EXTERIOR

Front View

- Dynamic modernism has been produced by providing a solid-looking hood shape from the front grille to the center of the hood and framing the hood with the left and right fenders.
- The front design, with minimum surface boundaries between the hood, grille, top mark and bumper, stretches out from the impressively projecting top mark.
- The headlights have a long, narrow design, which incorporates two accent lines, producing a crystal-like texture and boldness.

Rear View

- Power and modernity have been produced by providing a solid-looking body shape from the luggage door to the center of the bumper and framing the luggage door with the left and right fenders.
- The edge of the rear combination light has been extended further into the side of the body, and the inner lens portion is ingot-effect white, expressing modernity and width.
