4. 2AZ-FE Engine for Camry

An alternator pulley with a one-way clutch has been adopted to reduce belt friction.

5. 2GR-FE Engine for Aurion

To comply with Australian EURO IV, the ECM software has been changed.

6. U250E Automatic Transaxle (Camry for Australia)

Flex lock-up control has been adopted. For details, see page 16.

7. U660E Automatic Transaxle (Aurion for Australia)

- Direct downshift control has been adopted. For details, see page 18.
- Multi-mode automatic transmission has been changed. For details, see page 18.

8. Brake

Due to the discontinuation of the VSC indicator, the skid control ECU software has been changed for models with VSC.

9. Audio System

The main changes for the audio system are as follows. For details about the line-up, see page 20.

×: Applies

Item	Changed	Camry	Aurion
Audio System	• An AUX adapter has been added. • Bluetooth audio-compatible audio head units have been adopted. • A Bluetooth hands-free-compatible navigation receiver has been adopted.	×	×
	A rear view monitor system-compatible audio unit has been adopted.	×*1	×*1
	The speaker system has been changed from 6-speakers to 8-speakers.	-	×*2
Navigation with AV System	• An AUX adapter has been added. • The speaker system has been changed from 6-speakers to 8-speakers.	×*1	×*1

*1: Models for Australia *2: Models for G.C.C. Countries

10. Combination Meter Assembly

The main changes for the combination meter assembly are as follows. For details about the line-up, see page 22.

×: Applies -: Does Not Apply

Item	Changed	Camry	Aurion
Design	• The meter design color for Altise/GL grade has been changed from green to white. • The meter illumination color for other grades has been changed from green to white. • The color of each meter boss and gauge boss for sportive/SE grade has been changed from silver to black.	×	-
	AT-X Grade: The meter illumination color has been changed from green to white.	-	×
	Other AT-X/Touring Grade: • The gradations of the speedometer and tachometer have been changed from the inside to the outside. • The water temperature gauge and fuel gauge design have been changed.		
Buzzer	A change has been made to the operation of the warning buzzer that sounds when the vehicle is being driven with the parking brake applied. The buzzer, which previously only sounded once as a warning, has been changed to a buzzer that sounds intermittently until the parking brake is released.	×	×
	A warning function has been adopted for the smart entry and start system. For details, see page 24.	×	×
Indicator Light and Warning Light	• The VSC indicator light has been discontinued. The slip indicator light is used to show the operational status of the VSC system. • The cruise main indicator light design has been changed.	×	×
	• A smart key indicator light has been added for models with smart entry and start system. • A shift position indicator light and outside temperature gauge have been added to the Altise grade with automatic transaxle. • The seat belt warning light has been changed from that for the driver only to that for the driver and front passenger.	×*1	-
	The location of the ABS warning light and front fog indicator light has been changed.	-	×
	Others AT-X/Touring Grade: The color of the master warning light has been changed from red to orange.		
	Grande Grade: Because of the adoption of intelligent AFS, the headlight leveling indicator light has been changed to an AFS OFF indicator light.	-	×*2

*1: Models for Australia *2: Models for G.C.C. Countries

11. Lighting for Aurion

- An Intelligent Adaptive front-lighting System (AFS) has been adopted on the Grande grade for G. C. C. countries. Thus, the headlight leveling indicator light has been changed to the AFS OFF indicator light.
- The conditions for automatic headlight beam level control system initialization have been changed. The previous limit of 10 liters of gasoline remaining has been removed. For details, refer to Repair Manual.

12. Wireless Door Lock Control System

The wireless door lock buzzer has been changed to sound at 1.5 seconds for door ajar warning.

13. Smart Entry and Start System

The following messages have been added in the condition of “An engine start method is displayed”. For details, see page 24.

14. Rear View Monitor System

- A rear view monitor system has been adopted for Camry. However, except for the Grande grade for Australia, the rear view monitor system uses the radio receiver assembly to display a view of the area behind the vehicle.
- Rear view monitor system has been added on Aurion for G.C.C. Countries.
- The rear view monitor system has the following availability:

×: Equipped -:Not Equipped

Destination	Monitor Display	Camry	Aurion
Australia	Radio Receiver Assembly	×*1	×*1
	Navigation Receiver Assembly	×*2	×*2
G.C.C. Countries	Radio Receiver Assembly	-	-
	Navigation Receiver Assembly	×	×

*1: Except Grande Grade *2: Grande Grade

15. Seat Belt Warning System for Aurion

The front passenger seat belt warning system has been added on models for Australia.
