge set***
***Thermometer and hygrometer***

1) Prepare the vehicle.

NOTE:
Check that the ambient temperature is 25 — 40°C (77 — 104°F) and that the humidity is 30% — 80%.

- Place the vehicle in the shade and windless condition, and open the front hood.
- Open the front windows and close all doors.

2) Connect the manifold gauge set, and then check the refrigerant pressure.
(1) Connect the manifold gauge set, and start the engine.
(2) Set the vehicle to the following conditions.

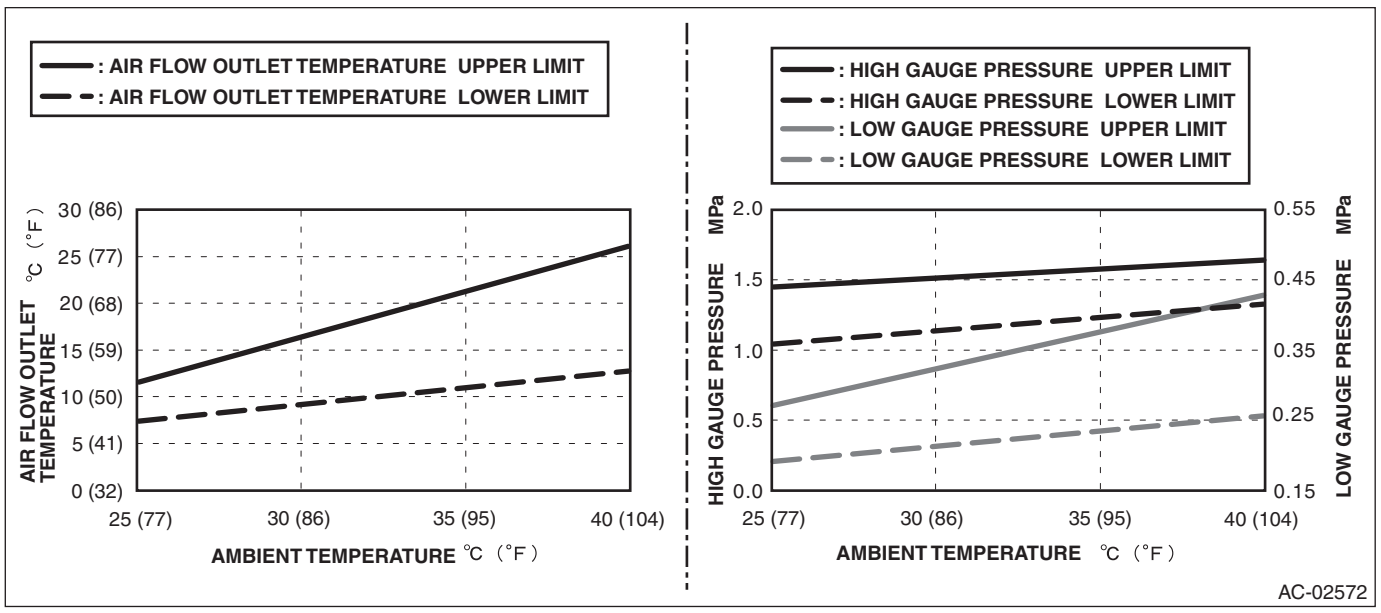
| Item | Condition |
|---|---|
| Engine | Warmed up (Engine coolant temperature indicator light: OFF) |
| Air vent grille | Shutter is fully open. |
| A/C switch | ON |
| Temperature adjustment dial | LO (MAX COOL) |
| FRESH/RECIRC switch | RECIRC |
| Air flow control dial or switch | VENT |
| Fan dial | Auto A/C model: 5/7 level |
| | Manual A/C model: 3/4 level |

(3) In the condition of step (2), idle the engine for 30 minutes.
(4) Read the gauge values on both high pressure side and low pressure side for manifold gauge.

3) Measure the air vent grille outlet opening temperature, ambient temperature and humidity.

NOTE:
For outlet opening temperature, measure the average temperature of center grille assembly and side grille assembly.

4) Check that the high and low pressures and outlet opening temperature for ambient temperature and humidity is within the standard value described in the chart below.



5) Refer to “DIAGNOSIS WITH SYMPTOM” if the inspection result is not within the standard value. <Ref. to AC-23, INSPECTION WITH PRESSURE SYMPTOMS, INSPECTION, Refrigerant Pressure with Manifold Gauge Set.>

# B: INSPECTION

## 1. INSPECTION WITH PRESSURE SYMPTOMS

| Symptoms | Reference |
|---|---|
| Both high and low pressure sides are low. | <Ref. to AC-23, BOTH HIGH AND LOW PRESSURE SIDES ARE LOW, INSPECTION, Refrigerant Pressure with Manifold Gauge Set.> |
| Both high and low pressure sides are high. | <Ref. to AC-23, BOTH HIGH AND LOW PRESSURE SIDES ARE HIGH, INSPECTION, Refrigerant Pressure with Manifold Gauge Set.> |
| Both high and low pressure sides are equal, or high-pressure side is low. | <Ref. to AC-24, BOTH HIGH AND LOW PRESSURE SIDES ARE EQUAL, OR HIGH-PRESSURE SIDE IS LOW, INSPECTION, Refrigerant Pressure with Manifold Gauge Set.> |
| High-pressure side is high. | <Ref. to AC-24, HIGH-PRESSURE SIDE IS HIGH, INSPECTION, Refrigerant Pressure with Manifold Gauge Set.> |
| Low-pressure side is low. | <Ref. to AC-25, LOW-PRESSURE SIDE IS LOW, INSPECTION, Refrigerant Pressure with Manifold Gauge Set.> |
| Low-pressure side is high. | <Ref. to AC-25, LOW-PRESSURE SIDE IS HIGH, INSPECTION, Refrigerant Pressure with Manifold Gauge Set.> |

## 2. BOTH HIGH AND LOW PRESSURE SIDES ARE LOW

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK REFRIGERANT LEAKAGE.**<br>Check the refrigerant for leakage. <Ref. to AC-30, INSPECTION, Refrigerant Leak Check.><br>NOTE:<br>When the pressure on the high-pressure side is less than 0.69 Mpa: Go to Step 2. | Are there any refrigerant leakage? | Repair the refrigerant leakage. | Go to step **2**. |
| 2 | **FILL PROPER AMOUNT OF REFRIGERANT.**<br>Drain the refrigerant completely, and then refill the proper amount of refrigerant.<br>• Recovery: <Ref. to AC-26, PROCEDURE, Refrigerant Recovery Procedure.><br>• Refill: <Ref. to AC-27, PROCEDURE, Refrigerant Charging Procedure.> | Is the refrigerant pressure within the specified range? | Refrigerant pressure is normal. | Perform appropriate inspection with pressure symptoms. |

## 3. BOTH HIGH AND LOW PRESSURE SIDES ARE HIGH

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 1 | **FILL PROPER AMOUNT OF REFRIGERANT.**<br>Drain the refrigerant completely, and then refill the proper amount of refrigerant.<br>• Recovery: <Ref. to AC-26, PROCEDURE, Refrigerant Recovery Procedure.><br>• Refill: <Ref. to AC-27, PROCEDURE, Refrigerant Charging Procedure.> | Is the refrigerant pressure within the specified range? | Refrigerant pressure is normal. | Perform appropriate inspection with pressure symptoms. |

## 4. BOTH HIGH AND LOW PRESSURE SIDES ARE EQUAL, OR HIGH-PRESSURE SIDE IS LOW

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK REFRIGERANT LEAKAGE.**<br>Check the refrigerant for leakage. <Ref. to AC-30, INSPECTION, Refrigerant Leak Check.><br>NOTE:<br>When the pressure on the high-pressure side is less than 0.69 Mpa: Go to Step 2. | Are there any refrigerant leakage? | Repair the refrigerant leakage. | Go to step **2**. |
| 2 | **FILL PROPER AMOUNT OF REFRIGERANT.**<br>Drain the refrigerant completely, and then refill the proper amount of refrigerant.<br>• Recovery: <Ref. to AC-26, PROCEDURE, Refrigerant Recovery Procedure.><br>• Refill: <Ref. to AC-27, PROCEDURE, Refrigerant Charging Procedure.> | Is the refrigerant pressure within the specified range? | Refrigerant pressure is normal. | Inspect the compressor. <Ref. to AC(diag)-34, COOL AIR DOES NOT COME OUT WHEN PRESSING THE A/C SWITCH. FOG CANNOT BE CLEARED. (COMPRESSOR DOES NOT OPERATE.), DIAGNOSTIC PROCEDURE WITH PHENOMENON, Diagnostics with Phenomenon.> |

## 5. HIGH-PRESSURE SIDE IS HIGH

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK CONDENSER.**<br>Check the condenser. <Ref. to AC-58, INSPECTION, Condenser.> | Is condenser normal? | Go to step **2**. | Clean or replace the condenser. |
| 2 | **CHECK RADIATOR FAN.**<br>Check the radiator fan system. <Ref. to CO(H4DO)-7, Radiator Fan System.> | Is radiator fan system normal? | Go to step **3**. | Repair or replace the faulty parts of the radiator fan system. |
| 3 | **FILL PROPER AMOUNT OF REFRIGERANT.**<br>Drain the refrigerant completely, and then refill the proper amount of refrigerant.<br>• Recovery: <Ref. to AC-26, PROCEDURE, Refrigerant Recovery Procedure.><br>• Refill: <Ref. to AC-27, PROCEDURE, Refrigerant Charging Procedure.> | Is the refrigerant pressure within the specified range? | Refrigerant pressure is normal. | Check the high-pressure hose and condenser for deformation or clogging, and replace if defective. |

## 6. LOW-PRESSURE SIDE IS LOW

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK REFRIGERANT LEAKAGE.**<br>Check the refrigerant for leakage. <Ref. to AC-30, INSPECTION, Refrigerant Leak Check.><br>NOTE:<br>When the pressure on the high-pressure side is less than 0.69 Mpa: Go to Step 2. | Are there any refrigerant leakage? | Repair the refrigerant leakage. | Go to step **2**. |
| 2 | **FILL PROPER AMOUNT OF REFRIGERANT.**<br>Drain the refrigerant completely, and then refill the proper amount of refrigerant.<br>• Recovery: <Ref. to AC-26, PROCEDURE, Refrigerant Recovery Procedure.><br>• Refill: <Ref. to AC-27, PROCEDURE, Refrigerant Charging Procedure.> | Is the refrigerant pressure within the specified range? | Refrigerant pressure is normal. | Go to step **3**. |
| 3 | **REPLACE EXPANSION VALVE.**<br>Replace the expansion valve. <Ref. to AC-69, REMOVAL, Expansion Valve.> | Is the refrigerant pressure within the specified range? | Refrigerant pressure is normal. | Inspect the compressor. <Ref. to AC(diag)-34, COOL AIR DOES NOT COME OUT WHEN PRESSING THE A/C SWITCH. FOG CANNOT BE CLEARED. (COMPRESSOR DOES NOT OPERATE.), DIAGNOSTIC PROCEDURE WITH PHENOMENON, Diagnostics with Phenomenon.> |

## 7. LOW-PRESSURE SIDE IS HIGH

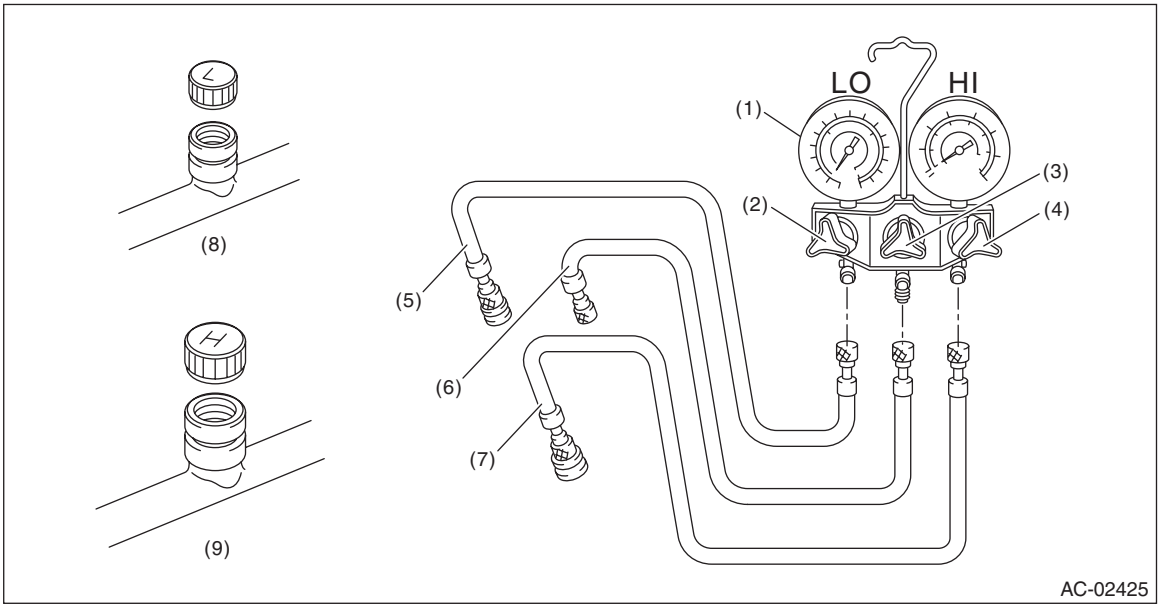
| | Step | Check | Yes | No |
|---|---|---|---|---|
| 1 | **FILL PROPER AMOUNT OF REFRIGERANT.**<br>Drain the refrigerant completely, and then refill the proper amount of refrigerant.<br>• Recovery: <Ref. to AC-26, PROCEDURE, Refrigerant Recovery Procedure.><br>• Refill: <Ref. to AC-27, PROCEDURE, Refrigerant Charging Procedure.> | Is the refrigerant pressure within the specified range? | Refrigerant pressure is normal. | Go to step **2**. |
| 2 | **REPLACE EXPANSION VALVE.**<br>Replace the expansion valve. <Ref. to AC-69, REMOVAL, Expansion Valve.> | Is the refrigerant pressure within the specified range? | Refrigerant pressure is normal. | Replace the evaporator. <Ref. to AC-63, REMOVAL, Evaporator.> |

# 4. Refrigerant Recovery Procedure

## A: PROCEDURE

***PREPARATION TOOL:***
***Manifold gauge set***
***Refrigerant recovery system***

**CAUTION:**
**• During operation, be sure to wear protective goggles and protective gloves.**
**• Connect the refrigerant recovery system with the manifold gauge set to discharge the refrigerant from the A/C system and recycle the gas.**
**• When recycling the discharged refrigerant, keep service cans on hand. Because the recovery rate with the recovery system is approx. 90%, service cans are necessary to charge the refrigerant.**
**• Follow the detailed operation procedure described in the operation manual attached to the refrigerant recovery system.**



| | | | | | |
|---|---|---|---|---|---|
| (1) | Manifold gauge | (4) | High pressure valve | (7) | High-pressure hose (high-pressure) |
| (2) | Low pressure valve | (5) | Low-pressure hose (low-pressure) | (8) | Low-pressure side service port |
| (3) | Center valve | (6) | Center manifold hose (vacuum pump and charge) | (9) | High-pressure side service port |

1) Perform compressor oil return operation. <Ref. to AC-34, PROCEDURE, Compressor Oil.>
2) Stop the engine.
3) Attach the manifold gauge set.
   (1) Confirm that all valves are fully closed.
   (2) Install the low/high pressure hoses to the service ports on the low/high pressure sides of the vehicle respectively.

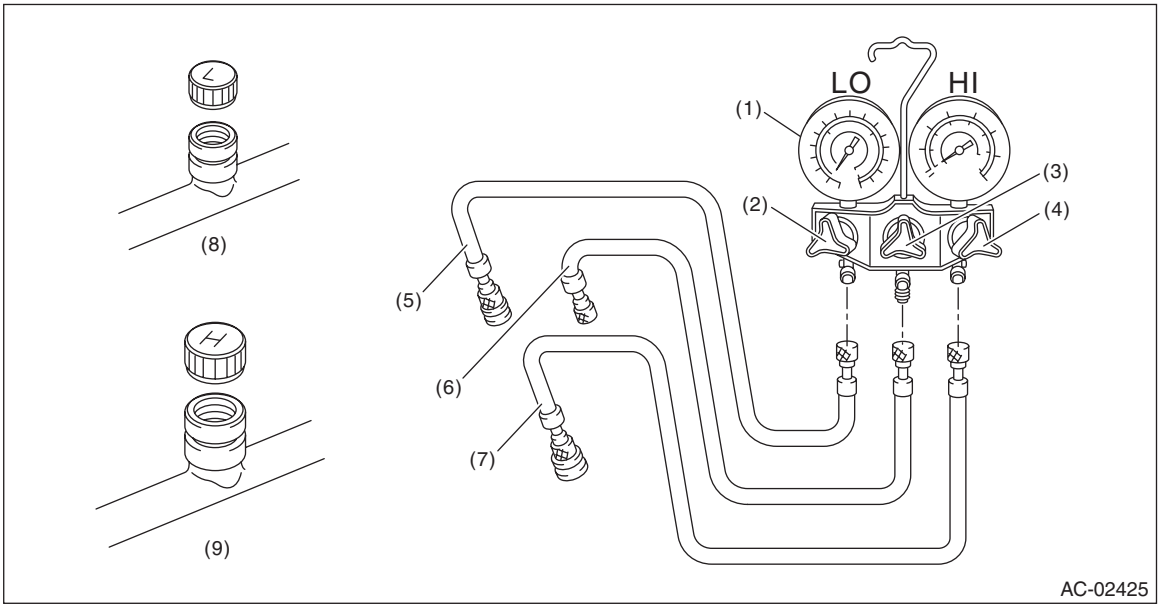
**CAUTION:**
**Confirm that the connections are secure.**
   (3) Connect the center hose to the refrigerant recovery system.
4) Follow the operation manual attached to the refrigerant recovery system to recover the refrigerant.

# 5. Refrigerant Charging Procedure

## A: PROCEDURE

***Preparation tool:***
***Manifold gauge set***
***Vacuum pump***
***Can tap***
***Weight scale***

**CAUTION:**
**• While working, be sure to wear protective goggles and protective gloves.**
**• Air in the cycle can cause insufficient air conditioning, and water in the cycle can cause clogging in the cycle (icing) and rust. To remove this air and water content, use a vacuum pump to perform evacuation before filling with refrigerant. By making the inside of the cycle a vacuum, the water content will evaporate even at normal temperatures, and can be removed.**



| | | | | | |
|---|---|---|---|---|---|
| (1) | Manifold gauge | (4) | High pressure valve | (7) | High-pressure hose |
| (2) | Low pressure valve | (5) | Low-pressure hose | (8) | Low-pressure side service port |
| (3) | Center valve | (6) | Center manifold hose (vacuum pump and charge) | (9) | High-pressure side service port |

1) Attach the manifold gauge set.
(1) Check that all valves are fully closed.
(2) Install the low/high pressure hoses to the service ports on the low/high pressure sides of the vehicle respectively.

**CAUTION:**
**Confirm that the connections are secure.**
(3) Connect the center manifold hose of the manifold gauge to the vacuum pump.

2) Perform evacuation.

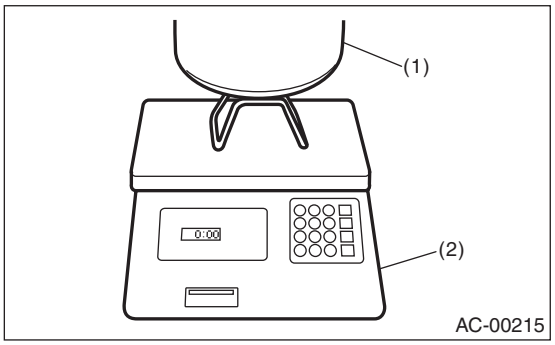
**CAUTION:**
**Make sure to perform evacuation using a vacuum pump.**

(1) Open the low-pressure valve, high-pressure valve and center valve.
(2) Operate the vacuum pump.
(3) Perform evacuation for 5 minutes or more, and when the low pressure gauge needle reaches -0.1 MPa (-1.0 kgf/cm$^2$, -14 psi), close the center manifold hose valve, and stop the vacuum pump.
(4) Leave alone for 5 to 10 minutes after closing the low pressure side and high pressure side valves, and check whether there is any change in the low pressure gauge needle indication.
If the needle position changes, this indicates a leak. Check the pipe and hose connections, and repair the location with the problem.
After repair, retry charging the refrigerant from the step 1).
(5) If there is no leakage, continue evacuation for additional 20 — 30 minutes, close all valves and then stop the vacuum pump.

3) Charge refrigerant.

(1) Follow the can tap operation manual to attach it to the refrigerant can.
(2) Disconnect the center manifold hose from the vacuum pump, and connect the hose to the tap valve.

NOTE:
When 13.6 kg (30 lb) refrigerant container (1) is used, measure the amount of refrigerant with a refrigerant charging scale (2), and connect with the center manifold hose.



(3) Open the tap valve of HFC-134a supply container (refrigerant can or refrigerant container).
(4) Loosen the center manifold hose connection on the manifold gauge for a few seconds (if there is a purge valve on the manifold gauge, push this instead) to allow the air in the center manifold hose to be bled by the refrigerant pressure.
(5) Open the low-pressure side and high-pressure side valves of the manifold gauge to fill with refrigerant.

NOTE:
If the HFC-134a supply container is empty, close all manifold gauge valves and the tap valve of HFC-134a supply container, and replace the empty supply container with a new one. After replacing with a new HFC-134a supply container, perform air purge, and resume the filling operation.

(6) If the low pressure gauge indicates approximately 0.2 MPa (2.0 kgf/cm$^2$, 29 psi) or refrigerant filling efficiency drops, close the low-pressure side valve and high-pressure side valve.
(7) Check that the low-pressure side valve and high-pressure side valve are closed, turn off the A/C switch and start the engine.

**CAUTION:**
**When filling with the engine running, do not open the high pressure side valve. Always fill from the low pressure side.**

(8) To prevent damage to the compressor, push the A/C switch ON-OFF quickly a few times.

(9) Set the vehicle to the following conditions.

| Item | Condition |
|---|---|
| Engine speed | 1,500 rpm |
| A/C switch | ON |
| Temperature adjustment dial | LO (MAX COOL) |
| Fan dial | HI (MAX) |
| FRESH/RECIRC switch | RECIRC |
| Air flow control dial or switch | VENT |
| WINDOW | OPEN |

(10) Open the low-pressure side valve, check the refrigerant pressure with a manifold gauge and fill with refrigerant up to the specified amount. <Ref. to AC-23, INSPECTION WITH PRESSURE SYMPTOMS, INSPECTION, Refrigerant Pressure with Manifold Gauge Set.>

4) Using an electronic leak detector (leak tester), check for refrigerant leaks in the system. <Ref. to AC-30, INSPECTION, Refrigerant Leak Check.>

5) After filling with refrigerant, close all valves and remove the manifold gauge set.

6) Attach cap to the service port of the low-pressure side and high-pressure side.

# 6. Refrigerant Leak Check

## A: INSPECTION

***PREPARATION TOOL:***
***Manifold gauge set***
***Electronic leak detector***

1) Attach the manifold gauge set.
   (1) Confirm that all valves are fully closed.
   (2) Install the low/high pressure hoses to the service ports on the low/high pressure sides of the vehicle respectively.

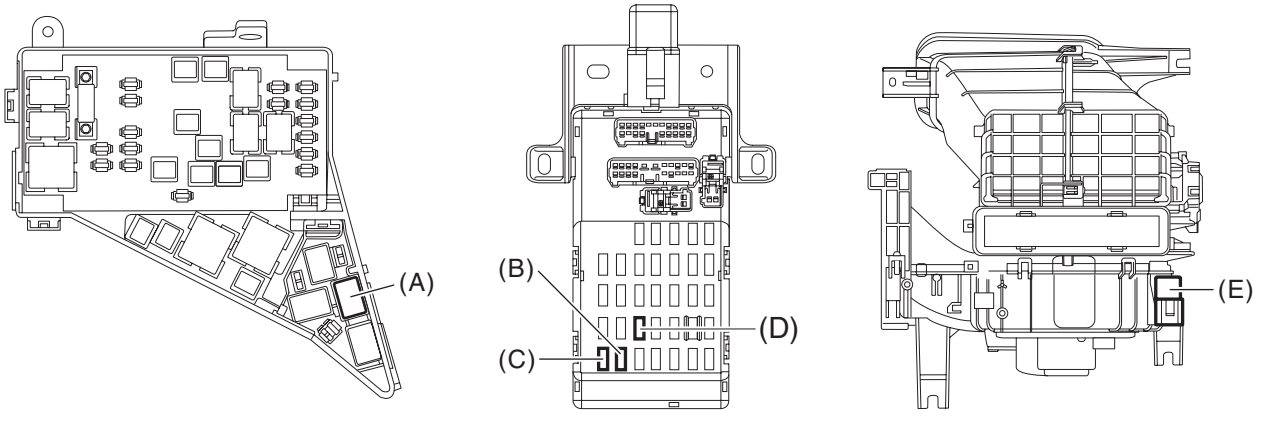
**CAUTION:**
**Confirm that the connections are secure.**

   (3) Start the engine to operate the A/C system for approx. 10 minutes, and check that the high-pressure side shows at least 0.69 MPa (7.0 kgf/cm$^2$, 100 psi).
2) Stop the engine to start the leak test.

| Inspection parts | Condition | Corrective action |
|---|---|---|
| Pipe | Check the connection between pipe and expansion valve. | Check the O-ring and tightening torque on the connection. If necessary, replace each part. |
| | Check the connection between pressure switch or pressure sensor and high-pressure pipe. | Replace the pressure switch or pressure sensor. |
| | Check the connection between pipe and condenser. | Check the O-ring and tightening torque on the connection. If necessary, replace each part. |
| Condenser | Check the welded spot of condenser and the core. | Replace the condenser. |
| Hose (high-pressure) | Check the connection between hose (high-pressure) and compressor. | Check the O-ring and tightening torque on the connection. If necessary, replace each part. |
| | Check the connection between hose (high-pressure) and condenser. | Check the O-ring and tightening torque on the connection. If necessary, replace each part. |
| | Check the rubber part of the flexible hose and the seam between hose and pipe.<br>**CAUTION:**<br>**Carefully check the external surface of flexible hose and pipe at approx. 25 mm (0.98 in) per second.** | Replace the hose (high-pressure). |
| | Check the valve and cap in the service port. | Check the rubber seal of the valve and cap. If necessary, replace valve or cap. |
| Compressor | Check the compressor pulley and the vicinity of shaft seal.<br>**CAUTION:**<br>**Some shaft seals will show a slight amount of leakage, about 3 g (0.1 oz) per year. This is not a problem.** | Replace the compressor. |
| Hose (low-pressure) | Check the connection between hose (low-pressure) and expansion valve. | Check the O-ring and tightening torque on the connection. If necessary, replace each part. |
| | Check the connection between hose (low-pressure) and compressor. | Check the O-ring and tightening torque on the connection. If necessary, replace each part. |
| | Check the rubber part of the flexible hose and the seam between hose and pipe.<br>**CAUTION:**<br>**Carefully check the external surface of flexible hose and pipe at approx. 25 mm (0.98 in) per second.** | Replace the hose (low-pressure). |
| | Check the valve and cap in the service port. | Check the rubber seal of the valve and cap. If necessary, replace valve or cap. |
| Evaporator | Remove the drain hose from the heater case, and check the end portion for 10 seconds or more. | Replace the evaporator. |
| | Check the air vent grille.<br>NOTE:<br>Turn the ignition switch to ON, and run the blower at high speed for approx. 1 minute. Stop the blower to check the air vent grille on the instrument panel. While moving the tester closer to the grille, run the blower for 1 or 2 seconds, then stop it. Check the grille at that position for at least 10 seconds. | Replace the evaporator. |

# 7. Relay and Fuse

## A: LOCATION



| | | |
|---|---|---|
| Main fuse box | A/C relay | (A) |
| Relay & fuse box | Fuse 15 A (blower motor relay) | (B) |
| | Fuse 15 A (blower motor relay) | (C) |
| | Fuse 10 A (A/C control panel) | (D) |
| Blower motor unit | Blower motor relay | (E) |

NOTE:
For other related fuses, refer to the wiring diagram. <Ref. to WI-15, Power Supply Circuit.>

# B: INSPECTION

## 1. CHECK FUSE

1) Remove the fuse and inspect visually.
2) If the fuse is blown out, replace the fuse.

NOTE:
If the fuse is blown again, check the system wiring harness.

## 2. CHECK RELAY

1) Check the resistance between relay terminals.
- A/C relay

| Terminal No. | Inspection conditions | Standard | Circuit |
|---|---|---|---|
| 1 — 2 | Always | 1 MΩ or more |  LI-01273 |
| 1 — 2 | Apply battery voltage between terminals 4 and 3. | Less than 1 Ω | |

- Blower motor relay

| Terminal No. | Inspection conditions | Standard | Circuit |
|---|---|---|---|
| 1 — 4 | Always | 1 MΩ or more |  AC-02796 |
| 1 — 4 | Apply battery voltage between terminals 2 and 3. | Less than 1 Ω | |

2) Replace the relay if the inspection result is not within the standard.

# 8. Compressor Oil

## A: PROCEDURE

NOTE:
Before making repairs, perform the oil return operation to return the compressor oil in circulation with the refrigerant to the compressor assembly.
1) Increase the engine to 1,500 rpm.
2) Turn the A/C switch to ON.
3) Turn the temperature control dial to LO (MAX COOL).
4) Turn the FRESH/RECIRC switch to RECIRC position.
5) Turn the fan dial to HI (MAX).
6) Leave in this condition for 10 minutes.

## B: ADJUSTMENT

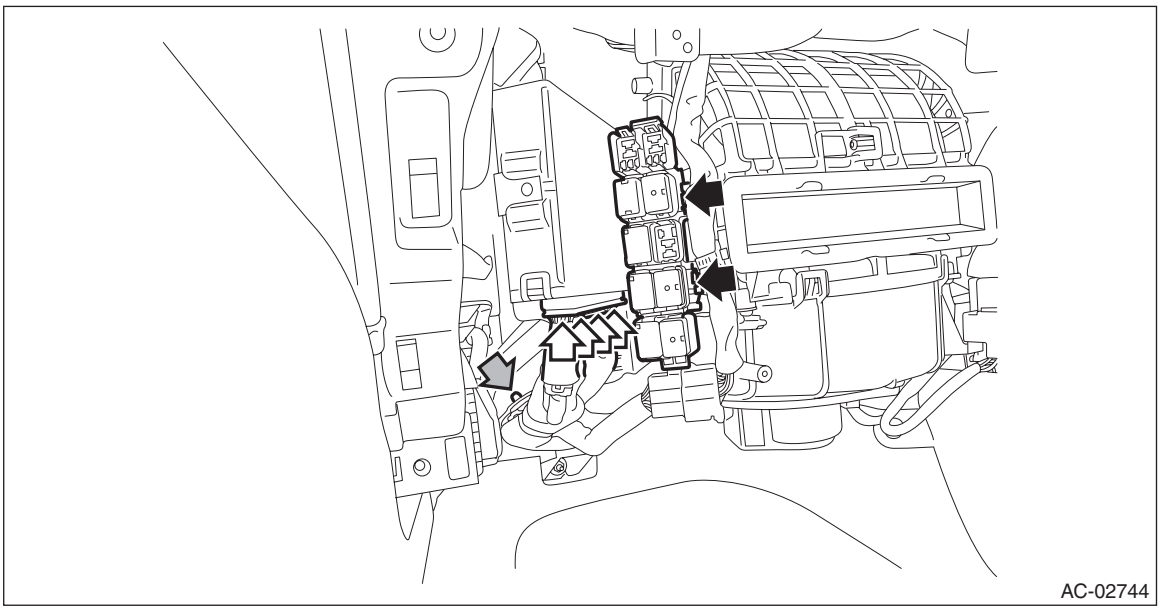
• If a component has been replaced, add an appropriate amount of compressor oil (same as the amount of remaining oil in removed component).
• When replacing the compressor assembly, the new compressor assembly will already have the specified amount of oil in it. Adjust the oil amount (so that the amount remains the same as that of the removed compressor assembly) and install the new compressor assembly.

NOTE:
Since the hygroscopicity of compressor oil is high, perform this series of works quickly.

# 9. Blower Motor Unit Assembly

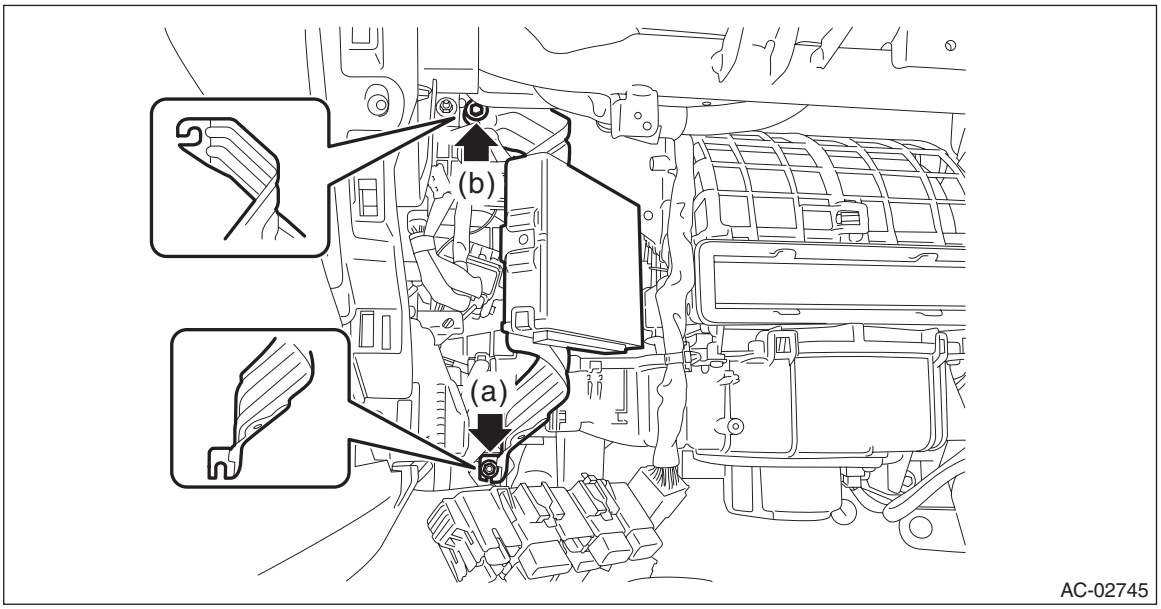
## A: REMOVAL

1) Disconnect the ground cable from battery.
2) Remove the glove box. <Ref. to EI-67, REMOVAL, Glove Box.>
3) Remove the engine control module (ECM).
   (1) Release the lock and remove the relay holder.
   (2) Remove the harness clip, and disconnect the connector.



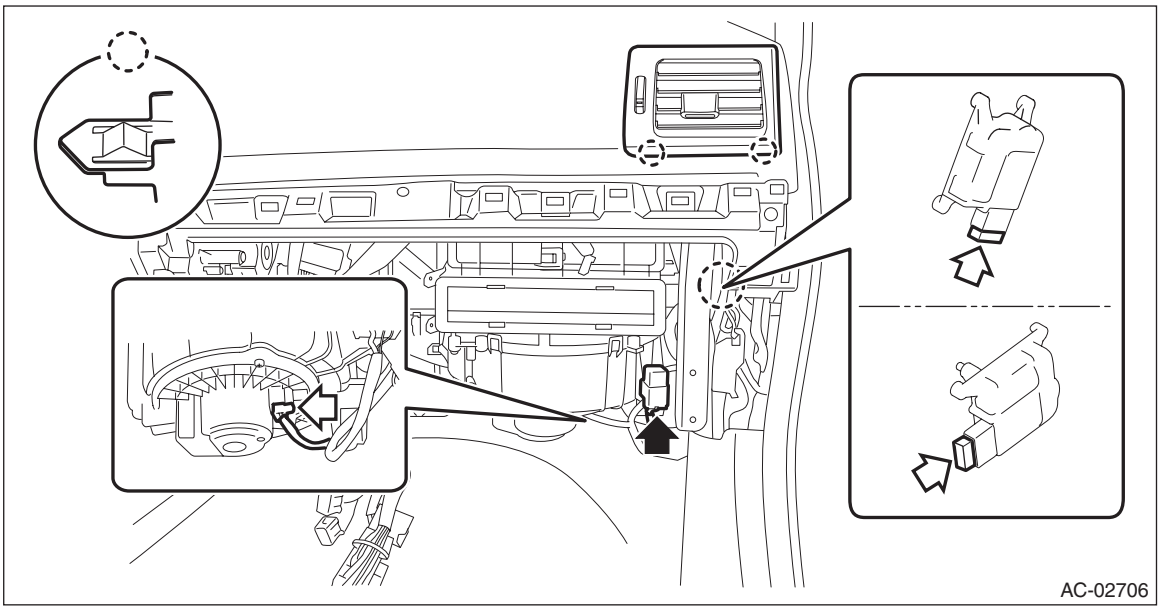
AC-02744

   (3) Remove the nut (a).
   (4) Loosen the bolt (b), and remove the engine control module (ECM).



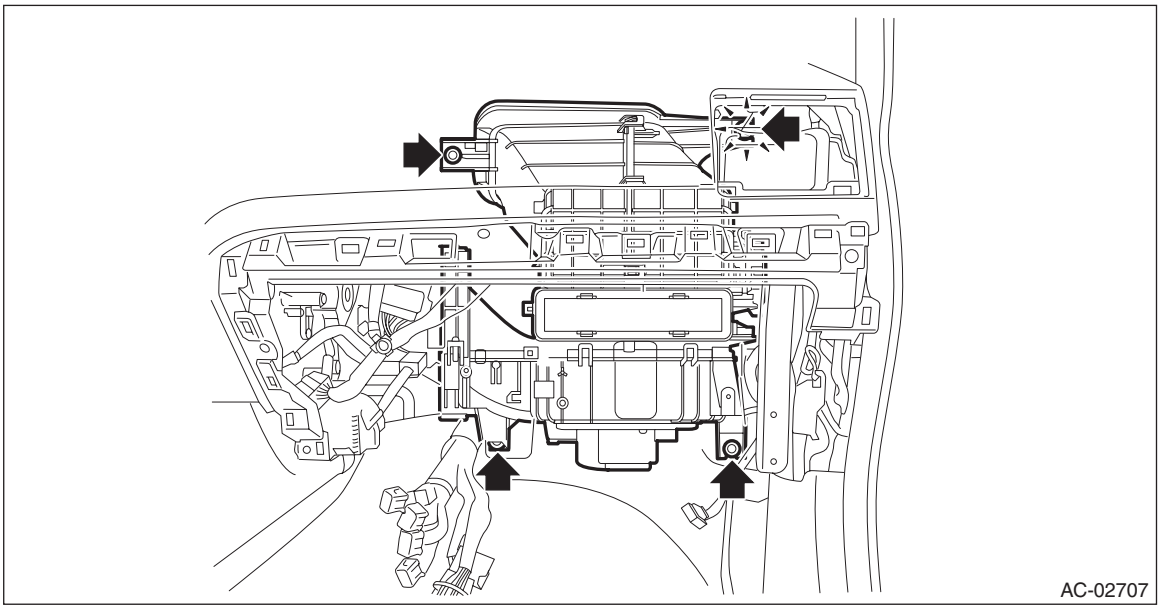
AC-02745

4) Remove the blower motor unit assembly.
(1) Release the claws, and then remove the grille assembly - ventilation RH.
(2) Disconnect the blower motor relay and each connector.



(3) Remove the bolts and nuts to remove blower motor unit assembly.

NOTE:
Remove the RH upper nut from the mounting portion of the grille assembly - ventilation RH.



## B: INSTALLATION

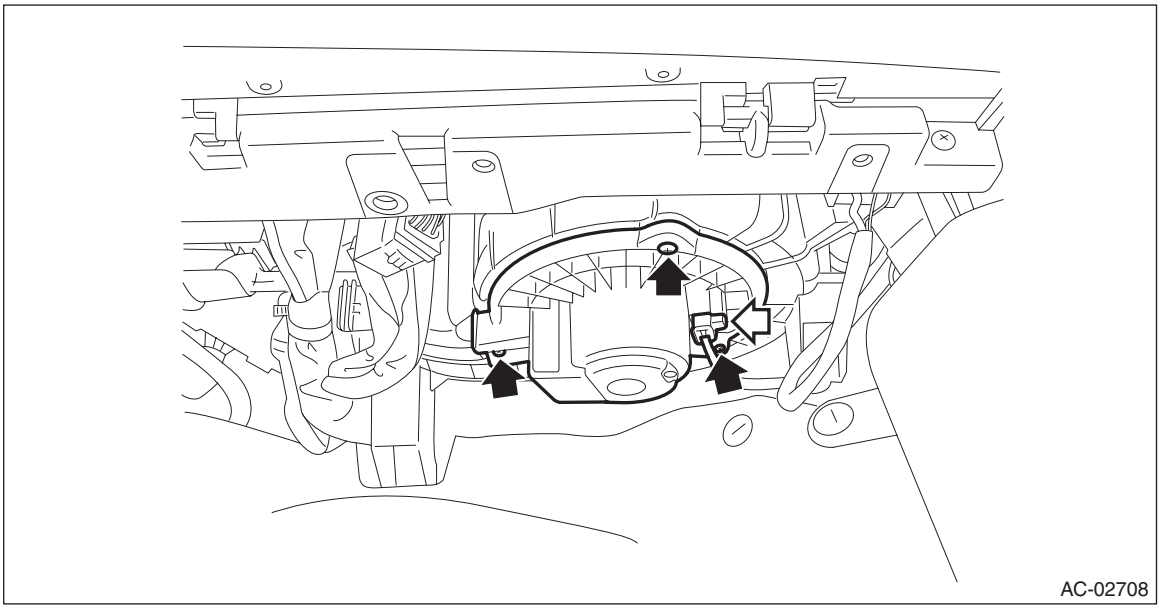
**CAUTION:**
**After installing the grille assembly - ventilation RH, check that the air vent grille of the grille assembly - ventilation RH is inserted correctly into the air vent duct.**
Install each part in the reverse order of removal.

***Tightening torque:***
***Blower motor unit: <Ref. to AC-10, BLOWER MOTOR UNIT, COMPONENT, General Description.>***
***Engine control module (ECM): 7.5 N·m (0.76 kgf-m, 5.5 ft-lb)***

# 10.Blower Motor

## A: REMOVAL

1) Disconnect the ground cable from battery.
2) Remove the blower - motor.
   (1) Disconnect the connector.
   (2) Remove the screws and detach the blower - motor.



## B: INSTALLATION

Install each part in the reverse order of removal.

## C: INSPECTION

**UNIT INSPECTION**

1) Check the motor operation when battery voltage is applied between the terminals of motor.

| Terminal No. | Inspection conditions | Specification | Connection diagram |
|---|---|---|---|
| 2 (+) — 1 (–) | Connect battery to the terminals | Speed |   |

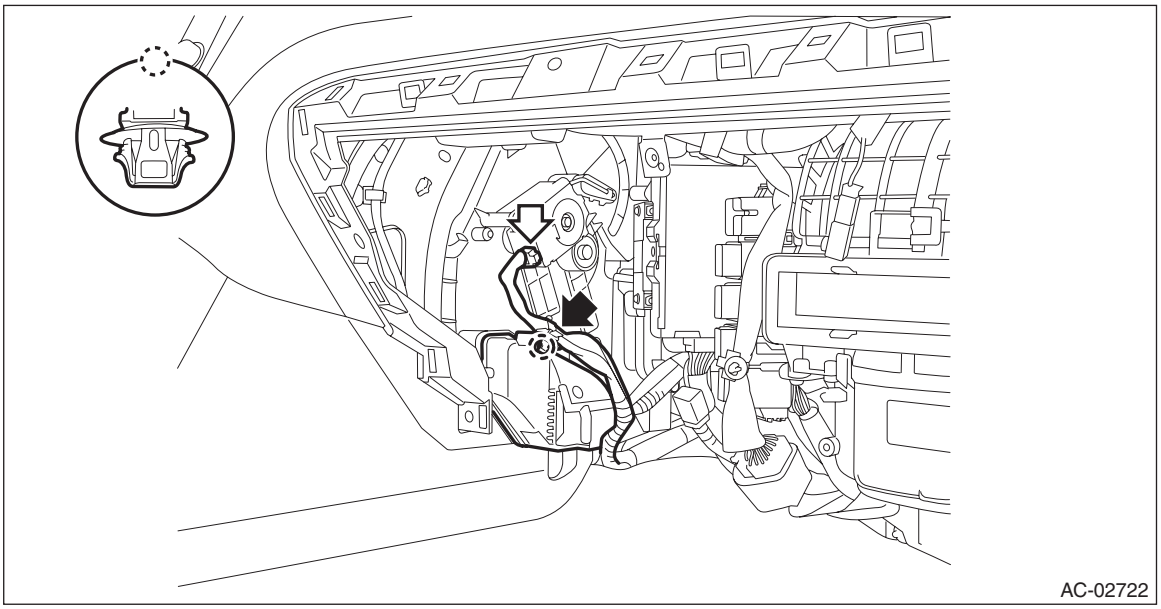
2) If it does not operate normally, replace the blower - motor.

# 11.Power Transistor (Auto A/C Model)

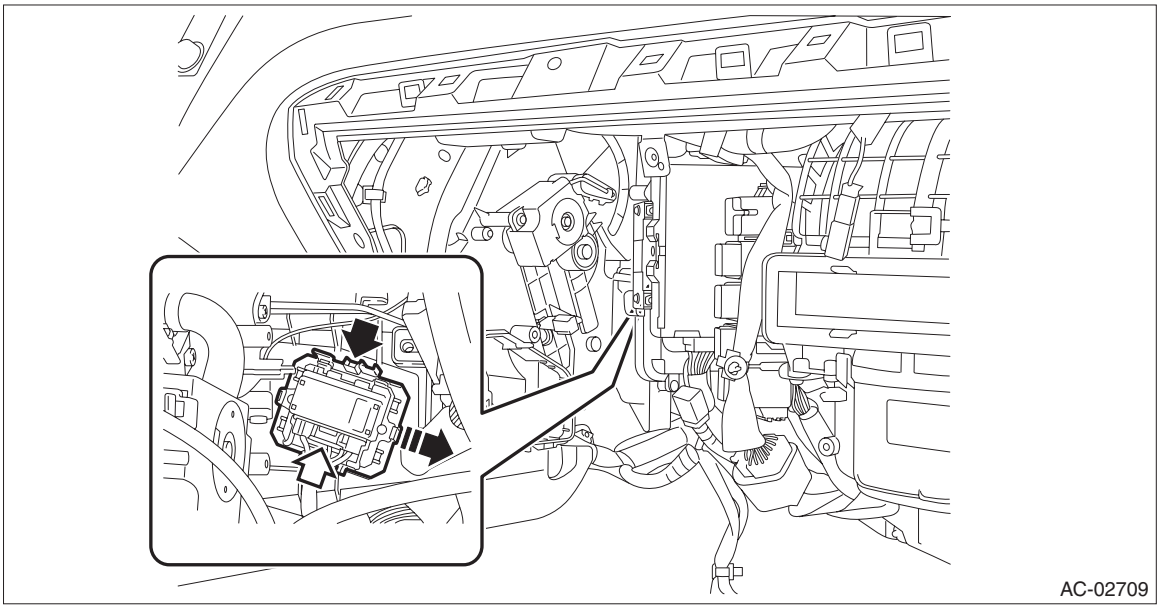
## A: REMOVAL

1) Disconnect the ground cable from battery.
2) Remove the glove box. <Ref. to EI-67, REMOVAL, Glove Box.>
3) Remove the screws and remove the duct - foot RH.

NOTE:
Remove the connector and clip of the motor - actuator mix RH, and move the harness aside.



4) Remove the power transistor.
   (1) Disconnect the connector.
   (2) Remove the power transistor while pressing the power transistor body claw part and sliding it.



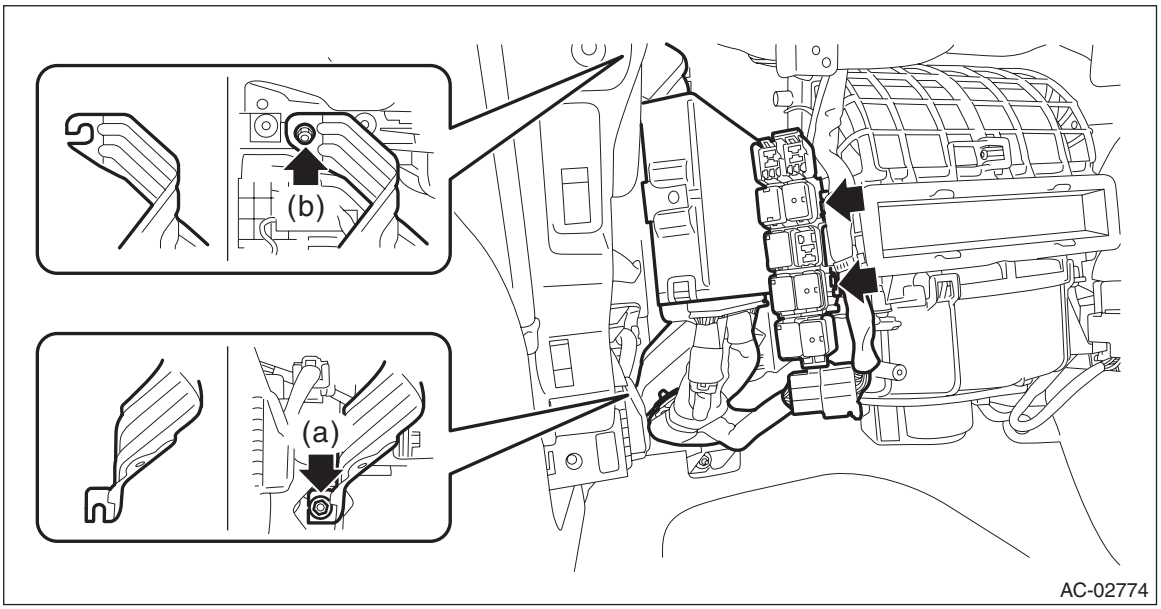
## B: INSTALLATION

Install each part in the reverse order of removal.

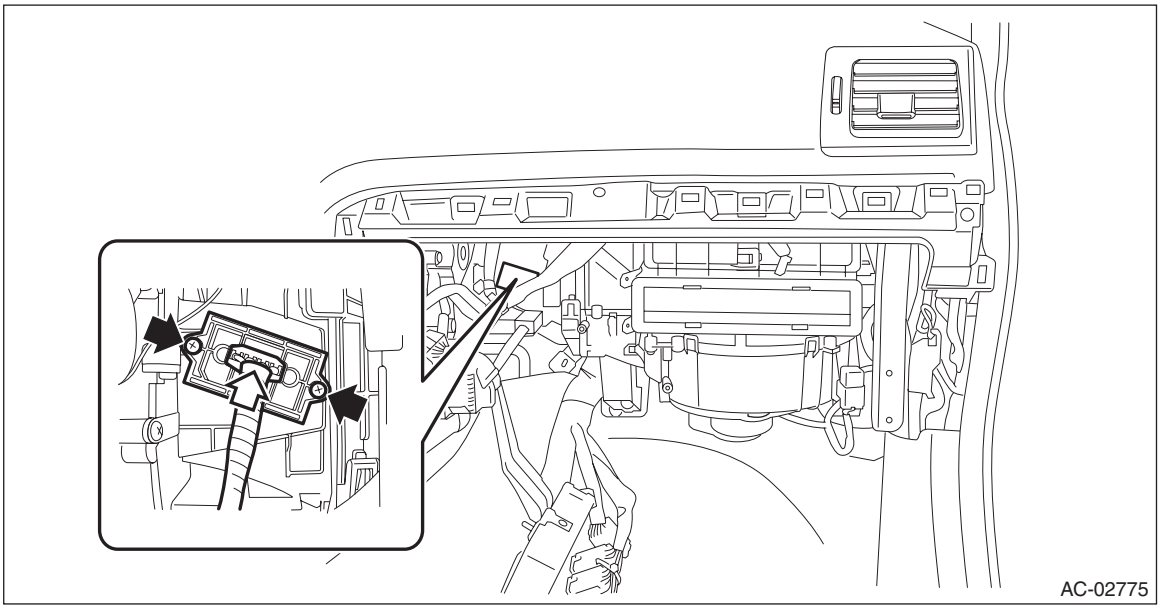
# 12.Blower Resistor (Manual A/C Model)

## A: REMOVAL

1) Disconnect the ground cable from battery.
2) Remove the glove box. <Ref. to EI-67, REMOVAL, Glove Box.>
3) Remove the engine control module (ECM).
   (1) Release the lock and remove the relay holder.
   (2) Remove the nut (a).
   (3) Loosen the bolt (b), and remove the engine control module (ECM).



4) Remove the resistor.
   (1) Disconnect the connector.
   (2) Remove the screw and remove the resistor.



## B: INSTALLATION

Install each part in the reverse order of removal.

***Tightening torque:***
***Engine control module (ECM): 7.5 N·m (0.76 kgf-m, 5.5 ft-lb)***

# C: INSPECTION

## UNIT INSPECTION

***PREPARATION TOOL:***

***Circuit tester***

1) Check the resistance between resistor terminals.

| Terminal No. | Standard | Connection diagram |
|---|---|---|
| 4 — 3 | Approx. 0.43 Ω |  AC-02897 |
| 4 — 2 | Approx. 1.03 Ω | |
| 4 — 1 | Approx. 3 Ω | |

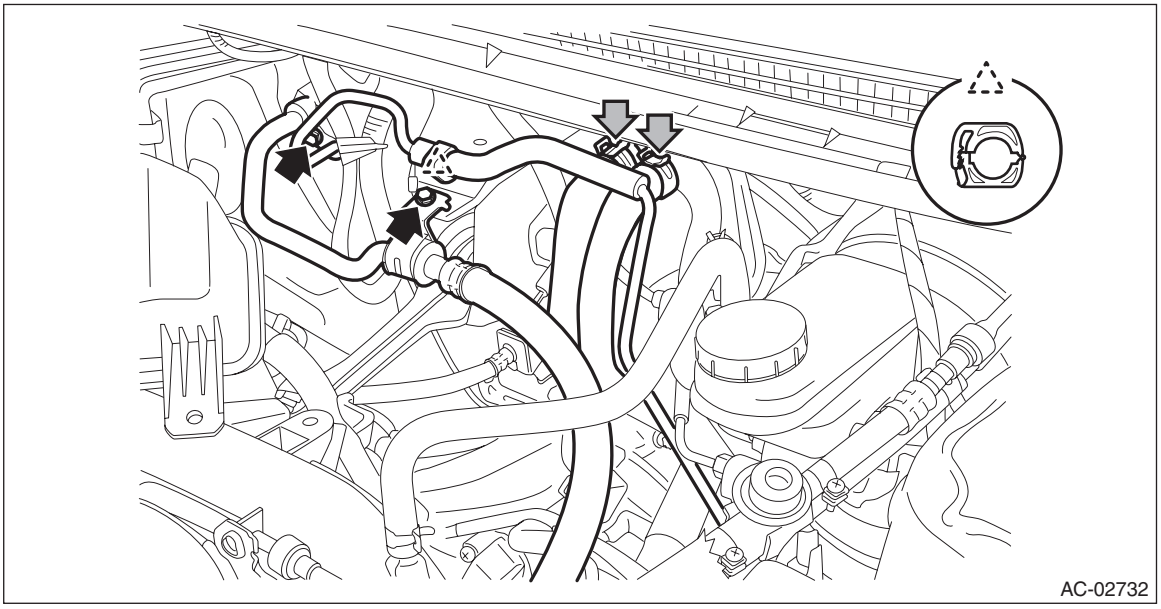
2) Replace the resistor if the inspection result is not within the standard.

# 13.Heater Core

## A: REMOVAL

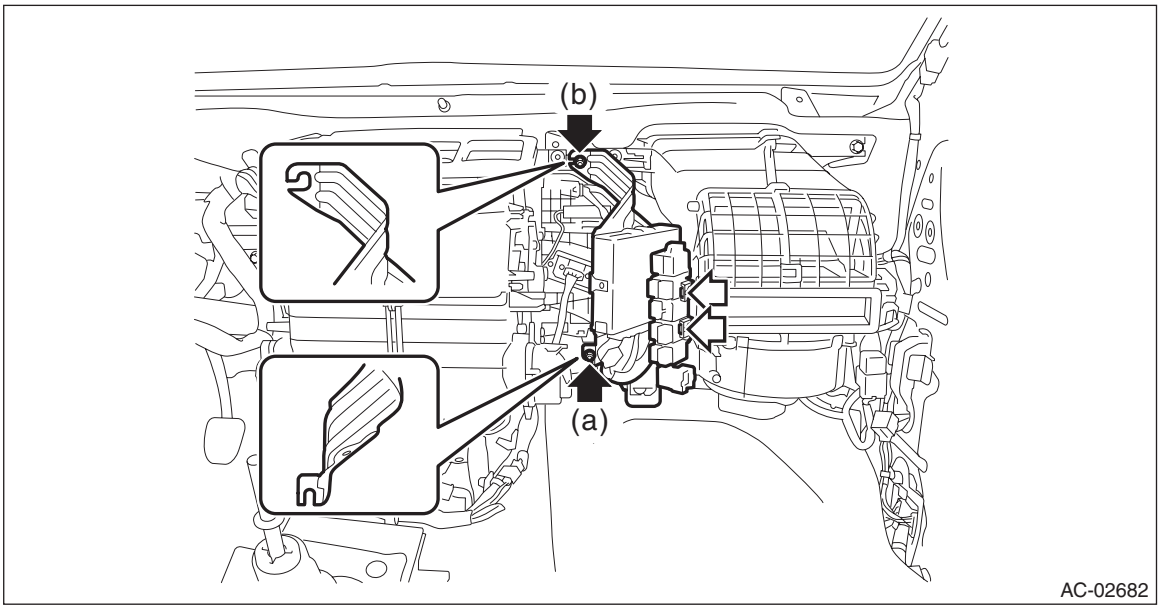
1) Disconnect the ground cable from battery.
2) Using the refrigerant recovery system, discharge refrigerant. <Ref. to AC-26, PROCEDURE, Refrigerant Recovery Procedure.>
3) Drain the coolant from the radiator. <Ref. to CO(H4DO)-13, DRAINING OF ENGINE COOLANT, REPLACEMENT, Engine Coolant.>
4) Remove the intake boot. <Ref. to IN(H4DO)-12, REMOVAL, Air Intake Boot.>

**CAUTION:**
**Move aside the intake boot to perform the operation without disconnecting the PCV hose.**
5) Remove the bolt, and remove the hose - pressure suction and the pipe - evaporator cooling from the expansion valve - cooling.
6) Loosen the heater hose clamps and remove the hoses.

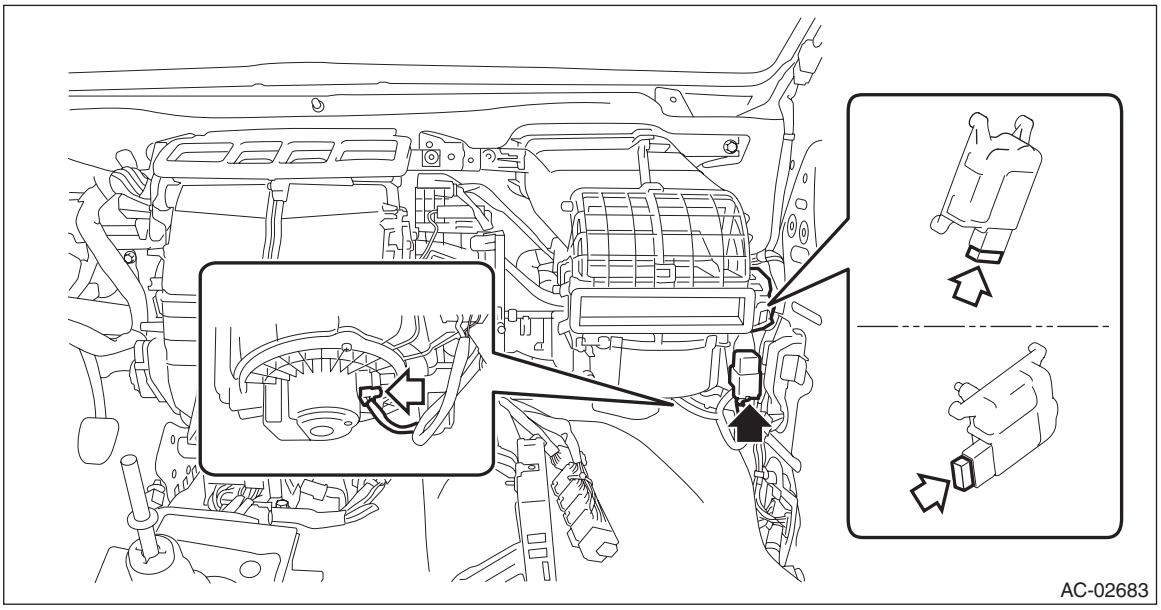


7) Remove the instrument panel assembly. <Ref. to EI-74, REMOVAL, Instrument Panel Assembly.>

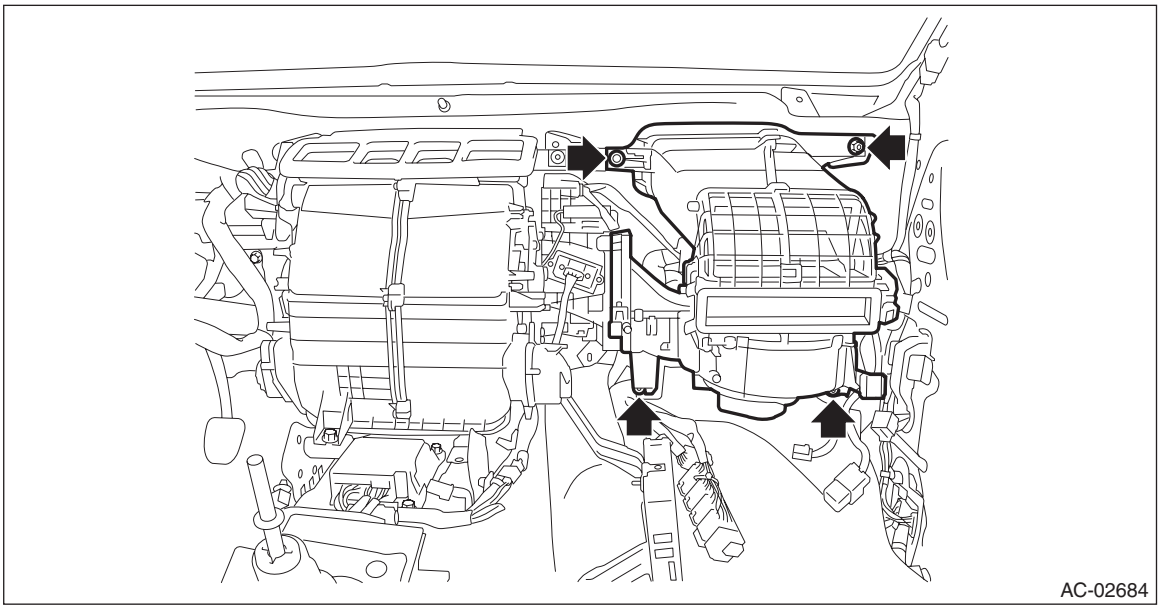
8) Remove the engine control module (ECM).
   (1) Release the lock and remove the relay holder.
   (2) Remove the nut (a).
   (3) Loosen the bolt (b), and remove the engine control module (ECM).



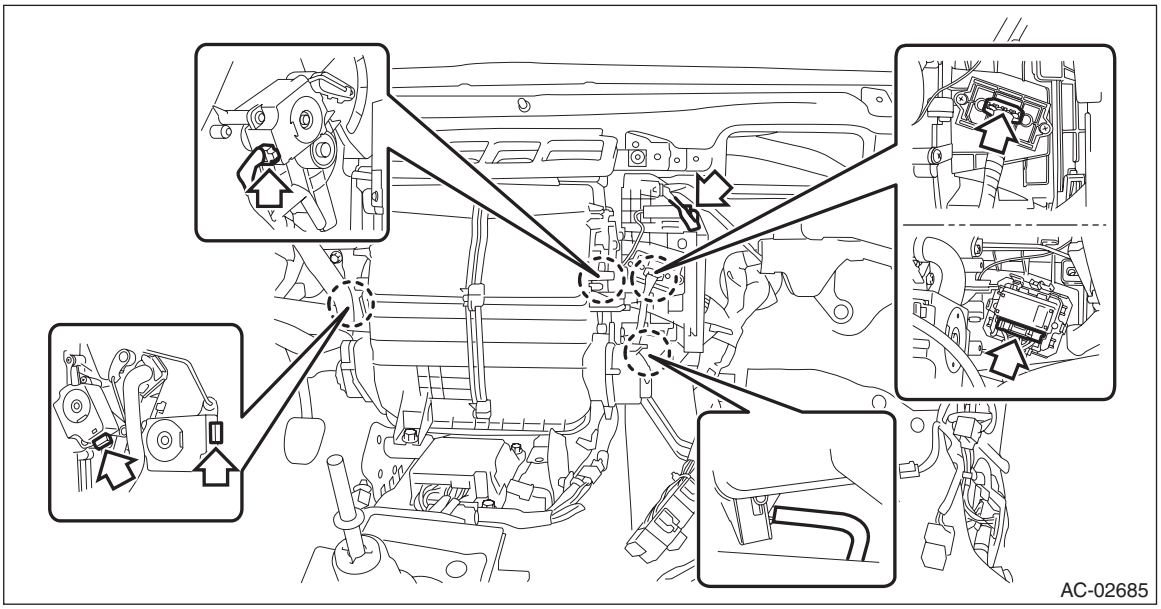
9) Remove the blower motor unit assembly.
   (1) Disconnect the blower motor relay and each connector.



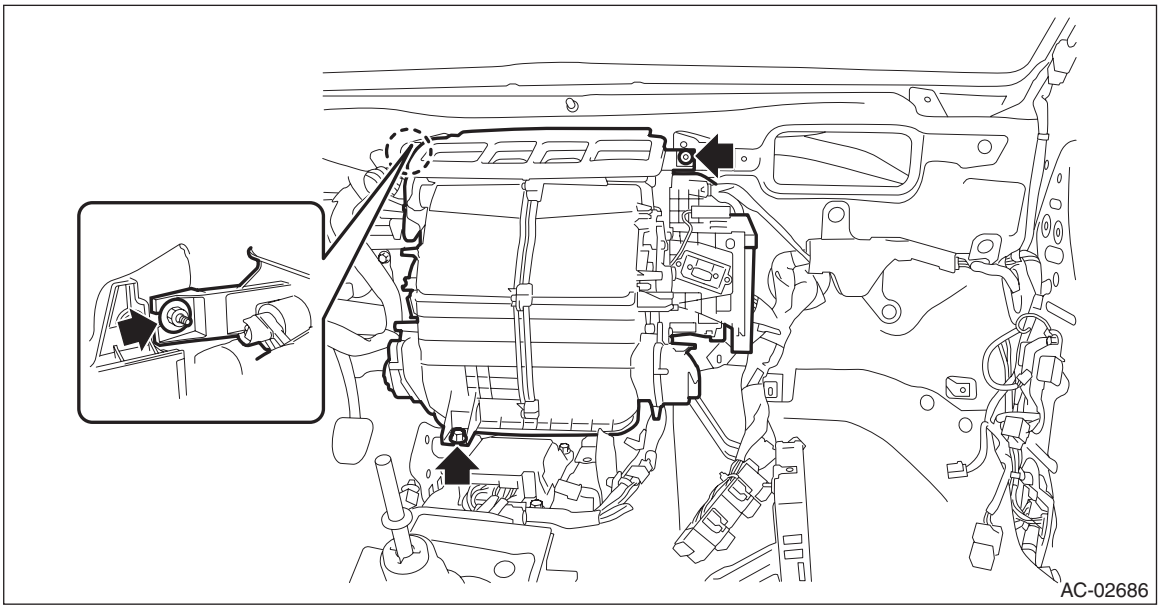
(2) Remove the bolts and nuts to remove blower motor unit assembly.



10) Remove the heater and cooling unit assembly.
(1) Disconnect each connector and the hose - drain.

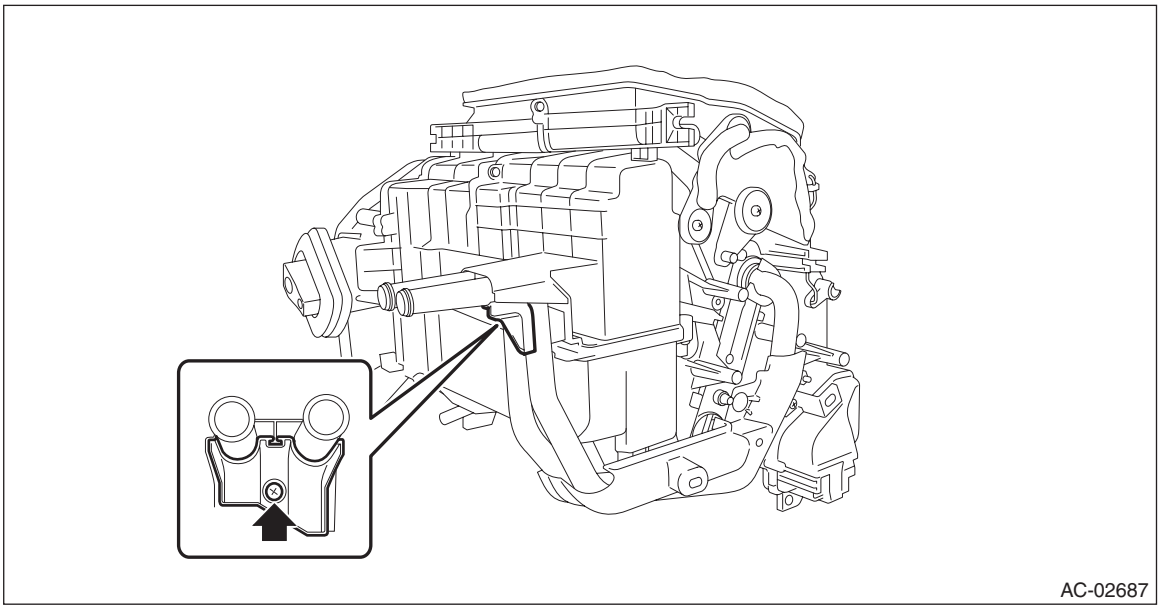


(2) Remove the bolt and nuts, and remove the heater & cooling unit assembly.

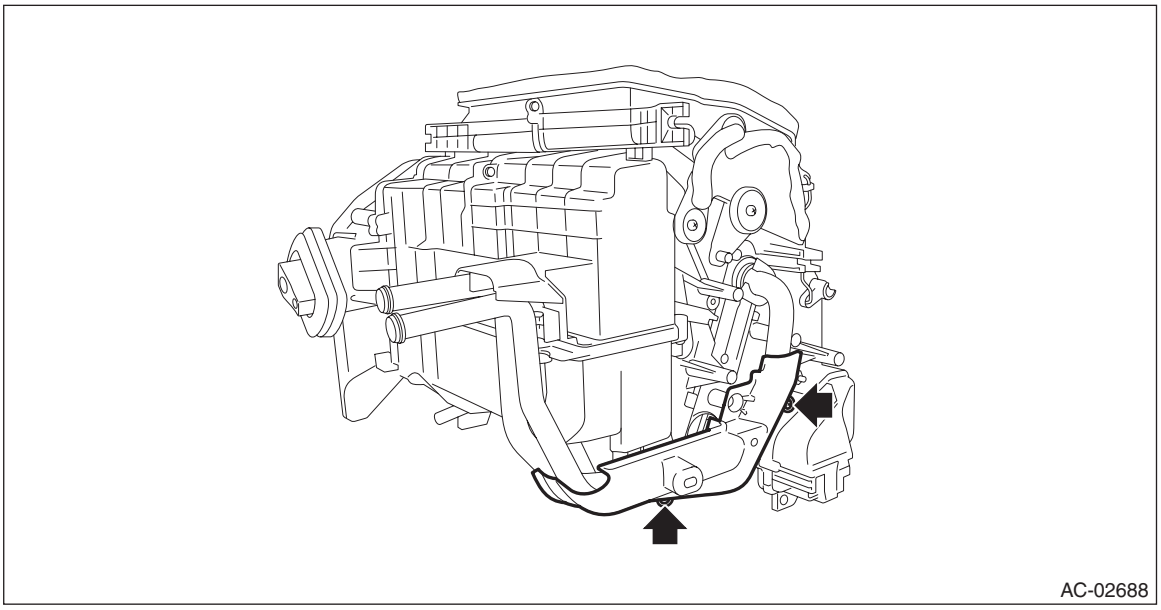


11) Remove the heater core.

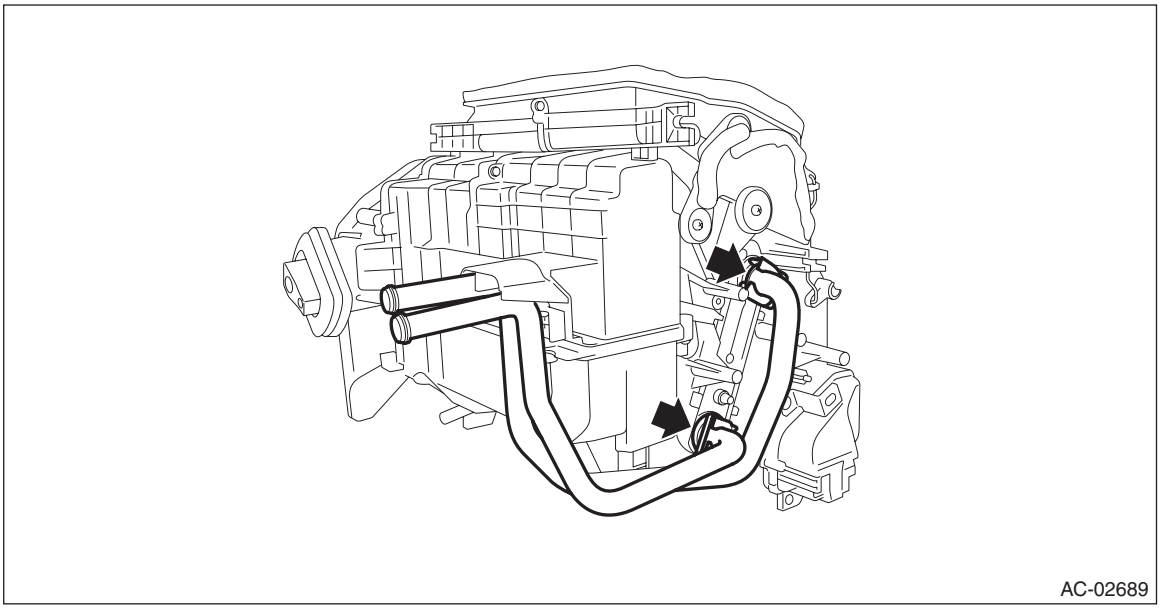
(1) Remove the screw and detach the clamp - pipe.



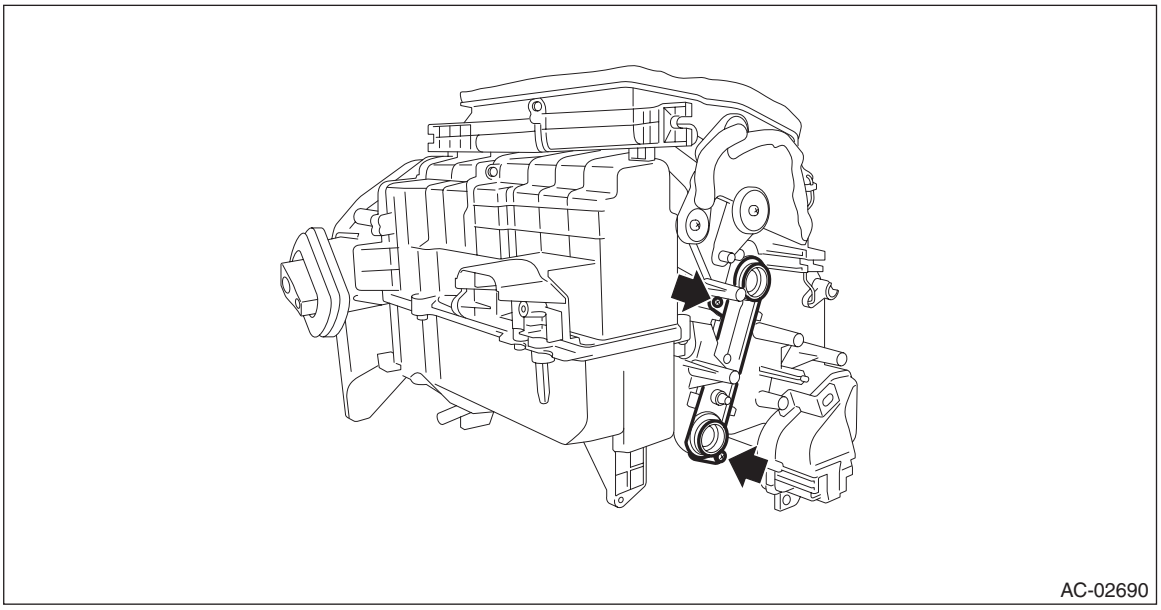
(2) Remove the screws and detach the cover - heater pipe.



(3) Remove the clamp, and remove the pipe - inlet and outlet.

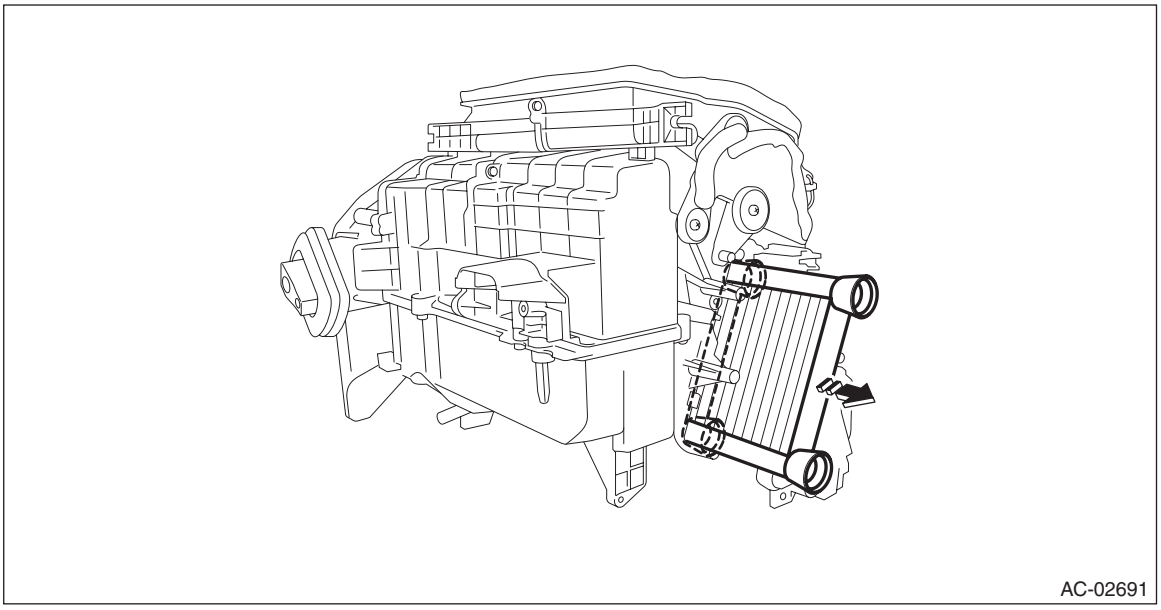


(4) Remove the screws and detach the plate - heater core.



AC-02690

(5) Pull out the heater core from the case - heater unit.



AC-02691

## B: INSTALLATION

**CAUTION:**
**Replace O-rings and clamps with new parts and install securely.**
1) Install each part in the reverse order of removal.

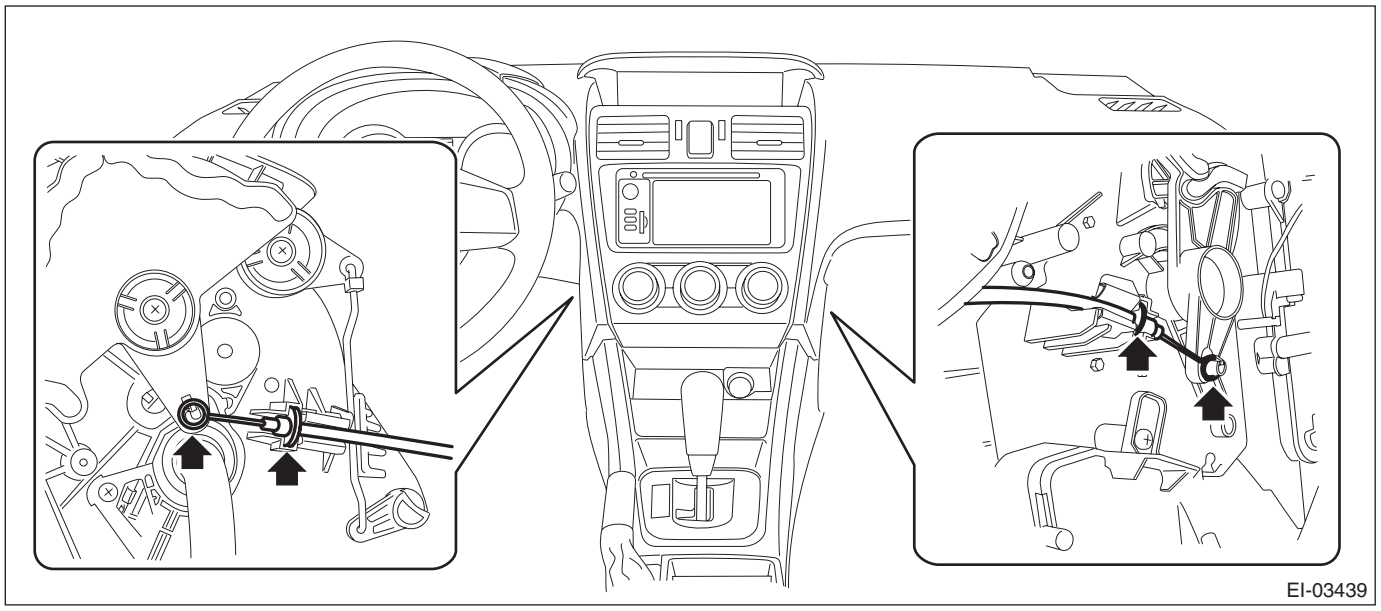
NOTE:
Refer to “INSTALLATION” of “Instrument Panel Assembly”. <Ref. to EI-92, INSTALLATION, Instrument Panel Assembly.>

***Tightening torque:***
***Heater cooling unit: <Ref. to AC-6, HEATER AND COOLING UNIT, COMPONENT, General Description.>***
***Blower motor unit: <Ref. to AC-10, BLOWER MOTOR UNIT, COMPONENT, General Description.>***
***Engine control module (ECM): 7.5 N·m (0.76 kgf-m, 5.5 ft-lb)***
2) Fill engine coolant. <Ref. to CO(H4DO)-14, FILLING OF ENGINE COOLANT, REPLACEMENT, Engine Coolant.>
3) Charge refrigerant. <Ref. to AC-27, PROCEDURE, Refrigerant Charging Procedure.>

# 14.Control Panel

## A: REMOVAL

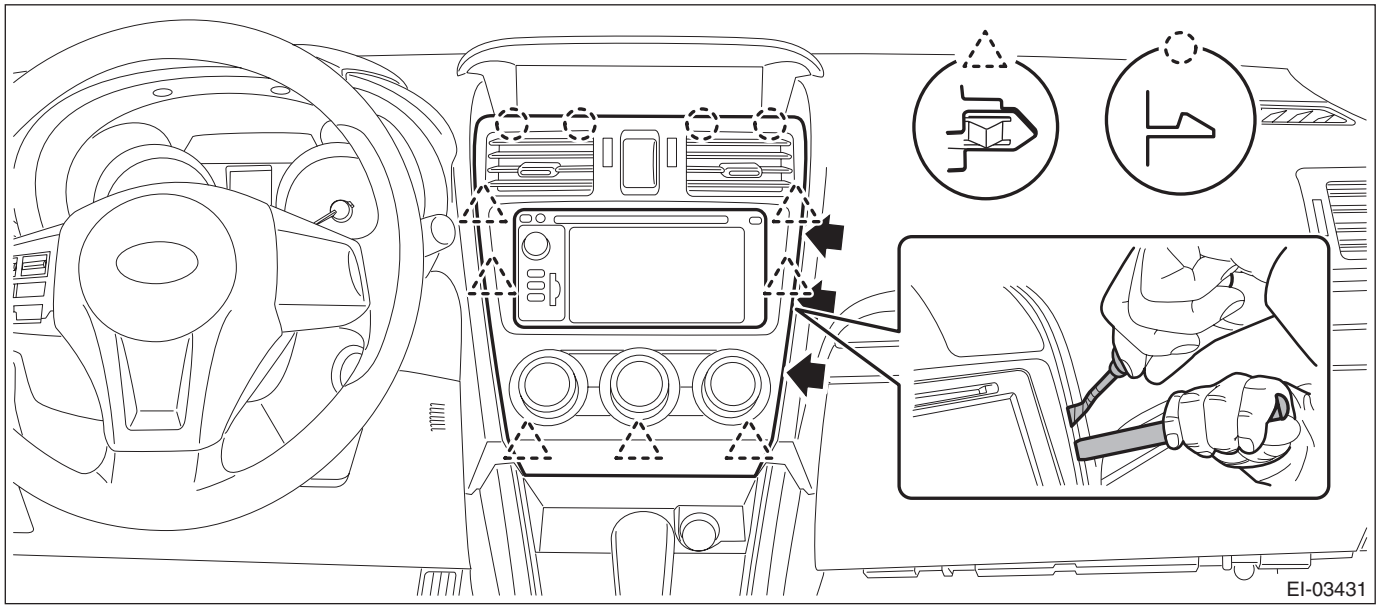
1) Disconnect the ground cable from battery.
2) On manual A/C models, disconnect the control cables from both sides of the heater and cooling unit assembly.



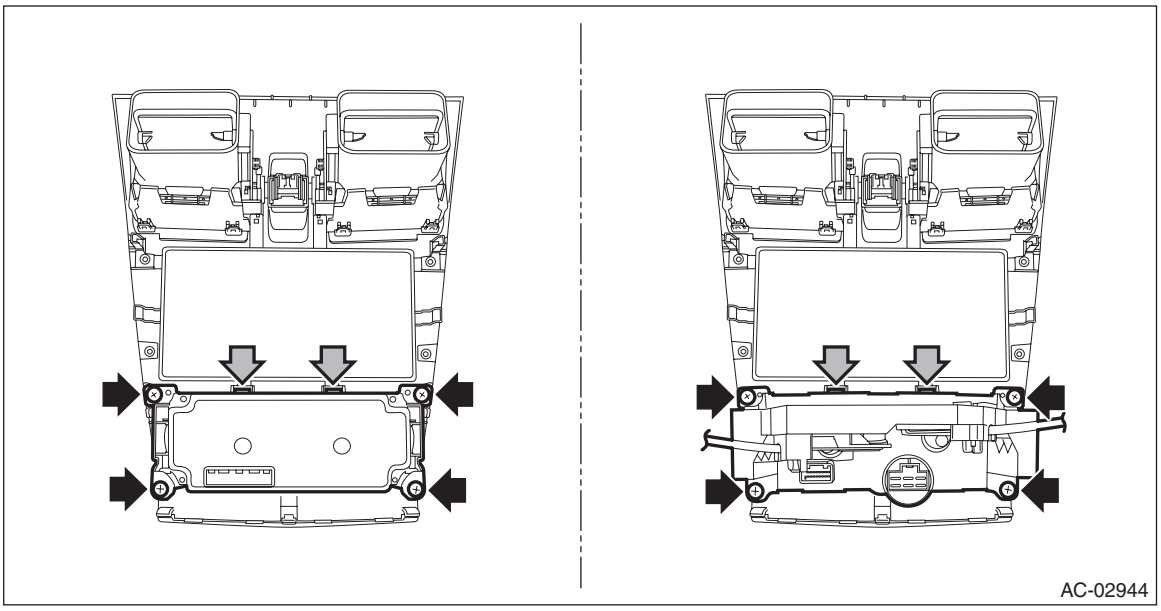
NOTE:
Remove the glove box pocket assembly on the passenger's side.
3) Remove the panel center assembly.

**CAUTION:**
- **Do not put your finger on the fin of the air vent grille. Doing so may damage the fin.**
- **Pull the panel center assembly slowly. Pulling with excessive force may damage the connector.**

(1) Insert a plastic remover to the three areas shown by the arrows, and lift up the panel center assembly slightly.
(2) With the panel center assembly lifted up slightly, release the claw by using a clip remover wrapped with protective tape.
(3) Release the rest of the claws, and pull out the panel center assembly.
(4) Disconnect the connectors, and remove the panel center assembly.



4) Remove the heater control assembly.
   (1) Remove the screws.
   (2) Release the claws, and then remove the heater control assembly from the panel center assembly.



## B: INSTALLATION

**CAUTION:**
**After installing the panel center assembly, check that the air vent grille of the panel center assembly is inserted correctly into the air vent duct.**
Install each part in the reverse order of removal.

# C: INSPECTION

## 1. CHECK ILLUMINATION

### UNIT INSPECTION

1) Check the illumination operation when battery voltage is applied between the terminals of control panel.

- Manual A/C model

| Terminal No. | Inspection conditions | Specification | Connection diagram |
|---|---|---|---|
| 14 (+) — 12 (–) | Connect battery to the terminals | Light ON |  AC-02733 |

- Auto A/C model

| Terminal No. | Inspection conditions | Specification | Connection diagram |
|---|---|---|---|
| 37 (+) — 35 (–) | Connect battery to the terminals | Light ON |  AC-02734 |

2) If it does not operate normally, replace the heater control assembly.

## 2. BLOWER SWITCH (MANUAL A/C MODEL)

### UNIT INSPECTION

***PREPARATION TOOL:***

***Circuit tester***

1) Measure the resistance between the control panel terminals.

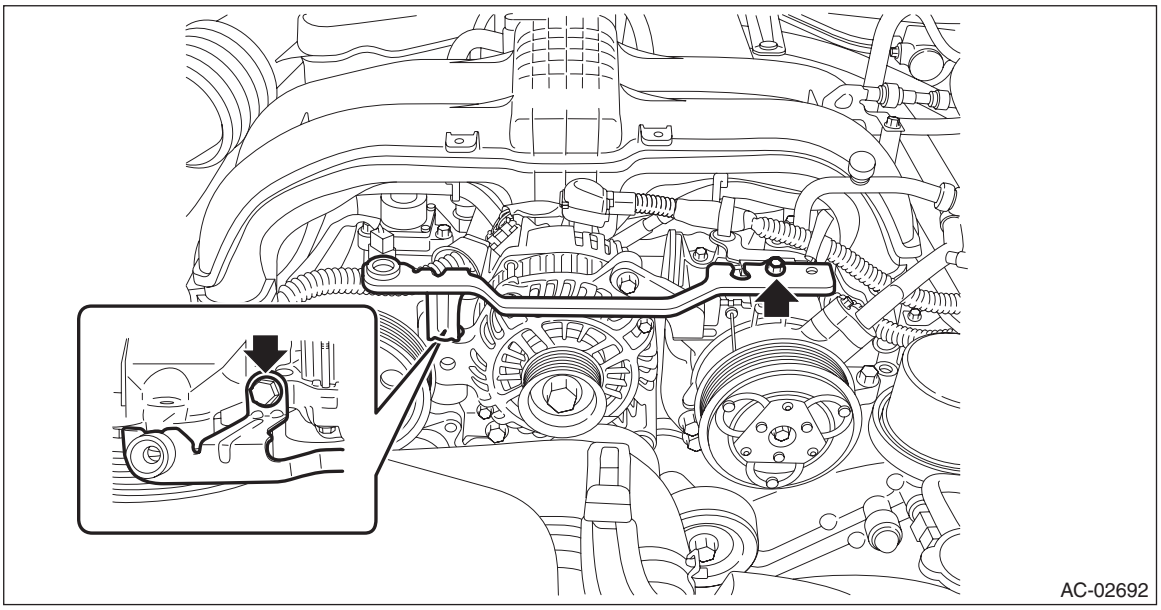
| Terminal No. | Inspection conditions | Standard | Connection diagram |
|---|---|---|---|
| — | OFF | — | — |
| 1 — 2, 4 | 1 (LO) | Less than 1 Ω |  AC-02798 |
| 1 — 3, 4 | 2 (M1) | Less than 1 Ω |  AC-02799 |
| 1 — 4, 6 | 3 (M2) | Less than 1 Ω |  AC-02800 |
| 1 — 4, 5 | 4 (HI) | Less than 1 Ω |  AC-02801 |

2) Replace the heater control assembly if the inspection result is not within the standard.

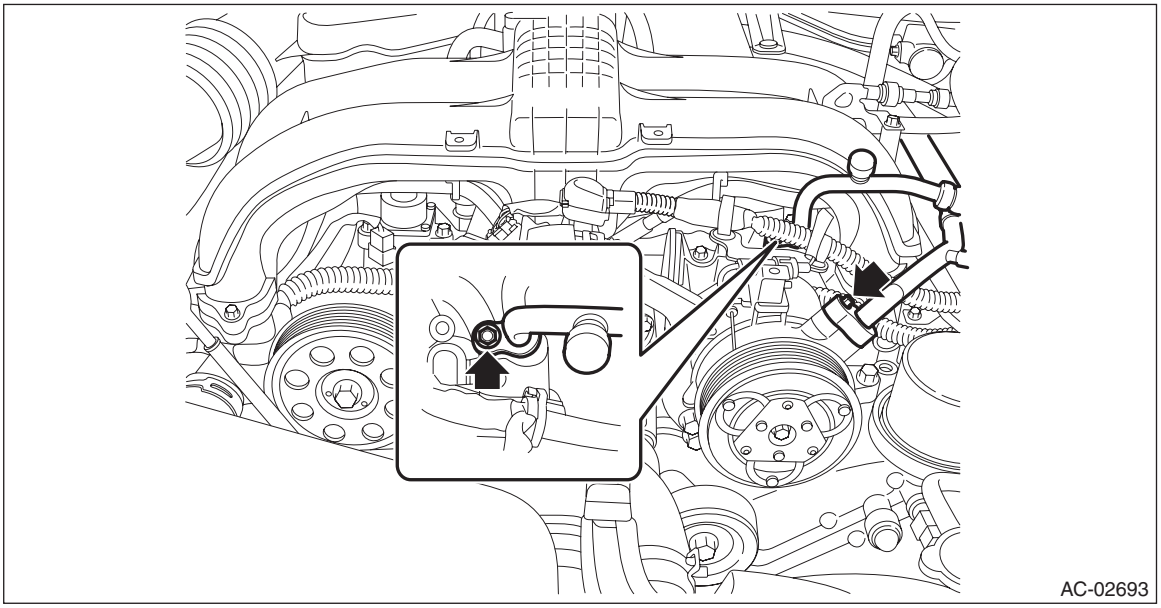
# 15.Compressor

## A: REMOVAL

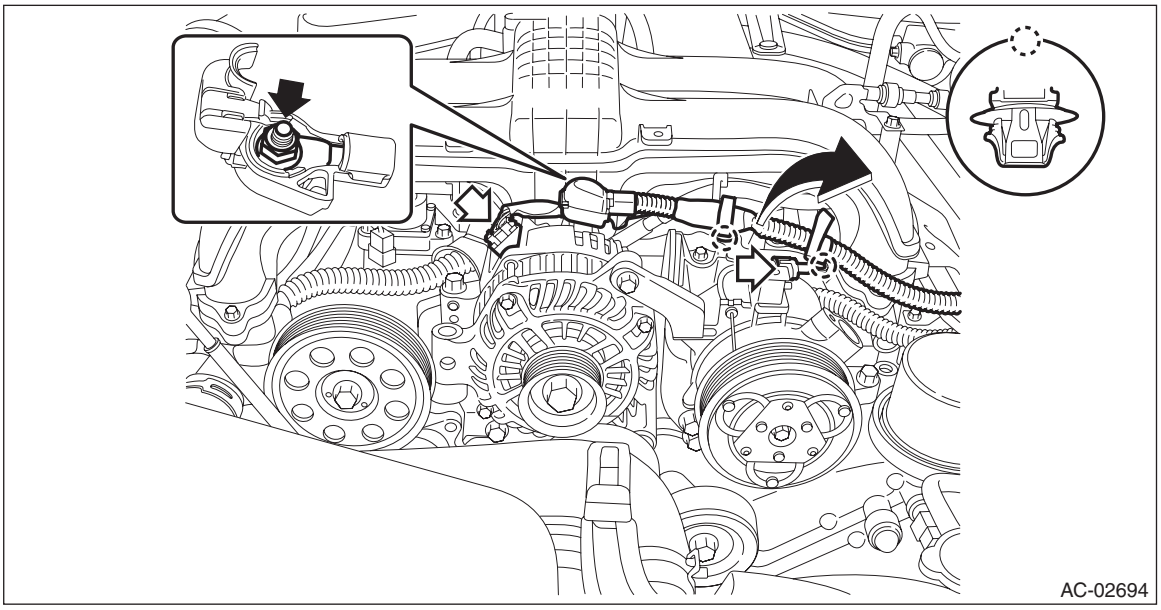
1) Perform compressor oil return operation. <Ref. to AC-34, PROCEDURE, Compressor Oil.>
2) Turn the A/C switch to OFF and stop the engine.
3) Using the refrigerant recovery system, discharge refrigerant. <Ref. to AC-26, PROCEDURE, Refrigerant Recovery Procedure.>
4) Disconnect the ground cable from battery.
5) Remove the V-belts. <Ref. to ME(H4DO)-75, REMOVAL, V-belt.>
6) Remove the bolts and remove the V-belt cover bracket.



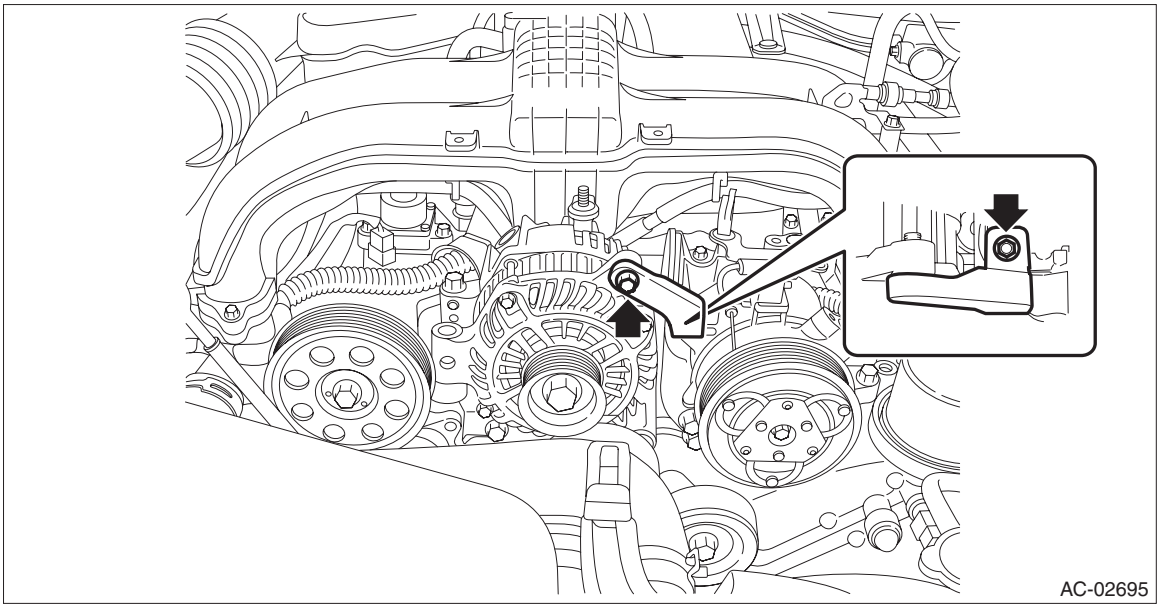
7) Remove the bolt, and detach the hose - pressure suction and the hose - pressure discharge.



8) Disconnect the nut and each connector, and move the generator harness to the right.

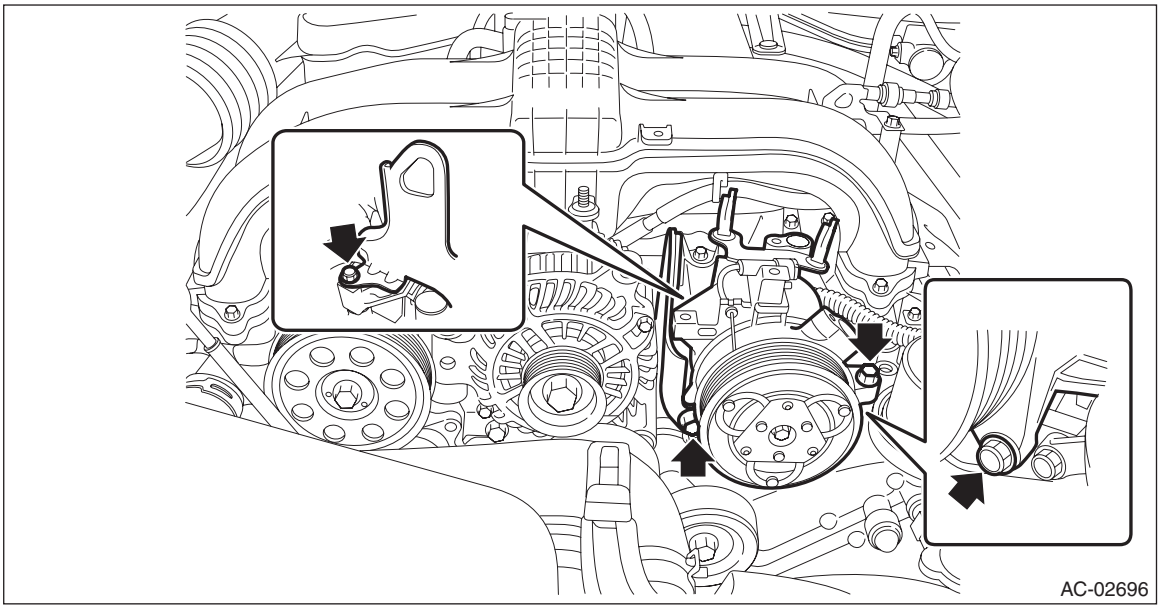


9) Remove the compressor assembly.
   (1) Remove the bolts, and then remove the generator bracket.



(2) Remove the bolts and remove the compressor assembly.

NOTE:
Tighten the engine hanger together with the compressor assembly.



## B: INSTALLATION

**CAUTION:**
**• Replace the O-rings on the hose - pressure suction and discharge with new parts, and then apply compressor oil.**
**• After replacing the compressor assembly, adjust the amount of the compressor oil. <Ref. to AC-34, PROCEDURE, Compressor Oil.>**

1) Install each part in the reverse order of removal.

***Tightening torque:***
***Air conditioning unit: <Ref. to AC-12, AIR CONDITIONING UNIT, COMPONENT, General Description.>***
***Compressor: <Ref. to AC-13, COMPRESSOR, COMPONENT, General Description.>***
***V-belt cover bracket and generator bracket: <Ref. to SC(H4DO)-5, GENERATOR BRACKET, COMPONENT, General Description.>***

2) Charge refrigerant. <Ref. to AC-27, PROCEDURE, Refrigerant Charging Procedure.>

# C: INSPECTION

## 1. MAGNET CLUTCH CLEARANCE INSPECTION

1) Check the clearance of entire circumference around the drive plate and pulley.

***Specification:***
***0.3 — 0.6 mm (0.0118 — 0.0236 in)***

2) Replace the compressor assembly if the inspection result is not within the standard.

## 2. MAGNET CLUTCH OPERATION INSPECTION

### UNIT INSPECTION

1) Check the magnet clutch operation when battery voltage is applied to the compressor terminal.

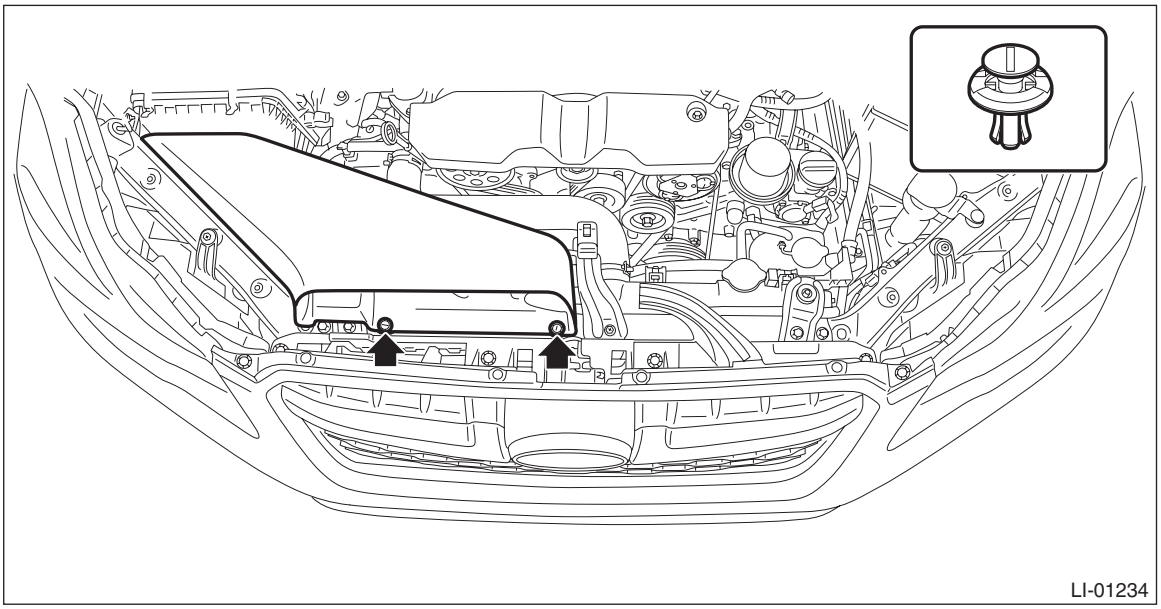
| Terminal No. | Inspection conditions | Specification | Connection diagram |
|---|---|---|---|
| 1 (+) — chassis ground (–) | Battery connection between compressor terminal and chassis ground | Engagement of magnet clutch |  AC-02772 |

2) If it does not operate normally, replace the compressor assembly.

# 16.Condenser

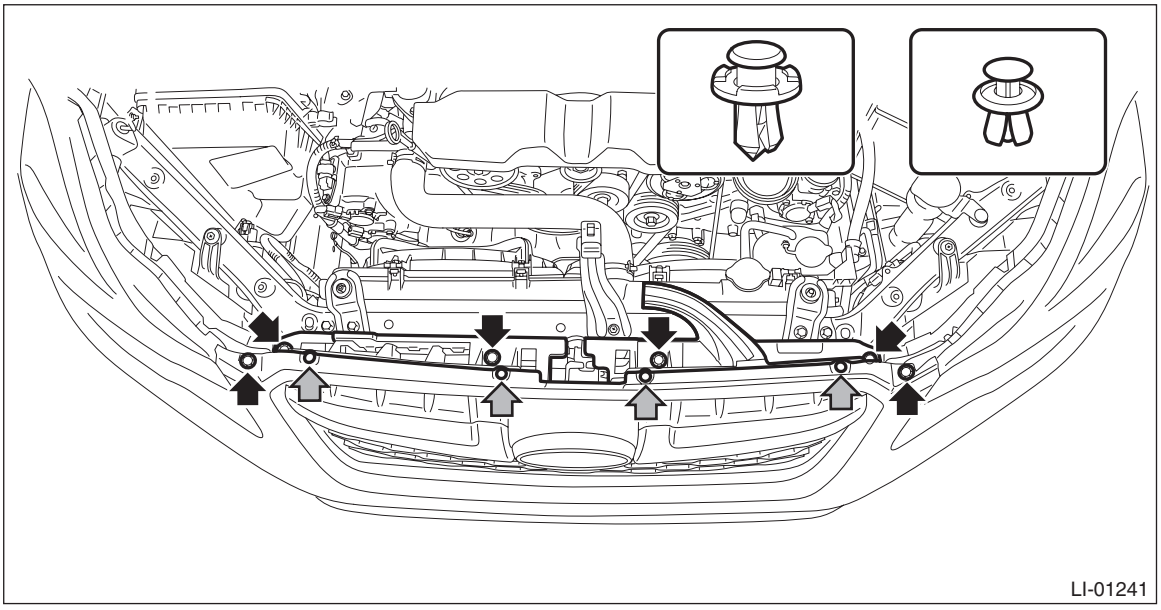
## A: REMOVAL

1) Using the refrigerant recovery system, discharge refrigerant. <Ref. to AC-26, PROCEDURE, Refrigerant Recovery Procedure.>
2) Remove the clips and remove the air intake duct.

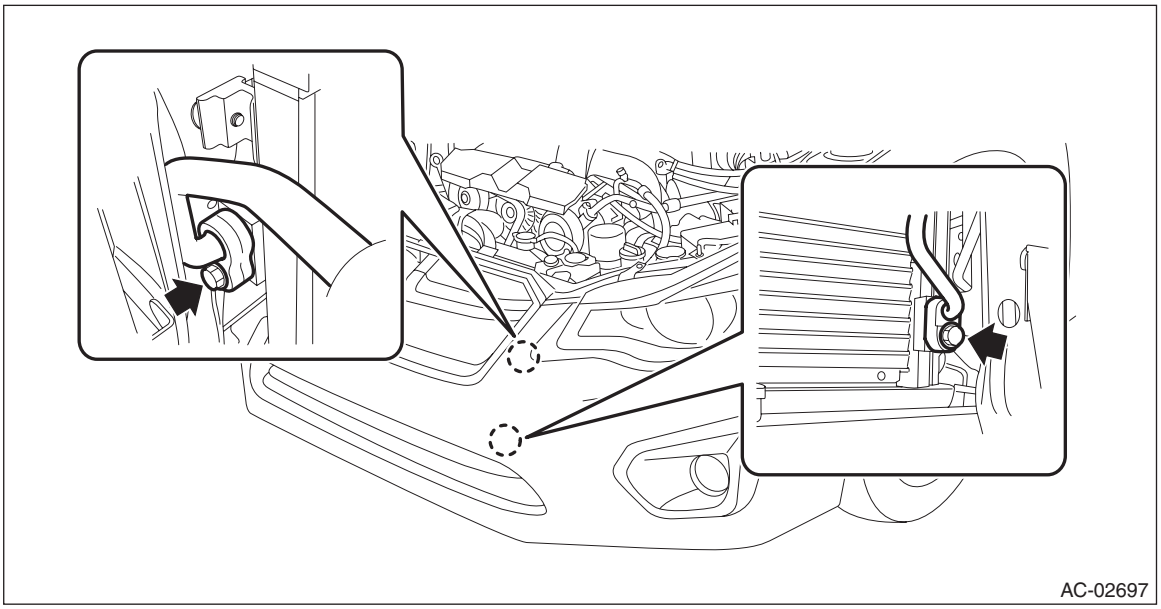


3) Remove the clip, and remove the bracket - grille.

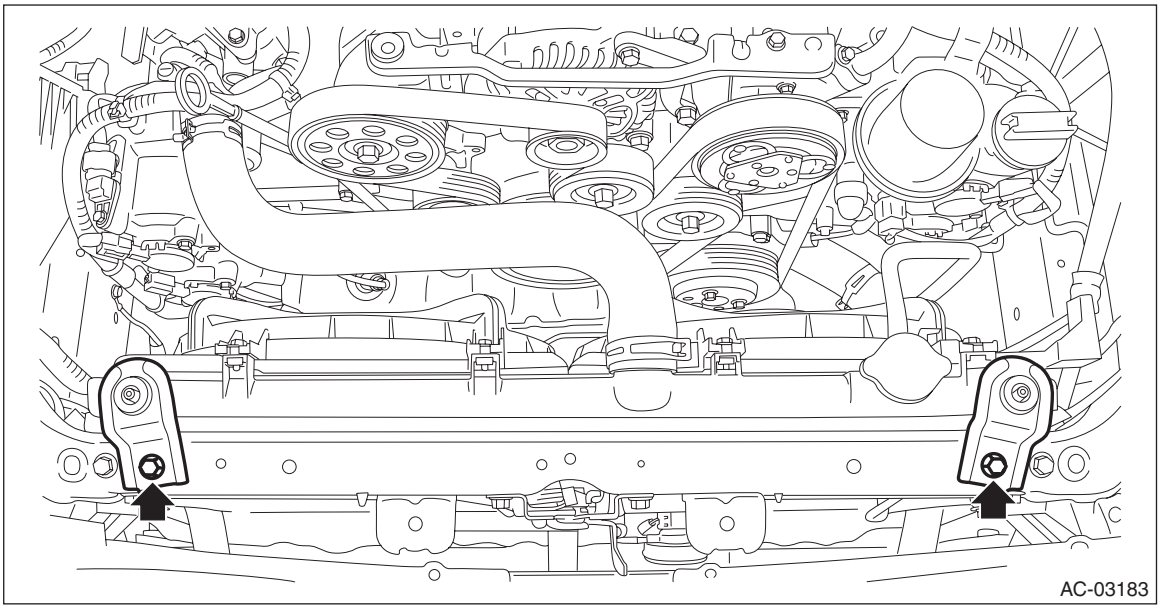
NOTE:
To prevent damage to the bracket - grille, make sure to remove all clips.



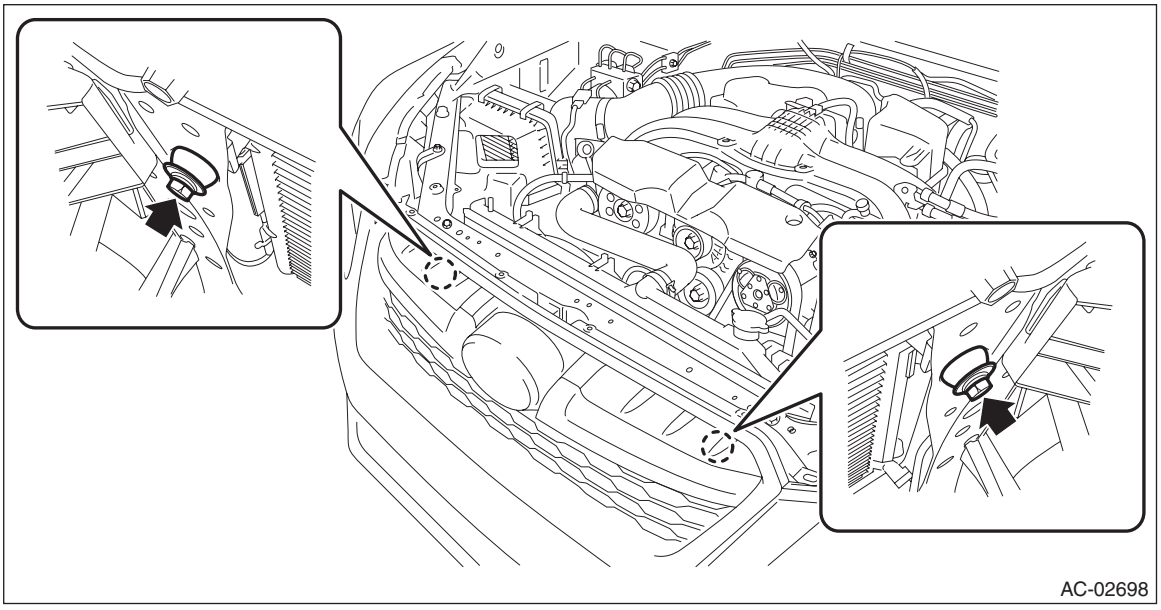
4) Remove the bolt, and disconnect the hose - pressure discharge and the pipe - evaporator cooling from the condenser assembly - air conditioner.



5) Remove the bolts and remove the radiator upper bracket.

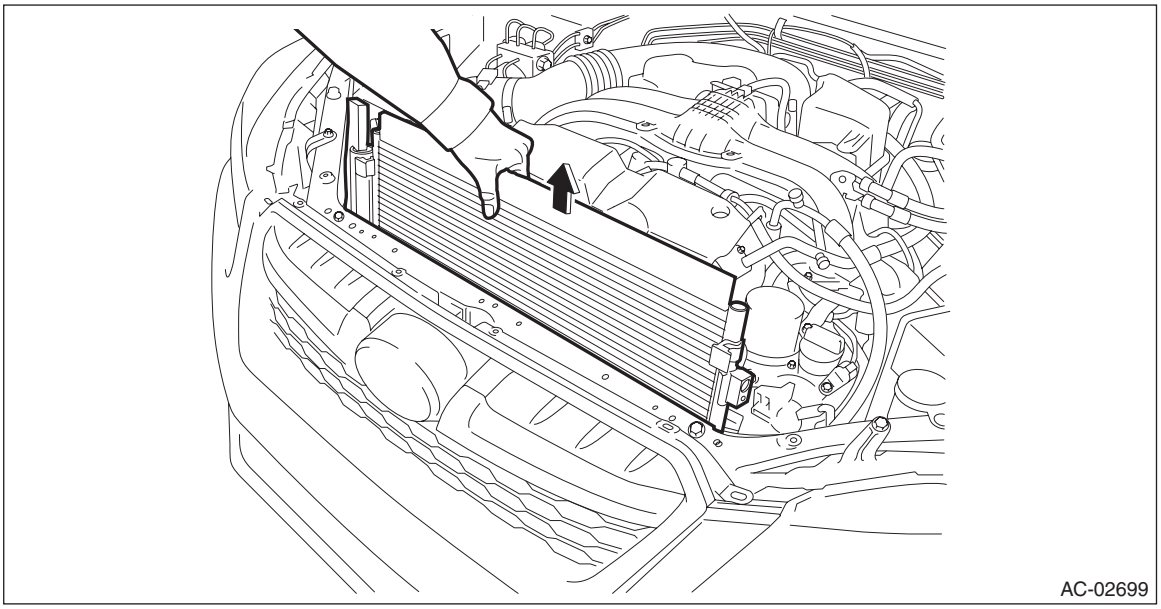


6) Remove the condenser assembly - air conditioner.
(1) Remove the bolt.



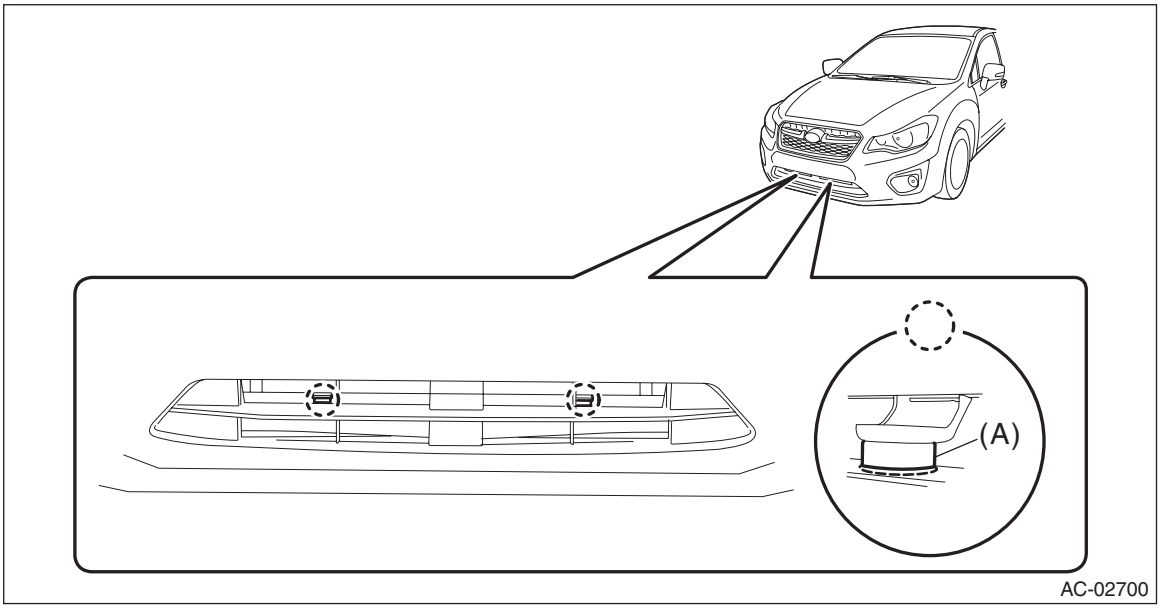
(2) By lifting the condenser assembly - air conditioner, pull it out through the space between the radiator and the radiator panel.

**CAUTION:**
**Be careful not to damage the condenser and radiator fin. If a damaged fin is found, repair it using a thin screwdriver.**



## B: INSTALLATION

**CAUTION:**
**• If the condenser assembly - air conditioner has been replaced, add an appropriate amount of compressor oil. <Ref. to AC-34, ADJUSTMENT, Compressor Oil.>**
**• Replace the O-rings with new parts, and then apply compressor oil.**
**• Confirm that lower guide (A) of condenser assembly - air conditioner fits into holes on radiator panel.**



1) Install each part in the reverse order of removal.

***Tightening torque:***
***Air conditioning unit: <Ref. to AC-12, AIR CONDITIONING UNIT, COMPONENT, General Description.>***
***Radiator upper bracket: <Ref. to CO(H4DO)-4, RADIATOR & RADIATOR FAN, COMPONENT, General Description.>***
2) Charge refrigerant. <Ref. to AC-27, PROCEDURE, Refrigerant Charging Procedure.>

## C: INSPECTION

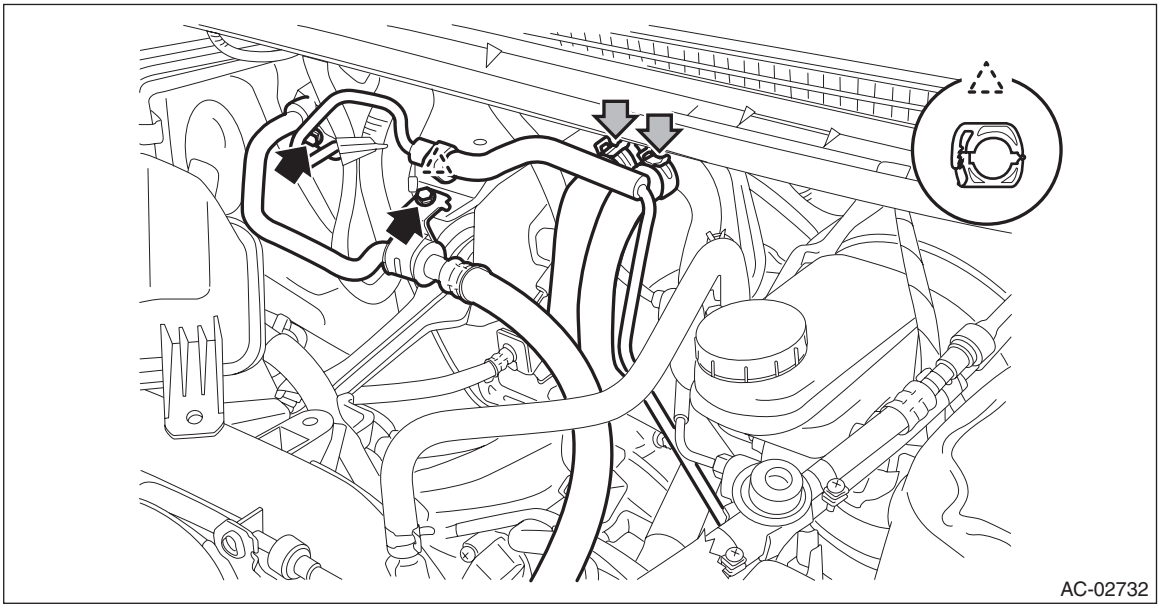
1) Check to see that the condenser fins are not clogged with debris or insects. Blow with compressed air or flush fins with water as needed.
2) If any oil leak is found, replace the condenser assembly - air conditioner.

# 17.Heater and Cooling Unit

## A: REMOVAL

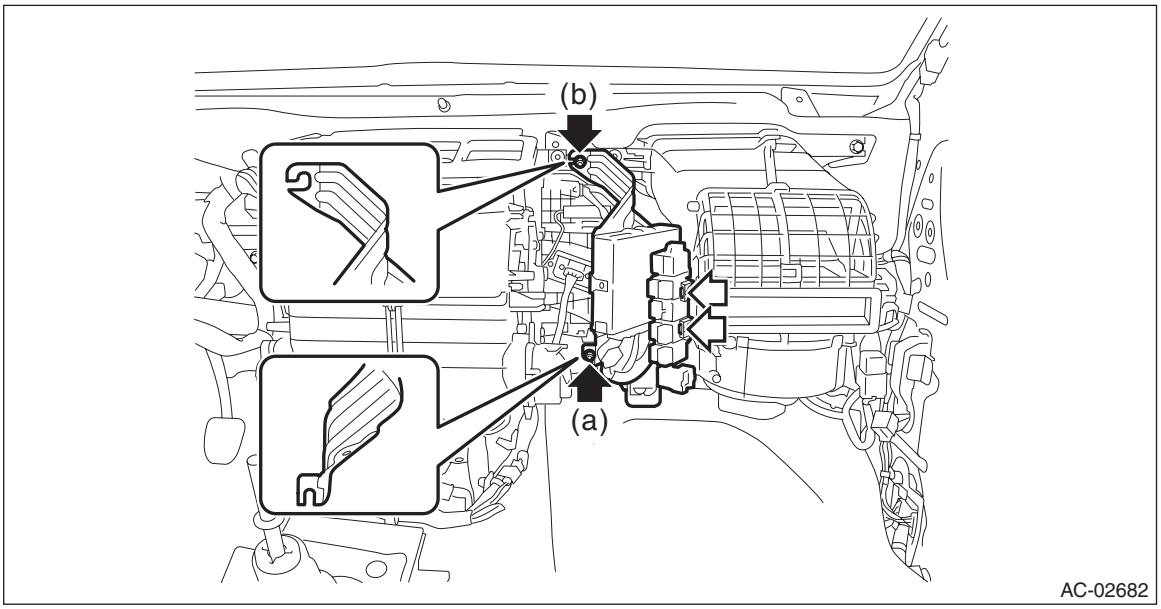
1) Disconnect the ground cable from battery.
2) Using the refrigerant recovery system, discharge refrigerant. <Ref. to AC-26, PROCEDURE, Refrigerant Recovery Procedure.>
3) Drain the coolant from the radiator. <Ref. to CO(H4DO)-13, DRAINING OF ENGINE COOLANT, REPLACEMENT, Engine Coolant.>
4) Remove the intake boot. <Ref. to IN(H4DO)-12, REMOVAL, Air Intake Boot.>

**CAUTION:**
**Move aside the intake boot to perform the operation without disconnecting the PCV hose.**
5) Remove the bolt, and remove the hose - pressure suction and the pipe - evaporator cooling from the expansion valve - cooling.
6) Loosen the heater hose clamps and remove the hoses.

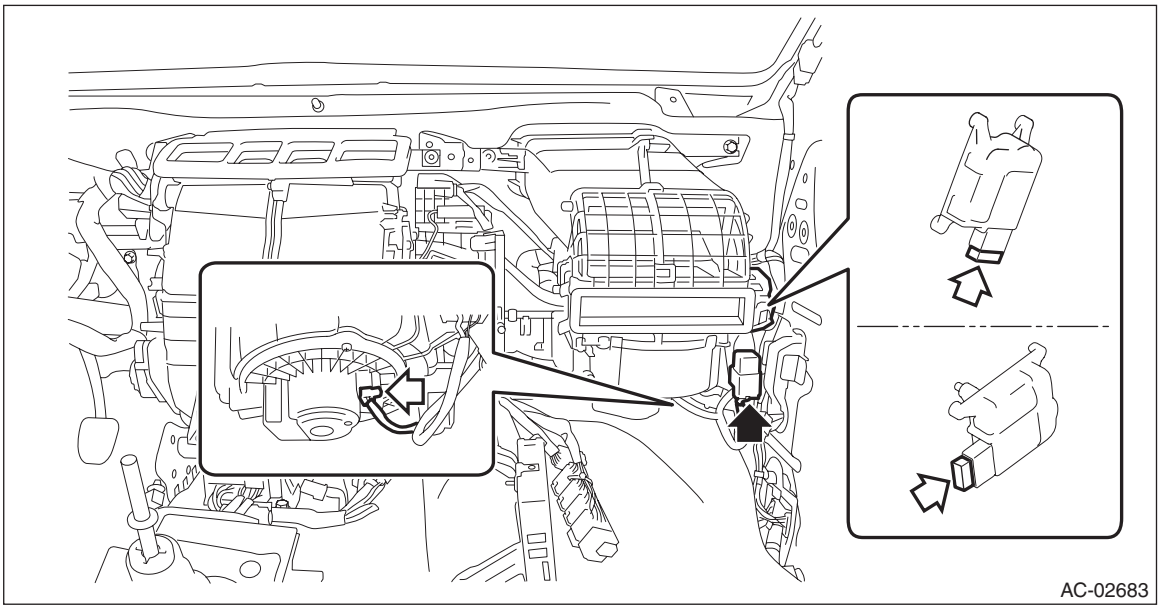


7) Remove the instrument panel assembly. <Ref. to EI-74, REMOVAL, Instrument Panel Assembly.>

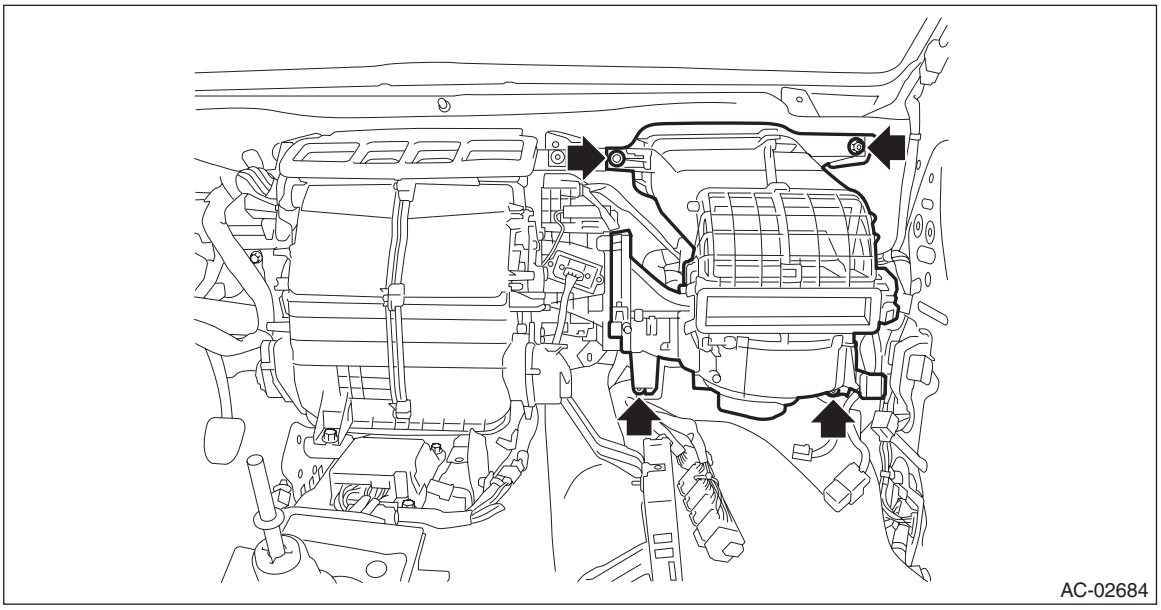
8) Remove the engine control module (ECM).
(1) Release the lock and remove the relay holder.
(2) Remove the nut (a).
(3) Loosen the bolt (b), and remove the engine control module (ECM).



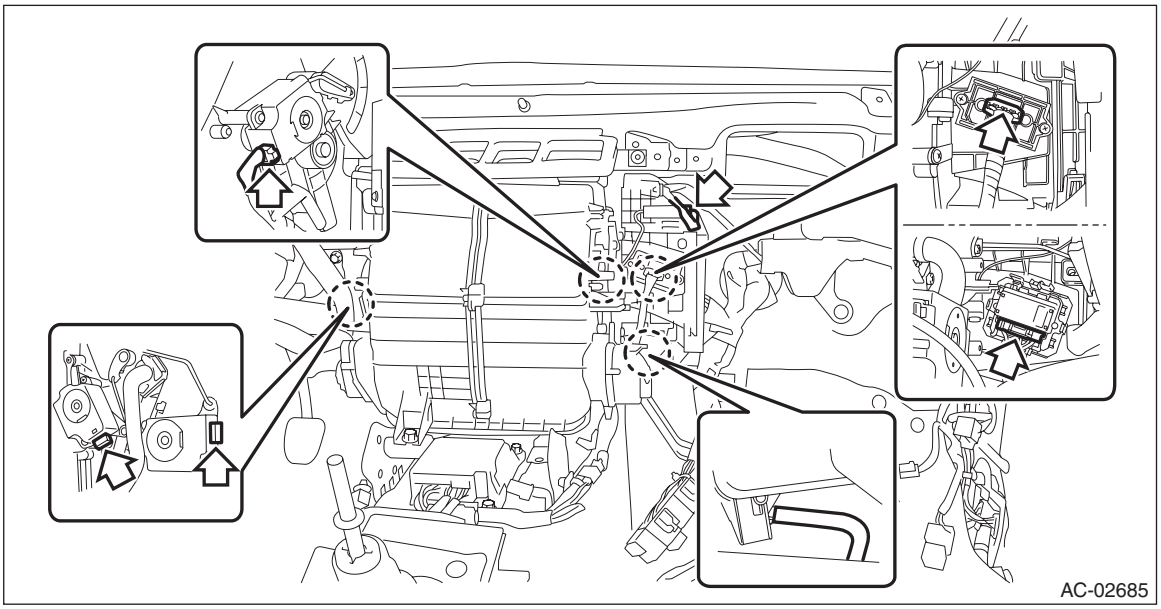
9) Remove the blower motor unit assembly.
(1) Disconnect the blower motor relay and each connector.



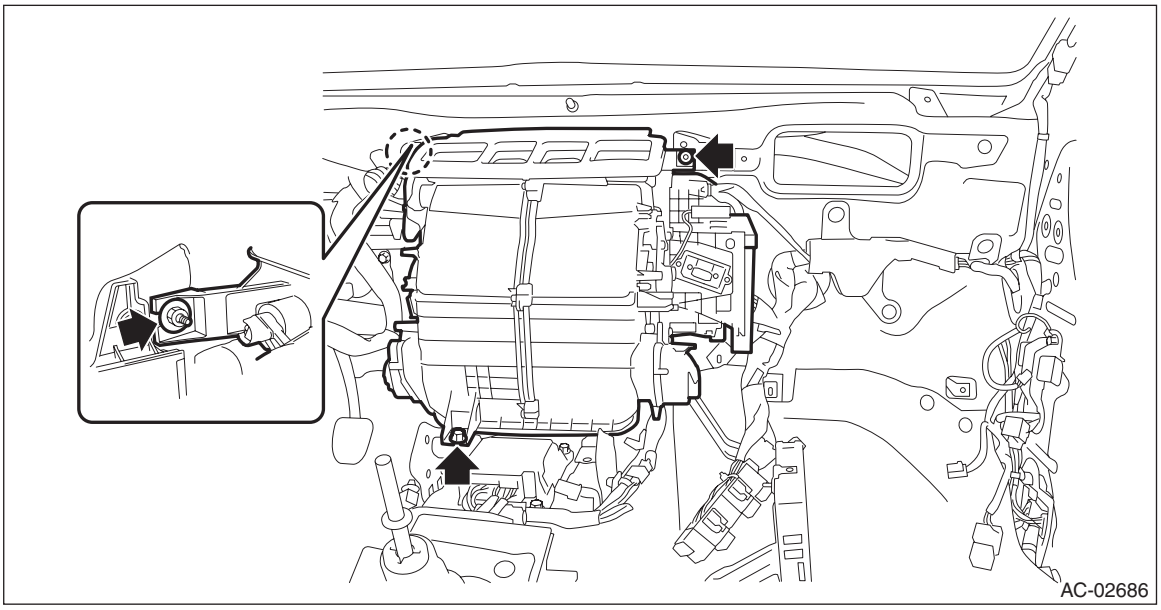
(2) Remove the bolts and nuts to remove blower motor unit assembly.



10) Remove the heater and cooling unit assembly.
(1) Disconnect each connector and the hose - drain.



(2) Remove the bolt and nuts, and remove the heater & cooling unit assembly.



## B: INSTALLATION

**CAUTION:**
**Replace O-rings with new parts and install securely.**
1) Install each part in the reverse order of removal.

NOTE:
Refer to “INSTALLATION” of “Instrument Panel Assembly”. <Ref. to EI-92, INSTALLATION, Instrument Panel Assembly.>

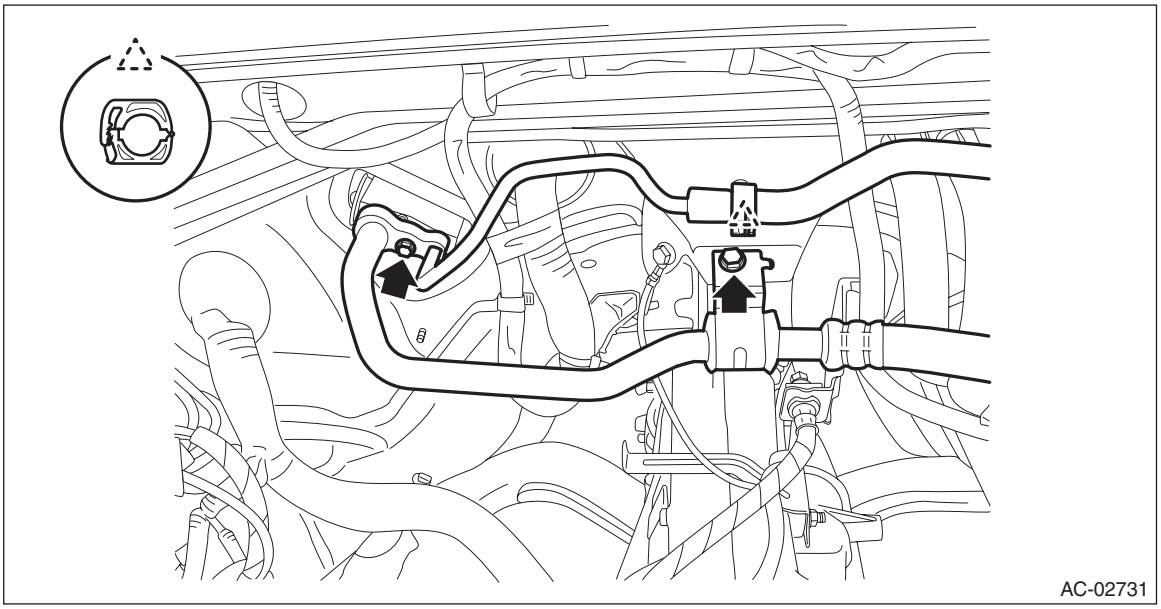
***Tightening torque:***
***Heater cooling unit: <Ref. to AC-6, HEATER AND COOLING UNIT, COMPONENT, General Description.>***
***Blower motor unit: <Ref. to AC-10, BLOWER MOTOR UNIT, COMPONENT, General Description.>***
***Engine control module (ECM): 7.5 N·m (0.76 kgf-m, 5.5 ft-lb)***
2) Fill engine coolant. <Ref. to CO(H4DO)-14, FILLING OF ENGINE COOLANT, REPLACEMENT, Engine Coolant.>
3) Charge refrigerant. <Ref. to AC-27, PROCEDURE, Refrigerant Charging Procedure.>

# 18.Evaporator

## A: REMOVAL

1) Disconnect the ground cable from battery.
2) Using the refrigerant recovery system, discharge refrigerant. <Ref. to AC-26, PROCEDURE, Refrigerant Recovery Procedure.>
3) Remove the intake boot. <Ref. to IN(H4DO)-12, REMOVAL, Air Intake Boot.>

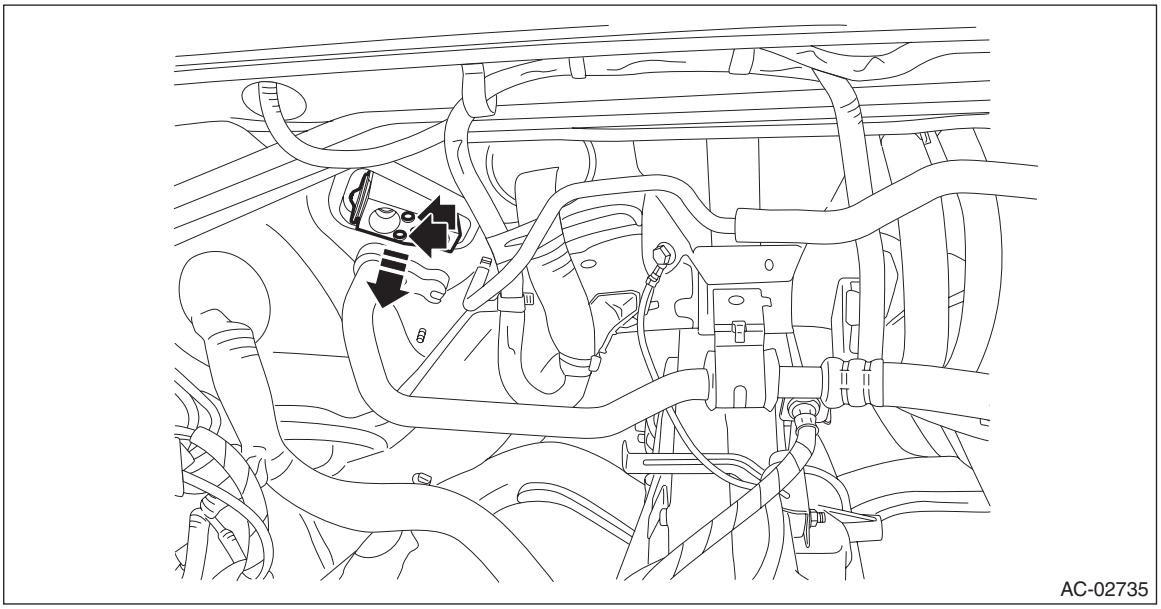
**CAUTION:**
**Move aside the intake boot to perform the operation without disconnecting the PCV hose.**
4) Remove the expansion valve - cooling.
(1) Remove the bolt, and detach the hose - pressure suction and the pipe - evaporator cooling.



AC-02731

(2) Remove the bolt, and remove the expansion valve - cooling.

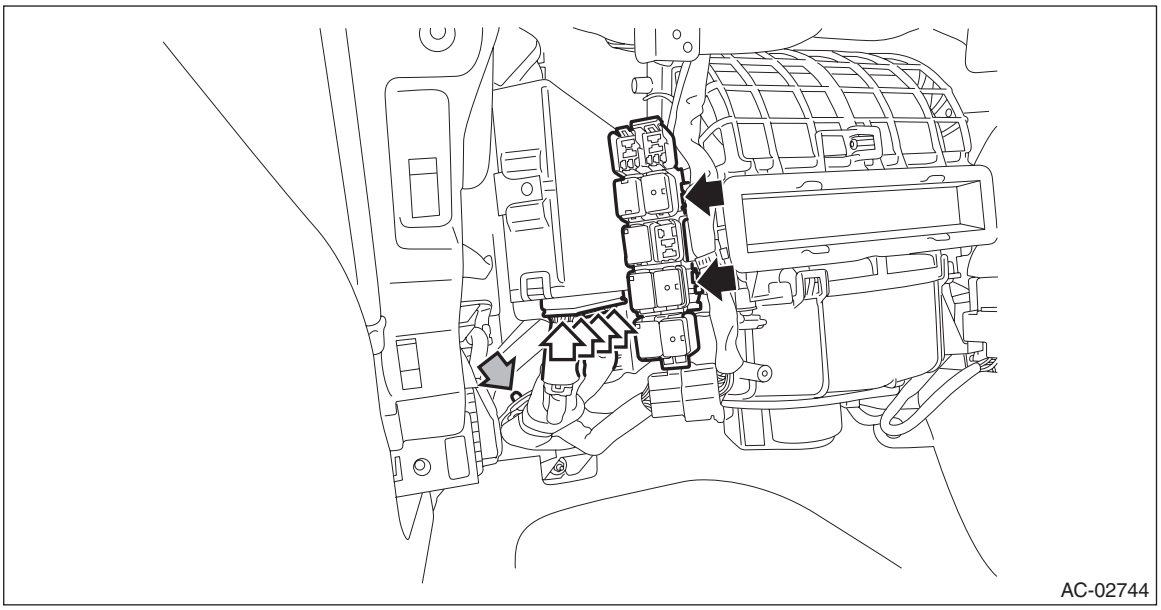
***PREPARATION TOOL:***
***Hexagon wrench: 4 mm (0.16 in)***



AC-02735

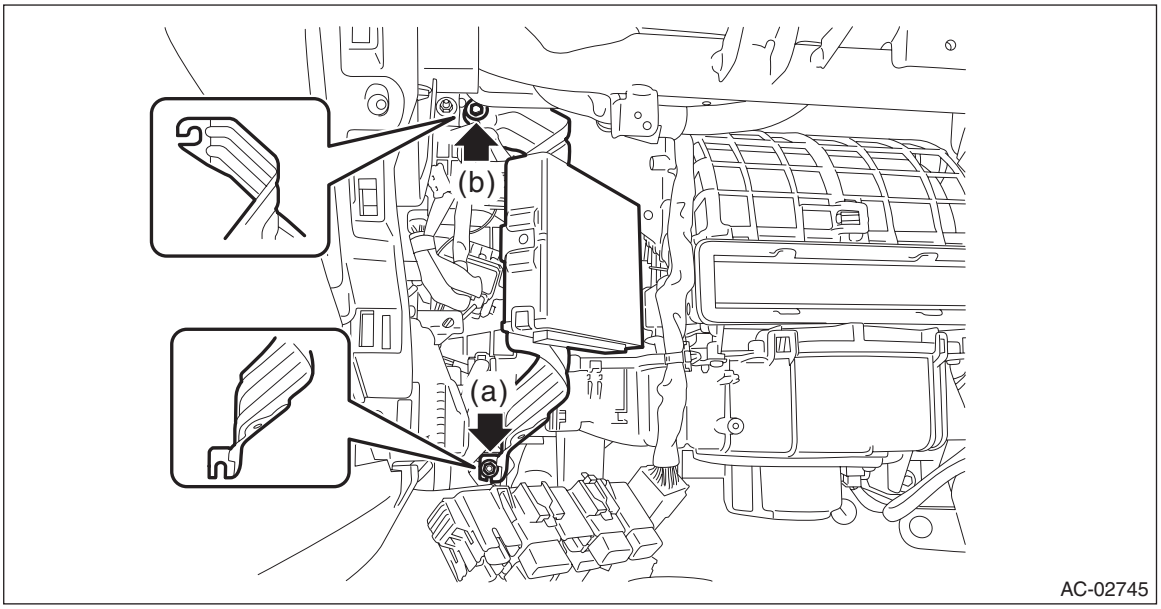
5) Remove the glove box. <Ref. to EI-67, REMOVAL, Glove Box.>

6) Remove the engine control module (ECM).
(1) Release the lock and remove the relay holder.
(2) Remove the harness clip, and disconnect the connector.



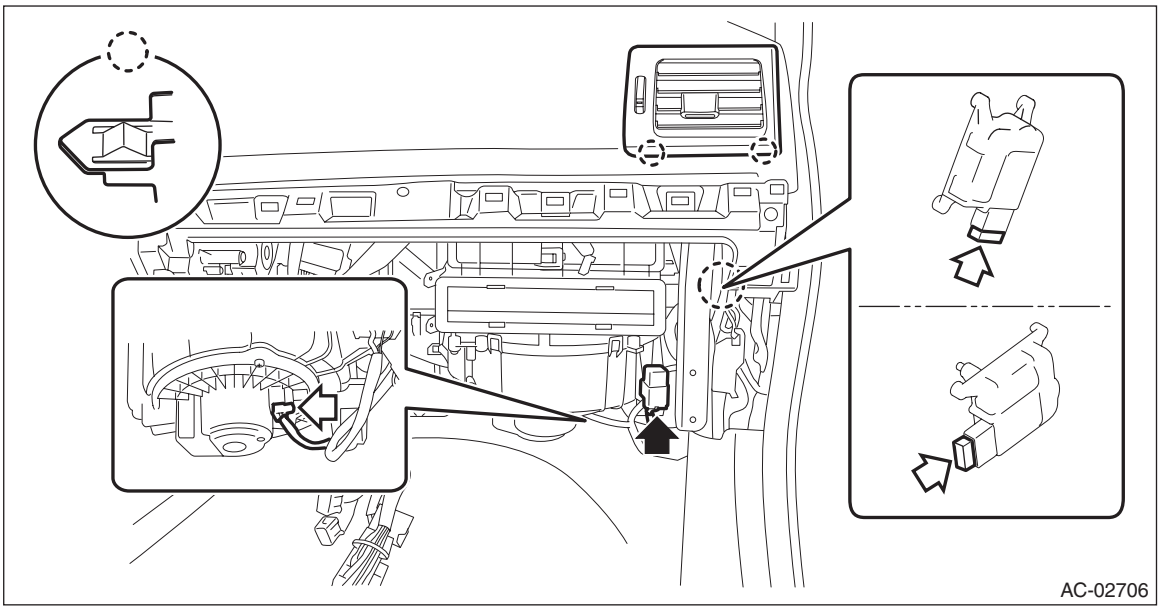
AC-02744

(3) Remove the nut (a).
(4) Loosen the bolt (b), and remove the engine control module (ECM).



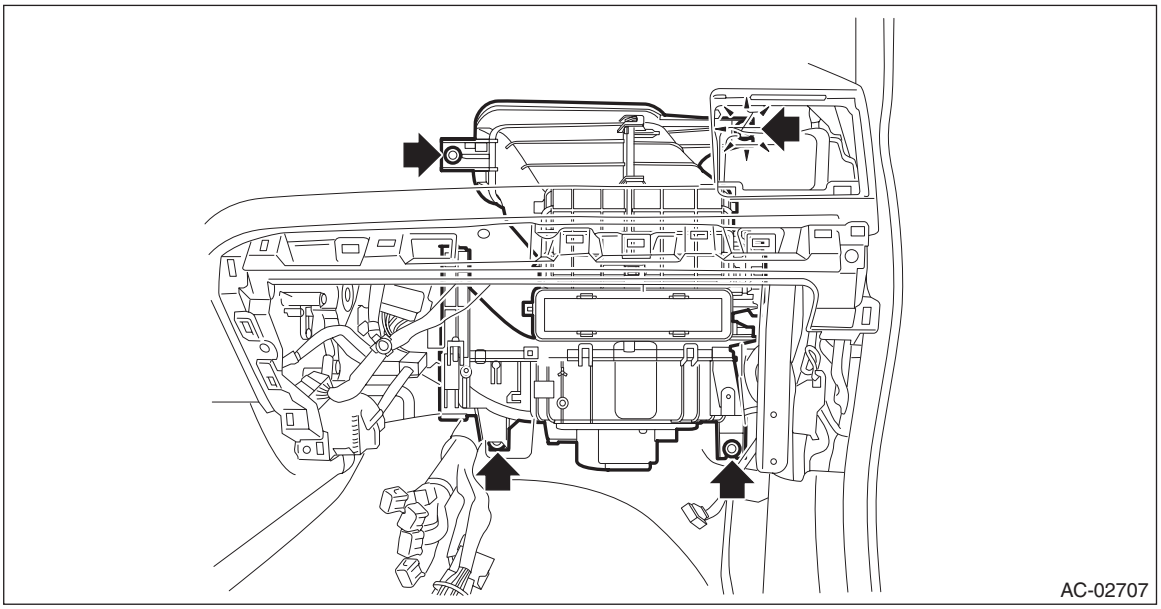
AC-02745

7) Remove the blower motor unit assembly.
(1) Release the claws, and then remove the grille assembly - ventilation RH.
(2) Disconnect the blower motor relay and each connector.

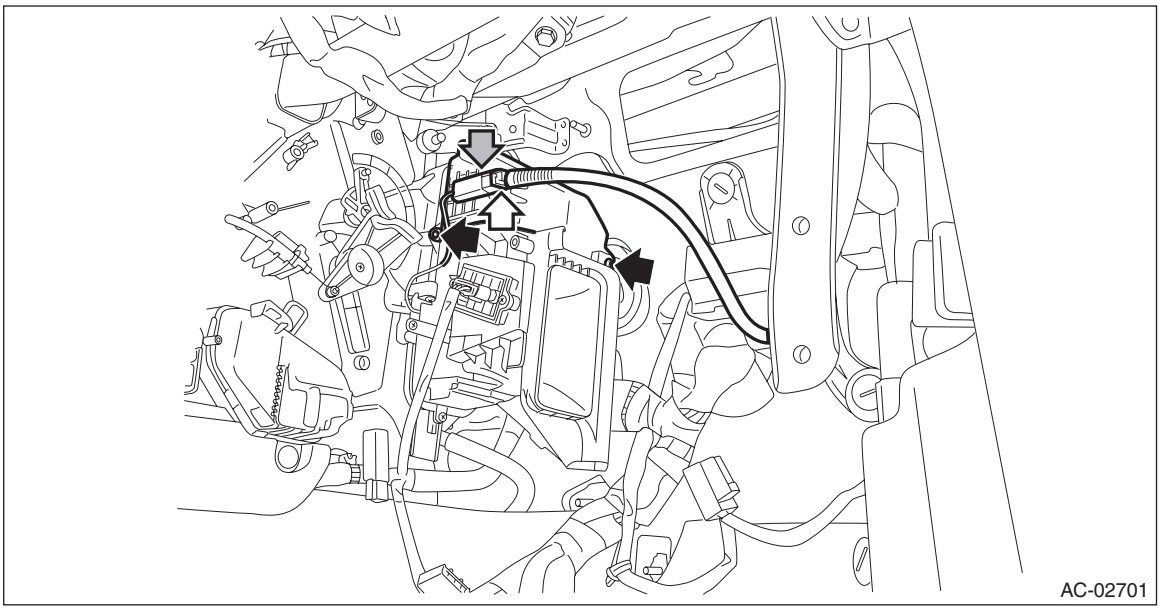


(3) Remove the bolts and nuts to remove blower motor unit assembly.

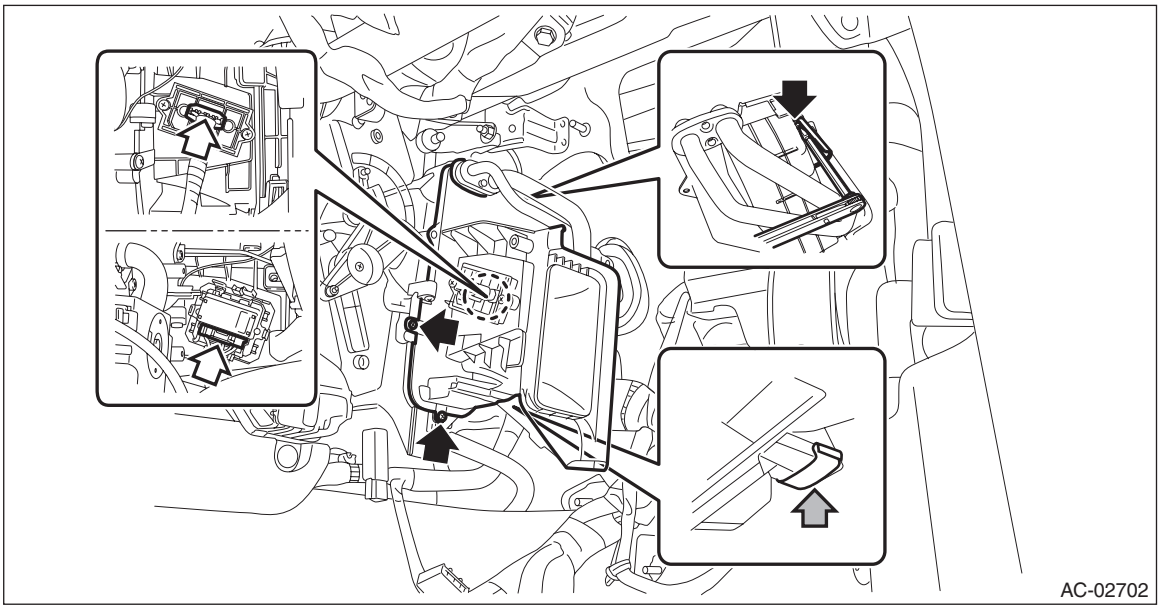
NOTE:
Remove the RH upper nut from the mounting portion of the grille assembly - ventilation RH.



8) Remove the evaporator assembly - cooling.
(1) Disconnect the connector and lock of the thermostat - cooling.
(2) Remove the screws and detach the cover.

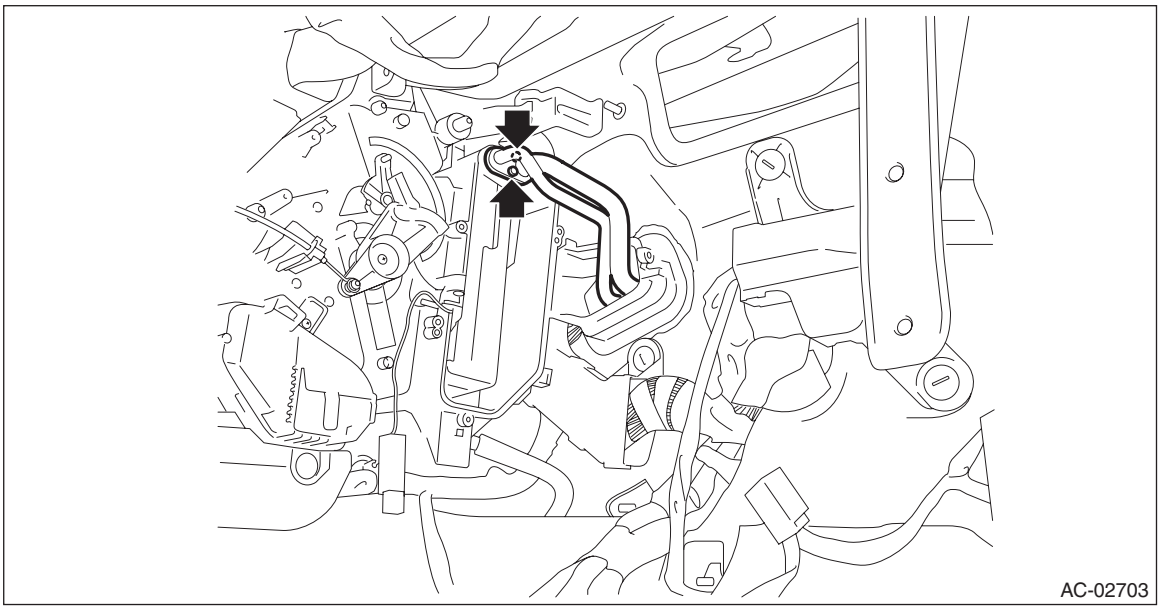


(3) Remove the cover - heater unit.
a) Disconnect the connector for the power transistor or resistor.
b) Remove the screws and clips to remove the cover - heater unit.

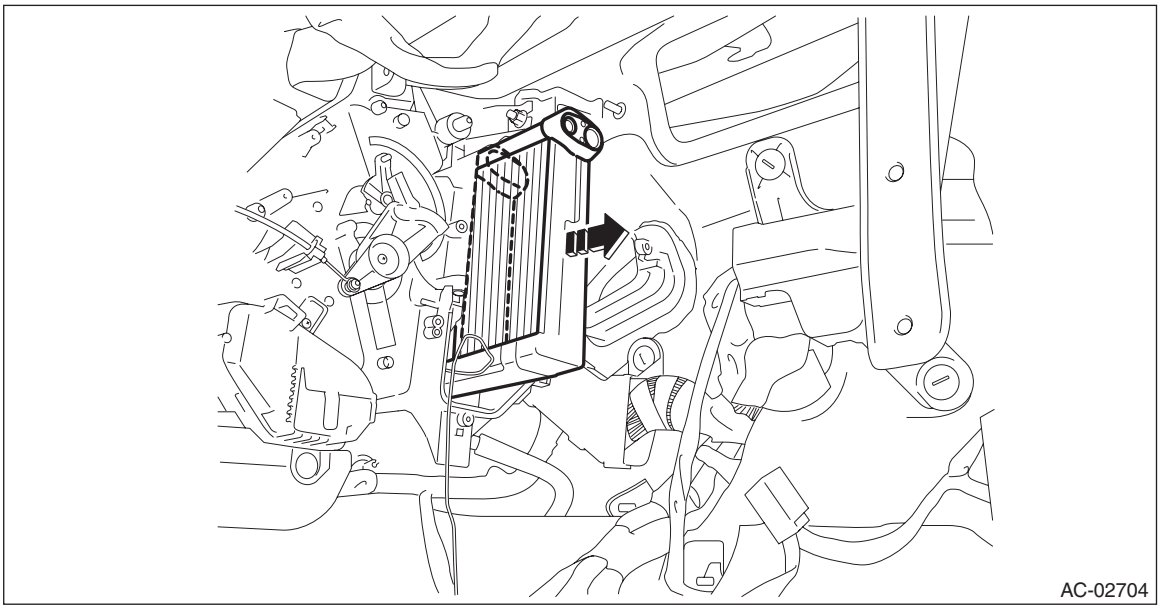


(4) Remove the bolt, and detach the pipe - evaporator core.

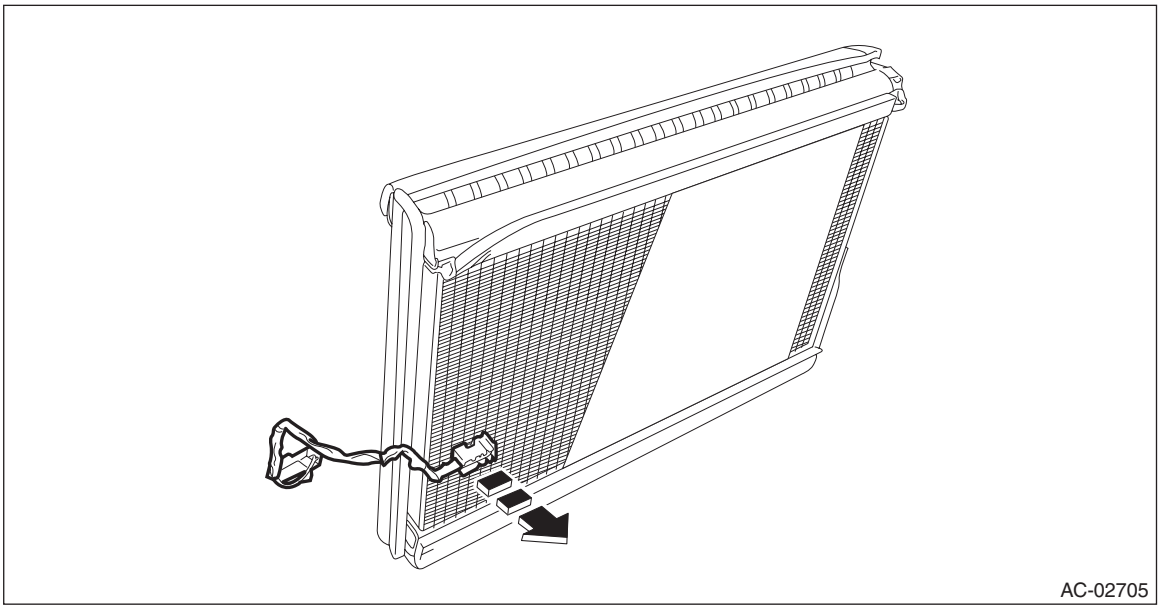
***PREPARATION TOOL:***
***Hexagon wrench: 4 mm (0.16 in)***



(5) Pull out the evaporator assembly - cooling from the case - heater unit.



(6) Remove the thermostat - cooling from the evaporator assembly - cooling.



## B: INSTALLATION

**CAUTION:**
**• If the evaporator assembly - cooling has been replaced, add an appropriate amount of compressor oil. <Ref. to AC-34, ADJUSTMENT, Compressor Oil.>**
**• When the evaporator assembly - cooling has been replaced, replace the packing of the expansion valve - cooling with a new one, and then apply compressor oil.**
**• Make sure that the water seal packing on the cover attachment area is securely attached.**
**• Replace the O-rings with new parts, and then apply compressor oil.**
**• After installing the grille assembly - ventilation RH, check that the air vent grille of the grille assembly - ventilation RH is inserted correctly into the air vent duct.**

1) Install the thermostat - cooling to the specified position. <Ref. to AC-82, INSTALLATION, Evaporator Sensor.>
2) Install each part in the reverse order of removal.

***Tightening torque:***
***Blower motor unit: <Ref. to AC-10, BLOWER MOTOR UNIT, COMPONENT, General Description.>***
***Engine control module (ECM): 7.5 N·m (0.76 kgf-m, 5.5 ft-lb)***

3) Charge refrigerant. <Ref. to AC-27, PROCEDURE, Refrigerant Charging Procedure.>

## C: INSPECTION

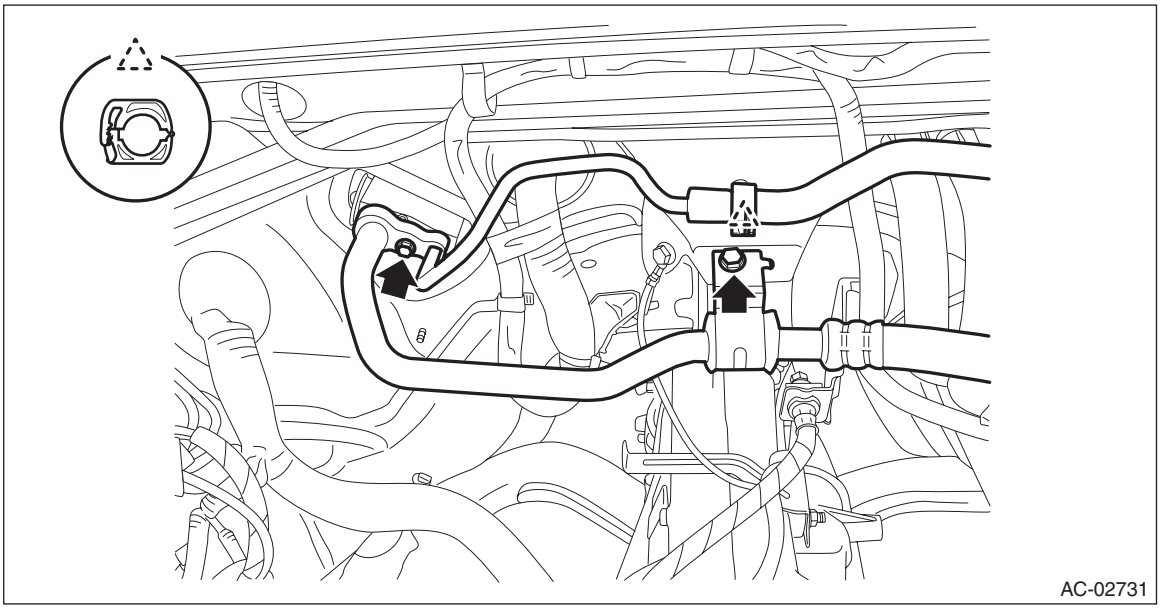
1) Check the evaporator fin for dust. Blow with compressed air or flush fins with water as needed.
2) If any oil leak is found, replace the evaporator assembly - cooling.

# 19.Expansion Valve

## A: REMOVAL

1) Disconnect the ground cable from battery.
2) Using the refrigerant recovery system, discharge refrigerant. <Ref. to AC-26, PROCEDURE, Refrigerant Recovery Procedure.>
3) Remove the intake boot. <Ref. to IN(H4DO)-12, REMOVAL, Air Intake Boot.>

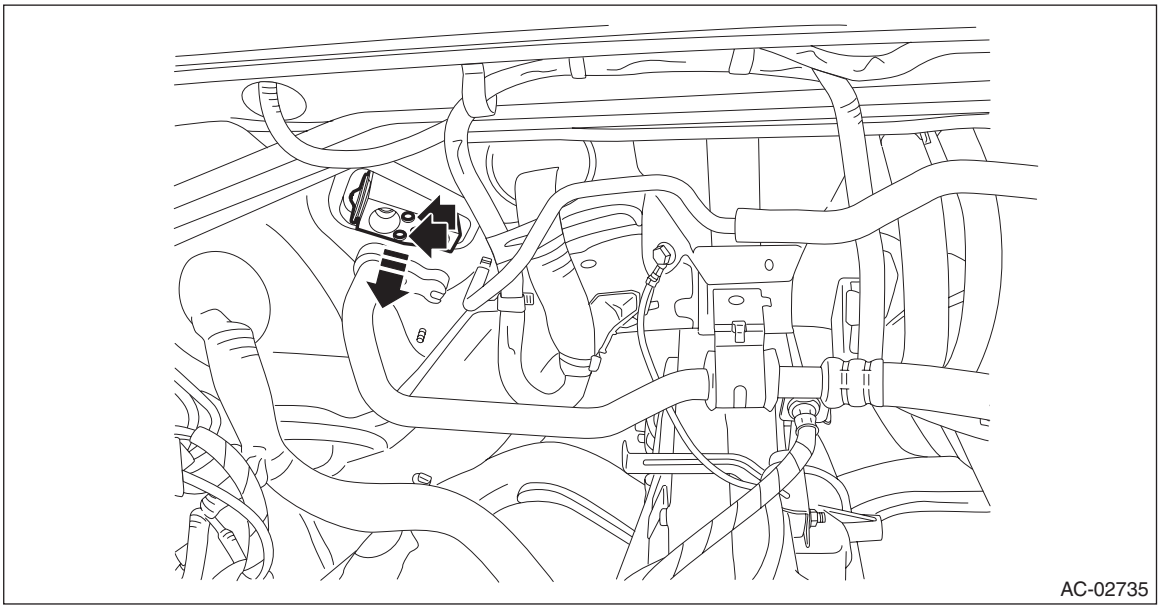
**CAUTION:**
**Move aside the intake boot to perform the operation without disconnecting the PCV hose.**
4) Remove the expansion valve - cooling.
(1) Remove the bolt, and detach the hose - pressure suction and the pipe - evaporator cooling.



AC-02731

(2) Remove the bolt, and remove the expansion valve - cooling.

***PREPARATION TOOL:***
***Hexagon wrench: 4 mm (0.16 in)***



AC-02735

## B: INSTALLATION

**CAUTION:**
**Replace the O-rings with new parts, and then apply compressor oil.**
1) Install each part in the reverse order of removal.

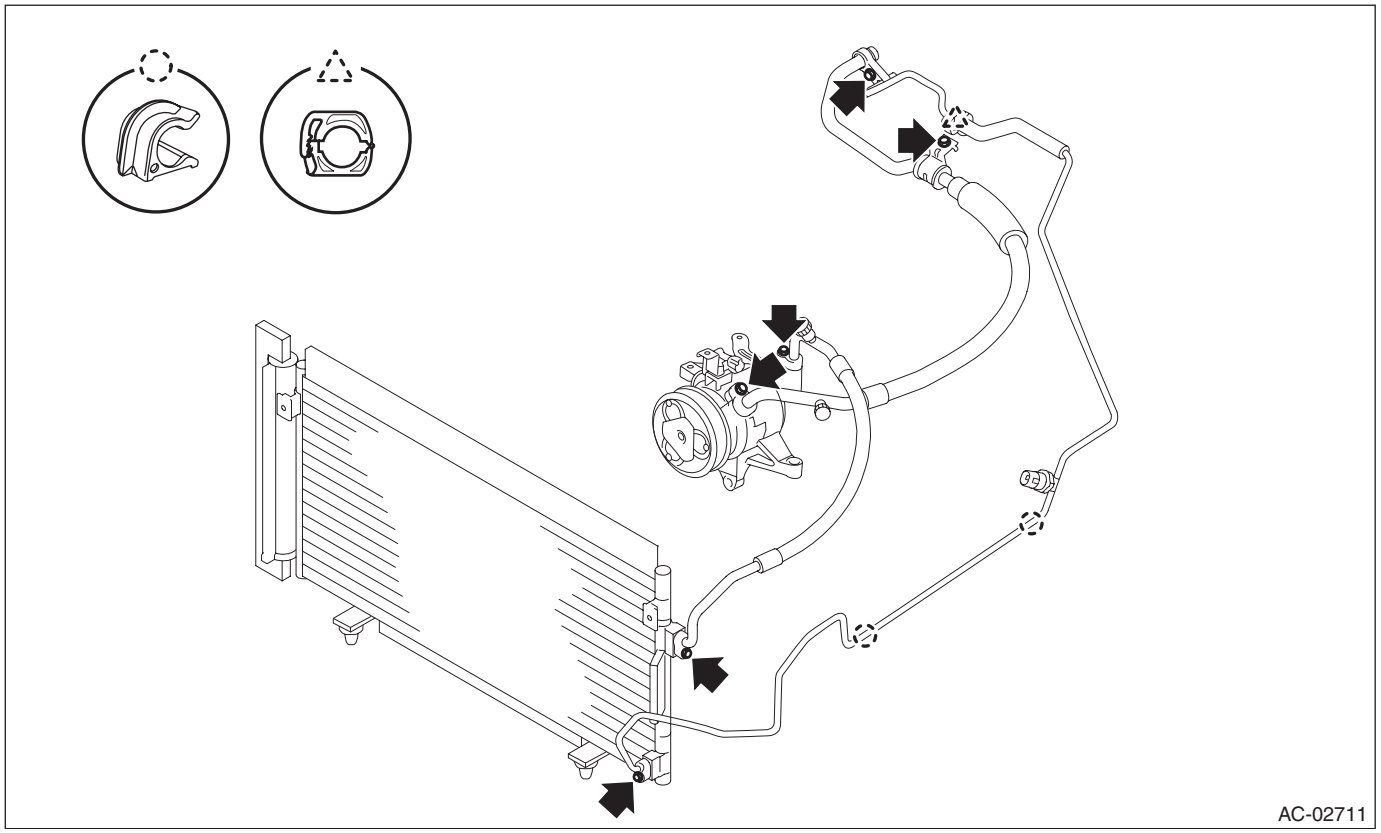
***Tightening torque:***
***Refer to "COMPONENT" of "General Description". <Ref. to AC-12, AIR CONDITIONING UNIT, COMPONENT, General Description.>***
2) Charge refrigerant. <Ref. to AC-27, PROCEDURE, Refrigerant Charging Procedure.>

# 20.Hose and Pipe

## A: REMOVAL

**CAUTION:**
- **When disconnecting hoses, do not apply excessive force.**
- **Seal the disconnected hose with a plug or vinyl tape to prevent foreign matter from entering.**

1) Disconnect the ground cable from battery.
2) Using the refrigerant recovery system, discharge refrigerant. <Ref. to AC-26, PROCEDURE, Refrigerant Recovery Procedure.>
3) Remove the bolt and detach the hoses and pipes.



## B: INSTALLATION

**CAUTION:**
- **If the hose and pipe has been replaced, add an appropriate amount of compressor oil to the compressor. <Ref. to AC-34, ADJUSTMENT, Compressor Oil.>**
- **Replace the O-rings with new parts, and then apply compressor oil.**
- **When connecting hoses, do not apply an excessive force to them. After installing, check that no torsion or excessive tension applied to the hoses.**

1) Install each part in the reverse order of removal.

***Tightening torque:***
***Refer to "COMPONENT" of "General Description". <Ref. to AC-12, AIR CONDITIONING UNIT, COMPONENT, General Description.>***

2) Charge refrigerant. <Ref. to AC-27, PROCEDURE, Refrigerant Charging Procedure.>

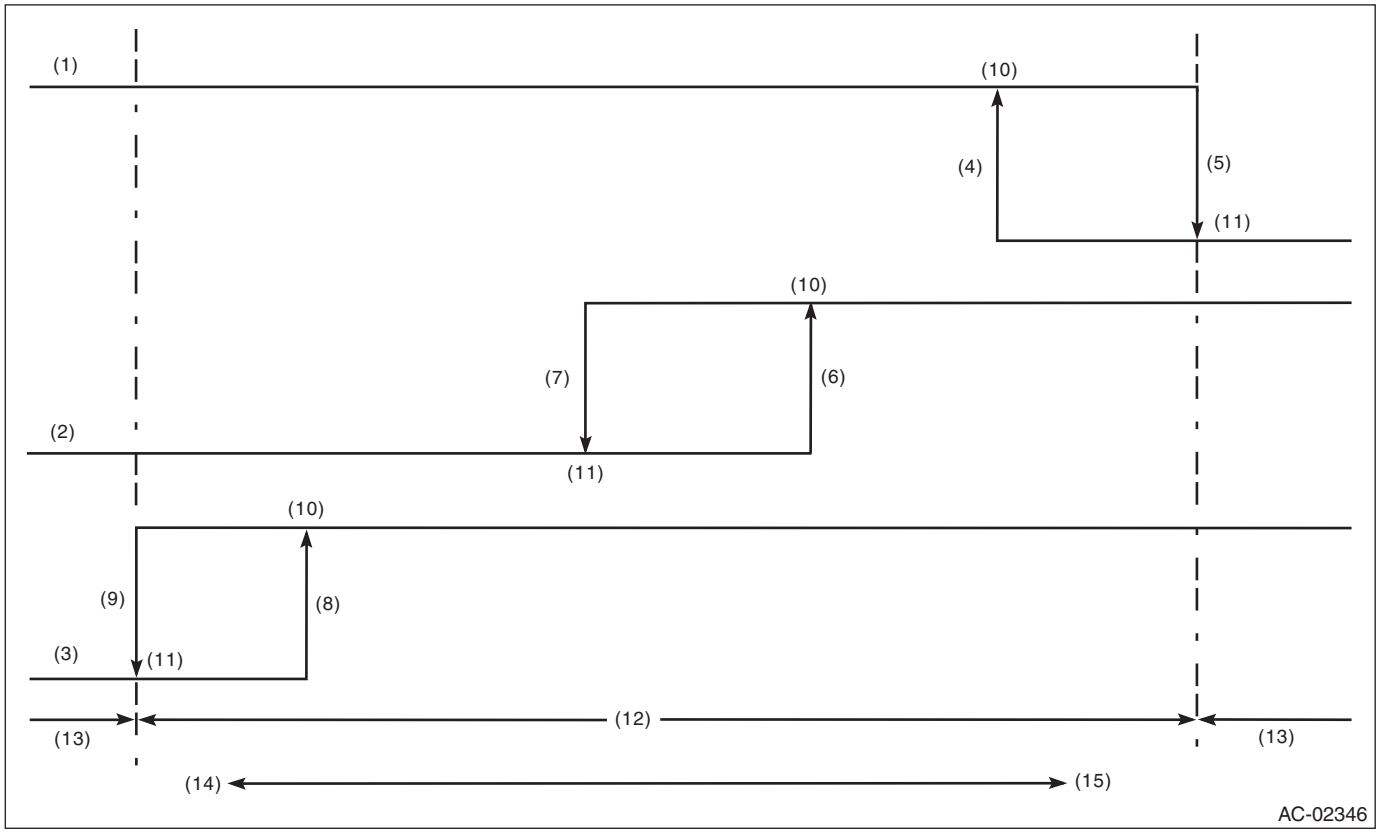
## C: INSPECTION

1) Check the hoses for cracks, damage and expansion. Replace the hose if faulty.
2) Check the pipes for crack or damage. Replace the pipe if faulty.

# 21.Pressure Switch (Triple Pressure Switch)

## A: INSPECTION

1) Connect the manifold gauge to the service valve on the high-pressure side.
2) Disconnect the connector.
3) Start the air conditioner, and check the operating pressure of switch by turning the compressor assembly (magnet clutch) to ON/OFF. Operation of each switch is as follows.



(1) High pressure switch
(2) Middle pressure switch
(3) Low pressure switch
(4) 2,350±200 kPa (24.00±2.04 kg/cm$^2$, 340.7±29.0 psi)
(5) 2940±200 kPa (29.98±2.04 kg/cm$^2$, 426.3±29.0 psi)
(6) 1,770±100 kPa (18.05±1.02 kg/cm$^2$, 256.65±14.5 psi)
(7) 1,470±120 kPa (14.99±1.22 kg/cm$^2$, 213.15±17.4 psi)
(8) 225±30 kPa (2.29±0.31 kg/cm$^2$, 32.6±4.3 psi)
(9) 196±25 kPa (2.00±0.25 kg/cm$^2$, 28.4±3.6 psi)
(10) ON
(11) OFF
(12) Operative range of compressor assembly
(13) Inoperative range of compressor assembly
(14) Low pressure
(15) High pressure

NOTE:
• High pressure switch turns the compressor assembly (magnet clutch) to OFF when the refrigerant pressure becomes extremely high to prevent the evaporator, air conditioner piping and expansion valve from getting damaged or frozen, etc.
• The middle pressure switch is used to effectively control the radiator fan output by judging high load/low load in normal pressure range.
• The low pressure switch detects a refrigerant shortage and deactivates the compressor assembly (magnet clutch) if the refrigerant pressure is abnormally low. (Because any further compressor assembly operation in such a state may lead to compressor seizure)

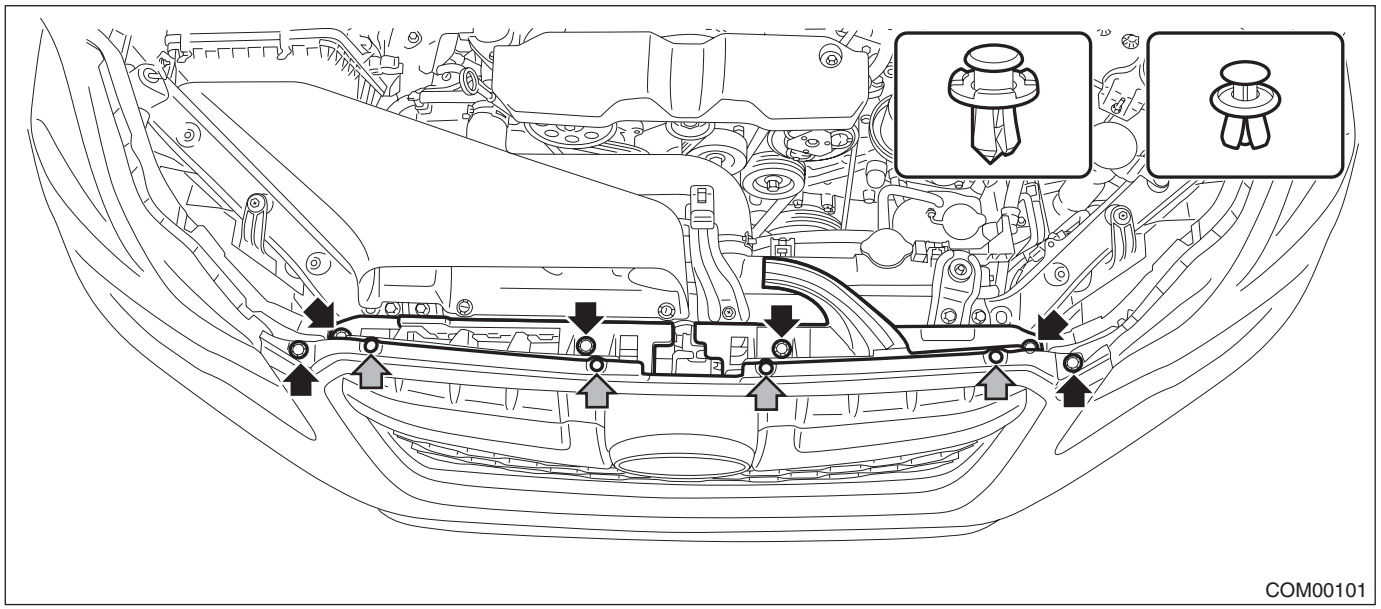
# 22.Ambient Sensor

## A: REMOVAL

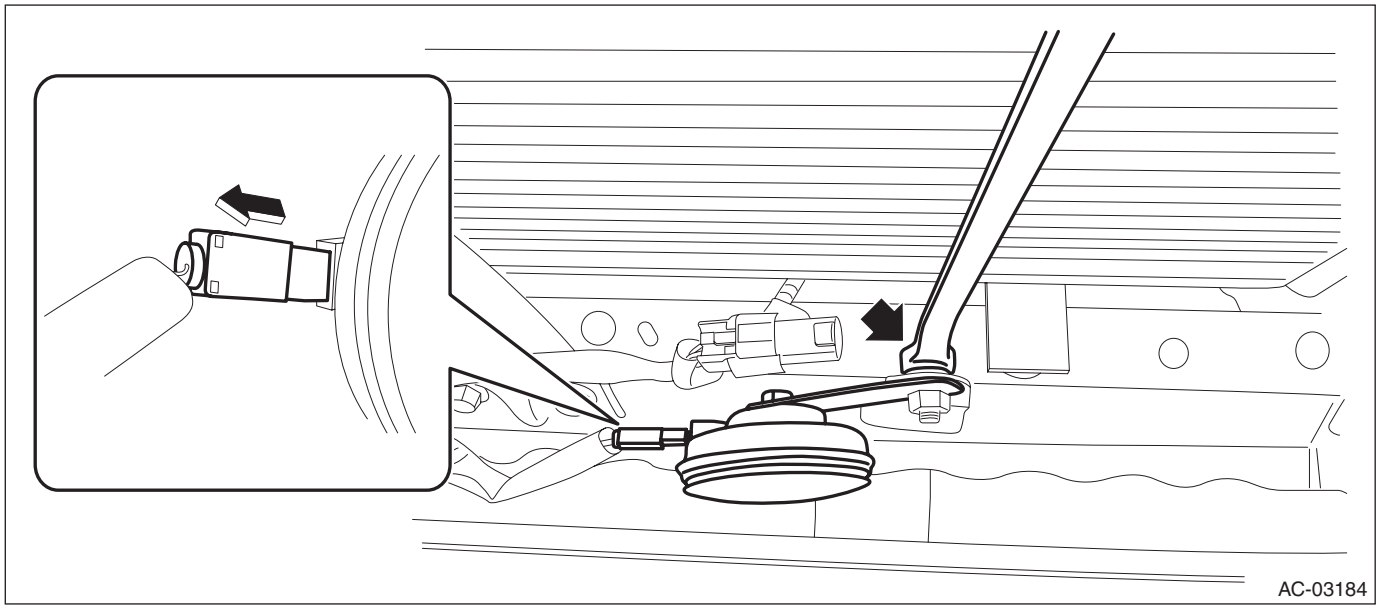
### 1. EXCEPT FOR XV MODEL

1) Disconnect the ground cable from battery.
2) Remove the clip, and remove the bracket - grille.

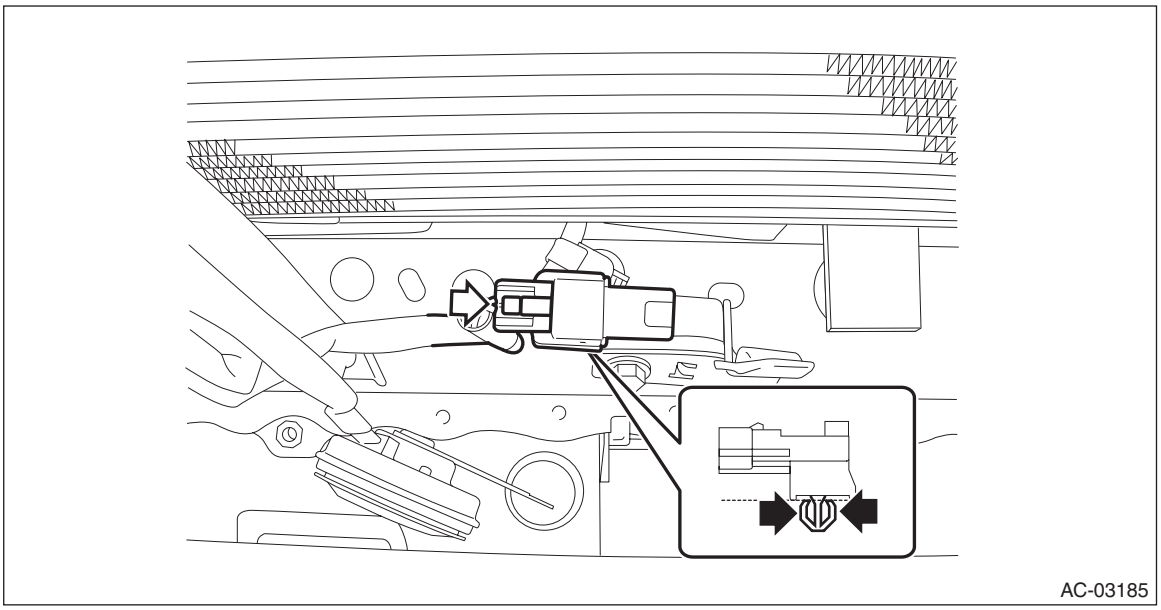
NOTE:
To prevent damage to the bracket - grille, make sure to remove all clips.



3) Remove the horn assembly - Lo.
   (1) Disconnect the connector.
   (2) Remove the horn bracket mounting bolt, and remove the horn assembly - Lo.

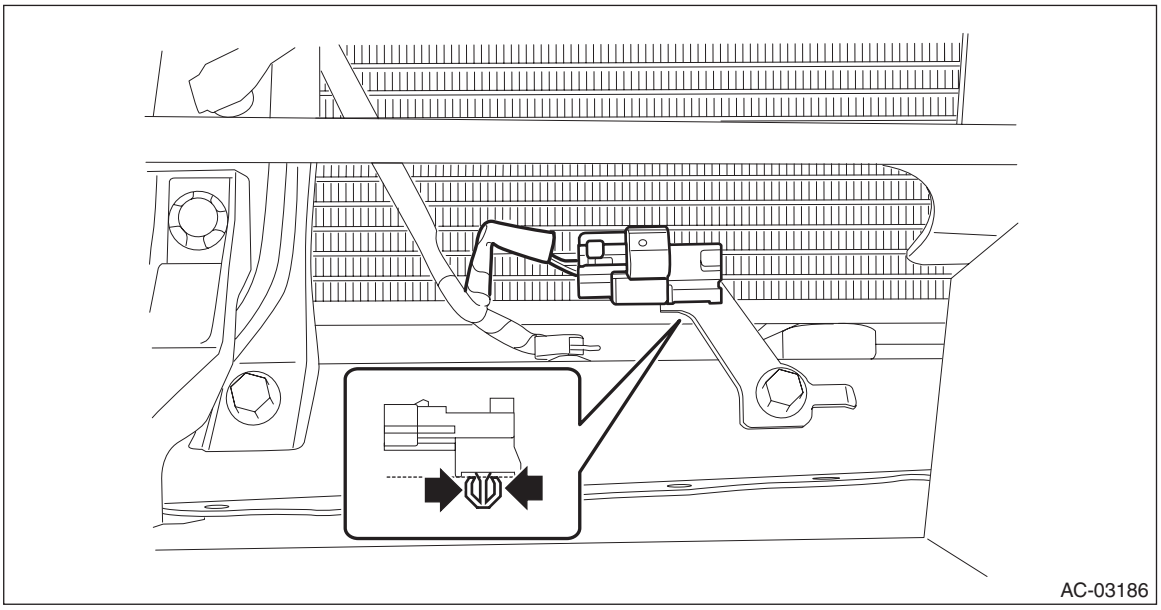


4) Remove the ambient sensor.
   (1) Disconnect the connector.
   (2) Release the claws, and then remove the ambient sensor from the bracket.



### 2. XV MODEL

1) Disconnect the ground cable from battery.
2) Remove the ambient sensor.
   (1) Disconnect the connector.
   (2) Release the claws, and then remove the ambient sensor from the bracket.



## B: INSTALLATION

Install each part in the reverse order of removal.

***Tightening torque:***
***Horn assembly - Lo (except for XV model): 18 N·m (1.84 kgf-m, 13.3 ft-lb)***

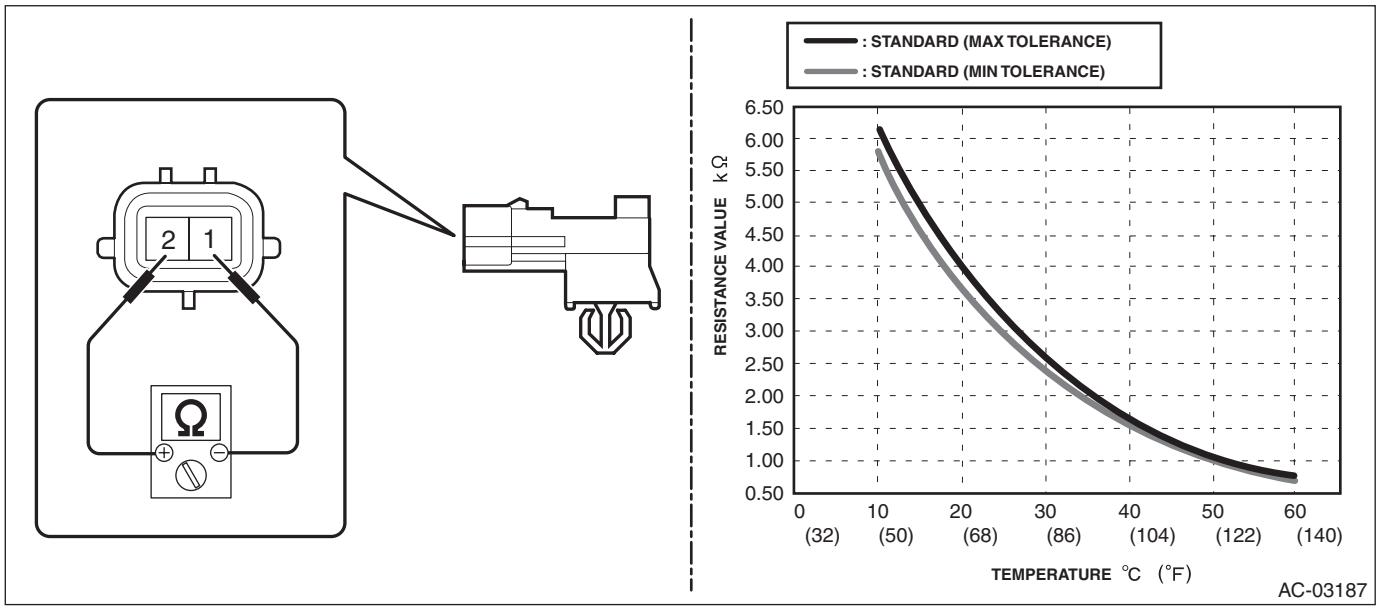
# C: INSPECTION

## UNIT INSPECTION

***Preparation tool:***
***Circuit tester***

1) Visually check the ambient sensor for dirt or damage, and clean or replace as necessary.
2) Check the resistance between ambient sensor terminals.

**CAUTION:**
**During inspection, be careful not to touch the sensor end in order to avoid misjudgment due to body temperature.**



| Terminal No. | Inspection conditions | Standard |
|---|---|---|
| 1 — 2 | 10°C | 5.82 — 6.18 kΩ |
| | 15°C | 4.58 — 4.87 kΩ |
| | 20°C | 3.64 — 3.86 kΩ |
| | 25°C | 2.91 — 3.09 kΩ |
| | 30°C | 2.35 — 2.49 kΩ |
| | 35°C | 1.9 — 2.02 kΩ |
| | 40°C | 1.56 — 1.65 kΩ |
| | 45°C | 1.28 — 1.36 kΩ |
| | 50°C | 1.06 — 1.12 kΩ |
| | 55°C | 0.88 — 0.93 kΩ |
| | 60°C | 0.74 — 0.78 kΩ |

3) Replace the ambient sensor if the inspection result is not within the standard value.

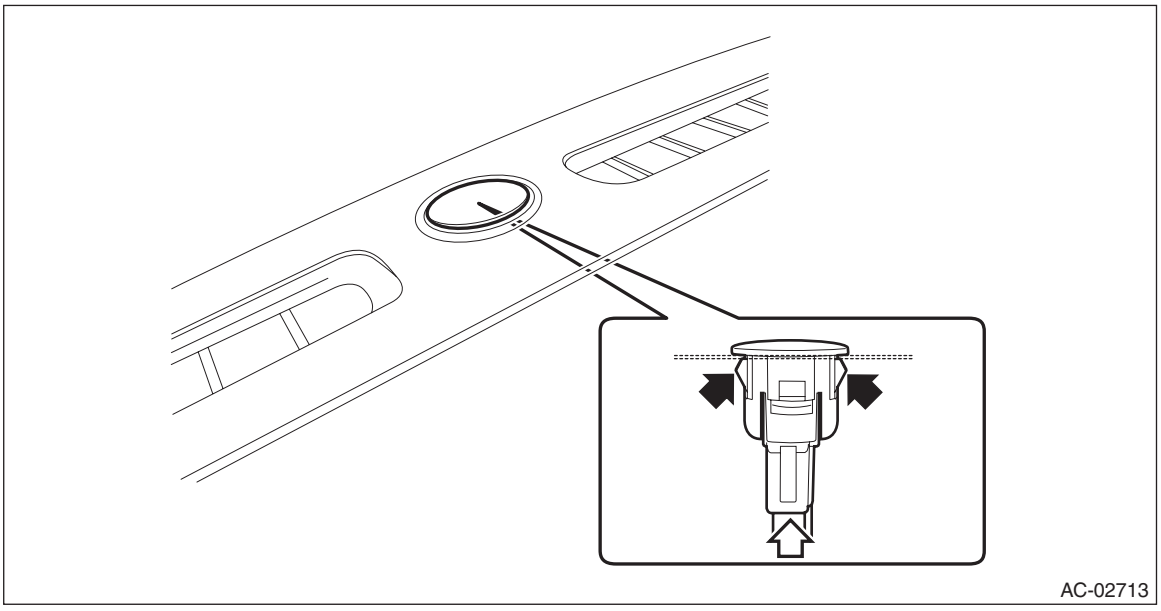
# 23.Sunload Sensor (Auto A/C Model)

## A: REMOVAL

**CAUTION:**
**Be careful not to damage the sensors and interior trims when removing.**

1) Disconnect the ground cable from battery.
2) Remove the sensor - sunload.
   (1) Release the connector and claws, and remove the panel COMPL - instrument UPR.

   (2) Press the left and right claws to remove the sensor - sunload from the panel COMPL - instrument UPR.



## B: INSTALLATION

Install each part in the reverse order of removal.

## C: INSPECTION

**On- the vehicle inspection**

***PREPARATION TOOL:***
***SUBARU SELECT MONITOR III KIT***

1) Check if there is anything that affects sensing, around the sensor - sunload.
   (1) Is there anything placed on the sensor - sunload that disturbs sensing?
   (2) Is there anything on the windshield glass, such as sticker and film, that disturbs sensing?
   - **No** → Go to step 2).
   - **Yes** → Remove everything that affects sensing.

2) Using the Subaru Select Monitor, check «Quantity of Sunload».

NOTE:
For detailed procedures, refer to “PC application help for Subaru Select Monitor”.
   (1) Cover the sensor - sunload with cloth.
   (2) Does the «Quantity of Sunload» indicate 0 $W/m^2$ when the direct sunlight is shielded?
   - **Yes** → Go to step 3).
   - **No** → Replace the sensor - sunload.

3) From the condition in step 2), expose the sensor - sunload to light.
   (1) Place intense light such as incandescent light at 30 cm or less from the sunload sensor.
   (2) Does «Quantity of Sunload» indicate 2000 $W/m^2$ or less?

**CAUTION:**
**The value changes depending on the angle of light.**
   - **Yes** → The sensor - sunload is normal.
   - **No** → Replace the sensor - sunload.

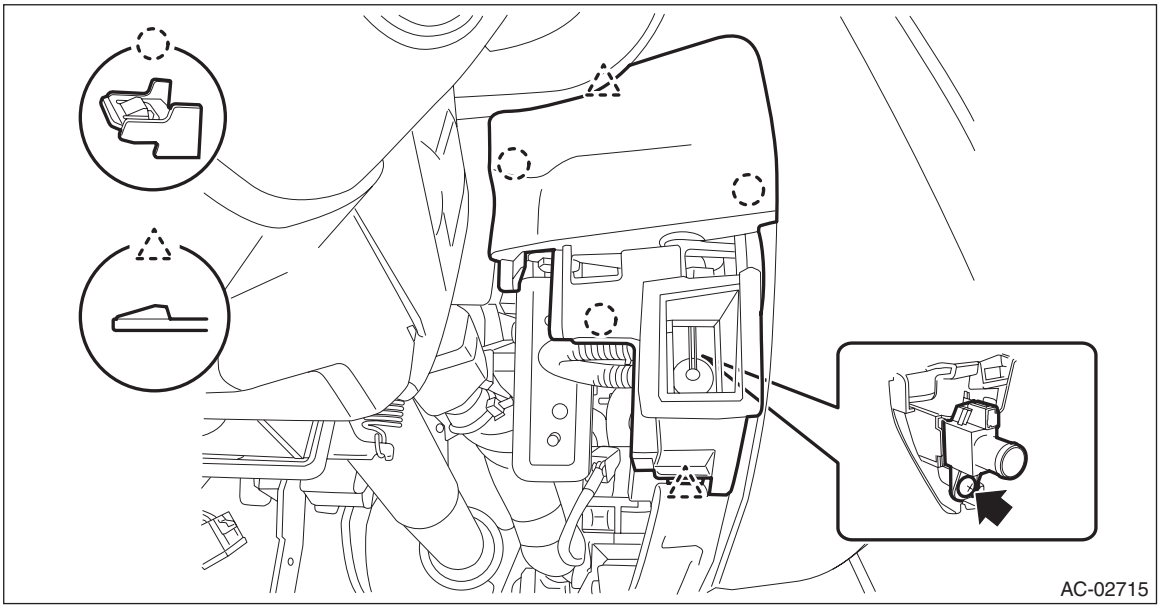
# 24.In-Vehicle Sensor (Auto A/C Model)

## A: REMOVAL

**CAUTION:**
**Be careful not to damage the sensors and interior trims when removing.**

1) Remove the knee airbag module. <Ref. to AB-44, REMOVAL, Knee Airbag Module.>
2) Remove the in-vehicle sensor.
   (1) Disconnect the connector, and remove the aspirator hose.

   (2) Release the claws and remove the cover switch - starter.
   (3) Remove the screw and remove the in-vehicle sensor from the cover switch - starter.



## B: INSTALLATION

Install each part in the reverse order of removal.

NOTE:
Refer to “INSTALLATION” of “Knee Airbag Module”. <Ref. to AB-46, INSTALLATION, Knee Airbag Module.>

***Tightening torque:***
***Blower motor unit: <Ref. to AC-10, BLOWER MOTOR UNIT, COMPONENT, General Description.>***
***Engine control module (ECM): 7.5 N·m (0.76 kgf-m, 5.5 ft-lb)***

## C: INSPECTION

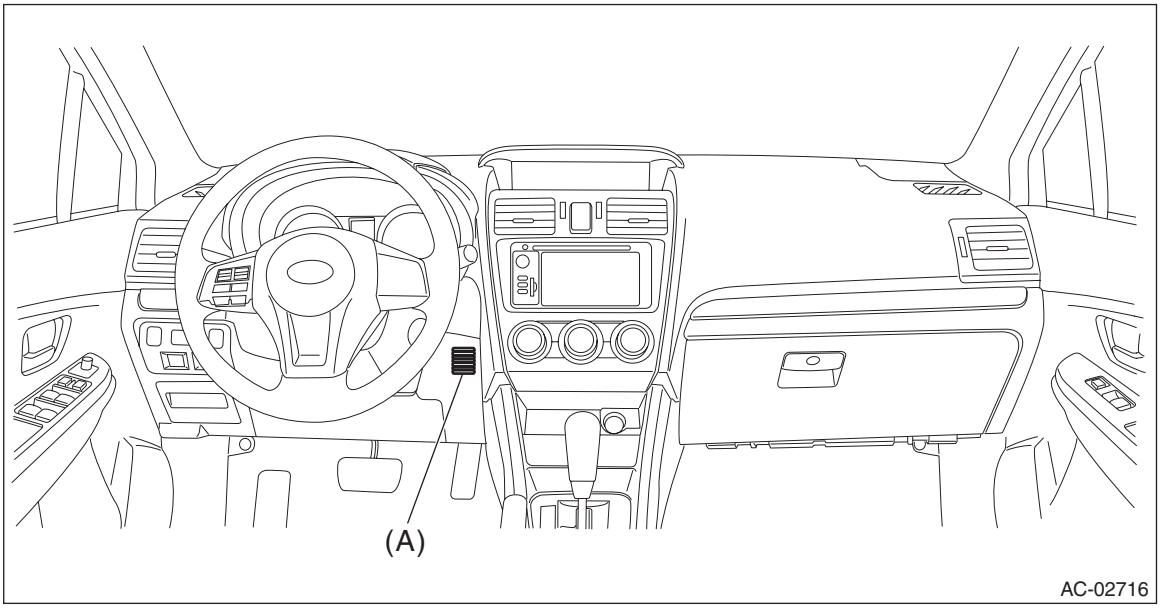
**On- the vehicle inspection**

***PREPARATION TOOL:***
***Circuit tester***

1) Set the vehicle to the following conditions.

| Item | Condition |
|---|---|
| Ignition switch | ON |
| A/C switch | ON |
| Temperature control dial | HI (MAX HOT) |
| Air flow control dial or switch | DEF |
| Fan dial | HI (MAX) |

2) Check the suction port (A) for in-vehicle sensor of the cover assembly - instrument panel LWR driver INN.

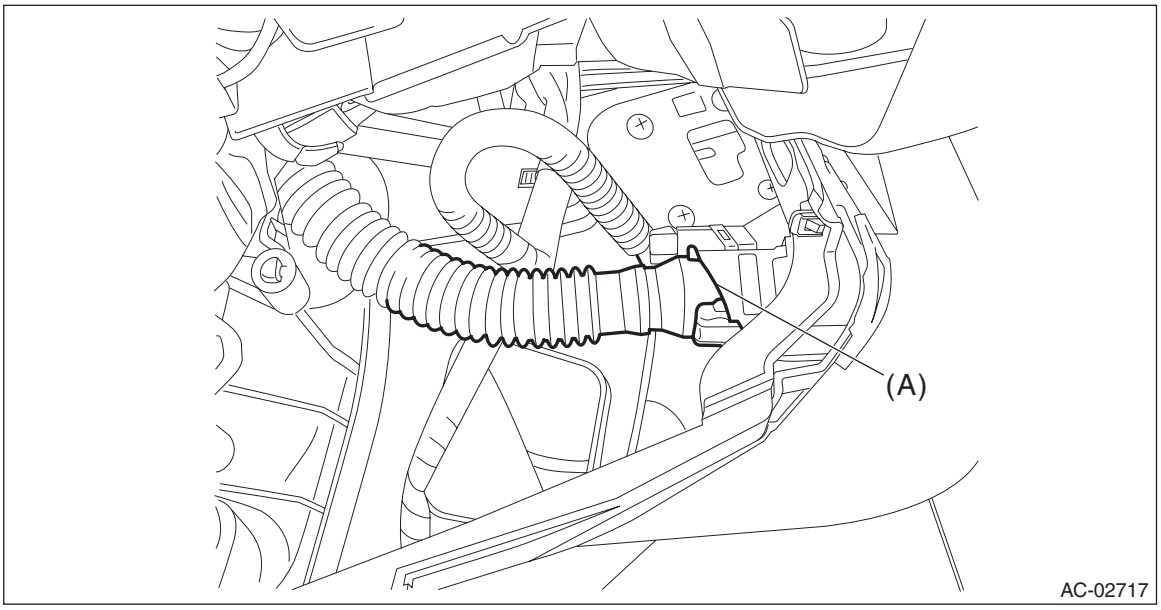


(1) Put a strip of paper close to the front side of suction port (A).
(2) Can you see that the paper moves toward the port and that the air is sucked into the port?

**CAUTION:**
**Be careful not to let the paper get sucked into the port.**

- **Yes** → Go to step 5).
- **No** → Go to step 3).

3) Remove the cover assembly - instrument panel LWR driver INN, and check the aspirator hose (A).



(1) Is the aspirator hose on both sides of case and sensor disengaged?
(2) Is the aspirator hose deformed or cracked?

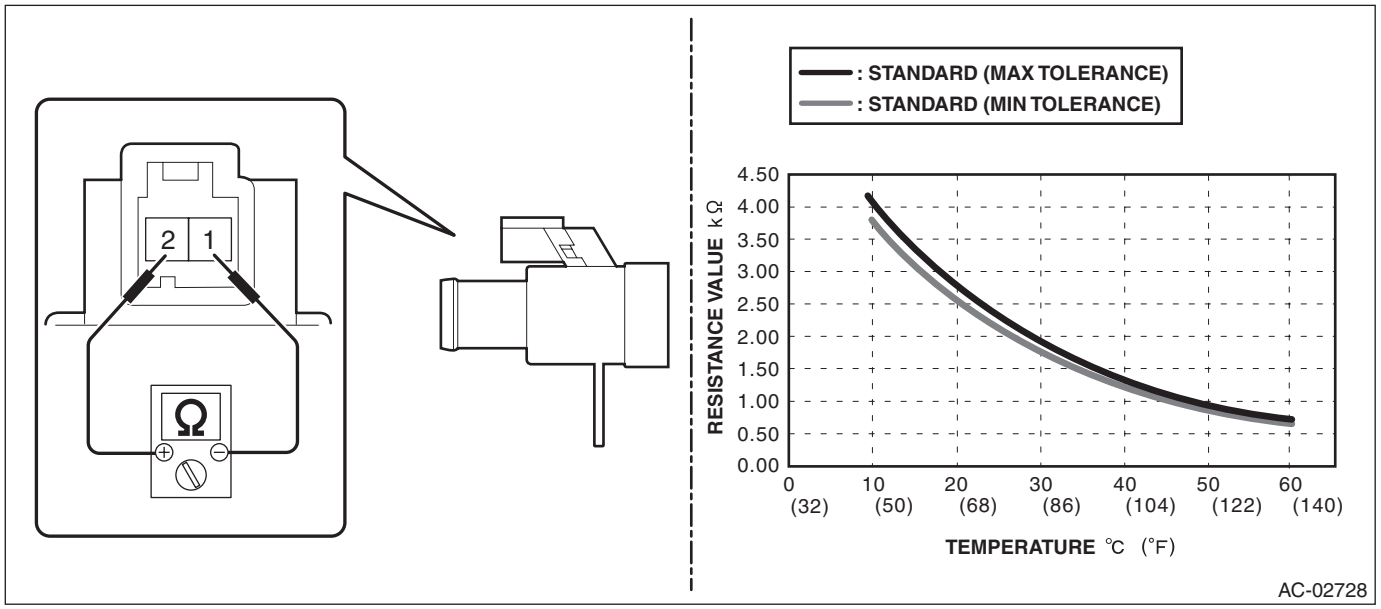
- **No** → Go to step 4).
- **Yes** → Repair or replace the aspirator hose, if necessary.

4) Check if there is anything that affects sensing, around the in-vehicle sensor.
(1) Is the in-vehicle sensor hole blocked?
(2) Is there any part (audio or navigation, etc.) that produces heat around the in-vehicle sensor?

- **No** → Go to step 5).
- **Yes** → Remove everything that affects sensing.

5) Perform a unit inspection of in-vehicle sensor.
(1) Disconnect the in-vehicle sensor connector.
(2) Is the resistance between in-vehicle sensor terminals within the specification?

**CAUTION:**
**During inspection, be careful not to touch the sensor end in order to avoid misjudgment due to body temperature.**



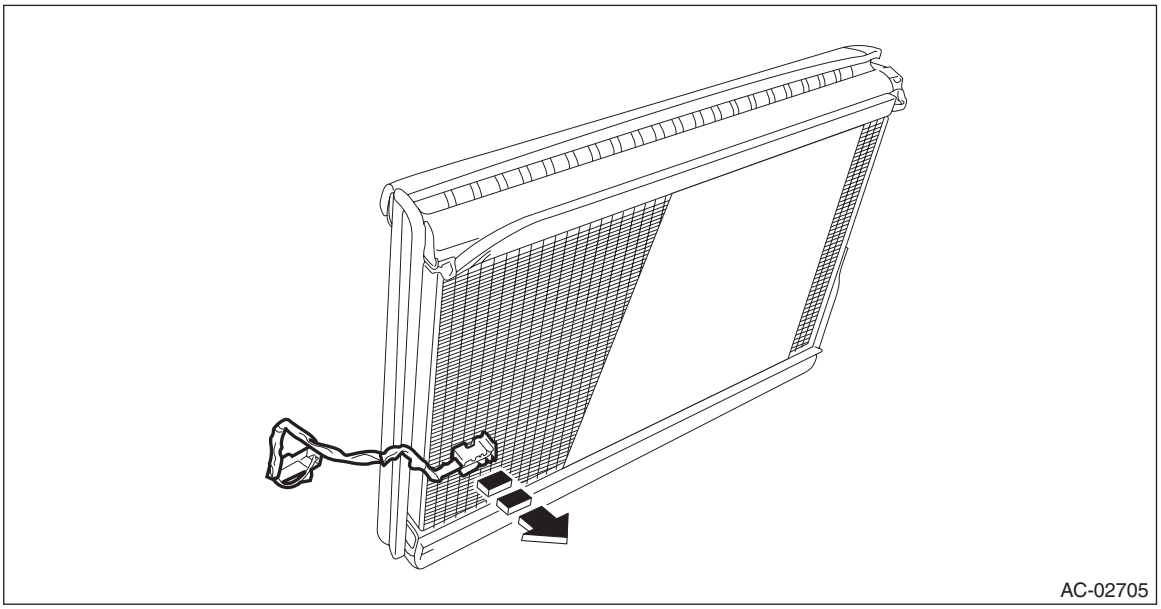
| Terminal No. | Inspection conditions | Standard |
|---|---|---|
| 1 — 2 | 10°C | 3.772 — 4.101 kΩ |
| | 15°C | 3.096 — 3.338 kΩ |
| | 20°C | 2.556 — 2.734 kΩ |
| | 25°C | 2.121 — 2.251 kΩ |
| | 30°C | 1.756 — 1.878 kΩ |
| | 35°C | 1.462 — 1.574 kΩ |
| | 40°C | 1.223 — 1.326 kΩ |
| | 45°C | 1.028 — 1.122 kΩ |
| | 50°C | 0.868 — 0.9542 kΩ |
| | 55°C | 0.7363 — 0.8147 kΩ |
| | 60°C | 0.6273 — 0.6984 kΩ |

- **Yes** → The in-vehicle sensor is normal.
- **No** → Replace the in-vehicle sensor.

# 25.Evaporator Sensor

## A: REMOVAL

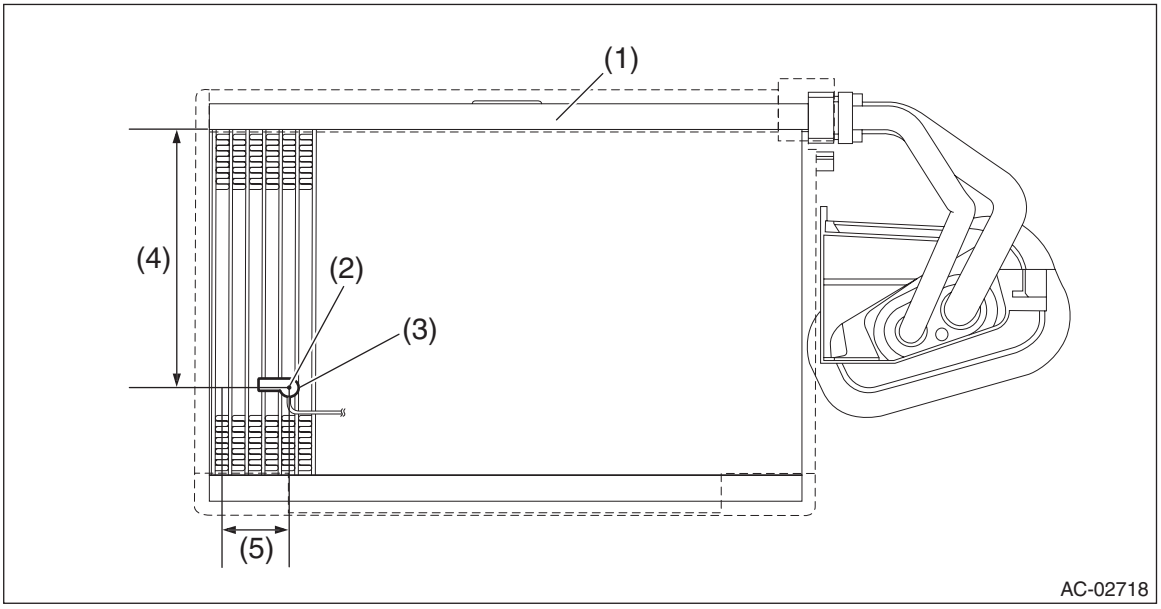
1) Remove the evaporator assembly - cooling. <Ref. to AC-63, REMOVAL, Evaporator.>
2) Remove the thermostat - cooling from the evaporator assembly - cooling.



## B: INSTALLATION

**CAUTION:**
- **Make sure that the water seal packing on the cover attachment area is securely attached.**
- **Replace the O-rings with new parts, and then apply compressor oil.**

1) Install the thermostat - cooling at the position shown in the figure below.



(1) Evaporator ASSY - cooling
(2) Center
(3) Thermostat - cooling
(4) 130 mm (5.12 in) from the upper end of the fins
(5) Fifth row fin from the left end

2) Install each part in the reverse order of removal.

***Tightening torque:***
***Heater cooling unit: <Ref. to AC-6, HEATER AND COOLING UNIT, COMPONENT, General Description.>***
***Blower motor unit: <Ref. to AC-10, BLOWER MOTOR UNIT, COMPONENT, General Description.>***
3) Charge refrigerant. <Ref. to AC-27, PROCEDURE, Refrigerant Charging Procedure.>

## C: INSPECTION

**On- the vehicle inspection**

***Preparation tool:***
***SUBARU SELECT MONITOR III KIT***
***Circuit tester***
***Thermometer and hygrometer***
1) Prepare the vehicle.

NOTE:
Check that the ambient temperature is 25 — 40°C (77 — 104°F) and that the humidity is 30% — 80%.
- Place the vehicle in the workshop or in the shade and windless condition.
- Open all windows.

2) Set the vehicle to the following conditions.

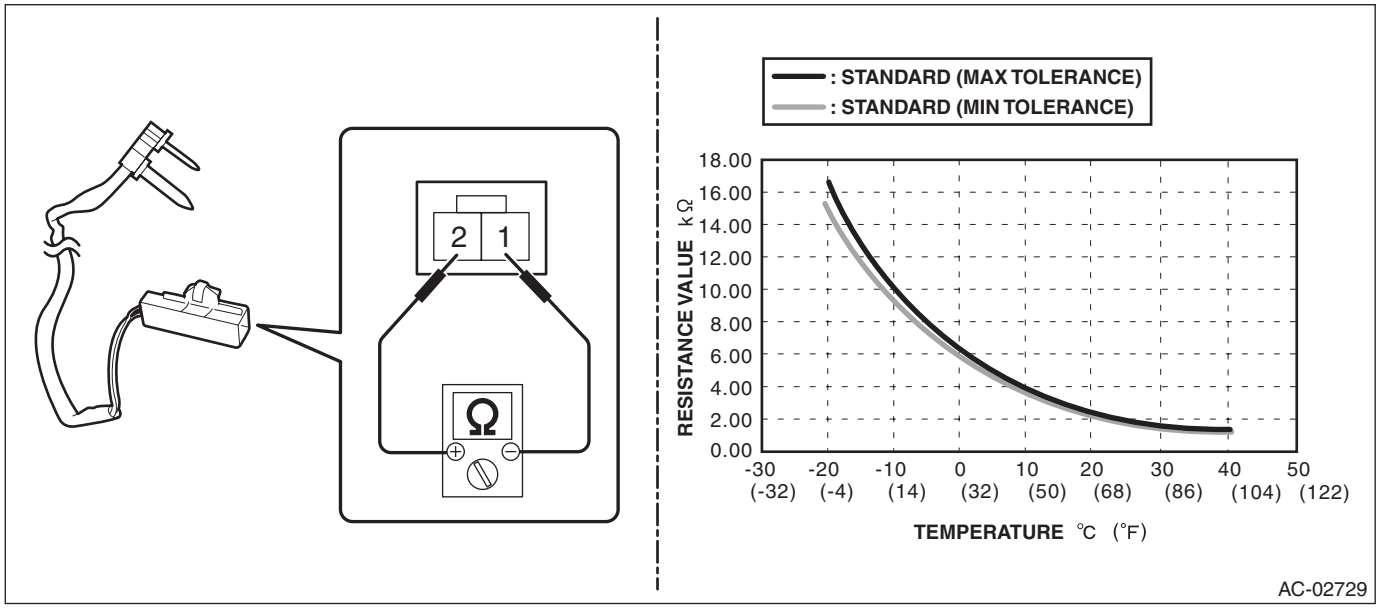
| Item | Condition |
|---|---|
| Engine | Idling |
| Air vent grille | Shutter is fully open. |
| A/C switch | OFF |
| Temperature adjustment dial | LO (MAX COOL) |
| FRESH/RECIRC switch | CIRC |
| Air flow control dial or switch | VENT |
| Fan dial | Auto A/C model: 5/7 level |
| | Manual A/C model: 3/4 level |

3) Using the Subaru Select Monitor, check «Evaporator Temperature».

NOTE:
For detailed procedures, refer to “PC application help for Subaru Select Monitor”.
(1) Idle the engine for 15 minutes, and then compare the air flow outlet temperature with «Evaporator Temperature».

NOTE:
For outlet opening temperature, measure the average temperature of center grille assembly and side grille assembly.
(2) Do the air flow outlet temperature and «Evaporator Temperature» differ by 3°C (5.4°F) or more?
- **Yes** → Go to step 4).
- **No** → Evaporator sensor is normal.

4) Check the evaporator sensor.
(1) Disconnect the evaporator sensor connector.
(2) Is the resistance between terminals of evaporator sensor within standard value?



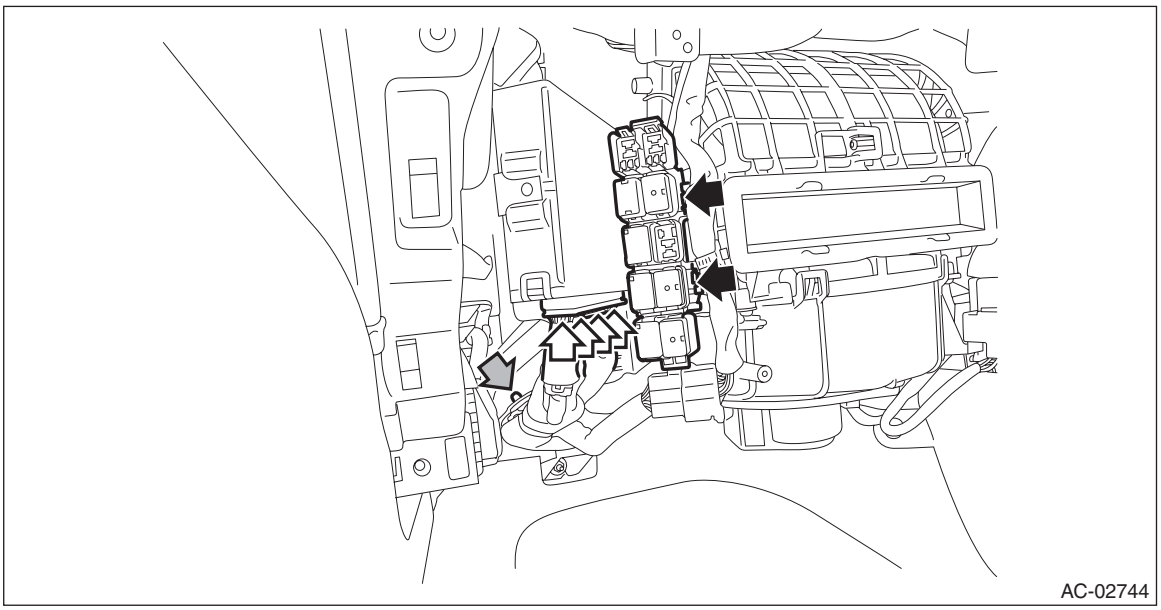
| Terminal No. | Inspection conditions | Standard |
|---|---|---|
| 1 — 2 | -20°C | 15.37 — 16.62 kΩ |
| | -15°C | 12.09 — 12.87 kΩ |
| | -10°C | 9.576 — 10.05 kΩ |
| | -5°C | 7.636 — 7.899 kΩ |
| | 0°C | 6.132 — 6.256 kΩ |
| | 5°C | 4.891 — 5.057 kΩ |
| | 10°C | 3.928 — 4.113 kΩ |
| | 15°C | 3.174 — 3.366 kΩ |
| | 20°C | 2.581 — 2.77 kΩ |
| | 25°C | 2.111 — 2.292 kΩ |
| | 30°C | 1.737 — 1.907 kΩ |
| | 35°C | 1.437 — 1.595 kΩ |
| | 40°C | 1.195 — 1.34 kΩ |

- **Yes** → Evaporator sensor is normal.
- **No** → Replace the evaporator sensor.

# 26.FRESH/RECIRC Door Actuator

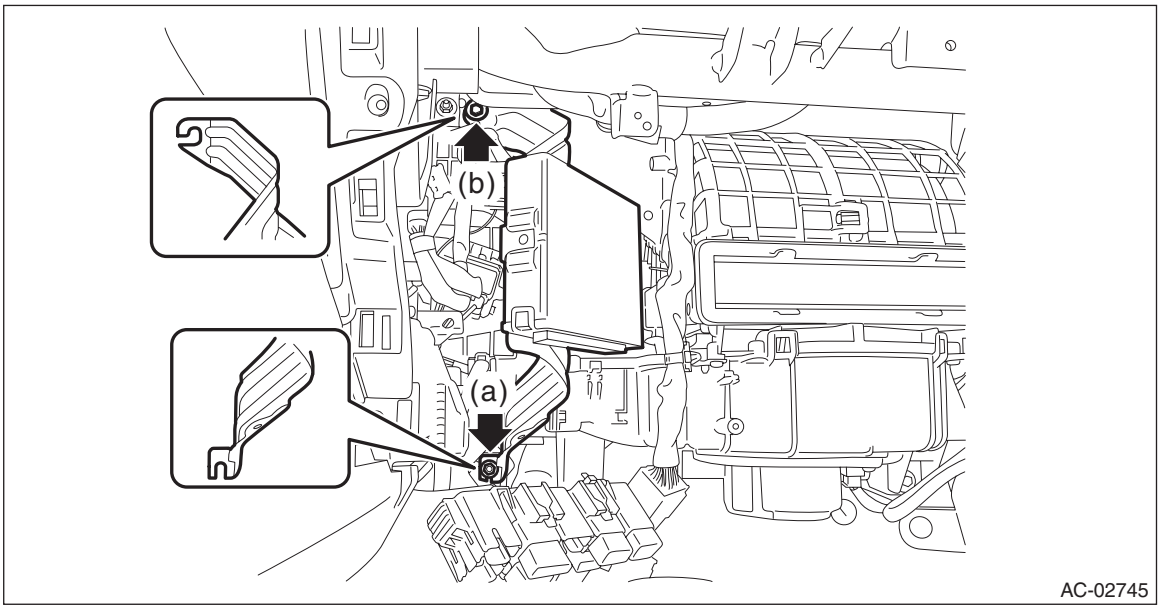
## A: REMOVAL

1) Disconnect the ground cable from battery.
2) Remove the glove box. <Ref. to EI-67, REMOVAL, Glove Box.>
3) Remove the engine control module (ECM).
   (1) Release the lock and remove the relay holder.
   (2) Remove the harness clip, and disconnect the connector.



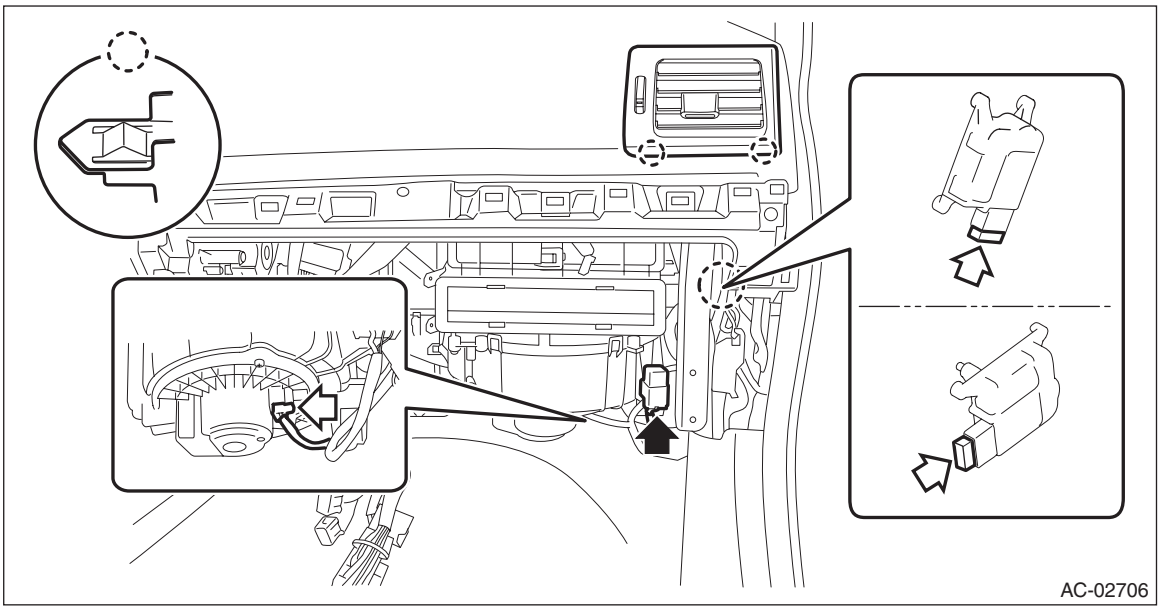
AC-02744

   (3) Remove the nut (a).
   (4) Loosen the bolt (b), and remove the engine control module (ECM).



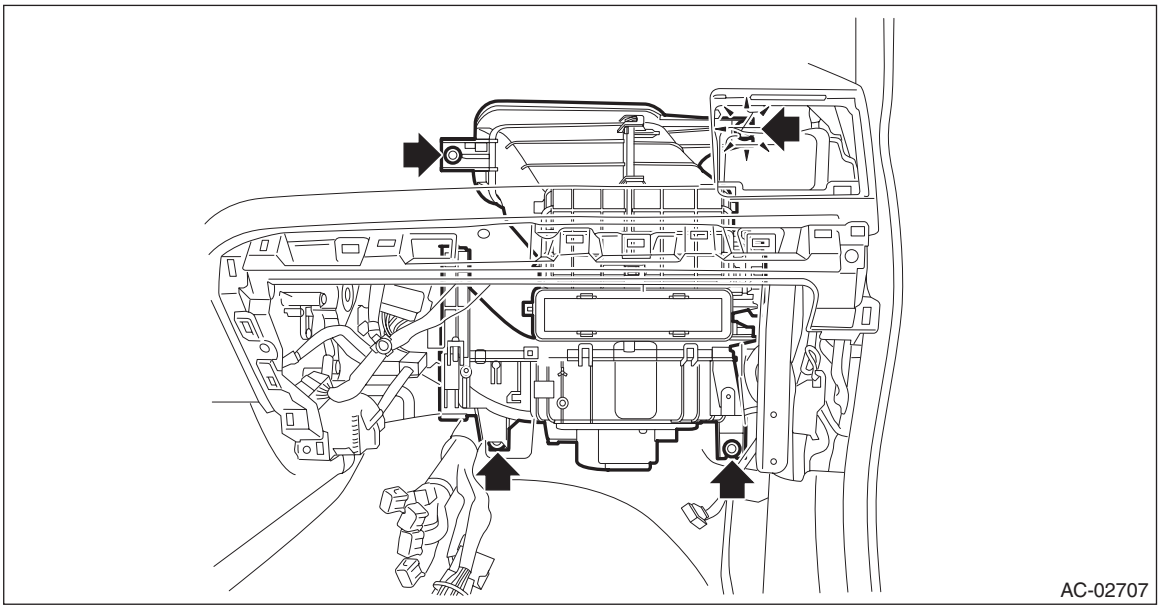
AC-02745

4) Remove the blower motor unit assembly.
(1) Release the claws, and then remove the grille assembly - ventilation RH.
(2) Disconnect the blower motor relay and each connector.



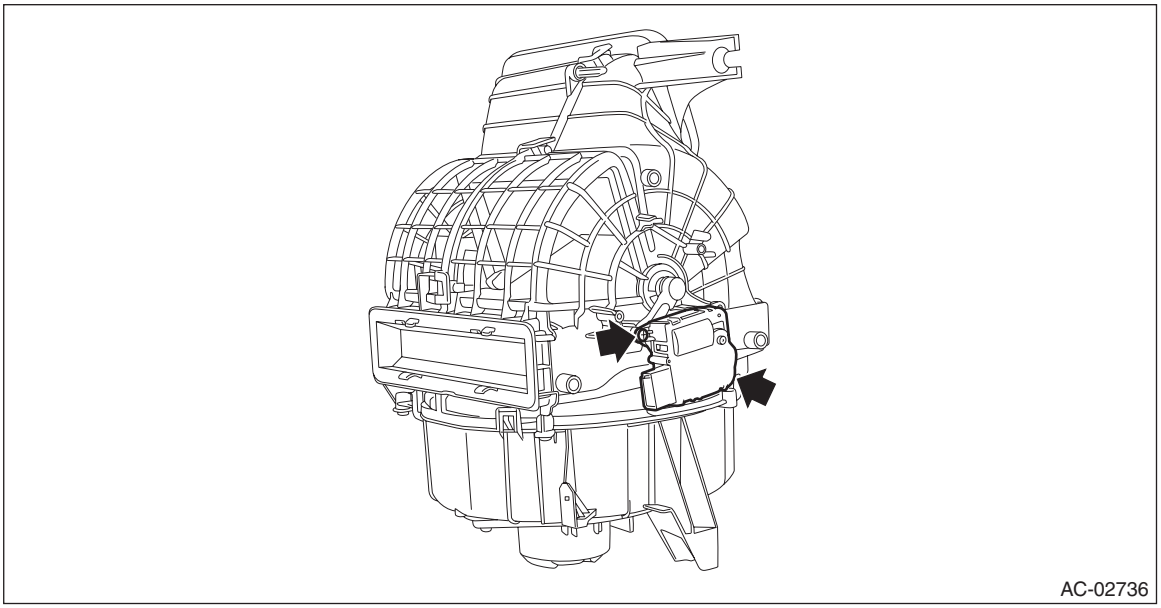
(3) Remove the bolts and nuts to remove blower motor unit assembly.

NOTE:
Remove the RH upper nut from the mounting portion of the grille assembly - ventilation RH.



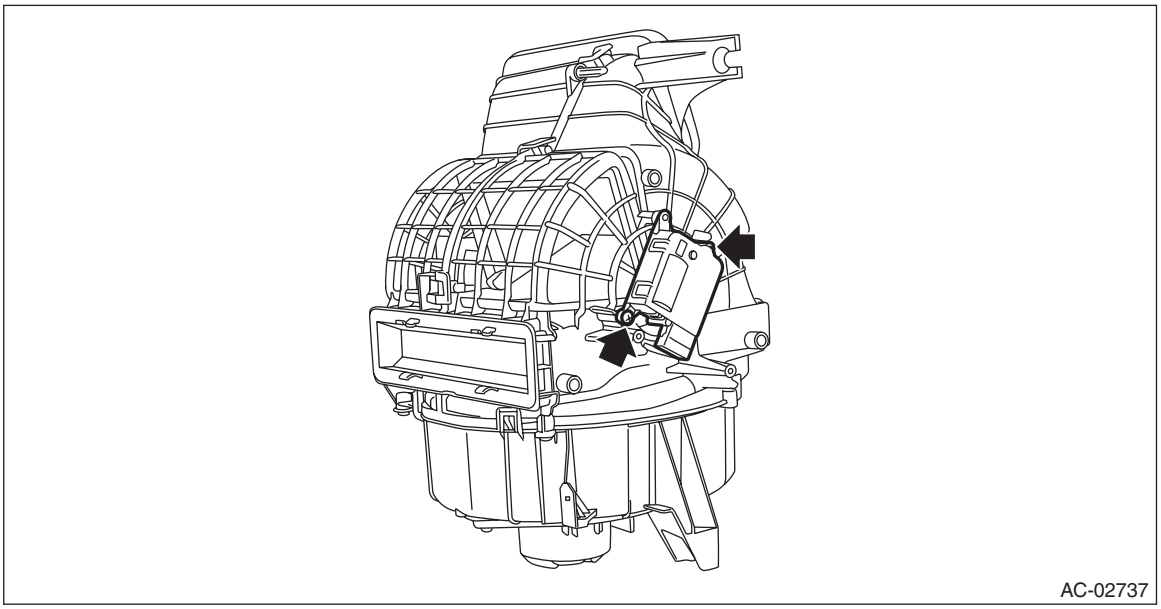
5) Remove the screws and detach the motor - actuator blower.

- Manual A/C model



AC-02736

- Auto A/C model



AC-02737

## B: INSTALLATION

**CAUTION:**
**After installing the grille assembly - ventilation RH, check that the air vent grille of the grille assembly - ventilation RH is inserted correctly into the air vent duct.**
Install each part in the reverse order of removal.

NOTE:
Refer to “INSTALLATION” of “Instrument Panel Assembly”. <Ref. to EI-92, INSTALLATION, Instrument Panel Assembly.>

***Tightening torque:***
***Blower motor unit: <Ref. to AC-10, BLOWER MOTOR UNIT, COMPONENT, General Description.>***
***Engine control module (ECM): 7.5 N·m (0.76 kgf-m, 5.5 ft-lb)***

# C: INSPECTION

## 1. CHECK LINK

1) Visually check the operation range of the link, and remove the foreign material if any.
2) Operate the FRESH/RECIRC switch to check that the link operates normally.
3) If it does not operate normally as the result of inspection, check the motor - actuator blower.

## 2. CHECK ACTUATOR

### UNIT INSPECTION

1) Check the actuator operation when battery voltage is applied between the terminals of actuator.

**CAUTION:**
**Remove the battery immediately once the actuator stops operating. Otherwise, damage to the motor can occur.**

- Manual A/C model

| Terminal No. | Inspection conditions | Position | Connection diagram |
|---|---|---|---|
| 5 (+) — 1 (–) | Connect battery to the terminals | RECIRC |  AC-02738 |
| 1 (+) — 5 (–) | | FRESH |  AC-02739 |

- Auto A/C model

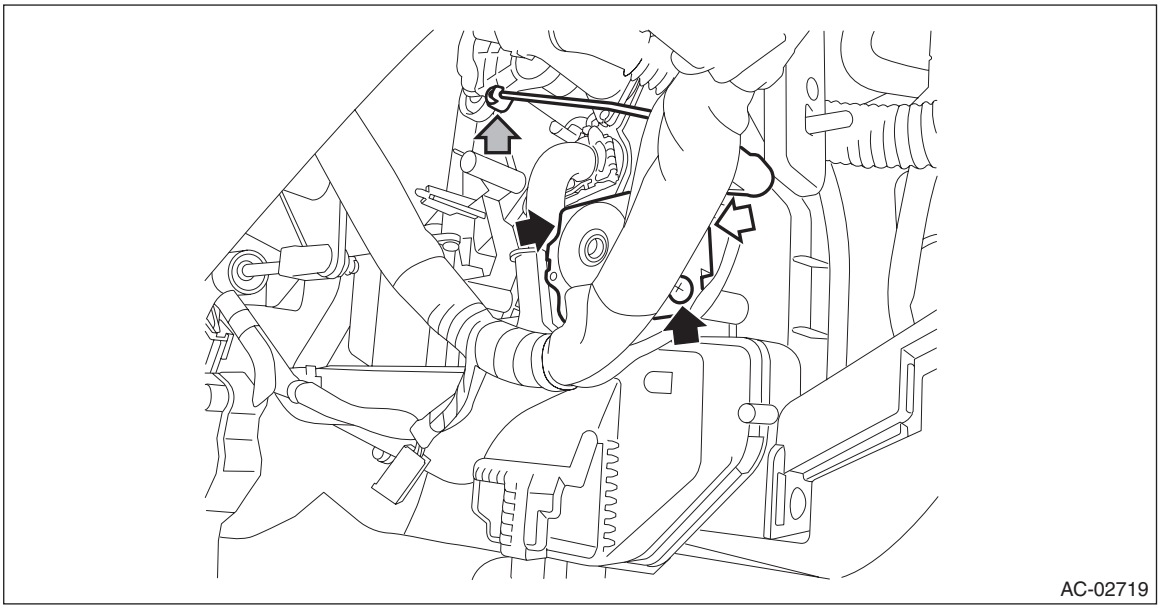
| Terminal No. | Inspection conditions | Position | Connection diagram |
|---|---|---|---|
| 1 (+) — 2 (–) | Connect battery to the terminals | RECIRC |  AC-02742 |
| 2 (+) — 1 (–) | | FRESH |  AC-02741 |

2) If it does not operate normally as the result of inspection, replace the motor - actuator blower.

# 27.Mode Door Actuator

## A: REMOVAL

1) Remove the knee airbag module. <Ref. to AB-44, REMOVAL, Knee Airbag Module.>
2) Remove the motor - actuator mode.
   (1) Disconnect the connector, and remove the rod from the rod clamp.
   (2) Remove the screws and detach the motor - actuator mode.



## B: INSTALLATION

Install each part in the reverse order of removal.

NOTE:
Refer to “INSTALLATION” of “Knee Airbag Module”. <Ref. to AB-46, INSTALLATION, Knee Airbag Module.>

# C: INSPECTION

## 1. CHECK LINK

1) Visually check the operation range of the link, and remove the foreign material if any.
2) Operate the air flow control dial or switch to check that the link operates normally.
3) If it does not operate normally as the result of inspection, check the motor - actuator mode.

## 2. CHECK ACTUATOR

### UNIT INSPECTION

***PREPARATION TOOL:***

***Circuit tester***

1) Check the resistance between actuator terminals.

| Terminal No. | Inspection conditions | Standard | Connector sketch |
|---|---|---|---|
| 3 — 1 | Always | 80 — 100 Ω |  |
| 3 — 2 | | | |
| 3 — 5 | | | |
| 3 — 6 | | | |

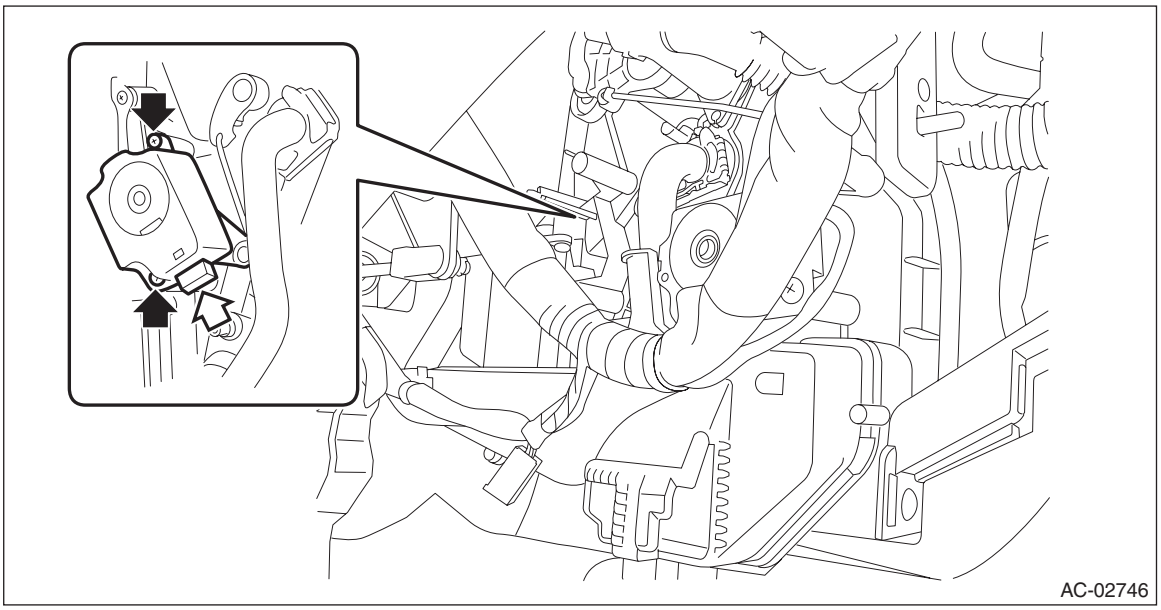
2) Replace the motor - actuator mode if it is found defective as a result of inspection.

# 28.Air Mix Door Actuator

## A: REMOVAL

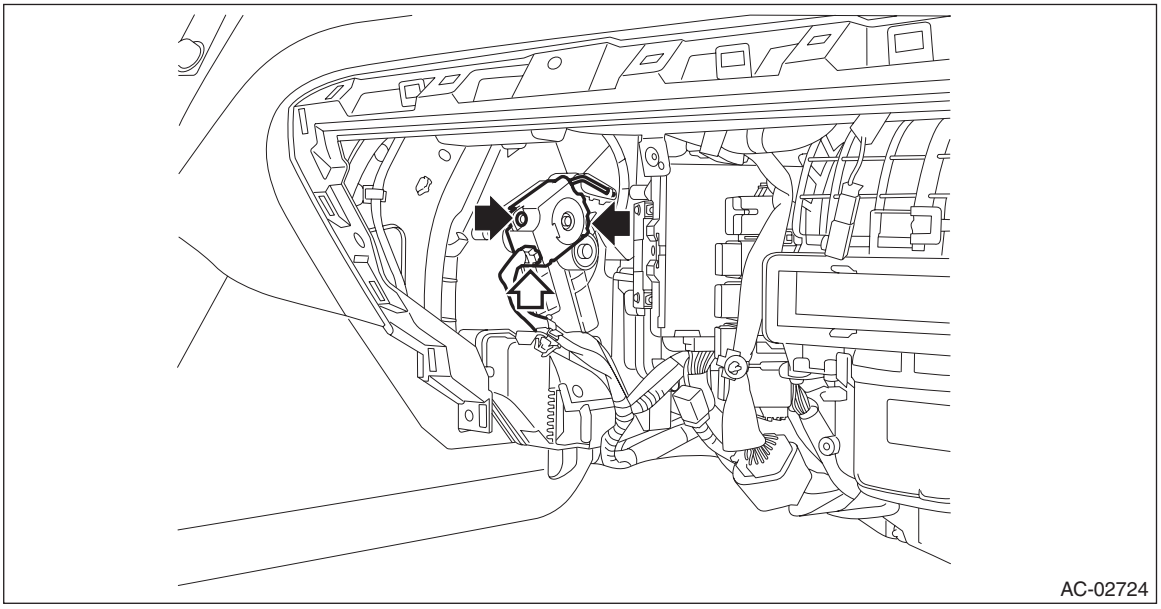
### 1. LH

1) Remove the knee airbag module. <Ref. to AB-44, REMOVAL, Knee Airbag Module.>
2) Remove the motor - actuator mix.
   (1) Disconnect the connector, and remove the rod from the rod clamp.
   (2) Remove the screws and detach the motor - actuator mix.



### 2. RH

1) Remove the glove box. <Ref. to EI-67, REMOVAL, Glove Box.>
2) Remove the motor - actuator mix.
   (1) Disconnect the connector, and remove the rod from the rod clamp.
   (2) Remove the screws and detach the motor - actuator mix.



## B: INSTALLATION

Install each part in the reverse order of removal.

NOTE:
Refer to “INSTALLATION” of “Knee Airbag Module”. <Ref. to AB-46, INSTALLATION, Knee Airbag Module.>

## C: INSPECTION

### 1. CHECK LINK

1) Visually check the operation range of the link, and remove the foreign material if any.
2) Operate the temperature control dial to check that the link operates normally.
3) If it does not operate normally as the result of inspection, check the motor - actuator mix.

### 2. CHECK ACTUATOR

#### UNIT INSPECTION

***PREPARATION TOOL:***
***Circuit tester***

1) Check the resistance between actuator terminals.

| Terminal No. | Inspection conditions | Standard | Connector sketch |
|---|---|---|---|
| 3 — 1 | Always | 80 — 100 Ω |  |
| 3 — 2 | | | |
| 3 — 5 | | | |
| 3 — 6 | | | |

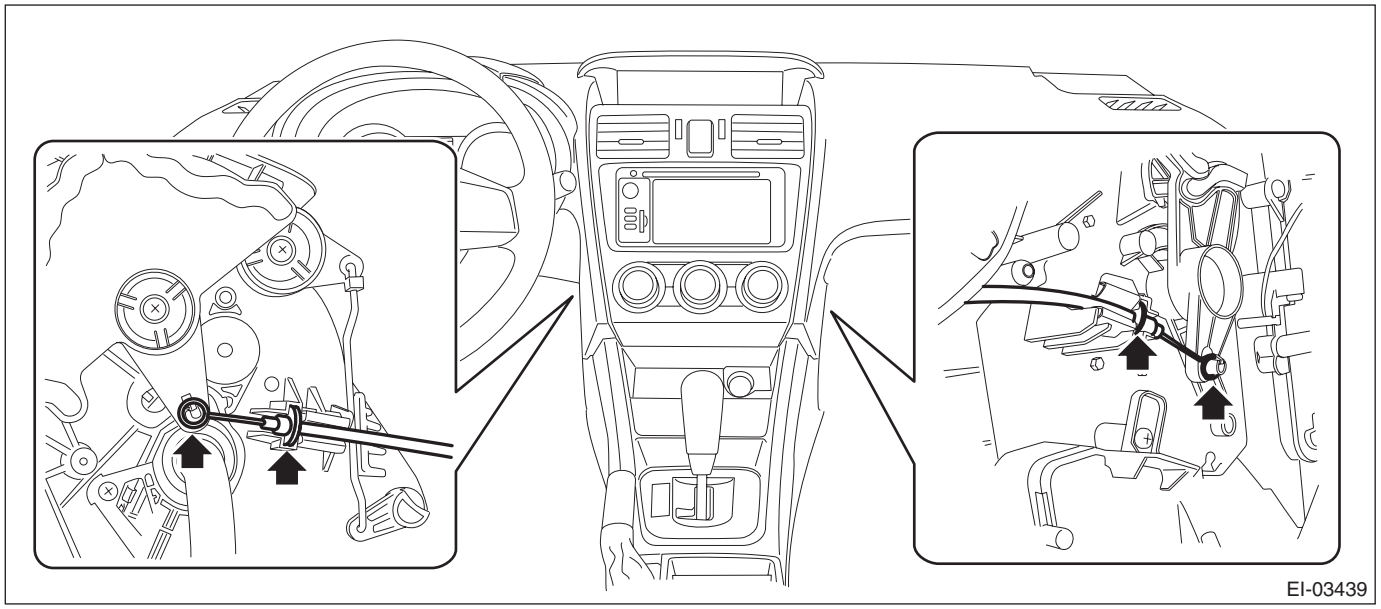
2) Replace the motor - actuator mix if it is found defective as a result of inspection.

# 29.Air Vent Grille

## A: REMOVAL

### 1. CENTER GRILLE ASSEMBLY

**CAUTION:**
**Be careful not to damage the interior trims when removing.**
1) Disconnect the ground cable from battery.
2) On manual A/C models, disconnect the control cables from both sides of the heater and cooling unit assembly.

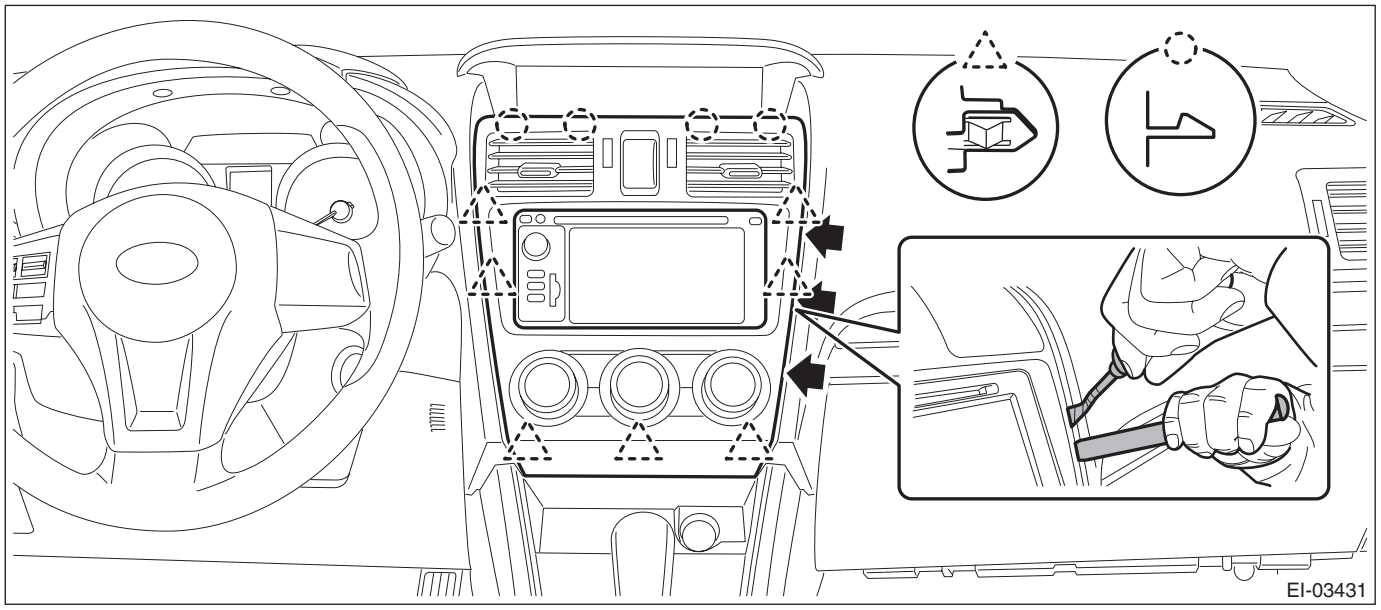


NOTE:
Remove the glove box pocket assembly on the passenger's side.

3) Remove the panel center assembly.

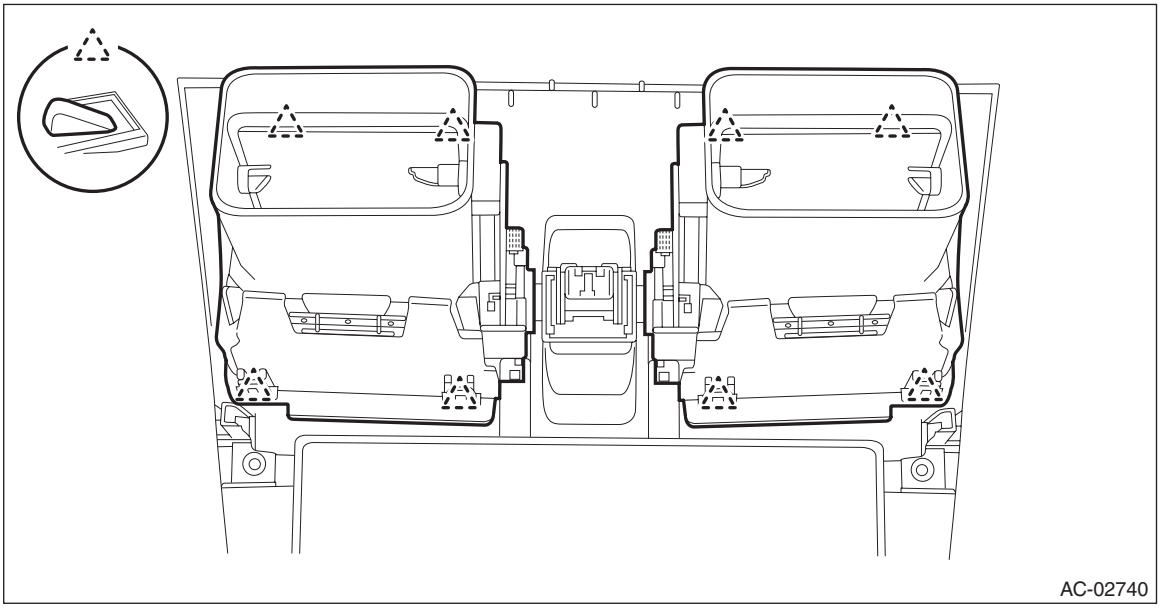
**CAUTION:**
- **Do not put your finger on the fin of the air vent grille. Doing so may damage the fin.**
- **Pull the panel center assembly slowly. Pulling with excessive force may damage the connector.**

(1) Insert a plastic remover to the three areas shown by the arrows, and lift up the panel center assembly slightly.
(2) With the panel center assembly lifted up slightly, release the claw by using a clip remover wrapped with protective tape.
(3) Release the rest of the claws, and pull out the panel center assembly.
(4) Disconnect the connectors, and remove the panel center assembly.



EI-03431

4) Release the claws, and then remove the grille assembly - CTR ventilation from the panel center assembly.

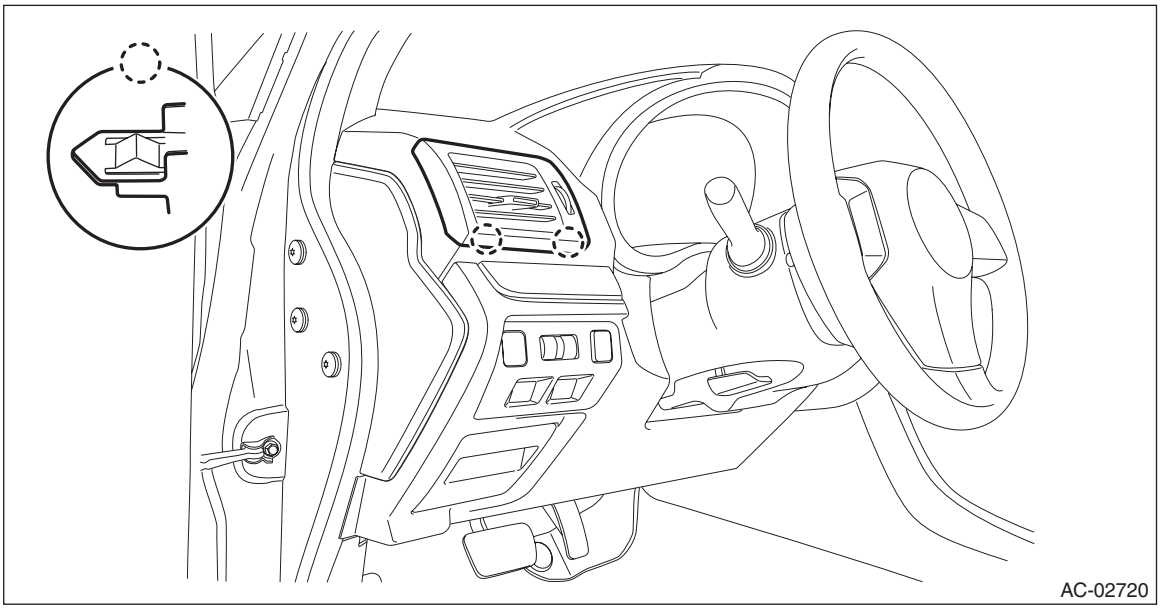


AC-02740

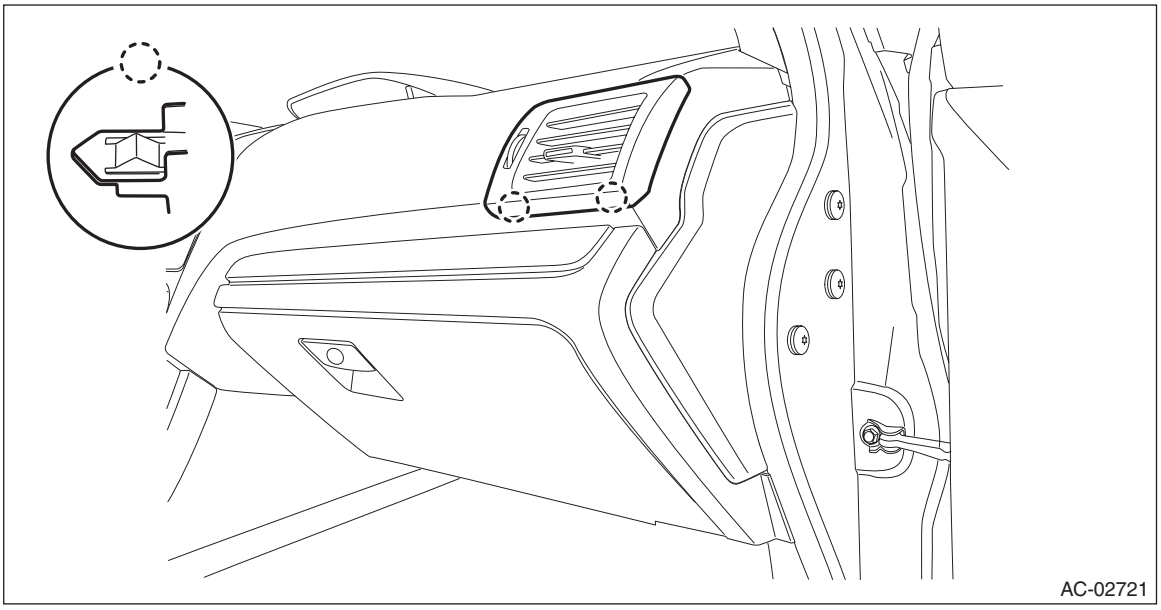
### 2. SIDE GRILLE ASSEMBLY

Release the claws, and then remove the grille assembly - ventilation RH.

- LH



- RH



## B: INSTALLATION

**CAUTION:**
**After installing the panel center assembly or grille assembly - ventilation, check that the air vent grille is inserted correctly into the air vent duct.**
Install each part in the reverse order of removal.

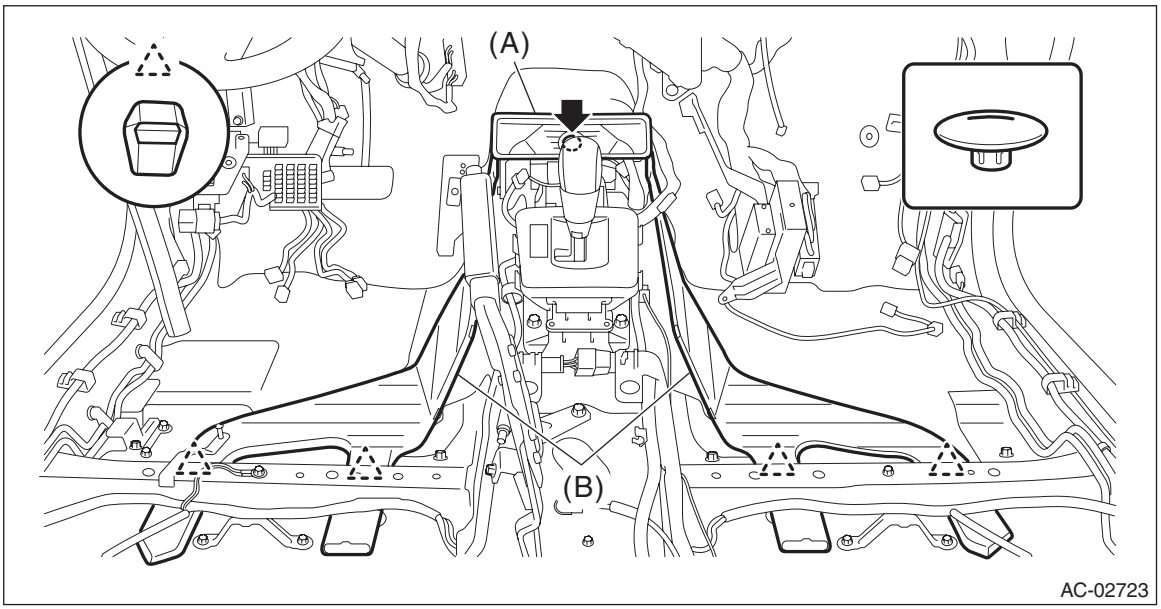
## C: INSPECTION

1) Check that the direction and amount of air can be adjusted smoothly. Replace the grille assembly - ventilation if faulty.
2) Check that the adjustment can be maintained in each position. Replace the grille assembly - ventilation if faulty.

# 30.Heater Duct

## A: REMOVAL

1) Remove the front seats. <Ref. to SE-7, REMOVAL, Front Seat.>
2) Remove the instrument panel assembly. <Ref. to EI-74, REMOVAL, Instrument Panel Assembly.>
3) Remove the duct - rear heater.
   (1) Lift the floor carpet.
   (2) Remove the clips, and remove the duct - rear heater CTR (A).
   (3) Release the claws, and remove the duct - rear heater (B) on LH and RH sides.



## B: INSTALLATION

Install each part in the reverse order of removal.

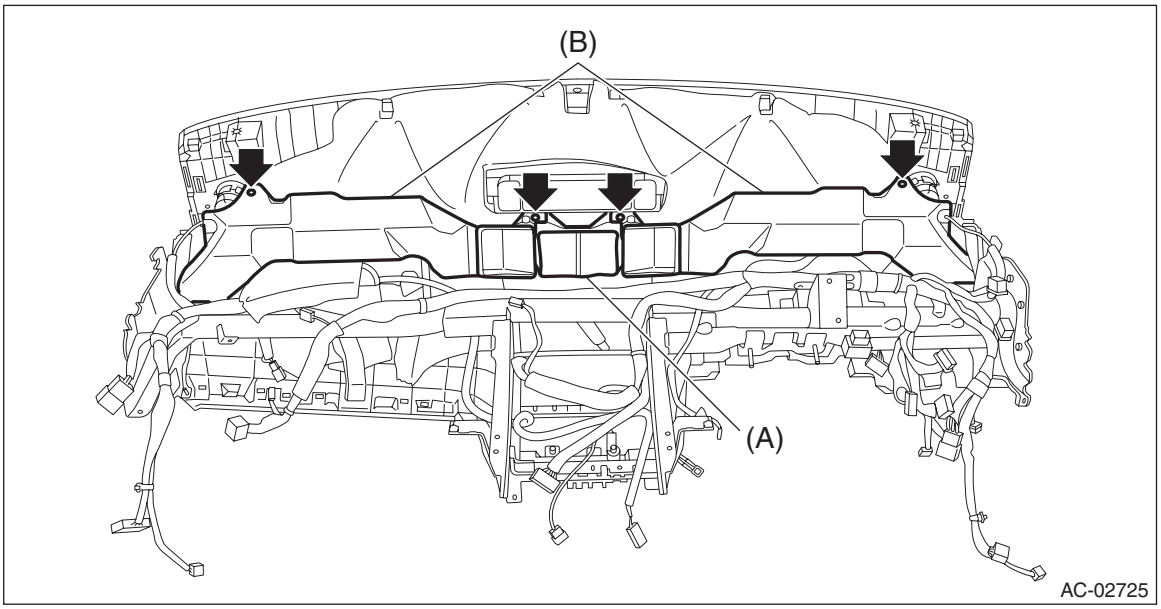
NOTE:
Refer to “INSTALLATION” of “Front Seat” and “Instrument Panel Assembly”.

- Front seat: <Ref. to SE-8, INSTALLATION, Front Seat.>
- Instrument panel assembly: <Ref. to EI-92, INSTALLATION, Instrument Panel Assembly.>

# 31.Heater Vent Duct

## A: REMOVAL

1) Remove the instrument panel assembly. <Ref. to EI-74, REMOVAL, Instrument Panel Assembly.>
2) Remove the screws and remove the duct - center vent (A) and the duct - side ventilation (B) on LH and RH sides.



## B: INSTALLATION

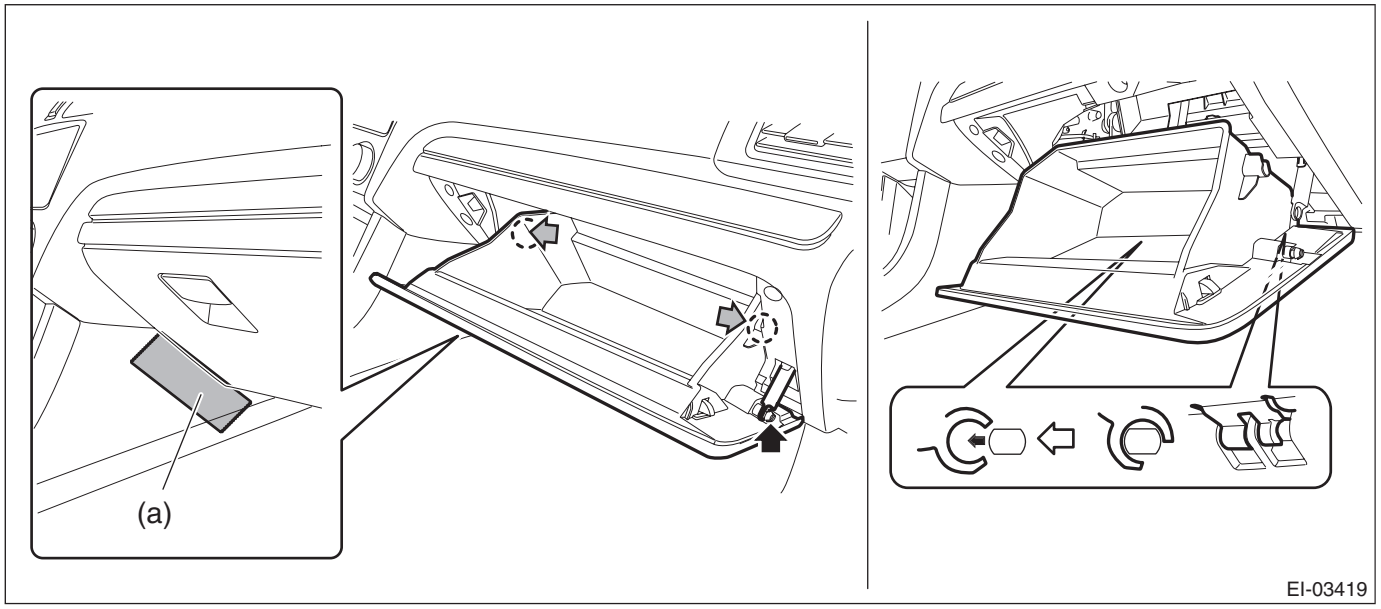
Install each part in the reverse order of removal.

NOTE:
Refer to “INSTALLATION” of “Instrument Panel Assembly”. <Ref. to EI-92, INSTALLATION, Instrument Panel Assembly.>

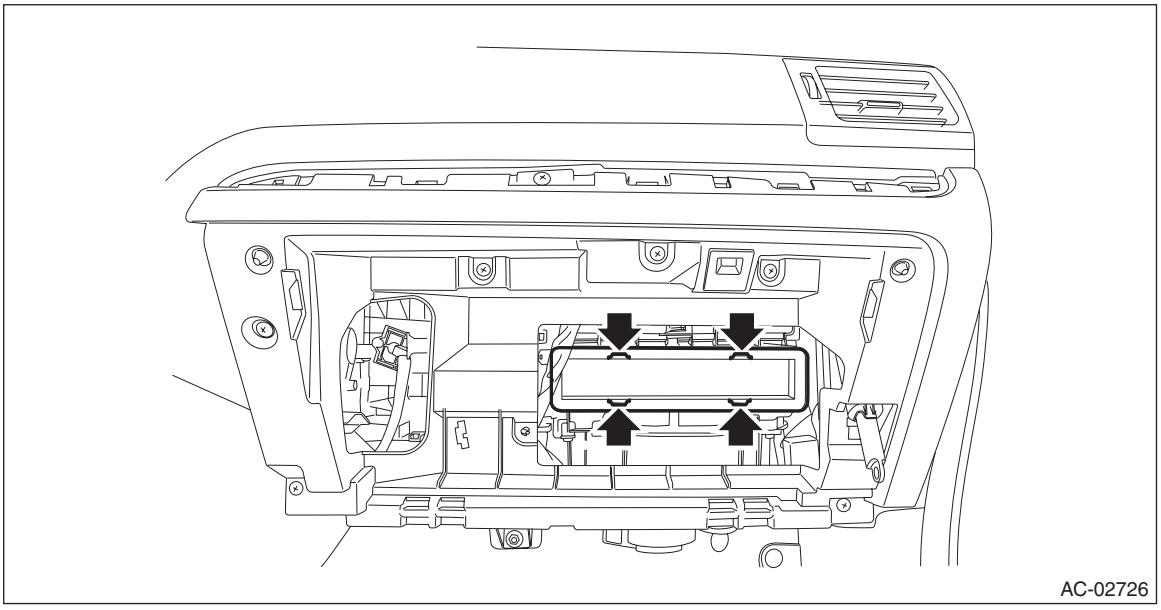
# 32.A/C Filter

## A: REPLACEMENT

1) Remove the pocket assembly.
   (1) Attach the protective tape (a) to the panel center LWR.
   (2) Remove the damper COMPL - pocket.
   (3) Release the stoppers and remove the pocket assembly by pulling it toward you.



2) Pinch the tabs to release the lock, and remove the filter kit.



3) Install each part in the reverse order of removal.

# 33.Diagnostics with Phenomenon

## A: INSPECTION

Refer to “Diagnostics with Phenomenon” for “HVAC SYSTEM (AUTO A/C) (DIAGNOSTICS)” section. <Ref. to AC(diag)-16, Diagnostics with Phenomenon.>

# HVAC SYSTEM (AUTO A/C) (DIAGNOSTICS)

# 1. Basic Diagnostic Procedure

## A: PROCEDURE

NOTE:
When the sunload sensor check is performed indoors or in the shade, it could be diagnosed as having an open circuit of the sensor. Always perform the check in direct sunlight.

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 1 | **START INSPECTIONS.**<br>1) Prepare a tool. <Ref. to AC-18, PREPARATION TOOL, General Description.><br>2) Perform the pre-inspection. <Ref. to AC(diag)-3, INSPECTION, General Description.> | Is a malfunction found in pre-inspection? | Solve the malfunction found in pre-inspection, and go to the next inspection procedure. Go to step **2**. | Go to step **2**. |
| 2 | **PREPARE SUBARU SELECT MONITOR.**<br>Prepare the Subaru Select Monitor. | Is the Subaru Select Monitor prepared? | Go to step **3**. | Go to step **4**. |
| 3 | **CHECK DTC.**<br>1) Leave the vehicle in a troubled condition for one minute or more.<br>2) Read the DTC using Subaru Select Monitor.<br>NOTE:<br>• If the communication function of the Subaru Select Monitor cannot be executed properly, check the communication circuit. <Ref. to AC(diag)-46, COMMUNICATION FOR INITIALIZING IMPOSSIBLE, Diagnostic Procedure for Subaru Select Monitor Communication.><br>• Record the freeze frame data that is recorded with DTC. | Is DTC displayed? | <Ref. to AC(diag)-48, LIST, List of Diagnostic Trouble Code (DTC).> | Refer to Diagnostics with Phenomenon. <Ref. to AC(diag)-16, INSPECTION, Diagnostics with Phenomenon.> |
| 4 | **A/C CONTROL PANEL SELF-DIAGNOSIS.**<br>1) Leave the vehicle in a troubled condition for one minute or more.<br>2) Perform the self-diagnosis of A/C control panel. <Ref. to AC(diag)-8, OPERATION, Diagnostic Chart for Self-Diagnosis.> | Is a malfunction detected? | Perform the diagnosis according to the self-diagnosis procedure. | Refer to Diagnostics with Phenomenon. <Ref. to AC(diag)-16, INSPECTION, Diagnostics with Phenomenon.> |

# 2. General Description

## A: CAUTION

1) Never connect the battery in reverse polarity.
• Doing so may immediately damage the A/C control panel.
2) Do not disconnect the battery terminals while the engine is running.
• A large counter electromotive force will be generated in the generator, and this voltage may damage electronic parts such as A/C control panel etc.
3) Before disconnecting the connectors of sensors and the A/C control panel, be sure to turn off the ignition switch.
• A/C control panel may be damaged.
4) Every A/C-related part is a precision part. Do not drop them.
5) Airbag system harness is routed near the A/C control panel and junction box.

**CAUTION:**
**• Do not use electrical test equipment on the airbag system harness and connector.**
**• Be careful not to damage the airbag system harness when servicing the A/C control panel and junction box.**

## B: INSPECTION

Before performing diagnosis, check the following items which might affect the A/C system problems.

### 1. BATTERY

Check the battery. <Ref. to SC(H4DO)-57, INSPECTION, Battery.>

NOTE:
If the battery voltage does not reach the specified value, recharge or replace the battery.

