# EXTERIOR

## STYLING

The round and bold "Minibus of the Future" design gives the new Coaster a luxurious look.

The styling has the following features:

- A sleek front view featuring a wide and uninhibited front windshield, and an integrated large front bumper-spoiler unit flush against the body.
- Smooth and aerodynamic silhouette brought about by the largely slanted front windshield and the round body configuration.
- Rear view with a shorter rear window whose proportion emulates a larger bus, and a confident trapezoidal body silhouette.
