NEW FEATURES

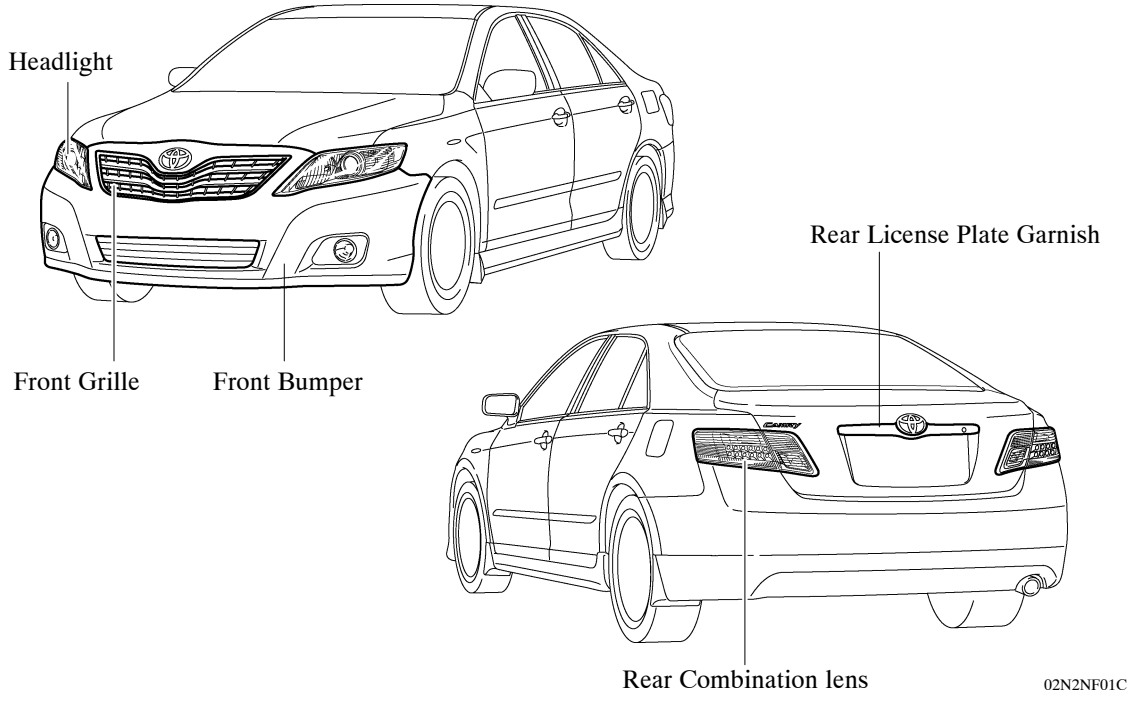

EXTERIOR

■ DESCRIPTION

1. Camry

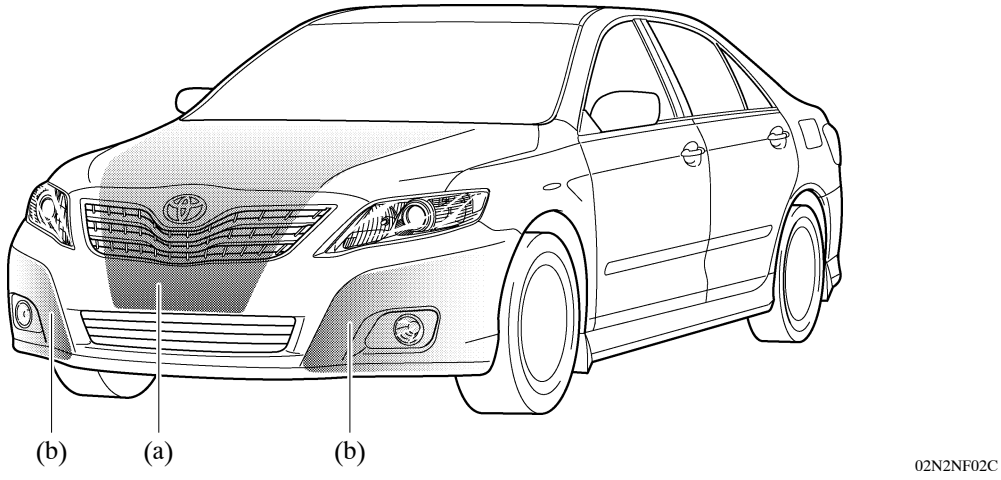

General

The front bumper, radiator grille, headlights, rear license plate garnish and rear combination lens have been redesigned to express sportiness and activity.

