Console Box

- A storage pocket for items such as cellular phones and wallets has been provided beside the front console (1).
- A cigarette lighter and an ashtray have been built into the front box. On models for Australia and G.C.C. Countries, a storage box for string small articles, with an internal 12 V power supply, has been provided in the upper part of the front box.
- Two drink cup holders with a lid, which can hold large-sized drink cups, have been provided in the center console beside the shift lever on Pedal Type paring brake models (3). In addition, a storage box with a lid has been provided behind the shift lever on high grade models (4). A storage box without a lid has been provided on normal grade models. Drink cup holders with a lid have been provided behind the shift lever on Lever Type parking brake models.
- The rear console box has a large capacity and a storage tray has been provided for keeping small articles (5). The console box lid can be used as an armrest (6), and the one used on models except Australian 2AZ-FE engine and G.C.C. countries models can slides 100 mm (3.94 in.).
