13. Steering

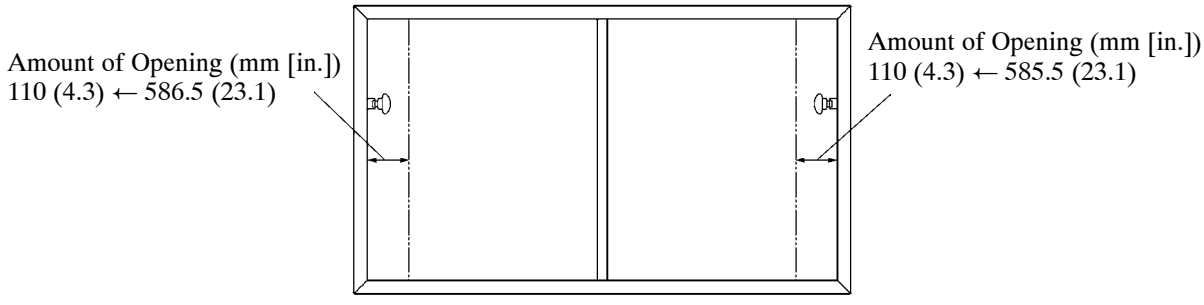

- On the newly introduced 2TR-FE engine models and the N04C-TQ engine automatic transmission models, the recirculating ball type steering gear and the hydraulic power steering are provided. The basic construction is the same as that of the previous models.
- On the 2TR-FE engine models, a reservoir tank is located as shown in the illustration below.

14. Safety Features

On the Hong Kong standard wheel base models and long wheel base models, the amount of the opening of the No. 3 side window has been changed as a safety measure for the increased seat height.
