■BODY

Low Vibration and Low Noise Body

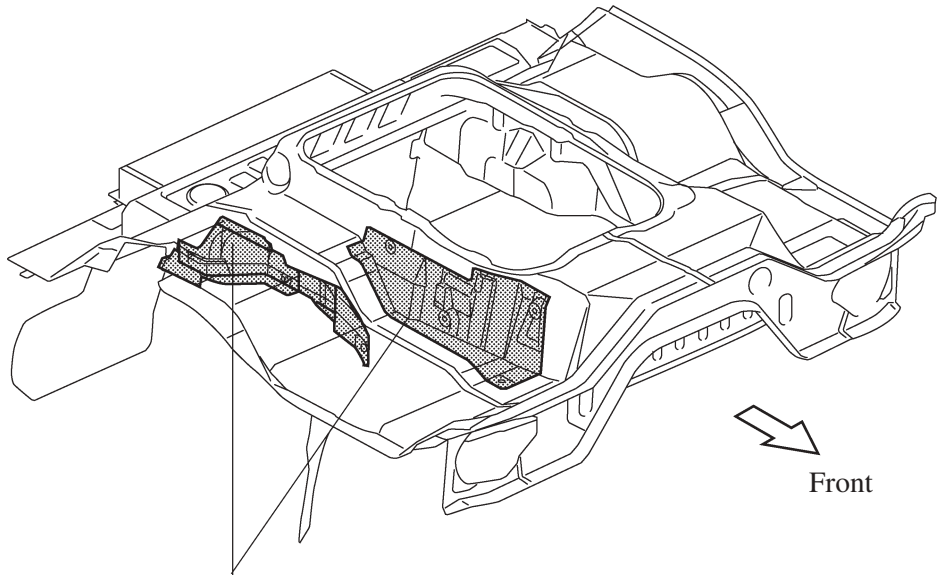

- Sound insulation panels have been added for the rear floor board of the N04C-TQ engine models except for the Europe models.

- Along with the provision of the N04C-TQ engine, asphalt sheets are applied the front floor area to reduce noise and vibration only for the Hong Kong and Singapore model.

- The thickness of the engine room silencer has been changed from 5 mm (0.2 in.) to 20mm (0.8 in.) on the N04C-TQ engine models.
