

■ HEADLIGHT CLEANER SYSTEM

1. General

- This system is used on all models with the optimal equipment HID headlight system.
- This system sprays washer fluid on the headlight lenses to wash the dirt off them.
- This system has the following function.

Function	Outline
Basic Function	This function is enabled when the conditions given below are met. • Headlight LO beam light up (Light control switch HEAD position) • Ignition switch ON position • Headlight cleaner switch push
Washer-Link Function	This function works in unison with the washer when the front windshield washer switch is turned ON, in order to operate the headlight cleaner only once, provided that the following conditions are present: • Headlight LO beam light up (Light control switch HEAD position) • Ignition switch ON position