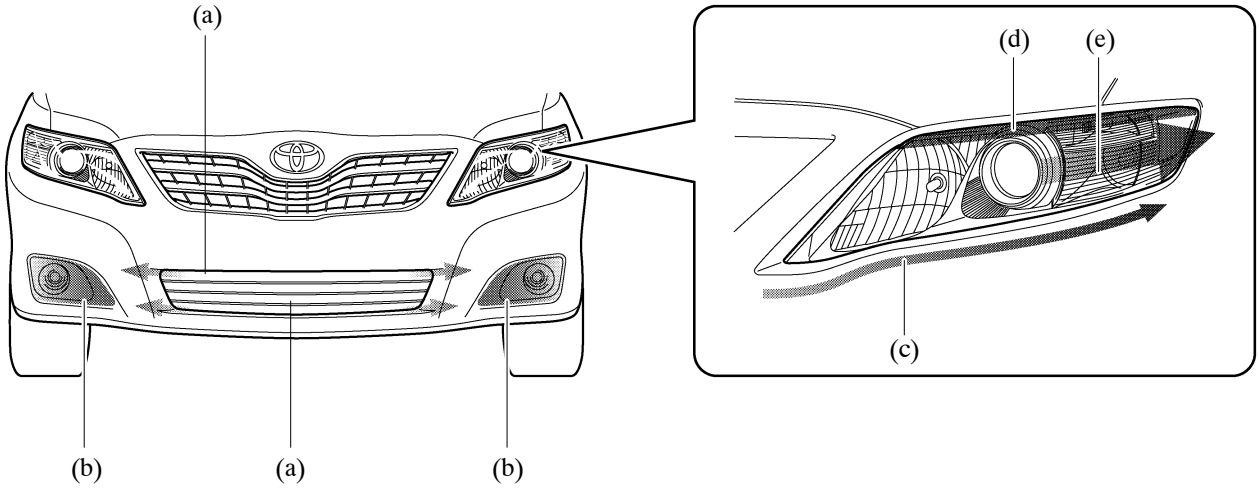

Front View

- A continuous design (a) from the hood to the bumper is integrated between each side of the vehicle to express a 3-dimensional (b) movement, aiming to achieve a sporty style.

