NAVIGATION WITH AV SYSTEM

■ DESCRIPTION

- The design of the screen has been improved in the navigation with AV system in order to improve its visibility. Furthermore, new functions have been added for improved convenience.
- A hands-free function for a Bluetooth® -compatible cellular telephones is used. For details, see Bluetooth® Hands-Free System section (See page 21).
- A Bluetooth® audio function is provided for Bluetooth® -compatible cellular telephones (with built-in audio player) and portable players.

NOTE: The cellular phone or portable player must correspond to the following specifications in order to be connected to the Bluetooth® audio system. However, note that some functions may be limited depending on the type of portable player.

- The following profiles must be supported:
  - Advanced Audio Distribution Profile (A2DP) Version 1.0
  - Audio/Video Remote Control Profile (AVRCP) Version 1.0 or higher (Version 1.3 or higher recommended)

- The major specifications of the navigation with AV system are shown in the table below:
