NEW FEATURES

■ EXTERIOR

1. Front Design

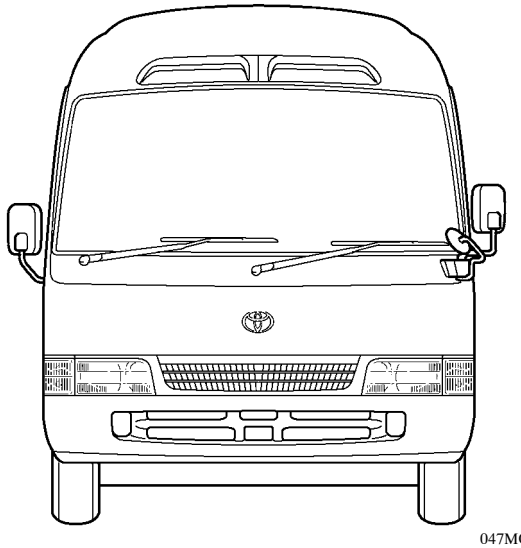

The front design of the Australia, G.C.C. countries, Taiwan, and Hong Kong models has been changed. The changed items are as follows:

- The headlight, front bumper, and radiator grille have been changed to have the design featuring wideness and low center-of-gravity under the theme of V-shape.
- A 4-beam halogen headlight which integrates a high beam, a low beam, a clearance light, and a front turn signal light is provided as standard equipment.
- A radiator grille of a material color is provided for all models. A radiator grille of an exterior color is provided for the models with the beige metallic exterior.
- The design of the front fog light and front fog light bezel has been changed. Fog light covers are provided for the models without the front fog lights. Fog light bezels of an exterior color are provided for the models with the beige metallic exterior.
- Along with the changes in the front design, the position of the side turn signal light has been changed to the side panel for the Australia, G.C.C. countries, and Hong Kong models.
