ENGINE IMMOBILISER SYSTEM

- The engine immobiliser system is provided on all models as option equipment.
- The engine immobiliser system prevents vehicle theft by comparing the ID code that is stored in the ECU against the ID code that is stored in the ignition key and permits ignition and the injection of fuel if the codes match.

DOOR LOCK CONTROL SYSTEM

- The door lock control system that lock or unlock all the doors simultaneously is standard equipment.
- The double locking system that prevents the doors from being unlocked either from inside or outside of the vehicle is option equipment for RHD of European model.
- If there is a collision which would trigger deployment of the airbags, the looked doors are released to aid rescue of the occupants.
