COMBINATION METER

- The electrical analog speedometer is standard for all models.
- An analog tachometer is standard for all models to Australia, as well as 1HZ-engine models to G.C.C. countries.
- An engine oil level warning light is equipped on all models.

Engine Oil Level Warning Light

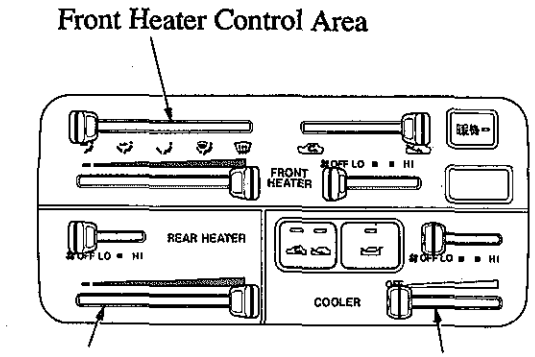

With Tachometer

AIR CONDITIONING

- The table below shows heater and cooler availability.

○ : Standard ● : Option

Destination	Heater		Cooler
	Front	Rear	
Australia	○	○	○ (except STD grade)
G.C.C. Countries	●	●	
Hong Kong	○	N.A.	
General Countries	●	●	

Air Conditioning Control Panel

- All air conditioning control switches have been consolidated into the heater control panel. Furthermore, the control area has been divided into separate zones for enhanced accessibility and control.
- The cooler uses the new R134a refrigerant. The cooler unit, previously located in the rear ceiling area, has been moved forward to enhance passenger comfort.