## C: PREPARATION TOOL

### 1. SPECIAL TOOL

| ILLUSTRATION | TOOL NUMBER | DESCRIPTION | REMARKS |
|---|---|---|---|
|  ST1B022XU0 | 1B022XU0 | SUBARU SELECT MONITOR III KIT | Used for troubleshooting the electrical system. |

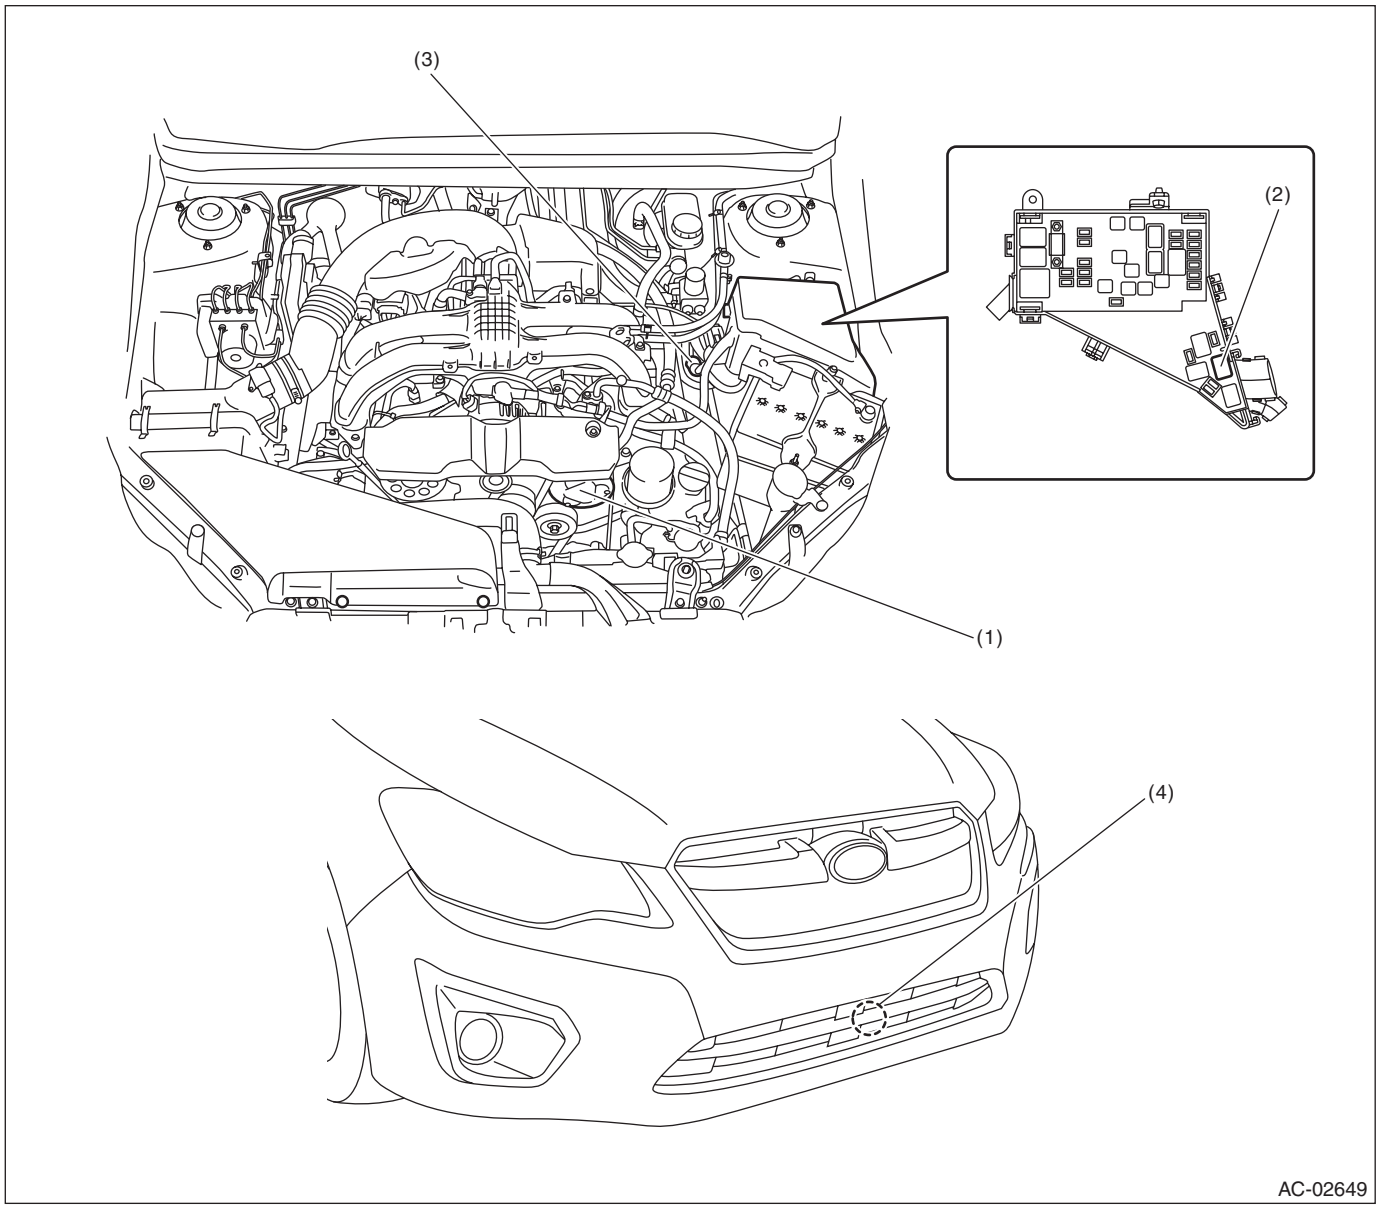
### 2. GENERAL TOOL

| TOOL NAME | REMARKS |
|---|---|
| Circuit tester | Used for measuring resistance, voltage and current. |

# 3. Electrical Component Location

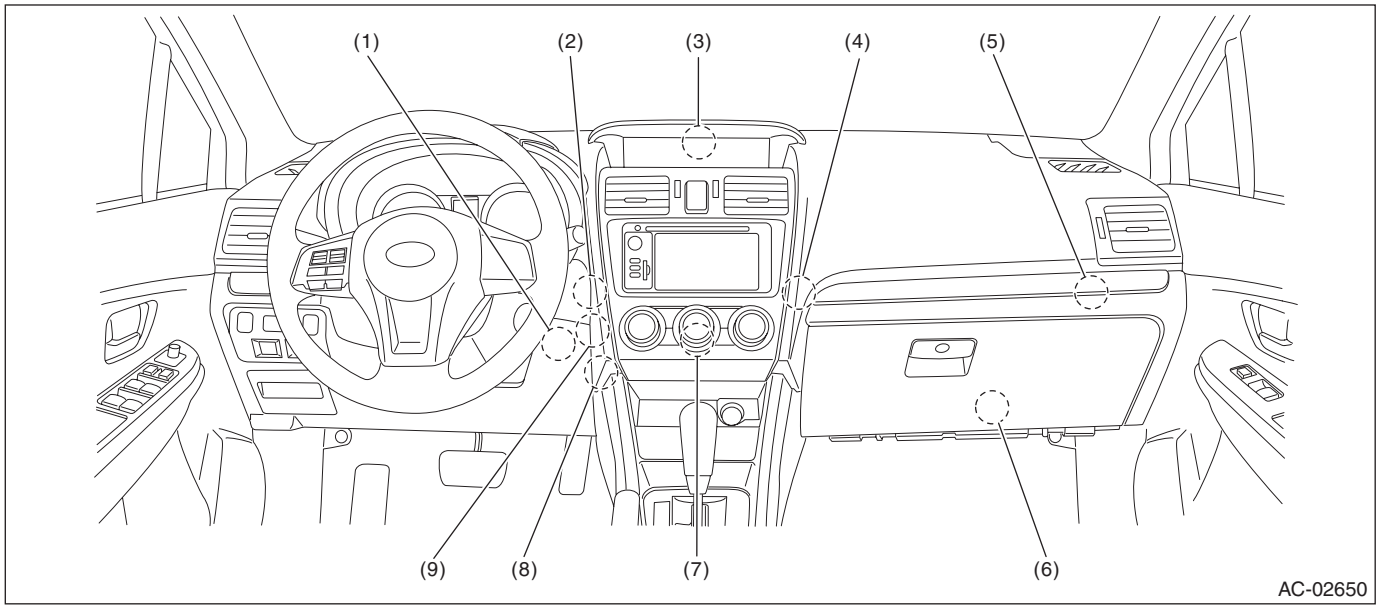
## A: LOCATION

### 1. OUTSIDE VEHICLE



(1) A/C compressor
(2) A/C relay
(3) Pressure switch
(4) Ambient sensor

## 2. COMPARTMENT

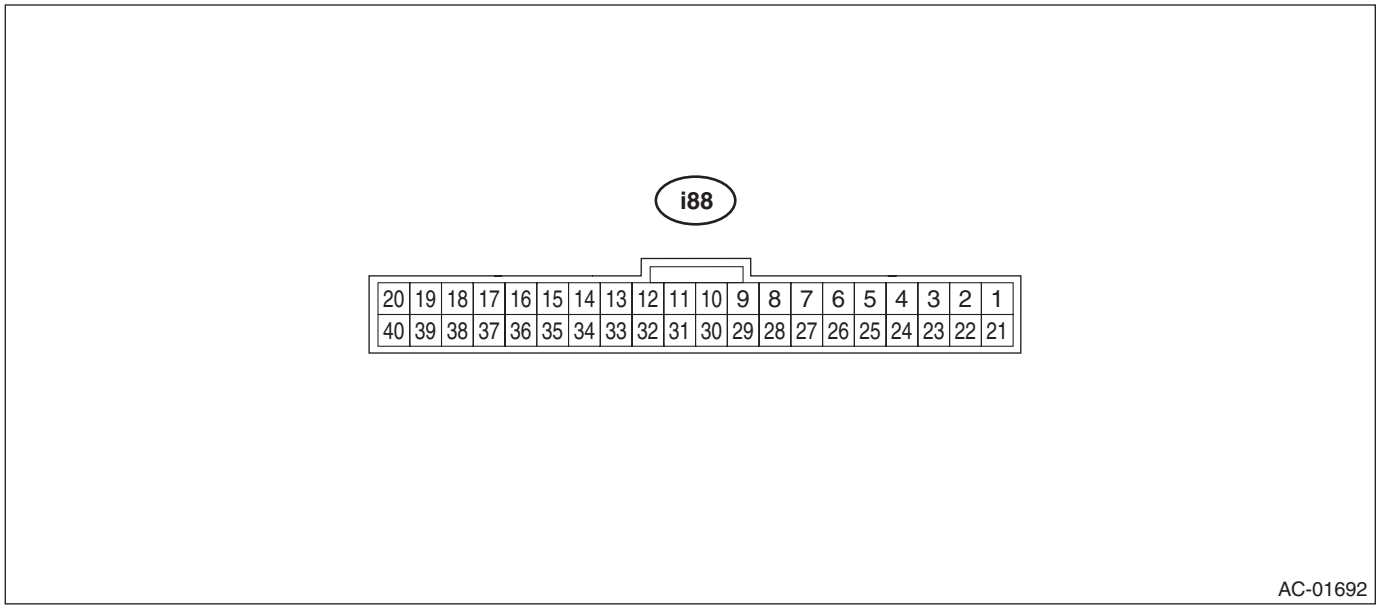


| | | | | | |
|---|---|---|---|---|---|
| (1) | In-vehicle sensor | (4) | Air mix door actuator *1 or air mix door actuator RH *2 | (7) | A/C control panel |
| (2) | Air mix door actuator LH *2 | (5) | Intake door actuator | (8) | Evaporator sensor |
| (3) | Sunload sensor | (6) | Blower motor | (9) | Mode door actuator |

*1: Without left/right independent air conditioning function
*2: With left/right independent air conditioning function

# 4. Auto A/C Control Module I/O Signal

## A: ELECTRICAL SPECIFICATION



| Terminal No. | Description | Measuring condition | | Standard |
|---|---|---|---|---|
| 1 | Mode door actuator #4 | Digital signal; can not be measured | | — |
| 2 | Mode door actuator #3 | Digital signal; can not be measured | | — |
| 3 | Mode door actuator #2 | Digital signal; can not be measured | | — |
| 4 | Mode door actuator #1 | Digital signal; can not be measured | | — |
| 6 | Intake door actuator (FRESH) | FRESH mode | | 8 V or more |
| 8 | Intake door actuator (RECIRC) | RECIRC mode | | 8 V or more |
| 9 | Blower fan ON signal | Blower fan is ON | | 1 V or less |
| 10 | Intake door potentiometer power supply | Ignition switch ON | | 5 V |
| 11 | A/C cut-off signal | A/C is cut off | | 1 V or less |
| 12 | Intake door potentiometer signal | Ignition switch ON | | 0 — 5 V |
| 14 | GND for sensors | Always | | 1 V or less |
| 15 | ACC power supply | ACC ON | | Battery voltage |
| 16 | Sunload sensor | Sunlight is contacting sensor | | 1 — 4 V |
| 17 | RECIRC sensor | Ignition switch ON | | 25°C: 2.5 V |
| 18 | Post evaporator sensor | Depends on temperature after the evaporator. | | 1 — 4.5 V |
| 19 | CAN Lo | Digital signal; can not be measured | | — |
| 20 | CAN Hi | Digital signal; can not be measured | | — |
| 21 | Air mix door actuator LH #4*2 | Digital signal; can not be measured | | — |
| 22 | Air mix door actuator LH #3*2 | Digital signal; can not be measured | | — |
| 23 | Air mix door actuator LH #2*2 | Digital signal; can not be measured | | — |
| 24 | Air mix door actuator LH #1*2 | Digital signal; can not be measured | | — |
| 25 | Air mix door actuator #4 *1 or air mix door actuator RH #4 *2 | Digital signal; can not be measured | | — |
| 26 | Air mix door actuator #3 *1 or air mix door actuator RH #3 *2 | Digital signal; can not be measured | | — |
| 27 | Air mix door actuator #2 *1 or air mix door actuator RH #2 *2 | Digital signal; can not be measured | | — |
| 28 | Air mix door actuator #1 *1 or air mix door actuator RH #1 *2 | Digital signal; can not be measured | | — |
| 31 | BATT | Always | | Battery voltage |
| 32 | IGN | Ignition ON | | Battery voltage |
| 34 | GND | Always | | 1 V or less |
| 35 | ILL– | Illumination ON (measure between 37 — 35) | | Battery voltage |
| 37 | ILL+ | | | |
| 40 | Fan control signal | Ignition switch: ON, Blower switch: ON | 1st | Approx. 9 V |
| | | | 2nd | Approx. 8 V |
| | | | 3rd | Approx. 7 V |
| | | | 4th | Approx. 6 V |
| | | | 5th | Approx. 5 V |
| | | | 6th | Approx. 3.5 V |
| | | | 7th | Approx. 0.5 V |

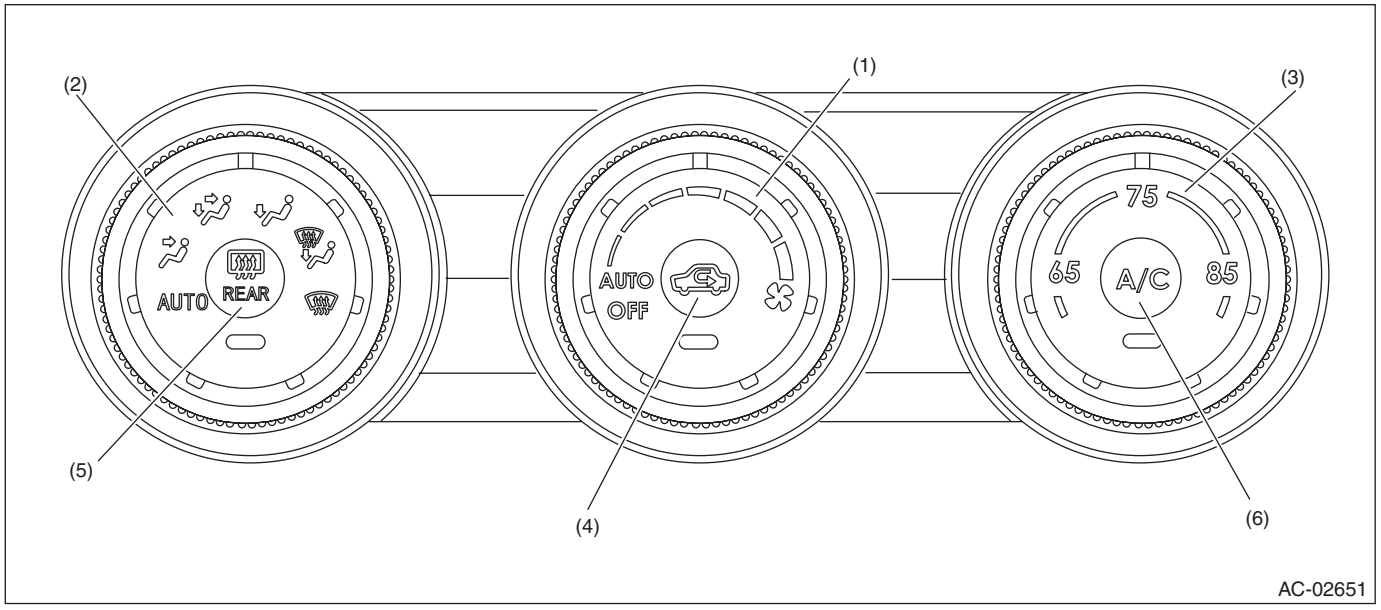
<Ref. to WI-35, WIRING DIAGRAM, Air Conditioning System.>

# 5. Diagnostic Chart for Self-Diagnosis

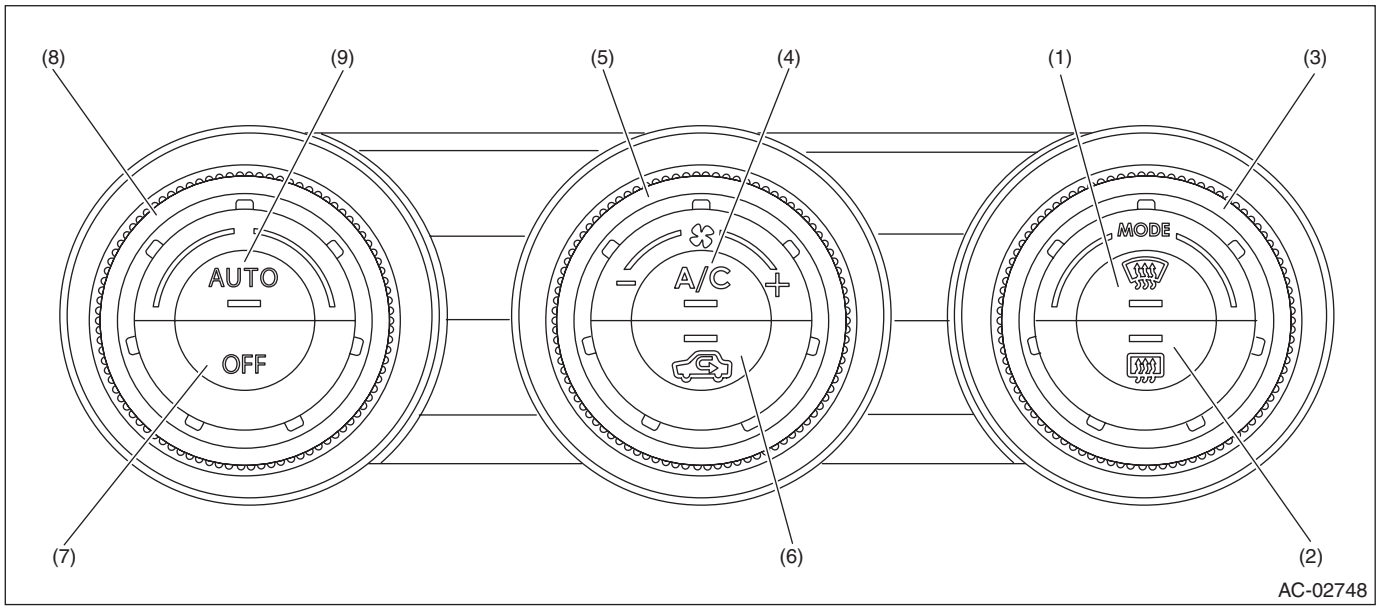
## A: OPERATION

- Without left/right independent air conditioning function (without high grade MFD)



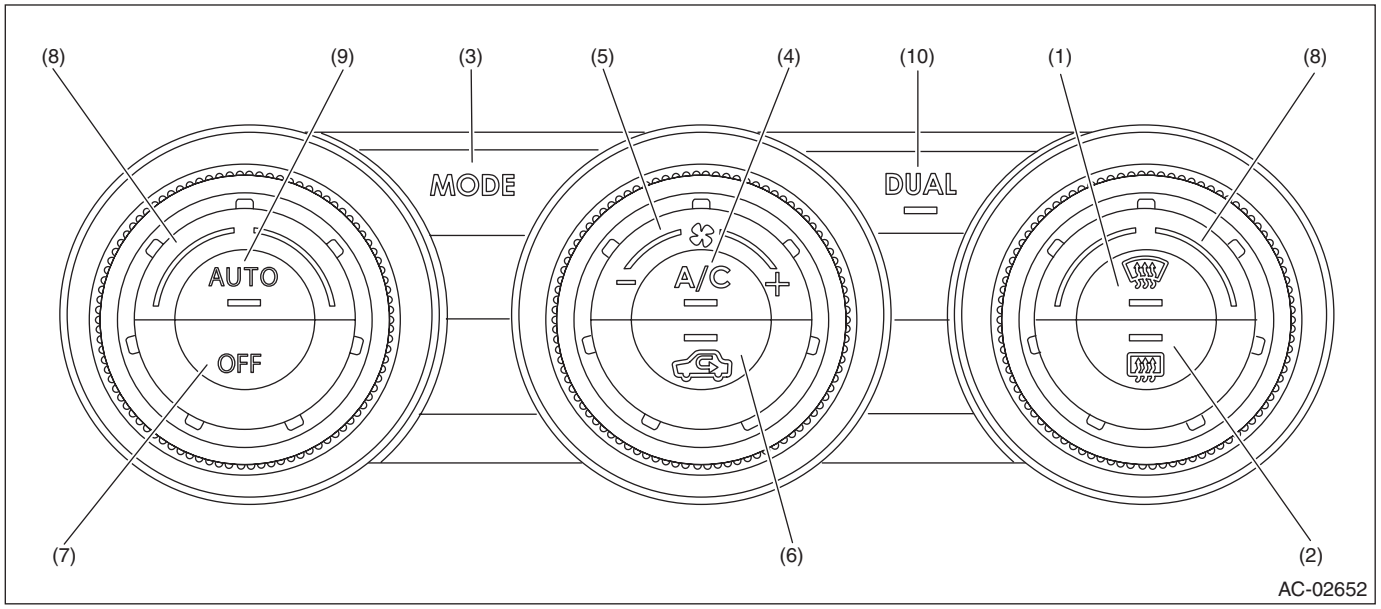
(1) Fan dial
(2) Air flow control dial
(3) Temperature adjustment dial
(4) FRESH/RECIRC switch
(5) Rear window defogger switch
(6) A/C switch

- Without left/right independent air conditioning function (with high grade MFD)



(1) Defroster switch
(2) Rear window defogger switch
(3) Air flow control dial
(4) A/C switch
(5) Fan dial
(6) FRESH/RECIRC switch
(7) OFF switch
(8) Temperature adjustment dial
(9) AUTO switch

- With left/right independent air conditioning function



(1) Defroster switch
(2) Rear window defogger switch
(3) Air flow control switch
(4) A/C switch
(5) Fan dial
(6) FRESH/RECIRC switch
(7) OFF switch
(8) Temperature adjustment dial
(9) AUTO switch
(10) Dual switch

## 1. A/C CONTROL PANEL SELF-DIAGNOSIS

- Without left/right independent air conditioning function (without high grade MFD)

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 1 | **SELECT SELF-DIAGNOSIS MODE IN THE CONTROL MODULE.**<br>1) Set the air flow control dial and fan dial to the AUTO position.<br>2) Start the engine with the A/C switch and the FRESH/RECIRC switch pressed. | Does the self-diagnosis mode operate? | Go to step **2**. | <Ref. to AC(diag)-17, NOTHING IS DISPLAYED ON THE SCREEN. NO ILLUMINATION APPEARS ON THE INDICATOR, DIAGNOSTIC PROCEDURE WITH PHENOMENON, Diagnostics with Phenomenon.> |
| 2 | **CHECK THE LIGHTING OF THE LED.**<br>Make sure that all switch LEDs on the control panel illuminate. | Do all LEDs blink eight times? | Go to step **3**. | Replace the A/C control panel. <Ref. to AC-47, REMOVAL, Control Panel.> |
| 3 | **CHECK SENSOR MALFUNCTION.**<br>1) Set the air flow control dial and fan dial to the AUTO position.<br>2) If the system has trouble for each sensor, the FRESH/RECIRC switch LED blinks or is turned off.<br>3) If the system has no malfunctions, the FRESH/RECIRC switch LED is illuminated. | Does the FRESH/RECIRC switch LED illuminate? | Go to step **5**. | Go to step **4**. |

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 4 | **CONFIRM MALFUNCTIONING SENSOR.**<br>1) Set the air flow control dial to AUTO.<br>2) Turn the fan dial to each mode position, and check each switch LED illumination according to sensor check table. <Ref. to AC(diag)-12, SENSOR CHECK TABLE, OPERATION, Diagnostic Chart for Self-Diagnosis.> | When turning the fan dial to each mode position, does the FRESH/RECIRC switch LED go off? | Go to step **5**. | Repair the defective sensor. |
| 5 | **CHECK AIR MIX DOOR AND MODE DOOR POSITION OPERATION SIGNALS.**<br>1) Set the air flow control dial to FACE.<br>2) Turn the fan dial to AUTO.<br>3) If there is a system malfunction in the air mix door signal or the mode door position signal, the FRESH/RECIRC switch LED goes off or blinks.<br>4) If the system has no malfunctions, the FRESH/RECIRC switch LED is illuminated. | Does the FRESH/RECIRC switch LED illuminate? | Go to step **8**. | Go to step **6**. |
| 6 | **CHECK AIR MIX DOOR POSITION DRIVE SIGNALS.**<br>1) Set the air flow control dial to FACE.<br>2) Place the fan dial in each position and then check each LED illumination conditions. <Ref. to AC(diag)-14, DRIVE SIGNAL CHECK TABLE, OPERATION, Diagnostic Chart for Self-Diagnosis.> | Do the LEDs illuminate in accordance with operation signal table? | Go to step **7**. | Check the air mix door actuator circuit. |
| 7 | **CHECK MODE DOOR POSITION DRIVE SIGNAL.**<br>1) Press the A/C switch.<br>2) Place the fan dial in each position and then check each LED illumination conditions. <Ref. to AC(diag)-14, DRIVE SIGNAL CHECK TABLE, OPERATION, Diagnostic Chart for Self-Diagnosis.> | Do the LEDs illuminate in accordance with operation signal table? | Go to step **8**. | Check the mode door actuator circuit. |
| 8 | **CHECK OPERATION OF EACH ACTUATOR, BLOWER FAN AND COMPRESSOR CLUTCH.**<br>1) Set the air flow control dial to B/L.<br>2) Turn the fan dial from AUTO to 7th, and select operating modes.<br>3) Check the operation of each mode according to operating mode table. <Ref. to AC(diag)-13, OPERATING MODE TABLE, OPERATION, Diagnostic Chart for Self-Diagnosis.> | Does the operation of each mode match to operating mode table? | Turn the fan dial to OFF or the ignition switch to OFF in order to complete self-diagnosis. | Repair the malfunctioning part in accordance with each diagnostic chart. |

• Without left/right independent air conditioning function (with high grade MFD), with left/right independent air conditioning function

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 1 | **SELECT SELF-DIAGNOSIS MODE IN THE CONTROL MODULE.**<br>Start the engine with the A/C switch and the FRESH/RECIRC switch pressed. | Does the self-diagnosis mode operate? | Go to step **2**. | <Ref. to AC(diag)-17, NOTHING IS DISPLAYED ON THE SCREEN. NO ILLUMINATION APPEARS ON THE INDICATOR, DIAGNOSTIC PROCEDURE WITH PHENOMENON, Diagnostics with Phenomenon.> |
| 2 | **CHECK INDICATOR BLINKS.**<br>Make sure that all switch indicators on the control panel blink. | Do all indicators blink eight times? | Go to step **3**. | Replace the A/C control panel. <Ref. to AC-47, REMOVAL, Control Panel.> |
| 3 | **CHECK SENSOR MALFUNCTION.**<br>1) The inspection mode for sensor is initiated by turning the fan dial one click to the right. (The auto switch indicator blinks two times.)<br>2) If all sensors have no malfunctions, the A/C switch indicator illuminates. If any sensor has a malfunction, the A/C switch indicator blinks.<br>3) Identify defective sensors according to the sensor check table. <Ref. to AC(diag)-12, SENSOR CHECK TABLE, OPERATION, Diagnostic Chart for Self-Diagnosis.> | Does the A/C switch indicator illuminate? | Go to step **4**. | Repair the defective sensor. |
| 4 | **CHECK ACTUATOR DRIVE SIGNAL.**<br>1) The inspection mode for actuator is initiated by turning the fan dial one click to the right. (The AUTO switch indicator blinks three times.)<br>2) If all actuators have no malfunctions, the defroster indicator illuminates. If any actuator has a malfunction, the defroster indicator blinks.<br>3) Identify defective actuator circuit according to the drive signal check table. <Ref. to AC(diag)-14, DRIVE SIGNAL CHECK TABLE, OPERATION, Diagnostic Chart for Self-Diagnosis.> | Does the defroster switch indicator illuminate? | Go to step **5**. | Repair the defective actuator circuit. |
| 5 | **CHECK OPERATION OF EACH ACTUATOR, BLOWER FAN AND COMPRESSOR CLUTCH.**<br>1) The inspection mode for blower fan, actuator and compressor is initiated by turning the fan dial one click to the right. (The AUTO switch indicator blinks four times.)<br>2) The number of blinking of A/C switch indicator changes and the operation mode changes each time the A/C switch is pressed.<br>3) Check each operation according to the operating mode table. <Ref. to AC(diag)-13, OPERATING MODE TABLE, OPERATION, Diagnostic Chart for Self-Diagnosis.> | Does each operation match to operating mode table? | System is normal. Press the OFF switch or turn the ignition switch to OFF in order to complete self-diagnosis. | Repair the defective part in accordance with each diagnostic chart. |

## 2. SENSOR CHECK TABLE

- Without left/right independent air conditioning function (without high grade MFD)

NOTE:

- When the sunload sensor check is performed indoors or in the shade, it could be diagnosed as having an open circuit. Always check the sunload sensor at a location exposed to direct sunlight.
- Past malfunction will illuminate if four malfunctions or more were detected previously.
- To cancel the past malfunction, perform either of the following procedure: Disconnect the negative battery terminal or press and hold the FRESH/RECIRC switch for 5 seconds or more while performing self-diagnosis step 3 — 7.

| Air flow control dial position | Fan dial position | Sensor to be checked | No trouble | Short circuit | Open circuit | When currently malfunctioning | When having malfunctioned in the past |
|---|---|---|---|---|---|---|---|
| AUTO | AUTO | In-vehicle sensor | FRESH/ RECIRC switch LED is turned off | FRESH/RECIRC switch LED blinks (Illuminates for 0.2 sec. ←→ turns off for 0.2 sec.) | FRESH/RECIRC switch LED blinks (Illuminates for 1 sec. ←→ turns off for 1 sec.) | Rear window defogger switch LED is turned off | Rear window defogger switch LED illuminates |
| | 1st | Ambient sensor | | FRESH/RECIRC switch LED blinks (Illuminates for 0.2 sec. ←→ turns off for 0.2 sec.) | | | |
| | 2nd | Evaporator sensor | | FRESH/RECIRC switch LED blinks (Illuminates for 0.2 sec. ←→ turns off for 0.2 sec.) | | | |
| | 3rd | Engine coolant temperature sensor | | — | | | |
| | 4th | Sunload sensor | | FRESH/RECIRC switch LED blinks (Illuminates for 0.2 sec. ←→ turns off for 0.2 sec.) | | | |
| | 5th | CAN communication | | — | | | |
| | 6th | FRESH/ RECIRC potentiometer | | FRESH/RECIRC switch LED blinks (Illuminates for 0.2 sec. ←→ turns off for 0.2 sec.) | | | |

- Without left/right independent air conditioning function (with high grade MFD), with left/right independent air conditioning function

NOTE:

- When the sunload sensor check is performed indoors or in the shade, it could be diagnosed as having an open circuit. Always check the sunload sensor at a location exposed to direct sunlight.
- If there are multiple defective sensors, a malfunction is displayed in the sequence of priority (1, 2, 3, etc.). The display changes in the sequence of priority (1, 2, 3, etc.) each time the A/C switch is pressed.
- Past malfunction will illuminate if four malfunctions or more were detected previously.

• To cancel the past malfunction, perform either of the following procedure: Disconnect the negative battery terminal or press and hold the FRESH/RECIRC switch for 5 seconds or more while performing self-diagnosis step 3 — 4.

| Sensor | A/C switch indicator | FRESH/RECIRC switch indicator | | | | Rear defroster switch indicator *2 | |
|---|---|---|---|---|---|---|---|
| | | Open | Sequence of priority | Short | Sequence of priority | Current malfunction | Past malfunction |
| In-vehicle sensor | Once | Light OFF | 1 | Light ON | 2 | Light OFF | Light ON |
| Ambient sensor | Twice | Light OFF | 3 | Light ON | 4 | Light OFF | Light ON |
| Evaporator sensor | 3 times | Light OFF | 5 | Light ON | 6 | Light OFF | Light ON |
| Engine coolant temperature sensor | 4 times | Light OFF | | | 7 | Light OFF | Light ON |
| Sunload sensor | 5 times | Light OFF*1 | 8 | Light ON | 9 | Light OFF | Light ON |
| CAN communication | 6 times | Light OFF | 10 | — | | Light OFF | Light ON |
| FRESH/RECIRC potentiometer | 7 times | Light OFF | 11 | Light ON | 12 | Light OFF | Light ON |

*1: Displays current malfunction only
*2: If the same diagnostic object contains a current malfunction and a past malfunction, the current malfunctions is displayed.

## 3. OPERATING MODE TABLE

• Without left/right independent air conditioning function (without high grade MFD)

| Operation | Fan dial position | | | | | | | |
|---|---|---|---|---|---|---|---|---|
| | AUTO | 1st | 2nd | 3rd | 4th | 5th | 6th | 7th |
| Blower fan | 4 V | 4 V | 4.9 V | 5.9 V | 7.0 V | 8.3 V | 9.8 V | 14 V |
| FRESH/RECIRC door | RECIRC | RECIRC | MIX | FRESH | FRESH | FRESH | FRESH | FRESH |
| Air flow control door | FACE | FACE | FACE | B/L | HEAT | HEAT | D/H | DEF |
| Air mix door | 0% | 0% | 0% | 50% | 50% | 100% | 100% | 100% |
| A/C compressor | OFF | ON | ON | ON | ON | ON | ON | ON |

• Without left/right independent air conditioning function (with high grade MFD), with left/right independent air conditioning function

| Operation | Number of blinking of A/C switch indicator | | | | | | | |
|---|---|---|---|---|---|---|---|---|
| | Once | Twice | 3 times | 4 times | 5 times | 6 times | 7 times | 8 times |

*1: Without left/right independent air conditioning function
*2: With left/right independent air conditioning function
*3: If the same diagnostic object contains a current malfunction and a past malfunction, the current malfunctions is displayed.

## 5. DIAGNOSTIC PROCEDURE IF A/C CONTROL PANEL SELF DIAGNOSIS FAILS TO OPERATE

NOTE:
For the diagnostic procedures, refer to Diagnostics with Phenomenon “Nothing is displayed on the screen. No illumination appears on the indicator.” <Ref. to AC(diag)-17, NOTHING IS DISPLAYED ON THE SCREEN. NO ILLUMINATION APPEARS ON THE INDICATOR, DIAGNOSTIC PROCEDURE WITH PHENOMENON, Diagnostics with Phenomenon.>

# 6. Diagnostics with Phenomenon

## A: INSPECTION

1. Perform the diagnosis according to the diagnostic procedure of the corresponding symptom that is shown in the symptom list.
2. If there are multiple symptoms, perform the diagnosis in the symptom sequence (1 → 2 → ... → 13).

### 1. SYMPTOM LIST

| Symptoms | | Diagnostic procedure |
|---|---|---|
| 1 | Nothing is displayed on the screen. No illumination appears on the indicator. | <Ref. to AC(diag)-17, NOTHING IS DISPLAYED ON THE SCREEN. NO ILLUMINATION APPEARS ON THE INDICATOR, DIAGNOSTIC PROCEDURE WITH PHENOMENON, Diagnostics with Phenomenon.> |
| 2 | Air conditioner does not stop when pressing the OFF switch. | <Ref. to AC(diag)-19, AIR CONDITIONER DOES NOT STOP WHEN PRESSING THE OFF SWITCH, DIAGNOSTIC PROCEDURE WITH PHENOMENON, Diagnostics with Phenomenon.> |
| 3 | Windshield grass does not clear when pressing the DEF switch. | <Ref. to AC(diag)-20, WINDSHIELD GRASS DOES NOT CLEAR WHEN PRESSING THE DEF SWITCH, DIAGNOSTIC PROCEDURE WITH PHENOMENON, Diagnostics with Phenomenon.> |
| 4 | Cold air not emitted. | <Ref. to AC(diag)-21, COLD AIR NOT EMITTED, DIAGNOSTIC PROCEDURE WITH PHENOMENON, Diagnostics with Phenomenon.> |
| 5 | Warm air not emitted. | <Ref. to AC(diag)-23, WARM AIR NOT EMITTED, DIAGNOSTIC PROCEDURE WITH PHENOMENON, Diagnostics with Phenomenon.> |
| 6 | Compartment temperature is lower than setting temperature. | <Ref. to AC(diag)-25, COMPARTMENT TEMPERATURE IS LOWER THAN SETTING TEMPERATURE, DIAGNOSTIC PROCEDURE WITH PHENOMENON, Diagnostics with Phenomenon.> |
| 7 | Compartment temperature is higher than setting temperature. | <Ref. to AC(diag)-27, COMPARTMENT TEMPERATURE IS HIGHER THAN SETTING TEMPERATURE, DIAGNOSTIC PROCEDURE WITH PHENOMENON, Diagnostics with Phenomenon.> |
| 8 | Air does not come out. Airflow is low. (Blower motor does not rotate.) | <Ref. to AC(diag)-29, AIR DOES NOT COME OUT. AIRFLOW IS LOW, DIAGNOSTIC PROCEDURE WITH PHENOMENON, Diagnostics with Phenomenon.> |
| 9 | Airflow cannot be adjusted. (Blower motor turns at a high speed.) | <Ref. to AC(diag)-32, AIR CANNOT BE CONTROLLED, DIAGNOSTIC PROCEDURE WITH PHENOMENON, Diagnostics with Phenomenon.> |
| 10 | Cool air does not come out when pressing the A/C switch. Fog cannot be cleared. (Compressor does not operate.) | <Ref. to AC(diag)-34, COOL AIR DOES NOT COME OUT WHEN PRESSING THE A/C SWITCH. FOG CANNOT BE CLEARED. (COMPRESSOR DOES NOT OPERATE.), DIAGNOSTIC PROCEDURE WITH PHENOMENON, Diagnostics with Phenomenon.> |
| 11 | Unable to switch suction vents. | <Ref. to AC(diag)-37, UNABLE TO SWITCH SUCTION VENTS, DIAGNOSTIC PROCEDURE WITH PHENOMENON, Diagnostics with Phenomenon.> |
| 12 | Unable to switch blow vents. | <Ref. to AC(diag)-38, UNABLE TO SWITCH VENTS, DIAGNOSTIC PROCEDURE WITH PHENOMENON, Diagnostics with Phenomenon.> |
| 13 | Illumination does not illuminate or cannot be dimmed. | <Ref. to AC(diag)-39, ILLUMINATION DOES NOT ILLUMINATE OR CANNOT BE DIMMED, DIAGNOSTIC PROCEDURE WITH PHENOMENON, Diagnostics with Phenomenon.> |

# B: DIAGNOSTIC PROCEDURE WITH PHENOMENON

## 1. NOTHING IS DISPLAYED ON THE SCREEN. NO ILLUMINATION APPEARS ON THE INDICATOR

**TROUBLE SYMPTOM:**

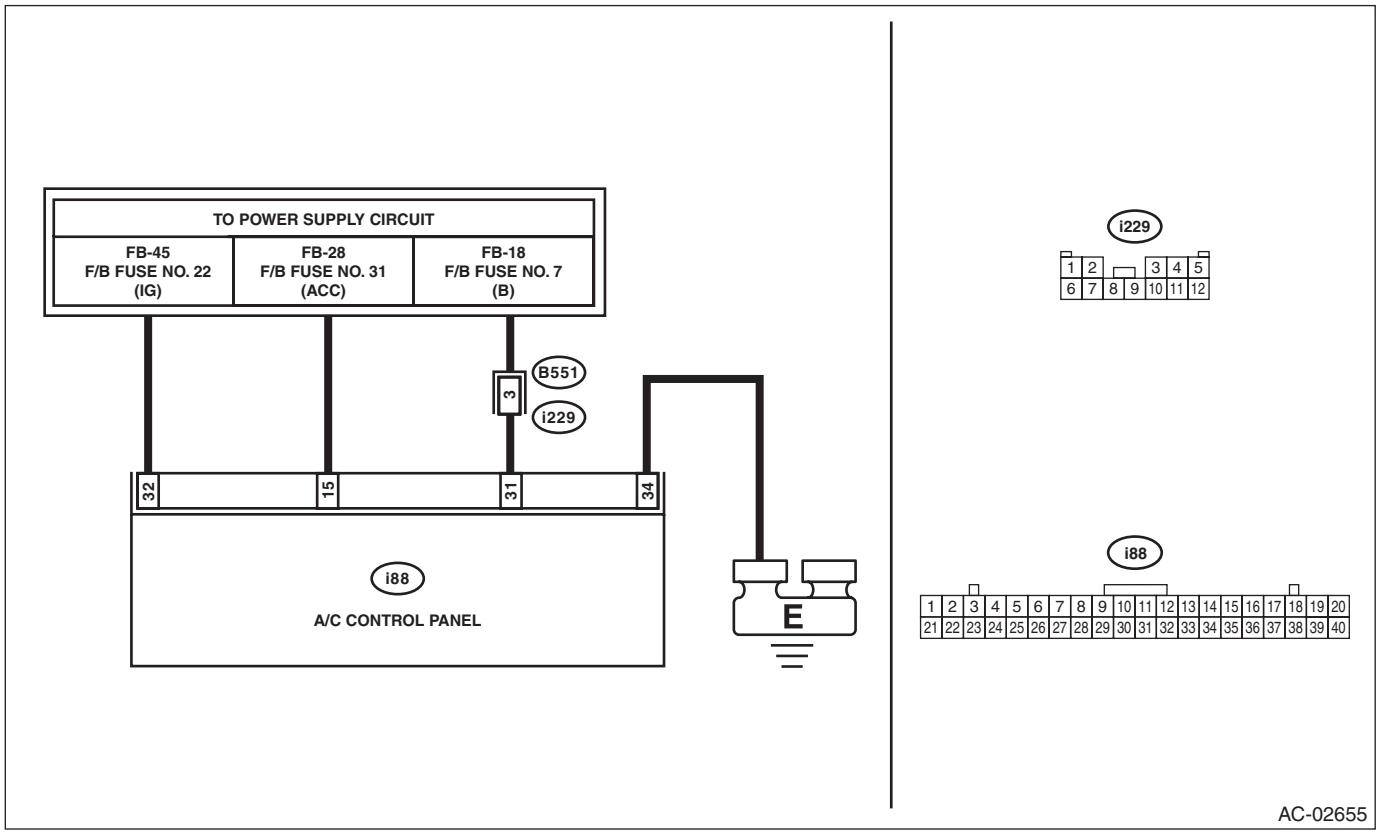
- When the AUTO button is pressed with IGN ON, nothing is displayed on the screen or indicators do not illuminate.
- Self diagnosis using A/C control panel does not operate.

**TROUBLE CAUSES:**

- A/C control panel power supply circuit failure
- CAN communication failure

**WIRING DIAGRAM:**

Air Conditioning System <Ref. to WI-35, WIRING DIAGRAM, Air Conditioning System.>



| | Step | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK FUSE.**<br>1) Turn the ignition switch to OFF.<br>2) Remove a fuse from fuse & relay box.<br>3) Check the condition of fuse. | Is the fuse blown out? | Replace the fuse. | Go to step **2**. |
| 2 | **CHECK CONNECTOR.**<br>Check for poor contact of connector. | Is there poor contact of connector? | Repair the connector. | Go to step **3**. |
| 3 | **CHECK A/C CONTROL PANEL POWER CIRCUIT.**<br>1) Remove the A/C control panel.<br>2) Disconnect the A/C control panel connector.<br>3) Measure the voltage between A/C control panel connector terminal and chassis ground after turning the ignition switch to ON.<br>***Connector & terminal***<br>***(i88) No. 15 (+) — Chassis ground (–):***<br>***(i88) No. 31 (+) — Chassis ground (–):***<br>***(i88) No. 32 (+) — Chassis ground (–):*** | Is the voltage 10 V or more? | Go to step **4**. | Check for open or short circuit in the harness between A/C control panel and fuse. |

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 4 | **CHECK A/C CONTROL PANEL GROUND CIRCUIT.**<br>Measure the resistance of harness between A/C control panel and chassis ground after turning the ignition switch to OFF.<br>***Connector & terminal***<br>***(i88) No. 34 — Chassis ground:*** | Is the resistance less than 10 Ω? | Go to step **5**. | Repair the harness for ground line. |
| 5 | **CHECK FOR POOR CONTACT.**<br>Check poor contact of A/C control panel connector. | Is there poor contact of connector? | Repair the connector. | Replace the A/C control panel. <Ref. to AC-47, REMOVAL, Control Panel.> |

## 2. AIR CONDITIONER DOES NOT STOP WHEN PRESSING THE OFF SWITCH

**TROUBLE SYMPTOM:**

Blower fan does not switch to OFF, inlet opening does not switch to FRESH, and compressor does not switch to OFF, when pressing the OFF switch.

**TROUBLE CAUSE:**

- CAN communication failure
- A/C control panel failure
- Blower motor failure
- Intake actuator failure
- Compressor failure

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK A/C CONTROL PANEL.**<br>1) Turn the ignition switch to ON.<br>2) Press the OFF switch located on the A/C panel.<br>3) Check the following data in “Read Current Data” using the Subaru Select Monitor.<br>• Blower Fan Level<br>• Fresh/Recircle Air Door Actuator Position Target | Does “Blower Fan Level” indicate 0 and “Fresh/Recircle Air Door Actuator Position Target” indicate 100%? | Go to step **2**. | Replace the A/C control panel. <Ref. to AC-47, REMOVAL, Control Panel.> |
| 2 | **CHECK BLOWER MOTOR.**<br>Check the blower motor operation with the OFF switch pressed. | Does the blower motor stop? | Go to step **3**. | <Ref. to AC(diag)-32, AIR CANNOT BE CONTROLLED, DIAGNOSTIC PROCEDURE WITH PHENOMENON, Diagnostics with Phenomenon.> |
| 3 | **CHECK INTAKE ACTUATOR.**<br>Check the intake door operation with the OFF switch pressed. | Is the intake door FRESH? | Go to step **4**. | <Ref. to AC(diag)-37, UNABLE TO SWITCH SUCTION VENTS, DIAGNOSTIC PROCEDURE WITH PHENOMENON, Diagnostics with Phenomenon.> |
| 4 | **CHECK COMPRESSOR.**<br>Check the compressor operation with the OFF switch pressed. | Does the compressor stop? | System is normal. | <Ref. to AC(diag)-34, COOL AIR DOES NOT COME OUT WHEN PRESSING THE A/C SWITCH. FOG CANNOT BE CLEARED. (COMPRESSOR DOES NOT OPERATE.), DIAGNOSTIC PROCEDURE WITH PHENOMENON, Diagnostics with Phenomenon.> |

## 3. WINDSHIELD GRASS DOES NOT CLEAR WHEN PRESSING THE DEF SWITCH

**TROUBLE SYMPTOM:**

Defroster indicator does not illuminate, outlet opening does not switch to DEF, compressor does not switch to ON, and inlet opening does not switch to FRESH, when pressing the DEF switch.

**TROUBLE CAUSE:**

- CAN communication failure
- A/C control panel failure
- Mode door actuator failure
- Compressor failure
- Intake actuator failure

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK A/C CONTROL PANEL.**<br>1) Turn the ignition switch to ON.<br>2) Press the DEF switch located on the A/C panel.<br>3) Check the following data in “Read Current Data” using the Subaru Select Monitor.<br>• Mode Door Actuator Position Target<br>• Fresh/Recircle Air Door Actuator Position Target | Does “Mode Door Actuator Position Target” indicate 100% and “Fresh/Recircle Air Door Actuator Position Target” indicate 100%? | Go to step **2**. | Replace the A/C control panel. <Ref. to AC-47, REMOVAL, Control Panel.> |
| 2 | **CHECK MODE DOOR ACTUATOR.**<br>Check the mode door operation with the DEF switch in ON. | Does air come out from the DEF outlet opening? | Go to step **3**. | <Ref. to AC(diag)-38, UNABLE TO SWITCH VENTS, DIAGNOSTIC PROCEDURE WITH PHENOMENON, Diagnostics with Phenomenon.> |
| 3 | **CHECK INTAKE ACTUATOR.**<br>Check the intake door operation with the DEF switch in ON. | Does the intake door operate normally? | Go to step **4**. | <Ref. to AC(diag)-37, UNABLE TO SWITCH SUCTION VENTS, DIAGNOSTIC PROCEDURE WITH PHENOMENON, Diagnostics with Phenomenon.> |
| 4 | **CHECK COMPRESSOR.**<br>Check the compressor operation with the DEF switch in ON. | Does the compressor operate? | System is normal. | <Ref. to AC(diag)-34, COOL AIR DOES NOT COME OUT WHEN PRESSING THE A/C SWITCH. FOG CANNOT BE CLEARED. (COMPRESSOR DOES NOT OPERATE.), DIAGNOSTIC PROCEDURE WITH PHENOMENON, Diagnostics with Phenomenon.> |

## 4. COLD AIR NOT EMITTED

**TROUBLE SYMPTOM:**
Cold air not emitted.
**TROUBLE CAUSES:**
- Airflow capacity failure
- Refrigerant pressure failure
- CAN communication failure
- A/C control panel failure
- Air mix actuator RH failure
- Air mix actuator LH failure (only with left/right independent air conditioning function)
- Intake door actuator failure
- Evaporator sensor failure
- In-vehicle sensor failure
- Ambient sensor failure
- Sunload sensor failure

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK MAX COOL.**<br>Set the A/C control panel dials as follows.<br>Temperature control dial: MAX COOL<br>FRESH/RECIRC switch: RECIRC<br>Mode switch or mode dial: VENT<br>A/C switch: ON | Does no cold air come out? | Go to step **2**. | Go to step **4**. |
| 2 | **CHECK AIRFLOW CAPACITY.**<br>Check the airflow capacity. <Ref. to AC(diag)-29, AIR DOES NOT COME OUT. AIRFLOW IS LOW, DIAGNOSTIC PROCEDURE WITH PHENOMENON, Diagnostics with Phenomenon.> | Is the airflow capacity normal? | Go to step **3**. | Perform repair according to inspection procedure. |
| 3 | **CHECK AMOUNT OF REFRIGERANT PRESSURE.**<br>Check the refrigerant pressure. <Ref. to AC-22, REFRIGERANT GAS PRESSURE INSPECTION, PROCEDURE, Refrigerant Pressure with Manifold Gauge Set.> | Is the refrigerant pressure normal? | Go to step **4**. | Perform repair according to refrigerant pressure inspection. |
| 4 | **CHECK A/C CONTROL PANEL.**<br>1) Turn the temperature control dials (driver's side) and (passenger's side) to MAX COOL.<br>2) Using Subaru Select Monitor, display the following data in "Read Current Data".<br>• Heater Control Panel Setting Value (Driver's)<br>• Heater Control Panel Setting Value (Passenger's) | Do "Heater Control Panel Setting Value (Driver's)" and "Heater Control Panel Setting Value (Passenger's)" indicate "60"*1? | Go to step **5**. | Replace the A/C control panel. <Ref. to AC-47, REMOVAL, Control Panel.> |
| 5 | **CHECK A/C CONTROL PANEL.**<br>1) Turn the temperature control dials (driver's side) and (passenger's side) to MAX HOT.<br>2) Using Subaru Select Monitor, display the following data in "Read Current Data".<br>• Heater Control Panel Setting Value (Driver's)<br>• Heater Control Panel Setting Value (Passenger's) | Do "Heater Control Panel Setting Value (Driver's)" and "Heater Control Panel Setting Value (Passenger's)" indicate "90"*2? | Go to step **6**. | Replace the A/C control panel. <Ref. to AC-47, REMOVAL, Control Panel.> |
| 6 | **CHECK DTC.**<br>1) Turn the ignition switch to ON.<br>2) Turn the temperature control dial at MAX COOL and leave for 16 seconds or more. (For vehicles with left/right independent air conditioner, perform setting on both sides.)<br>3) Read the DTC using Subaru Select Monitor. | Is DTC B14E1, B14E2, B14E3 or B14E4 displayed? | Perform the diagnosis according to DTC. | Go to step **7**. |

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 7 | **CHECK DTC.**<br>1) Turn the ignition switch to ON.<br>2) Turn the temperature control dial at MAX HOT and leave for 16 seconds or more. (For vehicles with left/right independent air conditioner, perform setting on both sides.)<br>3) Read the DTC using Subaru Select Monitor. | Is DTC B14E1, B14E2, B14E3 or B14E4 displayed? | Perform the diagnosis according to DTC. | Go to step **8**. |
| 8 | **CHECK INTAKE DOOR ACTUATOR.**<br>Visually check the intake door actuator operation. | Is the intake door actuator normal? | Go to step **9**. | Check the intake door actuator. <Ref. to AC(diag)-37, UNABLE TO SWITCH SUCTION VENTS, DIAGNOSTIC PROCEDURE WITH PHENOMENON, Diagnostics with Phenomenon.> |
| 9 | **CHECK EVAPORATOR SENSOR UNIT.**<br>Perform the inspection of evaporator sensor unit. <Ref. to AC-83, INSPECTION, Evaporator Sensor.> | Is the evaporator sensor normal? | Go to step **10**. | Replace the evaporator sensor. <Ref. to AC-82, REMOVAL, Evaporator Sensor.> |
| 10 | **CHECK IN-VEHICLE SENSOR UNIT.**<br>Check in-vehicle sensor. <Ref. to AC-79, INSPECTION, In-Vehicle Sensor (Auto A/C Model).> | Is the in-vehicle sensor normal? | Go to step **11**. | Replace the in-vehicle sensor. <Ref. to AC-78, REMOVAL, In-Vehicle Sensor (Auto A/C Model).> |
| 11 | **CHECK AMBIENT SENSOR UNIT.**<br>Check the ambient sensor. <Ref. to AC-75, INSPECTION, Ambient Sensor.> | Is the ambient sensor normal? | Go to step **12**. | Replace the ambient sensor. <Ref. to AC-73, REMOVAL, Ambient Sensor.> |
| 12 | **CHECK SUNLOAD SENSOR UNIT.**<br>Check the sunload sensor unit. <Ref. to AC-77, INSPECTION, Sunload Sensor (Auto A/C Model).> | Is the sunload sensor normal? | System is normal. | Replace the sunload sensor. <Ref. to AC-76, REMOVAL, Sunload Sensor (Auto A/C Model).> |

*1: For the 75°F center specification. Note that 18 for 25°C center specification and 15 for 22°C center specification.
*2: For the 75°F center specification. Note that 32 for 25°C center specification and 29 for 22°C center specification.

## 5. WARM AIR NOT EMITTED

**TROUBLE SYMPTOM:**
Warm air not emitted.
**TROUBLE CAUSES:**
- Airflow capacity failure
- Coolant level failure
- CAN communication failure
- A/C control panel failure
- Air mix actuator RH failure
- Air mix actuator LH failure (only with left/right independent air conditioning function)
- Intake door actuator failure
- Evaporator sensor failure
- In-vehicle sensor failure
- Ambient sensor failure
- Sunload sensor failure

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK MAX HOT.**<br>Set the A/C control panel dials as follows.<br>Temperature control dial: MAX HOT<br>FRESH/RECIRC switch: FRESH<br>Mode switch or mode dial: HEAT<br>A/C switch: OFF | Does no warm air come out? | Go to step **2**. | Go to step **4**. |
| 2 | **CHECK AIRFLOW CAPACITY.**<br>Check the airflow capacity. <Ref. to AC(diag)-29, AIR DOES NOT COME OUT. AIRFLOW IS LOW, DIAGNOSTIC PROCEDURE WITH PHENOMENON, Diagnostics with Phenomenon.> | Is the airflow capacity normal? | Go to step **3**. | Perform repair according to inspection procedure. |
| 3 | **CHECK ENGINE COOLANT.**<br>Check engine coolant amount. | Is the engine coolant level within the specification? | Go to step **4**. | Fill engine coolant. If there is coolant leakage, repair the leaks according to Engine Cooling System Trouble in General. <Ref. to CO(H4DO)-52, Engine Cooling System Trouble in General.> |
| 4 | **CHECK A/C CONTROL PANEL.**<br>1) Turn the temperature control dials (driver's side) and (passenger's side) to MAX COOL.<br>2) Using Subaru Select Monitor, display the following data in "Read Current Data".<br>• Heater Control Panel Setting Value (Driver's)<br>• Heater Control Panel Setting Value (Passenger's) | Do "Heater Control Panel Setting Value (Driver's)" and "Heater Control Panel Setting Value (Passenger's)" indicate "60"*1? | Go to step **5**. | Replace the A/C control panel. <Ref. to AC-47, REMOVAL, Control Panel.> |
| 5 | **CHECK A/C CONTROL PANEL.**<br>1) Turn the temperature control dials (driver's side) and (passenger's side) to MAX HOT.<br>2) Using Subaru Select Monitor, display the following data in "Read Current Data".<br>• Heater Control Panel Setting Value (Driver's)<br>• Heater Control Panel Setting Value (Passenger's) | Do "Heater Control Panel Setting Value (Driver's)" and "Heater Control Panel Setting Value (Passenger's)" indicate "90"*2? | Go to step **6**. | Replace the A/C control panel. <Ref. to AC-47, REMOVAL, Control Panel.> |

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 6 | **CHECK DTC.**<br>1) Turn the ignition switch to ON.<br>2) Turn the temperature control dial at MAX COOL and leave for 16 seconds or more. (For vehicles with left/right independent air conditioner, perform setting on both sides.)<br>3) Read the DTC using Subaru Select Monitor. | Is DTC B14E1, B14E2, B14E3 or B14E4 displayed? | Perform the diagnosis according to DTC. | Go to step **7**. |
| 7 | **CHECK DTC.**<br>1) Turn the ignition switch to ON.<br>2) Turn the temperature control dial at MAX HOT and leave for 16 seconds or more. (For vehicles with left/right independent air conditioner, perform setting on both sides.)<br>3) Read the DTC using Subaru Select Monitor. | Is DTC B14E1, B14E2, B14E3 or B14E4 displayed? | Perform the diagnosis according to DTC. | Go to step **8**. |
| 8 | **CHECK INTAKE DOOR ACTUATOR.**<br>Visually check the intake door actuator operation. | Is the intake door actuator normal? | Go to step **9**. | Check the intake door actuator. <Ref. to AC(diag)-37, UNABLE TO SWITCH SUCTION VENTS, DIAGNOSTIC PROCEDURE WITH PHENOMENON, Diagnostics with Phenomenon.> |
| 9 | **CHECK EVAPORATOR SENSOR UNIT.**<br>Perform the inspection of evaporator sensor unit. <Ref. to AC-83, INSPECTION, Evaporator Sensor.> | Is the evaporator sensor normal? | Go to step **10**. | Replace the evaporator sensor. <Ref. to AC-82, REMOVAL, Evaporator Sensor.> |
| 10 | **CHECK IN-VEHICLE SENSOR UNIT.**<br>Check in-vehicle sensor circuit. <Ref. to AC-79, INSPECTION, In-Vehicle Sensor (Auto A/C Model).> | Is the in-vehicle sensor circuit normal? | Go to step **11**. | Replace the in-vehicle sensor. <Ref. to AC-78, REMOVAL, In-Vehicle Sensor (Auto A/C Model).> |
| 11 | **CHECK AMBIENT SENSOR UNIT.**<br>Check the ambient sensor. <Ref. to AC-75, INSPECTION, Ambient Sensor.> | Is the ambient sensor normal? | Go to step **12**. | Replace the ambient sensor. <Ref. to AC-73, REMOVAL, Ambient Sensor.> |
| 12 | **CHECK SUNLOAD SENSOR UNIT.**<br>Check the sunload sensor unit. <Ref. to AC-77, INSPECTION, Sunload Sensor (Auto A/C Model).> | Is the sunload sensor normal? | System is normal. | Replace the sunload sensor. <Ref. to AC-76, REMOVAL, Sunload Sensor (Auto A/C Model).> |

*1: For the 75°F center specification. Note that 18 for 25°C center specification and 15 for 22°C center specification.
*2: For the 75°F center specification. Note that 32 for 25°C center specification and 29 for 22°C center specification.

## 6. COMPARTMENT TEMPERATURE IS LOWER THAN SETTING TEMPERATURE

**TROUBLE SYMPTOM:**

Compartment temperature is excessively lower than setting temperature.

**TROUBLE CAUSES:**

- Large airflow capacity
- Refrigerant pressure failure
- CAN communication failure
- A/C control panel failure
- Air mix actuator RH failure
- Air mix actuator LH failure (only with left/right independent air conditioning function)
- Evaporator sensor failure
- In-vehicle sensor failure
- Ambient sensor failure
- Sunload sensor failure

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK AIRFLOW CAPACITY.**<br>Check the airflow capacity. <Ref. to AC(diag)-32, AIR CANNOT BE CONTROLLED, DIAGNOSTIC PROCEDURE WITH PHENOMENON, Diagnostics with Phenomenon.> | Is the airflow capacity normal? | Go to step **2**. | Perform repair according to inspection procedure. |
| 2 | **CHECK AMOUNT OF REFRIGERANT PRESSURE.**<br>Check the refrigerant pressure. <Ref. to AC-22, REFRIGERANT GAS PRESSURE INSPECTION, PROCEDURE, Refrigerant Pressure with Manifold Gauge Set.> | Is the refrigerant pressure normal? | Go to step **3**. | Perform repair according to refrigerant pressure inspection. |
| 3 | **CHECK A/C CONTROL PANEL.**<br>1) Turn the temperature control dials (driver's side) and (passenger's side) to MAX COOL.<br>2) Using Subaru Select Monitor, display the following data in "Read Current Data".<br>• Heater Control Panel Setting Value (Driver's)<br>• Heater Control Panel Setting Value (Passenger's) | Do "Heater Control Panel Setting Value (Driver's)" and "Heater Control Panel Setting Value (Passenger's)" indicate "60"*1? | Go to step **4**. | Replace the A/C control panel. <Ref. to AC-47, REMOVAL, Control Panel.> |
| 4 | **CHECK A/C CONTROL PANEL.**<br>1) Turn the temperature control dials (driver's side) and (passenger's side) to MAX HOT.<br>2) Using Subaru Select Monitor, display the following data in "Read Current Data".<br>• Heater Control Panel Setting Value (Driver's)<br>• Heater Control Panel Setting Value (Passenger's) | Do "Heater Control Panel Setting Value (Driver's)" and "Heater Control Panel Setting Value (Passenger's)" indicate "90"*2? | Go to step **5**. | Replace the A/C control panel. <Ref. to AC-47, REMOVAL, Control Panel.> |
| 5 | **CHECK DTC.**<br>1) Turn the ignition switch to ON.<br>2) Turn the temperature control dial at MAX COOL and leave for 16 seconds or more. (For vehicles with left/right independent air conditioner, perform setting on both sides.)<br>3) Read the DTC using Subaru Select Monitor. | Is DTC B14E1, B14E2, B14E3 or B14E4 displayed? | Perform the diagnosis according to DTC. | Go to step **6**. |
| 6 | **CHECK DTC.**<br>1) Turn the ignition switch to ON.<br>2) Turn the temperature control dial at MAX HOT and leave for 16 seconds or more. (For vehicles with left/right independent air conditioner, perform setting on both sides.)<br>3) Read the DTC using Subaru Select Monitor. | Is DTC B14E1, B14E2, B14E3 or B14E4 displayed? | Perform the diagnosis according to DTC. | Go to step **7**. |

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 7 | **CHECK EVAPORATOR SENSOR UNIT.**<br>Perform the inspection of evaporator sensor unit. <Ref. to AC-83, INSPECTION, Evaporator Sensor.> | Is the evaporator sensor normal? | Go to step **8**. | Replace the evaporator sensor. <Ref. to AC-82, REMOVAL, Evaporator Sensor.> |
| 8 | **CHECK IN-VEHICLE SENSOR UNIT.**<br>Check in-vehicle sensor circuit. <Ref. to AC-79, INSPECTION, In-Vehicle Sensor (Auto A/C Model).> | Is the in-vehicle sensor circuit normal? | Go to step **9**. | Replace the in-vehicle sensor. <Ref. to AC-78, REMOVAL, In-Vehicle Sensor (Auto A/C Model).> |
| 9 | **CHECK AMBIENT SENSOR UNIT.**<br>Check the ambient sensor. <Ref. to AC-75, INSPECTION, Ambient Sensor.> | Is the ambient sensor normal? | Go to step **10**. | Replace the ambient sensor. <Ref. to AC-73, REMOVAL, Ambient Sensor.> |
| 10 | **CHECK SUNLOAD SENSOR UNIT.**<br>Check the sunload sensor unit. <Ref. to AC-77, INSPECTION, Sunload Sensor (Auto A/C Model).> | Is the sunload sensor normal? | System is normal. | Replace the sunload sensor. <Ref. to AC-76, REMOVAL, Sunload Sensor (Auto A/C Model).> |

*1: For the 75°F center specification. Note that 18 for 25°C center specification and 15 for 22°C center specification.
*2: For the 75°F center specification. Note that 32 for 25°C center specification and 29 for 22°C center specification.

## 7. COMPARTMENT TEMPERATURE IS HIGHER THAN SETTING TEMPERATURE

**TROUBLE SYMPTOM:**

Compartment temperature is excessively higher than setting temperature.

**TROUBLE CAUSES:**

- Large airflow capacity
- CAN communication failure
- A/C control panel failure
- Air mix actuator RH failure
- Air mix actuator LH failure (only with left/right independent air conditioning function)
- Intake door actuator failure
- Evaporator sensor failure
- In-vehicle sensor failure
- Ambient sensor failure
- Sunload sensor failure

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK AIRFLOW CAPACITY.**<br>Check the airflow capacity. <Ref. to AC(diag)-32, AIR CANNOT BE CONTROLLED, DIAGNOSTIC PROCEDURE WITH PHENOMENON, Diagnostics with Phenomenon.> | Is the airflow capacity normal? | Go to step **2**. | Perform repair according to inspection procedure. |
| 2 | **CHECK A/C CONTROL PANEL.**<br>1) Turn the temperature control dials (driver's side) and (passenger's side) to MAX COOL.<br>2) Using Subaru Select Monitor, display the following data in "Read Current Data".<br>• Heater Control Panel Setting Value (Driver's)<br>• Heater Control Panel Setting Value (Passenger's) | Do "Heater Control Panel Setting Value (Driver's)" and "Heater Control Panel Setting Value (Passenger's)" indicate "60"*1? | Go to step **3**. | Replace the A/C control panel. <Ref. to AC-47, REMOVAL, Control Panel.> |
| 3 | **CHECK A/C CONTROL PANEL.**<br>1) Turn the temperature control dials (driver's side) and (passenger's side) to MAX HOT.<br>2) Using Subaru Select Monitor, display the following data in "Read Current Data".<br>• Heater Control Panel Setting Value (Driver's)<br>• Heater Control Panel Setting Value (Passenger's) | Do "Heater Control Panel Setting Value (Driver's)" and "Heater Control Panel Setting Value (Passenger's)" indicate "90"*2? | Go to step **4**. | Replace the A/C control panel. <Ref. to AC-47, REMOVAL, Control Panel.> |
| 4 | **CHECK DTC.**<br>1) Turn the ignition switch to ON.<br>2) Turn the temperature control dial at MAX COOL and leave for 16 seconds or more. (For vehicles with left/right independent air conditioner, perform setting on both sides.)<br>3) Read the DTC using Subaru Select Monitor. | Is DTC B14E1, B14E2, B14E3 or B14E4 displayed? | Perform the diagnosis according to DTC. | Go to step **5**. |
| 5 | **CHECK DTC.**<br>1) Turn the ignition switch to ON.<br>2) Turn the temperature control dial at MAX HOT and leave for 16 seconds or more. (For vehicles with left/right independent air conditioner, perform setting on both sides.)<br>3) Read the DTC using Subaru Select Monitor. | Is DTC B14E1, B14E2, B14E3 or B14E4 displayed? | Perform the diagnosis according to DTC. | Go to step **6**. |

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 6 | **CHECK INTAKE DOOR ACTUATOR.**<br>Visually check the intake door actuator operation. | Is the intake door actuator normal? | Go to step **7**. | Check the intake door actuator. <Ref. to AC(diag)-37, UNABLE TO SWITCH SUCTION VENTS, DIAGNOSTIC PROCEDURE WITH PHENOMENON, Diagnostics with Phenomenon.> |
| 7 | **CHECK EVAPORATOR SENSOR UNIT.**<br>Perform the inspection of evaporator sensor unit. <Ref. to AC-83, INSPECTION, Evaporator Sensor.> | Is the evaporator sensor normal? | Go to step **8**. | Replace the evaporator sensor. <Ref. to AC-82, REMOVAL, Evaporator Sensor.> |
| 8 | **CHECK IN-VEHICLE SENSOR UNIT.**<br>Check in-vehicle sensor circuit. <Ref. to AC-79, INSPECTION, In-Vehicle Sensor (Auto A/C Model).> | Is the in-vehicle sensor circuit normal? | Go to step **9**. | Replace the in-vehicle sensor. <Ref. to AC-78, REMOVAL, In-Vehicle Sensor (Auto A/C Model).> |
| 9 | **CHECK AMBIENT SENSOR UNIT.**<br>Check the ambient sensor. <Ref. to AC-75, INSPECTION, Ambient Sensor.> | Is the ambient sensor normal? | Go to step **10**. | Replace the ambient sensor. <Ref. to AC-73, REMOVAL, Ambient Sensor.> |
| 10 | **CHECK SUNLOAD SENSOR UNIT.**<br>Check the sunload sensor unit. <Ref. to AC-77, INSPECTION, Sunload Sensor (Auto A/C Model).> | Is the sunload sensor normal? | System is normal. | Replace the sunload sensor. <Ref. to AC-76, REMOVAL, Sunload Sensor (Auto A/C Model).> |

*1: For the 75°F center specification. Note that 18 for 25°C center specification and 15 for 22°C center specification.
*2: For the 75°F center specification. Note that 32 for 25°C center specification and 29 for 22°C center specification.

## 8. AIR DOES NOT COME OUT. AIRFLOW IS LOW

**TROUBLE SYMPTOM:**

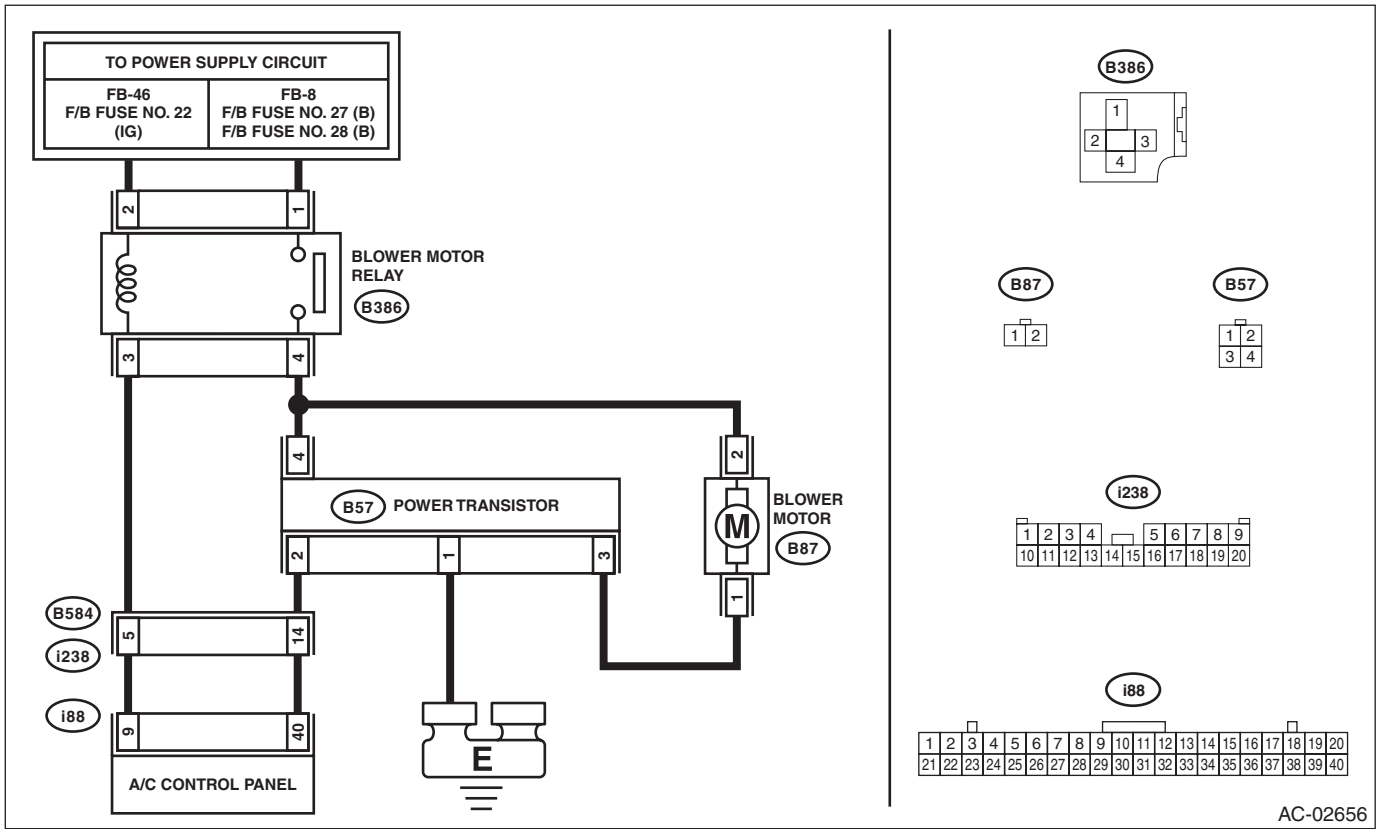
- Airflow capacity is insufficient.
- Air does not come out when operating the fan dial.

**TROUBLE CAUSES:**

- Airflow capacity failure
- CAN communication failure
- A/C control panel failure
- Blower motor failure

**WIRING DIAGRAM:**

Air Conditioning System <Ref. to WI-35, WIRING DIAGRAM, Air Conditioning System.>



| Step | | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK A/C CONTROL PANEL.**<br>1) Using Subaru Select Monitor, display the following data in "Read Current Data".<br>• Air mix door actuator position (driver's side)<br>• Air mix door actuator position (passenger's)<br>• Blower Fan Level<br>2) Turn the temperature control dial at MAX COOL and increase and decrease the A/C control panel fan dial. (For vehicles with left/right independent air conditioner, perform setting on both sides.) | Do "Air mix door actuator position (driver's side)" and "Air mix door actuator position (passenger's side)" indicate "0%"? Also, does the value of "Blower Fan Level" increase or decrease in conjunction with the fan dial operation? | Go to step **2**. | Go to step **5**. |
| 2 | **CHECK AIRFLOW CAPACITY.**<br>Turn the temperature control dial to LO (both dials for the models equipped with left/right independent air conditioning function), A/C control panel fan dial to MAX and FRESH/RECIRC switch to RECIRC. | Is the airflow capacity insufficient for the same model? | Go to step **3**. | System is normal. |
| 3 | **CHECK A/C FILTER.**<br>Check the A/C filter. | Is the A/C filter normal? | Go to step **4**. | Clean or replace the A/C filter. |

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 4 | **CHECK EACH DUCT.**<br>Check each duct joint for disconnection or clogging. | Is each duct normal? | Go to step **5**. | Repair the faulty duct. |
| 5 | **CHECK A/C CONTROL PANEL.**<br>1) Turn the ignition switch to ON.<br>2) Turn the fan dial to the maximum position.<br>3) Using the Subaru Select Monitor, check "Blower Fan Level" of the current data from the A/C diagnosis. | Does "Blower Fan Level" indicate "7"? | Go to step **6**. | Replace the A/C control panel. <Ref. to AC-47, REMOVAL, Control Panel.> |
| 6 | **CHECK A/C CONTROL PANEL.**<br>1) Turn the fan dial to the minimum position.<br>2) Using the Subaru Select Monitor, check "Blower Fan Level" of the current data from the A/C diagnosis. | Does "Blower Fan Level" indicate "1"? | Go to step **7**. | Replace the A/C control panel. <Ref. to AC-47, REMOVAL, Control Panel.> |
| 7 | **CHECK CONNECTOR.**<br>Check for poor contact of connector. | Is there poor contact of connector? | Repair the connector. | Go to step **8**. |
| 8 | **CHECK FUSE.**<br>1) Remove a fuse in the fuse & relay box.<br>2) Check the condition of fuse. | Is the fuse blown out? | Replace the fuse. | Go to step **9**. |
| 9 | **CHECK BLOWER MOTOR RELAY ON SIGNAL.**<br>1) Stop the engine.<br>2) Turn the fan dial OFF.<br>3) Turn the ignition switch to ON.<br>4) Using a tester, measure the voltage between the A/C control panel connector (i88) and chassis ground.<br>***Connector & terminal***<br>***(i88) No. 9 (+) — Chassis ground (–):*** | Is the voltage 10 V or more? | Go to step **10**. | • Check for open or short circuit in the harness between fuse and ECM.<br>• Check the blower relay connector and relay unit. <Ref. to AC-33, CHECK RELAY, INSPECTION, Relay and Fuse.> |
| 10 | **CHECK BLOWER MOTOR RELAY ON SIGNAL.**<br>1) Start the engine.<br>2) Turn the fan dial to ON.<br>3) Using a tester, measure the voltage between the A/C control panel connector (i88) and chassis ground.<br>***Connector & terminal***<br>***(i88) No. 9 (+) — Chassis ground (–):*** | Is the voltage 0 V? | Go to step **11**. | Replace the A/C control panel. <Ref. to AC-47, REMOVAL, Control Panel.> |
| 11 | **CHECK BLOWER MOTOR POWER SUPPLY CIRCUIT.**<br>1) Turn the ignition switch to ON.<br>2) Turn the fan dial to ON.<br>3) Use a tester to measure the voltage between the blower motor connector (B87) and chassis ground.<br>***Connector & terminal***<br>***(B87) No. 2 (+) — Chassis ground (–):*** | Is the voltage 10 V or more? | Go to step **12**. | • Check the blower motor power supply line harness for open circuit or connector disconnection.<br>• Check the blower relay connector and relay unit. <Ref. to AC-33, CHECK RELAY, INSPECTION, Relay and Fuse.> |
| 12 | **CHECK BLOWER MOTOR UNIT.**<br>Check the blower motor. <Ref. to AC-37, INSPECTION, Blower Motor.> | Is the blower motor OK? | Go to step **13**. | Replace the blower motor. <Ref. to AC-37, REMOVAL, Blower Motor.> |

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 13 | **CHECK HARNESS.**<br>1) Disconnect the power transistor and A/C control panel connector.<br>2) Using a tester, measure the resistance between harness terminals.<br>***Connector & terminal***<br>***(B386) No. 4 — (B57) No. 4:***<br>***(B87) No. 1 — (B57) No. 3:***<br>***(B57) No. 2 — (i88) No. 40:***<br>***(B57) No. 1 — Chassis ground:*** | Is the resistance less than 1 Ω? | Go to step **14**. | Repair or replace the open circuit of harness. |
| 14 | **CHECK HARNESS.**<br>Use a tester to measure the harness resistance between the power transistor connector and chassis ground.<br>***Connector & terminal***<br>***(B57) No. 2 — Chassis ground:*** | Is the resistance less than 1 Ω? | Repair or replace the short circuit of the harness. | Go to step **15**. |
| 15 | **CHECK POWER TRANSISTOR.**<br>Replace the power transistor with a properly functioning part. | Does the blower motor rotate? | Replace the power transistor. <Ref. to AC-38, REMOVAL, Power Transistor (Auto A/C Model).> | Replace the A/C control panel. <Ref. to AC-47, REMOVAL, Control Panel.> |

## 9. AIR CANNOT BE CONTROLLED

**TROUBLE SYMPTOM:**

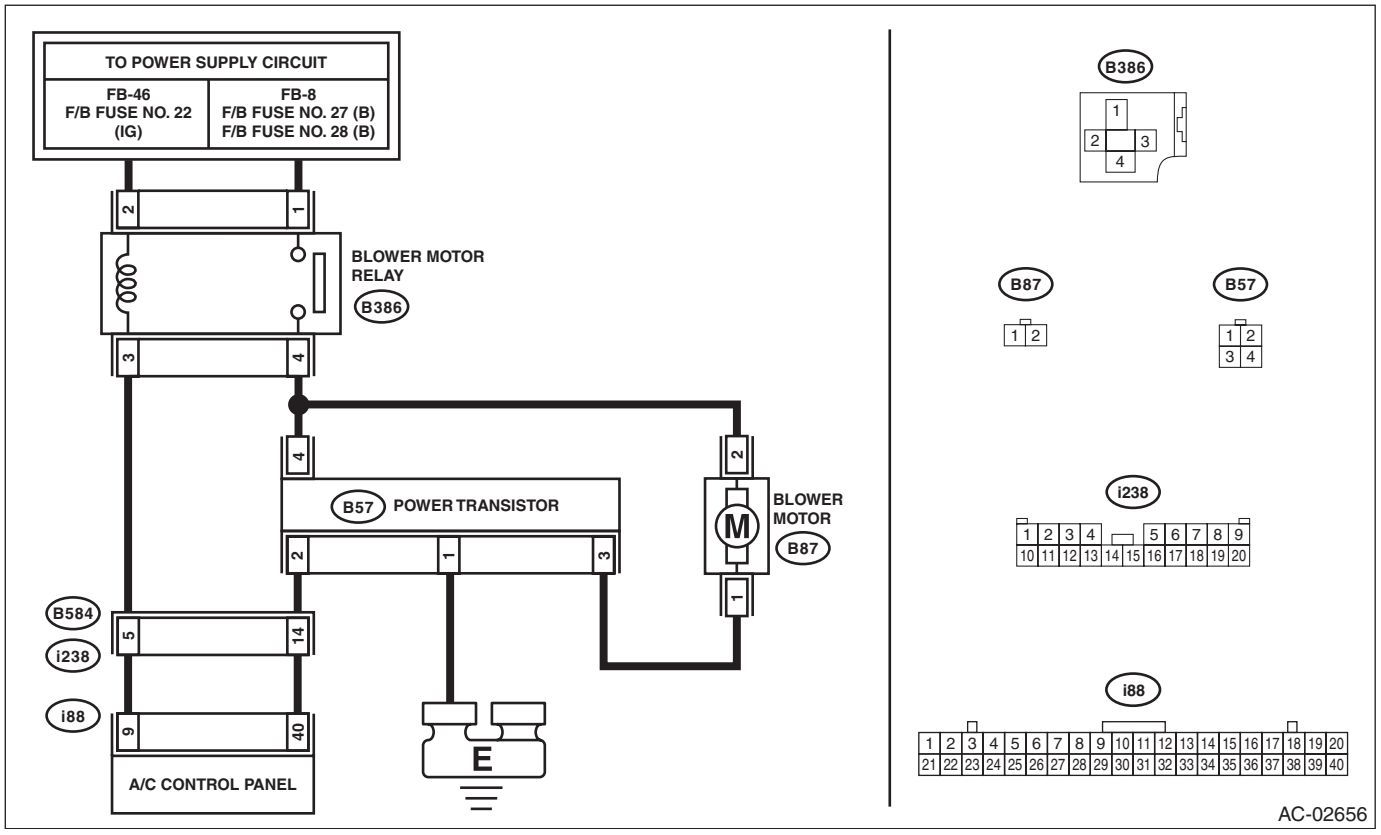
- The blower rotates even though the blower switch is not turned on.
- The blower motor continues to rotate at high speed. (Not adjustable.)

**TROUBLE CAUSES:**

- Airflow capacity failure
- CAN communication failure
- A/C control panel failure
- Blower motor failure

**WIRING DIAGRAM:**

Air Conditioning System <Ref. to WI-35, WIRING DIAGRAM, Air Conditioning System.>

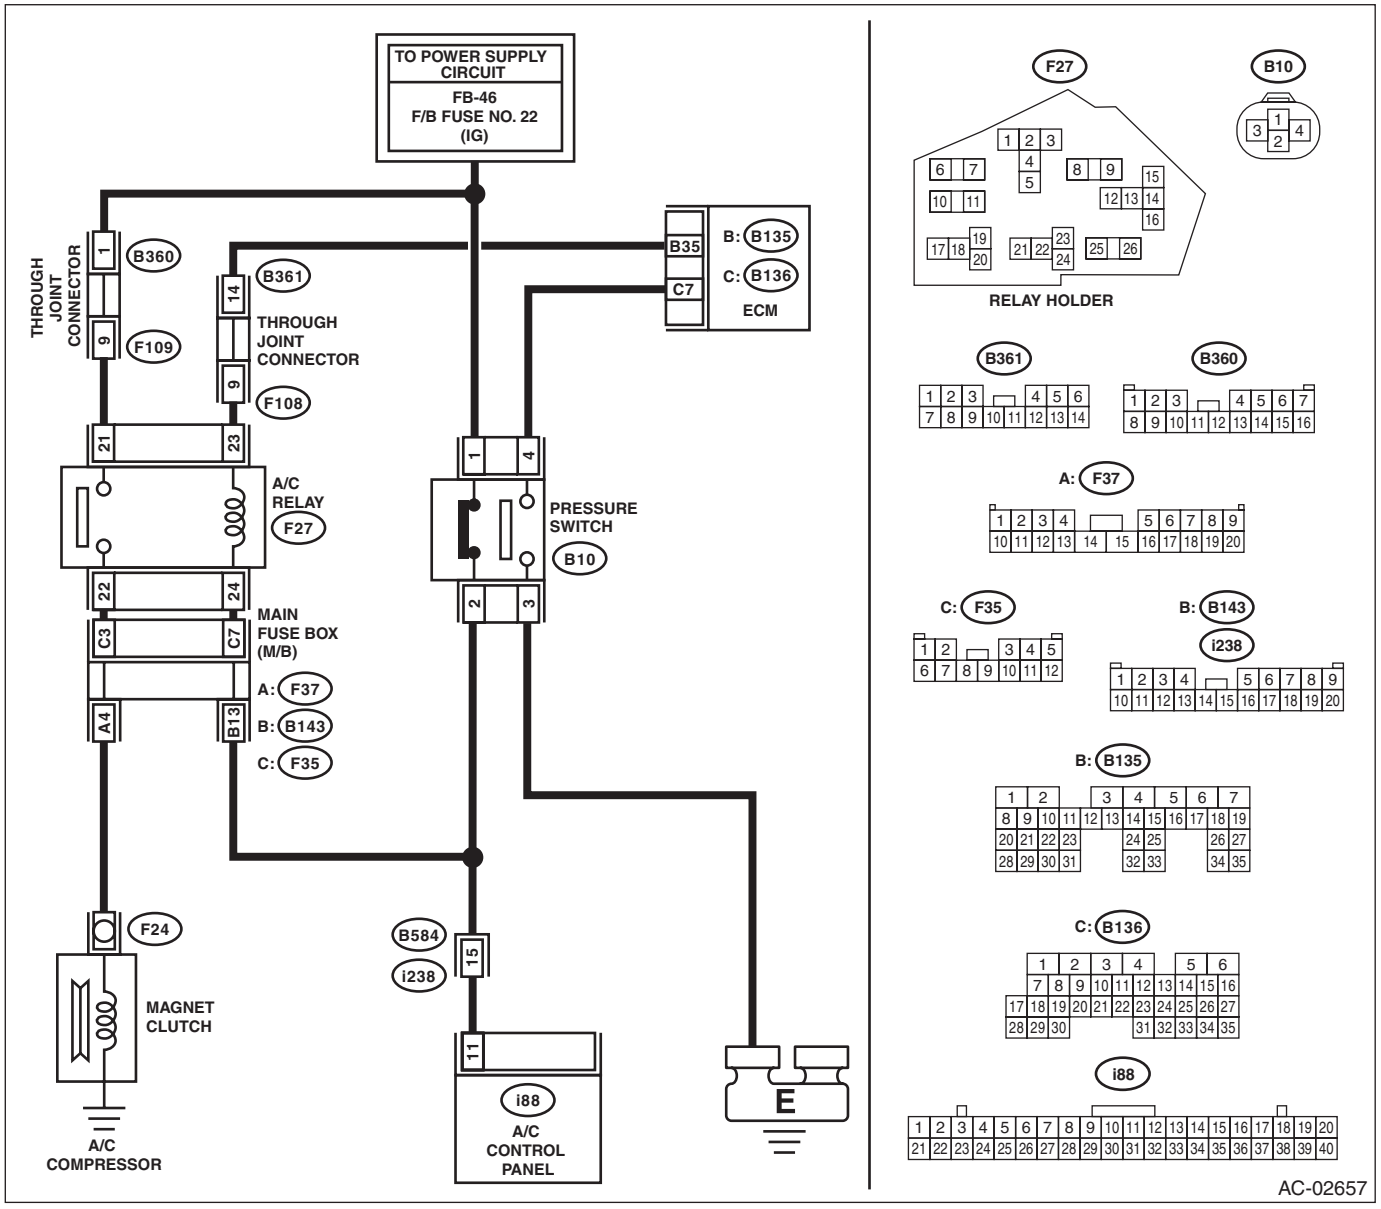


| Step | | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK A/C CONTROL PANEL.**<br>1) Turn the ignition switch to ON.<br>2) Turn the fan dial to the maximum position.<br>3) Using the Subaru Select Monitor, check "Blower Fan Level" of the current data from the A/C diagnosis. | Does "Blower Fan Level" indicate "7"? | Go to step **2**. | Replace the A/C control panel. <Ref. to AC-47, REMOVAL, Control Panel.> |
| 2 | **CHECK A/C CONTROL PANEL.**<br>1) Turn the fan dial to the minimum position.<br>2) Using the Subaru Select Monitor, check "Blower Fan Level" of the current data from the A/C diagnosis. | Does "Blower Fan Level" indicate "1"? | Go to step **3**. | Replace the A/C control panel. <Ref. to AC-47, REMOVAL, Control Panel.> |
| 3 | **CHECK HARNESS.**<br>1) Turn the ignition switch to OFF.<br>2) Disconnect the power transistor connector.<br>3) Use a tester to measure the resistance between the power transistor connector and chassis ground.<br>***Connector & terminal***<br>***(B57) No. 4 — Chassis ground:*** | Is the resistance less than 1 Ω? | Repair or replace the short circuit of the harness between blower motor and power transistor. | Go to step **4**. |

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 4 | **CHECK HARNESS.**<br>1) Remove the A/C control panel.<br>2) Turn the ignition switch to ON.<br>3) Use a tester to measure the resistance between the power transistor connector and chassis ground.<br>***Connector & terminal***<br>***(B57) No. 2 — Chassis ground:*** | Is the resistance less than 1 Ω? | Repair or replace the short circuit of the harness between A/C control panel and power transistor. | Go to step **5**. |
| 5 | **CHECK HARNESS.**<br>1) Connect the disconnected connectors.<br>2) Turn the ignition switch to ON.<br>3) Use a tester to measure the voltage between the power transistor connector and chassis ground.<br>***Connector & terminal***<br>***(B57) No. 2 (+) — Chassis ground (–):*** | Is the voltage approx. 9 V when fan dial in 1st, and approx. 3.5 V when fan dial in 6th? | Replace the power transistor. <Ref. to AC-38, REMOVAL, Power Transistor (Auto A/C Model).> | Go to step **6**. |
| 6 | **CHECK A/C CONTROL PANEL.**<br>1) Turn the fan dial OFF.<br>2) Disconnect the power transistor connector.<br>3) Use a tester to measure the resistance between the power transistor connector and chassis ground.<br>***Connector & terminal***<br>***(B57) No. 2 — Chassis ground:*** | When the fan dial is OFF and other than OFF, does the resistance change? | Replace the power transistor. <Ref. to AC-38, REMOVAL, Power Transistor (Auto A/C Model).> | Replace the A/C control panel. <Ref. to AC-47, REMOVAL, Control Panel.> |

## 10.COOL AIR DOES NOT COME OUT WHEN PRESSING THE A/C SWITCH. FOG CANNOT BE CLEARED. (COMPRESSOR DOES NOT OPERATE.)

**TROUBLE SYMPTOM:**
Compressor does not operate after turning the A/C switch to ON and fan dial between LO and HI.
**TROUBLE CAUSES:**
Compressor failure
**WIRING DIAGRAM:**
Air Conditioning System <Ref. to WI-35, WIRING DIAGRAM, Air Conditioning System.>



| | Step | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK A/C CONTROL PANEL.**<br>1) Leave the vehicle under the condition at ambient temperature of 15°C (59°F) or more.<br>2) Turn the ignition switch to ON.<br>3) Turn the fan dial to the maximum position.<br>4) Press the A/C switch. | Is "A/C" displayed on the A/C control panel? | Go to step **2**. | Replace the A/C control panel. <Ref. to AC-47, REMOVAL, Control Panel.> |
| 2 | **CHECK EVAPORATOR SENSOR.**<br>Using the Subaru Select Monitor, check "Evaporator Temp." of the current data from the A/C diagnosis. | Does the data indicate -0.5 degree or more? | Go to step **4**. | Go to step **3**. |
| 3 | **CHECK EVAPORATOR SENSOR.**<br>Check the evaporator sensor. <Ref. to AC-83, INSPECTION, Evaporator Sensor.> | Is the sensor normal? | Go to step **4**. | Replace the evaporator sensor. <Ref. to AC-82, REMOVAL, Evaporator Sensor.> |
| 4 | **CHECK PRESSURE SWITCH.**<br>Check the pressure switch connection. | Is the connector normal? | Go to step **5**. | Repair the connector. |
| 5 | **CHECK PRESSURE SWITCH.**<br>Using the Subaru Select Monitor, check "Pressure Switch" of the current data from Air Conditioning Diagnosis. | Does the data indicate normal? | Go to step **10**. | Go to step **6**. |
| 6 | **CHECK AMOUNT OF REFRIGERANT PRESSURE.**<br>Check the refrigerant pressure. <Ref. to AC-22, REFRIGERANT GAS PRESSURE INSPECTION, PROCEDURE, Refrigerant Pressure with Manifold Gauge Set.> | Is the refrigerant pressure normal? | Go to step **7**. | Perform repair according to refrigerant pressure inspection. |
| 7 | **CHECK CONNECTOR.**<br>Check poor contact of A/C control panel connector. | Is the connector normal? | Go to step **8**. | Repair the connector. |
| 8 | **CHECK FUSE.**<br>1) Turn the ignition switch to ON.<br>2) Remove a fuse in the fuse & relay box.<br>3) Check the fuse. | Is the fuse normal? | Go to step **9**. | Replace the fuse. |
| 9 | **CHECK PRESSURE SWITCH SIGNAL.**<br>1) Turn the ignition switch to OFF.<br>2) Disconnect the A/C control panel connector.<br>3) Turn the ignition switch to ON.<br>4) Measure the voltage between A/C control panel connector terminal and chassis ground.<br>***Connector & terminal***<br>***(i88) No. 11 (+) — Chassis ground (–):*** | Is the voltage 10 V or more? | Replace the A/C control panel. <Ref. to AC-47, REMOVAL, Control Panel.> | • Check for open or short circuit in the harness between fuse and A/C control panel.<br>• Check for poor contact of pressure switch connector. |
| 10 | **CHECK CAN COMMUNICATION CIRCUIT.**<br>Using the Subaru Select Monitor, check "A/C Switch Signal" of the current data from Engine Diagnosis. | Does the data indicate ON? | Go to step **12**. | Go to step **11**. |
| 11 | **CHECK CAN COMMUNICATION CIRCUIT.**<br>Perform the diagnosis for LAN system. <Ref. to LAN(diag)-2, PROCEDURE, Basic Diagnostic Procedure.> | Is the system normal? | Repair it according to DTC of LAN system. | Replace the A/C control panel. <Ref. to AC-47, REMOVAL, Control Panel.> |

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 12 | **CHECK A/C RELAY ON SIGNAL.**<br>1) Disconnect the ECM connector.<br>2) Turn the ignition switch to ON.<br>3) Measure the voltage between ECM connector terminal and chassis ground.<br>***Connector & terminal***<br>***(B135) No. 35 (+) — Chassis ground (–):*** | Is the voltage 10 V or more? | Go to step **13**. | • Check for open or short in the harness between pressure switch and ECM.<br>• Check poor contact of A/C relay connector.<br>• Check the A/C relay. <Ref. to AC-33, INSPECTION, Relay and Fuse.> |
| 13 | **CHECK A/C RELAY ON SIGNAL.**<br>1) Start the engine.<br>2) Turn the A/C switch to ON.<br>3) Turn the temperature control dial at maximum cool position.<br>4) Measure the voltage between ECM connector terminal and chassis ground.<br>***Connector & terminal***<br>***(B135) No. 35 (+) — Chassis ground (–):*** | Is the voltage 0 V? | Go to step **14**. | Replace the ECM. |
| 14 | **CHECK MAGNET CLUTCH POWER SUPPLY CIRCUIT.**<br>1) Stop the engine.<br>2) Disconnect the magnet clutch connector.<br>3) Start the engine.<br>4) Turn the A/C switch to ON.<br>5) Turn the temperature control dial at maximum cool position.<br>6) Measure the voltage between magnet clutch connector terminal and chassis ground.<br>***Connector & terminal***<br>***(F24) No. 1 (+) — Chassis ground (–):*** | Is the voltage 10 V or more? | Check the magnet clutch. | • Check for open or short circuit in the harness between fuse and magnet clutch.<br>• Check poor contact of A/C relay connector.<br>• Check the A/C relay. <Ref. to AC-33, INSPECTION, Relay and Fuse.> |

## 11.UNABLE TO SWITCH SUCTION VENTS

**TROUBLE SYMPTOM:**

Inlet opening does not switch RECIRC → FRESH or FRESH → RECIRC each time pressing the FRESH/RECIRC switch.

**TROUBLE CAUSE:**

Intake actuator failure.

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 1 | **VISUALLY CHECK INTAKE DOOR OPERATION.**<br>1) Remove the glove box. <Ref. to EI-67, REMOVAL, Glove Box.><br>2) Visually check the intake door operation by operating the FRESH/RECIRC switch. | Does the intake door operate normally? Is the portion between intake door and intake door case sealed completely? | System is normal. | Go to step **2**. |
| 2 | **CHECK A/C CONTROL PANEL.**<br>1) Turn the ignition switch to ON.<br>2) Using the Subaru Select Monitor, check "Fresh/Recircle Air Door Actuator Position Target" of the current data from Air Conditioning Diagnosis.<br>3) Operate the FRESH/RECIRC switch. | Does "Fresh/Recircle Air Door Actuator Position Target" indicate 0 ←→ 100? | Go to step **3**. | Replace the A/C control panel. <Ref. to AC-47, REMOVAL, Control Panel.> |
| 3 | **CHECK DTC.**<br>1) Turn the FRESH/RECIRC switch to RECIRC, and leave for 16 seconds or more.<br>2) Read the DTC using Subaru Select Monitor. | Is DTC B14E9, B14EA and B14EB displayed? | Perform the diagnosis according to DTC. | Go to step **4**. |
| 4 | **CHECK DTC.**<br>1) Turn the FRESH/RECIRC switch to FRESH, and leave for 16 seconds or more.<br>2) Read the DTC using Subaru Select Monitor. | Is DTC B14E9, B14EA and B14EB displayed? | Perform the diagnosis according to DTC. | System is normal. |

## 12.UNABLE TO SWITCH VENTS

**TROUBLE SYMPTOM:**

- Unable to switch blow vents.
- Outlet opening does not switch in the sequence of FACE → B/L → FOOT → F/D after operating the mode switch or mode dial.

**TROUBLE CAUSE:**

Mode actuator failure.

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK A/C CONTROL PANEL.**<br>1) Turn the ignition switch to ON.<br>2) Using the Subaru Select Monitor, check "Mode Door Actuator Position Target" of the current data from Air Conditioning Diagnosis.<br>3) Operate the air flow control switch. | Does the value of "Mode Door Actuator Position Target" change? | Go to step **2**. | Replace the A/C control panel. <Ref. to AC-47, REMOVAL, Control Panel.> |
| 2 | **CHECK DTC.**<br>1) Turn the air flow control switch to DEF, and leave for 16 seconds or more.<br>2) Read the DTC using Subaru Select Monitor. | Is DTC B14E5 and B14E6 displayed? | Perform the diagnosis according to DTC. | Go to step **3**. |
| 3 | **CHECK DTC.**<br>1) Turn the air flow control switch to VENT, and leave for 16 seconds or more.<br>2) Using the Subaru Select Monitor, read DTC of A/C control panel. | Is DTC B14E5 and B14E6 displayed? | Perform the diagnosis according to DTC. | System is normal. |

## 13.ILLUMINATION DOES NOT ILLUMINATE OR CANNOT BE DIMMED

**TROUBLE SYMPTOM:**

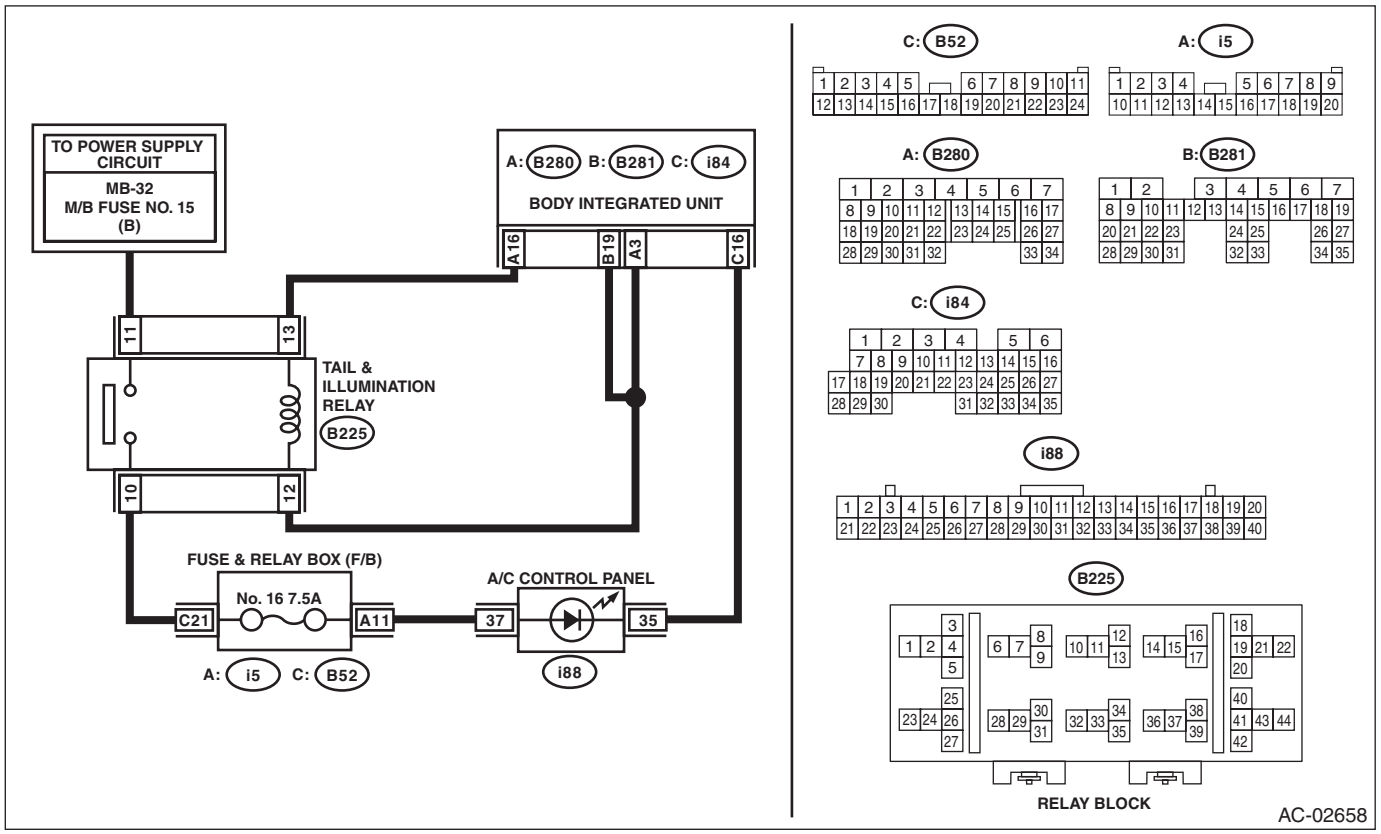
Even when the lighting switch is operated, the illumination does not come on. Even when the illumination control is operated, the illumination does not dim.

**TROUBLE SYMPTOM:**

Open circuit in illumination circuit

**WIRING DIAGRAM:**

Clearance Light and Illumination Light System <Ref. to WI-49, WIRING DIAGRAM, Clearance Light and Illumination Light System.>



| | Step | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK ILLUMINATION.**<br>Make sure that all illuminations except A/C come on. | Do other illuminations come on. | Go to step **2**. | <Ref. to LI-9, INSPECTION, Clearance Light and Illumination Light System.> |
| 2 | **CHECK CONNECTOR.**<br>Check for poor contact of connector. | Is there poor contact? | Repair the connector. | Go to step **3**. |
| 3 | **CHECK HARNESS.**<br>1) Turn the lighting switch to ON.<br>2) Using a tester, measure the voltage between the A/C control panel connector and chassis ground.<br>***Connector & terminal***<br>***(i88) No. 37 (+) — Chassis ground (–):*** | Is the voltage 10 V or more? | Go to step **4**. | Repair or replace the open circuit of harness. |
| 4 | **CHECK HARNESS.**<br>1) Turn the lighting switch to OFF.<br>2) Measure the resistance between A/C control panel connector and body integrated unit connector.<br>***Connector & terminal***<br>***(i88) No. 35 — (i84) No. 16:*** | Is the resistance less than 10 Ω? | Go to step **5**. | Repair or replace the open circuit of harness. |

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 5 | **CHECK A/C CONTROL PANEL UNIT.**<br>Check the A/C control panel. <Ref. to AC-47, REMOVAL, Control Panel.> | Is A/C control panel OK? | A/C control panel illumination circuit is normal. | Replace the A/C control panel. <Ref. to AC-47, REMOVAL, Control Panel.> |

# 7. Subaru Select Monitor

## A: OPERATION

For details of basic operations, refer to “PC application help for Subaru Select Monitor”.

NOTE:
If the communication for initializing of Subaru Select Monitor is impossible, perform the diagnosis using “Diagnostic Procedure for Subaru Select Monitor Communication Error”.

# 8. Read Diagnostic Trouble Code (DTC)

## A: OPERATION

For detailed operation procedures, refer to “PC application help for Subaru Select Monitor”.

# 9. Clear Memory Mode

## A: OPERATION

For detailed operation procedures, refer to “PC application help for Subaru Select Monitor”.

# 10.Read Current Data

## A: OPERATION

For detailed operation procedures, refer to “PC application help for Subaru Select Monitor”.

## B: LIST

| Items to be displayed | Unit of measure | Remarks | Note |
|---|---|---|---|
| In-vehicle Sensor Temperature | °C (°F) | A/C control panel input value | — |
| Quantity of Sunload | $W/m^2$ | A/C control panel input value | — |
| Heater Water Temperature | °C (°F) | Data value received by CAN | — |
| Heater Control Panel Setting Value (Driver’s) | LO: 18°C (60°F)<br>HI: 32°C (90°F) | Control panel display value | — |
| Heater Control Panel Setting Value (Passenger’s) | LO: 18°C (60°F)<br>HI: 32°C (90°F) | Control panel display value | For models with left/right independent air conditioning function only |
| Blower outlet request temperature (Driver’s) | °C (°F) | A/C control panel internal setting value | For models with left/right independent air conditioning function only |
| Blower outlet request temperature (Passenger’s) | °C (°F) | A/C control panel internal setting value | For models with left/right independent air conditioning function only |
| Air mix door actuator position (driver’s side) | % | A/C control panel input value | — |
| Air mix door actuator position (passenger’s side) | % | A/C control panel input value | For models with left/right independent air conditioning function only |
| Mode Door Actuator Position | % | A/C control panel input value | — |
| Fresh/Recircle Air Door Actuator Position | % | A/C control panel input value | — |
| Target air mix door actuator position (driver’s side) | % | A/C control panel input value | — |
| Target air mix door actuator position (passenger’s side) | % | A/C control panel input value | — |
| Mode Door Actuator Position Target | % | A/C control panel input value | — |

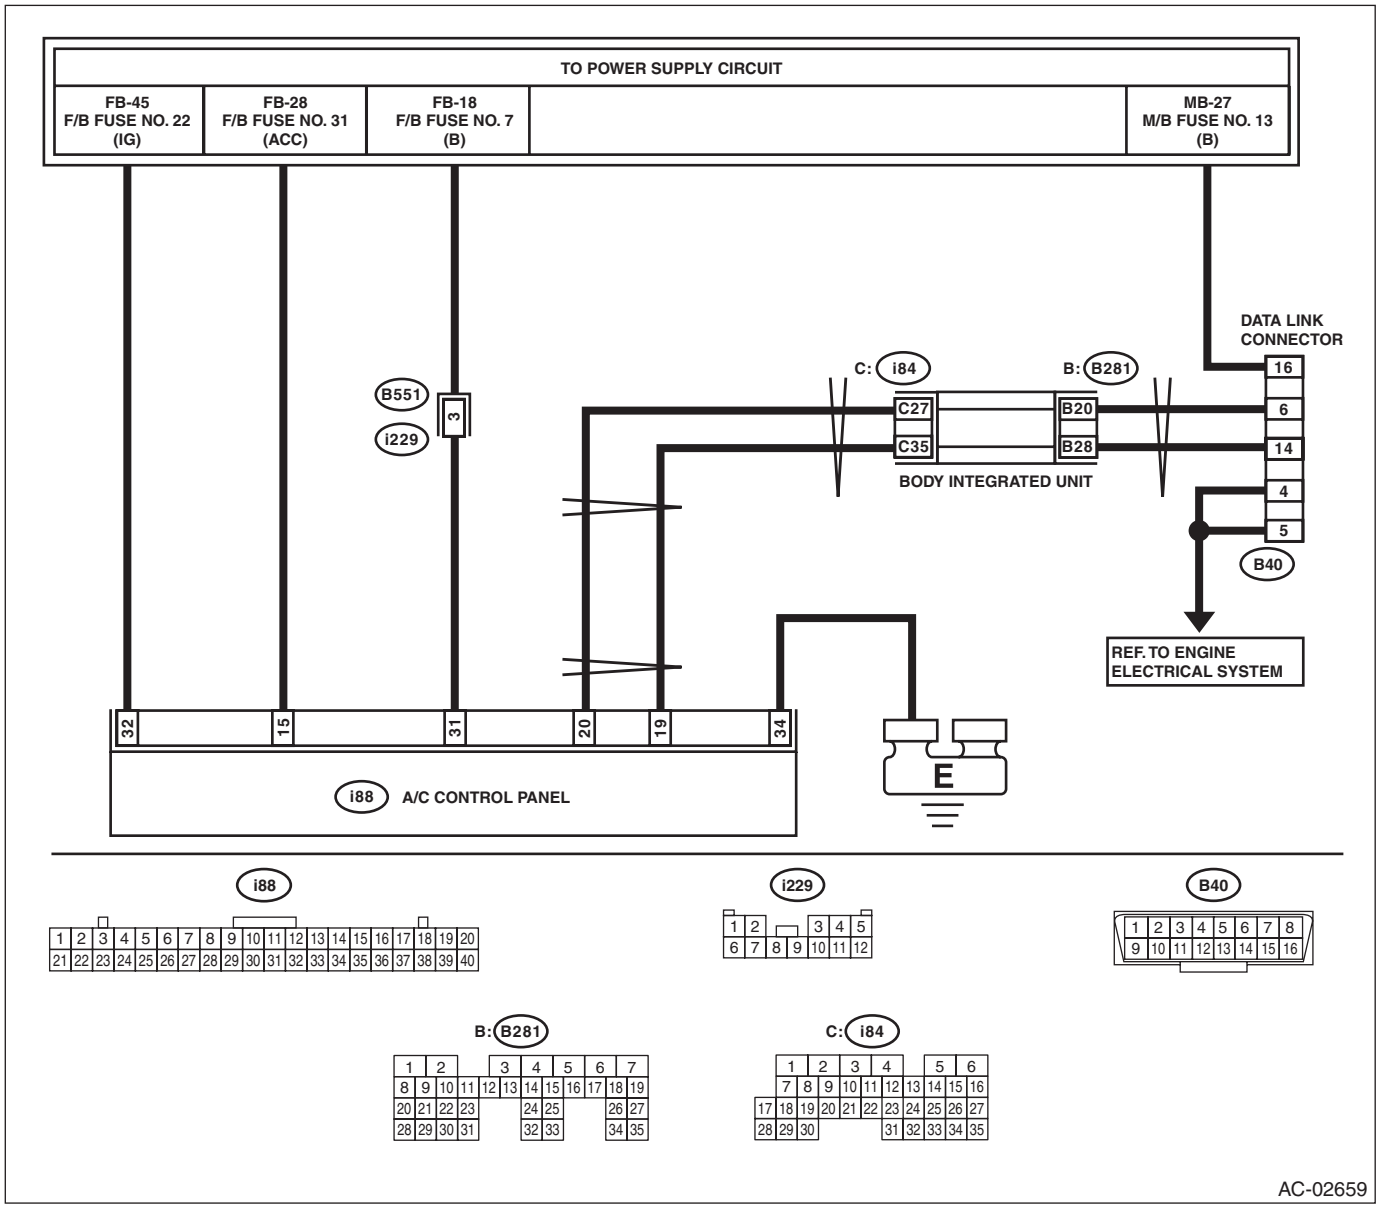
NOTE:
For detailed operation procedures, refer to “PC application help for Subaru Select Monitor”.

# 11.Diagnostic Procedure for Subaru Select Monitor Communication

## A: COMMUNICATION FOR INITIALIZING IMPOSSIBLE

**DIAGNOSIS:**
Defective CAN communication circuit
**TROUBLE SYMPTOM:**
- LAN system is abnormal.
- Communication failure between Subaru Select Monitor and A/C control panel

**WIRING DIAGRAM:**
Air Conditioning System <Ref. to WI-35, WIRING DIAGRAM, Air Conditioning System.>



| | Step | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK POWER SUPPLY CIRCUIT.**<br>Connect SDI (Subaru Diagnosis Interface) to the data link connector. | Is SDI powered on? | Go to step **4**. | Go to step **2**. |
| 2 | **CHECK POWER SUPPLY CIRCUIT.**<br>Measure the voltage between data link connector and chassis ground.<br>***Connector & terminal***<br>***(B40) No. 16 (+) — Chassis ground (–):*** | Is the voltage 10 V or more? | Go to step **3**. | Repair the power supply circuit.<br>NOTE:<br>In this case, repair the following item:<br>• Open or ground short circuit of harness between battery and data link connector<br>• Blown out of fuse (M/B No. 12) |
| 3 | **CHECK HARNESS BETWEEN DATA LINK CONNECTOR AND CHASSIS GROUND.**<br>1) Turn the ignition switch to OFF.<br>2) Measure the resistance of harness between data link connector and chassis ground.<br>***Connector & terminal***<br>***(B40) No. 4 — Chassis ground:***<br>***(B40) No. 5 — Chassis ground:*** | Is the resistance less than 5 Ω? | Repair the poor contact of data link connector. | Repair the harness and connector. |
| 4 | **CHECK SUBARU SELECT MONITOR.**<br>1) Connect the Subaru Select Monitor to a normal vehicle.<br>2) Start the engine and perform communication between the Subaru Select Monitor and vehicle. | Is communication possible? | Go to step **5**. | Use another Subaru Select Monitor because the CAN communication circuit of the Subaru Select Monitor is faulty. |
| 5 | **CHECK LAN SYSTEM.**<br>Check the LAN system. <Ref. to LAN(diag)-2, PROCEDURE, Basic Diagnostic Procedure.> | Is LAN system normal? | Go to step **6**. | Repair it according to the diagnosis for LAN system. |
| 6 | **CHECK CONNECTOR.**<br>Check for poor contact of power supply circuit connector. | Is there poor contact of connector? | Repair the connector. | Go to step **7**. |
| 7 | **CHECK FUSE.**<br>1) Turn the ignition switch to OFF.<br>2) Remove a fuse from the fuse box.<br>3) Check the fuse. | Is the fuse blown out? | Replace the fuse. | Go to step **8**. |
| 8 | **CHECK A/C CONTROL PANEL POWER CIRCUIT.**<br>1) Disconnect the A/C control panel connector.<br>2) Measure the voltage between A/C control panel connector terminal and chassis ground after turning the ignition switch to ON.<br>***Connector & terminal***<br>***(i88) No. 15 (+) — Chassis ground (–):***<br>***(i88) No. 31 (+) — Chassis ground (–):***<br>***(i88) No. 32 (+) — Chassis ground (–):*** | Is the voltage 10 V or more? | Go to step **9**. | Check for open or short circuit in the harness between A/C control panel and fuse. |
| 9 | **CHECK A/C CONTROL PANEL GROUND CIRCUIT.**<br>Measure the resistance of harness between A/C control panel and chassis ground.<br>***Connector & terminal***<br>***(i88) No. 34 — Chassis ground:*** | Is the resistance less than 5 Ω? | Check the connection between the data link connector and Subaru Select Monitor. | Repair the harness for ground line. |

# 12.List of Diagnostic Trouble Code (DTC)

## A: LIST

| DTC | Item | Content of diagnosis | Note |
|---|---|---|---|
| B1430 | Room Temperature Sensor Circuit Wire Break | In-vehicle air temperature sensor circuit is open. | <Ref. to AC(diag)-50, DTC B1430 ROOM TEMPERATURE SENSOR CIRCUIT WIRE BREAK, Diagnostic Procedure with Diagnostic Trouble Code (DTC).> |
| B1431 | Room Temperature Sensor Circuit Short-Circuit | In-vehicle air temperature sensor circuit is shorted. | <Ref. to AC(diag)-51, DTC B1431 ROOM TEMPERATURE SENSOR CIRCUIT SHORT-CIRCUIT, Diagnostic Procedure with Diagnostic Trouble Code (DTC).> |

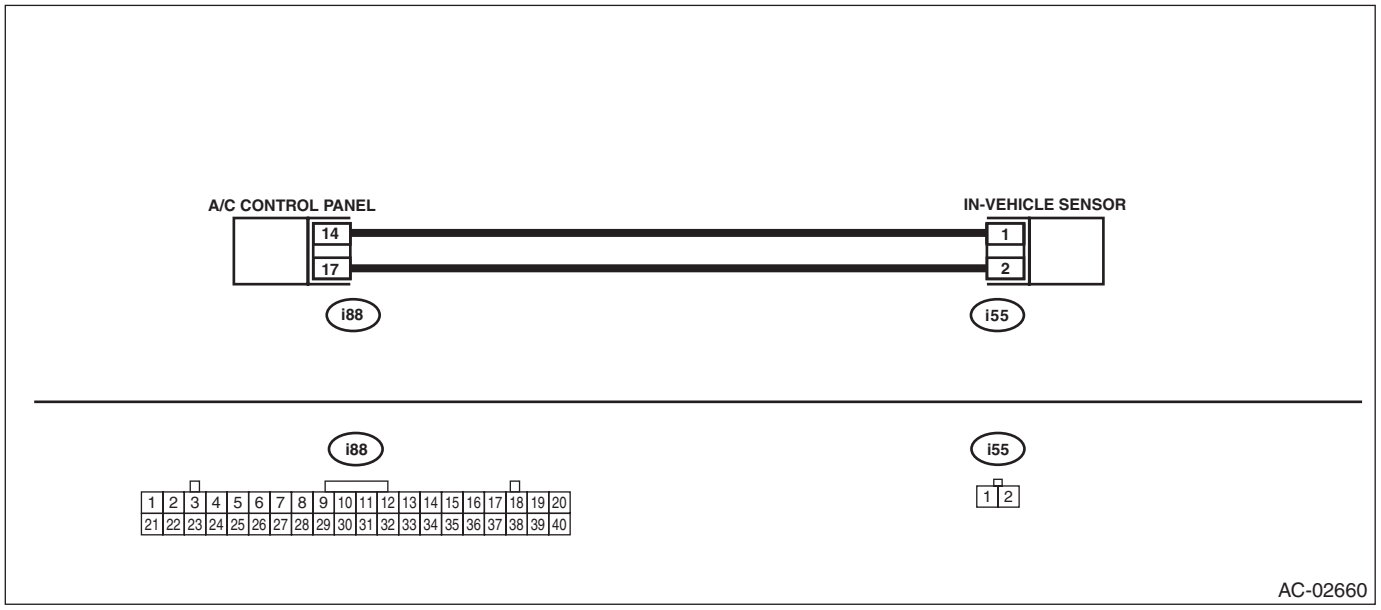
# 13.Diagnostic Procedure with Diagnostic Trouble Code (DTC)

## A: DTC B1430 ROOM TEMPERATURE SENSOR CIRCUIT WIRE BREAK

**DTC DETECTING CONDITION:**
In-vehicle sensor circuit is open.
**TROUBLE SYMPTOM:**
In-vehicle air temperature is falsely recognized as 25°C (77°F), and the compartment temperature is adjusted.
**WIRING DIAGRAM:**
Air Conditioning System <Ref. to WI-35, WIRING DIAGRAM, Air Conditioning System.>



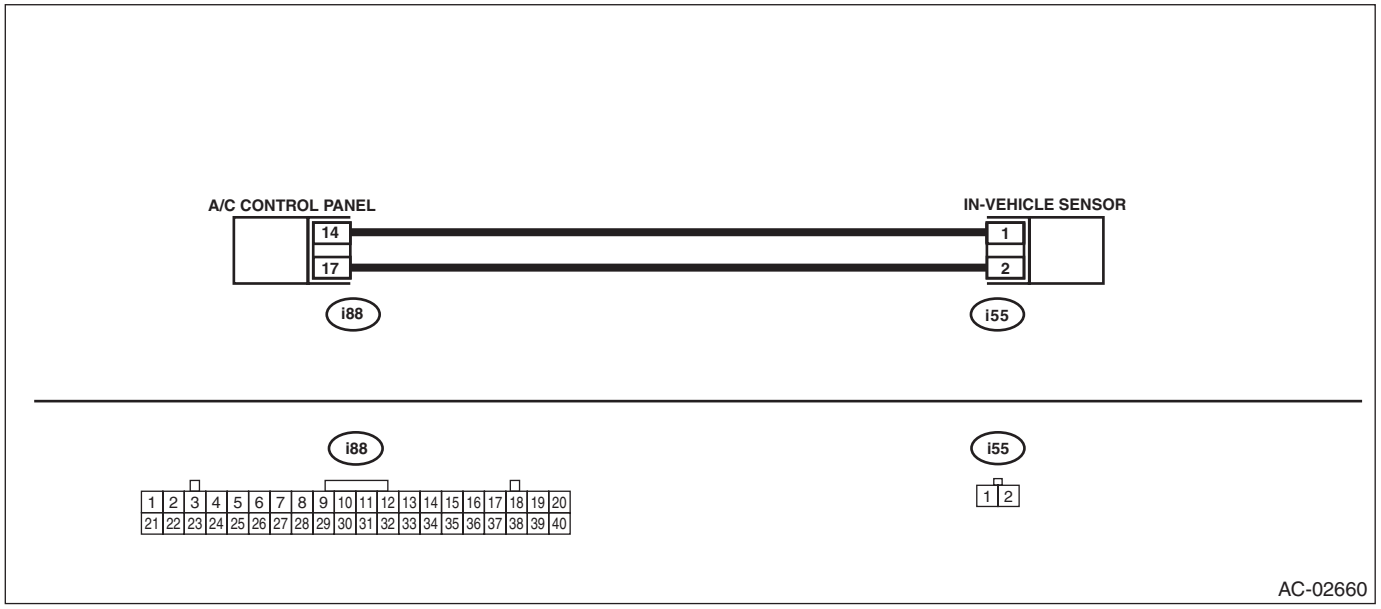
| | Step | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK CONNECTOR.**<br>1) Check the condition of connector connection.<br>2) Read the DTC using Subaru Select Monitor. | Is B1430 displayed? | Go to step **2**. | Check the connection of the in-vehicle sensor circuit. |
| 2 | **CHECK IN-VEHICLE SENSOR.**<br>1) Disconnect the in-vehicle sensor.<br>2) Short the connector.<br>3) Read the DTC relating the ECM using the Subaru Select Monitor. | Is B1431 displayed? | Replace the in-vehicle sensor. <Ref. to AC-78, REMOVAL, In-Vehicle Sensor (Auto A/C Model).> | Go to step **3**. |
| 3 | **CHECK HARNESS.**<br>1) Turn the ignition switch to ON.<br>2) Using the tester, measure the voltage between terminals.<br>***Connector & terminal***<br>***(i55) No. 2 (+) — No. 1 (–):*** | Is the voltage 4.5 — 5.0 V? | Go to step **4**. | Repair or replace the open circuit of harness. |
| 4 | **CHECK HARNESS.**<br>1) Disconnect the connector from the A/C control panel.<br>2) Using a tester, check continuity between terminals.<br>***Connector & terminal***<br>***(i55) No. 1 — (i88) No. 14:***<br>***(i55) No. 2 — (i88) No. 17:*** | Is there continuity? | Replace the A/C control panel. <Ref. to AC-47, REMOVAL, Control Panel.> | Repair or replace the open circuit of harness. |

# B: DTC B1431 ROOM TEMPERATURE SENSOR CIRCUIT SHORT-CIRCUIT

**DTC DETECTING CONDITION:**
In-vehicle sensor circuit is shorted.

**TROUBLE SYMPTOM:**
In-vehicle air temperature is falsely recognized as 25°C (77°F), and the compartment temperature is adjusted.

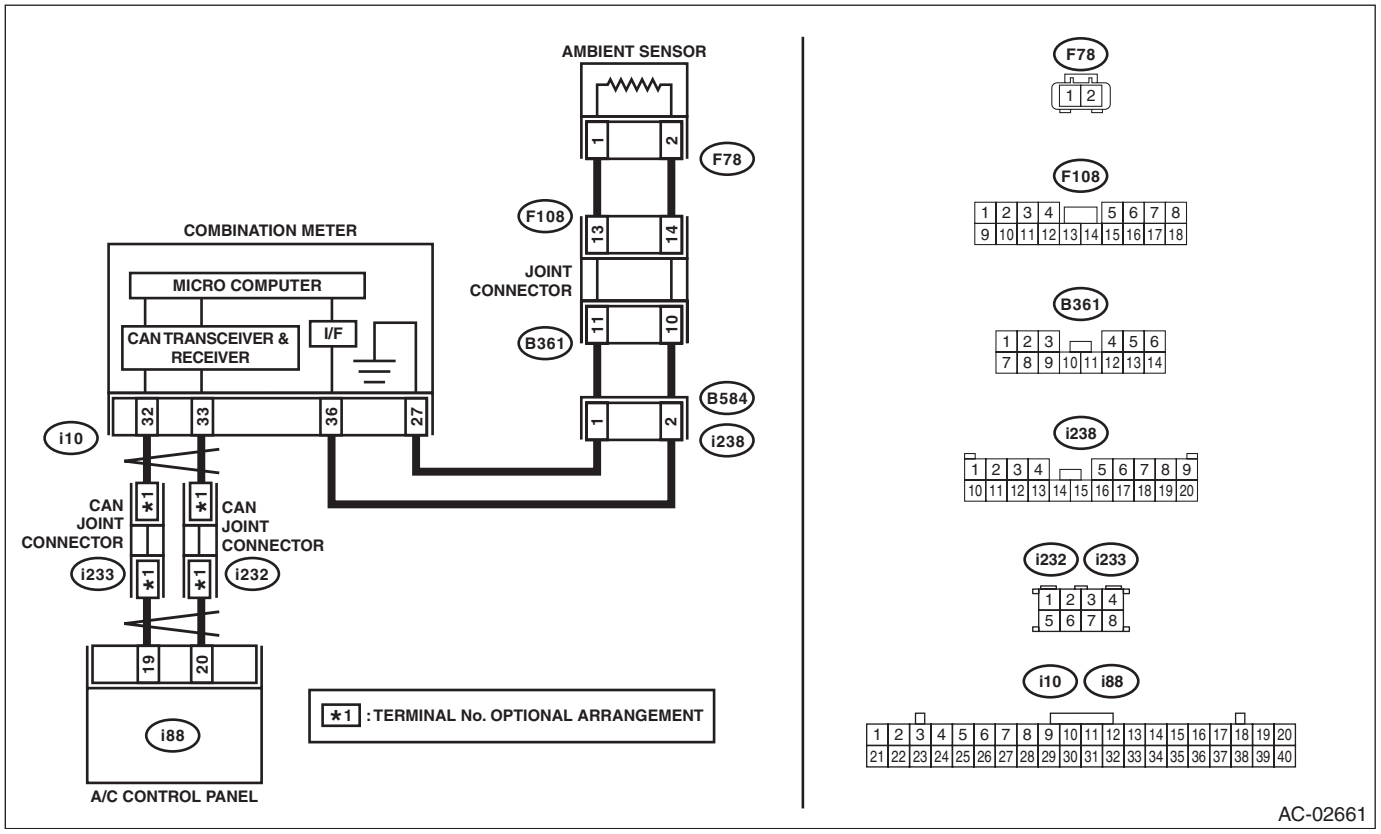
**WIRING DIAGRAM:**
Air Conditioning System <Ref. to WI-35, WIRING DIAGRAM, Air Conditioning System.>



| | Step | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK CONNECTOR.**<br>1) Check the condition of connector connection.<br>2) Read the DTC using Subaru Select Monitor. | Is B1431 displayed? | Go to step **2**. | Check the connection of the in-vehicle sensor circuit. |
| 2 | **CHECK IN-VEHICLE SENSOR.**<br>1) Disconnect the in-vehicle sensor. <Ref. to AC-78, REMOVAL, In-Vehicle Sensor (Auto A/C Model).><br>2) Read the DTC using Subaru Select Monitor. | Is B1430 displayed? | Replace the in-vehicle sensor. <Ref. to AC-78, REMOVAL, In-Vehicle Sensor (Auto A/C Model).> | Go to step **3**. |
| 3 | **CHECK HARNESS.**<br>1) Turn the ignition switch to ON.<br>2) Using the tester, measure the voltage between terminals.<br>***Connector & terminal (i55) No. 2 (+) — No. 1 (–):*** | Is the voltage 4.5 — 5.0 V? | Check the connection of the in-vehicle sensor circuit. | Go to step **4**. |
| 4 | **CHECK HARNESS.**<br>1) Disconnect the connector from the A/C control panel.<br>2) Using a tester, check continuity between terminals.<br>***Connector & terminal (i55) No. 1 — No. 2:*** | Is there continuity? | Repair or replace the short circuit of the harness. | Replace the A/C control panel. <Ref. to AC-47, REMOVAL, Control Panel.> |

## C: DTC B1432 OUTSIDE AIR SENSOR CIRCUIT WIRE BREAK (AIR-CONDITIONING)

**DTC DETECTING CONDITION:**
Ambient sensor circuit is open.
**TROUBLE SYMPTOM:**
Ambient temperature is falsely recognized, and the compartment temperature is adjusted.
**WIRING DIAGRAM:**
Air Conditioning System <Ref. to WI-35, WIRING DIAGRAM, Air Conditioning System.>

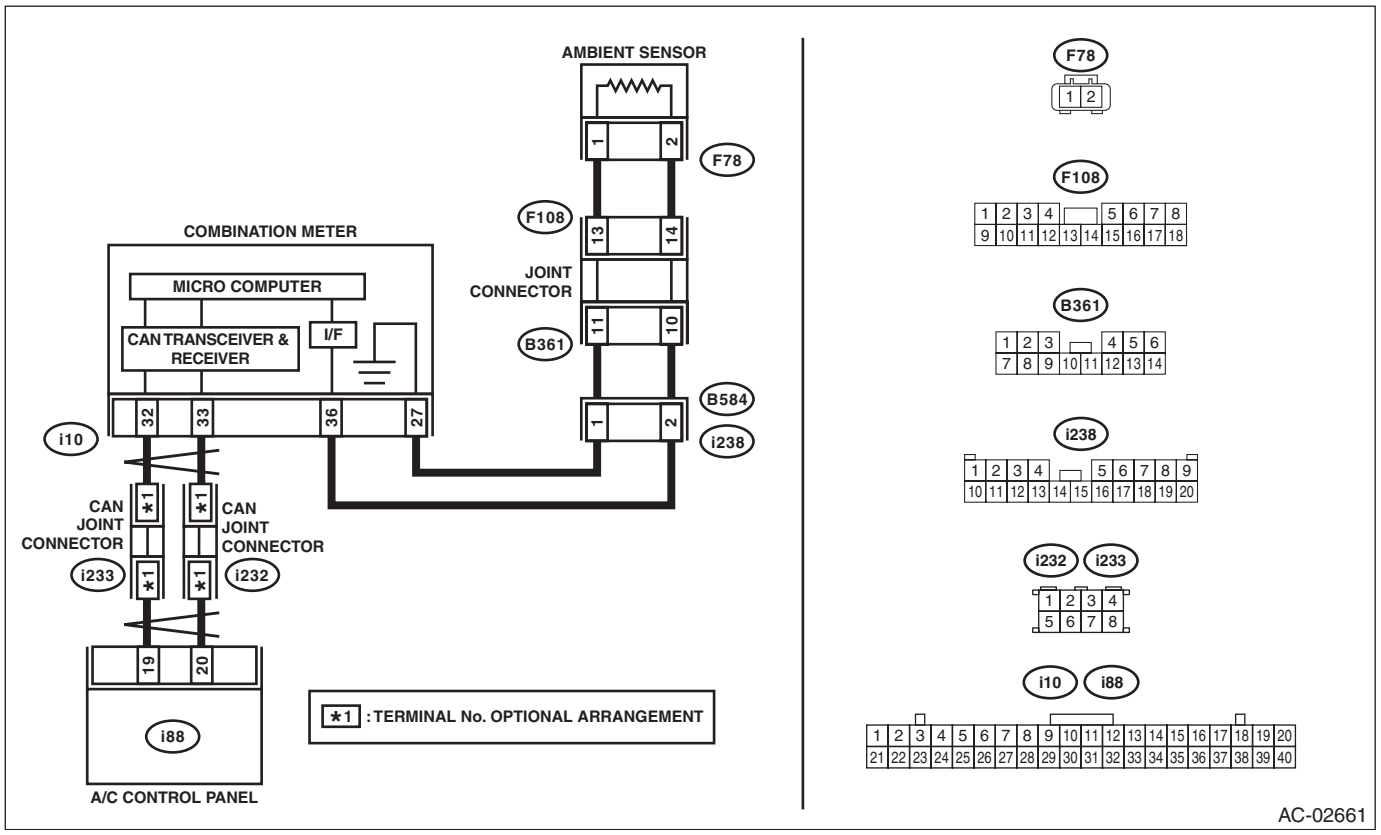


| Step | | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK AMBIENT SENSOR.**<br>Perform the inspection of ambient sensor unit. <Ref. to AC-75, INSPECTION, Ambient Sensor.> | Is the sensor normal? | Go to step **2**. | Replace the ambient sensor. <Ref. to AC-73, REMOVAL, Ambient Sensor.> |
| 2 | **CHECK HARNESS.**<br>1) Turn the ignition switch to ON.<br>2) Using the tester, measure the voltage between terminals.<br>***Connector & terminal***<br>***(F78) No. 2 (+) — No. 1 (–):*** | Is the voltage 4.5 — 5.0 V? | Replace the combination meter. <Ref. to IDI-17, REMOVAL, Combination Meter.> | Go to step **3**. |
| 3 | **CHECK COMBINATION METER OUTPUT SIGNAL.**<br>1) Turn the ignition switch to OFF.<br>2) Pull out the combination meter.<br>3) Disconnect the connector from the combination meter.<br>4) Turn the ignition switch to ON.<br>5) Measure the voltage between the combination meter connector terminals.<br>***Connector & terminal***<br>***(i10) No. 36 (+) — No. 27 (–):*** | Is the voltage 4.5 — 5.0 V? | Go to step **4**. | Replace the combination meter. <Ref. to IDI-17, REMOVAL, Combination Meter.> |

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 4 | **CHECK HARNESS.**<br>1) Disconnect the connector from the A/C control panel.<br>2) Using a tester, check continuity between terminals.<br>***Connector & terminal***<br>***(F78) No. 1 — (i10) No. 27:***<br>***(F78) No. 2 — (i10) No. 36:*** | Is there continuity? | Go to step **5**. | Repair or replace the open circuit of harness. |
| 5 | **CHECK FOR POOR CONTACT.**<br>Check for poor contact of combination meter connector. | Is there poor contact of connector? | Repair the connector. | Replace the combination meter. <Ref. to IDI-17, REMOVAL, Combination Meter.> |

## D: DTC B1433 OUTSIDE AIR SENSOR CIRCUIT SHORT-CIRCUIT (AIR-CONDITIONING)

**DTC DETECTING CONDITION:**
Ambient sensor circuit is shorted.
**TROUBLE SYMPTOM:**
Ambient temperature is falsely recognized, and the compartment temperature is adjusted.
**WIRING DIAGRAM:**
Air Conditioning System <Ref. to WI-35, WIRING DIAGRAM, Air Conditioning System.>

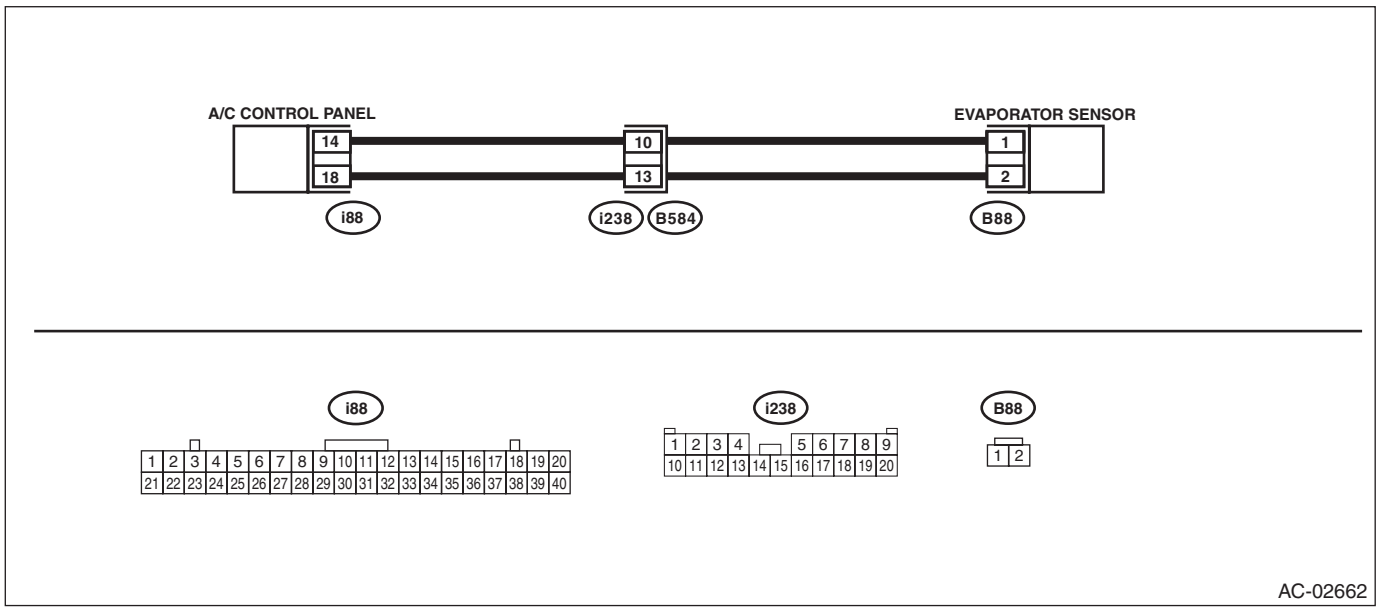


| Step | | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK AMBIENT SENSOR.**<br>Perform the inspection of ambient sensor unit. <Ref. to AC-75, INSPECTION, Ambient Sensor.> | Is the sensor normal? | Go to step **2**. | Replace the ambient sensor. <Ref. to AC-73, REMOVAL, Ambient Sensor.> |
| 2 | **CHECK HARNESS.**<br>1) Turn the ignition switch to ON.<br>2) Using the tester, measure the voltage between terminals.<br>***Connector & terminal***<br>***(F78) No. 2 (+) — No. 1 (–):*** | Is the voltage 4.5 — 5.0 V? | Replace the combination meter. <Ref. to IDI-17, REMOVAL, Combination Meter.> | Go to step **3**. |
| 3 | **CHECK COMBINATION METER OUTPUT SIGNAL.**<br>1) Turn the ignition switch to OFF.<br>2) Pull out the combination meter.<br>3) Disconnect the connector from the combination meter.<br>4) Turn the ignition switch to ON.<br>5) Measure the voltage between the combination meter connector terminals.<br>***Connector & terminal***<br>***(i10) No. 36 (+) — No. 27 (–):*** | Is the voltage 4.5 — 5.0 V? | Go to step **4**. | Replace the combination meter. <Ref. to IDI-17, REMOVAL, Combination Meter.> |

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 4 | **CHECK HARNESS.**<br>1) Disconnect the connector from the A/C control panel.<br>2) Using a tester, check continuity between terminals.<br>***Connector & terminal***<br>***(F78) No. 1 — (F78) No. 2:*** | Is there continuity? | Repair or replace the short circuit of the harness. | Replace the combination meter. <Ref. to IDI-17, REMOVAL, Combination Meter.> |

## E: DTC B1434 AMBIENT TEMPERATURE SENSOR CIRCUIT WIRE BREAK

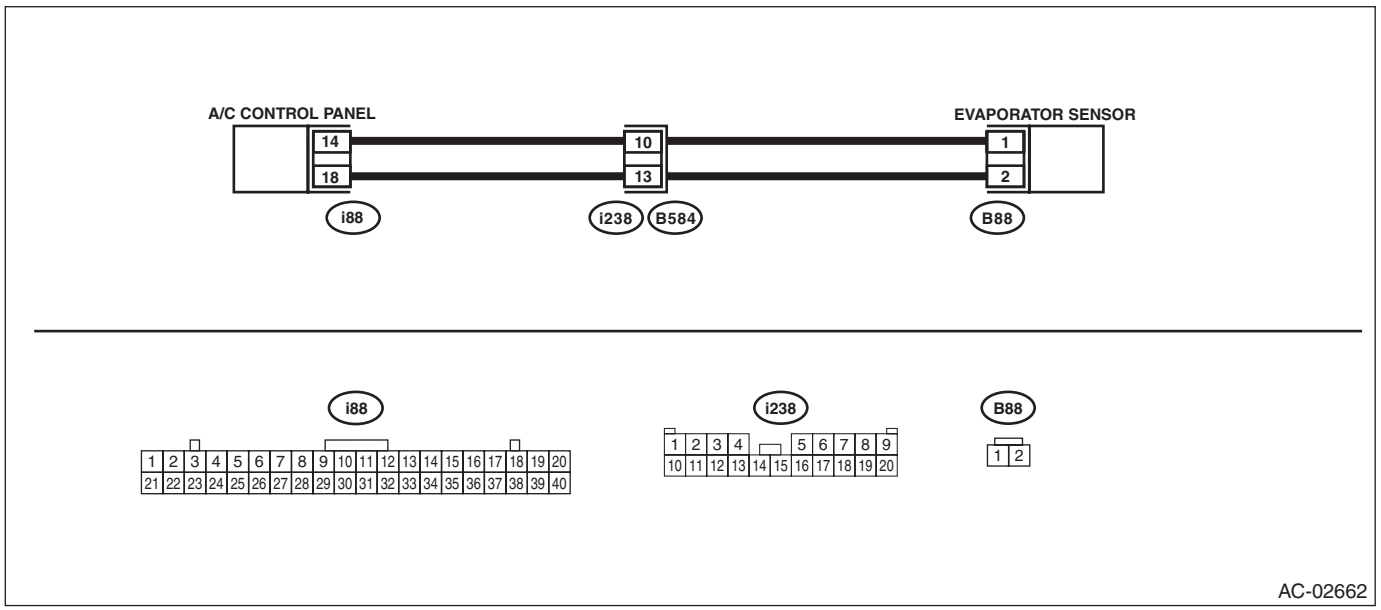
**DTC DETECTING CONDITION:**
Evaporator sensor circuit is open.
**TROUBLE SYMPTOM:**
Evaporator temperature is falsely recognized as low, and the compartment temperature is adjusted.
**WIRING DIAGRAM:**
Air Conditioning System <Ref. to WI-35, WIRING DIAGRAM, Air Conditioning System.>



| Step | | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK CONNECTOR.**<br>1) Check the condition of connector connection.<br>2) Read the DTC using Subaru Select Monitor. | Is B1434 displayed? | Go to step **2**. | Check the connection of the evaporator sensor circuit. |
| 2 | **CHECK EVAPORATOR SENSOR.**<br>1) Disconnect the evaporator sensor.<br>2) Short the evaporator sensor connector (B88).<br>3) Read the DTC using Subaru Select Monitor. | Is B1435 displayed? | Replace the evaporator sensor. <Ref. to AC-63, REMOVAL, Evaporator.> | Go to step **3**. |
| 3 | **CHECK HARNESS.**<br>1) Turn the ignition switch to ON.<br>2) Using the tester, measure the voltage between terminals.<br>***Connector & terminal***<br>***(B88) No. 2 (+) — No. 1 (–):*** | Is the voltage 4.5 — 5.0 V? | Go to step **4**. | Repair or replace the open circuit of harness. |
| 4 | **CHECK HARNESS.**<br>1) Disconnect the connector from the A/C control panel.<br>2) Using a tester, check continuity between terminals.<br>***Connector & terminal***<br>***(B88) No. 1 — (i88) No. 18:***<br>***(B88) No. 2 — (i88) No. 14:*** | Is there continuity? | Replace the A/C control panel. <Ref. to AC-47, REMOVAL, Control Panel.> | Repair or replace the open circuit of harness. |

# F: DTC B1435 EVAPORATOR SENSOR CIRCUIT SHORT-CIRCUIT

**DTC DETECTING CONDITION:**
Evaporator sensor circuit is shorted.
**TROUBLE SYMPTOM:**
Evaporator temperature is falsely recognized as high, and the compartment temperature is adjusted.
**WIRING DIAGRAM:**
Air Conditioning System <Ref. to WI-35, WIRING DIAGRAM, Air Conditioning System.>



AC-02662

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK CONNECTOR.**<br>1) Check the condition of connector connection.<br>2) Read the DTC using Subaru Select Monitor. | Is B1435 displayed? | Go to step **2**. | Check the connection of the evaporator sensor circuit. |
| 2 | **CHECK EVAPORATOR SENSOR.**<br>1) Disconnect the evaporator sensor.<br>2) Read the DTC using Subaru Select Monitor. | Is B1434 displayed? | Replace the evaporator sensor. <Ref. to AC-63, REMOVAL, Evaporator.> | Go to step **3**. |
| 3 | **CHECK HARNESS.**<br>1) Turn the ignition switch to ON.<br>2) Using the tester, measure the voltage between terminals.<br>***Connector & terminal (B88) No. 2 (+) — No. 1 (–):*** | Is the voltage 4.5 — 5.0 V? | Check the connection of the evaporator sensor circuit. | Go to step **4**. |
| 4 | **CHECK HARNESS.**<br>1) Disconnect the connector from the A/C control panel.<br>2) Using a tester, check continuity between terminals.<br>***Connector & terminal (B88) No. 1 — No. 2:*** | Is there continuity? | Repair or replace the short circuit of the harness. | Replace the A/C control panel. <Ref. to AC-47, REMOVAL, Control Panel.> |

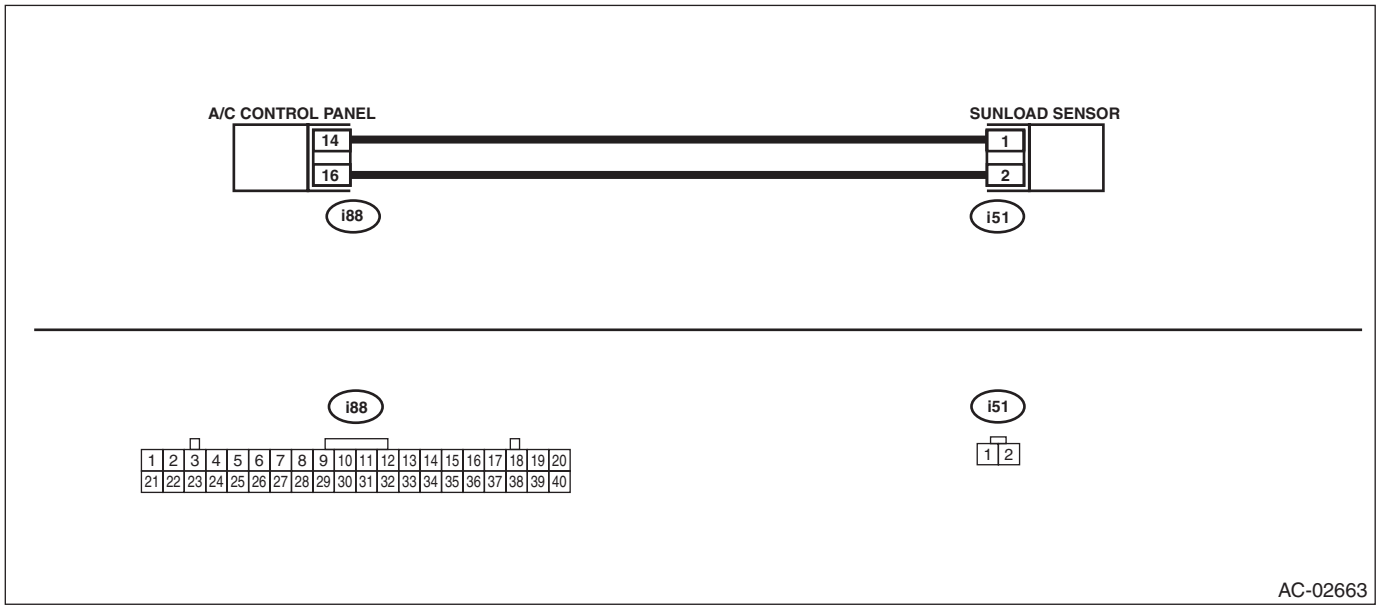
## G: DTC B14A1 SUNLOAD SENSOR CIRCUIT OPEN

**DTC DETECTING CONDITION:**
Sunload sensor circuit is open. (Displayed for current malfunction)

NOTE:
When the sunload sensor check is performed indoors or in the shade, it could be diagnosed as having an open circuit. Always check the sunload sensor in direct sunlight.

