ENGINE

3B AND 14B ENGINES

■ DESCRIPTION

The 3B and 14B engines are in-line 4, OHV 8-valve diesel engines with a capacity of 3.4 liters (3B) or 3.7 liters (14B). While the 3B engine is renowned for its quietness and serviceability, the 14B has a reputation for high performance and durability.
Although the basic construction and operation of these engines remain the same as in the previous model, their vibration and sound resistance and serviceability have been improved.
