■BULETOOTH AUDIO SYSTEM

The Bluetooth audio system enables users to enjoy music played on a portable player from the vehicle speakers via wireless communication.

- Portable players must correspond to the following specifications in order to be connected to the Bluetooth audio system. However, note that some functions may be limited depending on the type of portable player.
  - Advanced Audio Distribution Profile (A2DP) Version 1.0
  - Audio/Video Remote Control Profile (AVRCP) Version 1.0 or higher (Version 1.3 or higher recommended)