**TROUBLE SYMPTOM:**
Operation is performed as no sunload.

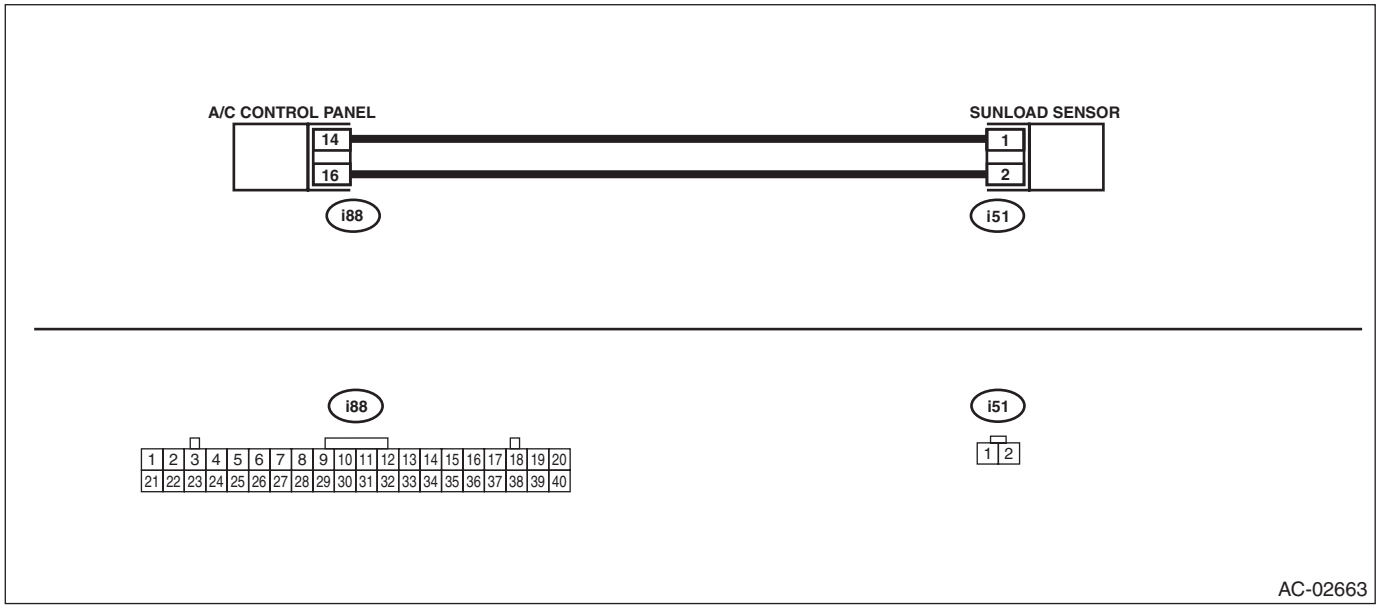
**WIRING DIAGRAM:**
Air Conditioning System <Ref. to WI-35, WIRING DIAGRAM, Air Conditioning System.>



| | Step | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK CONNECTOR.**<br>1) Check the condition of connector connection.<br>2) Read the DTC using Subaru Select Monitor. | Is B14A1 displayed? | Go to step **2**. | Check the connection of the sunload sensor circuit. |
| 2 | **CHECK SUNLOAD SENSOR.**<br>1) Disconnect the sunload sensor.<br>2) Short the connector.<br>3) Read the DTC using Subaru Select Monitor. | Is B14A2 displayed? | Replace the sunload sensor. <Ref. to AC-76, REMOVAL, Sunload Sensor (Auto A/C Model).> | Go to step **3**. |
| 3 | **CHECK HARNESS.**<br>1) Turn the ignition switch to ON.<br>2) Using the tester, measure the voltage between terminals.<br>***Connector & terminal***<br>***(i51) No. 2 (+) — No. 1 (–):*** | Is the voltage 4.5 — 5.0 V? | Go to step **4**. | Repair or replace the open circuit of the harness. |
| 4 | **CHECK HARNESS.**<br>1) Disconnect the connector from the A/C control panel.<br>2) Using a tester, check continuity between terminals.<br>***Connector & terminal***<br>***(i51) No. 1 — (i88) No. 14:***<br>***(i51) No. 1 — (i88) No. 16:*** | Is there continuity? | Replace the A/C control panel. <Ref. to AC-47, REMOVAL, Control Panel.> | Repair or replace the short circuit of the harness. |

## H: DTC B14A2 SUNLOAD SENSOR CIRCUIT SHORT

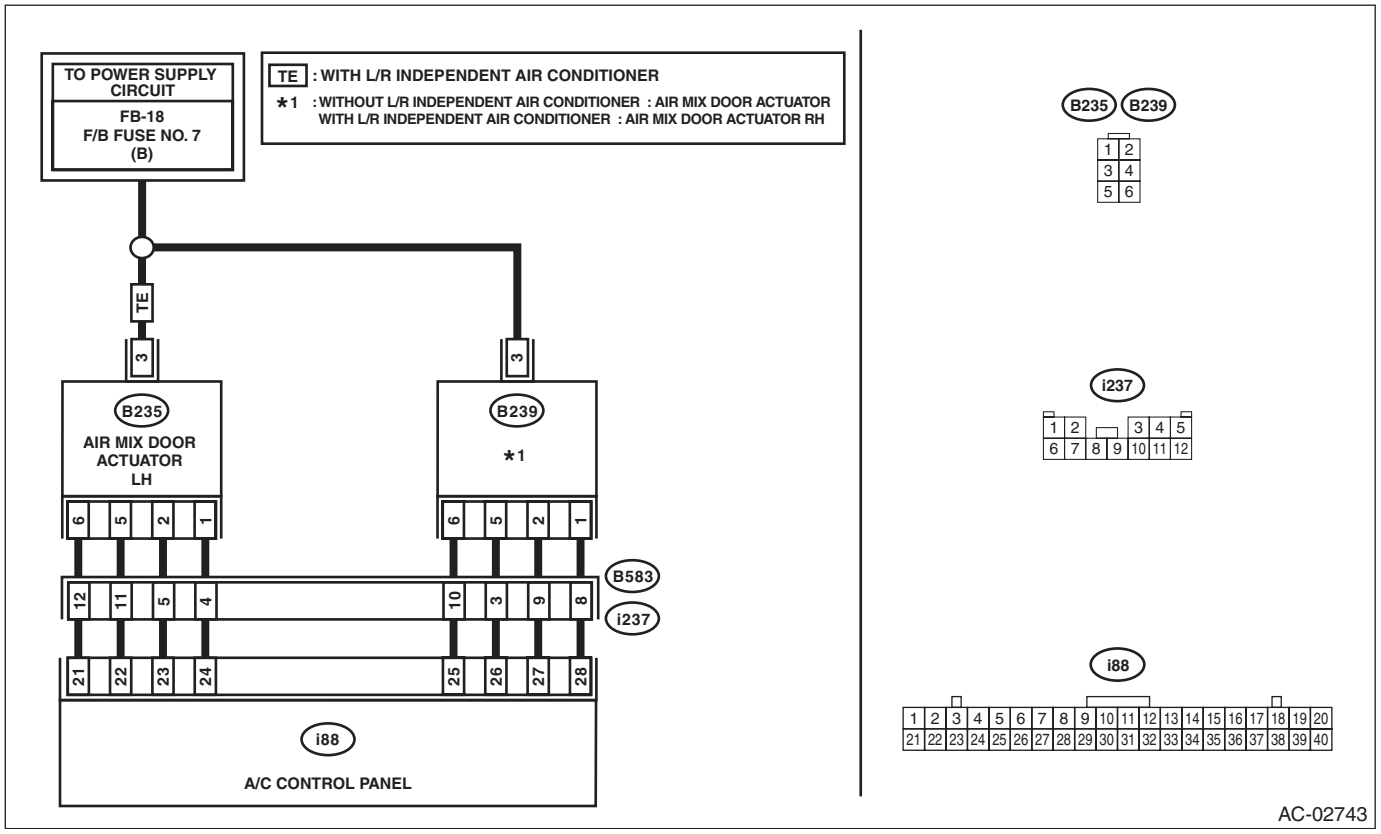
**DTC DETECTING CONDITION:**
Sunload sensor circuit is shorted.
**TROUBLE SYMPTOM:**
Operation is performed as no sunload.
**WIRING DIAGRAM:**
Air Conditioning System <Ref. to WI-35, WIRING DIAGRAM, Air Conditioning System.>



| | Step | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK CONNECTOR.**<br>1) Check the condition of connector connection.<br>2) Read the DTC using Subaru Select Monitor. | Is B14A2 displayed? | Go to step **2**. | Check the connection of the sunload sensor circuit. |
| 2 | **CHECK SUNLOAD SENSOR.**<br>1) Disconnect the sunload sensor.<br>2) Read the DTC using Subaru Select Monitor. | Is B14A1 displayed? | Replace the sunload sensor. <Ref. to AC-76, REMOVAL, Sunload Sensor (Auto A/C Model).> | Go to step **3**. |
| 3 | **CHECK HARNESS.**<br>1) Turn the ignition switch to ON.<br>2) Using the tester, measure the voltage between terminals.<br>***Connector & terminal***<br>***(i51) No. 2 (+) — No. 1 (–):*** | Is the voltage 4.5 — 5.0 V? | Check the connection of the sunload sensor circuit. | Go to step **4**. |
| 4 | **CHECK HARNESS.**<br>1) Disconnect the connector from the A/C control panel.<br>2) Using a tester, check continuity between terminals.<br>***Connector & terminal***<br>***(i51) No. 1 — No. 2:*** | Is there continuity? | Repair or replace the short circuit of the harness. | Replace the A/C control panel. <Ref. to AC-47, REMOVAL, Control Panel.> |

# I: DTC B14E1 AIR MIX DOOR ACTUATOR STEPPING MOTOR CIRCUIT WIRE BREAK (DRIVER'S SEAT)

**DTC DETECTING CONDITION:**
Air mix door actuator stepping motor circuit is open.
**TROUBLE SYMPTOM:**
Temperature cannot be adjusted.
**WIRING DIAGRAM:**
Air Conditioning System <Ref. to WI-35, WIRING DIAGRAM, Air Conditioning System.>

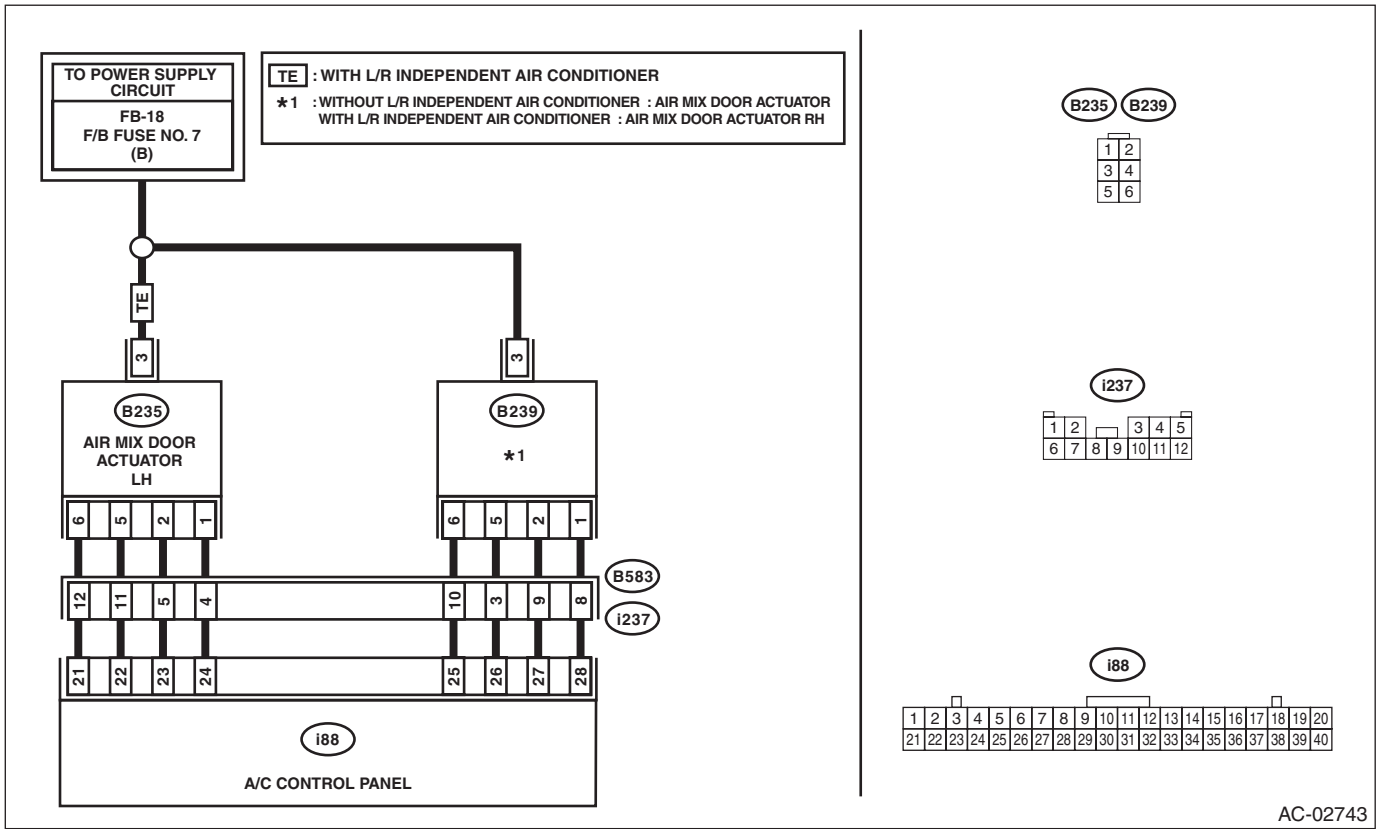


| | Step | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK CONNECTOR.**<br>1) Check the condition of connector connection.<br>2) Read the DTC using Subaru Select Monitor. | Is B14E1 displayed? | Go to step **2**. | Repair the poor contact of connector. |
| 2 | **CHECK ACTUATOR.**<br>1) Turn the ignition switch to OFF.<br>2) Disconnect the air mix door actuator connector.<br>3) Turn the ignition switch to ON.<br>4) Measure the voltage between the air mix door actuator connector terminal and chassis ground.<br>***Connector & terminal***<br>***Without left/right independent air conditioning function***<br>***(B239) No. 3 (+) — Chassis ground (–):***<br>***With left/right independent air conditioning function***<br>***(B235) No. 3 (+) — Chassis ground (–):*** | Is the voltage approx. 10 V or more? | Go to step **3**. | Check the DC power supply circuit. |

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 3 | **CHECK AIR MIX DOOR ACTUATOR.**<br>1) Turn the ignition switch to OFF.<br>2) Measure the resistance between air mix door actuator terminals using a tester.<br>***Connector & terminal***<br>***Without left/right independent air conditioning function***<br>***(B239) No. 3 — No. 1:***<br>***(B239) No. 3 — No. 2:***<br>***(B239) No. 3 — No. 5:***<br>***(B239) No. 3 — No. 6:***<br>***With left/right independent air conditioning function***<br>***(B235) No. 3 — No. 1:***<br>***(B235) No. 3 — No. 2:***<br>***(B235) No. 3 — No. 5:***<br>***(B235) No. 3 — No. 6:*** | Is the resistance 80 — 100 Ω? | Go to step **4**. | Replace the actuator. <Ref. to AC-92, REMOVAL, Air Mix Door Actuator.> |
| 4 | **CHECK HARNESS BETWEEN A/C CONTROL PANEL AND AIR MIX DOOR ACTUATOR.**<br>1) Disconnect the A/C control panel connector.<br>2) Measure the resistance between A/C control panel and air mix door actuator connector.<br>***Connector & terminal***<br>***Without left/right independent air conditioning function***<br>***(B239) No. 1 — (i88) No. 28:***<br>***(B239) No. 2 — (i88) No. 27:***<br>***(B239) No. 5 — (i88) No. 26:***<br>***(B239) No. 6 — (i88) No. 25:***<br>***With left/right independent air conditioning function***<br>***(B235) No. 1 — (i88) No. 24:***<br>***(B235) No. 2 — (i88) No. 23:***<br>***(B235) No. 5 — (i88) No. 22:***<br>***(B235) No. 6 — (i88) No. 21:*** | Is there continuity? | Replace the A/C control panel. <Ref. to AC-47, REMOVAL, Control Panel.> | Repair or replace the open circuit of harness. |

## J: DTC B14E2 AIR MIX DOOR ACTUATOR STEPPING MOTOR CIRCUIT SHORT-CIRCUIT (DRIVER'S SEAT)

**DTC DETECTING CONDITION:**
Air mix door actuator stepping motor circuit is shorted.
**TROUBLE SYMPTOM:**
Temperature cannot be adjusted.
**WIRING DIAGRAM:**
Air Conditioning System <Ref. to WI-35, WIRING DIAGRAM, Air Conditioning System.>

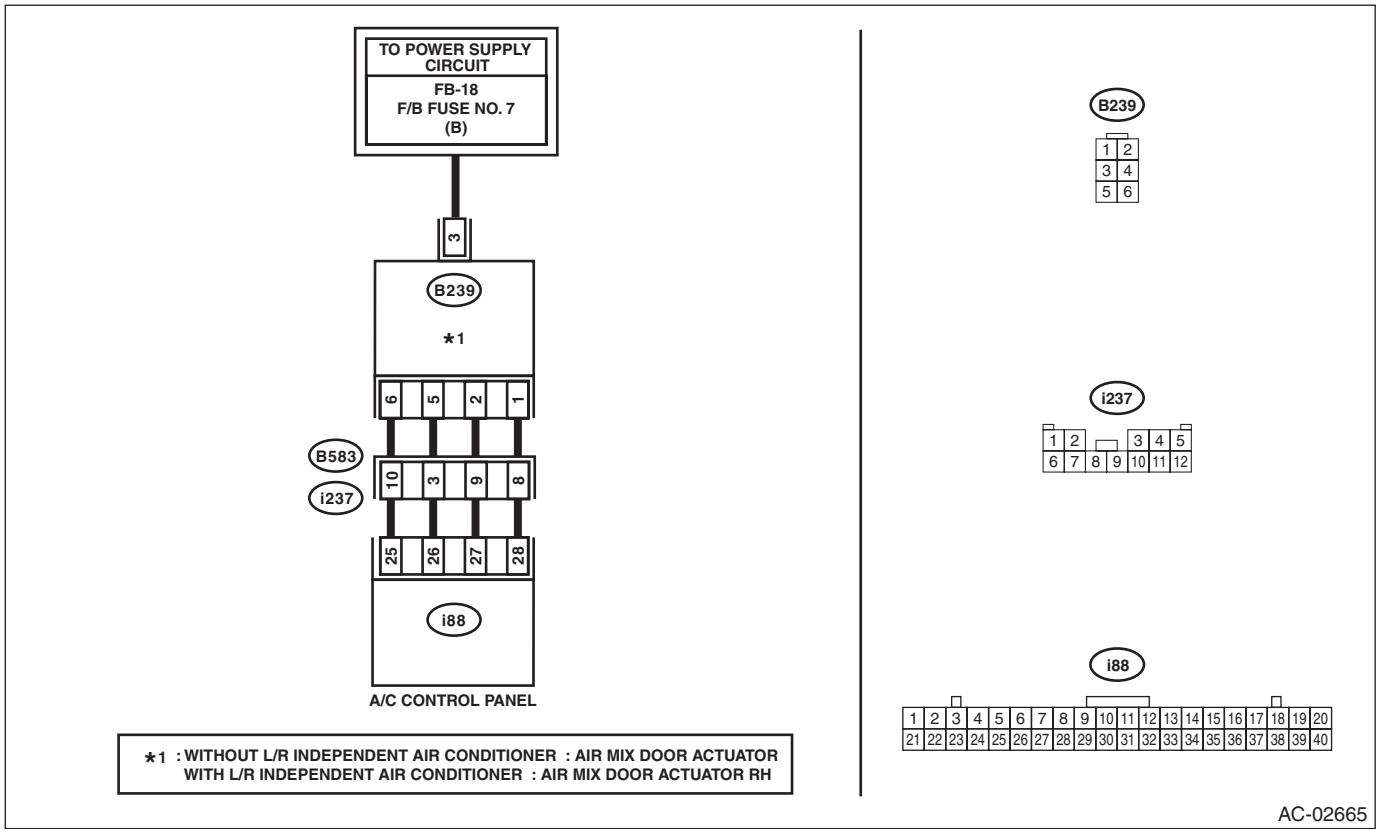


| Step | | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK CONNECTOR.**<br>1) Check the condition of connector connection.<br>2) Read the DTC using Subaru Select Monitor. | Is B14E2 displayed? | Go to step **2**. | Repair the poor contact of connector. |
| 2 | **CHECK POWER SUPPLY OF AIR MIX DOOR ACTUATOR.**<br>1) Turn the ignition switch to OFF.<br>2) Disconnect the air mix door actuator connector.<br>3) Turn the ignition switch to ON.<br>4) Measure the voltage between the air mix door actuator connector terminal and chassis ground.<br>***Connector & terminal***<br>***Without left/right independent air conditioning function***<br>***(B239) No. 3 (+) — Chassis ground (–):***<br>***With left/right independent air conditioning function***<br>***(B235) No. 3 (+) — Chassis ground (–):*** | Is the voltage approx. 10 V or more? | Go to step **3**. | Check the DC power supply circuit. |

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 3 | **CHECK AIR MIX DOOR ACTUATOR.**<br>1) Turn the ignition switch to OFF.<br>2) Measure the resistance between air mix door actuator terminals using a tester.<br>***Connector & terminal***<br>***Without left/right independent air conditioning function***<br>***(B239) No. 3 — No. 1:***<br>***(B239) No. 3 — No. 2:***<br>***(B239) No. 3 — No. 5:***<br>***(B239) No. 3 — No. 6:***<br>***With left/right independent air conditioning function***<br>***(B235) No. 3 — No. 1:***<br>***(B235) No. 3 — No. 2:***<br>***(B235) No. 3 — No. 5:***<br>***(B235) No. 3 — No. 6:*** | Is the resistance 80 — 100 Ω? | Go to step **4**. | Replace the actuator. <Ref. to AC-92, REMOVAL, Air Mix Door Actuator.> |
| 4 | **CHECK HARNESS BETWEEN A/C CONTROL PANEL AND AIR MIX DOOR ACTUATOR.**<br>1) Disconnect the A/C control panel connector.<br>2) Measure the voltage between air mix door actuator connector and chassis ground.<br>***Connector & terminal***<br>***Without left/right independent air conditioning function***<br>***(B239) No. 1 (+) — Chassis ground (–):***<br>***(B239) No. 2 (+) — Chassis ground (–):***<br>***(B239) No. 5 (+) — Chassis ground (–):***<br>***(B239) No. 6 (+) — Chassis ground (–):***<br>***With left/right independent air conditioning function***<br>***(B235) No. 1 (+) — Chassis ground (–):***<br>***(B235) No. 2 (+) — Chassis ground (–):***<br>***(B235) No. 5 (+) — Chassis ground (–):***<br>***(B235) No. 6 (+) — Chassis ground (–):*** | Is there any voltage? | Repair or replace the short circuit of the harness. | Replace the A/C control panel. <Ref. to AC-47, REMOVAL, Control Panel.> |

## K: DTC B14E3 AIR MIX DOOR ACTUATOR STEPPING MOTOR CIRCUIT WIRE BREAK (PASSENGER'S SEAT)

**DTC DETECTING CONDITION:**
Air mix door actuator stepping motor circuit is open.
**TROUBLE SYMPTOM:**
Temperature cannot be adjusted.
**WIRING DIAGRAM:**
Air Conditioning System <Ref. to WI-35, WIRING DIAGRAM, Air Conditioning System.>

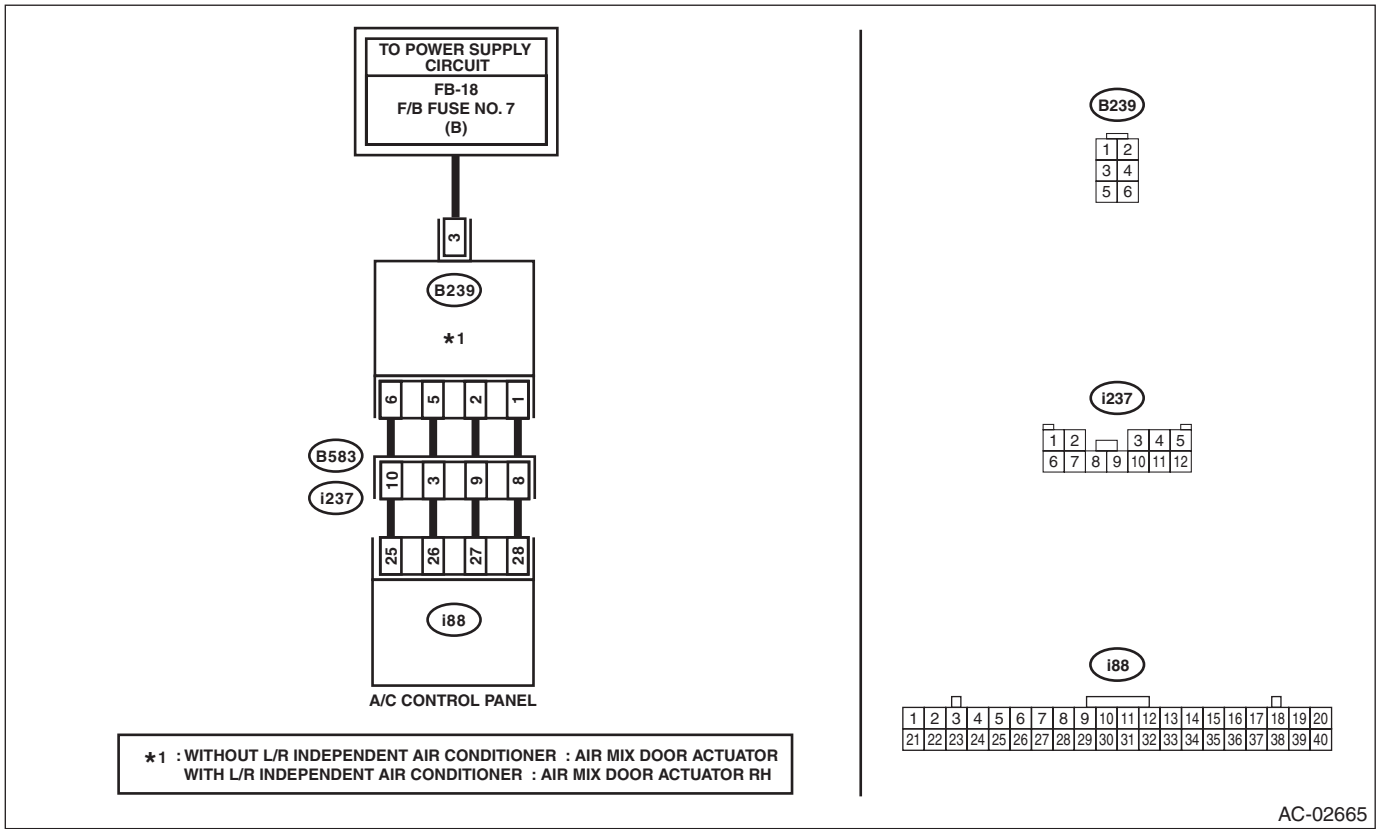


| | Step | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK CONNECTOR.**<br>1) Check the condition of connector connection.<br>2) Read the DTC using Subaru Select Monitor. | Is B14E3 displayed? | Go to step **2**. | Repair the poor contact of connector. |
| 2 | **CHECK ACTUATOR.**<br>1) Turn the ignition switch to OFF.<br>2) Disconnect the air mix door actuator connector.<br>3) Turn the ignition switch to ON.<br>4) Measure the voltage between the air mix door actuator connector terminal and chassis ground.<br>***Connector & terminal***<br>***(B239) No. 3 (+) — Chassis ground (–):*** | Is the voltage approx. 10 V or more? | Go to step **3**. | Check the DC power supply circuit. |

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 3 | **CHECK AIR MIX DOOR ACTUATOR.**<br>1) Turn the ignition switch to OFF.<br>2) Measure the resistance between air mix door actuator terminals using a tester.<br>***Connector & terminal***<br>***(B239) No. 3 — No. 1:***<br>***(B239) No. 3 — No. 2:***<br>***(B239) No. 3 — No. 5:***<br>***(B239) No. 3 — No. 6:*** | Is the resistance 80 — 100 Ω? | Go to step **4**. | Replace the actuator. <Ref. to AC-92, REMOVAL, Air Mix Door Actuator.> |
| 4 | **CHECK HARNESS BETWEEN A/C CONTROL PANEL AND AIR MIX DOOR ACTUATOR.**<br>1) Disconnect the A/C control panel connector.<br>2) Measure the resistance between A/C control panel and air mix door actuator connector.<br>***Connector & terminal***<br>***(B239) No. 1 — (i88) No. 28:***<br>***(B239) No. 2 — (i88) No. 27:***<br>***(B239) No. 5 — (i88) No. 26:***<br>***(B239) No. 6 — (i88) No. 25:*** | Is there continuity? | Replace the A/C control panel. <Ref. to AC-47, REMOVAL, Control Panel.> | Repair or replace the open circuit of harness. |

## L: DTC B14E4 AIR MIX DOOR ACTUATOR STEPPING MOTOR CIRCUIT SHORT-CIRCUIT (PASSENGER'S SEAT)

**DTC DETECTING CONDITION:**
Air mix door actuator stepping motor circuit is shorted.
**TROUBLE SYMPTOM:**
Temperature cannot be adjusted.
**WIRING DIAGRAM:**
Air Conditioning System <Ref. to WI-35, WIRING DIAGRAM, Air Conditioning System.>

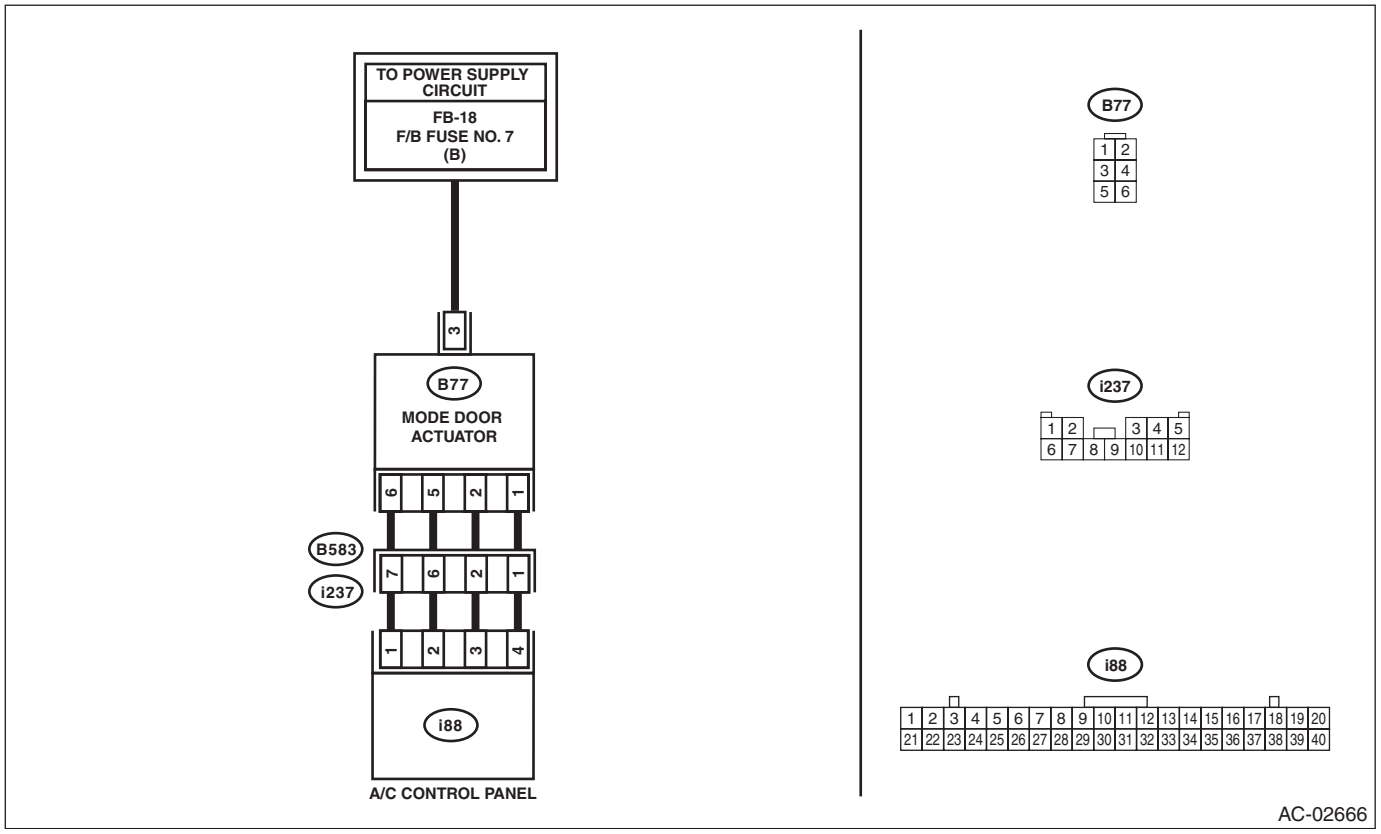


| | Step | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK CONNECTOR.**<br>1) Check the condition of connector connection.<br>2) Read the DTC using Subaru Select Monitor. | Is B14E4 displayed? | Go to step **2**. | Repair the poor contact of connector. |
| 2 | **CHECK POWER SUPPLY OF AIR MIX DOOR ACTUATOR.**<br>1) Turn the ignition switch to OFF.<br>2) Disconnect the air mix door actuator connector.<br>3) Turn the ignition switch to ON.<br>4) Measure the voltage between the air mix door actuator connector terminal and chassis ground.<br>***Connector & terminal***<br>***(B239) No. 3 (+) — Chassis ground (–):*** | Is the voltage approx. 10 V or more? | Go to step **3**. | Check the DC power supply circuit. |

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 3 | **CHECK AIR MIX DOOR ACTUATOR.**<br>1) Turn the ignition switch to OFF.<br>2) Measure the resistance between air mix door actuator terminals using a tester.<br>***Connector & terminal***<br>***(B239) No. 3 — No. 1:***<br>***(B239) No. 3 — No. 2:***<br>***(B239) No. 3 — No. 5:***<br>***(B239) No. 3 — No. 6:*** | Is the resistance 80 — 100 Ω? | Go to step **4**. | Replace the actuator. <Ref. to AC-92, REMOVAL, Air Mix Door Actuator.> |
| 4 | **CHECK HARNESS BETWEEN A/C CONTROL PANEL AND AIR MIX DOOR ACTUATOR.**<br>1) Disconnect the A/C control panel connector.<br>2) Measure the voltage between air mix door actuator connector and chassis ground.<br>***Connector & terminal***<br>***(B239) No. 1 (+) — Chassis ground (–):***<br>***(B239) No. 2 (+) — Chassis ground (–):***<br>***(B239) No. 5 (+) — Chassis ground (–):***<br>***(B239) No. 6 (+) — Chassis ground (–):*** | Is there any voltage? | Repair or replace the short circuit of the harness. | Replace the A/C control panel. <Ref. to AC-47, REMOVAL, Control Panel.> |

## M: DTC B14E5 MODE DOOR ACTUATOR STEPPING MOTOR CIRCUIT WIRE BREAK

**DTC DETECTING CONDITION:**
Mode door actuator stepping motor circuit is open.
**TROUBLE SYMPTOM:**
Vent does not change.
**WIRING DIAGRAM:**
Air Conditioning System <Ref. to WI-35, WIRING DIAGRAM, Air Conditioning System.>

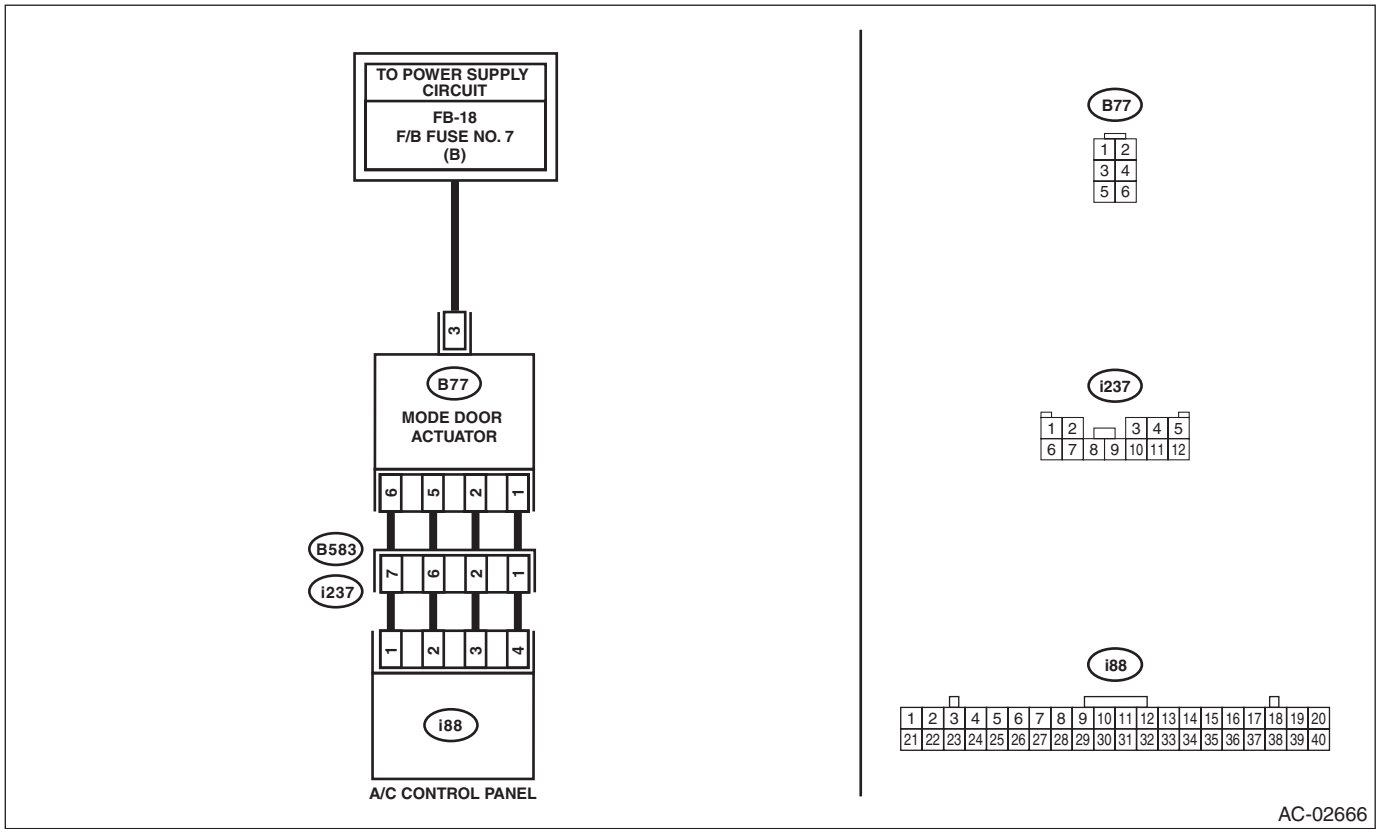


| | Step | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK CONNECTOR.**<br>1) Check the condition of connector connection.<br>2) Read the DTC using Subaru Select Monitor. | Is B14E5 displayed? | Go to step **2**. | Repair the poor contact of connector. |
| 2 | **CHECK ACTUATOR.**<br>1) Turn the ignition switch to OFF.<br>2) Disconnect the mode door actuator connector.<br>3) Turn the ignition switch to ON.<br>4) Measure the voltage between the mode door actuator connector terminal and chassis ground.<br>***Connector & terminal***<br>***(B77) No. 3 (+) — Chassis ground (–):*** | Is the voltage approx. 10 V or more? | Go to step **3**. | Check the DC power supply circuit. |

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 3 | **CHECK AIR MIX DOOR ACTUATOR.**<br>1) Turn the ignition switch to OFF.<br>2) Measure the resistance between mode door actuator terminals using a tester.<br>***Connector & terminal***<br>***(B77) No. 3 — No. 1:***<br>***(B77) No. 3 — No. 2:***<br>***(B77) No. 3 — No. 5:***<br>***(B77) No. 3 — No. 6:*** | Is the resistance 80 — 100 Ω? | Go to step **4**. | Replace the actuator. <Ref. to AC-90, REMOVAL, Mode Door Actuator.> |
| 4 | **CHECK HARNESS BETWEEN A/C CONTROL PANEL AND MODE DOOR ACTUATOR.**<br>1) Disconnect the A/C control panel connector.<br>2) Measure the resistance between A/C control panel and air mix door actuator connector.<br>***Connector & terminal***<br>***(B77) No. 1 — (i88) No. 4:***<br>***(B77) No. 2 — (i88) No. 3:***<br>***(B77) No. 5 — (i88) No. 2:***<br>***(B77) No. 6 — (i88) No. 1:*** | Is there continuity? | Replace the A/C control panel. <Ref. to AC-47, REMOVAL, Control Panel.> | Repair or replace the open circuit of harness. |

## N: DTC B14E6 MODE DOOR ACTUATOR STEPPING MOTOR CIRCUIT SHORT-CIRCUIT

**DTC DETECTING CONDITION:**
Mode door actuator stepping motor circuit is shorted.
**TROUBLE SYMPTOM:**
Vent does not change.
**WIRING DIAGRAM:**
Air Conditioning System <Ref. to WI-35, WIRING DIAGRAM, Air Conditioning System.>

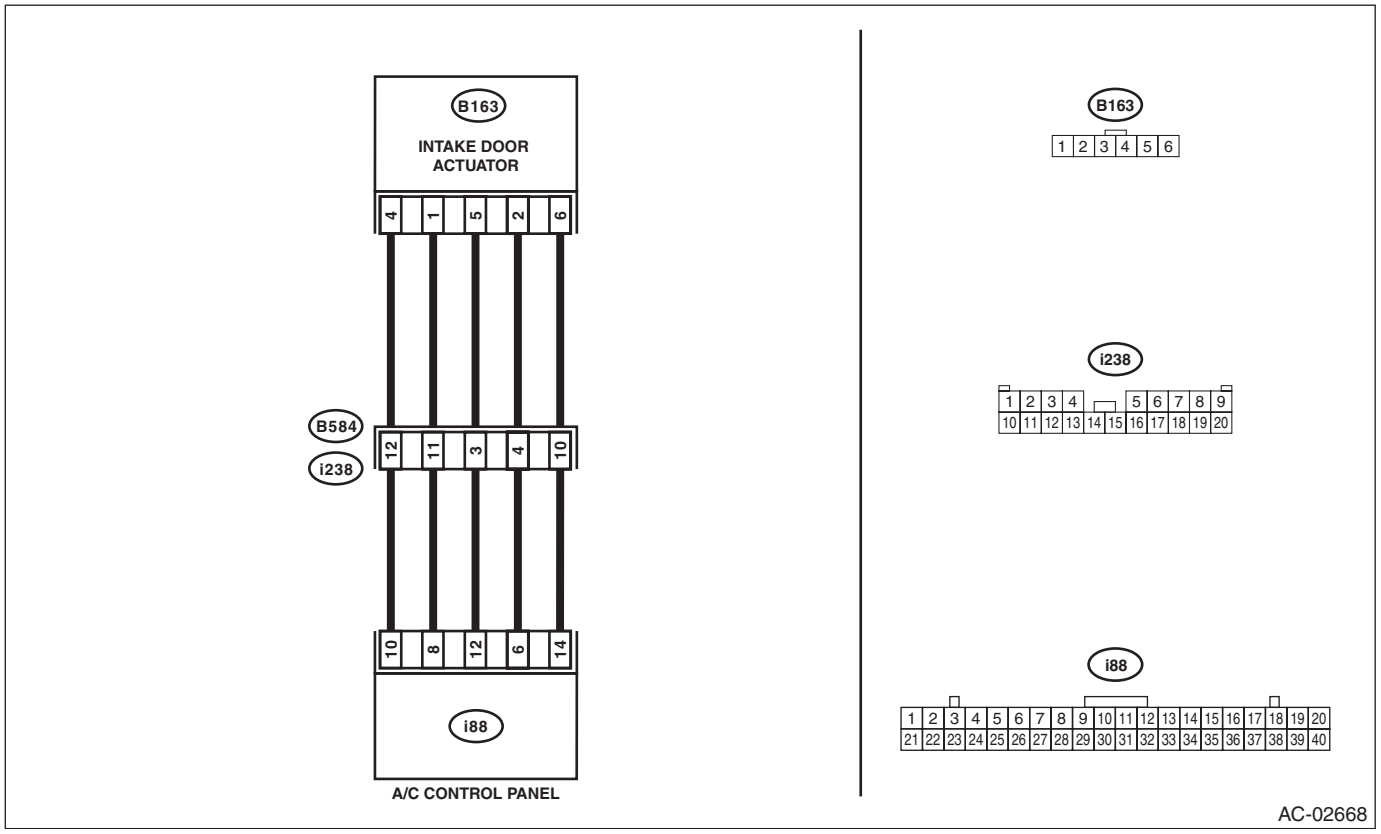


| | Step | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK CONNECTOR.**<br>1) Check the condition of connector connection.<br>2) Read the DTC using Subaru Select Monitor. | Is B14E6 displayed? | Go to step **2**. | Repair the poor contact of connector. |
| 2 | **CHECK POWER SUPPLY FOR MODE DOOR ACTUATOR.**<br>1) Turn the ignition switch to OFF.<br>2) Disconnect the mode door actuator connector.<br>3) Turn the ignition switch to ON.<br>4) Measure the voltage between the mode door actuator connector terminal and chassis ground.<br>***Connector & terminal***<br>***(B77) No. 3 (+) — Chassis ground (–):*** | Is the voltage approx. 10 V or more? | Go to step **3**. | Check the DC power supply circuit. |

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 3 | **CHECK MODE DOOR ACTUATOR.**<br>1) Turn the ignition switch to OFF.<br>2) Measure the resistance between mode door actuator terminals using a tester.<br>***Connector & terminal***<br>***(B77) No. 3 — No. 1:***<br>***(B77) No. 3 — No. 2:***<br>***(B77) No. 3 — No. 5:***<br>***(B77) No. 3 — No. 6:*** | Is the resistance 80 — 100 Ω? | Go to step **4**. | Replace the actuator. <Ref. to AC-90, REMOVAL, Mode Door Actuator.> |
| 4 | **CHECK HARNESS BETWEEN A/C CONTROL PANEL AND MODE DOOR ACTUATOR.**<br>1) Disconnect the A/C control panel connector.<br>2) Measure the voltage between mode door actuator connector and chassis ground.<br>***Connector & terminal***<br>***(B77) No. 1 (+) — Chassis ground (–):***<br>***(B77) No. 2 (+) — Chassis ground (–):***<br>***(B77) No. 5 (+) — Chassis ground (–):***<br>***(B77) No. 6 (+) — Chassis ground (–):*** | Is there any voltage? | Repair or replace the short circuit of the harness. | Replace the A/C control panel. <Ref. to AC-47, REMOVAL, Control Panel.> |

# O: DTC B14E9 INTAKE DOOR ACTUATOR POTENTIOMETER CIRCUIT WIRE BREAK

**DTC DETECTING CONDITION:**
Intake door actuator potentiometer circuit is open.
**TROUBLE SYMPTOM:**
FRESH/RECIRC does not operate.
**WIRING DIAGRAM:**
Air Conditioning System <Ref. to WI-35, WIRING DIAGRAM, Air Conditioning System.>

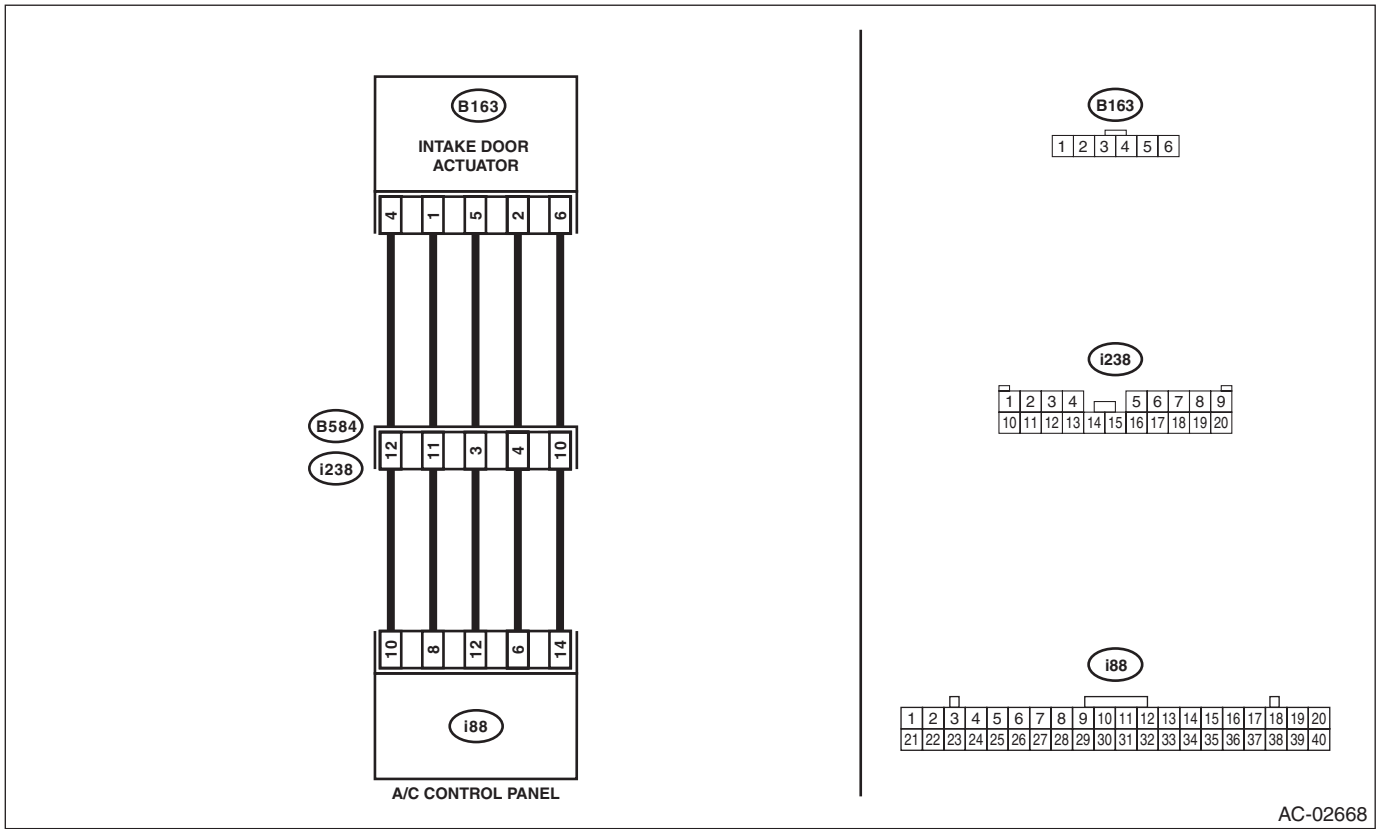


| | Step | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK CONNECTOR.**<br>1) Check the condition of connector connection.<br>2) Read the DTC using Subaru Select Monitor. | Is B14E9 displayed? | Go to step **2**. | Repair the poor contact of connector. |
| 2 | **CHECK HARNESS.**<br>1) Turn the ignition switch to ON.<br>2) Using the tester, measure the voltage between terminals.<br>***Connector & terminal***<br>***(B163) No. 4 (+) — No. 6 (–):*** | Is the voltage 4.5 — 5.0 V? | Go to step **3**. | Repair or replace the open circuit of harness. |
| 3 | **CHECK HARNESS.**<br>1) Turn the ignition switch to OFF.<br>2) Using a tester, check continuity between terminals.<br>***Connector & terminal***<br>***(B163) No. 1 — (i88) No. 8:***<br>***(B163) No. 2 — (i88) No. 6:***<br>***(B163) No. 4 — (i88) No. 10:***<br>***(B163) No. 5 — (i88) No. 12:***<br>***(B163) No. 6 — (i88) No. 14:*** | Is there continuity? | Go to step **4**. | Repair or replace the open circuit of harness. |

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 4 | **CHECK ACTUATOR.**<br>1) Turn the ignition switch to ON.<br>2) Using the tester, measure the voltage between terminals.<br>***Connector & terminal (B163) No. 5 (+) — No. 6 (–):*** | Is the voltage 0.5 — 4.5 V? | Replace the A/C control panel. <Ref. to AC-47, REMOVAL, Control Panel.> | Go to step **5**. |
| 5 | **CHECK HARNESS.**<br>1) Turn the ignition switch to OFF.<br>2) Using the tester, measure the resistance between terminals.<br>***Connector & terminal (B163) No. 4 — No. 5:*** | Is the resistance less than 1 Ω? | Repair or replace the short circuit of the harness. | Replace the actuator. <Ref. to AC-85, REMOVAL, FRESH/RECIRC Door Actuator.> |

# P: DTC B14EA INTAKE DOOR ACTUATOR POTENTIOMETER CIRCUIT SHORT-CIRCUIT

**DTC DETECTING CONDITION:**
Intake door actuator potentiometer circuit is shorted.
**TROUBLE SYMPTOM:**
FRESH/RECIRC does not operate.
**WIRING DIAGRAM:**
Air Conditioning System <Ref. to WI-35, WIRING DIAGRAM, Air Conditioning System.>



| | Step | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK CONNECTOR.**<br>1) Check the condition of connector connection.<br>2) Read the DTC using Subaru Select Monitor. | Is B14EA displayed? | Go to step **2**. | Repair the poor contact of connector. |
| 2 | **CHECK ACTUATOR.**<br>1) Turn the ignition switch to ON.<br>2) Using the tester, measure the voltage between terminals.<br>***Connector & terminal***<br>***(B163) No. 4 (+) — No. 6 (–):*** | Is the voltage 4.5 — 5.0 V? | Go to step **3**. | Repair or replace the open circuit of harness. |
| 3 | **CHECK HARNESS.**<br>1) Turn the ignition switch to OFF.<br>2) Using a tester, check continuity between terminals.<br>***Connector & terminal***<br>***(B163) No. 4 — (i88) No. 10:***<br>***(B163) No. 5 — (i88) No. 12:***<br>***(B163) No. 6 — (i88) No. 14:*** | Is there continuity? | Go to step **4**. | Repair or replace the open circuit of harness. |

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 4 | **CHECK ACTUATOR.**<br>1) Turn the ignition switch to ON.<br>2) Using the tester, measure the voltage between terminals.<br>***Connector & terminal***<br>***(B163) No. 5 (+) — No. 6 (–):*** | Is the voltage 0.5 — 4.5 V? | Replace the A/C control panel. <Ref. to AC-47, REMOVAL, Control Panel.> | Go to step **5**. |
| 5 | **CHECK HARNESS.**<br>1) Turn the ignition switch to OFF.<br>2) Using the tester, measure the resistance between terminals.<br>***Connector & terminal***<br>***(B163) No. 5 — No. 6:*** | Is the resistance less than 1 Ω? | Repair or replace the short circuit of the harness. | Replace the actuator. <Ref. to AC-85, REMOVAL, FRESH/RECIRC Door Actuator.> |

# Q: DTC B14EB INTAKE DOOR ACTUATOR LOCK

**DTC DETECTING CONDITION:**

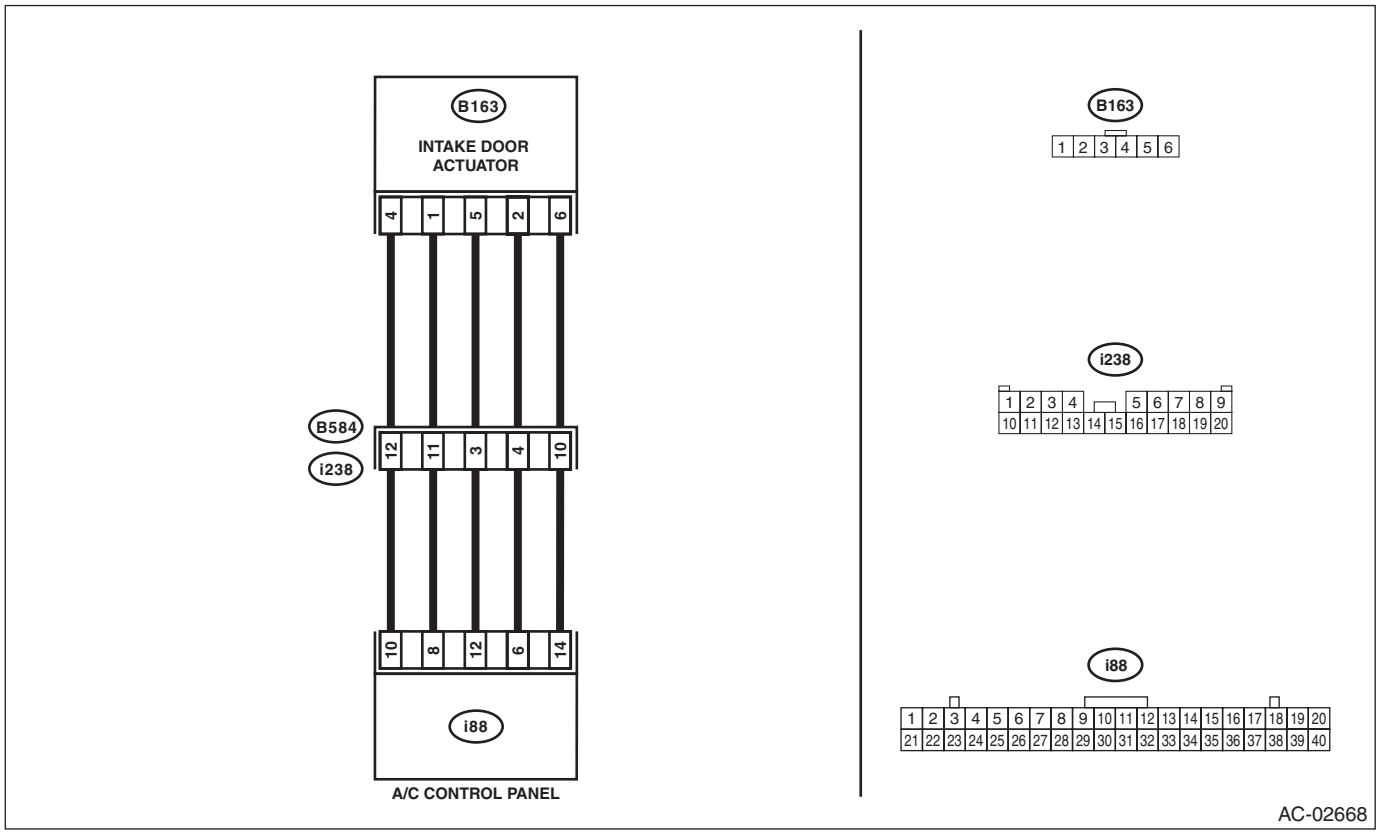
- Intake door actuator is locked.
- The potentiometer value of the actuator does not change.

**TROUBLE SYMPTOM:**

FRESH/RECIRC does not operate.

**WIRING DIAGRAM:**

Air Conditioning System <Ref. to WI-35, WIRING DIAGRAM, Air Conditioning System.>



| | Step | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK CONNECTOR.**<br>1) Check the condition of connector connection.<br>2) Read the DTC using Subaru Select Monitor. | Is B14EB displayed? | Go to step **2**. | Repair the poor contact of connector. |
| 2 | **CHECK CURRENT DATA.**<br>Using the Subaru Select Monitor, change the setting of “Fresh/Rec Air Dr Act Trgt Open Angle” from Air Conditioning Diagnosis and perform the active test**.** | Did the actuator move to the specified target opening angle? | Intake door actuator circuit is normal. | Go to step **3**. |
| 3 | **CHECK HARNESS.**<br>1) Turn the ignition switch to ON.<br>2) Using the tester, measure the voltage between terminals.<br>***Connector & terminal***<br>***(i176) No. 4 (+) — No. 6 (–):*** | Is the voltage 4.5 — 5.0 V? | Go to step **4**. | Repair or replace the open circuit of harness. |

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 4 | **CHECK HARNESS.**<br>1) Disconnect the connector from the A/C control panel.<br>2) Using a tester, check continuity between terminals.<br>***Connector & terminal***<br>***(i163) No. 1 — (i88) No. 8:***<br>***(i163) No. 2 — (i88) No. 6:***<br>***(i163) No. 4 — (i88) No. 10:***<br>***(i163) No. 5 — (i88) No. 12:***<br>***(i163) No. 6 — (i88) No. 14:*** | Is there continuity? | Go to step **5**. | Repair or replace the open circuit of harness. |
| 5 | **CHECK INTAKE DOOR ACTUATOR.**<br>Check the intake door actuator parts. | Is the actuator normal? | Replace the A/C control panel. <Ref. to AC-47, REMOVAL, Control Panel.> | Replace the actuator. <Ref. to AC-85, REMOVAL, FRESH/RECIRC Door Actuator.> |

## R: DTC U0073 CONTROL MODULE COMMUNICATION BUS “A” OFF

Detected when defective CAN line is detected.

NOTE:
Perform the diagnosis for LAN system. <Ref. to LAN(diag)-2, PROCEDURE, Basic Diagnostic Procedure.>

## S: DTC U0100 LOST COMMUNICATION WITH ECM/PCM “A”

Detected when CAN data is not received from engine control module (ECM).

NOTE:
Perform the diagnosis for LAN system. <Ref. to LAN(diag)-2, PROCEDURE, Basic Diagnostic Procedure.>

## T: DTC U0101 LOST COMMUNICATION WITH TCM

Detected when CAN data is not received from TCM.

NOTE:
Perform the diagnosis for LAN system. <Ref. to LAN(diag)-2, PROCEDURE, Basic Diagnostic Procedure.>

## U: DTC U0122 LOST COMMUNICATION WITH VEHICLE DYNAMICS CONTROL MODULE

Detected when CAN data is not received from VDC.

NOTE:
Perform the diagnosis for LAN system. <Ref. to LAN(diag)-2, PROCEDURE, Basic Diagnostic Procedure.>

## V: DTC U0140 LOST COMMUNICATION WITH BODY CONTROL MODULE

This is detected when CAN signal is not received from BIU.

NOTE:
Perform the diagnosis for LAN system. <Ref. to LAN(diag)-2, PROCEDURE, Basic Diagnostic Procedure.>

## W: DTC U0155 LOST COMMUNICATION WITH INSTRUMENT PANEL CLUSTER (IPC) CONTROL MODULE

This is detected when CAN signal is not received from meter.

NOTE:
Perform the diagnosis for LAN system. <Ref. to LAN(diag)-2, PROCEDURE, Basic Diagnostic Procedure.>

## X: DTC U0401 INVALID DATA RECEIVED FROM ECM/PCM “A”

This is detected when CAN data from engine control module (ECM) is abnormal.

NOTE:
Perform the diagnosis for LAN system. <Ref. to LAN(diag)-2, PROCEDURE, Basic Diagnostic Procedure.>

## Y: DTC U0402 INVALID DATA RECEIVED FROM TCM

This is detected when CAN data from TCM is abnormal.

NOTE:
Perform the diagnosis for LAN system. <Ref. to LAN(diag)-2, PROCEDURE, Basic Diagnostic Procedure.>

## Z: DTC U0416 INVALID DATA RECEIVED FROM VEHICLE DYNAMICS CONTROL MODULE

This is detected when CAN data from VDC is abnormal.

NOTE:
Perform the diagnosis for LAN system. <Ref. to LAN(diag)-2, PROCEDURE, Basic Diagnostic Procedure.>

## AA:DTC U0422 INVALID DATA RECEIVED FROM BODY CONTROL MODULE

This is detected when CAN data from BIU is abnormal.

NOTE:
Perform the diagnosis for LAN system. <Ref. to LAN(diag)-2, PROCEDURE, Basic Diagnostic Procedure.>

## AB:DTC U0423 INVALID DATA RECEIVED FROM INSTRUMENT PANEL CLUSTER CONTROL MODULE

This is detected when CAN data from meter is abnormal.

NOTE:
Perform the diagnosis for LAN system. <Ref. to LAN(diag)-2, PROCEDURE, Basic Diagnostic Procedure.>

# AIRBAG SYSTEM

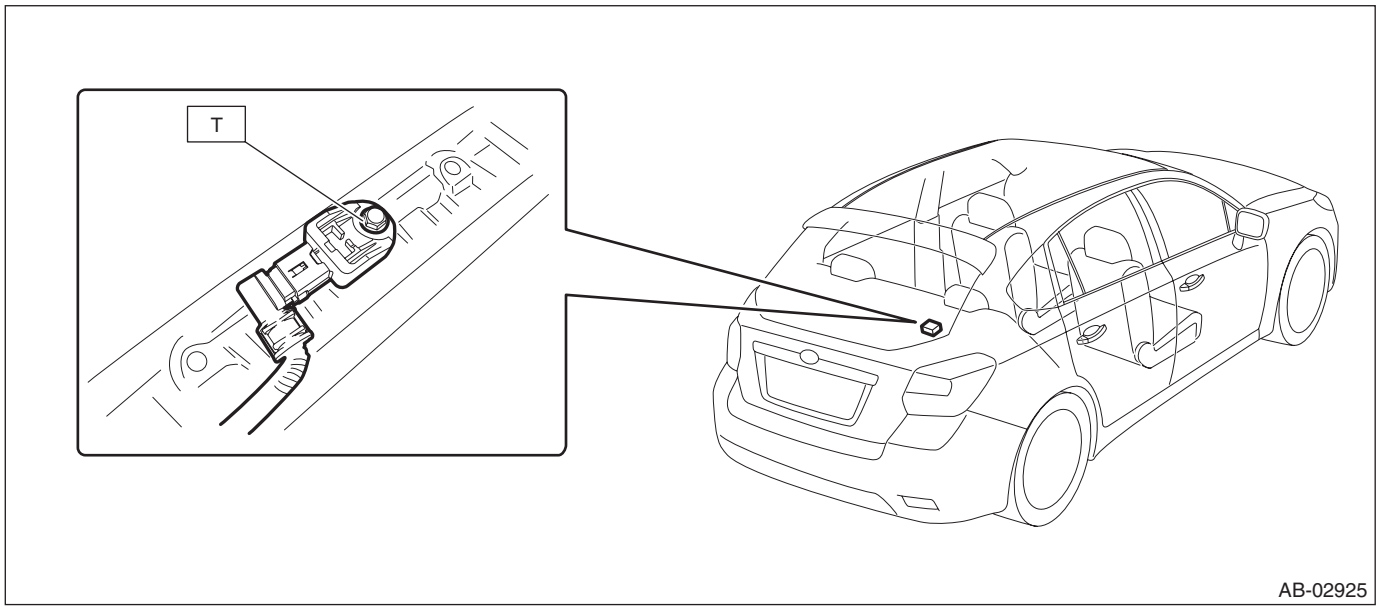
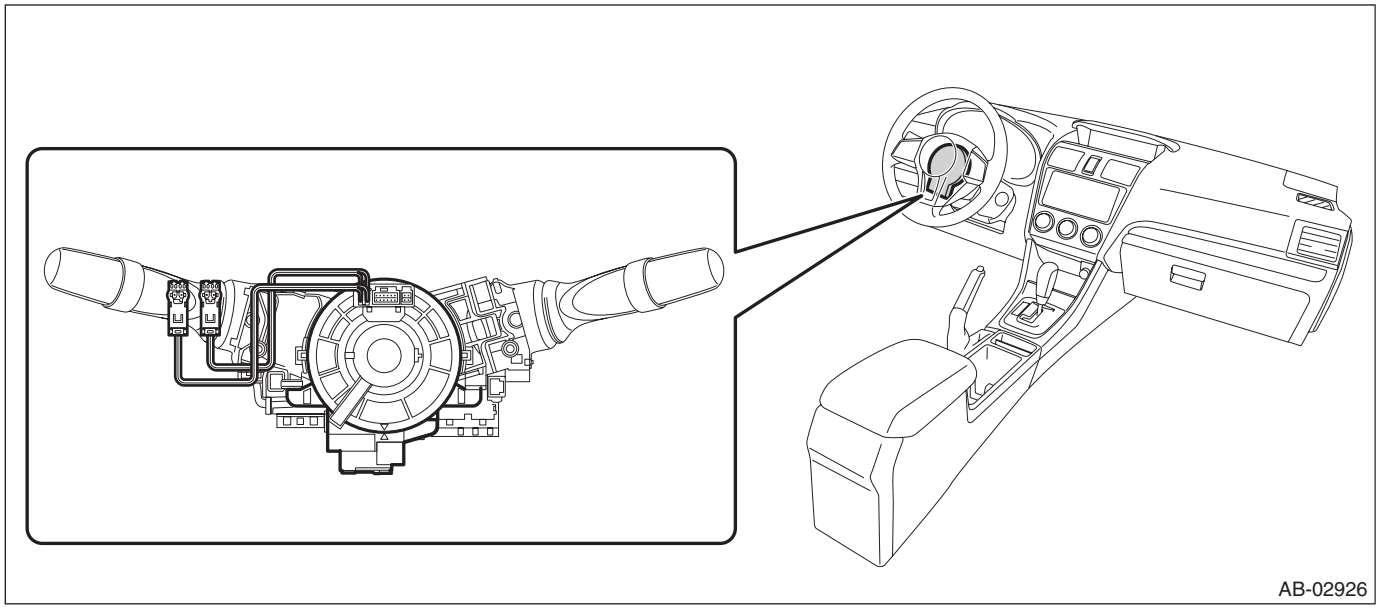
## 11.SATELLITE SAFING SENSOR

**CAUTION:**
**Do not reuse mounting bolts and nuts.**



***Tightening torque:***
***7.5 N·m (0.76 kgf-m, 5.5 ft-lb)***

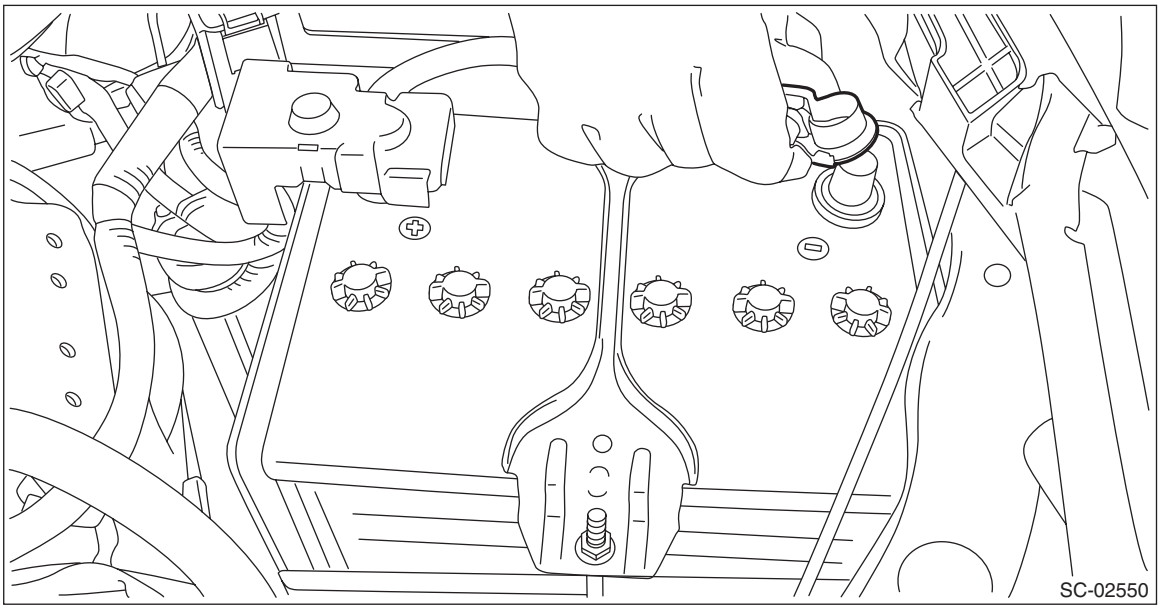
## 12.STEERING ROLL CONNECTOR



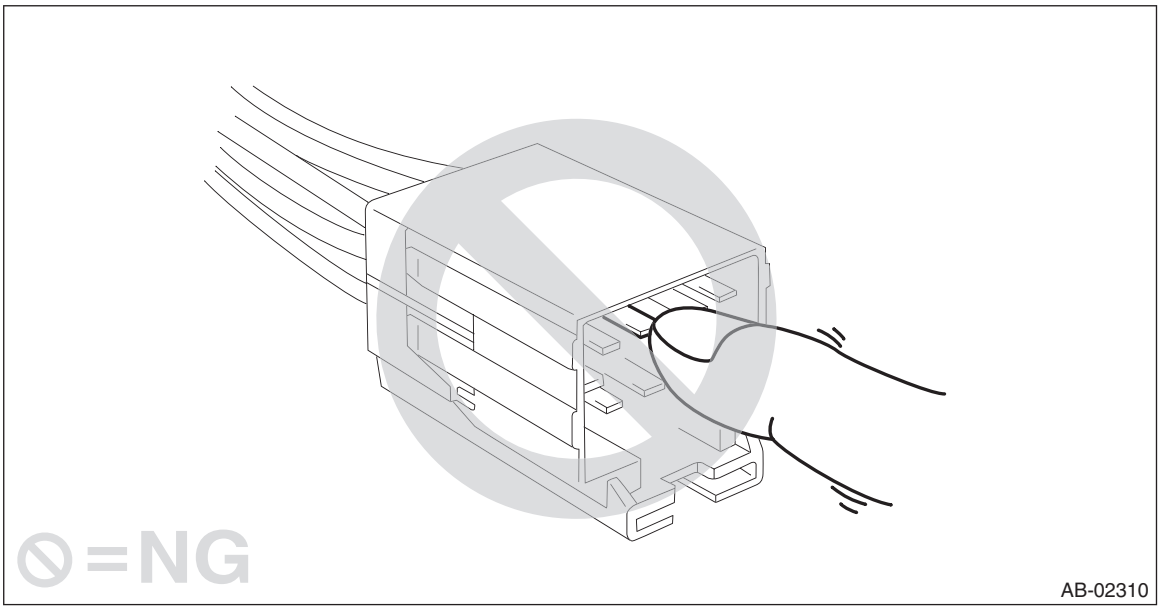
## B: CAUTION

### 1. BEFORE STARTING ALL WORKS

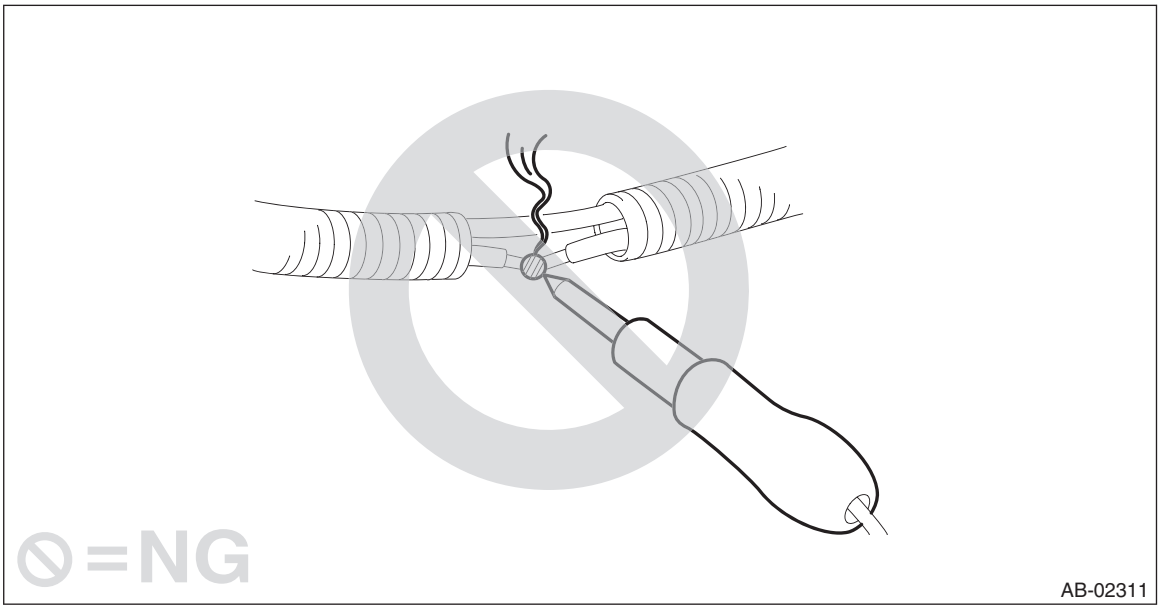
• The airbag system is fitted with a backup power supply. After disconnecting the battery ground cable, the airbag may operate if you do not wait for 60 seconds or more before starting the service of airbag system.



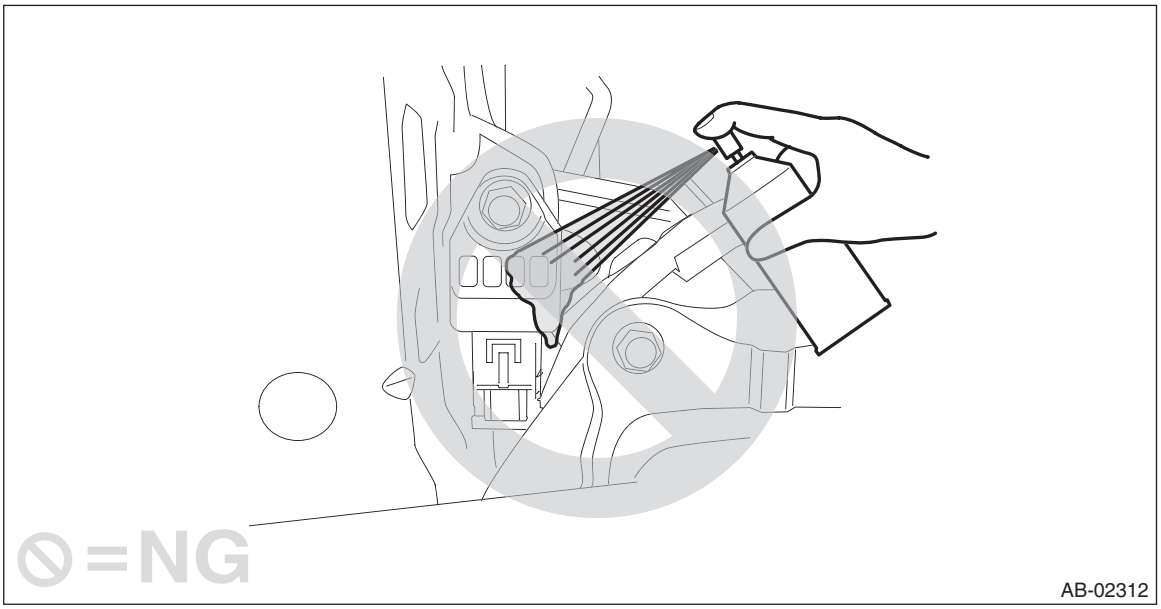
• When servicing a vehicle, be sure to turn the ignition switch to OFF, disconnect the ground cable from battery, and wait for 60 seconds or more before starting work.
• If the airbag warning light illuminates, check or repair the vehicle immediately to prevent it from airbag system malfunction.
• Do not allow water or oil to come in contact with the connector terminals. Also, do not touch the connector terminals directly.



• If damage, open circuit or rust is found on airbag system wiring harness, do not repair the harness. Always replace the faulty harness with a new genuine part.



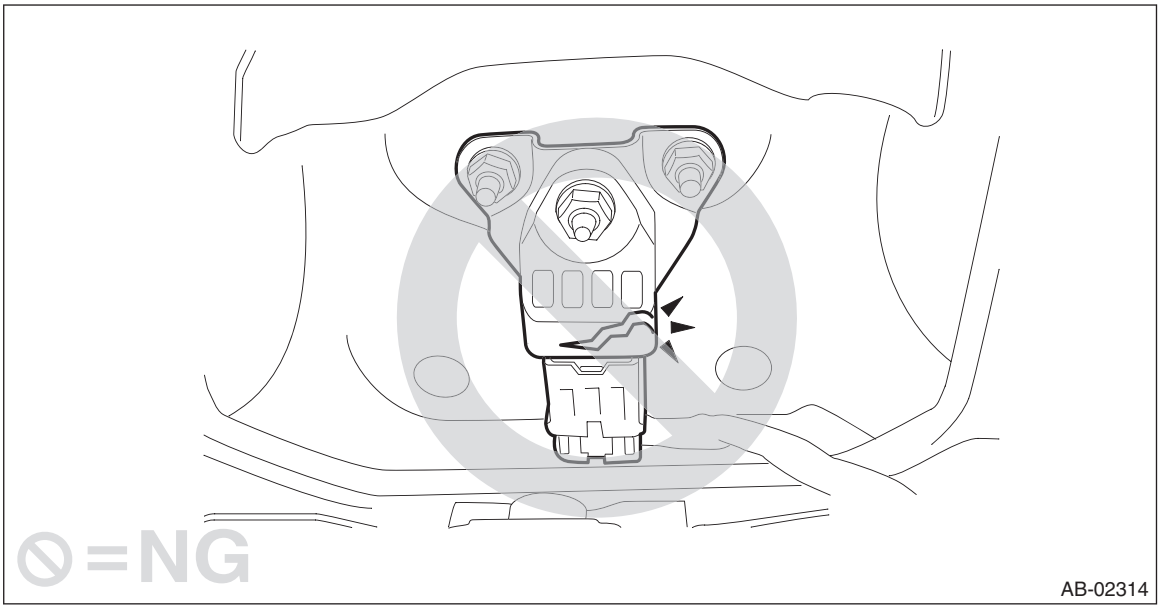
• When painting or performing sheet metal work on the front part of the vehicle, including the front wheel apron, front fender and radiator panel side, remove the front sub sensors and wiring harness of airbag system.
• When painting or performing sheet metal work on the side of the vehicle, including the side sill, center pillar and front and rear doors, remove the front door impact sensor, side airbag sensors, curtain airbag sensor, satellite safing sensor and wiring harness of the airbag system.



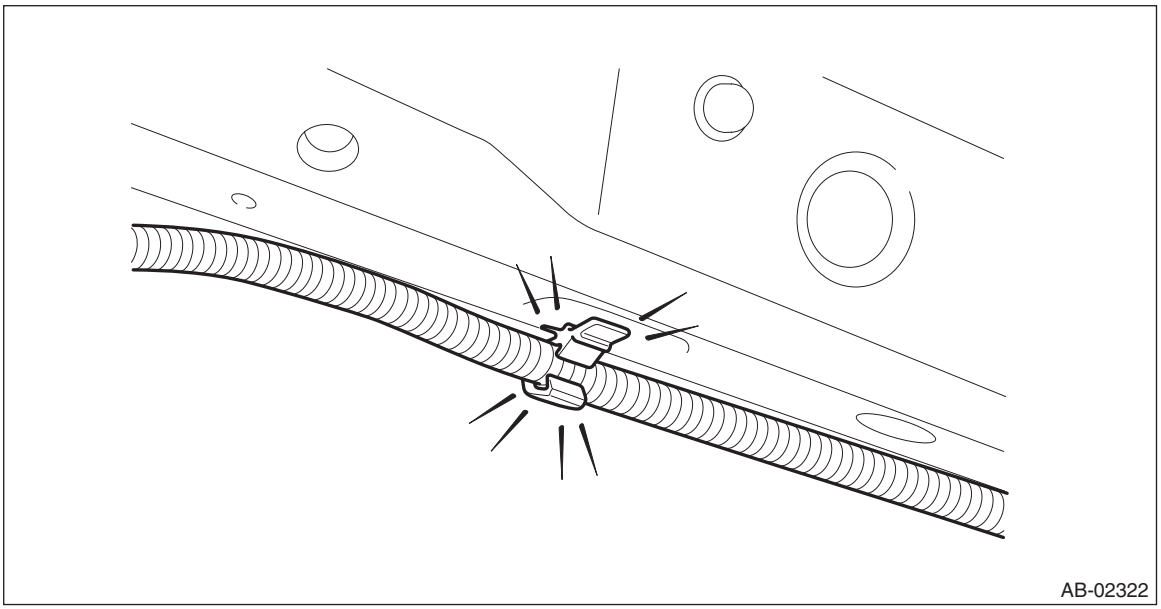
• When attaching the steering wheel and steering roll connector, be sure to adjust the steering roll connector.

## 2. BEFORE STARTING PARTS REPLACEMENT

• If airbag sensors, airbag module, airbag control module, pretensioners, harnesses, or the cover - satellite safing are deformed or damaged, replace with new parts.

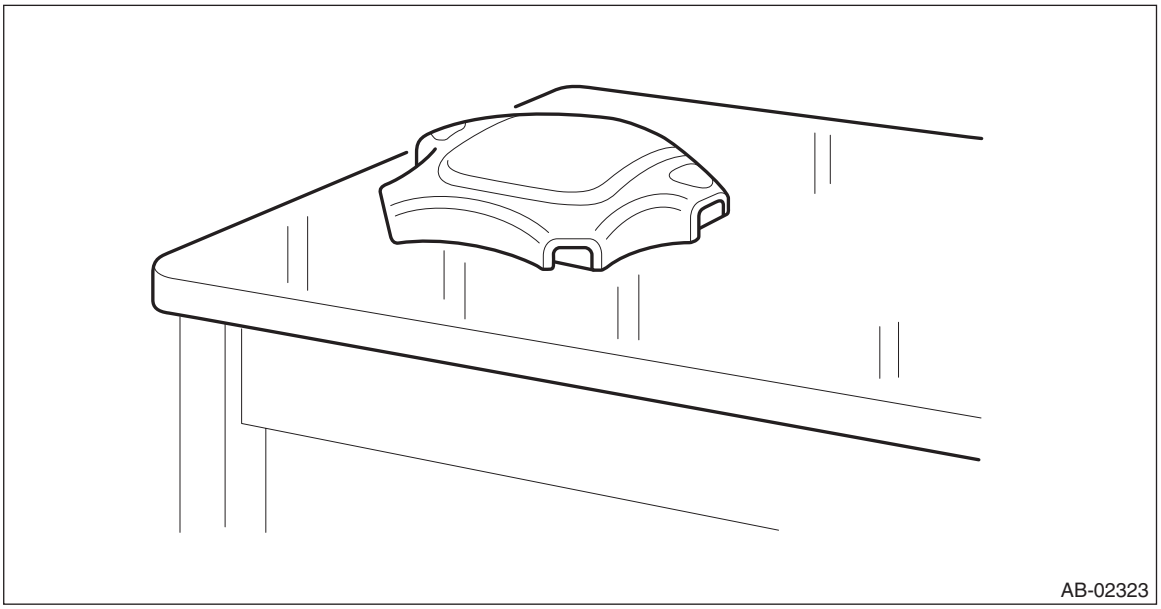


• Install the wiring harness securely with the specified clips to avoid interference or tangled with other parts.

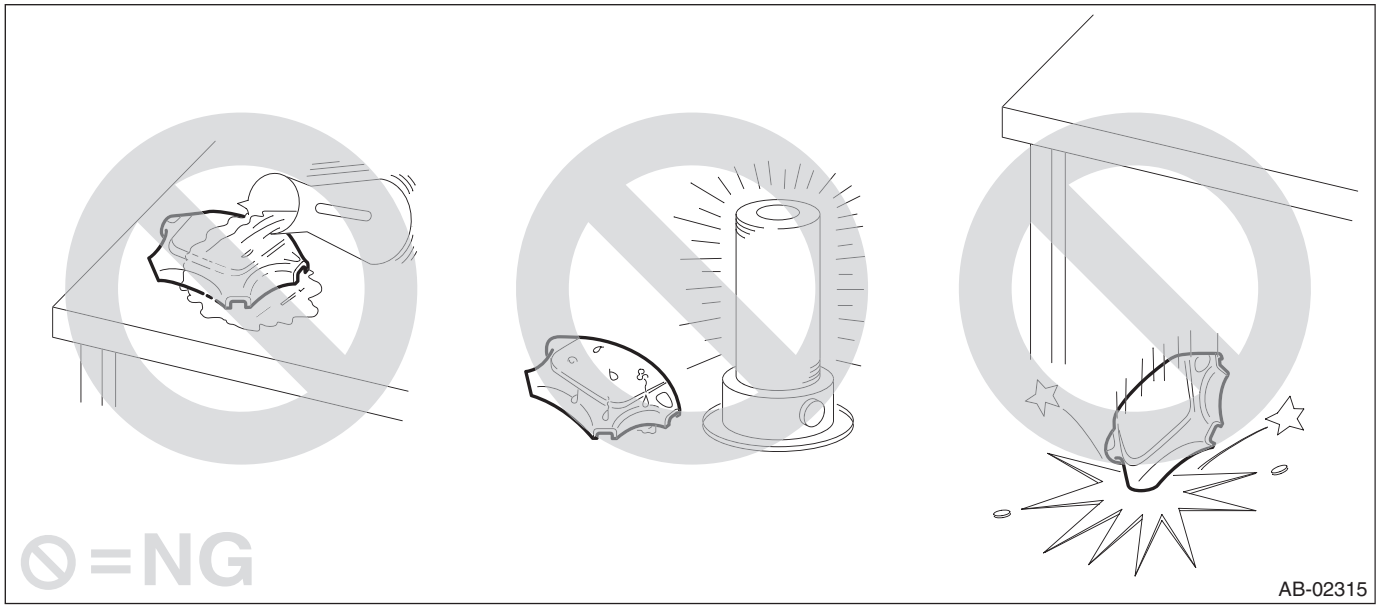


• Do not use the airbag or pretensioner parts from other vehicles. Always replace the defective parts with new parts.
• Never reuse any activated airbag module and pretensioner.
• Do not discard undeployed airbag or pretensioner.
• When airbag control module, front sub sensor, front door impact sensor, side airbag sensor, curtain airbag sensor and satellite safing sensor are removed, do not reuse the bolts and nuts of them. Always replace with the specified new bolts and nuts.
• When attaching the steering wheel and steering roll connector, be sure to adjust the steering roll connector.

• After removing each parts of the airbag system, keep them with the pad side facing upward on a dry, clean and flat surface away from heat, light sources, moisture and dust.

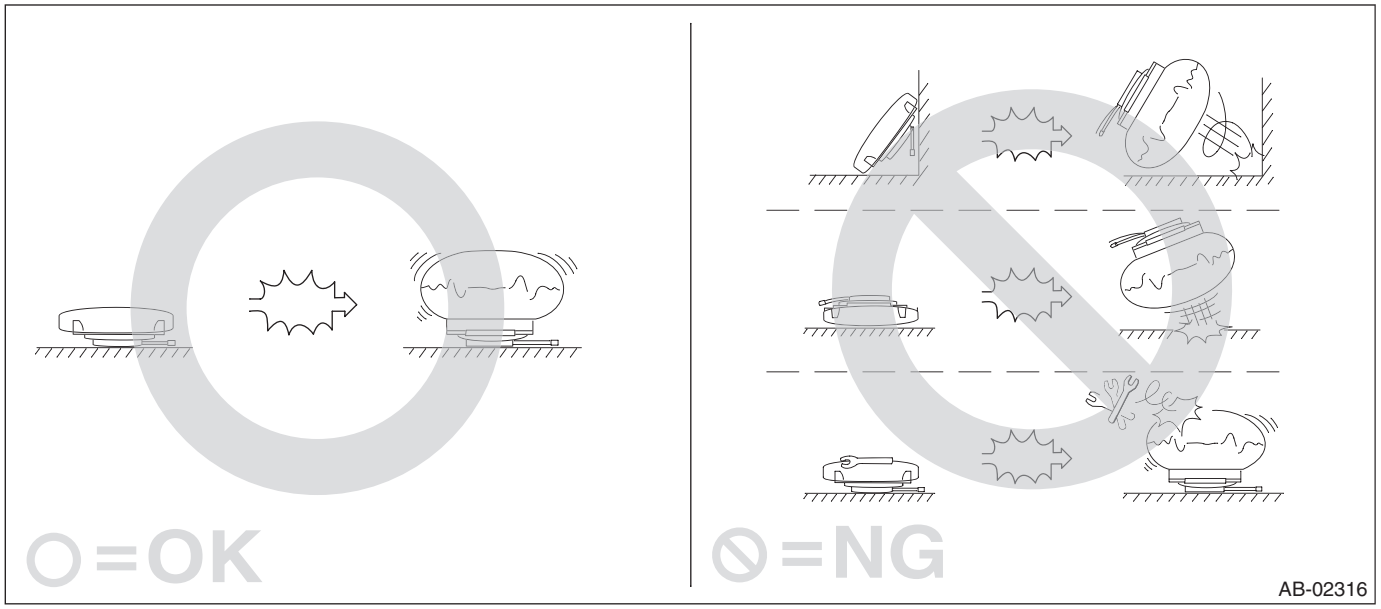


• Do not drop any airbag component, store them under high temperature of 85°C (185°F) or more, or let water, oil or grease get on them; the internal parts may be damaged or the reliability may be greatly lowered.

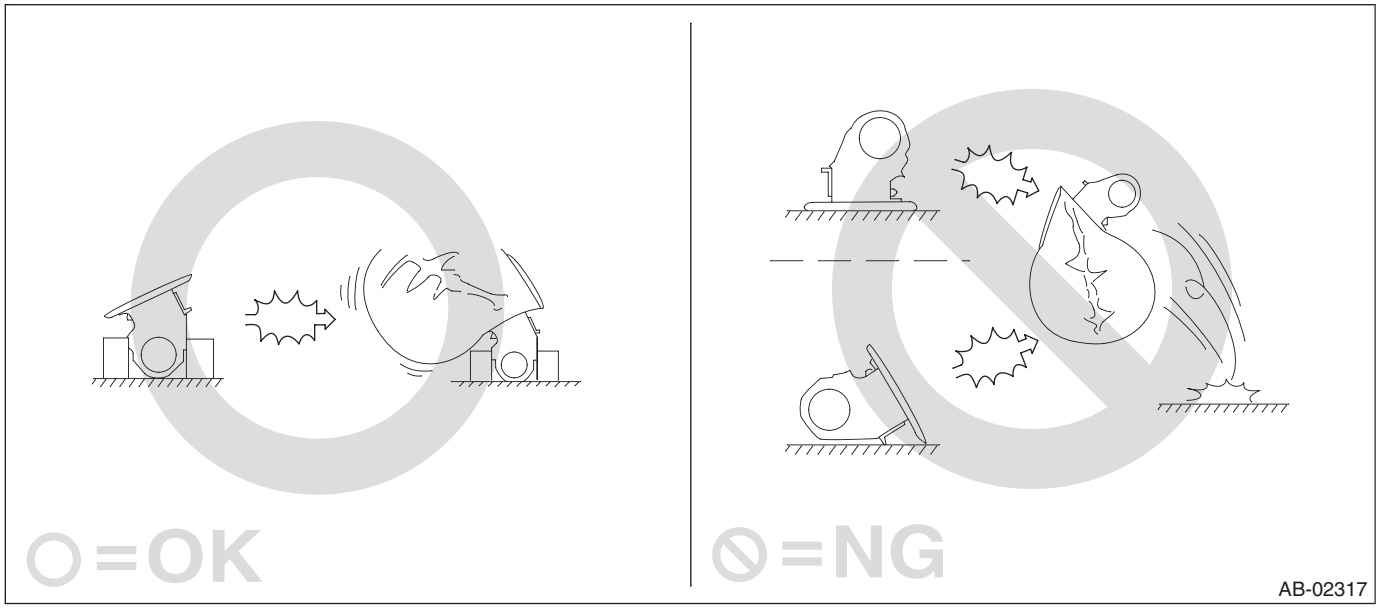


• When storing a removed airbag module, do not place it with the pad side facing downward. Do not place any objects on the airbag module. Do not pile up the airbag module. If the pad of the airbag module is in contact with other objects, it may cause a serious accident if the airbag accidentally operates.

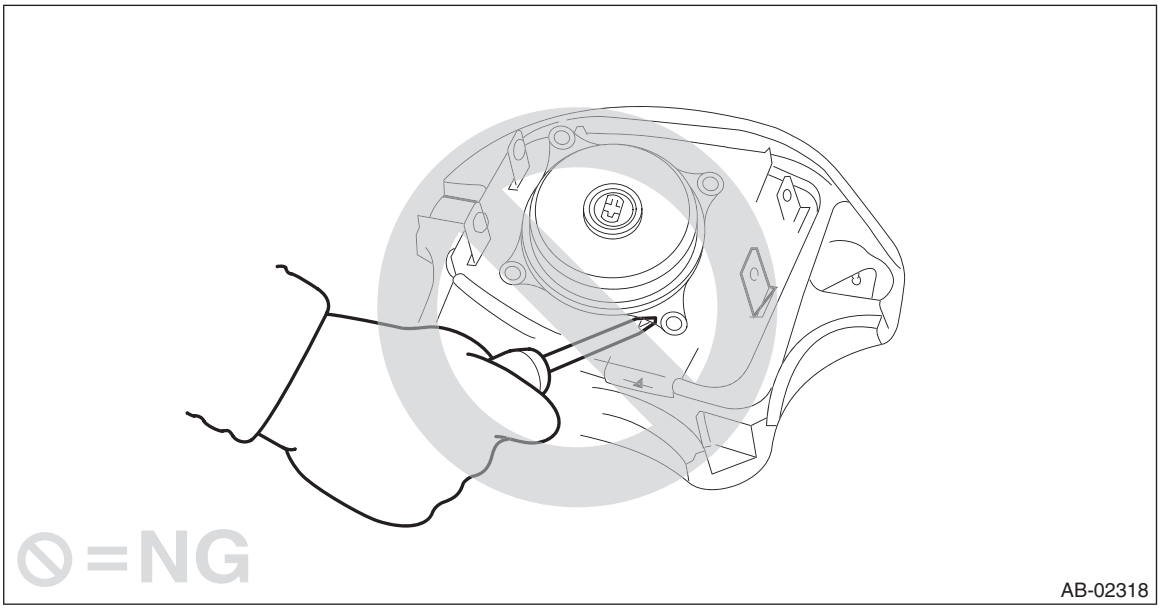
- Driver's airbag module



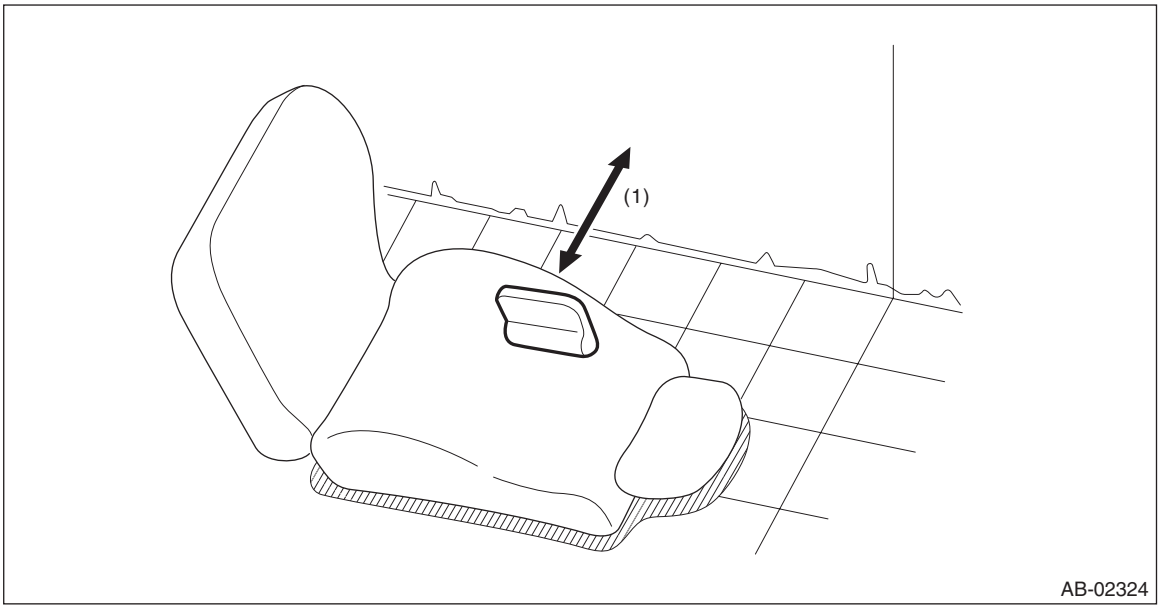
- Passenger's airbag module and side airbag module



• Do not disassemble driver's airbag module, knee airbag module, passenger's airbag module, side airbag module, curtain airbag module or pretensioner.



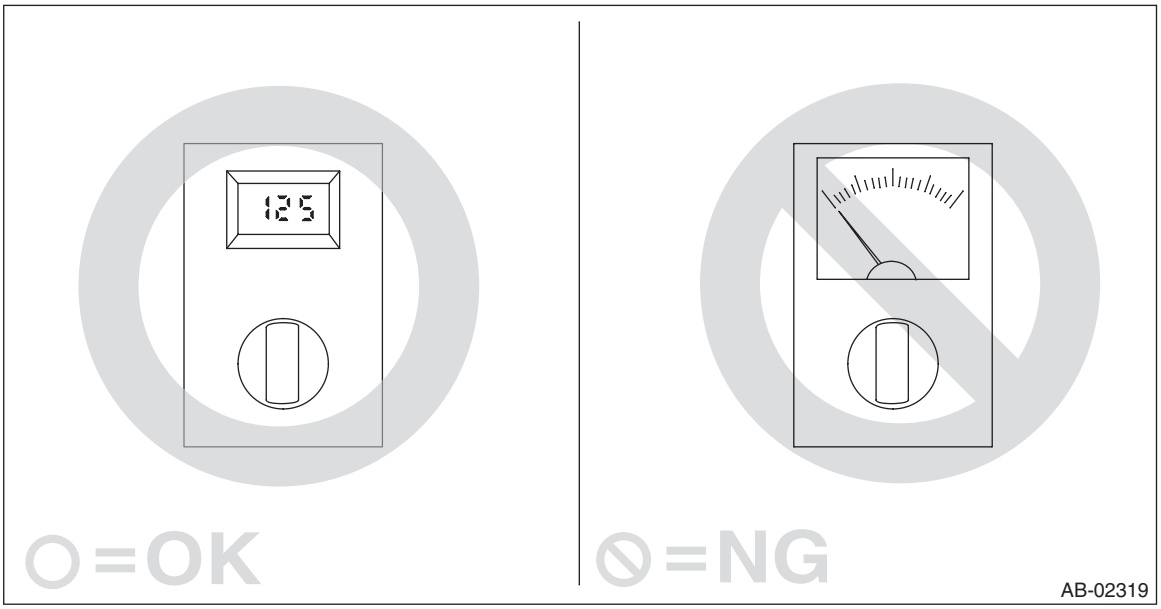
• The removed front seat with airbag module must be kept at least 200 mm (8 in) away from walls and other objects.



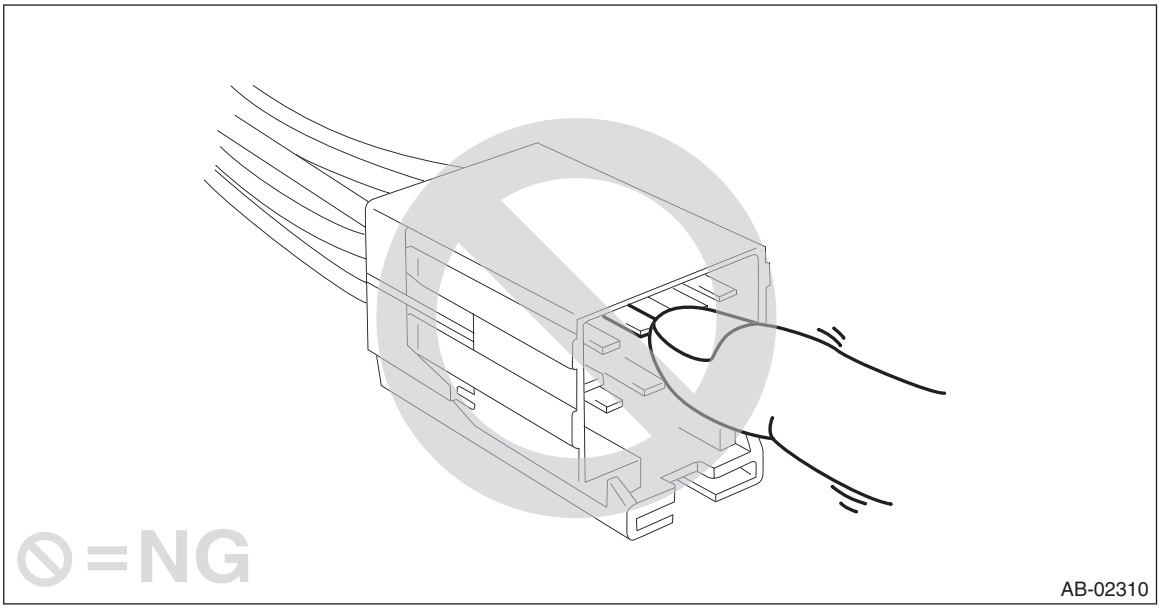
(1) 200 mm (8 in) or more

## 3. BEFORE STARTING TROUBLESHOOTING

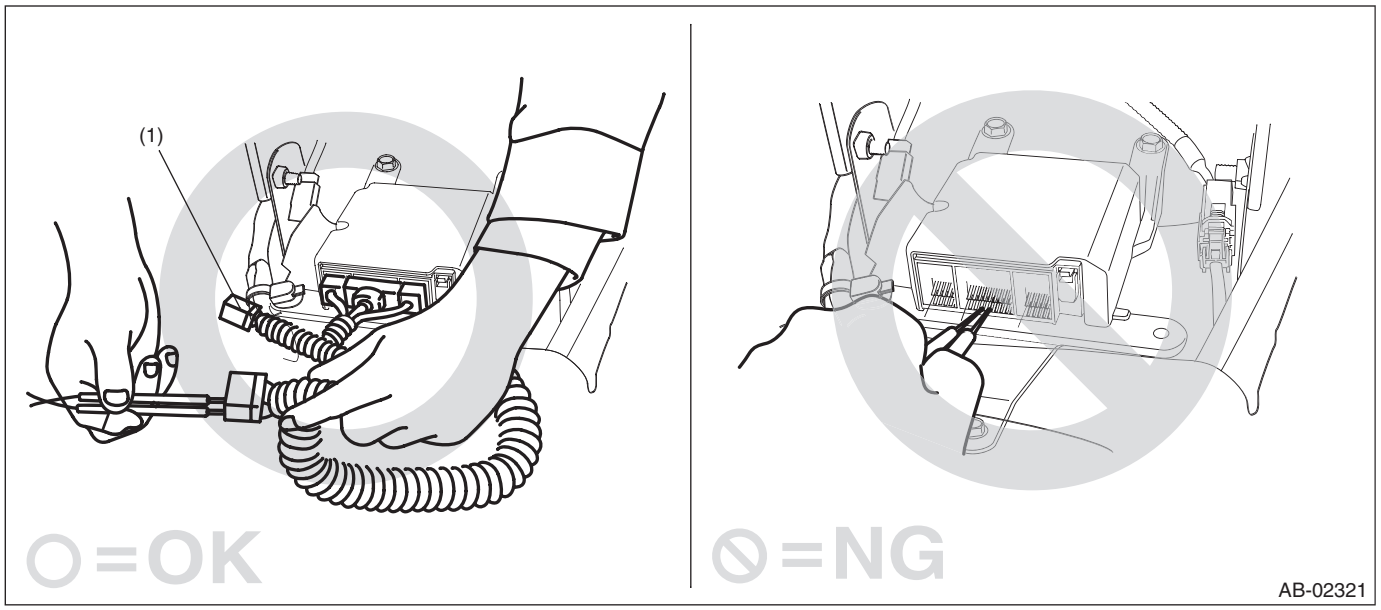
• Even if any part must be replaced as the result of troubleshooting, do not use an airbag part or pretensioner part from other vehicles. Always replace the defective parts with new parts.
• When checking the airbag system, be sure to use a digital circuit tester. Use of an analog circuit tester may cause the airbag to activate erroneously due to a minimal current inside tester.



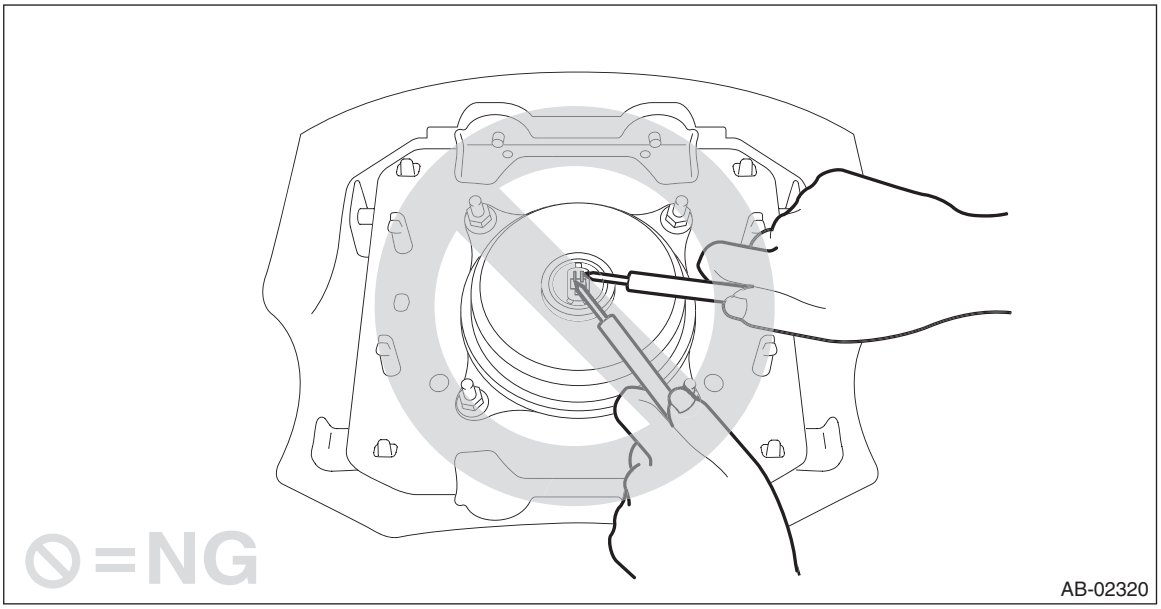
• Do not allow water or oil to come in contact with the connector terminals. Also, do not touch the connector terminals directly.



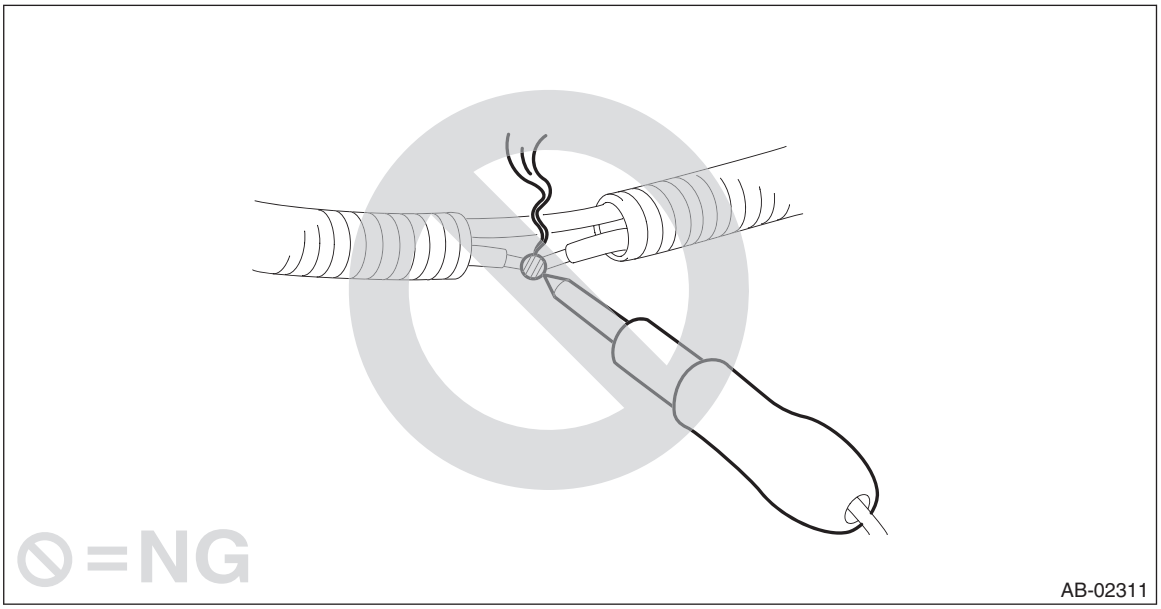
• When checking, use a test harness (1). Damage to connector terminal causes malfunction. Do not directly put the tester probe on airbag connector terminal.



• Do not check continuity of the driver's airbag module, knee airbag module, passenger's airbag module, side airbag module, curtain airbag module or pretensioner.



• If damage, open circuit or rust is found on airbag system wiring harness, do not repair the harness. Always replace the faulty harness with a new genuine part.



## C: PREPARATION TOOL

### 1. SPECIAL TOOL

| ILLUSTRATION | TOOL NUMBER | DESCRIPTION | REMARKS |
|---|---|---|---|
|  ST98299SA000 | 98299SA000 | TEST HARNESS N | Used for unit inspection of steering roll connector. |
|  ST98299SA040 | 98299SA040 | TEST HARNESS Q | Used for unit inspection of steering roll connector. |

### 2. GENERAL TOOL

| TOOL NAME | REMARKS |
|---|---|
| Steering wheel puller | Used for removing and installing the steering wheel. |
| TORX® T40 | Used for removing and installing the beam COMPL - steering. |

# 2. Airbag Connector

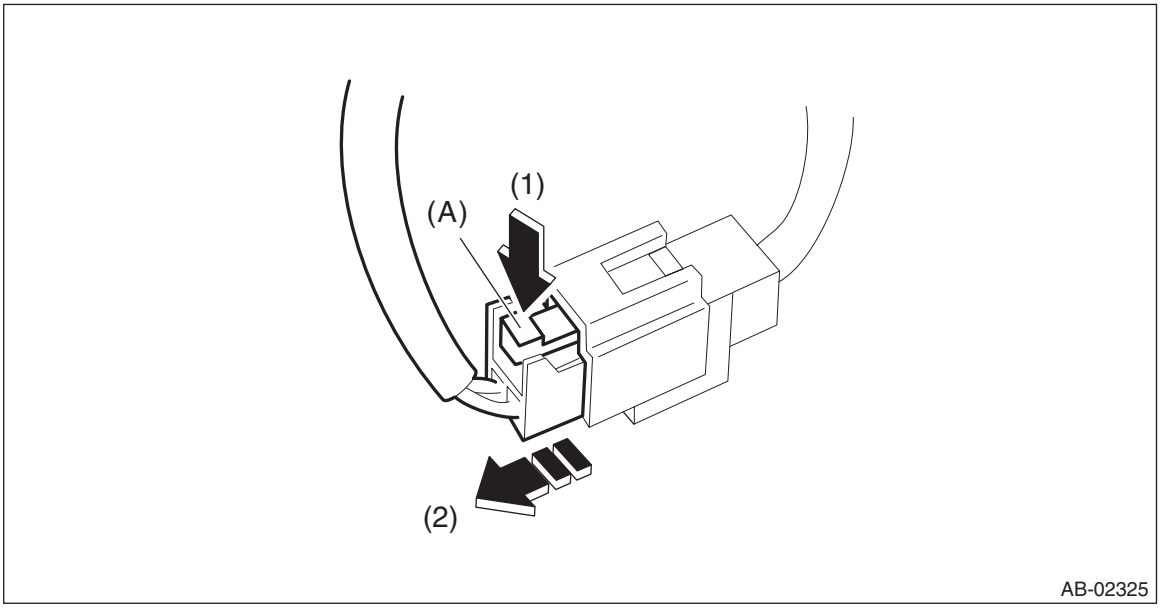
## A: PROCEDURE

### 1. POWER SUPPLY

1) How to disconnect:

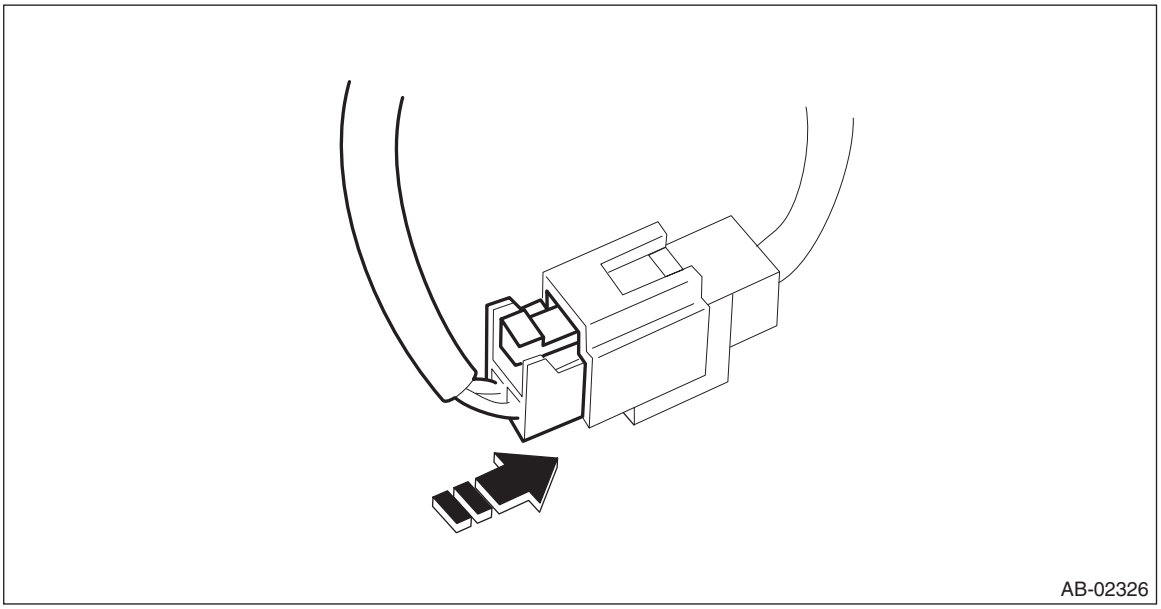
**CAUTION:**
**When pulling the slide lock or disconnecting connector, be sure to hold the connector, not the harness.**

(1) Push the lock (A).
(2) While holding down the lock (A), disconnect the connector.



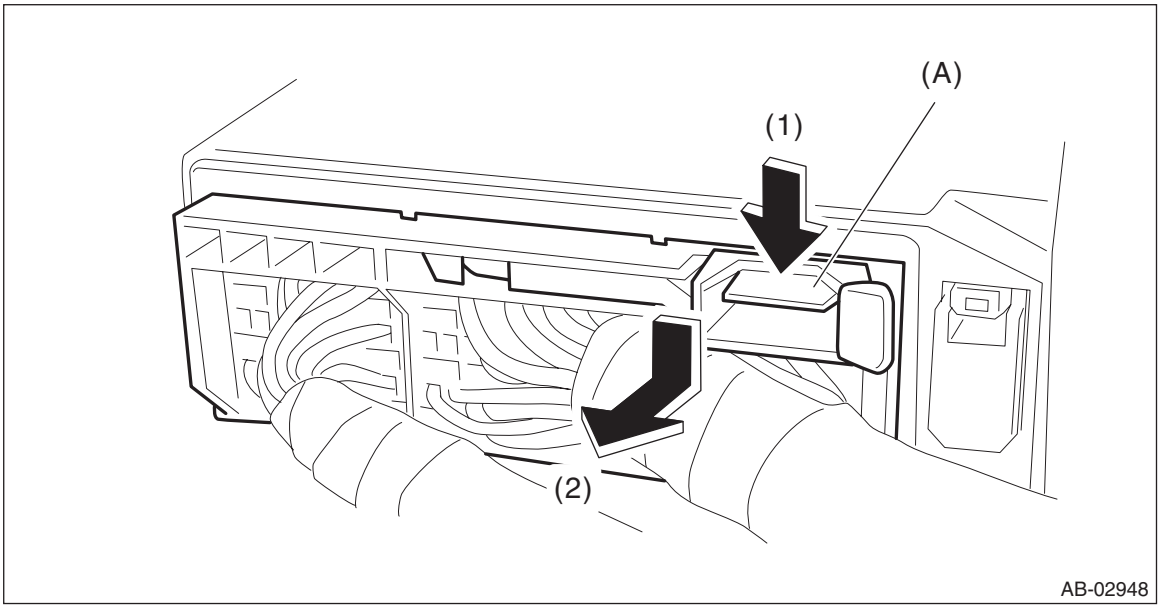
2) How to connect:

**CAUTION:**
**Be sure to insert the connector in until it is locked. Then pull it gently to make sure that it is locked.**
Holding the connector, push it in securely until a clicking sound is heard.



## 2. AIRBAG CONTROL MODULE

1) How to disconnect:
   (1) Push the lock lever plate (A).
   (2) While holding down the lock lever plate (A), pull the lever toward you.



2) How to connect:

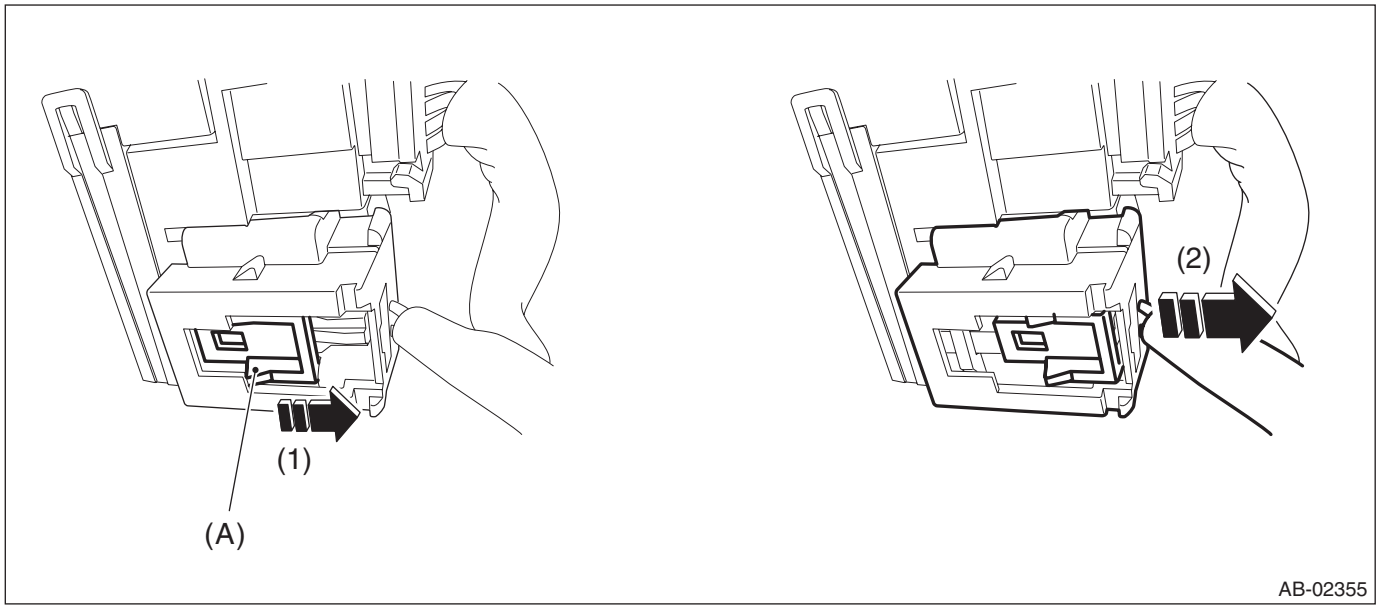
**CAUTION:**
**Be sure to insert the connector in until it is locked. Then pull it gently to make sure that it is locked.**
Insert the connector and push the lock lever in securely.

### 3. DRIVER'S AIRBAG MODULE (ROLL CONNECTOR)

1) How to disconnect:

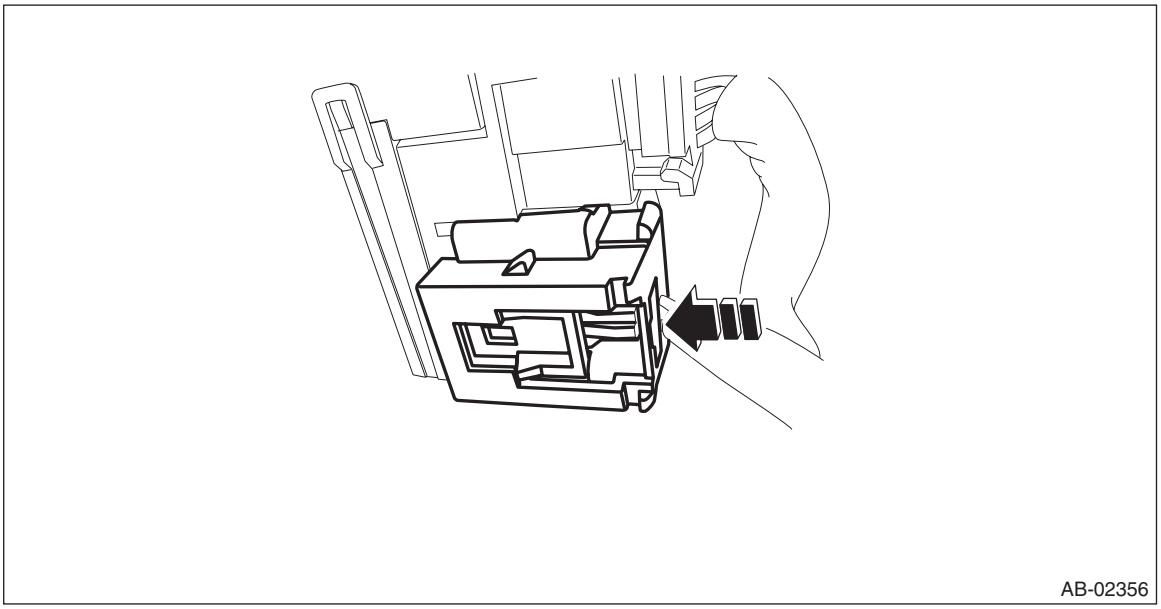
**CAUTION:**
**When pulling the slide lock or disconnecting connector, be sure to hold the connector, not the harness.**

(1) Pull the slide lock (A) in the direction of arrow.
(2) With the slide lock pulled, disconnect the connector.



2) How to connect:

**CAUTION:**
**Be sure to insert the connector in until it is locked. Then pull it gently to make sure that it is locked.**
Holding the connector, push it in securely until a clicking sound is heard.