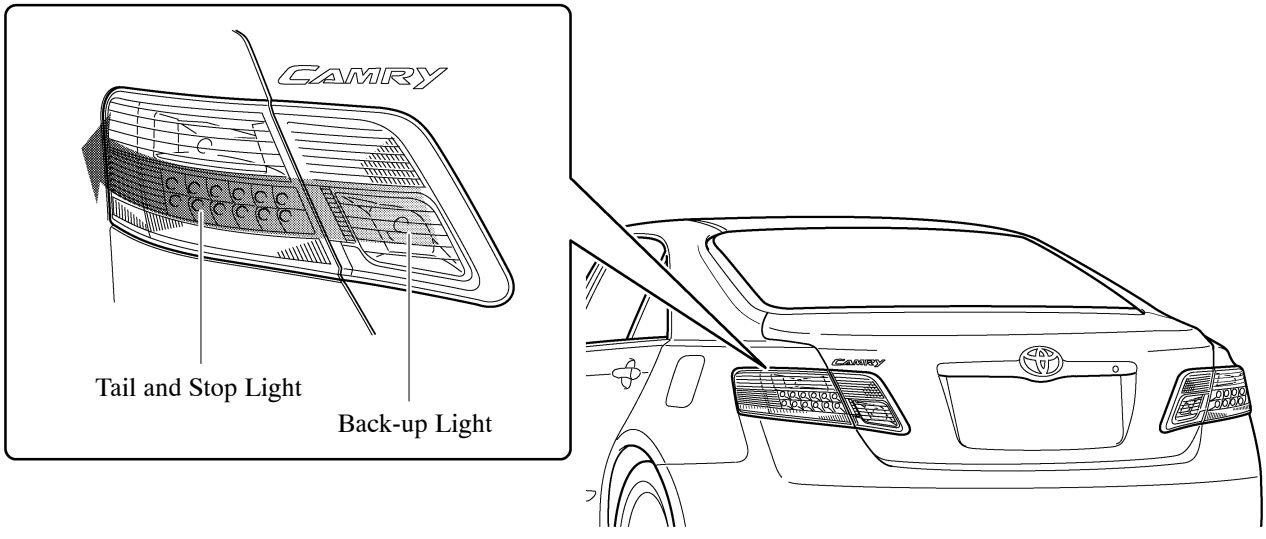

- A lower grille opening expanding (a) to both sides and a strong fog light profile (b) that adds depth are adopted. Further emphasis is placed on the inverted trapezoid design, aiming to achieve an integrated feel.
- For the headlights, an expressive design that uses curves (c) at the lower edge has been achieved as well as emphasizing the sharp horizontal headlight profile using a horizontal upper line (d) and the rearward flowing design of the clearance light and turn signal light portion (e).

02N2NF03C

Rear View

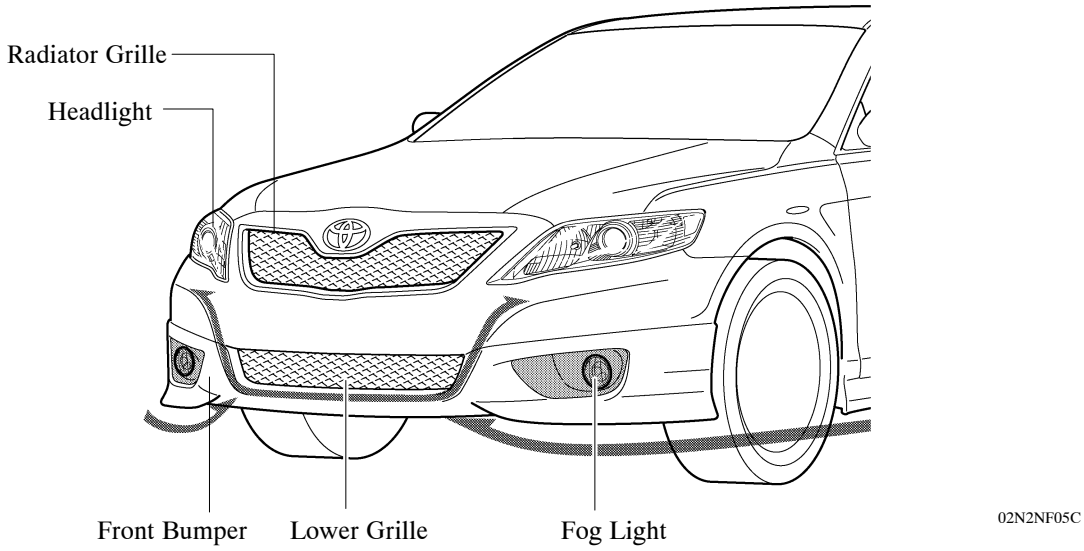

The rear combination lamps and rear lights emphasize the horizontal profile through the combination of the diamond-shaped back-up light and the tail and stop lights.

