

## 18.SI-DRIVE (SUBARU Intelligent Drive) Selector

### A: REMOVAL

- 1) Disconnect the ground cable from battery.
- 2) Remove the console box. <Ref. to EI-67, REMOVAL, Console Box.>
- 3) Remove the multi-selector switch connector from the console box.
- 4) Remove the screws and tabs holding the multi-selector switch to the console box and the multi-selector switch.

### B: INSTALLATION

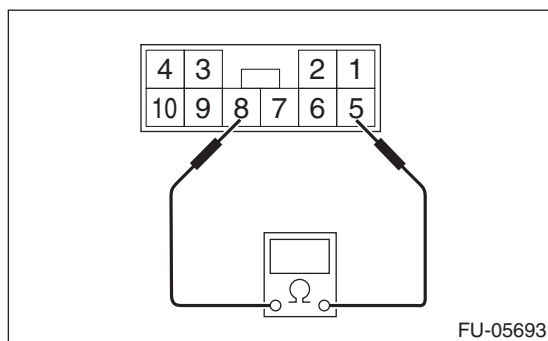

Install in the reverse order of removal.

#### *Tightening torque:*

**1.5 N·m (0.2 kgf·m, 1.1 ft·lb)**

### C: INSPECTION

- 1) Check that the multi select switch does not have deformation, cracks, or damage.
- 2) Check the resistance between the terminals at the SI-DRIVE selector.

Switch position	Terminal No.	Standard
Sport (When turning the SI-DRIVE selector to the left)	5 and 8	Less than 1 $\Omega$
Intelligent (When pressing the SI-DRIVE selector)		$1 \pm 0.05 \text{ k}\Omega$
Sport Sharp (When turning the SI-DRIVE selector to the right)		$3.67 \pm 0.1835 \text{ k}\Omega$