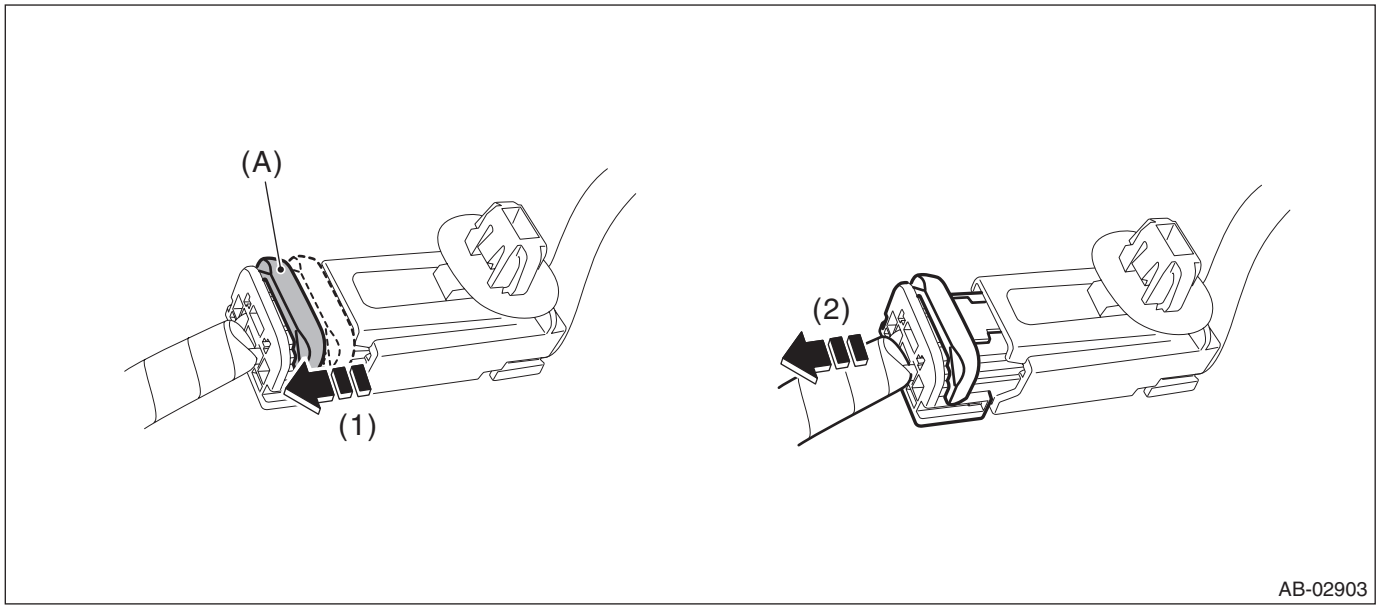


## 4. PASSENGER'S AIRBAG MODULE

1) How to disconnect:

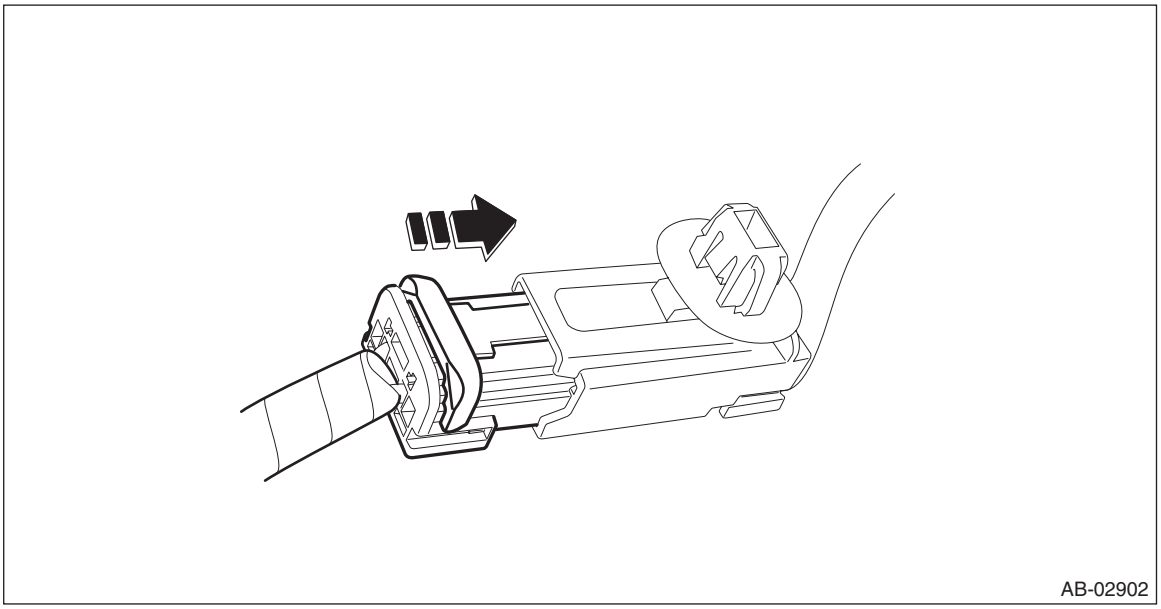
**CAUTION:**
**When pulling the slide lock or disconnecting connector, be sure to hold the connector, not the harness.**

(1) Pull the slide lock (A) in the direction of arrow.
(2) With the slide lock pulled, disconnect the connector.



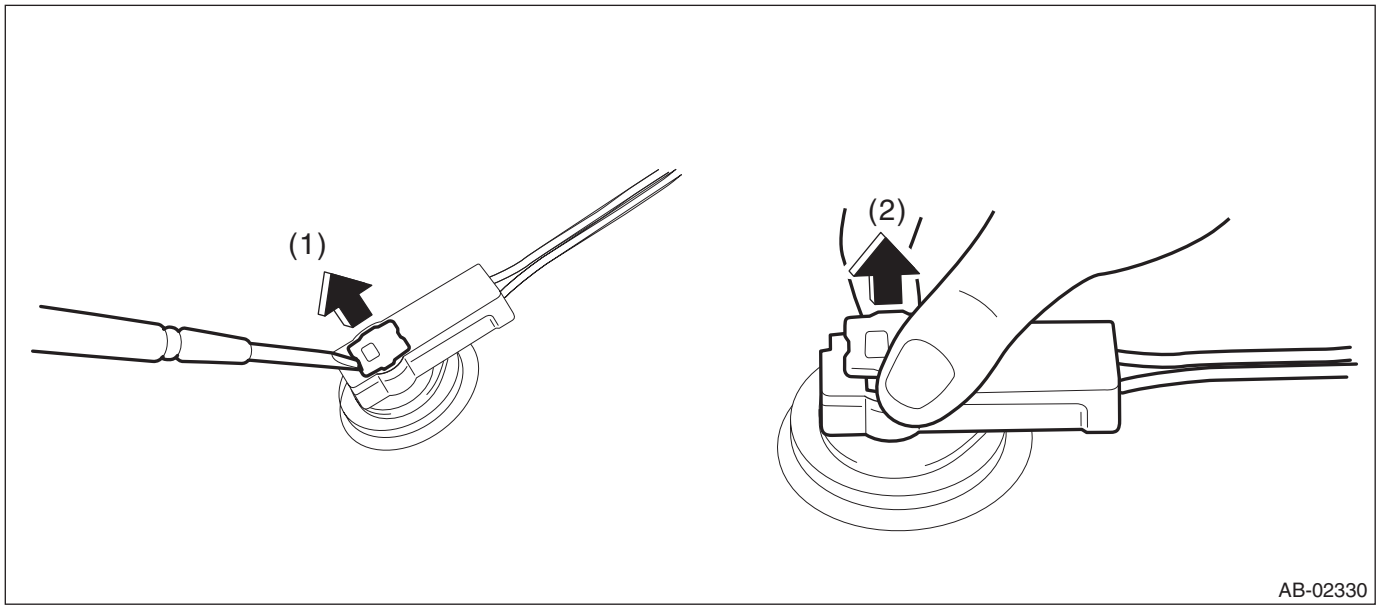
2) How to connect:

**CAUTION:**
**Be sure to insert the connector in until it is locked. Then pull it gently to make sure that it is locked.**
Holding the connector, push it in securely until a clicking sound is heard.



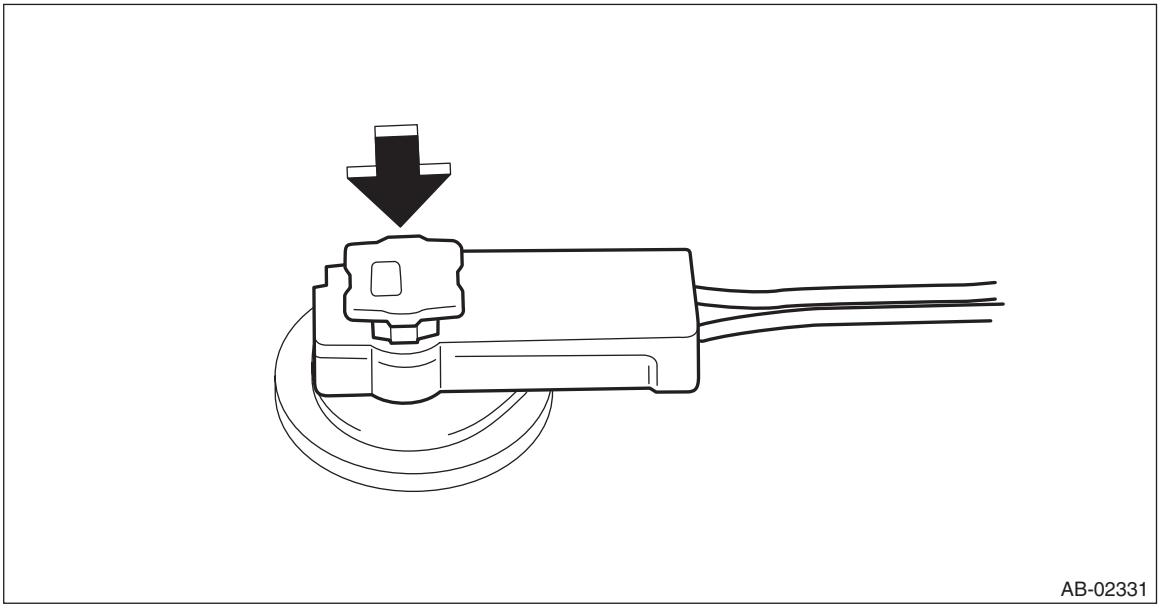
## 5. DRIVER'S AIRBAG MODULE, CURTAIN AIRBAG MODULE & PRETENSIONER

1) How to disconnect:
   (1) Using a flat tip screwdriver, pry the push lock upward to unlock.
   (2) Pull the connector to disconnect from the airbag module assembly or the retractor assembly.



2) How to connect:

**CAUTION:**
- **Be sure to insert the connector in until it is locked.**
- **Press in the push lock securely. Then pull it gently to make sure that it is locked.**



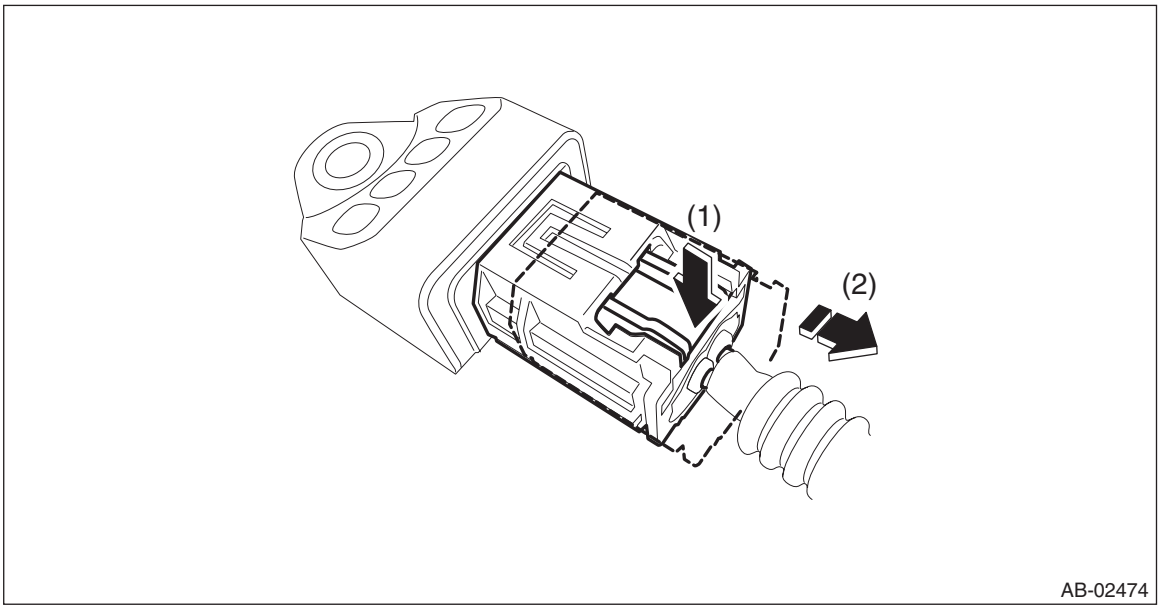
Connect the connector in the reverse order of disconnecting. At this time, be sure to insert until a clicking sound is heard.

## 6. FRONT SUB SENSOR

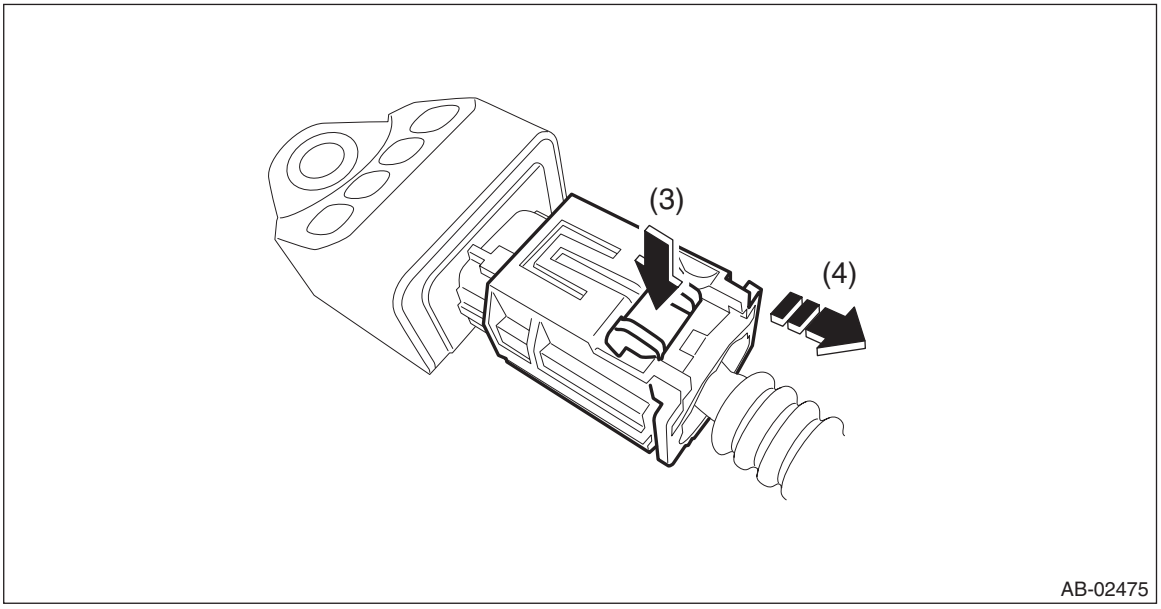
1) How to disconnect:

**CAUTION:**
**When pulling the slide lock or disconnecting connector, be sure to hold the connector, not the harness.**

(1) Push the lock arm.
(2) Holding outer part, pull it one step in the direction of arrow.

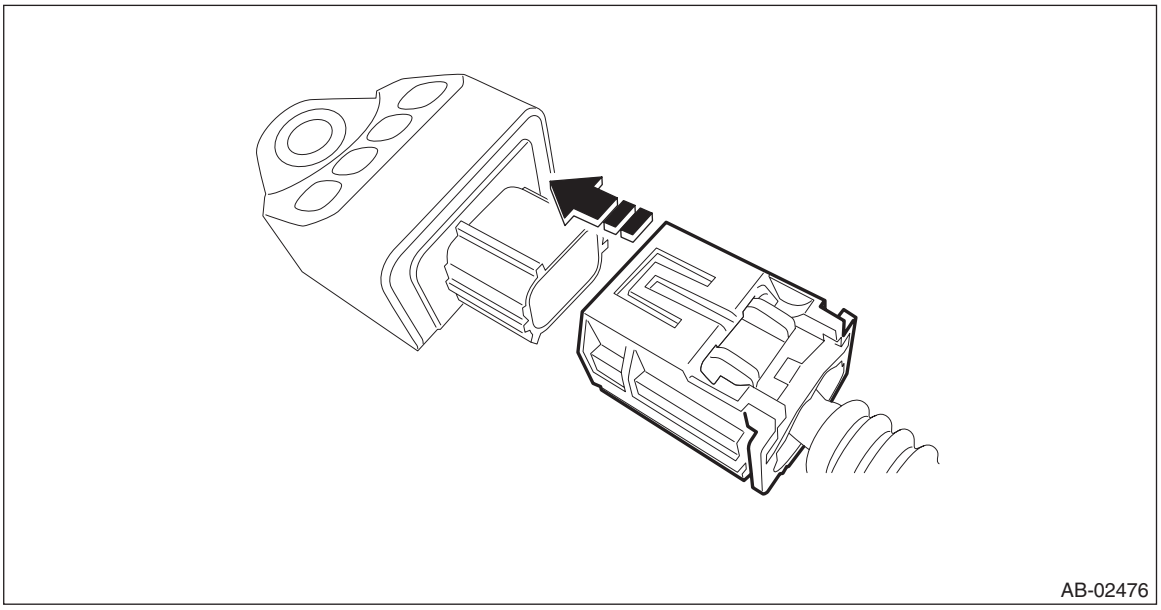


(3) Push the lock arm again.
(4) Holding outer part, pull it in the direction of arrow to disconnect the connector.



2) How to connect:

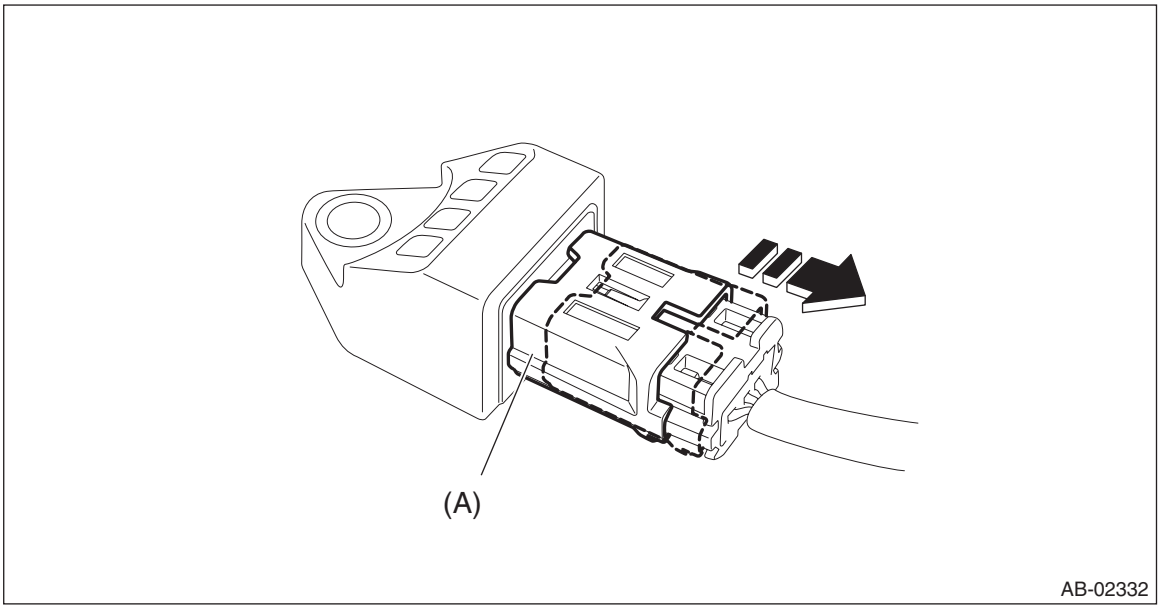
**CAUTION:**
**Be sure to insert the connector in until it is locked. Then pull it gently to make sure that it is locked.**
Holding the connector, push it in securely until a clicking sound is heard.



## 7. FRONT DOOR IMPACT SENSOR AND SATELLITE SAFING SENSOR

1) How to disconnect:

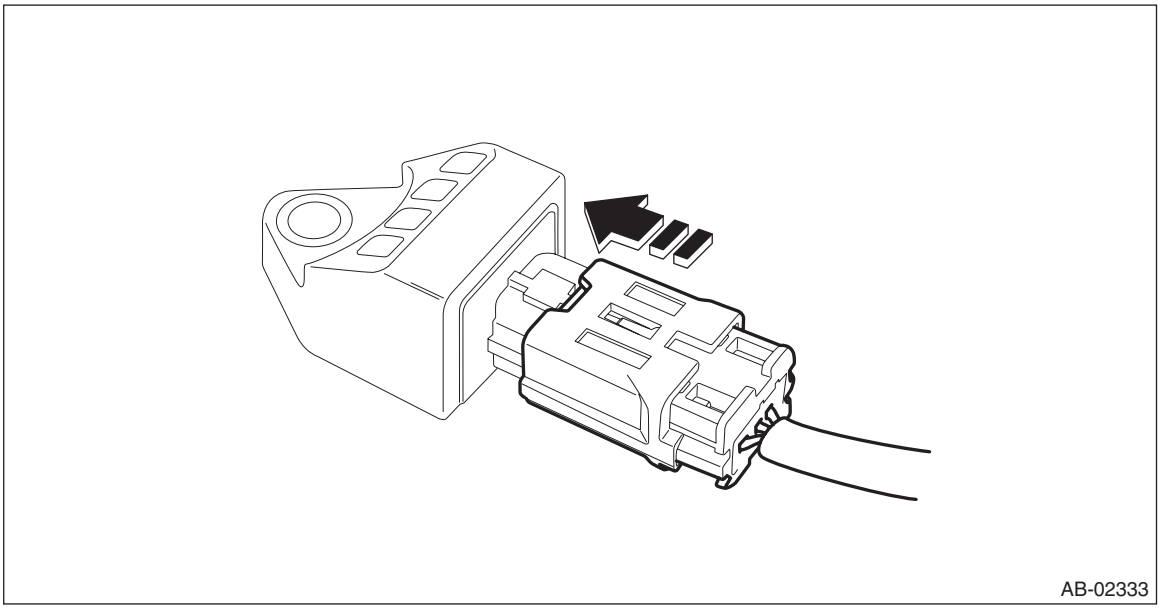
**CAUTION:**
**When pulling the slide lock or disconnecting connector, be sure to hold the connector, not the harness.**
Holding outer part (A), pull it in the direction of arrow.



2) How to connect:

**CAUTION:**
- **Do not touch the outer side section or else the outer side (A) will move back.**
- **Be sure to insert the connector in until it is locked. Then pull it gently to make sure that it is locked.**

Holding the connector, push it in securely until a clicking sound is heard.

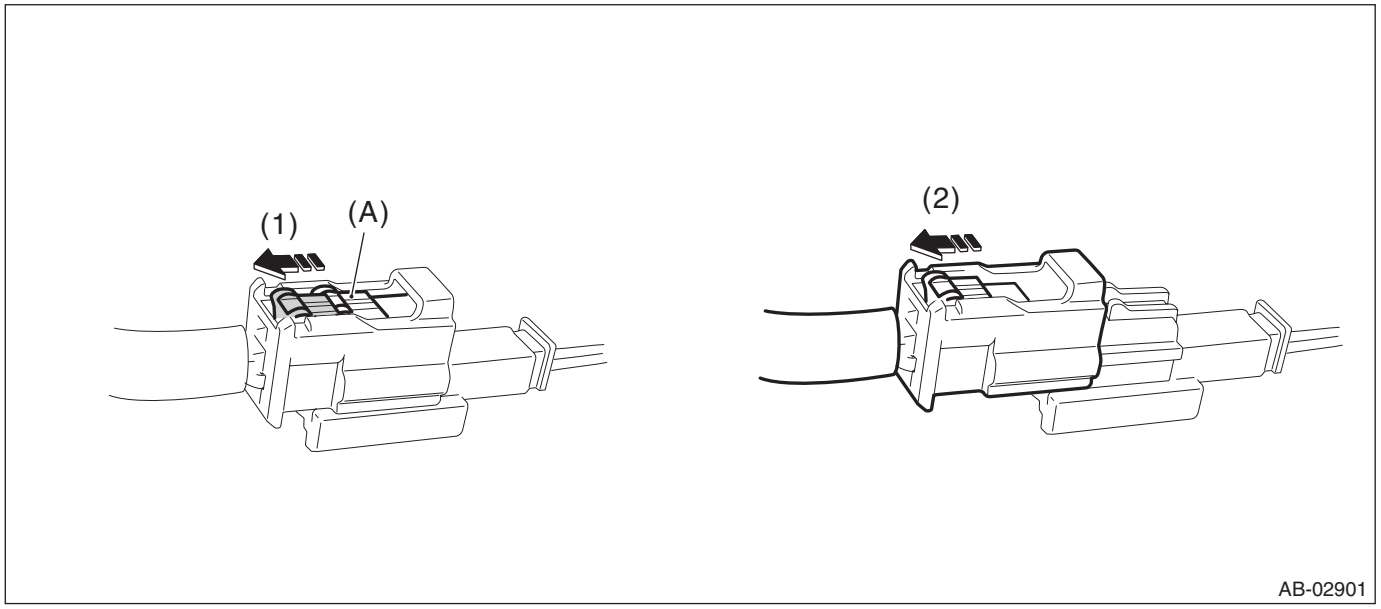


## 8. FRONT DOOR IMPACT SENSOR (BETWEEN AIRBAG REAR HARNESS AND DOOR HARNESS)

1) How to disconnect:

**CAUTION:**
**When pulling the slide lock or disconnecting connector, be sure to hold the connector, not the harness.**

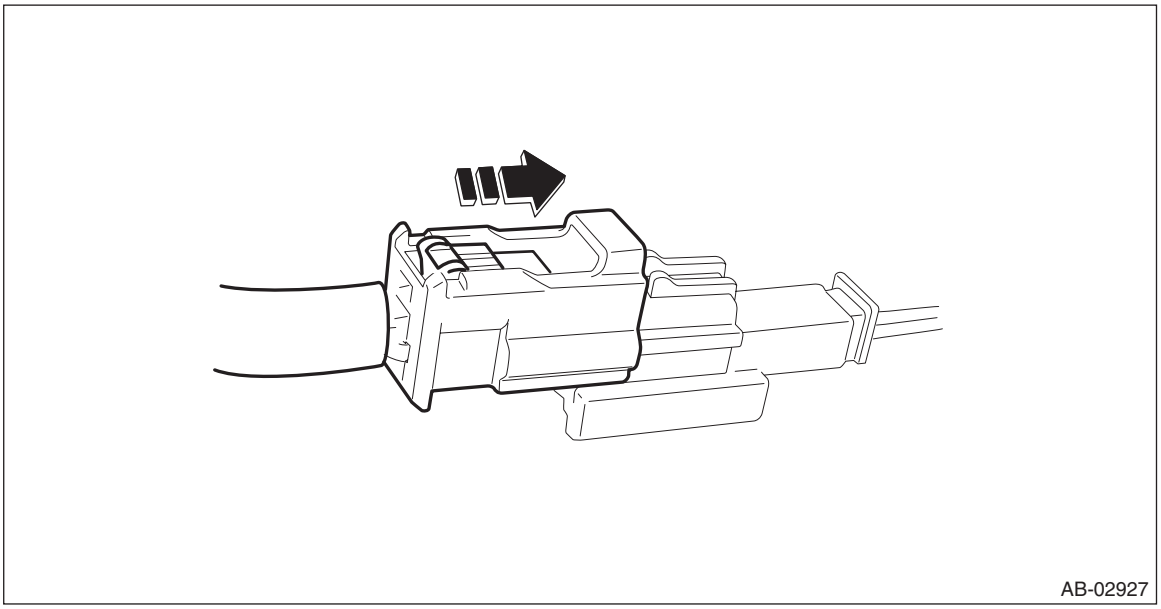
(1) Pull the slide lock (A) in the direction of arrow.
(2) With the slide lock pulled, disconnect the connector.



2) How to connect:

**CAUTION:**
- **Outer side (A) moves back, and so do not touch the outer part.**
- **Be sure to insert the connector in until it is locked. Then pull it gently to make sure that it is locked.**

Holding the connector, push it in securely until a clicking sound is heard.

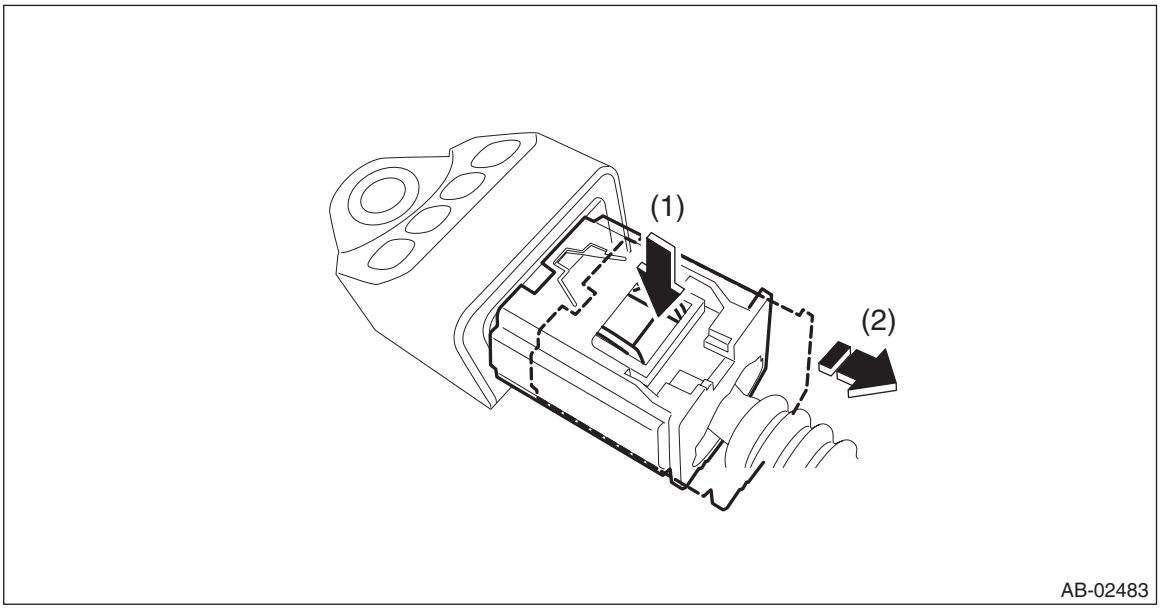


## 9. SIDE AIRBAG SENSOR AND CURTAIN AIRBAG SENSOR

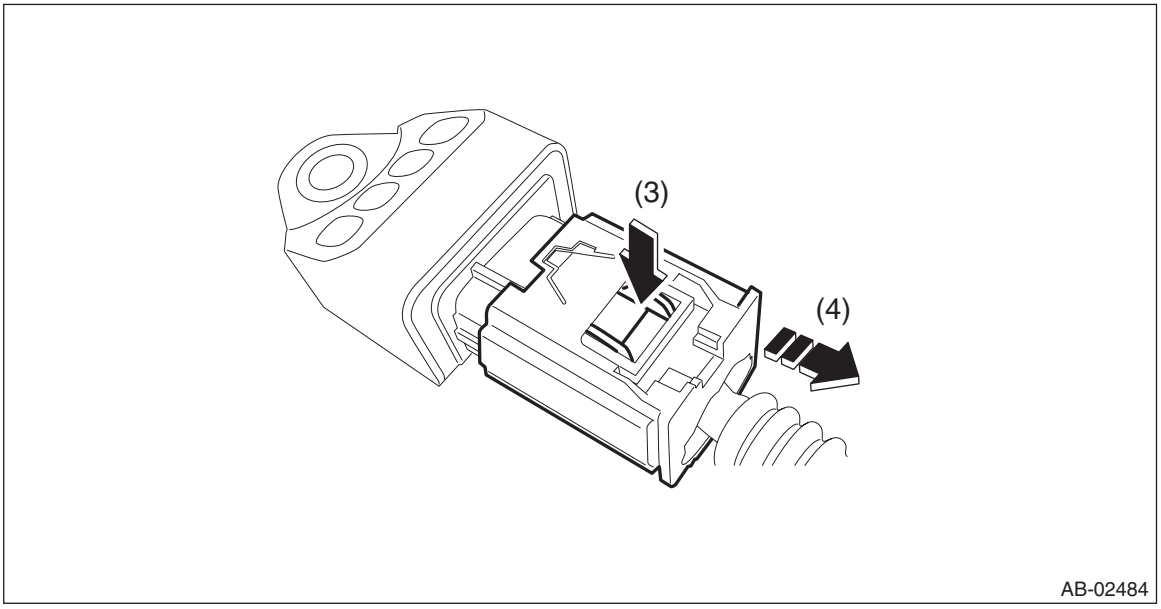
1) How to disconnect:

**CAUTION:**
**When pulling the slide lock or disconnecting connector, be sure to hold the connector, not the harness.**

(1) Push the lock arm.
(2) Holding outer part, pull it one step in the direction of arrow.

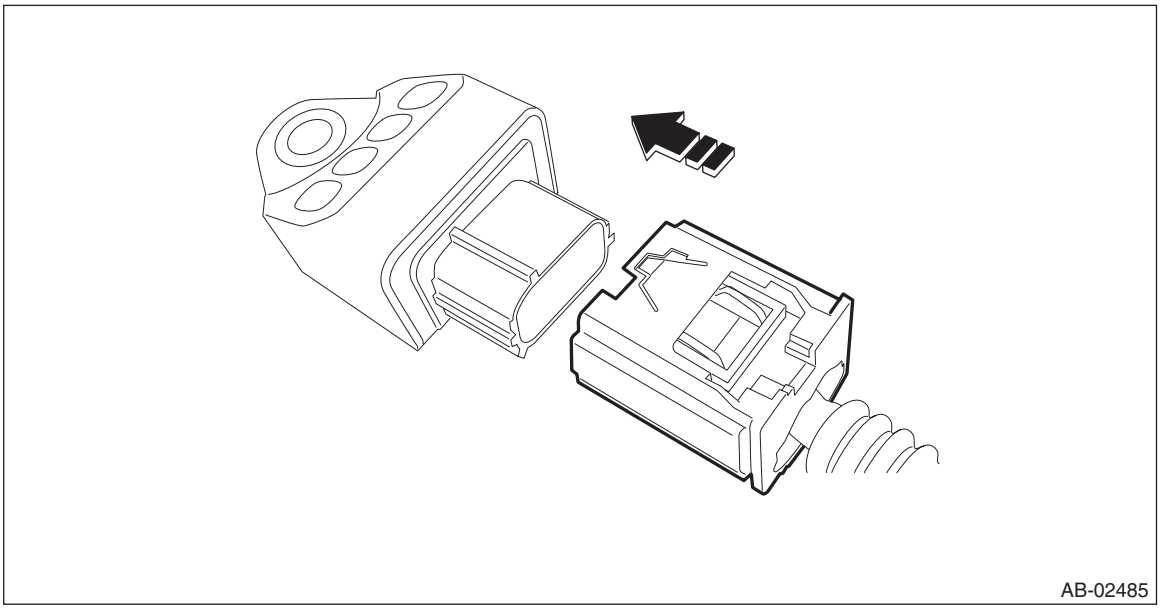


(3) Push the lock arm again.
(4) Holding outer part, pull it in the direction of arrow to disconnect the connector.



2) How to connect:

**CAUTION:**
**Be sure to insert the connector in until it is locked. Then pull it gently to make sure that it is locked.**
Holding the connector, push it in securely until a clicking sound is heard.

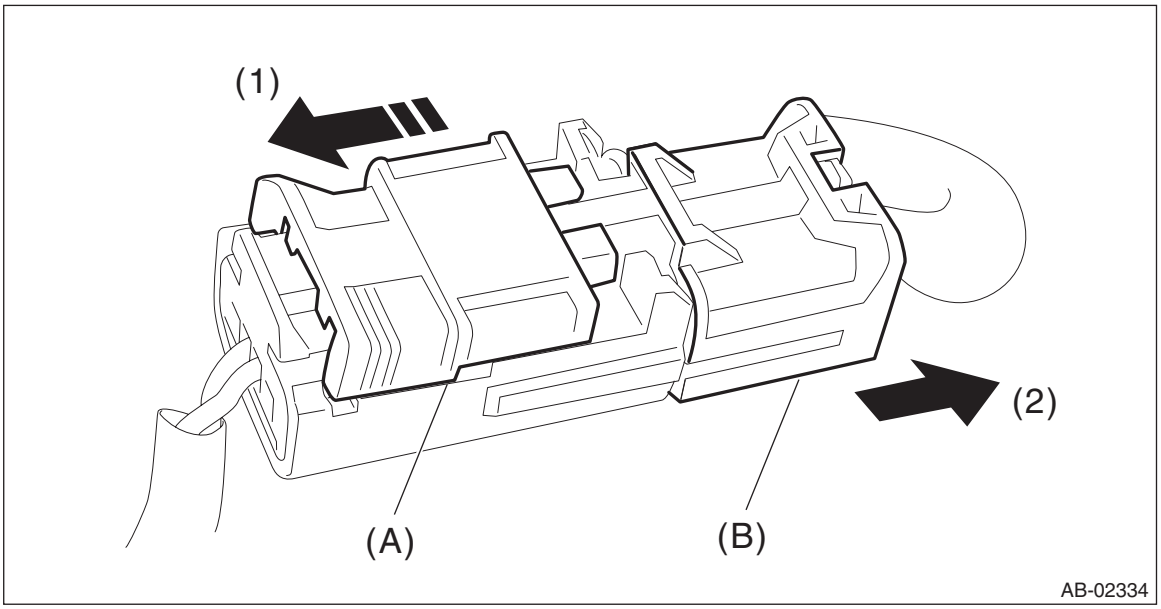


## 10.SIDE AIRBAG MODULE

1) How to disconnect:

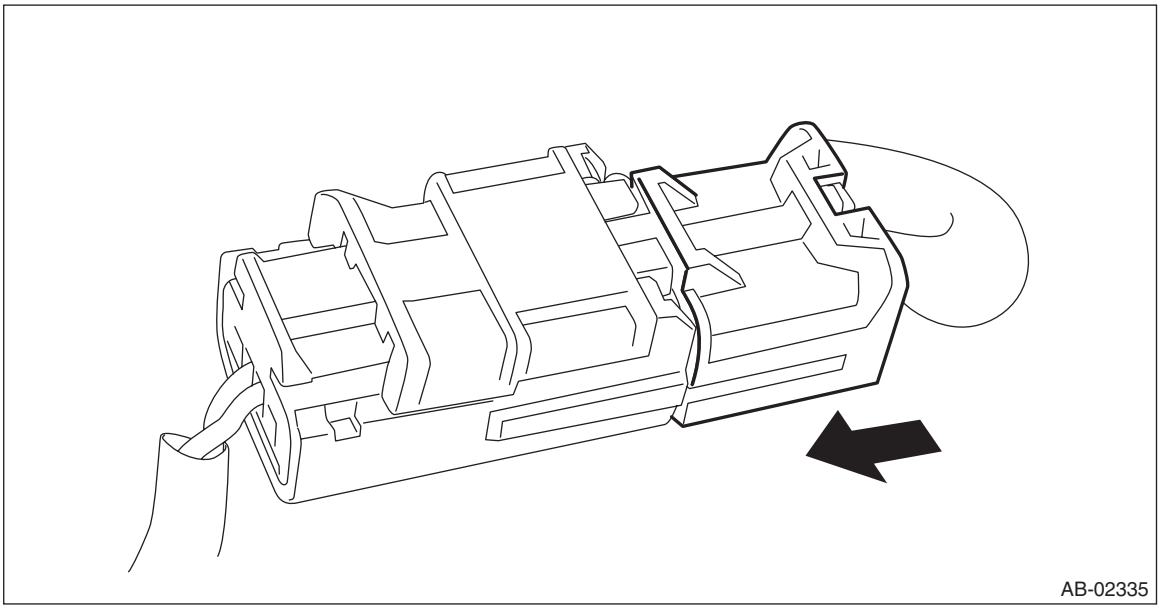
**CAUTION:**
**When pulling the slide lock or disconnecting connector, be sure to hold the connector, not the harness.**

(1) Move the slide lock (A) in the direction of arrow and hold it.
(2) While holding the slide lock (A) in place, pull the connector (B) to the direction of arrow.



2) How to connect:

**CAUTION:**
**Be sure to insert the connector in until it is locked. Then pull it gently to make sure that it is locked.**
Holding the connector, push it in securely until a clicking sound is heard.

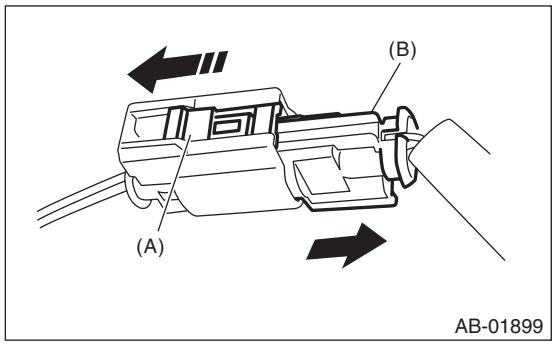


## 11.BUCKLE SWITCH RH

1) How to disconnect:

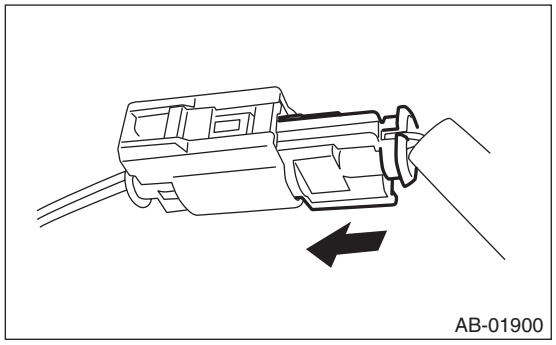
**CAUTION:**
**When pulling the slide lock or disconnecting connector, be sure to hold the connector, not the harness.**

(1) Move the slide lock (A) in the direction of arrow and hold it.
(2) While holding the slide lock (A), pull the connector (B) in the direction of arrow.



2) How to connect:

**CAUTION:**
**Be sure to insert the connector in until it is locked. Then pull it gently to make sure that it is locked.**
Holding the connector, push it in securely until a clicking sound is heard.

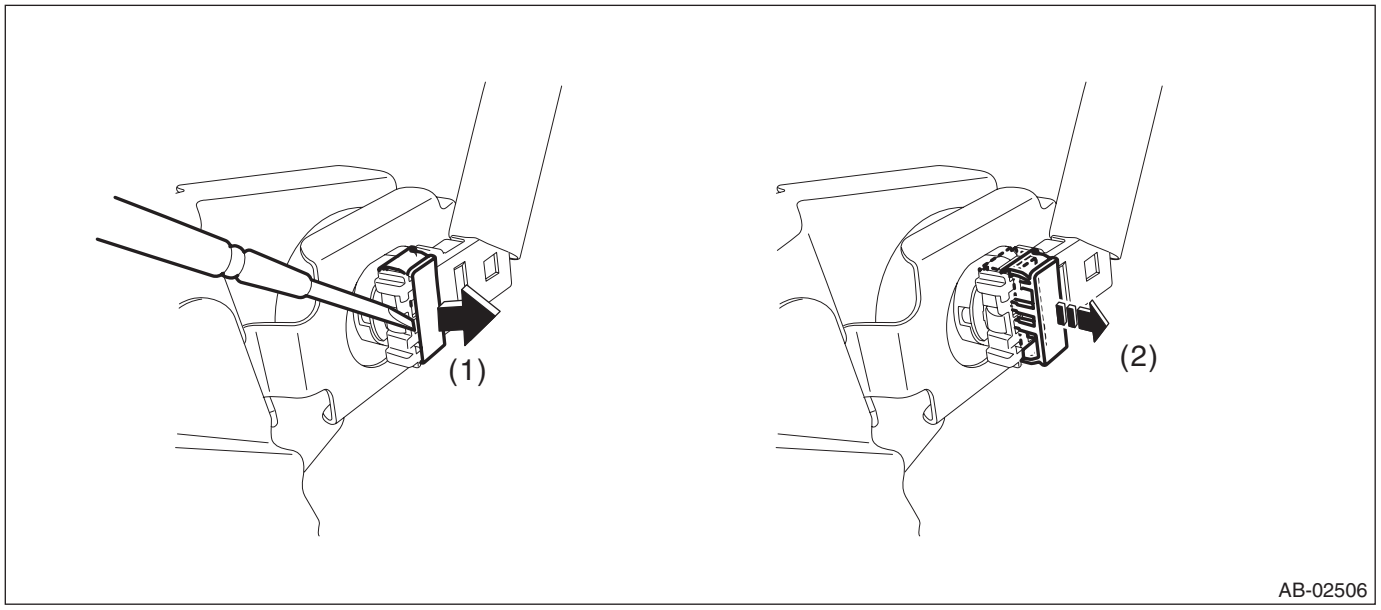


## 12.OCCUPANT DETECTION SYSTEM (BETWEEN AIRBAG REAR HARNESS AND SEAT HARNESS)

Refer to “OCCUPANT DETECTION SYSTEM” section. <Ref. to OD(diag)-9, OCCUPANT DETECTION SYSTEM (BETWEEN AIRBAG REAR HARNESS AND SEAT HARNESS), PROCEDURE, Airbag Connector.>

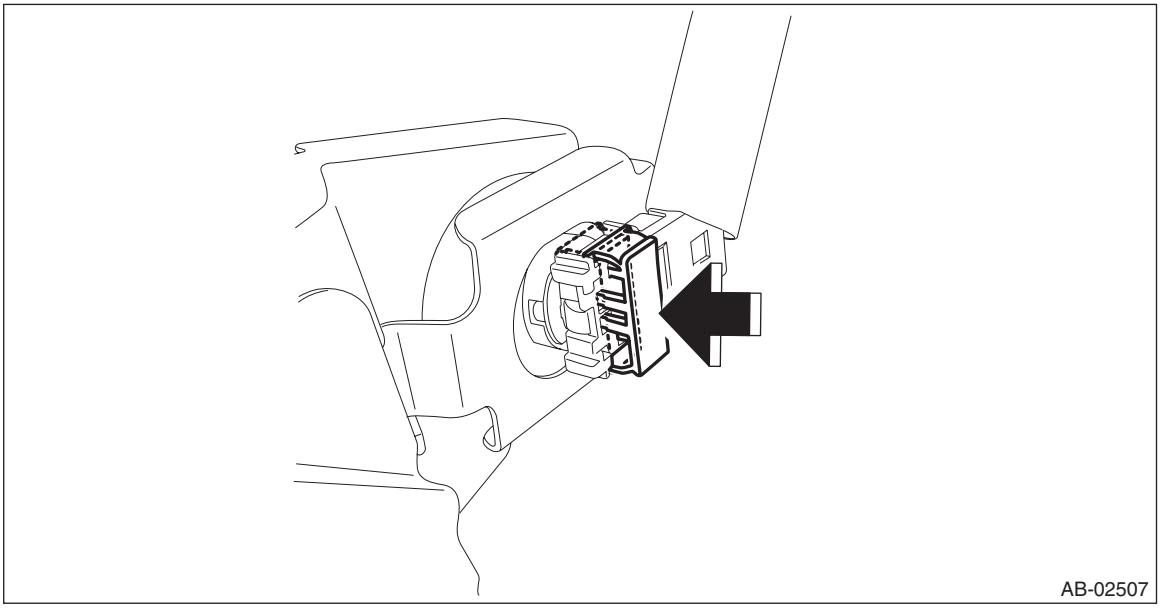
## 13.KNEE AIRBAG MODULE

1) How to disconnect:
   (1) Using a flat tip screwdriver, pry the push lock upward to unlock.
   (2) Pull the connector to disconnect from the airbag module assembly.



2) How to connect:

**CAUTION:**
- **Be sure to insert the connector in until it is locked.**
- **Press in the push lock securely. Then pull it gently to make sure that it is locked.**



Connect the connector in the reverse order of disconnecting. At this time, be sure to insert until a clicking sound is heard.

# 3. Inspection Locations after a Collision

## A: REPLACEMENT

Replace the following parts if the airbag system has been activated.

### 1. FRONT COLLISION

1) Driver's airbag module
2) Knee airbag module
3) Passenger's airbag module
4) Driver's seat belt (pretensioner)
5) Passenger's seat belt (pretensioner)
6) Lap seat belt pretensioner (XV model - passenger's side only)
7) Airbag control module
8) Front sub sensor (right and left)
9) Roll connector
10) Passenger's side seat cushion pad and frame assembly
11) Instrument panel (for integrating with passenger's airbag module)

### 2. SIDE COLLISION

1) Airbag control module
2) Satellite safing sensor
3) Cover - satellite safing
4) Side airbag module (operating side)
5) Side airbag sensor (operating side)
6) Front door impact sensor (operating side)
7) Curtain airbag module (operating side)
8) Curtain airbag sensor (operating side)
9) Pad assembly - front seat backrest (operating side)
10) Cover COMPL - front backrest (operating side)
11) Trim panel - roof assembly
12) Trim panel for each pillar (operating side)

### 3. ROLL OVER

1) Airbag control module
2) Curtain airbag module (both sides)
3) Driver's seat belt (pretensioner)
4) Passenger's seat belt (pretensioner)
5) Lap seat belt pretensioner (XV model - passenger's side only)

### 4. INSPECTION OF OTHER PARTS

Check for the following parts, and replace the damaged parts with new parts.
1) Steering wheel and column assembly - steering
Check the column assembly - steering for mounting conditions and deflection of front and rear, upward and downward directions, and deflection of front and rear direction with tilt lever released. (After a collision, absorbing part of the column assembly - steering may have been operated.)
2) Check the direct type connector of driver's airbag module, knee airbag module, curtain airbag module, and pretensioner for damage, and also check each harness for pinching and connector damage. Replace the main harness as an assembly if damage is found.
3) Check the seat cushion, backrest, slide rail and headrest for installation condition and looseness.
4) If any break or fray is found in the cover COMPL - front backrest of the driver's seat or passenger's seat, the side airbag system may not operate normally. In this case, replace the cover COMPL - front backrest with a new part.
5) For the passenger's seat, replace the frame assembly - front cushion with a new part if the frame assembly - front cushion is deformed or cracked.

6) If there are tears or loosening in the seat cover - front cushion on the passenger's side, it may interfere with the proper operation of the occupant detection system. Replace the cover - front cushion with a new part.
7) When the passenger seat cushion cover has been removed or replaced, make sure that the occupant detection system operates normally.
8) Use the Subaru Select Monitor to check whether the passenger's seat belt buckle switch is operating normally.

## B: INSPECTION

If the vehicle is involved in a collision, even if it is a slight collision, be sure to check the following systems.

### 1. DRIVER'S AIRBAG MODULE ASSEMBLY

1) Frontal collision (driver's airbag module assembly activated)
1. Replace the following parts with new ones.
   - Airbag control module
   - Driver's airbag module
   - Knee airbag module
   - Passenger's airbag module
   - Seat belt pretensioner (right and left)
   - Lap seat belt pretensioner (XV model - passenger's side only)
   - Front sub sensor (right and left)
   - Column ASSY - steering
2. Visually inspect the following items and replace any damaged part with a new one.
   - Steering wheel
   - Beam COMPL - steering
   - Instrument panel harness and connector on body side

2) Frontal collision (driver's airbag module not activated)
Visually inspect the following items and replace any damaged or cracked part with a new one.
Specially inspect the damage of airbag module body, mounting bracket and harness connector.
- Driver's airbag module
- Knee airbag module
- Passenger's airbag module
- Seat belt pretensioner (right and left)
- Lap seat belt pretensioner (XV model - passenger's side only)
- Front sub sensor (right and left)
- Instrument panel assembly (because it is integrated with passenger's airbag module)

3) No frontal collision
Visually inspect the airbag modules for damage or contamination and replace any faulty part with a new one.

### 2. KNEE AIRBAG MODULE

1) Frontal collision (knee airbag module activated)
1. Replace the following parts with new ones.
   - Airbag control module
   - Driver's airbag module
   - Knee airbag module
   - Passenger's airbag module
   - Seat belt pretensioner (right and left)
   - Lap seat belt pretensioner (XV model - passenger's side only)
   - Front sub sensor (right and left)
   - Column ASSY - steering
2. Visually inspect the following items and replace any damaged part with a new one.
   - Steering wheel
   - Beam COMPL - steering
   - Instrument panel harness and connector on body side

2) Frontal collision (knee airbag module not activated)
Visually inspect the following items and replace any damaged or cracked part with a new one.
Specially inspect the damage of airbag module body, mounting bracket and harness connector.
- Driver's airbag module
- Knee airbag module
- Passenger's airbag module
- Seat belt pretensioner (right and left)
- Lap seat belt pretensioner (XV model - passenger's side only)
- Front sub sensor (right and left)
- Instrument panel assembly (because it is integrated with passenger's airbag module)

3) No frontal collision
Visually inspect the airbag modules for damage or contamination and replace any faulty part with a new one.

### 3. PASSENGER'S AIRBAG MODULE

1) Frontal collision (passenger's airbag module activated)
1. Replace the following parts with new ones.
   - Airbag control module
   - Driver's airbag module
   - Knee airbag module
   - Passenger's airbag module
   - Seat belt pretensioner (right and left)
   - Lap seat belt pretensioner (XV model - passenger's side only)
   - Front sub sensor (right and left)
   - Instrument panel assembly (because it is integrated with passenger's airbag module)
2. Visually inspect the following items and replace any damaged part with a new one.
   - Beam COMPL - steering
   - Instrument panel harness and connector on body side

2) Frontal collision (passenger's airbag module not activated)
Visually inspect the following items and replace any damaged or cracked part with a new one.
Specially inspect the damage of airbag module body, mounting bracket and harness connector.
- Driver's airbag module
- Knee airbag module
- Passenger's airbag module
- Seat belt pretensioner (right and left)
- Lap seat belt pretensioner (XV model - passenger's side only)
- Front sub sensor (right and left)
- Instrument panel assembly (because it is integrated with passenger's airbag module)

3) No frontal collision
Visually inspect the airbag modules for damage or contamination and replace any faulty part with a new one.

### 4. SIDE AIRBAG MODULE

1) Side impact (side airbag module activated)
1. Replace the following parts with new ones.
   - Airbag control module
   - Satellite safing sensor
   - Cover - satellite safing
   - Front Door Impact Sensor
   - Side airbag module
   - Side airbag sensor
   - Curtain airbag module
   - Curtain airbag sensor
   - Pad assembly - front seat backrest

- Frame assembly - front backrest
- Cover COMPL - front backrest
- Trim panel - roof assembly
- Trim panel for each pillar

2. Visually inspect the following items and replace any damaged part with a new one.
   - Headrest assembly
   - Bushing - lock headrest
   - Slide rail assembly - OUT
   - Slide rail assembly - INN
   - Cover - hinge front seat
   - Knob - lifter
   - Lever - reclining
   - Side airbag harness and connector on body side

2) Side impact (side airbag module not activated)
Visually inspect the following items and replace any damaged or cracked part with a new one.
Specially inspect the damage of airbag module body, mounting bracket and harness connector.

- Pad assembly - front seat backrest
- Frame assembly - front backrest
- Cover COMPL - front backrest
- Sensor assembly - satellite safing
- Cover - satellite safing
- Front Door Impact Sensor
- Side airbag module
- Side airbag sensor
- Curtain airbag module
- Curtain airbag sensor

3) No side impact
Visually inspect the airbag modules for contamination and replace any faulty part with a new one.

### 5. CURTAIN AIRBAG MODULE

1) Side impact or roll over (curtain airbag module activated)
1. Replace the following parts with new ones.
   - Airbag control module
   - Satellite safing sensor
   - Cover - satellite safing
   - Curtain airbag module
   - Seat belt pretensioner (operating side)
   - Front door impact sensor
   - Side airbag sensor
   - Curtain airbag sensor
   - Pad assembly - front seat backrest (operating side)
   - Frame assembly - front backrest (operating side)
   - Cover COMPL - front backrest (operating side)
   - Trim panel - roof ASSY
   - Trim panel for each pillar
   - Airbag bracket (model with sunroof)
2. Visually inspect the following items and replace any damaged part with a new one.
   - Assist rail - front and rear
   - Bracket - assist rail front and rear
   - Curtain airbag harness and connector on body side.

2) Side impact (curtain airbag module not activated)
Visually inspect the following items and replace any damaged or cracked part with a new one.
Specially inspect the damage of airbag module body, mounting bracket and harness connector.
- Trim panel - roof ASSY
- Trim panel for each pillar
- Curtain airbag module
- Satellite safing sensor
- Cover - satellite safing
- Front door impact sensor
- Side airbag sensor
- Curtain airbag sensor

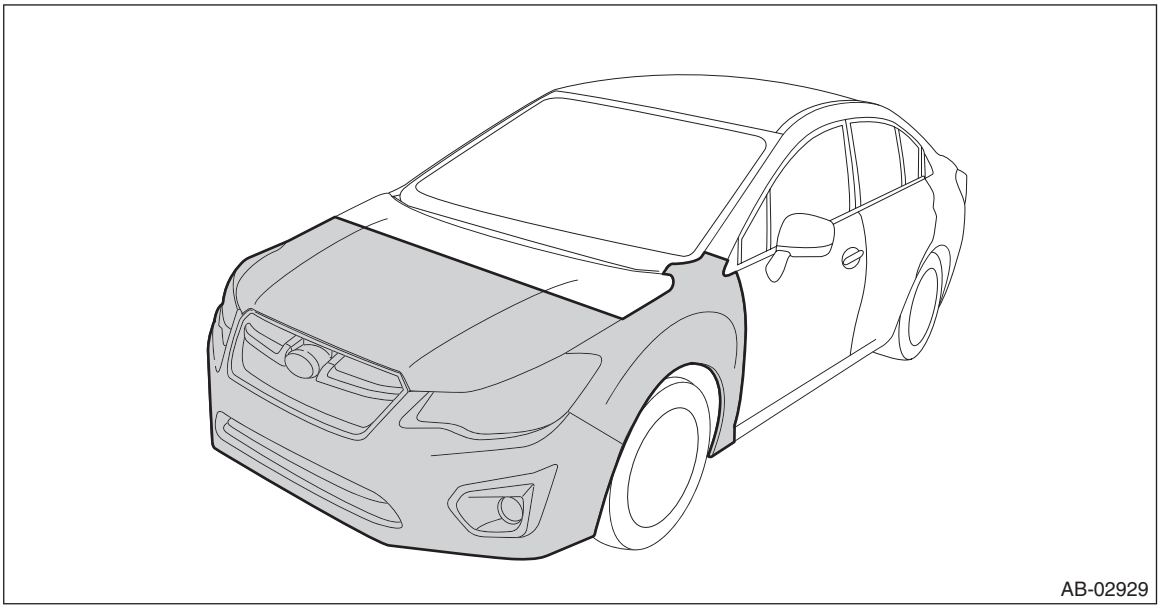
3) No side impact or roll over
Visually inspect the airbag covers for damage or contamination and replace any faulty part with a new one.

## 6. AIRBAG CONTROL MODULE

Check for the following, and replace the damaged parts with new parts.
- Control module is cracked or deformed.
- Mounting bracket is cracked or deformed.
- Connector is scratched, cracked or deformed.
- Driver's airbag module has been activated.
- Knee airbag module has been activated.
- Passenger's airbag module has been activated.
- Side airbag module has been activated.
- Curtain airbag module has been activated.
- Seat belt pretensioner has been activated.
- Lap seat belt pretensioner has been activated.

## 7. FRONT SUB SENSOR

If the section of vehicle as shown in the figure is damaged, check the following items and replace the damaged parts with new parts.

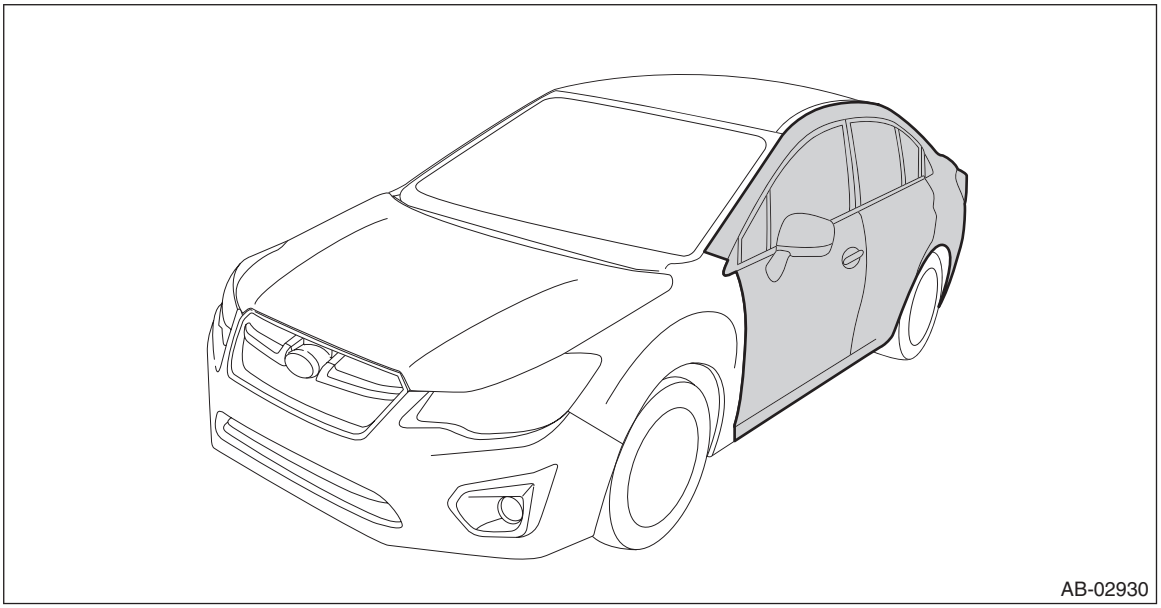


AB-02929

- Front sub sensor is cracked or deformed.
- Connector is scratched, cracked or deformed.
- Driver's airbag module, knee airbag module or passenger's airbag module has been activated.

## 8. FRONT DOOR IMPACT SENSOR, SATELLITE SAFING SENSOR, SIDE AIRBAG SENSOR AND CURTAIN AIRBAG SENSOR

If the section of vehicle as shown in the figure is damaged, check the following items and replace the damaged parts with new parts.



- Front door impact sensor, satellite safing sensor, side airbag sensor and curtain airbag sensor are cracked or deformed.
- Mounting bracket is cracked or deformed.
- Connector is scratched, cracked or deformed.
- Side airbag module or curtain airbag module has been activated. (operating side)

## 9. ROLL CONNECTOR

Check the following items and replace any damaged, cracked, or deformed parts with new parts.

- Combination switch
- Steering roll connector

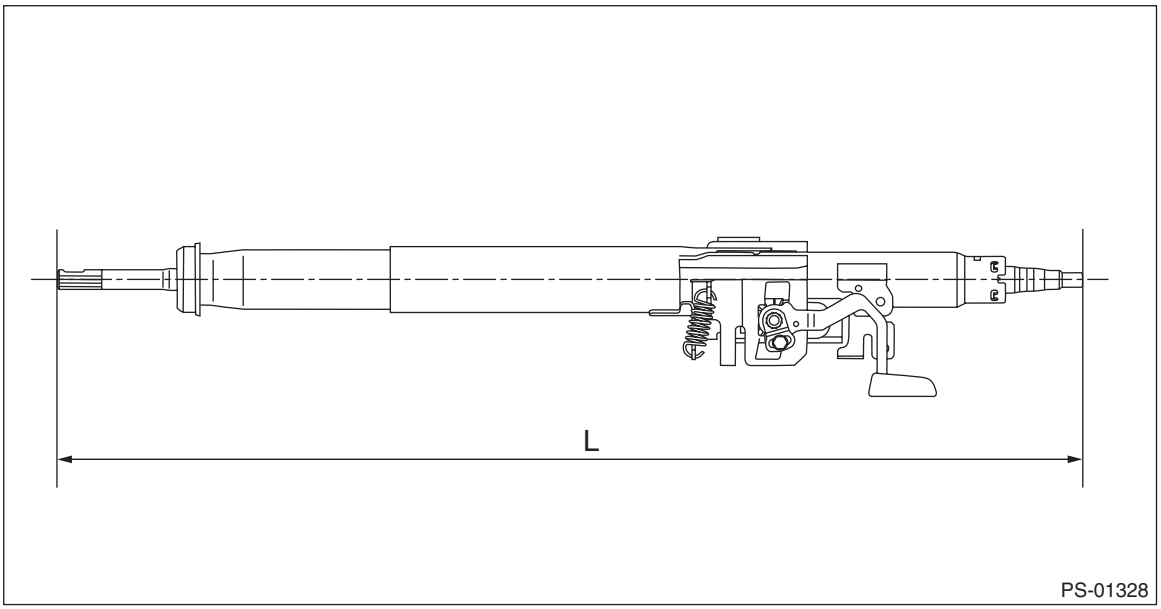
## 10.COLUMN ASSEMBLY - STEERING & STEERING WHEEL

Check the following items, and if there is anything out of standard, it is considered to be damaged. If so, replace it with a new part.

- Measure the whole length of the column assembly - steering.

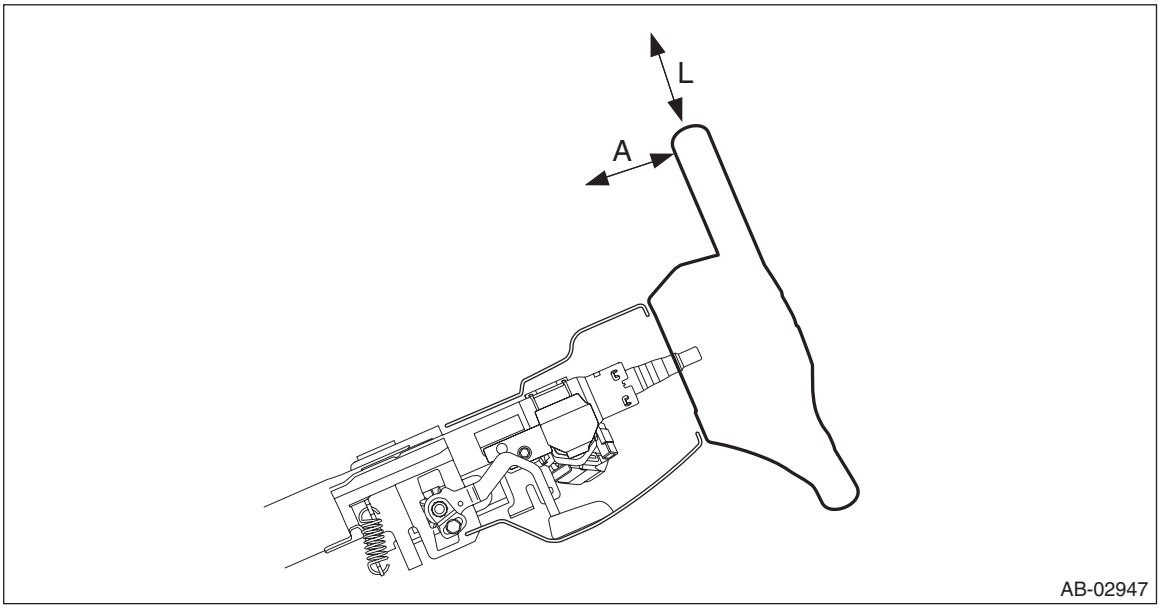
***Standard: Overall length L***

***Tilt and telescopic column (measure while minimized)***
***$819.7^{+1.5}_{-1.5}$ mm ($32.27^{+0.059}_{-0.059}$ in)***



- Check the steering wheel deflection in axial and vertical directions.

***Specification:***
***Axial deflection A (deflection of steering wheel)***
***Less than 6 mm (0.24 in)***
***Vertical deflection L (runout of steering wheel)***
***Less than 17 mm (0.68 in)***



## 11.PASSENGER'S SEAT

Check for the following, and replace the damaged parts with new parts.

- Body or bracket of the seat belt inner - front is scratched, cracked or deformed.
- Frame assembly - front backrest is cracked or deformed.
- Headrest assembly for deformation or play
- If the cover - front cushion and the cover COMPL - front backrest is damaged or frayed, replace the cover with a new part.

**CAUTION:**

**If any of the following applies, replace the pad assembly - front seat cushion & frame assembly - front cushion as a unit. Do not disassemble.**

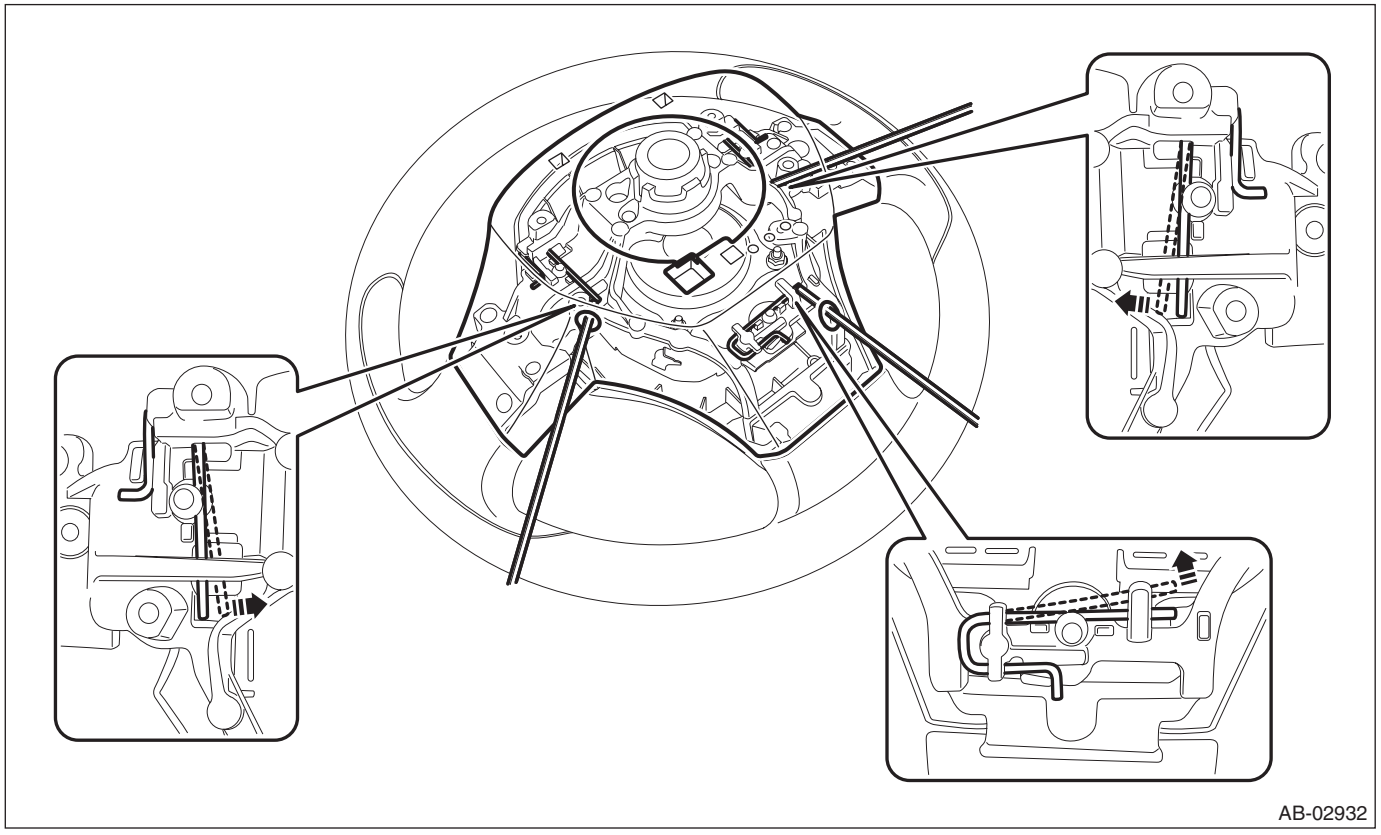
- **The frame assembly - front cushion or the pad assembly - front seat cushion is cracked or deformed.**
- **Scratches, cracks, or deformation found on the occupant detection system sensor mat or occupant detection control module, or attachment brackets of the control module.**
- **Harness and/or connector is cracked, deformed or open. Harness wire is exposed.**

# 4. Driver's Airbag Module

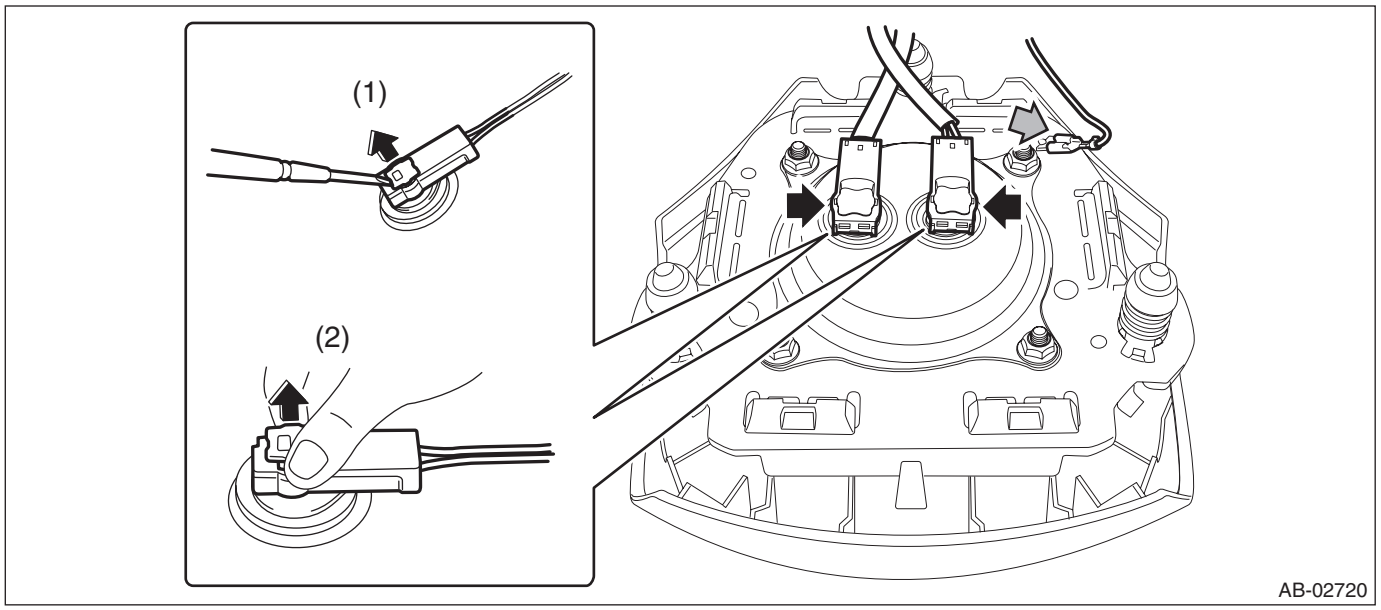
## A: REMOVAL

**CAUTION:**
**Refer to "CAUTION" of "General Description" before handling the airbag module. <Ref. to AB-11, CAUTION, General Description.>**

1) Position the front wheels straight ahead. (After moving a vehicle 5 m (16 ft) or more with front wheels positioned straight ahead, make sure that the vehicle moves straight ahead.)
2) Turn the ignition switch to OFF.
3) Disconnect the ground cable from battery and wait for at least 60 seconds before starting work.
4) Remove the driver's airbag module.
   (1) Using a hexagon wrench wrapped with protective tape, push in the snap pins to disengage the locks (3 places).



(2) Disconnect the horn harness and airbag connector, and remove the driver's airbag module. <Ref. to AB-24, DRIVER'S AIRBAG MODULE, CURTAIN AIRBAG MODULE & PRETENSIONER, PROCEDURE, Airbag Connector.>



## B: INSTALLATION

**CAUTION:**
**• Refer to "CAUTION" of "General Description" before handling the airbag module. <Ref. to AB-11, CAUTION, General Description.>**
**• Do not allow harness and connectors to interfere or get tangled up with other parts.**

1) Before installation, inspect the following items and replace any faulty part with a new one.
- Airbag module is cracked or deformed.
- Harness and/or connector is cracked, deformed or open.
- Harness wire is exposed.
- The steering wheel is in the way, making it difficult to install the airbag module.
- The clearance between the driver's airbag module and steering wheel is not constant.

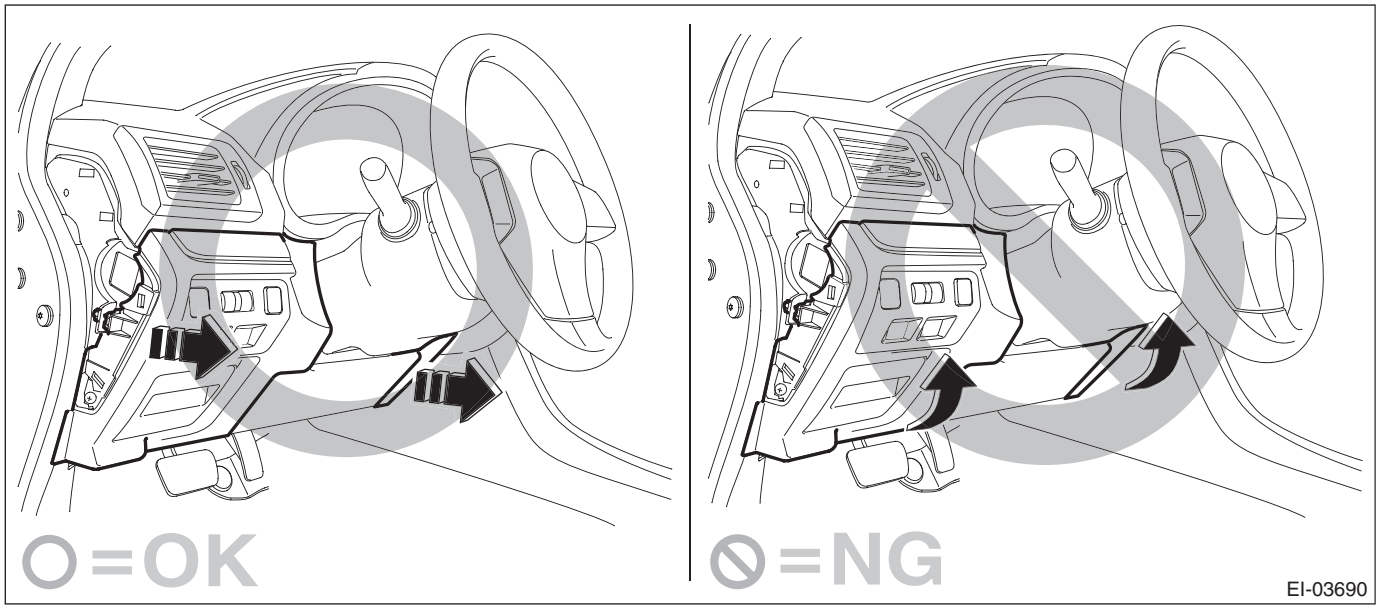
2) Install each part in the reverse order of removal.

# 5. Knee Airbag Module

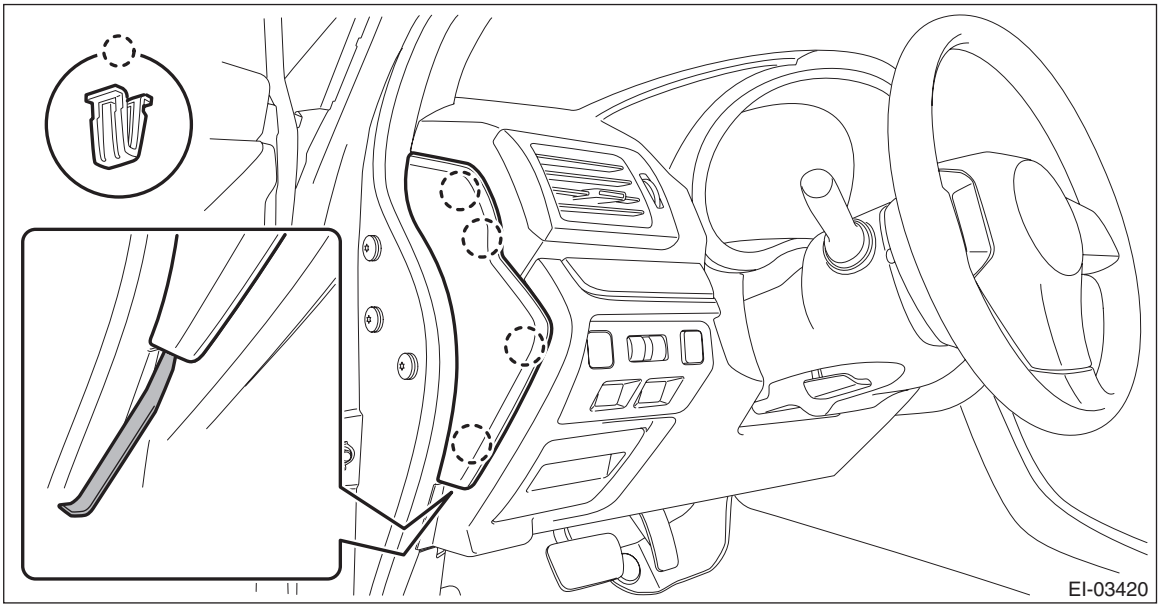
## A: REMOVAL

1) Turn the ignition switch to OFF.
2) Disconnect the ground cable from battery and wait for at least 60 seconds before starting work.
3) Remove the cover assembly - instrument panel LWR driver.

**CAUTION:**
**When removing the cover assembly - instrument panel LWR driver, be sure to pull it toward you. If attempting to remove by turning it upward, the claws may be damaged.**



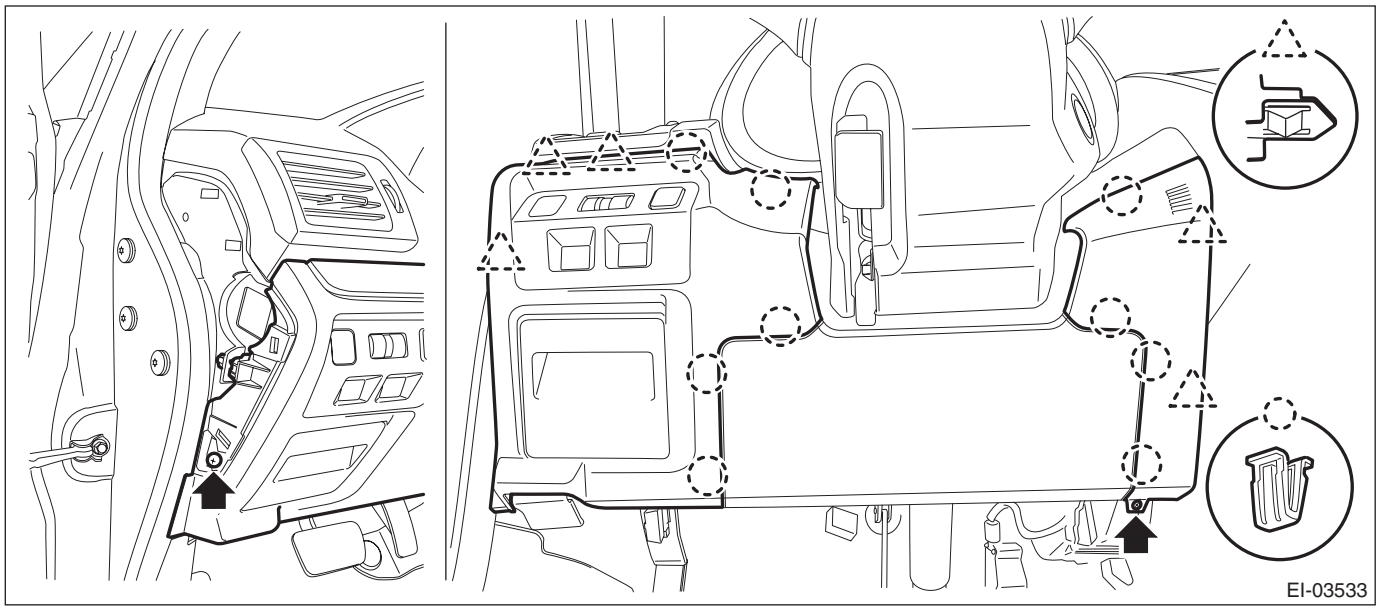
(1) Remove the clips, and remove the cover - instrument panel side LH.



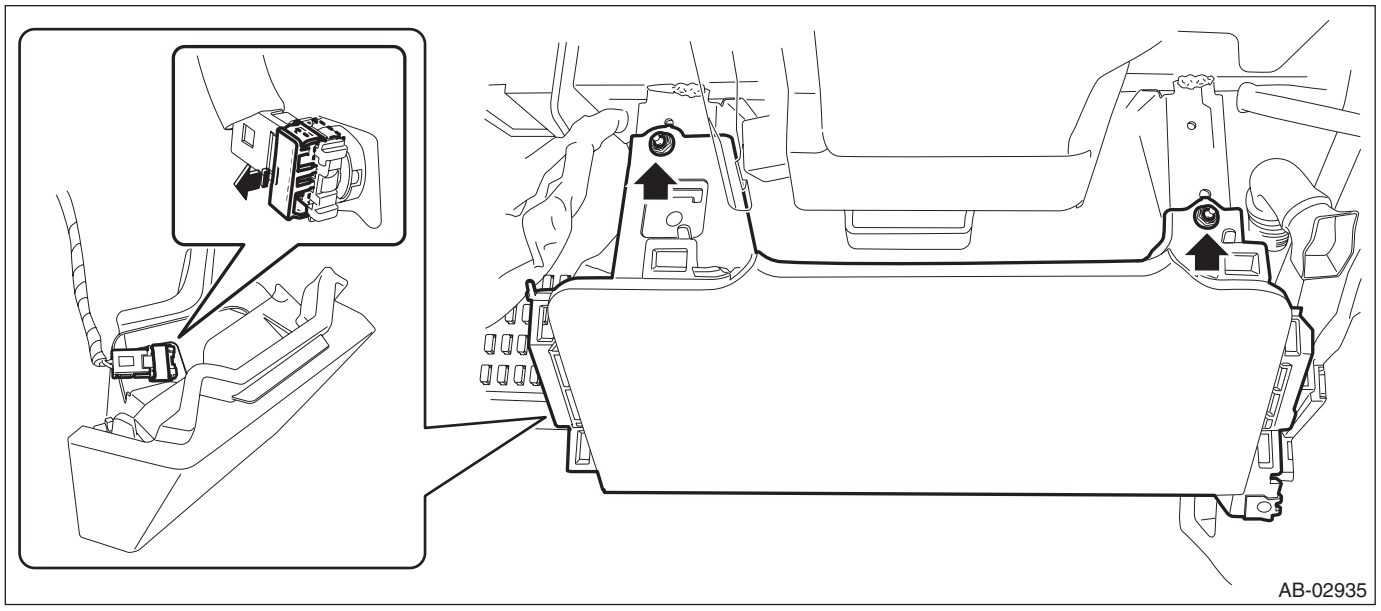
NOTE:
Using a plastic remover, open the cover - instrument panel side LH.

(2) Remove the screws and release the clips and claws.

(3) Disconnect the harness connectors, and remove the cover assembly - instrument panel LWR driver INN and the cover assembly - instrument panel LWR driver OUT.



4) Remove the nuts to remove the knee airbag module and disconnect the harness connector. <Ref. to AB-33, KNEE AIRBAG MODULE, PROCEDURE, Airbag Connector.>



## B: INSTALLATION

**CAUTION:**
**• Refer to "CAUTION" of "General Description" before handling the airbag module. <Ref. to AB-11, CAUTION, General Description.>**
**• Do not allow harness and connectors to interfere or get tangled up with other parts.**
1) Before installation, inspect the following items and replace any faulty part with a new one.
• Airbag module is cracked or deformed.
• Knee airbag module bracket is cracked or deformed.
• Harness and/or connector is cracked, deformed or open.
• Harness wire is exposed.
• Depending on the condition of the beam COMPL - steering, installation of the knee airbag module is difficult.
2) Install each part in the reverse order of removal.

***Tightening torque:***
***Knee airbag module: 7.5 N·m (0.76 kgf-m, 5.5 ft-lb)***

# 6. Passenger's Airbag Module

## A: REMOVAL

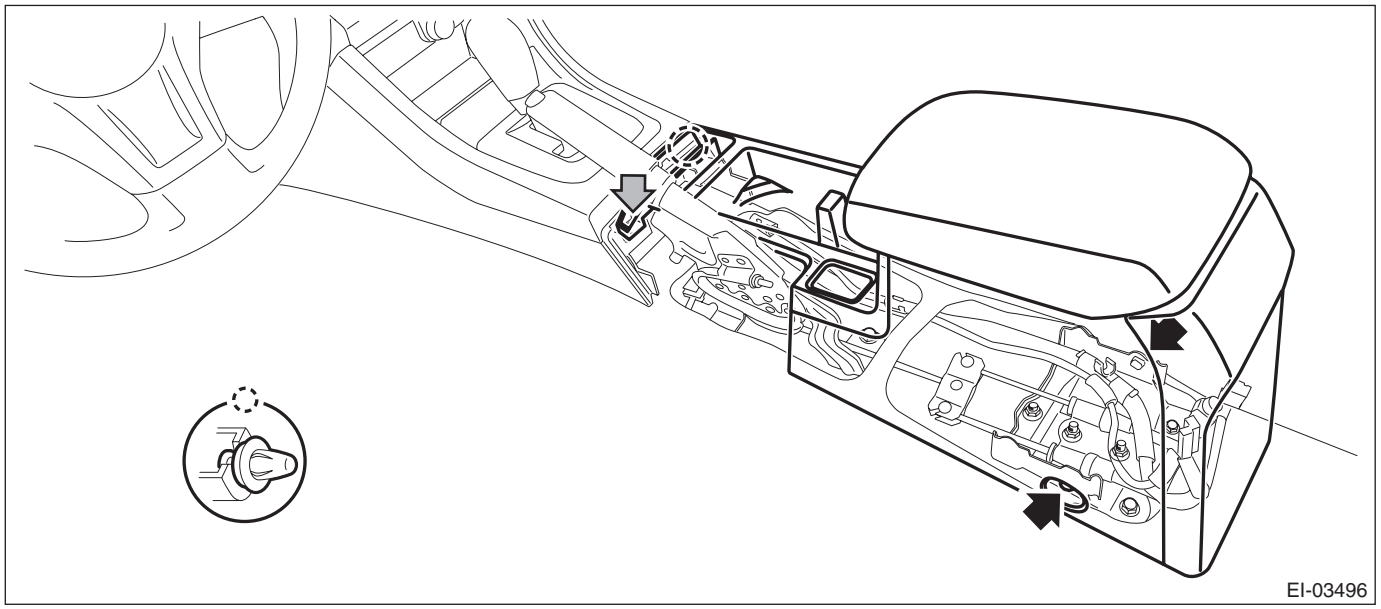
**CAUTION:**
**Refer to "CAUTION" of "General Description" before handling the airbag module. <Ref. to AB-11, CAUTION, General Description.>**

1) Turn the ignition switch to OFF.
2) Disconnect the ground cable from battery and wait for at least 60 seconds before starting work.

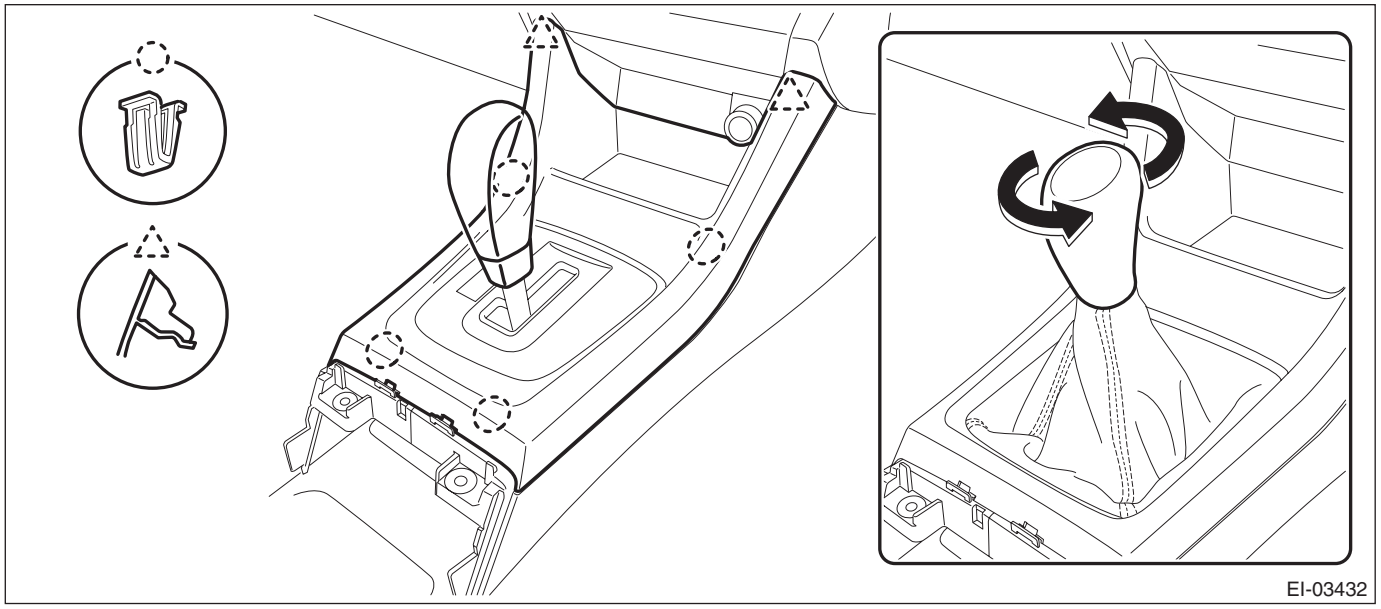
NOTE:
On CVT models, shift the select lever into "D" before disconnecting the battery ground cable.

3) Remove the console box assembly.
   (1) Release the claws, and then remove the boot - hand brake.

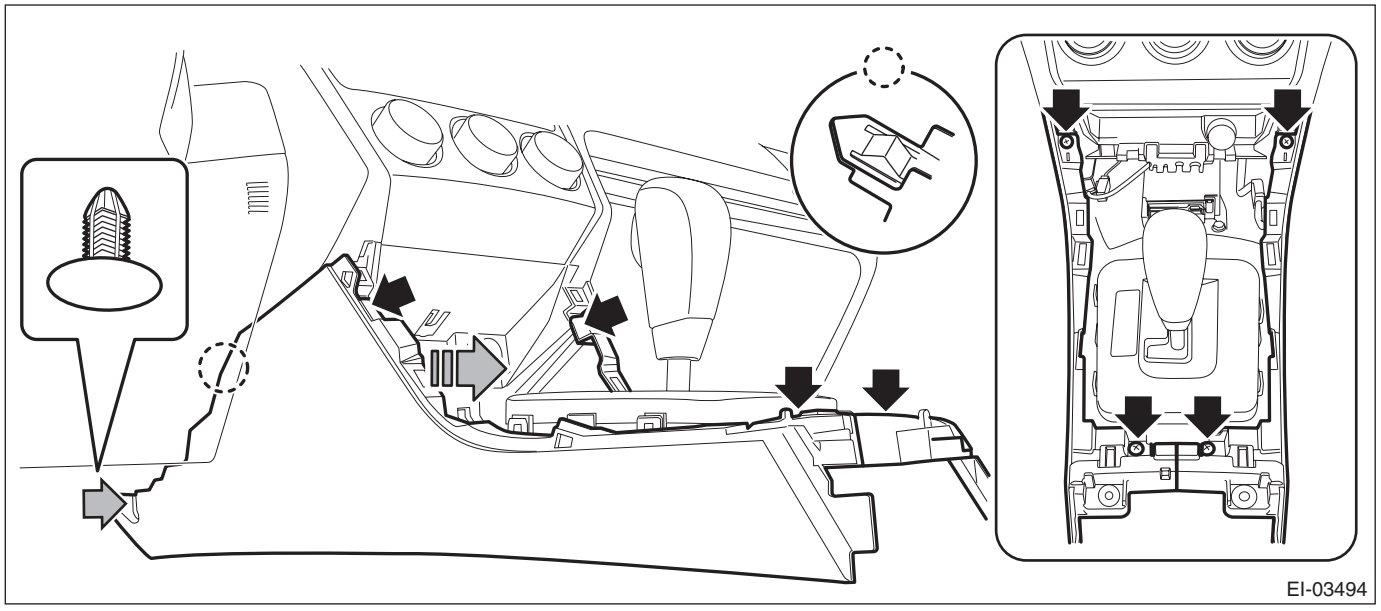
   (2) Move the seat forward, and remove the bolts after detaching the left and right caps.
   (3) Remove the screws, disconnect the harness connector and remove the console box assembly.



4) Remove the cover - shift lever.
   (1) Remove the shift knob. (MT model)
   (2) Release the clips and claws, then pull up the cover - shift lever.

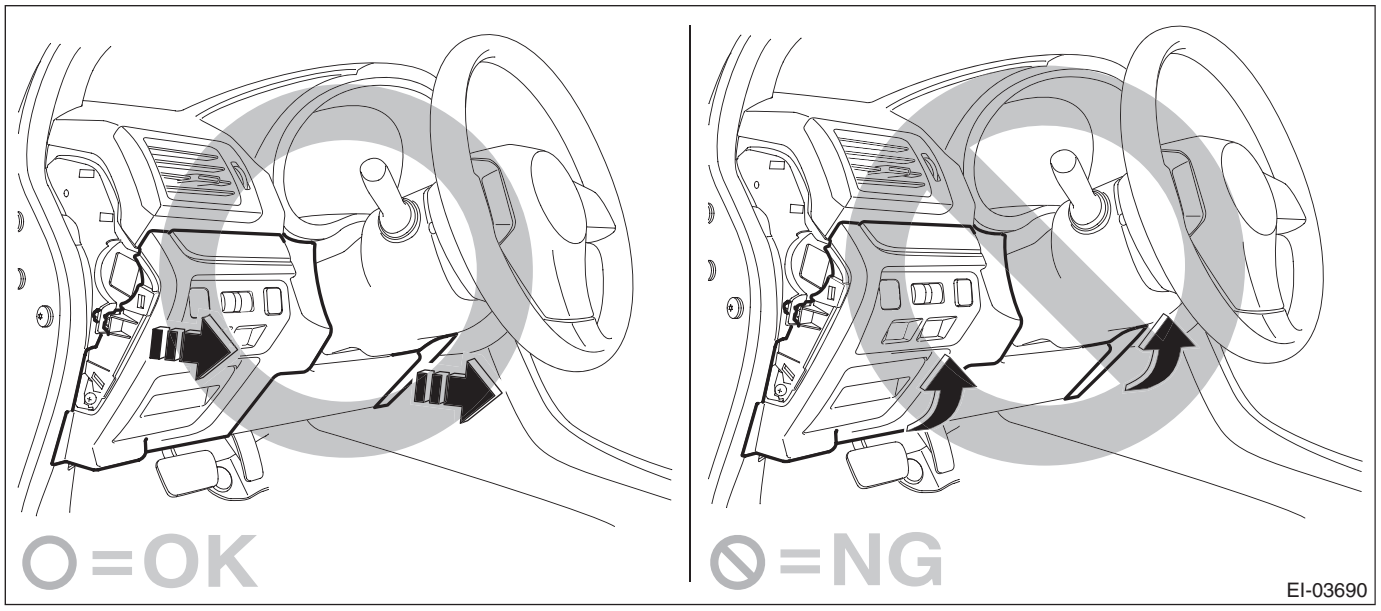


5) Remove the left and right panel center LWR.
   (1) Remove the screws and clips.
   (2) Release the claws, and then pull the panel center LWR to remove.

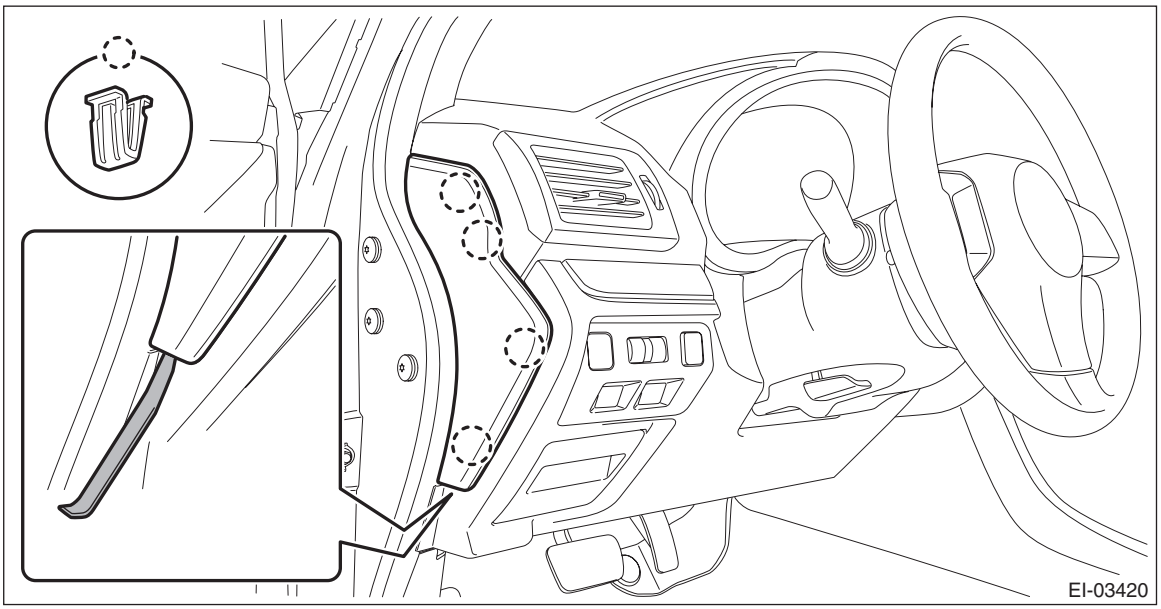


6) Remove the cover assembly - instrument panel LWR driver.

**CAUTION:**
**When removing the cover assembly - instrument panel LWR driver, be sure to pull it toward you. If attempting to remove by turning it upward, the claws may be damaged.**



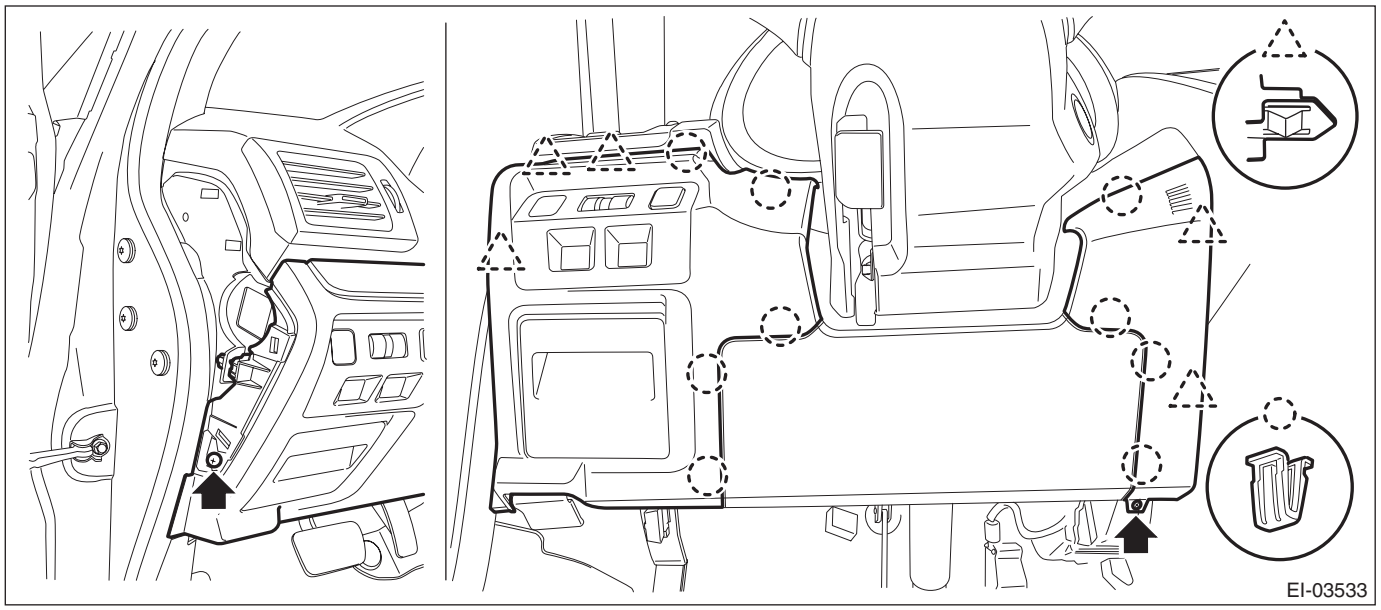
(1) Remove the clips, and remove the cover - instrument panel side LH.



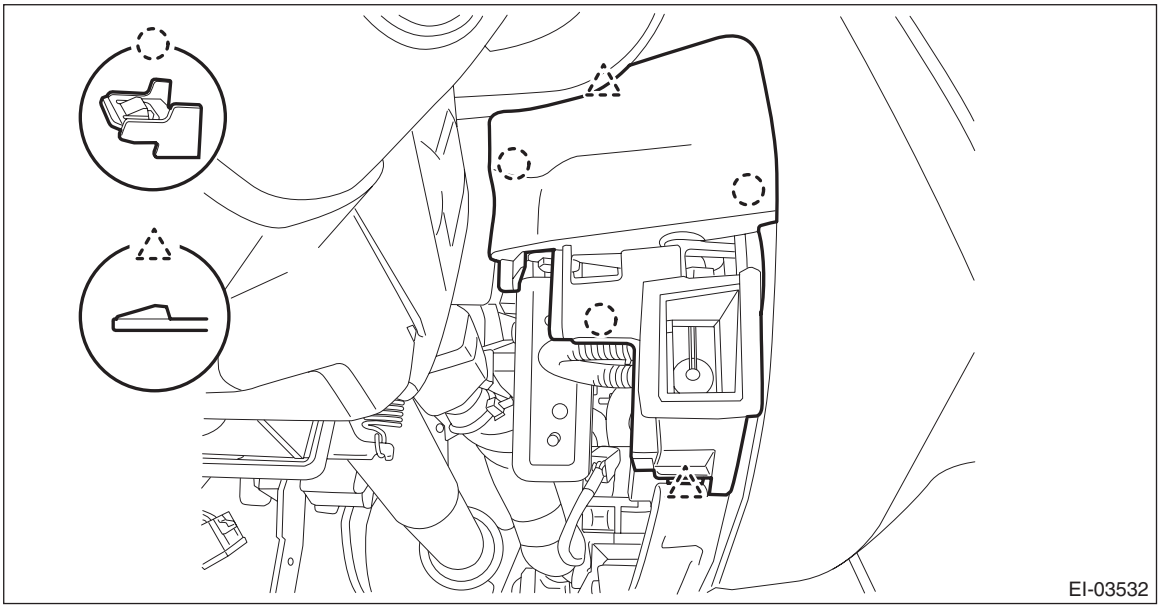
NOTE:
Using a plastic remover, open the cover - instrument panel side LH.

(2) Remove the screws and release the clips and claws.

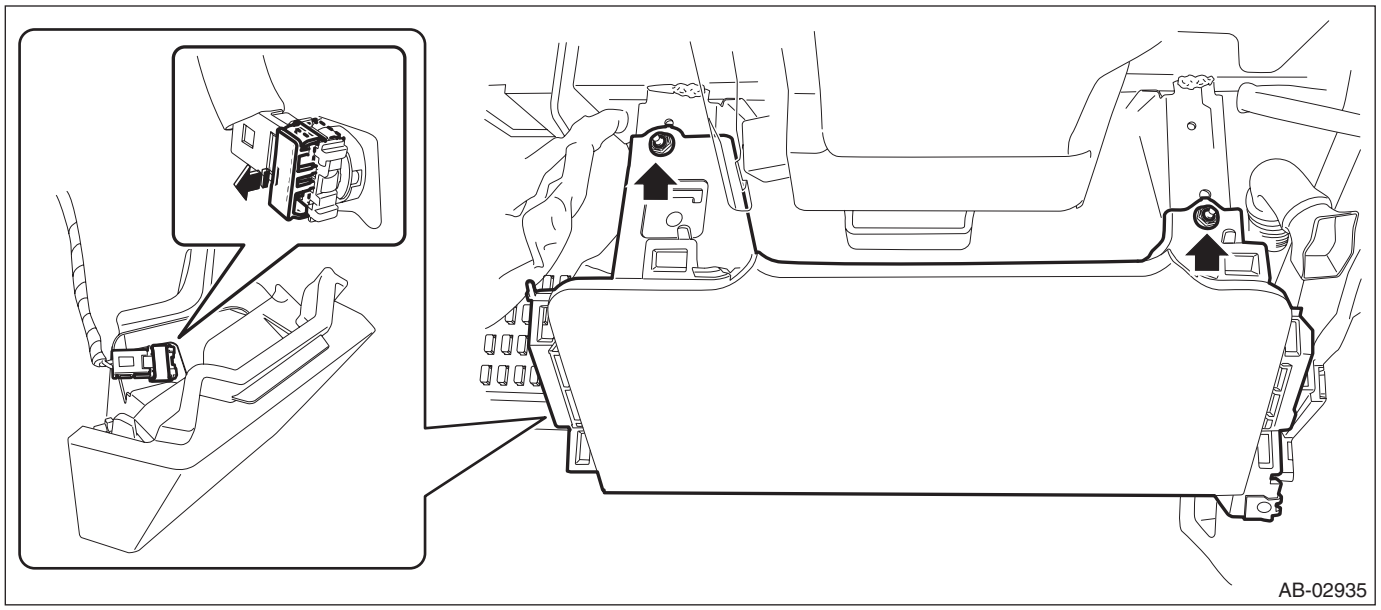
(3) Disconnect the harness connectors, and remove the cover assembly - instrument panel LWR driver INN and OUT.



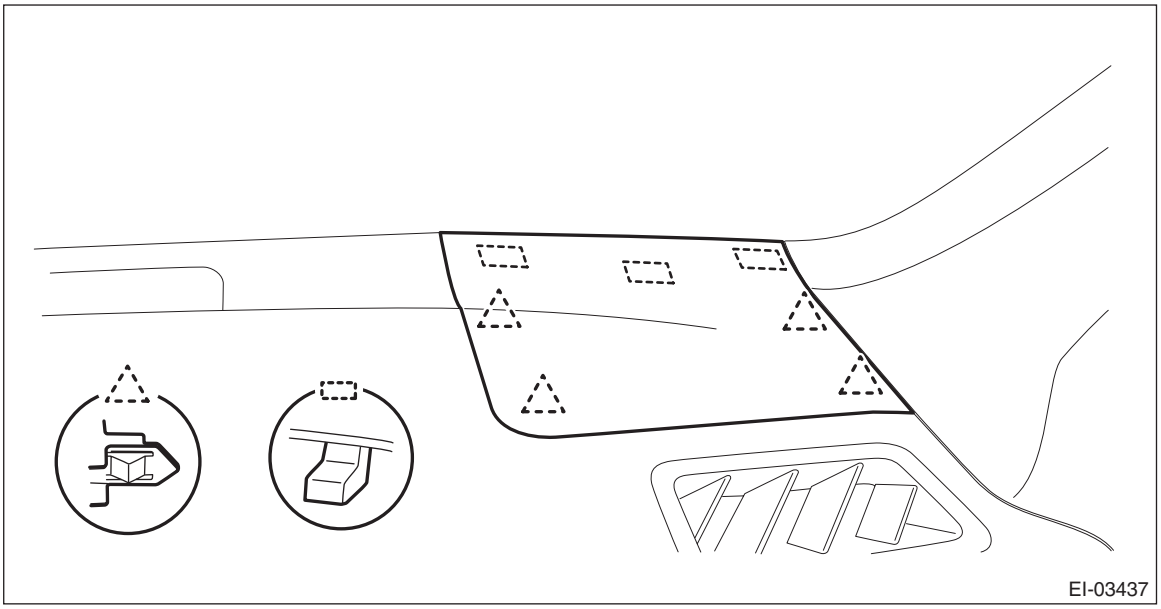
7) Remove the cover switch - starter.
(1) Release the claws and remove the cover switch - starter.
(2) Disconnect the connector and aspirator hose.



8) Remove the nuts to remove the knee airbag module and disconnect the harness connector. <Ref. to AB-33, KNEE AIRBAG MODULE, PROCEDURE, Airbag Connector.>



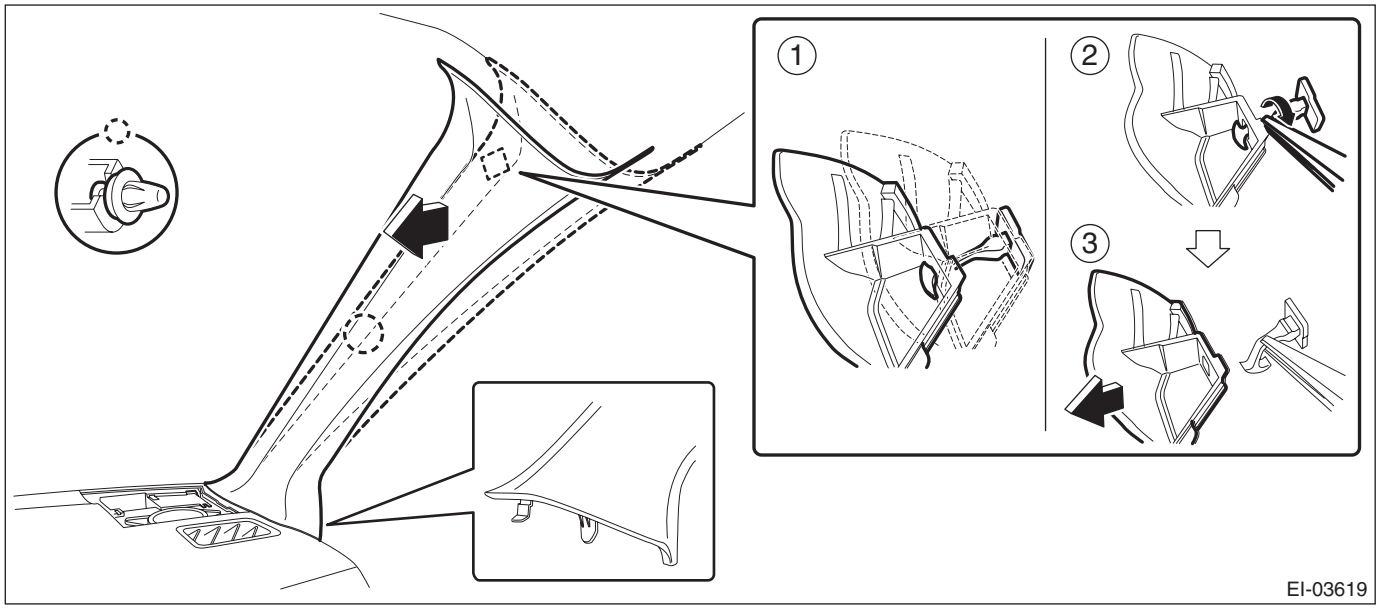
9) Release the clips and claws, then detach the left and right grille speaker side.



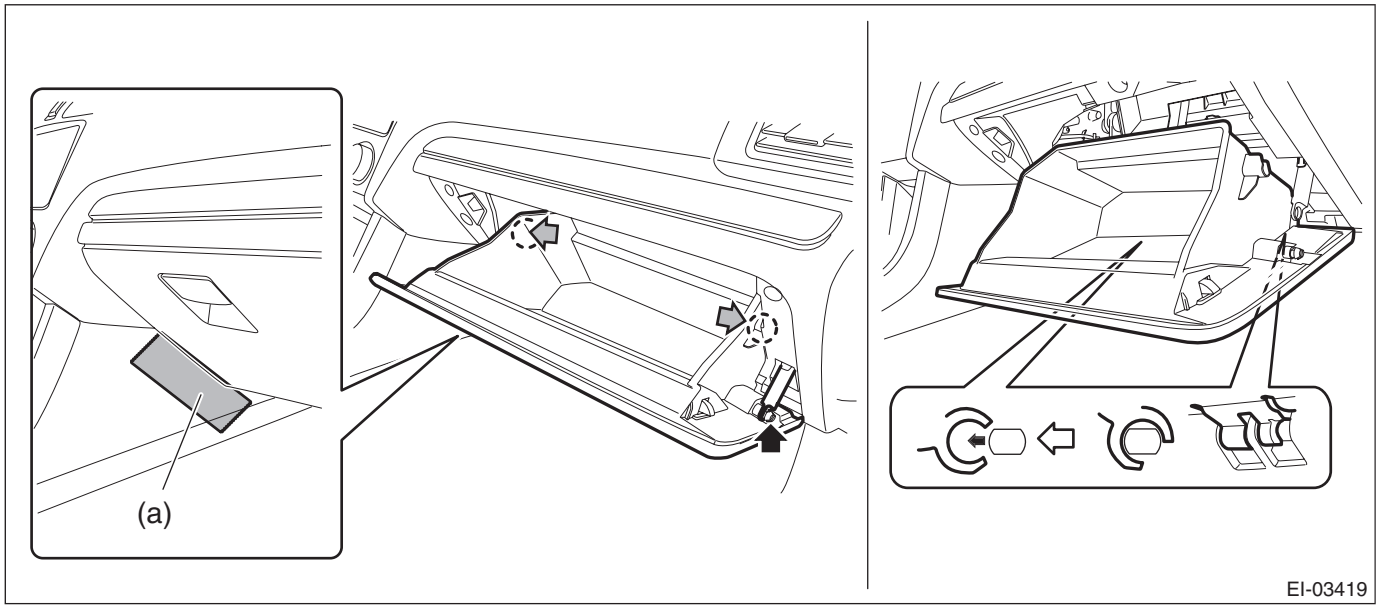
NOTE:
Remove the grille speaker side by using a plastic remover.

10) Remove the trim panel - front pillar UPR on the left and right sides.
(1) Pull the upper part of the trim panel - front pillar UPR towards the center of the vehicle.
(2) Insert long-nose pliers into the top part of the trim, grip the tether clip with the pliers and twist 90° in that position.

**CAUTION:**
**Be careful not to damage the pillar trim surface and curtain airbag module when inserting the pliers.**
(3) Holding the tether clip twisted as in the previous step, remove the trim panel - front pillar UPR from the tether clip.
(4) Remove the clips, and remove the trim panel - front pillar UPR.

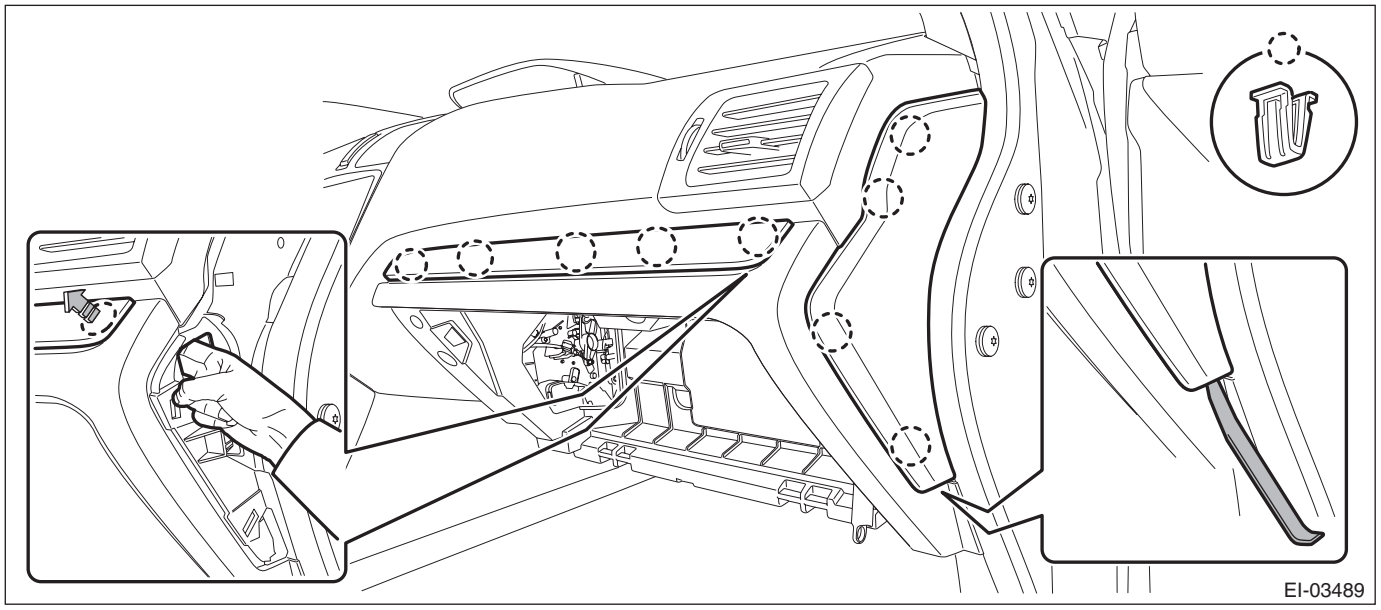


11) Remove the pocket assembly.
(1) Attach the protective tape (a) to the panel center LWR.
(2) Remove the damper COMPL - pocket.
(3) Release the stoppers and remove the pocket assembly by pulling it toward you.

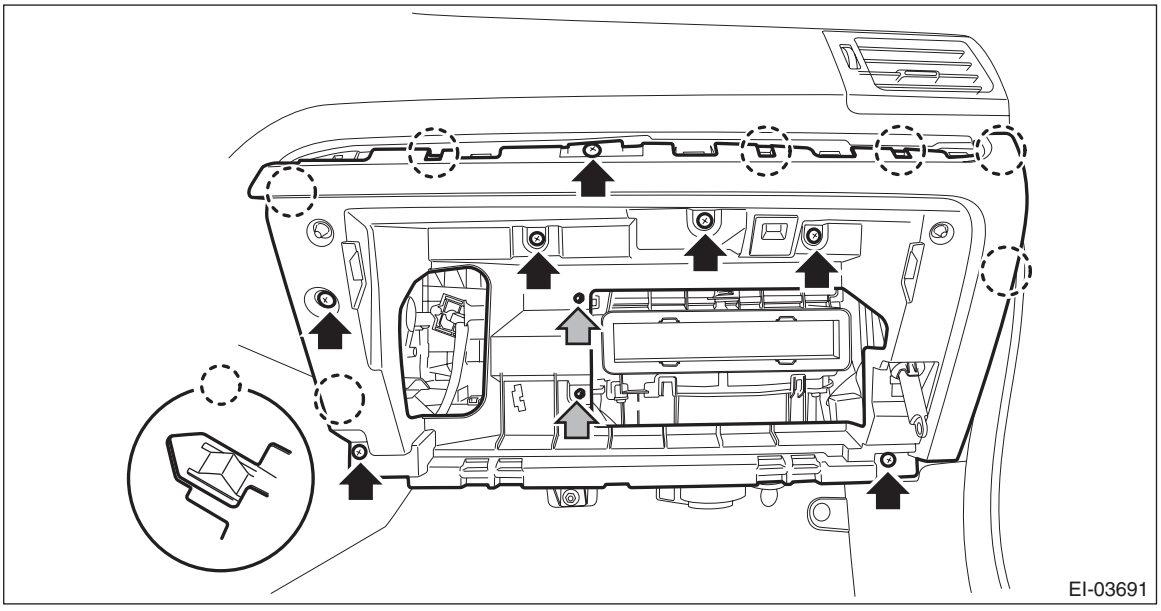


12) Remove the back panel - pocket.
(1) Remove the clips, and remove the cover - instrument panel side RH.

NOTE:
Remove the cover - instrument panel side RH by using a plastic remover.
(2) Release the clips, and remove the ornament - panel assembly passenger.

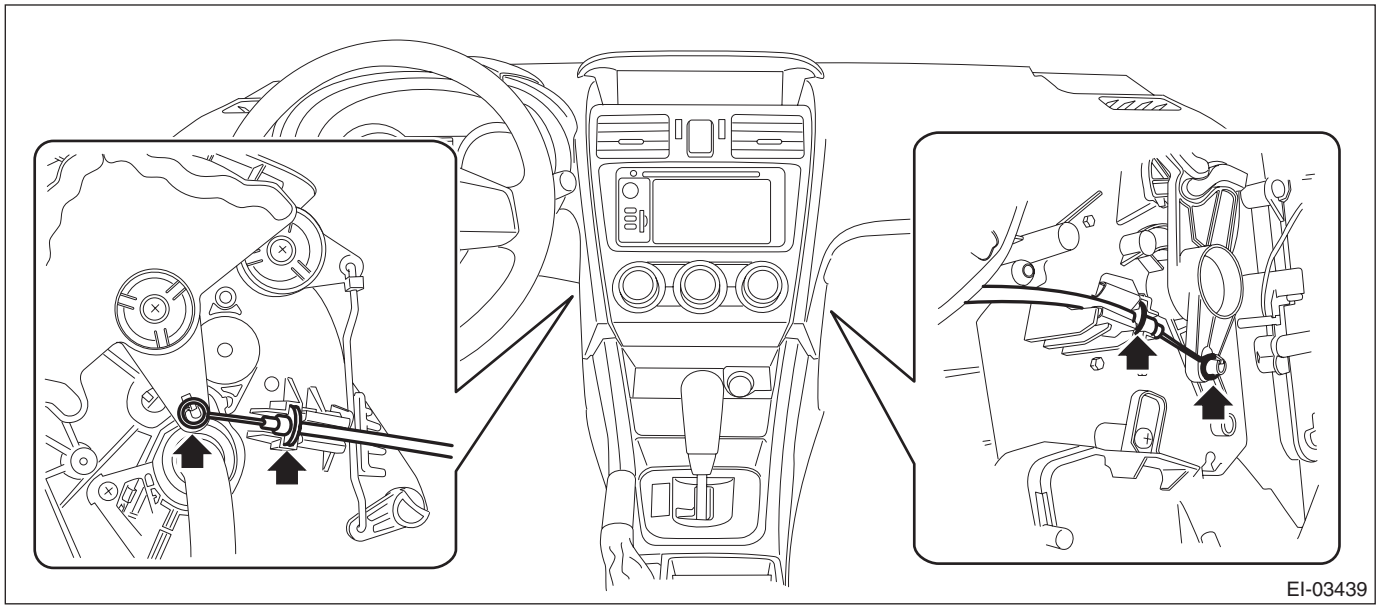


NOTE:
To facilitate the removal, push the clip of the ornament - panel assembly passenger from the backside.
(3) Release the claws and remove the screws, then remove the back panel - pocket.



(4) Disconnect the glove box light LED connector.

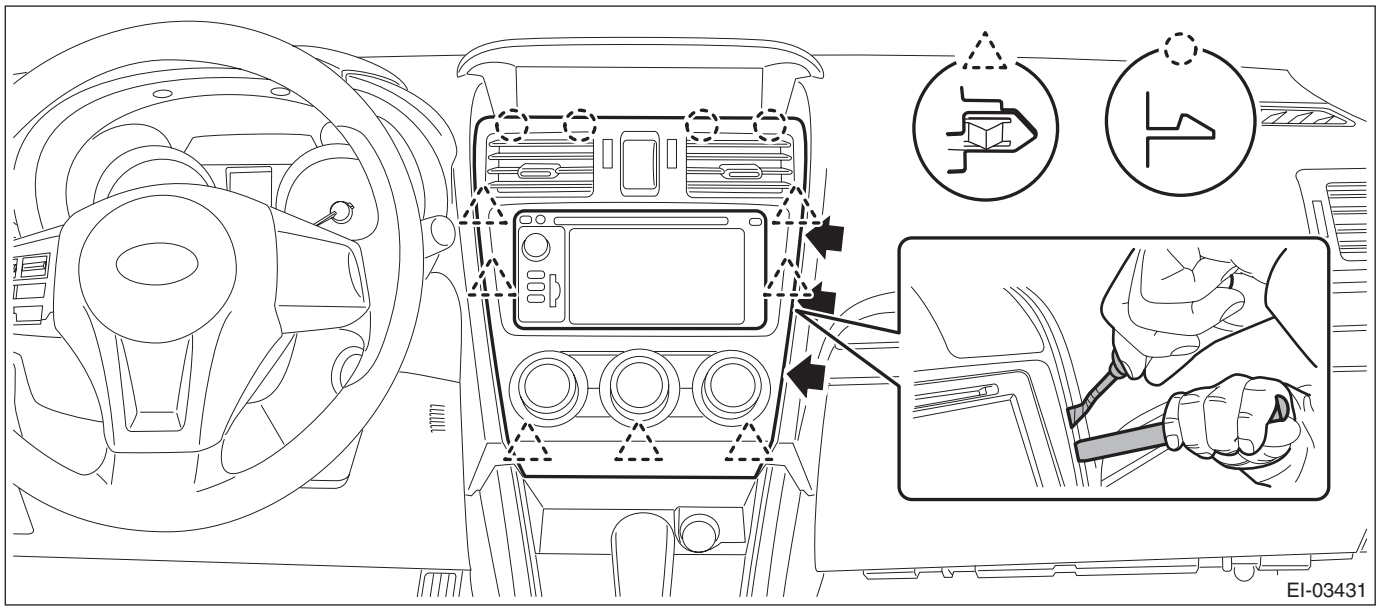
13) On manual A/C models, disconnect the control cables from both sides of the heater & cooling unit.



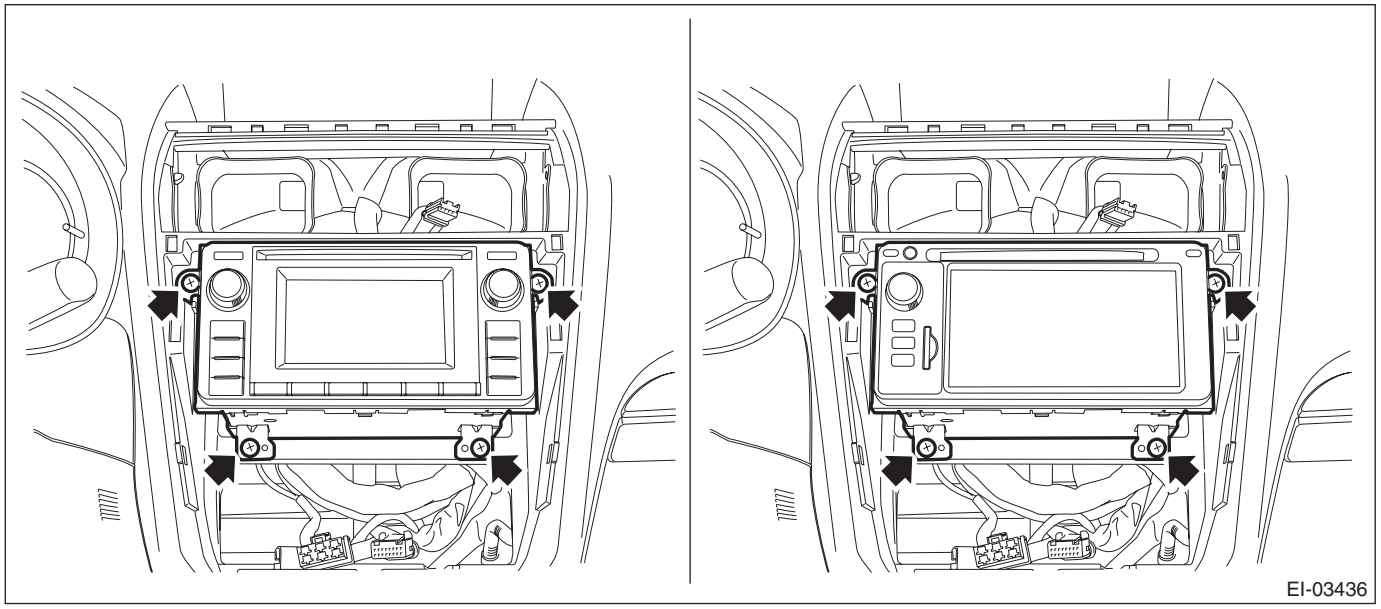
14) Remove the panel center assembly.

**CAUTION:**
- **Do not put your finger on the fin of the air vent grille. Doing so may damage the fin.**
- **Pull the panel center assembly slowly. Pulling with excessive force may damage the connector.**

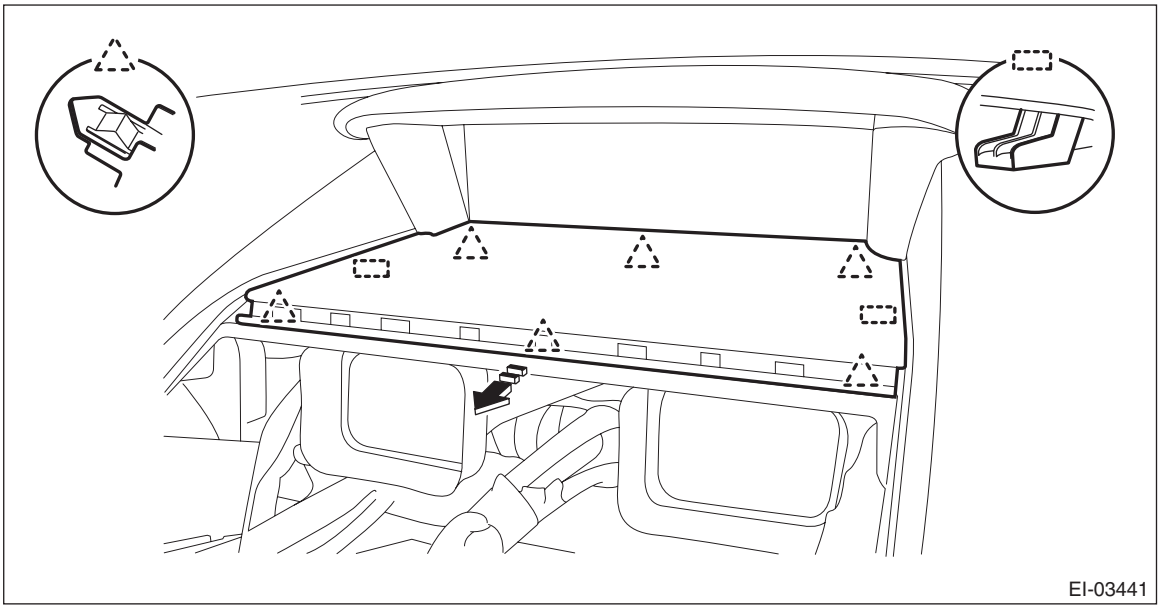
(1) Insert a plastic remover to the three areas shown by the arrows, and lift up the panel center assembly slightly.
(2) With the panel center assembly lifted up slightly, release the claw by using a clip remover wrapped with protective tape.
(3) Release the rest of the claws, and pull out the panel center assembly.
(4) Disconnect the connectors, and remove the panel center assembly.



15) Remove the audio assembly or navigation assembly.
(1) Remove the screws, and partially pull out the audio assembly or navigation assembly.
(2) Disconnect the connectors, and remove the audio assembly or navigation assembly.



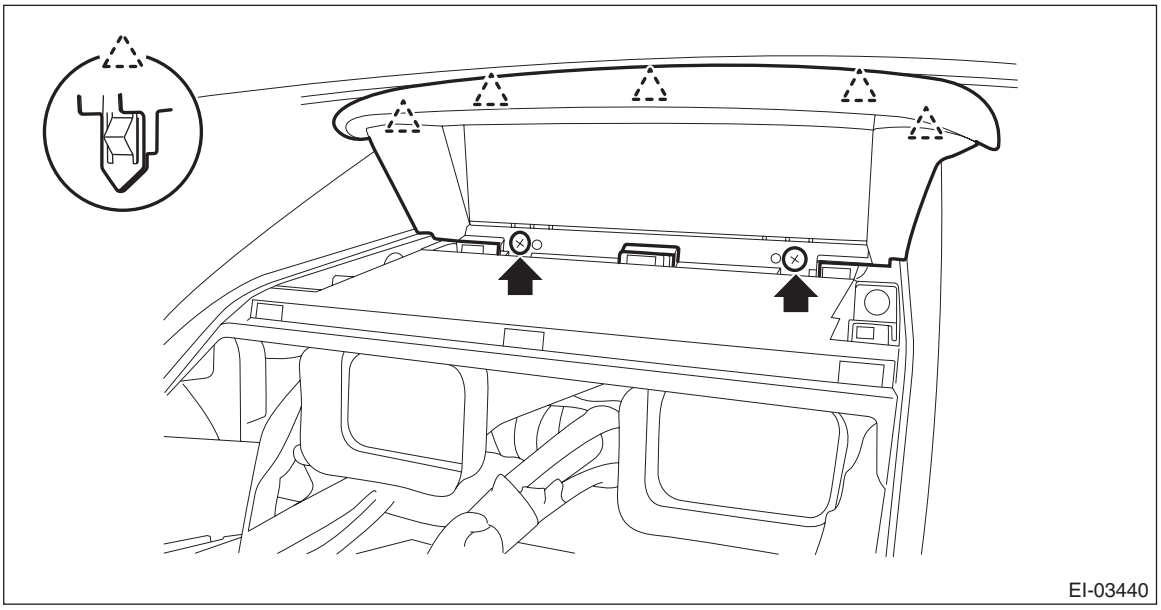
16) Remove the multi-function display assembly.
(1) Disconnect the claws and then remove the cover center UPR.



NOTE:
Lightly push up the back of the cover center UPR, hook the finger to the end portion and pull it toward you to remove it.
(2) Release the screws and claws, and then remove the panel - display UPR and the panel - display LWR.

NOTE:
Remove the panel - display UPR & panel - display LWR and the multi-function display assembly as a unit.

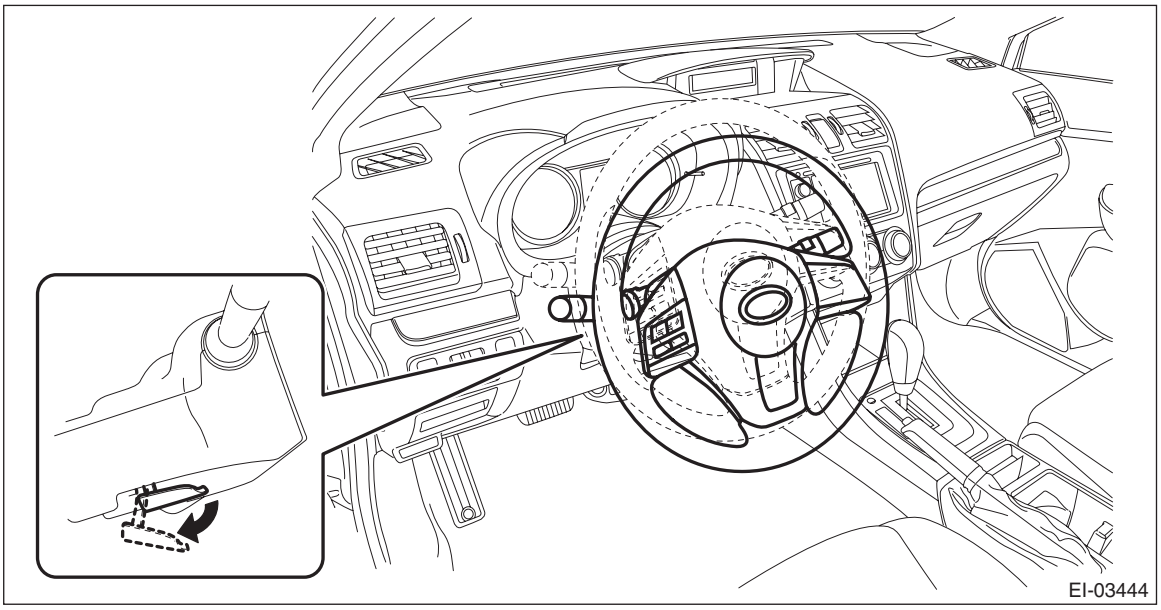
(3) Disconnect the connector and remove the multi-function display assembly.



