STEERING

■ DESCRIPTION

The same recirculating ball type steering gear box and conventional power steering as those of the previous model, are used. Power steering is now standard equipment for all new models.

- The steering gear box has been made compact and lightweight, and is provided with 2-stage power assist characteristics.
- A steering damper has been added to the steering linkage.
- The tilt type steering column is standard equipment for the DX and EX grade models for Australia.

Tilt Type Steering Column for Australia
