INTERIOR

Luxurious space created by the wide interior and high-quality workmanship

INTERIOR DESIGN

- An integrated and continuous look has been achieved from the instrument panel to the door trim.
- Simulated wood-grain color panels are used in various areas (air conditioner control panel, center console, etc.) of the instrument panel of the XLE grade to achieve a high-quality appearance.
- Functional features have been provided in every corner of the interior to enhance comfort and utility.
- An eyeglass case is provided in the overhead console of all models as standard equipment to enhance storage capability.
- A vanity mirror is provided on the back of the sun visor of all models as standard equipment. Indirect illumination is standard on the XLE grade and optional on the LE and SE grades to enhance utility.