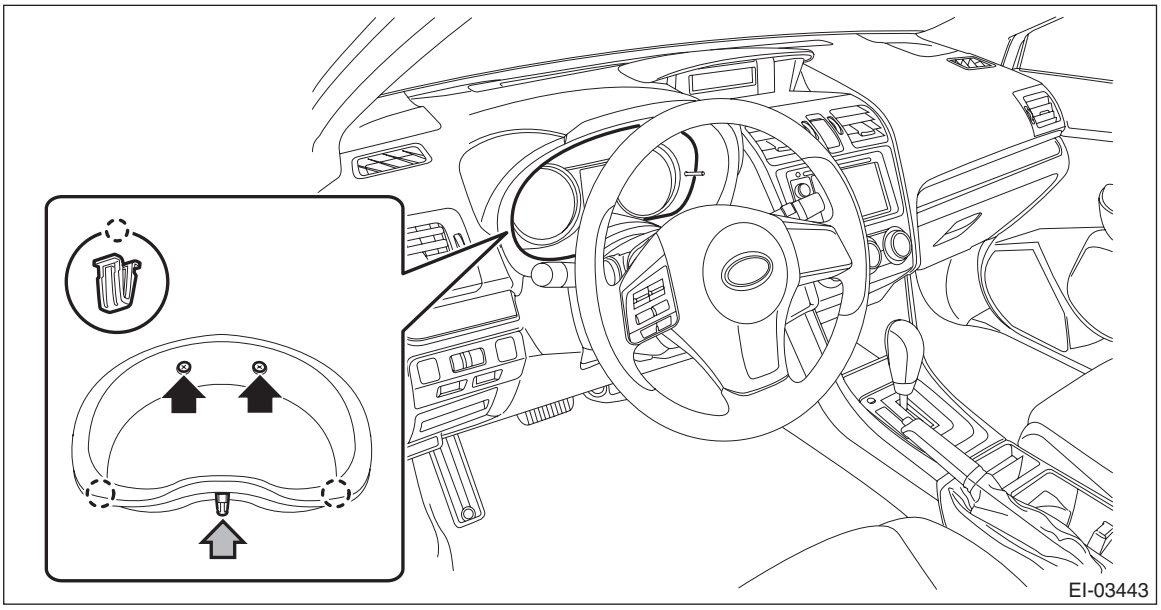
17) Remove the combination meter assembly.

**CAUTION:**
- **Be careful not to damage the meter or instrument panel.**
- **Pay particular attention to avoid damaging the meter glass.**

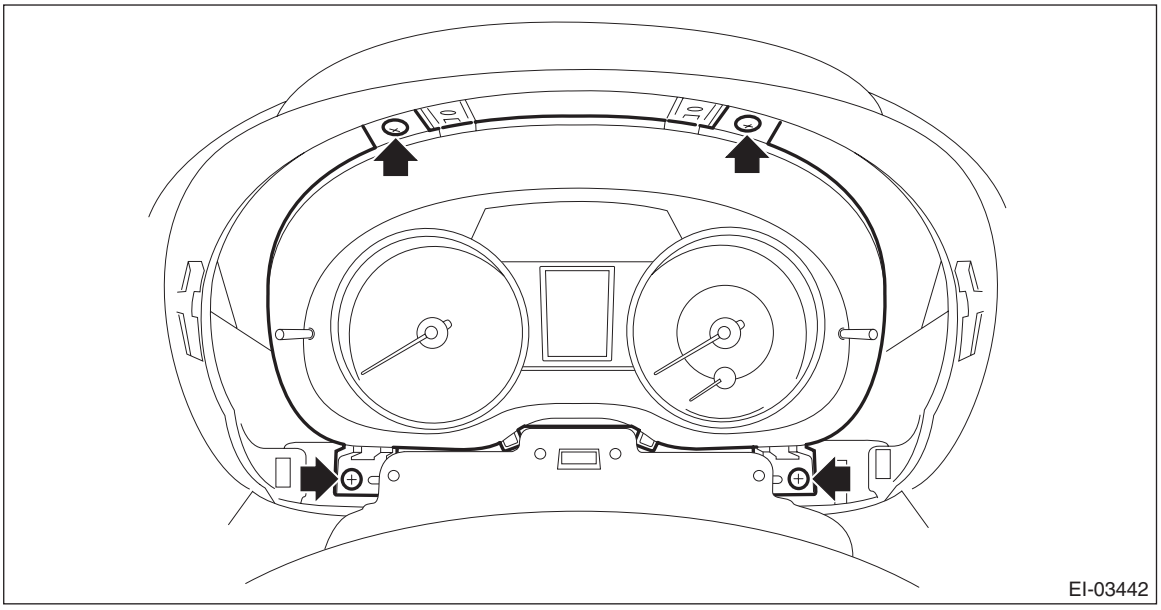
(1) Release the lock, tilt the steering column to the lowest end and fully extend the column by the telescopic system.



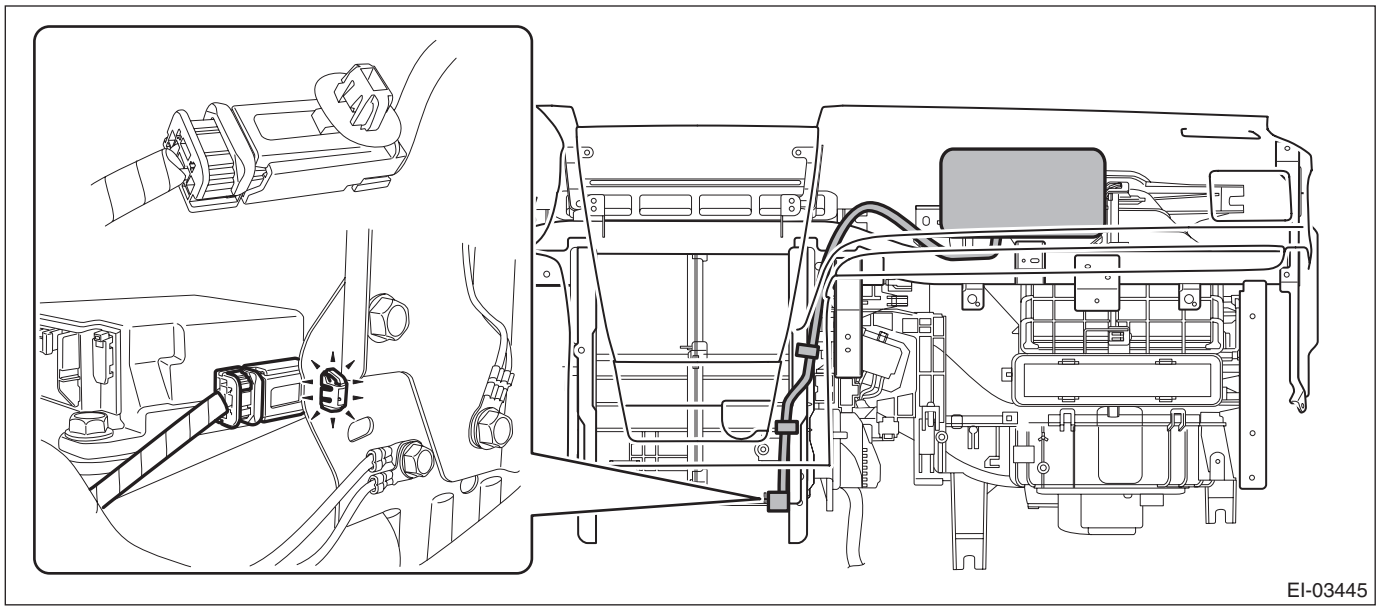
(2) Release the screws and clips, then detach the meter visor assembly.



(3) Remove the screws, disconnect the connector and remove the combination meter assembly.



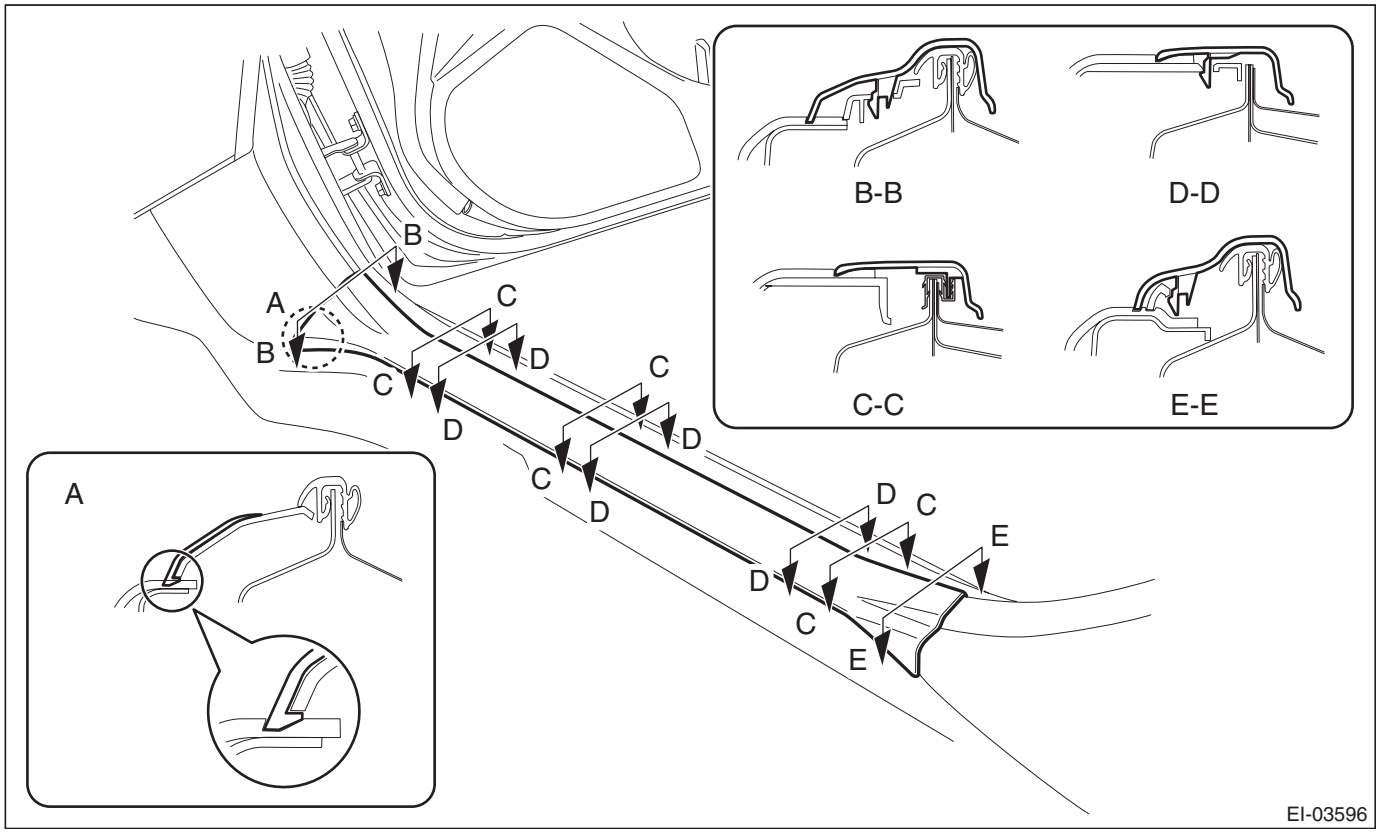
18) Disconnect the passenger's airbag module connector. <Ref. to AB-23, PASSENGER'S AIRBAG MODULE, PROCEDURE, Airbag Connector.>



EI-03445

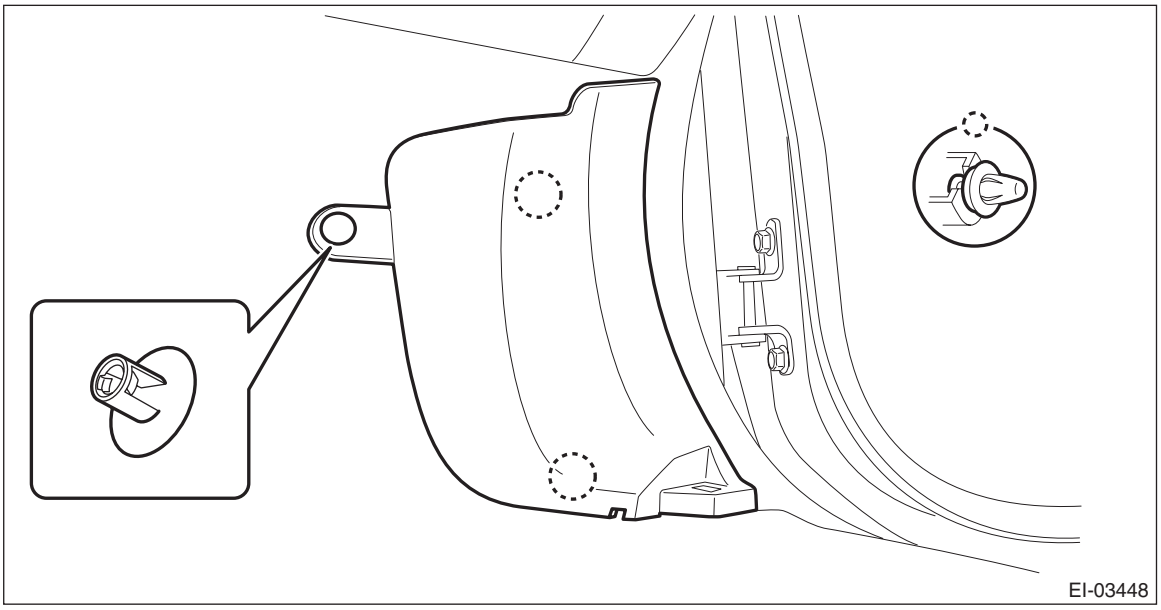
19) Remove the column assembly - steering. <Ref. to PS-18, REMOVAL, Steering Column.>
20) Release the claws, and then remove the cover side sill - front INN on LH and RH sides.

**CAUTION:**
**Do not pull with excessive force. Doing so may damage the claws of the cover side sill - front INN.**



EI-03596

21) Remove the clip, and remove the cover side sill - front on LH and RH sides.



22) Remove the instrument panel assembly and the beam COMPL - steering as a unit.

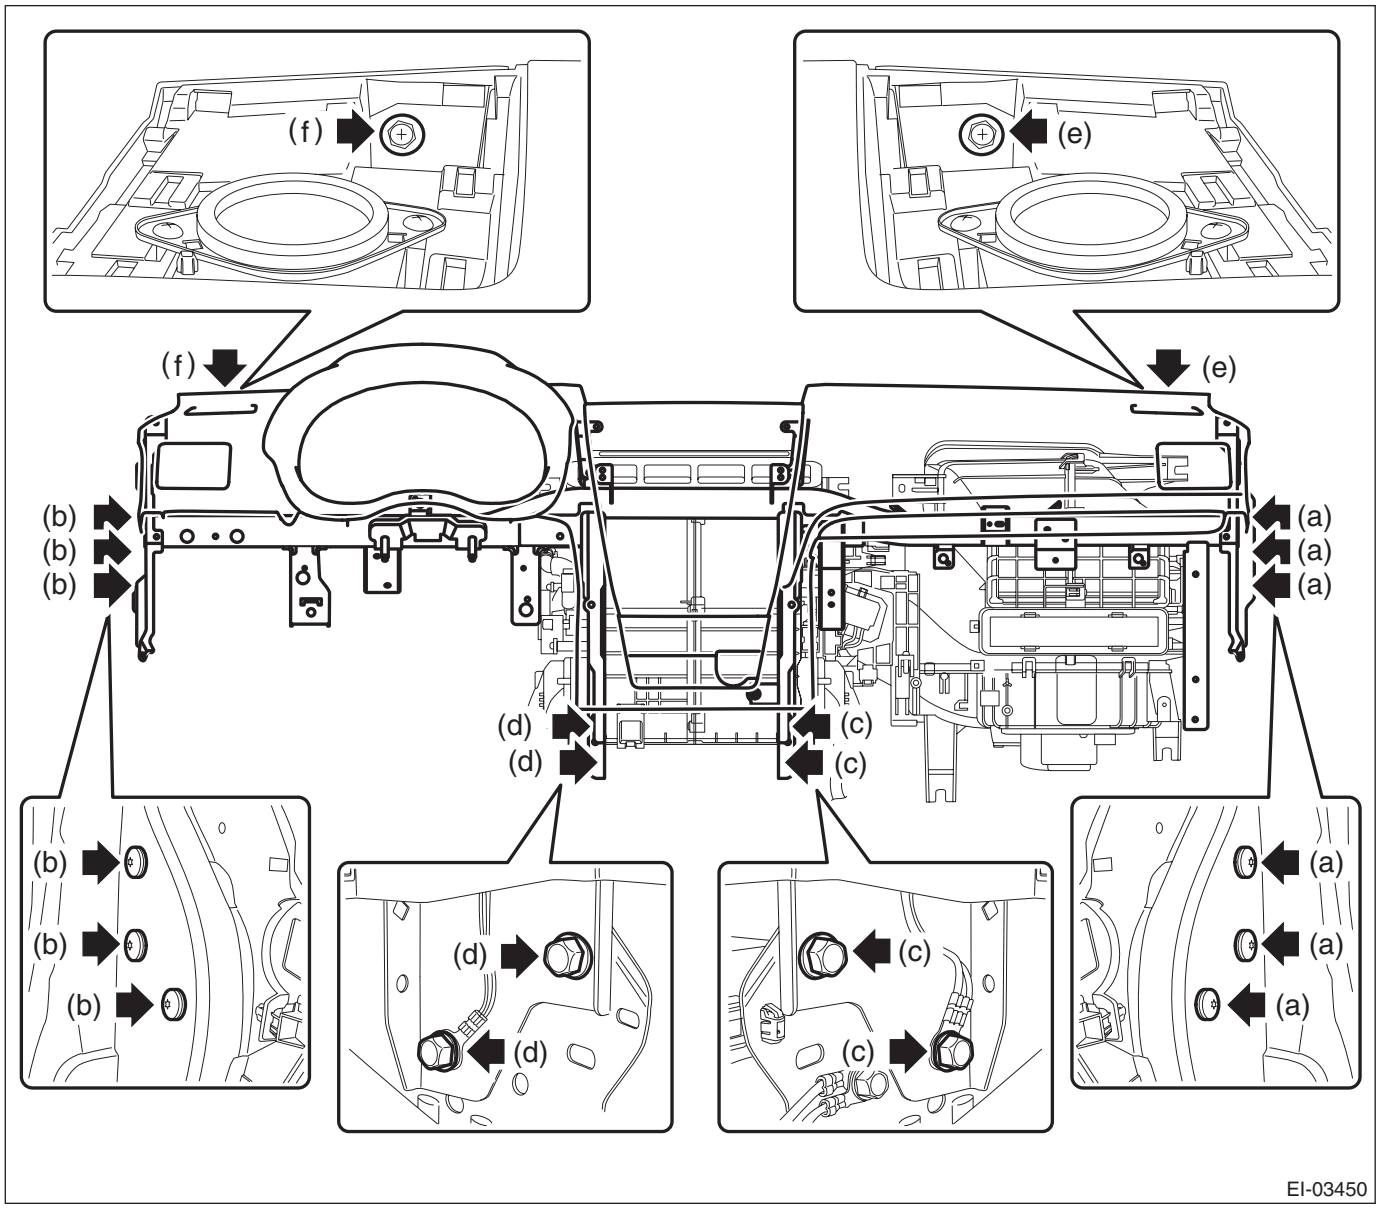
**CAUTION:**
**The instrument panel assembly and the beam COMPL - steering are heavy. Always work in a team of two persons when removing them from the vehicle, so as not to damage the vehicle interior.**

(1) Remove the fuse box and relay box.
(2) Disconnect all harness clamps and connectors of the instrument panel harness.
(3) Remove the TORX® bolt. (a), (b)

***Preparation tool:***
***TORX® T40***

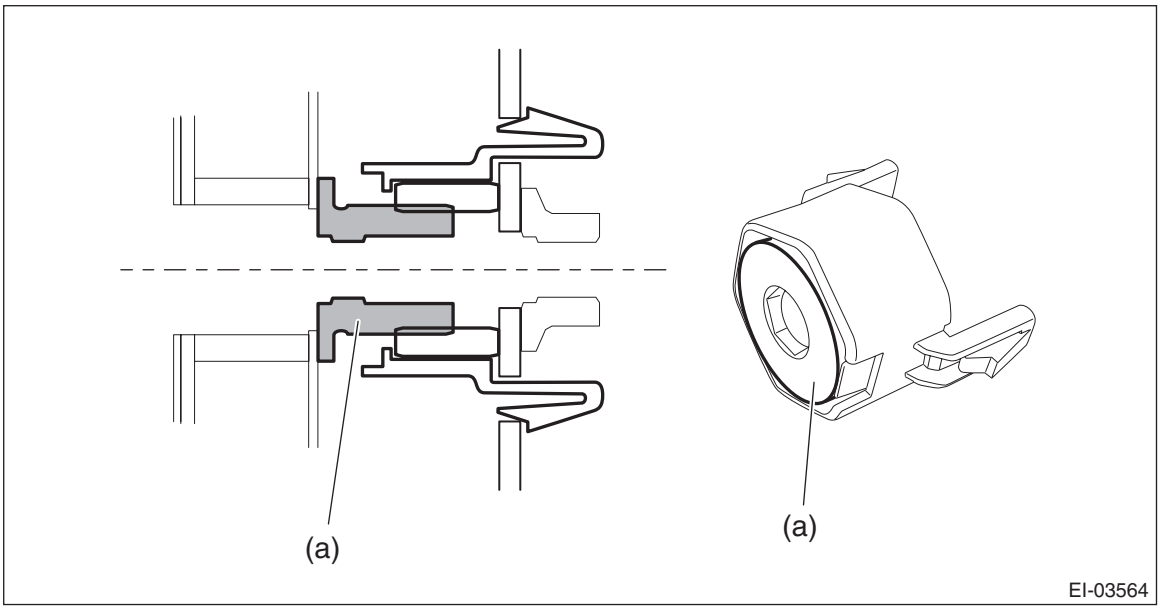
(4) Remove the bolts at the floor center. (c), (d)

(5) Remove the bolt. (e), (f)



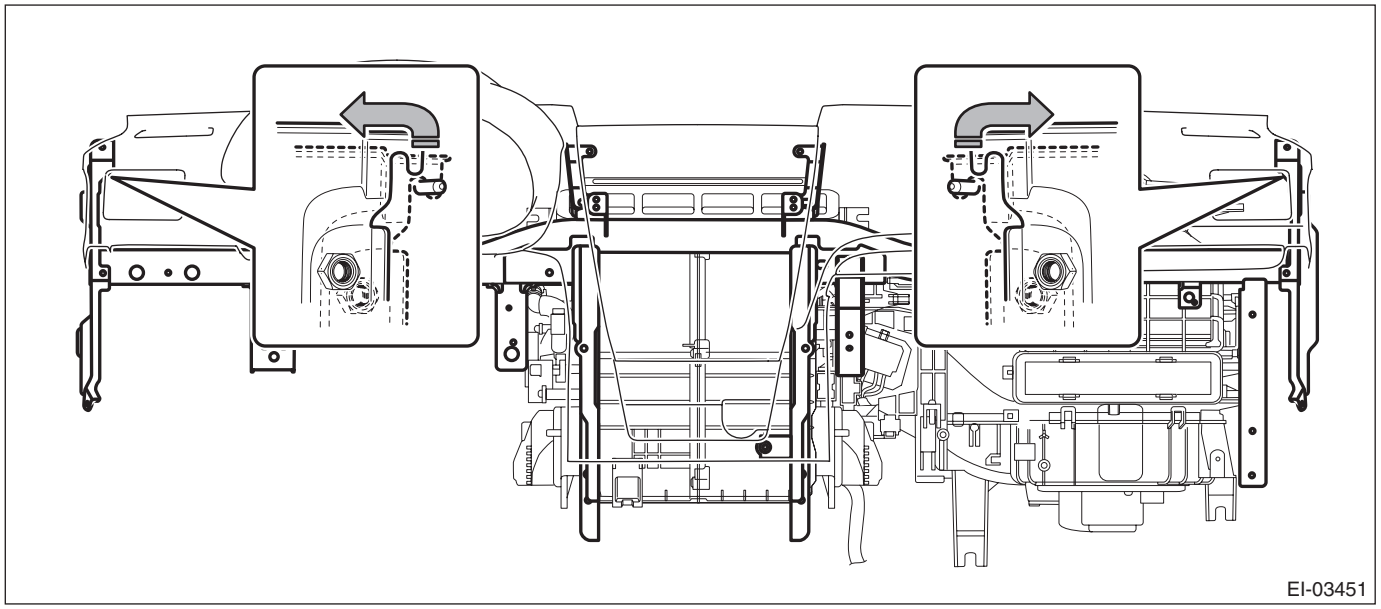
(6) Loosen the adjuster portion (a) of the adjuster - clip space. (only passenger's side of beam COMPL - steering)

***Preparation tool:***
***Hexagon wrench: 8 mm (0.31 in)***

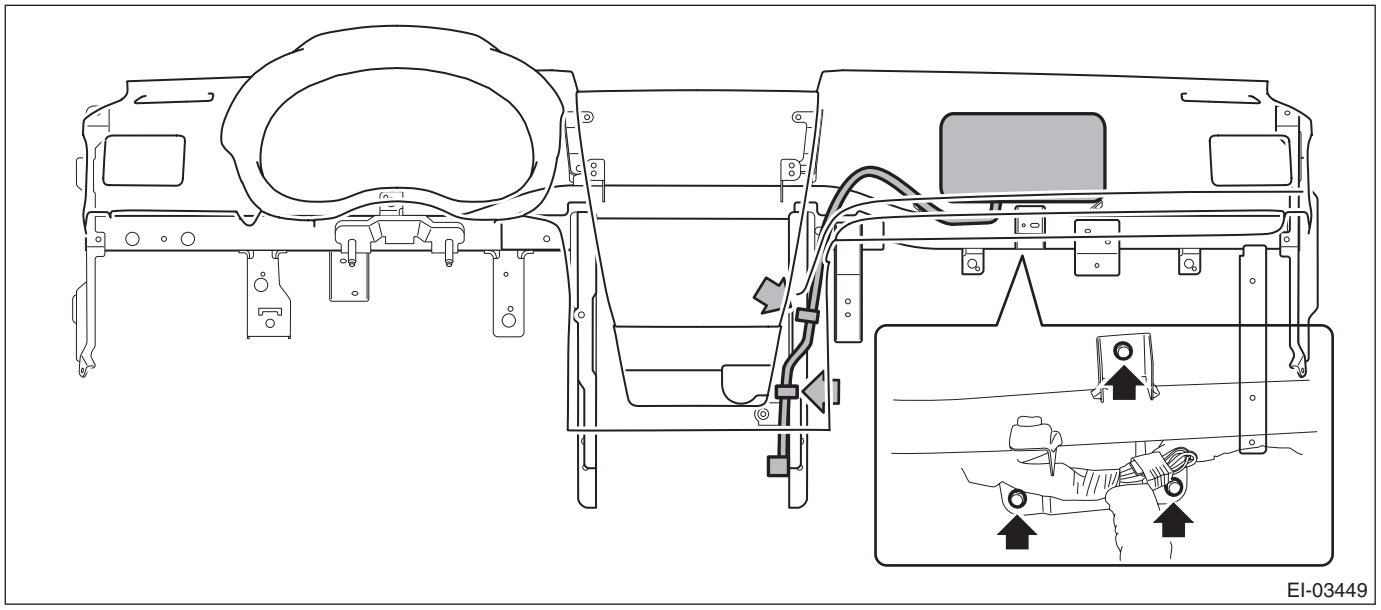


(7) Slightly lift the instrument panel assembly together with the beam COMPL - steering to detach the left and right pins. Then pull it toward you to remove the assembly.

**CAUTION:**
**• Check that all harness clamps and connectors are detached.**
**• The instrument panel assembly and the beam COMPL - steering are heavy. Always work in a team of two persons when removing them from the vehicle, so as not to damage the vehicle interior.**



23) Separate the panel COMPL - instrument and the beam COMPL - steering.
(1) Remove the clamps and bolts of the passenger's airbag module harness.

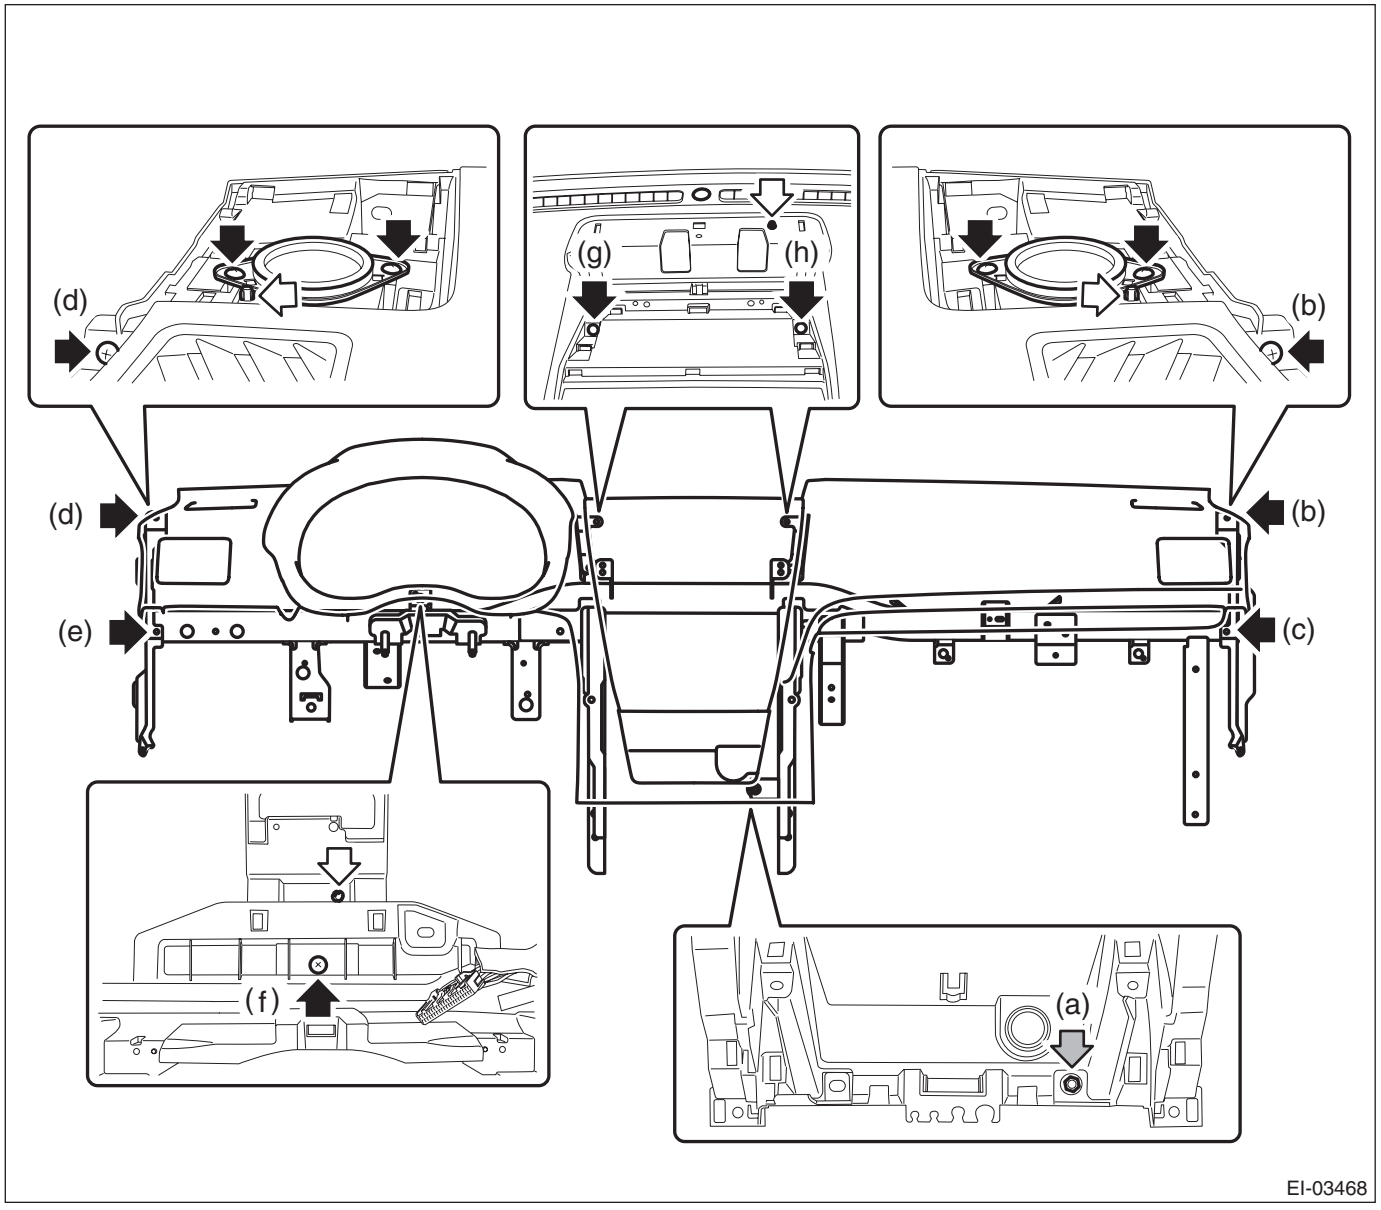


(2) Remove the left and right speakers and the sensor - sunload.

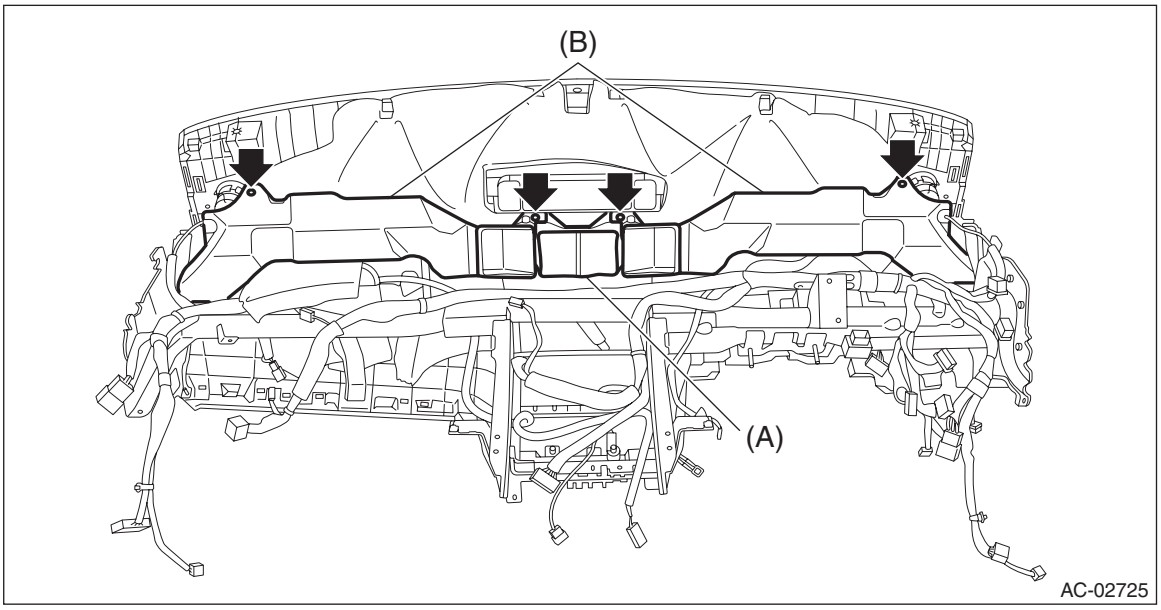
NOTE:
Detach the harness clamp together.

(3) Disconnect the front accessory socket connector.
(4) Remove the nut (a) and screws (b), (c), (d), (e), (f), (g) and (h).

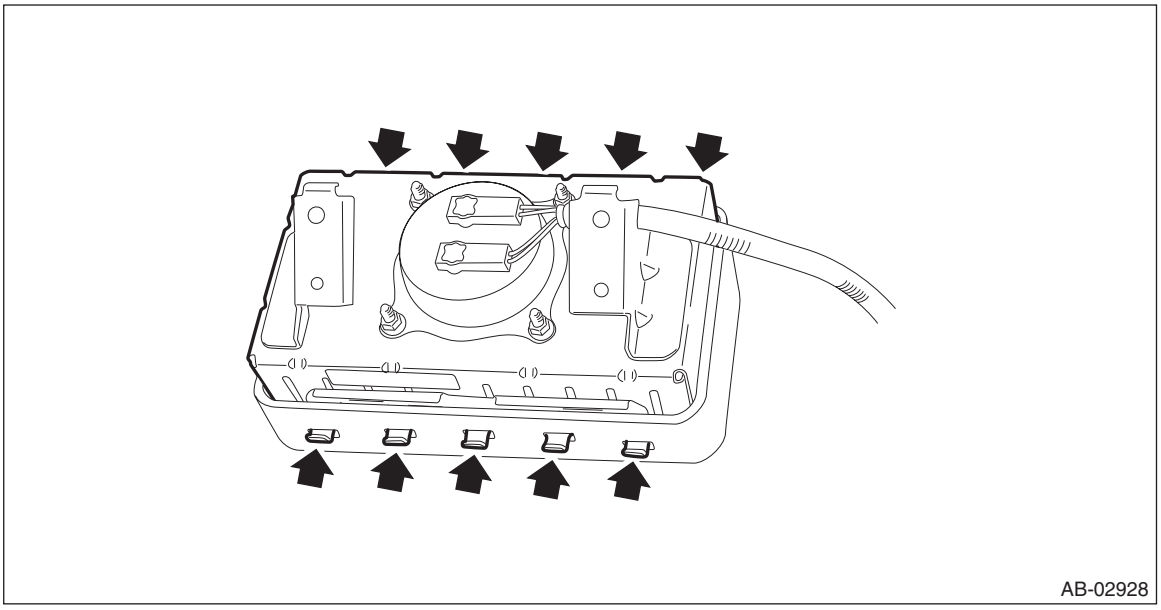
(5) While being careful with the harness, separate the panel COMPL - instrument and the beam COMPL - steering.



24) Remove the screws and remove the front (A) and side vent duct LH/RH (B).



25) Remove the claws, and remove the passenger's airbag module.



26) For handling of the removed airbag module, refer to "CAUTION". <Ref. to AB-11, CAUTION, General Description.>

## B: INSTALLATION

**CAUTION:**
**• Refer to "CAUTION" of "General Description" before handling the airbag module. <Ref. to AB-11, CAUTION, General Description.>**
**• Do not allow harness and connectors to interfere or get tangled up with other parts.**
**• When reusing the tether clip on the upper part of the trim panel - front pillar UPR, check that there is no damage to the tether clip. If the tether clip is damaged, its holding force is reduced and the trim panel - front pillar UPR may come off. Be sure to replace it with a new tether clip.**

1) Before installation, inspect the following items and replace any faulty part with a new one.
- Passenger's airbag lid (instrument panel surface) is cracked or deformed.
- Airbag module is cracked or deformed.
- Harness and/or connector is cracked, deformed or open.
- Harness wire is exposed.
- Mounting bracket is cracked or deformed.

2) Install each part in the reverse order of removal.

NOTE:
Refer to the installation procedure of the "Instrument Panel Assembly". <Ref. to EI-92, INSTALLATION, Instrument Panel Assembly.>

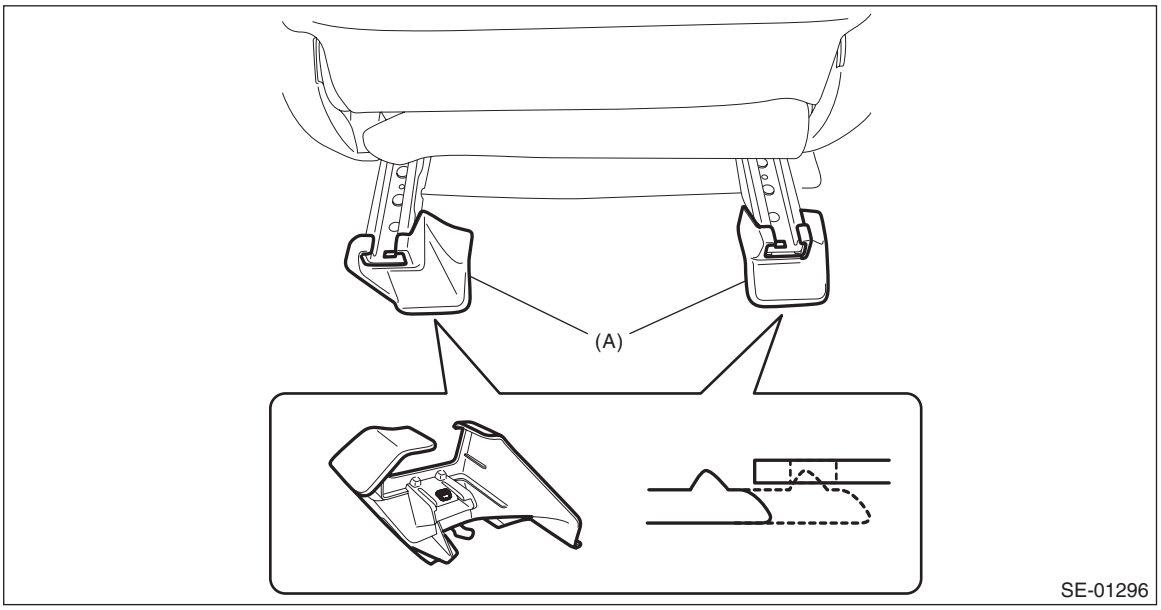
# 7. Side Airbag Module

## A: REMOVAL

**CAUTION:**
**Refer to "CAUTION" of "General Description" before handling the airbag module. <Ref. to AB-11, CAUTION, General Description.>**

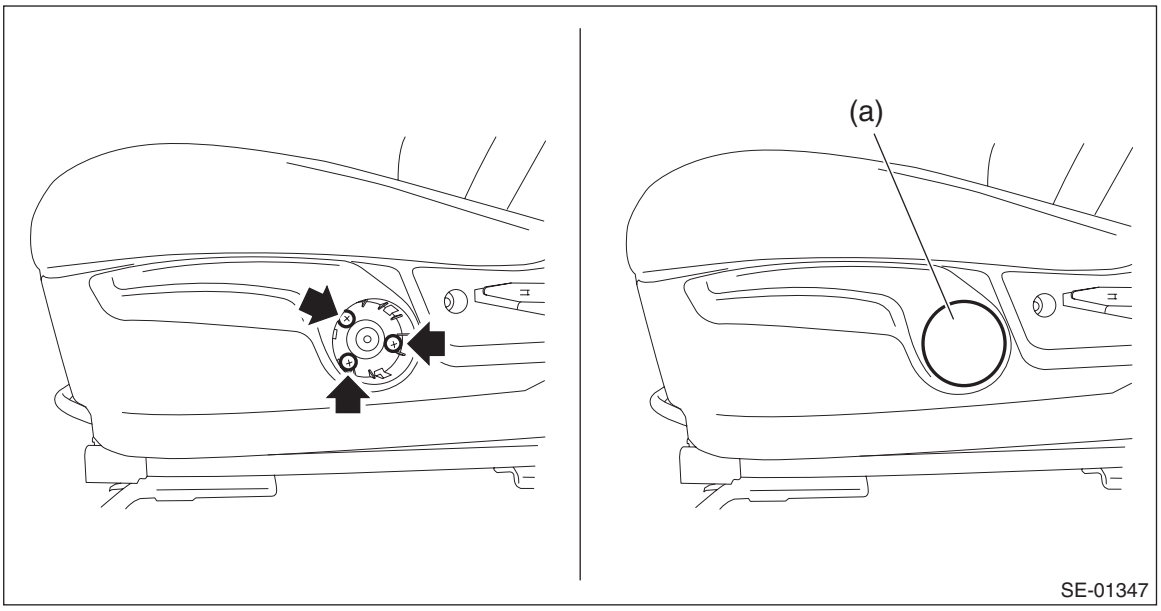
NOTE:
Remove the passenger's side by referring to driver's side.
1) Remove the headrest assembly.
2) Disconnect the ground cable from battery and wait for at least 60 seconds before starting work.
3) Remove the front seats.

**CAUTION:**
**Be careful not to damage the body when taking out the seat from the vehicle.**
(1) Tilt the backrest assembly forward and move the front seat to the front most position.
(2) Remove the cover - bolt rear (A) and remove the bolts.

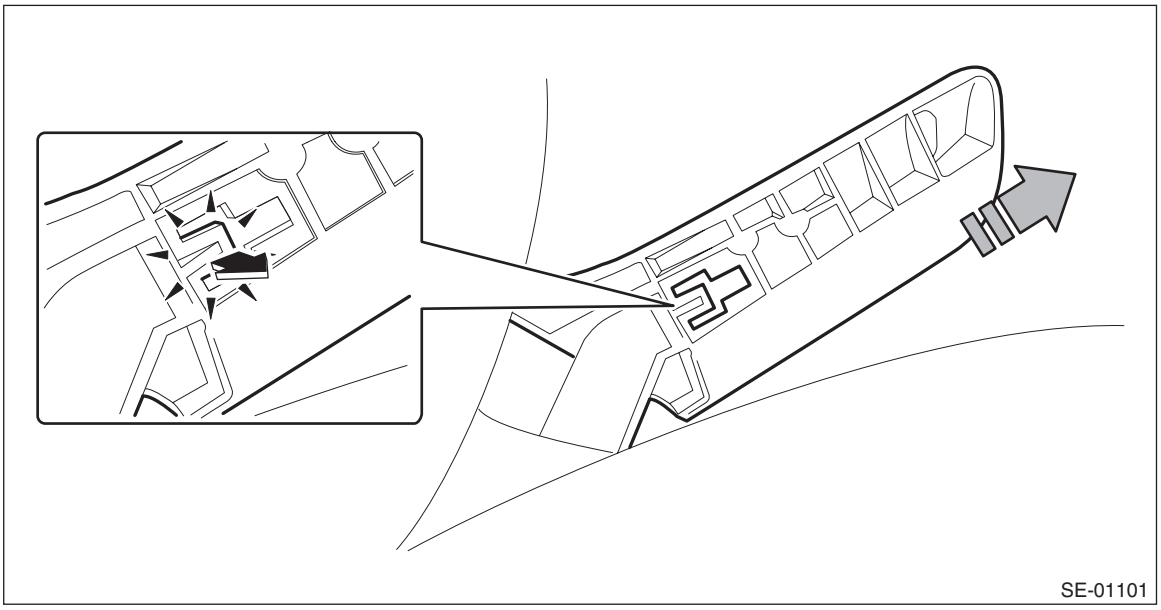


(3) Move the front seat to the rearmost position, and remove the bolts.
(4) Disconnect the connector under the front seat.
• Seat belt warning light connector (driver's seat)
• Occupant detection system harness connector (passenger's seat) <Ref. to OD(diag)-9, OCCUPANT DETECTION SYSTEM (BETWEEN AIRBAG REAR HARNESS AND SEAT HARNESS), PROCEDURE, Airbag Connector.>
• Side airbag module connector <Ref. to AB-31, SIDE AIRBAG MODULE, PROCEDURE, Airbag Connector.>
• Seat heater connector (model with seat heater)
• Buckle switch RH connector (passenger's seat) <Ref. to AB-32, BUCKLE SWITCH RH, PROCEDURE, Airbag Connector.>
(5) Take out the front seat assembly from the vehicle.

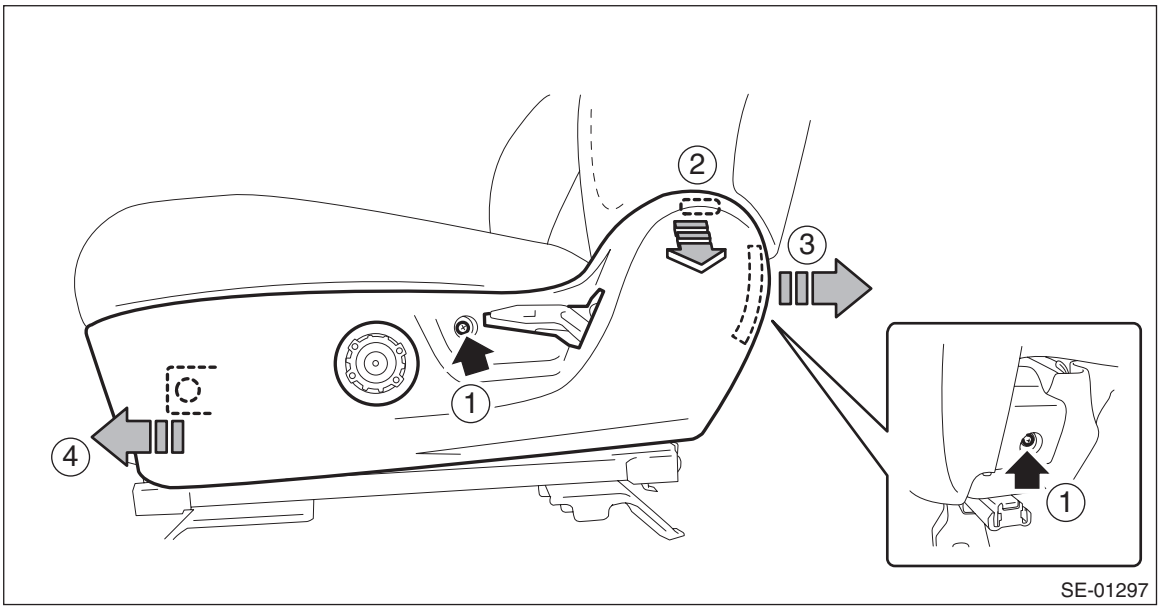
4) Remove the knob - lifter.
   (1) Using a flat tip screwdriver, remove the cap - lifter lever (a).
   (2) Remove the screws and remove the knob - lifter.



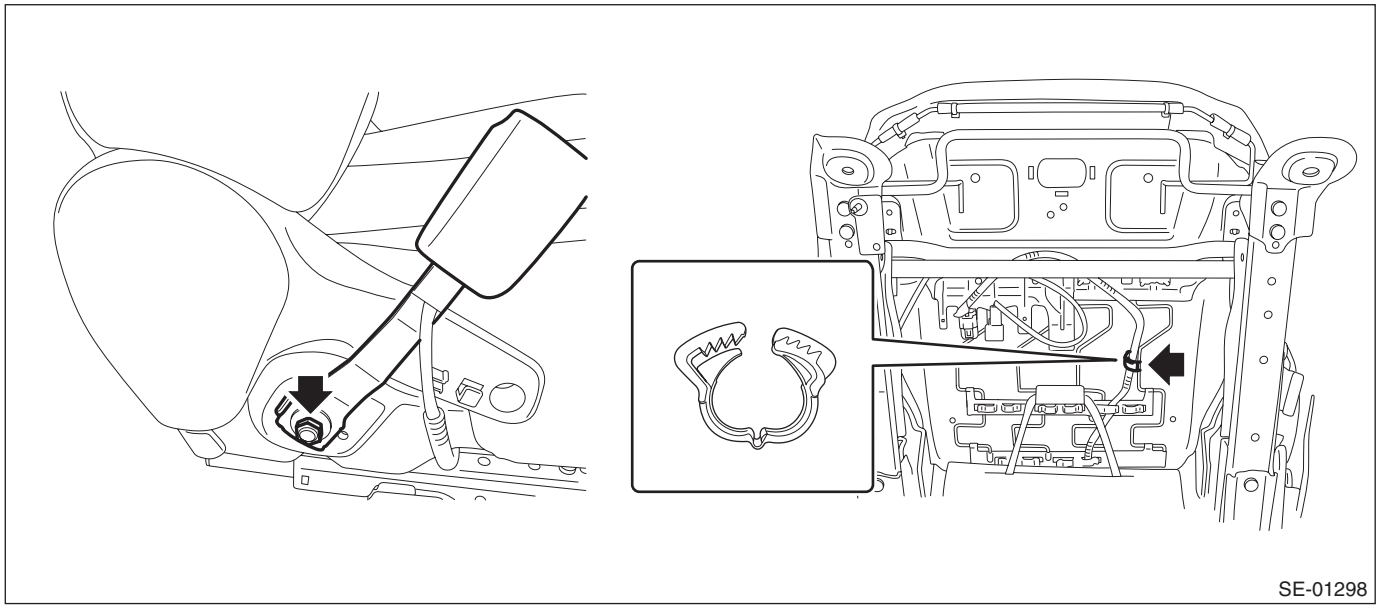
5) Remove the lever - reclining.
   (1) Pull up the lever - reclining and release the claws on the back.
   (2) Pull out the lever - reclining.



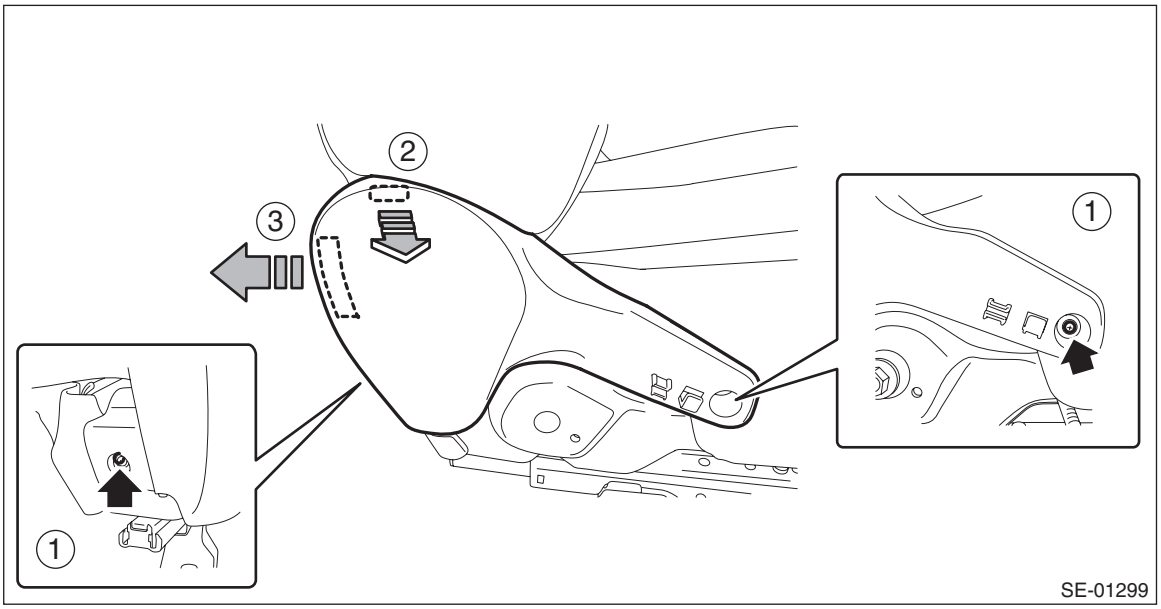
6) Remove the cover - hinge front seat outer.
(1) Remove the screws.
(2) Release the claw in the upper section of the cover - hinge front seat outer.
(3) Release the claw in the rear section of the cover - hinge front seat outer.
(4) Release the claw in the front section of the cover - hinge front seat outer, then remove the cover - hinge front seat outer.



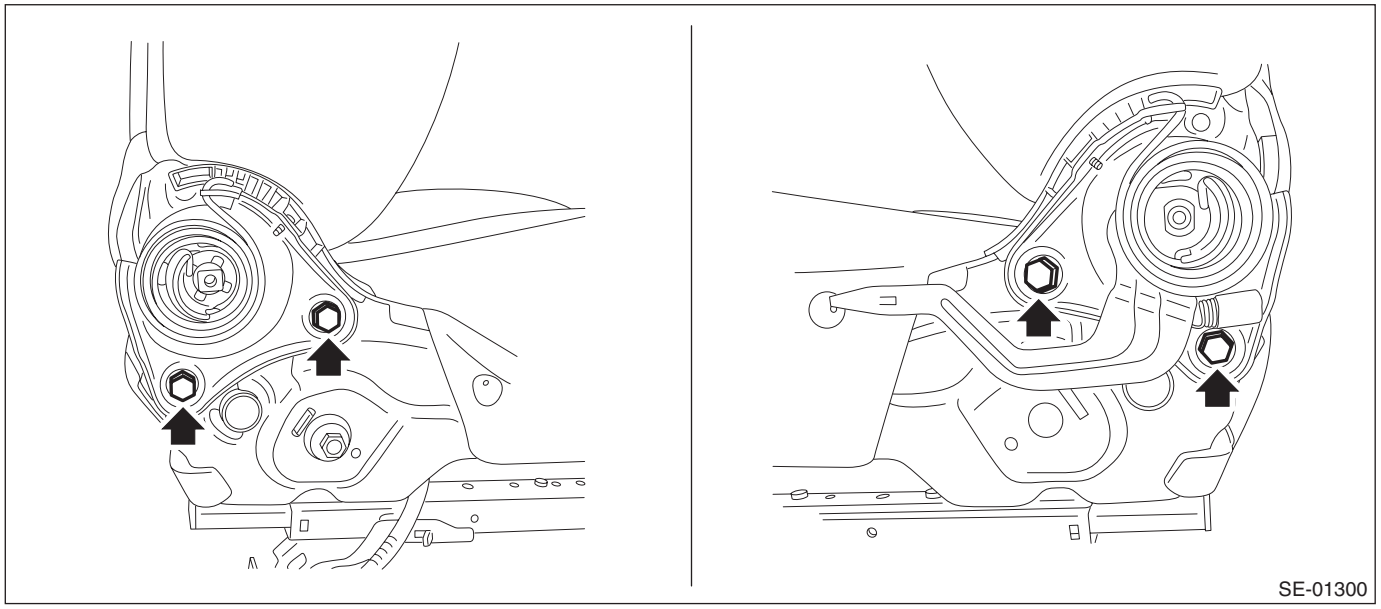
7) Remove the seat belt inner - front.
(1) Remove the nut, and remove the seat belt inner - front.
(2) Remove the clip for the seat belt inner - front located under the seat cushion assembly.



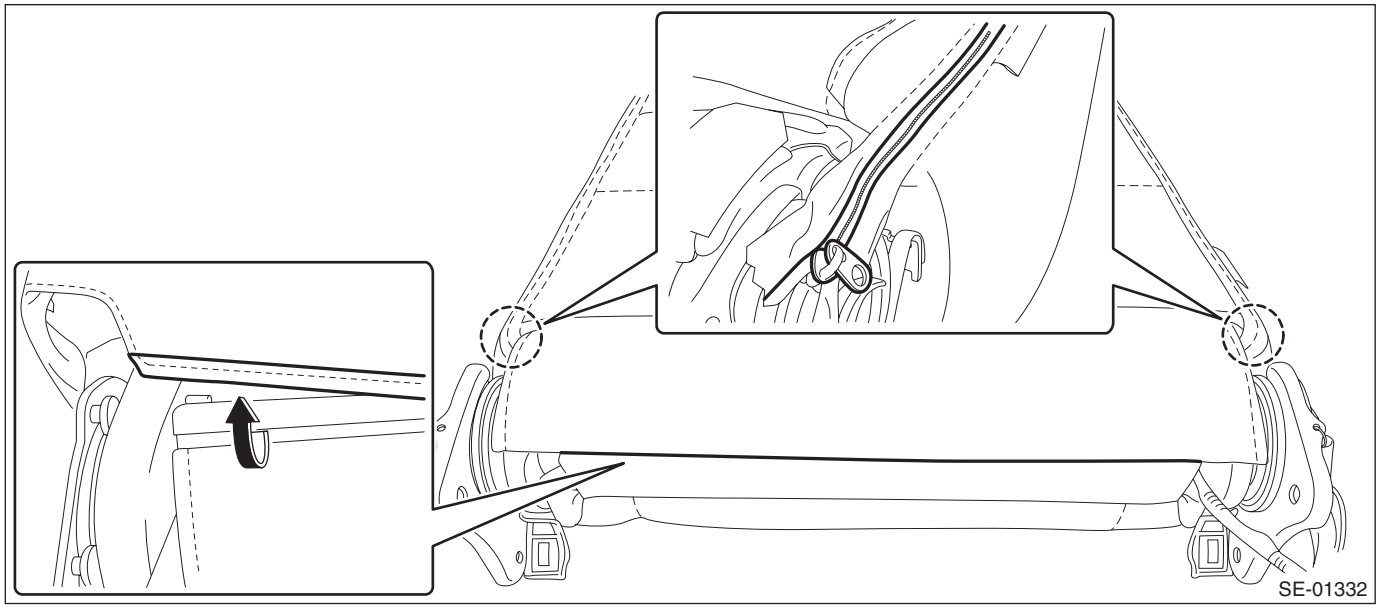
8) Remove the cover - hinge front seat inner.
(1) Remove the screws.
(2) Release the claw in the upper section of the cover - hinge front seat inner.
(3) Release the claw in the rear section of the cover - hinge front seat inner, then remove the cover - hinge front seat inner.



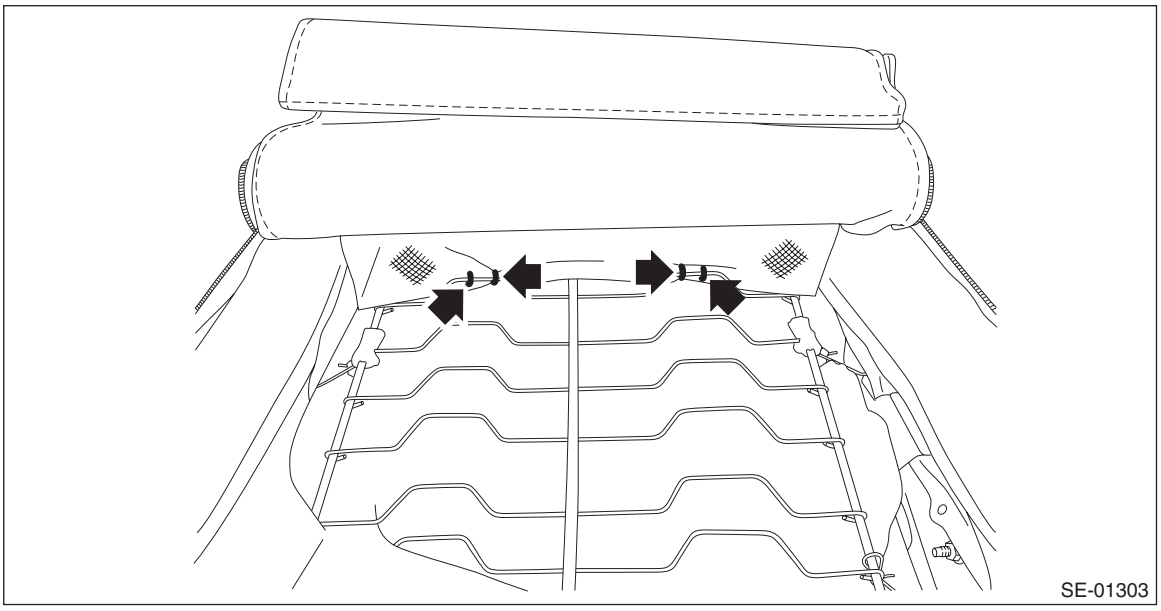
9) Separate the backrest assembly and the seat cushion assembly.
(1) Remove the clip for the side airbag harness located under the seat cushion assembly.
(2) Remove the bolts from reclining hinge of both sides.
(3) While taking care not to damage the airbag harness, separate the backrest assembly and the seat cushion assembly.



10) Remove the pad assembly - front seat backrest and the cover COMPL - front backrest.
(1) Remove the plastic fastener at the back side (bottom) of backrest assembly.
(2) Open the fastener at the rear side of backrest assembly.



(3) Remove the hog ring.

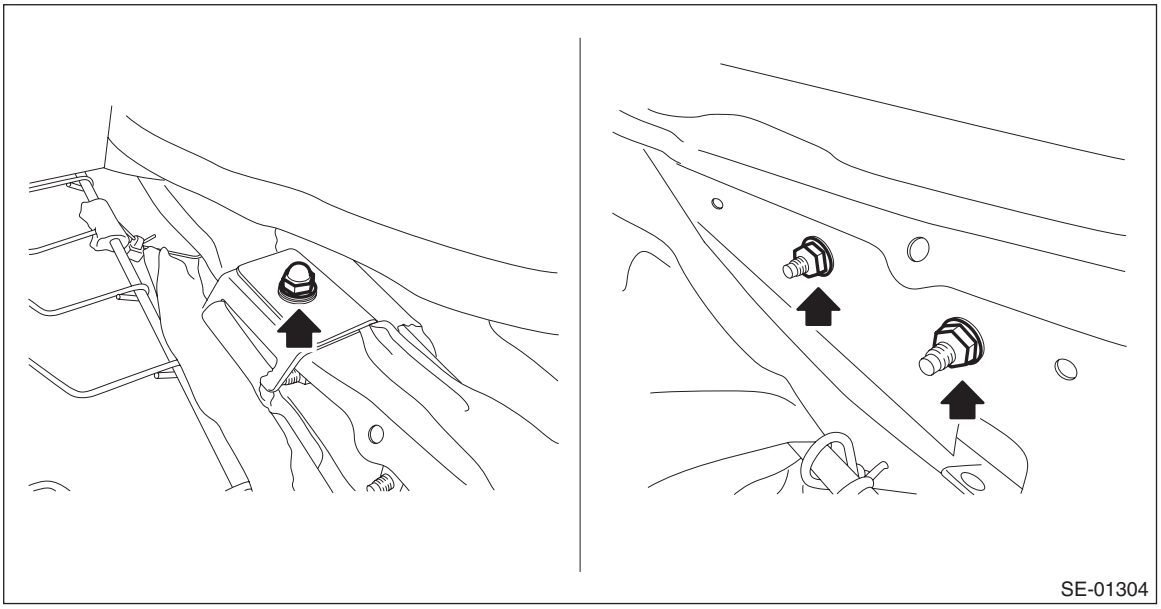


(4) Remove the pad assembly - front seat backrest and the cover COMPL - front backrest from the backrest assembly.

11) Remove the side airbag module.

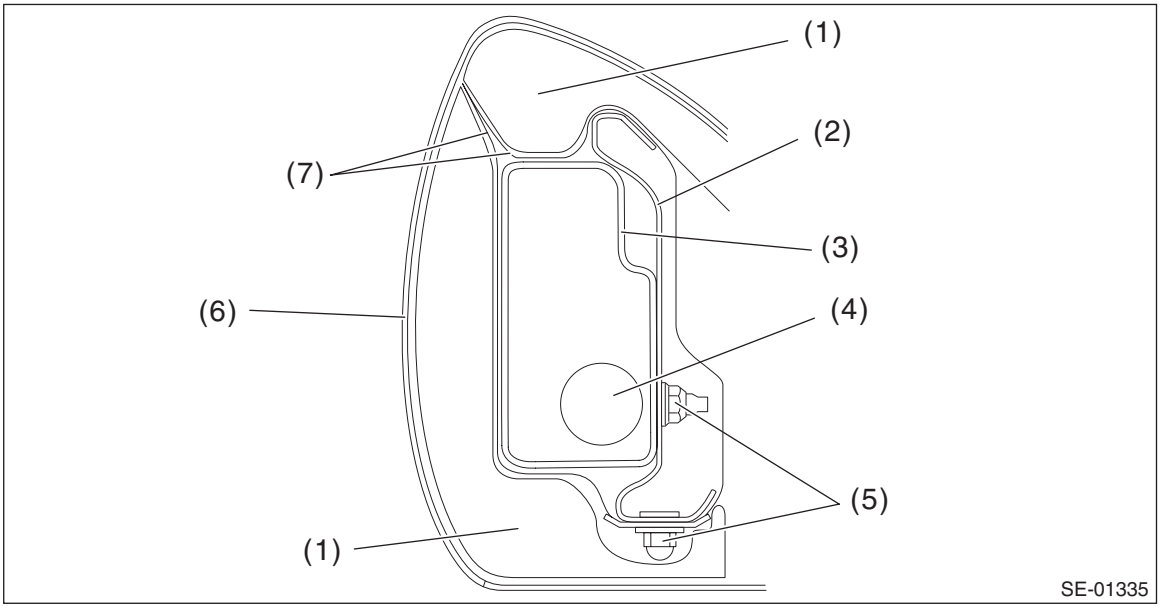
**CAUTION:**
**Do not open the protective cover of the side airbag module. If any damage is present in the protective cover or the cloth of side airbag module comes out from the protective cover slit, replace the side airbag module with a new part.**

(1) Remove the hexagon cap nut and nuts.
(2) While taking care not to damage the airbag protective cover, remove the side airbag module.



## B: INSTALLATION

**CAUTION:**
**• Refer to "CAUTION" of "General Description" before handling the airbag module. <Ref. to AB-11, CAUTION, General Description.>**
**• Make sure that the side airbag module is installed as shown in the figure.**



(1) Pad ASSY - front seat backrest
(2) Frame ASSY - front backrest
(3) Side airbag module protective cover
(4) Side airbag module inflator
(5) Nut
(6) Cover COMPL - front backrest
(7) Side airbag guide cloth

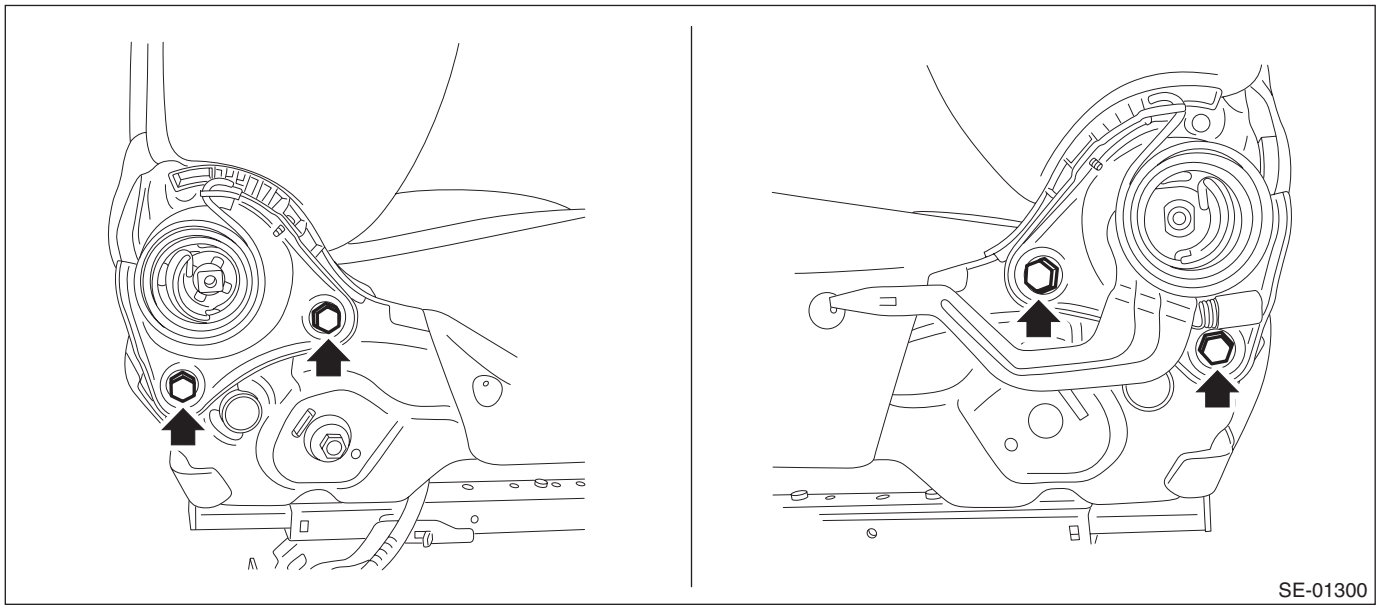
- **Be careful not to stain or damage the cover COMPL - front backrest during assembly.**
- **Do not reuse hog rings.**
- **Secure the hog ring using hog ring pliers.**
- **Install the hog rings to the specified points securely and make sure that there is no wrinkle or twisting on the cover COMPL - front backrest.**

1) Before installation, inspect the following items and replace any faulty part with a new one.
- Make sure that there is no foreign matter on side airbag module.
- Front seat, airbag module and mounting bracket are damaged or deformed.
- Harness and/or connector is cracked, deformed or open.
- Harness wire is exposed.

2) Install the side airbag module to the frame assembly - front backrest.

***Tightening torque:***
***Side airbag module: 6 N·m (0.61 kgf-m, 4.4 ft-lb)***

3) Install the side airbag harness to the frame assembly - front backrest.
4) Install the cover COMPL - front backrest.
5) Secure the backrest hinge.



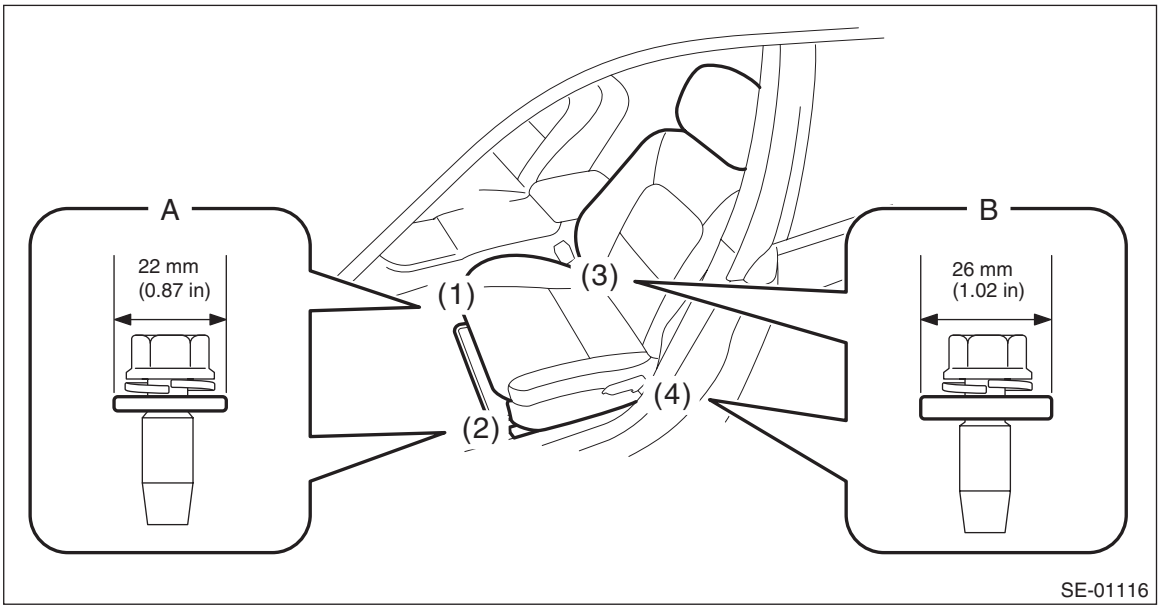
***Tightening torque:***
***Refer to "COMPONENT" of "General Description". <Ref. to SE-2, FRONT SEAT, COMPONENT, General Description.>***

6) Install the side airbag harness to the back of the seat cushion assembly using a cable clip.

**CAUTION:**
**After restoring the seat, operate the reclining and sliding mechanisms to check that the side airbag harness is not caught.**

7) Install the front seat assembly to the body.

**CAUTION:**
**• The front seat mounting bolts differ between the front mounting points and the rear mounting points. When installing the front seat, make sure that you are using correct bolts at correct positions.**
**• Tighten the slide rail assembly installing bolts in the order as shown in the figure, in several steps by gradually increasing the torque until they reach the specified torque.**



- **Front (bolt A): Washer diameter 22 mm (0.87 in)**
- **Rear (bolt B): Washer diameter 26 mm (1.02 in)**

***Tightening torque:***
***Front seat assembly: 53 N·m (5.40 kgf-m, 39.1 ft-lb)***

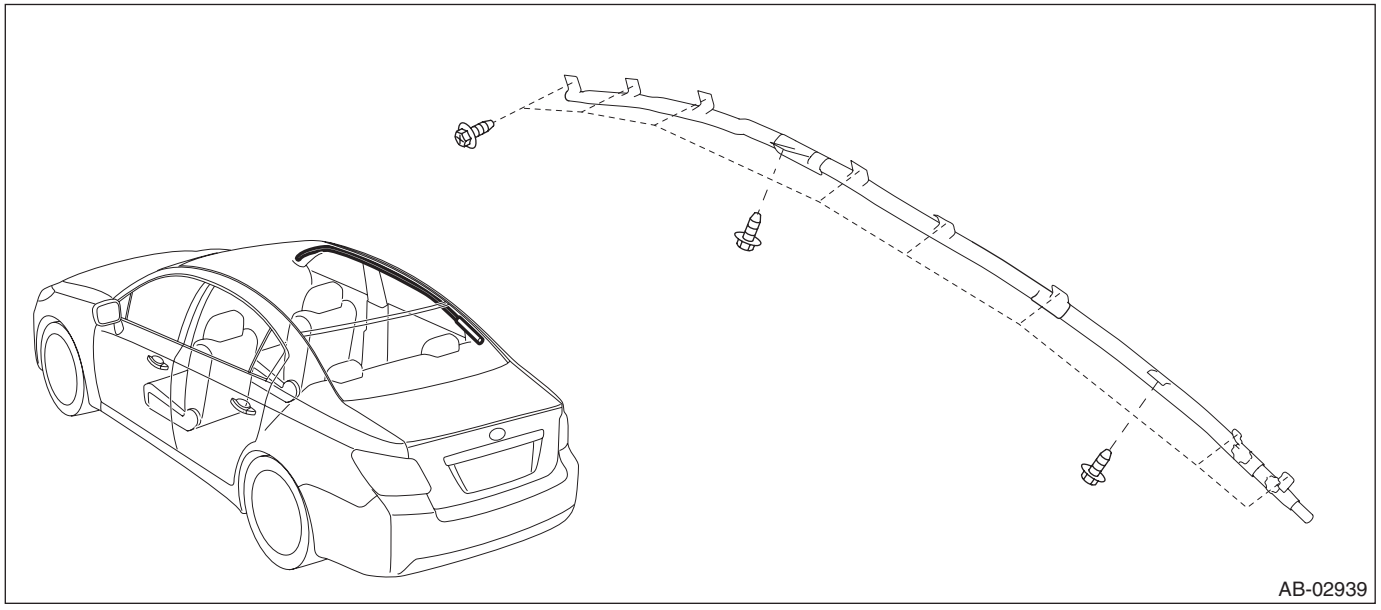
# 8. Curtain Airbag Module

## A: REMOVAL

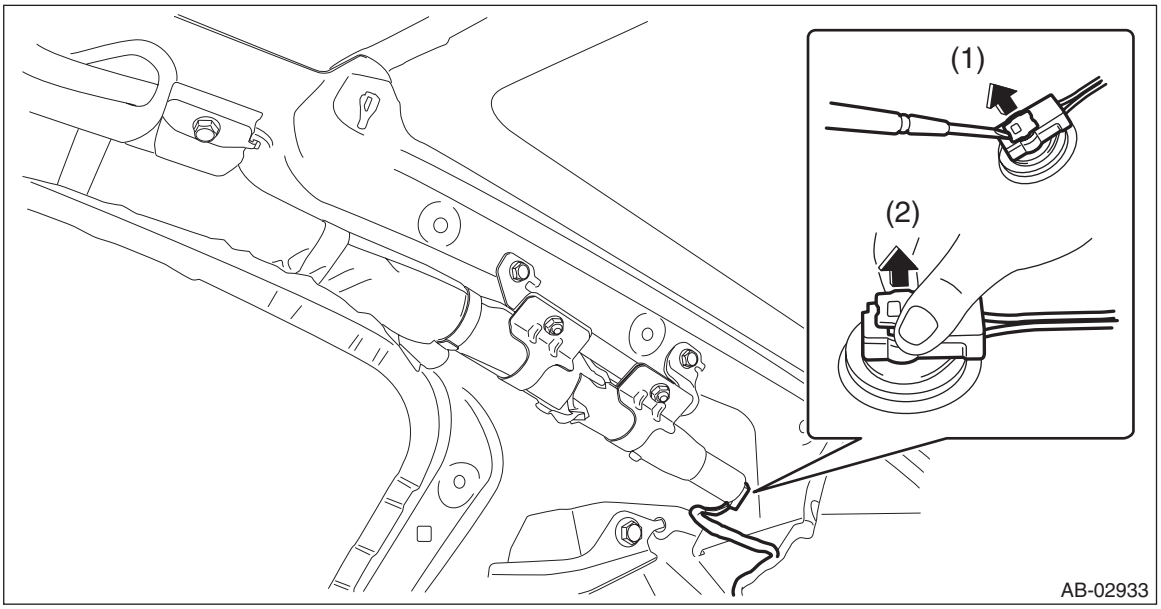
### 1. 4 DOOR MODEL

**CAUTION:**
**Refer to "CAUTION" of "General Description" before handling the airbag module. <Ref. to AB-11, CAUTION, General Description.>**
1) Turn the ignition switch to OFF.
2) Disconnect the ground cable from battery and wait for at least 60 seconds before starting work.
3) Remove the trim panel - roof assembly. <Ref. to EI-121, 4 DOOR MODEL, REMOVAL, Roof Trim.>
4) Remove the curtain airbag module.

**CAUTION:**
- **Be careful not to damage the curtain airbag module during removal.**
- **Never open the curtain airbag module before activation. Never reuse the deployed curtain airbag module.**
- **Remove the modules in order starting from the vehicle front.**
  (1) Remove all the bolts and clips, and remove the curtain airbag module.



(2) Disconnect the curtain airbag module connector. <Ref. to AB-24, DRIVER'S AIRBAG MODULE, CURTAIN AIRBAG MODULE & PRETENSIONER, PROCEDURE, Airbag Connector.>



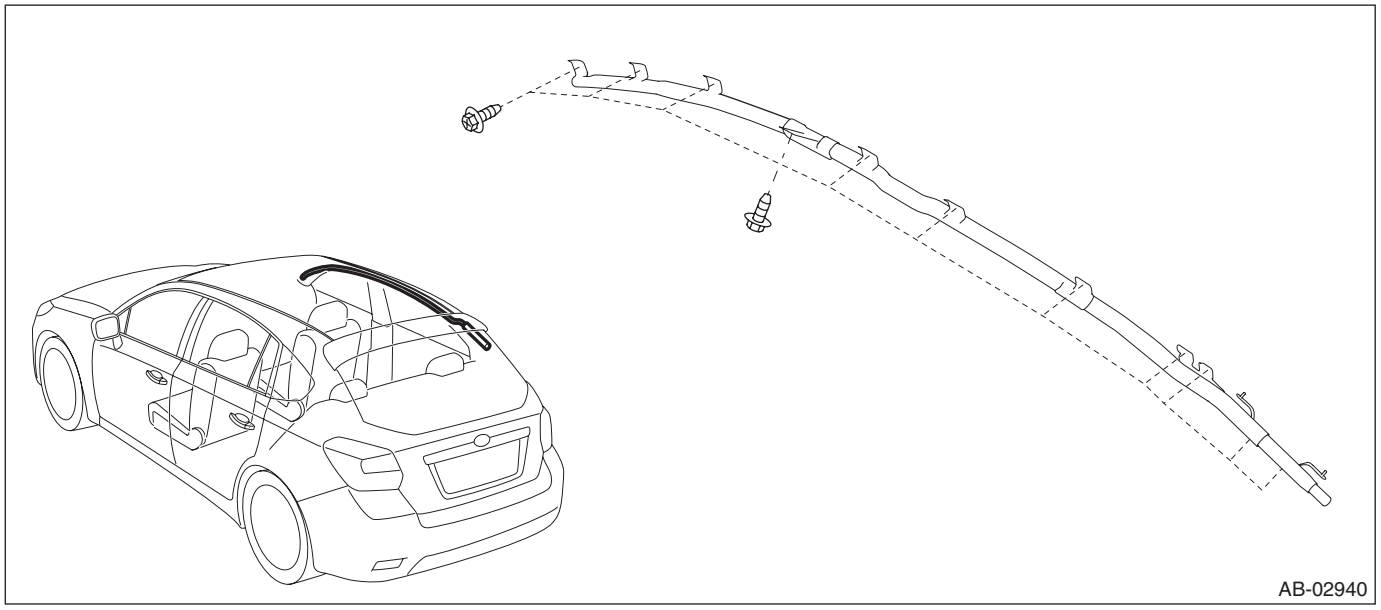
## 2. 5 DOOR MODEL/XV MODEL

**CAUTION:**
**Refer to "CAUTION" of "General Description" before handling the airbag module. <Ref. to AB-11, CAUTION, General Description.>**

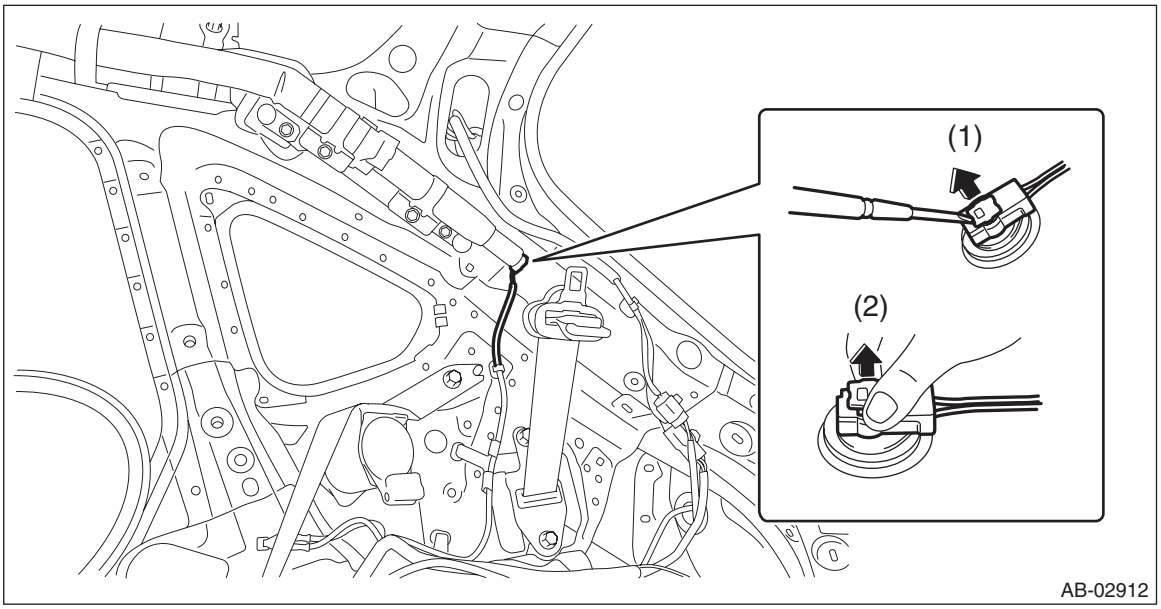
1) Turn the ignition switch to OFF.
2) Disconnect the ground cable from battery and wait for at least 60 seconds before starting work.
3) Remove the trim panel - roof assembly. <Ref. to EI-131, 5 DOOR MODEL/XV MODEL, REMOVAL, Roof Trim.>
4) Remove the curtain airbag module.

**CAUTION:**
- **Be careful not to damage the curtain airbag module during removal.**
- **Never open the curtain airbag module before activation. Never reuse the deployed curtain airbag module.**
- **Remove the modules in order starting from the vehicle front.**

(1) Remove all the bolts and clips, and remove the curtain airbag module.



(2) Disconnect the curtain airbag module connector. <Ref. to AB-24, DRIVER'S AIRBAG MODULE, CURTAIN AIRBAG MODULE & PRETENSIONER, PROCEDURE, Airbag Connector.>



## B: INSTALLATION

**CAUTION:**
**• Refer to "CAUTION" of "General Description" before handling the airbag module. <Ref. to AB-11, CAUTION, General Description.>**
**• When installing the curtain airbag module, install a specified part at specified place.**
**• Be careful not to damage the curtain airbag module during installation.**
**• Never open the curtain airbag module before activation. Never reuse the deployed curtain airbag module.**
**• Make sure that there are no foreign matter on airbag module.**

1) Before installation, inspect the following items and replace any faulty part with a new one.
- Airbag cover is scratched or torn.
- Harness and/or connector is cracked, deformed or open.
- Harness wire is exposed.
- Mounting bracket and securing clip are cracked or deformed.

2) Install each part in the reverse order of removal.

**CAUTION:**
**• Do not reuse the tether clips on the upper part of the front pillar trim. Always replace with a new part.**
**Once the tether clip is removed from the pillar trim, the retention power deteriorates and the front pillar trim may come off.**
**• Do not reuse the upper clips of the trim panel - center pillar UPR. Once the clip is removed, its holding force is reduced. Be sure to replace it with a new clip.**
**• Before installing the front pillar trim, check the condition of (white) protective unwoven cloth of curtain airbag. If it is damaged (airbag module cloth is exposed), replace the curtain airbag module assembly with a new part.**

***Tightening torque:***
***Curtain airbag module: 7.5 N·m (0.76 kgf-m, 5.5 ft-lb)***

# 9. Airbag Control Module

## A: REMOVAL

**CAUTION:**
**• Do not disassemble the airbag control module.**
**• If the airbag control module is deformed or if there is any trace of water on the module, replace the airbag control module with a new one.**
**• Do not drop the airbag control module.**
**• After removal, keep the airbag control module on a dry, clean surface away from moisture, heat and dust.**

1) Turn the ignition switch to OFF.

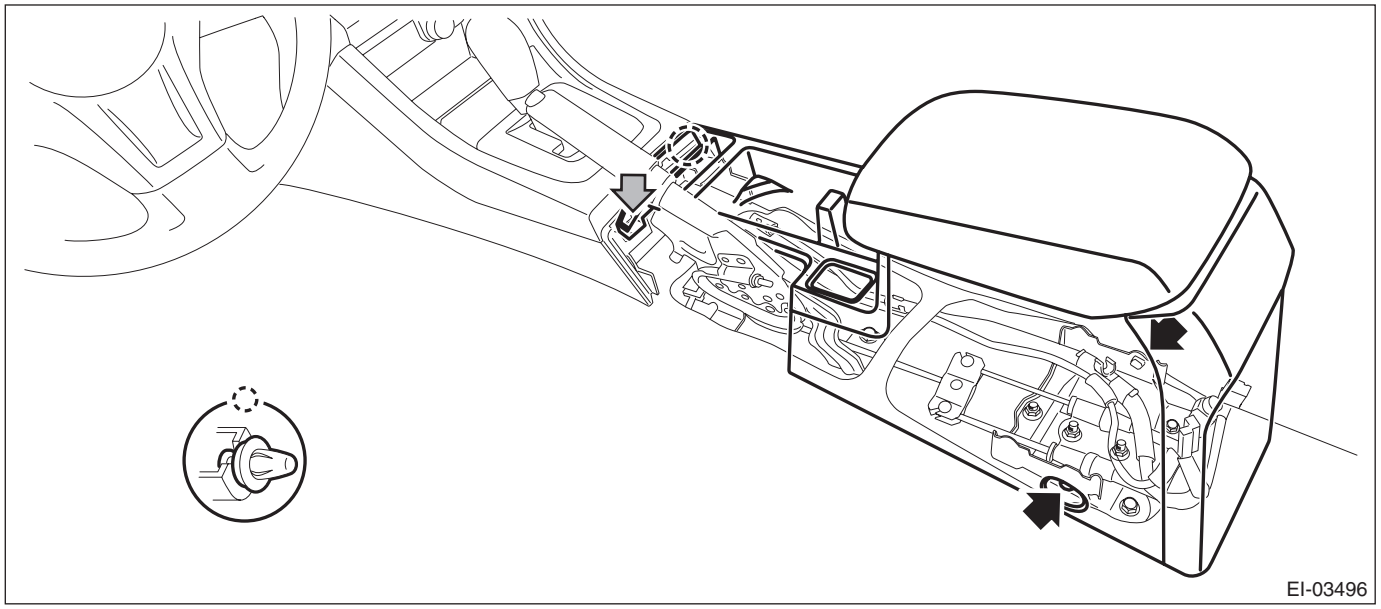
**CAUTION:**
**Disconnect the ground cable from battery and wait for at least 60 seconds before starting work.**

NOTE:
On CVT models, shift the select lever into “D” before disconnecting the battery ground cable.

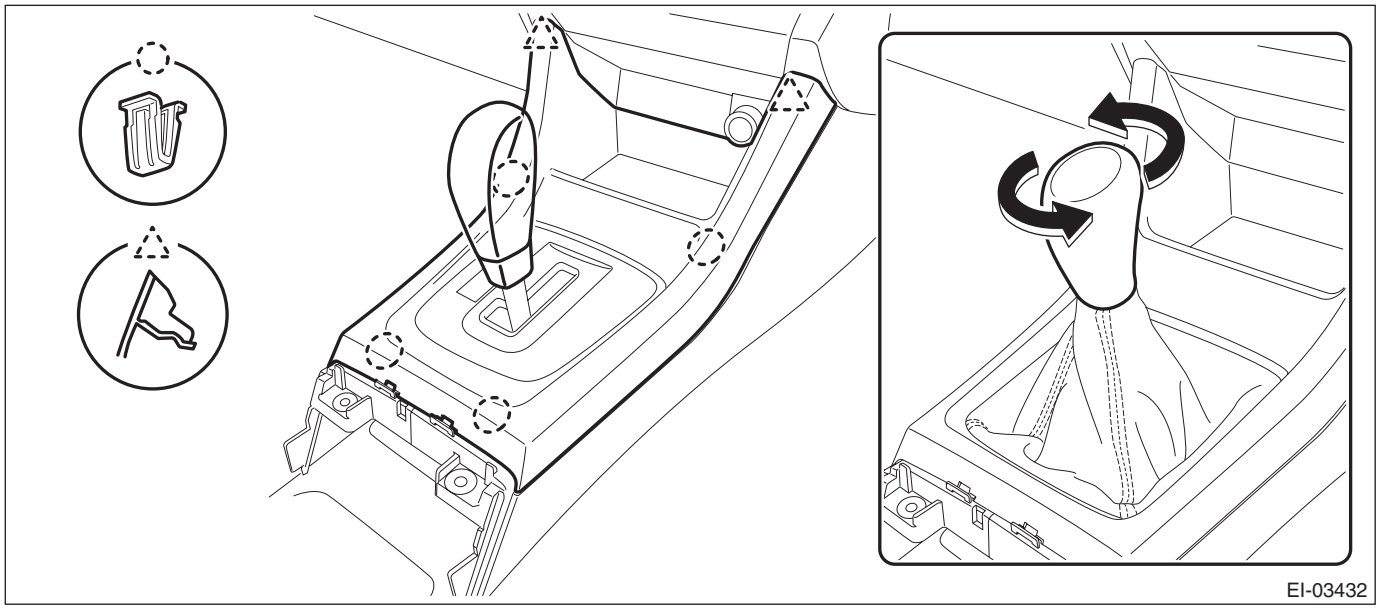
2) Remove the console box assembly.
   (1) Release the claws, and then remove the boot - hand brake.

   (2) Move the seat forward, and remove the bolts after detaching the left and right caps.

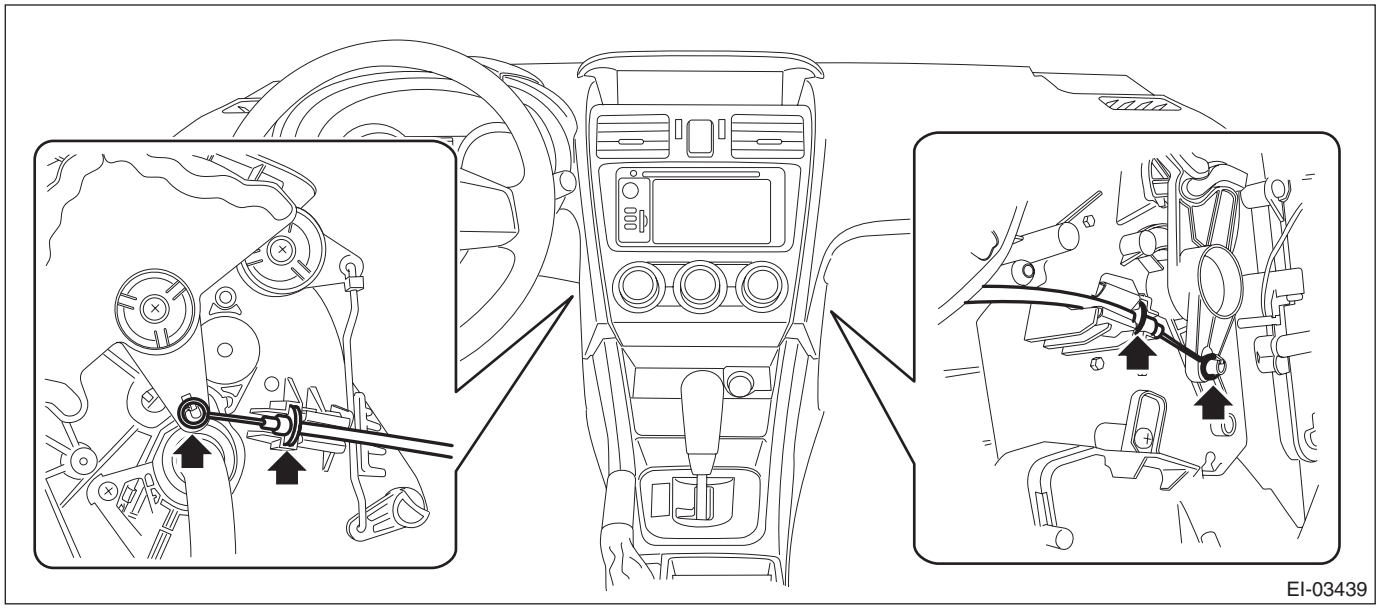
(3) Remove the screws, disconnect the harness connector and remove the console box assembly.



3) Remove the cover - shift lever.
(1) Remove the shift knob. (MT model)
(2) Release the clips and claws, then pull up the cover - shift lever.



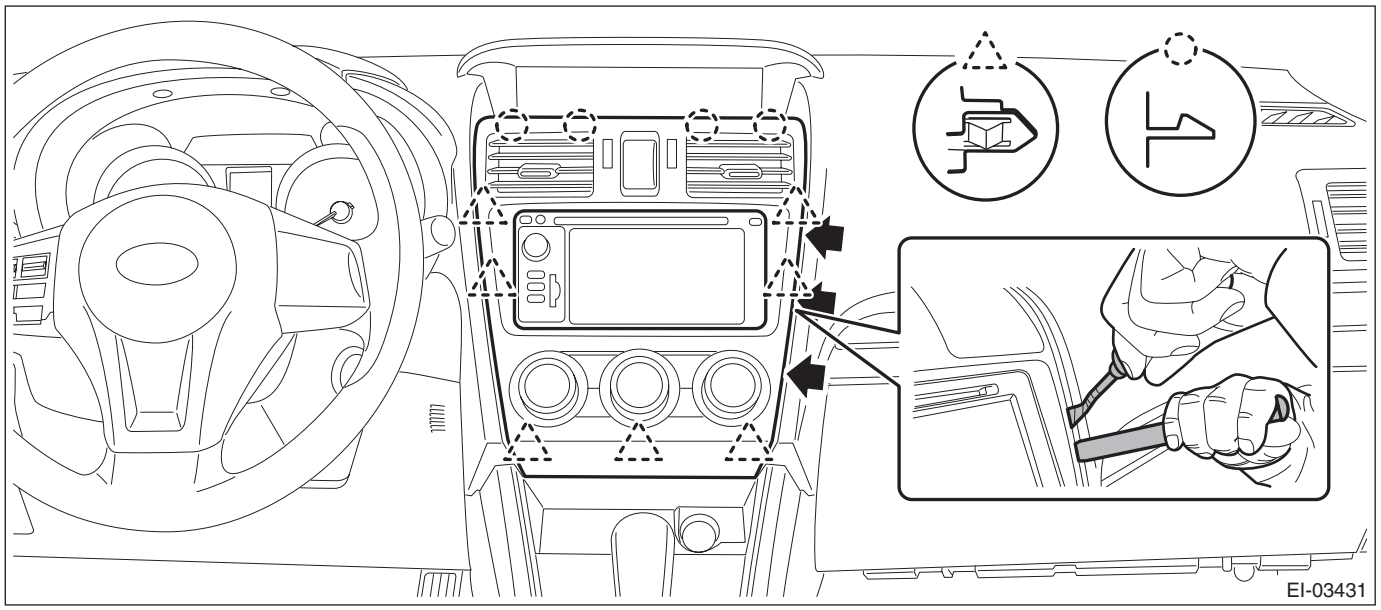
4) On manual A/C models, disconnect the control cables from both sides of the heater & cooling unit.



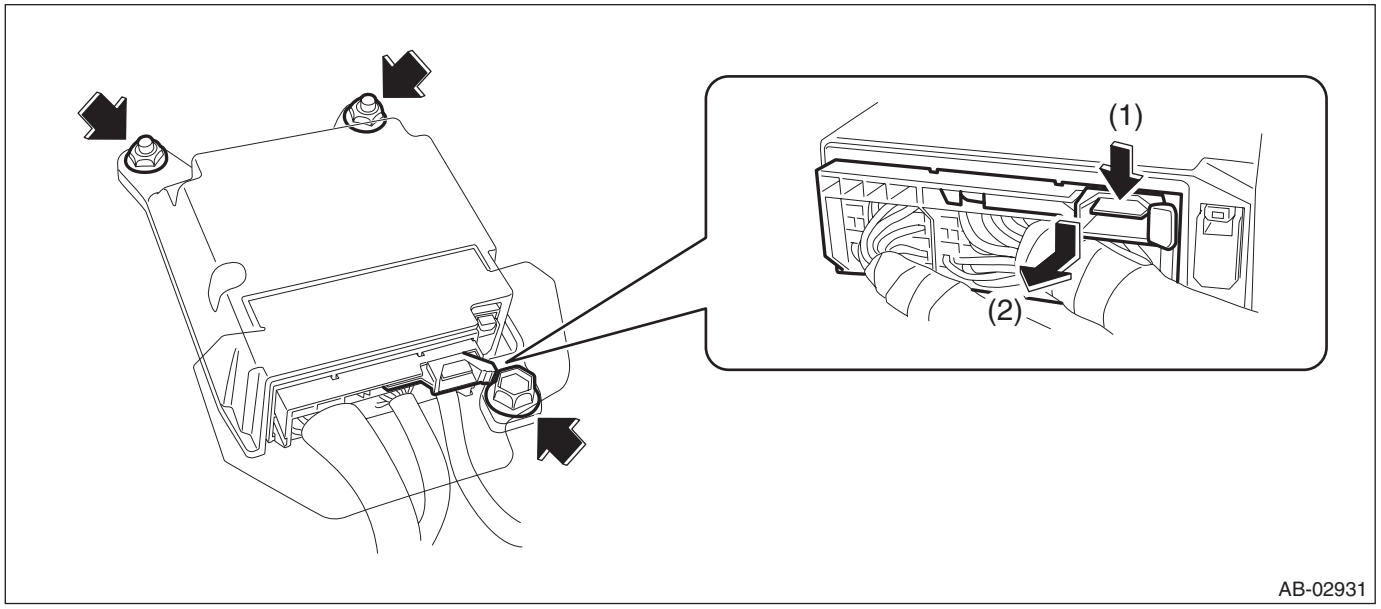
5) Remove the panel center assembly.

**CAUTION:**
- **Do not put your finger on the fin of the air vent grille. Doing so may damage the fin.**
- **Pull the panel center assembly slowly. Pulling with excessive force may damage the connector.**

(1) Insert a plastic remover to the three areas shown by the arrows, and lift up the panel center assembly slightly.
(2) With the panel center assembly lifted up slightly, release the claw by using a clip remover wrapped with protective tape.
(3) Release the rest of the claws, and pull out the panel center assembly.
(4) Disconnect the connectors, and remove the panel center assembly.



6) Remove the airbag control module.
(1) Disconnect the connector from airbag control module. <Ref. to AB-21, AIRBAG CONTROL MODULE, PROCEDURE, Airbag Connector.>
(2) Remove the bolt and nuts and remove the airbag control module.



## B: INSTALLATION

**CAUTION:**
**Do not reuse the bolt and nut.**
**Always use new bolts and nuts for them.**

1) Before installation, inspect the following items and replace any faulty part with a new one.
- Control module is deformed.
- Control module connector is damaged.
- Control module mounting bracket is damaged.

2) Install each part in the reverse order of removal.

***Tightening torque:***
***Airbag control module: 25 N·m (2.55 kgf-m, 18.4 ft-lb)***
***Console box assembly: 6.5 N·m (0.66 kgf-m, 4.8 ft-lb)***

# 10.Front Sub Sensor

## A: REMOVAL

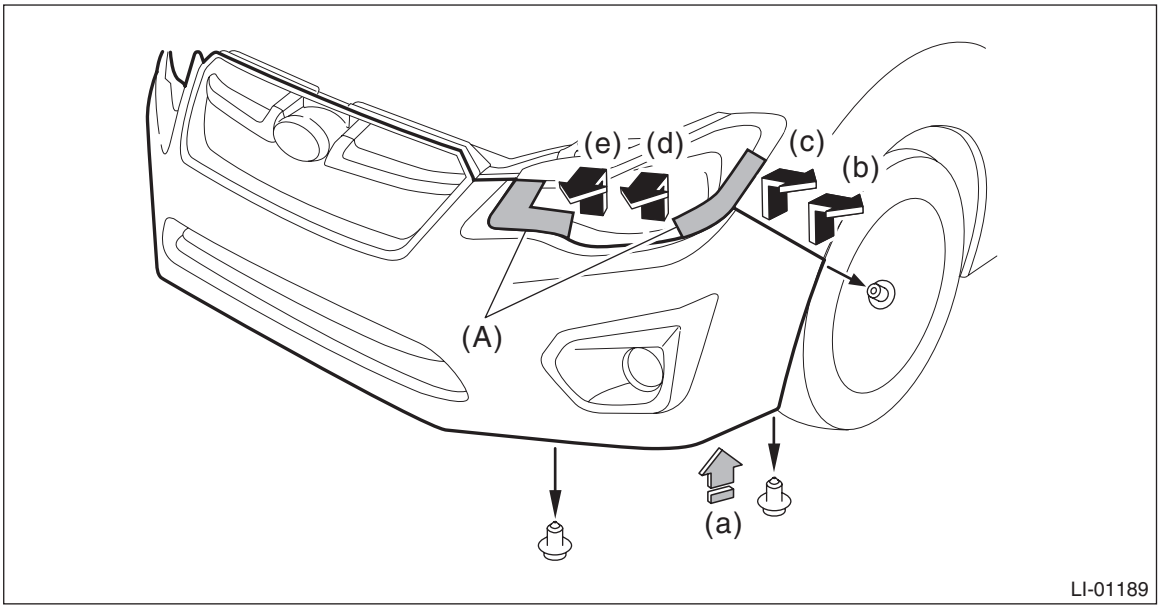
1) Disconnect the ground cable from battery and wait for at least 60 seconds before starting work.
2) Remove the bumper face - front.
   (1) Remove the screws and clips, and turn over the mud guard - front, and then disconnect the connectors of the fog light assembly - front on the LH and RH sides. (Model with fog light)

   (2) Remove the clips at the upper side of the bumper face - front.
   (3) Remove the clips from the fender.
   (4) Remove the clips at the lower side of the bumper face - front.

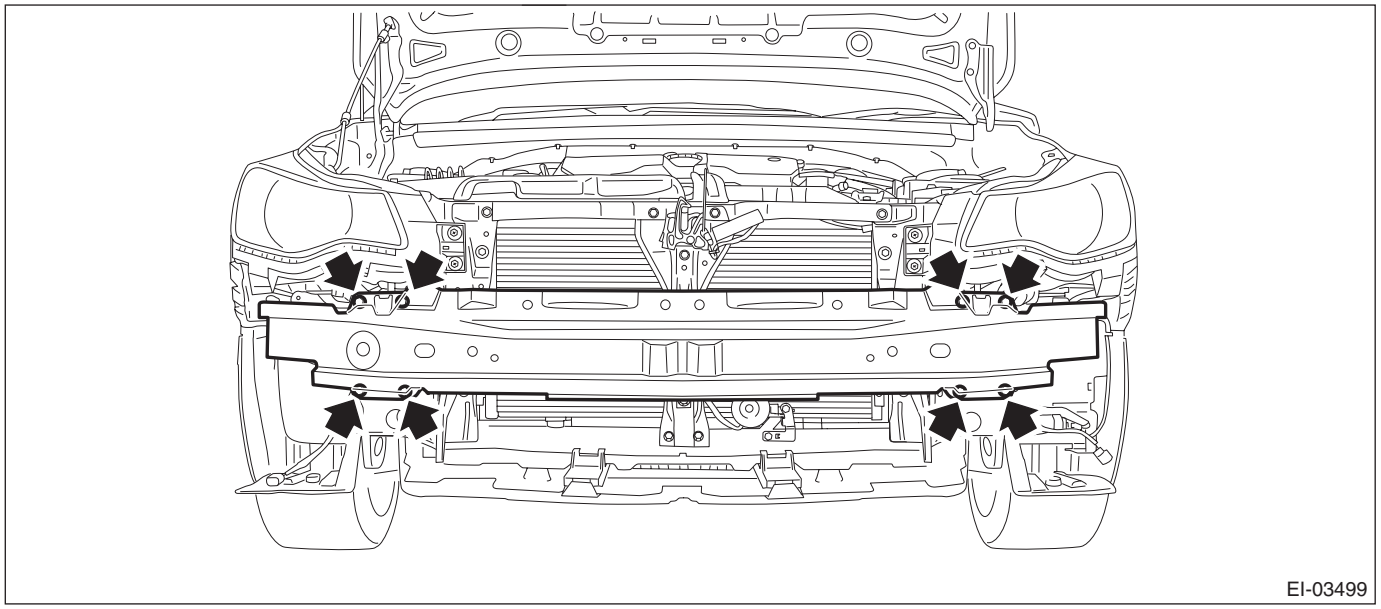
   (5) Apply protective tape (A) to the light assembly - head.

(6) Release the clips, and while pushing up the lower side (a) of the bumper face - front, remove in the order from (b) to (e).

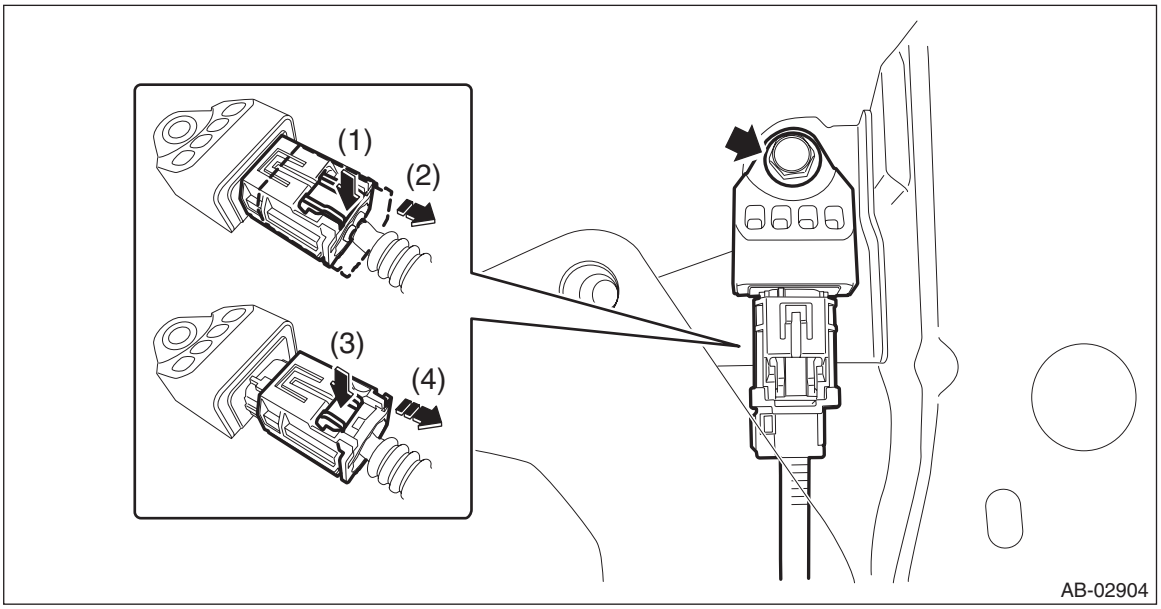
**CAUTION:**
**Do not pull forcibly. It may damage the flange sections of the bumper face - front.**



NOTE:
Detach the opposite side in the same manner.
3) Remove the bolts, and remove the bumper beam COMPL - front.



4) Remove the bolt, and then detach the front sub sensor. <Ref. to AB-25, FRONT SUB SENSOR, PROCEDURE, Airbag Connector.>



## B: INSTALLATION

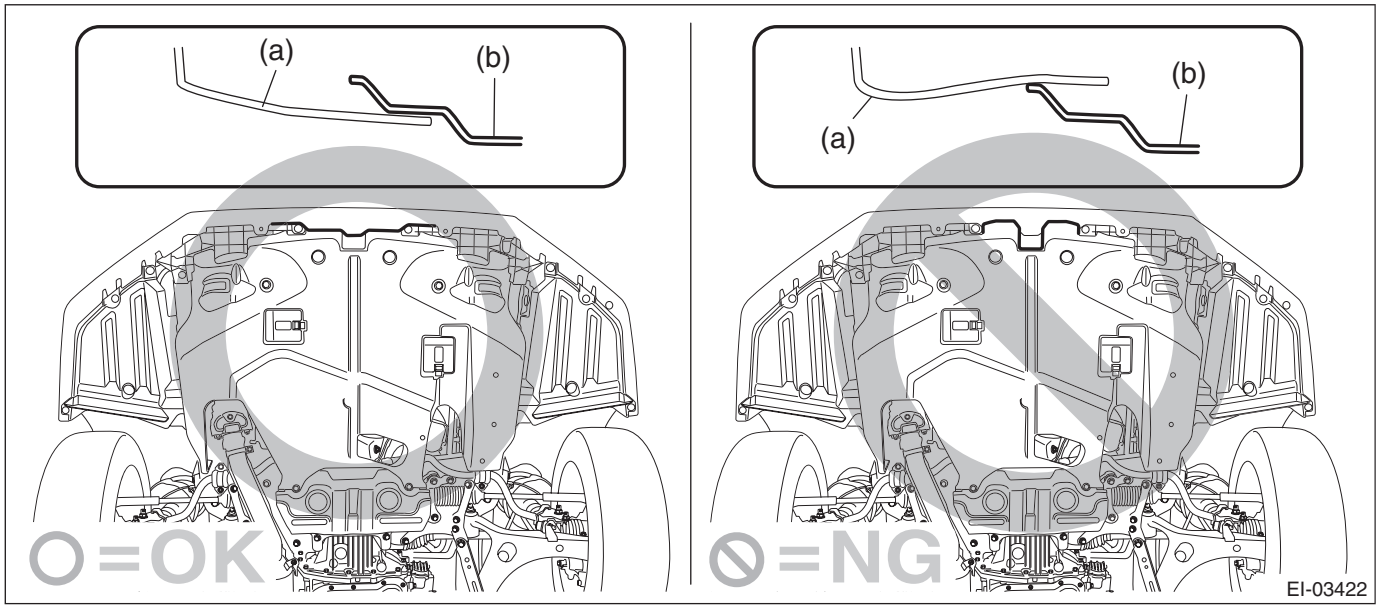
**CAUTION:**
- **If the airbag has been activated, replace the front sub sensor with a new part.**
- **Do not reuse the bolt and nut.**

**Always replace with the specified new bolts and nuts.**
- **When installing the sensor, insert the set pin on the backside of the sensor into the hole on the body side securely.**

1) Before installation, inspect the following items and replace any faulty part with a new part.
- Front sub sensor damage
- Connector damage

2) Install each part in the reverse order of removal.

**CAUTION:**
**Install the bumper face so that the under cover front end (b) comes inside the front bumper face (a).**

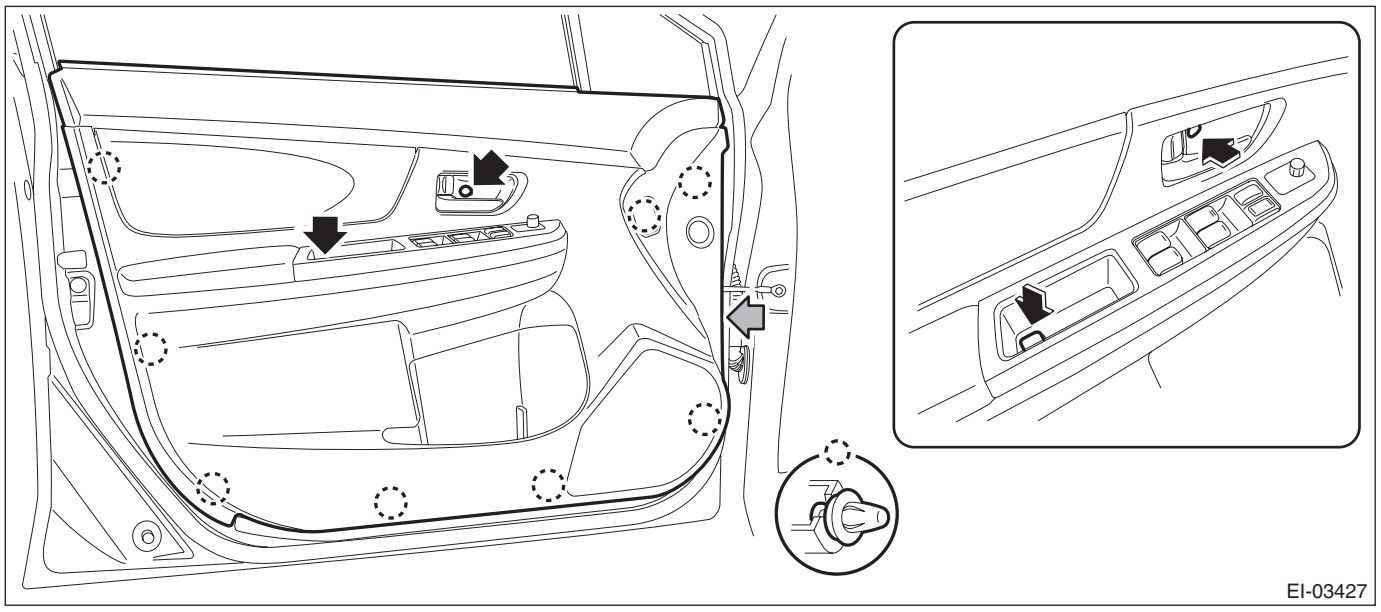


***Tightening torque:***
***Front sub sensor: 13 N·m (1.33 kgf-m, 9.6 ft-lb)***
***Bumper beam COMPL - front: 32 N·m (3.36 kgf-m, 24.3 ft-lb)***

# 11.Front Door Impact Sensor

## A: REMOVAL

1) Operate the power window switch to close the front door glass.
2) Turn the ignition switch to OFF.
3) Disconnect the ground cable from battery and wait for at least 60 seconds before starting work.
4) Remove the trim panel - front door.
   (1) Open the cover and remove the screw.
   (2) Remove the clips, and remove the trim panel - front door from the door panel.



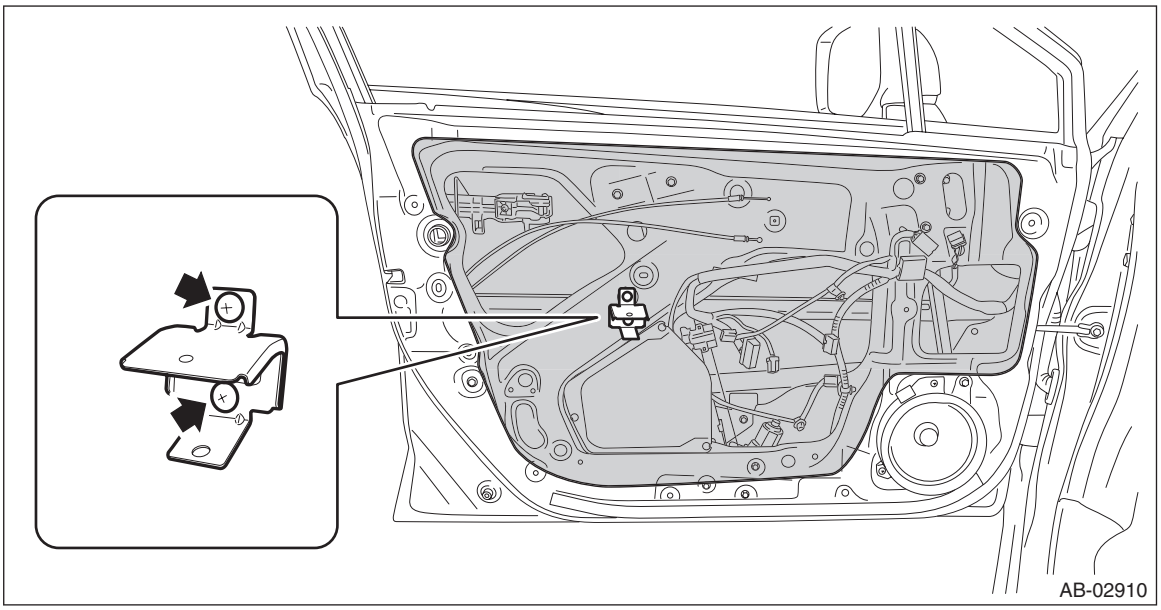
NOTE:
It is easier to remove the door trim if the removal is performed from the gray arrow section.
   (3) Detach the door lock cable (a) and door open cable (b) from the remote assembly - door.

   (4) Disconnect the harness connector and remove the trim panel - front door.

5) Remove the sealing cover.

**CAUTION:**
- **Carefully remove the butyl tape. Excessive force will easily break the cover.**
- **If the sealing cover gets broken, replace it with a new part.**

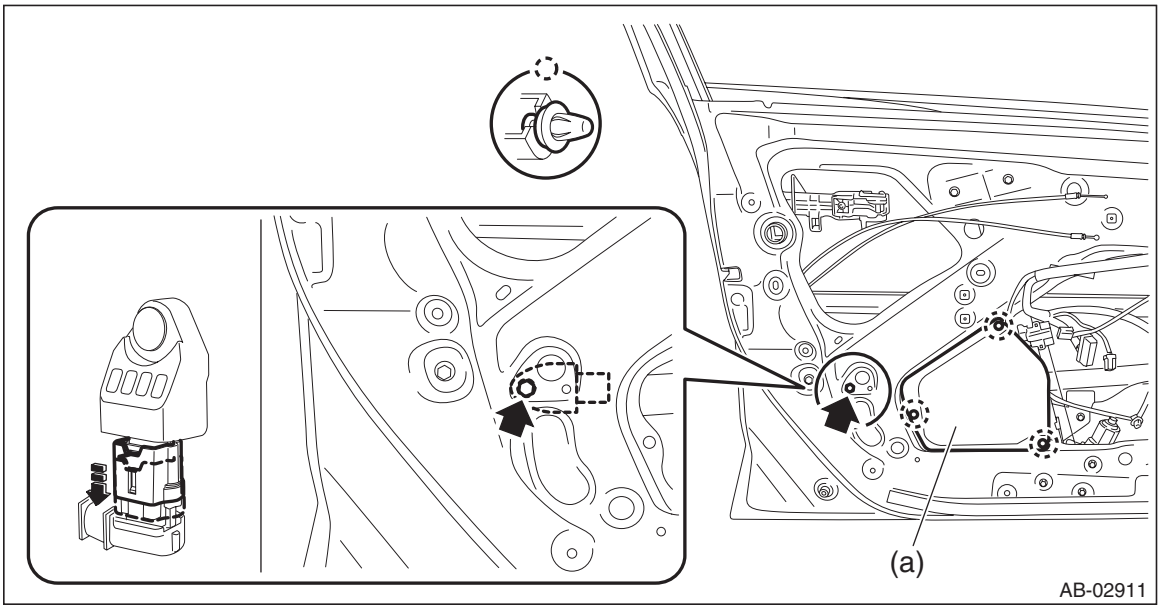
(1) Remove the screw to remove the bracket - door trim.
(2) Carefully remove the butyl tape to remove the sealing cover - front door.



6) Remove the front door impact sensor.
(1) Remove the front door inner pad (a).

**CAUTION:**
**If the clip is damaged, replace it with a new part because the panel assembly - front door may be deformed.**

(2) Remove the nuts and then remove the front door impact sensor.
(3) Disconnect the airbag connector and remove the front door impact sensor. <Ref. to AB-27, FRONT DOOR IMPACT SENSOR AND SATELLITE SAFING SENSOR, PROCEDURE, Airbag Connector.>



## B: INSTALLATION

**CAUTION:**
**Do not reuse the bolt and nut.**
**Always replace with the specified new bolts and nuts.**

1) Before installation, inspect the following items and replace any faulty part with a new part.
- The front door impact sensor or connector is damaged.
- Inner panel area of the panel assembly - front door is deformed.
- Side airbag module has been activated.

***Tightening torque:***
***Front door impact sensor: 7.5 N·m (0.76 kgf-m, 5.5 ft-lb)***

2) Install each part in the reverse order of removal.

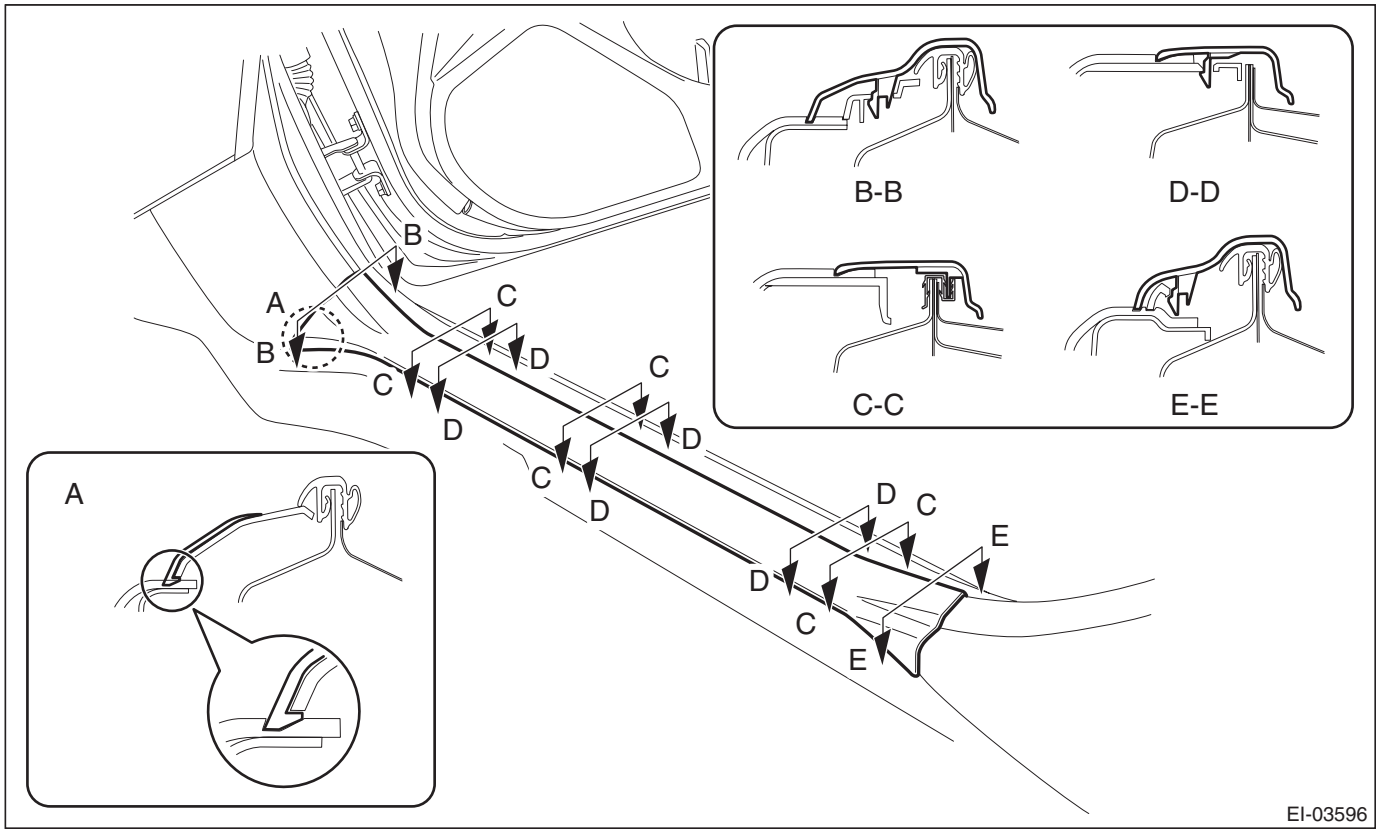
# 12.Side Airbag Sensor

## A: REMOVAL

**CAUTION:**
**• Airbag system satellite safing sensor is located in the lower of the rear seat cushion center. Before removing the rear seat, refer to "CAUTION" of "General Description" in "AIRBAG SYSTEM" section. <Ref. to AB-11, CAUTION, General Description.>**
**• The airbag system is fitted with a backup power supply. After disconnecting the battery ground cable, the airbag may operate if you do not wait for 60 seconds before starting the service of airbag system.**
1) Move the seat all the way forward, from which the side airbag sensor is to be removed.

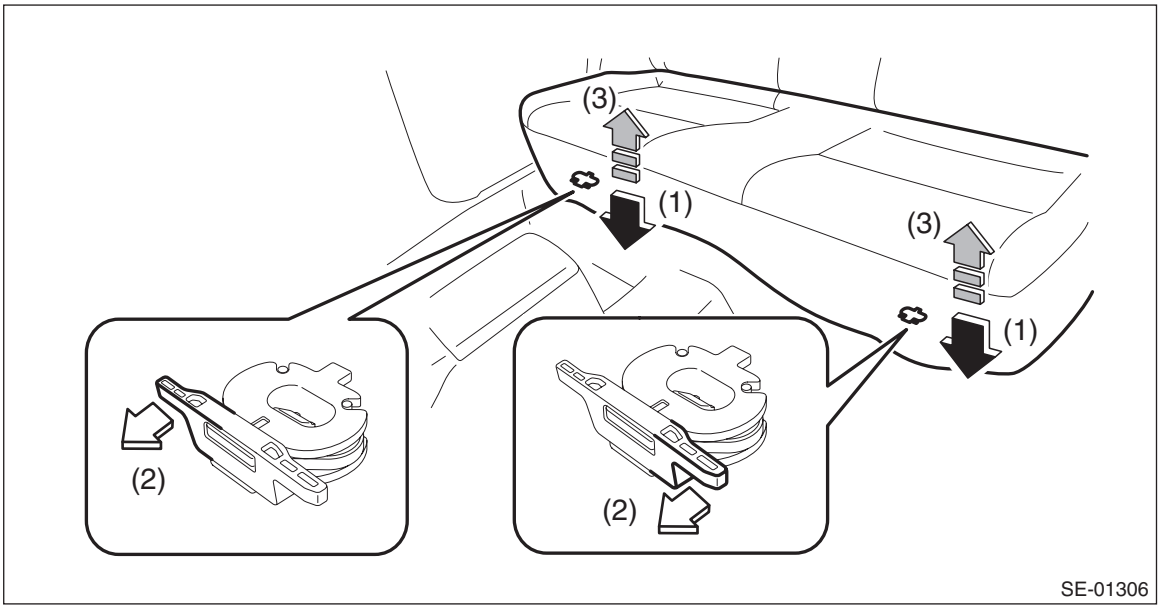
NOTE:
This is to remove the seat belt retractor assembly.
2) Turn the ignition switch to OFF.
3) Disconnect the ground cable from battery and wait for at least 60 seconds before starting work.
4) Release the claws, and then remove the cover side sill - front INN. (On the side where the side airbag sensor is removed)

**CAUTION:**
**Do not pull with excessive force. Doing so may damage the claws of the cover side sill - front INN.**

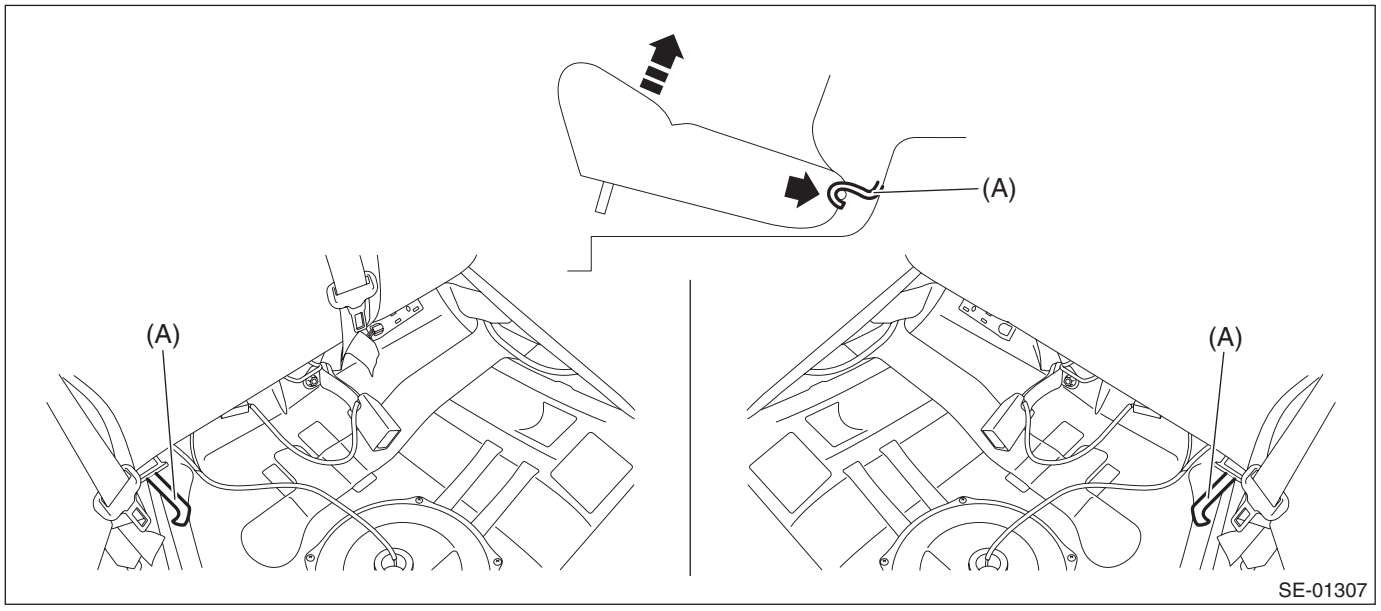


5) Remove the rear seat cushion assembly.
(1) Push the corners of the rear seat cushion from above.
(2) While pushing the corners of the rear seat cushion from above, pull the knob of the hook - seat cushion rear towards yourself.
(3) While pulling the knob towards yourself, disconnect the hooks by lifting up the rear seat cushion.

NOTE:
Pull the left side of the knob to disconnect the LH side hook, and pull the right side of the knob to disconnect the RH side hook.

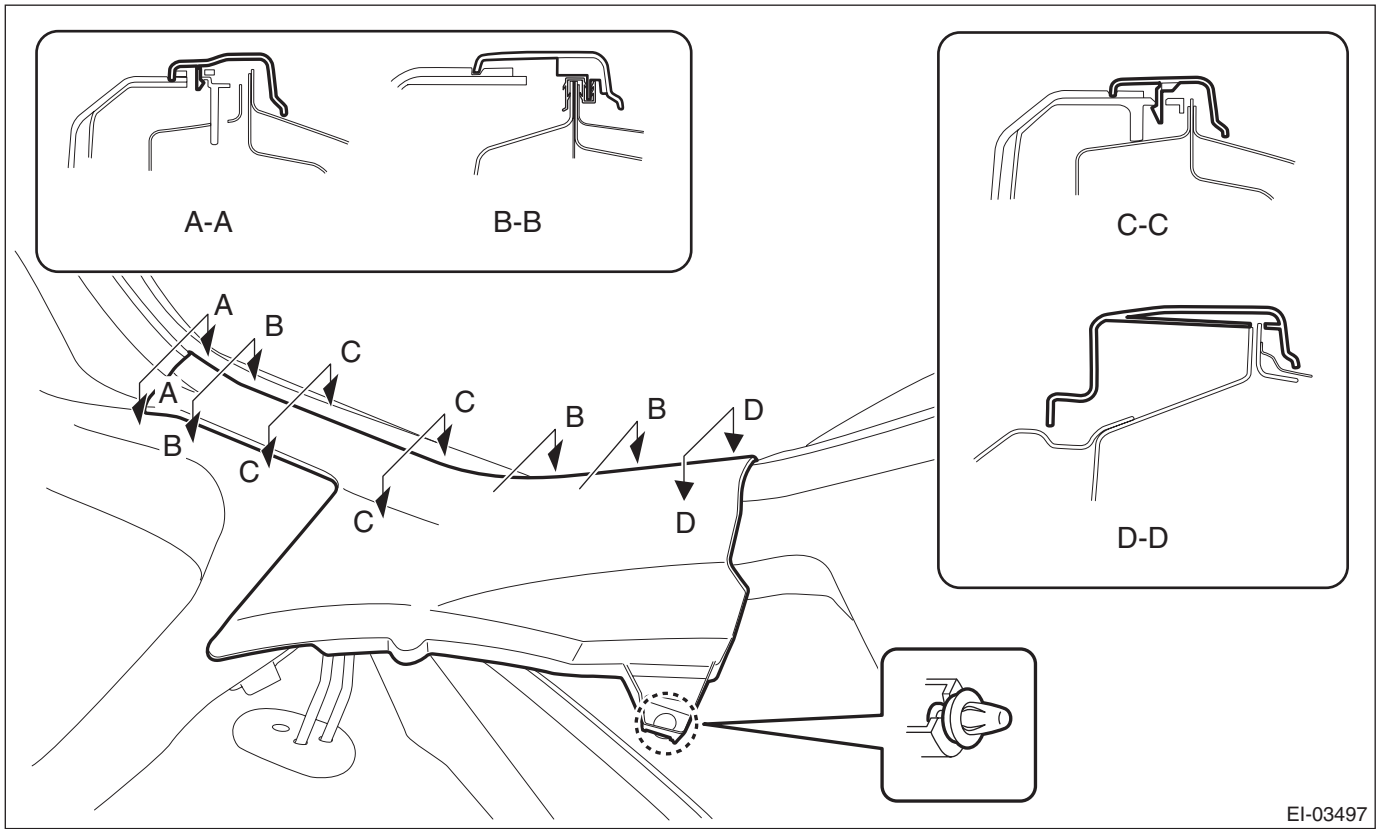


(4) Remove the hook (A) by pushing it back while lifting the front side of the rear seat cushion, and remove the rear seat cushion.