2. Camry Sportivo/SE Grade

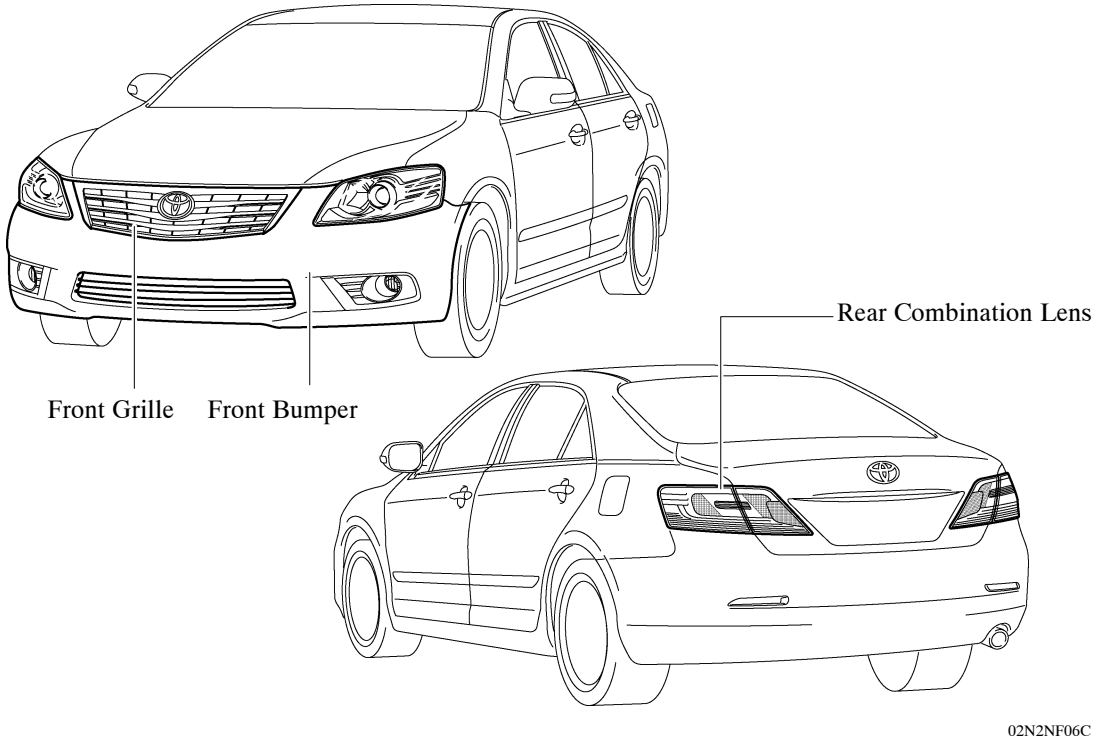

The radiator grille, headlights, lower grille, front bumper and fog lights have been changed to express a fresh and impressive sporty feel that complements the overall design theme and quality of the standard bumper.

3. Aurion

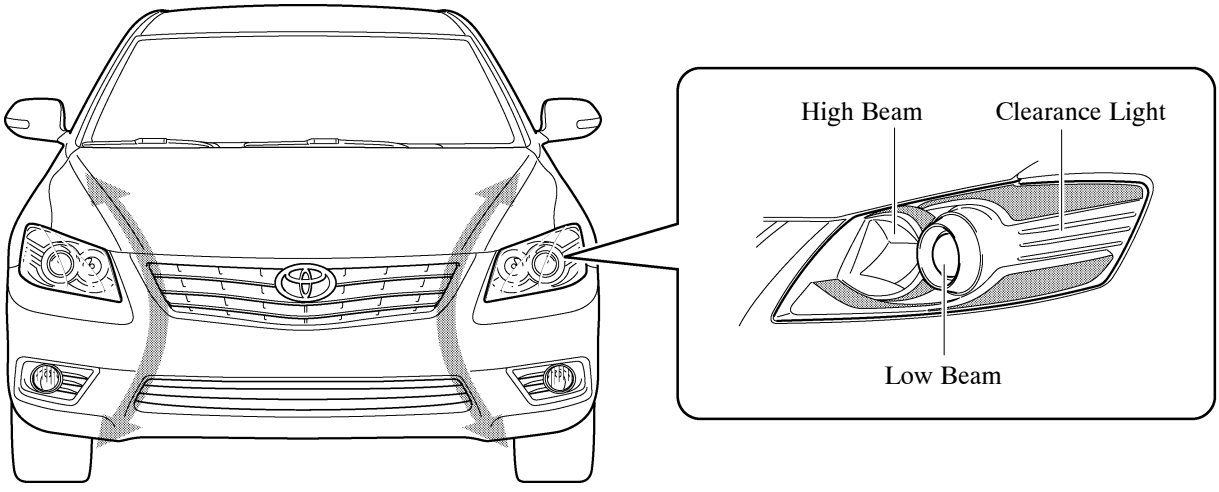

General

The front bumper, radiator grille, headlights, and rear combination lens have been redesigned to express sportiness and premium.

