■ INTAKE AND EXHAUST SYSTEM

1. Air Cleaner

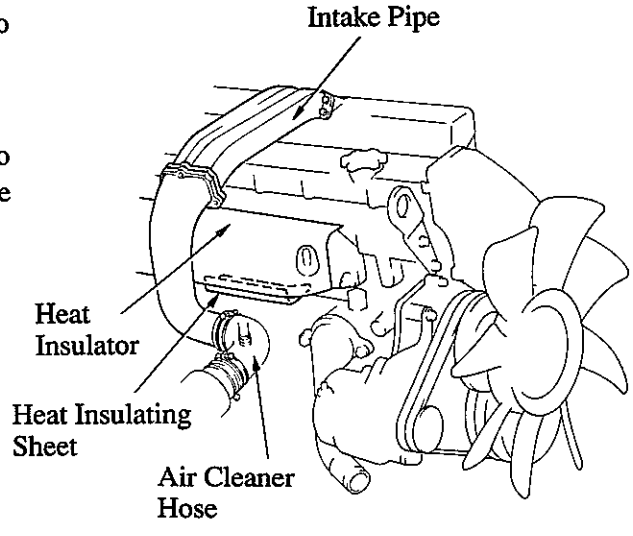

Similar to the 3B and 14B engines, three resonators have been provided in the pipe on the engine side and one in the pipe on the cool air intake duct to reduce intake noise and the noise level in the passenger compartment.

2. Intake Pipe and Exhaust Manifold Heat Insulator

The following modifications have been made to install the engine on the new Coaster:

- The intake pipe is devided into two sections.
- A heat insulating sheet has been added to protect the air cleaner hose from excessive heat.

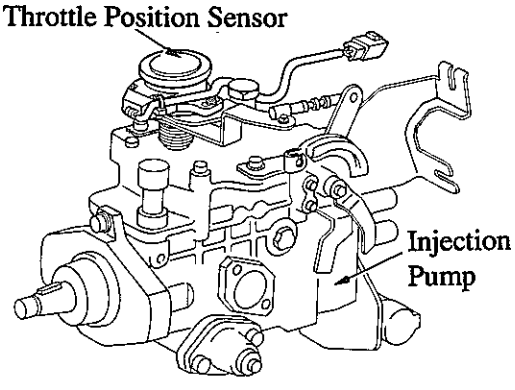

EG

■ FUEL SYSTEM

1. Injection Pump

A throttle position sensor for the ECT (Electronically Controlled Transmission) has been added to the injection pump of the A441E automatic transmission models.
For details of this throttle position sensor, refer to page 71 of the Automatic Transmission section.

2. Fuel Tank

The modifications made to the fuel tank are the same as those for the 3B and 14B engine models. Refer to page 41 of the 3B and 14B engines section for details.

■ ENGINE MOUNTING

The modifications to the engine mounts are the same as those for the 3B and 14B engine models. Refer to page 42 of the 3B and 14B engines section for details.