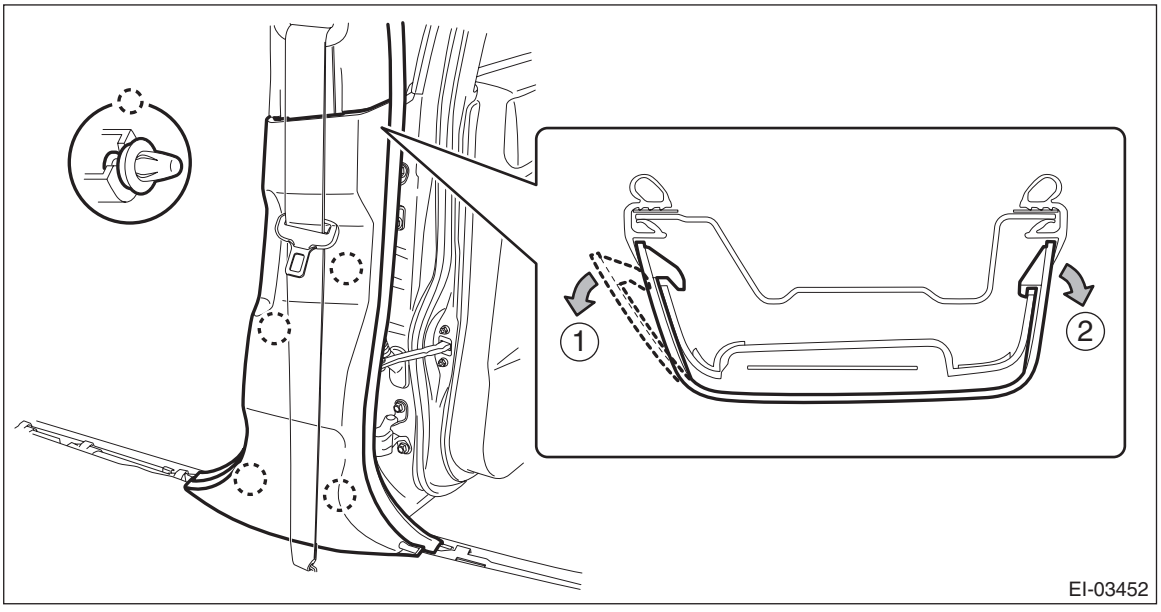
6) Release the clips and claws, and then remove the cover side sill - rear INN. (On the side where the side airbag sensor is removed)

**CAUTION:**
**Do not pull with excessive force. Doing so may damage the claws of the cover side sill - rear INN.**



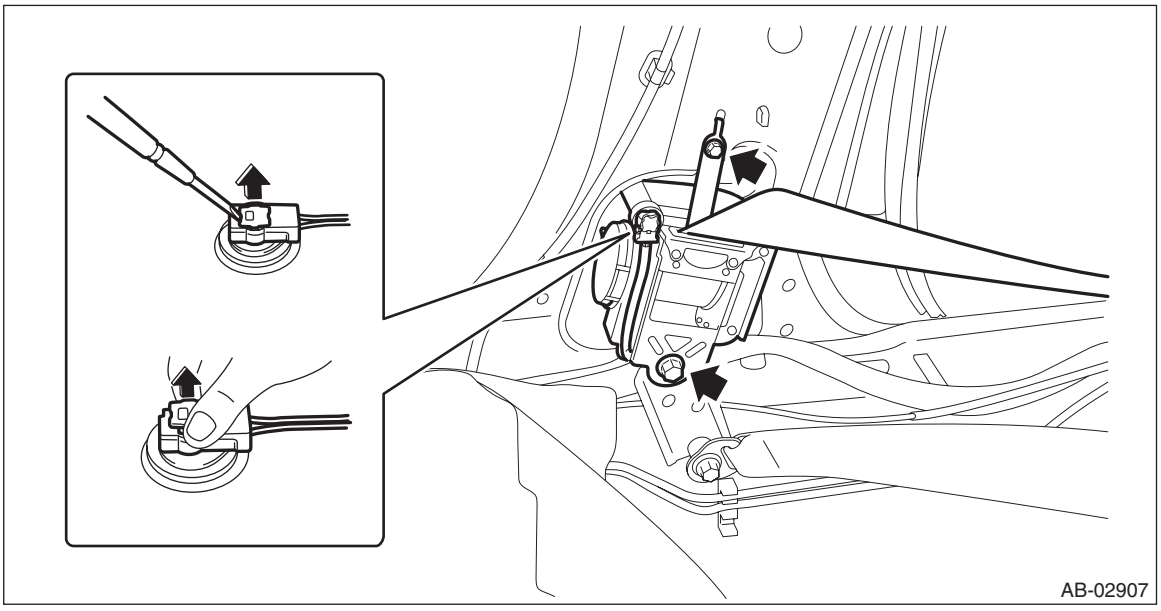
7) Remove the trim panel - center pillar LWR. (On the side where the side airbag sensor is removed)
(1) Release the clip by pulling the trim panel - center pillar LWR toward you.
(2) Expand the claws of the trim panel - center pillar LWR outward, and remove it from the trim panel - center pillar UPR.

**CAUTION:**
**Do not expand the trim panel - center pillar LWR excessively. Doing so may damage the trim.**



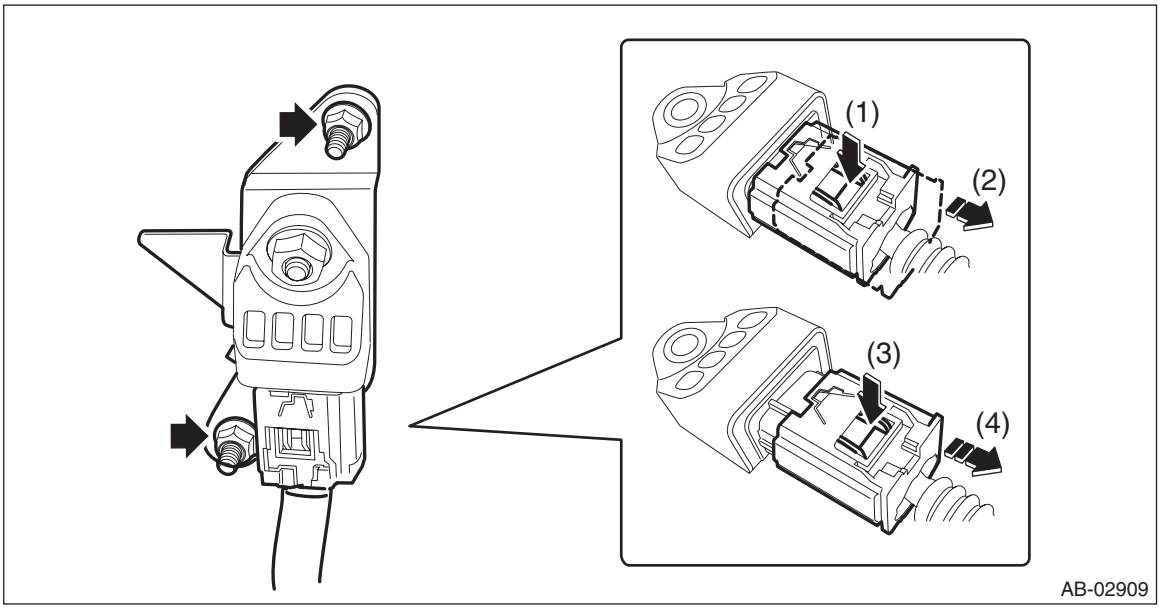
NOTE:
First release the claw located to the front of the vehicle.
8) Remove the seat belt retractor. (On the side where the side airbag sensor is removed)
(1) Turn over the floor mat to disconnect the belt tension sensor connector. <Ref. to AB-24, DRIVER'S AIRBAG MODULE, CURTAIN AIRBAG MODULE & PRETENSIONER, PROCEDURE, Airbag Connector.>

NOTE:
For XV model, disconnect the connector of the passenger's lap seat belt pretensioner.
(2) Remove the bolt to remove the seat belt retractor.



9) Remove the nuts and then remove the side airbag sensor. <Ref. to AB-29, SIDE AIRBAG SENSOR AND CURTAIN AIRBAG SENSOR, PROCEDURE, Airbag Connector.>

**CAUTION:**
- **Do not separate the side airbag sensor and bracket. It causes the airbag system malfunction.**
- **If the sensor is removed from the bracket, be sure to replace with a new part.**



## B: INSTALLATION

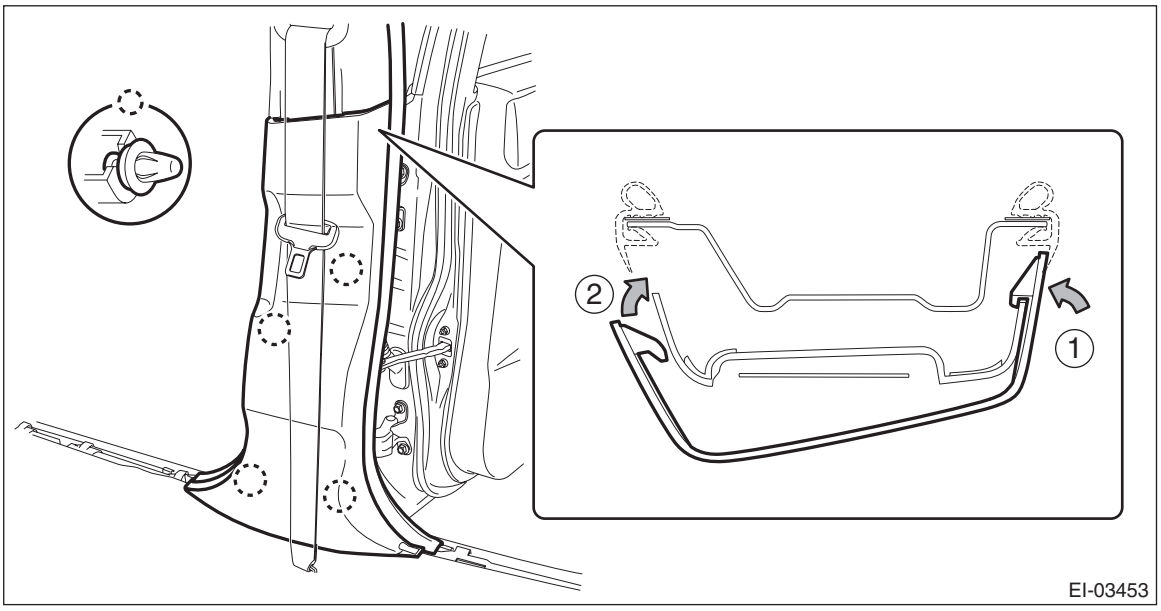
**CAUTION:**
**Do not reuse the bolt and nut.**
**Always replace with the specified new bolts and nuts.**

1) Before installation, inspect the following items and replace any faulty part with a new part.
- The side airbag sensor, sensor bracket, or connector are damaged.
- Side airbag module has been activated.

***Tightening torque:***
***Side airbag sensor: 7.5 N·m (0.76 kgf-m, 5.5 ft-lb)***

2) Install each part in the reverse order of removal.

NOTE:
Assemble the trim panel - center pillar LWR to the trim panel - center pillar UPR securely.



***Tightening torque:***
***Front seat belt: <Ref. to SB-2, FRONT SEAT BELT, COMPONENT, General Description.>***

# 13.Curtain Airbag Sensor

## A: REMOVAL

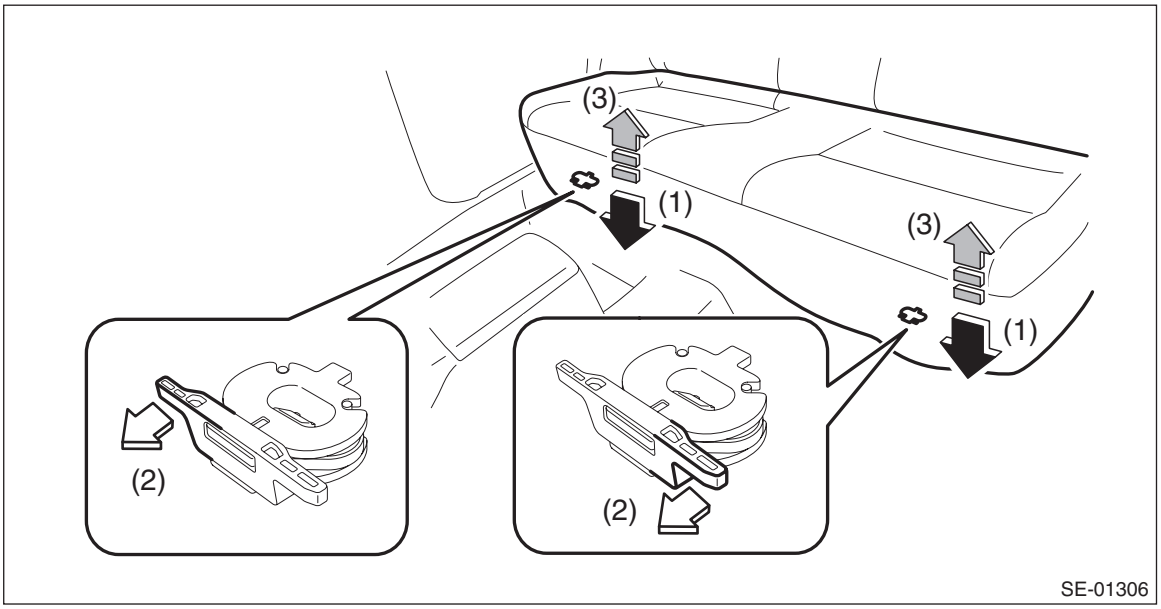
### 1. 4 DOOR MODEL

1) Disconnect the ground cable from battery and wait for at least 60 seconds before starting work.

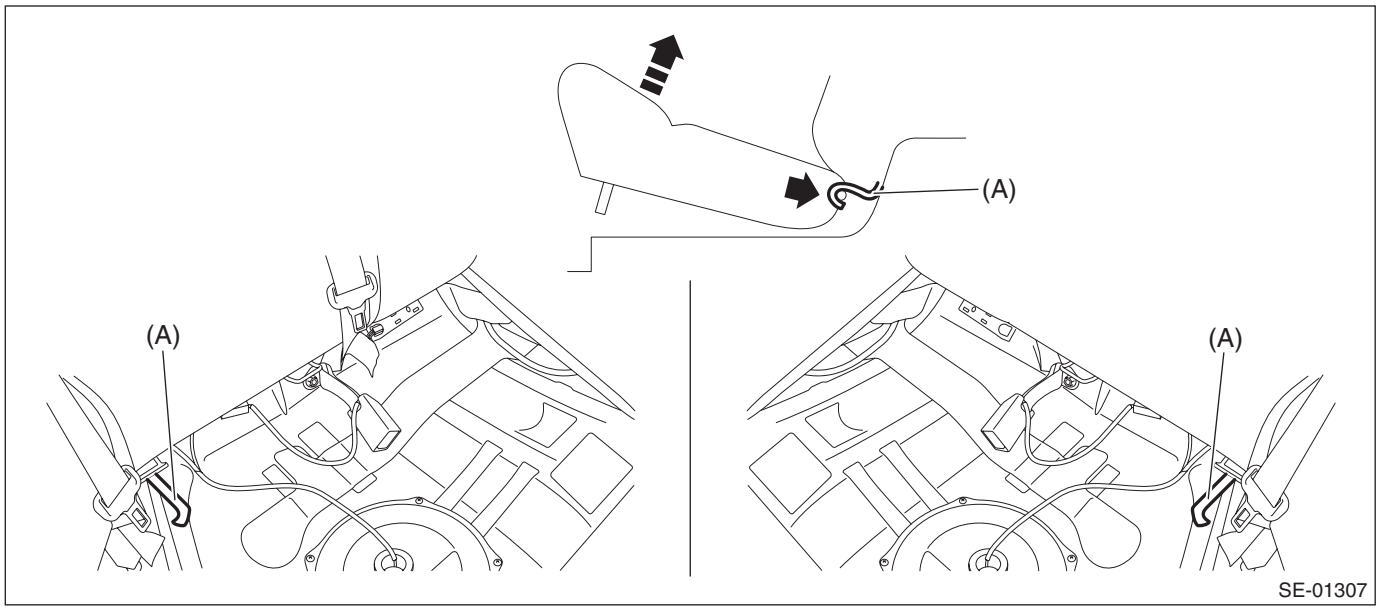
**CAUTION:**
**• Airbag system satellite safing sensor is located in the lower of the rear seat cushion center. Before removing the rear seat, refer to "CAUTION" of "General Description" in "AIRBAG SYSTEM" section. <Ref. to AB-11, CAUTION, General Description.>**
**• The airbag system is fitted with a backup power supply. After disconnecting the battery ground cable, the airbag may operate if you do not wait for 60 seconds before starting the service of airbag system.**

2) Remove the rear seat cushion assembly.
(1) Push the corners of the rear seat cushion from above.
(2) While pushing the corners of the rear seat cushion from above, pull the knob of the hook - seat cushion rear towards yourself.
(3) While pulling the knob towards yourself, disconnect the hooks by lifting up the rear seat cushion.

NOTE:
Pull the left side of the knob to disconnect the LH side hook, and pull the right side of the knob to disconnect the RH side hook.

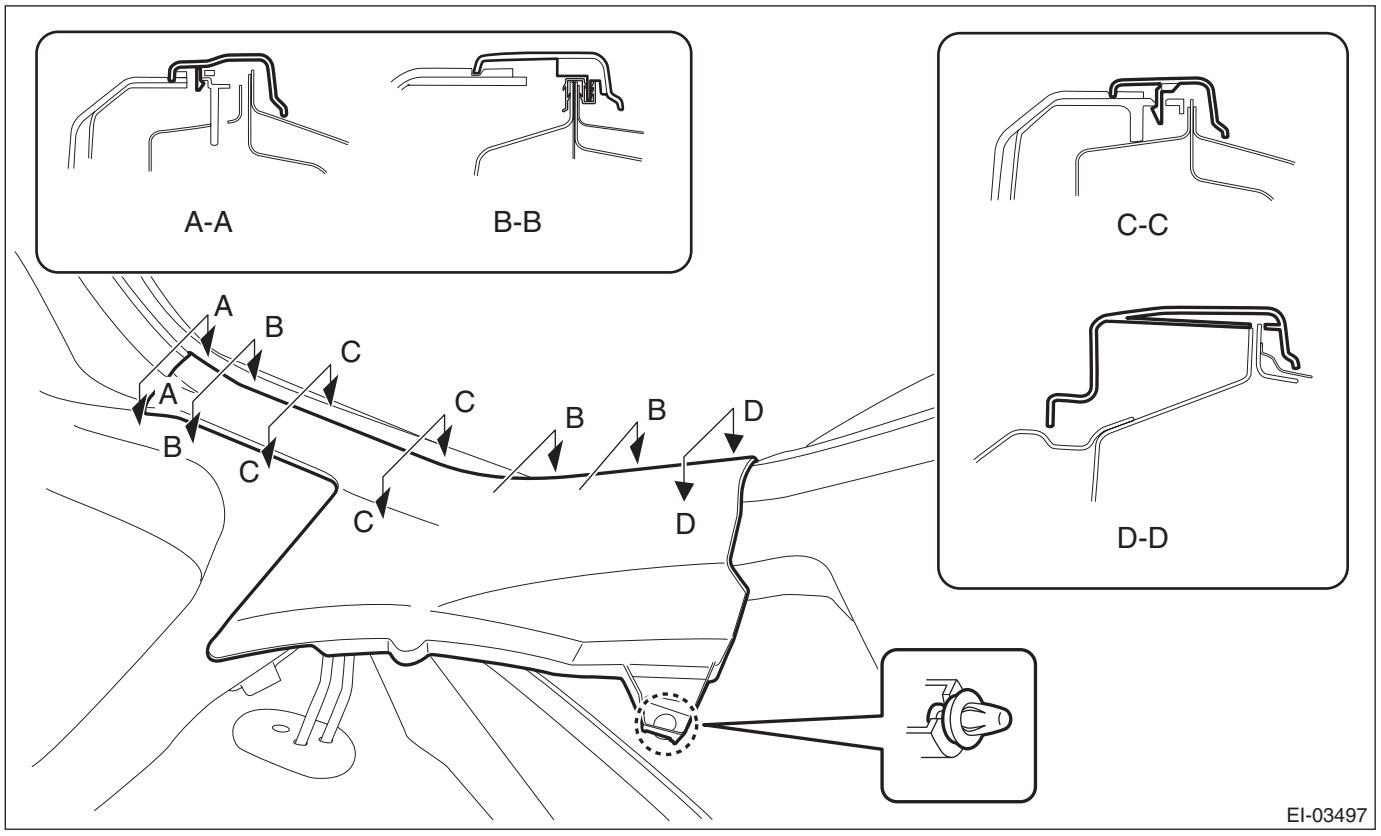


(4) Remove the hook (A) by pushing it back while lifting the front side of the rear seat cushion, and remove the rear seat cushion.

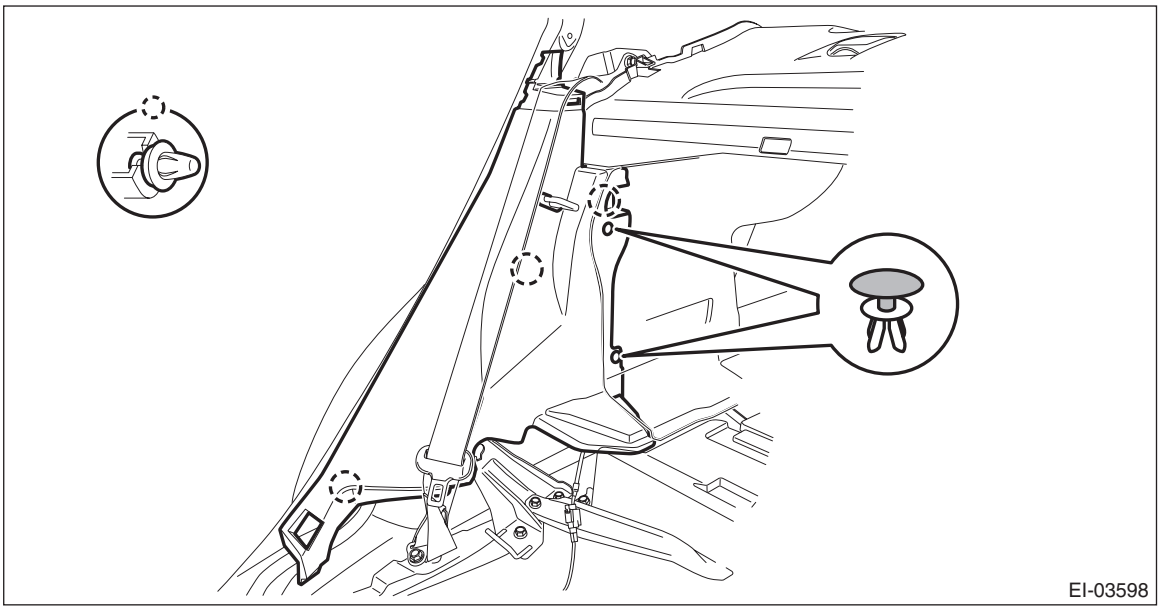


3) Release the clips and claws, and then remove the cover side sill - rear INN.

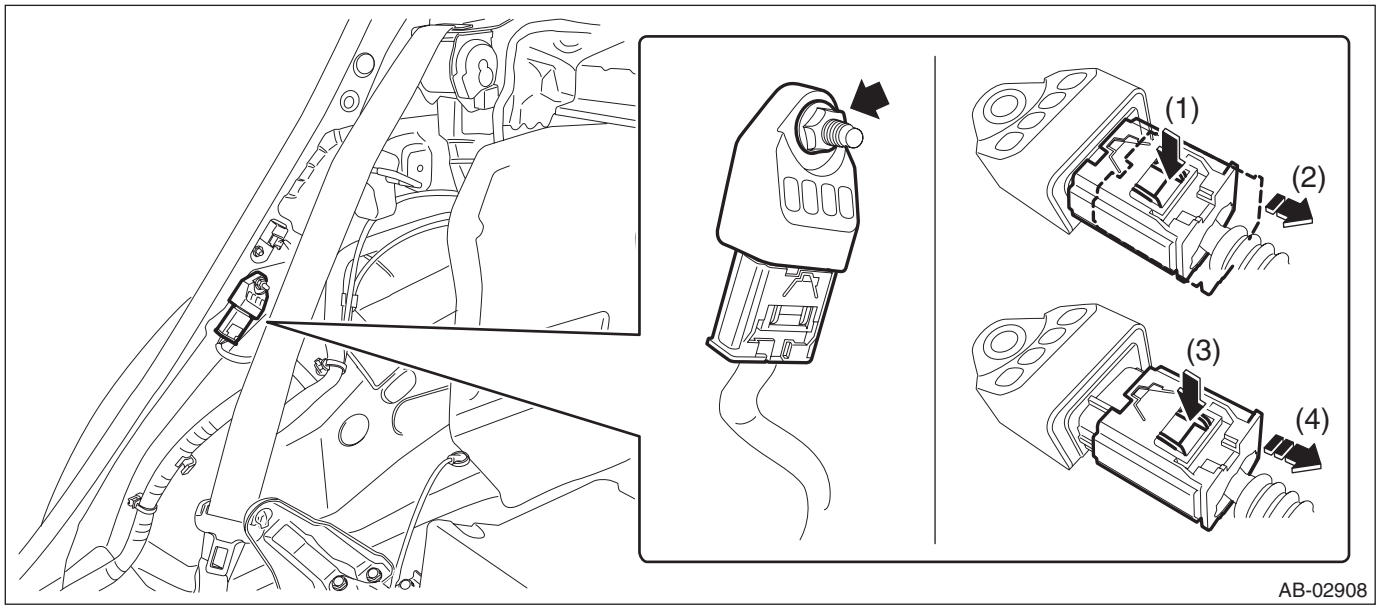
**CAUTION:**
**Do not pull with excessive force. Doing so may damage the claws of the cover side sill - rear INN.**



4) Remove the trim panel - rear pillar LWR. (On the side where the curtain airbag sensor is removed)
(1) Remove the clips, and turn over the trim panel - trunk side.
(2) Remove the clips, and remove the trim panel - rear pillar LWR.



5) Remove the nuts and then remove the curtain airbag sensor. <Ref. to AB-29, SIDE AIRBAG SENSOR AND CURTAIN AIRBAG SENSOR, PROCEDURE, Airbag Connector.>

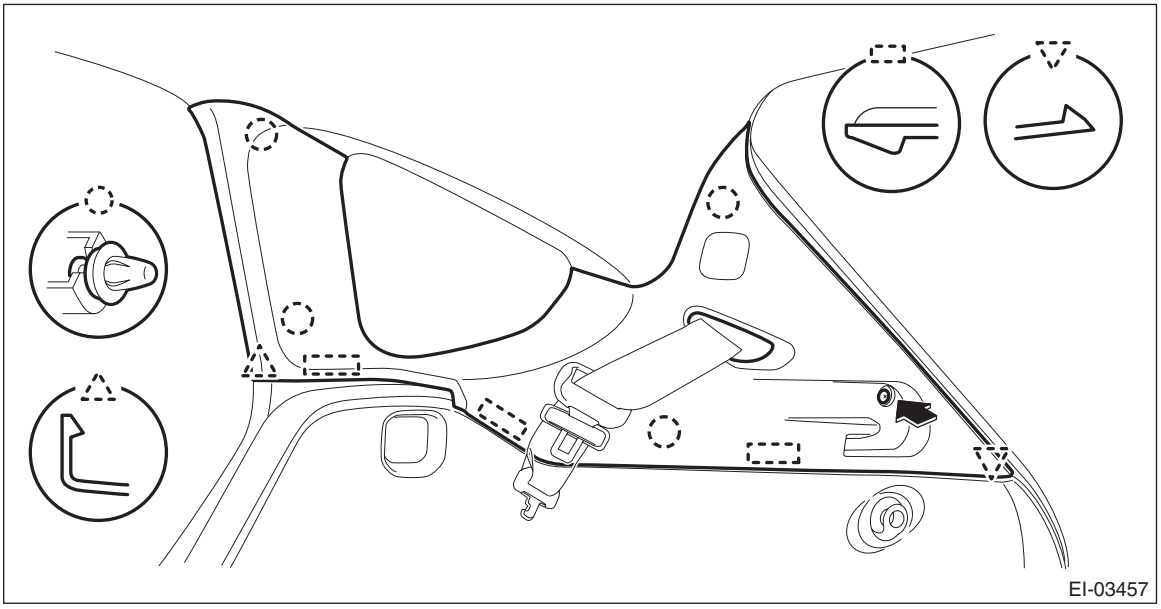


## 2. 5 DOOR MODEL/XV MODEL

1) Disconnect the ground cable from battery and wait for at least 60 seconds before starting work.

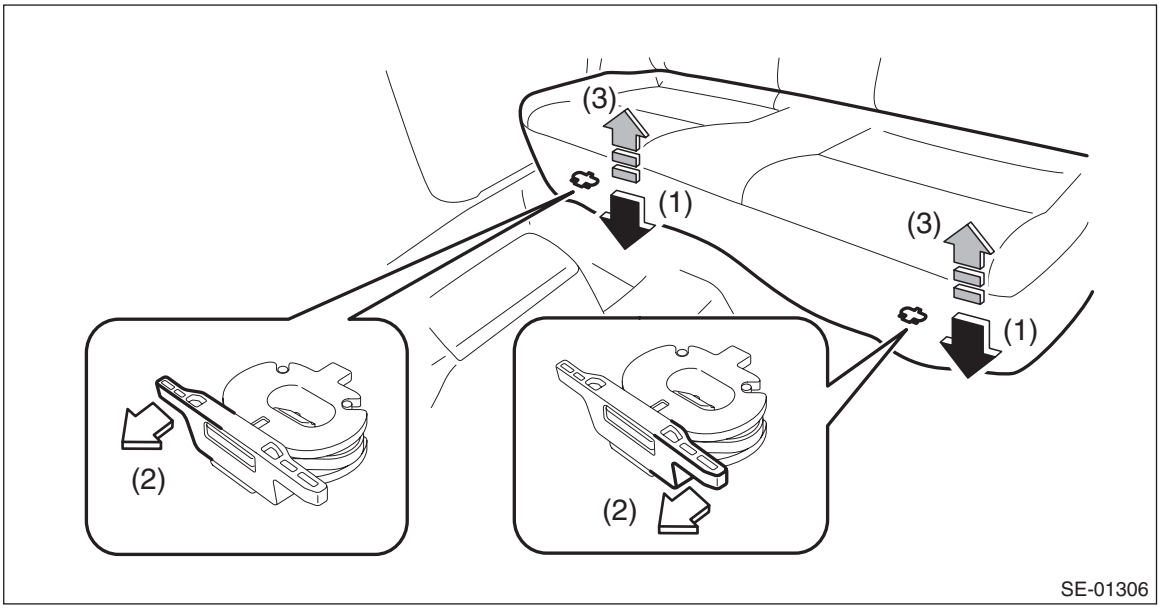
**CAUTION:**
**• Airbag system satellite safing sensor is located in the lower of the rear seat cushion center. Before removing the rear seat, refer to "CAUTION" of "General Description" in "AIRBAG SYSTEM" section. <Ref. to AB-11, CAUTION, General Description.>**
**• The airbag system is fitted with a backup power supply. After disconnecting the battery ground cable, the airbag may operate if you do not wait for 60 seconds before starting the service of airbag system.**

2) Remove the screws and clips, and remove the trim panel - rear quarter pillar UPR. (On the side where the curtain airbag sensor is removed)

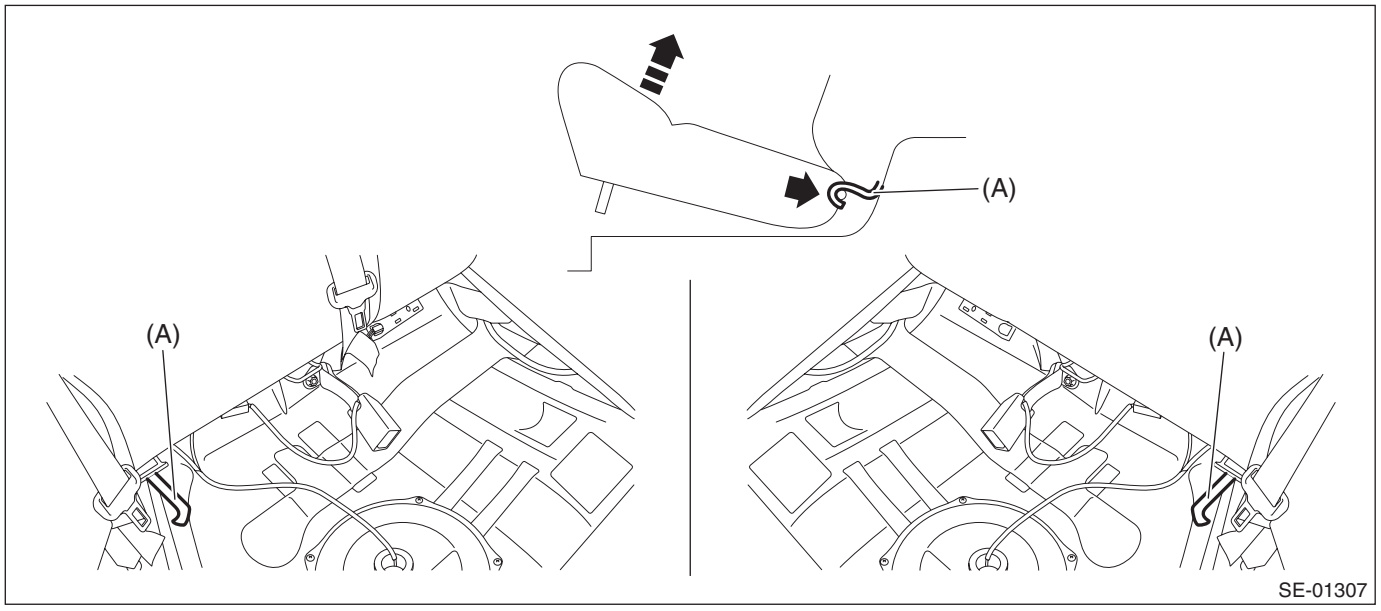


3) Remove the rear seat cushion assembly.
(1) Push the corners of the rear seat cushion from above.
(2) While pushing the corners of the rear seat cushion from above, pull the knob of the hook - seat cushion rear towards yourself.
(3) While pulling the knob towards yourself, disconnect the hooks by lifting up the rear seat cushion.

NOTE:
Pull the left side of the knob to disconnect the LH side hook, and pull the right side of the knob to disconnect the RH side hook.

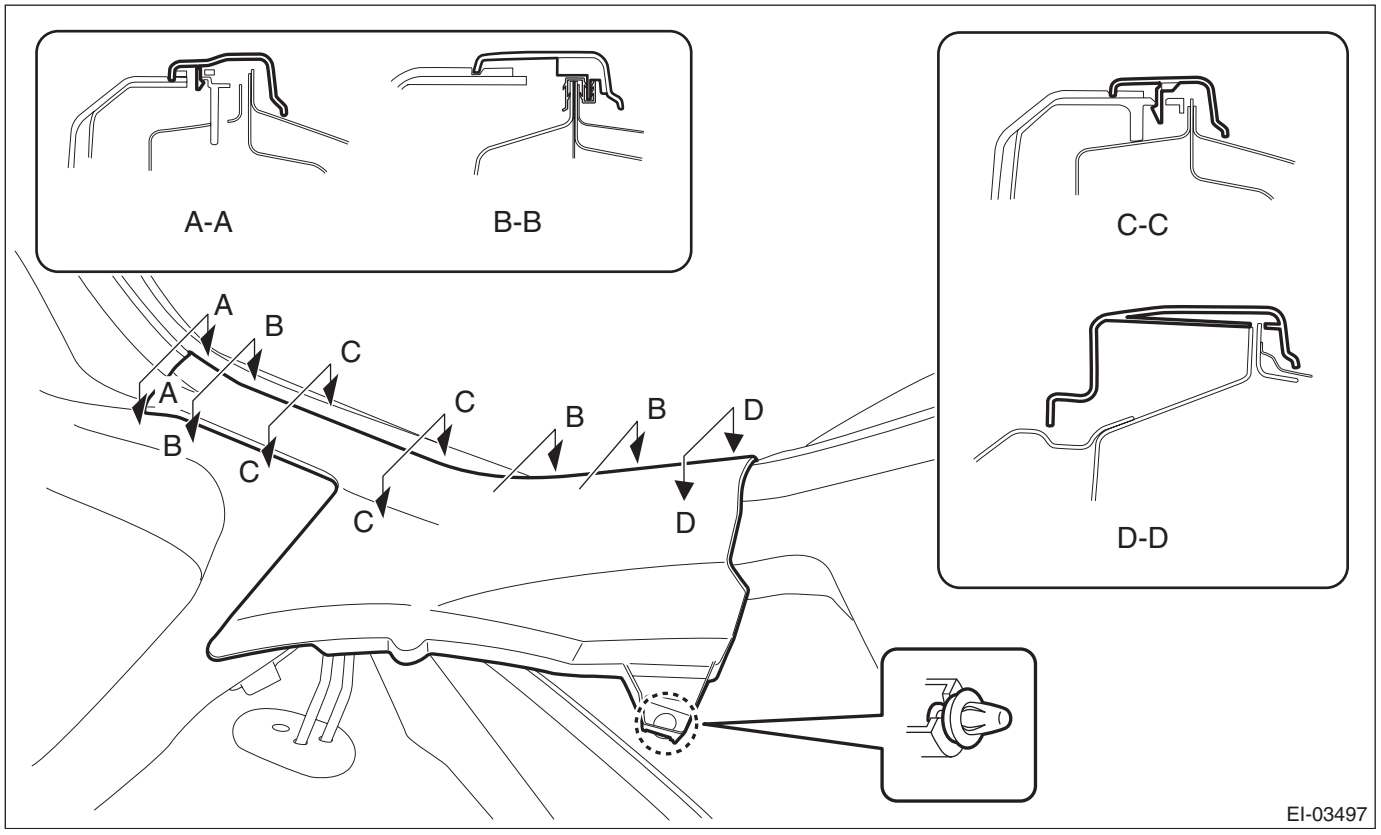


(4) Remove the hook (A) by pushing it back while lifting the front side of the rear seat cushion, and remove the rear seat cushion.

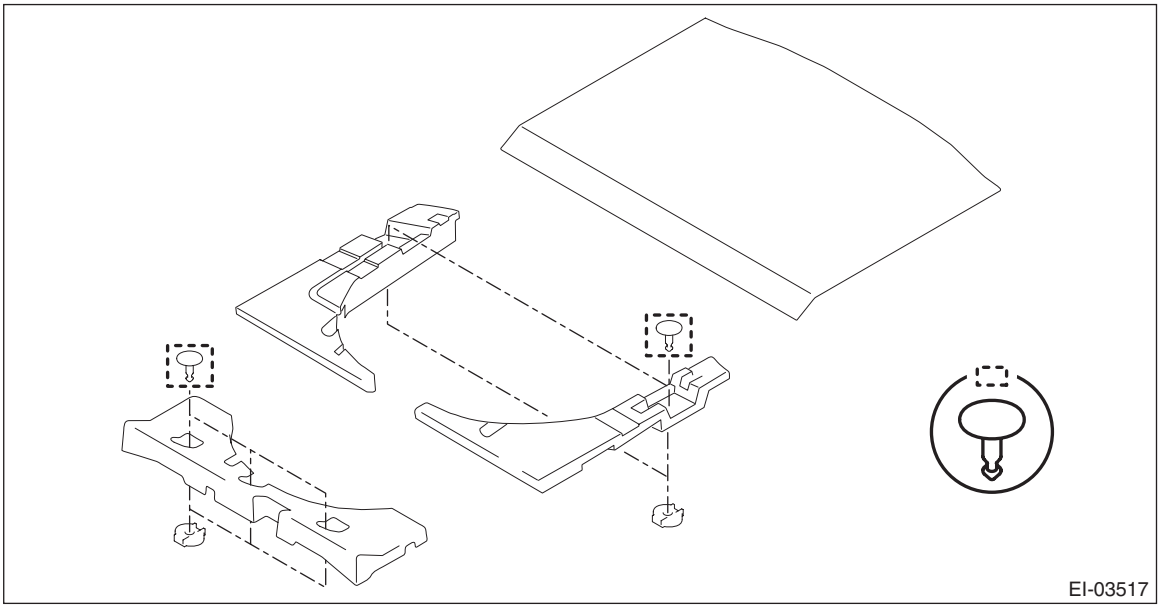


4) Release the clips and claws, and remove the side sill covers - rear INN on the left and right sides. (On the side where the curtain airbag sensor is removed)

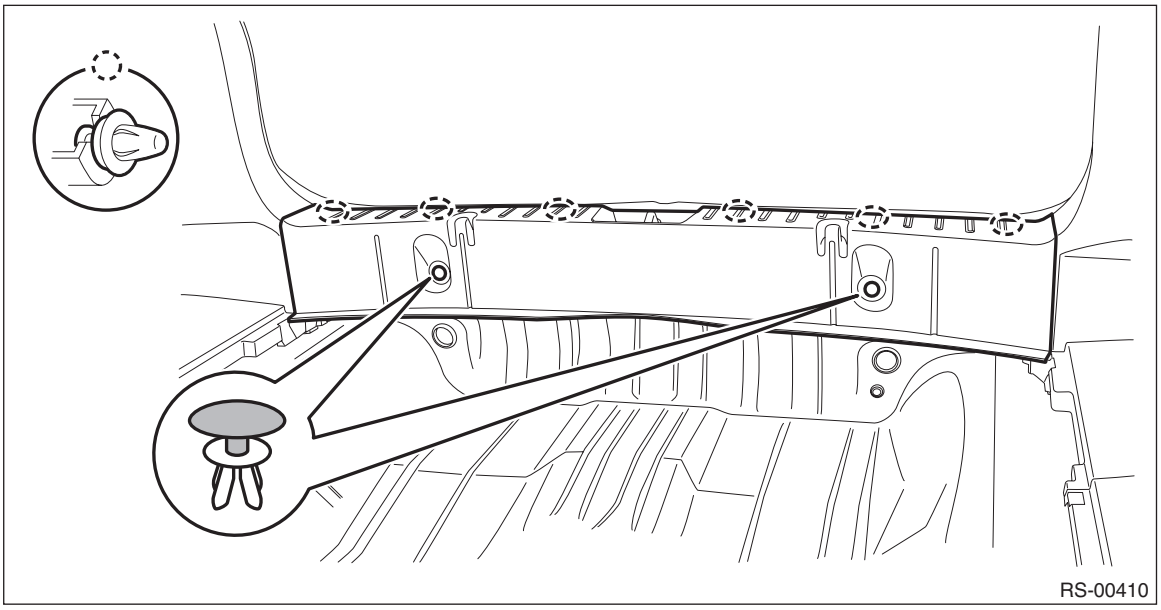
**CAUTION:**
**Do not pull with excessive force. Doing so may damage the claws of the side sill cover - rear INN.**



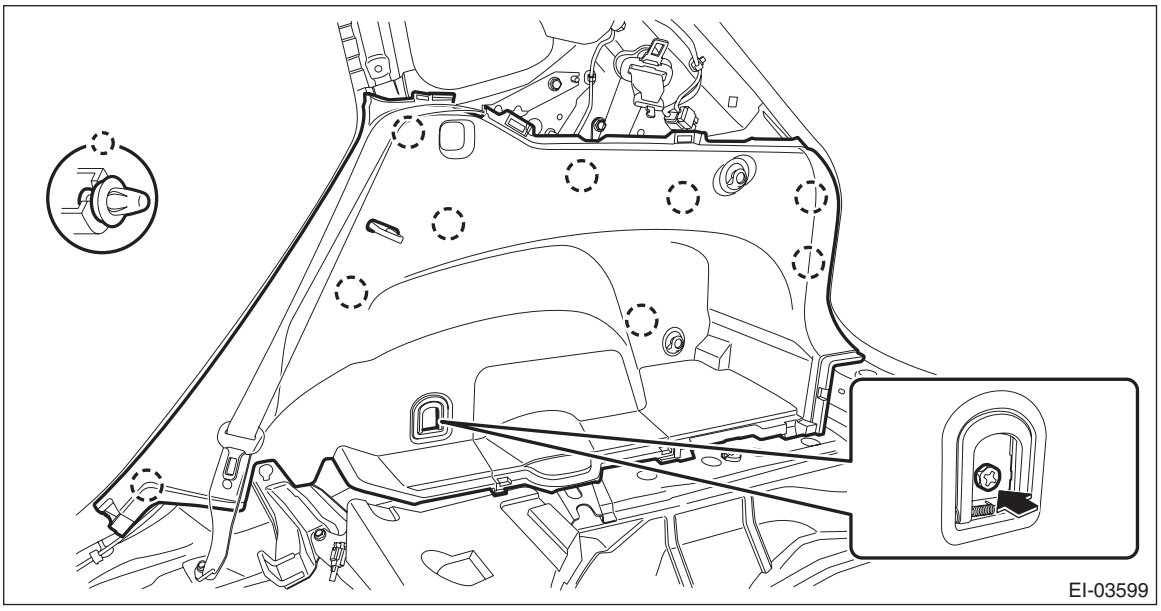
5) Remove the mat - rear floor CTR and the spacer - rear floor side.



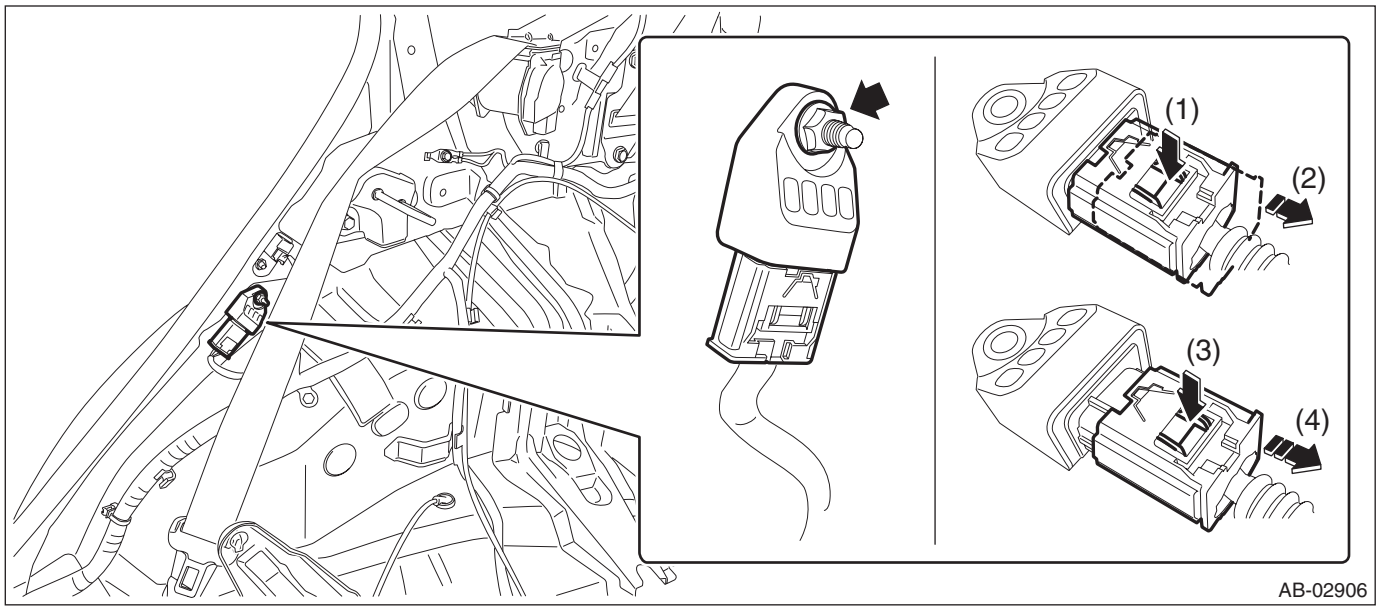
6) Remove the clips, and remove the trim panel - rear skirt.



7) Remove the trim panel - rear apron. (On the side where the curtain airbag sensor is removed)
   (1) Remove the caps, and then remove the screws.
   (2) Remove the clips, and remove the trim panel - rear apron.



8) Remove the nuts and then remove the curtain airbag sensor. <Ref. to AB-29, SIDE AIRBAG SENSOR AND CURTAIN AIRBAG SENSOR, PROCEDURE, Airbag Connector.>



## B: INSTALLATION

**CAUTION:**
**• Do not reuse the bolt and nut.**
**Always replace with the specified new bolts and nuts.**
**• When installing the sensor, insert the set pin on the backside of the sensor into the hole on the body side securely.**

1) Before installation, inspect the following items and replace any faulty part with a new one.
- Curtain airbag sensor or connector is damaged.
- Curtain airbag module has been activated.

2) Install each part in the reverse order of removal.

***Tightening torque:***
***Curtain airbag sensor: 7.5 N·m (0.76 kgf-m, 5.5 ft-lb)***
***Rear seat backrest assembly: <Ref. to SE-5, REAR SEAT, COMPONENT, General Description.>***

# 14.Satellite Safing Sensor

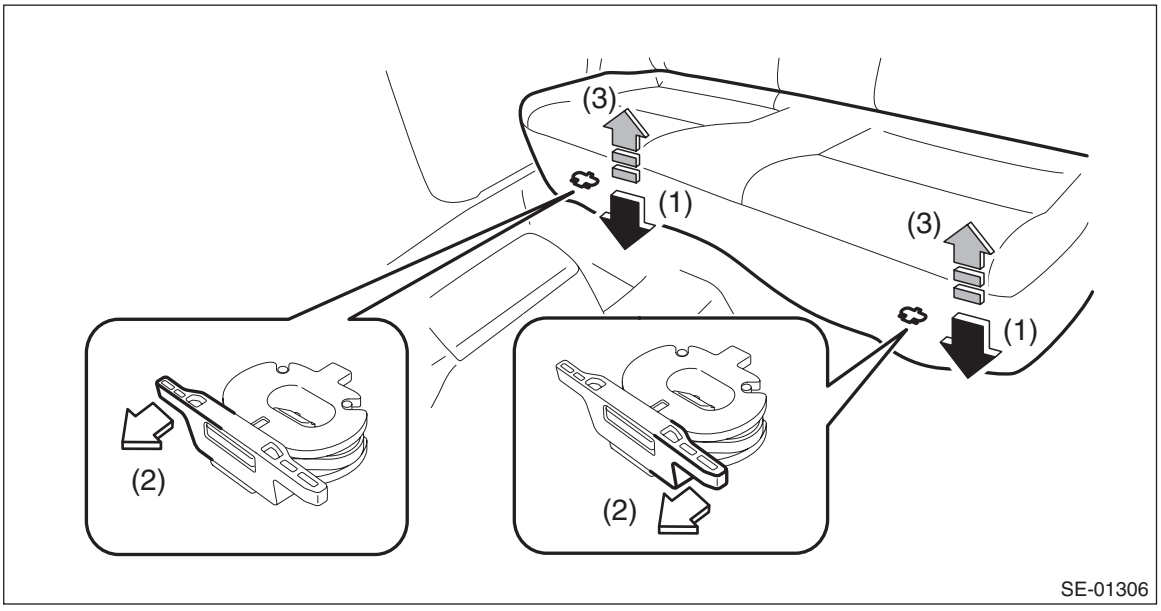
## A: REMOVAL

1) Turn the ignition switch to OFF.
2) Disconnect the ground cable from battery and wait for at least 60 seconds before starting work.

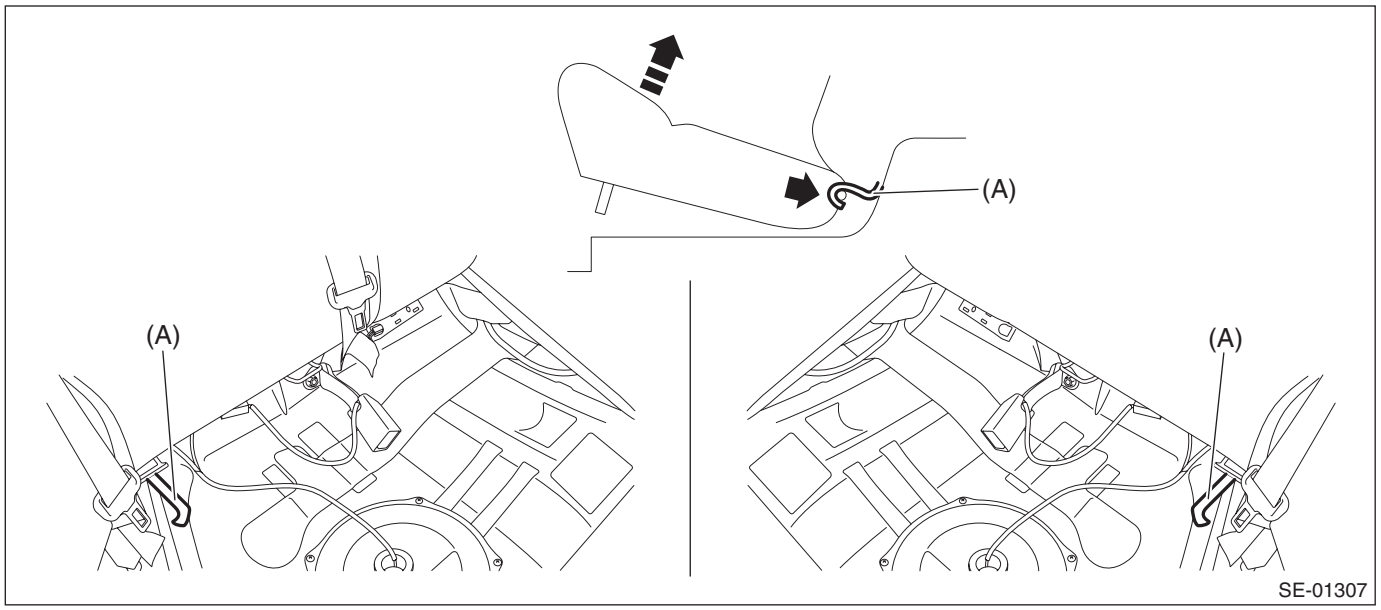
**CAUTION:**
**The airbag system is fitted with a backup power supply. After disconnecting the battery ground cable, the airbag may operate if you do not wait for 60 seconds before starting the service of airbag system.**

3) Remove the rear seat cushion assembly.
   (1) Push the corners of the rear seat cushion from above.
   (2) While pushing the corners of the rear seat cushion from above, pull the knob of the hook - seat cushion rear towards yourself.
   (3) While pulling the knob towards yourself, disconnect the hooks by lifting up the rear seat cushion.

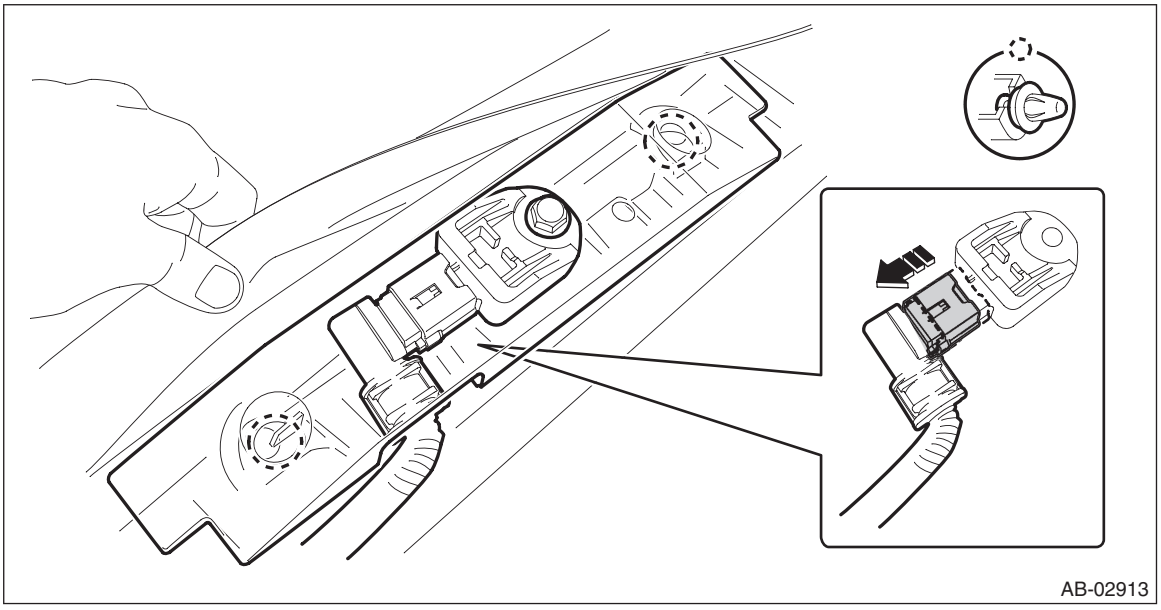
NOTE:
Pull the left side of the knob to disconnect the LH side hook, and pull the right side of the knob to disconnect the RH side hook.



(4) Remove the hook (A) by pushing it back while lifting the front side of the rear seat cushion, and remove the rear seat cushion.



4) Remove the satellite safing sensor.
(1) Remove the clip, and remove the cover - satellite safing.
(2) Remove the bolts and then remove the satellite safing sensor. <Ref. to AB-27, FRONT DOOR IMPACT SENSOR AND SATELLITE SAFING SENSOR, PROCEDURE, Airbag Connector.>



## B: INSTALLATION

**CAUTION:**
**• Do not reuse the bolt and nut.**
**Always replace with the specified new bolts and nuts.**
**• When installing the cover - satellite safing, push the cover securely until it contacts the floor panel.**
**• If the cover - satellite safing is too loose at its mounting portion to remove easily, replace with a new cover - satellite safing.**
**• After installing the cover - satellite safing, make sure that the sensor harness does not get caught.**
Install each part in the reverse order of removal.

***Tightening torque:***
***7.5 N·m (0.76 kgf-m, 5.5 ft-lb)***

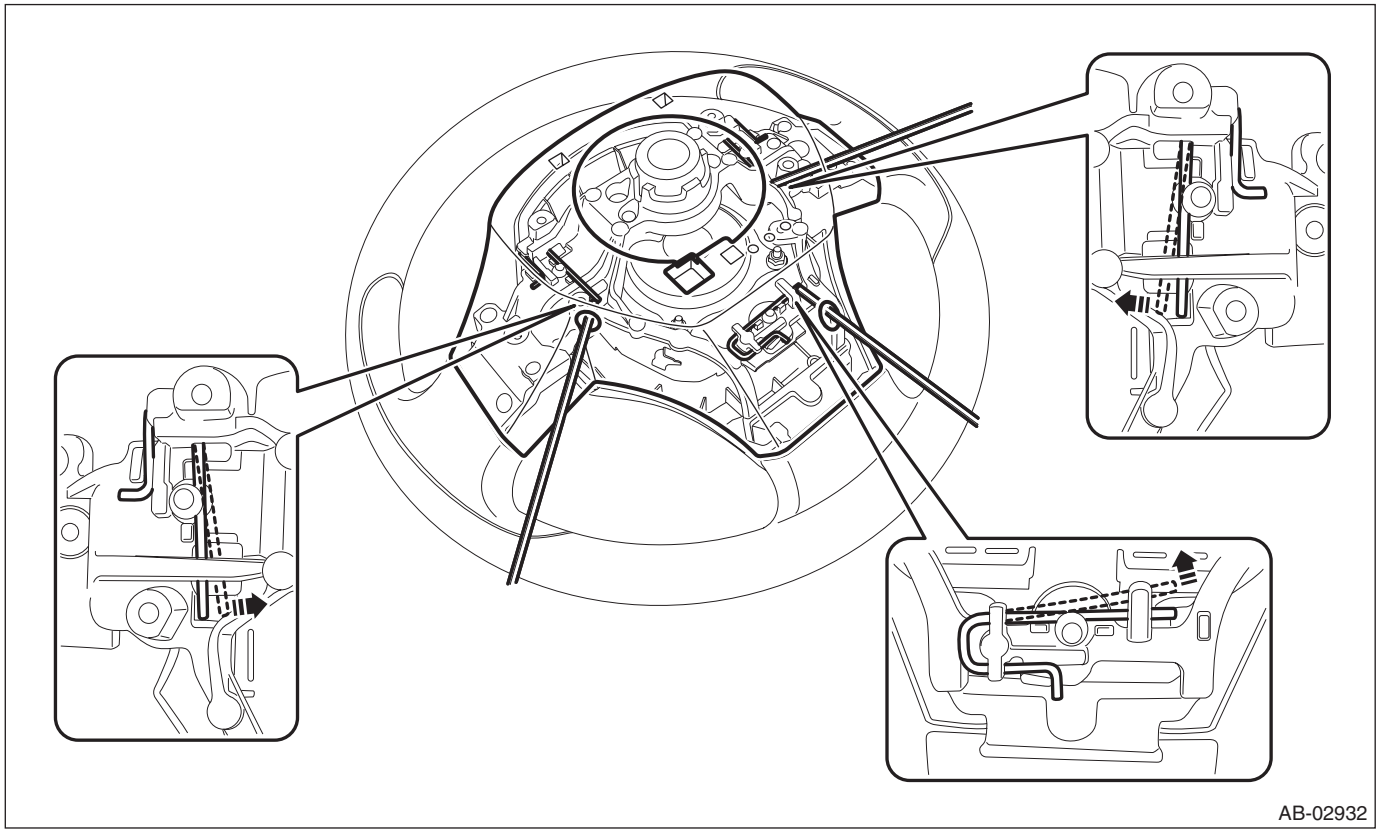
## C: INSPECTION

Check for the following, and replace the damaged parts with new parts.
- The satellite safing sensor connector is damaged.
- The cover - satellite safing is damaged
- Side airbag or curtain airbag has been activated.

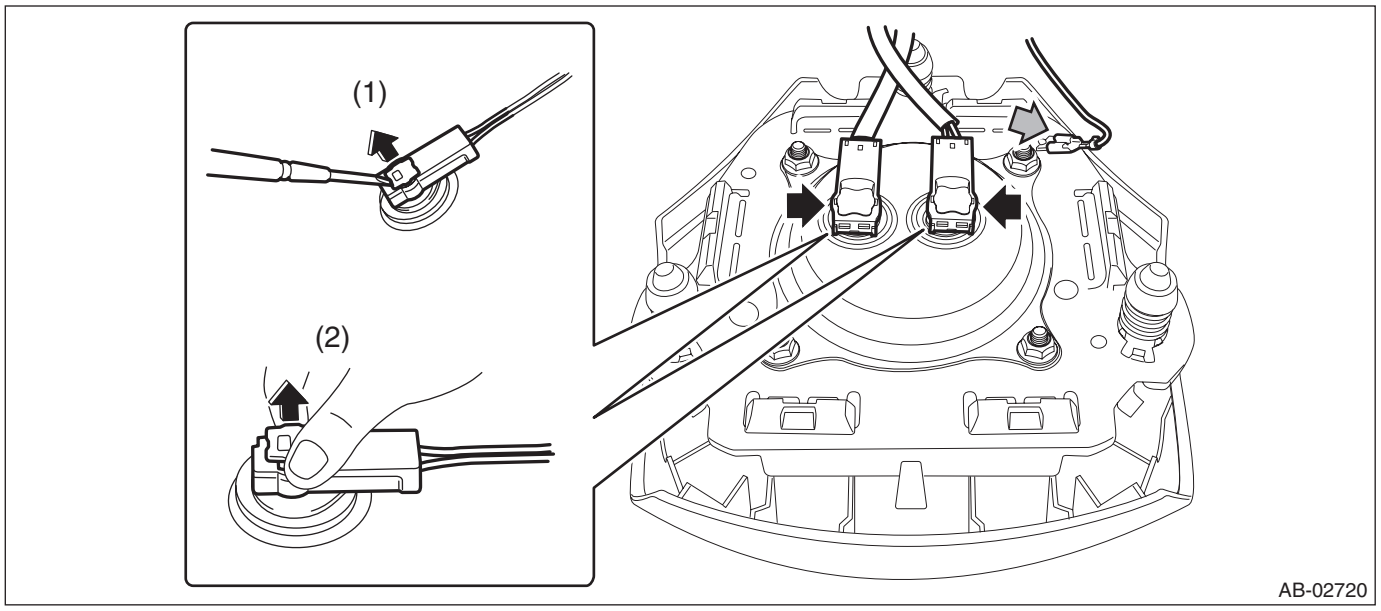
# 15.Roll Connector

## A: REMOVAL

1) Position the front wheels straight ahead. (After moving a vehicle 5 m (16 ft) or more with front wheels positioned straight ahead, make sure that the vehicle moves straight ahead.)
2) Turn the ignition switch to OFF.
3) Disconnect the ground cable from battery and wait for at least 60 seconds before starting work.
4) Remove the driver's airbag module.
   (1) Using a hexagon wrench wrapped with protective tape, push in the snap pins to disengage the locks (3 places).



(2) Disconnect the horn harness and airbag connector, and remove the driver's airbag module. <Ref. to AB-24, DRIVER'S AIRBAG MODULE, CURTAIN AIRBAG MODULE & PRETENSIONER, PROCEDURE, Airbag Connector.>

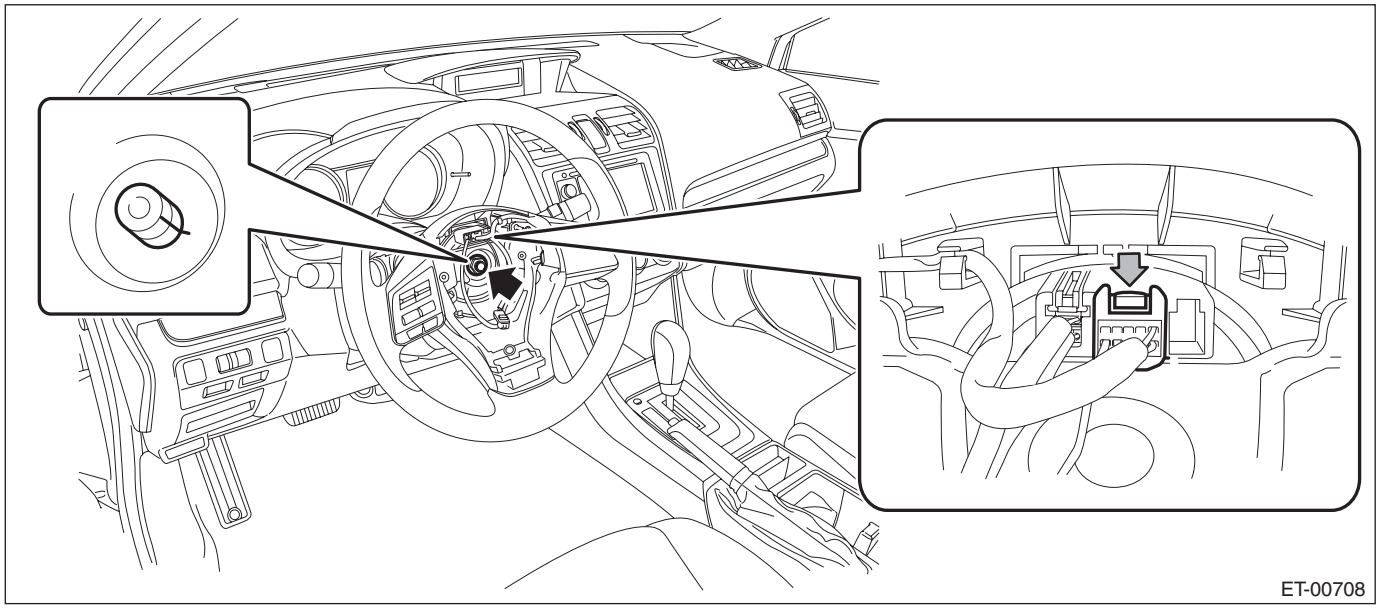


5) Remove the steering wheel.

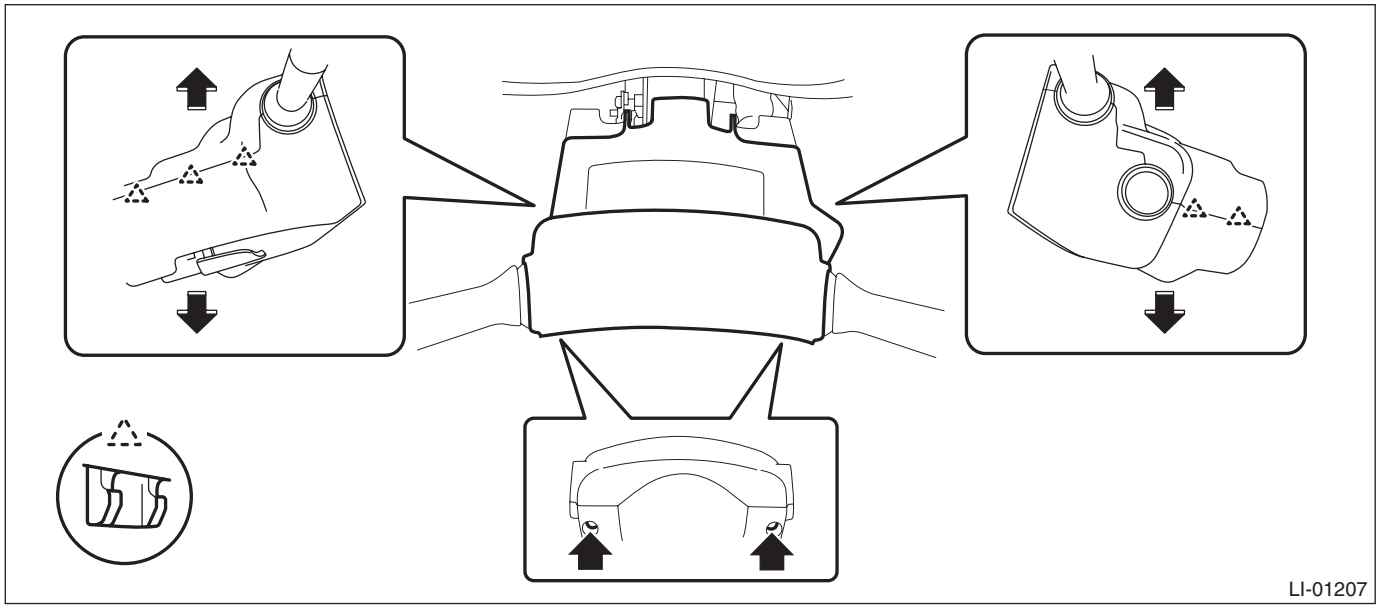
**CAUTION:**
- **Always use the steering wheel puller for removal to avoid deforming the steering wheel.**
- **If the steering wheel has been removed, make sure that the roll connector is not turned from the original position.**

(1) Disconnect the connector and remove the nut.
(2) Put alignment marks and remove the steering wheel.

***Preparation tool:***
***Steering wheel puller***

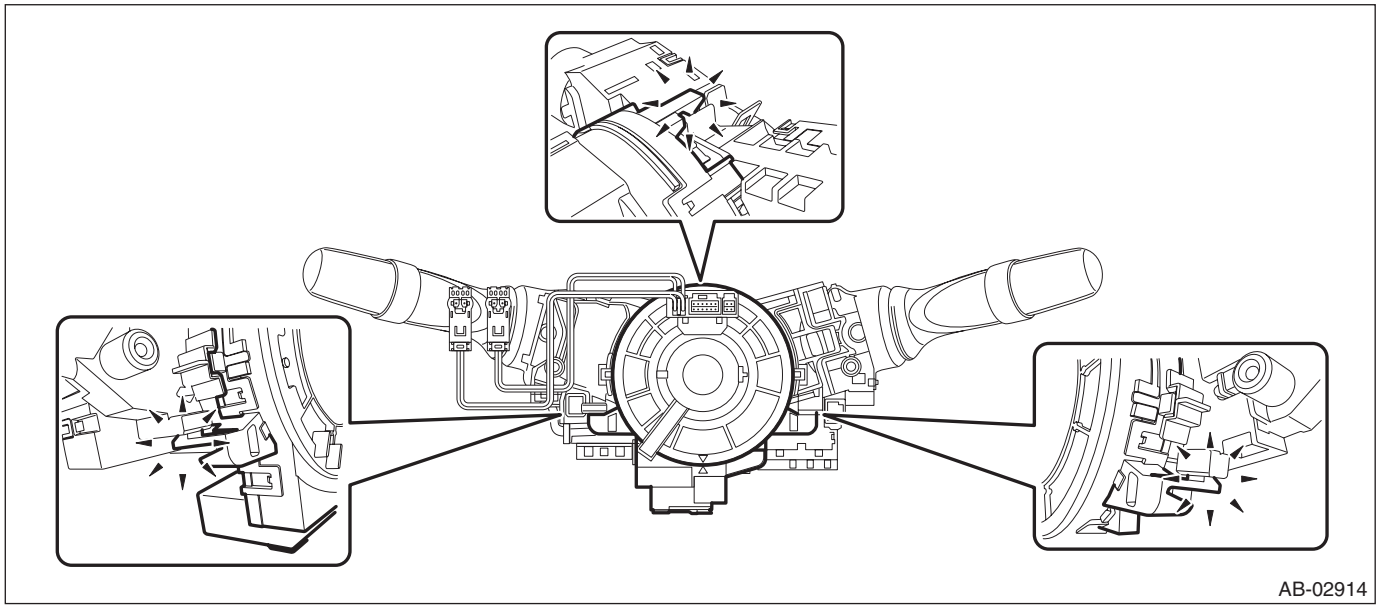


6) Remove the cover assembly - column.
(1) Remove the screws.
(2) Release the claw, and remove the cover assembly - column UPR and the cover assembly - column LWR.

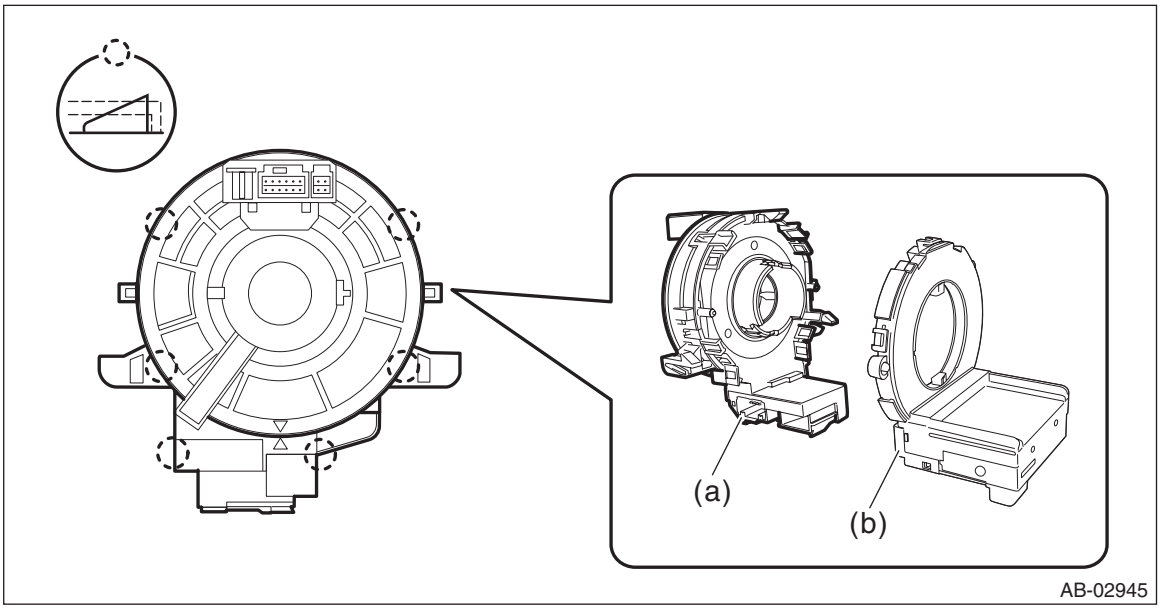


7) Remove the roll connector.

**CAUTION:**
**Make sure that the roll connector is not turned from the original position.**
(1) Disconnect the connector under the roll connector.
(2) Release the claws and remove the roll connector.



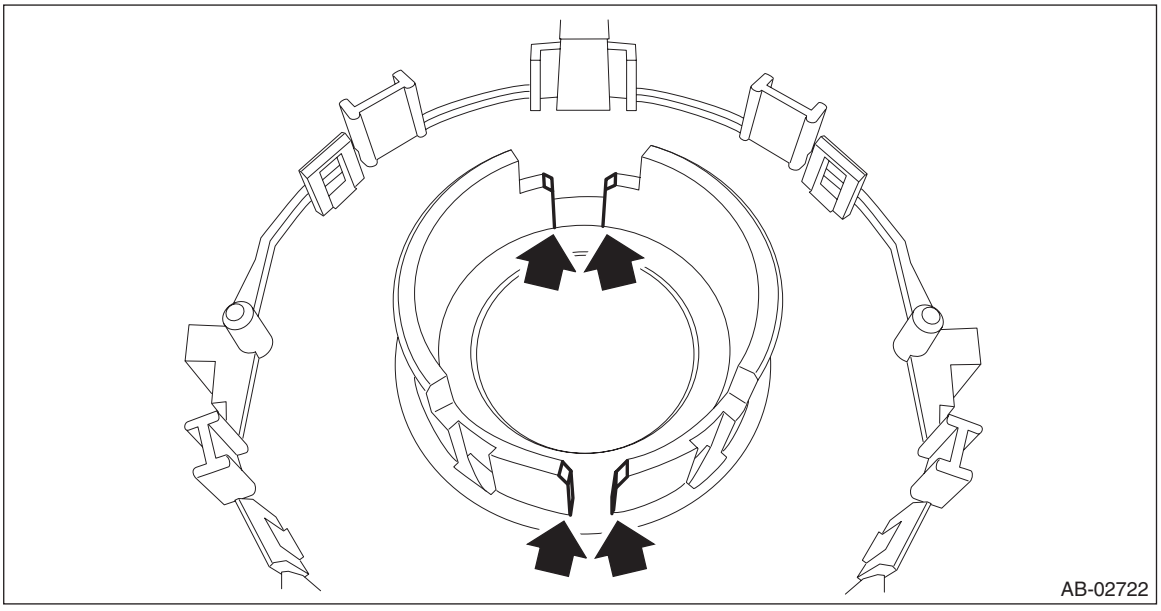
(3) Release the claws and separate the roll connector (a) and steering angle sensor (b).



## B: INSTALLATION

**CAUTION:**
**If the steering wheel and steering angle sensor are removed, perform "VDC sensor midpoint setting mode" of the VDC. <Ref. to VDC-19, VDC SENSOR MIDPOINT SETTING MODE, ADJUSTMENT, VDC Control Module and Hydraulic Control Unit (VDCCM&H/U).>**

1) Before attaching a new roll connector, apply a thin coat of grease contained in the connector onto the areas shown by the arrows.



2) Install each part in the reverse order of removal.
3) Before installing steering wheel, be sure to adjust the direction of roll connector with steering. <Ref. to AB-109, ADJUSTMENT, Roll Connector.>

***Tightening torque:***
***Steering wheel: 39 N·m (3.98 kgf-m, 28.8 ft-lb)***

***Clearance:***
***Cover assembly - column to Steering wheel: 4 — 6 mm (0.16 — 0.24 in)***

# C: INSPECTION

## 1. VISUAL INSPECTION

Check for the following, and replace the damaged parts with new parts.
- Combination switch is cracked or deformed.
- Roll connector is cracked or deformed.

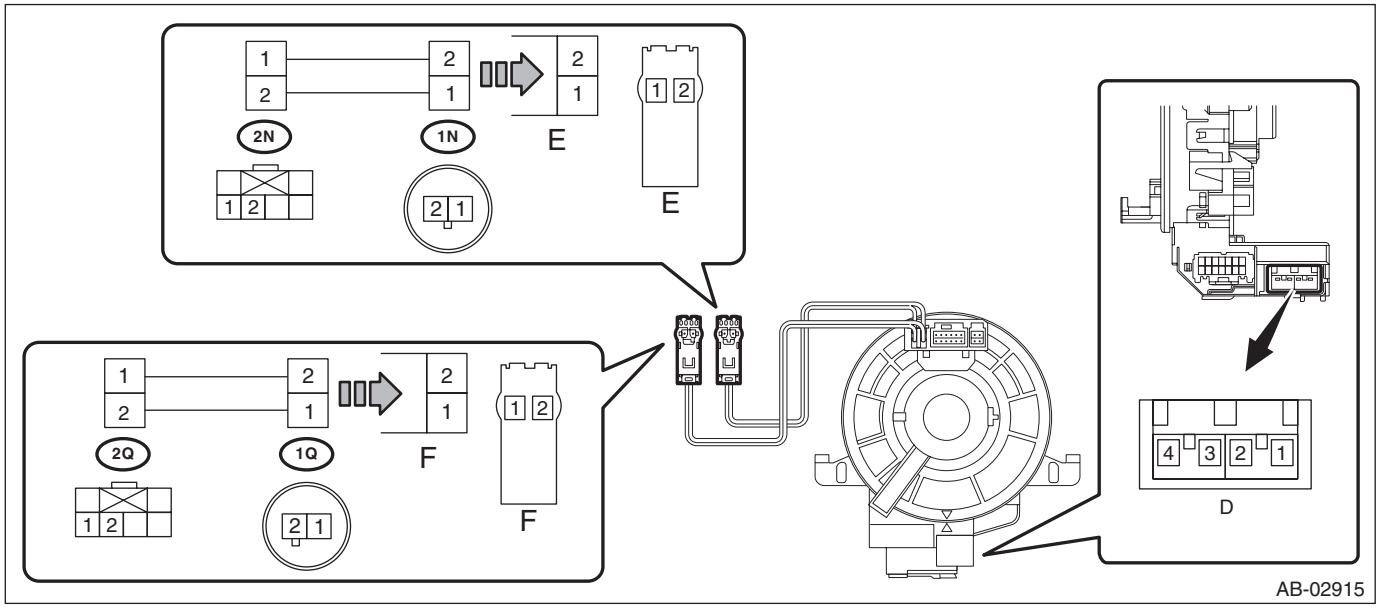
## 2. UNIT INSPECTION OF ROLL CONNECTOR

**CAUTION:**
**• Do not rotate the roll connector to more than the specified number of turns. Otherwise, the roll connector internal wire may be broken.**
**• When determining the end stop, rotate the connector slowly without applying excessive force. Applying excessive force at the end stop may break the internal wire.**
1) Adjust the roll connector. <Ref. to AB-109, ADJUSTMENT, Roll Connector.>
2) Set the roll connector to the central position.
3) Connect the test harness to the connector E and connector F.

***PREPARATION TOOL:***
***Test harness N (98299SA000)***
***Test harness Q (98299SA040)***
- Connector E - Test harness N (1N)
- Connector F - Test harness Q (1Q)

4) With the following conditions, check the resistance between the test harness connector terminals.
- Perform the check with the roll connector centered (front wheels direct straightforward).
- Rotate the roll connector counterclockwise from the center (front wheels direct straightforward) to an end stop. Then, perform the check while rotating it clockwise to approximately 4.5 turns.

***PREPARATION TOOL:***
***Circuit tester***



| Terminal No. | Inspection conditions | Standard |
|---|---|---|
| (2N) No. 1 — (2N) No. 2 | Always | Less than 1 Ω |
| (2Q) No. 1 — (2Q) No. 2 | Always | Less than 1 Ω |

NOTE:
The connector D is designed to short the terminals D1/D2 and D3/D4 when disconnected.
5) Replace the roll connector with a new part if the inspection result is not within the standard.

## D: ADJUSTMENT

**CAUTION:**
**• Do not rotate the roll connector to more than the specified number of turns. Otherwise, the roll connector internal wire may be broken.**
**• When determining the end stop, rotate the connector slowly without applying excessive force. Applying excessive force at the end stop may break the internal wire.**
1) Check that front wheels are positioned in straight ahead direction.
2) Rotate the roll connector counterclockwise until it stops.
3) Rotate the roll connector clockwise approx. 2.5 turns until "▲" marks are aligned.

NOTE:
When the roll connector comes to the center position, the orange roller (b) can be seen from the sight glass (a).

# 3. General Description

## A: CAUTION

Refer to “CAUTION” in “General Description” in Airbag System. <Ref. to AB-11, CAUTION, General Description.>

## B: INSPECTION

Measure the battery voltage and check electrolyte.

***Standard voltage: 12 V***

***Specific gravity: 1.260 or more***

## C: PREPARATION TOOL

**CAUTION:**
**To measure the voltage and resistance of airbag system component, be sure to use the specified test harness.**

### 1. SPECIAL TOOL

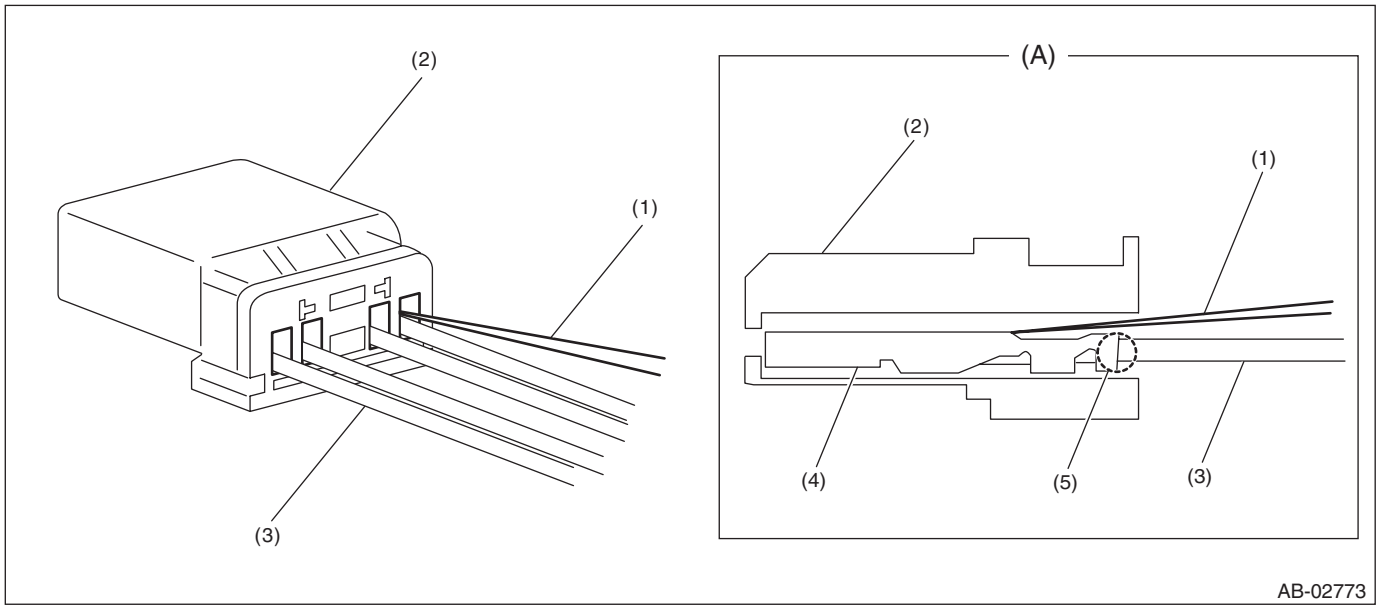
## 2. GENERAL TOOL

| TOOL NAME | REMARKS |
|---|---|
| Circuit tester | Used for measuring resistance, voltage and current. |
| Oscilloscope | Used for measuring the sensor. |
| Probe | Used when measuring voltage and resistance of passenger's airbag module. |

## 3. HOW TO USE PROBE

Insert the probe into the harness hole, and contact it with the terminal.



(A) Cross section

(1) Probe
(2) Connector (housing)
(3) Harness
(4) Terminal
(5) Connection

**CAUTION:**
- **Do not insert the probe forcibly.**
- **Be careful not to contact it to the connection (5) between the terminal and harness. (Harness will come off easily from connector if doing so.)**

# 4. Electrical Component Location

# 5. Airbag Connector

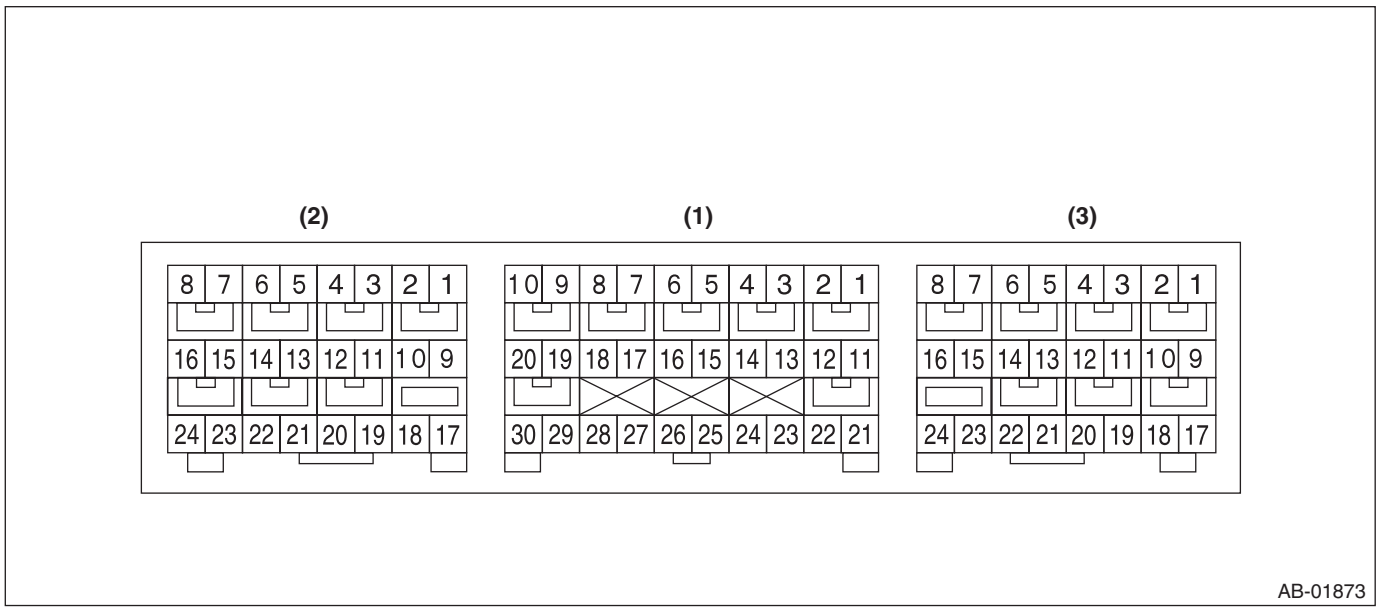
## A: PROCEDURE

For operation procedures, refer to “Airbag Connector” of Airbag System. <Ref. to AB-20, Airbag Connector.>

# 6. Airbag Control Module I/O Signal

## A: ELECTRICAL SPECIFICATION

- XV model



- Terminal numbers in airbag control module connector are shown in the figure.
- The airbag warning light illuminates when the connector is removed from the airbag control module.

# Airbag Control Module I/O Signal

| Item | | Control module terminal No. |
|---|---|---|
| Ignition power supply | Dedicated fuse | (1) — 21 |
| Passenger's airbag module level one | + | (1) — 4 |
| | – | (1) — 3 |
| Passenger's airbag module level two | + | (1) — 1 |
| | – | (1) — 2 |
| Driver's airbag module level one | + | (1) — 5 |
| | – | (1) — 6 |
| Driver's airbag module level two | + | (1) — 8 |

## B: WIRING DIAGRAM

Refer to the WI section wiring diagram. <Ref. to WI-30, WIRING DIAGRAM, Airbag System.>

# 7. Subaru Select Monitor

## A: OPERATION

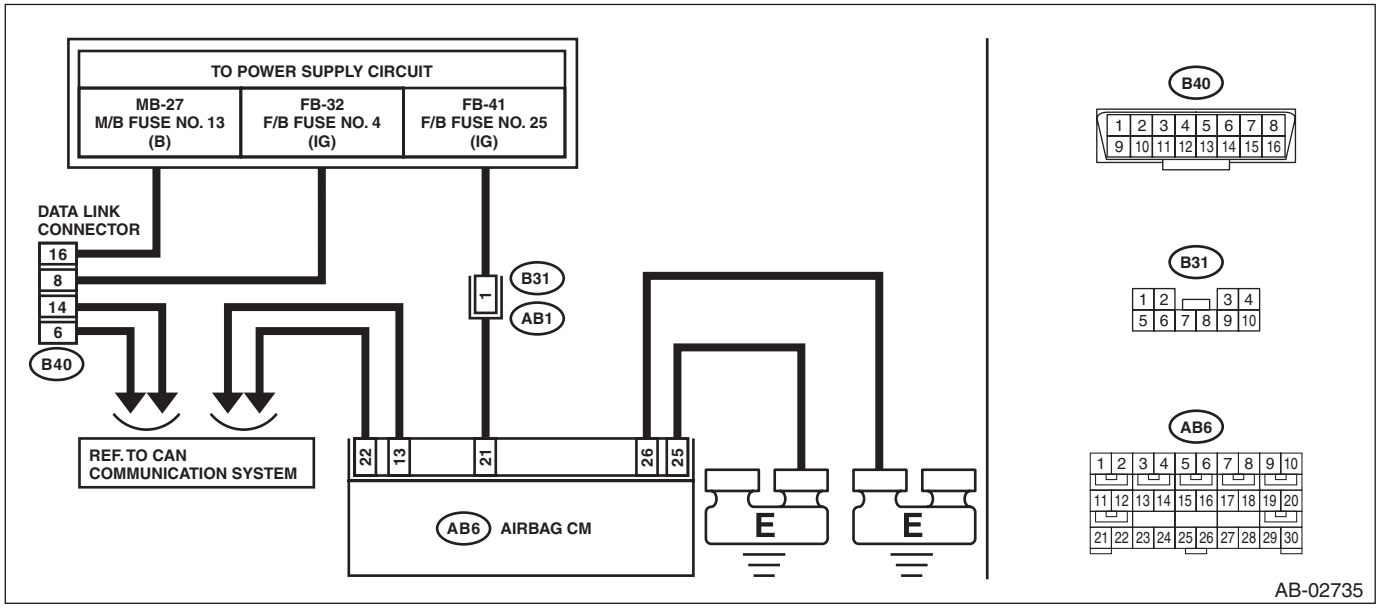
For operation procedures, refer to the “PC application help for Subaru Select Monitor”.

## B: INSPECTION

### 1. COMMUNICATION FOR INITIALIZING IMPOSSIBLE

**DTC DETECTING CONDITION:**
Defective harness connector
**TROUBLE SYMPTOM:**
Communication is impossible between the airbag control module and the Subaru Select Monitor.

**CAUTION:**
**Before performing diagnosis, refer to “CAUTION” in “General Description”. <Ref. to AB(diag)-4, CAUTION, General Description.>**
**WIRING DIAGRAM**:
Airbag system <Ref. to WI-30, WIRING DIAGRAM, Airbag System.>



| | Step | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK IGNITION SWITCH.** | Is the ignition switch ON? | Go to step **2**. | Turn the ignition switch to ON, and select the airbag mode using the Subaru Select Monitor. |
| 2 | **CHECK BATTERY.**<br>1) Turn the ignition switch to OFF.<br>2) Measure the battery voltage. | Is the voltage 11 V or more? | Go to step **3**. | Charge or replace the battery. |
| 3 | **CHECK BATTERY TERMINAL.** | Is there poor contact at battery terminal? | Repair or tighten the battery terminal. | Go to step **4**. |
| 4 | **CHECK SUBARU SELECT MONITOR COMMUNICATION.**<br>1) Turn the ignition switch to ON.<br>2) Using the Subaru Select Monitor, check whether communication to other systems can be executed normally. | Is the system name displayed on Subaru Select Monitor? | Go to step **9**. | Go to step **5**. |
| 5 | **CHECK SUBARU SELECT MONITOR.** | Is Subaru Select Monitor powered on? | Go to step **7**. | Go to step **6**. |

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 6 | **CHECK FUSE.**<br>Remove a fuse in the data link connector and visually check the fuse. | Is the fuse OK? | Repair the harness between the battery and the data link connector. | Replace the fuse. If the fuse is blown out again, check the power supply circuit. |
| 7 | **CHECK AIRBAG CONTROL MODULE CONNECTOR.**<br>1) Turn the ignition switch to OFF, disconnect the battery ground cable, and wait for 60 seconds or more.<br>2) Confirm that the connectors of airbag control module (AB6, AB17, AB18) are securely connected. | Is the connector of the airbag control module securely connected? | Go to step **8**. | Connect the connector of the airbag control module. |
| 8 | **CHECK SUBARU SELECT MONITOR COMMUNICATION.**<br>1) Disconnect the airbag control module connector.<br>2) Connect the battery ground terminal.<br>3) Turn the ignition switch to ON.<br>4) Check whether communication to other systems can be executed normally. | Is the system name displayed on Subaru Select Monitor? | Replace the airbag control module. <Ref. to AB-77, Airbag Control Module.> | Go to step **9**. |
| 9 | **CHECK FUSE.**<br>Remove fuse No. 25 from the fuse & relay box, and perform visual inspection. | Is the fuse OK? | Go to step **10**. | Replace the fuse. If the fuse is blown out again, check the power supply circuit. |
| 10 | **CHECK AIRBAG CONTROL MODULE CONNECTOR.**<br>1) Turn the ignition switch to OFF, disconnect the battery ground cable, and wait for 60 seconds or more.<br>2) Confirm that the connectors of airbag control module (AB6, AB17, AB18) are securely connected. | Is the connector of the airbag control module securely connected? | Go to step **11**. | Connect the connector of the airbag control module. |
| 11 | **CHECK CAN COMMUNICATION.**<br>Inspect LAN system. <Ref. to LAN(diag)-2, PROCEDURE, Basic Diagnostic Procedure.> | Is there any fault? | Repair it according to the diagnosis for LAN system. | Go to step **12**. |
| 12 | **CHECK POWER SUPPLY CIRCUIT.**<br>1) Disconnect the connectors (AB6, AB17, AB18) from airbag control module.<br>2) Connect the connector (1AG) in the test harness AG to the connectors (AB6, AB17, AB18).<br>NOTE:<br>Except for XV models, connect test harness AH between the connectors (AB6, AB17, AB18) and (1AG).<br>3) Turn the ignition switch to ON.<br>4) Measure the voltage between connector (2AG) in the test harness AG and chassis ground.<br>***Connector & terminal***<br>***(2AG) No. 1 (+) — Chassis ground (–):*** | Is the voltage 10 V or more? | Go to step **13**. | Repair the harness between the airbag control module and the battery. Or replace the airbag main harness along with the bulkhead harness. |

| Step | | Check | Yes | No |
|---|---|---|---|---|
| 13 | **CHECK BETWEEN AIRBAG CONTROL MODULE AND CHASSIS GROUND.**<br>1) Turn the ignition switch to OFF.<br>2) Measure the resistance between connector (2AG) in the test harness AG and chassis ground.<br>***Connector & terminal***<br>***(2AG) No. 4 — Chassis ground:***<br>***(2AG) No. 3 — Chassis ground:*** | Is the resistance less than 10 Ω? | Go to step **14**. | Repair the harness between the airbag control module and the chassis ground. Or replace the airbag main harness along with the bulkhead harness. |
| 14 | **CHECK POOR CONTACT OF CONNECTOR.** | Is there poor contact of the control module power supply, ground circuit and data link connector? | Repair the connector. (Replace the harness instead of repairing the airbag system connector.) | Replace the airbag control module. <Ref. to AB-77, REMOVAL, Airbag Control Module.> |

# 8. Read Diagnostic Trouble Code (DTC)

## A: OPERATION

For operation procedures, refer to the “PC application help for Subaru Select Monitor”.

NOTE:
For details concerning DTCs, refer to List of Diagnostic Trouble Codes (DTC). <Ref. to AB(diag)-34, List of Diagnostic Trouble Code (DTC).>

# 9. Inspection Mode

## A: PROCEDURE

Recreate the circumstance by referring to the conditions described in the checklist.

# 10.Clear Memory Mode

## A: OPERATION

For operation procedures, refer to the “PC application help for Subaru Select Monitor”.

NOTE:
Clear the DTC stored in the airbag control module after repairing the airbag system.

# 11.Display of Status Information

## A: OPERATION

Check the operating condition of each sensor, in the event of malfunction in the seat belt buckle switch or when the seat belt buckle switch has been replaced.
1) On «Main Menu» display, select {Each System Check}.
2) On «System Selection Menu» display, select {Airbag System}.
3) On «Airbag System» display, select {Current Data Display & Save}.
The following table is for support data.

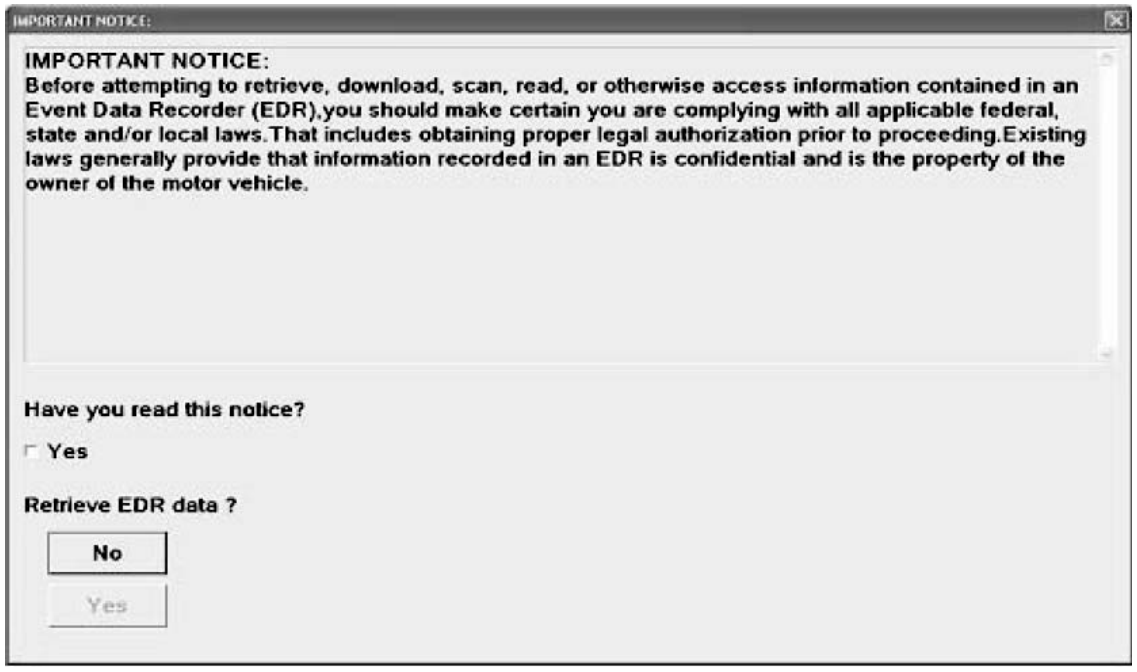
| Item | Display | Note |
|---|---|---|
| Trip Count | — | — |
| Count | — | — |
| Time Count | — | — |
| Belt Buckle Switch RH | Unbelted/Belted | “Belted” when passenger’s seat belt is fastened<br>“Unbelted” when passenger’s seat belt is not fastened |
| Passenger Occupant Status | Occupied/Empty or CRS | “Occupied” when the occupant is present<br>“Empty or CRS” when the seat is unoccupied or when child restraint seat is installed |
| Passenger Airbag Status | ON/OFF | “ON” when the passenger occupant status is “Occupied”<br>“OFF” when the status is “Empty or CRS” |

NOTE:
For detailed operation procedures, refer to “PC application help for Subaru Select Monitor”.

# 12.Event Record Data

## A: OPERATION

1) On «Main Menu» display, select {Each System Check}.
2) On «System Selection Menu» display, select {Airbag System}.
3) On «Airbag System» display, select {Event Record Data}. After it is selected, {IMPORTANT NOTICE} screen is displayed.
4) Once you have read the contents of the «IMPORTANT NOTICE», click the Yes checkbox.
5) If doing so will not violate any laws, click the {Yes} button to retrieve the EDR data.



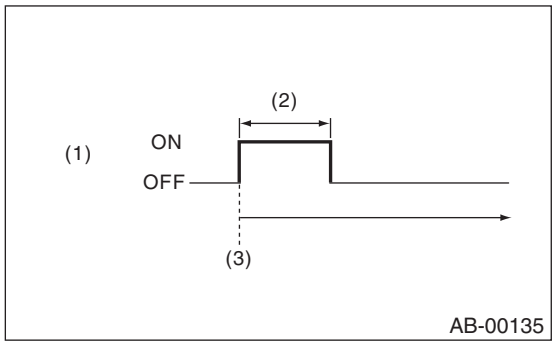
AB-02847

6) Select the items to be checked from each event record data.
7) Select the record data to be checked from each record data.
8) The selected record data is displayed. If there is no data recorded, «No Event Record Data Recorded» is displayed.
9) Select [Exit] to return to each event record data screen.

# 13. Airbag Warning Light Illumination Pattern

## A: INSPECTION

Turn the ignition switch to ON, and confirm that the airbag warning light remains on for approx. 6 seconds then turns off afterwards.



(1) Airbag warning light
(2) Approx. 6 sec.
(3) Ignition switch ON

# 14.Airbag Warning Light Failure

## A: AIRBAG WARNING LIGHT REMAINS ON

**DETECTING CONDITION:**

- Airbag warning light is faulty.
- Airbag control module to combination meter circuit is shorted or open.
- Grounding circuit is faulty.
- Airbag control module is faulty.
- Connector connection is improper.
- Connections of (AB6, AB17, AB18) to airbag control module are improper.

**CAUTION:**
**Before performing diagnosis, refer to "CAUTION" in "General Description". <Ref. to AB(diag)-4, CAUTION, General Description.>**

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK CAN COMMUNICATION.**<br>Inspect LAN system. <Ref. to LAN(diag)-2, PROCEDURE, Basic Diagnostic Procedure.> | Is there any fault? | Repair it according to diagnosis of LAN system. | Go to step **2**. |
| 2 | **CHECK DTC.**<br>1) Turn the ignition switch to OFF, disconnect the battery ground cable, and wait for 60 seconds or more.<br>2) Check the connection status of airbag CM connector. | Is there poor contact of connector? | Reconnect the connector. Or repair the connector. | Go to step **3**. |
| 3 | **CHECK FOR POOR CONTACT.**<br>Check the combination meter. <Ref. to IDI(diag)-2, PROCEDURE, Basic Diagnostic Procedure.> | Is there any fault? | Repair it according to INSTRUMENTATION/DRIVER INFO (DIAGNOSTICS). | Replace the airbag CM. <Ref. to AB-77, REMOVAL, Airbag Control Module.> |

## B: AIRBAG WARNING LIGHT REMAINS OFF

NOTE:
For the diagnostic procedure, refer to "AIRBAG WARNING LIGHT REMAINS ON". <Ref. to AB(diag)-33, AIRBAG WARNING LIGHT REMAINS ON, Airbag Warning Light Failure.>

# 15.List of Diagnostic Trouble Code (DTC)

## A: LIST

| DTC | Item | Content of diagnosis | Reference |
|---|---|---|---|
| U0073 | Control Module Communication Bus “A” Off | CAN communication error occurred. | <Ref. to AB(diag)-44, DTC U0073 CONTROL MODULE COMMUNICATION BUS “A” OFF, Diagnostic Chart with Trouble Code.> |
| B1000 | Airbag ECU Malfunction | Airbag control module is faulty. | <Ref. to AB(diag)-45, DTC B1000 AIRBAG ECU MALFUNCTION, Diagnostic Chart with Trouble Code.> |
| B1003 | Airbag ECU Malfunction | Airbag control module is faulty. | <Ref. to AB(diag)-45, DTC B1003 AIRBAG ECU MALFUNCTION, Diagnostic Chart with Trouble Code.> |
| B1105 | Airbag ECU Malfunction | Airbag control module is faulty. | <Ref. to AB(diag)-45, DTC B1105 AIRBAG ECU MALFUNCTION, Diagnostic Chart with Trouble Code.> |
| B1106 | Airbag ECU Malfunction | Airbag control module is faulty. | <Ref. to AB(diag)-45, DTC B1106 AIRBAG ECU MALFUNCTION, Diagnostic Chart with Trouble Code.> |
| B1115 | Airbag ECU Malfunction | Airbag control module is faulty. | <Ref. to AB(diag)-45, DTC B1115 AIRBAG ECU MALFUNCTION, Diagnostic Chart with Trouble Code.> |
| B1116 | Airbag ECU Malfunction | Airbag control module is faulty. | <Ref. to AB(diag)-45, DTC B1116 AIRBAG ECU MALFUNCTION, Diagnostic Chart with Trouble Code.> |
| B1120 | Airbag ECU Malfunction | Airbag control module is faulty. | <Ref. to AB(diag)-46, DTC B1120 AIRBAG ECU MALFUNCTION, Diagnostic Chart with Trouble Code.> |
| B1121 | Airbag ECU Malfunction | Airbag control module is faulty. | <Ref. to AB(diag)-46, DTC B1121 AIRBAG ECU MALFUNCTION, Diagnostic Chart with Trouble Code.> |
| B1125 | Airbag ECU Malfunction | Airbag control module is faulty. | <Ref. to AB(diag)-46, DTC B1125 AIRBAG ECU MALFUNCTION, Diagnostic Chart with Trouble Code.> |
| B1126 | Airbag ECU Malfunction | Airbag control module is faulty. | <Ref. to AB(diag)-46, DTC B1126 AIRBAG ECU MALFUNCTION, Diagnostic Chart with Trouble Code.> |
| B1135 | Airbag ECU Malfunction | Airbag control module is faulty. | <Ref. to AB(diag)-46, DTC B1135 AIRBAG ECU MALFUNCTION, Diagnostic Chart with Trouble Code.> |
| B1136 | Airbag ECU Malfunction | Airbag control module is faulty. | <Ref. to AB(diag)-46, DTC B1136 AIRBAG ECU MALFUNCTION, Diagnostic Chart with Trouble Code.> |

| DTC | Item | Content of diagnosis | Reference |
|---|---|---|---|
| B1145 | Airbag ECU Malfunction | Airbag control module is faulty. | <Ref. to AB(diag)-46, DTC B1145 AIRBAG ECU MALFUNCTION, Diagnostic Chart with Trouble Code.> |
| B1146 | Airbag ECU Malfunction | Airbag control module is faulty. | <Ref. to AB(diag)-46, DTC B1146 AIRBAG ECU MALFUNCTION, Diagnostic Chart with Trouble Code.> |
| B1170 | Airbag ECU Malfunction | Airbag control module is faulty. | <Ref. to AB(diag)-46, DTC B1170 AIRBAG ECU MALFUNCTION, Diagnostic Chart with Trouble Code.> |
| B1185 | Airbag ECU Malfunction | Airbag control module is faulty. | <Ref. to AB(diag)-46, DTC B1185 AIRBAG ECU MALFUNCTION, Diagnostic Chart with Trouble Code.> |
| B1195 | Airbag ECU Malfunction | Airbag control module is faulty. | <Ref. to AB(diag)-47, DTC B1195 AIRBAG ECU MALFUNCTION, Diagnostic Chart with Trouble Code.> |
| B1196 | Airbag ECU Malfunction | Airbag control module is faulty. | <Ref. to AB(diag)-47, DTC B1196 AIRBAG ECU MALFUNCTION, Diagnostic Chart with Trouble Code.> |
| B1199 | Airbag ECU Malfunction | Airbag control module is faulty. | <Ref. to AB(diag)-47, DTC B1199 AIRBAG ECU MALFUNCTION, Diagnostic Chart with Trouble Code.> |
| B11E0 | Rollover Ignition | Curtain airbag module (LH/RH) and seat belt pretensioner (LH/RH) are deployed. | <Ref. to AB(diag)-47, DTC B11E0 ROLLOVER IGNITION, Diagnostic Chart with Trouble Code.> |
| B11F2 | Front Impact Ignition | Front airbag module and seat belt pretensioner (LH/RH) are inflated. | <Ref. to AB(diag)-47, DTC B11F2 FRONT IMPACT IGNITION, Diagnostic Chart with Trouble Code.> |
| B11F3 | Front Impact Ignition | Front airbag module and seat belt pretensioner (LH/RH) are inflated. | <Ref. to AB(diag)-47, DTC B11F3 FRONT IMPACT IGNITION, Diagnostic Chart with Trouble Code.> |
| B11F4 | Front Impact Ignition | Front airbag module and seat belt pretensioner (LH/RH) are inflated. | <Ref. to AB(diag)-47, DTC B11F4 FRONT IMPACT IGNITION, Diagnostic Chart with Trouble Code.> |
| B11F5 | Front Impact Ignition | Front airbag module and seat belt pretensioner (LH/RH) are inflated. | <Ref. to AB(diag)-47, DTC B11F5 FRONT IMPACT IGNITION, Diagnostic Chart with Trouble Code.> |
| B11F7 | Side Impact Ignition | • Side airbag module and curtain airbag module are deployed.<br>• Curtain airbag module is deployed. | <Ref. to AB(diag)-48, DTC B11F7 SIDE IMPACT IGNITION, Diagnostic Chart with Trouble Code.> |
| B11F8 | Side Impact Ignition | • Side airbag module and curtain airbag module are deployed.<br>• Curtain airbag module is deployed. | <Ref. to AB(diag)-48, DTC B11F8 SIDE IMPACT IGNITION, Diagnostic Chart with Trouble Code.> |
| B11F9 | Side Impact Ignition | • Side airbag module and curtain airbag module are deployed.<br>• Curtain airbag module is deployed. | <Ref. to AB(diag)-48, DTC B11F9 SIDE IMPACT IGNITION, Diagnostic Chart with Trouble Code.> |

| DTC | Item | Content of diagnosis | Reference |
|---|---|---|---|
| B11FA | Side Impact Ignition | • Side airbag module and curtain airbag module are deployed.<br>• Curtain airbag module is deployed. | <Ref. to AB(diag)-48, DTC B11FA SIDE IMPACT IGNITION, Diagnostic Chart with Trouble Code.> |
| B11FB | Side Impact Ignition | • Side airbag module and curtain airbag module are deployed.<br>• Curtain airbag module is deployed. | <Ref. to AB(diag)-48, DTC B11FB SIDE IMPACT IGNITION, Diagnostic Chart with Trouble Code.> |
| B11FC | Side Impact Ignition | • Side airbag module and curtain airbag module are deployed.<br>• Curtain airbag module is deployed. | <Ref. to AB(diag)-48, DTC B11FC SIDE IMPACT IGNITION, Diagnostic Chart with Trouble Code.> |
| B1610 | Front Sub Sensor RH Failure | Front sub sensor (RH) is faulty | <Ref. to AB(diag)-48, DTC B1610 FRONT SUB SENSOR RH FAILURE, Diagnostic Chart with Trouble Code.> |
| B1612 | Front Sub Sensor RH Lost Communication | • Open or short circuit in harness (RH) between airbag control module and front sub sensor.<br>• Front sub sensor (RH) is faulty.<br>• Airbag control module is faulty. | <Ref. to AB(diag)-48, DTC B1612 FRONT SUB SENSOR RH LOST COMMUNICATION, Diagnostic Chart with Trouble Code.> |
| B1613 | Front Sub Sensor RH Initialization Error | | <Ref. to AB(diag)-49, DTC B1613 FRONT SUB SENSOR RH INITIALIZATION ERROR, Diagnostic Chart with Trouble Code.> |
| B1615 | Front Sub Sensor LH Failure | Front sub sensor (LH) is faulty. | <Ref. to AB(diag)-51, DTC B1615 FRONT SUB SENSOR LH FAILURE, Diagnostic Chart with Trouble Code.> |
| B1617 | Front Sub Sensor LH Lost Communication | • Open or short circuit in harness (LH) between airbag control module and front sub sensor.<br>• Front sub sensor (LH) is faulty.<br>• Airbag control module is faulty. | <Ref. to AB(diag)-51, DTC B1617 FRONT SUB SENSOR LH LOST COMMUNICATION, Diagnostic Chart with Trouble Code.> |
| B1618 | Front Sub Sensor LH Initialization Error | | <Ref. to AB(diag)-52, DTC B1618 FRONT SUB SENSOR LH INITIALIZATION ERROR, Diagnostic Chart with Trouble Code.> |
| B16F2 | Front Sub Sensor RH Recognition Error | • Front sensor (RH) is misinstalled.<br>• Airbag control module is faulty. | <Ref. to AB(diag)-54, DTC B16F2 FRONT SUB SENSOR RH RECOGNITION ERROR, Diagnostic Chart with Trouble Code.> |
| B16F3 | Front Sub Sensor LH Recognition Error | • Front sensor (LH) is misinstalled.<br>• Airbag control module is faulty. | <Ref. to AB(diag)-54, DTC B16F3 FRONT SUB SENSOR LH RECOGNITION ERROR, Diagnostic Chart with Trouble Code.> |
| B1620 | Side Airbag Sensor RH Failure | Side airbag sensor (RH) is faulty. | <Ref. to AB(diag)-54, DTC B1620 SIDE AIRBAG SENSOR RH FAILURE, Diagnostic Chart with Trouble Code.> |
| B1622 | Side Airbag Sensor RH Lost Communication | • Open or short circuit in harness (RH) between airbag control module and side airbag sensor.<br>• Side airbag sensor (RH) is faulty.<br>• Airbag control module is faulty. | <Ref. to AB(diag)-54, DTC B1622 SIDE AIRBAG SENSOR RH LOST COMMUNICATION, Diagnostic Chart with Trouble Code.> |
| B1623 | Side Airbag Sensor RH Initialization Error | | <Ref. to AB(diag)-55, DTC B1623 SIDE AIRBAG SENSOR RH INITIALIZATION ERROR, Diagnostic Chart with Trouble Code.> |

| DTC | Item | Content of diagnosis | Reference |
|---|---|---|---|
| B1625 | Side Airbag Sensor LH Failure | Side airbag sensor (LH) is faulty. | <Ref. to AB(diag)-57, DTC B1625 SIDE AIRBAG SENSOR LH FAILURE, Diagnostic Chart with Trouble Code.> |
| B1627 | Side Airbag Sensor LH Lost Communication | • Open or short circuit in harness (LH) between airbag control module and side airbag sensor.<br>• Side airbag sensor (LH) is faulty.<br>• Airbag control module is faulty. | <Ref. to AB(diag)-57, DTC B1627 SIDE AIRBAG SENSOR LH LOST COMMUNICATION, Diagnostic Chart with Trouble Code.> |
| B1628 | Side Airbag Sensor LH Initialization Error | | <Ref. to AB(diag)-58, DTC B1628 SIDE AIRBAG SENSOR LH INITIALIZATION ERROR, Diagnostic Chart with Trouble Code.> |
| B1630 | Curtain Airbag Sensor RH Failure | Curtain airbag sensor (RH) is faulty. | <Ref. to AB(diag)-60, DTC B1630 CURTAIN AIRBAG SENSOR RH FAILURE, Diagnostic Chart with Trouble Code.> |
| B1632 | Curtain Airbag Sensor RH Lost Communication | • Open or short circuit in harness (RH) between airbag control module and curtain airbag sensor.<br>• Side airbag sensor (RH) is faulty.<br>• Curtain airbag sensor (RH) is faulty.<br>• Airbag control module is faulty. | <Ref. to AB(diag)-60, DTC B1632 CURTAIN AIRBAG SENSOR RH LOST COMMUNICATION, Diagnostic Chart with Trouble Code.> |
| B1633 | Curtain Airbag Sensor RH Initialization Error | | <Ref. to AB(diag)-61, DTC B1633 CURTAIN AIRBAG SENSOR RH INITIALIZATION ERROR, Diagnostic Chart with Trouble Code.> |
| B1635 | Curtain Airbag Sensor LH Failure | Curtain airbag sensor (LH) is faulty. | <Ref. to AB(diag)-63, DTC B1635 CURTAIN AIRBAG SENSOR LH FAILURE, Diagnostic Chart with Trouble Code.> |
| B1637 | Curtain Airbag Sensor LH Lost Communication | • Open or short circuit in harness (LH) between airbag control module and curtain airbag sensor.<br>• Side airbag sensor (LH) is faulty.<br>• Curtain airbag sensor (LH) is faulty.<br>• Airbag control module is faulty. | <Ref. to AB(diag)-63, DTC B1637 CURTAIN AIRBAG SENSOR LH LOST COMMUNICATION, Diagnostic Chart with Trouble Code.> |
| B1638 | Curtain Airbag Sensor LH Initialization Error | | <Ref. to AB(diag)-64, DTC B1638 CURTAIN AIRBAG SENSOR LH INITIALIZATION ERROR, Diagnostic Chart with Trouble Code.> |
| B16F4 | Side Airbag Sensor RH Recognition Error | • Side airbag sensor (RH) is misinstalled.<br>• Airbag control module is faulty. | <Ref. to AB(diag)-67, DTC B16F4 SIDE AIRBAG SENSOR RH RECOGNITION ERROR, Diagnostic Chart with Trouble Code.> |
| B16F5 | Side Airbag Sensor LH Recognition Error | • Side airbag sensor (LH) is misinstalled.<br>• Airbag control module is faulty. | <Ref. to AB(diag)-67, DTC B16F5 SIDE AIRBAG SENSOR LH RECOGNITION ERROR, Diagnostic Chart with Trouble Code.> |
| B16F6 | Curtain Airbag Sensor RH Recognition Error | • Curtain airbag sensor (RH) is misinstalled.<br>• Airbag control module is faulty. | <Ref. to AB(diag)-68, DTC B16F6 CURTAIN AIRBAG SENSOR RH RECOGNITION ERROR, Diagnostic Chart with Trouble Code.> |
| B16F7 | Curtain Airbag Sensor LH Recognition Error | • Curtain airbag sensor (LH) is misinstalled.<br>• Airbag control module is faulty. | <Ref. to AB(diag)-68, DTC B16F7 CURTAIN AIRBAG SENSOR LH RECOGNITION ERROR, Diagnostic Chart with Trouble Code.> |
| B1642 | Side Satellite Sensor Bus RH Lost Communication | • Open or short circuit in harness (RH) between airbag control module and front door impact sensor.<br>• Side airbag sensor (RH) is faulty.<br>• Curtain airbag sensor (RH) is faulty.<br>• Front door impact sensor (RH) is faulty.<br>• Airbag control module is faulty. | <Ref. to AB(diag)-69, DTC B1642 SIDE SATELLITE SENSOR BUS RH LOST COMMUNICATION, Diagnostic Chart with Trouble Code.> |

| DTC | Item | Content of diagnosis | Reference |
|---|---|---|---|
| B1647 | Side Satellite Sensor Bus LH Lost Communication | • Open or short circuit in harness (LH) between airbag control module and front door impact sensor.<br>• Side airbag sensor (LH) is faulty.<br>• Curtain airbag sensor (LH) is faulty.<br>• Front door impact sensor (LH) is faulty.<br>• Airbag control module is faulty. | <Ref. to AB(diag)-73, DTC B1647 SIDE SATELLITE SENSOR BUS LH LOST COMMUNICATION, Diagnostic Chart with Trouble Code.> |
| B1650 | Occupant Classification System Malfunction | • Occupant detection sensor is faulty.<br>• Occupant detection control module is faulty.<br>• Occupant detection harness is faulty.<br>• Rear airbag harness (RH) is faulty.<br>• Fuse No. 25 is blown. | <Ref. to AB(diag)-76, DTC B1650 OCCUPANT CLASSIFICATION SYSTEM MALFUNCTION, Diagnostic Chart with Trouble Code.> |
| B1655 | Front Buckle Switch RH Failure | • Buckle switch (RH) circuit is open, shorted or shorted to ground.<br>• Occupant detection system is faulty.<br>• Occupant detection harness is faulty. | <Ref. to AB(diag)-76, DTC B1655 FRONT BUCKLE SWITCH RH FAILURE, Diagnostic Chart with Trouble Code.> |
| B1660 | Passenger's Airbag On Indicator Failure | • Passenger's airbag indicator is faulty.<br>• Airbag control module is faulty.<br>• Airbag main harness circuit is open, shorted or shorted to ground.<br>• Body harness circuit is open. | <Ref. to AB(diag)-77, DTC B1660 PASSENGER'S AIRBAG ON INDICATOR FAILURE, Diagnostic Chart with Trouble Code.> |
| B1675 | Satellite Safing Sensor Failure | Satellite safing sensor is faulty. | <Ref. to AB(diag)-79, DTC B1675 SATELLITE SAFING SENSOR FAILURE, Diagnostic Chart with Trouble Code.> |
| B1676 | Lost Communication With Satellite Safing Sensor | • Open or short circuit in harness between airbag control module and satellite safing sensor.<br>• Satellite safing sensor is faulty.<br>• Airbag control module is faulty. | <Ref. to AB(diag)-79, DTC B1676 LOST COMMUNICATION WITH SATELLITE SAFING SENSOR, Diagnostic Chart with Trouble Code.> |
| B1677 | Satellite Safing Sensor Initialization Incomplete | | <Ref. to AB(diag)-80, DTC B1677 SATELLITE SAFING SENSOR INITIALIZATION INCOMPLETE, Diagnostic Chart with Trouble Code.> |
| B16F8 | Satellite Safing Sensor Recognition Error | • Satellite safing sensor is misinstalled.<br>• Airbag control module is faulty. | <Ref. to AB(diag)-83, DTC B16F8 SATELLITE SAFING SENSOR RECOGNITION ERROR, Diagnostic Chart with Trouble Code.> |
| B16F9 | Door Sensor RH Recognition Error | • Front door impact sensor (RH) is misinstalled.<br>• Airbag control module is faulty. | <Ref. to AB(diag)-83, DTC B16F9 DOOR SENSOR RH RECOGNITION ERROR, Diagnostic Chart with Trouble Code.> |
| B1690 | Door Sensor RH Failure | Front door impact sensor (RH) is faulty. | <Ref. to AB(diag)-83, DTC B1690 DOOR SENSOR RH FAILURE, Diagnostic Chart with Trouble Code.> |
| B1692 | Lost Communication With Door Sensor RH | • Open or short circuit in harness between curtain airbag sensor and front door impact sensor.<br>• Front door impact sensor (RH) is faulty.<br>• Curtain airbag sensor (RH) is faulty.<br>• Airbag control module is faulty. | <Ref. to AB(diag)-83, DTC B1692 LOST COMMUNICATION WITH DOOR SENSOR RH, Diagnostic Chart with Trouble Code.> |
| B1693 | Door Sensor RH Initialization Incomplete | | <Ref. to AB(diag)-84, DTC B1693 DOOR SENSOR RH INITIALIZATION INCOMPLETE, Diagnostic Chart with Trouble Code.> |
| B16FA | Lost Communication With Door Sensor LH | • Front door impact sensor (LH) is misinstalled.<br>• Airbag control module is faulty. | <Ref. to AB(diag)-87, DTC B16FA LOST COMMUNICATION WITH DOOR SENSOR LH, Diagnostic Chart with Trouble Code.> |

| DTC | Item | Content of diagnosis | Reference |
|---|---|---|---|
| B1695 | Door Sensor LH Failure | Front door impact sensor (LH) is faulty. | <Ref. to AB(diag)-87, DTC B1695 DOOR SENSOR LH FAILURE, Diagnostic Chart with Trouble Code.> |
| B1697 | Lost Communication With Door Sensor LH | • Open or short circuit in harness between curtain airbag sensor and front door impact sensor.<br>• Front door impact sensor (LH) is faulty.<br>• Curtain airbag sensor (LH) is faulty.<br>• Airbag control module is faulty. | <Ref. to AB(diag)-87, DTC B1697 LOST COMMUNICATION WITH DOOR SENSOR LH, Diagnostic Chart with Trouble Code.> |
| B1698 | Door Sensor LH Initialization Incomplete | | <Ref. to AB(diag)-88, DTC B1698 DOOR SENSOR LH INITIALIZATION INCOMPLETE, Diagnostic Chart with Trouble Code.> |
| B161A | Lost Communication With Front Satellite Sensor Bus | • Open or short circuit in harness between airbag control module and front sub sensor.<br>• Front sub sensor is faulty.<br>• Airbag control module is faulty. | <Ref. to AB(diag)-91, DTC B161A LOST COMMUNICATION WITH FRONT SATELLITE SENSOR BUS, Diagnostic Chart with Trouble Code.> |
| B16F1 | Passenger's Seat Belt Warning Failure | • Airbag control module is faulty.<br>• Body integrated unit is faulty.<br>• Harness circuits between body integrated unit and airbag control module are open, shorted or shorted to ground. | <Ref. to AB(diag)-94, DTC B16F1 PASSENGER'S SEAT BELT WARNING FAILURE, Diagnostic Chart with Trouble Code.> |
| B16F0 | Passenger's Airbag Off Indicator Failure | • Airbag warning light is faulty.<br>• Open or short circuit in harness between airbag control module and airbag warning light.<br>• Poor contact of airbag main harness and instrument panel harness. • Ground circuit is faulty.<br>• Airbag control module is faulty. | <Ref. to AB(diag)-95, DTC B16F0 PASSENGER'S AIRBAG OFF INDICATOR FAILURE, Diagnostic Chart with Trouble Code.> |
| B1760 | Sensor Mat Abnormal | • Occupant detection sensor is open, shorted between terminals, shorted to power supply or shorted to ground.<br>• Seat heater is open.<br>• Occupant detection control module is faulty. | <Ref. to AB(diag)-95, DTC B1760 SENSOR MAT ABNORMAL, Diagnostic Chart with Trouble Code.> |
| B1761 | Sensor Mat Liquid Coating Abnormal | • Detected that the occupant detection sensor is spattered with fluid.<br>• Occupant detection sensor is faulty.<br>• Occupant detection control module is faulty. | <Ref. to AB(diag)-95, DTC B1761 SENSOR MAT LIQUID COATING ABNORMAL, Diagnostic Chart with Trouble Code.> |
| B1771 | Buckle Switch Abnormal | • Passenger's buckle switch circuit is open, shorted or shorted to ground.<br>• Occupant detection system is faulty.<br>• Occupant detection harness is faulty. | <Ref. to AB(diag)-95, DTC B1771 BUCKLE SWITCH ABNORMAL, Diagnostic Chart with Trouble Code.> |
| B1795 | ECU Internal Circuit Fault | Occupant detection control module is faulty. | <Ref. to AB(diag)-95, DTC B1795 ECU INTERNAL CIRCUIT FAULT, Diagnostic Chart with Trouble Code.> |
| B1800 | Short in Driver's Airbag | • Airbag main harness circuit is shorted.<br>• Airbag module harness (driver's side) circuit is shorted.<br>• Roll connector circuit is shorted.<br>• Driver's airbag module is faulty.<br>• Airbag control module is faulty. | <Ref. to AB(diag)-96, DTC B1800 SHORT IN DRIVER'S AIRBAG, Diagnostic Chart with Trouble Code.> |
| B1801 | Open in Driver's Airbag | • Airbag main harness circuit is open.<br>• Airbag module harness circuit (driver's side) is open.<br>• Roll connector circuit is open.<br>• Driver's airbag module is faulty.<br>• Airbag control module is faulty. | <Ref. to AB(diag)-98, DTC B1801 OPEN IN DRIVER'S AIRBAG, Diagnostic Chart with Trouble Code.> |

| DTC | Item | Content of diagnosis | Reference |
|---|---|---|---|
| B1802 | Short in Driver's Airbag (To Ground) | • Airbag main harness circuit is shorted to ground.<br>• Airbag module harness (driver's side) circuit is shorted to ground.<br>• Roll connector circuit is shorted to ground.<br>• Driver's airbag module is faulty.<br>• Airbag control module is faulty. | <Ref. to AB(diag)-100, DTC B1802 SHORT IN DRIVER'S AIRBAG (TO GROUND), Diagnostic Chart with Trouble Code.> |
| B1803 | Short in Driver's Airbag (To +B) | • Airbag main harness circuit is shorted to power supply.<br>• Airbag module harness circuit (driver's side) is shorted to power supply.<br>• Roll connector circuit is shorted to power supply.<br>• Airbag module is faulty.<br>• Airbag control module is faulty. | <Ref. to AB(diag)-102, DTC B1803 SHORT IN DRIVER'S AIRBAG (TO +B), Diagnostic Chart with Trouble Code.> |
| B1805 | Short in Passenger's Airbag | • Airbag main harness circuit is shorted.<br>• Airbag module harness circuit (passenger's side) is shorted.<br>• Passenger's airbag module is faulty.<br>• Airbag control module is faulty. | <Ref. to AB(diag)-104, DTC B1805 SHORT IN PASSENGER'S AIRBAG, Diagnostic Chart with Trouble Code.> |
| B1806 | Open in Passenger's Airbag | • Airbag main harness circuit is open.<br>• Airbag module harness circuit (passenger's side) is open.<br>• Passenger's airbag module is faulty.<br>• Airbag control module is faulty. | <Ref. to AB(diag)-106, DTC B1806 OPEN IN PASSENGER'S AIRBAG, Diagnostic Chart with Trouble Code.> |
| B1807 | Short in Passenger's Airbag (To Ground) | • Airbag main harness circuit is shorted to ground.<br>• Airbag module harness (passenger's side) circuit is shorted to ground.<br>• Passenger's airbag module is faulty.<br>• Airbag control module is faulty. | <Ref. to AB(diag)-109, DTC B1807 SHORT IN PASSENGER'S AIRBAG (TO GROUND), Diagnostic Chart with Trouble Code.> |
| B1808 | Short in Passenger's Airbag (To +B) | • Airbag main harness circuit is shorted to power supply.<br>• Airbag module harness (passenger's side) circuit is shorted to power supply.<br>• Passenger's airbag module is faulty.<br>• Airbag control module is faulty. | <Ref. to AB(diag)-112, DTC B1808 SHORT IN PASSENGER'S AIRBAG (TO +B), Diagnostic Chart with Trouble Code.> |
| B1810 | Short in Driver's Airbag Dual Stage - 2nd Step | • Airbag main harness circuit is shorted.<br>• Airbag module harness (driver's side) circuit is shorted.<br>• Roll connector circuit is shorted.<br>• Driver's airbag module is faulty.<br>• Airbag control module is faulty. | <Ref. to AB(diag)-115, DTC B1810 SHORT IN DRIVER'S AIRBAG DUAL STAGE - 2ND STEP, Diagnostic Chart with Trouble Code.> |
| B1811 | Open in Driver's Airbag Dual Stage - 2nd Step | • Airbag main harness circuit is open.<br>• Airbag module harness circuit (driver's side) is open.<br>• Roll connector circuit is open.<br>• Driver's airbag module is faulty.<br>• Airbag control module is faulty. | <Ref. to AB(diag)-117, DTC B1811 OPEN IN DRIVER'S AIRBAG DUAL STAGE - 2ND STEP, Diagnostic Chart with Trouble Code.> |
| B1812 | Short in Driver's Airbag Dual Stage - 2nd Step (To Ground) | • Airbag main harness circuit is shorted to ground.<br>• Airbag module harness (driver's side) circuit is shorted to ground.<br>• Roll connector circuit is shorted to ground.<br>• Driver's airbag module is faulty.<br>• Airbag control module is faulty. | <Ref. to AB(diag)-119, DTC B1812 SHORT IN DRIVER'S AIRBAG DUAL STAGE - 2ND STEP (TO GROUND), Diagnostic Chart with Trouble Code.> |
| B1813 | Short in Driver's Airbag Dual Stage - 2nd Step Circuit (To +B) | • Airbag main harness circuit is shorted to power supply.<br>• Airbag module harness circuit (driver's side) is shorted to power supply.<br>• Roll connector circuit is shorted to power supply.<br>• Airbag module is faulty.<br>• Airbag control module is faulty. | <Ref. to AB(diag)-121, DTC B1813 SHORT IN DRIVER'S AIRBAG DUAL STAGE - 2ND STEP CIRCUIT (TO +B), Diagnostic Chart with Trouble Code.> |

| DTC | Item | Content of diagnosis | Reference |
|---|---|---|---|
| B1815 | Open in Passenger's Airbag Dual Stage - 2nd Step | • Airbag main harness circuit is shorted.<br>• Airbag module harness circuit (passenger's side) is shorted.<br>• Passenger's airbag module is faulty.<br>• Airbag control module is faulty. | <Ref. to AB(diag)-123, DTC B1815 OPEN IN PASSENGER'S AIRBAG DUAL STAGE - 2ND STEP, Diagnostic Chart with Trouble Code.> |
| B1816 | Open in Passenger's Airbag Dual Stage - 2nd Step | • Airbag main harness circuit is open.<br>• Airbag module harness circuit (passenger's side) is open.<br>• Passenger's airbag module is faulty.<br>• Airbag control module is faulty. | <Ref. to AB(diag)-125, DTC B1816 OPEN IN PASSENGER'S AIRBAG DUAL STAGE - 2ND STEP, Diagnostic Chart with Trouble Code.> |
| B1817 | Short in Passenger's Airbag Dual Stage - 2nd Step (To Ground) | • Airbag main harness circuit is shorted to ground.<br>• Airbag module harness (passenger's side) circuit is shorted to ground.<br>• Passenger's airbag module is faulty.<br>• Airbag control module is faulty. | <Ref. to AB(diag)-128, DTC B1817 SHORT IN PASSENGER'S AIRBAG DUAL STAGE - 2ND STEP (TO GROUND), Diagnostic Chart with Trouble Code.> |
| B1818 | Short in Passenger's Airbag Dual Stage - 2nd Step Circuit (To +B) | • Airbag main harness circuit is shorted to power supply.<br>• Airbag module harness (passenger's side) circuit is shorted to power supply.<br>• Passenger's airbag module is faulty.<br>• Airbag control module is faulty. | <Ref. to AB(diag)-131, DTC B1818 SHORT IN PASSENGER'S AIRBAG DUAL STAGE - 2ND STEP CIRCUIT (TO +B), Diagnostic Chart with Trouble Code.> |
| B1820 | Short in Side Airbag RH | • Side airbag harness (RH) circuit is shorted.<br>• Side airbag module (RH) is faulty.<br>• Airbag control module is faulty. | <Ref. to AB(diag)-134, DTC B1820 SHORT IN SIDE AIRBAG RH, Diagnostic Chart with Trouble Code.> |
| B1821 | Open in Side Airbag RH | • Side airbag harness (RH) circuit is open.<br>• Side airbag module (RH) is faulty.<br>• Airbag control module is faulty. | <Ref. to AB(diag)-136, DTC B1821 OPEN IN SIDE AIRBAG RH, Diagnostic Chart with Trouble Code.> |
| B1822 | Short in Side Airbag RH (To Ground) | • Side airbag harness (RH) circuit is shorted to ground.<br>• Side airbag module (RH) is faulty.<br>• Airbag control module is faulty. | <Ref. to AB(diag)-138, DTC B1822 SHORT IN SIDE AIRBAG RH (TO GROUND), Diagnostic Chart with Trouble Code.> |

# 16.Diagnostic Chart with Trouble Code

## A: DTC U0073 CONTROL MODULE COMMUNICATION BUS “A” OFF

This is detected when a CAN line malfunction occurs.