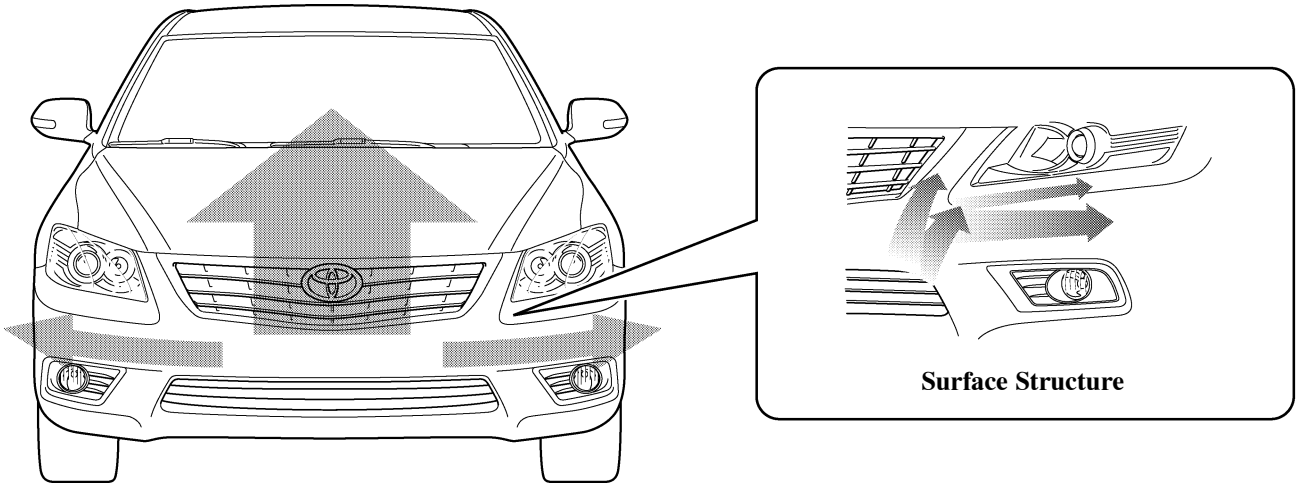

Front View

- An X-shaped front design has been achieved with the tires expressing a sturdy look. In addition, both the radiator grille and the lower grille have been expanded, aiming to evoke a feeling of luxury and a bulging impression.
- The Toyota emblem has been enlarged and matched with a 3-dimensional outer frame and flowing horizontal bars.
- The headlight extension is designed to sandwich the high beam, low beam, and clearance lights to create a thick, 3-dimensional look as if carved out of a solid block.

02N2NF07C

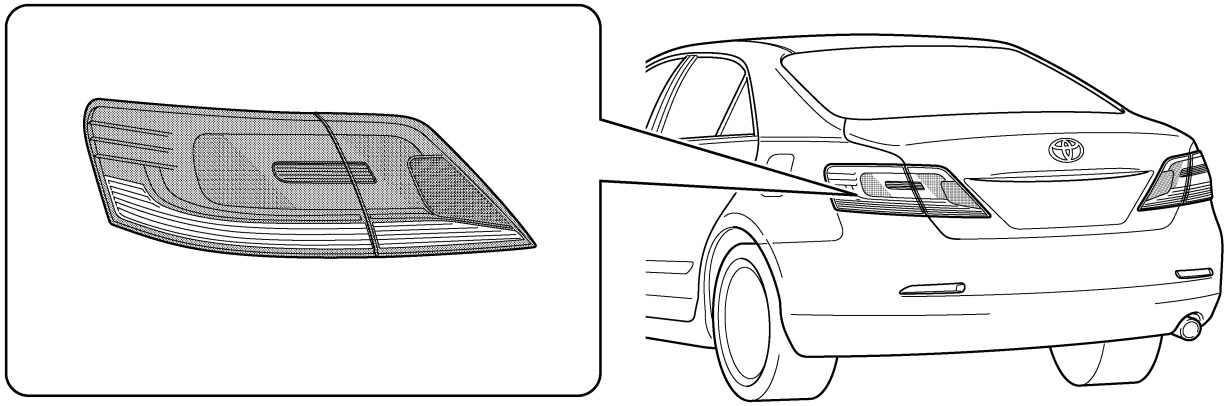

- The front bumper continuously flows to the hood top and the sides to unite the overall front design in the center.
- The front bumper is designed with a surface structure that separates one surface into two at various points to create a refined feel suitable for a luxury vehicle.

02N2NF08C

Rear View

- The side surface stretches outward to expand light distribution and emphasize the width of the vehicle.
- A thicker outer lens is adopted, achieving a 3-dimensional design. The parallelogram shape of the illuminated area creates a spirit of innovation.
