

2. Datum Dimensions

A: MEASUREMENT

NOTE:

- Using a tram tracking gauge, measure all the dimensions.
- When using a tape measure, carefully measure dimensions without letting the tape measure sag or twist.
- Measure the linear dimensions between cores of holes.
- Suffixes “RH” and “LH” indicate right-hand and left-hand.

(1) Tram tracking gauge

- Measure at the center of the circle around the outside of the body panel.

- (1) Datum points
- (2) Body panel
- (3) Outside

1. CENTER STRUCTURE

NOTE:

- Longitudinal dimensions are projected dimensions.
- The height dimensions are the vertical distances from the gauge point on the assumed horizontal line through the side sill flange joint (bending angle point).
- Diagonal dimensions are the actual dimensions between reference points. The values in brackets are projected dimensions for reference.