NOTE:
Perform the diagnosis for LAN system. <Ref. to LAN(diag)-2, PROCEDURE, Basic Diagnostic Procedure.>

## B: DTC B1000 AIRBAG ECU MALFUNCTION

**DTC DETECTING CONDITION:**
Airbag control module is faulty.

**CAUTION:**
**Before performing diagnosis, refer to "CAUTION" in "General Description". <Ref. to AB(diag)-4, CAUTION, General Description.>**

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK DTC.**<br>Read the DTC. (Current malfunction) <Ref. to AB(diag)-27, Read Diagnostic Trouble Code (DTC).> | Is any of B1000, B1003, B1105, B1106, B1115, B1116, B1120, B1121, B1125, B1126, B1135, B1136, B1145, B1146, B1170, B1185, B1195, B1196 or B1199 displayed? | Replace the airbag control module. <Ref. to AB-77, Airbag Control Module.> | Perform the Clear Memory Mode. <Ref. to AB(diag)-29, Clear Memory Mode.> |

## C: DTC B1003 AIRBAG ECU MALFUNCTION

NOTE:
Refer to DTC B1103 for details on DTC B1000. <Ref. to AB(diag)-45, DTC B1000 AIRBAG ECU MALFUNCTION, Diagnostic Chart with Trouble Code.>

## D: DTC B1105 AIRBAG ECU MALFUNCTION

NOTE:
Refer to DTC B1105 for details on DTC B1000. <Ref. to AB(diag)-45, DTC B1000 AIRBAG ECU MALFUNCTION, Diagnostic Chart with Trouble Code.>

## E: DTC B1106 AIRBAG ECU MALFUNCTION

NOTE:
Refer to DTC B1106 for details on DTC B1000. <Ref. to AB(diag)-45, DTC B1000 AIRBAG ECU MALFUNCTION, Diagnostic Chart with Trouble Code.>

## F: DTC B1115 AIRBAG ECU MALFUNCTION

NOTE:
Refer to DTC B1115 for details on DTC B1000. <Ref. to AB(diag)-45, DTC B1000 AIRBAG ECU MALFUNCTION, Diagnostic Chart with Trouble Code.>

## G: DTC B1116 AIRBAG ECU MALFUNCTION

NOTE:
Refer to DTC B1116 for details on DTC B1000. <Ref. to AB(diag)-45, DTC B1000 AIRBAG ECU MALFUNCTION, Diagnostic Chart with Trouble Code.>

## H: DTC B1120 AIRBAG ECU MALFUNCTION

NOTE:
Refer to DTC B1120 for details on DTC B1000. <Ref. to AB(diag)-45, DTC B1000 AIRBAG ECU MALFUNCTION, Diagnostic Chart with Trouble Code.>

## I: DTC B1121 AIRBAG ECU MALFUNCTION

NOTE:
Refer to DTC B1121 for details on DTC B1000. <Ref. to AB(diag)-45, DTC B1000 AIRBAG ECU MALFUNCTION, Diagnostic Chart with Trouble Code.>

## J: DTC B1125 AIRBAG ECU MALFUNCTION

NOTE:
Refer to DTC B1125 for details on DTC B1000. <Ref. to AB(diag)-45, DTC B1000 AIRBAG ECU MALFUNCTION, Diagnostic Chart with Trouble Code.>

## K: DTC B1126 AIRBAG ECU MALFUNCTION

NOTE:
Refer to DTC B1126 for details on DTC B1000. <Ref. to AB(diag)-45, DTC B1000 AIRBAG ECU MALFUNCTION, Diagnostic Chart with Trouble Code.>

## L: DTC B1135 AIRBAG ECU MALFUNCTION

NOTE:
Refer to DTC B1135 for details on DTC B1000. <Ref. to AB(diag)-45, DTC B1000 AIRBAG ECU MALFUNCTION, Diagnostic Chart with Trouble Code.>

## M: DTC B1136 AIRBAG ECU MALFUNCTION

NOTE:
Refer to DTC B1136 for details on DTC B1000. <Ref. to AB(diag)-45, DTC B1000 AIRBAG ECU MALFUNCTION, Diagnostic Chart with Trouble Code.>

## N: DTC B1145 AIRBAG ECU MALFUNCTION

NOTE:
Refer to DTC B1145 for details on DTC B1000. <Ref. to AB(diag)-45, DTC B1000 AIRBAG ECU MALFUNCTION, Diagnostic Chart with Trouble Code.>

## O: DTC B1146 AIRBAG ECU MALFUNCTION

NOTE:
Refer to DTC B1146 for details on DTC B1000. <Ref. to AB(diag)-45, DTC B1000 AIRBAG ECU MALFUNCTION, Diagnostic Chart with Trouble Code.>

## P: DTC B1170 AIRBAG ECU MALFUNCTION

NOTE:
Refer to DTC B1170 for details on DTC B1000. <Ref. to AB(diag)-45, DTC B1000 AIRBAG ECU MALFUNCTION, Diagnostic Chart with Trouble Code.>

## Q: DTC B1185 AIRBAG ECU MALFUNCTION

NOTE:
Refer to DTC B1185 for details on DTC B1000. <Ref. to AB(diag)-45, DTC B1000 AIRBAG ECU MALFUNCTION, Diagnostic Chart with Trouble Code.>

## R: DTC B1195 AIRBAG ECU MALFUNCTION

NOTE:
Refer to DTC B1195 for details on DTC B1000. <Ref. to AB(diag)-45, DTC B1000 AIRBAG ECU MALFUNCTION, Diagnostic Chart with Trouble Code.>

## S: DTC B1196 AIRBAG ECU MALFUNCTION

NOTE:
Refer to DTC B1196 for details on DTC B1000. <Ref. to AB(diag)-45, DTC B1000 AIRBAG ECU MALFUNCTION, Diagnostic Chart with Trouble Code.>

## T: DTC B1199 AIRBAG ECU MALFUNCTION

NOTE:
Refer to DTC B1199 for details on DTC B1000. <Ref. to AB(diag)-45, DTC B1000 AIRBAG ECU MALFUNCTION, Diagnostic Chart with Trouble Code.>

## U: DTC B11E0 ROLLOVER IGNITION

This DTC is indicated when the curtain airbag module and the seat belt pretensioner are deployed.
Once this DTC is displayed, the memory cannot be cleared. Replace the following parts.
- Airbag control module <Ref. to AB-77, Airbag Control Module.>
- Curtain airbag module <Ref. to AB-74, Curtain Airbag Module.>
- Front outer seat belt with pretensioner <Ref. to SB-16, Front Seat Belt.>

## V: DTC B11F2 FRONT IMPACT IGNITION

**DTC DETECTING CONDITION:**
This DTC is indicated when the front airbag module and the pretensioner are deployed.
Once this DTC is displayed, the memory cannot be cleared. Therefore replace the following parts.
- Airbag control module <Ref. to AB-77, Airbag Control Module.>
- Driver's airbag module <Ref. to AB-42, Driver's Airbag Module.>
- Passenger's airbag module <Ref. to AB-47, Passenger's Airbag Module.>
- Front sub sensor of both sides. <Ref. to AB-81, Front Sub Sensor.>
- Front outer seat belt with pretensioner of both sides. <Ref. to SB-16, Front Seat Belt.>
- Steering roll connector <Ref. to AB-104, Roll Connector.>
- Occupant detection system (passenger's seat cushion & frame assembly) <Ref. to SE-7, Front Seat.>

## W: DTC B11F3 FRONT IMPACT IGNITION

NOTE:
For details on DTC B11F3, refer to DTC B11F2. <Ref. to AB(diag)-47, DTC B11F2 FRONT IMPACT IGNITION, Diagnostic Chart with Trouble Code.>

## X: DTC B11F4 FRONT IMPACT IGNITION

NOTE:
For details on DTC B11F4, refer to DTC B11F2. <Ref. to AB(diag)-47, DTC B11F2 FRONT IMPACT IGNITION, Diagnostic Chart with Trouble Code.>

## Y: DTC B11F5 FRONT IMPACT IGNITION

NOTE:
For details on DTC B11F5, refer to DTC B11F2. <Ref. to AB(diag)-47, DTC B11F2 FRONT IMPACT IGNITION, Diagnostic Chart with Trouble Code.>

## Z: DTC B11F7 SIDE IMPACT IGNITION

This DTC is displayed when the side airbag module and curtain airbag module are deployed.
Once this DTC is displayed, the memory cannot be cleared. Replace the following parts.

- Airbag control module <Ref. to AB-77, Airbag Control Module.>
- Side airbag module (operating side) <Ref. to AB-66, Side Airbag Module.>
- Side airbag sensor (operating side) <Ref. to AB-88, Side Airbag Sensor.>
- Curtain airbag module (operating side) <Ref. to AB-74, Curtain Airbag Module.>
- Curtain airbag sensor (operating side) <Ref. to AB-93, Curtain Airbag Sensor.>
- Satellite safing sensor <Ref. to AB-101, Satellite Safing Sensor.>
- Front door impact sensor (operating side) <Ref. to AB-85, Front Door Impact Sensor.>

## AA:DTC B11F8 SIDE IMPACT IGNITION

NOTE:
For details on DTC B11F8. refer to DTC B11F7. <Ref. to AB(diag)-48, DTC B11F7 SIDE IMPACT IGNITION, Diagnostic Chart with Trouble Code.>

## AB:DTC B11F9 SIDE IMPACT IGNITION

NOTE:
For details on DTC B11F9, refer to DTC B11F7. <Ref. to AB(diag)-48, DTC B11F7 SIDE IMPACT IGNITION, Diagnostic Chart with Trouble Code.>

## AC:DTC B11FA SIDE IMPACT IGNITION

NOTE:
For details on DTC B11FA, refer to DTC B11F7. <Ref. to AB(diag)-48, DTC B11F7 SIDE IMPACT IGNITION, Diagnostic Chart with Trouble Code.>

## AD:DTC B11FB SIDE IMPACT IGNITION

NOTE:
For details on DTC B11FB, refer to DTC B11F7. <Ref. to AB(diag)-48, DTC B11F7 SIDE IMPACT IGNITION, Diagnostic Chart with Trouble Code.>

## AE:DTC B11FC SIDE IMPACT IGNITION

NOTE:
For details on DTC B11FC, refer to DTC B11F7. <Ref. to AB(diag)-48, DTC B11F7 SIDE IMPACT IGNITION, Diagnostic Chart with Trouble Code.>

## AF:DTC B1610 FRONT SUB SENSOR RH FAILURE

**DTC DETECTING CONDITION:**
Front sub sensor (RH) is faulty.
If DTC B1610 is displayed, the circuit within the front sub sensor (RH) is faulty.
Replace the front sub sensor (RH). <Ref. to AB-81, Front Sub Sensor.>

## AG:DTC B1612 FRONT SUB SENSOR RH LOST COMMUNICATION

NOTE:
For details on DTC B1612, refer to DTC B1613. <Ref. to AB(diag)-49, DTC B1613 FRONT SUB SENSOR RH INITIALIZATION ERROR, Diagnostic Chart with Trouble Code.>

# AH:DTC B1613 FRONT SUB SENSOR RH INITIALIZATION ERROR

**DTC DETECTING CONDITION:**

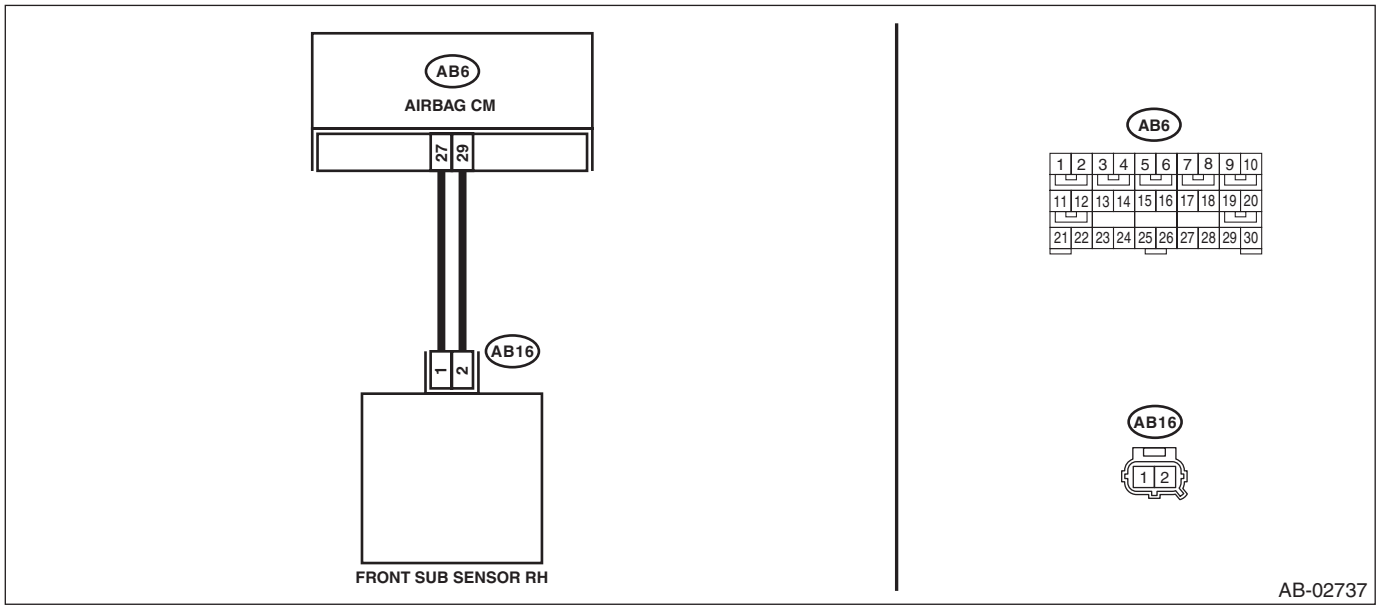
- Open or short circuit in harness of front sensor bus (RH).
- Front sub sensor (RH) is faulty.
- Airbag control module is faulty.

**CAUTION:**

**Before performing diagnosis, refer to "CAUTION" in "General Description". <Ref. to AB(diag)-4, CAUTION, General Description.>**

**WIRING DIAGRAM:**

Airbag system <Ref. to WI-30, WIRING DIAGRAM, Airbag System.>



| | Step | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK POOR CONTACT OF CONNECTORS.**<br>Check for poor contact of the connectors (AB6, AB16) between the airbag control module and the front sub sensor (RH). | Is there poor contact? | Replace the airbag main harness along with body harness. | Go to step **2**. |

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 2 | **CHECK AIRBAG MAIN HARNESS (FRONT SENSOR BUS RH).**<br>1) Turn the ignition switch to OFF, disconnect the battery ground cable, and wait for 60 seconds or more.<br>2) Remove the instrument panel lower cover and column cover, and disconnect the connectors (AB7) and (AB2).<br>3) Remove the console front panel and disconnect the connector (AB9).<br>4) Disconnect the connectors (AB6, AB17, AB18) from airbag control module.<br>5) Connect the connector (1AG) in the test harness AG to the connectors (AB6, AB17, AB18).<br>NOTE:<br>Except for XV models, connect test harness AH between the connectors (AB6, AB17, AB18) and (1AG).<br>6) Disconnect the connector (AB16) from the front sub sensor (RH), and then connect the connector (1H) in the test harness H to connector (AB16).<br>7) Measure the resistance between connector (4AG) in the test harness AG and connector (3H) in the test harness H.<br>***Connector & terminal***<br>***(4AG) No. 14 — (3H) No. 5:***<br>***(4AG) No. 12 — (3H) No. 6:*** | Is the resistance less than 10 Ω? | Go to step **3**. | Replace the airbag main harness along with body harness. |
| 3 | **CHECK AIRBAG MAIN HARNESS (FRONT SENSOR BUS RH).**<br>Measure the resistance between connector (4AG) in the test harness AG and chassis ground, and the resistance between connector (4AG) terminals in the test harness AG.<br>***Connector & terminal***<br>***(4AG) No. 12 — Chassis ground:***<br>***(4AG) No. 14 — Chassis ground:***<br>***(4AG) No. 12 — (4AG) No. 14:*** | Is the resistance 1 MΩ or more? | Go to step **4**. | Replace the airbag main harness along with body harness. |
| 4 | **CHECK AIRBAG CONTROL MODULE.**<br>1) Connect all connectors.<br>2) Clear the memory.<br>3) Perform the Inspection Mode.<br>4) Read the DTC. (Current malfunction) | Is the same DTC displayed? | Replace the front sub sensor (RH). <Ref. to AB-81, REMOVAL, Front Sub Sensor.> Replace the airbag control module if not operating normally even after replacing the sensor. <Ref. to AB-77, REMOVAL, Airbag Control Module.> | Go to step **5**. |
| 5 | **CHECK FOR ANY OTHER DTC ON DISPLAY.** | Is any other DTC displayed? | Check DTC using “List of Diagnostic Trouble Code”. <Ref. to AB(diag)-34, List of Diagnostic Trouble Code (DTC).> | Finish the diagnosis. |

## AI: DTC B1615 FRONT SUB SENSOR LH FAILURE

**DTC DETECTING CONDITION:**

Front sub sensor (LH) is faulty.

If DTC B1615 is displayed, the circuit within the front sub sensor (LH) is faulty.

Replace the front sub sensor (LH). <Ref. to AB-81, Front Sub Sensor.>

## AJ:DTC B1617 FRONT SUB SENSOR LH LOST COMMUNICATION

NOTE:

For details on DTC B1617, refer to DTC B1618. <Ref. to AB(diag)-52, DTC B1618 FRONT SUB SENSOR LH INITIALIZATION ERROR, Diagnostic Chart with Trouble Code.>

# AK:DTC B1618 FRONT SUB SENSOR LH INITIALIZATION ERROR

**DTC DETECTING CONDITION:**

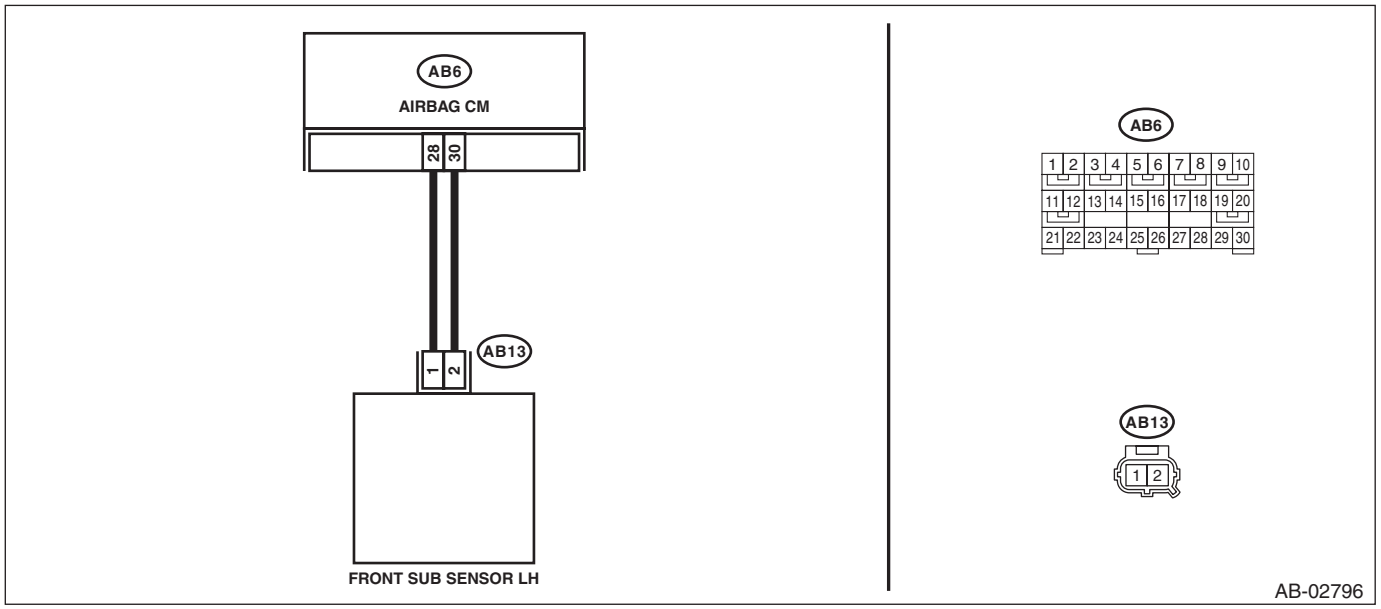
- Open or short circuit in harness of front sensor bus (LH).
- Front sub sensor (LH) is faulty.
- Airbag control module is faulty.

**CAUTION:**

**Before performing diagnosis, refer to "CAUTION" in "General Description". <Ref. to AB(diag)-4, CAUTION, General Description.>**

**WIRING DIAGRAM:**

Airbag system <Ref. to WI-30, WIRING DIAGRAM, Airbag System.>



| Step | | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK POOR CONTACT OF CONNECTORS.**<br>Check for poor contact of the connectors (AB6, AB13) between the airbag control module and the front sub sensor (LH). | Is there poor contact? | Replace the airbag main harness along with body harness. | Go to step **2**. |

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 2 | **CHECK AIRBAG MAIN HARNESS (FRONT SENSOR BUS LH).**<br>1) Turn the ignition switch to OFF, disconnect the battery ground cable, and wait for 60 seconds or more.<br>2) Remove the instrument panel lower cover and column cover, and disconnect the connectors (AB7) and (AB2).<br>3) Remove the console front panel and disconnect the connector (AB9).<br>4) Disconnect the connectors (AB6, AB17, AB18) from airbag control module.<br>5) Connect the connector (1AG) in the test harness AG to the connectors (AB6, AB17, AB18).<br>NOTE:<br>Except for XV models, connect test harness AH between the connectors (AB6, AB17, AB18) and (1AG).<br>6) Disconnect the connector (AB13) from the front sub sensor (LH), and then connect the connector (1H) in the test harness H to connector (AB13).<br>7) Measure the resistance between connector (4AG) in the test harness AG and connector (3H) in the test harness H.<br>***Connector & terminal***<br>***(4AG) No. 7 — (3H) No. 5:***<br>***(4AG) No. 9 — (3H) No. 6:*** | Is the resistance less than 10 Ω? | Go to step **3**. | Replace the airbag main harness along with body harness. |
| 3 | **CHECK AIRBAG MAIN HARNESS (FRONT SENSOR BUS LH).**<br>Measure the resistance between connector (4AG) in the test harness AG and chassis ground, and the resistance between connector (4AG) terminals in the test harness AG.<br>***Connector & terminal***<br>***(4AG) No. 7 — Chassis ground:***<br>***(4AG) No. 9 — Chassis ground:***<br>***(4AG) No. 7 — (4AG) No. 9:*** | Is the resistance 1 MΩ or more? | Go to step **4**. | Replace the airbag main harness along with body harness. |
| 4 | **CHECK AIRBAG CONTROL MODULE.**<br>1) Connect all connectors.<br>2) Clear the memory.<br>3) Perform the Inspection Mode.<br>4) Read the DTC. (Current malfunction) | Is the same DTC displayed? | Replace the front sub sensor (LH). <Ref. to AB-81, REMOVAL, Front Sub Sensor.> Replace the airbag control module if not operating normally even after replacing the sensor. <Ref. to AB-77, REMOVAL, Airbag Control Module.> | Go to step **5**. |
| 5 | **CHECK FOR ANY OTHER DTC ON DISPLAY.** | Is any other DTC displayed? | Check DTC using “List of Diagnostic Trouble Code”. <Ref. to AB(diag)-34, List of Diagnostic Trouble Code (DTC).> | Finish the diagnosis. |

## AL:DTC B16F2 FRONT SUB SENSOR RH RECOGNITION ERROR

**DTC DETECTING CONDITION:**
Front sub sensor (RH) is misinstalled.

**CAUTION:**
**Before performing diagnosis, refer to "CAUTION" in "General Description". <Ref. to AB(diag)-4, CAUTION, General Description.>**

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 1 | **REPLACE FRONT SUB SENSOR.**<br>1) Turn the ignition switch to OFF, disconnect the battery ground cable, and wait for 60 seconds or more.<br>2) Replace the front sub sensor (RH) with a genuine sensor. <Ref. to AB-81, REMOVAL, Front Sub Sensor.> | Does the warning light go off? | Finish the diagnosis. | Replace the airbag control module. <Ref. to AB-77, REMOVAL, Airbag Control Module.> |

## AM:DTC B16F3 FRONT SUB SENSOR LH RECOGNITION ERROR

**DTC DETECTING CONDITION:**
Front sub sensor (LH) is misinstalled.

**CAUTION:**
**Before performing diagnosis, refer to "CAUTION" in "General Description". <Ref. to AB(diag)-4, CAUTION, General Description.>**

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 1 | **REPLACE FRONT SUB SENSOR.**<br>1) Turn the ignition switch to OFF, disconnect the battery ground cable, and wait for 60 seconds or more.<br>2) Replace the front sub sensor (LH) with a genuine sensor. <Ref. to AB-81, REMOVAL, Front Sub Sensor.> | Does the warning light go off? | Finish the diagnosis. | Replace the airbag control module. <Ref. to AB-77, REMOVAL, Airbag Control Module.> |

## AN:DTC B1620 SIDE AIRBAG SENSOR RH FAILURE

**DTC DETECTING CONDITION:**
Side airbag sensor (RH) is faulty.
When DTC B1620 is displayed, the circuit within the side airbag sensor (RH) is faulty.
Replace the side airbag sensor (RH). <Ref. to AB-88, Side Airbag Sensor.>

## AO:DTC B1622 SIDE AIRBAG SENSOR RH LOST COMMUNICATION

NOTE:
For details on DTC B1622, refer to DTC B1623. <Ref. to AB(diag)-55, DTC B1623 SIDE AIRBAG SENSOR RH INITIALIZATION ERROR, Diagnostic Chart with Trouble Code.>

# AP:DTC B1623 SIDE AIRBAG SENSOR RH INITIALIZATION ERROR

**DTC DETECTING CONDITION:**

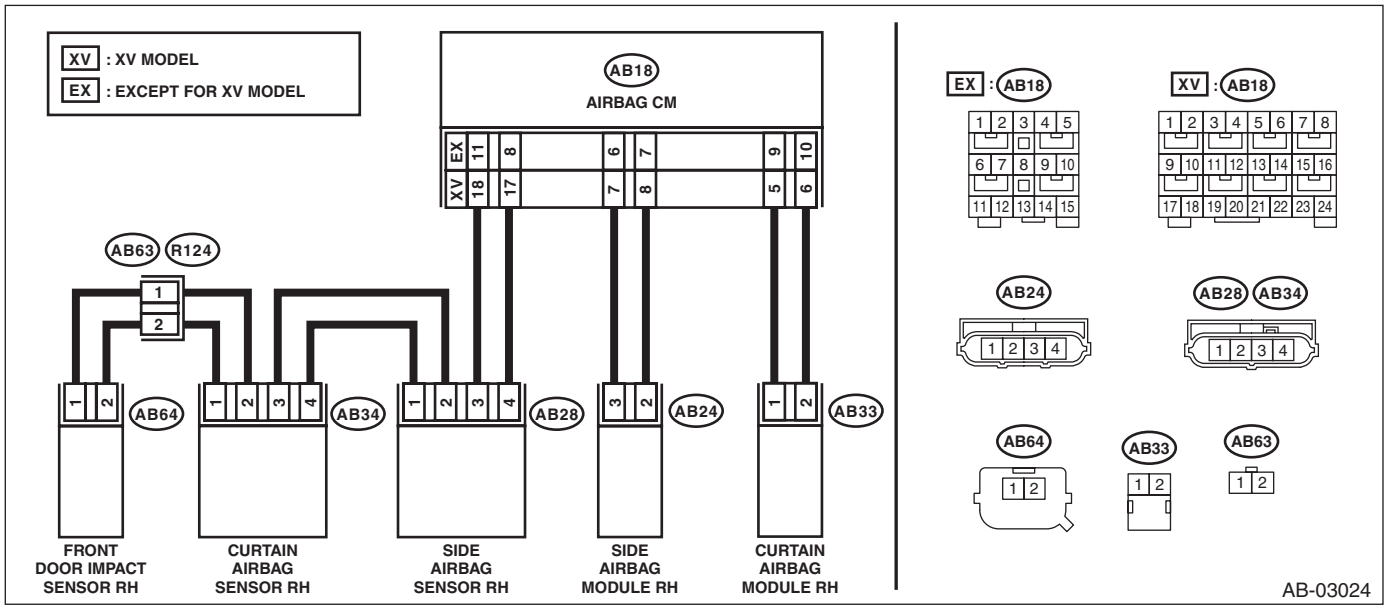
- Open or short circuit in harness of side sensor bus (RH).
- Side airbag sensor (RH) and curtain airbag sensor (RH) are faulty.
- Airbag control module is faulty.

**CAUTION:**

**Before performing diagnosis, refer to "CAUTION" in "General Description". <Ref. to AB(diag)-4, CAUTION, General Description.>**

**WIRING DIAGRAM:**

Airbag system <Ref. to WI-30, WIRING DIAGRAM, Airbag System.>



| | Step | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK POOR CONTACT OF CONNECTORS.**<br>Check for poor contact of the connectors between the airbag control module and the side airbag sensor (RH). | Is there poor contact? | Replace the airbag rear harness along with body harness. | Go to step **2**. |
| 2 | **CHECK AIRBAG REAR HARNESS (BETWEEN AIRBAG CONTROL MODULE AND SIDE AIRBAG SENSOR RH).**<br>1) Turn the ignition switch to OFF, disconnect the battery ground cable, and wait for 60 seconds or more.<br>2) Disconnect the connector (AB26) from seat belt pretensioner (RH).<br>3) Disconnect the connector (AB33) from curtain airbag module (RH).<br>4) Disconnect connector (AB24) of the side airbag module (RH).<br>5) Disconnect the connectors (AB6, AB17, AB18) from airbag control module.<br>6) Connect the connector (1AG) in the test harness AG to the connectors (AB6, AB17, AB18).<br>NOTE:<br>Except for XV models, connect test harness AH between the connectors (AB6, AB17, AB18) and (1AG).<br>7) Disconnect the connector (AB28) from side airbag sensor (RH), and connect the connector (2V) in test harness V to connector (AB28).<br>8) Measure the resistance between connector (5AG) in the test harness AG and connector (3V) in the test harness V.<br>***Connector & terminal***<br>***XV model***<br>***(5AG) No. 14 — (3V) No. 1:***<br>***(5AG) No. 16 — (3V) No. 2:***<br>***Except for XV model***<br>***(5AG) No. 14 — (3V) No. 1:***<br>***(5AG) No. 15 — (3V) No. 2:*** | Is the resistance less than 10 Ω? | Go to step **3**. | Replace the airbag rear harness along with body harness. |
| 3 | **CHECK AIRBAG REAR HARNESS (BETWEEN AIRBAG CONTROL MODULE AND SIDE AIRBAG SENSOR RH).**<br>Measure the resistance between test harness AG connectors (5AG) and chassis ground, and the resistance between connectors (5AG) of the test harness AG.<br>***Connector & terminal***<br>***(3V) No. 1 — Chassis ground:***<br>***(3V) No. 2 — Chassis ground:***<br>***(3V) No. 1 — (3V) No. 2:*** | Is the resistance 1 MΩ or more? | Go to step **4**. | Replace the airbag rear harness along with body harness. |
| 4 | **CHECK AIRBAG CONTROL MODULE.**<br>1) Connect all connectors.<br>2) Clear the memory.<br>3) Perform the Inspection Mode.<br>4) Read the DTC. (Current malfunction) | Is the same DTC displayed? | Go to step **5**. | Go to step **6**. |

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 5 | **REPLACE SIDE AIRBAG SENSOR (RH) AND CHECK AIRBAG CONTROL MODULE AFTER REPLACEMENT.**<br>1) Turn the ignition switch to OFF, disconnect the battery ground cable, and wait for 60 seconds or more.<br>2) Replace the side airbag sensor (RH). <Ref. to AB-88, REMOVAL, Side Airbag Sensor.><br>3) Connect all connectors.<br>4) Clear the memory.<br>5) Perform the Inspection Mode.<br>6) Read the DTC. (Current malfunction) | Is the system normal? | Go to step **6**. | Replace the curtain airbag sensor (RH). <Ref. to AB-93, REMOVAL, Curtain Airbag Sensor.> Replace the airbag control module if not operating normally even after replacing the sensor. <Ref. to AB-77, REMOVAL, Airbag Control Module.> |
| 6 | **CHECK FOR ANY OTHER DTC ON DISPLAY.** | Is any other DTC displayed? | Check DTC using "List of Diagnostic Trouble Code (DTC)". <Ref. to AB(diag)-34, List of Diagnostic Trouble Code (DTC).> | Finish the diagnosis. |

## AQ:DTC B1625 SIDE AIRBAG SENSOR LH FAILURE

**DTC DETECTING CONDITION:**

Side airbag sensor (LH) is faulty.

When DTC B1625 is displayed, the circuit within the side airbag sensor (LH) is faulty.

Replace the side airbag sensor (LH). <Ref. to AB-88, Side Airbag Sensor.>

## AR:DTC B1627 SIDE AIRBAG SENSOR LH LOST COMMUNICATION

NOTE:

For details on DTC B1627, refer to DTC B1628. <Ref. to AB(diag)-58, DTC B1628 SIDE AIRBAG SENSOR LH INITIALIZATION ERROR, Diagnostic Chart with Trouble Code.>

# AS:DTC B1628 SIDE AIRBAG SENSOR LH INITIALIZATION ERROR

**DTC DETECTING CONDITION:**

- Open or short circuit in harness of side sensor bus (LH).
- Side airbag sensor (LH) and curtain airbag sensor (LH) are faulty.
- Airbag control module is faulty.

**CAUTION:**

**Before performing diagnosis, refer to "CAUTION" in "General Description". <Ref. to AB(diag)-4, CAUTION, General Description.>**

| 1 | **CHECK POOR CONTACT OF CONNECTORS.**<br>Check for poor contact of the connectors between the airbag control module and the side airbag sensor (RH). | Is there poor contact? | Replace the airbag rear harness along with body harness. | Go to step **2**. |
| 2 | **CHECK AIRBAG REAR HARNESS (BETWEEN AIRBAG CONTROL MODULE AND SIDE AIRBAG SENSOR LH).**<br>1) Turn the ignition switch to OFF, disconnect the battery ground cable, and wait for 60 seconds or more.<br>2) Disconnect the connector (AB21) from seat belt pretensioner (LH).<br>3) Disconnect the connector (AB31) from curtain airbag module (LH).<br>4) Disconnect connector (AB19) of the side airbag module (LH).<br>5) Disconnect the connectors (AB17, AB6, AB18) from airbag control module.<br>6) Connect the connector (1AG) in the test harness AG to the connectors (AB6, AB17, AB18).<br>NOTE:<br>Except for XV models, connect test harness AH between the connectors (AB6, AB17, AB18) and (1AG).<br>7) Disconnect the connector (AB23) from side airbag sensor (LH), and connect the connector (2V) in test harness V to connector (AB23).<br>8) Measure the resistance between connector (5AG) in the test harness AG and connector (3V) in the test harness V.<br>***Connector & terminal***<br>***XV model***<br>***(5AG) No. 8 — (3V) No. 2:***<br>***(5AG) No. 10 — (3V) No. 1:***<br>***Except for XV model***<br>***(5AG) No. 9 — (3V) No. 2:***<br>***(5AG) No. 10 — (3V) No. 1:*** | Is the resistance less than 10 Ω? | Go to step **3**. | Replace the airbag rear harness along with body harness. |
| 3 | **CHECK AIRBAG REAR HARNESS (BETWEEN AIRBAG CONTROL MODULE AND SIDE AIRBAG SENSOR LH).**<br>Measure the resistance between test harness AG connectors (5AG) and chassis ground, and the resistance between connectors (5AG) of the test harness AG.<br>***Connector & terminal***<br>***(3V) No. 1 — Chassis ground:***<br>***(3V) No. 2 — Chassis ground:***<br>***(3V) No. 1 — (3V) No. 2:*** | Is the resistance 1 MΩ or more? | Go to step **4**. | Replace the airbag rear harness along with body harness. |
| 4 | **CHECK AIRBAG CONTROL MODULE.**<br>1) Connect all connectors.<br>2) Clear the memory.<br>3) Perform the Inspection Mode.<br>4) Read the DTC. (Current malfunction) | Is the same DTC displayed? | Go to step **5**. | Go to step **6**. |

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 5 | **REPLACE SIDE AIRBAG SENSOR (LH) AND CHECK AIRBAG CONTROL MODULE AFTER REPLACEMENT.**<br>1) Turn the ignition switch to OFF, disconnect the battery ground cable, and wait for 60 seconds or more.<br>2) Replace the side airbag sensor (LH). <Ref. to AB-88, REMOVAL, Side Airbag Sensor.><br>3) Connect all connectors.<br>4) Clear the memory.<br>5) Perform the Inspection Mode.<br>6) Read the DTC. (Current malfunction) | Is the system normal? | Go to step **6**. | Replace the curtain airbag sensor (LH). <Ref. to AB-93, REMOVAL, Curtain Airbag Sensor.> Replace the airbag control module if not operating normally even after replacing the sensor. <Ref. to AB-77, REMOVAL, Airbag Control Module.> |
| 6 | **CHECK FOR ANY OTHER DTC ON DISPLAY.** | Is any other DTC displayed? | Check DTC using "List of Diagnostic Trouble Code (DTC)". <Ref. to AB(diag)-34, List of Diagnostic Trouble Code (DTC).> | Finish the diagnosis. |

## AT:DTC B1630 CURTAIN AIRBAG SENSOR RH FAILURE

**DTC DETECTING CONDITION:**

Curtain airbag sensor (RH) is faulty.
If DTC B1630 is displayed, the circuit within the curtain airbag sensor (RH) is faulty.
Replace the curtain airbag sensor (RH). <Ref. to AB-93, Curtain Airbag Sensor.>

## AU:DTC B1632 CURTAIN AIRBAG SENSOR RH LOST COMMUNICATION

NOTE:
For details on DTC B1632, refer to DTC B1633. <Ref. to AB(diag)-61, DTC B1633 CURTAIN AIRBAG SENSOR RH INITIALIZATION ERROR, Diagnostic Chart with Trouble Code.>

# AV:DTC B1633 CURTAIN AIRBAG SENSOR RH INITIALIZATION ERROR

**DTC DETECTING CONDITION:**

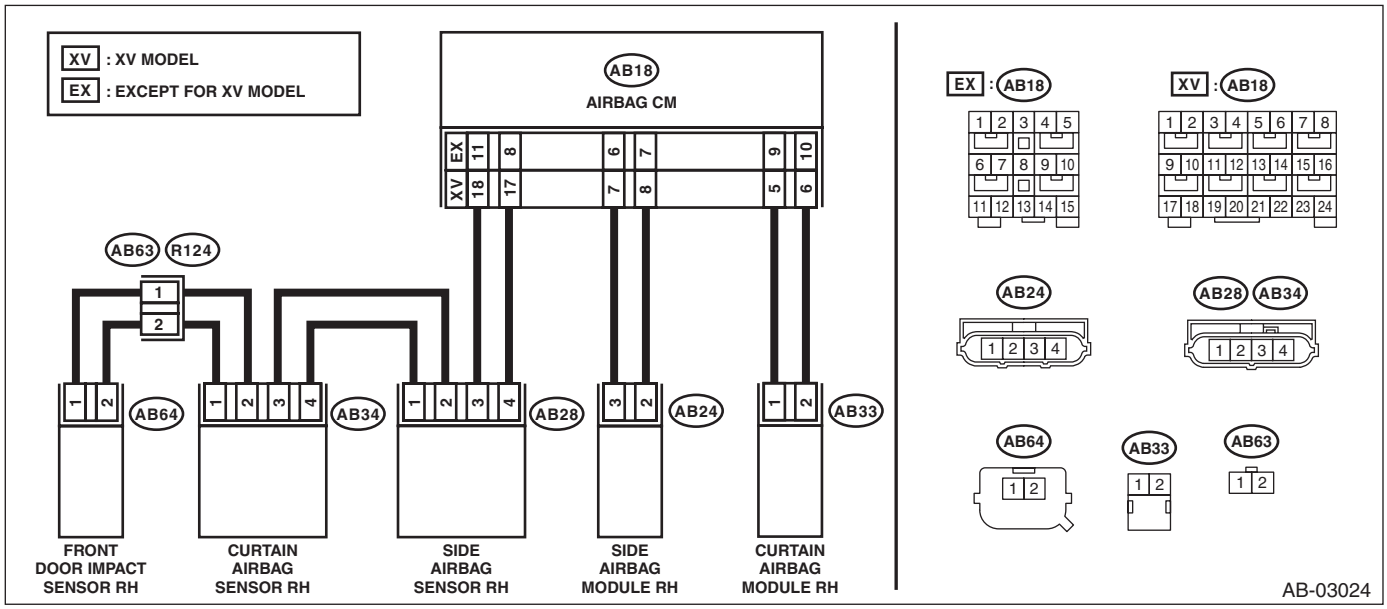
- Open or short circuit in harness of side sensor bus (RH).
- Side airbag sensor (RH) and curtain airbag sensor (RH) are faulty.
- Airbag control module is faulty.

**CAUTION:**

**Before performing diagnosis, refer to "CAUTION" in "General Description". <Ref. to AB(diag)-4, CAUTION, General Description.>**

**WIRING DIAGRAM:**

Airbag system <Ref. to WI-30, WIRING DIAGRAM, Airbag System.>



| Step | | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK DTC.**<br>Read the DTC. (Current malfunction) | Is DTC B1622 or B1623 displayed? | Perform the diagnosis according to DTC. | Go to step **2**. |
| 2 | **CHECK POOR CONTACT OF CONNECTORS.**<br>Check for poor contact of the connectors between the airbag control module and the door sensor (RH). | Is there poor contact? | Replace the airbag rear harness and the door harness. | Go to step **3**. |

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 3 | **CHECK AIRBAG REAR HARNESS (BETWEEN SIDE AIRBAG SENSOR (RH) AND CURTAIN AIRBAG SENSOR (RH)).**<br>1) Turn the ignition switch to OFF, disconnect the battery ground cable, and wait for 60 seconds or more.<br>2) Disconnect the connector (AB26) from seat belt pretensioner (RH).<br>3) Disconnect the connector (AB33) from curtain airbag module (RH).<br>4) Disconnect connector (AB24) of the side airbag module (RH).<br>5) Disconnect connector (AB28) from side airbag sensor (RH).<br>6) Connect the connector (AB28) of side airbag sensor (RH) and the connector (1AI) in the test harness AI.<br>7) Connect the connector (2AI) in the test harness AI and the connector (1V) in the test harness V.<br>8) Disconnect the connector (AB34) from curtain airbag sensor (RH), and connect the connector (2V) in test harness V to connector (AB34).<br>9) Measure the resistance between connector (3V) terminals in the test harness V.<br>***Connector & terminal***<br>***(3V) No. 2 — (3V) No. 6:***<br>***(3V) No. 1 — (3V) No. 7:*** | Is the resistance less than 10 Ω? | Go to step **4**. | Replace the airbag rear harness along with body harness. |
| 4 | **CHECK AIRBAG REAR HARNESS (BETWEEN SIDE AIRBAG SENSOR AND CURTAIN AIRBAG SENSOR RH).**<br>Measure the resistance between connector (3V) in test harness V and chassis ground, and the resistance between connector (3V) in test harness V.<br>***Connector & terminal***<br>***(3V) No. 2 — Chassis ground:***<br>***(3V) No. 1 — Chassis ground:***<br>***(3V) No. 2 — (3V) No. 1:*** | Is the resistance 1 MΩ or more? | Go to step **5**. | Replace the airbag rear harness along with body harness. |
| 5 | **CHECK AIRBAG CONTROL MODULE.**<br>1) Connect all connectors.<br>2) Clear the memory.<br>3) Perform the Inspection Mode.<br>4) Read the DTC. (Current malfunction) | Is the same DTC displayed? | Go to step **6**. | Go to step **7**. |

| 7 | **CHECK AIRBAG REAR HARNESS (BETWEEN SIDE AIRBAG SENSOR AND CURTAIN AIRBAG SENSOR RH).**<br>1) Disconnect the connector (2V) in the test harness V from the connector (AB28) of side airbag sensor (RH).<br>2) Connect the connector (AB28) of side airbag sensor (RH) and the connector (1AI) in the test harness AI.<br>3) Connect the connector (2AI) in the test harness AI and the connector (1V) in the test harness V.<br>4) Disconnect the connector (AB34) from curtain airbag sensor (RH), and connect the connector (2V) in test harness V to connector (AB34).<br>5) Measure the resistance between connector (3V) terminals in the test harness V.<br>***Connector & terminal***<br>***(3V) No. 2 — (3V) No. 6:***<br>***(3V) No. 1 — (3V) No. 7:*** | Is the resistance less than 10 Ω? | Go to step **8**. | Replace the airbag rear harness along with body harness. |
| 8 | **CHECK AIRBAG REAR HARNESS (BETWEEN SIDE AIRBAG SENSOR AND CURTAIN AIRBAG SENSOR RH).**<br>Measure the resistance between connector (3V) in test harness V and chassis ground, and the resistance between connector (3V) terminals in test harness V.<br>***Connector & terminal***<br>***(3V) No. 2 — Chassis ground:***<br>***(3V) No. 1 — Chassis ground:***<br>***(3V) No. 1 — (3V) No. 2:*** | Is the resistance 1 MΩ or more? | Go to step **9**. | Replace the airbag rear harness along with body harness. |
| 9 | **CHECK AIRBAG REAR HARNESS AND DOOR HARNESS (BETWEEN CURTAIN AIRBAG SENSOR RH AND DOOR SENSOR RH).**<br>1) Disconnect the connector (AB64) from the front door impact sensor (RH), and connect the connector (1H) in the test harness H to connector (AB64).<br>2) Measure the resistance between connector (3V) in the test harness V and connector (3H) in the test harness H.<br>***Connector & terminal***<br>***(3V) No. 4 — (3H) No. 5:***<br>***(3V) No. 5 — (3H) No. 6:*** | Is the resistance less than 10 Ω? | Go to step **10**. | Check the door harness, and if any fault is found, replace the harness. If there is no fault, replace the airbag rear harness together with body harness. |
| 10 | **CHECK AIRBAG REAR HARNESS AND DOOR HARNESS (BETWEEN CURTAIN AIRBAG SENSOR RH AND FRONT DOOR IMPACT SENSOR RH).**<br>Measure the resistance between connector (3V) in test harness V and chassis ground, and the resistance between connector (3V) terminals in test harness V.<br>***Connector & terminal***<br>***(3V) No. 4 — Chassis ground:***<br>***(3V) No. 5 — Chassis ground:***<br>***(3V) No. 4 — (3V) No. 5:*** | Is the resistance 1 MΩ or more? | Go to step **11**. | Check the door harness, and if any fault is found, replace the harness. If there is no fault, replace the airbag rear harness together with body harness. |

| Step | | Check | Yes | No |
|---|---|---|---|---|
| 11 | **CHECK AIRBAG CONTROL MODULE.**<br>1) Connect all connectors.<br>2) Clear the memory.<br>3) Perform the Inspection Mode.<br>4) Read the DTC. (Current malfunction) | Is the same DTC displayed? | Go to step **12**. | Go to step **15**. |
| 12 | **REPLACE SIDE AIRBAG SENSOR (RH) AND CHECK AIRBAG CONTROL MODULE AFTER REPLACEMENT.**<br>1) Turn the ignition switch to OFF, disconnect the battery ground cable, and wait for 60 seconds or more.<br>2) Replace the side airbag sensor (RH). <Ref. to AB-88, REMOVAL, Side Airbag Sensor.><br>3) Connect all connectors.<br>4) Clear the memory.<br>5) Perform the Inspection Mode.<br>6) Read the DTC. (Current malfunction) | Is the same DTC displayed? | Go to step **13**. | Go to step **15**. |
| 13 | **REPLACE CURTAIN AIRBAG SENSOR (RH) AND CHECK AIRBAG CONTROL MODULE AFTER REPLACEMENT.**<br>1) Turn the ignition switch to OFF, disconnect the battery ground cable, and wait for 60 seconds or more.<br>2) Replace the curtain airbag sensor (RH). <Ref. to AB-93, REMOVAL, Curtain Airbag Sensor.><br>3) Connect all connectors.<br>4) Clear the memory.<br>5) Perform the Inspection Mode.<br>6) Read the DTC. (Current malfunction) | Is the same DTC displayed? | Go to step **14**. | Go to step **15**. |
| 14 | **REPLACE FRONT DOOR IMPACT SENSOR (RH) AND CHECK AIRBAG CONTROL MODULE AFTER REPLACEMENT.**<br>1) Turn the ignition switch to OFF, disconnect the battery ground cable, and wait for 60 seconds or more.<br>2) Replace the front door impact sensor (RH). <Ref. to AB-85, REMOVAL, Front Door Impact Sensor.><br>3) Connect all connectors.<br>4) Clear the memory.<br>5) Perform the Inspection Mode.<br>6) Read the DTC. (Current malfunction) | Is the same DTC displayed? | Replace the airbag control module. <Ref. to AB-77, REMOVAL, Airbag Control Module.> | Go to step **15**. |
| 15 | **CHECK FOR ANY OTHER DTC ON DISPLAY.**<br>Read the DTC. (Current malfunction) | Is any other DTC displayed? | Perform the diagnosis according to DTC. | Finish the diagnosis. |

## BE:DTC B1647 SIDE SATELLITE SENSOR BUS LH LOST COMMUNICATION

**DTC DETECTING CONDITION:**

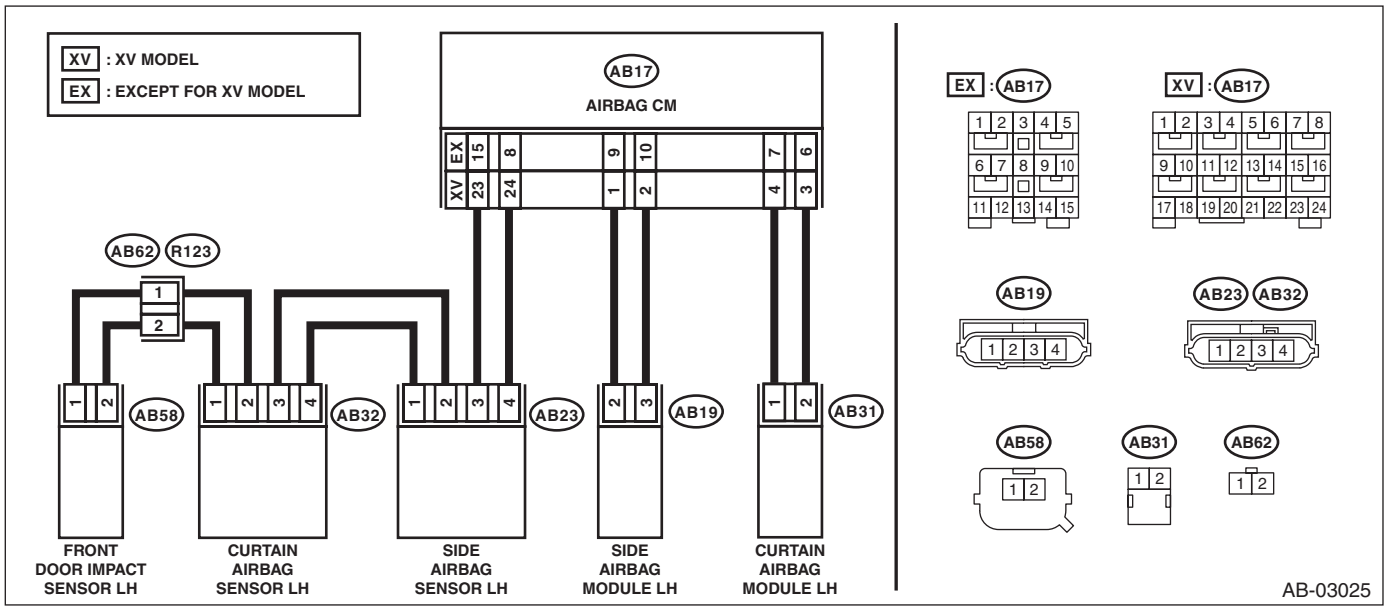
- Open or short circuit in harness of side sensor bus (LH).
- Side airbag sensor (LH) is faulty.
- Curtain airbag sensor (LH) is faulty.
- Front door impact sensor (LH) is faulty.
- Airbag control module is faulty.

**CAUTION:**

**Before performing diagnosis, refer to "CAUTION" in "General Description". <Ref. to AB(diag)-4, CAUTION, General Description.>**

**WIRING DIAGRAM:**

Airbag system <Ref. to WI-30, WIRING DIAGRAM, Airbag System.>



| Step | | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK DTC.**<br>Read the DTC. (Current malfunction) | Is DTC B1627 or B1628 displayed? | Perform the diagnosis according to DTC. | Go to step **2**. |
| 2 | **CHECK DTC.**<br>Read the DTC. (Current malfunction) | Is DTC B1637 or B1638 displayed? | Perform the diagnosis according to DTC. | Go to step **3**. |
| 3 | **CHECK DTC.**<br>Read the DTC. (Current malfunction) | Is DTC B1697 or B1698 displayed? | Perform the diagnosis according to DTC. | Go to step **4**. |
| 4 | **CHECK POOR CONTACT OF CONNECTORS.**<br>Check for poor contact of the connectors between the airbag control module and the front door impact sensor (LH). | Is there poor contact? | Replace the airbag rear harness and the door harness. | Go to step **5**. |

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 5 | **CHECK AIRBAG REAR HARNESS (BETWEEN AIRBAG CONTROL MODULE AND SIDE AIRBAG SENSOR LH).**<br>1) Turn the ignition switch to OFF, disconnect the battery ground cable, and wait for 60 seconds or more.<br>2) Disconnect the connector (AB21) from seat belt pretensioner (LH).<br>3) Disconnect the connector (AB31) from curtain airbag module (LH).<br>4) Disconnect connector (AB19) of the side airbag module (LH).<br>5) Disconnect the connectors (AB6, AB17, AB18) from airbag control module.<br>6) Connect the connector (1AG) in the test harness AG to the connectors (AB6, AB17, AB18).<br>NOTE:<br>Except for XV models, connect test harness AH between the connectors (AB6, AB17, AB18) and (1AG).<br>7) Disconnect the connector (AB23) from the side airbag sensor (LH).<br>8) Connect the connector (2V) in the test harness V to the connector (AB23).<br>9) Measure the resistance between connector (5AG) in the test harness AG and connector (3V) in the test harness V.<br>***Connector & terminal***<br>***XV model***<br>***(5AG) No. 10 — (3V) No. 1:***<br>***(5AG) No. 8 — (3V) No. 2:***<br>***Except for XV model***<br>***(5AG) No. 10 — (3V) No. 1:***<br>***(5AG) No. 9 — (3V) No. 2:*** | Is the resistance less than 10 Ω? | Go to step **6**. | Replace the airbag rear harness along with body harness. |
| 6 | **CHECK AIRBAG REAR HARNESS (BETWEEN AIRBAG CONTROL MODULE AND SIDE AIRBAG SENSOR LH).**<br>Measure the resistance between connector (3V) in test harness V and chassis ground, and the resistance between connector (3V) terminals.<br>***Connector & terminal***<br>***(3V) No. 1 — Chassis ground:***<br>***(3V) No. 2 — Chassis ground:***<br>***(3V) No. 1 — (3V) No. 2:*** | Is the resistance 1 MΩ or more? | Go to step **7**. | Replace the airbag rear harness along with body harness. |

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 7 | **CHECK AIRBAG REAR HARNESS (BETWEEN SIDE AIRBAG SENSOR AND CURTAIN AIRBAG SENSOR LH).**<br>1) Disconnect the connector (2V) in the test harness V from the connector (AB23) of side airbag sensor (LH).<br>2) Connect the connector (AB23) of side airbag sensor (LH) and the connector (1AI) in the test harness AI.<br>3) Connect the connector (2AI) in the test harness AI and the connector (1V) in the test harness V.<br>4) Disconnect the connector (AB32) from curtain airbag sensor (LH), and connect the connector (2V) in test harness V to connector (AB32).<br>5) Measure the resistance between connector (3V) terminals in the test harness V.<br>***Connector & terminal***<br>***(3V) No. 2 — (3V) No. 6:***<br>***(3V) No. 1 — (3V) No. 7:*** | Is the resistance less than 10 Ω? | Go to step **8**. | Replace the airbag rear harness along with body harness. |
| 8 | **CHECK AIRBAG REAR HARNESS (BETWEEN SIDE AIRBAG SENSOR AND CURTAIN AIRBAG SENSOR LH).**<br>Measure the resistance between connector (3V) in test harness V and chassis ground, and the resistance between connector (3V) terminals in test harness V.<br>***Connector & terminal***<br>***(3V) No. 2 — Chassis ground:***<br>***(3V) No. 1 — Chassis ground:***<br>***(3V) No. 1 — (3V) No. 2:*** | Is the resistance 1 MΩ or more? | Go to step **9**. | Replace the airbag rear harness along with body harness. |
| 9 | **CHECK AIRBAG REAR HARNESS AND DOOR HARNESS (BETWEEN CURTAIN AIRBAG SENSOR LH AND DOOR SENSOR LH).**<br>1) Disconnect the connector (AB58) from the front door impact sensor (LH), and connect the connector (1H) in the test harness H to connector (AB58).<br>2) Measure the resistance between connector (3V) in the test harness V and connector (3H) in the test harness H.<br>***Connector & terminal***<br>***(3V) No. 4 — (3H) No. 5:***<br>***(3V) No. 5 — (3H) No. 6:*** | Is the resistance less than 10 Ω? | Go to step **10**. | Check the door harness, and if any fault is found, replace the harness. If there is no fault, replace the airbag rear harness together with body harness. |
| 10 | **CHECK AIRBAG REAR HARNESS AND DOOR HARNESS (BETWEEN CURTAIN AIRBAG SENSOR LH AND DOOR SENSOR LH).**<br>Measure the resistance between connector (3V) in test harness V and chassis ground, and the resistance between connector (3V) terminals in test harness V.<br>***Connector & terminal***<br>***(3V) No. 4 — Chassis ground:***<br>***(3V) No. 5 — Chassis ground:***<br>***(3V) No. 4 — (3V) No. 5:*** | Is the resistance 1 MΩ or more? | Go to step **11**. | Check the door harness, and if any fault is found, replace the harness. If there is no fault, replace the airbag rear harness together with body harness. |

| Step | | Check | Yes | No |
|---|---|---|---|---|
| 11 | **CHECK AIRBAG CONTROL MODULE.**<br>1) Connect all connectors.<br>2) Clear the memory.<br>3) Perform the Inspection Mode.<br>4) Read the DTC. (Current malfunction) | Is the same DTC displayed? | Go to step **12**. | Go to step **15**. |
| 12 | **REPLACE SIDE AIRBAG SENSOR (LH) AND CHECK AIRBAG CONTROL MODULE AFTER REPLACEMENT.**<br>1) Turn the ignition switch to OFF, disconnect the battery ground cable, and wait for 60 seconds or more.<br>2) Replace the side airbag sensor (LH). <Ref. to AB-88, REMOVAL, Side Airbag Sensor.><br>3) Connect all connectors.<br>4) Clear the memory.<br>5) Perform the Inspection Mode.<br>6) Read the DTC. (Current malfunction) | Is the same DTC displayed? | Go to step **13**. | Go to step **15**. |
| 13 | **REPLACE CURTAIN AIRBAG SENSOR (LH) AND CHECK AIRBAG CONTROL MODULE AFTER REPLACEMENT.**<br>1) Turn the ignition switch to OFF, disconnect the battery ground cable, and wait for 60 seconds or more.<br>2) Replace the curtain airbag sensor (LH). <Ref. to AB-93, REMOVAL, Curtain Airbag Sensor.><br>3) Connect all connectors.<br>4) Clear the memory.<br>5) Perform the Inspection Mode.<br>6) Read the DTC. (Current malfunction) | Is the same DTC displayed? | Go to step **14**. | Go to step **15**. |
| 14 | **REPLACE FRONT DOOR IMPACT SENSOR (LH) AND CHECK AIRBAG CONTROL MODULE AFTER REPLACEMENT.**<br>1) Turn the ignition switch to OFF, disconnect the battery ground cable, and wait for 60 seconds or more.<br>2) Replace the front door impact sensor (LH). <Ref. to AB-85, REMOVAL, Front Door Impact Sensor.><br>3) Connect all connectors.<br>4) Clear the memory.<br>5) Perform the Inspection Mode.<br>6) Read the DTC. (Current malfunction) | Is the same DTC displayed? | Replace the airbag control module. <Ref. to AB-77, REMOVAL, Airbag Control Module.> | Go to step **15**. |
| 15 | **CHECK FOR ANY OTHER DTC ON DISPLAY.** | Is any other DTC displayed? | Perform the diagnosis according to DTC. | Finish the diagnosis. |

## BF:DTC B1650 OCCUPANT CLASSIFICATION SYSTEM MALFUNCTION

NOTE:
Refer to “Occupant Detection System” for details on DTC B1650. <Ref. to OD(diag)-19, DTC B1650 OCCUPANT CLASSIFICATION SYSTEM MALFUNCTION, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>

## BG:DTC B1655 FRONT BUCKLE SWITCH RH FAILURE

NOTE:
Refer to “Occupant Detection System” for details on DTC B1655. <Ref. to OD(diag)-21, DTC B1655 FRONT BUCKLE SWITCH RH FAILURE, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>

# BH:DTC B1660 PASSENGER'S AIRBAG ON INDICATOR FAILURE

**DTC DETECTING CONDITION:**

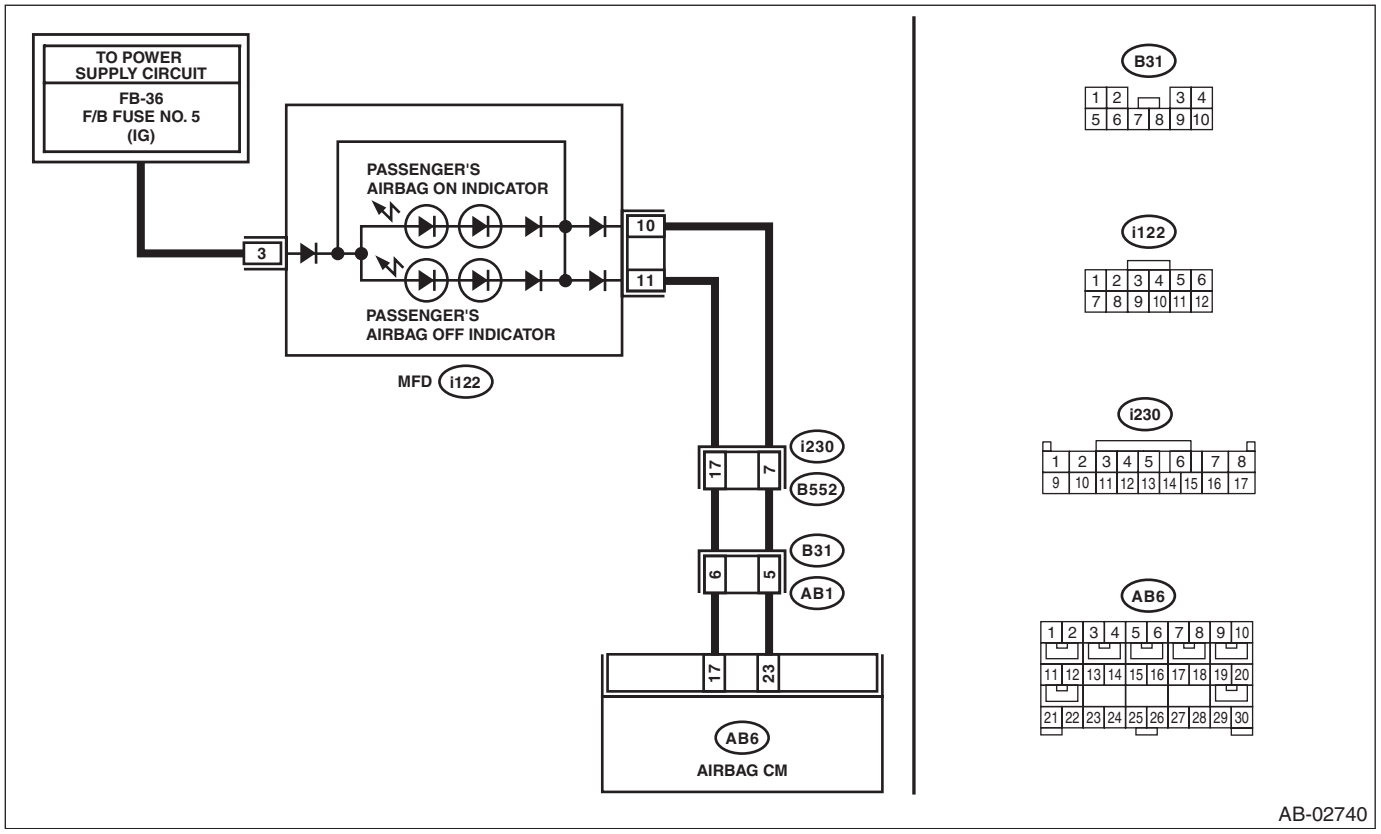
- Passenger's airbag indicator is faulty.
- Airbag control module is faulty.
- Airbag main harness circuit is open or shorted.
- Body harness circuit is open.

**CAUTION:**

**Before performing diagnosis, refer to "CAUTION" in "General Description". <Ref. to AB(diag)-4, CAUTION, General Description.>**

**WIRING DIAGRAM:**

Airbag system <Ref. to WI-30, WIRING DIAGRAM, Airbag System.>



| Step | | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK FOR POOR CONTACT.**<br>1) Turn the ignition switch to OFF, disconnect the battery ground cable, and wait for 60 seconds or more.<br>2) Check that the connector between the airbag control module and MFD is securely connected. | Is there poor contact of any connector? | Repair the bulkhead harness. Or replace the airbag main harness along with body harness. | Go to step **2**. |
| 2 | **CHECK AIRBAG MAIN HARNESS.**<br>1) Disconnect the connectors (AB6, AB17, AB18) from airbag control module.<br>2) Connect the battery ground terminal and turn the ignition switch to ON.<br>NOTE:<br>Neither of ON/OFF illuminates when it is normal. | Does the passenger's airbag indicator illuminate? | Go to step **3**. | Go to step **4**. |

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 3 | **CHECK AIRBAG MAIN HARNESS.**<br>1) Turn the ignition switch to OFF, disconnect the battery ground cable, and wait for 60 seconds or more.<br>2) Remove the MFD and disconnect the connector (i122).<br>3) Connect the connector (1AG) in the test harness AG to the connectors (AB6, AB17, AB18).<br>NOTE:<br>Except for XV models, connect test harness AH between the connectors (AB6, AB17, AB18) and (1AG).<br>4) Measure the resistance between connector (2AG) in the test harness AG and chassis ground.<br>***Connector & terminal***<br>***(2AG) No. 9 — (2AG) No. 8:***<br>***(2AG) No. 9 — Chassis ground:***<br>***(2AG) No. 8 — Chassis ground:*** | Is the resistance 1 MΩ or more? | Replace the MFD. <Ref. to IDI-24, REMOVAL, Multi-function Display (MFD).> | Repair the bulkhead harness. Or replace the airbag main harness along with body harness. |
| 4 | **CHECK AIRBAG MAIN HARNESS.**<br>1) Turn the ignition switch to OFF, disconnect the battery ground cable, and wait for 60 seconds or more.<br>2) Disconnect the connectors (AB6, AB17, AB18) from the airbag control module, and connect the connector (1AH) in the test harness AH.<br>3) Connect the connector (2AH) in the test harness AH and the connector (1AG) in the test harness AG.<br>4) Connect the connectors (7AG) and (8AG) in the test harness AG.<br>5) Connect the battery ground terminal and turn the ignition switch to ON. | Does the passenger's airbag indicator illuminate? | Replace the airbag control module. <Ref. to AB-77, Airbag Control Module.> | Go to step **5**. |
| 5 | **CHECK AIRBAG MAIN HARNESS.**<br>1) Turn the ignition switch to OFF, disconnect the battery ground cable, and wait for 60 seconds or more.<br>2) Remove the MFD and disconnect the connector (i122).<br>3) Measure the resistance between connector (2AG) in the test harness AG and connector (i122).<br>***Connector & terminal***<br>***(2AG) No. 9 — (i122) No. 11:***<br>***(2AG) No. 8 — (i122) No. 10:*** | Is the resistance less than 10 Ω? | Go to step **6**. | Repair the bulkhead harness. Or replace the airbag main harness along with body harness. |
| 6 | **CHECK BODY HARNESS.**<br>1) Turn the ignition switch to ON.<br>2) Measure the voltage between connector (i122) and chassis ground.<br>***Connector & terminal***<br>***(i122) No. 3 (+) — Chassis ground (–):*** | Is the voltage 10 V or more? | Replace the MFD. <Ref. to IDI-24, REMOVAL, Multi-function Display (MFD).> | Check the power supply circuit of MDF. |

## BI: DTC B1675 SATELLITE SAFING SENSOR FAILURE

**DTC DETECTING CONDITION:**

- Satellite safing sensor is faulty.
- Airbag control module is faulty.

**CAUTION:**
**Before performing diagnosis, refer to "CAUTION" in "General Description". <Ref. to AB(diag)-4, CAUTION, General Description.>**

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 1 | **REPLACE SATELLITE SAFING SENSOR.**<br>1) Turn the ignition switch to OFF, disconnect the battery ground cable, and wait for 60 seconds or more.<br>2) Replace the satellite safing sensor with a genuine sensor. <Ref. to AB-101, REMOVAL, Satellite Safing Sensor.> | Does the warning light go off? | Finish the diagnosis. | Replace the airbag control module. <Ref. to AB-77, REMOVAL, Airbag Control Module.> |

## BJ:DTC B1676 LOST COMMUNICATION WITH SATELLITE SAFING SENSOR

NOTE:
For details on DTC B1676, refer to DTC B1677. <Ref. to AB(diag)-80, DTC B1677 SATELLITE SAFING SENSOR INITIALIZATION INCOMPLETE, Diagnostic Chart with Trouble Code.>

# BK:DTC B1677 SATELLITE SAFING SENSOR INITIALIZATION INCOMPLETE

**DTC DETECTING CONDITION:**

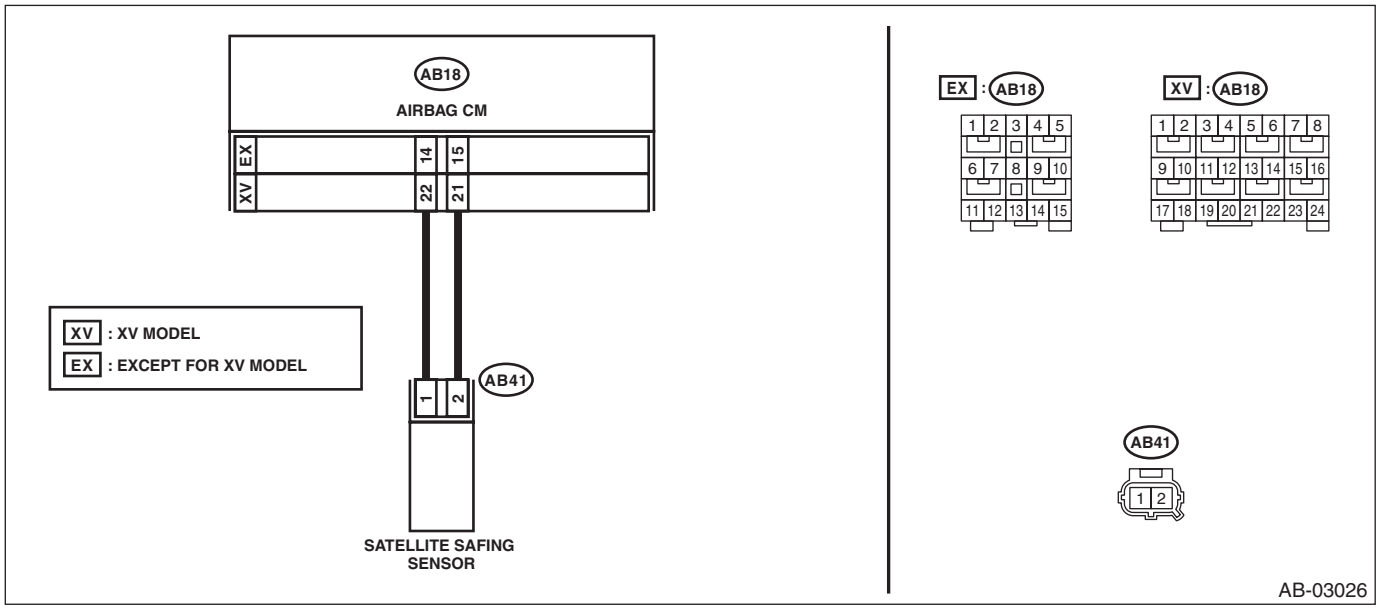
- Open or short circuit in harness of satellite safing sensor.
- Satellite safing sensor is faulty.
- Airbag control module is faulty.

**CAUTION:**

**Before performing diagnosis, refer to "CAUTION" in "General Description". <Ref. to AB(diag)-4, CAUTION, General Description.>**

**WIRING DIAGRAM:**

Airbag system <Ref. to WI-30, WIRING DIAGRAM, Airbag System.>



| | Step | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK POOR CONTACT OF CONNECTORS.**<br>Check for poor contact of the connectors (AB18, AB41) between the airbag control module and the satellite safing sensor. | Is there poor contact? | Replace the airbag rear harness along with body harness. | Go to step **2**. |
| 2 | **CHECK AIRBAG REAR HARNESS (BETWEEN AIRBAG CONTROL MODULE AND SATELLITE SAFING SENSOR).**<br>1) Turn the ignition switch to OFF, disconnect the battery ground cable, and wait for 60 seconds or more.<br>2) Disconnect the connectors (AB21, AB26) from seat belt pretensioner.<br>3) Disconnect the connectors (AB31, AB33) from curtain airbag module.<br>4) Disconnect connectors (AB19) and (AB24) from the side airbag module.<br>5) Disconnect the connectors (AB17, AB6, AB18) from airbag control module.<br>6) Connect the connector (1AG) in the test harness AG to the connectors (AB6, AB17, AB18).<br>NOTE:<br>Except for XV models, connect test harness AH between the connectors (AB6, AB17, AB18) and (1AG).<br>7) Connect the connector (2AH) in the test harness AH and the connector (1AG) in the test harness AG.<br>8) Disconnect the connector (AB41) from the satellite safing sensor and connect to the test harness H connector (1H).<br>9) Measure the resistance between connector in the test harness AG and connector in the test harness H.<br>***Connector & terminal***<br>***XV model***<br>***(5AG) No. 15 — (3H) No. 5:***<br>***(6AG) No. 14 — (3H) No. 6:***<br>***Except for XV model***<br>***(4AG) No. 5 — (3H) No. 5:***<br>***(5AG) No. 13 — (3H) No. 6:*** | Is the resistance less than 10 Ω? | Go to step **3**. | Replace the airbag rear harness along with body harness. |
| 3 | **CHECK AIRBAG REAR HARNESS (BETWEEN AIRBAG CONTROL MODULE AND SATELLITE SAFING SENSOR).**<br>Measure the resistance between connector in the test harness AG and chassis ground, and the resistance between connector terminals in the test harness AG.<br>***Connector & terminal***<br>***XV model***<br>***(5AG) No. 15 — Chassis ground:***<br>***(6AG) No. 14 — Chassis ground:***<br>***(5AG) No. 15 — (6AG) No. 14:***<br>***Except for XV model***<br>***(4AG) No. 5 — Chassis ground:***<br>***(5AG) No. 13 — Chassis ground:***<br>***(4AG) No. 5 — (5AG) No. 13:*** | Is the resistance 1 MΩ or more? | Go to step **4**. | Replace the airbag rear harness along with body harness. |

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 4 | **CHECK AIRBAG CONTROL MODULE.**<br>1) Connect all connectors.<br>2) Clear the memory.<br>3) Perform the Inspection Mode.<br>4) Read the DTC. (Current malfunction) | Is the same DTC displayed? | Replace the satellite safing sensor. <Ref. to AB-101, REMOVAL, Satellite Safing Sensor.> Replace the airbag control module if not operating normally even after replacing the sensor. <Ref. to AB-77, REMOVAL, Airbag Control Module.> | Go to step **5**. |
| 5 | **CHECK FOR ANY OTHER DTC ON DISPLAY.** | Is any other DTC displayed? | Check DTC using "List of Diagnostic Trouble Code (DTC)". <Ref. to AB(diag)-34, List of Diagnostic Trouble Code (DTC).> | Finish the diagnosis. |

## BL:DTC B16F8 SATELLITE SAFING SENSOR RECOGNITION ERROR

**DTC DETECTING CONDITION:**

- Satellite safing sensor is misinstalled.
- Airbag control module is faulty.

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 1 | **REPLACE SATELLITE SAFING SENSOR.**<br>1) Turn the ignition switch to OFF, disconnect the battery ground cable, and wait for 60 seconds or more.<br>2) Replace the satellite safing sensor with a genuine sensor. <Ref. to AB-101, REMOVAL, Satellite Safing Sensor.> | Does the warning light go off? | Finish the diagnosis. | Replace the airbag control module. <Ref. to AB-77, REMOVAL, Airbag Control Module.> |

## BM:DTC B16F9 DOOR SENSOR RH RECOGNITION ERROR

**DTC DETECTING CONDITION:**

- Front door impact sensor (RH) is misinstalled.
- Airbag control module is faulty.

**CAUTION:**
**Before performing diagnosis, refer to "CAUTION" in "General Description". <Ref. to AB(diag)-4, CAUTION, General Description.>**

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 1 | **REPLACE FRONT DOOR IMPACT SENSOR (RH).**<br>1) Turn the ignition switch to OFF, disconnect the battery ground cable, and wait for 60 seconds or more.<br>2) Replace the front door impact sensor (RH) with a genuine sensor. <Ref. to AB-85, REMOVAL, Front Door Impact Sensor.> | Does the warning light go off? | Finish the diagnosis. | Replace the airbag control module. <Ref. to AB-77, REMOVAL, Airbag Control Module.> |

## BN:DTC B1690 DOOR SENSOR RH FAILURE

**DTC DETECTING CONDITION:**

Front door impact sensor (RH) is faulty.
If DTC B1690 is displayed, the circuit within the front door impact sensor (RH) is faulty.
Replace the front door impact sensor (RH). <Ref. to AB-85, REMOVAL, Front Door Impact Sensor.>

## BO:DTC B1692 LOST COMMUNICATION WITH DOOR SENSOR RH

NOTE:
For details on DTC B1692, refer to DTC B1693. <Ref. to AB(diag)-84, DTC B1693 DOOR SENSOR RH INITIALIZATION INCOMPLETE, Diagnostic Chart with Trouble Code.>

# BP:DTC B1693 DOOR SENSOR RH INITIALIZATION INCOMPLETE

**DTC DETECTING CONDITION:**

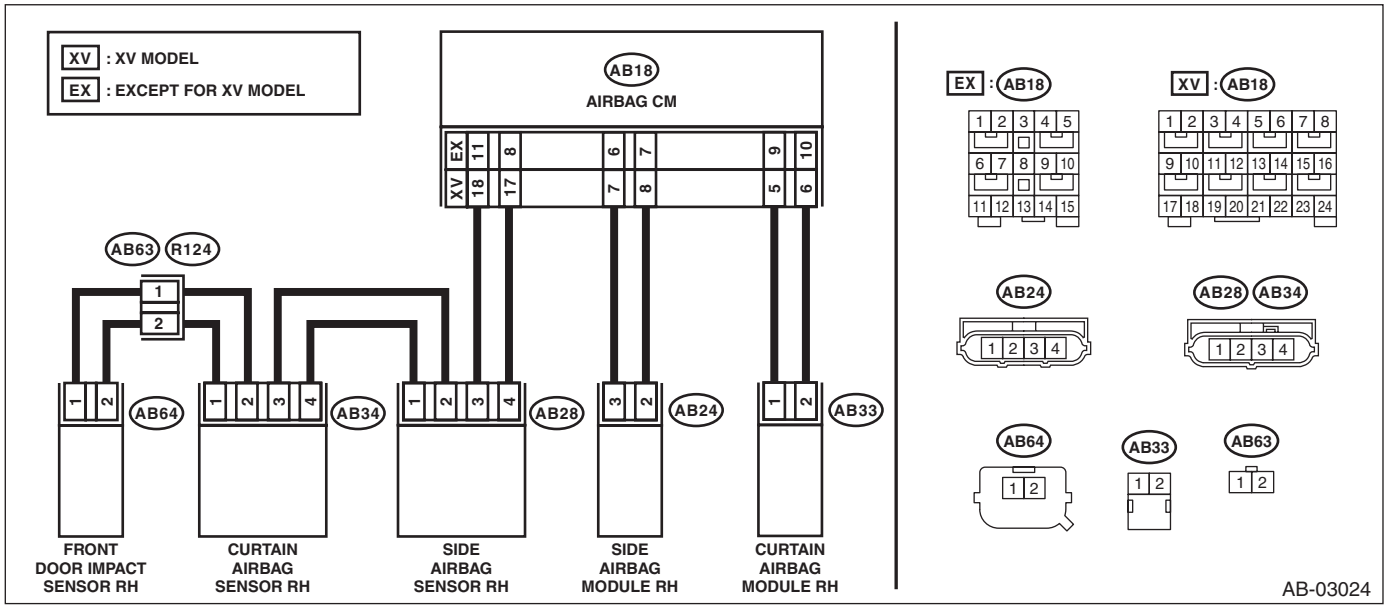
- Open or short circuit in harness of side sensor bus (RH).
- Front door impact sensor (RH) is faulty.
- Curtain airbag sensor (RH) is faulty.
- Airbag control module is faulty.

**CAUTION:**

**Before performing diagnosis, refer to "CAUTION" in "General Description". <Ref. to AB(diag)-4, CAUTION, General Description.>**

**WIRING DIAGRAM:**

Airbag system <Ref. to WI-30, WIRING DIAGRAM, Airbag System.>



| | Step | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK DTC.**<br>Read the DTC. (Current malfunction) | Is DTC B1622 or B1623 displayed? | Perform the diagnosis according to DTC. | Go to step **2**. |
| 2 | **CHECK DTC.**<br>Read the DTC. (Current malfunction) | Is DTC B1632 or B1633 displayed? | Perform the diagnosis according to DTC. | Go to step **3**. |
| 3 | **CHECK POOR CONTACT OF CONNECTORS.**<br>Check for poor contact of the connectors between the airbag control module and the front door impact sensor (RH). | Is there poor contact? | Replace the airbag rear harness and the door harness. | Go to step **4**. |

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 4 | **CHECK AIRBAG REAR HARNESS AND DOOR HARNESS (BETWEEN CURTAIN AIRBAG SENSOR RH AND DOOR SENSOR RH).**<br>1) Turn the ignition switch to OFF, disconnect the battery ground cable, and wait for 60 seconds or more.<br>2) Disconnect the connector (AB26) from seat belt pretensioner (RH).<br>3) Disconnect the connector (AB33) from curtain airbag module (RH).<br>4) Disconnect connector (AB24) from side airbag module (RH).<br>5) Disconnect the connector (AB34) from curtain airbag sensor (RH), and connect the connector (2V) in test harness V to connector (AB34).<br>6) Disconnect the connector (AB64) from the front door impact sensor (RH), and connect the connector (1H) in the test harness H to connector (AB64).<br>7) Measure the resistance between connector (3V) in the test harness V and connector (3H) in the test harness H.<br>***Connector & terminal***<br>***(3V) No. 4 — (3H) No. 5:***<br>***(3V) No. 5 — (3H) No. 6:*** | Is the resistance less than 10 Ω? | Go to step **5**. | Check the door harness, and if any fault is found, replace the harness. If there is no fault, replace the airbag rear harness together with body harness. |
| 5 | **CHECK AIRBAG REAR HARNESS AND DOOR HARNESS (BETWEEN CURTAIN AIRBAG SENSOR RH AND DOOR SENSOR RH).**<br>Measure the resistance between connector (3V) in test harness V and chassis ground, and the resistance between connector (3V) terminals in test harness V.<br>***Connector & terminal***<br>***(3V) No. 4 — Chassis ground:***<br>***(3V) No. 5 — Chassis ground:***<br>***(3V) No. 4 — (3V) No. 5:*** | Is the resistance 1 MΩ or more? | Go to step **6**. | Check the door harness, and if any fault is found, replace the harness. If there is no fault, replace the airbag rear harness together with body harness. |
| 6 | **CHECK AIRBAG CONTROL MODULE.**<br>1) Connect all connectors.<br>2) Clear the memory.<br>3) Perform the Inspection Mode.<br>4) Read the DTC. (Current malfunction) | Is the same DTC displayed? | Go to step **7**. | Go to step **9**. |
| 7 | **REPLACE FRONT DOOR IMPACT SENSOR (RH) AND CHECK AIRBAG CONTROL MODULE AFTER REPLACEMENT.**<br>1) Turn the ignition switch to OFF, disconnect the battery ground cable, and wait for 60 seconds or more.<br>2) Replace the front door impact sensor (RH). <Ref. to AB-85, REMOVAL, Front Door Impact Sensor.><br>3) Connect all connectors.<br>4) Clear the memory.<br>5) Perform the Inspection Mode.<br>6) Read the DTC. (Current malfunction) | Is the same DTC displayed? | Go to step **8**. | Go to step **9**. |

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 8 | **REPLACE CURTAIN AIRBAG SENSOR (RH) AND CHECK AIRBAG CONTROL MODULE AFTER REPLACEMENT.**<br>1) Turn the ignition switch to OFF, disconnect the battery ground cable, and wait for 60 seconds or more.<br>2) Replace the curtain airbag sensor (RH). <Ref. to AB-93, REMOVAL, Curtain Airbag Sensor.><br>3) Connect all connectors.<br>4) Clear the memory.<br>5) Perform the Inspection Mode.<br>6) Read the DTC. (Current malfunction) | Is the same DTC displayed? | Replace the airbag control module. <Ref. to AB-77, REMOVAL, Airbag Control Module.> | Go to step **9**. |
| 9 | **CHECK FOR ANY OTHER DTC ON DISPLAY.** | Is any other DTC displayed? | Check DTC using "List of Diagnostic Trouble Code". <Ref. to AB(diag)-34, LIST, List of Diagnostic Trouble Code (DTC).> | Finish the diagnosis. |

## BQ:DTC B16FA LOST COMMUNICATION WITH DOOR SENSOR LH

**DTC DETECTING CONDITION:**

- Front door impact sensor (LH) is misinstalled.
- Airbag control module is faulty.

**CAUTION:**
**Before performing diagnosis, refer to "CAUTION" in "General Description". <Ref. to AB(diag)-4, CAUTION, General Description.>**

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 1 | **REPLACE FRONT DOOR IMPACT SENSOR (LH).**<br>1) Turn the ignition switch to OFF, disconnect the battery ground cable, and wait for 60 seconds or more.<br>2) Replace the front door impact sensor (LH) with a genuine sensor. <Ref. to AB-85, REMOVAL, Front Door Impact Sensor.> | Does the warning light go off? | Finish the diagnosis. | Replace the airbag control module. <Ref. to AB-77, REMOVAL, Airbag Control Module.> |

## BR:DTC B1695 DOOR SENSOR LH FAILURE

**DTC DETECTING CONDITION:**

Front door impact sensor (LH) is faulty.
If DTC AB is displayed, the circuit within the front door impact sensor (LH) is faulty.
Replace the front door impact sensor (LH). <Ref. to AB-85, REMOVAL, Front Door Impact Sensor.>

## BS:DTC B1697 LOST COMMUNICATION WITH DOOR SENSOR LH

NOTE:
For details on DTC B1697, refer to DTC B1698. <Ref. to AB(diag)-88, DTC B1698 DOOR SENSOR LH INITIALIZATION INCOMPLETE, Diagnostic Chart with Trouble Code.>

# BT:DTC B1698 DOOR SENSOR LH INITIALIZATION INCOMPLETE

**DTC DETECTING CONDITION:**

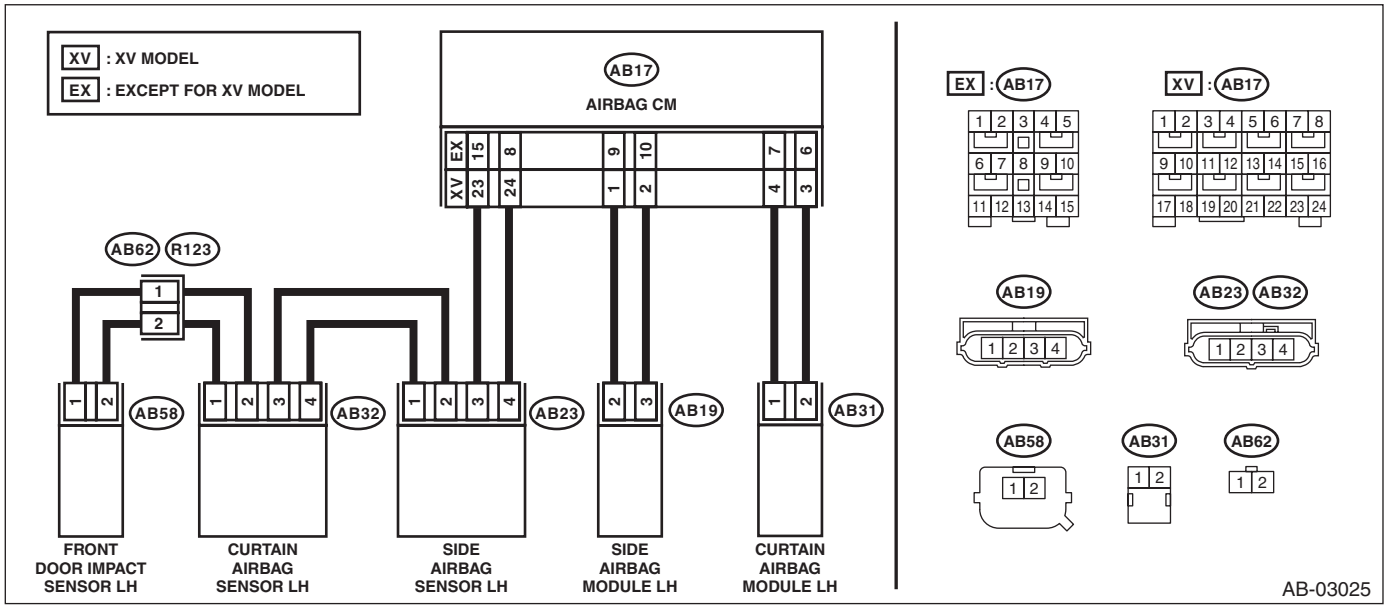
- Open or short circuit in harness of side sensor bus (LH).
- Front door impact sensor (LH) is faulty.
- Curtain airbag sensor (LH) is faulty.
- Airbag control module is faulty.

**CAUTION:**

**Before performing diagnosis, refer to "CAUTION" in "General Description". <Ref. to AB(diag)-4, CAUTION, General Description.>**

**WIRING DIAGRAM:**

Airbag system <Ref. to WI-30, WIRING DIAGRAM, Airbag System.>



| Step | | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK DTC.**<br>Read the DTC. (Current malfunction) | Is DTC B1627 or B1628 displayed? | Perform the diagnosis according to DTC. | Go to step **2**. |
| 2 | **CHECK DTC.**<br>Read the DTC. (Current malfunction) | Is DTC B1637 or B1638 displayed? | Perform the diagnosis according to DTC. | Go to step **3**. |
| 3 | **CHECK POOR CONTACT OF CONNECTORS.**<br>Check for poor contact of the connectors between the airbag control module and the front door impact sensor (LH). | Is there poor contact? | Replace the airbag rear harness and the door harness. | Go to step **4**. |

| Step | | Check | Yes | No |
|---|---|---|---|---|
| 4 | **CHECK AIRBAG REAR HARNESS AND DOOR HARNESS (BETWEEN CURTAIN AIRBAG SENSOR LH AND FRONT DOOR IMPACT SENSOR LH).**<br>1) Turn the ignition switch to OFF, disconnect the battery ground cable, and wait for 60 seconds or more.<br>2) Disconnect the connector (AB21) from seat belt pretensioner (LH).<br>3) Disconnect the connector (AB31) from curtain airbag module (LH).<br>4) Disconnect connector (AB19) from side airbag module (LH).<br>5) Disconnect the connector (AB32) from curtain airbag sensor (LH), and connect the connector (2V) in test harness V to connector (AB32).<br>6) Disconnect the connector (AB58) from the front door impact sensor (LH), and connect the connector (1H) in the test harness H to connector (AB58).<br>7) Measure the resistance between connector (3V) in the test harness V and connector (3H) in the test harness H.<br>***Connector & terminal***<br>***(3V) No. 4 — (3H) No. 5:***<br>***(3V) No. 5 — (3H) No. 6:*** | Is the resistance less than 10 Ω? | Go to step **5**. | Check the door harness, and if any fault is found, replace the harness. If there is no fault, replace the airbag rear harness together with body harness. |
| 5 | **CHECK AIRBAG REAR HARNESS AND DOOR HARNESS (BETWEEN CURTAIN AIRBAG SENSOR LH AND FRONT DOOR IMPACT SENSOR LH).**<br>Measure the resistance between connector (3V) in test harness V and chassis ground, and the resistance between connector (3V) terminals in test harness V.<br>***Connector & terminal***<br>***(3V) No. 4 — Chassis ground:***<br>***(3V) No. 5 — Chassis ground:***<br>***(3V) No. 4 — (3V) No. 5:*** | Is the resistance 1 MΩ or more? | Go to step **6**. | Check the door harness, and if any fault is found, replace the harness. If there is no fault, replace the airbag rear harness together with body harness. |
| 6 | **CHECK AIRBAG CONTROL MODULE.**<br>1) Connect all connectors.<br>2) Clear the memory.<br>3) Perform the Inspection Mode.<br>4) Read the DTC. (Current malfunction) | Is the same DTC displayed? | Go to step **7**. | Go to step **9**. |
| 7 | **REPLACE FRONT DOOR IMPACT SENSOR (LH) AND CHECK AIRBAG CONTROL MODULE AFTER REPLACEMENT.**<br>1) Turn the ignition switch to OFF, disconnect the battery ground cable, and wait for 60 seconds or more.<br>2) Replace the front door impact sensor (LH). <Ref. to AB-85, REMOVAL, Front Door Impact Sensor.><br>3) Connect all connectors.<br>4) Clear the memory.<br>5) Perform the Inspection Mode.<br>6) Read the DTC. (Current malfunction) | Is the same DTC displayed? | Go to step **8**. | Go to step **9**. |

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 8 | **REPLACE CURTAIN AIRBAG SENSOR (LH) AND CHECK AIRBAG CONTROL MODULE AFTER REPLACEMENT.**<br>1) Turn the ignition switch to OFF, disconnect the battery ground cable, and wait for 60 seconds or more.<br>2) Replace the curtain airbag sensor (LH). <Ref. to AB-93, REMOVAL, Curtain Airbag Sensor.><br>3) Connect all connectors.<br>4) Clear the memory.<br>5) Perform the Inspection Mode.<br>6) Read the DTC. (Current malfunction) | Is the same DTC displayed? | Replace the airbag control module. <Ref. to AB-77, REMOVAL, Airbag Control Module.> | Go to step **9**. |
| 9 | **CHECK FOR ANY OTHER DTC ON DISPLAY.**<br>Read the DTC. (Current malfunction) | Is any other DTC displayed? | Check DTC using "List of Diagnostic Trouble Code". <Ref. to AB(diag)-34, LIST, List of Diagnostic Trouble Code (DTC).> | Finish the diagnosis. |

# BU:DTC B161A LOST COMMUNICATION WITH FRONT SATELLITE SENSOR BUS

**DTC DETECTING CONDITION:**

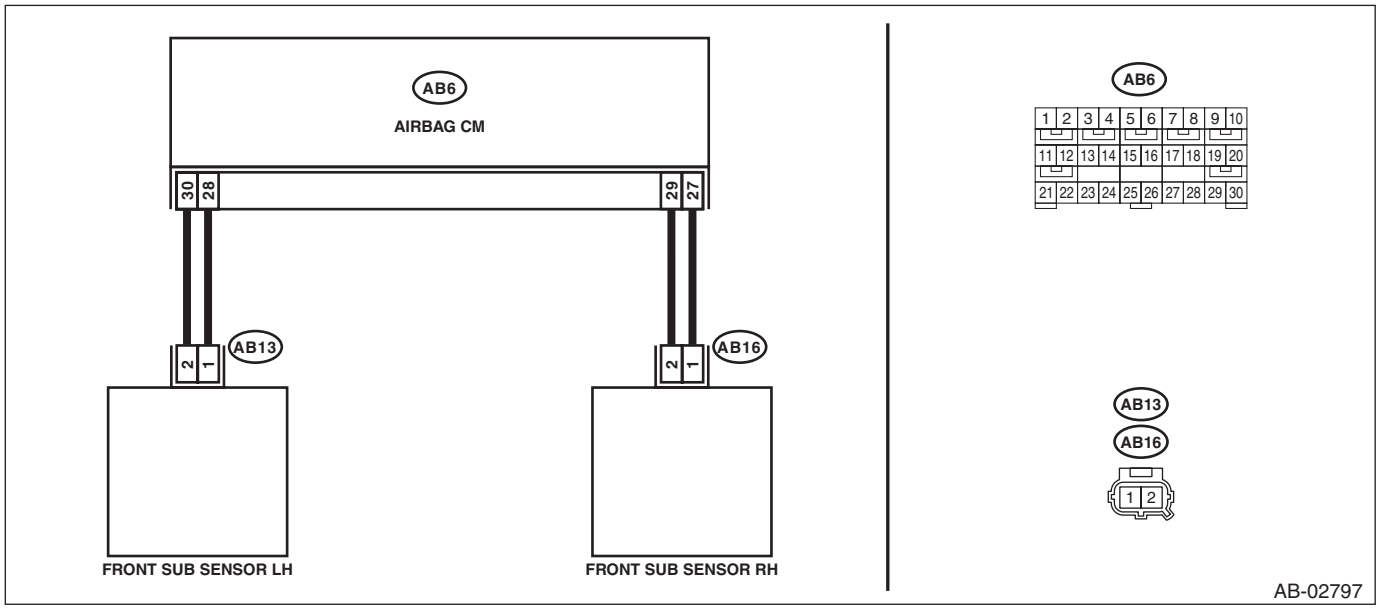
- Harness between airbag control module and front sub sensor is open or shorted.
- Front sub sensor is faulty.
- Airbag control module is faulty.

**CAUTION:**

**Before performing diagnosis, refer to "CAUTION" in "General Description". <Ref. to AB(diag)-4, CAUTION, General Description.>**

**WIRING DIAGRAM:**

Airbag system <Ref. to WI-30, WIRING DIAGRAM, Airbag System.>



| | Step | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK POOR CONTACT OF CONNECTORS.**<br>Check for poor contact of the connectors between the airbag control module and the front sub sensor. | Is there poor contact? | Replace the airbag main harness along with body harness. | Go to step **2**. |
| 2 | **CHECK AIRBAG MAIN HARNESS (FRONT SENSOR BUS LH).**<br>1) Turn the ignition switch to OFF, disconnect the battery ground cable, and wait for 60 seconds or more.<br>2) Remove the instrument panel lower cover and column cover, and disconnect the connectors (AB7) and (AB2).<br>3) Remove the console front panel and disconnect the connector (AB9).<br>4) Disconnect the connectors (AB6, AB17, AB18) from airbag control module.<br>5) Connect the connector (1AG) in the test harness AG to the connectors (AB6, AB17, AB18).<br>NOTE:<br>Except for XV models, connect test harness AH between the connectors (AB6, AB17, AB18) and (1AG).<br>6) Disconnect the connector (AB13) from the front sub sensor (LH), and then connect the connector (1H) in the test harness H to connector (AB13).<br>7) Measure the resistance between connector (4AG) in the test harness AG and connector (3H) in the test harness H.<br>***Connector & terminal***<br>***(4AG) No. 7 — (3H) No. 5:***<br>***(4AG) No. 9 — (3H) No. 6:*** | Is the resistance less than 10 Ω? | Go to step **3**. | Replace the airbag main harness along with body harness. |
| 3 | **CHECK AIRBAG MAIN HARNESS (FRONT SENSOR BUS LH).**<br>Measure the resistance between connector (4AG) in the test harness AG and chassis ground, and the resistance between connector (4AG) terminals in the test harness AG.<br>***Connector & terminal***<br>***(4AG) No. 7 — Chassis ground:***<br>***(4AG) No. 9 — Chassis ground:***<br>***(4AG) No. 7 — (4AG) No. 9:*** | Is the resistance 1 MΩ or more? | Go to step **4**. | Replace the airbag rear harness along with body harness. |
| 4 | **CHECK AIRBAG MAIN HARNESS (FRONT SENSOR BUS RH).**<br>1) Disconnect the connector (AB16) from the front sub sensor (RH), and then connect the connector (1H) in the test harness H to connector (AB16).<br>2) Measure the resistance between connector (4AG) in the test harness AG and connector (3H) in the test harness H.<br>***Connector & terminal***<br>***(4AG) No. 14 — (3H) No. 5:***<br>***(4AG) No. 12 — (3H) No. 6:*** | Is the resistance less than 10 Ω? | Go to step **5**. | Replace the airbag main harness along with body harness. |

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 5 | **CHECK AIRBAG MAIN HARNESS (FRONT SENSOR BUS RH).**<br>Measure the resistance between connector (4AG) in the test harness AG and chassis ground, and the resistance between connector (4AG) terminals in the test harness AG.<br>***Connector & terminal***<br>***(4AG) No. 12 — Chassis ground:***<br>***(4AG) No. 14 — Chassis ground:***<br>***(4AG) No. 12 — (4AG) No. 14:*** | Is the resistance 1 MΩ or more? | Go to step **6**. | Replace the airbag rear harness along with body harness. |
| 6 | **CHECK AIRBAG CONTROL MODULE.**<br>1) Connect all connectors.<br>2) Clear the memory.<br>3) Perform the Inspection Mode.<br>4) Read the DTC. (Current malfunction) | Is the same DTC displayed? | Replace the front sub sensor (LH) and front sub sensor (RH). <Ref. to AB-81, REMOVAL, Front Sub Sensor.> Replace the airbag control module if not operating normally even after replacing the sensor. <Ref. to AB-77, REMOVAL, Airbag Control Module.> | Go to step **7**. |
| 7 | **CHECK FOR ANY OTHER DTC ON DISPLAY.** | Is any other DTC displayed? | Check DTC using “List of Diagnostic Trouble Code”. <Ref. to AB(diag)-34, List of Diagnostic Trouble Code (DTC).> | Finish the diagnosis. |

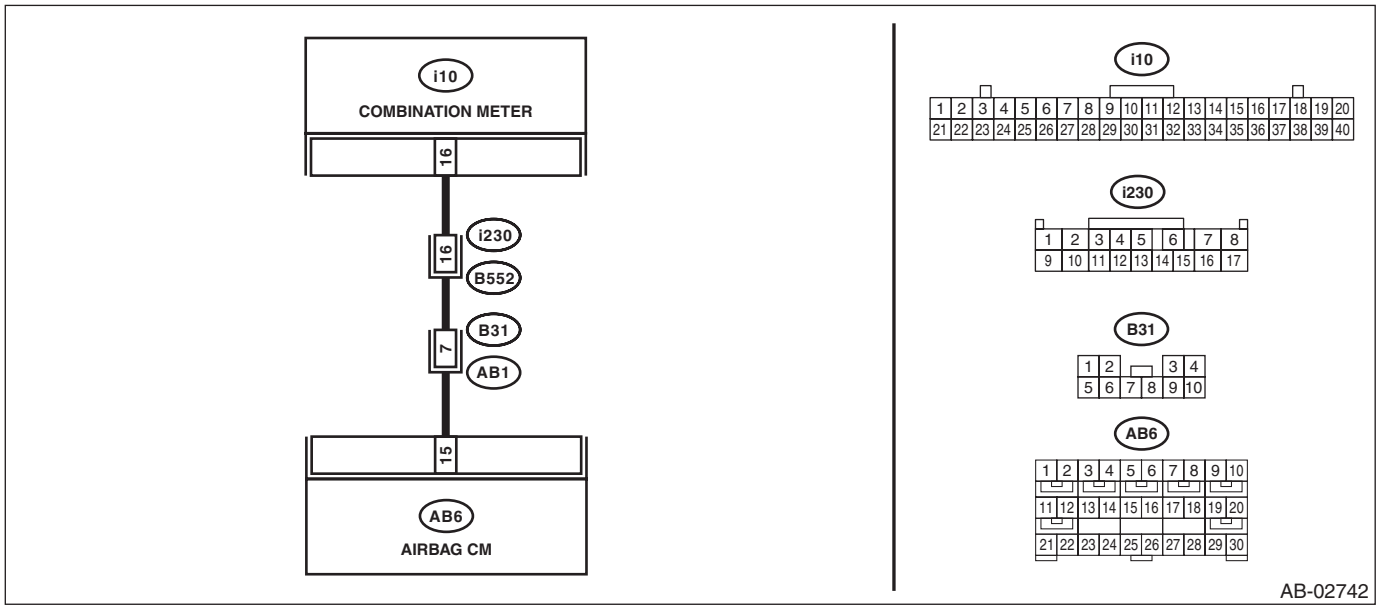
# BV:DTC B16F1 PASSENGER'S SEAT BELT WARNING FAILURE

**DTC DETECTING CONDITION:**

- Airbag control module is faulty.
- Meter is faulty.
- Harness circuits between meter and airbag control module are open, shorted or shorted to ground.

**CAUTION:**
**Before performing diagnosis, refer to "CAUTION" in "General Description". <Ref. to AB(diag)-4, CAUTION, General Description.>**

**WIRING DIAGRAM:**
Airbag system <Ref. to WI-30, WIRING DIAGRAM, Airbag System.>



| Step | | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK AIRBAG HARNESS.**<br>1) Turn the ignition switch to OFF, disconnect the battery ground cable, and wait for 60 seconds or more.<br>2) Disconnect the connectors (AB6, AB17, AB18) from airbag control module.<br>3) Connect the battery ground terminal and turn the ignition switch to ON. | Does the passenger's seat belt warning light blink for 6 seconds and go off? | Go to step **3**. | Go to step **2**. |
| 2 | **CHECK AIRBAG HARNESS.**<br>1) Turn the ignition switch to OFF.<br>2) Connect the connector (1AG) in the test harness AG to the connectors (AB6, AB17, AB18).<br>NOTE:<br>Except for XV models, connect test harness AH between the connectors (AB6, AB17, AB18) and (1AG).<br>3) Measure the resistance between connector (2AG) in the test harness AG and chassis ground.<br>***Connector & terminal***<br>***(2AG) No. 10 — Chassis ground:*** | Is the resistance 1 MΩ or more? | Replace the meter. <Ref. to IDI-17, REMOVAL, Combination Meter.> | Repair the bulkhead harness and instrument panel harness. Or replace the airbag main harness along with body harness. |

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 3 | **CHECK AIRBAG HARNESS.**<br>1) Turn the ignition switch to OFF.<br>2) Connect the connector (1AG) in the test harness AG to the connectors (AB6, AB17, AB18).<br>NOTE:<br>Except for XV models, connect test harness AH between the connectors (AB6, AB17, AB18) and (1AG).<br>3) Connect the connectors (7AG) and (8AG) in the test harness AG.<br>4) Turn the ignition switch to ON. | Does the passenger's seat belt warning light blink for 6 seconds, then repeatedly light and go off? | Replace the airbag control module. <Ref. to AB-77, Airbag Control Module.> | Go to step **4**. |
| 4 | **CHECK AIRBAG HARNESS.**<br>1) Turn the ignition switch to OFF.<br>2) Disconnect the connectors (7AG) and (8AG) in the test harness AG in the condition of step 3.<br>3) Disconnect the connector (i10) from meter.<br>4) Measure the resistance between connector (2AG) in the test harness AG and connector (i84).<br>***Connector & terminal***<br>***(2AG) No. 10 — (i10) No. 16:*** | Is the resistance less than 10 Ω? | Replace the meter. <Ref. to IDI-17, REMOVAL, Combination Meter.> | Repair the bulkhead harness and instrument panel harness. Or replace the airbag main harness along with body harness. |

## BW:DTC B16F0 PASSENGER'S AIRBAG OFF INDICATOR FAILURE

NOTE:
For details on DTC B16F0, refer to DTC B1660. <Ref. to AB(diag)-77, DTC B1660 PASSENGER'S AIRBAG ON INDICATOR FAILURE, Diagnostic Chart with Trouble Code.>

## BX:DTC B1760 SENSOR MAT ABNORMAL

NOTE:
Refer to "Occupant Detection System" for details on DTC B1760. <Ref. to OD(diag)-22, DTC B1760 SENSOR MAT ABNORMAL, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>

## BY:DTC B1761 SENSOR MAT LIQUID COATING ABNORMAL

NOTE:

## BZ:DTC B1771 BUCKLE SWITCH ABNORMAL

NOTE:
Refer to "Occupant Detection System" for details on DTC B1771. <Ref. to OD(diag)-22, DTC B1771 BUCKLE SWITCH ABNORMAL, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>

## CA:DTC B1795 ECU INTERNAL CIRCUIT FAULT

NOTE:
Refer to "Occupant Detection System" for details on DTC B1795. <Ref. to OD(diag)-22, DTC B1795 ECU INTERNAL CIRCUIT FAULT, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>

## CB:DTC B1800 SHORT IN DRIVER'S AIRBAG

**DTC DETECTING CONDITION:**

- Airbag main harness circuit is shorted.
- Airbag module harness (driver's side) circuit is shorted.
- Roll connector circuit is shorted.
- Driver's airbag module is faulty.
- Airbag control module is faulty.

**CAUTION:**

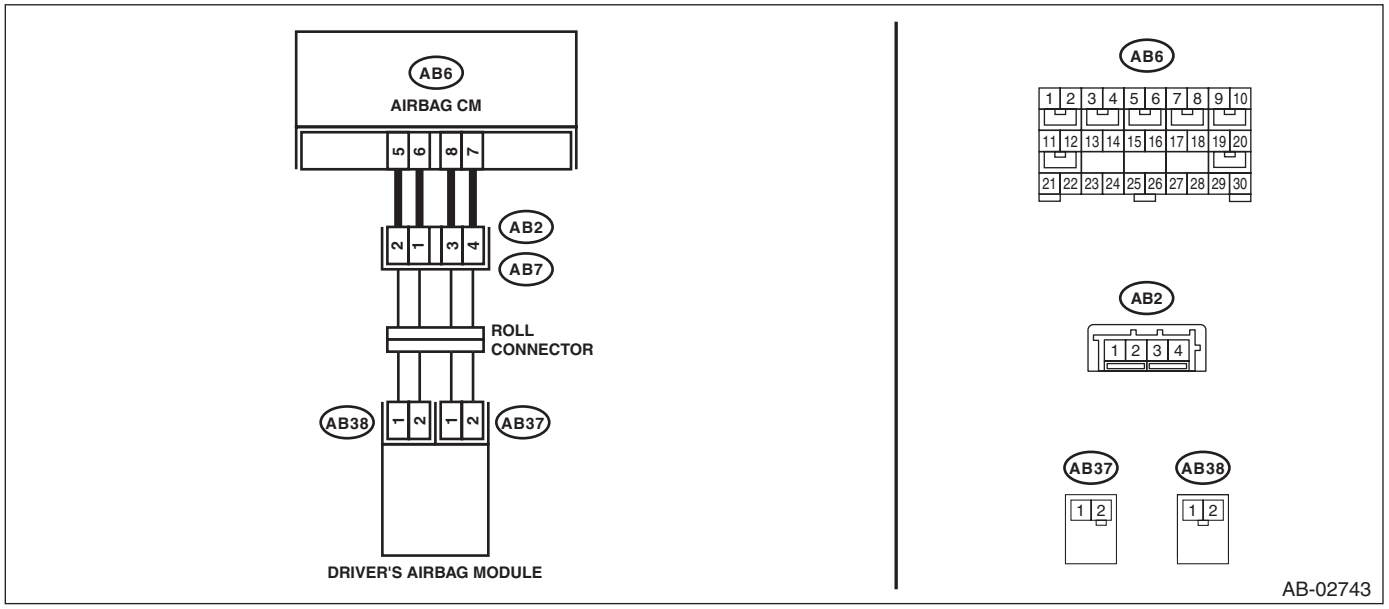
**Before performing diagnosis, refer to "CAUTION" in "General Description". <Ref. to AB(diag)-4, CAUTION, General Description.>**

NOTE:

Prior to starting work, prepare two AIRBAG RESISTORs (98299PA040).

**WIRING DIAGRAM:**

Airbag system <Ref. to WI-30, WIRING DIAGRAM, Airbag System.>



| | Step | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK POOR CONTACT OF CONNECTORS.**<br>Check for poor contact of the connectors between the airbag control module and the driver's airbag module. | Is there poor contact? | Replace the airbag harness. | Go to step **2**. |
| 2 | **CHECK DRIVER'S AIRBAG MODULE.**<br>1) Turn the ignition switch to OFF, disconnect the battery ground cable, and wait for 60 seconds or more.<br>2) Remove the driver's airbag module.<br>3) Connect the connector (1N) in the test harness N to the connector (AB38).<br>4) Connect the airbag resistor to the connector (2N) of test harness N.<br>5) Connect the connector (1Q) in the test harness Q to connector (AB37).<br>6) Connect the airbag resistor to the connector (2Q) in the test harness Q.<br>7) Connect the battery ground terminal and turn the ignition switch to ON. | Does the airbag warning light illuminate for six seconds and go off? | Replace the driver's airbag module. <Ref. to AB-42, Driver's Airbag Module.> | Go to step **3**. |

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 3 | **CHECK ROLL CONNECTOR AND AIRBAG MAIN HARNESS (DRIVER'S AIRBAG HARNESS).**<br>1) Turn the ignition switch to OFF, disconnect the battery ground cable, and wait for 60 seconds or more.<br>2) Remove the console front panel and disconnect the connector (AB9).<br>3) Disconnect the driver's knee airbag module connector (AB66).<br>4) Disconnect the airbag resistor from the connector (2N) in test harness N and from the connector (2Q) in test harness Q.<br>5) Disconnect the connectors (AB6, AB17, AB18) from the airbag control module, and connect the connector (1AG) in the test harness AG.<br>NOTE:<br>Except for XV models, connect test harness AH between the connectors (AB6, AB17, AB18) and (1AG).<br>6) Measure the resistance between connector (2Q) terminals in test harness Q.<br>***Connector & terminal (2Q) No. 1 — (2Q) No. 2:*** | Is the resistance 1 MΩ or more? | Go to step **5**. | Go to step **4**. |
| 4 | **CHECK AIRBAG MAIN HARNESS (DRIVER'S AIRBAG HARNESS).**<br>1) Remove the instrument panel lower cover and column cover, and disconnect the connector (AB7) from (AB2).<br>2) Measure the resistance between connector (3AG) terminals in test harness AG.<br>***Connector & terminal (3AG) No. 1 — (3AG) No. 3:*** | Is the resistance 1 MΩ or more? | Replace the roll connector. <Ref. to AB-104, Roll Connector.> | Replace the airbag main harness along with body harness. |
| 5 | **CHECK AIRBAG CONTROL MODULE.**<br>1) Connect all connectors.<br>2) Clear the memory.<br>3) Perform the Inspection Mode.<br>4) Read the DTC. (Current malfunction) | Is the same DTC displayed? | Replace the airbag control module. <Ref. to AB-77, Airbag Control Module.> | Go to step **6**. |
| 6 | **CHECK FOR ANY OTHER DTC ON DISPLAY.** | Is any other DTC displayed? | Check DTC using "List of Diagnostic Trouble Code (DTC)". <Ref. to AB(diag)-34, List of Diagnostic Trouble Code (DTC).> | Finish the diagnosis. |

# CC:DTC B1801 OPEN IN DRIVER'S AIRBAG

**DTC DETECTING CONDITION:**

- Airbag main harness circuit is open.
- Airbag module harness (driver's side) circuit is open.
- Roll connector is open.
- Driver's airbag module is faulty.
- Airbag control module is faulty.

**CAUTION:**

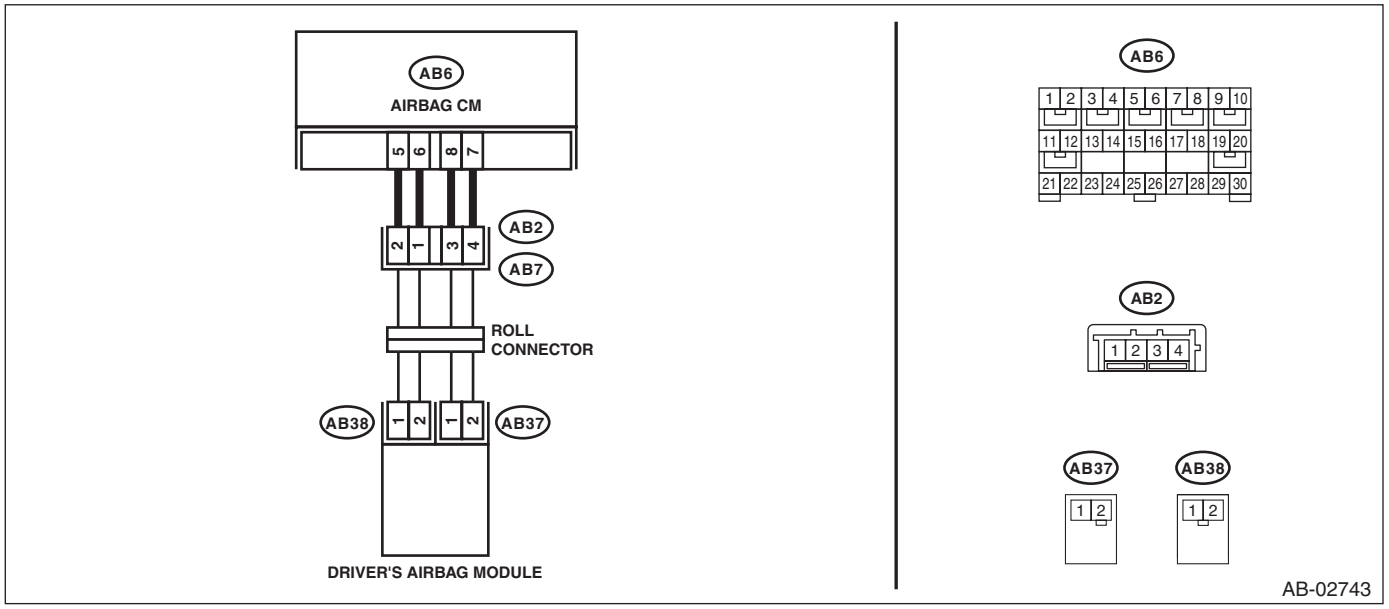
**Before performing diagnosis, refer to "CAUTION" in "General Description". <Ref. to AB(diag)-4, CAUTION, General Description.>**

NOTE:

Prior to starting work, prepare two AIRBAG RESISTORs (98299PA040).

**WIRING DIAGRAM:**

Airbag system <Ref. to WI-30, WIRING DIAGRAM, Airbag System.>



| | Step | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK POOR CONTACT OF CONNECTORS.**<br>Check for poor contact of the connectors between the airbag control module and the driver's airbag module. | Is there poor contact? | Replace the airbag harness. | Go to step **2**. |
| 2 | **CHECK DRIVER'S AIRBAG MODULE.**<br>1) Turn the ignition switch to OFF, disconnect the battery ground cable, and wait for 60 seconds or more.<br>2) Remove the driver's airbag module.<br>3) Connect the connector (1N) in the test harness N to the connector (AB38).<br>4) Connect the airbag resistor to the connector (2N) of test harness N.<br>5) Connect the connector (1Q) in the test harness Q to connector (AB37).<br>6) Connect the airbag resistor to the connector (2Q) in the test harness Q.<br>7) Connect the battery ground terminal and turn the ignition switch to ON. | Does the airbag warning light illuminate for six seconds and go off? | Replace the driver's airbag module. <Ref. to AB-42, Driver's Airbag Module.> | Go to step **3**. |

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 3 | **CHECK ROLL CONNECTOR AND AIRBAG MAIN HARNESS (DRIVER'S AIRBAG HARNESS).**<br>1) Turn the ignition switch to OFF, disconnect the battery ground cable, and wait for 60 seconds or more.<br>2) Remove the console front panel and disconnect the connector (AB9).<br>3) Disconnect the driver's knee airbag module connector (AB66).<br>4) Disconnect the airbag resistor from the connector (2N) in test harness N.<br>5) Disconnect the airbag resistor from the connector (2Q) of test harness Q.<br>6) Disconnect the connectors (AB6, AB17, AB18) from airbag control module.<br>7) Measure the resistance between connector (2Q) terminals in test harness Q.<br>***Connector & terminal***<br>***(2Q) No. 1 — (2Q) No. 2:*** | Is the resistance less than 10 Ω? | Go to step **5**. | Go to step **4**. |
| 4 | **CHECK ROLL CONNECTOR.**<br>1) Remove the instrument panel lower cover and column cover, and disconnect the connector (AB7) from (AB2).<br>2) Measure the resistance between connector (2Q) terminals in test harness Q.<br>***Connector & terminal***<br>***(2Q) No. 1 — (2Q) No. 2:*** | Is the resistance less than 10 Ω? | Replace the airbag main harness along with body harness. | Replace the roll connector. <Ref. to AB-104, Roll Connector.> |
| 5 | **CHECK AIRBAG CONTROL MODULE.**<br>1) Connect all connectors.<br>2) Clear the memory.<br>3) Perform the Inspection Mode.<br>4) Read the DTC. (Current malfunction) | Is the same DTC displayed? | Replace the airbag control module. <Ref. to AB-77, Airbag Control Module.> | Go to step **6**. |
| 6 | **CHECK FOR ANY OTHER DTC ON DISPLAY.** | Is any other DTC displayed? | Check DTC using "List of Diagnostic Trouble Code (DTC)". <Ref. to AB(diag)-34, List of Diagnostic Trouble Code (DTC).> | Finish the diagnosis. |

# CD:DTC B1802 SHORT IN DRIVER'S AIRBAG (TO GROUND)

**DTC DETECTING CONDITION:**

- Airbag main harness circuit is shorted to ground.
- Airbag module harness (driver's side) circuit is shorted to ground.
- Roll connector circuit is shorted to ground.
- Driver's airbag module is faulty.
- Airbag control module is faulty.

**CAUTION:**

**Before performing diagnosis, refer to "CAUTION" in "General Description". <Ref. to AB(diag)-4, CAUTION, General Description.>**

NOTE:

| 3 | **CHECK ROLL CONNECTOR.**<br>1) Turn the ignition switch to OFF, disconnect the battery ground cable, and wait for 60 seconds or more.<br>2) Remove the instrument panel lower cover and column cover, and disconnect the connector (AB7) from (AB2).<br>3) Disconnect the connector (AB66) from the driver's knee airbag module.<br>4) Disconnect the airbag resistor from the connector (2N) in test harness N and from the connector (2Q) in test harness Q.<br>5) Measure the resistance between connector (2N) in the test harness N and chassis ground.<br>***Connector & terminal***<br>***(2N) No. 1 — Chassis ground:***<br>***(2N) No. 2 — Chassis ground:*** | Is the resistance 1 MΩ or more? | Go to step **4**. | Replace the roll connector. <Ref. to AB-104, Roll Connector.> |
| 4 | **CHECK AIRBAG MAIN HARNESS (DRIVER'S AIRBAG HARNESS).**<br>1) Disconnect the test harness N from connector (AB38).<br>2) Disconnect the test harness Q from connector (AB37).<br>3) Remove the console front panel and disconnect the connector (AB9).<br>4) Disconnect the connectors (AB6, AB17, AB18) from the airbag control module, and connect the connector (1AG) in the test harness AG.<br>NOTE:<br>Except for XV models, connect test harness AH between the connectors (AB6, AB17, AB18) and (1AG).<br>5) Measure the resistance between connector (3AG) in the test harness AG and chassis ground.<br>***Connector & terminal***<br>***(3AG) No. 2 — Chassis ground:***<br>***(3AG) No. 4 — Chassis ground:*** | Is the resistance 1 MΩ or more? | Go to step **5**. | Replace the airbag main harness along with body harness. |
| 5 | **CHECK AIRBAG CONTROL MODULE.**<br>1) Connect all connectors.<br>2) Clear the memory.<br>3) Perform the Inspection Mode.<br>4) Read the DTC. (Current malfunction) | Is the same DTC displayed? | Replace the airbag control module. <Ref. to AB-77, Airbag Control Module.> | Go to step **6**. |
| 6 | **CHECK FOR ANY OTHER DTC ON DISPLAY.** | Is any other DTC displayed? | Check DTC using "List of Diagnostic Trouble Code (DTC)". <Ref. to AB(diag)-34, List of Diagnostic Trouble Code (DTC).> | Finish the diagnosis. |

## CM:DTC B1813 SHORT IN DRIVER'S AIRBAG DUAL STAGE - 2ND STEP CIRCUIT (TO +B)

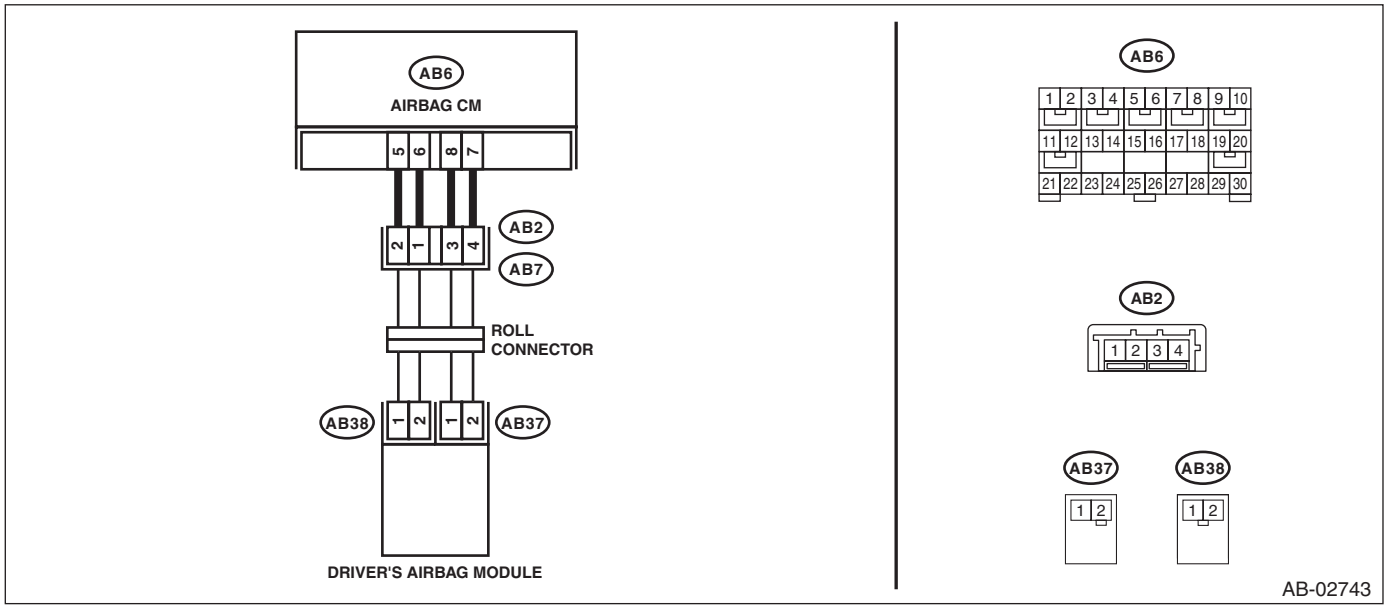
**DTC DETECTING CONDITION:**

- Airbag main harness circuit is shorted to power supply.
- Airbag module harness (driver's side) circuit is shorted to power supply.
- Roll connector is shorted to power supply.
- Driver's airbag module is faulty.
- Airbag control module is faulty.

**CAUTION:**
**Before performing diagnosis, refer to "CAUTION" in "General Description". <Ref. to AB(diag)-4, CAUTION, General Description.>**

NOTE:
Prior to starting work, prepare two AIRBAG RESISTORs (98299PA040).

**WIRING DIAGRAM:**
Airbag system <Ref. to WI-30, WIRING DIAGRAM, Airbag System.>



| | Step | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK POOR CONTACT OF CONNECTORS.**<br>Check for poor contact of the connectors between the airbag control module and the driver's airbag module. | Is there poor contact? | Replace the airbag harness. | Go to step **2**. |
| 2 | **CHECK DRIVER'S AIRBAG MODULE.**<br>1) Turn the ignition switch to OFF, disconnect the battery ground cable, and wait for 60 seconds or more.<br>2) Remove the driver's airbag module.<br>3) Connect the connector (1N) in the test harness N to the connector (AB38).<br>4) Connect the airbag resistor to the connector (2N) of test harness N.<br>5) Connect the connector (1Q) in the test harness Q to connector (AB37).<br>6) Connect the airbag resistor to the connector (2Q) in the test harness Q.<br>7) Connect the battery ground terminal and turn the ignition switch to ON. | Does the airbag warning light illuminate for six seconds and go off? | Replace the driver's airbag module. <Ref. to AB-42, Driver's Airbag Module.> | Go to step **3**. |

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 3 | **CHECK ROLL CONNECTOR.**<br>1) Turn the ignition switch to OFF, disconnect the battery ground cable, and wait for 60 seconds or more.<br>2) Remove the instrument panel lower cover and column cover, and disconnect the connector (AB7) from (AB2).<br>3) Disconnect the connector (AB66) from the driver's knee airbag module.<br>4) Disconnect the airbag resistor from the connector (2N) in test harness N and from the connector (2Q) in test harness Q.<br>5) Measure the voltage between connector (2N) in the test harness N and chassis ground.<br>***Connector & terminal***<br>***(2N) No. 1 (+) — Chassis ground (–):***<br>***(2N) No. 2 (+) — Chassis ground (–):*** | Is the voltage less than 1 V? | Go to step **4**. | Replace the roll connector. <Ref. to AB-104, Roll Connector.> |
| 4 | **CHECK AIRBAG MAIN HARNESS (DRIVER'S AIRBAG HARNESS).**<br>1) Disconnect the test harness N from connector (AB38).<br>2) Disconnect the test harness Q from connector (AB37).<br>3) Remove the console front panel and disconnect the connector (AB9).<br>4) Disconnect the connectors (AB6, AB17, AB18) from the airbag control module, and connect the connector (1AG) in the test harness AG.<br>NOTE:<br>Except for XV models, connect test harness AH between the connectors (AB6, AB17, AB18) and (1AG).<br>5) Measure the voltage between connector (3AG) in the test harness AG and chassis ground.<br>***Connector & terminal***<br>***(3AG) No. 2 (+) — Chassis ground (–):***<br>***(3AG) No. 4 (+) — Chassis ground (–):*** | Is the voltage less than 1 V? | Go to step **5**. | Replace the airbag main harness along with body harness. |
| 5 | **CHECK AIRBAG CONTROL MODULE.**<br>1) Connect all connectors.<br>2) Clear the memory.<br>3) Perform the Inspection Mode.<br>4) Read the DTC. (Current malfunction) | Is the same DTC displayed? | Replace the airbag control module. <Ref. to AB-77, Airbag Control Module.> | Go to step **6**. |
| 6 | **CHECK FOR ANY OTHER DTC ON DISPLAY.** | Is any other DTC displayed? | Check DTC using "List of Diagnostic Trouble Code (DTC)". <Ref. to AB(diag)-34, List of Diagnostic Trouble Code (DTC).> | Finish the diagnosis. |

# CN:DTC B1815 OPEN IN PASSENGER'S AIRBAG DUAL STAGE - 2ND STEP

**DTC DETECTING CONDITION:**

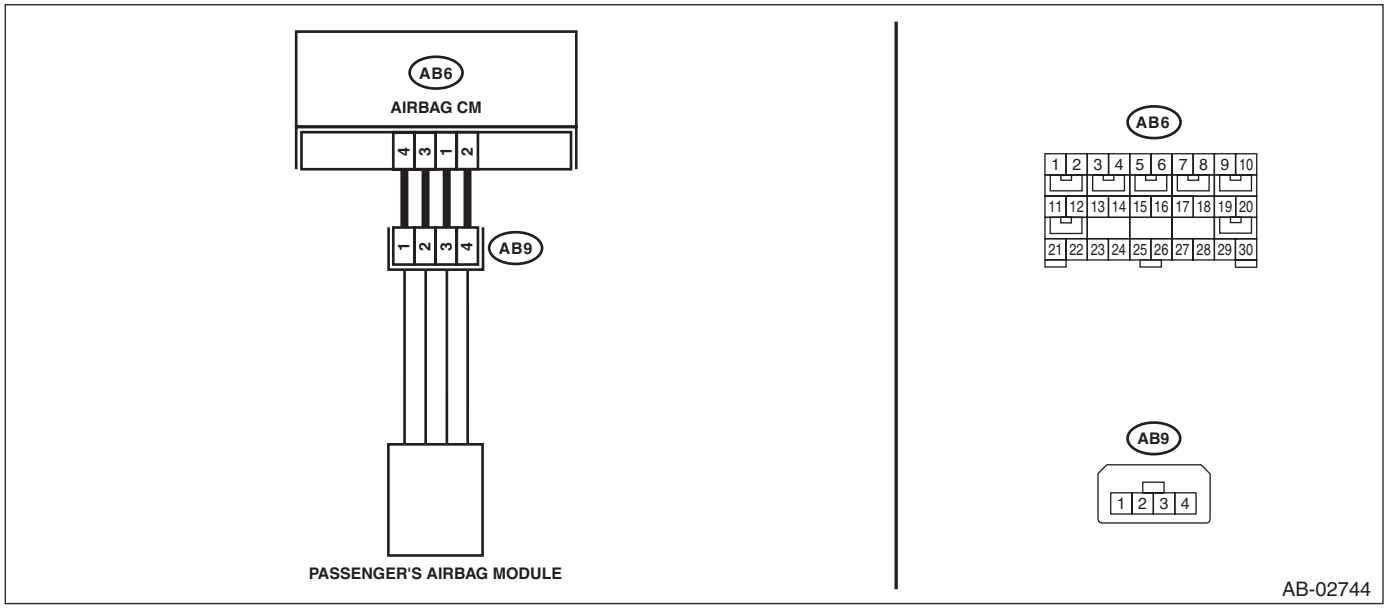
- Airbag main harness circuit is shorted.
- Airbag module harness circuit (passenger's side) is shorted.
- Passenger's airbag module is faulty.
- Airbag control module is faulty.

**CAUTION:**

**Before performing diagnosis, refer to "CAUTION" in "General Description". <Ref. to AB(diag)-4, CAUTION, General Description.>**

**WIRING DIAGRAM:**

Airbag system <Ref. to WI-30, WIRING DIAGRAM, Airbag System.>



| Step | | Check | Yes | No |
|---|---|---|---|---|
| 1 | **CHECK POOR CONTACT OF CONNECTORS.**<br>Check for poor contact of the connectors between the airbag control module and the passenger's airbag module. | Is there poor contact? | Replace the airbag harness. | Go to step **2**. |

| | Step | Check | Yes | No |
|---|---|---|---|---|
| 2 | **CHECK AIRBAG MAIN HARNESS (PASSENGER'S AIRBAG HARNESS).**<br>1) Turn the ignition switch to OFF, disconnect the battery ground cable, and wait for 60 seconds or more.<br>2) Disconnect the connectors (AB7) and (AB2).<br>3) Disconnect the connector (AB66) from the driver's knee airbag module.<br>4) Disconnect the connectors (AB6, AB17, AB18) from the airbag control module, connect the connector (1AG) in the test harness AG, and release the short mechanism of the connectors (AB6, AB17, AB18).<br>NOTE:<br>Except for XV models, connect the connectors (AB6, AB17, AB18) and the connector (1AH) in the test harness AH.<br>5) Disconnect the passenger's airbag module connector (AB9).<br>6) Using a probe, measure the resistance between the terminals of connector (AB9).<br><Ref. to AB(diag)-16, HOW TO USE PROBE, PREPARATION TOOL, General Description.><br>**CAUTION:**<br>**When measuring the resistance, make sure that the probe is inserted from the back side (harness side) of the connector. Also, do not insert the probe forcibly.**<br>***Connector & terminal (AB9) No. 3 — (AB9) No. 4:*** | Is the resistance 1 MΩ or more? | Go to step **3**. | Replace the airbag main harness along with body harness. |
| 3 | **CHECK AIRBAG CONTROL MODULE.**<br>1) Disconnect the test harness AG and test harness AH from the connectors (AB6, AB17, AB18).<br>2) Connect the connectors (AB6, AB17, AB18) and the airbag control module.<br>3) Connect the connectors (AB7) and (AB2).<br>4) Connect the connector (AB66) to the driver's knee airbag module.<br>5) Connect the battery ground terminal and turn the ignition switch to ON.<br>6) Perform the Inspection Mode.<br>7) Read the DTC. (Current malfunction) | Is DTC B1815 displayed? | Replace the airbag control module. <Ref. to AB-77, REMOVAL, Airbag Control Module.> | Go to step **4**. |
| 4 | **CHECK PASSENGER'S AIRBAG MODULE.**<br>1) Turn the ignition switch to OFF, disconnect the battery ground cable, and wait for 60 seconds or more.<br>2) Connect the passenger's airbag module connector (AB9).<br>3) Connect the battery ground terminal and turn the ignition switch to ON.<br>4) Perform the Inspection Mode.<br>5) Read the DTC. (Current malfunction) | Is DTC B1815 displayed? | Replace the passenger's airbag module. <Ref. to AB-47, REMOVAL, Passenger's Airbag Module.> | Go to step **5**. |
| 5 | **CHECK FOR ANY OTHER DTC ON DISPLAY.** | Is any other DTC displayed? | Check DTC using "List of Diagnostic Trouble Code (DTC)". <Ref. to AB(diag)-34, List of Diagnostic Trouble Code (DTC).> | Finish the diagnosis. |

# CO:DTC B1816 OPEN IN PASSENGER'S AIRBAG DUAL STAGE - 2ND STEP

**DTC DETECTING CONDITION:**

- Airbag main harness circuit is open.
- Airbag module harness (passenger's side) circuit is open.
- Passenger's airbag module is faulty.
- Airbag control module is faulty.

**CAUTION:**

**Before performing diagnosis, refer to "CAUTION" in "General Description". <Ref. to AB(diag)-4, CAUTION, General Description.>**

**WIRING DIAGRAM:**

Airbag system <Ref. to WI-30, WIRING DIAGRAM, Airbag System.>
