TILT STEERING

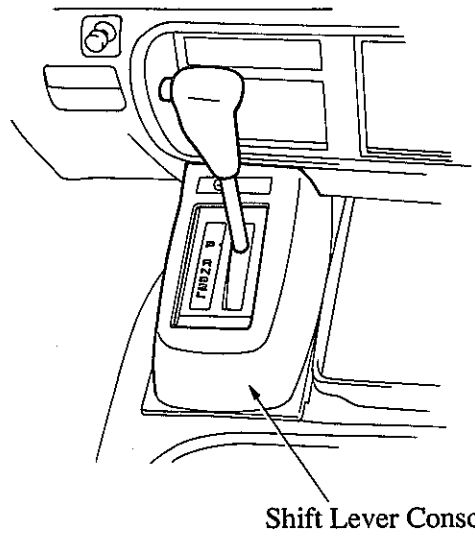

- The DX and EX grade models for Australia come equipped with tilt steering as standard.
- The tilt steering features the following characteristics:

Function	Feature
Tilt-Up Function	Tilts up the steering wheel to its uppermost position to give more leg space when the driver is getting in and out of the vehicle.
Stepless Adjustment	Allows selection of the steering wheel position to any angle within its operation range of 4°22'.
Memory Function	A tilted-up steering wheel can be returned to its original position by a simple one-touch operation.

AUTOMATIC TRANSMISSION SHIFT LEVER CONSOLE

Automatic transmission models have adopted a luxurious shift lever console which complements the instrument panel.
