

2. Interior

- The interior color (instrument panel, door trims, quarter trims, console box, and combination meter panel) has been changed to dark gray and the illumination color (audio, clock, heater control panel, and power window switch) has been changed to amber in order to create a chic and sporty look.
- The lettering and the graduation pitch on the dial of the speedometer and tachometer have been revised to enhance their readability.
- The LED (Light Emitting Diode) graduation pitch and layout of the fuel gauge and water temperature gauge have been revised to enhance their visibility.
